What is the Clinical Leadership and Management Program?

Clinical Leadership and Management (CLM) prepares students, entering either as freshman or with an associate degree, to work as health care professionals with leadership and management responsibilities. Program graduates will be prepared to assume administrative leadership in a variety of health service organizations. Examples include health systems, hospitals, physician practices, clinics, community health centers, government and other public sector providers, the health insurance industry, long-term care facilities, and mental health facilities. Students earn a Bachelor of Health Sciences in Clinical Leadership and Management and would be eligible for graduate study in health care administration.

The CLM degree program also accommodates transfer students from many allied health disciplines including, but not limited to: radiological technology, respiratory therapy, dental hygiene, clinical laboratory technicians, and nursing. The program provides accessible course offerings for non-traditional students, who may require part-time class schedules.

See back for more information on the Clinical Leadership and Management Program.
**Admission Process**

**Students entering as freshmen:** These students must have a minimum GPA of 2.0 or greater and need to apply to the University of Kentucky and declare their major as CLM.

**Students entering as transfers with a health-related associate degree:** These students must present a college GPA of 2.0 or greater and apply to both University of Kentucky and the Clinical Leadership and Management Program. The CLM application is available from the CLM website at bit.ly/UK_CLM and can be submitted electronically or in person. The CLM program does not have specific admission deadlines but encourages students to apply for either fall or spring semesters.

To access the university admission application and admission deadlines, visit: www.uky.edu/Admission.

**Curriculum**

As part of the University of Kentucky 120 credit degree requirement, students complete a comprehensive set of CLM major coursework. Students may enter as either Track A (with associate degree) or Track B (entering as freshman).

Below is a *sampling* of the major coursework for both tracks. For a complete course listing, please see the website.

- CLM 350 Health Policy and Politics
- CLM 405 Epidemiology and Biostatistics
- CLM 351 Health Services Administration
- CLM 354 Health Law
- CLM 355 Financial Management of Healthcare Institutions
- CLM 452 Community & Institutional Planning for Health Services
- CLM 444 Leadership & Human Resource Management
- CLM 445 Quality & Productivity Improvement & Evaluation
- CLM 353 Ethics in Healthcare
