Dip Section 2: Structural Datum (Sea Level)

Note on faults:
Surface faults intersecting a line of section are indicated in their approximate location along the bottom of the section. Surface fault locations are taken from the 1980 "Geologic Map of Kentucky" (Engel 1980). Major faults in this section include the White Mountain Fault Zone and the Pine Mountain Fault.

Dip Section 2: Stratigraphic Datum (Top of Big Lime)

This stratigraphic section uses the top of the Mississippian Big Lime as a datum. Strata below the top of the Big Lime are not shown on the section grid and are best seen and located on the Big Lime. The Forney Formation provides a datum in the southwest in the section. Correlations of four across wells in Big Lime are shown by the dashed lines, but these zones cannot be correlated with confidence toward the northwestern end of the section.
