---

1 Prior to filling out this form you MUST contact the Associate Provost for Academic Administration (APAA). If you do not know the CIP code, the APAA can provide you with that during the contact.

2 Program changes are typically made effective the semester following approval. No changes will be made effective until all approvals are received.

3 If there is only one plan for the degree, plans involving a thesis (or the equivalent in studio work, etc.) should be discussed under Plan A and those not involving a thesis should be discussed under Plan B.

---

In the current curriculum, students are not gaining much-needed skills in health promotion program planning and evaluation and evidence-based public health practice. The addition of the evidence-based course (CPH 646 Special Topics, to be approved as CPH 672) will provide students with this additional education. In addition, the content of the current course -- CPH 642 Ecological Perspectives on Health Behavior -- will be integrated into core course 604 as well as into CPH 648 Eliminating Racial and Ethnic Disparities and the Evidence-based Public Health Planning and Practice course. The addition of CPH 778 Special Topics: Ethics for Public Health (to be approved as CPH 763) ensures that our students are receiving an introduction to ethics in public health that is essential for proper conduct of public health research and practice. The total number of hours required for the MPH is not altered by this program change.
