The College of Pharmacy’s primary mission is to develop pharmacy practitioners and research scholars to improve patient outcomes and human health. The College recognizes that a geographically and culturally diverse student body contributes to more robust exchange of creative ideas and experiences, one that benefits all students. The UK College of Pharmacy, therefore, strives to admit a talented and diverse student body that enhances the educational process while serving the needs of the Commonwealth and the pharmacy profession.

Admission to the professional program is competitive. The number of students admitted to the Doctor of Pharmacy program depends upon the availability of resources such as faculty, clinical facilities and space for implementation of a quality educational program. Consideration for admission will be based on a holistic review of the applicant’s previous academic record, potential for academic achievement, standardized admission test scores, assessment of communication skills, contribution to diversity, integrity, commitment, motivation, character, maturity and emotional stability. Each applicant must have the physical, mental and emotional ability to learn and accomplish those competencies required of a pharmacy practitioner, as well as the character and thought processes necessary to make professional judgments that benefit the patient.

The Admissions Committee believes the applicant should base a decision to enter the pharmacy profession on more solid reasoning than merely an interest in science courses. The applicant should research opportunities available to pharmacy graduates, services provided by pharmacists and obligations of pharmacy practitioners to the people they serve.

Work experience is not a requirement for admission. However, applicants are strongly advised to shadow a pharmacist and volunteer in a pharmacy or healthcare environment prior to entering a pharmacy program. Students who have prior work, shadowing or volunteer experience in a pharmacy setting generally enhance their performance during the admissions interview process and in the PharmD program if later admitted.

The Admissions Committee cannot consider applications from students in other colleges of pharmacy when the applicant has previously been denied admission to the UK professional program or when the maximum number of students is already enrolled in the program.

Any student may be denied admission or permission to continue enrollment in the College of Pharmacy if, in the opinion of the faculty, the moral or ethical character of the student casts grave doubts upon his or her potential capabilities as a pharmacist. Any type of involvement in the illegal use of drugs or other illegal or unethical acts relating to the practice of pharmacy are examples of incidents which would provide cause for considering denying admission or for dismissal of a student from the College.

ACADEMIC PREPARATION – PharmD ADMISSION REQUIREMENTS

A minimum of 70 semester credit hours of prepharmacy course work is required for admission. Approximately 45-55 of those hours are in required subjects; the remaining credit hours can be elective courses of the student’s choice. Students are encouraged to take elective courses that satisfy their major requirements. Highly recommended electives include biochemistry, genetics, and physics. Other electives to consider: courses required by major; UK Core courses; PharmD Dual Degree prerequisites (if needed); medical terminology; healthcare-related courses; undergraduate courses in Human Health Sciences (HHS), Public Health (CPH), Clinical Leadership and Management (CLM).

Prepharmacy courses should be completed by the end of the spring semester prior to the desired fall enrollment. If admitted, a student may petition the Admissions Committee to determine if a prerequisite may be completed during the summer prior to College of Pharmacy matriculation. See the chart on page 300 for the number of semester credit hours required in each prepharmacy subject area and the exact courses as offered at UK. Students may complete the prepharmacy course work at any regionally-accredited college or university.

English Requirement for Students Interested in Pharmacy

UK students must take courses which satisfy the Composition and Communications I and II requirements. Non-UK students must take two semesters of English writing/composition and one semester of basic public speaking.

PharmD Admission Requirements: Suggested Prepharmacy Schedule

Below is a suggested three-year schedule for UK students on a prepharmacy track. For a two-year, more aggressive prepharmacy schedule, contact the Prepharmacy Advisor at: pharmacyinfo@lsv.uky.edu.

FIRST PREPHARMACY YEAR

Fall Semester
MA 109 College Algebra ............................................ 3
CHE 107 General College Chemistry I ..................... 3
CHE 111 Laboratory to Accompany General Chemistry I ......................................................... 1
CIS/WRD 110 Composition and Communication I ...... 3
UK 101 Academic Orientation ................................. 1-2
Elective .................................................................. 3
TOTAL .................................................................. 15-16

Spring Semester
MA 123 Elementary Calculus and Its Applications ................................................... 4
CHE 107 General College Chemistry II .................... 3
CHE 113 Laboratory to Accompany General Chemistry II ......................................................... 2
CIS/WRD 111 Composition and Communication II .... 3
Elective .................................................................. 3
TOTAL .................................................................. 15

SECOND PREPHARMACY YEAR

Fall Semester
CHE 230 Organic Chemistry I ................................. 3
CHE 231 Organic Chemistry Laboratory I .................. 1
BIO 148 Introductory Biology I .................................. 3
BIO 155 Introductory Biology I Laboratory ................ 1
the applicant’s communication skills, confidence, integrity, maturity, commitment to the field of pharmacy, motivation, character and ability to interact with others. Students selected for an interview can expect to spend about two hours interviewing. The interview may include individual and group sessions with fellow applicants before a committee of faculty, practitioners, and current pharmacy students.

Note: Interview dates for each admission cycle are set in early summer by the College of Pharmacy Admissions Office (dates may vary annually; it is strongly suggested that candidates apply by August 8 for maximum consideration). Apply approximately 14-months in advance of intended start date or as soon as possible thereafter due to a rolling admissions process.

Rolling Admissions Process/ Application Timelines

Rolling Admissions: Please note that the UK College of Pharmacy uses a rolling admissions process. The College screens applications, schedules interviews and makes acceptance decisions on a continual basis, which makes it necessary to complete the application process as early in the admissions cycle as possible. Review of applications specifically begins with Early Decision in late August/early September.

Early Decision (ED): Applicants are strongly encouraged to apply by August 8 for Early Decision consideration. Many positions in the class will be filled through the ED process which will limit the number of seats available through Regular Decision. Early Decision applications receive maximum consideration.

Required Admission Applications, Documents and Verification Process

Two separate applications and fees are required for admission to the College of Pharmacy:
1. PharmCAS Online Application– www.pharmcas.com
2. UK PharmD Supplemental Application – http://pharmacy.uky.edu/pharm-professional-program/admissions/pharm-application-process

Note: Deadlines for receipt of application materials may vary annually depending on PharmCAS requirements. For the most current listings of application deadlines and procedures, review both the PharmCAS and UK College of Pharmacy Web sites in June, approximately 14-20 months prior to intended start date.

Admission Committee Decisions/ Conditional Acceptance

The Admissions Committee convenes and admission decisions are made at the conclusion of each round of interviews. Selected candidates are then “conditionally accepted” based on a holistic review of GPA (weighing the science GPA most heavily), PCAT scores, interview performance, references, leadership/volunteer/service activities, written essays, character, contribution to diversity and an assessment of other characteristics as described under “Admissions Overview.” The total number of students admitted each year will depend upon the availability of resources.

All acceptances remain conditional until final matriculation and fall enrollment in classes.

Final Matriculation/Fall Enrollment Requirements

Before final matriculation and fall enrollment can be approved, all conditionally accepted students must submit a non-refundable tuition deposit, signed copies of specified acceptance forms, pass a criminal background check/drug screen with acceptable results, attend orientation programs and meet other enrollment requirements as set forth by the College prior to the first day of classes.

Individuals who are being reinstated to the full course of study following their removal for academic or other reasons must also submit a non-refundable tuition deposit.

Criminal Background Check and Drug Screen: Applicants should be aware that both criminal background checks (CBC) and drug screens (DS) are becoming common requirements for participation in specific course work in the College of Pharmacy and for eventual licensure as a pharmacist. As a result, CBC/DS are requirements for those students conditionally accepted for admission and must be completed with satisfactory results prior to matriculation to the College. Instructions for completion of CBC/DS requirements will be forwarded immediately following conditional acceptance to the College. The types of tests required as well as the cost involved are subject to change and beyond the control of the College of Pharmacy. The expense for background checks and drug screens will be borne by the individual applicant and/or student.

To view the official UK College of Pharmacy Criminal Background Check/Drug Screen Policy, visit: http://pharmacy.uky.edu/pharm-professional-program/admissions/pharmd-application-process

College of Public Health

Donna Arnett, Ph.D., M.S.P.H., is Dean of the College of Public Health. Kathryn M. Cardarelli, Ph.D., is Associate Dean for Academic and Student Affairs, and Kimberly I. Tumlin, Ph.D. is Assistant Dean for Academic and Faculty Affairs. Nancy Schoenberg, Ph.D. is Associate Dean for Student Affairs. Margaret McGladrey is Assistant Dean for Research.

The College of Public Health

The College of Public Health (CPH) is one of the six Health Professions Colleges at the University of Kentucky. Faculty within CPH work closely with the University Hospital, and local and regional clinical, research and translational centers. Ranked a Top 25 School of Public Health by U.S. News & World Report, CPH takes seriously its responsibility to the communities and individuals that comprise the Commonwealth of Kentucky. Further, CPH values students highly and, in all its actions, strives to build an environment where students can succeed and thrive. It takes pride in a collegial community of faculty and staff who are encouraged and supported in their work to solve the pressing public health problems that plague the region and the nation. Diversity of thought and diversity among students, staff and faculty, is woven into the fabric of the CPH culture. Given Kentucky’s ranking as the fourth unhealthiest state in the nation, the College continues its mission to help reduce the burdens and disparities of health problems on individuals, families and communities in the Commonwealth. Several professional and academic programs are offered at CPH including doctoral programs in public health, gerontology, and epidemiology and biostatistics; master’s programs in public health, health administration, and clinical research design; and an undergraduate program in public health. Further, CPH has partnerships with other units across campus to offer joint degree programs, including MD/MPH, PharmD/MPh and JD/MHA. Graduate certificates are also offered in the following: biostatistics, gerontology, global health, maternal and child health, and public health management.

Bachelor of Public Health

This program is for the student seeking a broad-based, scientifically grounded, and professionally-oriented foundation for impacting societal health. Public Health connects populations from an integrated approach of identifying behaviors that affect health and changing these behaviors; education on the science of primary prevention of disease; promoting healthcare equity, quality and accessibility; and advocating for improved healthcare systems. Completion of a Bachelor of Public Health degree prepares students for the public health workforce and equips them to find effective and meaningful solutions to real-world health problems. The College has strong ties to the public health practice community, both regionally and nationally, and provides students with opportunities to engage with professionals across the country. BPH graduates are well-positioned to pursue entry-level positions in community and public health and healthcare, as well as for graduate study in public health and a variety of other health professions. Students enrolled in the BPH should have both a belief in making positive changes and a devotion to making a difference in the health status of communities.

Graduate Programs in Public Health

The College of Public Health offers the following graduate degrees: Master of Public Health, Master of Health Administration, Master of Science in Clinical Research Design, Doctor of Public Health, Ph.D. Epidemiology/Biostatistics and a Ph.D. in Gerontology. Additional information may be obtained from the Admissions and Students Affairs office in the College of Public Health and/or from the Graduate School. There is an application deadline for each program and current information can be located on the College Web site at: www.uky.edu/publichealth/

Students who want to earn advanced degrees must be admitted to the University of Kentucky Graduate School, with the exception of the Doctor of Public Health Professional Program. For complete information, students should refer to The Graduate School Bulletin or contact:

Student Success

Student success is a priority in the College of Public Health and relies on collaboration between students, faculty and staff. The College looks forward to working with you on a rewarding academic venture! Admitted students are assigned to an advisor within the College. Curriculum plans are determined in the first semester of enrollment and updated each semester. For questions regarding progression through the program, contact:

Marilyn E. Underwood
Director of Undergraduate Advising
111 Washington Avenue, Suite 118C
Lexington, KY 40536-0003
(859) 218-2064
e-mail: ukphp@uky.edu
www.uky.edu/publichealth

All students within CPH must adhere to the Health Care Colleges Code of Student Professional Conduct, as well as the UK Student Code of Conduct.

Bachelor of Public Health

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in the Arts and Creativity

**Electives**

Choose electives to lead to the minimum total of 120 hours required for graduation.

**Total Minimum Hours Required for Degree** ........................................ 120

*Course may also be used toward completion of a UK Core requirement.*

**Curriculum Policies**

Students are expected to be familiar with the requirements for the degree of Bachelor of Public Health and to confer with their advisor for selecting courses. An effective curriculum requires continuous review to remain current and applicable to changing health needs. This may result in revision of courses and requirements; therefore, there can be no guarantee that course content will be identical in each subsequent academic year.

The BPH Program Learning Outcomes are:

- Demonstrate knowledge of public health from an interdisciplinary perspective.
- Show competency in ethical issues, social responsibility, and problem solving using evidence-based concepts in core public health areas.
- Show competency in relationship-building and team dynamics to plan and promote public health and reduce health disparities.
- Apply theories and concepts to communicate the interconnectedness among the physical, social, and environmental aspects of population health.
Social work is a profession with a two-fold mission: to help people function as well as they can within their environment and to work for improved social conditions. The social work profession has one of the fastest growing job outlooks in the nation; dedicated professionals make a difference daily in the lives of individuals, families and communities. Social work students learn to assess and critically examine needs and available resources to create maximum opportunities for people of all ages. Our alums work in a variety of settings including schools, hospitals, child welfare, mental health agencies, and social welfare organizations and with a diversity of populations including the elderly, the impoverished, the homeless, veterans and their families, children and adolescents, and refugees and immigrants. This includes services designed to protect, promote or restore the well-being of people.

Social work is not only restorative in nature, responding to human problems after the fact, but there is also a strong commitment towards preventive measures. An emphasis upon institutional change within society is predicated upon the principle that society has a responsibility to protect the most vulnerable groups in its midst from falling prey to damage and injury. This expresses itself in the central thrust of the social work profession towards social justice.

A career in social work offers the opportunity to help groups of people in many different settings. As the only helping profession that emphasizes human well-being and social justice, social workers strive to empower others to make the changes they desire in their lives and advocate to bring about social change on both individual and community levels. The program prepares students to become professional social workers through a liberal arts foundation and social work courses that include multiple service opportunities and field placements in social service agencies.

Today, professional social workers help communities provide maximum equality of opportunity for all; help vulnerable individuals address problems and needs more effectively; and seek continually to strengthen and improve the institutional systems responsible for education, justice, health, business, labor, and welfare, so that people are better served.

Program Accreditation
Both the Bachelor of Arts in Social Work and the Master of Social Work degree programs are fully accredited by the Council on Social Work Education.

Licensing
Social work graduates are eligible for licensing from the State Board of Examiners of Social Work of Kentucky, PO Box 1360, Frankfort, KY 40602, as follows:
- BASW graduates for license as "social workers"
- MSW graduates for license as "certified social workers"

Undergraduate Program in Social Work
The University of Kentucky grants the following degree in the College of Social Work:
- Bachelor of Arts in Social Work

THE UNDERGRADUATE PROGRAM OF EDUCATION FOR SOCIAL WORK

The undergraduate program in social work was inaugurated in 1944. Effective July 1, 1969, its administration was transferred from the College of Arts and Sciences to the newly established College of Social Professions, which is now the College of Social Work. Freshmen and transfer students who elect social work as a major should arrange to register in the College of Social Work. Each student will be assigned an advisor who will assist in the selection of appropriate courses and ensure that the requirements for the B.A. degree are met. Students who wish special information or a personal interview prior to registration may make an appointment through the Office of the Director of the Undergraduate Program of the College of Social Work.

The principal objective of the undergraduate program is to prepare students for beginning social work practice. Additionally, it prepares students for graduate professional education, whether in social work or other helping professions like law or medicine.

All social work majors have actual experience within their environment and to work for improved social conditions. The social work profession has one of the fastest growing job outlooks in the nation; dedicated professionals make a difference daily in the lives of individuals, families and communities. Social work students learn to assess and critically examine needs and available resources to create maximum opportunities for people of all ages. Our alums work in a variety of settings including schools, hospitals, child welfare, mental health agencies, and social welfare organizations and with a diversity of populations including the elderly, the impoverished, the homeless, veterans and their families, children and adolescents, and refugees and immigrants. This includes services designed to protect, promote or restore the well-being of people.

Social work is not only restorative in nature, responding to human problems after the fact, but there is also a strong commitment towards preventive measures. An emphasis upon institutional change within society is predicated upon the principle that society has a responsibility to protect the most vulnerable groups in its midst from falling prey to damage and injury. This expresses itself in the central thrust of the social work profession towards social justice.

A career in social work offers the opportunity to help groups of people in many different settings. Today, professional social workers help communities provide maximum equality of opportunity for all; help vulnerable individuals address problems and needs more effectively; and seek continually to strengthen and improve the institutional systems responsible for education, justice, health, business, labor, and welfare, so that people are better served.
Applications for admission are available online at: https://socialwork.uky.edu/basw/basw-application-information/; deadlines are August 1 for the fall semester, and December 1 for the spring semester.

Individuals who do not meet the admissions criteria may submit additional materials to the College’s Admissions Committee. Admission may be granted if there is persuasive evidence of both the capability and motivation to successfully undertake the BASW degree program.

**Degree Requirements**

The College of Social Work requires students to earn a minimum of 120 hours for the B.A. in Social Work with a minimum grade-point average of 2.5. In addition, students must earn a grade of C or better in all professional social work core classes. Students may take additional hours in accordance with stated University policy.

In addition to fulfilling UK Core requirements, students must complete the program requirements listed below.

**UK Core Requirements**

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

Note: Students must earn a grade of C or better in all Major Requirements courses.

Subtotal: Professional Social Work Major Hours: 47

**Social and Behavioral Sciences and Social Work Electives**

Students must complete 15 hours of upper-division courses from any of the following: anthropology, economics, family studies, political science, psychology, social work, sociology.

Subtotal: Related Electives: 15

**Electives**

Students must complete at least 6 hours of upper-division free elective courses and enough lower-division elective hours to lead to the minimum total of 120 hours required for graduation.

Subtotal: Free Electives minimum of 6

**Total Hours:** 120

**Probation, Dismissal and Reinstatement Policy**

An undergraduate social work major or graduate student may be dismissed from the College of Social Work for failure to make satisfactory progress. In the Social Work program, the college continuously monitors the progress of all social work students. Consistent with University regulations and the CSWE requirements that social work programs have policies for “terminating a student’s enrollment . . . for reasons of academic and professional performance,” the following rules apply in the College of Social Work:

**Academic Performance**

For students accepted to the Bachelor of Arts in Social Work (BASW) program, the rules for academic probation, dismissal and reinstatement are comparable to those established by the University for undergraduate colleges and also include criteria for student performance in required social work courses:

(a) A student must earn a C or better in all social work core courses (SW 300, SW 350, SW 400, SW 421, SW 422, SW 430, SW 435, SW 444, SW 450, SW 460, SW 445, SW 470) in order to complete the major requirements and advance through sequential social work courses. A grade lower than a C will require the student to repeat that course and obtain a C or better to meet major requirements.

(b) Any student who fails to maintain a cumulative UK GPA of 2.5 shall be placed on academic probation within the College of Social Work.

(c) A student can be removed from academic probation when a cumulative GPA of 2.5 is obtained.

(d) A student shall be dismissed from the College if he/she fails to achieve a cumulative GPA of 2.5 or higher within two consecutive semesters of being placed on probation or fails to earn a term GPA of 2.5 or higher for any two consecutive semesters following his/her placement on academic probation.

(e) A student who earns a term GPA of 2.5 or higher for each semester following placement on probation will continue in probationary status until a cumulative GPA of 2.5 or higher is obtained.

(f) A student may not graduate from the College of Social Work while on academic probation.
g. Students who are on academic probation within the College of Social Work may transfer to other colleges or departments provided the student meets eligibility criteria.

h. A student who has been dismissed from the College for academic reasons and has remained outside the program for at least a semester and a summer session may petition for reinstatement. Petition for reinstatement is to be made in writing to the Dean and shall include a written statement by the student specifying why he/she should be considered for reinstatement. After consultation with the Director of Undergraduate Studies and other faculty as appropriate, the Dean may choose to accept or deny the petition. The Dean may require that the student agree to certain conditions in order to be reinstated (i.e. take additional course work, complete a writing class, obtain tutoring, etc.). The Dean shall inform the student in writing that he/she has been reinstated or reasons for denial of the petition for reinstatement. No student will be readmitted to the College via reinstatement request more than twice.

i. A student who has been dismissed for academic reasons and reinstated shall, upon reinstatement, be placed on academic probation and be subject to the academic performance expectations outlined in this policy.

COURSES FOR NONMAJORS

Students from other departments are eligible to take certain social work courses offered to enrich the content of their basic major and/or to increase their knowledge and understanding of the society of which they are a part. They may take SW 124, Introduction to Social Services; SW 222, Development of Social Welfare; SW 322, Social Work and Social Welfare; and elective social work courses.

GRADUATE PROGRAMS

The College of Social Work offers graduate curricula leading to the Master of Social Work degree and to the Ph.D. in Social Work. An MSW is a prerequisite to Ph.D. admission. Master’s applicants holding the baccalaureate degree in social work may be eligible for the 38-credit advanced standing option. Others will be considered for the regular 60-credit MSW program.

For further information, see The Graduate School Bulletin or the College of Social Work Bulletin.
Additional Learning Opportunities

Don Witt is Vice Provost for Enrollment Management.

ADDITIONAL LEARNING OPPORTUNITIES

There are plenty of ways students can earn credit at the University of Kentucky. To learn more, see the information below. Distance Learning Programs are administered by the Office of the Associate Provost for Undergraduate Education; all other programs are administered by the Assistant Provost for Enrollment Management.

DISTANCE LEARNING PROGRAMS

Distance Learning Programs, a unit of the Teaching and Academic Support Center (TASC), provides a wide variety of faculty and student support services to enable development and delivery of credit courses and programs throughout the Commonwealth of Kentucky and around the world, with over 10,000 enrollments annually. Distance Learning students enroll in 15 full degree programs, over 700 courses, 5 certificates and state-mandated training while residing in over 200 cities and towns in more than 100 Kentucky counties. Distance Learning Programs delivers course work in cooperation with Teaching and Academic Support Center staff, UK academic departments and colleges, and other institutions of higher education statewide and nationally. Available advanced delivery modes include online instruction, interactive video, video-desktop conferencing, videostreaming, Web 2.0 technologies and hybrid models.

Specific support includes:

• online and hybrid course development and support;
• technical coordinators at interactive video and videoconferencing sites;
• extensive distance learning faculty and student support services;
• exploration of new technologies for distance learning delivery/modeling;
• strategic planning with academic units;
• support for collaborative distance learning programming;
• marketing for Distance Learning courses and programs; and
• coordination with Distance Learning Library Services.

For more information on Distance Learning Programs, call (859) 257-3377; or visit: www.uky.edu/ukonline/

SUMMER SCHOOL

The University offers two summer sessions between the spring and fall semesters: a first (four week) summer session in May followed by a second (eight week) summer session beginning in June. There are also some courses with variable terms available within these two sessions. Summer School courses provide educational enrichment and give students the opportunity to accelerate their academic progress. Information regarding admission procedures and Summer School calendar dates are listed in the University Calendar at the front of this Bulletin.

The Summer School Schedule of Classes can be viewed online in early December. For information about summer school, contact:

Summer School
(859) 257-3382
email: sbsize00@uky.edu
www.uky.edu/registrar/content/summer-sessions

WINTER INTERSESSION

Winter Intersession classes for 2016-2017 begin on December 19, 2016 and end on January 10, 2017. For more information on Winter Intersession courses, please contact:

Winter Intersession
(859) 257-8725
email: asout2@email.uky.edu
www.uky.edu/registrar/winter-intersession
001-099 — No credit, non-degree and/or developmental courses;

100-199 — Open to freshmen; undergraduate credit only;

200-299 — Prerequisite sophomore classification; or consent of instructor; undergraduate credit only;

300-399 — Prerequisite junior classification; undergraduate credit only;

400-499 — Prerequisite junior classification; undergraduate credit;

400G-499G — Graduate credit for non-majors;

500-599 — Prerequisite junior classification; undergraduate and graduate credit;

600-799 — Open only to graduate students;

800-999 — Open only to students in professional colleges and to students in other colleges offering professional degrees as defined by the Council on Postsecondary Education.

R — The letter R following the course designation and number indicates a remedial course. No course designated with an R will be counted as credit toward a bachelor’s degree at the University of Kentucky.

Courses may be approved for variable credits, e.g., (1-3), (2-6), etc. In no case, however, may the total credits exceed the maximum number authorized for the course.

Repeated registration in a course may be allowed if the course description carries the statement: “May be repeated to maximum of . . . credits.” However, a student may enroll only one time in a specific course during a given semester. Courses with the same number are not considered to be the same course if different identifying titles are an integral part of the record.

Unless indicated in the course description, the number of credits for a course indicates the number of lecture or discussion or class hours.

Exceptions to the requirements for admission to courses may be made as follows:

a. Freshmen and sophomores may be admitted to courses numbered between 300 and 499, upon approval of the instructor and the dean of the student’s college. Such approval is limited to students who have demonstrated superior ability or preparation.

b. Seniors with superior ability or preparation may be admitted to courses numbered between 600 and 799, upon approval of the instructor, the dean of the student’s college and the Dean of The Graduate School.

c. Courses elected on a pass-fail basis.

DEPARTMENT OF ORAL HEALTH PRACTICE
Robert Kovarik, Chair

Comprehensive Care
Thomas McConnell, Division Chief
Ershal Harrison, Assistant Professor, D.M.D., Kentucky, 1981
Kristy A. Lawson, Assistant Professor, D.M.D., Kentucky, 2005
Thomas A. McConnell, Associate Professor, D.D.S., University of the Pacific, 1977
Deborah S. Ray, Assistant Professor, D.M.D., Kentucky, 1987; G.P.R., Cert., Kentucky, 1988
Robert C. Taylor, Assistant Professor, D.M.D., Kentucky, 2003
David Thornton, Assistant Professor, D.M.D., Kentucky, 2000

Endodontics
Alfred Wiemann, Division Chief
Barry Burkett, Assistant Professor (part-time), D.M.D., Kentucky, 1977; Cert. Endo, Naval School of Health Services, 1984
Anna Dressman, Assistant Professor (part-time), D.M.D., Kentucky, 2007, Cert. Endo, Ohio State Univ., 2011
Harmeet Walia, Associate Professor (part-time), D.D.S., Marquette, 1984, M.S.D., Marquette, 1986
Alfred Wiemann, Assistant Professor, D.M.D., Kentucky, 1981
Paul T. Wehrman, Assistant Professor (part-time), D.M.D., Kentucky, 1973; Cert. Endo., Pittsburgh, 1978

Oral Diagnosis, Oral Medicine and Oral Radiology
Craig S. Miller, Interim Division Chief
Robert Danaher, Assistant Professor, Ph.D., Maryland, 1994
John E. Lindroth, Associate Professor, D.D.S., D.M.S., Virginia, 1977; Fellow, Orofacial Pain, Kentucky, 1992
Teresa A. Dawahare Lyon, Assistant Professor (part-time), D.M.D., Kentucky, 1989; Cert., G.P.R., Kentucky, 1991
Craig S. Miller, Professor, D.M.D., Kentucky, 1982; Cert., G.P.R., USAF, 1983; M.S., Texas-San Antonio, 1987
Kenneth B. Nusbacher, Assistant Professor, D.M.D., Kentucky, 2008
Gunal Ommari, Assistant Professor, B.D.S., Bengazi Univ., Libya, 2003; M.Sc., Bengazi Univ., Libya, 2008; Cert. G.P.R., Univ. of Connecticut, 2012; M.S.D., Univer. of Connecticut, 2013
B. Lynn Theiss, Assistant Professor, D.M.D., Kentucky, 1986; G.P.R., Kentucky 1988; M.S.D., Geriatric Dental Fellowship, Kentucky, 1991

Periodontics
Mohanad Al-Sabbagh, Division Chief
Mohanad Al-Sabbagh, Professor, D.D.S., Damascus, Syria, 1993; M.S., Buffalo, 2002
Delph Dawson, Assistant Professor, D.D.S., Univ. of Louisville, 1993; M.S., Kentucky, 1998
Jeffrey Ebersole, Professor, Ph.D., Pittsburgh, 1975
Pinar Emeneh Hujia, Assistant Professor, D.D.S., Haceteyte University, Turkey, 1998; Ph.D., Haceteyte University, Turkey, 2005; M.S., Ohio State, 2011
Douglas Nealum, Assistant Professor (volunteer) D.M.D., Kentucky, 1972; M.S., Kentucky, 1974
Elliot Neuam, Assistant Professor (part-time) D.M.D., Kentucky, 2011; M.S., Kentucky, 2014
Samuel J. Jasper, Associate Professor, D.D.S., Ohio State, 1976; M.S., Ohio State, 1980
Allison Wright, Assistant Professor (part-time) D.D.S., Univ. of Louisville, 2003; M.S., and Cert. Perio, Kentucky, 2013

Prosthodontics
Marcus F. Abboud, Division Chief
Marcus F. Abboud, Professor, D.D.S., Bonn, Germany, 1996; Ph.D., Bonn Germany, 2000; Cert. Oral Surgery, Bonn Germany; Cert. CBCT Technology and Diagnostics, Dental Medical Assoc., Nordheim, Germany
Rodrigo Fuentealba Hidalgo, Assistant Professor, D.D.S., Univ. of Concepcion, Chile, 1996
Vaughn Hoerfer, Assistant Professor, D.D.S., Univ. of the Pacific, 1984
Ahmad Kutuk, Assistant Professor, D.D.S., Univ of Jordan, 2001; M.S.D., New York, 2010
Richard J. Windhorn, Assistant Professor, D.M.D., Kentucky, 1983; Cert. Prosthodontics, Fort Gordon, Georgia, 1996
Restorative Dentistry

Robert O. Frazer, Division Chief

Elzangela Bertoli, Assistant Professor, D.D.S., Universidade Federal Do Espirito, 1995; Cert. Endodontics, Universidade Federal Do Espirito, 1998; Cert. Orofacial Pain, Kentucky, 2000; M.S., Kentucky, 2005

Susan Bishop, Assistant Professor, D.M.D., Kentucky, 2001

Raymond J. Byrom, Jr., Associate Professor (part-time), D.M.D., Kentucky, 1979

James E. Haubenreich, Associate Professor (part-time), D.D.S., Memphis, 1977

H. F. Howard, Assistant Professor (part-time), D.M.D., Kentucky, 1982

Jane Jordan, Assistant Professor (part-time), D.M.D., Kentucky, 1987

Robert E. Kovarik, Associate Professor, D.M.D., Kentucky, 1982; M.S., Georgia, 1991

Stacie Maggard, Assistant Professor (part-time), D.M.D., Kentucky, 1998

Richard J. Mitchell, Associate Professor, M.S., Georgia, 1971; Ph.D., Virginia, 1975

Hiroko Nagaoka, Assistant Professor, D.D.S., Nihon Uni, Japan, 2001; M.S., Univ. of North Carolina, 2013

Patricia Nihill, Associate Professor, (volunteer) D.M.D., S. Illinois, 1982; M.S., Northwestern, 1991

Gitanjali L. Pinto-Sinai, Assistant Professor, D.S.S., SUNY of Buffalo, 2001

Martha Rice, Assistant Professor (part-time) D.M.D., Kentucky, 1981

Carla Rodriguez, Assistant Professor, D.M.D., Kentucky, 1981

Lindsay Rule, Assistant Professor (part-time) D.M.D., Midwestern, 2012

William Sadler, Assistant Professor (part-time) D.M.D., Univ. of Alabama, 1975

Lina Sharab, Assistant Professor, D.M.D., Al-Ba’ath Univ, Syria, 2003; M.S., Kentucky, 2014

Richard Stoss, Assistant Professor (part-time) D.M.D., Kentucky, 2006

Gregory G. Zeller, Professor, D.D.S., Univ of Maryland-Baltimore, 1975; M.S., Univ. of Maryland-Baltimore, 1983

Gregory A. Zoll, Assistant Professor (part-time) M.Ed., Kentucky, 1995

department of oral health science

Larry L. Cunningham, Jr., Interim Chair

Octavio A. Gonzalez, Associate Professor, D.D.S., Pontificia Javeriana Univ., Columbia, 1993; M.Sc., Pontificia Javeriana Univ., Columbia, 2002; Ph.D., Kentucky, 2010

Christine T. Harper, Assistant Professor (Adjunct), M.S., Univ. of Dayton, 2002

Chifu B. Huang, Assistant Professor (part-time), M.S., Kentucky, 1990; Ph.D., Kentucky; MBA Washington, 2002

Lorri Morford, Assistant Professor, Ph.D., Kentucky, 1995

Oral and Maxillofacial Surgery

Larry L. Cunningham, Jr., Division Chief

Kenneth Bondra, Assistant Professor (part-time), D.M.D., Univ. of Pittsburgh, 1972

Larry L. Cunningham, Jr., Professor, D.D.S., Texas, 1995; M.D., Texas, 1998

Enil A. Dominguez Fernandez, Assistant Professor, D.D.S., Central Univ of Venezuela, 2001; Ehab Shetata, Assistant Professor, M.M.Ch.B., 1988; M.Sc., 1993; B.D.S., 1997; M.D., 2004; Univ of Alexandria, Egypt

Steven Tucker, Assistant Professor (part-time), D.M.D., Kentucky, 1974; Cert. Oral and Maxillofacial Surgery, Kentucky, 1978

Joseph D. Van Sickels, Professor, D.D.S., Virginia, 1972

Pediatric Dentistry

Ted Raybould, Interim Division Chief

Shellie A. Branson, Assistant Professor (part-time), D.M.D., Univ. of Louisville, 1984; Cert. Pediatric Dentistry, Univ. of Louisville, 1986

Enrique Bimstein, Professor, C.D., Univ Nacional Autonoma De Mexico, 1970; Cert., Pediatric Dentistry Fellowship, Jerusalem, 1971; Cert., Master Educator Fellowship, Florida, 2007

Charlotte Haney, Assistant Professor (part-time) D.M.D., Kentucky, 1976; Cert., Pediatric Dentistry, Kentucky, 1983

Wendy K. Humphrey Van Meter, Assistant Professor (part-time), D.M.D., Kentucky, 2003; G.P.R. Cert., Kentucky, 2004; Cert. Pediatric Dentistry, Kentucky, 2008

Rodney Jackson, Assistant Professor (part-time), D.M.D., Kentucky, 2001

Julie Keller, Assistant Professor (part-time), D.M.D., Univ of Louisville, 1996; Cert. Pediatric Dentistry, Kentucky, 1988

Lisa A. Kochis, Assistant Professor (part-time), D.D.S., Univ of Oklahoma, 1999; Cert., G.P.R., Univ of Oklahoma, 2000; Cert., Orthodontics, Univ of Louisville, 2003

David A. Nash, Professor, D.M.D., Kentucky, 1968; M.S., Iowa, 1970; Ed.D., West Virginia, 1984

Cristina V. Perez Pacheco, Assistant Professor, D.D.S., Concepcion, Chile, 1998; Cert., Clinical Pediatric Dentistry, Concepcion, Chile, 2000, Cert., Specialization in Pediatric Dentistry, Concepcion, Chile, 2002; Cert. and M.S., Orofacial pain, Kentucky, 2011

Erwin G. Turner, Associate Professor, D.M.D., Kentucky, 1974; Cert., Pediatric Dentistry, Kentucky, 1976

Adult Dentistry

Ted P. Raybould, Division Chief

John B. Burt, Assistant Professor, D.M.D., Kentucky, 1996

Eric T. Demann, Associate Professor, D.M.D., Kentucky, 2000

Christian S. Fraley, Assistant Professor, D.M.D., Kentucky, 1996; G.P.R. Cert., Kentucky, 1997

Daria Stone, Assistant Professor, D.M.D., Kentucky, 1995

James R. Thompson, Assistant Professor (part-time), D.M.D., Kentucky, 1978

Oral Pathology

Douglas D. Dam, Professor, D.D.S., Louisiana State, 1977; Cert. Oral Pathology, Emory, 1979

Craig B. Fowler, Associate Professor, D.D.S., Baylor, 1976; Cert. Oral Pathology, Emory University, 1985

Dean K. White, Professor (part-time), D.D.S., Missouri, 1970; M.S.D., Indiana, 1972

Orofacial Pain

Jeffrey P. Okeson, Division Chief

Charles R. Carlson, Associate Professor (joint), Ph.D., Vanderbilt, 1983

Remy de Leeuw, Professor, D.M.D., State Univ Groningen, 1988; Ph.D., State Univ Groningen, 1994

Isabel Moreno-Hay, Assistant Professor, D.D.S., Madrid, 2003; Cert., Implant Prosthodontics, Madrid, 2006; Ph.D., Facial Treatment Specialist, Madrid, 2011; Cert., Orofacial Pain, Kentucky, 2013

Jeffrey P. Okeson, Professor, D.D.M.D., Kentucky, 2012

Alan Wilkinson, Assistant Professor (part-time), D.M.D., Louisville, 1973; Cert., Orofacial pain, Kentucky, 1988

Orthodontics

G. Thomas Klaempfer, Division Chief

Melvin W. Dean, Assistant Professor (part-time), D.M.D., Kentucky, 1977; Cert. Orthodontics, Kentucky, 1979

James K. Hartsfield, Jr., Professor, D.M.D., South Carolina, 1981; M.S., Indiana, 1983; M.Sc., Harvard, 1987; Ph.D., South Florida, 1993

Bruce S. Haskell, Professor (part-time), D.M.D., Univ. of Pittsburgh, 1973; Cert. Orthodontics, Univ. of Rochester, 1975; Ph.D. Physical Anthropology, Univ. of Pittsburgh, 1978

Stephanos Kyrkanides, Professor, D.D.S., Univ. of Athens, 1991; Cert. Orthodontics, Kentuck, 1972

Robert Rust, Assistant Professor (part-time), D.M.D., Louisville, 1981; Cert. and M.S. Orthodontics, Kentucky, 1985

James Thacker, Assistant Professor (part-time), D.D.S., Case Western, 1982; Cert. Orthodontics, Boston, 1984

J. Philip Wahle, Assistant Professor (part-time), D.M.D., Kentucky, 1990; M.S., Kentucky, 1993

Public Health Dentistry

Ted Raybould, Interim Division Chief

Joanna A. Albaoe, Assistant Professor, M.S., Eastern Kentucky, 2009

Sharlee Burch, Assistant Professor (part-time), M.P.H., Western Kentucky, 2000; Ed.S., Liberty Baptist College, Lynchburg, VA, 2011; Ed.D., Liberty Baptist College, Lynchburg, VA, 2013

Wesley Coffman, Assistant Professor (part-time), D.M.D., Kentucky, 1978

Doug Smith, Associate Professor Emeritus, Ph.D., Arizona State, 1986
Jared Stallones, Professor, Ph.D., University of Texas at Austin, 1999
J. Truman Stevens, Associate Professor Emeritus, Ed.D., Virginia, 1972
Gerry Swan,* Associate Professor, Ph.D., Virginia, 2004
Kathleen Swan, Professor, Ph.D., Virginia, 2004
Robert Tannenbaum,* Adjunct Professor, Ed.D., Columbia, 1968
Mary Ann Vinton, Associate Professor, M.A., Kentucky, 1976
Kimberly White, Clinical Assistant Professor, Ed.D., Georgia, 1991
Angene Wilson, Professor Emeritus, Ph.D., Ohio State, 1976

*Joint Appointment

EARLY CHILDHOOD, SPECIAL EDUCATION, AND REHABILITATION COUNSELING
Margaret Bausch, Chair

Richard Allday, Associate Professor, Ph.D., Auburn, 2004
Melinda Ault, Associate Professor, Ph.D., Kentucky, 2010
Margaret Bausch, Professor, Ed.D., Kentucky, 1999
William H. Berline, Professor Emeritus, Ed.D., Penn State, 1972
Malachy Bishop, Professor, Ph.D., Wisconsin-Madison, 2000
Brian Bottge, Professor, Ph.D., Tennessee, 1991
Bela Collins, Professor Emeritus, Ed.D., Kentucky, 1990
Ralph M. Crystal, Professor, Ph.D., Wisconsin, 1977
Sonja M. Feist-Price, Professor, Ph.D., Southern Illinois, 1992
Sara Flanagan, Assistant Professor, Ph.D., Purdue, 2012
Allison Fleming, Assistant Professor, Ph.D., Michigan State, 2012
Jennifer Grisham-Brown, Professor, Ed.D., Kentucky, 1985
Debra A. Harley, Professor, Ph.D., Southern Illinois, 1992
Lee Ann Jung, Professor, Ph.D., Auburn, 2001
Justin Lane, Assistant Professor, Ph.D., Georgia, 2014
Donna Lee, Assistant Professor, Ph.D., Western Michigan, 2012
Katherine McCormick, Professor, Ph.D., Auburn, 1990
Robert McKenzie, Professor, Ph.D., Iowa, 1981
Carol Mushett, Clinical Assistant Professor, M.Ed., Georgia, 1978
C. Michael Nelson, Professor Emeritus, Ed.D., Kansas, 1969
Jackie Rogers, Clinical Associate Professor, Ph.D., Kentucky, 2001
Sally Shepley, Assistant Professor, Ph.D., Georgia, 2015
Deborah Bottge, Associate Professor Emeritus, Ph.D., Florida, 1983
Amy Spriggs, Assistant Professor, Ph.D., Georgia, 2011
Kim Townley, Associate Professor Emeritus, Ph.D., Missouri, 1984
Noel Ysasi, Assistant Professor, Ph.D., Texas, 2015

EDUCATIONAL, SCHOOL, AND COUNSELING PSYCHOLOGY
JeffReese, Chair

Caitlin Allen, Associate Professor, Ph.D, Alliant International University, 2003
University Faculty

Jonathan Campbell, Professor, Ph.D., Memphis State, 2000
Charlotte Clark, Associate Professor Emeritus, Ph.D., Minnesota, 1977
Candice Crowell, Assistant Professor, Ph.D., Georgia, 2015
Fred W. Donner, Professor, Ph.D., Minnesota, 1974
Stephen T. DeMers, Professor Emeritus, Ed.D., Rutgers, 1976
Alicia Fedewa, Associate Professor, Ph.D., Michigan State, 2009
Sycarah Fisher, Assistant Professor, Ph.D., Michigan State, 2009
Joseph Hammer, Assistant Professor, Ph.D., Iowa, 2015
Rachel Hammond, Clinical Associate Professor, Ph.D., Kentucky, 2009
Xin Ma, Professor, Ph.D., British Columbia, 1997
H. Thompson Prout, Professor Emeritus, Ph.D., Indiana, 1976
Jeff Reese, Professor, Ph.D., Texas A&M, 2000
Pam Remer, Associate Professor Emeritus, Ph.D., Colorado, 1972
Rory Remer, Professor Emeritus, Ph.D., Colorado, 1972
Sharon S. Rostosky, Professor, Ph.D., Tennessee, 1998
Lisa Ruble, Professor, Ph.D., Indiana, 1998
Danelle Stevens-Watkins, Associate Professor, Ph.D., University of Kentucky, 2008
Michael Tolan, Associate Professor, Ph.D., Nebraska-Lincoln, 2008
Kenneth M. Tyler, Associate Professor, Ph.D., Howard, 2002
Ellen Usher, Associate Professor, Ph.D., Emory, 2007
Judith Worell, Professor Emeritus, Ph.D., Ohio State, 1954
Lynda Brown Wright, Professor Emeritus, Ph.D., Texas A&M, 1991

EDUCATIONAL LEADERSHIP STUDIES

Beth Rous, Chair
Justin Bathon, Associate Professor, Ph.D., Indiana-Bloomington, 2008
Lars G. Björk, Professor, Ph.D., New Mexico, 1983
Patricia Browne-Ferrigno, Professor, Ph.D., Colorado at Denver, 2001
Carmen Coleman, Clinical Associate Professor, Ph.D., Kentucky, 2009
Fred Edmonds, Professor Emeritus, Ed.D., Kentucky, 1961
Charles F. Faber, Professor Emeritus, Ph.D., Chicago, 1961
J. John Harris III, Professor Emeritus, Ph.D., Michigan, 1972
Wayne Lewis, Associate Professor, Ph.D., North Carolina State, 2009
John Nash, Associate Professor, Ph.D., Wisconsin-Madison, 1992
Mary John O’Hair, Professor, Ed.D., New Mexico State, 1987
Beth Rous, Professor, Ed.D., Professor, University of Kentucky, 2001
Eddy J. Van Meter, Professor Emeritus, Ed.D., New Mexico State, 1971
Gene Wilhoit, Clinical Assistant Professor, MAT, Indiana, 1971

EDUCATIONAL POLICY STUDIES AND EVALUATION

Beth Goldstein, Chair
Richard Angelo, Associate Professor Emeritus, Ed.D., Temple, 1978
Jeffery P. Bieber, Associate Professor, Ph.D., Michigan, 1990
Kelly Bradley, Professor, Ph.D., Ohio State, 2002
Clinton Collins, Associate Professor Emeritus, Ph.D., Indiana, 1970
Alan J. DeYoung, Professor Emeritus, Ph.D., Stanford, 1975
Joseph Ferrare, Assistant Professor, Ph.D., Wisconsin, 2011
Beth Goldstein, Associate Professor, Ph.D., Wisconsin, 1985
Jane Jensen, Associate Professor, Ph.D., Indiana, 1997
Willis Jones, Assistant Professor, Ph.D., Vanderbilt, 2011
Edward Kifer, Professor Emeritus, Ph.D., Chicago, 1973
Jungmin Lee, Assistant Professor, Ph.D., Tennessee, 2014
Virginia Davis Nordin, Associate Professor Emeritus, J.D., Harvard, 1959
John Thein, Professor, Ph.D., California at Berkeley, 1973
Richard Waddington, Assistant Professor, Ph.D., Michigan, 2012

KINESIOLOGY AND HEALTH PROMOTION

Benjamin Johnson, Chair
Mark Abel, Associate Professor, Ph.D., Utah, 2006
Rayma Beal, Associate Professor Emeritus, Ed.D., Cincinnati, 1985
Aaron Beighle, Associate Professor, Ph.D., Arizona State, 2003
Stephanie Bennett, Assistant Professor, Ph.D., Middle Tennessee State, 2006
Haley Bergstrom, Assistant Professor, Ph.D., Nebraska, 2014
Lance Bollinger, Assistant Professor, Ph.D., East Carolina, 2013
T. Jeff Chandler, Adjunct Professor, Ed.D., Auburn, 1987
Jody L. Classy, Professor, Ph.D., Illinois, 1993
Randall Crist, Assistant Professor, Ed.D., Kentucky 1994
Heather Erwin, Associate Professor, Ph.D., Illinois, 2006
Elizabeth Fettrow, Assistant Professor, Ph.D., Ohio, 2013
Brad Fleener, Assistant Professor, Ph.D., Missouri-Columbia, 2008
John Hall, Associate Professor Emeritus, Ph.D., Oregon, 1975
Melinda Ickes, Assistant Professor, Ph.D., Cincinnati, 2010
Benjamin Johnson, Professor, Ph.D., Kentucky, 1985

Stanley Labanowich, Associate Professor Emeritus, Ph.D., Illinois, 1975
Kristen Mark, Assistant Professor, Ph.D., Indiana, 2012
James Nance, Associate Professor Emeritus, Ed.D., Eastern Kentucky, 1977
Melody Noland, Professor, Ph.D., Maryland, 1981
Steve Parker, Associate Professor, Ed.D., Kentucky, 1995
Bruce A. Rector, Adjunct Professor, J.D., Kentucky, 1990
Richard Riggs, Associate Professor Emeritus, Ed.D., Tennessee, 1975
Robert Shapiro, Professor, Ph.D., Illinois-Urbana, 1979
Lucian Taylor, Associate Professor, Ph.D., Mississippi, 1995
Dennis Vinton, Associate Professor Emeritus, Re.D., Indiana, 1969
Andrew Weiner, Associate Professor Emeritus, Ed.D., Georgia, 1976
James W. Yates, Associate Professor Emeritus, Ph.D., Penn State, 1980

STEM: SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS

Jennifer Wilhelmi, Chair
Brett Criswell, Clinical Assistant Professor, Ph.D., Pennsylvania, 2009
Molly Fisher, Associate Professor, Ph.D., North Carolina-Charlotte, 2009
Cindy Jong, Associate Professor, Ph.D., Boston College, 2009
Rebecca McNall Krall, Associate Professor, Ph.D., Virginia, 2003
Lisa Krause, Clinical Assistant Professor, Ed.D., Illinois, 2014
Margaret Schroeder, Associate Professor, Ph.D., Texas A&M, 2006
Jonathan Thomas, Assistant Professor, Ed.D., Cincinnati, 2010
Jennifer Wilhelm, Professor, Ph.D., Texas-Austin, 2002

COLLEGE OF ENGINEERING

Lawrence E. Holloway, Interim Dean

F. JOSEPH HALCOMB III, M.D. DEPARTMENT OF BIOMEDICAL ENGINEERING

Abhijit Patwardhan, Interim Chair
Kimberly Ward Anderson,* Professor, Ph.D., Carnegie-Mellon, 1986
Babak Bazgari, Assistant Professor, Ph.D., Ecole Polytechnique, Montreal, 2008
Eugene Bruce, Professor Emeritus, Ph.D., Southern California, 1973
Peter Hardy,* Assistant Clinical Professor, Ph.D., Toronto, 1991
Thomas P. Hedman, Adjunct Associate Professor, Ph.D., University of Strathclyde, Scotland, 1996
Charles F. Knapp, Professor Emeritus, Ph.D., Notre Dame, 1968
Stephen Lai-Fook, Professor Emeritus, Ph.D., Washington, 1972
Lu Yuan Lee,* Professor, Ph.D., Mississippi, 1975
As-Ling Lin,* Assistant Professor, Ph.D., University of Texas Health Science Center, 2006
Abhijit Patwardhan, Professor, Ph.D., Kentucky, 1992
David Pienkowski, Associate Professor, Ph.D., Pennsylvania, 1982
David Powell,* Assistant Professor, Ph.D., Kentucky, 2002
David Puleo, Professor, Ph.D., Rensselaer Polytechnic, 1991
David Randall,* Professor, Ph.D., Washington, 1972
Keith Rouch,* Professor, Ph.D., Marquette, 1978
Sibu P. Saha,* Professor, M.D., MBA, University of Rajshahi, 1966
Robert Shapiro,* Professor, Ph.D., Illinois at Urbana, 1979
Hainsworth Shin, Adjunct Assistant Professor, Ph.D., Rensselaer Polytechnic, 2003
Betty F. Sisken, Research Professor Emeritus, Ph.D., Kentucky, 1973
Charles Smith,* Assistant Professor, M.D., Tulane, 1979
Sridhar Sunderam, Associate Professor, Ph.D., Kansas, 1999
Margaret M. Szabunio,* Professor, M.D., Hahnemann Medical College, 1984
Moriel Vandsburger,* Assistant Professor, Ph.D., Virginia, 2010
Janet Walker,* Associate Professor, M.D., South Florida, 1981
Guoqiang Yu,* Professor, Ph.D., Taiwan, China, 1999
Joseph Zwischenberger,* Professor, M.D., Kentucky, 1977

*Joint Appointment

CHEMICAL AND MATERIALS ENGINEERING

Douglass S. Kalica, Chair
Kimberly Ward Anderson, Professor, Ph.D., Carnegie-Mellon, 1986
Thomas John Balk II, Professor, Ph.D., Johns Hopkins, 2000
Matthew Beck, Associate Professor, Ph.D., Northwestern, 2005
Bradley J. Berron, Assistant Professor, Ph.D., Vanderbilt, 2008
Dibakar Bhattacharyya, Professor, Ph.D., Illinois Institute of Technology, 1999
Yang-Tseng Cheng, Professor, Ph.D., California Institute of Technology, 1987
Thomas Coehl, Lecturer, Ph.D., Texas at Austin, 2013
Thomas D. Dziubla, Associate Professor, Ph.D., Drexel, 2002
Derek L. Englert, Assistant Professor STS, Ph.D., Texas A&M, 2009
Isabel C. Escobar, Professor, Ph.D., University of Central Florida, 2000
Eric A. Grulke, Professor, Ph.D., Ohio State, 1975
Zachary Hilt, Professor, Ph.D., Texas at Austin, 2004
Hyun-Tae Hwang, Assistant Professor STS, Ph.D., University of Southern California, 2000
Douglas S. Kalika, Professor, Ph.D., California-Berkeley, 1988
Richard I. Kermode, Professor Emeritus, Ph.D., Northwestern, 1962
Barbara Knutson, Professor, Ph.D., Georgia Institute of Technology, 1994
Jennifer Lovely, Lecturer, Ph.D., Kansas State University, 2016
Kenji Okazaki, Professor Emeritus, Dr. Eng. Sci., Kyoto University, 1967
Daniel W. Pack, Professor, Ph.D., California Institute of Technology, 1997
Christina M. Payne, Assistant Professor, Ph.D., Vanderbilt, 2007
Stephen E. Rankin, Professor, Ph.D., University of Minnesota, 1990
Philip J. Reuertoft, Professor Emeritus, Ph.D., Imperial College, England, 1959
J. Thomas Schrodt, Professor Emeritus, Ph.D., Louisville, 1966
Jeffrey R. Seay, Associate Professor STS, Ph.D., Auburn, 2008
Mona Shirpour, Assistant Professor, Ph.D., Universitat Stuttgart, Germany, 2011
David L. Silverstein, Professor STS, Ph.D, Vanderbilt, 1998
Jim L. Smart, Associate Professor STS Emeritus, Ph.D., Texas at Austin, 1997
Terry W. Strange, Voluntary Lecturer, M.S., Kentucky, 1974
Tate T. H. Tsang, Professor, Ph.D., Texas at Austin, 1980
Matthew C. Weisenberger, Adjunct Assistant Professor, Ph.D., Kentucky, 2007
Sarah A. Wilson, Lecturer, University of Massachusetts, 2015
Fuqian Yang, Professor, Ph.D., Wisconsin, 1994
Tongguang Zhai, Associate Professor, Ph.D., Oxford, England, 1994
John R. Baker, Associate Professor STS, Ph.D., Kentucky, 1999
Mehmet Bahadir,* Assistant Professor, D.I.T., Northern Iowa, 2009
Nelson K. Akafuah, Assistant Research Professor, Ph.D., Kentucky, 2009
Yu-Ming Zhang, Professor, Ph.D., Harbin Institute of Technology, China, 1990
John C. Young, Assistant Professor, Ph.D., Clemson, 2002
Lee T. Todd Jr., Professor Emeritus, Ph.D., Massachusetts Institute of Technology, 1974
Himanshu Thapliyal, Assistant Professor, Ph.D., South Florida, 2011
William T. Smith, Associate Professor, Ph.D., Virginia Polytechnic Institute, 1990
Vijay P. Singh, Professor, Ph.D., Minnesota, 1974
George D. Ricco, Assistant Professor STS, Ph.D., Purdue, 2013
W. Brent Seales, Professor, Ph.D., Wisconsin-Madison, 1988
Judith A. Goldsmith, Professor, Ph.D., Wisconsin-Madison, 1988
James Griffin, Professor, Ph.D., Purdue, 1991
Jane E. Hayes, Professor, Ph.D., George Mason, 1999
Robert Heath,* Associate Professor, Ph.D., Auburn, 1973
Nathan Jacobs, Associate Professor, Ph.D., Washington, 2010
Jerry W. Jaromczyk, Associate Professor, Ph.D., Warsaw, Poland, 1984
Kevin W. Joiner, Lecturer, M.S., Vanderbilt University, 1993
Debdy L. Keen, Lecturer, Ph.D., Kentucky, 1994
Andrew M. Klapper, Professor, Ph.D., Brown, 1982
K. Kubota,* Professor, Ph.D., Facultes des Sciences de Paris, France, 1969
Jinze Liu, Associate Professor, Ph.D., North Carolina-Chapel Hill, 2006
D. Manivannan, Associate Professor, Ph.D., Ohio State, 1997
Victor Marek, Professor, Ph.D., Warsaw, Poland, 1968
Neil Moore, Associate Professor STS, Ph.D., Kentucky, 2012
Yi Pike, Lecturer, Ph.D., Kentucky, 2011
W. Brent Seales, Professor, Ph.D., Wisconsin, 1991
Miroslaw Truszcynski, Professor, Ph.D., Warsaw University of Technology, 1980
Grzegorz Wasilkowski, Professor, Ph.D., Warsaw, Poland, 1980
Ruigang Yang, Professor, Ph.D., North Carolina-Chapel Hill, 2003
Tingting Yu, Assistant Professor, Ph.D., Nebraska, 2014
Jun Zhang, Professor, Ph.D., George Washington, 1997

*Joint Appointment

ELECTRICAL AND COMPUTER ENGINEERING

Michael T. Johnson, Chair
Robert J. Adams, Professor, Ph.D., Virginia Polytechnic, 1998
Jeffrey Ashley, Senior Lecturer, Ph.D., Kentucky, 2004
Lyle N. Back, Assistant Professor Emeritus, M.S., Kentucky, 1962
Zhi Chen, Professor, Ph.D., Illinois at Urbana-Champaign, 1999
Sen-ching Samson Cheung, Associate Professor, Ph.D., California-Berkeley, 2002
Sanjeevi Chitikshe,* Assistant Professor, Ph.D., Southern Illinois University, 2007
Aaron M. Cramer, Associate Professor, Ph.D., Purdue, 2007
John B. Crofton,* Associate Professor, Ph.D., Auburn, 1992
Henry Dietz, Professor, Ph.D., Polytechnic, 1987
Raymond J. Distler, Associate Professor Emeritus, Ph.D., Kentucky, 1964
Paul A. Dolloff, Adjunct Assistant Professor, Ph.D., Virginia Polytechnic Institute, 1996
Kevin D. Donohue, Prezi, Ph.D., Illinois Institute of Technology, 1987
Joseph A. Elias, Assistant Professor, Ph.D., Rhode Island, 1996
Gregory Gerhardt,* Professor, Ph.D., Kansas, 1983
Regina Hannemann, Senior Lecturer, Ph.D., Kassel, Germany, 2001
Laurence G. Hasebrook, Professor, Ph.D., Carnegie Mellon, 1990
J. Todd Hastings, Professor, Ph.D., Massachusetts Institute of Technology, 2003
J. Robert Heath, Associate Professor, Ph.D., Auburn, 1973
James M. Hereford,* Assistant Professor, Ph.D., Georgia Institute of Technology, 1990
Lawrence E. Holloway, Professor, Ph.D., Carnegie-Mellon, 1990
Dan M. Jonel, Professor, Ph.D., Polytechnic University of Bucharest, Romania, 1996
Michael T. Johnson, Professor, Ph.D., Purdue, 2000
Daniel L. Lau, Professor, Ph.D., Delaware, 1999
Laura M. Letellier, Lecturer, B.S., Purdue, 1977
Michael E. Lhamon, Adjunct Assistant Professor, Ph.D., Kentucky, 1997
Yuan Liao, Professor, Ph.D., Texas A&M, 2000
Stephen M. Lipka, Adjunct Assistant Professor, Ph.D., Virginia, 1985
Robert A. Lodder,* Professor, Ph.D., Brown, 1982
Caicheng Lu, Professor, Ph.D., Illinois at Urbana-Champaign, 1995
James E. Lumm, Jr., Professor, Ph.D., Iowa, 1993
Janet K. Lumm, Professor, Ph.D., Iowa, 1993
George D. Ricco, Assistant Professor STS, Ph.D., Purdue, 2013
Vijay P. Singh, Professor, Ph.D., Minnesota, 1974
William T. Smith, Associate Professor, Ph.D., Texas A&M, 2009
Robert A. Walker, Associate Professor Emeritus, M.S., Eastern, 1978
Shien T. Wang, Professor Emeritus, Ph.D., Cornell, 1969
Yi-Tin Wang, Professor, Ph.D., Illinois Urbana-Champaign, 1984
Don J. Wood, Professor Emeritus, Ph.D., Carnegie Institute of Technology, 1961
Samantha Jones Wright, Lecturer, M.S., Kentucky, 1997
Scott Yost, Associate Professor, Ph.D., Michigan, 1995

COMPUTER SCIENCE

W. Brent Seales, Chair
Anthony Q. Baxter, Associate Professor Emeritus, Ph.D., Virginia, 1973
Kenneth L. Calvert, Professor, Ph.D., Texas at Austin, 1991
Fuhua Cheng, Professor, Ph.D., Ohio State, 1982
LiCong Cui, Assistant Professor, Ph.D., Case Western Reserve University, 2014
Zongming Fei, Professor, Ph.D., Georgia Institute of Technology, 2000
Raphael A. Finkel, Professor, Ph.D., Stanford, 1976

MECHANICAL ENGINEERING

Michael W. Renfro, Chair
Nelson K. Afkhami, Assistant Research Professor, Ph.D., Kentucky, 2009
Rodney J. Andrews,* Professor, Ph.D., Kentucky, 1999
Nazeema Baduneeed, Associate Professor, Ph.D., Ohio, 2005
Mehmet Bahadir,* Assistant Professor, D.I.T., Northern Iowa, 2009
Sean Bailey, Associate Professor, Ph.D., Ottawa, 2006
John R. Baker, Associate Professor STS, Ph.D., Kentucky, 1999
MINING ENGINEERING

Rick Q. Honaker, Chair

Zacharias G. Agioutantis, Professor, Ph.D., Virginia Tech, 1987
John G. Groppo, Jr., Professor, Ph.D., Kentucky, 1992
Rick Q. Honaker, Professor, Ph.D., Virginia Polytechnic Institute, 1992
Joseph W. Leonard, Professor Emeritus, M.S., Penn State, 1958
G. T. Lineberry, Professor, Ph.D., West Virginia, 1982
Braden T. Lusk, Professor, Ph.D., Missouri-Rolla, 2006
Thomas Novak, Professor, Ph.D., West Virginia, 1982
Kyle A. Perry, Assistant Professor, Ph.D., Kentucky, 2010
Jhon J. Silva Castro, Assistant Professor, Ph.D., Pennsylvania, 2012
Joseph Sottile, Jr., Professor, Ph.D., Penn State, 1991
Richard J. Sweigard, Professor Emeritus, Ph.D., Penn State, 1984
Konstanty F. Urrug, Professor Emeritus, DSc., Krakow, 1971
Andrezj Wala, Professor Emeritus, Ph.D., Krakow, 1972
William Chad Wedding, Assistant Professor, Ph.D., Kentucky, 2014

SCHOOL OF ART AND VISUAL STUDIES

Robert Jensen, Chair

Ruth Adams, Associate Professor, M.F.A., Miami, 1999
Becky Alley, Lecturer, M.F.A., Kansas, 2005
Garry Bibbs, Associate Professor, M.F.A., Kentucky, 1986
Anna Brzyski, Professor, Ph.D., Chicago, 1999
Robert Shay, Professor, M.F.A., Wisconsin, 1973
Brandon Smith, Lecturer, M.F.A., Wisconsin, 1973

COLLEGE OF FINE ARTS

David Sogin, Interim Dean

ARTS ADMINISTRATION

Rachel Shane, Chair

Michael Braun, Associate Professor Emeritus, M.A., St. Cloud State, 1978
Sarah Clare Corporandy, Adjunct Assistant Professor, M.F.A., Wayne State, 2007
Frank Fletcher, Adjunct Assistant Professor, Ph.D., Massachusetts, Amherst, 1993
Michela Franzetti, Adjunct, M.A., Kentucky, 2015
Steve Hoffman, Adjunct Assistant Professor, M.A., Wisconsin-Madison, 1992
Michael Ibrahim, Adjunct Assistant Professor, M.A., Boston, 2007
Yuya Jung, Assistant Professor, Ph.D., Pennsylvania State, 2012
Kathleen Keys, Adjunct Assistant Professor, Ph.D., Ohio State, 2003
Cassandra Lopez, Adjunct Assistant Professor, M.F.A., Cranbrook Academy of Art, 2013
Geraldine Maschio, Associate Professor, Ph.D., Wisconsin-Madison, 1981
Carter McGowan, Adjunct Assistant Professor, J.D., Cornell Law School, 1995
Christopher Montpetit, Adjunct Assistant Professor, M.F.A., Columbia, 1990
Kristina Rideout, Adjunct, M.A., Kentucky, 2015
Jill Schneberg, M.F.A., University of Utah, 2005
Rachel Shane, Assistant Professor, Ph.D., Ohio State, 2006
Jessica Shields Adjunct Assistant Professor, M.F.A., Savannah College of Art and Design, 2012
Jeremy Stiffler, Adjunct Assistant Professor, M.S., Pennsylvania State, 2011
Misty Tolle, Adjunct Assistant Professor, M.A., Juilliard School, 2000

THEATRE

Nancy C. Jones, Chair

Herman D. Farrell III, Associate Professor, M.F.A., Columbia, 1994; J.D., New York University, 1989
Nelson Fields, Associate Professor, M.F.A., Iowa, 1992
Tony Hardin, Associate Professor, M.F.A., Virginia, 1999
Robert W. Haven, Associate Professor Emeritus, M.F.A., Delaware, 1992
Russell Henderson, Associate Professor, M.F.A, Trinity University-Dallas Theatre Center, 1979
John Holloway, Professor, M.F.A., Trinity University-Dallas Theatre Center, 1980
Nancy C. Jones, Associate Professor, M.F.A., Western Illinois, 1997
Geraldine Maschio, Associate Professor, Ph.D., Wisconsin-Madison, 1981
Rhoda-Gale Pollack, Professor Emeritus, Ph.D., Stanford, 1971
Stephanie Richards, Adjunct Assistant Professor, M.F.A., Iowa, 2003
Christina Ritter, Lecturer, Ph.D., Ohio State, 2007
James W. Rodgers, Professor Emeritus, Ph.D., Wayne State, 1968
Zachary Stirbling, Lecturer, M.F.A., Florida State, 2003
Susie Thiel, Lecturer, M.F.A., Michigan, 2011
Michael S. Tick, Professor, Ph.D., New York University, 1997

COLLEGE OF HEALTH SCIENCES

Scott M. Lephart, Dean

DEPARTMENT OF CLINICAL SCIENCES

Phylis Nash, Chair

Health Sciences Education and Research
Geza G. Bruckner, Division Director

Human Health Sciences and Clinical Leadership and Management

Lynda Bennett, Adjunct Assistant Professor, B.H.S., M.S., University of Kentucky and Northern Kentucky, 2013
Geza G. Bruckner, Professor, Ph.D., Kentucky, 1979
Ming Chih, Assistant Professor, M.H.A., M.S., Wisconsin Madison, 2013
Joseph L. Flinn III,* Professor, J.D., Georgetown, 1973
Rachel Hogg, Assistant Professor, Dr. P.H., M.A., Kentucky, 2014
Karen G. Skaff, Professor, Ph.D., Columbia, 1992; Kentucky, 1995
Jami Warren, Lecturer, M.A., Ph.D., Kentucky, 2011
*Joint Appointment

Clinical Nutrition
Geza G. Bruckner, Division Director

Maria G. Boosalis, Associate Professor Emeritus, Ph.D., M.P.H., R.D., L.D., Minnesota, 1984
Geza G. Bruckner, Professor, Ph.D., Kentucky, 1979
David T. Thomas, Associate Professor, Ph.D., RDN, CSSD, LD, FAND, North Carolina-Greensboro, 2009

Medical Laboratory Science

Michelle Butina, Program Director

Michelle Butina, Associate Professor, MLS(ASCP)CM, Ph.D., Georgia, 2010
Kim Campbell, Senior Lecturer, MLS(ASCP)CM, M.S.Ed., Kentucky, 1985
Philip Campbell, Adjunct Assistant Professor, M.T. (ASCP), M.S.Ed., Kentucky, 1979
Patricia Ann Collins, Associate Professor Emeritus, M.T. (ASCP), M.S. West Virginia, 1971
Linda Gorman, Associate Professor Emeritus, MLS(ASCP)CM, Ph.D., Kentucky 1996
Chad Guilliams, Lecturer, MLS(ASCP)CM, M.Ed, Georgia, 2009
Steve Schwarz, Assistant Professor, MLS(ASCP)CM, Ph.D., Wisconsin, 1998
E. Anne Steine-Martin, Associate Professor Emeritus, M.T. (ASCP), Ph.D., Kentucky, 1991
Marie Viteiteoe, Professor Emeritus, M.T. (ASCP), C.L.S. (NCA), Ed.D, West Virginia, 1973
*Joint Appointment

Graduate Faculty

Physician Assistant Studies

Policy on Residency

13 KAR 2:045.

DETERMINATION OF RESIDENCY STATUS FOR ADMISSION AND TUITION ASSESSMENT PURPOSES.

RELATES TO: KRS Chapter 13B, 164.020, 164.030, 164A.330(6)

STATUTORY AUTHORITY: KRS 164.020(8)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedures and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

Section 1. Definitions.

(1) “Academic term” means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.

(2) “Continuous enrollment” means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student’s control, including serious personal illness or injury, or illness or death of a parent.

(3) “Degree level” means enrollment in a course or program that could result in the award of a: (a) Certificate, diploma, or other program award at an institution; (b) Baccalaureate degree or lower, including enrollment in a course by a nondegree-seeking postbaccalaureate student; (c) Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry, or “Pharm. D.”; or

(4) “Determination of residency status” means the decision of a postsecondary education institution to classify a student as a resident or as a nonresident for admission and tuition assessment purposes.

(5) “Determination of residency status” means the decision of a postsecondary education institution that may include a formal hearing that results in the classification of a person as a Kentucky resident or as a nonresident for admission and tuition assessment purposes.

(6) “Domicile” means a person’s true, fixed, and permanent home and is the place where the person intends to remain indefinitely, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.

(7) “Full-time employment” means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.

(8) “Independent person” means a person who demonstrates financial independence from parents or persons other than a spouse and who meets the criteria for independence established in Section 5 of this administrative regulation.

(9) “Institution” means an entity defined by KRS 164.001(12) if the type of institution is not expressly stated and includes the Kentucky Virtual University, the Council on Postsecondary Education, and the Kentucky Higher Education Assistance Authority.

(10) “Kentucky resident” means a person determined by an institution for tuition purposes to be domiciled in and a resident of Kentucky as determined by this administrative regulation.

(11) “Nonresident” means a person who: (a) Is domiciled outside Kentucky; (b) Currently maintains legal residence outside Kentucky; or (c) Is not a Kentucky resident as determined by this administrative regulation.

(12) “Parent” means one (1) of the following: (a) A person’s father or mother; or (b) A court-appointed legal guardian if: 1. The guardianship is recognized by an appropriate court within the United States; 2. There was a relinquishment of the rights of the parents; and 3. The guardianship was not established primarily to confer Kentucky residency on the person.

(13) “Preponderance of the evidence” means the greater weight of evidence or evidence that is more credible and convincing to the mind.

(14) “Residence” means the place of abode of a person and the place where the person is physically present most of the time for a noneducational purpose in accordance with Section 3 of this administrative regulation.

(15) “Student financial aid” means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at an institution, and includes student employment by the institution or a graduate assistantship.

(16) “Sustenance” means living expenses including tuition, fees, books, and supplies.

Section 2. Scope.

(1) State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.

(2) The Council on Postsecondary Education may require a student who is neither domiciled in nor a resident of Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.

(3) This administrative regulation shall apply to all student residency determinations regardless of circumstances, including residency determinations made by the state-supported institutions for prospective and currently-enrolled students; the Southern Regional Education Board for contract spaces; reciprocity agreements, if appropriate; the Kentucky Virtual University; academic common market programs; the Kentucky Educational Excellence Scholarship Program; and other state student financial aid programs, as appropriate.

Section 3. Determination of Residency Status; General Rules.

(1) A determination of residency shall include: (a) An initial determination of residency status by an institution during the admission process or upon enrollment in an institution for a specific academic term or for admission into a specific academic program; (b) A reconsideration of a determination of residency status by an institution based upon a changed circumstance; or (c) A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.

(2) An initial determination of residency status shall be based upon: (a) The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution; (b) Information derived from admissions materials; (c) If applicable, other materials required by an institution and consistent with this administrative regulation; and (d) Other information available to the institution from any source.

(3) An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.

(4) A determination of residency status shall be based upon verifiable circumstances or actions.

(5) Evidence and information cited as the basis for Kentucky domicile and residency shall accompany the application for a determination of residency status.

(6) A student classified as a nonresident shall retain that status until the student is officially reclassified by an institution.

(7) A student may apply for a review of a determination of residency status once for each academic term.

(8) If an institution has information that a student’s residency status may be incorrect, the institution shall review and determine the student’s correct residency status.

(9) If the Council on Postsecondary Education has information that an institution’s determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.
Policy on Residency

(10) An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty or sanction may also include:

(a) Student discipline by the institution through a policy written and disseminated to students; or
(b) Criminal prosecution.

Section 4. Presumptions Regarding Residency Status.

(1) In making a determination of residency status, it shall be presumed that a person is a nonresident if:

(a) A person is, or seeks to be, an undergraduate student and admission records show the student to be a graduate of an out-of-state high school within five (5) years prior to a request for a determination of residency status;
(b) A person’s admissions records indicate the student’s residence to be outside of Kentucky at the time of application for admission;
(c) A person moves to Kentucky primarily for the purpose of enrollment in an institution;
(d) A person moves to Kentucky and within twelve (12) months enrolls at an institution more than half time;
(e) A person has a continuous absence of one (1) year from Kentucky; or
(f) A person attended an out-of-state higher education institution during the past academic year and paid in-state tuition at that institution.

(2) A presumption arising from subsection (1) of this section shall only be overcome by preponderance of evidence sufficient to demonstrate that a person is domiciled in and is a resident of Kentucky.

Section 5. Determination of Whether a Student is Dependent or Independent.

(1) In determining residency status, an institution shall first determine whether a student is dependent or independent. This provision is predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent and therefore lacks the ability to form the requisite intent to establish domicile.

A determination that a student is independent shall be one (1) step in the overall determination of whether a student is or is not a resident of Kentucky.

(2) In determining the dependent or independent status of a person, the following information shall be considered as well as other relevant information available at the time the determination is made:

(a) Whether the person has been claimed as a dependent on the federal or state tax returns of a parent or other person for the year preceding the date of application for a determination of residency status; or
(b) Whether the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and
(c) Whether the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person’s own sustenance.

(3) An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.

(4) Domicile may be inferred from the student’s permanent address, parent’s mailing address, or location of high school of graduation.

(5) Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.

(6) Financial assistance from or a loan made by a parent or family member other than an independent spouse, if used for sustenance of the student:

(a) Shall not be considered in establishing a student as independent; and
(b) Shall be a factor in establishing that a student is dependent.

Section 6. Effect of a Determination of Dependent Status on a Determination of Residency Status.

(1) The effect of a determination that a person is dependent shall be:

(a) The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person; and
(b) The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky regardless of which parent has legal custody or intent to claim that person as a dependent pursuant to federal or Kentucky income tax provisions.

(2) If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky but subsequently move from the state:

(a) The dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled; and
(b) The dependent person’s residency status shall be reassessed if continuous enrollment is broken or the current degree level is completed.

Section 7. Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status.

(1) A member, spouse, or dependent of a member whose domicile and residency was Kentucky at the time of induction into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:

(a) During the member’s time of active service; or
(b) If the member returns to this state within six (6) months of the date of the member’s discharge from active duty.

(2) A member of the armed services on active duty for more than thirty (30) days and who has a permanent duty station in Kentucky shall be classified as a Kentucky resident and shall be entitled to in-state tuition as shall the spouse or a dependent child of the member.

(b) A member, spouse, or dependent of a member shall not lose Kentucky residency status if the member is transferred on military orders while the member, spouse, or dependent requesting the status is in continuous enrollment at the degree level in which currently enrolled.

(3) Membership in the National Guard or civilian employment at a military base alone shall not qualify a person for Kentucky residency status under the provisions of subsections (1) and (2) of this section. If a member of the Kentucky National Guard is on active duty status for a period of not less than thirty (30) days, the member shall be considered a Kentucky resident, as shall the spouse of a dependent child of the member.

(4) A person’s residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

Section 8. Status of Nonresident Aliens; Visas and Immigration.

(1) (a) A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.
(b) Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.

(2) A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a person with an H-1 visa, I, K, L, N, R, shall establish domicile and residency the same as another person.

(3) (a) An independent person holding a nonimmigrant visa with designation B, C, D, F, H-2, H-3, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD, or TN shall not be classified as a Kentucky resident, because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.

(b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.
(c) A dependent person holding a visa described in subsection (2) of this section or paragraph (a) of this subsection, if a parent is a citizen of the United States and is a resident of and domiciled in Kentucky, shall be a resident of Kentucky for the purposes of this administrative regulation.

(4) A person shall be a Kentucky resident for the purpose of this administrative regulation if the person graduated from a Kentucky high school and:

(a) Is an undocumented alien;
(b) Holds a visa listed in subsections (2) or (3)(a) of this section; or
(c) Is a dependent of a person who holds a visa listed in subsections (2) or (3)(a) of this section.

(5) (a) Except as provided in paragraph (b) of this subsection, a person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been decided by the federal government.

(b) A person who has petitioned the federal government to reclassify his or her visa status based on marriage to a Kentucky resident and who can demonstrate that the petition has been filed and acknowledged by the federal government, may establish Kentucky domicile and residency at that time.

Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust.

A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(6).
Section 10. Criteria Used in a Determination of Residency Status.

(1) A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions.

(a) Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;

(b) Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;

(c) Payment of Kentucky withholding taxes while employed during the calendar year for which a change in classification is sought;

(d) Full-time employment of at least one (1) year while living in Kentucky;

(e) Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;

(f) Abandonment of a former domicile or residence and establishing domicile and residency in Kentucky with application over the time period following and incidental to the change in domicile and residency;

(g) Obtaining licensing or certification for a professional and occupational purpose in Kentucky;

(h) Payment of real property taxes in Kentucky;

(i) Ownership of real property in Kentucky, if the property was used by the student as a residence preceding the date of application for a determination of residency status;

(j) Marriage of an independent student to a person who was domiciled in and a resident of Kentucky prior to the marriage; and

(k) The extent to which a student is dependent on student financial aid in order to provide basic sustenance.

(2) Except as provided in subsection (4) of this section, the following facts, because of the ease and convenience in determining them, shall have limited probative value in a determination that a person is domiciled in and is a resident of Kentucky:

(a) Kentucky automobile registration;

(b) Kentucky driver’s license;

(c) Registration as a Kentucky voter;

(d) Long-term lease of at least twelve (12) consecutive months of noncollegiate housing; and

(e) Continued presence in Kentucky during academic breaks.

The absence of a fact contained in subsection (3) of this section shall have significant probative value in determining that a student is not domiciled in or is not a resident of Kentucky.

Section 11. Effect of a Change in Circumstances on Residency Status.

(1) If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by the institution.

(2) Upon transfer to a Kentucky institution, a student’s residency status shall be assessed by the receiving institution.

(3) A reconsideration of a determination of residency status for a dependent person shall be subject to the provisions for continuous enrollment, if applicable.

Section 12. Student Responsibilities.

(1) A student shall report under the proper residency classification, which includes the following actions:

(a) Raising a question concerning residency classification;

(b) Making application for change of residency classification with the designated office or person at the institution; and

(c) Notifying the designated office or person at the institution immediately upon a change in residency.

(2) If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student’s residency status.

(3) If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made;

(b) Notification shall be made by registered mail, return receipt requested.

(c) Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.

(4) A formal hearing conducted by an institution and the final recommended order shall be a final administrative action with no appeal to the Council on Postsecondary Education.

(b) A formal administrative hearing conducted by the Council on Postsecondary Education for residency determinations related to eligibility for the Academic Common Market and Regional Contract Programs shall be conducted pursuant to the provisions of KRS Chapter 13B and 13 KAR 2:070. The recommended order issued by the President of the Council shall be a final administrative action.

(5) A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

Section 13. Institutional Responsibilities.

Each institution shall:

(1) Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer’s determination;

(2) Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal;

(3) Establish a formal hearing process as described in Section 14 of this administrative regulation; and

(4) Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:

(a) Approved by the institution’s governing board;

(b) Made available to all students; and

(c) Filed with the council.

(1) A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.

(2) If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer shall:

(a) Be a person not involved in determinations of residency at an institution except for formal hearings; and

(b) Not be an employee in the same organizational unit as the residency appeals officer.

(3) An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:

(a) A hearing officer to make a recommendation on a residency appeal;

(b) Guarantees of due process to a student that include:

1. The right of a student to be represented by legal counsel; and

2. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency; and

(c) A recommendation to be issued by the hearing officer.

(4) An institution’s formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.

Section 15. Cost of Formal Hearings.

(1) An institution shall pay the cost for all residency determinations including the cost of a formal hearing.

(2) A student shall pay for the cost of all legal representation in support of the student’s claim of residency.
Policy on Residency

Revised Effective November 20, 2014

For further information about residency, please contact the Office of Undergraduate Admission and University Registrar, Funkhouser Building, University of Kentucky, Lexington, KY 40506-0054.

Policy subject to change without notice.
**Drug-Free Policy**

**Policy Statement as a Drug-Free Institution**

The University of Kentucky is committed to providing a healthy and safe environment for its students, faculty and staff. The University has defined conduct in relation to the unlawful possession, use, dispensation, distribution or manufacture of alcohol or illicit drugs. Conduct which is violative of this definition poses unacceptable risks and disregard for the health, safety, and welfare of members of the University community and shall result in disciplinary action up to and including suspension or termination.

As a recipient of federal grants and contracts, the University of Kentucky gives this notice to students, faculty and staff that it is in compliance with and shall continue to be in compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendment of 1989. Students, faculty and staff are herein notified of the standards of conduct which shall be applicable while on University of Kentucky property, on University business, and/or at University sponsored activities.

**Standards of Conduct**

By University regulations, by federal law, by state law, and, in some instances, by local ordinance, students, faculty and staff are prohibited from the unlawful possession, use, dispensation, distribution, or manufacture of illicit drugs on University property, on University business and/or at University sponsored activities.

Under University regulations, students, faculty and staff are required to abide by state laws concerning alcoholic beverages. Basically, Kentucky laws state that if one is under the age of 21, it is unlawful to:

1. possess or consume alcoholic beverages,
2. misrepresent one’s age for the purpose of purchasing alcoholic beverages, or
3. use a fake ID in an attempt to purchase alcoholic beverages.

No matter what one’s age, Kentucky law states that it is unlawful to:

1. procure any alcoholic beverages for anyone under 21 years of age or
2. drink or to be drunk in a public place.

University campuses and buildings are considered as public places for purposes of these laws, except for a facility licensed to serve alcoholic beverages, and except for a facility used as a private residence, unless University regulations state otherwise.

Ordinances of the Lexington-Fayette Urban County Government basically parallel the state laws.

Any member of the University student body, faculty, or staff who violates these defined standards of conduct shall be subject to appropriate disciplinary action up to and including suspension and/or termination. The specifically defined standards of conduct, the disciplinary procedures, and the appropriate sanctions are detailed in the codes of student conduct and in the Administrative Regulations (AR 6:4, HRP&P 13, HRP&P 14 and Human Resource Policy & Procedures Numbers 13.0 and 14.0).

In addition, it is a violation of state law to operate a motor vehicle while under the influence of any substance which may impair one’s driving ability (drugs or alcoholic beverages).

**Sanctions**

Under University regulation, students who violate this standard of conduct are subject to disciplinary action from a minimum of a warning to a maximum of suspension from the University. Students who reside in University Housing are subject to further disciplinary action which may vary from a warning to termination of their housing contract.

Faculty and staff are subject to disciplinary action from a minimum of a warning to a maximum of termination from University employment.

Under state and federal drug laws, the gravity of the sanction depends on the classification of the controlled substance, the particular activity involved (possession or trafficking which includes manufacture, sale and possession with intent to sell), and whether or not multiple convictions are involved.

Specific penalties under federal and state laws for trafficking in various controlled substances are outlined in Appendix A to this policy.

**Notice of Drug-Related Conviction**

In compliance with the Federal Drug-Free Workplace Act of 1988, any employee shall notify the immediate supervisor if the employee is convicted of a criminal drug offense occurring in the workplace or while on University business within five (5) days of the conviction. The University shall take appropriate sanction and remedies in accordance within its policies. The provisions of this section are applicable to students who are employees of the University. If the employee is under a federal contract or grant, the University shall notify the contracting or granting agency of the conviction and of its actions. This section of this policy is also applicable to students who receive a Pell grant (federal grant).

**Health Risks**

The scope and impact of health risks from alcohol and drug abuse are both alarming and well-documented, ranging from mood-altering to life-threatening, with consequences that extend beyond the individual to family, organizations and society at large. The University of Kentucky, therefore, conducts regular programs to educate its students, faculty and staff that consumption and use of drugs may alter behavior, distort perception, impair thinking, impede judgment, and lead to physical or psychological dependence.

Alcohol and/or drugs and/or drug abuse may lead to the deterioration of physical health by causing or contributing to various health conditions including but not limited to fatigue, nausea, personal injury, insomnia, pathological organ damage, some forms of cancer, pancreatitis, heart attack, respiratory depression, birth defects, convulsions, coma, and even death. Alcohol and drug abuse may also result in deterioration of mental health by causing or contributing to various conditions such as increased aggression, hallucinations, depression, disorientation, and psychosis.

A detailed list of the effects and health risks associated with the use of many specific drugs appears as Appendix B to this policy.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident.
Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person’s ability to learn and remember information.

Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Training and Counseling Resources

Continuous efforts are made to make students, faculty and staff aware of the on-campus and off-campus programs which provide information and professional services on matters related to the abuse of alcohol and drugs.

Lists of sources for information and counseling for students are published in the Kernel regularly. Students are encouraged to contact the Dean of Students and/or the Office of Residence Life for information and appropriate referral.

Counseling is provided by such areas as the University Health Services Counseling Center, Educational, School, and Counseling Psychology, the Medical Student Support Services program (MS3), and an In-resident counselor in the residence halls system.

For faculty and staff the Employee Assistance Program, REFER, specifically provides information as to resources available to employees. Other counseling, treatment, and rehabilitation services are available in the Lexington community as well as communities throughout the state in which College of Agriculture employees are located.

• Comprehensive Care Centers offer both counseling and treatment. (Visit www.bluegrass.org for locations and contact information.)
• In the Lexington area, the number for Alcoholics Anonymous (AA) is 859-225-1212. (Check local telephone directory for listings.)
• The Chrysalis House Inc. (859) 977-2501 offers long term, half-way house residential treatment for recovering chemically dependent women.
• University of Kentucky Family Center 859-257-7755.
• REFER Program 859-257-1467.

Many other services are available and may be located by looking in the local telephone directory yellow pages under “Social Services” or “Alcohol Abuse & Addiction – Information & Treatment” or in the section at the front of the telephone directory. Services may also be located by searching online.

Policy Review

This policy statement and any revisions thereto shall be distributed annually to students and employees. Distribution shall be the responsibility of the Vice President for Student Affairs and the Associate Vice President for Human Resources.

Annual Review Policy – The Vice President for Student Affairs and the Associate Vice President for Human Resources shall review and interpret policies and procedures relevant to this policy statement. These two administrators shall jointly be responsible for maintaining records of the annual review of the policy statement.

</table>

1 Designated as a narcotic under the CSA  
2 Not designated as a narcotic under the CSA
#A&S 100 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED. (1-6)
This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most three times under the A&S 100 number. Students may not repeat under the same title. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

#A&S 101 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED. (1-6)
This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most twice under the A&S 101 number. Students may not repeat under the same title. Offered pass/fail only. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

#A&S 103 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES I (Subtitle required). (3-5)
This course provides elementary language instruction with an emphasis upon the spoken language of everyday use where appropriate. Writing and the elements of grammar are gradually introduced. Students may not repeat this course under the same subtitle. Prereq: Will be set by instructor.

#A&S 104 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES II (Subtitle required). (3-5)
A continuation of #A&S 103. Students may not repeat this course under the same subtitle. Prereq: #A&S 103.

#A&S 110-A&S 119 SPECIAL INTRODUCTORY COURSE IN THE HUMANITIES (Subtitle required) (1-6)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 120-A&S 129 SPECIAL INTRODUCTORY COURSE IN THE NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required) (1-6)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 130-A&S 139 SPECIAL INTRODUCTORY COURSE IN THE SOCIAL SCIENCES (Subtitle required) (1-6)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 140 FOCUS: CONNECT AND RECOVER. (2)
This course is designed to assist students in preparation for the continuing academic rigor of coursework in the College of Arts and Sciences majors. Through lectures, discussions, exercises, and out-of-class assignments, #A&S 140: FOCUS: Connect and Recover will enable students to actively develop and maintain skill sets and study habits based on current educational practices and research linked to increased degree completion. Thematic activities will focus on personal and professional development, goal-setting, time management; and discovering and learning how to use college and university based support resources. Prereq: Permission of instructor.

#A&S 141 ASPIRE: ACADEMICALLY SOUND PREPARATION FOR INVOLVED RESEARCH EDUCATION. (3)
This course is designed to assist students in transitioning into majors in the College of Arts and Sciences with a focus on a deeper understanding of research and liberal arts education at a tier 1 research institution. Through lectures, discussions, exercises, and out-of-class assignments, #A&S 141 will enable students to actively develop and maintain skill sets and be prepared to make decisions relevant to their major and planned career path while also emphasizing the interdisciplinary nature of college learning. Prereq: #A&S Major; acceptance to Academic Dean Program.

#A&S 150 YOUR CAREER AND ACADEMIC JOURNEY. (2)
This course simplifies the complex process of choosing a major by leading students through personal, academic and occupational information searches. It offers a natural progression for decision-making by using thought-provoking self-exploratory activities. Whether choosing or changing a major, the discovery process examines different perspectives, such as relating interests, skills and values to academic and vocational fields of study. Once specific academic alternatives are identified, a search of occupational information helps students examine the career possibilities that specifically relate to the majors they are considering.

#A&S 203 INTERMEDIATE INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES I (Subtitle required). (3-5)
This course provides intermediate instruction in a less commonly taught language. Development of speaking, listening, reading, and writing skills, as appropriate, will be stressed. Students may not repeat this course under the same subtitle. Prereq: #A&S 104 in the same language or permission of instructor.

#A&S 300 SPECIAL COURSE (Subtitle required). (1-6)
Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Arts and Sciences. A particular course may be offered at most three times under the A&S 300 number, and no A&S 300 course may be given for more than six credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of 12 credit hours under different subtitles.

#A&S 306 SPIRIT CHEMISTRY (3)
In this course, students will explore the production of distilled spirits. The production of distilled spirits involves three basic steps: selection and processing of a carbohydrate (starch or sugar), fermentation of the carbohydrate to produce ethanol and distillation of the ethanol. In these processes, substances are produced and concentrated in the ethanol that create the unique flavors and fragrances associated with the individual spirit. Seven distilled spirits (moonshine, vodka, gin, rum, tequila, bourbon and scotch) will be discussed in detail. Prereq: Credit hours sufficient to be considered a junior or permission of the instructor.

#A&S 310-A&S 319 SPECIAL COURSE IN HUMANITIES (Subtitle required) (1-6)
An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 320-A&S 329 SPECIAL COURSE IN NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required) (1-6)
An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Natural, Physical, or Mathematical Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 330-A&S 339 SPECIAL COURSE IN SOCIAL SCIENCES (Subtitle required) (1-6)
An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 350 PERSONAL STRENGTHS AND YOUR CAREER DEVELOPMENT. (3)
This course is designed to introduce students to the fundamentals of planning and organizing career development strategies. Emphasis is placed on identification of individual goals,
A-E 120 PATHWAYS TO CREATIVITY IN THE VISUAL ARTS. (3)

Students will be challenged to think creatively, expand cognitive development, perception, self-expression, and sensory awareness through research and rich studio experiences. Aesthetic knowledge and skills will provide students with a pathway to learning that integrates prior knowledge with new experiences which enhance creative learning through discovery, discussion, and collaboration.

A-E 200 WORKSHOP IN DESIGN EDUCATION FOR ELEMENTARY TEACHERS. (3)

A lecture-laboratory course that explores and analyzes concepts in the visual arts and examines how these concepts might be used to improve and enhance learning opportunities in the visual arts and in various disciplines for elementary students.

A-E 300 INTRODUCTION TO ART EDUCATION. (3)

This course provides an introduction to the art teaching profession with particular emphases on the development of the creative, critical, collaborative, and communicative skills that are required in art teaching situations. Opportunities to gain skills will be provided through participation in group-generated projects and leadership activities. Students will engage in personal reflection and critical analysis of the teaching/learning process through journal-keeping, teacher portfolio development and creative research.

A-E 362 FIELD EXPERIENCES IN ART EDUCATION. (1-3)

A-E 362 is the first course in the Art Education professional education sequence. It gives the art education candidate the opportunity for a variety of planned experiences in the schools and other educational and community settings. Candidates will learn to identify standards and unbrided learning tools in school settings, and will develop a variety of products to demonstrate Art Education learning outcomes. 64 field experience hours are required for A-E 362. Prereq: Admission to the Teacher Education Program (TEP).

A-E 395 INDEPENDENT WORK: ART EDUCATION. (1-3)

Supervised individual research, practicum, and field experience leading to the development of art education curriculum theory, and teaching techniques appropriate for various populations and conditions. A learning contract will be submitted to both the department and to the office of the dean at the time of registration. May be repeated to a maximum of six credits. Prereq: Major and consent of instructor.

A-E 399 EXPERIENTIAL EDUCATION. (1-15)

Development of personally motivated and planned projects and internships in art education and interdisciplinary program activities outside the academic classroom experience, encompassing recreation, general education, adult education, special education, state programs, and group field experiences and workshops. May be repeated to a maximum of 15 credits. (Approval of Fine Arts dean required for more than six credits per semester.) Prereq: Recommendation of art faculty member and department chairman; completion of departmental learning agreement.

A-E 515 INTRODUCTION TO ART THERAPY. (3)

An examination of various historical and contemporary conceptions of the therapeutic function and value of art from an art education perspective. The impact of art experience on emotional, intellectual and behavioral development and or rehabilitation will be explored through readings, discussions, guest lectures, and lab experiences. Lecture, two hours per week; laboratory, two hours per week. Prereq: PSY 331 and major or consent of instructor.

A-E 538 ADVANCED ARTS AND CRAFTS IN THE ELEMENTARY SCHOOL. (3)

Planned to give the elementary teacher an understanding of teaching methods involved in, and construction of, art activities which would enrich the classroom program.

A-E 545 TOPICAL STUDIES IN ART EDUCATION (Subtitle required). (3)

Intensive study and analysis of a designated topic, issue or development in the philosophy, history, or methodology of art education in community and public school settings. May be repeated to a maximum of six credits. Prereq: Art education major or consent of instructor.

A-E 550 COMMUNITY ART EDUCATION. (3)

An examination of community arts organizations and the role they play in identifying and interpreting the diverse artistic needs of the community. The course will provide students with the tools to define, locate, and research community organizations as potential sites for art programming.
A-E 695 INDEPENDENT WORK: ART EDUCATION. (1-3) Supervised individual research, experimental practicum, and the initiation of field programs leading to the discovery and development of new knowledge in art education theory and method. A formal learning contract between student and supervising faculty member is required. May be repeated to a maximum of six credit hours. Prereq: Graduate standing in the department and consent of instructor.

A-E 748 MASTER'S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

A-H Art History

A-H 101 INTRODUCTION TO VISUAL STUDIES. (3) The course introduces students to the concepts and techniques of visual literacy. It explores a full spectrum of man-made visual forms encountered by contemporary Americans from architecture and works of art to graphic novels, advertisements, television programs and films, photos and the Internet.

†A-H 104 AFRICAN ART AND ITS GLOBAL IMPACT. (3) An introduction to the visual arts of civilizations prior to the Renaissance. Students will become familiar with selected monuments from cultures in Africa, Asia, the Pacific, the Americas and Europe, and will be able to evaluate the development of artistic practices within a tradition or comparatively between traditions.

A-H 106 RENAISSANCE TO MODERN ART. (3) An introduction to the history of European art and its legacy from the Middle Ages to the present. Students will become familiar with major works and monuments and develop an understanding of how art has functioned and evolved in the European tradition. As an introduction to the discipline of art history, the class develops student's ability to describe and analyze art and architecture using sophisticated terminology, and enables a student to connect works of art to specific social and historical contexts.

A-H 300 TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3) According to the subtitle, this course examines topics in art history and visual studies that are explicitly not limited by geographical location and/or period in history. Topics might be defined by subject matter, artistic practices and traditions, genres, and other comparable categories within art history and visual studies. May be repeated under a different subtitle for a maximum of six credits. Prereq: At least one Art History and Visual Studies course at the 100-level recommended.

A-H 301 CROSS-CULTURAL TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3) Depending on the subtitle, this course compares images and/or artifacts produced either in different cultural contexts or as a result of intercultural contacts and interchange. May be repeated under a different subtitle to a maximum of six credits. Prereq: At least one Art History and Visual Studies course at the 100-level recommended.

A-H 304 AFRICAN ART AND ITS GLOBAL IMPACT. (3) Throughout history, visual arts from the African continent (architecture, sculpture, paintings, body art, textiles, photography and performance) have inspired artists from around the world. This course examines a selection of specific African art works that have shaped European and American cultural histories, and created a global modernity. The earliest examples include ancient rock art, and the most recent are comprised of installations and digital works made by African artists working abroad. Prereq: A-H 105 recommended.

A-H 308 STUDIES IN AFRICAN ARTS (Subtitle required). (3) Depending on the subtitle, the course will focus upon arts connected to a particular period, theme, medium, region of Africa and the African Diaspora, or examine specific sets of images, themes, theoretical positions or media originating from, or associated with, the African continent. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 104 recommended.

A-H 310 ASIAN ART AND CULTURE (Subtitle required). (3) Depending on subtitle, a study of the art production of a particular medium, theme, period, or region in East Asia. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 311 THE ARTS AS SOFT POWER: THE JAPANESE TEA CEREMONY. (3) The term "soft power" was coined by Joseph Nye, a U.S. scholar of international relations. It is used to describe forms of influence used as alternatives to "hard power"—coercive acts such as war, threats, or economic sanctions. This course will investigate how soft power was used as a tool of diplomacy thousands of years before the term was invented, and explore examples of how it is used at the beginning of the 21st century. The course then will examine the Japanese tea ceremony (known as chajuyu or chado) and its domestic use as soft power among Japanese warlords in the late sixteenth century, its adoption as a way to modernize Japanese women in the nineteenth century, and its role in shaping Japan's international image in the twentieth century. Prereq: Sophomore standing or permission of the instructor.

A-H 314 ANCIENT (Subtitle required). (3) Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be selected periods or media of art and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as CLA 314.)

A-H 323 MIDDLE Ages (Subtitle required). (3) Considers the interrelationships of art and architecture with religion, literature, politics, and other expressive forms as they shape and are shaped by medieval patrons and artists between the fourth and fifteenth century C.E., according to subtitle. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 334 REFRAMING RENAISSANCE ART. (3) An exploration of Renaissance artistic production as a European phenomenon of dynamic interchange between European artistic centers, artists, and trade in works of art. Besides painting, sculpture, and architecture, the study of Renaissance visual culture is expanded to include prints and the decorative arts. While the achievements of individual artists are considered, focus is placed on the values and motives of the patrons as well as the purposes and functions of art works. Prereq: Sophomore standing or permission of the instructor.

A-H 335 EARLY MODERN ART AND VISUAL CULTURE, 1400-1700 (Subtitle required). (3) According to the subtitle, this course examines various aspects of the social, political, cultural, and aesthetic contexts of European art and visual culture. Issues of production and reception, style and function, artist and viewer, and European interactions with non-European cultures will be considered. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 101 or A-H 106 recommended.

A-H 339 ART AND VISUAL CULTURE 1700-1840 (Subtitle required). (3) Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1700 and 1840. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 106 recommended.

A-H 340 ART AND VISUAL CULTURE 1840-1914 (Subtitle required). (3) Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1840 and 1914. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 106 recommended.

A-H 341 20TH CENTURY (Subtitle required). (3) Depending on subtitle, this course examines aspects of 20th century art in its social, political, and aesthetic contexts. May be repeated under a different subtitle for a maximum of six credits. Prereq: A-H 106 recommended.

A-H 342 AMERICAN ART & VISUAL STUDIES (Subtitle required). (3) According to the subtitle, this course examines various aspects of American art & visual culture in their social, political, and aesthetic contexts between the 18th and the early 21st centuries. Topics range from the traditional fine arts media to photography, advertising, film, and various forms of popular culture. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 343 HISTORY OF PHOTOGRAPHY. (3) Chronological survey of the history of photography from its inception to the present day. Emphasis on fine art photography, the work and contributions of its practitioners, the relationship of photography to other art forms, general issues within the medium. Prereq: A-H 106 recommended.

A-H 350 CONTEMPORARY ART AND VISUAL STUDIES (Subtitle required). (3) According to the subtitle, this course examines various aspects of art and visual culture in their social, political, theoretical, and aesthetic contexts after 1965. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 360 VISUAL CULTURE OF POLITICS. (3) The course examines specific instances of visual political discourse across a range of historic periods, cultural contexts, political positions, and media. Although a significant portion of the historic part of the course focuses on works of art and architecture, the course also examines popular print culture and political use of mass media from film to television and Internet. Some of the themes covered in the course are: symbols and symbolism of political power, imagery of specific political values, emotional appeal, political propaganda, politics of gender and race, and visual strategies of political opposition and resistance.

A-H 399 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-15) A community-based or field-based experience in Art History. A formal learning contract among student, field supervisor, and supervising faculty member required. May be repeated to a maximum of 15 hours. Prereq: Any 100-level course in Art History and Visual Studies.

A-H 501 MUSEUM STUDIES I: INTRODUCTION. (3) An introduction to museology and the museum profession as related to a particular exhibition project. Intended for advanced students in arts related professions. Seminar format, coordinated with the University of Kentucky Art Museum Staff. Prereq: Major in art history or arts administration (with art history emphasis), or consent of instructor.
A-H 502 MUSEUM STUDIES II: INTERNSHIP. (3)
A supervised internship in a professional museum setting that builds upon Museum Studies I. The focus may be on a single aspect or several areas of museum activity: administration, curatorship, education, registration and collection management, design, development, public relations, etc. Laboratory, 10 hours per week. May be repeated to a maximum of 9 credits within different contexts. Prereq: Completion of A-H 501 with a grade of B or better.

A-H 504 PRACTICAL ISSUES IN ART HISTORY (Subtitle required). (3)
This course examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. Students engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing and at least one course in Art History and Visual Studies.

*A-H 510 ART HISTORY AND VISUAL STUDIES HONORS THESIS. (3)
Faculty-sponsored research projects for Art History and Visual Studies Majors, leading to an Honors Thesis. Enrollment is offered only to outstanding undergraduate majors with a project in progress, including students who are accepted into the University Scholars Program. Topics to be determined. Prereq: A-HVS major and CFA learning contract, approved by faculty sponsor.

A-H 524 THEORY AND METHODS. (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of the instructor.

A-H 525 STUDIES IN GENRES AND MEDIA (Subtitle required). (3)
Study of a particular genre (type of subject, such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 526 ART AND THE ARTIST IN SOCIETY (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 527 INTERDISCIPLINARY APPROACHES (Subtitle required). (3)
Study of artistic and other visual production of a period, geographical location, theme, or medium, with emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of instructor.

A-H 528 TOPICAL SEMINAR IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
An in-depth study of works of art and visual culture, the study of a specific period, geographic location, medium, or theme, or the study of ideas or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing.

A-H 529 TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)
According to subtitles, seminar will focus on developments, problems, or issues in architectural or design history. Subtitle required. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Junior standing.

A-H 555 METHODS IN ART HISTORY AND VISUAL STUDIES. (3)
A seminar that reviews basic research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a range of methodological approaches to the study of objects, environments, and images, students develop and refine the practical skills needed to conduct and present their research. Prereq: Junior status and at least two courses in Art History and Visual Studies at the 300-level, or permission of the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

A-H 592 AESTHETICS. (3)
Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts, in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. (Same as PHI 592.)

A-H 598 COORDINATE STUDY IN ART HISTORY AND VISUAL STUDIES. (3)
Course number for those students wishing to do advanced work on a special subject in conjunction with a regularly scheduled 300-level course in Art History and Visual Studies not previously taken by the student. May be repeated to a maximum of nine credits. Prereq: Two courses in Art History and Visual Studies or permission of the instructor.

A-H 599 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-9)
Internship with a university, community, state, regional or national organization that provides practical work experience related to art history and/or visual studies. The internship is identified by the student, conducted under the supervision of the on-site supervisor, and evaluated by a faculty advisor. Students must file a learning contract with the College of Fine Arts to register for the course. May be repeated to a maximum of nine credits. Prereq: Two art history courses at the 500-level, or graduate status, or permission of the instructor.

A-H 604 PRACTICAL PROBLEMS IN ART HISTORY: (Subtitle required). (3)
A seminar that examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. Students engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 624 THEORY AND METHODS: (Subtitle required). (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 625 PROBLEMS IN GENRES AND MEDIA: (Subtitle required). (3)
Study of a particular genre (type of subject), such as still life or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 626 THE ARTIST IN SOCIETY: (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 627 INTERDISCIPLINARY PROBLEMS: (Subtitle required). (3)
Seminar that focuses on the artistic and other visual production of a period, geographical location, theme, or medium with an emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 628 ART HISTORY AND VISUAL STUDIES TOPOGRAPHICAL SEMINAR: (Subtitle required). (3)
In-depth study of works of art and visual culture, the study of a specific period, geographical location, medium or theme, or the study of ideas and/or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 629 ART HISTORY TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)
According to subtitles, seminar will focus on developments, problems or issues in architectural or design history. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Graduate standing.

A-H 655 ADVANCED RESEARCH METHODS IN ART HISTORY AND VISUAL STUDIES. (3)
This course practices research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a selection of methodological approaches to the study of art and images, graduate students will refine the practical skills to conduct and present their own research. Prereq: Graduate status in SAVS.

A-H 738 MASTER'S PORTFOLIO PREPARATION. (1-3)
Plan B candidates for the M.A. in Art History may use this course number to execute and receive credit for a plan of preparation for the M.A. non-Thesis Portfolio. College of Fine Arts Learning Contract required.

A-H 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

A-H 768 THESIS FORMULATION AND PREPARATION IN ART HISTORY. (3)
Independent study for art history graduate students to formulate and prepare master’s thesis under the direction of their thesis advisor. A formal learning contract between student and thesis advisor is required. May be repeated to a maximum of six credits. Prereq: Art History graduate student completing thesis option (Option A).

A-H 780 INDEPENDENT WORK: ART HISTORY. (1-3)
Supervised and sustained individual research and interpretation in the history of art leading to the discovery and demonstration of new knowledge. A formal learning contract between student and supervising faculty member required. May be repeated to a maximum of six credits. Prereq: Graduate standing in the department, 18 credits in art history and consent of instructor.

A-S Art Studio

A-S 001 FOUNDATION EXHIBITION. (0)
An annual exhibition where all first-year Foundation students will select and exhibit one of their own work, present it professionally, and provide an accompanying artist’s statement. The exhibition will occur each spring semester. Grade: P or F. Prereq or concur: A-S 101, A-S 102 and A-S 130.
A-S 101 CREATIVITY PRACTICES IN ART STUDIO. (1)
This seminar course for incoming Art Studio and Art Education majors is designed to develop creative problem-solving and orient students to the Department and University. Through discussion, in-class exercises, and out-of-class assignments, students will gain knowledge of arts-related resources and programming at UK and in the local community. Students will acquire skills for a sustained career in the visual arts, including an introduction to professional practices and portfolio development. Art Studio and Art Education Majors only; no prerequisites.

A-S 102 TWO-DIMENSIONAL SURFACE. (3)
A broad, cross-disciplinary studio course exploring design elements and principles as the basic means of organizing two-dimensional space. Each student develops the ability to form strategies, concepts and ideas to enhance creativity and articulate personal expression.

A-S 103 THREE-DIMENSIONAL FORM. (3)
A broad, cross-disciplinary studio course exploring the elements and principles of designing in the round. Basic concepts involving three-dimensional design in visual art will be explored through discussion and the creation of spatial forms. Special emphasis will be given to the creative process in problem solving.

A-S 130 DRAWING. (3)
A broad, cross-disciplinary studio course exploring the visual language of drawing through observation. Students learn the mechanisms of visual perception, how individual components of a drawing relate to the organization of the composition as a whole. Each student develops not only observational skills rooted in traditional drawing media for realistic renderings, but also gradually builds strategies, concepts, and ideas for abstract expression.

A-S 200 INTRODUCTION TO DIGITAL ART, SPACE AND TIME. (3)
This course provides fundamental instruction in digital media as a creative tool. Students will learn the basics of digital collage, video editing and sound design. An overview of historical and contemporary digital art practice will be presented as well as elements of designs and composition. Four studio hours and one 50-minute lecture per week.

A-S 201 PROFESSIONAL PRACTICES IN ART STUDIO. (1)
This course is designed to assist Art Studio and Art Education majors in developing practical skills needed to create a successful, professional practice in the visual arts. Students are required to prepare a portfolio emphasizing written, oral, and visual presentation and documentation skills. The course will include developing resumes, artist and biographical statements, community engagement, networking, and locating exhibition opportunities. Art Studio and Art Education majors only. PreReq: A-S 101, A-S 102, A-S 103, A-S 130, and A-S 200; or consent of instructor.

A-S 245 INTRODUCTION TO WEB DESIGN. (3)
An introductory level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the Internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week.

A-S 270 CERAMICS FOR NON-MAJORS. (3)
This is a studio course that explores the arts and creativity through the discipline of ceramics. An overview of historical and contemporary ceramic art practices will be presented as well as the basics of design and composition. Using hand building and wheel throwing techniques, students will explore the sculptural and functional potential of clay as an object-making medium. No prerequisites.

A-S 280 INTRODUCTION TO PHOTOGRAPHIC LITERACY. (3)
Students are introduced to photography, through both the study of its history and the practice of making photographs. The historical portion will focus on both photographic literacy and aesthetics. The practice will take students through various styles, genres and technical aspects of the medium.

A-S 285 LENS ARTS. (3)
A-S 285 is an introductory course in digital image making that focuses on the still and moving image as an art practice. Students will learn the fundamentals of cameras operation and still and moving image editing software in order to build an individualized portfolio. Students will be introduced to contemporary lens arts practice through research and assignments.

A-S 300 DIGITAL PHOTOGRAPHY. (3)
A-S 300 is an introductory course in digital photography as a creative tool. The primary emphasis is the practice of photography as fine art. This course also provides a thorough background in basic techniques that students may apply to any photographic discipline as well as historical and theoretical approaches to photography. Students receive technical instruction in the DSLR camera, lens choice, exposure controls, digital workflow, processing of digital files, output and presentation. Students must have a DSLR camera. Studio 9 hours per week.

A-S 305 STUDIO LIGHTING. (3)
A-S 305, Studio Lighting is an introductory course in lighting control in photography. This course provides a thorough background in basic techniques that students may apply to any discipline, with its primary emphasis upon the practice of the medium as a fine art. Students will receive technical instruction in types of lighting, exposure controls, lighting styles and working in a photographic lighting studio. PreReq: A-S 300 or consent of instructor.

A-S 310 PAINTING I. (3)
Concentrated painting experience stressing enlargement of formal understanding and personal expression. PreReq: A-S 102 and A-S 130.

A-S 311 PAINTING II. (3)
A continuation of A-S 310. PreReq: A-S 310 and consent of the instructor.

A-S 320 PRINTMEDIA: SCREENPRINT/RELIEF. (3)
Students will learn the skills necessary to create screen and relief prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editionable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. PreReq: A-S 130 or consent of instructor.

A-S 321 PRINTMEDIA: INTAGLIO/LITHOGRAPHY. (3)
Students will learn the skills necessary to create Lithography and Intaglio prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editionable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. PreReq: A-S 130 or consent of instructor.

A-S 322 SCREEN PRINTING. (3)
Intensive studio experience in serigraph printmaking processes and history relevant to contemporary practices in the medium. Six studio hours per week. PreReq: A-S 320.

A-S 330 INTERMEDIATE DRAWING. (3)
Continued studio experience in two-dimensional representation and abstraction using a variety of drawing materials and processes. When offered in the fall, emphasis will be on the human figure. When offered in the spring, course content will cover a broad range of traditional and experimental subjects including landscape, still lifes, collage, and mixing words with images. May be repeated to a maximum of six credits. Nine studio hours per week. PreReq: A-S 102 or consent of instructor.

A-S 331 EXPLORATION OF HUMAN FORM. (3)
Students strengthen drawing skills through observation and in experimentation with process and strategy. Students gain a better understanding of design and composition in relationship to overall outcome of drawing and explore a range of drawing materials. PreReq: A-S 102 and A-S 130.

A-S 340 INTRODUCTION TO GRAPHIC DESIGN, MEANING AND IMAGE. (3)
An introductory level course in graphic design, meaning and image. Students will be introduced to the study of typography, illustration, and layout design, as well as the social, political, and historical impact of graphic design. Technical and theoretical issues pertinent to the field will be presented.

A-S 341 GRAPHIC DESIGN: LAYOUT. (3)
Students prepare professional quality assignments in lettering, pictogram systems, logos, and corporate identity design, line art, and cartoons for advertising illustration, as well as solutions for posters, billboards, folders, storyboards, and cover illustration. Nine studio hours per week. PreReq: A-S 340 (with a grade of B or better) and Portfolio Review.

A-S 345 WEB DESIGN. (3)
An intermediate level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week. PreReq: A-S 200 or consent of instructor.

A-S 346 DIGITAL VIDEO. (3)
An intermediate level course in which students learn advanced video compositing methods, image control and key effects in the digital world specific to the Final Cut Pro or like environments. Basic and advanced titling and graphic animation are explored as well as storyboarding, sound design and title effects. This course explores various video editing styles. Work is collaborative and individual. Nine studio hours per week. PreReq: A-S 200 or consent of instructor.

A-S 347 MULTIMEDIA (Subtitle required). (3)
An intermediate level course that allows students to explore a variety of programming environments. Programming topics may include video, audio and/or still images with net based or physical installation based output. This class builds on students’ previous experiences with digital media production and introduces programming to their tool pallet. Fundamentals of computer programming are presented, supplemented by historical readings and discussions of art theory dealing with the use of digital technologies in artistic context. Nine studio hours per week. May be repeated to a maximum of nine hours when identified under a different subtitle. PreReq: A-S 200 or consent of instructor.

A-S 348 CIRCUITS & BITS: INTRODUCTION TO HARDWARE AND SOFTWARE TOPICS IN ARTS. (3)
A broad, cross-disciplinary, multimedia studio course designed to teach students custom software creation and electronics fabrication in an art environment. Technical information is presented in conjunction with art historical and theoretical issues. Students will be introduced to a skill-set needed to create interactive artworks. PreReq: A-S 200, or junior standing (or above) in the College of Design, or consent of the instructor.

A-S 350 FIBER I. (3)
Introductory studio experience to the design and fabrication of woven and non-woven fiber art in two or three dimensions; emphasis on color, structure and related aesthetic values. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. PreReq: A-S 102 or A-S 130 or consent of instructor.
- A-S 351 FIBER II. (3)
  Continuation of A-S 350, emphasis on developing perceptual and technical skills toward increasing aesthetic involvement in two or three dimensions with woven and non-woven fiber and fabric. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. Prereq: A-S 350 or consent of instructor.

- A-S 355 INTRODUCTION TO SCULPTURE. (3)
  Emphasis is placed on developing a sense of 3D techniques, tools and materials as students create sculptures dealing with movement, emotions, narrative and non-objective/art subject matters. Sculptural concepts are explored through individual research, critical discussions and art production. Students experiment with mixed-media, and surface finishing. Prereq: A-S 103.

- A-S 360 INTRODUCTION TO HOT METALS: FABRICATION. (3)
  A-S 360 is an introductory course in metal working skills, techniques and processes for producing sculptural art based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.

- A-S 361 INTRODUCTION TO HOT METALS: CASTING. (3)
  Art Studio 361 is an introductory course in metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: casting and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.

- A-S 370 CERAMICS I. (3)
  Introductory studio experience to a variety of ceramic materials and processes. Nine studio hours per week. Prereq: A-S 103 or consent of instructor.

- A-S 371 CERAMICS II. (3)
  A continuation of A-S 370. Nine studio hours per week. Prereq: A-S 370 or consent of instructor.

- A-S 380 BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)
  A-S 380 is an introductory course in photography. Although it provides a thorough background in basic techniques that students may apply to any discipline, its primary emphasis is upon the practice of the medium as a fine art. Students receive technical instruction in camera and lens construction, exposure controls, processing of black and white negatives and prints, and presentation. Studio, nine hours per week.

- A-S 381 ADVANCED BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)
  A-S 381 is a continuation of A-S 380. The emphasis is upon refining visual perception and basic photographic skills with an introduction to some of the advanced techniques of black and white photography. Students receive technical instruction in the Zone System, archival processing, toning, and presentation. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.

- A-S 384 COLOR PHOTOGRAPHY I. (3)
  A-S 384 is an introductory course in color photography. The emphasis is upon the unique qualities of color photography relating to visual perception. Students receive technical instruction in negative and transparency film development and printing. Studio, nine hours per week.

- A-S 385 DIGITAL METHODS FOR PHOTOGRAPHY. (3)
  An intermediate level course designed to help students integrate traditional silver-based photography processes with new digital computer imaging tools such as Adobe Photoshop or like program. Students are required to produce original photographic imagery for use in creating digital artwork output to printed material with inkjet printers. Advanced methods of input and output calibration, as well as advanced methods of image manipulation, are covered. Emphasis is placed on the aesthetics and ethics of digital photographic art and creating meaningful and effective images. Nine studio hours per week. Prereq: A-S 200 and A-S 380 or A-S 300 or permission of instructor.

- A-S 386 NONSILVER PHOTOGRAPHY I. (3)
  A-S 386 is an introductory course in nonsilver photography. The emphasis is upon the unique qualities of nonsilver photography relating to visual perception. Students receive technical instruction in the use of orthochromatic films, half-tone separations, cyanotypes, Van Dyke brown prints, and gum-bichromate prints. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.

- A-S 387 TOPICS IN PHOTOGRAPHY (Subtitle required). (3)
  An intermediate level course that allows students to explore a variety of lens based or photographic artistic topics. This class builds on students' previous experiences with photographic media. The class is supplemented by historical readings and discussion of art theory dealing with the use of photographic technology in an artistic context. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: Will be designated with subtitle or consent of instructor.

- A-S 390 TOPICAL STUDIES (Subtitle required). (3)
  Studio investigation of art forms, processes, and topics not specially treated in the regular studio course of study. Topics announced in schedule book for each semester. Nine studio hours per week. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: To be specified as appropriate when topic is identified.
Course Descriptions

A-S 550 FIBER III. (3)
Supervised individual development in fiber. Nine studio hours per week. Prereq: A-S 351 or consent of instructor.

A-S 551 FIBER IV. (3)
Continuation of A-S 550; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 550 or consent of instructor.

A-S 560 ADVANCED HOT METALS: FABRICATION. (3)
Art Studio 560 is an advanced level course, continuing metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 360 or consent of instructor.

A-S 561 ADVANCED HOT METALS: CASTING. (3)
Art Studio 561 is an advanced course in metal working skills, techniques and processes for production sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 361 or consent of instructor.

A-S 570 CERAMICS III. (3)
Supervised individual development in ceramics. Nine studio hours per week. Prereq: A-S 371 or consent of instructor.

A-S 571 CERAMICS IV. (3)
Continuation of A-S 570; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 570 or consent of instructor.

A-S 580 PHOTOGRAPHY PROJECTS I. (3)
A-S 580 is a photography based project course. The emphasis of this course is on the expansion of photographic techniques, self-expression, and long-term project development. Prereq: Any of the following: A-S 381, A-S 384, A-S 385, A-S 386, A-S 305 or consent of instructor.

A-S 581 PHOTOGRAPHY PROJECTS II. (3)
A-S 581 is a continuation of A-S 580. The emphasis of this course is advanced exploration and experimentation of photographic techniques, self-expression, and long-term project development in preparation for student’s future success in independent research. May be repeated to a maximum of six credits. Prereq: A-S 580 or consent of instructor.

A-S 584 COLOR PHOTOGRAPHY. (3)
A-S 584 is a continuation of A-S 384. The emphasis is upon advanced color photographic processes and continued acquisition of skills for self-expression through the medium. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 384 or consent of instructor.

A-S 586 NONSILVER PHOTOGRAPHY II. (3)
A-S 586 is a continuation of A-S 386. The emphasis is upon advanced nonsilver photographic processes and continued acquisition of skills for self-expression through the various media. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 386 or consent of instructor.

A-S 587 ADVANCED TOPICS IN PHOTOGRAPHY (Subtitle required). (3)
An advanced course focusing on a specific area or topic of lens based or photographic arts emphasizing personal development of the technical, conceptual and technical skills. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under different subtitle. Prereq: Will be designated with subtitle or consent of instructor.

A-S 596 WORKSHOP. (1-6)
Workshops in a variety of media dealing with supervised investigation of advanced art studio problems. Prereq: Consent of instructor.

A-S 610 PAINTING V. (3)
Advanced studio investigation of current ideas in painting. Exploration of contemporary and traditional procedures, materials, and issues in a context of a group discussion and review. May be repeated to a maximum of nine credits. Prereq: Graduate standing in the department and approval of the instructor.

A-S 611 PAINTING VI. (3)
Continued studio investigation of current ideas in painting, with increased concentration on critical group discussions of student work and readings in contemporary art. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 610 and consent of instructor.

A-S 620 PRINTMAKING V. (3)
Advanced studio investigation of current ideas in printmaking. Exploration of contemporary and traditional procedures, materials, and issues. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: Graduate standing in the department and consent of the instructor.

A-S 621 PRINTMAKING VI. (3)
Continued advanced studio investigation of current ideas in printmaking. Increased concentration on technical and aesthetic development in preparation for entry into the professional environment. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 620.

A-S 630 GRADUATE DRAWING. (3)
Supervised studio course in graduate-level drawing and mixed media. Works on paper or other two-dimensional surfaces. Emphasis will be placed on personal style, its identification, definition, and further development in the context of contemporary drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 646 ADVANCED INTERMEDIA STUDIO (Subtitle required). (3)
A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits when identified by the same subtitle. Nine studio hours. Prereq: A-S 540 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

A-S 650 FIBER V. (3)
In this supervised graduate studio course in fiber, emphasis will be placed on personal style, its identification, definition, and further development in the context of modern sculpture. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 651 FIBER VI. (3)
Continued advanced studio investigation of current ideas in the fiber arts. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 650.

A-S 660 SCULPTURE V. (3)
In this supervised studio course in graduate sculpture, emphasis will be placed on personal style, its identification, definition, and further development in the context of modern sculpture. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 661 SCULPTURE VI. (3)
Continued advanced studio investigation of current ideas in sculpture. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 670 CERAMICS V. (3)
In this supervised studio course in graduate ceramic, emphasis will be placed on personal style, its identification, definition, and further development in the context of direction in modern ceramics. Studio, nine hours per week. Prereq: A-S 670.

A-S 680 PHOTOGRAPHY V. (3)
A-S 680 is a continuation of A-S 581. In this supervised studio course in graduate photography, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 581 and consent of instructor.

A-S 681 PHOTOGRAPHY VI. (3)
A-S 681 is a continuation of A-S 680. The emphasis will be upon continued advanced studio investigation of current ideas in photography with increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 680 and consent of instructor.

A-S 687 GRADUATE TOPICS IN PHOTOGRAPHY (Subtitle Required). (3)
A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in a specified topical area of lens based or photographic arts. May be repeated to a maximum of nine credits when identified under a different subtitle. Six studio hours. Prereq: Graduate standing.

A-S 710 PROBLEMS IN PAINTING. (3)
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of painting. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 720 PROBLEMS IN PRINTMAKING. (3)
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of printmaking. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.
A-S 730 PROBLEMS IN DRAWING. (3) Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 740 PROBLEMS IN FIBER. (3) Sustained individual problems and experimental work in the technical and theoretical problems of fiber. May be repeated to a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 750 PROBLEMS IN SCULPTURE. (3) Sustained individual problems and experimental work in the technical and theoretical problems of sculpture. May be repeated to a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 767 M.F.A. STUDIO THESIS PROJECT. (1-6) Independent research and preparation for the M.F.A. thesis exhibition. For the student working in a highly technical medium or process, the preparation of a related written thesis under close guidance will be the outcome. The student will be expected to know the standard forms for photographic records and the preparation of a professional portfolio. May be repeated to a maximum of six credits. Prereq: Normally taken during final semester for graduate study.

A-S 770 PROBLEMS IN CERAMICS. (3) Sustained individual problems and experimental work in the technical and theoretical problems of ceramics. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 777 PROBLEMS IN INTERMEDIA. (3) A studio course specially designed for independent graduate research emphasizing individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 779 PROBLEMS IN PHOTOGRAPHY. (3) A-S 779 emphasizes sustained individual problems and experimental work in the technical and theoretical problems of photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 780 PROBLEMS IN DESIGN. (3) Sustained individual problems and experimental work in the technical and theoretical problems of design. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 793 GRADUATE STUDIO SEMINAR. (3) A studio seminar for graduate students in the studio area, in all areas of concentration. Lectures, discussion and criticism will focus on current formal and theoretical problems in the arts. Emphasis will be placed on the integration of concepts and practices arising in the different fields in the visual arts with critical discourse through monthly group critiques. Required of M.F.A. candidates every Fall semester of their residency. May be repeated to a total of 12 credits. Prereq: Graduate standing in the department.

A-S 795 INDEPENDENT RESEARCH. (1-3) Advanced studio investigation of art forms, processes, and topics not especially treated in the regular curriculum. May be repeated to a maximum of nine credits. Studio, three hours per week per credit. Prereq: Twelve credits in upper division studio work and consent of instructor.

AAD Arts Administration

AAD 150 EXPLORING ARTS ADMINISTRATION. (3) Exploring Arts Administration introduces the field of arts administration to students interested in investigating the connections between art, artists, and audiences through participation in class discussions, engagement with guest lectures, and attendance of arts events. The questions that drive this inquiry include: What is the work of the arts in society? What intellectual inquiry will guide me within the profession? What are the organizational structures that present the arts? And how do I begin to participate within the profession?

AAD 200 ARTS ADMINISTRATION COMMUNICATIONS. (3) Arts Administration Communications guides students to master the primary writing styles and communication skills in the field of arts administration that they will be using throughout the remainder of their arts administration courses and into their careers. The course introduces students to different communication styles and dynamic processes through comprehending concepts and communicating them in verbal, nonverbal, written, visual, listening, and new media communications. In addition, internal and external communication systems and styles are emphasized through concepts and practices in interpersonal, team, organizational, and community communications. Furthermore, communication issues and cultural diversity in communication styles will be explored in this course. Prereq: Completion of CIS 110 or WRD 110.

AAD 250 DIGITAL DESIGN FOR ARTS ADMINISTRATORS I. (3) Effective visual communication has become vital for business in today’s global market. AAD 250: Digital Design for Arts Administrators I will explore the powerful graphic and visual design programs of Adobe Photoshop, InDesign, Illustrator and iMovie. Students will develop an ‘eye’ for design through the exploration of advanced design software, advanced design elements, and peer critiques. Students will demonstrate basic design skills through design projects for both print and the web. Prereq: Enrollment limited to AAD pre-majors prior to add/drop.

AAD 260 DIGITAL DESIGN FOR ARTS ADMINISTRATORS II. (3) A successful organization will have a beautiful and creative online presence through the digital realms of blogging, eNewsletters, and website design. In AAD 260: Digital Design for Arts Administrators II, students will explore topics such as branding, marketing, color theory, and digital analytics. Specifically, students will learn the process of designing, building and maintaining a website that meets an organization’s needs. The course will also examine the legal, philosophical, societal and technological issues relevant to delivering information in the 21st century. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of the instructor.

AAD 299 ARTS ADMINISTRATION INTERNSHIP ORIENTATION. (1) All students in Arts Administration are required to complete 6 credit hours of internship work. Internships provide an experiential learning opportunity for students to experience real-world circumstances in the arts. AAD 299: Arts Administration Internship Orientation is designed to prepare students for their internship experience. Topics include searching for an internship, resume and cover letter construction, interviewing skills, and professionalism in the work place. Students must complete AAD 299 before they may register for internship hours. Prereq: Completion of AAD 150, 200, and 250, or consent of instructor.

AAD 300 MANAGEMENT AND PLANNING FOR THE ARTS. (3) Arts organizations are inherently collaborative. Arts administration students need to understand the concepts and theories of leadership, management and collaboration in order to collaborate effectively in the ever-changing and adaptive environment of arts organizations. AAD 300: Management and Planning for the Arts will explore the principles of arts management, management theory and practice, organizational structure and communication, decision-making and accountability, human resource management and volunteer administration, and ethics and social responsibility. Additionally, students will study various approaches to conducting strategic planning, using SWOT analysis, as well as identification of strategic issues and the formulation of strategic plans. Prereq: AAD 150 and AAD 200.

AAD 310 MARKETING FOR THE ARTS. (3) Connecting and communicating with current and prospective arts audiences is essential for ensuring a strong future for the arts. AAD 310: Marketing for the Arts offers an overview of marketing, advertising, and promotion for visual and performing arts institutions. Students will learn the processes and strategies for building audiences for the arts through market research, marketing principles, and communication techniques. Topics include audience development, market segmentation, positioning strategies, marketing plans, media coverage, and promotion techniques. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of instructor.

AAD 320 FUNDRAISING FOR THE ARTS. (3) In the United States, a significant amount of nonprofit arts organizations’ income comes from unearned revenue through fundraising. Without substantial knowledge and skills specific to fundraising in the nonprofit sector, arts organizations may not be able to sustain themselves long-term. This course prepares students to understand the function of fundraising in arts organizations and helps them pursue careers in fundraising and development within the nonprofit arts sector. Furthermore, this course will guide students through the key theories, principles, processes, and programs of fundraising. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of instructor.

AAD 350 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS. (3) Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of “mission to money” is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 350: Financial Management for Arts Organizations I is the first of two courses that will guide students through the key conceptual areas of financial management. Part I includes understanding the basic principles of accounting, legal reporting requirements, reading financial statements and interpreting performance measurements. Prereq: Completion of AAD 200, AAD 300 and UK Core Quantitative and Statistical requirements or consent of the instructor.

AAD 350 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS II. (3) Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical, and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of “mission to money” is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 370: Financial Management for Arts Organizations II is the second of the two financial management courses that will guide students through the key conceptual areas of financial management. Part II includes creating mission-driven budgets, developing cost-benefit analyses, managing cash flow, endowment and capital management, and understanding the use and purpose of economic impact studies. Prereq: AAD 350.
Course Descriptions

AAD 390 PROGRAMMING AND EVENT PLANNING. (3)
Arts programming and events are at the core of all arts and cultural organizations. AAD 390: Programming and Event Planning will prepare students for planning and implementing arts programs and events by considering organizational mission and vision, planning processes and logistics; collaboration and individual responsibilities; marketing and fundraising strategies, budget management; and evaluation. Students will be introduced to relevant programming theory and research methodologies for planning and evaluating arts programs. Prereq: AAD 310 and AAD 320, or consent of instructor.

AAD 399 ARTS ADMINISTRATION PRACTICUM. (1)
Under the supervision of a faculty member, students complete on-campus arts administration service projects at BAT. These projects must be in service to the student’s primary art discipline’s department or school. Examples of projects might include conducting a publicity campaign for an event, working on a fundraiser, producing a publication, conducting research, updating a website, etc. Pass/fail option only. Learning contract required. Prereq: Arts Administration major or consent of instructor.

AAD 402 TOPICS IN ARTS ADMINISTRATION (Subtitle required). (3)
A seminar which covers special topics in arts administration. May be repeated to a maximum of 12 credits when identified by different subtitles. Prereq: Completion of AAD 200, AAD 202 and one of the following: CIS 111 or WRD 111, or consent of instructor.

AAD 410 ARTS ENTREPRENEURSHIP.
Beginning at the point of invention, Arts Entrepreneurship will move from the sketch of a shared creative idea and create impact upon our community through original arts programming built upon a shared mission. Driven by the shared belief that creativity is the seed of hope, “Art in Unlikely Places” connects inspiring artists to those most in need of the transformative powers of the arts – orphans, prisoners, the ailing, the impoverished, the elderly, and the distraught, sharing beauty with those whose lives might otherwise be absent of the hope experienced in the artistic moment. Prereq: Completion of AAD 300, AAD 390 and one or more of the following: AAD 310 and AAD 320, or consent of instructor. Students enrolled in the Certificate in Innovation and Entrepreneurial Thinking may enroll without the prerequisite courses.

AAD 420 ARTS ADMINISTRATION: PRACTICES, POLICIES AND THE LAW.
Artists and arts administrators are required to work within current cultural, business and legal environments. Thus, students in AAD 420 Arts Administration: Practices, Policies and the Law will discuss cultural policy, management and legal issues that affect the arts, arts organizations and artists. Topics include cultural policy, funding, advocacy, arts and community, First Amendment, intellectual property, organizational structure, contracts, labor, unions and employee relations. Students will analyze contemporary and historical case studies to expose the cultural, legal and business issues that frame the arts in today’s society. Prereq: Completion of AAD 200 and AAD 300, or consent of instructor.

AAD 450 ARTS ADMINISTRATION SENIOR SEMINAR. (3)
As an advanced seminar course, this course prepares students to enter the job market or pursue graduate studies. It builds upon the other courses in the curriculum as well as practicum and internship experiences. During the course, students will work to revise and prepare electronic portfolios based on written and graphic materials prepared throughout their degree program. Additionally, students will write and critique cover letters and resumes and prepare for job interviews and negotiations. Prereq: Completion of all pre-major requirements, all 200 level AAD courses, AAD 300, AAD 310, AAD 320 and AAD 330. The course should be completed in the final year of a student’s program. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

AAD 499 INTERNSHIP IN ARTS ADMINISTRATION. (1-12)
AAD 499: Internship in Arts Administration is designed to provide each student with the opportunity to utilize classroom knowledge in a practical, real-world setting with the support of both an on-site supervisor and a faculty advisor. The internship experience allows students to develop skills and knowledge beyond the classroom. May be repeatable for a maximum of 12 credit hours. Prereq: Completion of AAD 299. Controlled enrollment; Arts Administration Learning Contract is required.

AAD 520 THE ARTS AND ARTISTS IN SOCIETY. (3)
The arts and artists have influenced concepts of love, war, religion, race, ethnicity and gender and helped societies face problems, celebrate accomplishments, mourn losses, beautify environment and drive economies. The course will investigate the intersection of arts and civic life. Through writing research papers, exploring topics including the intrinsic and extrinsic value of the arts, and through analyzing social, economic and political trends, students will learn the role of the arts and artists in historical and contemporary society. Prereq: Undergraduate Arts Administration students: senior status.

AAD 540 SEMINAR IN ARTS ADMINISTRATION (Subtitle required). (3)
A seminar which covers special topics in arts administration. May be repeated to a maximum of 9 credits when identified by different subtitles.

#AAD 550 GRANT WRITING FOR NONPROFIT ORGANIZATIONS. (3)
The competitive grant proposal process is the ultimate exercise in organizational capacity, yet the process itself can be elusive. In AAD 550 Grant Writing for Nonprofit Organizations, students will develop project proposals, writing, development and research skills. Specific topics will include writing style and format, advanced analysis of tone, institutional prospect research, program design, strategic planning, building a case for support, identifying funding sources, creating the letter of intent, evaluation, sustainability, organizational capacity, and grant writing ethics. Throughout the course, students will write a complete grant proposal for an organization of their choice.

#AAD 560 TEACHING ARTISTRY FOR SCHOOL-BASED PROGRAMS. (3)
By giving students both the understanding and skills necessary to create engaging artistic experiences, AAD 560: Teaching Artistry for School-Based Programs provides students preparation for reaching out to people and communities of diverse backgrounds. Participants will learn the essential skills, strategies, and processes of teaching artistic and arts education for arts organizations. Building from a historical perspective, students will practice teaching artistry by learning how to “open up works of art” and create interactive performances and exhibits. Course content will also include basic classroom lesson and assessment creation as well as models of education utilized in professional arts organizations.

#AAD 565 COMMUNITY ENGAGEMENT IN THE ARTS. (3)
All arts programming activities are meant to engage attendees at some level. This seminar examines various ways arts administrators provide community engagement activities within their organizations, including performing arts producing and presenting organizations, museums and art centers and other types of arts organizations. In Community Engagement in the Arts, students will discuss the role of audience, take in-person opportunities in the arts, why community engagement is important, types of community engagement activities, how to develop community engagement programs, and activity evaluation and assessment.

AAD 600 ARTS ADMINISTRATION TECHNOLOGIES. (3)
From brochures to web sites to video, arts organizations are investing more time and resources in effectively communicating with the public. As such, arts administrators must be skilled in utilizing current technology to convey messages. In this course, students will learn a variety of computer applications that will aid in the successful creation of print materials, web sites, video and other multi-media presentations. Additionally, the course will introduce concepts of design principles and relevant theories.

AAD 610 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS. (3)
Financial management is a central function of successful arts management. It is the foundation in which human, physical and financial resources are maintained and monitored. In the nonprofit sector, the relationship of “mission to money” is a key conceptual framework that must be understood by arts managers. Arts managers are the source of financial information to both internal and external stakeholders and successful financial analysis is essential for sound strategic planning and governance. This course guides students through key topics of financial management including accounting practices, interpreting financial statements, creating mission-driven budgets, analyzing cash-flow, developing cost-benefit analyses and managing investments.

AAD 620 MANAGEMENT AND LEADERSHIP IN THE ARTS. (3)
People are the basis of arts organizations. Understanding the factors that determine individual attitudes and behaviors, being able to solve problems, capitalize on new opportunities and reach goals is necessary for being a successful leader in a work environment. As such, this course focuses on the planned, systematic process in which applied organizational theory and behavioral science principles and practices are introduced into organizations, toward the goal of increasing organizational and individual effectiveness. The course prepares students to organize and motivate people within an arts organization, manage social environments, and execute strategic change. Topics explored include organizational design, decision-making, conflict resolution, designing effective reward systems, team building, and organizational dynamics and culture. Additionally, students will focus on reflecting upon their own leadership skills and abilities.

AAD 630 MARKETING RESEARCH AND PLANNING FOR ARTS ORGANIZATIONS. (3)
Arts managers are consistently faced with the challenge of connecting arts offerings with an audience. Understanding the possible markets and developing strategies to reach the desired audience are part of every arts organization’s primary administrative activities. Throughout this course, students will explore theories and frameworks crucial to the marketing function including product development, market research, consumer behavior, brand development, pricing strategies and promotion techniques. Students will utilize the knowledge to analyze marketing strategies, investigate consumer behavior and conduct primary and secondary marketing research for an arts organization. Prereq: AAD 600.

AAD 640 PRINCIPLES OF FUNDRAISING. (3)
Most nonprofit organizations earn more than half of their annual revenue from fundraising activities, involving contributions from businesses, foundations, government and individuals. This course will examine how each of these entities are identified, contacted, courted, asked and ultimately convinced to contribute. Students will learn practical fundraising techniques such as how to identify government and foundation granting programs, how to write successful grants to those programs, how to identify potential individual donors and solicit their contributions, and how to identify and carry out special events that lead to contributions from a variety of donors. The philosophies and theories that underlie the concept of charitable giving will be examined, as will the ethical considerations inherent in the fundraising process. Prereq: AAD 600, AAD 610, or consent of instructor.

AAD 650 THE ARTS AND THE LAW. (3)
How does art interact with law? How does law impact artistic creation? How can arts administrators ensure that their organization legally protects itself? Understanding the legal environment in which arts organizations exist and artists create empowers arts administrators to make sound and reasoned decisions. Throughout this course, students will be exposed to
A variety of legal topics related to artistic creation and the managing of arts organizations. The course will provide historical and contemporary introduction to the laws and policies, both in the United States and internationally, related to intellectual property, First Amendment, cultural property, human resource management, labor relations, immigration and cultural exchange, and contract development and enforcement.

**AAD 660 SOCIAL AND CULTURAL ENTREPRENEURIALISM.** (3)
Utilizing entrepreneurial concepts, social entrepreneurs use innovative solutions in order to achieve social change. Social entrepreneurialism is a burgeoning field that is garnering attention from investors, philanthropists, foundations and nonprofit leaders in order to achieve meaningful social returns while maintaining financially viable organizations. This course introduces students to the field of social entrepreneurship and explores how to start, grow and maintain successful mission-driven cultural ventures.

**AAD 695 INDEPENDENT STUDY IN ARTS ADMINISTRATION.** (1-6)
Supervised individual work in Arts Administration. Restricted to majors. A learning contract with project clearly defined must be approved by supervising faculty member, program director, and site supervisor (if required). May be taken up to 6 credits. Prereq: Restricted to majors.

**AAD 699 INTERNSHIP IN ARTS ADMINISTRATION.** (3)
Students without substantial work experience in the field of Arts Administration are required to complete three credit hours of internships in order to graduate, and must work at least 50 hours for each credit hour earned. While students are ultimately responsible for finding and completing their internships, students do receive ample support and assistance from Program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor and the host organization supervisor. Students must complete their internship during the summer between the student’s first and second year in the program. However, internships can also be completed during spring and fall semesters, or the summer after students have completed their regular course work.

**AAD 730 MARKETING STRATEGIES AND APPLICATIONS FOR ARTS ORGANIZATIONS.** (3)
Effective implementation of a marketing plan and marketing strategies brings an audience and arts organizations together. In AAD 730: Marketing Strategies and Applications for Arts Organizations, students will learn the components and construction of a strategic integrated marketing communications plan. The process will allow students to make reasoned and sound marketing decisions for an arts organization based on marketing research conducted in AAD 630: Marketing Research and Planning for Arts Organizations. Additionally, students will utilize their skills in writing, graphic design, and communications to create effective marketing messages in a variety of mediums. Prereq: AAD 630.

**AAD 740 FUNDRAISING TECHNIQUES.** (3)
This course will explore how the basic techniques examined in AAD 640 Principles of Fundraising are organized into sophisticated annual and capital campaigns. Emphasis will be placed on goal setting, message development, use of outside consultants, prospect identification, pre-campaign testing, campaign execution, and donor follow-up. The course will also cover how these campaigns are supported by planned giving methods, databases and web-based applications, as well as related legal and ethical issues. Prereq: AAD 640.

**AAD 750 CAPSTONE COURSE IN ARTS ADMINISTRATION.** (3)
As the final course in the graduate program in Arts Administration, students will demonstrate their knowledge of the field through the completion of a significant research project. Students will design an independent study utilizing recognized research methodology under the guidance of their faculty advisor and graduate committee. The research findings, conclusions and recommendations will be presented as both a formal research paper and oral presentation.

**AAS African American Studies**

**#AAS 100 INTRODUCTION TO AFRICAN STUDIES.**
This course provides a basic overview of African histories, cultures and societies. (Same as HIS 100.)

**AAS 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY**
This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz composition as philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealist and existentialist artistic movements in modern and postmodern cultural contexts. Artists to be discussed include James Baldwin, Harruyette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative trends, and political connotations specific to African American literature and culture. (Same as ENG 168.)

**AAS 201 INTRODUCTION TO AFRICAN-AMERICAN STUDIES.** (3)
An interdisciplinary course which establishes the intellectual context for an examination of the African-American experience; it introduces students to the various approaches scholars use to analyze that experience. This course employs a topical framework which permits focus on issues reflecting the diversity and richness of African-American experience across geographic boundaries.

**AAS 235 INEQUALITIES IN SOCIETY.** (3)
This course seeks to promote an understanding of inequalities in American society by considering them in the context of the social origins, development, and persistence of inequalities in the United States and other societies. Issues of inequality that may be considered include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as SOC 235.)

**AAS 253 HISTORY OF PRE-COLONIAL AFRICA.** (3)
This course examines the early history of Africa, from human evolution to colonization by European powers in the late 19th century. Topics include: the development of states from Neolithic forms of political organization, the political, cultural, and social transformations that accompanied a African conversion to Islam, a close discussion of oral epic poetry as a window into medieval empire-building in the Sahel, an extended conversation about the role of Africa in the transatlantic slave trade, and a discussion of the dilemmas faced by African rulers in the era of partition on conquest by European powers. Successful students will gain a thorough introduction to the major developments in the early history of Africa, which will serve as a solid foundation for further coursework in African history and other African studies courses. (Same as HIS 253.)

**AAS 254 HISTORY OF COLONIAL AND POSTCOLONIAL AFRICA.** (3)
This course is a survey of the history of Africa from the onset of colonial rule in the 1880s to the present. Its main objective is to introduce students to some of the major socio-political and economic developments that made Africa what it is today. The course will explore themes such as the impact of the quest for African and Africans’ responses, African nationalism and struggles for independence, as well as post-colonial African politics and economic (under) development. (Same as HIS 254.)

**AAS 260 AFRICAN AMERICAN HISTORY TO 1865.** (3)
A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as HIS 260.)

**AAS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT.** (3)
This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960’s. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as HIS 261.)

**AAS 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required).** (3)
This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as FR 263.)

**AAS 264 INTRODUCTION TO BLACK WRITERS.** (3)
An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core Credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prereq: Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite. (Same as ENG 260.)

**AAS 300 HISTORY OF JAZZ.** (3)
A listening survey course covering the chronological evolution of jazz from its West African and European roots, through its germination in America, to the present. Emphasis will be on the various styles and functions of jazz, particularly as they have been affected by changing social-cultural patterns during the twentieth century. (Same as MUS 300.)

**AAS 326 PEOPLE AND CULTURES OF SUB-SAHARAN AFRICA.** (3)
A survey of indigenous societies and cultures of Africa south of the Sahara, with special attention to their adaptation of colonialism and post-colonial national development. Prereq: Sophomore standing or higher. (Same as ANT 326.)

**AAS 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA.**
A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region’s position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as GEO 328.)

**AAS 336 GEOGRAPHY OF SUB-SAHARAN AFRICA.**
This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic and political development. Prereq: GEO 130 and 152, 160, or 172. (Same as GEO 336.)
AAS 360 RACE AND SPORTS IN AMERICA. (3)
This reading seminar examines the history of race and sport in America. (Same as HIS 360.)

AAS 384 BLACK THEATER WORKSHOP. (3)
A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as TA 384.)

AAS 400 SPECIAL TOPICS IN AFRICAN-AMERICAN STUDIES
(Subtitle required).
Detailed investigations of a particular topic in African-American Studies, with emphasis on content and existing research. Topics will vary from semester to semester and are announced the preceding semester. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Twelve hours of African-American Studies minor courses, including AAS 200.

AAS 401 INDEPENDENT READING AND RESEARCH IN AFRICAN-AMERICAN STUDIES. (3)
For African-American Studies majors. The student pursues a course of reading and research under the guidance of a staff member, completes a major research project, and takes an examination. A written contract defining the area of study is negotiated between student and instructor at the beginning of the course. May be repeated to a maximum of six credits. Prereq: African-American Studies minor, 12 hours of African-American Studies minor courses, including AAS 200.

AAS 417G SURVEY OF SUB-SAHARAN POLITICS. (3)
A survey of Sub-Saharan government and politics intended to give the student broad knowledge about the setting of African politics, precolonial African political systems, the political legacies of major European colonial powers, and problems of political development. Prereq: PS 210 or 212. (Same as PS 417G.)

AAS 420 AFRICAN-AMERICAN RELIGIOUS EXPERIENCE. (3)
This course explores and examines how African Americans shaped and fashioned their religion to meet their own peculiar needs as they responded to historical occurrences.

AAS 432 RACE AND ETHNIC RELATIONS. (3)
Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as SOC 432.)

AAS 433 TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3)
A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: Six hours of social science or consent of instructor. (Same as SOC 435.)

AAS 471 RACE, ETHNICITY AND POLITICS. (3)
An examination of the role that race and ethnicity play in the political arena. Students will explore the nature of race, racism, and ethnocentrism, as well as their impact on political institutions and public policy. Particular attention will be given to elections, public opinion, mass media and social movements in the United States. (Same as PS 471.)

AAS 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICES IN AMERICA. (2-3)
The course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as SW 523.)

AAS 535 ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3)
A sociological study of topics relevant to social inequalities and stratification. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 535.)

#AAS 545PSYCHOLOGY OF THE BLACK EXPERIENCE.
EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational, School, and Counseling Psychology and is cross-listed with the Africana Studies program and Psychology department. It is designed to offer enrolled undergraduate, graduate students opportunities to survey, explore, and critique classic and contemporary theories and research articulating the psychologies that inform both social and academic experiences and observed behaviors of Black people. While there are multiple objectives for this upper-level undergraduate and graduate-level seminar course, one central objective for the course is to expose all students to literature and research pertaining to the Black experience in the United States in an effort to develop and refine ideas and mindsets that will foster and reflect innovative ways of thinking about how to enhance the life experiences of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. Prereq: PSY 100 or AAS 200 or consent of the instructor. (Same as EDP 545.)

AAS 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3)
This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as EDC 550.)

AAS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3)
This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as HIS 587.)

AAS 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3)
This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as EDC 601.)

AAS 616 MULTICULTURAL PSYCHOLOGY. (3)
This course is designed to increase one’s sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one’s skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as EDP 616.)

AAS 635 SEMINAR IN SOCIAL INEQUALITIES. (3)
This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classic and contemporary works on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking a specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as SOC 635.)

AAS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY. (3)
Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as HIS 654.)

AAS 656 BLACK AMERICAN LITERATURE. (3)
An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as ENG 656.)

AAS 657 RACE RELATIONS IN THE UNITED STATES. (3)
This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as HIS 657.)

AAS 720 SOCIAL WORK PERSPECTIVES ON HUMAN AND CULTURAL DIVERSITY. (3)
This second required course in the human behavior and social environment sequence builds upon the foundation course. The focus of this course is upon the effects of discrimination and oppression experienced by diverse population groups with special attention to the effects of racism, sexism, ageism, classism and geography upon vulnerable groups; and upon institution- alized societal and cultural themes in diversity; with implications for social work practice. Prereq: SW 620 or advanced standing in the MSW program. (Same as SW 720.)

ABT Agricultural Biotechnology

ABT 101 INTRODUCTION TO BIOTECHNOLOGY. (1)
An introduction to biotechnology: historical perspectives, current applications and future directions. The course will consist of informal lectures and interactive discussions led by Biotechnology faculty and visiting professionals. The course will also orient students to the educational/career opportunities in Biotechnology and assist them in developing a focus for their individualized degree programs. Lecture, two hours per week. Prereq: First year or first semester transfer students in Agricultural Biotechnology. [Offered in fall only.]
ABT 360 GENETICS. (3)
The basic principles of heredity as currently understood from evidence accumulated in classical, cytogenetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: BIO 148, BIO 152 and CHE 105 or consent of instructor. (Same as ENT 360.) [Offered in fall only.]

ABT 361 GENETICS LAB ONLINE. (1)
Analysis and interpretation of genetics problems using interactive computer programs. Prereq: ABT/ASC/ENT 360 (should be taken concurrently).

ABT 395 INDEPENDENT STUDY IN BIOTECHNOLOGY. (1-4)
Independent study in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: ABT/AG/ENT 360 or consent of appropriate instructor before registration. [Offered in fall, spring and summer II.]

ABT 399 EXPERIENTIAL LEARNING IN BIOTECHNOLOGY. (1-6)
An internship in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: Consent of the instructor, chairperson for the Agricultural Biotechnology degree program and completion of a learning contract before registration. [Offered in fall, spring and summer II.]

ABT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)
Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription and translation of DNA as well as RNA processing, recombination and the theoretical underpinnings of genetic engineering. Prereq: ABT/ENT 360 or BIO 304 or consent of instructor. (Same as ENT 460.) [Offered in spring only.]

ABT 461 INTRODUCTION TO POPULATION GENETICS. (3)
This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as BIO/ENT/FOR 461.) [Offered in spring only.]

ABT 495 EXPERIMENTAL METHODS IN BIOTECHNOLOGY. (4)
A laboratory techniques course designed to give students the technical skills and understanding necessary to critically examine biological systems at the molecular level. The course will emphasize the principles of chemistry, biochemistry and molecular biology as applied to a model system for laboratory investigations. Laboratory, nine hours per week. Prereq: ABT/ENT 360 or BIO 304, Agricultural Biotechnology major or consent of instructor. [Offered in fall and spring.]

ABT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY. (3)
An introduction to modern evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). (Same as ENT 505.)

ACC Accountancy

ACC 201 FINANCIAL ACCOUNTING I. (3)
This course is designed to provide an introduction to financial accounting from the users` perspectives. Its primary purposes are to promote understanding of financial accounting information for decision making purposes and to focus on financial accounting`s role in communicating business results. Prereq: Successful completion of 27 semester credit hours.

ACC 202 MANAGERIAL USES OF ACCOUNTING INFORMATION. (3)
An introduction to the use of accounting data within an organization to analyze and solve problems and to make planning and control decisions. Prereq: ACC 201 or BE 161 and BE 162.

ACC 211 FINANCIAL ACCOUNTING LAB. (1)
A laboratory-based approach to introductory financial accounting applications, with the primary focus on the accounting cycle. The primary objective is to promote an understanding of how accounting information is identified, recorded, and processed for financial reporting. Prereq: ACC 201. Enrollment priority will be given to accounting and finance majors.

ACC 221 ACCOUNTING FUNDAMENTALS I. (2)
Examines the basic principles/concepts which govern the recording/reporting of accounting data. Studies the language of accounting and the accounting cycle. Establishes a framework for understanding how data is transformed into the accounting statements and how these statements are interpreted by decision makers. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

ACC 222 ACCOUNTING FUNDAMENTALS II. (2)
Examines the preparation and use of accounting information for management decision making. Provides an understanding of various traditional and contemporary management accounting techniques used to use and analyze data within a company. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

ACC 300 FINANCIAL ACCOUNTING II. (3)
This course is designed for non-accounting majors to provide expanded study of the impact of relevant financial accounting issues on the users of financial reporting. Topics may include financial statements; income recognition; cash and receivables; inventories; operating assets; investing activities; intangible assets; current liabilities; long-term liabilities; leases; pensions, postretirement benefits, and bonds; financial instruments; accounting for income taxes; and owner`s equity. Open to Accounting majors. Prereq: ACC 201 and ACC 202.

ACC 301 INTERMEDIATE ACCOUNTING I. (3)
This course is the first of a two-course financial accounting series, providing in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

ACC 302 INTERMEDIATE ACCOUNTING II. (3)
This course is the second of a two-course financial accounting series, providing in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 324 ACCOUNTING INFORMATION SYSTEMS. (3)
This course focuses on two major components of accounting information systems: conceptual models and physical implementation. Accounting systems are studied from an accounting cycles perspective, emphasizing the nature and relevance of accounting internal controls and the relationship of accounting systems to the functional areas of accounting. Using contemporary information technology, students analyze, design, and implement accounting systems along with relevant internal control structures. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

ACC 395 INDIVIDUAL WORK IN ACCOUNTING. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ACC 399 INTERNSHIP IN ACCOUNTING. (1)
A course designed for undergraduate accounting students who, through the Accounting Internship Director, have secured full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and for no more than two consecutive semesters, repeated to a maximum of three credits. Prereq: Junior standing in accounting and approval of the Accounting Internship Director.

ACC 403 AUDITING. (3)
This course examines the attest function in accounting. Emphasis is placed on auditing fundamentals and objectives, including the evaluation of internal control structures for the purpose of determining relevant auditing procedures. Prereq: ACC 301 and ACC 324 or consent of the Director of the School of Accountancy.

ACC 407 CONCEPTS OF INCOME TAXATION. (3)
A study of the federal income tax structure with emphasis upon the conceptual foundations of taxation relating to the three types of taxpayers: businesses, individuals, and estates and trusts. Prereq: Junior standing and ACC 202 or consent of the Director of the School of Accountancy.
Course Descriptions

ACC 410 NOT-FOR-PROFIT AND GOVERNMENTAL ACCOUNTING. (3)
This course examines accounting topics specific to not-for-profit entities and various governmental units. Emphasis is placed on the recording of usual transactions, forms and content of reports, and analysis of external reports. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

ACC 418 COST MANAGEMENT. (3)
Traditional and contemporary concepts and techniques that provide accounting information for management decision making at both strategic and operational levels. Topics include the costing of products and services; project and activity analysis; planning and control methods; and performance measurement. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 507 ADVANCED TOPICS IN TAXATION. (3)
A detailed study of advanced topics in taxation, including corporate taxation, accounting for income taxes, and international tax. Prereq: ACC 302 and ACC 407 or consent of the Director of the School of Accountancy.

ACC 508 CONTROLLERSHIP. (3)
A comprehensive study of the controller’s objectives, responsibilities, functions, organizational roles, etc. Prereq: ACC 418.

ACC 516 ADVANCED TOPICS IN FINANCIAL REPORTING. (3)
A comprehensive study of financial accounting and reporting issues involving business combinations, partnerships, foreign currency transactions, not-for-profit accounting and other current accounting issues. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

ACC 555 FORENSIC ACCOUNTING AND FRAUD EXAMINATION. (3)
This course will cover the principles and methodology of fraud detection and deterrence. The course includes such topics as skimming, cash larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement schemes, non-cash misappropriations, corruption, fraudulent financial statements, and interviewing witnesses. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 590 SPECIAL TOPICS IN ACCOUNTING. (Subtitle required). (3)
Readings, projects, lectures and/or discussion to illuminate current topics of special interest or concern in accounting. May be repeated to a maximum of twelve credits. May not be repeated under the same title. Prereq: Consent of instructor.

ACC 600 INQUIRY, COMMUNICATION, AND LEADERSHIP IN ACCOUNTING. (3)
Critical examination of accounting concepts and standards. Study of current problems and contemporary developments reflected in accounting literature and reports. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 603 ATTEST FUNCTION. (3)
A critical examination of contemporary professional attestation theory and practice including a comprehensive review of AICPA audit case studies, statements on audit procedure, and their application in simulated business situations. Prereq: ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 605 INTERNAL AUDITING. (3)
This course provides students an understanding of the internal audit profession and the internal audit process. Topics that will be included in this course are: the professional practices framework for internal auditing, organizational governance, risk and control issues, and experience in conducting internal audit engagements. It provides the basic preparation for students to take positions in auditing compliance, risk management and process improvement. Prereq: Graduate standing.

ACC 610 NOT-FOR-PROFIT AND REGULATORY ACCOUNTING. (3)
A study of the contemporary issues in the area of not-for-profit and regulatory accounting. Prereq: ACC 410G or consent of instructor.

ACC 617 SELECTED TOPICS IN TAXATION. (3)
A study of selected topics in taxation, including partnership taxation, tax research, and other tax topics. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 619 INDEPENDENT STUDY IN ACCOUNTING. (1-3)
Designed for students undertaking special studies to be conducted in regular consultation with the instructor. Prereq: Consent of instructor.

ACC 621 UNDERSTANDING FINANCIAL STATEMENTS. (3)
Financial statements communicate information about a business and its operations. Students will gain an understanding of the information being communicated (or not communicated) by the business entity. Emphasis is on the uses of information, rather than its preparation. Prereq: Admission to MSACC program or consent of DGs.

ACC 624 ENTERPRISE INFORMATION AND CONTROL SYSTEMS. (3)
The course simultaneously examines two issues related to enterprise information systems development: 1) methodologies for designing and implementing information systems, and 2) assessment of enterprise risk and internal control systems. Case analyses and "real world" projects are used to accomplish the course objectives. Current computer technologies, including relational database systems and internet data processing, are integrated into the course content. Prereq: ACC 324, ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 627 CORPORATE TAXATION. (3)
A study of the application of accounting information and services in the recognition or solution of management problems in business. Prereq: Graduate standing in the MBA program, ACC 202, or ACC 221 and ACC 222, or its equivalent, and MA 123 or its equivalent. Course credit will not be given to students in the MSACC program.

ACC 637 TAXATION OF FLOW-THROUGH ENTITIES. (3)
A detailed study of the income taxation of flow-through entities, including Partnerships, S corporations, and limited liability companies. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 647 MULTIJURISDICTIONAL TAXATION. (3)
A study of the taxation of taxpayers located in two or more tax jurisdictions. The course involves two major categories, international taxation and state and local taxation. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 691 ADVANCED TOPICS IN ACCOUNTING (Subtitle required). (3)
An advanced seminar on selected topics such as cross-disciplinary research on behavioral decision-making, research using archival data, and analytical models in accounting. May be repeated to a maximum of eighteen credits. Prereq: Doctoral student status in business administration.

ACC 700 TOPICAL SEMINAR IN ACCOUNTING RESEARCH (Subtitle required). (1-3)
An advanced seminar on selected topics such as cross-disciplinary research on behavioral decision-making, research using archival data, and analytical models in accounting. May be repeated to a maximum of eighteen credits. Prereq: Doctoral student status in business administration.

ACC 790 DOCTORAL COLLOQUIUM – ACCOUNTANCY. (1-2)
This course provides professional socialization for Ph.D. students in accounting. Topics include research, teaching, and service, transition, preparation for a career as a professor, and special research topics, including lectures by noted scholars.

ACC 795 INDEPENDENT STUDY IN ACCOUNTING. (1-6)
Designed for students undertaking special studies to be conducted in regular consultation with instructor. May be repeated to a total of 12 credit hours. Prereq: Consent of instructor.

AEC Agricultural Economics

AEC 101 THE ECONOMICS OF FOOD AND AGRICULTURE. (3)
An introduction to the field of agricultural economics and some of the basic tools and concepts of decision making. Concepts are illustrated in terms of selected current social and economic issues including the role of agriculture in both a national and international dimension. Students who have completed ECO 201 are not eligible to take AEC 101 without the consent of the instructor.

AEC 201 INTRODUCTION TO FARM AND NATURAL RESOURCE FINANCE. (3)
Study in special topics in agricultural economics. May be repeated under a different subtitle to a maximum of fifteen credits. Lecture, one to three hours; laboratory, zero to six hours per week. Prereq: ECO 201. [Offered in fall and spring.]

AEC 301 CAREER READINESS FOR AGRICULTURAL ECONOMICS. (1)
This course examines post-graduate opportunities, expectations, and strategies in agricultural economics. Students will explore information relevant to writing resumes, completing job applications, and participating in job interviews. Prereq: Junior standing and a C or better in AEC 302, AEC 303 and/or AEC 305. [Offered in fall and spring.]

AEC 302 AGRICULTURAL MANAGEMENT PRINCIPLES. (4)
A comprehensive study of economic principles and management tools useful in farm and agribusiness decision making. Utilizes a systems approach to the planning, implementation and control of the agricultural business. Specific attention to application of management and decision theory, economic principles used in decision making, and risk management strategies. Emphasis on planning the future course of the business, acquiring and managing the necessary resources, and establishing physical and financial control over the business. Lab incorporates microeconomic applications of management principles developed in lectures. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]

AEC 303 MICROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)
Emphasis on the development of theoretical models of production and consumption economics and application of these models to problems. The importance of concepts of marginality to managers and consumers is emphasized. Role of risk and uncertainty in resource allocation is outlined. Prereq: "C" or better in ECO 201 and "C" or better in MA 123 or MA 113. [Offered in fall and spring.]

AEC 304 MACROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)
Analysis of the market’s role in determining prices and coordinating productive activities in the food and agricultural systems. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]
AEC 306 TECHNICAL COMMUNICATION IN ECONOMICS. (2)
This course examines how to create and distribute original economic ideas in written and oral forms using appropriate digital technologies. Prereq: ECO 201, CIS/WRD 110 and 111 or equivalent; 30 credit hours of coursework. AEC 305 is a co-requisite (recommended) or prerequisite. This course fully satisfies the University’s graduation composition and communication requirement (GCCR) for AECG majors. To receive GCCR credit, students must earn an average (weighted) of “C” or better on all GCCR assignments. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

AEC 309 INTERNATIONAL AGRICULTURE, WORLD FOOD NEEDS AND U.S. TRADE IN AGRICULTURAL PRODUCTS. (3)
Present and projected world food/population balance by geographic regions; food production and world trade in agricultural products with an emphasis upon the implications for U.S. agriculture; an introduction to agricultural development problems of the less developed nations of Latin America, Africa, and Asia. Prereq: “C” or better in ECO 201. [Offered in fall only.]

AEC 311 LIVESTOCK AND MEAT MARKETING. (3)
Provides students with a unique and practical overview of the economics of the livestock and meat marketing system. Topics will include general marketing, price forecasting, price risk management, decision making, and capital investment analysis. Prereq: AEC 305. [Offered in fall only.]

AEC 313 TOBACCO MARKETING. (3)
Study of production and utilization of tobacco by areas of the world, the marketing systems for grain, and the application of economic and marketing principles to the pricing and movement of grain. Prereq: AEC 305, AEC 321. [Offered in fall only.]

AEC 314 GRAIN MARKETING. (1)
AEC 316 COOPERATIVE MANAGEMENT AND MARKETING. (1)
This course provides knowledge about the unique features of cooperatives and their role in a market economy and examines the structure organization, finance, management, and operations of cooperative organizations. Prereq: AEC 305. [Offered in fall only.]

AEC 317 MARKETING HORTICULTURAL PRODUCTS. (3)
This course examines the market structure and institutions associated with horticultural and nursery product markets within the context of formulating and evaluating alternative, firm-specific marketing strategies. Prereq: AEC 305. [Offered in fall only.]

AEC 320 AGRICULTURE PRODUCT MARKETING AND SALES. (3)
This course examines marketing activities within the U.S. food system. Sector performance is considered as well as the competitive behavior of firms in various agricultural channels. Firm level marketing principles, methods, and strategies are considered, with special focus on developing effective sales programs for agricultural products. Prereq: AEC 305. [Offered in fall and spring.]

AEC 321 AGRICULTURAL FUTURES MARKETS. (3)
The mechanics, theory, and practical application of hedging as related to agricultural commodities. The historical development of futures markets, functions of the futures markets, and the role of the speculator will also be explored. Prereq: AEC 303 and AEC 305. [Offered in spring only.]

AEC 324 AGRICULTURAL LAW. (3)
A study of legislation, administrative regulations, constitutions and court cases that have economic ramifications on agricultural and rural life. Prereq: “C” or better in ECO 201. [Offered in fall and spring.]

AEC 325 EQUINE LAW. (3)
This course examines equine law from tort and contractual perspectives dealing with basics of liability, purchase and sale, entity formation, constitutional and tax issues. Following the class, students should be able to recognize when it is necessary to retain a lawyer, but are not expected to be able to act as a lawyer. Prereq: “C” or better in ECO 201. [Offered in spring only.]

AEC 326 PRINCIPLES OF ENVIRONMENTAL LAW. (3)
Provides a basic knowledge of the principles of United States environmental law. Addresses the framework of the American Legal system as it applies to environmental regulation. Covers the sources of environmental law and reviews major federal environmental statutes and judicial decisions addressing specific issues. Prereq: “C” or better in ECO 201. [Offered in fall and spring.]

AEC 340 HUMAN RESOURCE MANAGEMENT IN AGRICULTURE. (3)
An overview of the management of the human resource in an agricultural context. Major components will include the acquisition, training, motivation, compensation, performance evaluation, and retention of the agricultural labor force. Other topics include the legal and taxation components of hired labor and working with a multi-cultural and multi-generational work force. Prereq: ECO 201. [Offered in spring only.]

AEC 395 INDEPENDENT RESEARCH IN AGRICULTURAL ECONOMICS. (1-3)
Directed independent study of a selected problem. May be repeated to a maximum of six credits. Prereq: Consent of instructor or director of undergraduate studies and completion of a proposed plan of learning agreement prior to registration. The student must have completed 60 credit hours prior to registering for AEC 395 and the student must earn a C or better in one of the following courses: AEC 303, AEC 302, or AEC 305. [Offered in fall, spring and summer.]

AEC 396 INTERNATIONAL STUDIES IN AGRICULTURAL ECONOMICS. (1)
The student will participate in a university-approved study abroad program or in an approved international study tour through the College of Agriculture or through additional international opportunities pre-approved by the director of undergraduate studies. [Offered in spring only.]

AEC 399 EXPERIENTIAL LEARNING IN AGRICULTURAL ECONOMICS. (1-6)
A field or community-based experience in the application of economics to agricultural or rural problems. May be repeated; a maximum of six credits allowed. Pass-fail only. Credit not available for the Agricultural Economics Major Requirements. Prereq: Nine hours in agricultural economics or economics, permission of instructor and department chairperson, and completion of learning agreement prior to registration. [Offered in fall, spring and summer.]

AEC 422 AGRIBUSINESS MANAGEMENT. (3)
Examines and analyzes decision-making tools and problem-solving techniques available to agribusiness managers. Provides learning experience in addressing contemporary economic, marketing and management issues through case study analyses, selected readings and computerized business simulations. Prereq: AEC 303, AEC 305, FIN 300, MGT 301, MKT 300, and senior standing in Agricultural Economics. [Offered in fall and spring.]

AEC 425 FOREST MANAGEMENT. (4)
The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives for various properties and ownership types and integrates scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: Completion of the Spring Field Semester or consent of instructor. [Same as FOR 425.]

AEC 441G AGRICULTURAL FINANCIAL MANAGEMENT. (3)
Applies micro agricultural finance to farm and other agricultural business firms. Reviews elementary mathematics of finance and the objectives of financial management. Uses financial statements, cash flow analysis, financial leverage and other elements in applying the theory of capital investment for making management decisions. Prereq: AEC 303 and FIN 300. [Offered in spring only.]

AEC 445G INTRODUCTION TO RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)
Economic analysis of the problems of assuring resource availability and environmental quality. Theoretical concepts and empirical tools for evaluating environmental and resource policy. Prereq: “C” or better in ECO 201 or consent of the instructor. [Offered in fall and spring.]

AEC 471 INTERNATIONAL TRADE. (3)
This is an advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as a means of explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. [Same as ECO 471.]

AEC 479 PUBLIC ECONOMICS. (3)
An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. [Same as ECO 479.]

AEC 483 REGIONAL ECONOMICS. (3)
This course presents an economic approach to the study of regions. The emphasis is on the role of spatial relationships in economic activity. Topics considered include market area analysis, location theory, economic base and input-output analysis as well as regional economic development. Prereq: AEC 303. [Offered in fall only.]

AEC 490 QUANTITATIVE METHODS AND PRICE ANALYSIS. (3)
An integration of current issues in Agricultural Economics with oral and written communication, problem solving, and research. Major emphasis is on a senior paper and oral presentation. Prereq: AEC 302, 303, 305, ECO 479. [Same as ECO 490.]

AEC 503 PRICE THEORY AND APPLICATIONS. (3)
This course uses calculus to develop core concepts in microeconomics and show how they can be applied to agricultural and natural resource issues. A central objective of this course is to link mathematical techniques with economic analysis to show students that calculus provides an efficient way to study producer and consumer behavior. Prereq: AEC 303 and MA 113. [Offered in fall only.]

AEC 510 INTERNATIONAL TRADE AND AGRICULTURAL MARKETING. (3)
A study of institutional, economic and cultural factors that influence aggregate agricultural trade and exports of individual agriculture businesses. Macro issues of agricultural trade policies are examined along with elements of international marketing for agricultural products. Prereq: AEC 303 or equivalent) and AEC 305. [Offered in fall only.]

Course Descriptions
AEC 531 AGRICULTURAL PRICE ANALYSIS. (3)

The course links calculus-based microeconomic theory, industry-specific pricing systems, and empirical data from state and local food markets ranging from farm inputs to the consumer level. Students gain experience with tools and techniques used in empirical analysis of supply and demand. Prereq: AEC 503 and (ECO 391 or STA 570). [Offered in spring only.]

AEC 532 AGRICULTURAL AND FOOD POLICY. (3)

This course surveys a variety of current public policies that influence the agricultural and rural economies. Students are exposed to the conflicting views of those concerned with food and agricultural policy issues in an international economy. Economic principles are used to evaluate alternatives in terms of the general welfare of society. Prereq: AEC 303 and AEC 305. [Offered in spring only.]

AEC 545 RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)

This is an advanced level course focused on economic analysis. It will help students frame natural resource and environmental problems so that they can be analyzed and solved. Major topics include water resources, fisheries, energy (and other non-renewable resources), agriculture, and pollution. Policy instruments such as pricing, emission fees, and tradable permits will be covered in detail. Prereq: AEC 303 or AEC 4454 or consent of instructor. (Same as NRE 545.) [Offered in fall only.]

AEC 580 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)

Directed independent study of a selected problem. May be repeated to a maximum of six credits. Prereq: Consent of instructor, director of undergraduate or graduate study and completion of a proposed plan of learning objectives and outcomes prior to registration. [Offered in fall, spring and summer.]

AEC 590 INTRODUCTION TO QUANTITATIVE ECONOMICS. (3)

An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in comparative statics. Prereq: ECO 401 and MA 113, or consent of instructor. (Same as ECO 590.) [Offered in fall only.]

AEC 606 ADVANCED AGRICULTURAL MARKETING. (3)

A critical examination of objectives and results of various types of research in market organization, marketing functions, price analysis, markets over time, space and form, market information, commodity promotion programs, quality standards, and macroeconomic linkages to marketing. Prereq: AEC 624 and ECO 601 (may be concurrent). [Offered in fall only.]

AEC 610 INTERNATIONAL TRADE IN AGRICULTURAL PRODUCTS. (3)

This course analytically examines current empirical research in the area of agricultural trade. Prereq: ECO 601, AEC 624 and ECO 671. [Offered in spring only.]

AEC 620 ADVANCED PRODUCTION ECONOMIC. (3)

An advanced treatment of production economics with emphasis on flexible product and factor price situations, factor demand functions, multiple product production, and poly-periodic production theory. Prereq: ECO 601. [Offered in fall only.]

AEC 622 ADVANCED AGRIBUSINESS MANAGEMENT STRATEGIES. (3)

This course integrates knowledge of economics, econometrics, business administration, finance, accounting, marketing, decision making, and research methodology. The focus is on analytical skills and scholarly academic research. Prereq: AEC 422, ECO 601 or AEC 603, an introductory course in econometrics, or consent of instructor. [Offered in spring only.]

AEC 624 ADVANCED QUANTITATIVE METHODS IN AGRICULTURAL ECONOMICS. (3)

This course uses statistical tools to model agricultural and economic systems. Subjects covered include: (1) the classical linear regression model, (2) statistical hypotheses tests, and (3) estimation techniques for single and simultaneous equation models. Prereq: ECO 391, STA 291 and MA 113. [Offered in fall only.]

AEC 626 AGRICULTURE AND ECONOMIC DEVELOPMENT. (3)

Analytical consideration of the role of agriculture in economic development at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as ECO 674.) [Offered in spring only.]

AEC 640 ADVANCED AGRICULTURAL POLICY. (3)

This course focuses on development of a framework to analyze alterative paradigms of the political economy of agriculture. The framework focuses on the role of institutions that modify behavior of decision makers. Agricultural and food policies are evaluated in terms of the efficient use of resources and the general welfare of society. Prereq: ECO 601 or AEC 503. [Offered in spring only.]

AEC 645 NATURAL RESOURCE ECONOMICS. (3)

Econometric analysis of natural resource use and environmental issues. Discussion of criteria for public decision making, welfare economics, market failure, benefit-cost analysis, and benefit estimation, as applied to natural resources and the environment. Prereq: ECO 590 and ECO 601.

AEC 646 INTERTEMPORAL DECISION AND NATURAL RESOURCES. (3)

This course teaches the application of economic theory to the analysis of solutions for current and prospective natural resource problems. Such understanding will be geared toward fashioning, selecting and implementing planning associated with land, water, air, biological and other natural resources and conservation of the natural environment in serving the needs and desires of citizens. Prereq: ECO 660 and AEC 590.

AEC 653 LOCAL ECONOMIC DEVELOPMENT. (3)

The course develops the capacity to employ the theories, practices and philosophies of economic development at the local level. The primary geographic focus of the course is the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as PA 653.) [Offered in spring only.]

AEC 661 PROGRAMMING MODELS IN AGRICULTURAL ECONOMICS. (3)

A study of programming models useful in agricultural economics; includes an examination of the structure of the models themselves, economic interpretation of their components and their use in research in agricultural economics. Prereq: MA 416G and either ECO 620 or ECO 601. [Offered in fall only.]

AEC 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)

Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate computational and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as FOR 662.)

AEC 681 SOCIETY OF FOOD AND AGRICULTURE. (3)

This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis will be given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as CLD/SOC 691.)

AEC 724 APPLIED ECONOMETRICS. (3)

This course introduces students to the econometric models, estimation procedures, and model applications in the literature. The course includes an overview of different econometric models, model estimations using Sta, and discussion of agricultural and applied econometrics papers applying these models, and writing mini projects and a term paper with econometric analysis. Prereq: include discrete and limited dependent variable models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics. Prereq: ECO 703 or consent of instructor. [Offered in spring only.]

AEC 745 ENVIRONMENTAL AND NATURAL RESOURCES. (3)

This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and other market failures, environmental policies, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 (or equivalent courses), or consent of instructor. (Same as ECO 726.) [Offered in fall only.]

AEC 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall, spring and summer.]

AEC 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 780 residence credit following the successful completion of the qualifying exams.

AEC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students must register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall, spring and summer.]

AEC 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of department. [Offered in fall, spring and summer.]

AEC 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely. Prereq: Consent of adviser and chairperson of department.

AEC 780 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)

Open to graduate students who have the necessary training and ability to conduct research on a selected problem. May be repeated three times for a total of nine credits. Prereq: Consent of instructor and departmental chairperson. [Offered in fall, spring and summer.]

AEC 790 RESEARCH WORK IN AGRICULTURE ECONOMICS. (3-9)

Independent research under the direction of a faculty members and the Director of Graduate Studies. Prereq: Successful completion of written portion of AEC qualifying exam and permission of Director of Graduate Studies. [Offered in fall, spring and summer.]

AEC 796 SEMINAR (Subtitle required). (3)

An extended original investigation of a specific topic designed to give students experience in methods of research and an intensive study of a particular subject in the field of agricultural economics. May be repeated to a maximum of six credits under different subtitles. Prereq: Ph.D. applicant or candidate. [Offered in fall and spring.]

</thead>
<tbody>
<tr>
<td>AED 110</td>
<td>INTRODUCTION TO CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as FCS 110.)</td>
</tr>
<tr>
<td>AED 362</td>
<td>FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, fieldtrips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as FCS 362.)</td>
</tr>
<tr>
<td>AED 371</td>
<td>ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. (Same as FCS 371.)</td>
</tr>
<tr>
<td>AED 395</td>
<td>SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>1-3</td>
<td>Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as FCS 395.)</td>
</tr>
<tr>
<td>AED 399</td>
<td>EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>1-3</td>
<td>A field-based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as FCS 399.)</td>
</tr>
<tr>
<td>AED 580</td>
<td>FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as FCS 580.)</td>
</tr>
<tr>
<td>AED 583</td>
<td>DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as FCS 583.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.</td>
</tr>
<tr>
<td>AED 586</td>
<td>METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as FCS 586.)</td>
</tr>
<tr>
<td>AED 592</td>
<td>TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>12</td>
<td>Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as FCS 592.)</td>
</tr>
<tr>
<td>AED 671</td>
<td>YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as FCS 671.)</td>
</tr>
<tr>
<td>AED 686</td>
<td>INSTRUCTIONAL ASSESSMENT IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>3</td>
<td>An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems. (Same as FCS 695.)</td>
</tr>
<tr>
<td>AED 799</td>
<td>RESEARCH IN CAREER AND TECHNICAL EDUCATION.</td>
<td>Agricultural Education</td>
<td>1-3</td>
<td>Individual research of importance to career and technical education. May be repeated to a maximum of nine credits. (Same as FCS 799.)</td>

## AEN Agricultural Engineering

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Department</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AEN 103</td>
<td>BASIC PRINCIPLES OF SURVEYING.</td>
<td>Agricultural Engineering</td>
<td>2</td>
<td>General use of surveying equipment, development of topographic maps, layout of engineering systems, earthwork computations, and introduction to boundary surveys for Agriculture students. This course is not available for credit to persons who have received credit in another introductory surveying course. Lecture, one hour; laboratory, three hours. Prereq: A course in trigonometry, enrollment in the College of Agriculture and/or consent of instructor.</td>
</tr>
<tr>
<td>AEN 220</td>
<td>PRINCIPLES OF INTERNAL COMBUSTION ENGINES.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>Principles of selection of internal combustion engines. Operating principles of internal combustion engines including fuel injection, ignition, lubrication, and maintenance. Power transmission application and efficiency are considered. Lecture, two hours per week; lab, two hours per week. (Same as TSM 220.)</td>
</tr>
<tr>
<td>AEN 225</td>
<td>FABRICATION AND CONSTRUCTION FOR TECHNICAL SYSTEMS.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>Lecture, 1 hour; laboratory 4 hours. Wood and metal work, including reading engineering drawings, welding, power woodworking tools, soldering and pipe work. Prereq: Major in agricultural education, or Individualized Agriculture Curriculum (TSM), or a minor in TSM, or consent of instructor. (Same as TSM 252.)</td>
</tr>
<tr>
<td>AEN 263</td>
<td>AGRICULTURAL SAFETY AND HEALTH.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>The course provides an overview of major safety and health hazards in agricultural production (farms) and of the basic approaches to prevention of agricultural injuries and illnesses.</td>
</tr>
<tr>
<td>AEN 340</td>
<td>PRINCIPLES OF FOOD ENGINEERING.</td>
<td>Agricultural Engineering</td>
<td>4</td>
<td>The functional requirements and principles of operation of systems for the handling and processing of food and agricultural products are studied. The areas covered are mass and energy balances, fluid mechanics, heat transfer, refrigeration, food freezing, evaporation, drying and special topics such as extrusion and microwave heating. Prereq: Completion of PHY 211 and MA 123 or MA 113 or MA 137 and junior standing in Food Science major or Technical Systems Management option in AICU. (Same as TSM 340.)</td>
</tr>
<tr>
<td>AEN 341</td>
<td>BREWING SCIENCE AND TECHNOLOGY.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>Introduction to the science and technology associated with the brewing of beer. Topics will include the history of beer, varieties of beer, and production of beer. Within the discussions about the production of beer, the effect of raw materials, processing, microbiology, and storage on the taste and appearance of the beer will be studied. The class will also cover beer appreciation and sensory perception, which will complement the discussions of science and technology in the production of beer. Prereq: All students must be 21 by the first day of class. (Same as TSM 341.)</td>
</tr>
<tr>
<td>AEN 461G</td>
<td>BIOMETEOROLOGY.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>An introduction to the impact and relationship of the atmosphere on living organisms. Emphasis on the practical application of meteorology to everyday problems within the biosphere. Weather analysis, interpretation, psychometrics of the atmosphere, and the impact of weather and climate on animals, plants and man are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Junior, Senior, or Graduate standing. (Same as TSM 461G.)</td>
</tr>
<tr>
<td>AEN 462</td>
<td>RESIDENTIAL AND COMMERCIAL IRRIGATION DESIGN.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td>The utilization of hydraulic principles in the design, assimilation, installation and operation of residential and commercial irrigation systems in applications which emphasize water conservation, nutrient management and environmental protection. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>AEN 767</td>
<td>DISSERTATION RESIDENCY CREDIT.</td>
<td>Agricultural Engineering</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>
AHS 840 ETHICS IN HEALTH PRACTICE. (2)
A study of selected ethical issues that arise in the practice of health professionals. The health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will beanalyzed.

AIS 101 ELEMENTARY MODERN STANDARD ARABIC. (4)
An introduction to the standard written language of the Arab World. Initial emphasis upon the phonology and script, followed by gradual coverage of the grammar, with exercises in reading, writing, pronunciation, and vocabulary building.

AIS 102 ELEMENTARY MODERN STANDARD ARABIC. (4)

AIS 201 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 102, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 102.

AIS 202 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 201, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 201.

AIS 228 ISLAMIC CIVILIZATION. (3)
This course is an introduction to the religion of Islam and the classical era of the Islamic civilization. A great deal of time will be spent on the life of Muhammad (570-632) and basic beliefs, rituals and practices. The course will also explore aspects of the history of Islamic civilization from the time of Muhammad to around the 17th century, including science, art, theology and law.

AIS 301 COLLOQUIAL ARABIC I. (3)
Provides advanced skills in developing linguistic and communicative skills in colloquial Arabic based on Egyptian Arabic that is widely understood throughout the Arab world. Introduces aspects of Egyptian cultural life. Designed for those who have some experience with Standard Arabic. Prereq: AIS 202 or consent of instructor.

AIS 302 COLLOQUIAL ARABIC II. (3)
A continuation of AIS 301. Prereq: AIS 301 or consent of instructor.

AIS 311 ARABIC FOR BUSINESS AND MEDIA I. (3)
This course is designed to meet the needs of intermediate-level students of Arabic as well as members of the business community who wish to learn Arabic for professional purposes. The topics cover travel, social, and business interactions. The course also introduces and engages with a variety of current, authentic and primary Arabic materials through the language of the newspapers, magazines, Internet news sites, and TV news. Some of the media topics that will be covered are meetings and conferences, elections, and demonstrations and social protest. By the end of this course, the students will be at a mid-intermediate level of proficiency in Arabic. Prereq: To enroll in this course, students should have completed four semesters of Arabic (AIS 101, AIS 102, AIS 201, and AIS 202). Alternatively, the students should seek the approval of the course instructor.

AIS 312 ARABIC FOR BUSINESS AND MEDIA II. (3)
This course builds on and expands the business, travel, and social topics covered in AIS 311 through additional and more complex situations and interactions, such as shopping, going around town, at the sales office, at the post office, at the bank, renting and buying a house and a lot of land. The course also expands on the media topics covered in the first part of this course, in terms of both variety and difficulty. Some of the new topics will be elections, conflict and terrorism, business, cultural and social news. The course will take the students to a high-intermediate level of proficiency in Arabic. Prereq: To enroll in this course, students should have completed five semesters of Arabic (AIS 101, AIS 102, AIS 201, AIS 202 and AIS 311). Alternatively, the students should seek the approval of the course instructor.

AIS 320 MODERN ARABIC LITERATURE AND FILM IN TRANSLATION. (3)
This course introduces students to major Arab writers, poets, and filmmakers through some of their primary novels, novelllas, poems, and films with a focus on the heartbeat of the Arab world.

AIS 330 ISLAMIC CIVILIZATION II. (3)
The Islamic world’s response to westernization and the resultant reassessment of its cultural role in the modern world.

AIS 331 CLASSICAL ARABIC LITERATURE (in English). (3)
Reading from some of the major works of Arabic literature (poetry and prose) of the 6th-14th centuries which are an integral part of the Arab cultural heritage, e.g., the ‘Mu’allaqat, Koran, Ibn Ishaq’s Sirah; al-Tabari’s Ta’riikh; Abu ’l-Faraj’s Kitab al-Aghani; al-Ghazali’s Ihya; al-Hamdi’s Maqamat; and Ibn Khaldun’s Muqaddimah.

AIS 338 WOMEN AND ISLAM. (3)
A survey of women’s issues related to Islam and contemporary Muslim culture including the perception of women in Islam, the role and rights of women in Islam, female circumcision, honor
AMS 340 FUNDAMENTALISM AND REFORM IN ISLAM. (3)
This course focuses on the revival of Islam in the 20th century and the various responses of Islam to modernism and western political and intellectual domination. Particular attention will be given to the rise of militant Islam and the terrorist attacks of 9/11. The original writings of major thinkers will be read and discussed.

AMS 345 ISLAMIC MYSTICISM. (3)
This course is an overview of Islamic spirituality, which refers to the spiritual aspects within basic Islamic texts and general Islamic practices, and Islamic mysticism, which refers to the concepts and practices of Sufism. Throughout the entire course, poems from Rumi, the greatest of the Sufi poets, will be read and discussed. The purpose of the course is to expose students to the ideas and practices of Islamic spirituality and mysticism, the history of Sufism and in a lesser extent the debate between Sufism and normative Islam.

AMS 395 INDEPENDENT WORK IN ARABIC/ISLAMIC STUDIES. (1-3)
Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

AMS 410 THEOLOGY AND LAW IN ISLAM. (3)
This course provides an historical and thematic overview of theology and law (Shari‘ah or Fiqh) in Islam. The main concepts of Islamic theology are introduced, comparing them to Christian thought and taking into account contemporary issues. The section on law covers the historical development of the classical legal schools and the main concepts of Islamic legal philosophy. Prereq: Islamic Civilization I or permission of the instructor.

AMS 430 ISLAM IN AMERICA. (3)
This course is an overview of the Muslim experience in America with special emphasis on the issues facing Muslims as they seek to adjust and find their space in America, especially in the wake of 9/11.

AMS 435 TOPICS IN ISLAMIC STUDIES (Subtitle required). (3)
Variable in content, this course focuses on important texts and issues in Islamic history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

AMS 440 INTRODUCTION TO THE QURAN. (3)
An introduction to the disciplines of knowledge related to the Quran, its major themes, style of presentation, and relevance to contemporary societies and issues.

AMS 442 ARABIC READING I. (3)
Advanced skills in speaking, reading, and analyzing selected texts from traditional and modern Arabic literature using formal spoken and written Arabic. Introduction to the use of Arabic computer software. Prereq: AIS 202 or equivalent.

AMS 443 ARABIC READING II. (3)
Continuation of AIS 442 with emphasis on Modern Arabic Short Stories. Prereq: AIS 442 or equivalent.

AMS 495G ADVANCED INDEPENDENT WORK IN ARABIC/ISLAMIC STUDIES. (1-3)
Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of AIS 395 and 495G.
AN 303 SUPPLY CHAIN MANAGEMENT. (3)
The study of supply chain management involves the management of key business processes, the flow of products and information, and relationships with fellow members of the supply chain. This course will introduce students to the terminology, concepts, and skills related to supply chain management. Students will develop an understanding of the complexities associated with the physical movement of goods and information, and how they affect the mission of the firm. Discussions will address the various processes and activities within an organization and how they interface with the rest of the supply chain. Prereq. Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 303.)

AN 306 ANALYTICS: MODELS AND METHODS. (3)
Analytical activities are rapidly expanding in businesses, government and not-for-profit organizations. For the modern enterprise, problems in practically every domain are being formulated as models, which are then used to analyze data – producing explanations and predictions that help businesses improve and compete better. Understanding how these models are implemented and solved via computers – generating solutions that must then be interpreted and appropriately applied in decisional processes. This course leads students through the steps of model formulation, solution, interpretation, and application in such crucial decision domains as investment, scheduling, production, inventory, and logistics. It furthers hands-on experiential exercises with such widely used modeling techniques as linear programming, network flow programming, and multiple-objective decision modeling. Prereq. Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 306.)

AN 320 BUSINESS COMPUTING SYSTEMS. (3)
This course investigates how business firms use computing systems to facilitate effective and efficient business processes, thereby improving individual and organizational productivity and competitiveness. The course is geared toward non-technical professionals who seek an overall understanding of how firms design and deploy computer-based solutions to organizational problems. Using cases and hands-on exercises as pedagogical tools, the course furnishes a business applications-oriented view of various computing technologies, such as communications networks, databases, decision support systems, and enterprise systems. The course also addresses ethical and global management issues arising from the worldwide deployment and use of such systems by modern, global business firms. Prereq. CS 101 or MOS Certification. Open only to Business Minors; not available for credit to Business and Economics Majors.

AN 322 INFORMATION SYSTEMS IN THE MODERN ENTERPRISE. (3)
This course provides an introduction to the uses of information systems in the management of organizations. Recognizing that modern organizations rely on such systems, it is geared toward aspiring managers who need to understand how their organizations and how they can participate in the realization in value from these systems. The course covers basic systems concepts; socio-technical issues; emerging hardware, software, and telecommunications infrastructure technologies; systems analysis and design, database management; system implementation; project management; and systems management. It also introduces such applications as decision support, knowledge management, and e-business with an emphasis on relevant managerial problems within both local and global contexts. Prereq. Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 324 DATA BASE MANAGEMENT. (3)
Databases are the backbone of information systems. Almost every modern organization uses database technology to support its routine operations. As information and database technology evolves, customer relationship management, human resources management, and electronic commerce. Database technology is also the foundation of data-driven decision-making that has permeated the business world. With the proliferation of data-driven decision-making and end-user computing, understanding database technologies is necessary for business students to remain competent in the ever-changing environment. Prereq. Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 324.)

AN 390 SPECIAL TOPICS IN ANALYTICS. (3)
This course number gives faculty members the flexibility to teach various special topics of interest to students, subject to contemporary student demand and faculty availability. The special topics may be concerned with techniques, technologies, and applications related to analytics. The offerings include, but are not limited to, such courses as Supply Chain Management, Enterprise Systems, Electronic Commerce, Systems Analysis & Design, Data Mining, Data Warehouse & Database Management, Online Analytical Processing, Knowledge Management Systems, and Programming Languages. While a student may take as many distinct DIS 390 courses as needed, only two or three may be counted as electives. A student may not repeat a special topics course under the same title. Prereq. Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 324.)

AN 395 INDIVIDUAL WORK IN ANALYTICS. (1-3)
This individually customized course enables the student to independently study a topic of personal interest that is not ordinarily covered in the standard curriculum. The student confers with a willing, qualified instructor to design the course – including the course scope, learning methods, timetable, milestones, deliverables, and evaluation metrics. Typically, a final written report or paper is required. To ensure progress, the student stays in contact with the instructor throughout the course of independent study. Examples of prior individual work include: Lean Development, Business Intelligence, Six Sigma, Manufacturing-Resources Planning, Mathe

AN 403G PRODUCTION AND INVENTORY SYSTEMS. (3)
This course is an advanced introduction to the complexities of managing production and inventory systems. An enterprise’s success in today’s highly-competitive, often-global business environment, depends on effectively managing its production activities and the related inventories at various production-process stages. Because such decisions are invariably tied to demand forecasts, the course begins with an examination of forecasting. Students are then led through the topics of production planning, master scheduling, material-requirements & manufacturing-resources planning, production activity control, capacity management, and sequencing & scheduling. The course culminates with a coverage of contemporary trends toward just-in-time manufacturing systems and lean manufacturing systems. Applications of analogous systems and principles in the service sector are also addressed throughout the course. Prereq. Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 403.)

AN 406G PRODUCTIVITY AND QUALITY MANAGEMENT. (3)
This course is an advanced treatment of two related concepts that are vital to the success of an enterprise: quality and productivity. As a key ingredient of competitive strategy, quality encompasses many attributes of a product or service – such as its design, its features, fit and finish, durability, safety, and customer treatment. In highly competitive settings, a firm that achieves and sustains high quality levels for its goods and/or services, while remaining at least as efficient as competitors in processes used to produce these outputs, tends to outperform its competitors. Beginning with an examination of connections between quality and productivity, this course examines their underlying philosophic, strategic, and human issues. The course includes both micro and macro perspectives on quality and productivity, comparing manufacturing and service sector strategies. Prereq. Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 406.)

AN 420G DATA MINING. (3)
Datamining is concerned with tools and techniques to help a data/business analyst numerically and visually explore vast data sets, classify data, predict outcomes, or identify associations, patterns, and exceptional events. In practical terms, such capabilities allow firms to better segment markets, evaluate and classify stocks, identify prospective customers, foretell contingencies and catastrophes, identify defaults and fraudulent transactions, measure churn, identify threats, perform service requests, bundle goods and services, recognize how events (e.g., purchases) are likely to unfold over time, and so on. Such capabilities often make the difference between survival and demise in today’s increasingly global, increasingly competitive, and increasingly volatile business settings. Prereq. Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 420.)

AN 446G TOPICS IN ANALYTICS. (3)
This course covers contemporary topics in enterprise data, analysis, and decision making. Past coverage has included Data Mining, Data Communications, and Valuation of Information. The topics covered would also be valuable to students from programs such as Computer Science, Telecommunications, Statistics and Engineering. Prereq. Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 446.)

AN 450G ANALYTICS TECHNOLOGIES. (3)
This course develops computing skills relevant to the construction, maintenance, and usage of systems for analytics. It does so by combining the facets of technology (e.g., advanced spreadsheet computing), realistic workplace decision making, and decision support system development into a capstone experience. Prior courses introduce students to analytical techniques commonly used in organizational decision making, as well as current information technologies. This course combines students’ abilities in both areas within an advanced software context. Specifically, the course enhances students’ abilities in developing computer-based systems that employ analytical techniques for the purpose of aiding organizational decision-makers. Prereq. Senior standing or graduate student status in the College of Business and Economics. B&E graduate students must have completed 9 of the 18 credits required for an Analytics major. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor.
ANA 109 Anatomy and Physiology for Nursing I. (4)
Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.)

ANA 110 Anatomy and Physiology for Nursing II. (4)
Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.) Prereq: Successful completion of ANA 109 with a C or better.

ANA 209 Principles of Human Anatomy. (3)
The structure of the human body will be examined at various levels: cellular, tissues and organ systems. The gross anatomical arrangement of the body will be studied in a system-by-system format relating structure to function and the fundamentals of human embryology/normalality with adult anatomy. The central nervous system will be emphasized. Prereq: Introductory biology or zoology.

ANA 305 Introduction to Neuroscience Techniques. (4)
This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent. (Same as BIO/PSY 305.)

ANA 309 An Introduction to Regional Anatomy. (5)
This course is designed to serve as a transition between systems-based undergraduate anatomy and regionally-based medical professional anatomy. The human body will be taught in an online format, including modules for independent study, weekly virtual team-based learning sessions, and formal and practical examinations. Anatomical organization will be presented in a regional format so that students can assimilate the bones, muscles, vasculature, innervations, and lymphatic pattern for each region of the body, similar to the pedagogical approach used in medical professional programs. Prereq: ANA 209 and mastery of the Second Life program. #ANA 394 Independent Research in Neurobiology and Neuroscience. (1-3)
ANA 394 is designed to provide students with an intensive experience in laboratory or field research. Participation should take an active role in the design and execution of experiments and in the analysis and interpretation of data. They should be capable of "independent research" in the sense that they can conduct the experiments with little direct supervision. Students are expected to become familiar with related research in the current literature by regularly reading scientific journals. The student is expected to devote at least 3-4 hours per week for each credit hour enrolled to laboratory work, although often more time is necessary.

ANA 395 Independent Research in Anatomy and Neurobiology. (1-3)
Independent research with faculty members. May be repeated to a maximum of 12 credits. Laboratory, three to nine hours per week. Prereq: Biology or psychology majors with sophomore, junior, or senior standing and consent of a faculty member.

ANA 410G Neurobiology of Brain and Spinal Cord Disorders. (3)
ANA 410G is a multidisciplinary discussion of neurodegenerative diseases and neurologic disorders. The course objective is to provide an in-depth understanding of the basic science and clinical aspects of neurologic disorders and neurodegenerative diseases. Current treatment strategies and new approaches for treatment and potential cure of these devastating illnesses are included. These include the role of genetics in aging and neurodegeneration, the effects of aging and disease on the brain and central nervous system, and the molecular and cellular basis of neurodegenerative diseases and neurologic disorders. The format of the course will consist of a series of formal lectures and informal discussion sessions. Reference materials will be recent review articles. Graduate students taking the course will present studies from the primary medical literature in a journal club format and will also prepare a paper examining one disorder in detail. This course will be of interest to advanced students from a variety of disciplines whose interests concern brain and spinal cord disorders. Prereq: For undergraduate students: BIO 302 or PSY 312 or consent of course directors. For graduate students: Enrollment in a graduate program in biomedical sciences, gerontology, or any area of neuroscience is required. This course is open to all students, including those enrolled in the College of Medicine or graduate students from other programs.

ANA 417G Functional Human Neuroanatomy. (3)
This course provides an introductory level of understanding of human central nervous system (CNS) anatomy and function. Lecture topics will explore the CNS in terms of structures that make up functional systems (e.g., motor, sensory, visual, etc.). The course will integrate neuroanatomy and neurophysiology with human and animal anatomy. Prereq: For undergraduate students: BIO 302 or consent of course director. Prereq: #ANA 394 Independent Research.

ANA 442 Molecular and Cellular Neurobiology. (3)
This 3 credit hour course is designed to be an introductory course for undergraduate students aimed at providing an overview of central nervous systems. The course will cover topics associated with cellular and molecular neurobiology. Subject matter is intended to range from molecular mechanisms underlying neuronal signaling and cellular function to how these properties are integrated across simple networks, neural systems and behavior. Prereq: BIO 152 or equivalent; BIO 302 or PSY 312, or consent of course director.

ANA 503 Independent Work in Anatomy. (3)
Reading and laboratory work in a defined area of anatomy are carried out under the direct supervision of one faculty member. Hours of discussion and laboratory work by individual arrangement. May be repeated to a maximum of 12 credits. Prereq: #ANA 394 Independent Research in Neurobiology and Neuroscience.

ANA 511 Introduction to Human Anatomy. (5)
The principles of organization of the human body are presented. Gross anatomy lectures initially follow a systemic plan. This is succeeded by a regional presentation. Several methods of studying anatomy are utilized. These include radiology, palpation of living structures, and the demonstration of preserved fresh and fixed materials. Prereq: Some background in biology, including one or more such courses as biology, zoology, botany, comparative anatomy or embryology, and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 512 Microscopy and Ultrastructure. (4)
The organization of cells, tissues and organs are presented through lectures and in the laboratory, through the microscopic study of histological sections and illustrations. Prereq: #ANA 394 Independent Research in Neurobiology and Neuroscience. Prereq: Admission to a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 530 Combined Histology and Special Oral Microanatomy. (5)
ANA 530 will cover advanced topics in human dental anatomy and neuroanatomy. Topics include: neural pathways, development, neuroanatomy, neurobiochemistry, neuropharmacology, neuroimaging and molecular neuroanatomy. Laboratory experiences will be used to complement lectures. Prereq: ANA 511, 512, 513; PGY 511; and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 532 Systemic Human Anatomy. (5)
ANA 532 will cover advanced topics in human dental anatomy and neuroanatomy. Topics include: neural pathways, development, neuroanatomy, neurobiochemistry, neuropharmacology, neuroimaging and molecular neuroanatomy. Laboratory experiences will be used to complement lectures. Prereq: ANA 511, 512, 513; PGY 511; and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 534 Dental Gross Anatomy and Embryology. (6)
Study of human gross and developmental anatomy with particular emphasis on functional anatomy of the head and neck. Lecture/laboratory course, with dissection being an essential component of the laboratory portion. 140 hours. Prereq: Admission to the College of Dentistry. (Same as OBI 815.)

ANA 536 Human Embryology, an Abbreviated Course. (2)
A concise presentation of developmental mechanisms, early development of the embryo, and subsequent development of selected systems and regions of the body. Lecture, one hour. Prereq: Admission to the College of Dentistry.

ANA 538 Dental Neuroanatomy. (2)
Study of human dental neuroanatomy with emphasis on functional neuroanatomy of central nervous system, especially related to cranial nerves 5, 7, 9, 10, and 10, and long tracts. Lecture, 1 hour per week. Prereq: Admission to the College of Dentistry. (Same as OBI 817.)

ANA 600 Seminar in Anatomy. (1)
A weekly seminar devoted to presentation and discussion of classic and new research in the field. May be repeated to a maximum of 6 credits. Prereq: Admission to the graduate anatomy program or permission of the course director.

ANA 605 Neurobiology of CNS Injury and Repair. (3)
The objective of the course will be to provide a general overview of the current state of knowledge concerning the pathophysiology and therapeutic approaches to central nervous system injury. The course will provide a strong working background concerning the issues, techniques and priorities of neurotrauma therapeutic discovery research aimed at reducing acute post-traumatic neurodegeneration in the injured brain or spinal cord or enabling regeneration and repair. This course is a graduate level course intended for students who are in their second or subsequent years of graduate study and who are pursuing focused research training in neurotrauma research. No special prerequisites, other than graduate standing, are necessary. However, a background in neuroanatomy and neurophysiology is highly recommended. Prereq: Permission of instructor. (Same as PGY 605.)

ANA 609 Educational Strategies in the Anatomical Sciences. (3)
This course offers an overview of major principles and techniques associated with teaching the anatomical sciences. Classroom and laboratory issues, teaching theory, portfolio development and assessment strategies are among the topics covered in this course. Prereq: Admission to the graduate certificate program in the Anatomical Sciences or the permission of the course director.

ANA 611 Regional Human Anatomy. (5)
Functional human anatomy covering all regions of the body utilizing dissection techniques with an emphasis on cross-sectional anatomy and normal morphology. Lecture, four hours; laboratory, four hours per week. Prereq: Enrollment in the PAS Program of the College of Allied Health or graduate program in the biomedical sciences (by consent of course director only).
<table>
<thead>
<tr>
<th>Course Descriptions</th>
</tr>
</thead>
</table>
| **ANA 612 BIOLOGY OF AGING.** (3)  
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be qualitative and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as BIO/GRN/PGY 612.) |
| **ANA 618 MOLECULAR NEUROBIOLOGY.**  
Hands-on course for practitioners interested in acquiring functional MRI techniques (as a research tool. Prereq: (1) Introductory statistics (e.g. PSY 610, STA 503, STA 570). (2) Permission of instructor. | **ANA 629 TECHNIQUES OF ANATOMICAL RESEARCH.**  
The objectives of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, protected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology. |
| **ANA 631 ADVANCED HUMAN ANATOMY.** (3-5)  
The objective of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, protected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology. | **ANA 632 ADVANCED NEUROANATOMY.** (3-5)  
The objectives include specific and detailed correlation of microscopic and ultrastructural morphology of structures in the nervous system with function of these structures. Emphasis will be placed on structural-function relationships, neurotransmitters, chemical constituents of the nervous system, neuronal as well as non-neuronal cells, plasticity of the nervous system and developmental biology. The detailed content and emphasis will depend on both the background and goals of the students. Depending on number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and oral presentations may be a course requirement. Prereq: ANA 511, 512, 513, 516, or equivalents, or consent of instructor. |
| **ANA 638 DEVELOPMENTAL NEUROBIOLOGY.** (3)  
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cell biological and molecular approaches to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as BIO/PGY/PSY 638.) |
| **ANA 655 INTRODUCTION TO MAGNETIC RESONANCE IMAGING.** (3)  
Survey of basic concepts and applications in magnetic resonance imaging: physics and chemistry, basic mathematical foundations, workings of a modern MRI scanner, image reconstruction, biology with emphasis on neurobiology, medical applications in the brain and heart. Covers basic functional imaging and spectroscopy. Prereq: Undergraduate major in a science or engineering discipline. |
| **ANA 660 BIOLOGY OF REPRODUCTION.** (3)  
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanism of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as ASC 660 and BIO 660.) |
| **ANA 662 ULTRASTRUCTURAL ANATOMY.** (2-5)  
The objectives of this course are to advance the students’ knowledge of the submicroscopic structure of cells and tissues. Correlation of intra- and extracellular morphology and function will be emphasized. Students will do detailed laboratory work in the techniques of electron microscopy. Depending on the number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: ANA 512, previous work in microscopy including histology or cytology, or equivalents, and consent of instructor. |
| **ANA 710 AGING OF THE NERVOUS SYSTEM.** (3)  
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organic, and behavioral. A strong background in basic sciences is encouraged. (Same as GRN/PGY/PHA 710.) |
| **ANA 748 MASTER’S THESIS RESEARCH.** (0)  
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. |
| **ANA 749 DISSERTATION RESEARCH.** (0)  
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 residence credit following the successful completion of the qualifying exams. |
| **ANA 767 DISSERTATION RESIDENCY CREDIT.** (2)  
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. |
| **ANA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)  
May be repeated to a maximum of 12 hours. |
| **ANA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.** (0-12)  
May be repeated indefinitely. |
| **ANA 780 SPECIAL TOPICS IN NEUROBIOLOGY.** (1-3)  
A lecture/seminar course offered based on contemporary topics in neurobiology. Course is designed to offer different emphasis in a given year and to cover timely topics. Prereq: Consent of the course director. |
| **ANA 790 RESEARCH IN ANATOMY.** (1-12)  
Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Consent of the instructor. |
| **ANA 801 HISTOLOGY FOR PHYSICAL THERAPY STUDENTS.** (1)  
A survey of selected basic and specialized mammalian tissues most commonly involved in diseases treated by physical therapists. The course provides information required for understanding the cellular mechanisms behind the various diseases and the rationale for subsequent treatment. Prereq: Admission to the College of Allied Health. |
| **ANA 802 NEUROANATOMY FOR PHYSICAL THERAPY STUDENTS.** (2)  
A concise account of the functional anatomy of the central nervous system. The anatomical organization is correlated with physiological activity. Emphasis is placed upon the morphological basis for progressively higher levels of control of activity from the simple reflex to voluntary motor activities controlled by the cerebral cortex. This type of knowledge is required for proper understanding and performance of physical therapy technicians in the treatment of medical and surgical disease. |
| **ANA 811 HUMAN ANATOMY FOR ALLIED HEALTH PROFESSIONS.** (5)  
A dissection-based gross anatomy course designed to present the principles of the human body in a regional format with special emphasis on functional/anatomical clinical relationships. Prereq: Enrollment in the PT program of the College of Allied Health Professions. |
| **ANA 814 HUMAN STRUCTURE/GROSS ANATOMY.** (6)  
The course consists of lecture, small group, laboratory, and palpation exercises that provide a basic understanding of anatomical principles, organization and development. Anatomical structures are introduced as a basis for future functional correlates and principles are taught via laboratory discussions, prosections, dissections, films and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year). (Same as MD 814.) |
| **ANA 815 FIRST-YEAR ELECTIVE, ANATOMY.** (1-3)  
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine. |
| **ANA 825 SECOND-YEAR ELECTIVE, ANATOMY.** (1-4)  
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser. |
| **ANA 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6)  
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by the permission of the Student Progress and Promotions Committee. |
| Approved elective:  
**ANA 850 APPLIED HUMAN ANATOMY** |

### Anesthesiology

**ANS 815 FIRST-YEAR ELECTIVE, ANESTHESIOLOGY.** (1-3)  
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anesthesiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.
ANT 160 CULTURAL DIVERSITY IN THE MODERN WORLD. (3)

Directed at non-majors, this course is intended to introduce the student to the diversity of human cultural experience in the contemporary world. Goals of the course include gaining an appreciation for the common human uniqueness and uniqueness of all cultures; to gain a sensitivity toward stereotypes and ethnocentrism, and to understand the distinctions between “race,” ethnicity and racism. The course features extended descriptions of the cultural dynamics of the culture(s) with which the instructor has worked.

ANT 220 INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3)

The study of the lifeways and beliefs of different peoples. The objectives of the course are to foster an appreciation for the variety of cultural traditions found throughout the world, and to introduce students to anthropological concepts and methods of inquiry.

ANT 221 NATIVE PEOPLE OF NORTH AMERICA. (3)

This is a survey of the aboriginal American cultures of North America and of the impact of four centuries of British, French, Spanish, and Russian contact on Native American societies. Particular emphasis is placed on comparing and contrasting cultural characteristics of Native American groups living in ecologically diverse regions of North America. The course will include consideration of the status of Native Americans in present-day North America.

ANT 222 MIDDLE EAST CULTURES. (3)

As part of the General Education curriculum, this course falls under the “Global Dynamics” category of the broad area of “Citizenship.” This course will explore some of the cultures, religions, beliefs, and aspects of culture, found in the broad region of the Middle East and North Africa. Exploration will be rooted in anthropological research and perspective, and organized around rubrics including kinship, gender, religion, and cultural performance.

ANT 225 CULTURE, ENVIRONMENT AND GLOBAL ISSUES. (3)

A fundamental part of human experience is interacting with our physical surroundings, but in the globalized ecosystem of our planet, our interactions with the physical world increasingly include distant places rather than just the surroundings we see from our door step. This course introduces students to awareness, knowledge and ability to reflect on how human behavior intersects with global environments. To do so, it applies an anthropological interpretive framework to topics that link human lifestyles, the environment and global issues. Prereq: Freshman or sophomore standing only.

ANT 230 INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. (3)

This course explores the ways in which biology, the environment and culture come together to form the human condition. Topics include human genetics, human evolution, primate behavior, contemporary human variation and applied biological anthropology, including forensics, child growth and human nutrition. This course includes a laboratory component.

ANT 240 INTRODUCTION TO ARCHAEOLOGY. (3)

Introduces the theories, techniques, and strategies used by archaeologists to recover and interpret information about past cultures.

ANT 241 ORIGINS OF OLD WORLD CIVILIZATION. (3)

This course explores the rise of civilizations in the Old World through archaeology and history. The course examines theories of civilization and state formation and case studies that demonstrate how states arose. Concentrates on regions that produced some of the earliest and most complex societies on the planet: Mesopotamia, Egypt, the Indus Valley, China, and Europe. Comparing and contrasting these great societies will show how each was influenced by its unique social, cultural and environmental surroundings. The course also examines the origins of agriculture, writing, art, trade, mathematics, astronomy and religion in Africa, Asia, and Europe.

ANT 242 ORIGINS OF NEW WORLD CIVILIZATION. (3)

This course discusses warfare, commerce, social organization, political diplomacy, disease, demographics, religion, and environmental degradation among the ancient peoples of the Americas as revealed by archaeological, art historical, and textual data. Students will gain an appreciation of the diversity of human life in the New World as well as an understanding of the tremendous cultural achievements of the Inca, the Aztec, the Maya, and their neighbors. We will use the concept of complexity as a framework for comparing different societies and for contextualizing the relevance of ancient civilizations for understanding global processes in the contemporary world.

ANT 245 FOOD CULTURE AND SOCIETY. (3)

This course is designed for students in anthropology, food, nutrition, agriculture and environmental studies. It explores food items and cultural systems. Food systems include the knowledge, values and practices used to produce, distribute, process, exchange and consume food. These are embedded in culture and operate within societies. Thus, why we eat, what we eat, when, where and with whom we eat, how and where we obtain our food, how we produce, process and distribute it are highly variable across the globe. Whether we eat fast food or eat in restaurants, whether we live in a small town or large city, whether we are exposed to food from distant places rather than just the surroundings we see from our door step. This course will explore these questions and more.

ANT 251 GLOBAL HEALTH: CULTURE, PATHOLOGIES AND SOCIAL INEQUALITIES. (3)

What are the relationships between globalization, development, social justice and health? How do different global health interventions influence how people provide for their survival and solutions to chronic and emergency health problems? This course explores contemporary global health issues from an anthropological perspective. Participants examine health effects of economic collapse, disasters and socio-political changes in industrialized and developing countries. We also study the growing global health industry from a social science perspective to evaluate the strengths and limitations of international aid, humanitarian interventions and NGOs for the well-being of individuals and communities. Topics include chronic and infectious diseases, environmental disasters, pharmaceuticals and the traffic in human organs. Course materials include texts from anthropology, mass media, documentaries, blogs and Twitter feeds. This course will be of interest to students in anthropology and the social sciences, International Studies, pre-med students and those who are interested in pursuing advanced degrees or professional careers in development and policy.

ANT 301 HISTORY OF ANTHROPOLOGICAL THEORY. (3)

The purpose of this course is to acquaint the undergraduate student with the history of the development of anthropological ideas from their precursors in thought about human nature and behavior beginning with ethnographic and philosophical literature from Greek and Roman civilization, and ending with discussion of current emphases in anthropological theory. The course will provide anthropology majors with the foundations they need to master this area of disciplinary knowledge.

**ANT 302 ETHNOGRAPHIC METHODS: DOING ANTHROPOLOGY.** (3)

Introduction to qualitative research methods in cultural anthropology, with a focus on participant observation, interviewing, collaborative methods, ethnographic writing, and other techniques. Prereq: Anthropology major or minor status or instructor's approval.

**ANT 303 TOPICS IN THE ANTHROPOLOGY OF FOOD AND NUTRITION: (Subtitle required)** (3)

This course focuses on food and nutrition through the lens of anthropology. Topics will vary, but each semester the course will provide insight into an aspect of food and nutrition that is relevant to present-day concerns in regional, national, and/or global context. Nutrition is one of the most critical health issues in the U.S. and globally as people struggle with both undernutrition and overnutrition and the long-term consequences of both to human well-being. At the same time, it is important to recognize that food is embedded in cultural, social, and political-economic contexts that serve to foster and maintain cultural and social identity, and/or in which food is a commodity to be bought, sold and traded for economic profit and/or political gain.

**ANT 311 ANTHROPOLOGY OF GLOBALIZATION.** (3)

This course explores the ways in which differences in factors such as nationality, ethnicity, age, gender, class and occupation shape experiences of globalization. We will analyze and interpret rapidly changing patterns of global production, consumption, politics, resistance, adaptation, and identity construction around the world.

**ANT 312 BUSINESS, CULTURE AND SOCIETY.** (3)

The course introduces students to recent research in business and organizational anthropology within three overlapping domains: marketing and consumer behavior, organizational theory and culture, and global business (especially international marketing, intercultural management and intercultural communication). The course will explore the meanings and uses of core concepts such as culture, design, social organization, consumption, globalization, ethnography, business, branding and marketing. Students will have opportunities for hands-on research involving observation and critical analysis and will learn how to make effective (oral, written, and visual) critical commentaries on the methods, theories and ethics of business anthropology.

**ANT 315 VISUAL AND SOUNDSCAPE ANTHROPOLOGY.** (3)

Anthropological observation, interviewing, and analysis of human experience score the inception of the discipline, and are increasingly paying attention to what can be learned through the other senses as well. This course will explore ethnographic, documentary, and cross-cultural film traditions; ethics, methods, and theories of recording and presentation; ways to use sensory anthropology methods in all the subfields (archaeologists reconstructing soundscapes, for example); critical attention to the uses of cinema, television, radio and social media to disempower or empower; indigenous media; and current work in participatory video and interest in analog vs. digital technologies.

**ANT 320 ANDEAN CIVILIZATION.** (3)

A study of the Inca and other pre-Hispanic civilizations of highland South America in terms of their origins, their development, and their material, social, and intellectual achievements.

**ANT 321 INTRODUCTION TO JAPANESE CULTURE, MEIJI (1868) TO PRESENT.** (3)

General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nation-building, Japan and the West, Japan and Asia (for the Meiji period 1868-1912); gender constructions in modernization, urbanization and consumerism; the Taisho period (1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as JPN 321.)

**ANT 322 ANCIENT MEXICAN CIVILIZATIONS.** (3)

The course provides a study of the Aztec and the related cultures of the New World. It provides a detailed discussion of pre-Columbian subsistence practices, economy, religion, and politics by tracing the development of ancient Mesoamerican civilization from its earliest beginnings to the Spanish conquest. (Same as LIN 325.)

**ANT 324 CONTEMPORARY LATIN AMERICAN CULTURES.** (3)

This course is a detailed survey of societies and cultures of contemporary Latin America, utilizing contributions from anthropological research. Prereq: Introductory social science course.

**ANT 325 LANGUAGE AND CULTURE.** (3)

This course is an introduction to linguistic anthropology. The course reviews the basic principles of linguistic analysis and examines the ways in which linguistic structures interact with and reflect cultural variation. (Same as LIN 325.)

**ANT 326 PEOPLE AND CULTURES OF SUB-SAHARAN AFRICA.** (3)

A survey of indigenous societies and cultures of Africa south of the Sahara, with special attention to their adaptation of colonialism and post-colonial national development. Prereq: Sophomore standing (S). (Same as AAS 326.)

**ANT 327 CULTURE AND SOCIETIES OF INDIA AND SOUTH ASIA.** (3)

This course considers the interrelationships between the various religions, political and philosophical traditions and practices of India and South Asia in the context of their shared cultural, historic, structural, geographic and demographic ties.

**ANT 328 THE ANCIENT MAYA.** (3)

This course uses archaeology, epigraphy, ethnohistory and ethnographic analogy to explore the origin, florescence and decline of the ancient Maya (1000 BC to 1500 AD). The class ties economics, politics, social organization, and religion into a holistic understanding of the ancient Maya world.

**ANT 329 CULTURES AND SOCIETIES OF EURASIA AND EASTERN EUROPE: SOCIALISM AND POST-SOCIALIST CHANGE.** (3)

This course explores an anthropological study of cultures and societies of Eurasia and Eastern Europe. The course considers the demise of Soviet socialism and the emergence of democracy and market economies. We examine how people experience political, cultural and economic transformations in their social relations and in their everyday lives.

**ANT 330 NORTH AMERICAN CULTURES.** (3)

This course uses readings, films, and music to explore the plurality of peoples and cultures in North America— with particular attention to the U.S. We will look at youth cultures as sites of creativity and resistance, examine perennial problems in social equality, consider the similarities and differences between urban and rural ways of life, and explore environmental concerns as an integral part of making and sustaining culture.

**ANT 331 ANTHROPOLOGY OF NORTH AFRICA.** (3)

This is a survey course of North Africa as a cultural area. Countries included in any given semester will vary. North Africa is Islamic and is often considered to be part of the Middle East but has a distinct history and culture of its own. Course content will include cultural, social, historical, economic, religious, and political perspectives on this important region. Ethnicity and the impact of colonialism will be discussed. Other important segments will examine gender status and roles, family and marriage, sociopolitical organization, the life course of males and females, and aging.

**ANT 332 HUMAN EVOLUTION.** (3)

Basic concepts and theory of evolution will be reviewed and applied to the study of fossil humans. The evidence for the evolution of humans and their primate relatives will be studied, with attention paid to alternate interpretations of the data. Prereq: ANT 230 or BIO 150.

**ANT 333 CONTEMPORARY HUMAN VARIATION.** (3)

This course focuses on human variation resulting from adaptation to a wide range of environments and the stresses inherent in each. It explores how humans respond to natural stresses, e.g., cold, heat, aridity and altitude, and human-made stresses, e.g., poverty, malnutrition and chemical pollution.

**ANT 335 RELIGION IN EVERYDAY LIFE.** (3)

Directed at non-majors (with no anthropology prerequisite), this course is intended to introduce the student to the diversity and unity of religious beliefs and practices in everyday life throughout the world through the lens of the social science anthropology. This includes the study of religions both textual and non-textual, large-scale and small-scale. The course content will include ethnographic materials as well as an examination of various methods and theoretical approaches used in anthropology in the cross-cultural study of religion. Questions that are addressed in this course include: Why do humans have/need religion? What is “religion”? Where, when, and how did “religion” evolve as a cultural universal in the human species? We will examine the basic components of religious beliefs and practices and how they are integrated into human life both individually and in communities. Students will think critically about the social organization of religion and impact of religion on society. Other areas of discussion will include: religious specialists, sacred places, religion and adaptation, religion and gender, and politics and religion. This course is much more than a typical survey of world religions and will specifically encourage the cross-cultural comparative perspective of a significant feature of all human groups.

**ANT 338 ECONOMIC ANTHROPOLOGY.** (3)

A comparative ethnographic, theoretical, and historical exploration of the socio-cultural constitution of economic practices. Students will examine different approaches to questions of human nature, choice, values and morality. The course explores power and social life in diverse cultures through a topical focus on peasants, markets, gifts, commodities, consumption and systems of production. The course provides a foundation for applying anthropological knowledge to real-world situations and the material is readily applied to anthropology, international business and social science.

**ANT 339 HUMAN RIGHTS IN GLOBAL PERSPECTIVE.** (3)

This class discusses theoretical debates on human rights within the discipline of anthropology and contrasts these approaches to those of other disciplines. Once students acquire this foundation, they apply their knowledge to a human rights problem of their own choice. They identify a researchable question about human rights and use appropriate evidence and methods to substantiate their claims. Students will also learn through experience the ethic dimensions of research and how research can have an important impact on society.

**ANT 340 DEVELOPMENT AND CHANGE IN THE THIRD WORLD.** (3)

This course introduces the student to how anthropologists approach the study and practice of economic development. It explores cross-culturally how local populations have responded to development; the different topics of development anthropology, such as agriculture and rural development; and the ways anthropological knowledge is applied in addressing development problems.

**ANT 341 APPALACHIAN ENGLISH.** (3)

The Appalachian Mountains, which range from New York to Mississippi, making up part of the larger geographic region of the Southern Highlands. These states are known to many Americans as being home to unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this

<tr>
<td>ANT 350</td>
<td>TOPICS IN ANTHROPOLOGY</td>
<td>Discussion, reading and writing focusing on specific topics in anthropology. May be repeated up to a maximum of nine credits under different subtitle.</td>
<td>(Subtitle required)</td>
</tr>
<tr>
<td>ANT 351</td>
<td>SPECIAL TOPICS IN ARCHAEOLGY</td>
<td>Discussion, reading and writing focusing on specific topics in archaeology. May be repeated up to a maximum of twelve credits under a different subtitle.</td>
<td>(Subtitle required)</td>
</tr>
<tr>
<td>ANT 352</td>
<td>SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY</td>
<td>Discussion, reading and writing focusing on specific topics in cultural anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.</td>
<td>(Subtitle required)</td>
</tr>
<tr>
<td>ANT 355</td>
<td>SPECIAL TOPICS IN PHYSICAL OR BIOLOGICAL ANTHROPOLOGY</td>
<td>Discussion, reading and writing focusing on specific topics in physical or biological anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.</td>
<td>(Subtitle required)</td>
</tr>
<tr>
<td>ANT 375</td>
<td>ECOLOGY AND SOCIAL PRACTICE</td>
<td>This course provides a broad survey of theoretical and historical issues in the link between humans and their environment. Throughout the semester, students will read about and discuss the many ways humans interact with their physical surroundings. Students will examine human cultural adaptation to different ecological settings, and with an overall concern of finding general principles that apply to the many human lifestyles on the planet.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 399</td>
<td>FIELD BASED/COMMUNITY BASED EDUCATION</td>
<td>A community-based or field-based experience in Anthropology under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Pass-fail only. Prereq: Permission of instructor and departmental chairperson; completion of departmental learning agreement.</td>
<td>(1-15)</td>
</tr>
<tr>
<td>ANT 401</td>
<td>GENDER ROLES IN CROSS-CULTURAL PERSPECTIVE</td>
<td>Explores the theoretical and substantive basis for contemporary thinking about gender from an anthropological perspective. Gender content is explored in several cultures representing all levels of sociocultural complexity.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 420</td>
<td>SURVEY OF MEDICAL ANTHROPOLOGY</td>
<td>This course provides a survey of health, disease, and healing in non-Western and Western societies. An examination of major theoretical perspectives in medical anthropology.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 432</td>
<td>ANTHROPOLOGY OF EASTERN EUROPE AND RUSSIA</td>
<td>An anthropological approach to the cultural, political, and economic experiences of people living under state socialism and through its demise. We ask how everyday life and social relations in this region are being affected by emerging market relations and democracy. Reading includes ethnographic studies and the works of essayists, fiction writers, and scholars from the region. Prereq: ANT 160 or ANT 220.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 433</td>
<td>SOCIAL ORGANIZATION</td>
<td>This course provides an overview of how anthropologists approach the study of social organization. The class will provide historical and conceptual background to the study of social organization, and explore a range of organizational forms from rural households to complex communities.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 435</td>
<td>CULTURES AND POLITICS OF REPRODUCTION</td>
<td>This course takes a cross-cultural approach to understanding the ways reproduction and associated phenomena (such as family formations and the social use of technologies) comprise arenas where social relations become created and challenged. Ethnographic case studies will explore cultural rules and constructions of the body (sexuality, anatomy and physiology), parenthood, and kinship relations; and students will examine the ways the state, social movements, legal/medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: ANT 220 or WS 201 or permission of instructor.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 440</td>
<td>ANTHROPOLOGICAL PERSPECTIVES ON CHILD GROWTH</td>
<td>This course examines basic concepts of child growth and development, the evolutionary pattern of human growth and comparative patterns of human growth across populations. Taking a biocultural approach, the course explores the many influences that facilitate or constrain child growth, including poverty, gender ideology, nutrition, and illness, focusing especially on social inequality. Taking a child-centered approach, the course also focuses on the lives of children, how children cope with the circumstances of their lives, and the effect of those circumstances on their well-being.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 450</td>
<td>SYMBOLS AND CULTURE</td>
<td>Examines the way in which symbolic systems create the meanings through which we experience life. The course will explore symbols and symbolizing behavior from a humanistic perspective, and will present examples of non-Western symbolic systems. Prereq: ANT 220, or consent of instructor.</td>
<td>3</td>
</tr>
<tr>
<td>ANT 470G</td>
<td>REGIONAL AMERICAN ETHNOGRAPHY</td>
<td>The ethnography of a selected North American or South American culture area or group. Both historical and contemporary cultures will be considered, e.g., Appalachia, Northwest Coast Indians, Urban American, etc. May be repeated to a maximum of six credits.</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 506</td>
<td>SOCIOLINGUISTICS</td>
<td>This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN/SOC 506.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 507</td>
<td>LINGUISTIC ANTHROPOLOGY</td>
<td>This course is an advanced survey of current areas of research in linguistic anthropology. Topics include language and thought, cultural differences in linguistic interaction, the ethnography of communication, ritual uses of language, language and identity and cultural poetics. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN 507.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 515</td>
<td>PHONOLOGICAL ANALYSIS</td>
<td>This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 515.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 516</td>
<td>GRAMMATICAL TYPOLOGY</td>
<td>This course examines the typological classification of languages according to their morphological and phonological characteristics. Course work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from a non-Western language. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 516.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 519</td>
<td>HISTORICAL LINGUISTICS</td>
<td>This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world's languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 221 and LIN 222. (Same as LIN 519.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 525</td>
<td>APPLIED ANTHROPOLOGY</td>
<td>Principles of policy research and intervention in cultural anthropology with attention to the theoretical and ethical basis of such research and intervention. Intervention techniques considered include research and development anthropology, action anthropology, community development, community advocacy anthropology and culture brokerage. Prereq: Nine hours of cultural anthropology or consent of instructor.</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 530</td>
<td>ELITES IN CROSS-CULTURAL PERSPECTIVE</td>
<td>This course examines elites in different areas of the world paying special attention to what defines them as power holders, their sub-cultures, history, patterns of class reproduction, and relations to subaltern groups. The class will also explore the critical perspectives gained from studying up, as well as the theoretical and methodological difficulties of doing this kind of work.</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 532</td>
<td>ANTHROPOLOGY OF THE STATE.</td>
<td>This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world's languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 221 and LIN 222. (Same as LIN 519.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 534</td>
<td>SOCIOLOGY OF APPALACHIA</td>
<td>A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, sociology and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as CLD/SOC 534.)</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 541</td>
<td>ARCHAEOLOGICAL METHOD AND THEORY</td>
<td>Examines the concepts, aims and methodology of archaeology as a scientific discipline within the social sciences. Attention given to the basic principles and recent advances of archaeological fieldwork and post-field analysis. Prereq: ANT 240 and six hours of cultural anthropology or archaeology courses, or consent of instructor.</td>
<td>3</td>
</tr>
<tr>
<td>*ANT 543</td>
<td>CULTURAL RESOURCE MANAGEMENT</td>
<td>Introduction to the theory and practice of culture resource management as it has developed in the historic preservation movement in the United States. The history of preservation is covered and related to the development of current legal standards. Prereq: Consent to entry is required.</td>
<td>3</td>

Material culture to address research issues of interest in anthropology, history, and other relevant disciplines. Prereq: ANT 240.

ANT 555 EASTERN NORTH AMERICAN ARCHAEOLOGY. (3) Detailed analysis of prehistoric cultures of eastern United States with emphasis on interpretation of prehistory in Ohio River Valley. Prereq: ANT 240 and six hours of archaeology or cultural anthropology, or consent of instructor.

ANT 580 ADVANCED TOPICS IN ANTHROPOLOGY. (3) Selected topics of the theoretical or methodological importance in anthropology, with special attention to topics of contemporary relevance. Refer to Schedule of Classes for topics. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

ANT 581 INDEPENDENT WORK IN ANTHROPOLOGY. (1-4) May be repeated three times to a maximum of 12 credits. Prereq: Major in anthropology, standing of 3.0 in the department and consent of instructor.

ANT 582 SENIOR INTEGRATIVE SEMINAR. (3) Seminar focusing on current issues in anthropology. Purpose is to provide a format in which advanced undergraduates can integrate knowledge acquired in previous anthropological course work and evaluate the contribution of the different anthropological subdisciplines to understanding contemporary problems. Emphasis placed on oral and written communication. Prereq: Major in anthropology; senior standing.

ANT 585 FIELD LABORATORY IN ARCHAEOLOGICAL RESEARCH. (3-6) Practical supervised training in-field in archaeological research methods and techniques, problem analysis, field laboratory procedures, recording methods. Laboratory, 20 to 40 hours per week. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

ANT 600 PRACTICUM IN TEACHING ANTHROPOLOGY. (1) Guided practical experience in teaching, supplemented with group discussions of teaching practice and selected reading on lecture technique, course development, test writing and other skills for participation in the professoriate. May be repeated to a maximum of three credits. Prereq: Graduate status in anthropology or consent of instructor.

ANT 601 THEORIES AND CONCEPTS IN ANTHROPOLOGY. (3) This course is an intensive examination of the theoretical perspective in anthropology. While attention will be given to the historical foundations of anthropological theory, emphasis will be placed on contemporary concerns in anthropology as illustrated through the contributions of selected theorists. Prereq: Admission to Graduate Program or approval of instructor.

ANT 602 SEMINAR IN CULTURE CHANGE. (3) This course explores the relationship between society, culture, and human biology. Its thematic focus will be how cultural ideologies and social organization play out with respect to the biology of human groups, both archaeological and contemporary populations. We will pay special attention to issues of class, gender and ethnicity and focus on demographic and health-related issues. Current issues in biological anthropology, including critical analysis of evolutionary adaptation theory and the concept of “race” in contemporary human populations will also be addressed. Prereq: First-year graduate standing in Anthropology, or permission of instructor.

ANT 603 HUMAN BIOLOGY IN CONTEXT OF SOCIOCULTURAL CHANGE. (3) This course explores the relationship between society, culture, and human biology. Its thematic focus will be how cultural ideologies and social organization play out with respect to the biology of human groups, both archaeological and contemporary populations. We will pay special attention to issues of class, gender and ethnicity and focus on demographic and health-related issues. Current issues in biological anthropology, including critical analysis of evolutionary adaptation theory and the concept of “race” in contemporary human populations will also be addressed. Prereq: First-year graduate standing in Anthropology, or permission of instructor.

ANT 604 SOCIAL ORGANIZATION, KINSHIP AND IDENTITIES. (3) Social organization is a core component of anthropology. This seminar encompasses both historical and contemporary approaches to this central focus of the discipline. It includes the major theoretical approaches to the study of social organization and examines key concepts such as kindred and collective identity. Topics include how human groups are defined, organized, perpetuated, and changed, as well as the role of individuals in broader social structures. Prereq: Graduate standing in Anthropology.

ANT 608 ANTHROPOLOGY OF FOOD AND NUTRITION. (3) This seminar examines how food is fundamental to human existence in a variety of ways. We eat to maintain life – and the nutritional characteristics of human diets shape the development and health of individuals and populations. But, for the most part, humans do not eat nutrients, humans eat food, and food consumption and production is an intensely cultural, social and political activity. We will explore food and nutrition from all these perspectives. In addition to theorizing food and nutrition, we will become familiar with the methods most often used by national and global scholars to assess dietary intake. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 610 HISTORY OF THEORY IN ANTHROPOLOGY. (3) This course aims to give graduate students a firm grounding in the development of anthropological theory. It will illuminate the conceptualization of human nature and identity and provide a historical and theoretical basis for evaluating the diversity of anthropological theories. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 620 TOPICS AND METHODS OF EVALUATION. (3) An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as EDP/EPE 620/SOC 622.)

ANT 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3) An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data of these studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as EDP/EPE 621.)

ANT 637 SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT. (3) Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and developments, and alternative policies are presented. The course considers the possible roles for social scientists in policy formulation and application. Prereq: Six graduate credits in social sciences or consent of instructor. (Same as SOC 637.)

ANT 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3) An intensive examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as CLD/SOC 640.)

ANT 641 GENDER ISSUES IN DEVELOPMENT. (3) An examination of gender issues in domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as SOC 641.)

ANT 645 ANTHROPOLOGY AND EPIDEMIOLOGY. (3) This course will introduce students to the fundamentals of epidemiology, as the methodological approach, which underlies biomedical research, and we will examine the ways that the methodologies of anthropology and epidemiology complement each other in the study of health and disease. The course will examine the points of similarity between anthropology and epidemiology particularly as regards the importance of examining sociocultural phenomena in order to better understand the origins of disease. The course will explore the tensions between anthropology and epidemiology in matters of methodology, exemplified by the debate over quantitative vs. qualitative approaches, as well as theoretical perspective. Prereq: Permission of instructor.

ANT 646 GLOBAL HEALTH: PEOPLE, INSTITUTIONS AND CHANGE. (3) This course presents anthropological studies of health in an international context, attending to ways in which anthropological study can contribute to identification of issues relevant to health and development. It will have a dual focus. First, it will deprivilege western concepts and explore indigenous and biomedical accounts of health. Topics may include culturally-defined syndromes, international medicines and health, and illness and body from an international, ethnographic perspective. Second, the course will explore the culture of international health agencies, e.g., WHO, UNICEF, etc. Prereq: Permission of instructor.

ANT 650 THEORY IN ARCHAEOLOGY. (3) This seminar examines the development of archaeological theory with specific emphasis on the discipline of anthropological archaeology in the New World. Particular schools and trends in contemporary archaeological theory are discussed in detail. Prereq: ANT 541 or consent of instructor.

ANT 651 ARCHAEOLOGICAL DATA ANALYSIS. (3) This course examines the manipulations of archaeological data that follow fieldwork. These procedures, usually consisting of data processing and classification, are often undertaken in the field as data are being gathered. Data organization and analysis are the basic goals of this course. May be repeated to a maximum of six credits. Prereq: ANT 541 or consent of instructor.

ANT 652 HOUSEHOLD, COMMUNITY, AND DEMOGRAPHIC ARCHAEOLOGY. (3) A seminar which examines the theory and methodology used by archaeologists to study population aggregates ranging from individual households to regional populations. Particular emphasis given to theoretical perspectives which integrate ecological, social and spatial analyses of population data. Prereq: Graduate standing in the Department of Anthropology or consent of instructor.

ANT 653 PREHISTORIC ECONOMICS. (3) This seminar examines the theory and methodology used by archaeologists to study and reconstruct the economic structure of past societies. Discussion examines forms of subsistence and craft production and systems of resource distribution and exchange. Prereq: ANT 541 or consent of instructor.

ANT 654 ARCHAEOLOGY OF POLITICAL SYSTEMS. (3) This course is designed to study the archaeology of political systems. The goals are to discuss the major trends, concepts, and perspectives in researching event and process in the evolution of political organization and social integration. A corollary goal is to examine the empirical evidence for, and archaeological correlates of, political evolution. It is not intended as a comprehensive coverage of all theories about past political systems, or a survey of the rise and development of political forms in complex societies around the world. Prereq: ANT 541, ANT 662 or consent of instructor.

ANT 660 ETHNOGRAPHIC RESEARCH. (3) Intensive graduate seminar designed to help students develop skills in ethnographic data collection and analysis. The aim of the course is to explore the processes through which

<tr>
<td>ANT 731</td>
<td>SEMINAR IN SOCIAL AND POLITICAL DYNAMICS.</td>
<td>3</td>
<td>Theoretical frameworks for the analysis of political systems and processes. The seminar explores politics as action and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 or consent of instructor.</td>
</tr>
<tr>
<td>ANT 732</td>
<td>SEMINAR IN ECOLOGICAL ANTHROPOLOGY.</td>
<td>3</td>
<td>A study of the interaction among populations, organization, environment, technology and symbols. The course focuses on recent anthropological contributions to the understanding of ecological relationships both now and in the past, including how people exploit the environment and how resource exploitation results in environmental change. Prereq: Completion of ANT 601 and ANT 602 or consent of instructor.</td>
</tr>
<tr>
<td>ANT 733</td>
<td>SEMINAR IN SYMBOLS AND MEANING.</td>
<td>3</td>
<td>Seminar in the development of anthropological approaches to cultural meaning in actions, thoughts, and language from the 1960s. Includes the social structural approach to symbolism and ritual, cognitive approaches to meaning, the anthropology of experience and expression, interpretive and post-modern approaches, and topical applications of these approaches. Prereq: ANT 601 and 602 or consent of instructor.</td>
</tr>
<tr>
<td>ANT 734</td>
<td>SEMINAR IN ECONOMIC ANTHROPOLOGY.</td>
<td>3</td>
<td>Theoretical frameworks for the analysis of economic systems and processes. The seminar explores the interaction between economic phenomena and other aspects of social and political organization both as action, structure, and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 (ANT 538 is recommended) or consent of instructor.</td>
</tr>
<tr>
<td>ANT 735</td>
<td>SEMINAR IN PRACTICE AND ACTION.</td>
<td>3</td>
<td>Comparative analysis of various modes of social action including action research, advocacy, cultural action, and participatory action research. Foundations in social theory considered. Prereq: Admission to graduate program in anthropology or consent of instructor.</td>
</tr>
<tr>
<td>ANT 736</td>
<td>CULTURE, ENVIRONMENT AND DEVELOPMENT.</td>
<td>3</td>
<td>This seminar explores the relationships between social processes, development, and the environment. It provides the graduate student with the necessary theoretical and analytical tools to examine the social and cultural processes of environmental degradation and change. Topics include political ecology, health impacts of development, deforestation, resource tenure systems, environmental grassroots movements and large-scale development organizations. Prereq: Consent of instructor. (Same as SOC 737.)</td>
</tr>
<tr>
<td>ANT 737</td>
<td>SOCIOCULTURAL THEORIES IN THE ANTHROPOLOGY OF GENDER.</td>
<td>3</td>
<td>Anthropological approaches to the study of gender have proliferated since the 1970s. The primary objective of this seminar is to introduce graduate students to the range of theories currently in play through a sampling of key works by a range of anthropologists. Prereq: Consent of instructor. (Same as SOC/PSYC 776.)</td>
</tr>
<tr>
<td>ANT 738</td>
<td>SEMINAR IN REGIONAL ARCHAEOLOGY.</td>
<td>3</td>
<td>This course examines contemporary issues and theory in the archaeology of a particular region of the world. Students may take this course up to 9 credit hours under a different region each time course is offered. Prereq: Graduate Standing in Anthropology or permission of instructor.</td>
</tr>
<tr>
<td>ANT 748</td>
<td>MASTER’S THESIS RESEARCH.</td>
<td>0</td>
<td>Half-time to full-time work on the thesis. May be repeated a maximum of six semesters. Prereq: All course work toward the degree must be completed.</td>
</tr>
<tr>
<td>ANT 749</td>
<td>DISSERTATION RESEARCH.</td>
<td>0</td>
<td>Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.</td>
</tr>
<tr>
<td>ANT 750</td>
<td>GRADUATE FIELD STUDY IN ANTHROPOLOGY.</td>
<td>1-6</td>
<td>Field research as part of a long-range anthropological research program for graduate interns training under direct faculty supervision. Provides students with experience conducting scientific research as research team member. Report required. Laboratory, three hours to full-time. Prereq: Appropriate language fluency; preparatory area study plus consent of instructor.</td>
</tr>
<tr>
<td>ANT 756</td>
<td>ADVANCED SEMINAR IN MEDICAL ANTHROPOLOGY.</td>
<td>3</td>
<td>(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as BSC 765.)</td>
</tr>
<tr>
<td>ANT 765</td>
<td>GENDER, ETHNICITY AND HEALTH.</td>
<td>3</td>
<td>This course will bring the anthropology of gender to the study of medical anthropology. We will examine the relationships between gender, ethnicity, and health. The seminar will also explore the symbolic importance of gender and health within the United States, and internationally. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>ANT 766</td>
<td>DISSERTATION RESIDENCY CREDIT.</td>
<td>0-12</td>
<td>May be repeated indefinitely. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>ANT 770</td>
<td>TOPICAL SEMINAR: (Subtitle required).</td>
<td>0</td>
<td>Intensive work in particular fields of anthropology. May be repeated four times. Prereq: Graduate Standing in Anthropology, or consent of instructor.</td>
</tr>
<tr>
<td>ANT 774</td>
<td>FOOD AND FOOD SECURITY IN A CHANGING WORLD.</td>
<td>3</td>
<td>This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political, and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food; food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as BSC 774.)</td>
</tr>
<tr>
<td>ANT 775</td>
<td>CULTURES AND POLITICAL REPRODUCTION.</td>
<td>3</td>
<td>This course takes a cross-cultural approach to understanding how reproduction and associated phenomena (family formations and the social use of technologies) comprise arenas where broader political debates become played out, and social relations become created and contested. Ethnographic case studies include cross-cultural constructions of the body, parenthood, and kinship relations; and we examine how the state, social movements, legal medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: Graduate standing in Anthropology or consent of instructor.</td>
</tr>
<tr>
<td>ANT 776</td>
<td>DEPENDENCY BEHAVIOR.</td>
<td>3</td>
<td>The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; and welfare and poverty. Prereq: Consent of instructor. (Same as SOC/PSYC/BSC 776.)</td>
</tr>
</tbody>
</table>
ANT 790 RESEARCH PROBLEMS IN ANTHROPOLOGY. (1-6)
Intensive study in the fields of physical anthropology, archaeology and ethnology with qualified staff members. May be repeated to a maximum of nine credits. Prereq: Admission into the graduate program.

APP Appalachian Studies

APP 200 INTRODUCTION TO APPALACHIAN STUDIES. (3)
A multidisciplinary introduction to Appalachian culture, history and society. Examines how Appalachia came to be viewed as a distinct region, looks at its place in American life.

APP 300 TOPICS IN APPALACHIAN STUDIES (Subtitle required). (3)
Study of topics relevant to Appalachian Studies, such as gender, folklore, literature, religion, community development, public policy, social movements and social change. May be repeated to a maximum of twelve credits under different subtitles. Prereq: APP 200 or consent of instructor.

APP 311 APPALACHIAN ENGLISH. (3)
The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this variety. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features the speech of Appalachia shares with others. We will examine the history, origins, and development of English in Appalachian and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as ANT 341/LIN 311.)

APP 395 INDEPENDENT STUDY. (1-6)
Independent study of special topic under the supervision of Appalachian Studies-affiliated faculty. Students must identify both a topic for this project as well as a faculty mentor who has agreed to supervise this project. May be repeated to a maximum of six credits. Prereq: APP 200.

APP 399 PRACTICUM. (1-6)
A field-, community-based, practical or applied educational experience supervised by an Appalachian Studies Program faculty affiliate. May be repeated to a maximum of six hours. Pass-fail only. A learning contract must be filed in order to receive credit for this course. Prereq: APP 200.

ARC Architecture

ARC 101 DRAWING I: OBSERVATIONAL FREEHAND DRAWING. (3)
Focuses on the rigors of observational drawing. Structure, space, contour, line, and color are explored through study of the human body, still life, landscape, and architectural spaces with attention to their application to the architectural experience. Studio: 6 hours per week. Prereq: Admission to the School of Architecture.

ARC 111 INTRODUCTION TO HISTORY AND THEORY. (3)
Introduces enduring themes and generative forces in the history and theory of architecture by examining the cultural periods of various societies in different historical periods.

ARC 151 DESIGN STUDIO I. (6)
Studies investigate two-dimensional media, analyze buildings and text, and construct models as a means to explore basic environmental design principles. The studio continues with an emphasis on three-dimensional exploration and construction. Students investigate architectural design programs and materials of constructions. Studio: 12 hours per week. Prereq: Admission to the School of Architecture.

ARC 199 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 203 DIGITAL MEDIA WITHIN ARCHITECTURE. (3)
A workshop that introduces students to the creative, analytical and generative potential of computers in the design of architecture. Lecture: one hour; laboratory: four hours per week. Prereq: Admission to the School of Architecture.

ARC 212 HISTORY AND THEORY I: 15TH-17TH CENTURIES. (3)
An overview of the key themes and historical developments in architecture from the fifteenth through seventeen centuries. Emphasis on Western examples and relationships with earlier and later conditions, including contemporary problems.

ARC 213 HISTORY AND THEORY II: 18TH-19TH CENTURIES. (3)
Continues the investigation of key themes and historical developments of architecture in the eighteenth and nineteenth centuries. Prereq: ARC 212 or consent of instructor.

ARC 231 STRUCTURAL AND MATERIAL CONCEPTS. (3)
Introduces technological concepts of building and investigates the spatial and formal language of architecture with visual and physical analyses of various building structures and materials through the use of computers, field observations, etc. Prereq: Admission to the School of Architecture; MA 109 or MA 123. Paired with: ARC 252.

ARC 252 DESIGN STUDIO II. (6)
Students gain understanding of architectural language based on modern archetypes. Projects explore aesthetic and poetic possibilities while also emphasizing cohesion among space, structure, site, program, and material assembly. A variety of assembly types are introduced for the examination of structural and materials concepts. Studio: 12 hours per week. Prereq: ARC 151 with a grade of C or better. Paired with course: ARC 231. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ARC 253 DESIGN STUDIO III. (6)
Extends the consideration of the issues related to the isolated object to the multiplicity of the object with reference to issues of scale and form, focusing attention on formal strategies for obtaining thematic unity. Studio: 12 hours per week. Prereq: ARC 252 with a grade of C or better.

ARC 299 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 314 HISTORY AND THEORY III: 20TH CENTURY AND CONTEMPORARY ARCHITECTURE. (3)
Investigates modern and late twentieth century architecture as well as current themes and issues in contemporary architecture in relation to their historical context. Satisfies graduate writing requirement for Architecture Majors. Prereq: ARC 111, ARC 212 and ARC 213; or consent of the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ARC 315 HISTORY AND THEORY OF ARCHITECTURE IV: URBAN FORMS. (3)
An investigation of the factors and a consideration of the theories which have affected world urban form related to architecture. Prereq: ARC 314, or consent of the instructor.

ARC 332 ENVIRONMENTAL CONTROLS I. (3)
Design, analysis and coordination of building systems to meet basic human needs and social expectations of the built environment. Considers ecology when addressing the thermal environment, water, sanitation, concentrated energy, circulation, life-safety, and communications. Prereq: ARC 231. Paired with: ARC 354.

ARC 333 ENVIRONMENTAL CONTROLS II. (3)
A continuing investigation into ideas and issues raised in ARC 332, Environmental Controls I. Prereq: ARC 332. Paired with: ARC 355.

ARC 354 DESIGN STUDIO IV. (6)
Studies the formal characteristics of site and context together with laws and principles of building and nature, ecology, and the ways these forces influence architecture. The studio investigates applications of current technology and building systems. Studio: 12 hours per week. Prereq: ARC 253 with a grade of C or better. Paired with course: ARC 332.

ARC 355 DESIGN STUDIO V. (6)
Explores the architectural problem of a large-scale interior space conditioned by social and cultural programs. Special problems in lighting and acoustics will be addressed along with long span structure. Attention will be paid to issues of scale, life safety social interaction and public circulation. Studio: 12 hours per week. Prereq: ARC 354 with a grade of C or better. Paired with: ARC 333.

ARC 399 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 404 DRAWING III (Off Campus). (3)
ARC 405 DIGITAL VISUALIZATION I. (3)
Students are introduced to concepts of computer visualization as applied to the study of architecture. Students will utilize modeling, rendering, and animation software to create three-dimensional representations of selected projects. Lecture: two hours; laboratory: two hours per week. Prereq: ARC 203.

ARC 406 DIGITAL VISUALIZATION II. (3)
A continued exploration of computer visualization with particular emphasis on a specific software. Subtitle required. Lecture: 1 hour; laboratory: four hours per week. Prereq: ARC 405.

ARC 410 INDEPENDENT STUDY. (3)
An independent study of architecture history and/or theory, wherein a student will research a specific topic agreed upon with a designated faculty member of the college. Laboratory, six hours per week. May be repeated to a maximum of six hours.

KEY: # = new course * = course changed † = course dropped ¶ = course purged
Course Descriptions

ARC 434 STRUCTURAL DESIGN AND ANALYSIS I. (3)

ARC 435 MATERIALS AND METHODS OF CONSTRUCTION. (3)
An intensive exploration of materials and building techniques with special consideration given to the properties of materials and their uses in various methods of construction. Prereq: ARC 231.

ARC 456 DESIGN STUDIO VI. (6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 355 with a grade of C or better.

ARC 457 DESIGN STUDIO VII. (6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 455 or ARC 456 with a grade of C or better.

ARC 461 TRAVEL SEMINAR: URBAN CONTEXT (Off Campus). (3)

ARC 499 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 510 GENERATIVE AND CRITICAL STRATEGIES. (3)
This course explores, studies, and tests various visual and analytical tools used by designers to understand their work in order to understand the relationship of form, content, and performance of a design. Students will use these tools to gain an understanding of buildings, spaces, objects, contexts, and landscapes from a wide range of cultures and time periods. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 511 HISTORY AND THEORY SEMINAR: PRE-20TH CENTURY (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of pre-twentieth century architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 512 HISTORY AND THEORY SEMINAR: MODERN (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of modern architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 513 HISTORY AND THEORY SEMINAR: CONTEMPORARY (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of contemporary architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 514 HISTORY AND THEORY SEMINAR: THEORY AND CRITICISM (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of architectural theory and criticism. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 515 HISTORY AND THEORY SEMINAR: URBAN FORMS (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of urban forms. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 533 STRUCTURAL DESIGN AND ANALYSIS II. (3)
An exploration of structural concepts for the materials of steel and wood, including considerations of load and resistance as factors in architectural design. Prereq: ARC 434.

ARC 534 ADVANCED STUDIES IN STRUCTURAL SYSTEMS. (3)
An exploration of structural concepts relating to construction with the materials concrete and masonry, including discussion of stress and load as considerations in architectural design. Prereq: ARC 333.

ARC 550 ACCELERATED DESIGN. (9)
Accelerated Design I: immersion through design in the comprehensive elements that order architecture with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.
of the necessity for building codes, problems in interpretation and applications as well as legal aspects involved. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 738 CONSTRUCTION SPECIFICATIONS. (3)
A study in defining the quality of materials used in architectural design. Prereq: Admission to the Master of Architecture program.

ARC 743 ADVANCED PROFESSIONAL PRACTICE. (3)
A continuation of concepts introduced in ARC 641, Professional Practice, with an emphasis in issues relating to the legal, business, and organizational considerations of architectural practice as well as investigations into advocacy and the public and private leadership roles of the architect. Prereq: ARC 641.

ARC 748 MASTER’S PROJECT RESEARCH. (0)
Half-time to full-time work on Master’s Project. May be repeated a maximum of six times.
Prereq: All course work toward the degree must be completed.

ARC 750 DESIGN STUDIO X. (6)
Utilizing given site and program requirements, graduate students explore design issues comprehensively by producing a developed and detailed building design. Students will engage in structural design, environmental systems, life-safety and post-design assessments as required to meet the most current NAAB standards for a comprehensive studio. Studio: 12 hours per week. Prereq: ARC 659.

ARC 759 MASTER’S PROJECT IN BUILDING DESIGN. (9)
A final, comprehensive project in the building technology and tectonics concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Building Design concentration.

ARC 761 SPECIAL PROBLEMS IN TOWN DESIGN. (3)
Students explore various topics related to the theory and practice of existing, emerging and new strategies for city and town development, revitalization, and long-term sustainability. Subtitle required. Prereq: Admission to the Master of Architecture program.

ARC 779 MASTER’S PROJECT IN TOWN DESIGN. (9)
A final, comprehensive project in the town design concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Town Design concentration.

ARC 799 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ASC Animal Sciences

ASC 101 DOMESTIC ANIMAL BIOLOGY. (3)
The first in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on a fundamental understanding of anatomy, physiology, nutrition, reproduction, genetics and behavior of domestic animals. [Offered in full only.]

ASC 102 INTRODUCTION TO LIVESTOCK AND POULTRY PRODUCTION. (3)
The second in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on the application of scientific disciplines of anatomy, physiology, nutrition, reproduction, genetics and behavior in the management of domestic animals. Prereq: ASC 101. Primary registration access limited to College of Agriculture, Food and Environment majors and remaining seats open during secondary registration. [Offered in spring only.]

ASC 106 ANIMAL AGRICULTURE IN THE MODERN WORLD. (3)
Relationships of food production and consumption to income of humans throughout the world; major livestock (beef and dairy cattle, sheep, swine, poultry and horses) production areas of the world; relationships between live animal merit and yield of retail cuts of meat; identification of skeletal components; identification and functions of reproductive and digestive tract components; characteristics of breeds of beef and dairy cattle, sheep, swine, poultry and horses.

ASC 205 CAREER DEVELOPMENT FOR ANIMAL SCIENCES. (1)
Local experts in a wide variety of animal production enterprises and associated support services will give presentations on their area of expertise. Following the presentation, students will have the opportunity to discuss the topic of the day and potential employment opportunities in that field with the speaker. Prereq: ASC 102 (or concurrent enrollment). [Offered in fall and spring.]

ASC 209 VETERINARY MEDICAL TERMINOLOGY. (3)
This course will cover veterinary terminology including medical word roots, prefixes, suffixes and animal specific terminology involving food animals, horses and pets. Veterinary case studies will allow students to apply these fundamentals in practical situations. Appropriate for pre-vets and any students interested in animal health and care.

ASC 300 MEAT SCIENCE. (4)
A historical perspective of the meat industry together with major changes in body type and composition in both the live animal and its end product meat. Students will evaluate live market animals (swine, cattle, sheep) harvest the market animals, and follow their carcasses and cuts through fabrication and distribution channels. Major topics of discussion will focus on growth and development, inspection, grading, physical and chemical composition of meat and postmortem changes that affect meat quality. Additional information will cover meat marketing trends, nutrition, meat cookery, meat selection, health issues and consumer information. Prereq: ASC 101 and ASC 102. [Offered in fall only.]

ASC 301 LIVESTOCK SELECTION AND EVALUATION. (3)
Selection principles of purebred and commercial beef cattle, sheep, swine and horses. Evaluation of live animal and carcass characteristics of beef cattle, sheep and swine. Emphasis placed on oral reasons. Laboratory, six hours. Prereq: Junior or senior standing or consent of instructor. [Offered in full only.]

ASC 303 EVALUATION AND GRADING OF MEATS. (2)
A detailed consideration of the factors involved in the selection, grading and evaluation of carcasses and wholesale cuts of beef, pork and lamb. Specific emphasis will be given to cutability, quality and maturity as they relate to palatability and acceptability by the consumer. Laboratory, four hours. Prereq: ASC 301 and ASC 306. [Offered in full only.]

ASC 309 ADVANCED EVALUATION AND GRADING OF MEAT. (2)
Further consideration of the factors involved in selecting, grading and evaluating carcasses and wholesale cuts of beef, pork, and lamb. Emphasis will be placed on writing reasons. Laboratory, four hours. Prereq: ASC 303 or consent of instructor. [Offered in full only.]

ASC 310 EQUINE ANATOMY. (2)
Anatomy of the horse’s systems. Topics will include the anatomy of skeletal, muscular, respiratory, digestive, cardiovascular, and nervous systems. By the end of the course the students will be able to name and identify all the equine bones and their respective anatomical landmarks, know the equine muscles and tendons responsible for locomotion and their respective skeletal attachments, and describe the anatomy and recognize the function of the equine respiratory, cardiovascular, digestive, and nervous systems. Prereq: ASC 101. [Offered in fall and spring.]

ASC 311 ADVANCED EQUINE EVALUATION. (1)
Advanced study of confirmation and performance in the horse. Selection of horses of different breeds based on confirmation, breed character and movement. Emphasis will be placed on developing a know ledge of industry standards and preparation of oral reasons. Prereq: ASC 310. [Offered in full only.]

ASC 320 ADVANCED LIVESTOCK SELECTION AND EVALUATION. (2)
Selection of purebred and commercial beef cattle, sheep, swine and horses. Special emphasis on oral reasons, livestock contest procedures and herd improvement principles. Laboratory, six hours. Prereq: ASC 301 or consent of instructor. [Offered in spring only.]

ASC 320 EQUINE MANAGEMENT. (3)
Study of the basic principles associated with horse management. Topics will include equine behavior, equine diseases and herd health programs, facilities and environmental management,
**ASC 321 DAIRY CATTLE EVALUATION.**
Evaluation of dairy cattle for type characteristics. Laboratory, four hours. [Offered in spring only.]

**ASC 323 ADVANCED DAIRY CATTLE EVALUATION.**
Open only to those who have consent of instructor. Laboratory, two hours. Prereq: ASC 321. [Offered in fall only.]

**ASC 325 ANIMAL PHYSIOLOGY.**
An introduction to the functional anatomy and physiology of major body systems in domestic animals. Emphasis will be on how these systems interact to regulate circulation, gas exchange, acid-base balance, digestion and metabolism, location and adapting to environmental changes. Prereq: BIO 152, junior standing or consent of instructor. [Offered in fall only.]

**ASC 333 TOPICS IN ANIMAL SCIENCE (Subtitle required).**
Intensive study in a unique aspect of animal agriculture not covered in other courses currently offered. May be repeated under different subtitle two times to a maximum of 8 credits. Prereq: Specified by instructor for each offering.

**ASC 340 POULTRY PRODUCTION.**
A study of the application of avian biology to modern poultry production. Topics include anatomy, physiology, reproduction, incubation and embryonic development, breeding and genetics, nutrition and feeding, disease control, housing and environmental control, management, poultry and egg products, and the structure of the poultry industry. For majors and non-majors. Prereq: ASC 101 or ASC 102 or equivalent permission of the instructor. [Offered in spring only.]

**ASC 362 ANIMAL BREEDING AND GENETICS.**
Study of genetics as applied to specific companion animals and livestock species. Roles of selection and mating systems and their expected consequences are examined when applied to qualitative and quantitative traits expressed by specific companion animals and various livestock species. Prereq: ASC 101, BIO 152. [Offered in spring only.]

**ASC 364 REPRODUCTIVE PHYSIOLOGY OF FARM ANIMALS.**
Introduction to anatomy and physiological processes related to reproduction with a focus on farm animals. Evaluations of management procedures as they related to reproductive physiology. Prereq: ASC 101 and BIO 152. Primary registration access limited to College of Agriculture, Food and Environment majors and remaining seats open during secondary registration. [Offered in spring only.]

**ASC 378 ANIMAL NUTRITION AND FEEDING.**
A fundamental study of the nutrients, their utilization and their role in the animal in conjunction with an applied understanding of the manner in which feedstuffs are evaluated and blended to meet the various species needs for those nutrients. Prereq: ASC 101 and CHE 230 or CHE 236. [Offered in fall only.]

**ASC 380 APPLIED ANIMAL NUTRITION.**
The composition and nutritional characteristics of common feedstuffs. The digestive systems, nutritional requirements, formulated rations and economical feeding programs for farm animals. Prereq: ASC 378 or consent of instructor. [Offered in fall (online).]

**ASC 382 ANIMAL PRODUCTION PRINCIPLES.**
A broad survey of animal agricultural management covering cattle, horses, poultry, swine, sheep and goats. Emphasis is placed on the practical application of scientific disciplines including anatomy, physiology, nutrition, reproduction and genetics. For nonmajors only. [Offered in spring only.]

**ASC 388 COMPANION ANIMAL NUTRITION.**
This course offers an introductory look at the nutrition of companion animals, primarily the dog and cat. Basic concepts in nutrition, food chemistry, biochemistry, digestive physiology and microbiology will be addressed as they pertain to pet health and well being. Prereq: CHE 230 or CHE 236 or equivalent. [Offered in fall (online).]

**ASC 389 APPLIED EQUINE NUTRITION AND FEEDING.**
This course examines the feeding management of broodmares, growing horses, performance horses and horses with special traits. Emphasis is placed on common equine feeds, feed and ration analysis, factors influencing the utilization of feeds by horses, and factors affecting nutrient requirements and feeding management of the different classes of horses. Prereq: A course in nutrition or consent of instructor. [Offered in spring only.]

**ASC 395 SPECIAL PROBLEM IN ANIMAL SCIENCES.**
Independent study in Animal Sciences under the supervision of a faculty member. May be repeated for a maximum of eight credits. Prereq: Consent of appropriate instructor. [Offered in fall and spring.]

**ASC 399 EXPERIENTIAL LEARNING IN ANIMAL SCIENCES.**
A field-based learning experience in animal sciences under the supervision of a faculty member. May be repeated to a maximum of six credits on a pass/fail basis. Prereq: Consent of instructor and department chairperson and completion of a departmental learning contract before registration. [Offered in fall and spring.]

**ASC 404G SHEEP SCIENCE.**
History and importance of the sheep industry; application of the principles of selection, breeding, management and feeding of sheep for efficient lamb and wool production. Lecture, three hours per week; laboratory, three hours per week. Prereq: ASC 300, ASC 362, ASC 364, ASC 378 or consent of instructor. [Offered in fall only.]

**ASC 406B CATTLE SCIENCE.**
Scope and importance of the beef cattle industry; roles of the major cattle breeds and organizations associated with the beef cattle industry; application of equipment, identification, nutrition, reproduction, genetics, health, marketing, taxation and management principles to beef cattle production; impact of current economic, social and environmental issues on the beef cattle industry. Lecture, three hours; laboratory, three hours. Prereq: ASC 300, ASC 362, ASC 364 and ASC 378 or consent of instructor. [Offered in fall only.]

**ASC 408G SWINE PRODUCTION.**
A study of scope and importance of the swine industry. Application of principles of breeding, reproduction, nutrition, housing, health, and management of swine in modern production systems. Prereq: ASC 101 and ASC 102. [Offered in spring only.]

**ASC 410G EQUISE SCIENCE.**
Detailed study of the anatomy and physiology of the horse as they relate to the nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Lecture, two hours; laboratory, two hours. Prereq: ASC 310, ASC 364, and ASC 378. [Offered in spring only.]

**ASC 420G DAIRY CATTLE MANAGEMENT.**
Scope and importance of the dairy cattle industry; selection, breeding, housing, feeding and management of dairy cattle. Lecture, two hours; laboratory, two hours. Prereq: ASC 325, ASC 364 and ASC 378 or consent of instructor. [Offered in fall only.]

**ASC 435 WILDLIFE SCIENCE AND APPLICATIONS.**
A review of the major scientific disciplines that make up animal science (anatomy, genetics, nutrition, physiology, behavior) and how these are applied to the management of wildlife in diverse settings. Prereq: ASC 101 or BIO 152, consent of instructor.

**ASC 470 CAPSTONE FOR ANIMAL AGRICULTURE.**
Discussion of the importance of livestock production to society and consideration of major issues impacting animal agriculture. Principles and practices learned in disciplinary and commodity Animal Sciences courses are integrated into a unified perspective, and the scientific method is employed as an approach to problem analysis and resolution. Refinement of skills in critical thinking, information gathering, writing, and oral communication is emphasized. Prereq: Senior standing in College of Agriculture, Animal Sciences majors. [Offered in fall and spring.]

**ASC 489 ACADEMIC ENRICHMENT EXPERIENCE IN ANIMAL SCIENCES.**
Development and evaluation of the student’s required academic enrichment experience (study abroad, undergraduate research, internship, student mentorship, leadership, etc.) Prereq: Open to Animal Sciences majors only.

**ASC 564 MILK SECRETION.**
Anatomy of the mammary gland, physiology and biochemistry of milk secretion and management factors affecting yield and composition of milk. Prereq: ASC 101 and BIO 152. [Offered in spring only.]

**ASC 601 MAMMALIAN ENDOCRINOLOGY.**
An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 401G and BIO 350 or equivalents. (Same as PGY 601.)

**ASC 602 INTEGRATED NUTRITIONAL SCIENCES II.**
Integrated study of the properties, metabolism, biochemistry and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as CNU/NS 602.) [Offered in spring – odd years.]

**ASC 630 ADVANCED MEAT SCIENCE.**
Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: ASC 304, ASC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as FSC 630.) [Offered in spring – even years.]

**ASC 660 BIOLOGY OF REPRODUCTION.**
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Reading assignments will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO-PGY 502 or consent of instructor. (Same as PGY 660 and ANA 660.) [Offered in spring – odd years.]
ASC 680 LABORATORY METHODS IN NUTRITIONAL SCIENCES. (4)
The use of laboratory techniques and instrumentation in the solution of fundamental problems of nutrition. Lecture, one hour; laboratory, six hours. [Offered in fall—odd years.]

ASC 681 ENERGY METABOLISM. (2)
An in-depth discussion of nutritional energetics, from the standpoint of factors which influence the utilization of dietary energy. A critical review of current literature. Prereq: ASC 378 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring—odd years.]

ASC 682 MICROBIAL ECOLOGY OF DIGESTION. (2)
A study of the principles and present concepts of protein and amino acid nutrition and metabolism in the animal. Prereq: Graduate level biochemistry. [Offered in fall only.]

ASC 684 ADVANCED RUMINANT NUTRITION. (3)
Principles of ruminate metabolism in the utilization of feedstuffs for milk, meat, and wool production. Prereq: ASC 682 and two or more courses from ASC 681, ASC 683, ASC 685 and ASC 687 or consent of instructor. [Offered in spring—even years.]

ASC 685 MINERAL METABOLISM. (2)
An in-depth review of the function, requirement deficiency and toxicity of mineral elements in nutrition. Emphasis on the interactions between elements and current literature will be made. Prereq: ASC 378 or NFS 510 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring—even years.]

ASC 686 ADVANCED NONRUMINANT NUTRITION. (3)
A study of nutrient utilization as influenced by digestion, absorption and metabolism with emphasis on swine and poultry. Prereq: One course each in nutrition and biochemistry.

ASC 687 VITAMIN METABOLISM. (2)
Detailed study of the metabolism of vitamins and the role of vitamins in the metabolism of carbohydrates, proteins, lipids, and minerals. Prereq: BCH 502 or CHE 552 or consent of instructor. [Offered in spring—odd years.]

ASC 688 EQUINE METABOLISM. (2)
Detailed study of anatomical, physiological and microbiological factors influencing the nutritive requirements of the equine for maintenance, growth, reproduction, lactation and work. Prereq: One course in nutrition and physiology or biochemistry or consent of instructor. [Offered in spring—even years.]

ASC 689 PHYSIOLOGY OF NUTRIENT DIGESTION AND ABSORPTION. (3)
An analysis and comparison of the structure and function of mammalian and avian gastrointestinal tracts, of feedstuff digestive processes, and of specific mechanisms responsible for nutrient absorption in various cell types. Emphasis is placed on livestock and avian species. Prereq: Graduate level Biochemistry. [Offered in fall—even years.]

ASC 690 MACRONUTRIENT METABOLISM IN DOMESTIC ANIMALS. (2)
An in-depth study of macronutrient metabolism and how it can be influenced by nutrition in both ruminant and non-ruminant species. Students will learn the important principles of macronutrient metabolism in domestic animals through lectures, evaluation of the current scientific literature and presentations. Prereq: 3 credits in biochemistry (BCH 401G, BBS 601, or equivalent) and 3 credits in animal nutrition, or consent of the instructor.

ASC 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall, spring and summer.]

ASC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ASC 767 RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall, spring and summer.]

ASC 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ASC 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ASC 771 ANIMAL SCIENCE SEMINAR. (1)
May be repeated twice for a maximum of three credits. [Offered in fall and spring.]

ASC 777 ADVANCED TOPICS IN ANIMAL SCIENCE (Subtitle required). (1-4)
Intensive study in a unique aspect of animal agriculture not covered in other graduate courses currently offered. May be repeated under a different subtitle up to a maximum of 12 credits. Prereq: Permission of instructor.

ASC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)
May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 780.) [Offered in fall and spring.]

ASC 781 SPECIAL PROBLEMS IN GENETICS AND ANIMAL BREEDING. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 782 SPECIAL PROBLEMS IN ANIMAL NUTRITION. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 783 SPECIAL PROBLEMS IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-4)
Intensive study or investigation of topics in physiology not covered in formalized courses. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 790.)

ASC 791 RESEARCH IN GENETICS AND ANIMAL BREEDING. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 792 RESEARCH IN ANIMAL NUTRITION. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 793 RESEARCH IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-6)
Original investigation of mechanisms and problems related to mammalian reproduction. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

AST 191 THE SOLAR SYSTEM. (3)
A course emphasizing the nature, origin and evolution of planets, satellites and other objects in the Solar System. Topics also include historical astronomy, the naked eye phenomena of the sky and modern solar system discoveries made by spacecraft. This course may be taken independently of AST 192.

AST 192 STARS, GALAXIES AND THE UNIVERSE. (3)
A course covering the universe outside the Solar System. A principle theme is the origin and evolution of stars, galaxies and the universe at large. Topics also include black holes, quasars and the big bang model of the universe. This course may be taken independently of AST 191.

AST 310 TOPICS IN ASTRONOMY AND ASTROPHYSICS (Subtitle required). (3)
Readings, research, discussions and lectures to illuminate problems of contemporary significance in astronomy and astrophysics. May be repeated to a maximum of six credits under a different subtitle. Prereq: To be announced with subtitle.

AST 395 INDEPENDENT WORK IN ASTRONOMY. (1-3)
Students may select an approved topic for study under the direction of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.

AST 591 ASTROPHYSICS I—STARS. (3)
The physics of stars from star formation to stellar death. Topics include stellar structure and evolution, energy generation and transport, the later stages of stellar evolution and stellar remnants. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 591.)

AST 592 ASTROPHYSICS II—GALAXIES AND INTERSTELLAR MATERIAL. (3)
The physics of galaxies and of the interstellar medium. Topics include galaxy formation, evolution and interaction, phases of the interstellar medium, and physical processes in the interstellar medium. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 592.)

AST 639 PHYSICAL PROCESSES IN ASTROPHYSICS. (3)
A lecture and problem course covering the physical processes encountered in astrophysics. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 392 or consent of instructor. (Same as PHY 639.)
AT 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated for a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as HS 500, CLS 500, CNU 500, CD 500, P S 500.)

AT 660 DIRECT STUDY IN ATHLETIC TRAINING. (1-3)
A specific topic in Athletic Training related to the student’s interests is selected for intensive study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Graduate standing and consent of instructor.

AT 670 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING I. (2)
An introduction to the research process in athletic training. The importance of pursuing quality research in athletic training will be stressed and the procedures necessary to complete this process will be presented. May be repeated to a maximum of 8 credits. Prereq: Graduate standing and consent of the instructor.

AT 671 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING II. (2)
The second course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the methodological procedures of designing and pursuing research in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 672 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING III. (2)
The third course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 673 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING IV. (2)
The final course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 680 SPECIAL TOPICS IN ATHLETIC TRAINING: (Subtitle required). (1-3)
Study of emerging topics of current high interest in athletic training. May be repeated to a maximum of 9 credits. Prereq: Graduate standing and consent of instructor.

AT 682 CLINICAL SEMINAR IN ATHLETIC TRAINING. (1)
This is an advanced athletic training course encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course will be on the presentation of case studies for group discussion and contribution. This course will utilize a combination of discussion, review, and student presentation.

AT 685 PRINCIPLES AND APPLICATION OF KINESIOLOGICAL EMG. (3)
To introduce the student to the principles and application of kinesiologic electromyography (EMG). Kinesiologic EMG research incorporates the study of human movement with direct assessment of the muscles involved with human motion. The primary aim for this course is to provide the student with background and practical knowledge of kinesiologic EMG in order to be able to perform and critically analyze kinesiologic EMG studies. Students will enhance their understanding of neuromuscular properties of skeletal muscleunit. Students will be exposed to the common procedures used to collect, analyze, and interpret both surface and invasive kinesiologic EMG research. Prereq: KHP 615 or comparable graduate level biomechanics course, the course can be taken concurrently. Approval of instructor.

AT 690 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE UPPER EXTREMIT Y. (4)
Current evaluation and rehabilitation of upper extremity and upper spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory, and research techniques will be used to review current practice and interventions. Prereq: Graduate standing and consent of instructor.

AT 692 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE SPINE. (4)
This is an advanced athletic training course encompassing a regional study of orthopedic evaluation and management of the cervical, thoracic, and lumbar spine. A combination of lecture, applied evaluation and rehabilitation techniques, critical reviews of the literature, discussion, and student presentations will be employed. Prereq: Graduate standing and consent of instructor.

AT 695 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE LOWER EXTREMIT Y. (4)
Current evaluation and rehabilitation of lower extremity and lumbar spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory and student presentation and written reviews of current practice and interventions will be employed. Prereq: Graduate standing and consent of instructor.

AT 700 MUSCLE MECHANICS. (3)
This is an advanced athletic training course encompassing a wide range of topics related to all aspects of skeletal muscle form and function. The primary focus of this course will be on the mechanical properties of skeletal muscle, and translational aspects of basic science research and clinical care.

AT 720 SPORTS MEDICINE. (3)
A study of basic areas covered in sports medicine with readings and discussions of current international trends in the research and practice in this field. Prereq: Twelve semester hours; credit in the field of biological sciences; consent of instructor. (Same as KHP 720.)

AT 740 MUSCULOSKELETAL ANATOMY DISSECTION. (3)
This course is a 3-credit cadaver anatomy laboratory course, which will include examination and dissection of the human cadaver. Lectures and laboratory experience will emphasize the musculoskeletal, articular, nervous, and vascular systems particularly as they relate to athletic injury mechanism and evaluation.

AT 768 RES CR MASTERS DEGREE. (1-3)
Residency credit for master’s thesis.

B&E Business and Economics

B&E 102 MICROSOFT OFFICE SPECIALIST – WORD. (0)
This course is designed to give students experiences with the Microsoft Office Application of Word 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Word 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 103 MICROSOFT OFFICE SPECIALIST – POWERPOINT. (0)
This course is designed to give students experience with the Microsoft Office Application of PowerPoint 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in PowerPoint 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 104 MICROSOFT OFFICE SPECIALIST – EXCEL. (0)
This course is designed to give students experience with the Microsoft Office Application of Excel 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Excel 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 105 TECHNOLOGY FOR BUSINESS SOLUTIONS. (1)
This course prepares pre-major students in the Gatton College of Business & Economics to use business software at a high level of proficiency and focuses on Microsoft Excel and Access. Lectures will be supplemented with hands on experiences with business problems. Prereq: ACC 201 and ECO 201, pre-major in the Gatton College of Business & Economics, or consent of instructor.

B&E 120 LEADERSHIP IN THE GLOBAL MARKETPLACE. (3)
An introductory examination of the skills, competencies, and styles of effective global leaders. Activities include individual assessments and a personal leadership development plan. Prereq: Acceptance in the Global Scholars Certificate program.

B&E 122 THE CHALLENGE OF LEADERSHIP. (1)
Current leadership challenges as discussed by the people who confront them. Students have the opportunity to discuss leadership challenges with guest speakers from the corporate, government and non-profit sectors. Prereq: Acceptance into Global Business Leadership Certificate program.

*B&E 201 INTRODUCTION TO BUSINESS. (3)
This course provides an introductory level understanding of how a business operates and how it is managed. Business concepts and activities that will be covered include business development, management, human resources, marketing, accounting and finance. Prereq: Open to all students except those admitted to the Upper Division of the Gatton College of Business and Economics.

B&E 223 INTRODUCTION TO THE ECONOMICS OF BUSINESS. (2)
Provides an introduction to the principles of microeconomics and some key concepts of macroeconomics as they relate and apply to the immediate interests of business managers. Basic tools of economics will be used to study consumer/producer behavior, how markets work, supply and demand interaction, and intra to market structure. This course is specifically
Course Descriptions

designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

B&E 240 INTER-CULTURAL BUSINESS COMMUNICATION. (3)
This course is designed to improve students’ ability to communicate effectively with people from diverse cultural backgrounds. Prereq: Acceptance into Global Business Leadership certificate program.

B&E 300 CAREER DEVELOPMENT IN BUSINESS AND ECONOMICS. (1)
The course will emphasize the application of analytical, communicative, and critical thinking skills in the development of students’ careers. It will address career opportunities, selection of personally appropriate career plans, and job search activities. It will enhance analytical skills through career analysis and company analysis, and enhance written and oral communication skills through their application to job search activities. Prereq: At least 60 hours of earned credit.

B&E 327 LARGER WORLD ISSUES IN BUSINESS. (3)
A case-based course that explores the nexus between business and the social issues of the day (e.g., poverty, the environment). Student activities include a case competition exercise where they examine a social issue in business and hone their analytical and oral presentation skills. Prereq: Acceptance into the Global Scholars program.

BA Business Administration

BA 700 TEACHING METHODS IN BUSINESS. (1)
A part-time course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance the learning experience. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as ECO ’700.)

BA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BA 762 RESEARCH METHODOLOGY. (3)
Examines fundamental concepts in design, control, and measurement for social science research with emphasis on: reliability, internal and external validity, and causality. Prereq: Admission to DBA program and prior completion of or concurrent enrollment in a graduate level course on the general linear model.

BA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Acceptance into the Global Scholars program.

BA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Acceptance into the Global Scholars program.

BAE Biosystems and Agricultural Engineering

BAE 102 INTRODUCTION TO BIOSYSTEMS ENGINEERING. (1)
An introduction to the engineering of food and fiber production and processing systems. Professionalism and the engineering approach will be emphasized.

BAE 103 ENERGY IN BIOLOGICAL SYSTEMS. (2)
This course introduces the concepts of energy transport in biological systems including the study of thermodynamics, heat transfer, psychometrics, and fluid flow. BAE 102 and prerequisite or: MA 113, or consent of instructor.

BAE 201 ECONOMIC ANALYSIS OF BIOSYSTEMS. (2)
The financial and managerial aspects of biosystems in evaluating design alternatives. Typical topics included are: concepts of present and future value, techniques of managerial economics, and biosystem design analysis in the evaluation of alternatives. Retirement/placement policies and risk analysis. Prereq: MA 113, BAE 103 or consent of instructor.

BAE 202 STATISTICAL INFERENCES FOR BIOSYSTEMS ENGINEERING. (3)
Introduction to statistics and statistical inference reasoning. Evaluation of common claims based on statistical constructs, hypothesis tests, margins of error, confidence intervals, and analysis of variation. Identification of possible statistical obstacles, such as confounding, missing data, and inappropriate randomness. Conceptual statistics will be emphasized. Special attention will be given to include biosystems engineering problems. Prereq: MA 114.

BAE 305 DC CIRCUITS AND MICROELECTRONICS. (3)
An introduction to the use of digital electronics and integrated circuits in solving biosystems engineering problems. Digital circuits, microprocessor concepts, computer interfacing, transducers, signal conditioning and control applications are discussed. Lecture; two hours; laboratory, two hours per week. Prereq: EE 305; prerequisite or: CS 221 or equivalent.

BAE 400 SENIOR SEMINAR. (1)
A course for senior students in biosystems engineering with emphasis on oral communications skills. Students will do literature searches on topics related to the biosystems engineering profession and present oral and written reports. Prereq: or concur with BAE 402.

BAE 402 BIOSYSTEMS ENGINEERING DESIGN. (2)
A design course for seniors in BAE requiring students to solve open-ended problems. Students will use previously learned engineering principles to produce actual designs which will be built and analyzed in BAE 403. Prereq: BIO 148, BIO 152; or prerequisite or: BAE 417 or BAE 447.

BAE 403 BIOSYSTEMS ENGINEERING DESIGN II. (2)
Student design teams evaluate and enhance design solutions, fabricate prototypes, execute performance tests, analyze results, and develop final design specifications. Oral and written reports are required. Prereq: BAE 402.

BAE 417 DESIGN OF MACHINE SYSTEMS. (3)
A study of the operational characteristics and design features associated with production and processing equipment for food and fiber products and an introduction to conceptualization, analysis and design of these systems. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330 or CE 341, or consent of instructor.

BAE 427 STRUCTURES AND ENVIRONMENTAL ENGINEERING. (3)
This course teaches load estimation for high timber and concrete structures and introduces the design of heating, cooling, and ventilation in structures. Prereq: CE 341 or ME 330; BIO 148 and 152; prerequisite or: EM 313.

BAE 435G WASTE MANAGEMENT FOR BIOSYSTEMS. (3)
A study of the characteristics; treatment and utilization principles; and analysis and design of systems for managing waste from the production and processing of food and fiber. Lecture, two hours; laboratory, three hours per week. Prereq: MA 214; BIO 152.

BAE 437 LAND AND WATER RESOURCES ENGINEERING. (3)
The hydrologic cycle is studied and design procedures are developed for flood control structures, water table management, wetlands, irrigation, and erosion control systems. Prereq: CE 341 or ME 330; BIO 148 and BIO 152.

BAE 438G FUNDAMENTALS OF GROUNDWATER HYDROLOGY. (3)
The first course in the physics of saturated flow in porous media. Topics include ground water occurrence, Durian flow, well hydraulics, flow nets, layered systems flow and pollutant movement. Prereq: ME 330 or CE 341 or consent of instructor, and engineering standing. (Same as GE 460.)

BAE 447 BIOPROCESS ENGINEERING FOUNDATIONAL. (3)
Design principles and equipment selection for the most common process operations are studied for the manufacturing and preservation of biological materials. Topics will include the design of fluid flow systems, transient heat transfer, heat exchangers, psychrometrics, and refrigeration. Prereq: BIO 148 and BIO 152; prerequisite or: ME 325.

BAE 450 SPECIAL PROBLEMS. (1-3)
An intensive study of some phases of biosystems engineering in which the student is particularly interested. Approval of instructor is required. May be repeated to a maximum of six credits. Prereq: Approval of the instructor.

BAE 502 MODELING OF BIOLOGICAL SYSTEMS. (3)
The course will focus on the mathematical description and computer simulation of the complex interactions involved in biological systems. Computer simulation will be used as a tool to analyze and suggest design changes to optimize performance. Prereq: BAE 402.

BAE 503 FUNDAMENTALS OF BIORENEWABLE RESOURCE ENGINEERING. (3)
This course introduces students to the science and engineering of converting biorenewable resources to energy and bio-based products. Topics include: Defining the resource base; physical and chemical properties of biorenewable resources; description of biobased products; methods of production for biorenewable resources.

BAE 504 BIOFUELS PRODUCTION AND PROPERTIES. (3)
This course introduces students to the science and engineering of liquid biofuels for transportation. Topics include: physical and chemical properties; engine performance; processing technologies; and environmental impact of biofuels. Prereq: BAE 503 or consent of instructor.

BAE 505 THERMOCHEMICAL PROCESSING OF BIOMASS. (3)
Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Prereq: BAE 503, BAE 504, or consent of instructor.

BAE 506 LIFE CYCLE ASSESSMENTS FOR BIORESOURCE ENGINEERING. (3)
Life Cycle Assessment (LCA) is a method in which the energy and raw material consumption, different types of emissions and other important factors related to a specific production or
service are measured, analyzed and summarized over the entire life cycle. This course will cover the theory, practice and application of Life Cycle Assessment. Life Cycle Assessment is one tool in a large toolbox of methods, such as Life Cycle Costing (LCC), Substance Flow Analysis (SFA), and Risk Assessment (RA), used to evaluate goods, services and systems. Prereq: Senior or graduate student standing.

BAE 513 SOIL DYNAMICS IN TILLAGE AND TRACTION. (3)
A course for advanced undergraduate and graduate students which presents the principles of dynamic soil-machine interaction. The performance characteristics of tractive devices are presented along with the corresponding soil compliance. Soil response to mechanical disturbance or tillage is also presented. Lecture, two hours; laboratory, two hours per week. Prereq: EM 313; EM 302.

BAE 515 FLUID POWER SYSTEMS. (3)
Analysis and design of fluid power systems used in agricultural, industrial and processing equipment. Selected topics to include: positive displacement components, control devices, actuators, fluid transmission and system dynamics. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330, ME 340 and engineering standing.

BAE 517 OFF-ROAD VEHICLE DESIGN. (3)
Morphology, operational characteristics, and design considerations of off-road vehicles used in agriculture, forestry and construction. This course provides an introduction to conceptualization, analysis and design of these vehicles. Topics to be addressed include: engine performance and design, vehicle testing, turbo chargers and intercoolers, drivetrains, chassis mechanics, electronic systems, hydraulic systems, and human factors. Prereq: BAE 417.

BAE 532 INTRODUCTION TO STREAM RESTORATION. (3)
Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as CE 542.)

BAE 533 ENVIRONMENTAL CONTROL SYSTEM DESIGN AND RECLAMATION. (3)
Introduction to the principles of sustainable mine planning with a focus on environmental control system design, reclamation and restoration design, and environmental monitoring systems. Topics will include curled and diversion design, hydrologic inputs, catchment delineation and routing, sedimentologic inputs, erosion control and best management practice selection, sediment pond design, design of silt fences, grass filters, and sediment ditches, weep berm and vegetated filter strip design, reforestation, grassland/wildlife establishment, stream restoration, wetlands/vernal ponds, environmental monitoring system design, and community integration. Prereq: MNG 291, MNG 463, and engineering standing or consent of instructor. (Same as MNG 535.)

BAE 536 FLUVIAL HYDRAULICS. (3)
Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as CE 546.)

BAE 537 IRRIGATION AND DRAINAGE ENGINEERING. (3)
Planning and design of irrigation system: sprinkler, traveling gun, center pivot, trickle, subirrigation and residential and commercial irrigating; pumps; water quality treatment and supply; ponds and wells; principles of water movement and plant-soil relationships; surface and subsurface drainage. Prereq: ME 330 or CE 341 or consent of instructor.

BAE 538 GIS APPLICATIONS FOR WATER RESOURCES. (3)
This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complimented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as CE 568.)

BAE 541 INTERMEDIATE FLUID MECHANICS. (3)
Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as CE 541.)

*BAE 545 ENGINEERING HYDRAULICS. (3)
Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 460 G and engineering standing, or consent of instructor. (Same as CE 549.)

BAE 547 WATERSHED SEDIMENTATION. (3)
The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) predictive models of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre-or Co-requisite or equivalent). (Same as CE 547.)

BAE 549 BIOLOGICAL PROCESS ENGINEERING. (3)
An analysis of processing operations for the conversion or generation of biological materials. The course material applies thermodynamics, heat transfer, mass and energy balances, and reaction kinetics to biological process operations such as sterilization, fermentation, product recovery, freezing, drying, evaporation, and refrigeration. Applications include biomedical, food processing, and biochemical and biofuel production from biomass. Prereq: BAE 447 or consent of instructor.

BAE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT. (3)
Study of the generation and management of solid and hazardous wastes. Application of engineering principles to the collection, transport, processing, resource recovery and ultimate disposal of these wastes. Prereq: CE 471 G, CE 521 or consent of instructor and engineering standing. (Same as CE 556.)

*BAE 580 HEATING, VENTILATING AND AIR CONDITIONING. (3)
A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in thermal environmental design. Building energy requirements will be computed and thermal comfort criteria will be studied. Prereq: BAE 427 or ME 321, or consent of instructor. This course is openly only to graduate students or undergraduates with engineering standing. (Same as ME 580.)

BAE 581 PHYSICS OF PLANT AND ANIMAL ENVIRONMENTS. (3)
A study of the thermal, moisture, light, and gaseous components of plant and animal environments with emphasis on interactions between these biological systems and their environments. Prereq: BAE 427 or consent of instructor.

BAE 599 TOPICS IN BIOSYSTEMS ENGINEERING. (2-3)
A detailed investigation of a topic of current significance in biosystems engineering such as: design of small earth dams, vacuum dehydration systems, small particle mechanics, biofuels, environmental control in greenhouses, sprinkler irrigation, energy conversion in agriculture, bio-simulation. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the BAE 599 number. Prereq: Variable; given when topic identified.

BAE 618 ADVANCED PLANT, SOIL AND MACHINERY RELATIONSHIPS. (3)
A consideration of fundamental concepts of energy and materials in the identification and mensuration of parameters needed in the development of new machines for agriculture. Lecture, two hours; laboratory, two hours. Prereq: BAE 417.

BAE 625 TOPICS IN ADVANCED ENVIRONMENT CONTROL AND ANALYSIS (Subtitle required). (3)
A study of current research in environment control and analysis of agricultural, commercial and residential structures. May be repeated three times for a maximum of nine credits, but not more than three credits may be earned under a particular topic. Prereq: Senior course in environment control and HVAC, BAE/ME 580, or consent of instructor.

BAE 638 GROUNDWATER HYDROLOGY. (3)
The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as CE 642.)

BAE 643 MECHANICS OF SEDIMENT TRANSPORT. (3)
Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as CE 643.)

BAE 647 SYSTEM OPTIMIZATION. (3)
Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g. biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as ECE 647.)

BAE 648 ENERGY AND MASS TRANSFER IN BIOSYSTEMS PROCESSING. (3)
A comprehensive and in-depth study of the principles of energy and mass transfer as they apply to the processing of agricultural and biological materials. Prereq: BAE 549 or consent of instructor.

BAE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL. (3)
Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as CE 652.)

BAE 653 WATER QUALITY IN SURFACE WATERS. (3)
Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeriation, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as CE 653.)
BCH 401G FUNDAMENTALS OF BIOCHEMISTRY. (3) Descriptive chemistry of amino acids and proteins, carbohydrates, lipids, and nucleic acids. Discussion of structure and function; metabolism and bioenergetics; and biological information flow. At the undergraduate level, understanding is demonstrated through hour examinations. At the graduate level, understanding is demonstrated through hour examinations and a brief paper. Lecture: three hours; one optional conference. Prereq: CHE 107, CHE 236 and BIO 152 or equivalent.

BCH 419G MOLECULAR BASIS OF HUMAN DISEASE. (3) The goal of this course is to provide students with an understanding of the defining characteristics of the major human diseases, the molecular mechanisms responsible for causing these diseases, and some of the molecular technologies used to diagnose and treat them. Prereq: BCH 401G.

BCH 517 EXPERIMENTAL METHODS IN BIOCHEMISTRY. (4) A laboratory course dealing with the instrumentation and procedures of biochemical research. Because many of the materials used are labile, the course is given in a block during a four-week period at the end of the spring semester. Five days per week during four-week intersession, or summer session. Prereq: BCH 401G, 502 or 811 and consent of instructor.

BCH 556 PRINCIPLES OF DRUG DESIGN. (3) Introduction to medicinal chemistry will be explored through rational biochemical and physical organic chemical approaches to drug design, action and development. Structural features, physical properties, mechanism of action and metabolism of drug like molecules, forces that govern interaction of drug-like molecules with their targets, enzyme mechanisms and inhibition and xenobiotic metabolism will be illustrated with specific examples showing how drugs function at the molecular level. Prereq: CHE 230, CHE 232, BIO 148, BIO 152. (Same as CHE 580/PHS 556.)

BCH 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1-3) Each semester five distinguished scientists will visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/MI/PLS/PPA 601.)

BCH 604 STRUCTURAL BIOLOGY. (3) An advanced course on the function and structure of macromolecules. Topics include: the physical determinants of protein structure, classification of protein architecture, protein-nucleic acid and protein-protein interactions, sequence dependence of nucleic acid structure, ribozymes, dynamics and evolutionary relationships. Prereq: BBS 601-602/BCH 607-608 or equivalent.

BCH 607 BIOMOLECULES AND METABOLISM. (3) An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as BBS 601.)

BCH 660 BIOMOLECULES AND MOLECULAR BIOLOGY. (3) An introductory graduate-level biochemistry course focused on the cellular mechanisms that underlie the regulated expression of genes, including transcription and translation, as well as basic mechanisms of DNA replication, repair and recombination. Genetic engineering and other experimental approaches critical to molecular biology research will be reviewed. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

BCH 669 PLANT BIOCHEMISTRY. (3) The course will consider the chemical constituents of plants (with emphasis on biologically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent consent of instructor. (Same as PLS/PPA 609.)

BCH 670 STRUCTURE AND FUNCTION OF BIOMEMBRANES. (3) A lecture and seminar course that discusses primary literature focused on the structures, assembly, and functions of biologically important membranes. Prereq: CHE 232; CHE 442G; BCH 401 G, 811, or BBS 601.

BCH 681 BIOCHEMISTRY AND CELL BIOLOGY OF NUCLEIC ACIDS. (3) A lecture and seminar course devoted to a study of the principles of nucleic acid chemistry and to the role of nucleic acids in cellular function. Prereq: BCH 401G, 502 or 811.

University of Kentucky 2016-2017 Undergraduate Bulletin
BCH 612 STRUCTURE AND FUNCTION OF PROTEINS AND ENZYMES. (3)
Primarily a lecture course devoted to the relationship of the structure of protein molecules to their biological roles. Proteins will be discussed in terms of their size, shape, conformation, primary structure, catalytic mechanism and regulatory properties. Prereq: BCH 401G, 502 or 811; CHE 444G or consent of instructor. May be taken concurrently with BCH 502.

BCH 615 MOLECULAR BIOLOGY. (3)
This course will develop the student’s ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g., BHS 602) or consent of instructor. (Same as BIO/MI 615.)

BCH 616 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 619 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 620 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as PHR 620/PLS 642.)

BCH 625 SCIENTIFIC COMMUNICATIONS. (2)
To be useful, scientific research needs to be explained clearly to others – to colleagues, to administrators, to foundations and governmental bodies, and to the public. This course will give students the tools to effectively present their data, their ideas, and themselves to the scientific community. Through a series of directed exercises the students will learn how to write an abstract, a scientific paper, and a grant, and to prepare a poster and to give an oral presentation. The class will draw examples, topics, and exercises from current literature. Prereq: Good standing in a graduate program in the physical, chemical or biomedical sciences.

BCH 640 RESEARCH IN BIOCHEMISTRY. (1-9)
Prereq: Consent of instructor.

#BCH 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BCH 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BCH 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

#BCH 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BCH 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

BCH 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as CHE/CME/PHA/PHR 779.)

BCH 780 TOPICS IN BIOCHEMISTRY. (1-3)
A lecture and seminar course offered on topics of special interest to graduate students. May be repeated to a maximum of six credits.

BCH 812 DENTAL BIOCHEMISTRY. (6)
This is a comprehensive course in biochemistry designed to fulfill the specific needs of student dentists. Course content is generally as outlined in the American Association of Dental Schools suggested curriculum guidelines for biochemistry. Part I acquaints students with the chemical constituents of prokaryotic and eukaryotic cells; topics include the chemistry of lipids, carbohydrates, proteins, vitamins and coenzymes, and the nature of enzyme action. Part II integrates the chemical principles learned from Part I with concepts of cell dynamics, structure, function, subcellular organization, and metabolism. Topics include intermediary metabolism, bioenergetics, DNA replication, protein synthesis, and cellular regulatory and control mechanisms. Course content, where possible, is related to current concepts concerning the etiology of oral diseases, their treatment, and prevention to assist student dentists in attaining institutional goals and objectives for clinical competency. Prereq: Admission into the College of Dentistry. (Same as OBI 812.)

BCH 815 FIRST-YEAR ELECTIVE, BIOCHEMISTRY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass/Fail only. Prereq: Admission to first year, College of Medicine.

BCH 819 CELLULAR STRUCTURE AND FUNCTION/BIOCHEMISTRY. (7)
The course combines lecture, small group activities, clinical correlations, problem-based learning, and problem-solving sessions in providing an understanding of the relationship of biochemical principles to human health and disease. Close integration with genetics topics provides a better picture of human biochemistry, molecular biology and genetics contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

BCH 825 SECOND-YEAR ELECTIVE, BIOCHEMISTRY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student with an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass/Fail only. Prereq: Admission to second year medical curriculum and approval of advisor.

BCH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved elective:

BCH 8650 ELECTIVE IN BIOCHEMISTRY

BIO 101 WAYS OF DOING BIOLOGY. (1)
Through a series of lectures and discussions students will gain a better understanding of the various academic programs in the life sciences across campus. Information will also be provided about research opportunities and career possibilities. Pass/fail only. Enrollment limited to freshmen and sophomore science majors.

BIO 102 HUMAN ECOLOGY. (3)
A study of the interrelationships of man, populations, space, energy, food, mineral resources and other life on earth. Not for life science majors.

BIO 103 BASIC IDEAS OF BIOLOGY. (3)
Introductory biology. Discussion topics are those relevant to both plants and animals - cell structure and function, molecules important to living things, metabolism, heredity, environment. Not for life science majors.

BIO 110 INTRODUCTION TO HUMAN BIOLOGY AND HEALTH. (3)
This course provides the student with a general overview of the basic dimensions of health (such as physical, social and emotional) and the applications of these dimensions to personal wellness.

BIO 111 GENERAL BIOLOGY LABORATORY. (1)
Laboratory studies in the structure and function of cells, plants, and animals; ecology; heredity; and evolution. Prereq or coreq: BIO 103 or consent of instructor.

BIO 148 INTRODUCTORY BIOLOGY I. (3)
BIO 148 introduces the student to the biological mechanisms operating at the molecular, cellular, and population level that contribute to the origin, maintenance, and evolution of biodiversity including the origins and history of the evolutionary process. Course material is presented within a phylogenetic context, emphasizing the shared history of all living organisms on earth through common ancestry. The first semester of an integrated one-year sequence (BIO 148 and BIO 152). Prereq: Math ACT of 24 or above or MA 109, and past or concurrent enrollment in CHE 105.

BIO 150 PRINCIPLES OF BIOLOGY I. (3)
The first semester of an integrated one-year sequence (BIO 150 and BIO 152) that is designed to develop an appreciation of biological principles necessary to explore life at the cellular and molecular levels. Similarities and differences in structure and function of simple and complex cells will be covered along with theories on the origin and evolution of biological systems. Prereq: CHE 105, or Math ACT score of 26 or above plus concurrent enrollment in CHE 105, or chemistry placement test passed plus concurrent enrollment in CHE 105.

BIO 151 PRINCIPLES OF BIOLOGY LABORATORY I. (2)
An introductory laboratory in which biological systems are investigated at the cellular and molecular levels. Laboratory, four hours per week. Prereq: This course is a companion to the BIO 150 lecture course, but it need not be taken concurrently.

BIO 152 PRINCIPLES OF BIOLOGY II. (3)
The second semester of an integrated one-year sequence (BIO 150 and 152) that is designed to develop understanding and appreciation for the diverse forms of plant and animal life, and
their relationships to each other and to their environment. Structure and function relationships will be explored at many levels of organization: cell, tissue, organ, organism, population and community. Prereq: A C or better in BIO 148 or permission of instructor.

BIO 153 PRINCIPLES OF BIOLOGY LABORATORY II. (2)
An introductory laboratory course in which biological systems are investigated at the organismal, population and community level. Laboratory, four hours per week. Prereq: CHE 105, or Math ACT of 26 or above plus concurrent enrollment in CHE 105, or chemistry placement test passed plus concurrent enrollment in CHE 105.

BIO 155 LABORATORY FOR INTRODUCTORY BIOLOGY I. (1)
This course is designed to provide a broad introduction into the data, results, and information associated with biological research, and into some of the analytical approaches used to test biological hypotheses. Communication of these aspects of biological research is crucial, and much of this lab course will be focused on the development of effective writing skills for the delivery of this information. Prereq: Math ACT of 23 or above or MA 109, past or concurrent enrollment in CHE 105.

BIO 180 SPECIAL TOPICS IN BIOLOGY (INTRODUCTORY LEVEL): (Subtitle required). (1-4)
Interdisciplinary, topical or experimental course in introductory biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 190 SUPPLEMENTAL BIOLOGY WORKSHOP I. (1)
Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 150.

BIO 192 SUPPLEMENTAL BIOLOGY WORKSHOP II. (1)
Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 152.

BIO 198 SCHOLARS BIOLOGY RESEARCH. (2)
Biology 198 is one of the Scholars courses for biology majors in the Department of Biology Scholars Program. This course is designed to provide a solid introduction to 21st century biology research. Students will learn how to critically read, interpret, understand and discuss original literature. Students will learn how to discuss data and information from the original literature appropriately, develop reasonable hypotheses from current 21st century biology research and provide plausible conclusions and presentations in regard to those problems using original information and data. Lastly, the course is designed to equip students with the necessary skills to participate and succeed in an upper level research experience. The course substitutes for BIO 155 for BIOLOGY majors. Prereq: ACT 30 or Reading/Math SAT of 1320 or Reading/Math Writing SAT of 1320 or Reading/Math Writing SAT of 1980, and declared biology major, and run High School GPA of 3.5.

BIO 199 RESEARCH EXPERIENCE IN BIOLOGY. (0-1)
Participation in biological research under the direction of a faculty mentor in Biology or related field. A research contract signed by the student and faculty mentor must be approved by the Director of Undergraduate Studies in Biology. Offered pass/fail only.

BIO 208 PRINCIPLES OF MICROBIOLOGY. (3)
The course introduces fundamental microbiological principles and techniques. Emphasis is placed on structural, functional, ecological and evolutionary relationships among microorganisms, principally viruses, rickettsiae bacteria, fungi and algae. Prereq: High school chemistry recommended.

BIO 209 INTRODUCTORY MICROBIOLOGY LABORATORY. (2)
Laboratory exercises in general microbiology. Laboratory, four hours per week. Prereq: One unit of chemistry or consent of instructor; BIO 206 or BIO 308 should be taken concurrently.

BIO 300 GENERAL ENTOMOLOGY. (3)
Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as ENT 300.)

BIO 302 INTRODUCTION TO NEUROSCIENCE. (3)
This introductory course is designed to provide students with a basic understanding, at the physiological, cellular and molecular levels, of how the nervous system functions to create behavior. It will also introduce students to the consequences of abnormal system functioning brought about by either disease or injury. Prereq: BIO 152 or equivalent or permission of instructor.

BIO 303 INTRODUCTION TO EVOLUTION. (4)
This course covers topics in evolution, concentrating on the Darwinian theories of evolution including descent with modification, natural selection, and sexual selection. Topics will include: patterns of evolution, the genetic source of variation, measuring evolution, adaptation, speciation, human evolution, “evo-devo”, and evolutionary medicine. Taught on campus (lecture: three hours; recitation, three hours) or online. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent.

BIO 304 PRINCIPLES OF GENETICS. (4)
A study of the physical and chemical aspects of the genetic material and their relationship to the expression and inheritance of the phenotype. Lecture, three hours; laboratory, three hours per week. Prereq: BIO 148, BIO 152, BIO 155, CHE 107, CHE 113.

### BIO 305 INTRODUCTION TO NEUROSCIENCE TECHNIQUES. (4)
This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent. (Same as ANA/PSY 305.)

### BIO 308 GENERAL MICROBIOLOGY. (3)
Fundamental concepts of microbiology. The nutrition, physiology, genetics, molecular biology of microorganisms, and their roles in nature and in infection and immunity will be studied. Prereq: BIO 148, BIO 152 and BIO 155 (or equivalent courses); CHE 230; and BIO 315 or BIO 304.

### BIO 309 MICROBIOLOGY LABORATORY. (2)
This course includes laboratory exercises that are designed to illustrate processes central to microbiology and to familiarize students with basic skills required for working with microorganisms in a safe environment. Students will become familiar with isolating, culturing, and identifying microorganisms, and with molecular techniques used to study and manipulate microbes. Prereq: BIO 148, BIO 152 and BIO 155 (or equivalent courses); CHE 230; and BIO 315 or BIO 304 and previous or concurrent enrollment in BIO 308. Or consent of instructor.

### BIO 310 THE LIFE PROCESSES OF PLANTS. (3)
This course is intended to provide a basic understanding of the natural products and processes that shape the nature of modern plants and govern their interactions with the environment. Students will develop a basic understanding of how these plant attributes relate to organismic function. Emphasis will be placed on exploring the nature of the major plant biomes of the Earth, their biotic and abiotic components, and how member plants compete for space and other resources. Development of optimal plant strategies for reproductive success, plant interaction with other living systems as well as abiotic factors and their defense from predation and attack will also be considered. Prereq: BIO 152.

### BIO 315 INTRODUCTION TO CELL BIOLOGY. (4)
The structure and function of cells will be considered. Emphasis will be placed on the ultrastructure of cell organelles in plants and animals as a framework for understanding the compartmentalized nature of cell activity. Lecture, three hours; laboratory three hours weekly.

### BIO 325 ECOLOGY. (4)
This course introduces the scientific study of relationship between organisms and their environment. The course is structured around levels of organization – from physiological ecology to individuals, populations, communities, ecosystems, landscapes, regions, and the biosphere. Students will be expected to develop a solid knowledge base and understanding of key concepts and issues in contemporary ecology; to become familiar with how ecological understanding is attained by researchers; and to see how ecological knowledge and methods can be used to address important societal problems. Lecture, three hours per week; laboratory, an average of three hours per week. Prereq: BIO 150-153 or equivalent introductory biology sequence; and BIO 304 or equivalent genetics course; or consent of instructor.

### BIO 340 COMPARATIVE ANATOMY. (4)
BIO 350 ANIMAL PHYSIOLOGY. (4)
An introduction to the basic principles of animal physiology. An elementary discussion of the major vertebrate organ systems including nutrition, metabolism, respiration, circulation, excretion, muscle contraction, peripheral and central nervous system, and endocrine function emphasizing homeostasis. Lecture, three hours; laboratory, three hours. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, CHE 105 (or CHE 109 and CHE 110) and CHE 107 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

### BIO 351 PLANT KINGDOM. (3)
An evolutionary survey of the morphology, taxonomy, life histories and biological relationships of all plant groups comprising the plant kingdom. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in biology.

### BIO 355 BIOLOGY STUDY ABROAD (Subtitle required). (3)
This course offers students an opportunity to study unique biological communities and to experience living in a foreign culture. Specific content and location varies. May be repeated a maximum of two times under different subtitles. Prereq: Will be set by instructor.

### BIO 361 ECOLOGY OF THE KENTUCKY FLORA AND VEGETATION. (4)
An overview of the phytosociology, geology, soils, hydrology, climate (paleo and recent), vegetation (paleo and recent), flora (including floristic relationships), archeobotany, and agriculture of Kentucky. Lecture, two hours; laboratory, two hours per week. Prereq: One year of introductory Biology or consent of instructor.

### BIO 375 BEHAVIORAL ECOLGY AND SOCIOBIOLOGY. (4)
This course will explore the selective forces influencing animal behavior, such as foraging, predator avoidance, mate choice, parental care, and social interaction. Specific phenomena to be explored include the evolution of optimal foraging and search images, extravagant male characteristics, female preferences, conflicts between the sexes, infanticide, parent-offspring conflict, dominance hierarchies, optimal group size, altruism, and eusociality. The study of these behaviors integrates ideas and approaches from ecology, genetics, physiology, and psychology. Students will be encouraged to read outside material, to think carefully, logically, and critically about ideas, and to ask questions and defend their views in class. Prereq: A year of introductory biology (BIO 150/152).
BIO 380 SPECIAL TOPICS IN BIOLOGY (INTERMEDIATE LEVEL) (Subtitle required). (1-4)
Intermediate course for experimental or core course in intermediate (300-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 394 RESEARCH IN NEUROSCIENCE. (1-3)
An independent research project in an area of neuroscience under the direction of a faculty mentor. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies (Neuroscience). May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of the minor or major in Neuroscience. Prereq: BIO 152 and BIO 302 or PSY 312.

BIO 395RESEARCH IN BIOLOGY. (1-3)
An independent research project in an area of biology under the direction of a faculty mentor. The research project can be conducted in the Department of Biology or in other biological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Biology. May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of a BS or BA in Biology. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent. Completion of at least one of the Biology core courses (Cell Biology, Evolution, Genetics, Physiology, Ecology) is strongly recommended.

BIO 397 RESEARCH IN MICROBIOLOGY. (1-3)
An independent research project in an area of microbiology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other microbiological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Microbiology. Prereq: BIO 308 and BIO 309.

BIO 401 SPECIAL TOPICS IN BIOLOGY FOR ELEMENTARY MIDDLE AND HIGH SCHOOL TEACHERS (Subtitle required). (1-4)
Selected topics in biology of special interest to teachers such as biological research experiences related to pharmacological assays, collecting behavioral data, compilation and statistically analysis of data. When the course is offered, a specific title with specific credits, the number of hours in laboratory discussion and laboratory, will be given. Lecture discussion, two-four hours; laboratory, zero-four hours. May be repeated to a maximum of 12 credits. Prereq: By consent of instructor only.

#BIO 404 ADVANCED GENETICS. (3)
This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. The course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is investigated to understand the development and application of these methodologies. The course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. Prereq: BIO 304 (Introductory Genetics) or equivalent or consent of the instructor is required. BIO 315 (Cell Biology) or equivalent is recommended, but not required.

#BIO 405 HUMAN GENETICS. (3)
This course will survey selected topics relevant to the understanding of the diversity and complexity of human genetic diseases, and will explore some of the contemporary methodologies used to identify genes underlying human genetic diseases. This course will also cover modern methods for genome analysis since the human genome sequence forms the foundation of current human genetics in research and medicine. Prereq: Grade of C or better in BIO 304 or permission of instructor.

#BIO 410 LABORATORY IN GENETICS AND CELL BIOLOGY. (3)
A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 148 and BIO 152 or one course in introductory botany or consent of instructor. (Same as NRE 420G.)

BIO 420G TAXONOMY OF VASCULAR PLANTS. (4)
A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 148 and BIO 152 or one course in introductory botany or consent of instructor. (Same as NRE 420G.)

BIO 425 BIOLOGY SEMINAR: (Subtitle required). (1)
This seminar develops effective analysis, presentation, and discussion skills required of Biology majors by exploring various life science topics of interest to faculty and students. Satisifies seminar requirements for Biology majors and can be repeated for a maximum of 2 credits under a different subtitle. Prereq: Senior standing in Biology recommended. BIO 150-153 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

BIO 426 NEUROSCIENCE SEMINAR (Subtitle required). (1)
This seminar course develops effective analysis, presentation and discussion skills required of science majors by exploring one neuroscience topic in detail. Prereq: Determined by instructor.

BIO 427 SEMINAR IN MICROBIOLOGY (Subtitle required). (1)
This seminar course develops effective analysis, presentation, and discussion skills required of Biology majors by exploring various microbiological topics. Prereq: Senior standing recommended. BIO 308 and BIO 309 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected.

BIO 430G PLANT PHYSIOLOGY. (4)
Basic principles of plant physiology; the physiological processes of green plants and the effect of the environment on these processes. Lecture (three hours) and laboratory (three hours). Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 (or equivalent); CHE 230 and CHE 231 (or equivalent) or consent of instructor.

BIO 440 COMPARATIVE AND FUNCTIONAL ANATOMY. (4)
Comparative and Functional Neurowanatomy explores the cellular bases for sensory, integrative and motor neuroscience from an evolutionary perspective, delineating common features of all nervous systems ranging from chordiannerve nets to vertebral nerve cords of most invertebrates to the chordate/vertebrate central nervous systems. Discovery of the common features of nervous structure in model system organisms with the human brain will provide students a perspective on the value of model systems for future study. Functional analyses of nervous system structures will explain some of the experimental and clinical bases for neural function and behavior. Prereq: BIO 302 or consent of instructor.

BIO 446 NEUROPHYSIOLOGY LABORATORY. (3)
This course will focus on experimentation in neurophysiology. The generation of receptor potentials in sensory neurons will be measured in addition to action potentials in axons. Pharmacological experimentation of ionotropic and metabotropic receptors subtypes and second messengers signaling will be conducted. The role key of ion channels and transporters in regulation of the membrane potential will be covered in great detail experimentally. The concept of electron-neuron communication through electrical and chemical synapses will be examined. One will be required to understand and critically analyze research papers in the field of neuroscience in the form of discussion and written reviews. Students will be required to answer essay questions on exams and will have homework sets. In addition, a research paper on a topic in the course will be required. Prereq: Required: a physiology course (PGY 412G and/or BIO 350).

BIO 452G LABORATORY IN ECOLOGY. (3)
An introduction to laboratory and field experimentation and computer simulation in ecology. Exercises and demonstrations will be performed to familiarize students with (1) particular ecosystems, (2) some important research problems in ecology, and (3) current research techniques for dealing with them. One or two Saturday field trips will be required. Laboratory, four hours. Prereq or coreq: BIO 352 or equivalent and consent of instructor.

BIO 461 INTRODUCTION TO POPULATION GENETICS. (3)
This survey course examines the population dynamics and equilibrium of genes in nuclei, organelles and mitochondria. Emphasis will be on biological relevance (in plants, animals, and microorganisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/ENT/FOR 461.)

BIO 494G IMMUNOLOGY. (4)
A survey of theories and mechanisms of immunity including: nature of antigens and antibodies, antigen-antibody reactions, immunocompetent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as MI 494G.)

BIO 495G BACTERIAL PATHOGENESIS. (3)
This course will examine the pathogenic mechanisms used by bacteria to cause human disease. Bacterial virulence factors and host susceptibility factors will be discussed, with an emphasis on understanding the techniques that can be used to identify these traits in newly emerging pathogens. Prereq: BIO 308, BIO 315, BCH 401 recommended. Or permission of instructor. (Same as MI 495G.)

BIO 499G BACTERIAL PATHOGENESIS. (3)
This course will examine the pathogenic mechanisms used by bacteria to cause human disease. Bacterial virulence factors and host susceptibility factors will be discussed, with an emphasis on understanding the techniques that can be used to identify these traits in newly emerging pathogens. Prereq: BIO 308, BIO 315, BCH 401 recommended. Or permission of instructor. (Same as MI 495G.)

BIO 499 RESEARCH SEMINAR. (1)
A seminar for students engaged in independent research. Students with BIO 395 experience will interact with student colleagues and experienced research mentor. Prereq: Past or current enrollment in BIO 395.
BIO 502 PRINCIPLES OF SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (5)
Advanced survey of major mammalian physiological systems at the systems, cellular and molecular level; lectures, assigned reading, advanced texts or monographs, demonstrations and problem-oriented study questions. Prereq: One year each, physics, general chemistry; PGY 206 or its equivalent. (Same as PGY 502.)

BIO 507 BIOLOGY OF SLEEP AND CIRCADIAN RHYTHMS. (3)
This course provides an introduction to the fields of sleep and circadian rhythms including the underlying neuroanatomy, neurophysiology, and the molecular and genetic underpinnings of sleep and circadian behaviors. The medical and societal relevance of these areas will also be emphasized. Considerable time will be spent reading and analyzing the primary literature in these fields, including student presentations of selected articles. Prereq: BIO 304; BIO 315; BIO 350 or equivalent.

BIO 508 EVOLUTION. (3)
Mechanisms of evolutionary change, with a brief summary of historical evolution, especially of the Metazoa. Prereq: BIO 304 or ASC/ABT 360.

BIO 510 RECOMBINANT DNA TECHNIQUES LABORATORY. (4)
An introduction to the construction, isolation, and analysis of recombinant DNA clones, with emphasis on practical experience in basic techniques. Graduate students will be given first preference in enrollment. Lecture, one hour; laboratory, six hours per week. Prereq: BIO 304 and BIO 315 or equivalent with consent of instructor.

BIO 515 GENERAL CELL BIOLOGY. (3)
An integrative, analytical study of the cell as the basic unit of biological structure and function, with emphasis on eukaryotes. Lecture, discussions with readings in some original literature. Prereq: BIO 315 or BCH 401G or equivalent and consent of instructor. (Same as MI 515.)

BIO 520 BIOINFORMATICS. (3)
An introduction to computer analysis of macromolecular structure information. This course describes how to access, process, and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as INF 520.)

#BIO 527 STEM CELLS, TISSUE ENGINEERING, AND REGENERATIVE MEDICINE. (3)
The course will provide students with knowledge from a broad range of topics related to stem cells, tissue engineering and regenerative medicine, including: an historical perspective of these fields, contemporary use of stem cells in medicine, introduction to different concepts in regenerative medicine, research in tissue engineering and biomaterials, and societal issues surrounding stem cells and regenerative medicine. Prereq: BIO 315 and BIO 304.

BIO 529 DEVELOPMENTAL BIOLOGY. (3)
An introduction to the principles of developmental biology, particularly of animals, including genetic and environmental control of development at the molecular, cellular, and physiological levels. Prereq: BIO 304 or equivalent, or graduate standing in life sciences, or consent of instructor.

BIO 530 BIOGEOGRAPHY AND CONSERVATION. (3)
An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have come to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as GEO 530.)

BIO 535 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR. (3)
The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as PGY 535.)

BIO 542 HISTOLOGY. (5)
An in-depth study of vertebrate cell and tissue structure and function. Human tissue is emphasized. Some knowledge of biochemistry, physiology, and anatomy is desirable. The laboratory involves study of prepared microscope slides. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 315 or consent of instructor.

BIO 550 ADVANCED PHYSIOLOGY. (3)
Physiological mechanisms by which animals cope with different environmental stresses. Osmoregulation, respiration, temperature regulation and tolerance, sensory reception, circulation, etc. Prereq: One year college chemistry, BIO 350 or equivalent, one year college physics or consent of instructor.

BIO 551 LIFE CYCLE ECOLOGY OF FLOWERING PLANTS. (4)
The effect of physical and biotic factors on plants and environment. Physiological, morphological and anatomical adaptations of plants to the physical factors of the environment are emphasized. Some of the laboratory exercises are carried out in the field. Lecture, three hours; laboratory, two hours. Prereq: BIO 325 or consent of instructor.

BIO 553 FISH BIOLOGY. (4)
This course explores the biology of fishes from an evolutionary perspective. Lectures cover physiology, functional morphology, ecology, population biology, behavioral evolutionary relationships, and fishes biology. Laboratory exercises include development of a fish collection; experiments in fish physiology, behavior and ecology; computer modeling of problems in fisheries biology; and field trips. Lecture, three hours; laboratory, two hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 or consent of instructor.

BIO 555 VERTEBRATE ZOOLOGY. (5)
An intensive study of the vertebrate classes with emphasis on trends and processes in evolution, classification, phylogeny, ecology, and adaptations in morphology and behavior. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 556 COMMUNICATION BIOLOGY. (3)
Animals sense and respond to numerous signals from their environment by using sensory modalities attuned to visual, auditory, chemical, and electromagnetic cues. This course is an in-depth examination of the physiological bases of sensory input and the interactive, motor system-mediated, behavioral repertoires exhibited by different species in response to such inputs. Prereq: BIO 325 or BIO 350.

BIO 559 ORNITHOLOGY. (4)
A study of the life histories, habits, identification, structure, adaptations, and physiology of birds. Special emphasis upon migrations, songs, nests and economic importance of our native birds. Lecture, field excursions, laboratory studies. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY. (4)
Emphasis will be placed on the physiological and toxicological effects of chemicals on natural biota, including considerations at cellular, organismal, population, and community levels. This will include assimilation and metabolism of pollutants by animal species, with emphasis upon biochemical and physiological mechanisms involved in stress-induced responses and stress reduction. Additional areas of concern will include the transport, fate, and effects of chemical stressors on structure and function of biotic communities and will include introductions to ecotoxicology and environmental regulatory strategies. Lecture, three hours; recitation, two hours per week. Prereq: BIO 350 or PGY 302 or equivalent or consent of instructor.

BIO 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: One year of biology. (Same as ENT 561.)

*BIO 563 PARASITOLOGY. (4)
Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as ENT 563.)

BIO 564 INSECT TAXONOMY. (4)
A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as ENT 564.)

BIO 567 APPLICATIONS OF GENETICS. (4)
Course covers genetic concepts with an emphasis on interpretation and analysis of molecular and population genetic data using examples from the entomological literature. Prereq: ABT 360 or BIO 304 or equivalent and an introductory statistics course.

BIO 568 INSECT BEHAVIOR. (3)
The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as ENT 568.)

BIO 575 PLANT ANATOMY AND MORPHOLOGY. (4)
A survey of the diverse structural features of plants and their functional and phylogenetic significance. Emphasis will be on the adaptive design of modern vascular plants as a response to natural and artificial selection. Lecture, three hours; laboratory, two hours per week. Prereq: Introductory biology sequence (six hours) or consent of instructor.

BIO 580 SPECIAL TOPICS IN BIOLOGY (ADVANCED LEVEL): (Subtitle required). (1-4)
Interdisciplinary, topical or experimental course in advanced (500-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Course format: variable—Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 582 VIROLOGY. (3)
Physical, chemical and biological properties of viruses. Modes of replication and control of gene product formation displayed by representative plant, animal, and bacterial viruses. Prereq: BIO 304 and biochemistry or equivalent strongly recommended, or consent of instructor. (Same as MI 582.)

BIO 595 IMMUNOBIOLOGY. (2)
Laboratory in immunology and serology. Preparation, standardization, and uses of biological laboratory reagents and monoclonal antibodies. Preparation and use of enzyme conjugates. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as MI 595.)
BIO 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures and have informal discussions with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/M/PLS/JPA 601.)

#BIO 604 GENETIC ANALYSIS. (3)
This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. The course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is utilized to understand the development and application of these methods. The course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. Prereq: BIO 304 (Introductory Genetics) or equivalent or consent of the instructor. (Same as BCH/MI/PLS/PPA 601.)

#BIO 605 EMPirical METHODS IN ECOLOGY AND EVOLUTION.

BIO 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization approaches and quantitative genetics. Students will work with the instructor to address an important contemporary research problem and will report their results in a final term paper. Prereq: BIO 606 and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as ENT/FOR 606.)

BIO 607 ADVANCED EVOLUTION. (3)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as ENT/FOR 607.)

BIO 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus, or consent of instructor. (Same as ENT/FOR 608.)

BIO 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community organization. Both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as ENT/FOR 609.)

#BIO 611 BIOPATHOLOGY.

BIO 612 BIOLOGY OF AGING. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/GRN/PGY 612.)

BIO 615 MOLECULAR BIOLOGY. (3)
This course will develop the student's ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g., IBS 602) or consent of instructor. (Same as BCH/M/615.)

BIO 618 MOLECULAR NEUROBIOLOGY.

BIO 620 PLANT MOLECULAR BIOLOGY. (3)
This course is intended to be a treatment of current concepts of plant molecular biology. It will be a literature-based course, supplemented by handouts and reading lists. The course will deal as much as is possible with topics that are unique to plants. Current aspects of molecular biology that are relevant to the course content will be covered in the first part of the course; however, these lectures will not be a review of topics that should have been retained from genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as PLS 620.)

BIO 621 TOPICS IN MODERN BIOLOGY (Subtitle required). (1-3)
A course for students in the biological and related sciences to be taught on various topics by specialists in their fields. Designed to give the student the most up-to-date information on the various topics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

BIO 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biomedical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430 or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 622.)

BIO 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biomedical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytocrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430 or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 623.)

BIO 625 INSECT-PLANT RELATIONSHIPS. (3)
This course examines the natural history, ecology, and evolution of insect/plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multitrophic-level interactions, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as ENT 625.)

BIO 632 ADVANCED CELL BIOLOGY I. (3)
A molecular level treatment of cell structure and function derived from current experimental approaches. Eukaryotes will be stressed. Topics will usually include membrane structure and function, the cytoskeleton and the extracellular matrix, and bioenergetics. Lectures and discussions with reading in the original literature. Prereq: BIO 304 or equivalent; coreq: BCH 501 or equivalent or consent of instructor.

#BIO 633 ADVANCED CELL BIOLOGY II.

BIO 650 INCISE PHYSIOLOGY. (4)
Study of insect physiological processes including development, digestion, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq: Consent of instructor. (Same as ENT 635.)

BIO 653 INSECT MOLECULAR BIOLOGY. (4)
Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with insect molecular biology techniques. Prereq: ENT/BIO 635 or consent of instructor. (Same as ENT 636.)

BIO 654 DEVELOPMENTAL BIOLOGY. (3)
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cellular biological and molecular approaches to cell differentiation, neural pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as ANA/PGY/PSY 638.)

BIO 656 ANIMAL PHYSIOLOGY LABORATORY. (2)
Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as PGY 650.)

BIO 657 INSECT ECOLOGY. (3)
The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as ENT 657.)

BIO 667 INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as ENT/FOR 667.)

BIO 668 PHYLOGENETIC SYSTEMATICS. (3)
Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as ENT 684.)

BIO 685 INMUNOLOGY, INFECCTION AND INFAMATION. (3)
An introductory level graduate course surveying current trends in immunology including the organization of the immune system, cells important for immunity and inflammation; types of immune responses, cellular immunology, molecular immunology, self-nonselid differentiation, vaccines and immune mediated diseases. Prereq: BCH 401G, or BCH 501 or 502, IBS 501 or equivalent or consent of the course director. (Same as MI 685.)

BIO 707 CONTEMPORARY TOPICS IN IMMUNOLOGY. (3)
This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 685 or equivalent or consent of instructor. (Same as MI 707.)

BIO 712 MICROBIAL STRUCTURE AND FUNCTION. (3)
Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture, division, and differentiation. Prereq: (to reflect appropriate IBS course). (Same as MI 720 and OBI 720.)
Homeostatic mechanisms, input-output analysis, steady state and transient response, feedback concepts, system identification and simulation from actual operating data. Prereq.: PGY 502 and ME 440 or equivalent.

BME 615 BIOMEDICAL SIGNAL PROCESSING II. (3)
Stochastic processes, Fourier-based spectral analysis and linear system identification, modern spectral estimation (AR, MA, ARMA), parametric transfer function estimation, time-frequency analysis of nonstationary signals. Prereq.: BME 605, BME 610, EE 640 recommended.

BME 640 BIOMEDICAL ENGINEERING ETHICS. (1)
This course presents an engineering-based approach to study the system of ethics applicable to biomedical engineering. This course will describe and examine the responsibilities of biomedical engineers to stakeholders, e.g., patients, research subjects, and engineering clients, as well as to the legal system (where applicable) and the profession as an entity. As a scholarly discipline, biomedical engineering ethics draws upon principles from subjects such as: the philosophy of science, the philosophy of engineering, and the ethics of technology. Materials from these principles will be used in this course with adaption to the special circumstances attending the practice of Biomedical Engineering.

BME 642 NAVIGATIONAL GUIDES FOR BIOMEDICAL PRODUCT DEVELOPMENT. (3)
This course teaches engineers how biomedical product designs are influenced by government regulations, economic issues, and ethical concerns.

BME 661 BIOMATERIALS SCIENCE AND ENGINEERING. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted materials, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq.: Undergraduate engineering degree or consent of instructor.

BME 662 TISSUE-IMPLANT INTERFACE. (3)
Study of the interface between implants and host tissues from both the materials and biological perspective. Structure of the tissue-implant interface; surface characterization of biomaterials; protein adsorption; mechanisms of cell responses; the methods for controlling the tissue-implant interface, with emphasis on orthopedic and cardiovascular applications. Prereq.: BME 661 or consent of instructor.

BME 670 BIOSOLID MECHANICS. (3)
Application of laws of mechanics to study the behavior of human organ systems. Stress-strain analysis of soft and hard body tissues with emphasis on pulmonary and musculoskeletal systems. Viscoelastic properties. Prereq.: Undergraduate engineering degree or consent of instructor.

BME 672 MUSCULOSKELETAL BIOMECHANICS. (3)
Application of laws of mechanics to study behavior of human musculoskeletal system. Materials science of bone, muscle, tendon are integrated into static and dynamic analyses of isolated (e.g., foot, arm, and hand) and whole body segment. Prereq.: PGY 502, ME 330 or consent of instructor.

BME 685 BIOFLUID MECHANICS. (3)
Review of the rheology of circulatory processes in the body. Special emphasis on cardiovascular dynamics: pulsatile pressure and flow, vascular impedance, wave propagation/reflection, cardiac dynamics. Special topics. Lecture, three hours with periodic lab demonstrations. Prereq.: Undergraduate engineering degree or consent of instructor.

BME 690 RESEARCH IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Individual study related to a special research project. Intended for M.S. candidates who want a research project experience independent of their M.S. thesis work. This course cannot be used to satisfy residency credit requirements. Lecture, 1-3 hours; laboratory, 3-6 hours per week. May be repeated to a maximum of six credits. Prereq.: Consent of instructor and graduate standing in BME.

BME 699 SPECIAL TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Special topics in biomedical engineering, addressed primarily in a lecture/discussion format. Presentation of focussed or specialized topics that are not available in standard courses. Lecture, three hours; laboratory 0-2 hours per week. May be repeated to a maximum of nine credits. Prereq.: Consent of instructor and graduate standing in BME.

BME 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq.: All course work toward the degree must be completed.

BME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq.: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

BME 766 MANAGEMENT OF TECHNOLOGY. (3)
Successfulness in developing new technologies relies upon knowing which technology advance, the ultimate scientific limits of that technology, and the forecasted rate of technological change. This course presents curricula that explore the direction of technological change and how this affects the rate and extent of innovation.

BME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BME 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BME 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

BME 772 SEMINAR. (0)
Review of current literature in the field of biomedical engineering, general discussion and presentation of papers on research in biomedical engineering. Lecture, one hour per week. Required for all graduate students in biomedical engineering.

BME 774 GRADUATE BME SEMINAR. (0-1)
Scientists and engineers present current research in biomedical engineering. Students are required to prepare for and deliver a seminar on their own research. May be repeated to a maximum of 4 credits. Prereq.: Graduate standing in Biomedical Engineering or consent of instructor.

BME 777 ADVANCED STUDY PROJECT. (3)
This is an independent study project, topic to be selected in consultation with the instructor. Purpose is to integrate all materials learned in the program and apply these principles to the solution of an actual problem in biomedical engineering technology. Prereq.: Permission of instructor and completion of year 1 of 1PBM studies.

BME 781 SPECIAL PROBLEMS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Discussion of advanced and current topics in biomedical engineering. Individual work on research problems of current interest. May be repeated to a maximum of nine credits. Lecture/ laboratory hours, variable. Prereq.: Approval of instructor.

BME 790 RESEARCH IN BIOMEDICAL ENGINEERING. (1-9)
Graduate research in any area of biomedical engineering, subject to approval of the Director of Graduate Studies. May be repeated to a maximum of nine hours. Prereq.: Consent of the Director of Graduate Studies.

BMI Biomedical Informatics

BMI 633 INTRODUCTION TO BIOINFORMATICS. (3)
This is an introductory course aimed at a multi-disciplinary audience with an interest in applying the principles of information sciences for obtaining insight into biological processes and systems that can eventually be used to make informed decisions.

BMI 730 PRINCIPLES OF CLINICAL INFORMATICS. (3)
This course offers an overview of Clinical informatics, which is the application of informatics principles, methods, and tools to support healthcare practice and research activities as well as business processes.

BMI 731 BIOMEDICAL INFORMATION RETRIEVAL. (3)
This class is an introductory information retrieval class that is focused on biomedical information search engines. Basic IR concepts such index construction, optimization, visualization, and evaluation will be covered. In addition to core IR contexts, students will have an opportunity to learn about search engines, web crawling, and some Web 2.0 technologies based on hands-on exercises and assignments with a focus on techniques that can be used to access, retrieve, organize, and present information. Students will employ an open source indexing engine (e.g., Lemur or Lucene or something similar) to understand how back-end of retrieval engine is effectively and efficiently structured.

BMI 732 BIOMEDICAL ONTOLOGIES AND SEMANTIC WEB TECHNIQUES. (3)
This course is a conceptual introduction to biomedical ontologies and ontological modeling in biomedicine throughSemantic Web techniques. Students will learn about RDF, OWL, description logics, and SPARQL and their role in designing ontologies. Biomedical terminologies such as GO, ICD-9/10, SNOMED-CT, and MeSH will be discussed as case studies. Prereq.: MA 123 (or equivalent) or consent of the instructor.

BMI 733 BIOMEDICAL NATURAL LANGUAGE PROCESSING. (3)
This course is a technical introduction to the area of biomedical natural language processing (NLP). In the field of biomedical informatics, this focuses on the common steps in extracting information from textual data that arises from biomedical literature and clinical documents. Topics involve n-gram models, tokenization, POS tagging, and parsing. Preq.: MA 123 (or equivalent) or consent of instructor.

BMI 734 INTRODUCTION TO BIOMEDICAL IMAGE ANALYSIS. (3)
This class aims to give students a broad overview of biomedical image analysis and imaging informatics. We will introduce the state-of-the-art knowledge to understand, develop, and apply existing methods and software to handle biomedical image data to extract quantitative metrics.
INTRODUCTION TO BIOIMAGINE INFORMATICS. (3)
This course provides an introduction to searching and retrieval in biomedical image analysis and imaging informatics, including search engine design and advanced biomedical image analysis, searching, and retrieval algorithm for fast and efficient image searching and retrieval. Prereq: BMI 734: Introduction to Biomedical Image Analysis.

BMI 735 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (3)
This course will introduce students to the processes involved in the development and implementation of a research protocol. Students will be introduced to key aspects of the leadership, communication and team work involved in interdisciplinarian research. Students will also be introduced to the structure and functioning of the NIH and the NIH grant application and review process. Finally, students will apply their knowledge regarding the research methods and technologies of clinical and translational science to develop an NIH-format research grant application that addresses a research topic in their own area of interest. This course is intended for advanced graduate or professional students pursuing focused research training in one of the degree or certificate programs available in clinical and translational science. It is expected students will have completed the course in Methods and Technologies in Clinical & Translational Science (BSC 731) prior to this course. Prereq: BSC 731 and graduate standing in the clinical and translational science program.

BMI 736 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)
This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as CPH 841.)

BSC 620 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)
This course is designed to critically examine undeniable inequities in the distribution of health and disease in the United States and their international perspectives from social and biomedical sciences. Prereq: Graduate studies in the health fields.

BSC 625 FUNDAMENTALS OF BIOSTATISTICS FOR CLINICAL AND TRANSLATIONAL SCIENCE. (3)
This course is designed to support clinical and translational science students in acquiring an applied understanding of the biostatistical tools and techniques commonly used in the conduct of clinical and translational science research. Through a combination of lectures, readings, demonstrations, discussions, and self-study modules, students will understand and appreciate measurement and statistical challenges that are common to clinical and translational science. Study design, selection of independent and dependent variables, and the selection and use of statistical techniques will be the focus of the course. The course activities are intended to promote the application of biostatistics to research concepts in the students’ areas of interest and to foster practical knowledge that supports students’ own research agendas. The diverse interests and experiences of students and faculty offer opportunities to learn from each other. Prereq: This course is designed for scholars pursuing research training in clinical and translational science to integrate and apply knowledge obtained in previous training. Permission is required from the Course Director for entry into the class.

BSC 626 SURVEY OF HEALTH PSYCHOLOGY. (3)
A survey of the field of health psychology. It will explore the ways in which social and psychological research contribute to an understanding of health and illness behavior. Prereq: Graduate or professional standing and consent of instructor. (Same as PSY 626.)

BSC 731 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE. (3)
This overview course is designed to introduce the student to the major methods and technologies of clinical and translational science (CTS) with an emphasis on human subjects research. Students learn these core methodologies through classroom discussions, readings, and written portfolio activities that challenge them to apply methodologies to their own areas of research interest. Specifically, the course teaches students to formulate research questions and write literature reviews; apply CTS research methods, including experimental, survey, and qualitative research methodologies, to diverse areas of research by aligning appropriate methodologies to research questions of interest, and enhance interdisciplinary communication skills. It is assumed that students are engaged in research that is consistent with CTS or will become engaged in such research in the near future. Prereq: Graduate standing. Permission is required from the Course Director for entry into the class.

BSC 732 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (3)
This course will introduce students to the processes involved in the development and implementation of a research protocol. Students will be introduced to key aspects of the leadership, communication and team work involved in interdisciplinarian research. Students will also be introduced to the structure and functioning of the NIH and the NIH grant application and review process. Finally, students will apply their knowledge regarding the research methods and technologies of clinical and translational science to develop an NIH-format research grant application that addresses a research topic in their own area of interest. This course is intended for advanced graduate or professional students pursuing focused research training in one of the degree or certificate programs available in clinical and translational science. It is expected students will have completed the course in Methods and Technologies in Clinical & Translational Science (BSC 731) prior to this course. Prereq: BSC 731 and graduate standing in the clinical and translational science program.
BSC 765 RESEARCH PROBLEMS IN MEDICAL ANTHROPOLOGY. (3)
(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as ANT 765.)

BSC 766 CONCEPTS IN MEDICAL SOCIOLOGY. (3)
A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to the concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as SOC 766.)

BSC 770 PSYCHOSOCIAL ISSUES IN HEALTH AND AGING. (3)
This course will focus on psychosocial issues related to the physical health and functioning of older adults. Topic areas include: theories of aging; age-appropriate research designs; age-related cognitive personality, social and family changes which influence physical health; health behavior and education of older adults; and selected chronic conditions, e.g. Alzheimer’s disease, arthritis, depression, diabetes and stroke. 

BSC 772 TOPICAL SEMINAR IN MEDICAL BEHAVIORAL SCIENCE. (1-3)
Advanced study of selected topics of current importance in medical behavioral science. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BSC 773 PSYCHOSOCIAL ONCOLOGY. (3)
This course will introduce the student to the field of psychosocial oncology. Historical and recent developments in the application of behavioral science knowledge and methodology to the understanding and treatment of cancer and the cancer patient will be examined. The role of psychosocial factors in the etiology, prevention, and treatment of cancer will be explored. Emphasis will be placed upon the interaction of biological, psychological, and social factors throughout the course of cancer. Prereq: Graduate standing.

BSC 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)
This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as ANT 774.)

BSC 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in women; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/SOC 776.)

BSC 777 SEMINAR IN MENTAL ILLNESS CONCEPTS, RESEARCH AND POLICY. (3)
An exploration of behavioral science concepts which bear on various physical illnesses. The perspective of the course is interdisciplinary, using concepts from the various behavioral science disciplines. Prereq: Consent of instructor.

BSC 779 BEHAVIORAL FACTORS IN DEATH AND DYING. (3)
Behavioral concepts are examined which explain reactions of individuals, collectivities and social institutions to the phenomenon of death. Prereq: Consent of instructor.

BSC 782 WOMEN’S HEALTH AND AGING. (3)
This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as GRN 782.)

BSC 785 COMPARATIVE HEALTH CARE SYSTEMS. (3)
BSC 850 ELECTIVE IN BEHAVIORAL SCIENCE
Approved electives:

BSC 814 PATIENTS, DENTISTS AND SOCIETY. (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as CDE 814.)

BSC 815 FIRST-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

BSC 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as CDE 824.)

BSC 825 SECOND-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

BSC 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

BSC 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as CDE 824.)

BSC 825 SECOND-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

BSC 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

BSC 850 ELECTIVE IN BEHAVIORAL SCIENCE
BSC 880 TREATMENT OF DENTAL FEAR

BST 330 STATISTICAL THINKING FOR POPULATION HEALTH. (3)
This course provides students with an introduction to statistical concepts that are important for solving real-world public health problems. This course will present statistical principles and associated scientific reasoning underlying public health practice and health policy decision making. Prereq: UK Core course in Quantitative Foundations.

BST 655 INTRODUCTION TO STATISTICAL GENETICS. (3)
BST 655 presents an introduction to the statistical methodologies used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used (and freely available) software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical human genetics literature. Prereq: STA 580 or equivalent. (Same as STA 655.)

BST 675 BIOMETRICS I. (4)
This course, the first of a two-semester sequence in biometrics, introduces probability, discrete random variables, continuous random variables, joint distributions, and sampling distributions. Prereq: STA 580 and MA 114 or equivalent.

BST 676 BIOMETRICS II. (4)
This course, the second of a two-semester sequence in biometrics, introduces techniques for constructing and evaluating point estimators, hypothesis testing procedures, and interval estimators. Prereq: BST 675.

BST 681 LINEAR REGRESSION. (3)
This course, the first in a two-semester sequence in regression modeling, covers linear regression models for normally distributed outcomes. The course will cover simple and multiple linear regression, estimation, interpretation, hypothesis testing, model building and diagnostics, matrix algebra for regression, and an introduction to design of experiments. The course will include the use of computing tools to apply these models to real data. Prereq: STA 580 or consent of instructor.

BST 682 GENERALIZED LINEAR MODELS. (3)
The course will cover the generalized linear model framework, multivariate maximum likelihood theory, logistic regression, Poisson regression, and nominal and ordinal logistic regression models, as well as approaches for building and checking these models. The course will include the use of computing tools to apply these models to real data. Prereq: BST 675, BST 681.

BST 693 STATISTICAL PRACTICE IN PUBLIC HEALTH. (3)
To provide an introduction to statistical practice in public health including improved statistical communication (how to ask good questions in a consulting setting, writing analysis plans, and how to express results both orally and in writing), programming for reproducibility and data ethics, and utilizing statistical methodology for problem solving in public health research. Prereq: CPH 630/STA 681 or equivalent and CPH 535 or equivalent.

University of Kentucky 2016-2017 Undergraduate Bulletin
Course Descriptions

BST 701 BAYESIAN MODELING IN BIOSTATISTICS. (3)
This course provides an introduction to Bayesian ideas and data analysis applied to the biosciences. The course illustrates current approaches to Bayesian modeling and computation in biostatistics. Prereq: BST 682 and BST 676 or equivalent.

BST 713 CLINICAL TRIALS. (3)
Design and analysis of Phase I-III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalence, mixed models, and meta analysis. Coreq: STA 603. (Same as STA 653.)

BST 740 SPATIAL STATISTICS. (3)
Course will cover risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case control studies, and based on regional counts, linking spatial exposure data to health events through regression modeling, Bayesian spatial analysis. Prereq: BST 682.

BST 761 TIME SERIES ANALYSIS. (3)

BST 762 LONGITUDINAL DATA ANALYSIS. (3)
This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models and an introduction to nonlinear models as they apply to the analysis of correlated data. Prereq: BST 682 and BST 676. (Same as STA 632.)

BST 763 ANALYSIS OF CATEGORICAL DATA. (3)
Multinomial and product-multinomial models; large-sample theory of estimation and testing, Pearson chi-square and modified chi-square statistics, Pearson-Fisher Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as STA 665.)

BST 764 APPLIED STATISTICAL MODELING FOR MEDICINE AND PUBLIC HEALTH. (3)
This course introduces some useful statistical models not typically encountered in the core courses of the master's or doctoral biostatistics curriculum. These include finite mixture models, nonparametric regression models, covariance-based models, and stochastic models. Prereq: BST 682 and BST 676.

BST 765 MISSING DATA METHODOLOGY FOR PUBLIC HEALTH. (3)
This course surveys methods for analyzing data with missing observations. This includes methods for data missing completely at random including hot deck and cold deck, mean substitution, and single imputation; methods for data missing at random including multiple imputation and weighted estimating equations and methods for data missing not at random including pattern mixture models, selection models, and shared random effects models. Prereq: BST 676 and BST 762.

BST 766 ANALYSIS OF TEMPORAL DATA IN PUBLIC HEALTH. (3)
This course surveys methods for analyzing public health data collected over time. Methods covered include smoothing time series data, the modeling of stationary time series for Gaussian distributions and hazard functions. Time to event analysis using Kaplan-Meier method and life-table method. Accelerated failure time model, logit model for discrete data, complimentary log-log model, and proportional hazards model. Tests for goodness-of-fit, graphical methods, and residual and influence statistics. Time-dependent covariates, non-proportional hazards, left truncation, and late entry into the risk set. Sample size and power, competing risks, and time to event analysis with missing data. Prereq: STA 580 or equivalent.

BTH Bioethics

BTH 405 BIOETHICS ON FILM. (1-3)
The objectives of this course are to use a variety of films (some documentaries) to examine core bioethics issues and principles comprising Autonomy, Beneficence, Non-Maleficence and Justice. Core concepts in Professionalism and Humanism will also be explored. The films selected help to illustrate complex bioethics issues within our current social and medical constructs.

CDE Community Dentistry

CDE 814 PATIENTS, DENTISTS AND SOCIETY. (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as BSC 814.)

CDE 815 FUNDAMENTALS OF DENTAL PUBLIC HEALTH. (2)
Fundamentals of Dental Public Health is a first-year course designed to introduce student dentists to the dental specialty of Dental Public Health, to dental epidemiological concepts, terminology, and methods used in population-based health care. Community oral health problems in Kentucky and the United States will be reviewed. Emphasis will be placed on public health research, program evaluation, and outcomes evaluation strategies related to oral disease in populations. Lecture, 28 hours; laboratory, 3 hours.

CDE 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as BSC 824.)

CDE 830 ADVANCED CONCEPTS IN DENTAL PUBLIC HEALTH. (1)
Advanced Concepts in Dental Public Health is a third year course designed to help students develop the perspective and sensitivities of dentists practicing in the community. It examines the external environment and various factors that influence the oral health of the community including barriers to care. Financing mechanisms and workforce issues will be discussed. To provide a framework for the dental student’s professional development, the instructional content builds on the concepts acquired in the first year introductory course in dental public health and presents concepts that will help the student dentist prepare for the Community-Based Dental Education Program. (CDE 841). Course material is organized around current societal and dental health issues and health care delivery system trends in Kentucky and the United States. These issues and trends will be examined in the context of current national debates concerning access to oral health prevention and care for high risk populations and the associated health disparities to these populations. Prereq: Admission to College of Dentistry or consent of course director.

CDE 840 ADVANCED COURSE ON THE TREATMENT OF SPECIAL PATIENTS. (1)
In this course, dental students participate in preclinical seminars and dental treatment of mentally, medically and physically handicapped patients. Several phases of dental treatment of the special patient, such as sedation and general anesthesia, pharmacological evaluation and preventive dentistry, are covered. The course is individually designed based on the student’s interest in treating compromised patients. Note: Scheduling for this course will take place outside of regularly scheduled clinic/class time. Enrollment minimum is one and maximum enrollment is four. Prereq: Fourth-year standing, consent of Course Director, Academic Performance Committee (APC), and Team Leader.

CDE 841 DENTAL PRACTICE FIELD EXPERIENCE. (6-10)
Students are provided a full-time, off-campus assignment to a dental practice environment for a period of 6-10 weeks. Students spend an average of 32 hours each week participating in practice management and patient treatment activities under the supervision of a dentist. Approximately eight hours a week are spent in career plan development and in study of the community or region, particular its health care delivery system and the role of dentistry in that system. Prereq: CDE 830.

CDE 844 DENTAL PRACTICE MANAGEMENT II. (4)
This course is primarily designed to give the student dentists, prior to graduation, practical, useful knowledge on establishing and maintaining a private dental practice. The course will be presented in an active learning format. Course sessions and activities will include special sessions designed to introduce students to the current environment of dental practice, to organized dentistry in Kentucky, to the College’s Alumni Association and to new developments and continuing education in the dental profession. Lecture 69 hours. Prereq: CDE 830 or consent of course director.

CDE 850 EXTRAMURAL EXPERIENCES FOR STUDENT DENTISTS. (1-6)
This course is designed to provide second and/or third-year student dentists an experiential learning experience in a research program, clinical program, public health program, and/or institutional dental program. Career planning and service-learning are emphasized and coordinated with placement in a community-based site. Fourth year students may also participate in elective experiences with the approval of the Academic Performance Committee (APC). Students learn by active participation in patient care and research, by observation and by discussion with mentors. Discussions and interviews with patients and dental residents and staff are also encouraged. This course provides an opportunity for selected students, based on their own career goals, to participate in short-term elective dental educational experience external to the students dentists’ clinical. While the sites vary greatly, most experiences include some patient care experiences (observation, assisting, direct participation in patient care under the direct supervision of an approved mentor). Extramural experiences are customized for each student dentist. If completed as an elective in Year 3 of the curriculum this does not satisfy the Year 4 elective requirement. Prereq: Getting a passing score on the National Boards.

CDE 855 PUBLIC HEALTH DENTISTRY FIELD EXPERIENCE. (1-2)
This course allows implementation of oral health promotion programs designed in CDE 830 in community settings. Prereq: Must be fourth year dental student.

CDE 880 TREATMENT OF DENTAL FEAR. (1)
This advanced course in the treatment of dental fear is intended to prepare the student to manage very fearful dental patients. Topics covered include etiologies, diagnosis and types, relaxation and distraction, and case histories. Note: Scheduling for the course will take place outside of regularly scheduled clinic/class time. Prereq: CDS 823 and consent of course director. (Same as BSC 880.)
CDS 683 COMMUNITY-BASED SERVICE ELECTIVE.  (1-5)
This Community-Based Service elective is designed to give students greater opportunities to provide dental services to diverse, underserved populations. The goals of this course are to expand development of a service ethic and to meet some of the needs of populations who do not have access to dental care. The majority of the time requirements for this course will be rotations to community clinics where students will work under the supervision of a College of Dentistry faculty providing dental services. Individual contracts will be developed with participating students to determine credit hours. In addition, there will be two one-hour seminars to discuss and debrief on the experiences of participating students. Prereq: Completion of year two of dental school curriculum and/or approval of College of Dentistry APC.

CDS 684 INTERNATIONAL ELECTIVE.  (1-3)
This community-based service learning elective is designed to afford students greater opportunities to provide a broad spectrum of dental educational, clinical and public health services to diverse, underserved populations in an international setting. The majority of the time requirements for this course will be in a foreign country at designated community sites potentially working with other health care professionals. Activities will include but are not limited to assessing both community and patient needs and providing services based on the needs assessment and community goals. Students will work with UK approved organizations and under the direct supervision of a College of Dentistry faculty while in-country. Prereq: Admission to College of Dentistry.

CDS 611 CHILD GROWTH AND DEVELOPMENT PART I.  (2)
A seminar course on nature and physiologic control of physical growth, for graduate students in dentistry. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 612 CHILD GROWTH AND DEVELOPMENT PART II.  (2)
A seminar course for graduate students in dentistry covering emotional and intellectual growth of children, and diseases and congenital anomalies of children. Prereq: Admission to graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 613 CONTEMPORARY LEADERSHIP IN DENTISTRY.  (1)
The course will explore the current leadership dilemma in the health professions (specifically). The purpose is to prompt the extension of the role of oral health professionals to serve as leaders who engage a richer “public good” agenda as part of their role as doctor/teacher. The course will concentrate on important issues such as leadership development and theories of leadership; team building; personality preferences and leadership; peer assessment; transformational and transactional leadership; stress management; leadership change; negotiation; and giving and receiving feedback. Prereq: Enrollment in one of the College of Dentistry’s post-doctoral programs.

CDS 631 DIAGNOSIS AND MANAGEMENT OF TEMPOROMANDIBULAR DISORDERS AND OROFACIAL PAIN.  (1)
This course provides information regarding the normal anatomy and function of the masticatory system and then highlights some of the common disorders related to dysfunction of this system. Emphasis is placed on temporomandibular disorders and how they are identified and managed in the clinical practice. Other disorders associated with orofacial pain complaints will be discussed so that students are able to identify these conditions and successfully manage them or refer the patients to the appropriate health care provider. Prereq: Admission to dental graduate program; D.D.S. or D.M.D. degree.

CDS 660 RESEARCH DESIGN, METHODS AND DISSEMINATION.  (2)
This lecture/seminar course is designed to provide students with an overview of the basic principles of study design and protocol development, with a focus on clinical and translational research. It also is designed to expose students to the interplay between patient care and clinical/translational research and to provide the students with tools that will assist them in dissemination of their research findings. Prereq: Admission to dental graduate program.

CDS 670 ADVANCES IN ORAL AND MAXILLOFACIAL PATHOLOGY.  (1)
This course consists of 16 hours of lecture on the major disease topics in Oral and Maxillofacial Pathology including oral mucosal, salivary gland and bone pathology. Current classifications of these major categories will be presented and selected topics of current importance will be discussed. Prereq: Admission to dental graduate program.

CDS 680 CLINICAL MEDICINE FOR POSTGRADUATE DENTAL STUDENTS.  (2)
This course is designed to provide graduate students and dental residents with an advanced understanding of how various medical disorders and medical therapies can affect oral health and the delivery of dental care. Prereq: Admission to dental graduate program.

CDS 748 MASTER’S THESIS RESEARCH.  (0-6)
Half-time or full-time research. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CDS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.  (1-6)
May be repeated to a maximum of 12 hours.

CDS 820 NEW DEVELOPMENTS IN DENTISTRY.  (1)

CDS 821 LOCAL ANESTHESIA.  (1)
The action and dosage of local anesthetic agents used in dentistry are taught as they are the proper injection techniques. The technique of venipuncture and administration of intravenous drugs are also included. Patient evaluation and emergency techniques for cardiac and respiratory resuscitation are reviewed. Lecture, six hours; self-instruction, 16 hours; clinic, five hours. Prereq: ANA 534.

CDS 822 GERONTOLOGY/GERIATRIC DENTISTRY.  (1)
This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

CDS 823 MANAGEMENT II: PATIENT COMMUNICATION.  (1)
The primary purpose of this course is to improve students’ ability to interact with patients in an empathetic and professional manner. Proper management of all assigned patients is required. Instruction leading to recertification in cardiopulmonary resuscitation will be included. Lecture, 26 hours. Prereq: CDS 821 or consent of course director.

CDS 824 ORAL DIAGNOSIS AND TREATMENT PLANNING.  (1)
The purpose of this course is to prepare the student for clinical dentistry by presenting techniques of examination and diagnostic procedures that ultimately lead to diagnosis and treatment planning. CDS 824 consists of lectures, interactive case presentations, clinic exercises, out-of-class assignments, handouts, self-study time, and website utilization. Contact hours 10. Prereq: ODM 814 or consent of course director.

CDS 828 THE PROFESSION OF DENTISTRY.  (1)
This course focuses on ethical practice in clinical dentistry. In the life of a health-care clinician circumstances arise daily which are ethical in nature. The dentist, and the patient, must respond to these circumstances in ways that result in the best for all parties concerned. This course will...
Course Descriptions

**CDS 820 SPECIAL TOPICS IN DENTISTRY III.** (1)
This course is the second year of the two year longitudinal core curriculum in Interprofessional HealthCare education. The course focuses primarily on team approaches to patient quality and safety and issues surrounding transitions in settings of patient care. Background information is presented through BlackBoard and students then meet in several interprofessional groups for discussions and completion of a group capstone project. There are also two required named lectures and one session on Evidence Based Dentistry (EBD). Seminar, 16 hours. Prereq: CDS 819.

**CDS 830 NEW DEVELOPMENTS IN DENTISTRY III.** (1-2)
This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. When offered, this course will be required of third-year dental students. May be repeated to a maximum of four credits. Prereq: Third-year standing in the College of Dentistry; any course prerequisites will be announced.

**CDS 831 CONSCIOUS SEDATION.** (1)
This course is designed to teach the principles of nitrous oxide-oxygen inhalation sedation and intravenous sedation in dentistry. The management of emergencies associated with these techniques and an introduction to the principles of general anesthesia are also included. Lecture, 21 hours; clinic, four hours. Prereq: CDS 821.

**CDS 833 CLINICAL PATIENT MANAGEMENT.** (1)
This course introduces the dental student to various special needs conditions and teaches the proper methods of physical management of special needs patients needed to provide dental care. Properly assigned to all assigned dental patients is required. Instruction leading to recertification in cardiopulmonary resuscitation is also included. Lecture, 26 hours; laboratory, 3 hours; clinic, 3 hours per term. Prereq: CDS 823.

**CDS 835 DENTAL IMPLANTOLOGY.** (2)
Dental implantology has become an integral part of dental services. This course contains information on patient centered criteria for implant services, surgical considerations, and prosthetically driven treatment results. The student will have the opportunity to familiarize himself with the components used in providing such treatment through a hands-on laboratory session. Lecture, 24 hours; laboratory, 12 hours. Prereq: Admission to College of Dentistry or discretion of course director.

**CDS 838 THE PROFESSION OF DENTISTRY III.** (1)
This course is an introduction to the issues of justice and how we define, appropriate, and ensure justice today. The ethical principle of justice is the touchstone for American law, and a vision for our judiciary system. While dentists, as members of society, comply with laws in a way common to all other citizens, they also have additional legal responsibilities which derive from the unique relationship dentist and dentists have with society generally and patient specifically. This course will explore the relationship of dentistry to society and attempt to explicate further the nature of professional responsibility. In so doing, the major question will be, “How do society and dentistry interact for the good of the public and the profession?” Prereq: Approval of dean and/or his designee for academic affairs and the course director.

**CDS 840 NEW DEVELOPMENTS IN DENTISTRY IV.**

* CDS 843 MANAGEMENT IV: GERIATIC DENTISTRY. (2)
Emphasis in this course is placed on developing abilities to make individual treatment decisions for elderly dental patients and acquiring positive attitudes towards the provision of oral health care to the aged. Students will make site visits to residential centers for the elderly. Proper management of all assigned dental patients and instruction leading to recertification in cardiopulmonary resuscitation are also included. Lecture, 23 hours; laboratory, 12 hours. Prereq: CDS 833 or consent of course director.

**CDS 844 DRUG MISUSE, ABUSE AND DEPENDENCY: WHAT DENTISTS NEED TO KNOW.** (1)
This course is designed to provide new insights and understanding into prevention, recognition and treatment of patients with, and at risk for, drug misuse and abuse. The course enables dental students to understand addiction as primary, chronic and progressive disease and to demonstrate an understanding of the pharmacology, abuse potential, as well as the behavioral and physiological effects of the commonly abused drugs. Emphasis will be on increasing dental students skills and abilities to recognize the signs and symptoms of drug abuse; identify and manage patients at risk for drug problems; and become effective in providing successful care for drug dependent patients while minimizing their potential for relapse.

**CDS 846 DIAGNOSIS AND MANAGEMENT OF OROFACIAL PAIN.** (3)
This course focuses on the diagnosis and management of orofacial pain and temporomandibular disorders. The course will consist of lectures and one laboratory session. The information provided in this course will allow the student to understand the dentist’s role in managing complex orofacial pain problems. The area of temporomandibular disorders will be emphasized since the dentist plays a major role in managing these pain disorders. Lecture, 45 hours; laboratory, 3 hours. Prereq: ANA 534, OSGI 820, and RSD 822.

**CDS 860 SPECIAL TOPICS IN ORAL HEALTH.** (1-3)
This course will engage students in a variety of activities including lectures, independent literature review and preparing community-based projects, and individual or small group discussions to address current topics of special interest of concern in oral health. Projects and discussion areas for students participating in an interdisciplinary colloquium will be developed in conjunction with other health care providers. Prereq: Enrollment in the College of Dentistry; approval of the course director.

**CDS 863 EXPLORING DENTAL TEACHING ELECTIVE.** (1)
This course will provide dental students who have an interest in teaching an opportunity to learn about being a dental faculty member in a systematic way. This course will educate dental students on two main subjects: 1) Roles, responsibilities, and opportunities for dental educators in an academic institution, and 2) Effective teaching in the classroom and clinic. Lecture, 16 hours. Prereq: Open to all 4th year dental students. Open to 3rd year dental students with permission of the course director and the Academic Performance Committee.

**CDS 865 FORENSIC ODONTOLOGY.** (1)
Elective introductory course in forensic dentistry for fourth year dental students. Prereq: Must be fourth year dental student.

**CDS 881 MAXILLOFACIAL DISEASE FOR THE HEALTH CARE PROFESSIONAL.** (1)
Designed for motivated 4th year medical students who want to understand more about Hospice and Palliative Care. This rotation will present students with a multidisciplinary approach to caring for patients by working with doctors, nurses, home health care providers and chaplains. Prereq: MD 836/837 or consent of course director. (Same as SUR 875.)

**CDS 885 ADVANCED DENTAL IMPLANTOLOGY ELECTIVE.** (1)
Dental Implantology has become an integral part of dental services. This course contains information on patient centered criteria for advanced implant services, advanced surgical considerations, and advanced prosthodontically driven treatment results. Additional topics include treatment planning for the implant patient, the various types of restorative and reconstructive complications related to implant dentistry, esthetic consideration for implant restorations, immediate implant placement and immediate provisionalization, and immediate/early loading protocols will be discussed. The student will have the opportunity to familiarize him/herself with multiple implant systems and multiple implant placement protocols. The student will have the opportunity to have literature reviews on most current techniques and products. 12 hours Lecture, 8 hours Laboratory. Prereq: Successful completion of CDS 835.

---

**CE Civil Engineering**

**CE 106 COMPUTER GRAPHICS AND COMMUNICATION.** (3)
Introduction to the use of scale, dimensioning, and orthographic projections. Graphical solution of spatial problems. Integrated application of computer graphics. Lecture, two hours; laboratory, four hours per week. Prereq or coreq: MA 113 or consent of instructor.

**CE 120 INTRODUCTION TO CIVIL ENGINEERING.** (1)
An introduction to the civil engineering profession and the use of computer hardware and software in CE systems analysis and design. Presentations will be used to illustrate the concept, design, construction and operation processes. Sample problems and class exercises on the various technical areas of civil engineering will make use of existing computer software packages and teamwork principles.

**CE 195 INDEPENDENT WORK IN PRE-CIVIL ENGINEERING.** (0-4)
Independent or make-up work for lower division engineering students in the field of civil engineering. May be repeated for a maximum of four credit hours. Prereq: Admission to the College of Engineering and consent of department chair or DUS, and the instructor.

**CE 211 SURVEYING.** (4)
A comprehensive course in the art and science of surveying as applied to civil engineering, including the use and care of surveying instruments; measurement of horizontal and vertical distances, angles and directions; collection of ground and underground data for the design and layout of roads, buildings, various mineral workings and other structures; and some aspects of the precise determination of position and direction for survey control. Lecture, three hours, laboratory, three hours per week. Prereq or coreq: CE 106; prereq: MA 114.

**CE 221 APPLIED UNCERTAINTY AND RISK ANALYSIS IN CIVIL ENGINEERING.** (3)
An introduction to the applications of uncertainty, reliability, decision, and risk analysis in civil engineering. Data collection, systems analysis, and civil engineering design under uncertainty. Probabilistic analysis of the various areas of civil engineering: geotechnical, transportation, environmental, materials, structural, hydraulic, and water resources engineering. Civil engineering systems governed by random processes. Applications of mathematics software, Monte Carlo simulation, and time series in civil engineering. Prereq: MA 114.

**CE 303 INTRODUCTION TO CONSTRUCTION ENGINEERING.** (3)
The study of the planning, administration, management, and cost of construction projects and an introduction to the methodology utilized in executing specific design. Emphasis is placed on the preparation of construction firm’s development of various areas of construction documents, theory of engineering economics, estimating and quantity take-off, contractual and management systems, scheduling, project administration, and inspection of construction operations. Prereq: CE 106 and engineering standing.
CE 329 CIVIL ENGINEERING COMMUNICATIONS AND TEAMS LAB. (1)
The class focuses on presenting the proper tools and techniques for oral presentations, identifying the requirements for proper technical writing, and providing students with the means to effectively work within a team environment. Prereq: CIS 111 Comp and Comm II; Engineering standing.

CE 331 TRANSPORTATION ENGINEERING. (3)

CE 341 INTRODUCTION TO FLUID MECHANICS. (4)
Fundamental principles of thermodynamics and fluid flow. Includes fluids at rest, fluids in motion. Continuity, momentum and energy relations, ideal and viscous fluids. Emphasis on incompressible fluids. Description of pumps and open channels. Prereq: PHY 231 and MA 214 and engineering standing.

CE 351 INTRODUCTION TO ENVIRONMENTAL ENGINEERING. (3)
Overview of environmental chemistry and microbiology, water quality, water and wastewater treatment, solid and hazardous wastes management, hazardous waste remediation, and air pollution control. Emphasis on the basic science and engineering principles required to understand both natural and engineered systems, as well as the engineering approach to understanding the natural environment and specific treatment mitigation methods. Prereq: CHE 107, MA 214, PHY 231, and engineering standing.

CE 381 CIVIL ENGINEERING MATERIALS I. (3)
A study of the microscopic and macroscopic structures and properties of materials used in civil engineering construction with emphasis on the relationships of their physical and mechanical properties to engineering design and application. Written reports and oral presentation of results will be required. Lecture, two hours; laboratory, three hours per week. Coreq: EM 302 and engineering standing.

CE 382 STRUCTURAL ANALYSIS. (3)

CE 395 INDEPENDENT WORK IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Engineering standing, consent of department chairman and the instructor.

CE 399 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 399 number. Prereq: Variable; given when topic identified and registration in the College of Engineering.

CE 401 SEMINAR. (1)
A discussion of the ethical and professional aspects of civil engineering practice. Concepts of loss prevention and conflict resolution. Structured small group discussion, oral presentations, and role playing. Lecture, two hours per week. Prereq: Senior classification and engineering standing.

CE 403 CONSTRUCTION METHODOLOGY. (3)
A study of the methodology used in construction, with an emphasis on the selection and application of resources: labor, materials, equipment, money and time. The importance of cost and quality is stressed. Weekly lab periods are used to acquaint the student with actual construction documents and to provide supervised work sessions in plan reading and basic estimating. Lecture, two hours; laboratory, three hours per week. Prereq: CE 303, CE 381, and engineering standing.

CE 429 CIVIL ENGINEERING SYSTEMS DESIGN. (3)
The course is designed to provide the graduating civil engineer with an integration of professional practice issues with planning, design, and construction. Topics to be covered will include: development of teaming, problem solving, and decision-making skills; development of written and oral technical communication skills; procurement of professional services; integration of planning, design, and construction activities; integration of environmental, legal, political, and social issues and concerns into the project process. All activities will be conducted in teams. Lecture, three hours; laboratory three hours per week. Prereq: To be taken during the student’s last semester.

CE 433 RAILWAY OPERATIONS AND MULTI-MODAL TRANSPORTATION. (3)
Study of the transportation engineering aspects of efficient management of railway freight, passenger and intermodal operations and the relationships to the other major transport modes—water, highway, air, pipeline and overland conveyer. Prereq: CE 331 and engineering standing.

CE 451 WATER AND WASTEWATER TREATMENT. (3)
Fundamentals of the design and operation of water and wastewater treatment facilities. Prereq: CE 341, CE 351, and engineering standing or consent of instructor.

CE 460 FUNDAMENTALS OF GROUNDWATER HYDROLOGY. (3)
The first course in the physics of saturated flow in porous media. Topics include groundwater occurrence, Darcian flow, well hydraulics, flow nets, layered systems flow and pollutant movement. Prereq: ME 330 or CE 341 or consent of instructor, and engineering standing. (Same as BAE 438G.)

CE 461 WATER RESOURCES ENGINEERING. (4)
A hydrological and hydraulic study of the laws governing the occurrence, distribution, and movement of water in watershed systems. Meteorological considerations, precipitation, evaporation, infiltration, streamflow, hydrograph analysis, flood routing, open channel hydraulics, culvert design, pump systems, groundwater flow, and frequency analysis. Prereq: CE 341 and engineering standing or consent of instructor.

CE 471G SOIL MECHANICS. (4)
A study of the strength, deformation and hydraulic properties of soils and their relationship to settlement, stress distribution, earth pressure, bearing capacity and slope stability. Design of footing foundations and retaining walls. Written and oral presentations of student projects will be required. Lecture, three hours; laboratory, three hours per week. Prereq: EM 302; prereq or concur: GLY 220; and engineering standing or consent of instructor.

CE 482 ELEMENTARY STRUCTURAL DESIGN. (3)
Application of principles of solid mechanics to the design of steel, timber, and reinforced concrete members and structures. Emphasis on basic ideas and their application to practical design of relatively simple structures according to the building code. Credit may not be used to satisfy degree requirements if credit is earned in CE 485G, or CE 486G, or CE 487G. Prereq: CE 382 and engineering standing.

CE 486G REINFORCED CONCRETE STRUCTURES. (3)
Theory and design of beams, slabs, girders and columns as related to building frames and bridges. Introduction to pre-stressed concrete, elastic design and ultimate strength design. Concur: CE 487G; prereq: CE 382 and engineering standing, or consent of instructor.

CE 487G STEEL STRUCTURES. (3)
Behavior, analysis, and design of compression members, laterally braced and unbraced beams, beam-columns, composite beams, tension members, directly loaded bolted and welded connections, and column base plates. Evaluation of frame stability. Prereq: CE 382 and engineering standing, or consent of instructor.

CE 499 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
Spots a special topic of current interest in civil engineering. May be repeated to a maximum of eight credits, but not more than four credits may be earned under the same subtitle. A particular topic may be offered at most twice under the CE 499 number. May be counted as technical or design elective with consent of instructor. Prereq: Variable; given when topic is identified, plus engineering standing.

CE 507 CONSTRUCTION SAFETY AND HEALTH. (3)
The course will develop an understanding of safety and health, and risk analyses; psychological factors of organizational culture and climate; design safe work procedures for the execution of particular types of work; and individual versus management level improvement in safety and health procedures in the construction process. Prereq: Engineering standing and CE 303 or consent of instructor.

CE 508 DESIGN AND OPTIMIZATION OF CONSTRUCTION OPERATIONS. (3)
The course critically examines repetitive operations that occur from project to project and the deterministic approaches used to design and optimize their effectiveness. Scientific techniques used to field measure the efficiency of construction operations are also examined. The primary metrics used to optimization include cost, schedule, and sustainability. Prereq: CE 303, CE 381, and engineering standing or graduate standing.

CE 509 CONTROL OF THE CONSTRUCTION PROJECT. (3)
This course investigates the principles and practices for the control of budget and schedule for construction projects. Topics studied include: estimating construction costs and developing a project budget, planning construction operations and developing a project schedule, documenting and reporting of project progress and spending, and the management of change of contract amount, contracttime, and contract scope work. Prereq or coreq: CE 508 or consent of instructor.

CE 517 BOUNDARY LOCATION PRINCIPLES. (3)
Procedures for locating or relocating the boundaries of real property; records searching, technical aspects of field work, prepartion of descriptions and survey reports, land data systems, legal aspects, special problems. Prereq: CE 211, engineering standing, or consent of instructor.

CE 518 ADVANCED SURVEYING.

CE 521 ENGINEERING ECONOMY.
Course Descriptions

CE 525 CIVIL ENGINEERING APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS. (3) CE 525 focuses on GIS as a tool in Civil Engineering. The terms and concepts related to Geographic Information Systems are introduced. The management of spatial databases, particularly those related to Civil Engineering, is covered. Students will collect data using a Global Positioning System (GPS). Students will be required to use the GIS ArcInfo to solve a specific individual spatial problem that they propose based on several Civil Engineering databases available to them. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and one of the following: CE 331, CE 341, or CE 471G.

CE 531 GEOMETRIC DESIGN AND OPERATIONS OF ROADWAYS. (3) Analysis of transportation facilities through a diagnostic study of transportation systems with emphasis on design, capacity and safety. Engineering practice oriented toward open-ended design solutions, mostly focused on roadway design. Prereq: CE 211, CE 331, and engineering standing.

CE 533 RAILROAD FACILITIES DESIGN AND ANALYSIS. (3) Principles of railroad location, construction, rehabilitation, maintenance, and operation with an emphasis on track structure design and analysis, bridges and bridge loading, drainage considerations, track geometry effects, and operating systems analysis. Prereq: CE 381, CE 381; concur: CE 471G and engineering standing.

CE 534 PAVEMENT DESIGN, CONSTRUCTION AND MANAGEMENT. (3) Design, analysis, construction, and management of flexible and rigid pavements. Stresses and strains, pavement materials, subgrade soil stabilization, bases and subbases, quality control, drainage, pavement-type selection, and pavement management. Prereq: CE 381, prerequisite or concurrent CE 471G, and engineering standing.

CE 539 TRANSPORTATION SYSTEMS DESIGN. (3) This course focuses on the design of urban intersections and the procedures used to evaluate the operational level of urban roadway systems. First, a review of urban intersection design principles and important urban road design aspects is presented. Second, traffic signal timing techniques are reviewed and students are required to use two software packages for evaluation of traffic operation of urban roadway systems. The focal point of the course is a group design project where solutions to accommodate all transportation modes and their issues along a corridor in Lexington are sought. Fieldwork and data collection are part of this course. Lecture, two hours; laboratory, one hour. Prereq: CE 211 and CE 331; CE 531 prerequisite or concur.

CE 541 INTERMEDIATE FLUID MECHANICS. (3) Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as BAE 541.)

CE 542 INTRODUCTION TO STREAM RESTORATION. (3) Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as BAE 532.)

CE 546 FLUVIAL HYDRAULICS. (3) Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as BAE 536.)

CE 547 WATERSHED SEDIMENTATION. (3) The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre- or Co-requisite or equivalent). (Same as BAE 547.)

*CE 549 ENGINEERING HYDRAULICS. (3) Analysis and Design of flow inclosed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461G and engineering standing, or consent of instructor. (Same as BAE 545.)

CE 551 WATER AND WASTEWATER TREATMENT ENGINEERING. (3) This course examines the scientific and engineering aspects of water and wastewater treatment. Conventional water treatment processes such as rapid mixing, flocculation, sedimentation, filtration, and disinfection as well as biological processes for wastewater treatment are analyzed. Sustainable alternative treatment techniques are also discussed. Prereq: CE 341, CE 351, and engineering standing or consent of instructor.

CE 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3) This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as EGR 553.)

CE 555 MICROBIAL ASPECTS OF ENVIRONMENTAL ENGINEERING. (3) Environmental microbiology for engineering students with emphasis on microbially mediated chemical cycles, microbial ecology, and industrial microbiology. Prereq: CE 351, engineering standing, graduate status or consent of instructor.

CE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT. (3) CE 556 GIS APPLICATIONS FOR WATER RESOURCES. (3) This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complemented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as BAE 538.)

CE 579 GEOTECHNICAL ENGINEERING. (3) Application of the principles of soil mechanics and structural mechanics to the design of retaining walls, bracing for excavations, footings, and pile foundations and to the analysis of the stability of earth slopes. Prereq: CE 471G and engineering standing.

CE 581 CIVIL ENGINEERING MATERIALS I. (3) Design, evaluation, and construction of Portland cement concrete and high mix asphalt (HMA). Advanced topics related to high performance concrete and asphalt materials are covered in this course. Prereq: CE 381 and engineering standing.

CE 582 INTERMEDIATE STRUCTURAL ANALYSIS. (3) Analysis of indeterminate, truss, frame and arch structures using energy principles associated with the flexibility and stiffness methods; influence line functions for indeterminate structures; and use of available computer programs for structural analysis and matrix operations. Prereq: CE 382 and engineering standing; or consent of instructor.

CE 584 DESIGN OF TIMBER AND MASONRY STRUCTURES. (3) Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the fieldwork level, or consent of instructor. (Same as ARC 584.)

CE 585 CIVIL ENGINEERING FAILURES. (3) Fundamentals of failure investigation and forensic engineering. Failure types and mechanisms; Case studies and discussions on various constructed facilities. Prereq: CE 382 or consent of instructor, and engineering standing.

CE 586 PRESTRESSED CONCRETE. (3) Fundamental basis and underlying principles for the analysis and design of prestressed concrete. Working stress and ultimate strength design methods, full and partial prestressing. Design for shear and torsion, deflection, crack control, and long-term effects, and prestress losses. Composite beams, continuous slabs, short and slender columns, prestress structures and their connections. Prereq: CE 486G and engineering standing.

*CE 589 DESIGN OF STRUCTURAL SYSTEMS. (3) Building codes, design loads, computerized structural analysis and design, gravity and lateral system design, structural system descriptions and selection considerations, and structural contract documents. Prereq: CE 486G and CE 487G, engineering standing or consent of instructor.

CE 590 INDEPENDENT WORK IN CE. (1-4) Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Consent of department chairperson and the instructor; with engineering standing.

CE 599 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4) A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 599 number. Prereq: Variable; given when topic is identified; plus engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor’s degree in civil engineering or its equivalent.

CE 601 CONSTRUCTION EQUIPMENT. (3) Management of construction projects: planning, estimating, scheduling and control; organization; site management; material management; safety management; quality management; construction labor relations; productivity management; claims. Prereq: Engineering Standing, graduate status, or consent of instructor.

CE 602 CONSTRUCTION PROJECT MANAGEMENT. (3) Management of construction projects: planning, estimating, scheduling and control; organization; site management; material management; safety management; quality management; construction labor relations; productivity management; claims. Prereq: Engineering Standing, graduate status, or consent of instructor.

CE 605 NEW ENGINEERING ENTERPRISES. (3) The course covers the theory and actual practices of organization, management and operation of engineering companies. Primary emphasis on construction companies; however, the principles apply to most service oriented engineering companies. Students will be required to
do several independent exercises related to establishing an engineering company. Prereq: Graduate standing in engineering or consent of instructor.

**CE 621 INTRODUCTION TO FINITE ELEMENT ANALYSIS.** (3)

Theoretical, conceptual, and computational aspects of the finite element method are developed. Development of the element relationships, element calculations, and assembly of the finite element equations are covered. Both one- and two-dimensional finite element problems are considered. One-dimensional problem areas include elastic deformation, heat conduction, fluid flow, electrostatics, groundwater flow, mass transport, beams on elastic foundations, etc. Two-dimensional problem areas include Poisson’s equation, viscous incompressible flow, plane elasticity, and bending of elastic plates. Prereq: MA 432G, MA 537 or consent of instructor.

**CE 631 URBAN TRANSPORTATION PLANNING.** (3)

A detailed review of the transportation planning process; inventory methodologies; trip generation, study and assignment with associated mathematical models and theories; prediction of future travel; land and use modes; modal split; developing and testing proposed systems; simulation. Prereq: CE 531 or equivalent and STA 381, or 681 or equivalent statistics course. (Same as GEO 643.)

**CE 633 AIR TRANSPORT ENGINEERING.** (3)

Planning location and design of airports, STOL ports, and heliports. Air traffic operations, performance and control as related to facility requirements. Role of governmental agencies. Prereq: CE 531 or consent of instructor.

**CE 634 TRAFFIC CHARACTERISTICS.** (3)

Vehicle operating characteristics, driver, pedestrian and roadway characteristics as they individually, and collectively as traffic stream characteristics, are related to the planning design and operation of highway facilities.

**CE 635 HIGHWAY SAFETY.** (3)

A detailed review of the impacts of safety considerations on highway design and planning, focusing on the highway environment, its users (both vehicles and drivers) and their interactions. The role of special interest groups (tracking industry, insurance agencies) is also examined. Prereq: CE 539 or consent of instructor.

**CE 641 MECHANICS OF LIQUID FLOW IN PIPES.** (3)

**CE 642 OPEN CHANNEL FLOW.** (3)

The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipaters, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as BAE 642.)

**CE 643 MECHANICS OF SEDIMENT TRANSPORT.** (3)

Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 541 or consent of instructor. (Same as BAE 643.)

**CE 651 FUNDAMENTALS OF WATER QUALITY CONTROL.** (3)

Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as BAE 652.)

**CE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL.** (3)

Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as BAE 653.)

**CE 655 WATER SANITATION AND HEALTH.** (3)

Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CPH 790.)

**CE 660 GROUNDWATER HYDROLOGY.**

Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as BAE 662.)

**CE 664 WATERSHED MANAGEMENT.**

This course provides an overview of the scientific principles and management strategies used to effectively manage the physical, chemical, biological and social resources within a watershed so as to improve and sustain the integrity of the watershed system. The course will examine watershed management from both a scientific/engineering perspective as well as from a social science/policy perspective. Examples of effective watershed management will be drawn from cases studies in Kentucky and the United States. Students will be provided with an introduction to those spatial data sets, computer software, and methods currently used in watershed management practice. Prereq: BAE 437 or CE 461G or an equivalent course in hydrology, or consent of instructor.

**CE 665 WATER RESOURCES SYSTEMS.** (3)

Application of systems analysis, mathematic modeling, and optimization in water resources management and design. Solution of problems in water found in supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as BAE 665.)

**CE 667 STORMWATER MODELING.**

Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Solution of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as BAE 667.)

**CE 671 ADVANCED SOIL MECHANICS.** (3)

Detailed study of soil behavior. Specific topics include soil classification and structure, strength and deformational behavior, compaction, consolidation, and stress distribution in earth masses. Prereq: CE 471G or consent of instructor.

**CE 672 LANDFILL DESIGN.** (3)

This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as BAE 672.)

**CE 676 GROUNDWATER AND SEEPAGE.** (3)

**CE 679 GEOTECHNICAL EARTHQUAKE ENGINEERING.** (3)

**CE 681 ADVANCED CIVIL ENGINEERING MATERIALS.** (3)

**CE 682 ADVANCED STRUCTURAL ANALYSIS.**

Theory and application of energy principles for plane and space frames; shear wall structures; geometric and material nonlinear formations; and nonlinear solution strategies. Solution techniques for the analysis of large complex structures. Introduction to plane strain/stress, axisymmetric and plate bending finite element analysis.

**CE 684 SLAB AND FOLDED PLATE STRUCTURES.** (3)

**CE 686 ADVANCED REINFORCED CONCRETE THEORY.** (3)

Background and origin of modern reinforced concrete design procedures and codes. Comparison of American and foreign methods of analysis. Review of current research and projection to anticipated future changes in design and construction practices. Prereq: CE 486G or consent of instructor.

**CE 687 ADVANCED STEEL DESIGN.** (3)

Strength of structural steel columns, including asymmetry and slender compression elements. Flexural strength of slender plate girders. Shear strength with and without post-buckling strength. Frame stability. Steel connections. Floor vibration serviceability. Prereq: CE 487G or consent of instructor.

**CE 699 TOPICS IN CIVIL ENGINEERING (Subtitle required).** (1-4)

An advanced level presentation of a topic from one of the major areas of civil engineering such as hydraulics, geotechnics, structures, transportation, surveying, or water-resources. Course with a given subtitle may be offered not more than twice under this number. Prereq: Variable; given when topic identified; graduate standing.

**CE 748 MASTER’S THESIS RESEARCH.** (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**CE 749 DISSERTATION RESEARCH.** (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Research for two full-time semesters of 709 residence credit following the successful completion of the qualifying exams.
## Course Descriptions

### CHE Chemistry

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 101</td>
<td>MOLECULAR SCIENCE FOR CITIZENS.</td>
<td>3</td>
<td>CHE 105 or CHE 108 or CHE 110</td>
<td>A conceptual introduction to the molecular nature of natural and man-made materials as well as the key molecules of biological organisms. The important classes of molecules will be discussed in terms of their properties and impact on our everyday real world experience.</td>
</tr>
<tr>
<td>CHE 103</td>
<td>CHEMISTRY FOR HEALTH PROFESSIONALS.</td>
<td>4</td>
<td>CHE 107 and 113</td>
<td>A study of the basic concepts of general, organic, and biological chemistry. Topics include electronic structure of atoms and molecules, periodicity of the elements, stoichiometry, states of matter, kinetics, equilibria, acids and bases, organic functional groups, stereochemistry, carbohydrates, lipids, proteins, and enzymes. Topics are presented with an emphasis on application to the allied health professions. Prereq: Credit for MA 111, or Math ACT score above 20, or ALEKS Math Placement above 45.</td>
</tr>
<tr>
<td>CHE 104</td>
<td>INTRODUCTORY GENERAL CHEMISTRY.</td>
<td>3</td>
<td>CHE 107 and 113</td>
<td>A study of the general principles including laws of definite and multiple proportions, stoichiometry, gases, electronic structure, chemical bonding, periodic relationships, oxidation-reduction, acid bases, chemical equilibrium and acids/bases. Intended for students interested in a one-semester course in general chemistry and recommended for students seeking careers in nursing, nutrition and allied health science fields. Not open to students who have already completed both CHE 105 and 107. Prereq: Credit for MA 111, or Math ACT score above 20, or ALEKS Math Placement above 45.</td>
</tr>
<tr>
<td>CHE 105</td>
<td>GENERAL COLLEGE CHEMISTRY I.</td>
<td>4</td>
<td>CHE 104 and 106 or CHE 104 and 108</td>
<td>A study of the principles of chemistry and their application to the more important elements and their compounds. Not open to students who have already completed both CHE 104 and 106 or CHE 104 and 108, but open to students who have completed just CHE 104. Prereq: Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110, or the KCTCS course CHE 102R or CHM 100.</td>
</tr>
<tr>
<td>CHE 107</td>
<td>GENERAL COLLEGE CHEMISTRY II.</td>
<td>3</td>
<td>CHE 105 or CHE 108 or CHE 110</td>
<td>A continuation of CHE 105. A study of the principles of chemistry and their application to the more important elements and compounds. Prereq: CHE 105 or CHE 108 or CHE 110 (with a C or better in any one of these prerequisites).</td>
</tr>
<tr>
<td>CHE 108</td>
<td>INTRODUCTION TO INORGANIC, ORGANIC AND BIOCHEMISTRY WITHOUT LABORATORY.</td>
<td>3</td>
<td>CHE 104 and CHE 108</td>
<td>A continuation of CHE 104. A study of selected aspects of inorganic, organic, and biochemistry including the chemistry of metals and nonmetals, basic organic functional groups, proteins, nucleic acids, and lipids. Not open to students who have already completed CHE 105 and 107. Not recommended for students seeking careers in medicine, science, dentistry, engineering, veterinary science, agricultural sciences, education, or allied fields for which the recommended sequence is CHE 105/107, and 111/115. Prereq: CHE 104 or the KCTCS course CHM 100.</td>
</tr>
<tr>
<td>CHE 109</td>
<td>GENERAL CHEMISTRY I.</td>
<td>3</td>
<td>CHE 105</td>
<td>A study of the principles of chemistry and their application to the more important elements and their compounds. The two-semester CHE 109/110 sequence covers the same material as CHE 105. Prereq: Math ACT of 23 or above; or math placement test; or KCTCS course CHM 100 or CHM 102.</td>
</tr>
<tr>
<td>CHE 110</td>
<td>GENERAL CHEMISTRY II.</td>
<td>3</td>
<td>CHE 105</td>
<td>The second half of a sequence (with CHE 109) in which the material of CHE 105 is covered in two semesters.</td>
</tr>
<tr>
<td>CHE 111</td>
<td>LABORATORY TO ACCOMPANY GENERAL CHEMISTRY I.</td>
<td>1</td>
<td>CHE 105</td>
<td>A laboratory course, to accompany CHE 105, dealing with the properties of chemical substances and providing an introduction to quantitative chemical analysis. Prereq or concr: CHE 105.</td>
</tr>
<tr>
<td>CHE 112</td>
<td>LABORATORY TO ACCOMPANY GENERAL CHEMISTRY II.</td>
<td>1</td>
<td>CHE 105</td>
<td>A laboratory course, to accompany CHE 107, emphasizing qualitative and quantitative chemical analysis. Prereq: CHE 111; prereq or concr: CHE 107.</td>
</tr>
<tr>
<td>CHE 195</td>
<td>GENERAL CHEMISTRY WORKSHOP I.</td>
<td>1</td>
<td>CHE 105</td>
<td>Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 105 need not be accompanied by enrollment in CHE 195. Prereq: Concurrent registration in CHE 105 required.</td>
</tr>
<tr>
<td>CHE 197</td>
<td>GENERAL CHEMISTRY WORKSHOP II.</td>
<td>1</td>
<td>CHE 105</td>
<td>Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 107 need not be accompanied by enrollment in CHE 197. Prereq: Concurrent registration in CHE 107 required.</td>
</tr>
<tr>
<td>CHE 199</td>
<td>RESEARCH EXPERIENCE IN CHEMISTRY.</td>
<td>0</td>
<td>CHE 105</td>
<td>Participation in laboratory research in chemistry. Offered pass/fail only. Prereq: Permission of instructor.</td>
</tr>
<tr>
<td>CHE 211</td>
<td>ANALYTICAL CHEMISTRY.</td>
<td>4</td>
<td>CHE 107</td>
<td>An introduction to the theory and practice of quantitative chemical analysis. Lecture, 2 hours; laboratory, 3 hours. Prereq: CHE 107 and CHE 113.</td>
</tr>
<tr>
<td>CHE 231</td>
<td>ORGANIC CHEMISTRY LABORATORY I.</td>
<td>1</td>
<td>CHE 230 or CHE 236</td>
<td>Laboratory for CHE 230 or CHE 236. Laboratory, three hours per week. Prereq: CHE 113; prereq or concr: CHE 230 or CHE 236.</td>
</tr>
<tr>
<td>CHE 232</td>
<td>ORGANIC CHEMISTRY II.</td>
<td>3</td>
<td>CHE 231</td>
<td>A continuation of CHE 230. Prereq: CHE 230 with grade C or above.</td>
</tr>
<tr>
<td>CHE 233</td>
<td>ORGANIC CHEMISTRY LABORATORY II.</td>
<td>1</td>
<td>CHE 232</td>
<td>Laboratory for CHE 232. Laboratory, three hours per week. Prereq: CHE 231. Prereq or concr: CHE 232.</td>
</tr>
<tr>
<td>CHE 236</td>
<td>SURVEY OF ORGANIC CHEMISTRY.</td>
<td>3</td>
<td>CHE 107</td>
<td>A one-semester course in organic chemistry. Not open to students who have already completed both CHE 230 and 232. Prereq: CHE 107 and 113.</td>
</tr>
<tr>
<td>CHE 250</td>
<td>FORENSIC SCIENCE ON TELEVISION.</td>
<td>3</td>
<td>CHE 105</td>
<td>This course will introduce students to the basic chemical and biochemical principles of forensic science utilized on popular science/science fiction television shows. Forensic science involves the application of techniques from instrumental chemical analysis and molecular biology to identify and quantify evidence collected from crime scenes. By using popular television shows to introduce specific techniques students should gain a basic understanding of the capabilities and limitations of forensic science as it is presently practiced. Prereq: CHE 103 or CHE 104 or CHE 110 or CHE 105.</td>
</tr>
<tr>
<td>CHE 295</td>
<td>ORGANIC CHEMISTRY WORKSHOP I.</td>
<td>1</td>
<td>CHE 230 or CHE 236</td>
<td>Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 230 need not be accompanied by enrollment in CHE 295. Prereq: Concurrent registration in CHE 230 required.</td>
</tr>
<tr>
<td>CHE 297</td>
<td>ORGANIC CHEMISTRY WORKSHOP II.</td>
<td>1</td>
<td>CHE 230 or CHE 236</td>
<td>Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 232 need not be accompanied by enrollment in CHE 297. Prereq: Concurrent enrollment in CHE 232 required.</td>
</tr>

</table>
| CHE 372     | COMMUNICATION IN CHEMISTRY.                                         | 1       | CHE 107                              | Reports and discussions on recent research and current chemical literature; writing and revision of scientific papers; literature searching methods; preparation of effective presentations and visual aids. CHE 372 and CHE 472 meet the A&S College Writing and
Communications Requirement. Prereq: CHE 226 (or concurrent) or CHE 232 (or concurrent) or consent of Director of Undergraduate Studies. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**CHE 395 INDEPENDENT WORK IN CHEMISTRY.** (1-3)
An independent research project in an area of chemistry under the direction of a chemistry faculty mentor. Must be approved by the Director of Undergraduate Studies in Chemistry. May be repeated to a maximum of 12 credits. Prereq: Declared major in Chemistry; CHE 230, 231; CHE 232 or CHE 226; GPA of at least 3.0 in CHE courses.

**CHE 410G INORGANIC CHEMISTRY.** (2)
An overview of inorganic chemistry, including fundamental aspects of structure, bonding, periodicity, spectroscopic properties, reaction mechanisms and applications. Prereq: CHE 231 and 232; prereq or concur: a physical chemistry course at or above the 400 level.

**CHE 412 INORGANIC CHEMISTRY LABORATORY.** (2)
A laboratory course with assignments that will acquaint the student with the synthesis, characterization and properties of inorganic and organometallic compounds of both main-group and transition elements. Laboratory, six hours per week. Prereq: CHE 410G; prereq or concur: a physical chemistry course at or above the 400 level.

**CHE 421 INSTRUMENTAL ANALYSIS.** (4)
The theory and application of instrumental methods of analysis. Lecture, two hours; laboratory, six hours. Prereq: A physical chemistry course at or above the 400 level.

**CHE 440G INTRODUCTORY PHYSICAL CHEMISTRY.** (4)
An introduction to the laws of thermodynamics, the thermo-dynamic functions and their application to phase equilibria, chemical equilibria, solutions electrochemistry. Chemical kinetics, including rate laws, reaction mechanisms, Arrhenius, collision, and activated complex theories, and catalysis. Quantum theory including an elementary introduction to spectroscopy. The fourth hour to be devoted to problem solving and problem-solving techniques. Prereq: PHY 213 or PHY 232; MA 114; CHE 226 or MA 213.

**CHE 441 PHYSICAL CHEMISTRY LABORATORY.** (2)
Laboratory studies in physical chemistry, including quantum chemistry, spectroscopy, thermodynamics and chemical kinetics. Laboratory, six hours. Prereq: A physical chemistry course at or above the 400 level.

**CHE 442G THERMODYNAMICS AND KINETICS.** (3)
Principles of physical chemistry including thermodynamics, chemical kinetics, and statistical thermodynamics. Prereq: CHE 226; MA 213; PHY 213 or 232.

**CHE 446G PHYSICAL CHEMISTRY FOR ENGINEERS.** (3)
An introductory course in physical chemistry for engineering students. Kinetic theory, thermodynamics, phase diagrams, colligative properties, electrochemistry, transport properties, kinetics, quantum theory, spectroscopy. Prereq: CHE 107, 113; PHY 232; MA 213; CHE 200 or the equivalent.

**CHE 454 BIOLOGICAL CHEMISTRY LABORATORY.** (2)
An introductory biological chemistry laboratory course. Areas of experimentation will include spectroscopic methods, electrophoresis, chromatography, and isolation and characterization of biological macromolecules. Prereq: CHE 232, or CHE 350 and a physical chemistry course at or above the 400 level (e.g., CHE 440), or consent of instructor.

**CHE 472 COMMUNICATION IN CHEMISTRY.** (1)
Reports and discussions on recent research and current chemical literature in seminar format; literature searching methods; resume construction; preparation of effective presentations abstracts and visual aids. CHE 472 and CHE 372 meet the A&S College Writing and Communications Requirement. Prereq: CHE 372 or consent of the Chemistry Director of Undergraduate Studies. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**CHE 510 ADVANCED INORGANIC CHEMISTRY.** (3)
A course dealing with the concepts of inorganic chemistry with emphasis on atomic structure, periodicity, nomenclature, bonding, reaction mechanisms and acid-base theories. Prereq: CHE 232, CHE 226, and a physical chemistry course at or above the 400 level; or CHE 410G and CHE 412G.

**CHE 514 DESCRIPTIVE INORGANIC CHEMISTRY.** (3)
A course dealing with descriptive chemistry of the elements and their compounds, excluding the hydrocarbons and their derivatives. Prereq: CHE 226 and CHE 232; or CHE 450G, or permission of instructor.

**CHE 520 RADIOCHEMISTRY.** (3)
Applications of radionuclides in chemistry with emphasis on principles of radioactive decay, interactions of radiation with matter, use of isotopic tracers, activation analysis, isotope dilution analysis, hot atom chemistry and nuclear dating methods. Prereq: CHE 107, or 226.

**CHE 524 CHEMICAL INSTRUMENTATION.** (4)
Aspects of electronics, microcomputers, computer interfacing, and data analysis as they apply to chemical measurement systems. Lecture, two hours; laboratory, six hours per week. Prereq: A physical chemistry course at or above the 400 level or consent of instructor.

**CHE 525 BIOANALYTICAL SENSORS.** (3)
Theory, principles, and applications of bioanalytical sensors and sensing systems, including transducers, molecular recognition, and microfabrication. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

**CHE 526 CHEMICAL SEPARATIONS.** (2)
An advanced study of the theory, instrumentation, and analytical applications of chemical separation methods. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

**CHE 532 SPECTROMETRIC IDENTIFICATION OF ORGANIC MOLECULES.** (2)
A discussion of nuclear magnetic resonance, ultraviolet and infrared spectroscopies, and mass spectrometry in the determination of the structure and stereochemistry of organic molecules. Prereq: CHE 231 and CHE 232.

**CHE 533 QUALITATIVE ORGANIC ANALYSIS LABORATORY.** (2)
The identification of unknown organic compounds using nuclear magnetic resonance, ultraviolet and infrared spectroscopy, mass spectrometry and traditional chemical techniques. Separation techniques are also emphasized. Laboratory, six hours. Prereq: CHE 532.

**CHE 535 SYNTHETIC ORGANIC CHEMISTRY.** (3)
A general survey of organic chemistry with emphasis on synthetic methods and the synthesis of natural products. Prereq: CHE 232.

**CHE 536 ORGANIC MATERIALS: ELECTRONIC AND PHOTONIC PROPERTIES.** (3)
A description of relationships between molecular structure and optical and electronic properties, focusing on changes in properties moving from single molecules to aggregates to bulk solids. Electronic structure and photonic properties of organic molecules, solid-state polymers and interfaces will be considered. Material characteristics will be studied in the types of devices where organic materials show promising performance: displays, lighting, transistors, energy conversion/storage applications, and non-linear optics technologies. Prereq: CHE 232 and PHY 213 or PHY 232, or permission of the instructor.

**CHE 538 PRINCIPLES OF ORGANIC CHEMISTRY.** (3)
A general survey of the field of organic chemistry. Topics emphasized are: mechanistic principles relating molecular structure to reaction outcome, stereoisomerism and its effect on chemical reactivity, and simple molecular orbital theory as required to understand aromaticity and to predict the occurrence and stereochemistry of pericyclic reactions. Prereq: CHE 232.

**CHE 547 PRINCIPLES OF PHYSICAL CHEMISTRY I.** (3)
An introduction to quantum chemistry and spectroscopy, emphasizing modern applications of quantum theory to the calculation of molecular properties. Practical experience with quantum chemistry software on various computer platforms is included. Prereq: MA 213; PHY 213 or 232, or consent of instructor.

**CHE 548 PRINCIPLES OF PHYSICAL CHEMISTRY II.** (3)
Fundamental principles of classical physical chemistry, including thermodynamics, statistical thermodynamics, and chemical kinetics. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

**CHE 550 BIOLOGICAL CHEMISTRY I.** (3)
An introduction to biochemical chemistry. Topics include amino acids and proteins; nucleic acids and nucleotides; enzyme structure, function and energetics; metabolism including glycolysis; the tricarboxylic acid cycle; electron transport and oxidative phosphorylation; glyoxen metabolism; hormone action; and other aspects of modern biological chemistry. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

**CHE 552 BIOLOGICAL CHEMISTRY II.** (3)
A course in the chemistry of nucleic acids and proteins. Prereq: CHE 550, or consent of instructor.

**CHE 553 CHEMISTRY AND MOLECULAR BIOTECHNOLOGY.** (3)
This course focuses on the chemical aspects of biotechnology development. Current topics in biotechnology are emphasized through extensive reading and classroom discussion of the most recent scientific literature. Biotechnology development in fields as diverse as agriculture, the environment, and medicine will be covered. Prereq: An introductory course in biology, biological chemistry, or biochemistry; and CHE 232; or consent of instructor.

**CHE 555 HOMONUCLEAR NMR.** (3)
This course will give students hands-on experience with modern NMR experiments that are the mainstays of chemical structural analysis and biophysical studies of macromolecules and pharmaceuticals. Lecture, two hours; laboratory, three hours per week. Prereq: CHE 232 or 236, and a physical chemistry course at or above the 400 level.

**CHE 556 ELEMENTS OF BIOCHEMISTRY.** (3)
A course in the neurochemistry of the brain. Among topics to be covered: brain cell cytoarchitecture; chemical bases for: neuronal membrane transport, electrical excitability, and...
<table>

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 558</td>
<td>HORMONE RECEPTORS AND CELL SIGNALS.</td>
<td>(3) This course starts with the general concepts on hormones and their receptors and describes how hormones interact with their receptors and generate hormone signals and responses. Prereq: CHE 232 and a biological chemistry course, or consent of instructor.</td>
<td>CHE 580</td>
</tr>
<tr>
<td>CHE 559</td>
<td>MOLECULAR BIOPHYSICS.</td>
<td>(3) Overview of intermolecular forces responsible for formulation tertiary structure and macromolecular assemblies, as well as linked equilibria, allostery and propagation of signals. Extension of these principles to explain macromolecular machines, complex molecular behavior and, ultimately, processes of life. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.</td>
<td>CHE 565</td>
</tr>
<tr>
<td>CHE 565</td>
<td>ENVIRONMENTAL CHEMISTRY.</td>
<td>(3) A study of the sources, reactions, transport, effects, and fates of chemical species in the atmosphere, hydrosphere, lithosphere and biosphere. Prereq: Two semesters of general college chemistry are required. Courses in analytical and physical chemistry are recommended, but are not required.</td>
<td>#CHE 566</td>
</tr>
<tr>
<td>CHE 566</td>
<td>ORGANIC MATERIALS: CHARACTERIZATION AND DEVICES.</td>
<td>(3) A study of applications of organic materials in electronic and optical devices, focusing on appropriate material selection, processing, and interpretation of device output. Will cover basic methods for the formation of thin films of organic molecules and polymers, various spectroscopic techniques relevant to device performance, and methods to form and measure devices such as transistors and light-emitting diodes. Hybrid organic-inorganic material systems, and complex device structures for all-organic circuitry will be discussed. Prereq: CHE 232 and PHYS 213 or PHYS 223, or permission of the instructor.</td>
<td>¶CHE 567</td>
</tr>
<tr>
<td>CHE 567</td>
<td>POLYMER CHEMISTRY.</td>
<td>(3) Introduction to the theory and practice of polymer chemistry and polymer characterization. Prereq: CHE 230 and CHE 226; or permission from the instructor.</td>
<td>CHE 580</td>
</tr>
<tr>
<td>CHE 580</td>
<td>TOPICS IN CHEMISTRY.</td>
<td>(1-3) A detailed investigation of a topic of current significance in chemistry. May be repeated to a maximum of six credits. Lecture and/or laboratory: variable. Prereq: CHE 232 and a physical chemistry course at the 400 level or above, or consent of instructor.</td>
<td>CHE 610</td>
</tr>
<tr>
<td>CHE 610</td>
<td>CHEMISTRY OF THE TRANSITION METALS.</td>
<td>(3) A detailed treatment of the chemistry of the transition elements, lanthanides and actinides, including the structure of coordination complexes, bonding, reaction mechanisms and preparations. Prereq: CHE 510.</td>
<td>CHE 612</td>
</tr>
<tr>
<td>CHE 612</td>
<td>INORGANIC CHEMISTRY OF THE NON-METALS.</td>
<td>(3) A detailed treatment of the inorganic chemistry of the nonmetals. Topics include theories of bonding, spectroscopic characteristics, reaction mechanisms, preparations, physical methods of characterization and structural determination, and applications. Prereq: CHE 510.</td>
<td>CHE 614</td>
</tr>
<tr>
<td>CHE 614</td>
<td>ORGANO transition METAL CHEMISTRY.</td>
<td>(3) A detailed treatment of the organometallic chemistry of the transition metals, including lanthanides and actinides. Topics include synthesis, structure, bonding theories, reactions, characterization by physical methods, and applications in organic chemistry and catalysis. Prereq: CHE 232, and CHE 410G or 510, and a physical chemistry course at the 400 level or above, or consent of instructor.</td>
<td>CHE 616</td>
</tr>
<tr>
<td>CHE 616</td>
<td>NUCLEAR CHEMISTRY.</td>
<td>A detailed study of modern small-molecule crystallography with emphasis on typical applications of interest to synthetic chemists. Prereq: CHE 232 and a physical chemistry course at the 400 level or above.</td>
<td>CHE 620</td>
</tr>
<tr>
<td>CHE 620</td>
<td>ELECTROCHEMICAL METHODS OF ANALYSIS.</td>
<td>(3) An introduction to modern small-molecule crystallography with emphasis on typical applications of interest to synthetic chemists. Prereq: CHE 232 and a physical chemistry course at the 400 level or above.</td>
<td>CHE 623</td>
</tr>
<tr>
<td>CHE 623</td>
<td>CHEMICAL EQUILIBRIUM AND DATA ANALYSIS.</td>
<td>(3) An advanced treatment of chemical equilibrium, sampling, and the evaluation of data obtained from chemically related measurements. Prereq: CHE 226 or 522 or a physical chemistry course at the 400 level or above.</td>
<td>CHE 625</td>
</tr>
<tr>
<td>CHE 625</td>
<td>SPECTROSCOPIC ANALYSIS.</td>
<td>(3) An intensive study of the theory, instrumentation, and analytical applications of modern atomic and molecular spectrometric methods. Prereq: CHE 522.</td>
<td>CHE 626</td>
</tr>
<tr>
<td>CHE 626</td>
<td>ADVANCED ANALYTICAL CHEMISTRY.</td>
<td>An advanced study of the theory and practice of quantitative analysis.</td>
<td></td>

</tbody>
</table>
**CHE 780 INDIVIDUAL WORK IN CHEMISTRY.** (1-5)
Selected library and laboratory problems in conformance with the student’s interest will be
attacked and pursued under the direction of a suitable staff member who is proficient in the area under investigation.

**CHE 790 RESEARCH IN CHEMISTRY.** (1-12)
Work may be taken in the following fields, subject to the approval of the Departmental Graduate Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry, radiochemistry, or physical chemistry. May be repeated indefinitely.

---

**Course Descriptions**

**CHI Chinese Culture and Language**

**CHI 101 BEGINNING CHINESE I.**
A course in first semester Chinese language.

**CHI 102 BEGINNING CHINESE II.**
A course in second semester Chinese language. Prereq: CHI 101 or equivalent.

**CHI 201 INTERMEDIATE CHINESE I.**
A course in third semester Chinese language. Prereq: CHI 102 or equivalent.

**CHI 202 INTERMEDIATE CHINESE II.**
A fourth semester course in Chinese language. Prereq: CHI 201 or equivalent.

**CHI 301 ADVANCED INTERMEDIATE CHINESE I.**
A course designed to increase student skills in listening, speaking, writing, and reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 202 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

**CHI 302 ADVANCED INTERMEDIATE CHINESE II.**
A course designed to increase student skills in listening, speaking, writing, and reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 301 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

**CHI 310 SOUNDS OF EAST ASIAN LANGUAGES.**
An interdisciplinary, multimedia approach to the representation of gender relations in Chinese literature over time. Critical engagement of such topics as the complex relationships between women’s issues and national discourse, between identity and performance, between the construction of female subjectivity and male fantasy, between gender and genre. Students will be encouraged to conduct cross-genre and cross-cultural comparisons. All readings in English. Prereq: Junior status or consent of instructor.

**CHI 321 INTRODUCTION TO CONTEMPORARY CHINESE FILM.**
The course offers an overview of major films, directors and actors in the contemporary PRC, Taiwan and Hong Kong. It examines the genres of Chinese film better known in the U.S., including the Hong Kong action film, fifth-generation mainland cinema and Taiwanese urban dramas. The course takes for granted understandings of contemporary Chinese culture and society. The course will be in English and all required readings are in English as well. Students are not expected to know Chinese to take this course.

**CHI 322 SELF AND SOCIETY IN CHINESE CULTURE.**
This course takes an interdisciplinary approach to the concept of the self and its relationship to larger social categories such as family and society in Chinese culture. Critical approaches to topics such as self-expression in art and literature over time and across genres, self-cultivation, gender, consciousness, modernity, and transnational identity. Course readings will include philosophical and religious texts as well as literature, historical writing, and material culture in its various forms. Prereq: CHI 302 or equivalent.

**CHI 332 CHINESE DRAMA – FROM PAST TO PRESENT.**
An interdisciplinary course that introduces students to the drama and oral performances of China from their origins in early time to their contemporary developments. Focius will be the history and aesthetics of Chinese theatre artists as well as works of regional dramatic forms. Students will also learn to appreciate Chinese performances in terms of both their social, political and historical context and their structural and formal properties. The course will be conducted in English and all required readings are English as well. Students are not expected to know Chinese to take this course.

**CHI 330 INTRODUCTION TO CHINESE CULTURE, PRE-MODERN TO 1840.**
This course introduces students to premodern Chinese history, society, and culture up to 1840. Some of the major questions to be addressed include: Is “China” the oldest continuous civilization? Was it culturally and ethnically homogenous? Was Chinese traditional culture and society “patricracy”?” To what extent was the state successful in penetrating into the daily lives of individuals? Course assignments will include primary and secondary literature (entirely in English) as well as visual and material culture sources. No prior knowledge of Chinese history, culture, or language required.

**CHI 331 INTRODUCTION TO CHINESE CULTURE, 1840 TO PRESENT.**
This course introduces students to modern Chinese history, society, and culture from 1840 to the present, with a special focus on developments in the twentieth century. We will investigate three sets of major problems: (1) China is often seen as an ethnically and culturally homogeneous society, but what is China (and Han) Chinese? (2) How did China transition from a multi-ethnic empire to a modern nation state? (3) What does modernity mean in the Chinese context? Aside from these specific objectives, this course will also teach students to analyze written and visual texts found in various genres. No prior knowledge of Chinese history, culture, or language required.

**CHI 332 CHINESE SHORT STORIES.**
This course takes an interdisciplinary approach and analyzes the issues of didacticism in storytelling, the problems of interpretation and the balance between entertaining and enlightening and the art and techniques of narration in traditional Chinese short stories. By reading Taoist, Buddhist and folk and ghost stories as windows onto the social practices and values of traditional China, the course investigates broad social concerns such as identity, gender, sexuality and morality in pre-modern China. The course will be conducted in English and all required readings are in English as well. Students are not expected to know Chinese to take this course.

**CHI 333 TRADITIONAL CHINESE MEDICINE.**
This course is an interdisciplinary introduction to the history of Chinese medicine: its philosophy, theories, practices and transformations. Drawing on cultural history, anthropology, and medical studies, this course investigates Chinese medicine in its intellectual, social and cultural context and emphasizes the following components: 1) reading primary texts in translation; 2) a historical overview of the development of Chinese medicine; 3) examining different methodological approaches. The course will be conducted in English and all required readings are English as well. Students are not expected to know Chinese to take this course.

**CHI 345 INTRODUCTION TO EARLY CHINESE THOUGHT.**
This course will examine the intellectual history of China’s classical period, from the late Shang until the sixtieth century CE, and critically engage fundamental concepts of early Chinese philosophy and religion including: the Dao, the discourse of tradition, formation of philosophical “schools,” cosmic and social gender, the Sage, and human nature. This course will also consider “Religion” and “Philosophy” as terms of inquiry, and synthesize this literature to describe and analyze changes and continuities to Chinese thought during the classical era.

**CHI 395 INDEPENDENT WORK IN CHINESE.**
Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

**CHI 401 ADVANCED CHINESE I.**
The course builds on the linguistic skills acquired in previous Chinese study and further trains students in advanced use of the language, including listening, speaking, reading and writing. The course will expand students’ vocabulary and improve students’ reading and writing, speaking, and listening skills. The topics of the lessons cover the social changes in contemporary China and cultural developments in the new global economy. Prereq: CHI 301 or equivalent.

**CHI 430 POPULAR CULTURE IN MODERN CHINA.**
This course provides a critical examination of modern Chinese popular culture and its global cultural significance in the contemporary world. From film to literature, from music to theatre, this course will probe modern Chinese popular culture as it has manifested itself, and trace its sociopolitical, aesthetic, and affective impact on the contemporary world.

**CHI 450 DAOISM.**
Interdisciplinary examination of the development of Daoism, China’s indigenous philosophical and religious tradition. Includes critical approaches to texts that are central to the doctrines, concepts, and practices of Daoism, and an assessment of its impact on Chinese art, poetry, fiction, and historical writing from all periods of Chinese history. This course will also offer a discussion of Daoism and its emergence in 20th century American culture and evaluate its impact and effects on North American pop culture, alternative culture, and new religious movements. Prereq: CHI 330 or CHI 345 strongly recommended.

**CHI 495G ADVANCED INDEPENDENT WORK IN CHINESE.**
Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of CHI 395 and 495G.

**CHI 511 LITERARY CHINESE.**
This course builds on linguistic skills learned in previous study of Chinese and Japanese, introducing the grammar, vocabulary, and concepts of Literary Chinese. The class will focus on early texts written in what is often referred to as “Classical Chinese,” which flourished from the late Zhou to the end of the Han dynasty (220 CE) and was the common written language of East Asia. Prereq: CHI 301 or JPN 301 or consent of instructor.
### Course Descriptions

#### CIS 110 COMPOSITION AND INFORMATION STUDIES

(3) Composition and Information Studies is an introductory course in a two-course sequence designed to engage students in composing and communicating ideas through speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

#### CIS 111 COMPOSITION AND INFORMATION II

(3) Composition and Information II is the advanced course in a two-course sequence designed to engage students in composing and communicating ideas through speech, writing, and visuals. In this course, students will work in small groups to explore issues of public concern using rhetorical analysis, engage in deliberation, compose conscientious and well-developed arguments, and propose viable solutions to different audiences. Students will sharpen their ability to conduct research; compose and communicate in spoken, written, and visual forms; and work effectively in teams through sustained interrogation of an issue. A significant component of the class will involve learning to use visual and digital resources both to enhance written and oral presentations and to communicate with public audiences. Prereq: CIS 110.

#### CIS 112 ACCELERATED COMPOSITION AND INFORMATION II (CIS)

(3) Composition and Information 112 is an accelerated version of the standard two-semester composition and information sequence. It focuses on integrated oral, written, and visual communication skill development and emphasizes critical inquiry and research. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and use interpersonal skills to work effectively in groups (dyads and small groups). Prereq: AP English Composition score of 4 or 5, an ACT English score of 32 or higher, an SAT verbal score of 720 or higher, or acceptance into the University's Honors Program.

#### CIS 184 COMMUNICATING ARGUMENTS

(3) Theories, strategies, techniques for researching, analyzing, constructing, and presenting oral arguments for and against selected contemporary topics and issues. Emphasis on in-class presentations. Prereq: Instructor approval required to enroll.

#### CIS 191 SPECIAL TOPICS IN INSTRUCTIONAL COMMUNICATION

(Subtitle required) (1-3) Study of a specialized topic in instructional communication. May be repeated to a maximum of nine credits under different subtitles. Lecture. Prerequisites will be set by the instructor.

#### CIS 284 INTERCOLLEGIATE DEBATE AND FORENSICS

(1) Preparation for and participation in intercollegiate debating and/or forensics. May be repeated seven times for a maximum of eight credits. Prereq: Instructor approval required to enroll.

#### CIS 300 STRATEGIC BUSINESS AND PROFESSIONAL COMMUNICATION (W)

(3) This communication-intensive course prepares students for their careers by developing effective communication skills and applied specifically to today’s technology-driven and global business environment. The course will focus on developing strong communication skills in interpersonal settings, on small group teams, and when delivering public presentations. Students will prepare cover letters, resumes, websites, and portfolios; develop effective interviewing skills in face-to-face and online environments; communicate effectively based on audience analysis in face-to-face and online settings; deliver effective formal public business presentations (informative and persuasive) based on audience analysis and using a variety of presentation aids that enhance the message; and learn to manage data, graphics, and a positive online presence (e.g., websites, blogs, social media outlets, email messages, and webinars). Prereq: Upper division status in accounting, analytics, communication, economics, finance, management, marketing, or permission from the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

#### CIS 391 SPECIAL TOPICS IN INSTRUCTIONAL COMMUNICATION

(Subtitle required) (3) Intensive study of a specialized topic in instructional communication. May be repeated to a maximum of 9 credits under different subtitles. Lecture.

#### CIS 399 CONSULTING AND TRAINING—MULTIMODAL COMMUNICATION CONSULTING CENTER INTERNSHIP

(1-3) The principle purpose of this course is to provide students with an opportunity to intern in the Multimodal Communication Consulting Center (MC3). The internship will provide students with the ability to act as a peer tutor in the MC3, engage in classroom presentations, and develop out-of-class instructional workshop focused on presentational elements and multimodal communication. Prereq: CIS/WRD 110 and 111 or equivalents and by instructor approval.

#### CIS 499 INTERNATIONAL INTERNSHIP

(3) Qualified students enter the professional sector to refine skills and knowledge. Supervised internships in an international location approved by the College allow placements in industry, government, the media, communication agencies, etc. International internship credit will only be given for sites/programs approved by Education Abroad at UK. Pass/Fail only. Prereq: Admission to upper-division in one of the undergraduate majors in the College of Communication and Information (COM, ICT, ISC, JOU or MAS), fulfillment of internship prerequisites and their implications for such contexts as management and organizational communication, health communication, international development, journalism, democracy and civic engagement, public policy, and communication with marginalized groups. Prereq: At least one year of graduate study in communication or consent of instructor.

#### CJT 601 PROSEMINAR IN COMMUNICATION

(3) Introduction to graduate study; theory and systems, research strategies. Prereq: Graduate standing in communication or consent of instructor.

#### CJT 608 MASS COMMUNICATIONS AND SOCIETY

(3) A study of the ways in which the communications media play their roles in contemporary society with special attention to the major functions, rights, and responsibilities of media and individuals. Prereq: Graduate standing in communication or consent of instructor.

#### CJT 610 PARTICIPATORY COMMUNICATION

(3) This seminar will provide students with a state of the art account of the underlying philosophical, theoretical, and methodological premises of participatory communication. This will help students gain a deep understanding of participatory communication theory and research, and their implications for such contexts as management and organizational communication, health communication, international development, journalism, democracy and civic engagement, public policy, and communication with marginalized groups. Prereq: At least one year of graduate study in communication or consent of instructor.

#### CJT 615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS

(3) This course is an introductory graduate-level survey of theory and research on human communication mediated by communication and information technologies. This course is designed to cover the areas not typically addressed in traditional courses of mass or interpersonal communication, including theory and research on the use of computers and electronic communication over a variety of communication and information systems. Prereq: Graduate standing or consent of instructor. (Same as LIS 615.)

#### CJT 616 FOUNDATIONS IN INSTRUCTIONAL COMMUNICATION

(3) Instructional communication is a blending of three disciplines including pedagogy (i.e., teaching), educational psychology (i.e., cognitive learning), and communication. Although each of these unique disciplines is embedded in its own theoretical and research tradition, this course will focus on where these three disciplines intersect. We will examine and criticize various communication and instructional models, plan for and deliver instruction in both in-person and computer-aided venues, learn various methods for assessing teaching and learning, and discuss the managerial and political aspects of instructional delivery in various professional contexts, with a special emphasis on those in academic, information, and organizational settings.

#### CJT 619 PROSEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION

(3) Examines important issues in communication from a global perspective. In-depth study of international communications systems, international information flow, problems that occur in communicating with members of different cultures or subcultures, and development of theories and strategies for improving international communication in various professional, organizational, and interpersonal levels. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

#### CJT 625 PROSEMINAR IN ORGANIZATIONAL COMMUNICATION

(3) This course is an introductory graduate-level survey of theory and research in the area of organizational communication and related topics. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Prereq: Graduate standing in communication or consent of instructor.
Course Descriptions

* CJT 629 INTRODUCTION TO MEDICAL INFORMATICS. (3)
This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including patient care, research, and education. During the semester we will explore a number of topics central to understanding the field, including: the nature of biomedical information, the electronic medical record, the role of information and computing technologies to support clinical decision making, how information and medical informatics standards, information retrieval, system analysis and technology assessment, and essential issues of information technology in medical education and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and be able to use this as a foundation for further education, training, and work in health information professions. (Same as LIS 629.)

CJT 630 PROSEMINAR IN MASS MEDIA LAW AND PUBLIC POLICY. (3)
Study of mass communication law and policy-making. Intensive review of court decisions, statutes and administrative rules and regulations regarding libel, privacy, public access to government meetings and documents, intellectual property, broadcast regulation, commercial and corporate speech, obscenity and protection of news sources. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

CJT 631 PROSEMINAR IN INTERPERSONAL COMMUNICATION. (3)
The course reviews existing and emerging theoretical perspectives relevant to the context of interpersonal communication. Emphasis is on theories of message production and reception, identity management, relationship development, and related processes. Methods of investigation unique to the study of interpersonal interaction are also addressed. Students are expected to be familiar with general communication theory and basic research methods prior to enrolling in the course.

CJT 636 ASSESSMENT AND EVALUATION METHODS IN APPLIED COMMUNICATION RESEARCH. (3)
In applied instructional settings (e.g., training, workshops, teaching, online courses, conference proceedings), goals are set for specific outcomes to be achieved, whether they are affective, cognitive, or behavioral. In these instructional contexts, assessment is used to evaluate the effectiveness of any program or intervention. Additionally, assessment is used to improve upon existing programs and interventions. Students will learn how to develop, conduct, and evaluate sound assessment plans, and provide recommendations based on assessment results.

CJT 637 INFORMATION TECHNOLOGY. (3)
Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer services, hardware evaluation and selection, and system security. Prereq: Consent of instructor. (Same as LIS 637.)

CJT 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)
A course examining the structure, development and evolution of the Internet; network protocols and client/server architecture issues; Web page design, authoring and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTML and scripting languages; and Internet related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as LIS 638.)

CJT 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to: the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as ICT/LIS 640.)

CJT 645 PROSEMINAR IN MASS COMMUNICATION THEORY. (3)
A broad examination and critical analysis of major mass communication theories and research areas. Prereq: A course in research methods and graduate standing in communication or consent of instructor.

CJT 646 INTERPERSONAL COMMUNICATION IN INSTRUCTION. (3)
Interpersonal communication exists in the relationships between students and instructors and between students, both in and out of the classroom. Although these relationships differ from other interpersonal relationships (e.g., friends, significant others), their impact is no less profound or influential. In this course, students will explore how interpersonal concepts, constructs, theories, and relationships emerge in the classroom and impact the overall instructional environment in terms of learning outcomes, satisfaction, and engagement, among other important instructional outcomes.

CJT 650 DISTANCE EDUCATION: DELIVERY. (3)
This course has been designed for those faculty or future faculty who plan to teach via distance education technology. This course will review current literature on how to deliver distance education content with attention to developing materials, setting delivery timelines, facilitating interactions, and using appropriate teaching strategies. Prereq: Master’s degree. (Same as EDS 651.)

CJT 651 COMMUNICATION THEORY. (3)
Examination and critical analysis of the major theories of communication processes, including systems theory, structural theories and semiotics, behaviorism, symbolic interactionism, theories of the social construction of reality, and other theoretical approaches to the study of communication. Prereq: Graduate standing or consent of instructor.

CJT 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)
This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master’s degree. (Same as EDS 652.)

CJT 656 INSTRUCTIONAL COMMUNICATION AND TECHNOLOGY. (3)
Instructional communication often utilizes technology. Teaching and learning now incorporate a wide variety of technologies, ranging from supplementing traditional lectures to holding classes online with students across the world. This course marries traditional areas of concern for instructional communication and emerging technologies to explore the landscape of teaching and learning. Through readings, technology demonstrations, and discussion, the class will examine ethical, technological, professional, and scholarly questions.

CJT 664 QUALITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
Goals, epistemology and methods of qualitative inquiry in communication. Strengths and limitations of different qualitative research methodologies. Distinctive contributions of qualitative research to theory and practice of communication.

CJT 665 QUANTITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
The scientific method. Communication research as part of social science research. Study and practice of quantitative behavioral research techniques which apply to communication. Prereq: Graduate standing in communication or consent of instructor.

CJT 666 INFORMATION SYSTEMS DESIGN. (3)
Study of concepts and methods of information system design and development with particular relevance to library and information center applications. Emphasis is given to modeling of system functions, data, and processes of computer-based information systems including the development of small scale information systems. Prereq: LIS 636 or consent of instructor. (Same as LIS 666.)

CJT 671 PROSEMINAR IN HEALTH COMMUNICATION. (3)
This course is designed to provide a broad introduction to communication in a health care context. Topics addressed are patient-provider communication, small group communication, communication in health care organizations, intercultural communication in health care, and health images in the mass media. Prereq: Graduate standing in communication or consent of instructor.

CJT 682 COMMUNICATION AND PERSUASION. (3)
An advanced course examining the literature in communication and attitude change. Issues in message development, theory, and philosophical orientation are central. Covers communication, broadly, including interpersonal, mediated, and mass communication. Prereq: Graduate standing in communications or consent of instructor.

CJT 684 PROSEMINAR IN INSTRUCTIONAL COMMUNICATION. (3)
This course is an introductory graduate-level survey of current theory, research, and current developments in the area of instructional communication. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Hands-on opportunities are provided to construct and refine strategies and resources for instruction. Prereq: Prior experience, or COM 581 or consent of instructor.

CJT 685 SEMINAR: PREPARING FUTURE FACULTY FOR THE MULTICULTURAL CLASSROOM. (1-3)
This course is to prepare future communication faculty for facilitating and dealing with diverse student learning in an increasingly multicultural classroom context. Prereq: Recommend CJT 684 or GS 650.

CJT 686 PRACTICUM IN PREPARING FUTURE FACULTY. (3)

CJT 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (1-3)
A survey and historical study of multicultural literature for your of all ages. Students will engage in extensive reading, evaluation, and discussion of literature and the issues related to developing an understanding of various cultures and special populations. Prereq: LIS 610 or LIS 614, or consent of instructor.

CJT 695 SEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION. (Subtitle required) (3)
Special Topics Issues in International/Inter-cultural Communication examines the current and the alternative perspectives in the field of study. Topics/Issues such as the New World Information and Communication Order, Information/Communication Technologies, Commu-
**Course Descriptions**

**CJT 721 SEMINAR IN RISK COMMUNICATION.** (3)
This course establishes risk communication as a distinct sub-discipline within the communication discipline. Ethical considerations are paramount in all areas covered in the course. Theories of risk communication such as mindfulness, sensemaking, chaos, image repair, issues management, the constraints of structuration, and renewal discourse are discussed in terms of pre-crisis, crisis, and post-crisis. Applied research areas such as best practices, high-reliability organizations, terrorism, and health risks are also considered. Ultimately, the course provides an overview of the established and emerging perspectives on risk and crisis from the communication perspective.

**CJT 722 SEMINAR IN CRISIS COMMUNICATION.** (3)
This course follows the crisis communication management process through the stages of pre-crisis, crisis, and post-crisis. The pre-crisis stage discusses planning and environmental scanning. The crisis stage discusses communication strategies for image restoration. The post-crisis stage depicts crisis as an opportunity for organizational learning and for rebuilding or expanding public trust. The course uses a case study approach throughout.

**CJT 723 SEMINAR IN TRAINING AND CONSULTING.** (3)
This graduate course explores communication training and consultation as a research and instructional focus for students interested in applied communication. Students will learn how to identify and assess communication competence and how to develop training programs to enhance communication competency.

**CJT 725 SEMINAR IN ORGANIZATIONAL COMMUNICATION: (Subtitle required).** (3)
This course is concerned with theory and research relevant to organizational communication and related areas of interest. Special attention is given to various topics relevant to a specific subtitle. May be repeated to a maximum of six credits under a different subtitle. Prereq: Consent of instructor. Graduate standing in communication or consent of instructor.

**CJT 726 COMMUNICATION LEADERSHIP STUDIES.** (3)
The primary purpose of this course is to extend students’ theoretical understanding of leadership from a communication perspective. Specifically, this course is designed to (1) sharpen the students’ understanding of the role of communication in developing effective leadership behaviors; (2) familiarize students with leadership as it relates to the communication process; (3) involve students in major term projects which incorporate current leadership theory and research; and (4) enhance students’ understanding of published research in leadership communication.

**CJT 730 SEMINAR IN MASS MEDIA AND PUBLIC POLICY (Subtitle required).** (3)
The role of mass communications media in making public policy and the effects of public policies on the mass media. One subject area will be investigated each semester; typical topics are (1) political campaign communications; (2) censorship; (3) controversial public issues; (4) rights; (5) international and world agreements. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 630 and graduate standing in communication or consent of instructor.

**CJT 731 SEMINAR IN INTERPERSONAL COMMUNICATION (Subtitle required).** (3)
Consideration of special problems in interpersonal communication with emphasis on emergence of theory and implications for further research. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 631 and graduate standing in communication or consent of instructor.

**CJT 745 SEMINAR IN MASS COMMUNICATION (Subtitle required).** (3)
Consideration of selected topics in mass communication theory and research. May be repeated under a different subtitle to a maximum of six credits. Prereq: CJT 631 and graduate standing in communication or consent of instructor.

**CJT 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**CJT 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examinations.

**CJT 751 ADVANCED TOPICS IN COMMUNICATION THEORY AND CONSTRUCTION.** (3)
Intensive examination of selected topics important to the construction, development, and testing of communication theories and problems. Prereq: Completion of required first-year curriculum for the Ph.D.

**CJT 764 ADVANCED TOPICS IN QUALITATIVE RESEARCH METHODS.** (3)
A focused treatment of one or more issues, topics, or problems in qualitative research methodology in communication, such as ethnography, discourse analysis, semiotics, or historical methods. Prereq: CJT 664 or consent of instructor.

---

**CLA 229 THE ANCIENT NEAR EAST AND GREECE**
Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as HIS 229.)

---

**CLA 100 ANCIENT STORIES IN MODERN FILMS.** (3)
This course will view a number of modern films and set them alongside ancient literary texts which have either directly inspired them or with which they share common themes. In the first part of the course, we will consider the relationship between ancient Greek epic, tragic, and comic literature and the modern cinema. In the second part, we will look at a number of ways in which the city of Rome has been treated as both a physical place and as an idea or ideal in the works of both ancient Romans and modern film-makers.

**CLA 131 MEDICAL TERMINOLOGY FROM GREEK AND LATIN.** (3)
Latin and Greek roots, prefixes, and suffixes as found in medical terminology. Primarily for pre-medical, pre-dental, pre-nursing and pre-veterinary students, but others will be admitted for help in vocabulary building.

**CLA 135 GREEK AND ROMAN MYTHOLOGY.** (3)
The Greek myths studied both from the standpoint of their meaning to the Greeks and Romans and from the standpoint of their use in later literature and in everyday life. Fulfills Gen Ed Inquiry, Humanities.

---

**CLA 210 THE ART OF GREECE AND ROME.** (3)
A survey of the major forms of art in ancient Western Asia, Greece, and Rome, with emphasis on the comparative typology and cultural significance of the monuments.

---

**CLA 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT.** (3)
Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as HIS 229.)
### Course Descriptions

**CLA 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE.** (3)
Covers the conquest of Alexander the Great, and the main features of the Hellenistic World, the Roman Republic and the Roman Empire to the death of Constantine. (Same as HIS 230.)

**CLA 261 LITERARY MASTERPIECES OF GREECE AND ROME.** (3)
A survey of major Greek and Roman literary works. Attention will be focused on the various genres of Classical literature, and the course will include comparative analysis of Greek and Latin literary pieces.

**CLA 314 ANCIENT (Subtitle required).**
Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be on selected periods or media of artistic and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A H 105 recommended. (Same as A-H 314.)

**CLA 331 GENDER AND SEXUALITY IN ANTIQUITY.** (3)
A survey of the construction of gender, sexuality, and their relation to and expression in the societies of ancient Greece and Rome. Gender roles, marriage, social problems concerning sex and virginity, and different ways of understanding sexuality and gender in historical contexts are examined through the study of ancient literature, art and the insights of contemporary scholarship.

**CLA 382 GREEK AND ROMAN RELIGION.** (3)
A broad examination of the varieties of religious practice and experience in the ancient Mediterranean world, particularly in Greece and Rome, with emphasis placed on how dramatically ancient religious concepts and systems differ from those of the modern world.

**CLA 390 BACKGROUNDS TO AND EARLY HISTORY OF CHRISTIANITY TO 150 CE.** (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphasis is placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 390.)

**CLA 391 CHRISTIANS IN THE ROMAN EMPIRE.** (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 391.)

**CLA 450G SPECIFIC TOPICS IN CLASSICAL STUDIES (Subtitle required).** (3)
This course offers advanced study of a particular topic in classical studies not covered in other CLA courses. The field of study for this course is broadly conceived, and can include aspects of Greek or Latin philology and literature, as well as the history and culture of antiquity, archaeological material, literary theory and criticism, the classical traditions in the humanities, and pertinent topics in the Middle Ages and Renaissance. Format includes lectures and discussions, assigned and supplementary readings, and paper writing. May be repeated to a maximum of nine credits with different topics.

**CLA 462G TOPICS IN CLASSICAL LITERATURE (Subtitle required).** (3)
A study of a specific genre or genre, or author or set of authors, selected from Greek and Roman literature read in English translation. In addition to developing an appreciation of the works studied and their ongoing contribution to world literature, the course will examine various methods of literary analysis and criticism as well as the historical, social, and cultural context of these works in classical antiquity. The course is especially suited for students outside the classical languages who wish to acquire a sophisticated understanding of classical culture and for students interested in comparative literary studies.

**CLA 509 ROMAN LAW.** (3)
An introductory history to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as HIS 509.)

### COURSES IN LATIN

**CLA 101 ELEMENTARY LATIN.** (4)
An introduction to the study of classical Latin. Emphasis is placed on learning to read the language. Some attention is given to Latin literature and Roman civilization.

**CLA 102 ELEMENTARY LATIN.** (4)
A continuation of CLA 101. Prereq: CLA 101 or the equivalent.

**CLA 201 INTERMEDIATE LATIN.** (3)
Review of grammatical principles together with readings from Latin prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Latin literature. Emphasis is placed on developing reading ability. Prereq: CLA 102 or two years of high school Latin or equivalent.

**CLA 202 INTERMEDIATE LATIN.** (3)
A continuation of CLA 201. Prereq: CLA 201 or three years of high school Latin or equivalent.

**CLA 205 COMPREHENSIVE INTERMEDIATE LATIN.** (3)
An accelerated course offered in the summer session designed to take the student through the material normally covered in the two intermediate-level Latin courses (201 and 202). This course is intended to expand the student’s knowledge of the vocabulary, grammar, and prose idiom of classical and post-classical Latin. There will also be discussions of Latin art, literature, history, and culture and, as time permits, Latin’s role in the development of the English language. Oral exercises will also be part of the instruction. Prereq: CLA 202 or equivalent, or permission of the instructor.

**CLA 212 ACCELERATED LATIN.** (3)
An intensive course that covers, in one semester, all the morphology, syntax, and grammar of Latin that is required to bring students with no background in the language to the level at which they can begin to read unaltered Latin texts.

**CLA 301 LATIN LITERATURE I (Subtitle required).**
An introduction to the literature of Republican Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

**CLA 302 LATIN LITERATURE II (Subtitle required).** (3)
An introduction to the literature of Imperial Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

**CLA 501 LATIN COMPOSITION.** (3)
The course is designed for students with a good command of Latin morphology and basic knowledge of Latin syntax. The participants will deepen their knowledge of Latin syntax, internalize the principles of Latin grammar and usage, and develop a sensitivity to prose style. The course will involve readings from Latin authors from all periods, and exercises in Latin prose composition. It will foster familiarity with the language through exercises that will go beyond simple translation from English. English, not Latin, will be the spoken language used in this course. Prereq: Proficiency in Latin above the 300 level.

**CLA 521 ADVANCED LATIN COMPOSITION AND READING.** (3)
This course continues the study of Latin composition, concentrating on the compound sentence, modes of expression in subordinate clauses, and the figures of speech in rhetoric. Students will become acquainted with masterpieces of Latin prose from all periods, including Cicero, Sallust, Livy, Petronius, Pliny Minor, Einhard, Abelard, Erasmus of Rotterdam, Thomas More. This course, unlike CLA 501, will be conducted entirely in Latin, with the objective of further enhancing the students’ abilities to express themselves in correct Latin prose. Prereq: Consent of instructor.

**CLA 524 THE LATIN LITERATURE OF THE REPUBLIC (Subtitle required).** (3)
A study of one or more works selected from the beginnings of Roman literary history to 31 B.C., the period of such writers as Cicero, Caesar, Sallust, Plautus, Terence, Lucretius, and Catullus. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and or poetry, including epic, lyric, elegiac, pastoral, and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

**CLA 525 THE LATIN LITERATURE OF THE EMPIRE (Subtitle required).** (3)
A study of one or more works selected from approximately 31 B.C. to the end of the Western Empire, the period of such writers as Livy, Tacitus, Pliny, Seneca, Virgil, Horace, Ovid, and Juvenal. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and or poetry, including epic, lyric, elegiac, pastoral, and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

**CLA 528 LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required).** (3)
A study of one or more works selected from late Latin literature of late antiquity, or after the fall of the empire in the west, from approximately 200 AD into the Middle Ages and Renaissance. Authors and works may include early Christian Latin writers such as Augustine, late antique pagan writers such as the historian Ammianus, as well as medieval poetry, the Latin novel, medieval Christian writers, and Renaissance figures such as Erasmus. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, as well as the historical and cultural setting of the text and author. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

**CLA 611 LATIN OF ANCIENT ROME AND THE MIDDLE AGES (Subtitle required).** (3)
This course is based on extensive reading of Latin texts taken from the Roman through the...
Medieval periods. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding such work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 612 LATIN OF THE MIDDLE AGES AND THE MODERN WORLD (Subtitle required). (3)
This course is based on extensive reading of Latin texts taken from the Medieval through the Modern period. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding such work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 624 SEMINAR IN THE LATIN LITERATURE OF THE REPUBLIC (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem in the period of the Roman Republic. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 625 SEMINAR IN THE LATIN LITERATURE OF THE EMPIRE (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem in the period of the Roman Empire. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 626 SEMINAR IN LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem from Latin literature of late antiquity or early Christianity, or after the fall of the empire in the west, including the Middle Ages and Renaissance. Intensive study of Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

COURSES IN GREEK
CLA 151 ELEMENTARY GREEK. (4)
An introduction to the study of Classical Greek. Emphasis is placed on learning to read the language. Some attention is given to Greek literature and civilization.

CLA 152 ELEMENTARY GREEK. (4)
A continuation of CLA 151. Prereq: CLA 151 or equivalent.

CLA 251 INTERMEDIATE GREEK. (3)
Review of grammatical principles together with readings from Greek prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Greek literature. Emphasis is placed on developing reading ability. Prereq: CLA 152 or equivalent.

CLA 252 INTERMEDIATE GREEK. (3)
The reading of Greek prose and poetry. Textual and literary analysis of selections from classical authors and the New Testament. Prereq: CLA 251 or equivalent.

CLA 350 PREPARING TO READ GREEK TEXTS. (3)
This course completes the study of fundamentals of the grammar and syntax of Classical Greek and prepares the student to read original Greek texts with competence and confidence. Prereq: CLA 252 or equivalent, or permission of instructor.

CLA 551 GREEK POETRY AND DRAMA (Subtitle required). (3)
A study of one or more works of Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 655 SEMINAR IN GREEK PROSE (Subtitle required). (3)
Graduate seminar in Greek prose literature, which may include history, biography, satire, and the novel. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

OTHER ADVANCED COURSES
CLA 395 UNDERGRADUATE INDEPENDENT STUDY IN CLASSICS. (1-3)
An independent investigation of a topic, usually outside of or in considerably greater depth than available in the regular course offerings, in Greek and/or Roman language, literature, history, or culture. The course is designed for advanced undergraduate students under the supervision of a faculty member, and usually takes the form of directed readings, writing, and discussion, with tutorial meetings with the instructor no less than once a week. An advanced undergraduate research paper or equivalent project is the standard product of the course. May be repeated to a maximum of 6 credits. Prereq: Advanced undergraduate experience in Classics and permission of the instructor.

CLA 480G STUDIES IN GREEK AND LATIN LITERATURE (Subtitle required). (3)
A study of one or more works of Classical literature, either Greek or Latin, is designed to offer study in a particular text or author meeting a particular need or demand for graduate students from other undergraduate and advanced graduate students in Classics. The course is not intended for Classics graduate students. Mastering the language of the text is a fundamental objective of this course, but the historical, social, and cultural milieu will also be studied. May be repeated for credit up to a maximum of six hours.

CLA 580 INDEPENDENT WORK IN CLASSICS. (3)
Courses to meet the needs of the student, including those who wish to study Medieval and/ or Renaissance Latin, will be arranged in various areas. May be repeated to a maximum of 12 credits. Prereq: Major standing of 3.0 in the department or consent of instructor.

CLA 615 MANUSCRIPT CULTURES. (3)
This course examines how the vehicle of the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as HIS 615.)

CLA 616PAPELOGRAPHY. (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, expand abbreviations and acronyms appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the "archaeology of the book." The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the manuscripts. (Same as HIS 616.)

CLA 630 SEMINAR IN CLASSICAL LITERATURE AND CULTURE (Subtitle required). (3)
This graduate seminar offers advanced, intensive study in two particular approaches to the study of Classics, requiring a broader and more inclusive approach beyond the scope of the typical Greek or Latin seminar. These are: 1) the coordinated study of works of both Greek and Latin literature, and 2) the study of a specific research area in classical studies and culture. One of these areas will be the focus of each course each time it is offered. Topics in the coordinated study of Greek and Latin literature can take various forms, such as the passions in Greek and Roman poetry, comparative Greek and Latin drama, Homer and Virgil, etc. Research in classics and culture involves extensive reading of a large body of sources and scholarship on a specific topic of current scholarly interest, along with the use of texts in the original language(s) for course assignments and papers. Appropriate competence in reading Latin and/or Greek texts is expected of all students in the course. Topics may include a focused aspect of Greek and/or Roman society, material culture, early Christianity—and its relation to classical culture, aspects of Medieval or Renaissance culture, or the ongoing influence of classical stories, ideals, and cultural forms in modern media. May be repeated for up to six credits on different topics. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 695 INDEPENDENT STUDY. (1-3)
Independent investigation of a problem under supervision of a graduate faculty member, or directed readings, writing, and discussion in small groups on topics outside the usual seminar offerings, guided by a graduate faculty member. May be repeated to a maximum of nine credits.
**University of Kentucky**

### Course Descriptions

**CLA 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**CLA 768 RESIDENCE CREDIT FOR MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

**CLA 790 RESEARCH IN THE TEACHING OF CLASSICAL LANGUAGES.** (3)
Problems in the teaching of Latin and/or Greek in secondary and/or higher education. Objectives, methods, preparation of materials, development of curricula, or the history of the field. Prereq: CLA 530 or the equivalent.

### CLD  Community and Leadership Development

**CLD 100 INTRODUCTION TO COMMUNITY AND LEADERSHIP DEVELOPMENT.** (1)
The course explores how communities of place and interest influence our lives and how these different types of communities are related to the media and leadership. Introduces the intellectual frameworks underlying this field as well as the types of research and outreach done by faculty.

**CLD 102 THE DYNAMICS OF RURAL SOCIAL LIFE.** (3)
Introduces major concepts of sociology by exploring social, political and cultural issues confronting rural society and American agriculture, such as: population change, industrialization, energy developments, agricultural change. Student may not receive credit for both this course and SOC 101.

**CLD 225 COMMUNITY AND COMMUNICATION: EXPLORING THEIR INTERSECTIONS.** (3)
This course will explore the inextricable link between community and communication by examining the social structure of communities and the media residing within them. Particular emphasis will be placed on the availability of information to citizens and in turn how this information environment facilitates/thwarts social interaction.

**CLD 230 INTRAPERSONAL LEADERSHIP.** (3)
This course is designed to provide a foundation for individuals “to get to know themselves better” in the context of leadership. Examination of effective leader characteristics, personality traits, motivation, personal leadership vision and other concepts will encourage students to develop a better understanding of their own leadership skills and perspectives. In addition, students will determine their own personality style, and learn how to best use this style when leading others. Ultimately, this type of intrapersonal knowledge will serve as the building block for deeper exploration into the field of leadership.

**CLD 250 READING CRITICALLY AND WRITING WELL: COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT.** (3)
This course will provide students with a foundation for critical thinking through an emphasis on reading, writing and analytical discussions addressing basic agricultural topics, controversial agricultural topics and specific topics in community communications and leadership development. Prereq: ENG 104 and sophomore status. Primary registration access limited to majors and remaining seats open during secondary registration.

**CLD 260 COMMUNITY PORTRAITS.** (3)
This course introduces the social science concept of community. The focus will be on definitions of community, and the different types of communities that exist in society. Students will gather and analyze information about real communities that represent different types of community.

**CLD 300 FOUNDATIONAL THEORIES IN COMMUNITY AND LEADERSHIP DEVELOPMENT.** (3)
This course illustrates the role of social theories and research. More importantly, it addresses the question, “How do we apply theory to guide our understanding of the world around us?” Students will study theories common to multiple social science contexts (communications, leadership, community and education) and, following critical analysis, describe how they are applied within various situations. Students will be expected to integrate the theories into a personal holistic viewpoint that affects their lives. Prereq: Major standing in CLD.

**CLD 305 RESEARCH METHODS IN COMMUNITY AND LEADERSHIP DEVELOPMENT.** (3)
This course will familiarize students with research concepts, methods, and skills used in community and organizational development and communication. The course focuses on applied research, such as secondary data analysis, survey design, focus groups, key informant interviews and content analysis. In addition, the course considers the politics of information and ethical concerns in social research. Prereq: Major standing and CLD 300 (may be taken concurrently).

**CLD 325 WRITING FOR COMMUNITY MEDIA.** (3)
This 3-hour skills course will teach students how to write clearly, concisely and accurately for various community media, including print, radio, television and new social media. It provides a broad-based understanding of writing and communicating to community audiences. Prereq: Major standing in CLD plus completion of graduation writing requirement.

**CLD 330 INTERPERSONAL SKILLS FOR TOMORROW’S LEADERS.** (3)
This course provides fundamental leadership theories, models, and perspectives to aid students in conducting interpersonal relationships in their daily lives, and help students acquire skills basic to becoming a leader in their professional lives. Each student will begin developing a foundation of practical leadership applications. Prereq: Major standing in CLD.

**CLD 340 COMMUNITY INTERACTION.** (3)
Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attitudes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or SOC 101 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as SOC 340.)

**CLD 360 ENVIRONMENTAL SOCIOCULTURE.** (3)
A sociological study of the inter-relationship between human societies and the natural environment. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as SOC 360.)

**CLD 362 FIELD EXPERIENCE IN CLD.** (3)
Supervised experiences in businesses, agencies or government. Required of all Community Communications and Leadership Development majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Junior standing, majors only.

**CLD 370 LEARNING IN SOCIETY.** (3)
Learning in Society is designed to assist students in identifying and evaluating human learning and development within various social contexts. This course focuses on the impact social interactions have on human cognition, emotion and identity. Theoretical foundations for this course include social learning, social integration, multiple intelligences, emotional intelligence, systems psychology, and identity development. Prereq: Major standing in CLD or CTE students admitted to TEP.

**CLD 375 CONTEMPORARY ADULT LEARNING.** (3)
This course expands on adult learning theory first presented by Malcolm Knowles and focuses on the idea of lifelong learning, differences between pedagogy and andragogy, fundamental andragogical concepts, and the role that adult learning professionals play in the adult learning process. Finally, an international context will be explored by comparing and contrasting adult education systems in the U.S. and around the world. Prereq: Major standing in CLD or CTE: students admitted to TEP.

**CLD 380 GLOBALIZATION: A CROSS-CULTURAL PERSPECTIVE.** (3)
A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as SOC 380.)

**CLD 395 SPECIAL PROBLEMS IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT.** (1-3)
Directed independent study of a selected problem in the field of community communications and leadership development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

**CLD 399 EXPERIENTIAL LEARNING IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT.** (1-3)
A field-based learning experience, under faculty supervision, in the application of community communications and leadership techniques in agricultural/public issues. May be repeated to a maximum of six credits. Offered on a pass/fail basis only. Prereq: Consent of instructor and completion of learning contract.

**CLD 400 AGRICULTURAL COMMUNICATIONS CAMPAIGNS.** (3)
Exploration of communications campaigns and strategies in the agricultural sector. Students will learn how to plan and enact communications campaigns centered on agricultural issues and audiences. Prereq: Primary registration access limited to majors and remaining seats open during secondary registration.

**CLD 401 PRINCIPLES OF COOPERATIVE EXTENSION.** (3)
Philosophy, history, and development of Cooperative Extension Service; evaluation of instructional techniques; leadership training; and practice in use of Extension methods. Open to junior and senior students.

**CLD 402 PRINCIPLES OF LEADERSHIP.** (3)
This course is designed to provide an introduction to leadership. Its focus is the development of an understanding of leadership theories and styles. You will also learn strategies for successful leadership. The introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership skills and styles for success, and 3) examination of the responsibilities of leadership. Prereq: Admission to the program or consent of instructor. (Same as EDL 402.)

**CLD 403 LEADERSHIP AND COMMUNICATION.** (3)
This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues
of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as EDL 403.)

CLD 404 CONTEMPORARY LEADERSHIP APPLICATIONS. (3)
This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as EDL 404.)

CLD 420 SOCIOCULTURAL COMMUNICATIVE RATIONALE WITH EMERGING TECHNOLOGIES. (3)
A sociocultural study of issues relevant to communities. Topics may include: communication, interaction and relationships within and beyond the community; social inequality and social processes within communities such as social networks, social capital, power and decision-making, and social change. Prereq: SOC 101 or RSO 102 or CLD 102; and one of the following: SOC 302 or 304 or CLD 405; or consent of instructor. (Same as SOC 420.)

CLD 430 LEADING IN COMMUNITIES: VISION, ACTION, AND CHANGE. (3)
This course examines the nuances of leadership within communities. To learn what makes an effective community leader and the role a leader plays in community action, students will explore the importance of framing ideas, mobilizing resources, and developing social capital. This course expands on theories to highlight correlations with servant leadership, community behavior, and collaborative leadership styles. Finally, working with community visioning, change and ambiguity will reinforce the need for flexibility within the community leader's toolkit. Prereq: Major standing in CLD.

CLD 440 COMMUNITY PROCESSES AND COMMUNICATION. (3)
This course examines the relationship between community organization and change and the media. Special emphasis is given to the role of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD 430 or consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration. (Same as SOC 440.)

CLD 460 COMMUNITY DEVELOPMENT AND CHANGE. (3)
This course examines change and change management within communities and organizations. This includes looking at the change process through the eyes of innovation, opinion leader and community member. In addition to individual skill development, this course will introduce a vision of an ideal organization/community, one that supports innovation and creativity, knowledge exchange and application and collaboration; a culture that makes productive change a part of the everyday work, encouraging initiative and promoting viability in today's society. This course weaves together theoretical and experiential threads using insights gained from readings, industry-based examples, case studies, class assignments and experiential activities. Prereq: Major standing in CLD.

CLD 465 TOPICS IN COMMUNITY COMMUNICATIONS
Subtitle required. (3)
Intensive study of a specialized topic in community communications. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 470 TOPICS IN LEADERSHIP
Subtitle required. (3)
Intensive study of a specialized topic in leadership studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 475 TOPICS IN NON-FORMAL EDUCATION
Subtitle required. (3)
Intensive study of a specialized topic in non-formal education. May be repeated under different subtitles. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 480 TOPICS IN COMMUNITY
Subtitle required. (3)
Intensive study of a specialized topic in community studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 490 SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3)
A capstone course for seniors in community communications and leadership development. Presentations, research papers, outside speakers and career guidance will be significant course components. Prereq: Senior standing in the major, or consent of instructor.

CLD 495 TOPICAL SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT
Subtitle required. (1-3)
Topical seminar using readings, discussions, and papers to focus on current issues of significance to community communications and leadership development. May be repeated to a maximum of twelve credits under different subtitles. Prereq: Consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 497 PROFESSIONAL PRACTICUM IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
This is a cooperative educational program between the Community and Leadership Development majors at the University of Kentucky and approved employers who furnish facilities and instruction that help students acquire the skills and knowledge required in their chosen field. Ultimately, this is a dually beneficial relationship; stakeholder relations are improved while students have an opportunity to build relationships/networks that could encourage future career development. Prereq: Major standing in CLD; senior standing.

CLD 517 RURAL SOCIOLOGY. (3)
A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; and the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 517.)

CLD 525 COMMUNITY DIVERSITY AND MEDIA. (3)
This course covers how media, both traditional news media and newly emerging digital communication technologies, relate to community diversity. Specifically, the course focuses on the relationships between media and community (power) structure, community institutions/organizations, social movements and minority groups, urban/rural communities, gender/ race/ethnicity/class and more. Prereq: Major standing in CLD or graduate student status.

CLD 530 FUNDAMENTALS OF ORGANIZATIONAL LEADERSHIP. (3)
This course explores the existing and emerging knowledge base for leadership within organizations. Leadership and motivation of others requires individuals to go beyond their basic knowledge of managing others and learn how cultures, structures, and individuals in organizations interact within the system. This course highlights correlations with organizational behavior, team building, and collaborative leadership styles. In this class, students will explore organizational culture, team synergy and individual leadership capital. Prereq: Major standing in CLD or graduate student status.

CLD 534 SOCIOLOGY OF APPALACHIA. (3)
A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/SOC 534.)

CLD 560 COMMUNITY INEQUALITIES. (3)
This course focuses on the emergence and persistence of community inequalities in contemporary American society. This begins by identifying, describing, and analyzing inequalities within and among American communities and then considering the implications of these inequalities for organizational and community processes. The essential questions that will guide this course are: How do we define, measure and evaluate the differences among communities? What factors contribute to the emergence and persistence of the inequalities among communities? What are the consequences of these inequalities for the people who live in these communities? Prereq: Major standing in CLD or graduate student status.

CLD 575 SCHOOLS, COMMUNITY AND SOCIETY.
This course highlights the integrative knowledge base of contemporary and historical societal norms, distinctive communities and educational systems. Prereq: Major standing in CLD; CTE students admitted to TEP; or graduate student status.

CLD 610 EXPERIENTIAL EDUCATION: PROCESS AND PRACTICE. (3)
This course is designed for students to examine and apply theoretical and practical foundations of Experiential Education within classroom and community-based educational environments.

CLD 620 GRADUATE STUDY IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1)
This course is an introduction to the interdisciplinary field of Community and Leadership Development (CLD). CLD reflects the multidisciplinary fields of faculty in the department: Rural Sociology, Community Development, Community Communications, Leadership Development and Agricultural Education.

CLD 630 INDIVIDUAL AND GROUP DYNAMICS. (3)
This course is designed as an advanced course exploring the dynamics involved in individual and group situations. Specifically, students will explore basic psychological and social psychological processes shaping human behavior and learn to apply the knowledge of these processes in educational, organizational and community settings.

CLD 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3)
An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT/SOC 640.)

CLD 650 APPLIED COMMUNITY COMMUNICATIONS
This course familiarizes students with advanced writing and editing techniques, common forms of workplace writing, audience analysis, content analysis, and graphic design tips and tools. Discussion will include some of the larger issues surrounding community communications, such as discourse communities, bias, and ethics. Prereq: Graduate standing.

CLD 660 ADVANCED LEADERSHIP THEORY AND PRACTICE. (3)
This course has been designed to introduce the theoretical and research foundation of leadership studies through current journal articles and text chapters and also emphasizes multiple dimensions and contexts that influence leadership dynamics.

CLD 665 PROGRAM DEVELOPMENT AND EVALUATION. (3)
Course is designed to help students design, implement, and evaluate educational and social programs using a logic-based framework. (Same as SOC 665.)

CLD 670 COMMUNITY ENGAGEMENT. (3)
This course is designed as a service-learning/community engagement experience. It is organized with a field component related to the student’s area of interest and an in-class experience that
provides students with the opportunity to share and process their field experiences and to learn and grow from them through a variety of interactive exercises, readings, films and guest presentations.

CLD 671 ADVANCED METHODS OF TEACHING. (3) The principles of method applied to teaching in the fields of classroom and community-based education. Prereq: Teaching experience within a classroom or community-based educational setting.

CLD 672 ADULT EDUCATION IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

CLD 673 CURRENT TRENDS IN AGRICULTURAL EDUCATION. (3) Class work pertains to current trends and significant developments in agricultural education. May be repeated to a maximum of nine credits.

CLD 675 THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY. (3) This course is designed to explore the dynamics of community development and leadership communication within both geographic-boundary communities and communities of taste. (Same as SOC 675.)

CLD 676 SUPERVISION IN AGRICULTURAL EDUCATION. (3) This course includes practice in teaching for observation by others, student teaching, and school visiting.

CLD 678 COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES. (3) A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture.

CLD 684 STATISTICAL ANALYSIS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) The purpose of this course is to develop an overview and basic understanding of descriptive and inferential statistics. As a result, students will be able to organize and summarize quantitative data; interpret data; make generalizations from sample data to populations or theory; and, read and understand research reports.

CLD 685 COMMUNITY DEVELOPMENT THEORY AND PRACTICE. (3) This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as SOC 685.)

CLD 686 RESEARCH DESIGN. (3) This course is an introduction to research design/methodology in social science research. The course emphasizes conceptualizing and working with the various components of a research inquiry and in particular how these components work together and strengthen the overall research design.

CLD 691 SOCIOLOGY OF FOOD AND AGRICULTURE. (3) This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as AEC/SOC 691.)

CLD 694 THE ADMINISTRATION OF AGRICULTURAL EDUCATION. (3) A course designed for superintendents, high school principals, and other administrators. Its purpose is to prepare administrators and supervisors for leadership in agricultural education. (Same as EDL 694.)

CLD 748 MASTER'S THESIS RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CLD 758 CREATIVE COMPONENT IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) This course offers a non-thesis option in Community and Leadership Development for students interested in completing a practitioner-based scholarly project. Prereq: All course work toward the degree must be completed and approval of the student’s Advisory Committee is required.

CLD 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours. Prereq: All course work toward the degree must be completed.

CLD 777 TOPICAL SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) Advanced study of topics of current importance in community and leadership development such as dispute resolution, volunteer management, or advanced program design and evaluation. May be repeated to a maximum of six credits.

CLD 780 SPECIAL PROBLEMS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6) Supervised individual study on selected issues in community and leadership development. May be repeated to a maximum of six credits. Learning contract must be filed with Director of Graduate Studies.

CLD 790 RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6) Supervised individual graduate research projects on selected issues in community and leadership development. May be repeated to a maximum of six credits. Research Learning contract must be filed with the Director of Graduate Studies.

CLM Clinical Leadership and Management

CLM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3) Review of the wellness-illness spectrum and the societal response to health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. (Same as HHS/HSM 241.)

*CLM 350 HEALTH POLICY AND POLITICS. (3) This course will address the development of the past and current US health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: HHS 101, HHS 102 and CLD 241. Student admitted to the CLM or HHS program or consent of instructor. (Same as HHS 350.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

*CLM 351 HEALTH SERVICES ADMINISTRATION. (3) Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as HHS/HSM 351.)

CLM 353 ETHICS IN HEALTHCARE. (2) The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed. (Same as HHS 353.)

CLM 354 HEALTH LAW. (3) Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HHS/HSM 354.)

CLM 355 FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS. (3) A review of financial management practices in health care institutions. Course will analyze regulatory and third party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HSM 355.)

*CLM 405 EPIDEMIOLOGY AND BIOSTATISTICS. (3) This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis in the distribution and dynamic behavior of disease within populations. Etiologic factors, modes of transmission and pathogenesis will be conceptualized and examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious disease, rates of morbidity and mortality, sensitivity, specificity, and predictive values strategies used in epidemiological studies to include measures of disease effect, validity, reliability; sampling methods and computer-based biostatistical analysis that emphasize the generalized linear model and forms of SEM as appropriate for an upper division undergraduate course. Prereq: Completion of CLM 241, CLM 350, and admission to the CLM Program or consent of instructor. (Same as HHS 405.)
Course Descriptions

*CLS 444 LEADERSHIP AND HUMAN RESOURCE MANAGEMENT. (3)
This course focuses on leadership and managerial roles and responsibilities, with particular emphasis on organizational design, theory, and behavior. Human resource management, team leadership, and strategies for promoting employee motivation, loyalty, and productivity will be discussed. Other topics to be discussed include writing a business plan, financial and budgetary considerations, public relations, and quality and productivity. Laboratory compliance, government regulations, and accreditation will also be covered. Prereq: Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor.

*CLS 445 QUALITY AND PRODUCTIVITY IMPROVEMENT AND EVALUATION. (3)
A core program course that focuses on leadership and management knowledge, skills, and practices that promote clinical quality, efficiency, and productivity. Methods to measure, monitor, and evaluate quality and productivity will be discussed. Prereq: Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor.

*CLS 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)
Theoretical foundations for health planning. History of health planning and regulation. Special attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor. (Same as HSM 452.)

CLM 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical issues and problems regarding the roles, trends, and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as HHS 480.)

*CLS 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT. (1-3)
Students will gain practical general training and experiences in the healthcare workplace with a focus on exposure/experience in clinical leadership and management. The CLM faculty in coordination with the practicum coordinator will arrange these experiences with the site employer/manager and develop an individualized plan for the student at each site. The plan relates the workplace training and experiences to the student's general and technical course of study. Prereq: Consent of instructor; HHS 102 and HHS 241; student must receive a grade of C or better in previous practicum to be able to re-enroll in this course. (Same as HHS 501.)

CLM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR. (3)
This course examines the structure and function of the long-term care sector with emphasis on nursing homes and the role of noninstitutional alternatives. Analysis focuses on the impact of changes in organizational policy, interorganizational relationships, newly emerging treatment modalities, and the influence of the external organizational, economic, and political environment. Prereq: A course in health care delivery systems or permission of instructor. (Same as HSM 510.)

*CLS 595 DIRECTED STUDIES. (1-3)
Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 355, CLM 405, CLM 444, CLM 445, CLM 452, CLM 495, or consent of instructor. (Same as HSE 595.) This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CLSM Clinical Laboratory Sciences

CLSM 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of six credits. Prereq: Admission to the Clinical Laboratory Sciences Professional Program or consent of instructor. (Same as AT 500, HS 500, CNU 500, CD 500, PAS 500.)

CLSM 501 SEMINAR IN ADVANCED HEMATOLOGY.

CLSM 520 REPRODUCTIVE LABORATORY SCIENCE.

CLSM 610 ETHICS IN CLINICAL SCIENCES RESEARCH.

CLSM 816 HISTOTECHNOLOGY II.

CLSM 832 BASIC CLINICAL CHEMISTRY. (1)
The study of the theory and practice of clinical chemistry laboratory testing, including quality control, instrumentation principles, problem-solving, and appreciation of accuracy of and confidentiality for patient laboratory findings. Prereq: Admission into the Clinical Laboratory Sciences Professional Program or consent of instructor.

CLSM 833 BASIC HEMATOLOGY. (1)
The theory and practice of clinical hematology laboratory testing, including manual and automated procedures, instrumentation principles, quality assurance, and problem-solving. Hematopoiesis, hemostasis, and blood cell function are discussed as they relate to clinical laboratory practice. Special emphasis is placed on the relationship of clinical hematology testing to pathophysiology and on the acquisition of valid test results. Prereq: Admission into the Clinical Laboratory Sciences Program or consent of instructor.

CLSM 838 BASIC IMMUNOHEMATOLOGY. (1)
An introduction to the principles and practice of blood banking follows a review of classic genetics and fundamentals of immunology. The course includes didactic instruction in blood group systems; donor selection and component preparation; antibody detection and identification and compatibility testing. Prereq: Admission to the Clinical Laboratory Sciences Program and CLSM 835 (or equivalent) or consent of instructor.

CLSM 851 BASIC CLINICAL MICROBIOLOGY. (1)
The study of medically significant microbiology, including commensal flora, normal flora and pathogens. Lectures also cover microbial physiology, interactions between host and pathogenic microorganisms, and the clinical and epidemiological consequences of these interactions. Prereq: Admission to the Clinical Laboratory Sciences Program.

CME Chemical Engineering

CME 006 THE ENGINEERING PROFESSION (JUNIOR AND SENIOR). (0)
Activities of the Student Chapter of the American Institute of Chemical Engineers (for junior and senior year chemical engineering students). Lecture: one hour per week. May be repeated three times. Prereq: Chemical engineering major.

CME 101 INTRODUCTION TO CHEMICAL ENGINEERING. (1)
An introduction to the chemical engineering profession including: problem-solving techniques, use of computers, computer problems and lectures by practitioners.

CME 200 PROCESS PRINCIPLES. (3)
A course in material and energy balances, units, conversions, tie elements, recycle, bypass, equations of state, heat effects, phase transitions, and the first and second laws of thermodynamics, applications in separation processes involving equilibrium reactions and energy exchange. Prereq: “C” or better in MA 113; “C” average in CHE 105 and 107; prereq or concur: MA 114, PHY 231.

CME 220 COMPUTATIONAL TOOLS IN CHEMICAL ENGINEERING. (3)
An introduction to computational tools used in chemical engineering, such as Microsoft Excel, MATLAB, and Aspen. Prereq: Grade of “C” or better in CME 200.

CME 320 ENGINEERING THERMODYNAMICS. (4)
Fundamentals of thermodynamics, review of first law, second and third laws, VL, LL and SL equilibria, homogeneous and heterogeneous chemical reaction equilibria. Prereq: MA 213, PHY 231, and “C” or better in CME 200.

CME 330 FLUID MECHANICS. (3)
Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows; flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing; CME 220, 320; MA 214.

CME 395 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)
Individual work on some selected problems in the field of chemical engineering. May be repeated one time. Prereq: Engineering standing and approval of the chairperson of the department.

CME 404 POLYMERIC MATERIALS. (4)
Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and thermal properties, crystallinity, polymer blends, evaluation of polymers for specific applications (aerospace, automotive, biomedical), laboratory activities for each of the above. Prereq: Engineering standing. CHE 230 or CHE 236, MSE 301 or consent of instructor. (Same as MSE 404.)

CME 415 SEPARATION PROCESSES. (3)
Separations based on both equilibrium stage concepts and mass transfer rate control are addressed for a range of chemical process operations, including distillation, gas absorption, extraction, adsorption, and membrane-based processes. Design problems are conceived to require computer-aided modeling and analysis. Prereq: Engineering standing; CME 220, 320.

CME 420 PROCESS MODELING IN CHEMICAL ENGINEERING. (3)
Applications of principles of material and energy balances, thermodynamics, heat and mass transfer, physical chemistry and numerical methods to problems in separation and transport processes and reactive systems. Prereq: Engineering standing; CME 330, 415.
CME 425 HEAT AND MASS TRANSFER. (4)
Fundamental principles of conduction and convective heat transfer, and diffusional and convective mass transfer. Design applications to heat exchangers and packed bed absorbers. Prereq: Engineering standing; CME 330, 415.

CME 432 CHEMICAL ENGINEERING LABORATORY I. (2)
A laboratory course emphasizing experimental work in fluid flow, separations, heat transfer, and mass transfer. A majority of this course will focus on lab report writing, statistics, experimental design and safety in the laboratory. Prereq: Engineering standing; CME 330, CME 415; CHE 230, 231.

CME 433 CHEMICAL ENGINEERING LABORATORY II. (3)
A continuation of CME 432. A laboratory course emphasizing more detailed experiments in fluid flow, heat transfer, mass transfer, separations, and chemical reaction kinetics with more extensive data collection and analysis as well as a design component based on the experimental results. Prereq: Engineering standing; CME 432; concur: CME 550.

CME 455 CHEMICAL ENGINEERING PRODUCT AND PROCESS DESIGN. (3)
A lecture and problem-solving course emphasizing process economic evaluation, product design, and process synthesis as they apply to chemical units and systems. Appropriate use of software for simulation and design of chemical systems will also be emphasized. Prereq: Engineering standing; concur: CME 550.

CME 456 CHEMICAL ENGINEERING PROCESS DESIGN II. (4)
A lecture and problem-solving course intended to combine the principles of chemical engineering with optimization as they apply to the design of chemical processes. Results of each design case studied will be presented by oral and written reports. Prereq: Engineering standing; CME 455, 550.

CME 462 PROCESS CONTROL. (3)
Basic theory of automatic control devices and their application in industrial chemical plants is emphasized. Identification of control objectives, appropriate measurements and manipulations, and possible loops between these, requires integration of the control system with the original process design. Interactions between process units are analyzed using well-known analytical tools and design strategies. Prereq: Engineering standing; CME 420, 550.

CME 470 PROFESSIONALISM, ETHICS AND SAFETY. (2)
Detailed lectures and supervised discussions on standards of ethics and safety as they relate to the chemical engineering profession. Emphasis will be on safety in plant design and process operations, laboratory safety, hazardous risk management, regulation and oversight. Prereq: Engineering Standing. Concurrent: CME 455.

CME 505 ANALYSIS OF CHEMICAL ENGINEERING PROBLEMS. (3)
The application of differential and integral equations to traditional and non-traditional chemical engineering problems. Prereq: CME 425, CME 550 concurrent or consent of instructor.

CME 515 AIR POLLUTION CONTROL. (3)

CME 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3)
Overview of technologies used for generating electricity from location, recovery, transport and storage of fuel to the types of technologies used to convert the fuel to electricity. Includes a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar, and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as EGR 542.)

CME 550 CHEMICAL REACTOR DESIGN. (3)
A lecture and problem course dealing with interpretation of rate data and development of performance equations for single and multiple reactor systems. A design problem will be selected for an industrially important chemical reaction system requiring computer solution. Prereq: Engineering standing; CME 420, 425.

*CME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3)
Theory and practice as related to the chemical and physical processing of polymer systems. Polymer theory, heat transfer in polymer flows, polymer engineering properties. Polymer properties. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as MFS/MSE 554.)

*CME 556 INTRODUCTION TO COMPOSITE MATERIALS. (3)

CME 580 DESIGN OF RATE AND EQUILIBRIUM PROCESSES FOR WATER POLLUTION CONTROL. (3)
The design of chemical and physical processes for the removal and concentration of organic, inorganic, and particulate pollutants from aqueous solution/suspension: adsorption, desorption, disinfection, membrane processes, thermal processes, flow through beds of solids, etc. Prereq: CHE 440G, CME 425 and prereq or concur: CME 550 or consent of instructor.

CME 599 TOPICS IN CHEMICAL ENGINEERING. (3)
A detailed investigation of a topic of current significance in chemical engineering such as: contemporary energy topics, fuels development, membrane science, computer control of chemical processing. A particular topic may be offered twice under the CME 599 number. May be repeated to a maximum of six credits. Prereq: Engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics, and mathematics. For major work, a candidate must hold a bachelor’s degree in chemical engineering or its equivalent.

CME 620 EQUILIBRIUM THERMODYNAMICS. (3)
The criteria for physical and chemical equilibria, including: predictive equations, solution theory, chemical activity, coupled chemical equilibrium, and external constraints. Emphasis may be on vapor-liquid equilibrium, chemical reaction equilibrium, or complex ionic equilibria. Prereq: CHE 440G and CME 320 or consent of instructor.

*CME 622 PHYSICS OF POLYMERS. (3)
Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer physics. Theory and practice as related to the chemical and physical processing of polymer systems. Polymer theory, heat transfer in polymer flows, polymer engineering properties. Polymer properties. Prereq: CME 550, CME 630, CME 505, or instructor consent.

CME 630 TRANSPORT I. (3)
A unified study of physical rate processes in liquids and vapors, including: mass, energy, and momentum transport, transport in chemically reacting systems, similarities, turbulence modeling, buoyance-induced transport and multicomponent diffusion. Prereq: ME 330, CME 425, CME 505 concurrent or consent of instructor.

CME 650 ADVANCED CHEMICAL REACTOR DESIGN. (3)
Rate expressions for heterogeneous reaction kinetics; energy and mass transport within and external to reacting porous catalysts; design equations for multiphase fixed and moving bed reactors. Prereq: CME 550, CME 630, CME 505, or instructor consent.

CME 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/EE/MSE 664.)

CME 680 BIOCHEMICAL ENGINEERING. (3)
Principles and design of processes involving biochemical reactions, including aerobic and anaerobic fermentations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as BAE 680.)

CME 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 residency credit following the successful completion of the qualifying exams.

CME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CME 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CME 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)

CME 771 SEMINAR. (0)
Review of current literature in the field of chemical engineering, general discussion and presentation of papers on departmental research. Lecture, one hour per week. Required for all graduate students in chemical engineering.

CME 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CH/PHA/PHR 779.)

CME 780 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)
Independent study, design, or research in chemical engineering topics. May be repeated to a maximum of 12 credits. Prereq: Approval of the departmental director of Graduate Studies.
CNU Clinical Nutrition

CNU 400 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2) This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition-related issues commonly observed in physically active individuals and nutritional considerations in the prevention and rehabilitation of injury. Prereq: Admission into Human Health Sciences Undergraduate Program or consent of instructor; 200 level physiology or equivalent.

CNU 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3) Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to 2 credits experiential/research). (Same as AT 500, HS 500, CLS 500, CD 500, PAS 500.)

CNU 501 NUTRACEUTICALS AND FUNCTIONAL FOODS IN HEALTH AND DISEASE PREVENTION. (2) The course will cover the classification, brief history and the impact of nutraceuticals and functional foods on health and disease. An example of nutraceuticals to be covered in the course includes isoflavones, flavonoids, carotenoids, lycopene, garlic, omega 3 fatty acids, sphingolipids, vitamin E and antioxidants, S-adenosyl-L-methionine, CLA, creatine, herbal products in foods and lipids. Prereq: Undergraduate organic chemistry and/or biochemistry.

CNU 502 OBESITY C2C: CELL TO COMMUNITY (Subtitle required). (2) This course will provide an overview of the obesity epidemic from an applied clinical as well as public health perspective. Topics to be covered include etiology, pathophysiology, evaluation, treatment, management, and prevention of obesity throughout the lifecycle.

*CNU 503 NUTRITION FOR HEALTH PROFESSIONS. (1-2) An interdisciplinary/interprofessional approach to applied and medical nutrition therapy and its role in primary, secondary, and tertiary health care delivery. Covers the fundamental principles and concepts of nutrition science as applied to the human life cycle. Prereq: Undergraduate junior, senior and/or graduate students planning to enroll or who are currently enrolled in the Colleges of Medicine, Nursing, Dentistry, Pharmacy, Public Health and/or Health Sciences. Completion of at least one semester of biology, chemistry, and/or biochemistry and/or consent of instructor.

CNU 601 INTEGRATED NUTRITIONAL SCIENCES I. (3) The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism, (2) the impact of nutritional factors on macronutrient metabolism to health and disease, (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: IBS 601, PGY 206. (Same as NS 601.)

CNU 602 INTEGRATED NUTRITIONAL SCIENCES II. (3) Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601. PGY 206. (Same as ASC/NS 602.)

CNU 603 INTEGRATED NUTRITIONAL SCIENCES III. (2) This course is aimed at providing medical and health professional students with a working knowledge of the biologic applications and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as FSC/NS 603.)

CNU 604 LIPID METABOLISM. (3) Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas include: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G, and BCH 401 G or equivalent or consent of instructor. (Same as NS/PT 605.)

CNU 605 WELLNESS AND SPORTS NUTRITION. (3) Focus will be on the use of the most recently developed technologies and model systems in molecular biology for studying nutrient regulation of gene expression. Examples include current problems in nutrition such as models for engineering plants containing more desirable nutrient sources (e.g., for increasing effects of various nutrients in transgenic mice on tumor suppressor genes and oncogene expression, that are important in cancer prevention; and for studying nutrient effects on genes that modulate obesity. Prereq: BCH 501 and 502 or equivalent; or BCH 401G and consent of instructor. (Same as NS 605.)

CNU 606 NUTRITIONAL IMMUNOLOGY. (3) Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from experimental and clinical perspectives. A lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: PGY 412G and CNU 601, or consent of instructor. (Same as NS 608.)

CNU 609 ETHICS IN CLINICAL SCIENCES RESEARCH. (1) Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as C/D/CLS/PT/IAS 610.) (Same as NS 609.)

CNU 611 ADVANCED MEDICAL NUTRITION THERAPY. (2) The overall course objective is for the advanced health care professional to gain an in-depth working knowledge and set of skills in medical nutrition therapy of acute and chronic conditions, including pediatrics that builds upon previous nutrition course work and/or experience. Prereq: PGY 206 or equivalent; BCH 401G or equivalent; advanced nutrition course or consent of instructor.

CNU 612 ASSESSMENT SKILLS FOR THE CLINICAL NUTRITIONIST. (2) The goal of this course is to provide the Clinical Nutrition masters student with the skills necessary to identify a comprehensive medical history, perform basic physical examination techniques appropriate for nutritional assessment, evaluate and interpret laboratory test results, and systematically report their findings in appropriate oral and written formats. Prereq: Admission into the Center for Nutritional Sciences Masters with emphasis in Clinical Nutrition or by consent of instructor.

CNU 613 APPLIED NUTRITION AND DISEASE PREVENTION. (2) This course is designed to give the medical and health professional student an understanding of the basic principles of normal nutrition and medical nutrition therapy during the course of health and disease. Areas to be covered include: general principles of macro- and micronutrients; the basics of nutritional assessment; the Recommended Dietary Allowances and Dietary Reference Intakes; the “MyPyramid” Food Guide Pyramid; nutritional needs throughout the life cycle; determination of energy and macronutrient requirements; and nutrition for health promotion and disease prevention, e.g., cardiovascular, diabetes, renal, pulmonary, cancer, AIDS, gastrointestinal; weight maintenance/weight loss. Prereq: Completion of 400 or 500 level nutrition course or consent of instructor.

CNU 701 NUTRITION AND CHRONIC DISEASES. (4) Selected topics in nutritional sciences as related to health and chronic diseases, e.g., gastro-intestinal disease, cancer, AIDS, diabetes, cardiovascular disease, obesity, including drug-nutrient interactions. Prereq or concur: NS/CNU 601, NS/ASC 602. (Same as NS 701.)

CNU 702 CLINICAL WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3) A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer options in therapeutic nutrition, and/or health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services e.g., surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CNU 601, NS/ASC 602, NS/CNU 701, NS/NFS 610 and graduate status or consent of instructor. (Same as NS 702.)

CNU 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1) This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as NFS/NS 704.)

CNU 782 SPECIAL PROBLEMS. (1-6) Independent, advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as NFS/NS 782.)

CNU 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6) Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as NFS/NS 790.)

COM Communication

COM 101 INTRODUCTION TO COMMUNICATIONS. (3) An introduction to the process of communication as a critical element in human interaction and in society. Designed to enhance effective communication and informed use of the mass media. (Same as NFS/NS 102.)

COM 181 BASIC PUBLIC SPEAKING. (3) A course designed to give the student platform experience in the fundamentals of effective speaking.
Course Descriptions

COM 199 PRESENTATIONAL COMMUNICATION SKILLS. (1)
Introduces students to fundamental oral communication skills needed to prepare and present messages effectively. Note: This course will not substitute for the three-credit course COM 181, Basic Public Speaking. It will count toward partial completion of the oral communication skills component of the University Studies Program.

COM 249 MASS MEDIA AND MASS CULTURE. (3)
An examination of the interplay between the technology and content of the mass communication media. Prereq: COM 101 or its equivalent.

COM 252 INTRODUCTION TO INTERPERSONAL COMMUNICATION. (3)
This writing intensive course examines basic verbal and nonverbal concepts affecting the communication process between individuals in various interpersonal contexts. Course also requires participation in written and oral activities designed to develop and improve interpersonal skills. Topics include: perspective-taking, relationship and conversation management, effective listening, conflict management, communication climate, communication anxiety, and cultural/gender differences in interpersonal communication.

COM 281 COMMUNICATION IN SMALL GROUPS. (3)
A study of communication processes in small group situations. Topics include conflict, leadership, and decision-making. Students will participate in group discussion and develop skills in analyzing group performance.

COM 285 APPLIED PHONETICS. (3)
Study of the phonetic structure of English language with requirement of mastery of International Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in general speech, speech correction, radio, television, and theatre.

COM 287 PERSUASIVE SPEAKING. (3)
A study of the processes involved in attitude change, with emphasis on the preparation and delivery of persuasive messages.

COM 311 TAKING CONTROL OF YOUR HEALTH: PATIENT-PROVIDER COMMUNICATION. (3)
This course helps students explore, understand, and appreciate the patient-provider relationship through an examination and analysis of selected health communication case studies and related materials. It is also designed to improve communication skills with and among physicians, nurses, and allied health professionals.

COM 312 LEARNING INTERCULTURAL COMMUNICATION THROUGH MEDIA AND FILM. (3)
This course examines intercultural and co-cultural divides using a skills-based approach. Students will be exposed to cultural communication situations and will apply skills using lecture, discussion, and various media (e.g., news, radio, film, blogs), equipping them with more effective skills for communicating with other groups, communities, and cultures.

COM 313 INTERPERSONAL COMMUNICATION IN CLOSE RELATIONSHIPS. (3)
This course focuses on describing and explaining communication processes that occur within the context of close relationships. Three general topic areas include: (1) developing and escalating relationships, (2) satisfying relationships, and (3) coping with relational challenges.

COM 314 THE DARK SIDE OF INTERPERSONAL COMMUNICATION AND RELATIONSHIPS. (3)
Provides an overview of research and theory related to the “dark side” of interpersonal communication and relationships. This course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

COM 315 UNDERSTANDING WORKPLACE COMMUNICATION IN A DIVERSE U.S. SOCIETY. (3)
Understanding workplace communication in U.S. society requires an interdisciplinary approach in preparing students to develop an enlightened consideration of the complex and contextual nature of communication in organizations. The emphasis on community, culture and citizenship is designed to engage students using dynamic learning experiences such as debates and discussion over topics relevant to the role of communication and organizations in U.S. society.

COM 316 EMERGENCY AND DISASTER COMMUNICATION: HUMANITY IN A ZOMBIE APOCALYPSE. (3)
The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all-hazards scenarios, historical narratives of disaster and films in the zombie genre are used to discuss issues of preparedness and survival strategies. Students will demonstrate an ability to analyze the rhetorical situation of apocalypse, engage in emergency and disaster planning, response, and recovery assignments, activities, and exercises including developing emergency evacuation plans, preparing emergency kits and bug-out bags, and exercising medical triage and first aid.

COM 317 COMMUNICATION IN FAMILY AND MARITAL RELATIONSHIPS. (3)
The goal of this course is to familiarize you with an in-depth understanding of the communication processes that take place in families and marriage (which includes, straight, gay, and common-law relationships). Emphasis is placed on the theoretical explanations of communication processes and on their practical application through communication behaviors that enhance familial interactions. The course reviews communication theories and theories from allied disciplines that have been employed in scholarly research of families and marriages. What you learn in this course will improve the quality of your family and marriage communication and relationships.

COM 318 COMMUNICATION AND SPORT. (3)
This course is designed to explore in depth the relationship between communication and sport. We will examine theories of communication and their connection to sport. The class will examine the relationship between sport and race, gender, class, violence, community, and society along with communication influences how we interact and engage them.

COM 325 INTRODUCTION TO ORGANIZATIONAL COMMUNICATION. (3)
Designed to introduce students to basic concepts in the study of organizational communication. The course considers approaches to the practice and study of communication within organizational settings, including classical approach, human relations, human resource approaches, systems approaches, cultural approaches, and critical approaches. It also introduces specific issues within the study of organizational communication, including assimilation, decision-making, conflict, change, emotion, cultural diversity and communication technologies. Prereq: Communication major; others need departmental approval.

COM 326 COMMUNICATION STRATEGIES FOR PROFESSIONAL EXCELLENCE. (3)
Communication Strategies for Professional Excellence introduces students to a variety of technical and business theories and practices designed to be applicable to business communication in the real world. This course is focused on communication strategies to use once the job has been secured, rather than those to get the job (i.e., resume, cover letter, interviewing). Specifically, the course teaches the fundamentals of good business communication, including protocols for writing media notices/releases, marketing copy, business letters, memorandum, electronic mail, thank you notes, apology letters, persuasive messages, and business plans. Throughout these writing assignments, you will also become acquainted with the strategies used by communication professionals such as functions of media, employee, government, investor, and consumer relations. In addition, there will be instruction in oral presentation and in depth practice on both an individual and a collaborative basis. Finally, students will also learn tactics for running a business meeting, dealing with organizational conflict, and finding ways to enhance their business communication through technically based media. Prereq: Upper Division standing in the Communication Major. ADDITIONALLY, completion of all COMM BA/BSc pre-requisites and completion of COM 101, or equivalent.

COM 249, COM 252, CIS or WRD 110, CIS or WRD 111. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

COM 350 LANGUAGE AND COMMUNICATION. (3)
An introductory survey course covering syntactic, semantic and pragmatic aspects of language as they relate to communication. Language learning, sign typologies, psycholinguistics, and the nature of meaning are selected topic areas. Emphasis is on behavioral, communication approach. Not open to students who have completed a 300-level (or above) linguistic class.

COM 351 INTRODUCTION TO COMMUNICATION THEORY. (3)
Considers various theoretical perspectives which lead to an in-depth understanding of communication processes. Begins with discussion of the development of theory and inquiry. Includes perspectives of systems, cognitive, behavioral, affective, symbolic interactionist, dramatic, cultural and social reality, interpretive and critical theories. Prereq: Upper Division standing in the Communication Major. ADDITIONALLY, completion of all COM MA/BSc pre-requisites and completion of COM 101, or equivalent. Specific requirements specified. Prereq: COM 101, COM 249, COM 252, CIS or WRD 110, CIS or WRD 111. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

COM 352 INTERPERSONAL COMMUNICATION AND SOCIAL MEDIA. (3)
With the proliferation of technologically advanced social media (e.g., Facebook, chat, twitter) available at the fingertips of individuals through multiple channels (e.g., phone, iPad, laptop, online video games), interpersonal relationships are being affected. Negotiating this relatively new, understudied, and quickly evolving terrain can present relational difficulties for a variety of relationships types. Students in this class will gain a thorough understanding of multiple communication platforms and the communication theory that can explain the interactions occurring in each platform, as well as improve their mediated communication skills to enhance interpersonal relationships. Prereq: CIS 110, CIS 111, COM 252.

COM 365 INTRODUCTION TO COMMUNICATION RESEARCH METHODS. (3)
An introduction to the methods of philosophy of scientific research into the origins, nature, and effects of communication processes. Provides skills necessary for designing research projects and for interpreting and critically evaluating research results. Prereq: STA 210.

COM 381 COMMUNICATION, LEADERSHIP, AND ENTREPRENEURSHIP. (3)
This course provides an introduction to the study and practice of leadership from a managerial, entrepreneurial and communication perspective. Course activities will cover, 1) the basic concepts essential to personal skills development and organizational leadership behavior, 2) the theory component, and 3) the practical process of leadership and entrepreneurship. The course is designed to introduce students to leadership perspectives and the role communication plays in effective leadership and entrepreneurial strategies. The course explores communication variables involved when leaders attempt to influence members to achieve a goal. Topics
include power, credibility, motivation, research on leader traits, styles, and situations, innovation strategies, organizational dynamics, creative problem solving, and current models of leadership. The different leadership challenges posed by different group and organizational types will also be explored.

COM 390 COMMUNICATION EDUCATION ABROAD (Subtitle required). (1-6)
Communication education abroad is an academically rigorous and experientially rich opportunity for students to work with a UK faculty member by participating in a formal study abroad course, research program, or service project related to one or more of many communication theories, concepts, and skills. Any communication education abroad offering will be grounded firmly in the communication discipline in ways designed to enrich one’s understanding of how individual and local communication norms and practices both shape and are shaped by global trends, communication, and interactions. Prereq: Consent of instructor. May be repeated to a maximum of six credits. Consent of instructor.

COM 395 INDEPENDENT WORK. (1-3)
Research and study of special topics in communication. The student proposes the specific study to be undertaken and formally contracts with a faculty supervisor for guidance and evaluation. Ordinarily, projects will require the production of written materials as a basis for the evaluation. May be repeated to a maximum of six credits. Consent of instructor.

COM 399 INTERNSHIP IN COMMUNICATION. (1-6)
Provides field-based experience in communication through work in industry, government, education, etc. Pass-fail only. May be repeated to a maximum of six credits. Consent of instructor.

*COM 405 COMMUNICATION, NEGOTIATION, AND CONFLICT MANAGEMENT IN ORGANIZATIONS. (3)
This course explores the role of communication in negotiation and conflict management in organizations. The course examines conflict theories and approaches, negotiation processes, and third party intervention through the study of strategies and tactics, interaction processes, phases and stages of conflict development, and conflict framing. The course examines strategies and tactics used in exchange of offers and counteroffers, salary negotiations, buying and selling of products, team bargaining, and multipart negotiations. Consent of instructor.

*COM 449 SOCIAL PROCESSES AND EFFECTS OF MASS COMMUNICATION. (3)
This course examines the relationship between the organization of modern society and its communication media with special emphasis on cultural processes and social change. The social-psychological bases of communication are studied within a context of theory and research. Consent of instructor.

*COM 452 STUDIES IN INTERPERSONAL COMMUNICATION. (3)
Examines current theory and research on the nature and development of interpersonal communication ability. Topics include: understanding strategic communication, relational communication elements, and cultural and institutional influences on the development of interpersonal communication. Consent of instructor.

COM 453 DIGITAL AND MASS COMMUNICATION MEDIA LITERACY. (3)
A course designed to examine theory and research related to criticism of the mass media and to the relationship of digital and mass communication to contemporary social issues. Consent of instructor.

*COM 454 HONORS SEMINAR IN COMMUNICATION (Subtitle required). (3)
Intensive study of a communication topic in professional, theoretical, and research methodology areas of communication. This seminar will count toward a Communication major and toward credits for graduation. Consent of instructor.

*COM 462 INTERCULTURAL COMMUNICATION. (3)
An overview of problems, issues, processes and assumptions involved with communicating across cultures and co-cultures. Theories of cognition and communication will be used to explore and explain communication with people from diverse cultures. Differences in both verbal and nonverbal communication among different cultural groups will be discussed. Consent of instructor.

*COM 471 INTRODUCTION TO HEALTH COMMUNICATION. (3)
This course examines the origin of health communication in the United States and the impact of the mass media, interpersonal communication, and organizational communication in health contexts. Topics include: health communication, media literacy, and advocacy skills. Consent of instructor.

*COM 482 STUDIES IN PERSUASION. (3)
This course explores the role of communication in negotiation and conflict management in organizations. The course examines conflict theories and approaches, negotiation processes, and third party intervention through the study of strategies and tactics, interaction processes, phases and stages of conflict development, and conflict framing. The course examines strategies and tactics used in exchange of offers and counteroffers, salary negotiations, buying and selling of products, team bargaining, and multipart negotiations. Consent of instructor.

*COM 525 ADVANCED ISSUES IN ORGANIZATIONAL COMMUNICATION. (3)
Examines theory and research relevant to understanding advanced issues in organizational communication. Topics may include strategies of innovation, organizing, networking, decision-making, globalization, technology, power, and diversity. Consent of instructor.

*COM 535 RISK AND CRISIS COMMUNICATION. (3)
This course examines strategic risk and crisis communication theory, research, and practice. Special emphasis is placed on crisis planning, media relationships, image restoration, ethical responses, and organizational learning. Consent of instructor.

*COM 553 CRITICAL ANALYSIS OF COMMUNICATION AND PERSUASION IN POPULAR CULTURE. (3)
This course focuses on what and how popular culture entertainment media functions to communicate and persuade. Forms to be examined may include films, television programs, music, cartoons, and/or comics. Ultimately, students will be equipped with tools to make educated decisions as critical consumers of the messages conveyed in popular culture communication media. Consent of instructor.

COM 571 INTERPERSONAL COMMUNICATION IN HEALTH CONTEXTS. (3)
Examines theory and research relevant to the role of interpersonal communication in managing mental and physical health. Topics related to interaction in health contexts include: communication in health and illness, health and personal relationships, health care provider/patient communication, medical decision-making, and interpersonal health education and prevention efforts. Consent of instructor.

COM 572 HEALTH COMMUNICATION CAMPAIGNS AND COMMUNITIES. (3)
This online course focuses on the role of the mass media in contemporary public health campaigns. Most class sessions focus on the application of theory and research to the design of public health campaigns. Earlier studies examining the role of the mass media in health campaigns indicated that the mass media played a small and rather insignificant role in changing health behaviors. However, more recent studies indicate that careful targeting combined with formative research often yield successful behavior change. Consent of instructor.

*COM 581 TEAMWORK AND LEADERSHIP IN ORGANIZATIONS. (3)
Examines theory and research on the nature and development of small group communication. Topics include leadership, interpersonal relations and roles, goals, and decision-making in multiple organizational contexts. Consent of instructor.

*COM 584 TEACHING OF COMMUNICATION. (3)
This course uses research on communication and theory to develop effective instructors of communication. Topics include instructor identity, course development, teaching communication contexts (e.g., small group, intercultural, persuasion, speech) in diverse settings (e.g., classroom, organizational training), managing learners, and learning assessment. Consent of instructor.

*COM 591 SPECIAL TOPICS IN COMMUNICATION (Subtitle required). (1-3)
Intensive study of a specialized topic area in communication. May be repeated to a maximum of six credits under different subtitles. Consent of instructor.

CPE Computer Engineering

#CPE 282 DIGITAL LOGIC DESIGN. (3)
Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Consent of instructor.

#CPE 287 INTRODUCTION TO EMBEDDED SYSTEMS. (3)
Introduction to Embedded Systems teaches students how to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, designing, programming, and interfacing and lab projects will back up that theory with hands-on design experience using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/O, and basic real-time processing. Lecture, three hours; laboratory, one three-hour session. Consent of instructor.

#CPE 380 COMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Consent of instructor.

#CPE 480G ADVANCED COMPUTER ARCHITECTURE. (3)
This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/ audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders.

University of Kentucky 2016-2017 Undergraduate Bulletin 416

KEY: # = new course  * = course changed  † = course dropped  ‡ = course purged
Health care reform is often in the news, and everyone has an opinion on why the system is broken, how to fix it, who should have access to good medical care, under what circumstances, and what constitutes “good care.” This online, multi-format course will consider what it means to be a good patient or a good doctor, with an emphasis on U.S. history, who was included or excluded in each group, how medicine became professionalized, and how people have organized around health issues. Students will engage with primary sources, watch related films, and participate in online moderated discussions. (Same as CWS 309.)

CPH 310 DISEASE DETECTIVES: EPIDEMIOLOGY IN ACTION. (3)
This course will outline the history of epidemiology as a science and examine its wide-ranging contributions to the fields of public health, medicine, and the social sciences. This course will focus on epidemiological methods to investigate health outcomes and identify associated and causative factors of disease in populations.

CPH 315 CHRONIC DISEASE EPIDEMIOLOGY. (3)
This course is an introduction to the epidemiology of chronic diseases including but not limited to cardiovascular disease, cancer, and diabetes, with a focus upon chronic disease surveillance and risk factors. Prereq: CPH 310 or equivalent (with permission from instructor).

*CPH 320 FUNDAMENTALS OF ENVIRONMENTAL HEALTH. (3)
An overview of the physical factors that influence human health, including hazards from unsanitary water, polluted air, traumatic injury hazards, toxins, radiologic risks, and other features of the natural and human-made environment that can kill, injure, maim, and cause disease in human populations. Special focus is given to understanding the relationships between biological, chemical, and other factors that produce unhealthy environments that sicken individuals throughout their lifespan. Additional topics include the important influence of environmental hygiene, restaurant inspections, occupational safety and health issues, clean water standards, air pollution regulations, and other laws and regulations that protect the health and safety of human populations. Prereq: BPH 284.

CPH 351 PREPARING FOR A PAPALIPTIC EVENT: POPULATION HEALTH AND CRISIS MANAGEMENT. (3)
Students enrolled in this course will participate in in-depth analyses of multiple large-scale disasters. This course will provide students with the knowledge necessary to participate in all phases of the crisis management process, as overseen by a health service organization. Case studies will be utilized heavily throughout this course and students will have the opportunity to engage in discussion with various health professionals from around Kentucky who engage in crisis management activities. Prereq: CPH 201 or permission of the instructor.

CPH 365 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required). (3)
This course provides focused coverage within domains of public health, including: Health Behavior; Epidemiology; Gerontology; Environmental Health; Health Services Management, and Biostatistics. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduate majors university-wide.

#CPH 395 UNDERGRADUATE INDEPENDENT STUDIES IN PUBLIC HEALTH. (1-3)
This course offers students the opportunity to independently promote learning in public health content areas and/or skills that are not covered by formal courses within the college. Students typically work with an individual faculty member to develop specialized or advanced knowledge or skills, or to identify, design and conduct research. Students must coordinate with a faculty member to complete a request for Research/Independent Study prior to registering for CPH 395. This course may be repeated for a maximum of 6 semester hours. Prereq: A minimum of 60 credit hours completed or junior level standing and permission of instructor.

CPH 410 EPIDEMIOLOGY IN THE WEB OF CAUSATION: PEOPLE, PLACE, AND POLITICS. (3)
This course will provide an interdisciplinary introduction to applications of epidemiology in the context of political, community, social, and behavioral influences on health. Epidemiology is the study of patterns of diseases, injury, and other indicators of health in human populations. This course will review principles and introduce novel methods used in epidemiologic research. Students will learn approaches to collecting data about sensitive health behaviors, examining social networks, integrating information from interviews and focus groups, and collecting spatial data using a smart phone application. These topics will be explored using a range of case examples, including infectious disease, humanitarian crises, sexual health, substance abuse, obesity, and others. Prereq: Introduction to Public Health (CPH 201) and Disease Detectives (CPH 310) or equivalents (instructor permission required) should be taken before or at least concurrently with this course.

CPH 423 HEALTH OF KENTUCKIANS. (3)
This course provides an overview of the determinants, factors, and remedies to the traditionally poor health status of Kentuckians. The course focus is on population health of the Commonwealth, with an emphasis on data, trends and solutions to illness, death and disability. Other topics include health rankings, vital statistics and demographic factors. The comparison of Kentucky’s population health status to the U.S average and to other states is presented, plus strategies to improve population health in the Commonwealth. Additional topics include the relationship between Kentucky’s demograhic, economic, environmental, and education characteristics and their impact on health.

*CPH 440 FOUNDATIONS OF HEALTH BEHAVIOR. (3)
This course will provide students with an overview of how the social and behavioral sciences contribute to primary prevention in the rapidly expanding field of health behavior. Emphasis
will be placed on theory-driven approaches that are supported by empirical investigations. Students will acquire a working knowledge of foundational theories used in public health practice and will be able to articulate the theoretical constructs. The course includes an overview of public health issues in the United States. The course also includes training regarding the translation of research findings into public health practice. Prereq: BPH Majors only.

CPH 441 THE SMOKING GUN: TOBACCO AND THE PUBLIC’S HEALTH. (3)

This course will provide a theoretical, cultural and economic rationale for the role of tobacco smoking related to the overall health of US populations in the United States and abroad. This course will examine trends in tobacco smoking from the 1960’s to present day and how social and political forces have both directly and indirectly undermined the current public health agenda – towards minimum, and eventually eradicate tobacco related disease and death worldwide. Students will acquire the necessary tools to identify the scientific literature on smoking and disease through traditional published literature, tobacco websites, and national data sets. Prereq: Junior or Senior undergraduate in good academic standing, recommendation of advisor or permission of instructor.

CPH 450 MANAGING HEALTH ORGANIZATIONS TO IMPROVE POPULATION HEALTH. (3)

This course will introduce students to a number of foundational concepts related to leadership and management, specifically in the realm of health organizations (e.g., local and state health departments, hospitals, community clinics, etc.). In particular, this course will explore the areas of managing human and non-human resources, and improving agency performance. Students will have the opportunity to interact with managers and organizational leaders from a variety of health service agencies. Prereq: CPH 201 or permission of the instructor.

*CPH 470 PUBLIC HEALTH CAPSTONE. (3)

This course will provide students with training in the practice of conducting literature reviews and in the process of synthesizing reviewed materials into a coherent and timely manuscript. Literature reviews will be focused on core areas within public health such as the prevention of cardiovascular disease, obesity, cancer, and diabetes. Students will draw upon previous coursework in public health to fully understand one clearly defined area of scientific inquiry regarding the prevention or treatment of disease at the population level. Using their past acumen of acquired knowledge, students will acquire the cognitive skills needed to analyze and synthesize literature into a simplified and cohesive manuscript that offers practical and evidenced-based conclusions for public health practitioners. They will also acquire professional skills needed for academic presentation and written findings to audiences of public health peers and professionals. Prereq: BPH Majors only plus HSM 241, CPH 310, CPH 320, CPH 330 and CPH 440. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

*CPH 472 PUBLIC HEALTH PROFESSION AND PRACTICE. (3)

This course familiarizes students with the practice of public health, introducing them to the various settings and arenas in which public health professionals work. Through guest lectures and discussions with professionals in the field, students gain exposure to the roles and responsibilities of the public health workforce as well as its interconnection with other professions including medicine, nursing, pharmacy, dentistry, engineering, social work, and communications. Students will assess their own interests, skills, and personality to explore and describe their own career goals. Prereq: BPH Majors only plus CPH 470.

*CPH 476G A SICK WORLD: GLOBAL PUBLIC HEALTH IN THE EARLY 21ST CENTURY. (3)

This course provides students with basic knowledge about the issues of global public health and its importance to all peoples of the globe. After receiving an introduction to the principles and goals of global public health, students will begin to acquire functional knowledge of the theoretical and methodological underpinnings of global public health practice. Key content areas such as health determinants, issues of health, education, and poverty, ethical and human rights concerns, the impact of culture on global public health, the burden of disease on the global human population, and other pertinent global public health topics will become focal points for class discussion. This course will emphasize theory-driven empirical investigation of key behavioral issues that influence the health and well-being of people around the globe. Case studies of global public health issues will be utilized. Prereq: BPH Majors only or by permission of the instructor.

CPS 535 DATABASES AND SAS PROGRAMMING. (3)

Students will learn how to construct and maintain databases with applications to public health. They will also learn how to program in SAS, the leading statistical analysis system. SAS skills include report writing, macro writing, and Programming using SAS IML. Lecture, two hours; laboratory, two hours per week. Prereq: STA 291 or equivalent.

CPS 551 COMPARATIVE HEALTH SYSTEMS. (3)

An overview of healthcare system structure in selected countries with attention to their developmental history, financing, and delivery infrastructure.

CPS 580 BIOSTATISTICS I. (3)

CPS 580 covers univariate statistical methods commonly encountered in public health studies. This includes descriptive statistics, hypothesis testing, paired and unpaired tests, ANOVA, contingency tables, logrank test, regression and correlation. Prereq: MA 109 or higher. (Same as STA 580.)

CPS 600 HEALTH SERVICES AND SYSTEMS ORGANIZATION. (3)

An introduction to the health care delivery system in the United States, including its organization, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

CPH 601 ENVIRONMENTAL HEALTH. (3)

An introduction to the theory and practice of assessing, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as ES 620.)

CPH 603 BIOSTATISTICS CONCEPTS AND APPLICATIONS IN PUBLIC HEALTH. (3)

This course covers topics relating to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards). Prereq: MA 111 or equivalent.

*CPH 604 FOUNDATIONS OF HEALTH BEHAVIOR. (3)

This course will demonstrate how changes in health behavior can and do impact population-level indicators of morbidity and mortality. Students will acquire the necessary tools to identify priority needs for health promotion, design health programs, and to implement and evaluate these programs. Students will be able to make clear links between health promotion practices and the overarching goals of public health. Selection and design of strategies will be achieved through an understanding of theory-based approaches that have been widely applied in health promotion research. The course will also introduce students to various methods that can be used to plan, measure, and evaluate health promotion programs. Prereq: Admission to MPH program or permission of instructor.

CPH 605 EPIDEMIOLOGY. (3)

This is an initial graduate level course in the principles of epidemiology and applications in preventive medicine and environmental health. The course consists of lectures and informal discussions. Principles and methods of epidemiologic research with a focus on issues of study design and analysis will be presented. Prereq: Graduate student in good standing in the MPH program, MSPH program, or community health nursing, or consent of instructor.

*CPH 608 PUBLIC HEALTH CAPSTONE. (3)

To be successful in the MPH degree program and the profession, students are expected to demonstrate excellence in communication skills both orally and in writing. The 'manuscript' format for the capstone project is intended to familiarize students with the rigors of preparing manuscripts for professional journals. This course provides course credit for students who successfully complete the MPH capstone project and oral final examination. Prereq: MPH students only.

CPH 609 PUBLIC HEALTH PRACTICUM. (3 or 6)

The public health practicum is designed as an integrative experience in the workplace. The practicum is an opportunity to apply classroom theories and methods under the guidance of an experienced public health practitioner with faculty oversight. Prereq: Admission to MPH program or permission of instructor.

CPH 610 INJURY EPIDEMIOLOGY AND CONTROL. (3)

The epidemiological basis for understanding the distribution and determinants for traumatic injury and poisonings including both intentional and unintentional events. Topics include sources of data, methodological approaches to studying injuries, evaluation of injury interventions and the link between epidemiology and public health policy impacting injuries. Prereq: PM 620 and/or permission of instructor.

CPH 611 ADVANCED EPIDEMIOLOGY. (3)

This course provides specialized epidemiological content and method designed to meet the research and practice needs of health professionals. Practice-based problem sets and hands-on computer assignments will complement this seminar-oriented course, focusing on the role of epidemiology in the prevention of disease and injury. Prereq: CPH 605 or consent of instructor. (Same as PM 621.)

CPH 612 INFECTIOUS/EMERGING DISEASES EPIDEMIOLOGY. (3)

The theory/concepts of infectious diseases epidemiology, such as epidemic modeling expos- tulated through a systematic study of the more recent emerging diseases. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 613 MOLECULAR EPIDEMIOLOGY, CANCER PREVENTION AND CONTROL. (3)

This course consists of didactic lectures, journal clubs, and small group round table discussions related to the principles of underlying biomarker discovery and development for cancer prevention and control. The overarching goal of this course will be to assess how biomarkers are developed and used for the risk assessment, early detection, diagnosis, prognostic, and theragnosis of cancer. Prereq: CPH 605 or consent of instructor.

CPH 614 MANAGERIAL EPIDEMIOLOGY. (3)

This course applies and integrates the principles and tools of epidemiology to the decision-making process in health care management. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

CPH 615 CANCER EPIDEMIOLOGY. (3)

This course applies and integrates the principles and tools of epidemiology to the study of cancer. The course includes discussion of the burden of various kinds of cancer across the United
**Course Descriptions**

States and the world by age, gender, and race/ethnicity, the underlying biology behind the development of cancer in humans, cancer surveillance, the epidemiology of various kinds of cancer by type (e.g., major risk factors such as human behavior, e.g., smoking and alcohol use, endogenous/exogenous hormones, viruses, environmental/occupational, and diet, and sources of data and methods for evaluating cancer screening, measuring the impact of risk factors, determining the incidence of cancer and cancer clusters, measuring patterns of care, and understanding the determinants of survival. Prereq: CPH 605 or consent of instructor.

**CPH 616 CARDBIOVASCULAR DISEASE EPIDEMIOLOGY.**

A study of work-related and environmental exposures and hazards associated adverse health outcomes. Integrating the fields of occupational and environmental epidemiology. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 620 or consent of instructor.

**CPH 618 EPIDEMIOLOGY OF AGING.**

This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and CPH 605/PM 620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as GRN 618.)

**CPH 620 OCCUPATIONAL AND ENVIRONMENTAL HEALTH II.**

CPH 620 addresses advanced theories and practices of identifying, assessing, and controlling occupational and environmental hazards that may adversely affect the health of communities and working populations. The course emphasizes health effects of non-chemical hazards, such as radiation, noise, hypoxia, and physical agents that lead to morbidity and mortality. However, evaluation and control measures will cover many types of hazardous exposures, including those from chemical exposures.

**CPH 622 TOXIC AGENTS AND THEIR IMPLICATIONS IN PUBLIC HEALTH.**

This course provides an overview of chemical agents within the environment, their interaction with the human organism, and resultant public health implications. The goal of this course is to utilize toxicological information to create, understand, and explain control strategies that protect and improve public health. Prereq: CPH 601.

**CPH 623 PUBLIC HEALTH BIOLOGY.**

Public Health Biology is a 1 credit course offered over five weeks that will introduce students to some of the basic terminology and concepts of human health.

**CPH 630 BIOSTATISTICS II.**

Students will learn statistical methods used in public health studies. This includes receiver operator curves, multiple regression logistic regression, confounding and stratification, the Mantel-Haenszel procedure, and the Cox proportional hazards model. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or CPH 580. (Same as STA 681.)

**CPH 631 DESIGN AND ANALYSIS OF HEALTH SURVEYS.**

Students will learn design and analysis issues associated with well-known national health surveys, including reliability and validity of measurements, instrument validation, sampling designs, weighting of responses, and multiple imputations. Students will learn how to use statistical software to analyze data from complex survey designs. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent.

**CPH 636 DATA MINING IN PUBLIC HEALTH.**

This course introduces the basic techniques for and practical issues associated with the exploratory analysis of large public health data sets, the development of models from such data sets, and the effective communication of one’s findings. Prereq: STA/CPH 580 and CPH 535, or graduate program status in Ph.D. Statistics or Ph.D. Epidemiology/Biostatistics.

**CPH 640 WOMEN'S HEALTH.**

This course will cover a variety of women’s health topics including substance abuse, violence against women, nutrition, chronic diseases, reproductive and sexual health, and menopause. The course content will also emphasize the social, economic, environmental, behavioral, and political factors associated with women’s health. We will address these content areas using a life course perspective. The epidemiology, measurement and interpretation of these factors, and how these factors can be translated into interventions, programs, and policy, will be of major interest. Our focus will be primarily within the United States though we will touch on some aspects of global health. Prereq: Enrollment in the MPH program or permission of instructor.

**CPH 641 PUBLIC HEALTH AND ANTHROPOLOGY.**

Examination of how the perspectives and methods of anthropology can be and have been applied in public health research and intervention projects. Prereq: Enrollment in the MPH, or DrPH program, or consent of instructor.

**CPH 642 ECOLOGICAL AND ADVANCED HEALTH BEHAVIOR THEORY.**

Exploration of ecological model and other advanced theories of health behavior, based on theoretical and case-study literature. Contrasts individual-level and population-level approaches to health behavior. Prereq: CPH 604 or consent of instructor.

**CPH 643 MEASURING HEALTH BEHAVIOR: INDIVIDUALS AND COMMUNITIES.**

This course focuses on measurement, the key component of research. Topics include types of measurement; units of measurement; theory and measurement; reliability and validity; survey development; how and where to find “good” measures of health behaviors; and cultural considerations in measurement. The course relies upon the sociocultural framework acknowledging that health behaviors (as well as their determinants, consequences, and correlates) can and should be measured at all levels of society (e.g., individual, relational, community, and societal). The goal of the course is to train the student in how to measure health behaviors both reliably and effectively. Prereq: Enrollment in the M.P.H. or Dr.P.H. program, or consent of instructor.

**CPH 644 RURAL HEALTH DISPARITIES.**

Through class meetings, course readings, and assignments, this course will provide students with a comprehensive overview of issues pertaining to health disparities of rural populations by examining current programs and policies, relevant literature, public health practice, and qualitative and quantitative research pertaining to the health and well-being of rural populations.

**CPH 645 FOOD SYSTEMS, MALNUTRITION AND PUBLIC HEALTH.**

Exploration of the role of the global food system in shaping food consumption and the implications for public health. Prereq: Enrollment in College of Public Health or consent of instructor.

**CPH 646 SPECIAL TOPICS IN BEHAVIORAL HEALTH: (Subtitle required).**

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH 647 RESEARCH METHODS FOR PUBLIC HEALTH.**

This course provides the student with basic knowledge about the design and analysis of research in the field of health behavior. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health behavior 2) achieving competence in research methodology, and 3) understanding the conceptual application of analytic techniques to data. Prereq: M.P.H., Dr.P.H., or Ph.D. in public health student or permission of instructor.

**CPH 648 ELIMINATING RACIAL AND ETHNIC HEALTH DISPARITIES.**

This course will help the learner understand differences in minority populations in order to help students and lobby for the infrastructure needed to prevent excess disease and death among undererved populations. A special emphasis in this class will be placed on understanding the role of culture in influencing the adaptation of health attitudes, practices, and behaviors. An additional focus will be placed on health status, current trends, and health indicators for special populations. Prereq: Graduate student in Public Health and others by instructor permission.

**CPH 649 INDEPENDENT STUDIES IN PUBLIC HEALTH.**

Designed for advanced students with research or special study interest in Behavioral Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH 650 MANAGEMENT OF PUBLIC HEALTH ORGANIZATIONS.**

This course teaches the theories and practice of administration as they are applied in public health settings. It addresses knowledge and applications of the functions of public health management and their relationship to organizational effectiveness. Prereq: College of Public Health major or by permission of instructor.

**CPH 651 POPULATION HEALTH: MEASUREMENT, MANAGEMENT AND IMPROVEMENT.**

This course explores strategies for measuring, managing and improving health status on a population-wide basis using insight from the social and behavioral sciences. Students will examine approaches for measuring population health and analyzing determinants of health and wellbeing using primary and secondary sources. Students will acquire an understanding of how multiple service delivery and financing systems interact in shaping health and wellbeing on a population level, and what policy and management strategies and incentives are available to align the medical, public health and social systems that support population health. Finally, the course will introduce students to an array of analytic tools and methodologies for evaluating the implementation and impact of population health improvement strategies. Prereq: Enrollment in the MPH program or permission of the instructor.

**CPH 652 HEALTH FINANCE.**

This course is designed to provide students an understanding of key principles of financial management techniques that are applied in health care organizations. Knowledge of key elements of strategic financial planning and their application in developing organizational plans and programs will be enhanced through the case study method. Prereq: Enrollment as an MPH or MHA student.

**CPH 653 PUBLIC HEALTH LAW & POLICY.**

Overview of public health law with emphasis on topics and materials used by public health practitioners, as well as the use of law to advance public health agenda. Prereq: Graduate status or approval of instructor.

**CPH 655 MANAGEMENT ACCOUNTING FOR HEALTHCARE ORGANIZATIONS.**

This course is designed to introduce the use of management accounting techniques to decision making in health care organizations. Lectures, problems, and cases will be used to provide an opportunity to focus on the various types of health care providers. Prereq: Enrollment as an MPH or MHA student.
### Course Descriptions

#### CPH 658 HEALTH ECONOMICS.
(3)
This course describes the role and methods of economics as applied to public health care delivery in the United States. Prereq: CPH 600.

#### CPH 660 GIS AND PUBLIC HEALTH.
(3)
This course will introduce students to the ArcView Geographic Information System (GIS) to map and spatially analyze public health data. Prereq: Public Health graduate student or permission of instructor.

#### CPH 661 BIOETHICS FOR PUBLIC HEALTH PROFESSIONALS.
(3)
This course will engage students in readings, projects, and discussions to address controversial issues of bioethics for public health professionals. Prereq: Public Health at the University of Kentucky or permission of instructor.

#### CPH 662 PUBLIC HEALTH RESPONSE TO TERRORISM, DISASTERS AND EMERGENCIES.
(3)
This course will focus on the public health concepts, history, methods, planning, and response preparedness to weapons of mass destruction, terrorism, natural and human-made disasters, and other health emergencies. Prereq: Public Health graduate student or permission of instructor. 

#### CPH 663 INTRODUCTION TO PUBLIC HEALTH PRACTICE AND ADMINISTRATION.
(3)
This course is to be a practical application of the principles of health care organization to public health at the national, state, and local levels. Prereq: Health care organization course.

#### CPH 664 DESIGN AND ANALYSIS OF CLINICAL TRIALS.
(3)
This course will introduce the fundamental concepts used in the design of Phase II/IV clinical trials and statistical methodology associated with trial data analysis. Prereq: STA 570 or permission of instructor.

#### CPH 665 ETHICAL ISSUES IN CLINICAL RESEARCH.
(3)
Based on NIH guidelines for Responsible Conduct of Research, this course will present ethical and regulatory guidelines for conducting clinical research. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills, or permission of instructor. (Same as PHR 665.)

#### CPH 666 PRACTICUM IN CLINICAL RESEARCH I.

#### CPH 667 PRACTICUM IN CLINICAL RESEARCH II.

#### CPH 668 PRACTICUM IN CLINICAL RESEARCH III.

#### CPH 669 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE.
(3)
This overview course is designed to introduce the student to the major methods and technologies of clinical and translational science. The course will consist of 14 presentations followed by open discussion of the presentation and assigned readings by class members. The location of classes may change based on the content of the lecture. Homework assignments will provide experiential opportunities to work with the various methods and technologies. Active participation by all members is expected. Each weekly presentation is designed to provide a general overview of a method or technology commonly used in clinical and translational science. Discussions are intended to integrate the information across traditional disciplinary boundaries. Homework assignments are designed to provide practical experience with the discussion topic. Prereq: Graduate standing.

#### CPH 670 INTERDISCIPLINARY PROTOCOL DEVELOPMENT.
(2)
This course is designed to orient students to leadership and teamwork processes involved in clinical and translational research and to train students to function effectively in team settings. Students will be assigned to multidisciplinary teams with a designated principal investigator. Each team will be assigned to develop an integrated multidisciplinary grant application to address an assigned clinical research topic. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to the grant application. The course will consist of four class periods. The first three classes will consist of an orientation to communication and the role of leadership and teamwork in multidisciplinary clinical and translational research. The final class period will be reserved for a teams organizational meeting. Supplemental team meetings on research will be required to complete an individual five-page grant research methods report that is integrated into a multidisciplinary research application addressing a clinical research topic assigned to the team under the direction of an assigned principal investigator. Prereq: Graduate standing.

#### CPH 671 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE.
(1)
This seminar course is designed to orient students to clinical and translational research community and activities at the University of Kentucky and to incorporate a multidisciplinary approach to clinical and translational research. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to ongoing discussions. The course will consist of seven evening seminars focusing on different topics of clinical and translational research. Students will be required to present a description of their research interests and activities during one seminar. Homework assignments will require students to summarize the key elements of each seminar as related to clinical and translational research and the relevance of these issues to their own research interests and career plans. Active participation by all members is expected. Prereq: Graduate standing.

#### CPH 672 EVIDENCE-BASED PUBLIC HEALTH PLANNING AND PRACTICE.
(3)
This course provides the student with knowledge and skills in evidence-based public health: applying scientific reasoning, systematic use of data and information systems, and appropriate behavioral science theory to the development, implementation, and evaluation of effective programs and policies in public health. The course will emphasize online data, tools, and other resources that support the evidence-based decision making process. Prereq: CPH 604 or permission of instructor.

#### CPH 680 FUNDAMENTALS OF HEALTHCARE QUALITY AND SAFETY.
(3)
This course introduces you to the broad discipline of health services systems with an emphasis on quality and patient safety. By the end of this course you will have a better understanding of the theory, methods, structures, and processes of health services, quality and patient safety and why the core areas of interest are so important in health care. Prereq: CPH 600 or permission of instructor.

#### CPH 681 LEGAL ASPECTS OF HEALTHCARE MANAGEMENT.
(3)
The course will familiarize students with the application of law to management issues in health care organizations. Skills including terminology, legal reasoning, the tools of law, and topics specific to the health care setting are addressed. Prereq: MHA program status.

#### CPH 682 QUANTITATIVE METHODS FOR HEALTHCARE MANAGEMENT.
(3)
This course is a survey of quantitative methods for healthcare managers. Specific content areas include problem solving, data collection, measurement, analytic techniques, and research design. Prereq: MHA program status or permission of instructor.

#### CPH 683 HEALTH CARE OPERATIONS MANAGEMENT.
(3)
This course covers the basics of operations improvement from project selection through process and outcomes evaluation. The focus is on strategic decision-making under conditions of uncertainty, risk, and multiple objectives, as well as change implementation using teams. Prereq: HA 621 or permission of instructor.

#### CPH 684 STRATEGIC HUMAN RESOURCES MANAGEMENT IN HEALTHCARE.
(3)
This course will examine concepts, methods, systems, and processes for planning and managing human resources in healthcare. It is designed for those aspiring in strategic leadership roles in complex healthcare organizations, rather than primarily for those seeking a specialized role in human resources. Prereq: MHA program status or permission of instructor.

#### CPH 687 ORGANIZATION THEORY AND BEHAVIOR.
(3)
This course is an introduction to the disciplines of organization theory and organization behavior and their application in healthcare organization management. It includes the interaction of both external and internal resources and constraints on administrative decision-making processes and a focus on the management challenges presented by organizations, particularly healthcare organizations. Special attention is given to understanding the practice of administration in organizations, the skills needed for effective management, and evolving management approaches (i.e. LEAN). Prereq: MHA program status or permission of instructor.

#### CPH 688 PRACTICUM IN HEALTH ADMINISTRATION.
(1-3)
Managerial experience in a healthcare setting is an essential component of the health administration educational process. An administrative internship, also referred to as the internship, provides the student with the opportunity to put into practice the knowledge and skills learned in the classroom in healthcare organizations under the guidance of a senior healthcare administrator with faculty oversight. Prereq: MHA program status or permission of instructor.

#### CPH 689 PUBLIC HEALTH PRACTICE THROUGH SERVICE LEARNING.
(1-3)
This course will provide students the opportunity to gain first hand public health experience by participating in projects in a community setting. Number of credit hours, associated contact hours, and assignments to be determined in consultation with the instructor. Prereq: Enrollment in a Public Health degree program and completion of the core curriculum, or consent of instructor.

#### CPH 690 OCCUPATIONAL SAFETY AND HEALTH-FIELD SURVEYS.
(3)
This course provides students with the opportunity to visit various worksites and industries in the Appalachian region. This course will provide students with onsite, direct experience recognizing hazards and evaluating control measures to reduce occupational health and safety risks. This is a cross-disciplinary course for graduate students in occupational safety, industrial hygiene, environmental health, occupational health nursing, ergonomics, injury prevention, agricultural health and safety, occupational epidemiology and occupational medicine. Prereq: CPH 620 Occupational Health.

#### CPH 701 CURRENT ISSUES IN PUBLIC HEALTH.
(1)
This seminar course will introduce M.S. and Ph.D. students to the critical role of public health in protecting, maintaining, and improving the health of the population. Specific emphasis will be directed to the “Ten Essential Functions of Public Health” through weekly lectures, readings, and writing assignments. While all five core areas of public health will be introduced. Prereq: Admission to College of Public Health M.S. or Ph.D. program.

#### CPH 709 GLOBAL HEALTH INTERNSHIP.
(3)
This course will consist of an internship in a foreign country, preferably in a resource-limited setting. Students will have both a University of Kentucky and a local mentor, and will develop
a plan for participating in some type of health-related project or activity during a four-week period. A paper or presentation summarizing the key components of the internship experience will be submitted upon returning to Lexington. Prereq: Enrollment in the Graduate Certificate in Global Health Program, and completion of the course CPH 751, Introduction to Global Health, or approval from the Director of the certificate.

CPH 710 AVERSE EVENTS IN HEALTHCARE: EPIDEMIOLOGY AND PREVENTION. (3)
This course will focus on the epidemiology, history, methods, and ancillary laboratory tools used in the study and control of healthcare associated adverse events, including discussions of key concepts and theory, basic types of epidemiological investigations and study designs, and distinctive problems associated with specific risk factors. Adverse events will be discussed as components of patient safety and the quality of care.

CPH 711 CHRONIC DISEASE EPIDEMIOLOGY. (3)
A survey course on the leading chronic diseases in the U.S., including cardiovascular disease, cancer and diabetes with focus on surveillance and risk factors. Prereq: Enrollment in a Public Health degree program, CPH 605/PM 620 Introduction to Epidemiology or consent of instructor.

CPH 712 ADVANCED EPIDEMIOLOGY. (3)
Introduction to specialized epidemiologic content areas as well as methods designed to meet the research and practice of health professionals. Lecture, two hours; laboratory, two hours each week. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 621 or consent of instructor.

CPH 713 PHARMACOEPIEMIOLOGY. (3)
This course will provide an overview of the field of pharmacoepidemiology and its relationship to health care research. Various topics including methodology and analytical issues relevant to the conduct of pharmacoepidemiologic research will be covered. Time will also be spent reviewing existing papers in the field of pharmacoepidemiology. Prereq: CPH 605 and STA 580 or equivalent; may be concurrently. (Same as PPS 701.)

CPH 714 MATERNAL AND CHILD HEALTH INFORMATION AND DATA SYSTEMS. (3)
This course will equip participants with basic skills in identifying, accessing, interpreting and utilizing U.S. maternal and child health data systems at the national and state level. Participants will learn the essential ways that data sources inform public health practice and how to interpret and present information from these sources. They will also learn key skills in data interpretation, data linkage, working with small numbers, stratifying data by population subgroups and examining trends over time.

CPH 715 PERINATAL EPIDEMIOLOGY. (3)
This course will equip participants with basic skills in the field of perinatal epidemiology and its application in the field of Maternal and Child Health. Students will work with birth and death data using SAS, SPSS or STATA to gain experience in secondary data analysis; from initial data base organization and cleaning through descriptive analysis and interpretation of the content. Topics such as proper data coding, the use of prenatal indices and an introduction to data linkage will be included.

#CPH716 PROSEMINAR IN OCCUPATIONAL HEALTH AND SAFETY. (0-1)
This course will provide students, in a seminar format for 6 sessions during the semester, presentations from occupational health and safety professionals from a variety of disciplines and experiences. The seminar is 2.5 hours long at each session. Knowledge regarding workplace exposures and related health outcomes will be provided. Students should acquire basic understanding of current topics in the fields of occupational medicine, nursing, safety, industrial hygiene, epidemiology, biostatistics, mining, and agriculture.

CPH 718 SPECIAL TOPICS IN EPIDEMIOLOGY: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 719 INDEPENDENT STUDIES IN EPIDEMIOLOGY. (1-3)
Designed for advanced students with research or special study interests in Epidemiology. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 725 CLINICAL PREVENTIVE SERVICES. (3)
Disease prevention and control have been recognized as more efficient and effective in extending the quality and quantity of human life. As a core part of the Preventive Medicine-Public Health Residency curriculum, this course will focus on up-to-date, clinically relevant information and cutting edge research results regarding clinical preventive medicine and public health issues. The primary focus of this course will be 1) evidence based preventive health care services, and 2) recommendations of the United States Preventive Services Task Force for screening and preventive health care services. Prereq: Permission of instructor.

CPH 728 SPECIAL TOPICS IN OCCUPATIONAL/ENVIRONMENTAL HEALTH: (Subtitle required) (1-3)
This course will engage students in reading, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 729 INDEPENDENT STUDIES IN OCCUPATIONAL/ENVIRONMENTAL HEALTH. (1-3)
Designed for students with research or special study interest in Occupational and Environmental Health. Structured activities with goals, objectives, and deliverables are designed with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health program or consent of instructor. This is a controlled enrollment course; see instructor for additional information.

CPH 738 SPECIAL TOPICS IN BIOSTATISTICS: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 739 INDEPENDENT STUDIES IN BIOSTATISTICS. (1-3)
Designed for advanced students with research or special study interest in Biostatistics. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 740 INTRODUCTION TO MATERNAL AND CHILD HEALTH. (3)
This course will acquaint students with the major issues and challenges of working in the area of maternal and child health. Prereq: UK graduate or professional school student status.

CPH 748 RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CPH 750 LEGAL BASIS OF PUBLIC HEALTH. (3)
Designed for advanced students with research or special study interest in Law. Public Health. A legal perspective will be provided on the laws and regulations that govern the public health system. Prereq: Graduate or professional school student status.

CPH 751 PROSEMINAR IN EMERGING DISEASES: (Subtitle required). (0-1)
This course will provide students, in a seminar format for 6 sessions during the semester, presentations from emerging diseases professionals from a variety of disciplines and experiences. The seminar is 2.5 hours long at each session. Knowledge regarding workplace exposures and related health outcomes will be provided. Students should acquire basic understanding of current topics in the fields of emerging diseases, nursing, safety, industrial hygiene, epidemiology, biostatistics, mining, and agriculture.

CPH 752 LEADERSHIP IN HEALTH ORGANIZATIONS. (3)
This course is designed to explore the dimensions of leadership as presented in both the traditional and contemporary literature. It focuses student understanding on their leadership qualities and the ways to apply them in the current public health environment.

CPH 754 HEALTH CARE ACCESS AND COVERAGE. (3)
This course will introduce students to the public health knowledge set required to understand how the health care system works, the impact of health care policy, and the role of health care providers in delivering high quality care. Prereq: CPH 605/PM 621 or consent of instructor.

CPH 755 LEADING CHANGE WITH HEALTHCARE TEAMS. (3)
This course focuses on developing the skills necessary to successfully facilitate teams to achieve sustainable change in healthcare systems. The course introduces the foundations of change management, key features of successful teams and factors that lead to team failures; and specific behaviors and communications that enhance effective team interaction. By the end of this course you will have a better understanding of team dynamics and the tools of implementation with special emphasis on applications to improve healthcare quality, safety, satisfaction and efficiency. Prereq: CPH 600 or permission of instructor.

CPH 758 SPECIAL TOPICS IN HEALTH MANAGEMENT POLICY: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 759 INDEPENDENT STUDIES IN HEALTH MANAGEMENT POLICY. (1-3)
Designed for advanced students with research or special study interest in Health Services Management. Students must develop a prospectus that specifies goals, objectives, and deliverables with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health degree program or consent of instructor. This is a controlled enrollment course; contact instructor for additional information.

CPH 763 ETHICS FOR PUBLIC HEALTH. (3)
The focus of this class is on applied ethics and its application to public health issues. In addition to examining current issues that might arise during the time frame of the course, we will address the following: ethical frameworks, theories, and approaches; a unique public health ethics; social justice; ethics surrounding infectious diseases, including surveillance and control; health disparities; environmental and occupational health issues; genetics; smoking cessation; end-of-life issues; and communities regarding vulnerable populations; public health research, and ethical leadership of public health organizations. Prereq: Enrollment in the MPH program or consent of instructor.

CPH 767 DISSERTATION RESEARCH CREDIT. (2)
Students will enroll in this course to complete their research for their dissertation. Prereq: Approval of DGS.

CPH 768 RESIDENCY CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 credits. Prereq: All course work toward the degree must be completed. *CPH 776 INTRODUCTION TO GLOBAL PUBLIC HEALTH. (3)
**Course Descriptions**

**CPH 778 SPECIAL TOPICS IN PUBLIC HEALTH:**  (Subtitle required). (1-3)

This course will engage students on topics of special interest or concern in public health. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH 779 INDEPENDENT STUDIES IN PUBLIC HEALTH.**  (1-3)

Designed for advanced students with research or special study interests in Public Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

*CPH 780 STRATEGIC PLANNING AND MARKETING IN HEALTH CARE.** (3)

This course is designed to focus on the future needs of the health care organization as contrasted to day-to-day operational management. Strategies for the design and implementation of organizational change including techniques of quality and process improvement will be discussed. The strategic planning component of needs assessment, demands analysis, generation of alternative, priority setting and evaluation form the basis of the course. Several health care trends such as restructuring, innovation in health care delivery and financing, and performance measurements will be illustrated through case analysis in a variety of provider settings. Prereq: MPA/MHA program status and PA/HA 621.

*CPH 781 HEALTHCARE ETHICS AND GOVERNANCE.** (2)

This course addresses the basic concepts and principles of healthcare ethics, including the biomedical, managerial, and organizational components and applies them using case studies, role playing, and analytical exercises. The course also examines the roles and responsibilities of healthcare governing boards and factors that influence their effectiveness. Prereq: MHA program status or consent of instructor.

*CPH 782 INFORMATION SYSTEMS IN HEALTH CARE.** (3)

This course will focus on the life cycle approach to information system development. Phases of this approach include systems analysis, design, implementation, maintenance and evaluation. This approach has a technological, financial, and human factors component. The decision making and planning role of administration as well as the need on how to maximize the utilization of current systems is stressed. Topics include the information needs of the strategic planning process, administrative function and clinical care. The course will involve site visits. Prereq: CPH 780 and CPH 687.

*CPH 784 DECISION MAKING IN HEALTH CARE ORGANIZATIONS.** (3)

This course is designed to build on the concepts and techniques introduced in the MHA curriculum and integrate them with a decision making focus in a variety of health care problems and settings. Case analysis will be used extensively to develop an opportunity for the student to learn to apply the appropriate skills to an unstructured environment. Prereq: MHA program status and completion of first two semesters MHA course work.

*CPH 785 HEALTH POLICY.** (3)

An analysis of the development and implementation of health policy on a national, state, local, and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values, and political and community factors affecting policy development and program implementation. Prereq: MHA program status or permission of instructor. (Same as PA 673.)

**CPH 786 DOCTORAL SEMINAR.**

Students will attend colloquium sessions that will supplement the core curriculum with additional application. Prereq: Enrollment in the Ph.D. in Epidemiology and Biostatistics program.

*CPH 787 INDEPENDENT STUDY IN HEALTH ADMINISTRATION.** (1-3)

Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

*CPH 788 SPECIAL TOPICS IN HEALTH ADMINISTRATION.** (1-3)

An analysis of selected issues with special significance for health administration. Prereq: MHA Program Status.

**CPH 790 WATER SANITATION AND HEALTH.**

Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CE 655.)

**CPH 841 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE.**

This course offers a structural exposure of students to the variables of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as BSC 620.)

**CPH 901 PUBLIC HEALTH DOCTORAL PROFESSIONAL COLOQUIUM.**

Seminar course designed as an integrative introduction, consideration, capstone for the Doctor of Public Health (Dr.P.H.) degree. Offered each semester of enrollment. Prereq: Admission to the Dr.P.H. program.

**CPH 910 TOPICS IN ADVANCED EPIDEMIOLOGY AND LABORATORY.**

Provides the student with an introduction to advanced epidemiologic content areas as well as methods designed to meet the research and practice needs of health professionals. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to the Dr.P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

**CPH 911 PROFESSIONAL SEMINAR IN EPIEpidemiology.**

Professional Seminar in Epidemiology is an advanced course in one of the five content areas of public health designed as the link between academic work in epidemiology and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 9110, or approval of instructor.

**CPH 920 ADVANCED ENVIRONMENTAL HEALTH.**

This professional seminar in Environmental Health is designed to provide comprehensive coverage of the principles upon which the Environmental Health field relies. Prereq: Admission into the Dr.P.H. curriculum.

**CPH 921 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH.**

Designed as the link between academic work in environmental health and application health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

**CPH 930 BIOSTATISTICS CONCEPTS FOR THE PUBLIC HEALTH PRACTITIONER.**

This course covers topics relating to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards). Prereq: Doctor of Public Health Student.

**CPH 931 PROFESSIONAL SEMINAR IN BIOSTATISTICS.**

Designed as the link between academic work in biostatistics and application in public health practice; and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 930, or approval of instructor.

**CPH 940 HEALTH-RELATED BEHAVIORS: MODELS AND APPLICATIONS.**

This course evaluates the use of models of health on related behavior and their applications for intervention in public health problems. Prereq: Admission to the Dr.P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

**CPH 941 PROFESSIONAL SEMINAR IN HEALTH ENHANCEMENT.**

Designed as the opportunity to link academic work in health enhancement with application in public health practice and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 940, or approval of instructor.

**CPH 942 SEMINAR IN PUBLIC HEALTH COMMUNICATION.**

This seminar in Public Health Communication is intended to acquaint students with theory and current research related to communication in public health settings. It is designed to provide insight into the communication that serves as the lifeblood of the organized institutions which promote public health. Those who wish to have a significant role in the management of public health practitioners, improve their understanding of organizations, understand how groups and individuals fit into the larger mission, need to apply advanced information and communication technologies, and desire to become more effective communicators will find this course worthwhile. This course is primarily designed to give students a background in theories, perspectives, concepts, and approaches to understanding communication. Thus, it seeks to promote student understanding, analytical skills, and critical thinking necessary for such professions as consulting, research, and management and for their own personal development.

**CPH 949 DOCTORAL CAPSTONE RESEARCH.**

This course will allow Dr.P.H. students to remain in a full-time enrollment status at the University of Kentucky while working on their doctoral capstone. Enrollment is restricted and by special permission only; students may only register for this course after all for-credit course work has been completed.

**CPH 950 WELL MANAGED PUBLIC HEALTH CARE ORGANIZATION.**

The Well Managed Public Health Care Organization is an advanced course addressing effective senior management of public and private organizations focusing upon public health. Prereq: Admission to the Dr.P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

**CPH 951 PROFESSIONAL SEMINAR IN PUBLIC HEALTH MANAGEMENT AND PRACTICE.**

Designed to link academic work in public health management with application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 950, or approval of instructor.

**CPH 952 SEMINAR IN ADVANCED LEADERSHIP.**

This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the learner for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

**CPH 953 SEMINAR IN ETHICAL AND MORAL DECISION-MAKING.**

This course provides the opportunity to link academic work in public health decision-making with its application to public health practice and to prepare the learner for the practice of public
health decision-making based on ethical and moral principles. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession involved in health decision-making. The period of Nazi Germany 1933-1945 will compose the underlying case study. The seminar will consider in depth the decisions made by Nazi political and military leaders, citizens, religious leaders, concentration camp commanders, guards, and prisoners, physicians, scientists and business leaders. Films will be used extensively in the seminar. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 954 SEMINAR IN ADVANCED PUBLIC HEALTH FINANCE AND ECONOMICS. (3) This course provides the opportunity to link academic work in public health finance and economics with application in public health practice and to prepare the learner for key leadership roles in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health finance and economics. Prereq: Enrollment as a Dr.P.H. student or permission of instructor and approval of the Associate Dean for Admissions and Student Affairs.

CPH 956 PROGRAM EVALUATION FOR PUBLIC HEALTH PROFESSIONALS AND LEADERS. (3) This course is designed to provide Dr.P.H. students the knowledge and skills to guide and critically review program evaluations in their roles as public health professionals and leaders. The course focuses on providing an overview of the key concepts, methods, and approaches to program evaluation with an emphasis on public health practice. Topics include approaches to program evaluation, defining evaluation questions, managing an evaluation, program evaluation standards, program evaluation designs, reporting and disseminating results and findings, and political issues of evaluation. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 960 BIOLOGY OF AGING. (3) This course will focus on the recognition and discussion of the outcomes of biological changes in terms of the effects of aging on the individual’s physical and psychosocial systems. It will be organized utilizing a systems approach to presentations, class discussions, case readings and on-line discussions. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 961 A STUDY OF THE OLDER PERSON. (3) An increasing elderly population during this century has created a variety of pressing social issues. Underscoring such issues is a long-standing cultural view of elders as a homogenous group of people who are “different” from younger labor force participants, a view that has resulted in a stressful collection of attitudes and practices that may reflect discrimination against elders. A properly informed public is necessary to combat ageism and establish sound economic, social, cultural and health care policies that successfully encompass all ages of society. Gerontology is a field of study designed to provide knowledge and a sound data base for dealing with present and future issues of aging and the older population, especially within the realm of public health. This course has been designed to give students pursuing a Dr.P.H. with a concentration in gerontology a broad yet comprehensive graduate-level introduction to the field and to the experience of an older individual that will provide a solid foundation for subsequent courses, and more importantly, personal scholarly development in the program. An array of topics and themes will be presented to adequately represent the multidisciplinary nature of gerontology. Through critical examination of such topics and themes the learner will gain a conceptual foundation for developing effective skills in interdisciplinary inquiry. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 993 PROFESSIONAL SEMINAR IN FOUNDATIONS OF PUBLIC HEALTH PRACTICE. (3) A culminating experience professional seminar linking evidence-based academic work in public health with the foundations of practice. A fundamental part of the course is to prepare the learner for a community advocacy role in public health using skill sets found in critical analysis and leadership. Prereq: All 9X0 and 9X1 courses in the Dr.P.H. program.

CPH 994 PROFESSIONAL SEMINAR IN LEADING PEOPLE – MANAGING CHANGE. (3) A culminating experience professional seminar linking academic work in public health leadership, management and ethics with application to public health practice and preparing learners for a leadership role in public health. Prereq: All five 9X0 and three 9X1 courses in the Dr.P.H. program.

CPH 995 DOCTORAL SEMINAR IN PUBLIC HEALTH RESEARCH METHODS. (3) A survey course in a seminar style covering both classical and recent literature in public health services, including description and critique of research. Prereq: HSM 601 CPH 602 STA 570 or 580, and admission to the Dr.P.H. program or post-doctoral fellowship, or consent of instructor.

CPH 996 PUBLIC HEALTH PROJECT OR DISSERTATION RESEARCH. (1-12) Public health project or dissertation research for residency credit. To be repeated unlimited. Prereq: Completion of the Dr.P.H. Determinative Examination.

CPH 997 DOCTORAL PUBLIC HEALTH FIELD PRACTICUM. (2-4) Required public health field work is the integrative component of the curriculum and an opportunity to apply and test didactic learning. May be repeated twice. Laboratory, eight to sixteen hours per week. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, second year status, or approval of instructor.

CPH 998 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required). (1-4) Designed to address contemporary topics of significance in the field of public health as well as the study of specific topics and problems. May be repeated three times. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CPH 999 DIRECTED STUDIES IN PUBLIC HEALTH. (1-4) Study and research on contemporary and specific topics and problems of significance to the field of public health, and the interests of individual students. May be repeated to a maximum of six hours. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CS 100 THE COMPUTER SCIENCE PROFESSION. (1) An introductory seminar which covers the fundamental activities, principles, and ethics of the computer science profession. An overview of the discipline of computer science, examples of careers, the history of computing and experience with elementary computing tools are included.

CS 101 INTRODUCTION TO COMPUTING I. (3) An introduction to computing and its impact on society from a user’s perspective. Topics include computation using spreadsheets, beautification using text formatters and word processors, information management with database managers, and problem solving through program design and implementation using a simple programming language. Not open to students who have received credit for higher level computer science courses.

CS 115 INTRODUCTION TO COMPUTER PROGRAMMING. (3) This course teaches introductory skills in computer programming using a high-level computer programming language. There is an emphasis on both the principles and practice of computer programming. Covers principles of problem solving by computer and requires completion of a number of programming assignments.

CS 215 INTRODUCTION TO PROGRAM DESIGN, ABSTRACTION, AND PROBLEM SOLVING. (4) The course covers introductory object-oriented problem solving, design, and programming engineering. Fundamental elements of data structures and algorithm design will be addressed. An equally balanced effort will be devoted to the three main threads in the course: concepts, programming language skills, and rudiments of object-oriented programming and software engineering. Prereq: CS 115, 221, or equivalent.

CS 216 INTRODUCTION TO SOFTWARE ENGINEERING TECHNIQUES. (3) Implementation of large programming projects using object-oriented design techniques and software tools in a modern development environment. Software engineering topics to include: life cycles, metrics, requirements specifications, design methodologies, validation and verification, testing, reliability and project planning. Prereq: CS 215.

CS 221 FIRST COURSE IN COMPUTER SCIENCE FOR ENGINEERS. (2) Characteristics of a procedure-oriented language; description of a computer as to internal structure and the representation of information; introduction to algorithms. Emphasis will be placed on the solution of characteristic problems arising in engineering. Prereq: Not open to students who have received credit for CS 115.

CS 261 SOCIAL NETWORKS: METHODS AND TOOLS. (3) The complex connectedness of the modern society is a multifaceted phenomenon resulting from the growing density of the human population, the advent of fast global mass transportation infrastructure, the emergence of global companies and markets, and spurred by the Internet and its applications such as the Web, Facebook and Twitter. In this course, we learn about graph theory, game theory and computational tools required to model and analyze social networks, matching markets, web search, network externalities, tipping points, information cascades, epidemics, small worlds, and voting schemes. The course requires no programming background and has no university-level prerequisites.

CS 270 SYSTEMS PROGRAMMING. (3) This course provides an introduction to computer systems and explores computer architecture, operating systems, and networks from a programmer’s perspective. The course also introduces advanced programming and debugging tools. Topics include hardware instruction sets, machine language and C language program representations, linking/loading, operating systems (process management, scheduling, memory management, interprocess communication, and file systems), network programming (socket programming and web protocols), and common security attacks and solutions. Prereq: EE 280 and CS 216.

CS 315 ALGORITHM DESIGN AND ANALYSIS. (3) Introduction to the design and analysis of algorithms. Asymptotic analysis of time complexity. Proofs of correctness. Algorithms and advanced data structures for searching and sorting lists,
Course Descriptions

CS 316 WEB PROGRAMMING. (3)
This course introduces students to the World Wide Web, languages and techniques used for web programming, data transfer over the Internet, and the tools available in the web environment. Prereq: CS 216.

CS 321 INTRODUCTION TO NUMERICAL METHODS. (3)

CS 335 GRAPHICS AND MULTIMEDIA. (3)
This course focuses on the graphical human-machine interface, covering the principles of windowing systems, graphical interface design and implementation, and processing graphical data. There is an emphasis on medium-scale programming projects with graphical user interfaces using a high-level procedural programming language and concepts such as object-oriented design. Prereq: CS 216 and engineering standing.

CS 340 APPLICABLE ALGEBRA. (3)
Topics include: Euclid’s algorithm, unique factorization moduli arithmetic, Fermat’s and Euler’s theorems, Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotients rings, field extensions, finite fields and BCH codes. Prereq: MA 322 or MA 213. (Same as MA 340.)

CS 371 INTRODUCTION TO COMPUTER NETWORKING. (3)
Introduction to the principles and concepts of the Internet; data communications and digital channel characteristics; networking applications and protocols, client-server paradigm and network programming; reliable data transfer, end-to-end transport; addressing, forwarding and routing, datagram networks; media access control, data link control; selected topics from cloud computing, network security and network management. Concepts are combined with programming and other hands-on assignments to enhance the learning of these topics. Prereq: CS 270, CS 315.

CS 375 LOGIC AND THEORY OF COMPUTING. (3)

CS 378 INTRODUCTION TO CRYPTOLOGY. (3)
The study of secrecy in digital systems. Methods of keeping information secure from classical systems dating from ancient times to modern systems based on modern mathematics. Basic methods of encryption using public key systems, block ciphers, and stream ciphers. The mathematical tools for the design and analysis of such systems are included. Topics include classical cryptography, modern methods of public and private key encryption, authentication and digital signatures, hashing, and passwords. Number theory, abstract algebra, combinatorics, and complexity theory is useful for the design and analysis of cryptosystems. Prereq: CS 315 and STA 281, or instructor’s consent.

CS 380 COMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: CS 215 and EE/EE/CPE 282 or EE 280. (Same as CPE/EE 380.)

CS 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)
A course in the hardware and software of microprocessors. Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CS 380. (Same as EE 383.)

CS 395 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-2)
A course for computer science majors only. A topic, approved by the chairperson of the department, provides an opportunity for supervised individual research and study. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

CS 405G INTRODUCTION TO DATABASE SYSTEMS. (3)
Study of fundamental concepts behind the design, implementation and application of database systems. Brief review of entity-relationship, hierarchical and network database models and an in-depth coverage of the relational model including relational algebra and calculus, relational database theory, concepts in schema design and integrity in database systems. Prereq: CS 315 and graduate or engineering standing.

CS 415G COMBINATORICS AND GRAPH THEORY. (3)
A basic course in the theory of counting and graph theory. Topics in enumerative combinatorics may include: generating functions, compositions, partitions, Fibonacci numbers, permutations, cycle structure of permutations, permutations statistics, Stirling numbers of the first and second kind, Bell numbers, inclusion-exclusion. Topics in graph theory may include: Eulerian and Hamiltonian cycles, matrix tree theorem, planar graphs and the 4-color theorem, chromatic polynomial, Hall’s marriage theorem, stable marriage theorem, Ramsey theory, electrical networks. Prereq: MA 213 or MA 322. (Same as MA 415G.)

CS 416G INTRODUCTION TO OPTIMIZATION. (3)
The course is an introduction to modern operations research and includes discussion of modeling, linear programming, dynamic programming, integer programming, scheduling and inventory problems and network algorithms. Prereq: CS 215 or equivalent. (Same as MA 416G.)

CS 422 NUMERICAL SOLUTIONS OF EQUATIONS. (3)
Linear equations: Gaussian elimination, special linear systems, orthogonalization, eigenproblem, iterative methods. Nonlinear equations: solutions of equations in one variable, stability, solutions of systems of nonlinear equations. Optimization. Prereq: CS/MA 321 and MA 322; or consent of instructor. (Same as MA 422.)

CS 441G COMPILERS FOR ALGORITHMIC LANGUAGES. (3)
The techniques of processing, specifying, and translating high-level computer languages are covered. Topics include finite state automata, context-free grammars, language specification, attributed translation grammars, language parsing, and automatic generation of compilers by SLR, LALR, and other methods of analyzing context-free grammars. Other topics may include code optimization, semantics of programming languages, and top-down parsing. Prereq: CS 315 and engineering standing.

CS 450G FUNDAMENTALS OF PROGRAMMING LANGUAGES. (3)
An intensive study of fundamental programming concepts exhibited in current high level languages. Concepts include recursion, iteration, coroutines, multiprocessing, backtracking, pattern-matching, parallel processing, data structures, and storage management. Typical languages studied are SNOBOL, LISP, PASCAL, and APL. Prereq: CS 370. Restricted to computer science and electrical engineering majors. Others by permission.

CS 460G MACHINE LEARNING. (3)
Study of computational principles and techniques that enable software systems to improve their performance by learning from data. Focus on fundamental algorithms, mathematical models and programming techniques used in Machine Learning. Topics include: different learning paradigms (such as supervised, unsupervised and reinforcement learning); various learning algorithms (such as decision trees, neural networks, k-NN, boosting, SVM, k-means) and crosscutting issues of generalization, data representation, feature selection, model fitting and optimization. The course covers both theory and practice, including programming and written assignments that utilize concepts covered in lectures. Prereq: Strong programming ability (CS 315), basic probability and statistics (STA 281), and basic concepts of linear algebra (MA/CS 321 or MA/CS 322), or instructor’s consent.

CS 463G INTRODUCTION TO ARTIFICIAL INTELLIGENCE. (3)
The course covers basic techniques of artificial intelligence. The topics in this course are: search and game-playing, logic systems and automated reasoning, knowledge representation, intelligent agents, planning, reasoning under uncertainty, and declarative programming languages. The course covers both theory and practice, including programming assignments that utilize concepts covered in lectures. Prereq: CS 315, CS 375, and engineering standing.

CS 470G INTRODUCTION TO OPERATING SYSTEMS. (3)
This course provides an introduction and overview of operating system design, internals, and administration. Topics include: scheduling, process management, memory management, device drivers, file systems, modern operating systems concepts (kernel/microkernel designs, concurrency, synchronization, interprocess communication, security and protection), and operating system administration. Prereq: CS 315, CS 380, and graduate or engineering standing.

CS 471G NETWORKING AND DISTRIBUTED OPERATING SYSTEMS. (3)
This course provides an introduction to networking and distributed operating systems with examples. Topics will include protocol stacks, link, network, transport, and application layers, network management, the client-server model, remote procedure calls, and case studies of distributed OS and file systems. Prereq: CS 315 and graduate or engineering standing.

CS 480G ADVANCED COMPUTER ARCHITECTURE. (3)
This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CPE/EE 480.)

CS 485G TOPICS IN COMPUTER SCIENCE (Subtitle required). (2-4)
Studies of emerging research and methods in computer science. A review and extension of selected topics in the current literature. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory will be announced. Lecture/discussion, two-four hours; laboratory, zero-four hours per week. May be repeated up to the discretion of the department.

CS 498 SOFTWARE ENGINEERING FOR SENIOR PROJECT. (3)
Current approaches – practice and technologies – for developing reliable software: specification, testing, and verification. Individual and team assignments focused on applying these approaches to software systems. A significant communication and composition component of the course is the emphasis on specifying, designing, presenting, and documenting software systems. Prereq: CS 315, 215, 216.
CS 499 SENIOR DESIGN PROJECT. (3)
Projects to design and implement complex systems of current interest to computer scientists. Students will work in small groups. Prereq: CS 315 and engineering standing. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CS 505 INTERMEDIATE TOPICS IN DATABASE SYSTEMS. (3)
The course introduces a variety of modern techniques in database and distributed database systems. The major topics include, but are not limited to: object-oriented database systems; distributed, heterogeneous and web-based databases; knowledge based systems; physical database design; and security. The course covers a variety of methods that allow for a solution of database problems where the traditional relational database techniques are not viable or not sufficient. Prereq: CS 405 or consent of instructor.

CS 515 ALGORITHM DESIGN. (3)
The design and analysis of efficient algorithms on data structures for problems in sorting, searching, graph theory, combinatorial optimization, computational geometry, and algebraic computation. Algorithm design techniques: divide-and-conquer, dynamic programming, greedy method, and randomized algorithms. Prereq: CS 315 and engineering standing.

*CS 521 COMPUTATIONAL SCIENCES. (3)
Study of computer science techniques and tools that support computational sciences and engineering. Emphasis on visualization, performance evaluation, parallel computing, and distributed computing. Prereq: Either EGR 102 or CS 115, and CS 380/EE 380 and engineering standing.

CS 522 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA I. (3)

CS 535 INTERMEDIATE COMPUTER GRAPHICS. (3)
Three-dimensional graphics primitives such as 3D viewing, lighting, shading, hidden line/surface removal, and more advanced topics such as solid modeling, image storage and representation, advanced raster graphics architecture and algorithms, advanced modeling techniques, and animation will be covered. Prereq: CS 335, CS 315; CS 321, and engineering standing.

CS 536 SITUATED COMPUTING. (3)
This course covers the fundamental concepts involved in understanding and designing a closed-loop, sensing, reasoning, and acting agent. Biological models of sensing and acting will be discussed and related to modern artificial counterparts. The course consists of three major topics: visual learning, vision, brain, and robotics. It will introduce students to the issues in computer and biological vision, to models of belief representation and modification, architectures for perception processing and reasoning, machine learning for vision, neural networks, path planning, intelligent localization based on visual cues, and to forward and inverse kinematics, intelligent grasping, and the integration of perception and action. Prereq: CS 4600 or consent of instructor.

CS 537 NUMERICAL ANALYSIS. (3)

CS 541 COMPILER DESIGN. (3)
Intermediate aspects of a compilation process with an emphasis on front-end issues. Practical issues in using compiler writing tools. Code generation for expressions, control statements and procedures (including parameter passing). Symbol tables, runtime organization for simple and structured variables. Using compilers and translators for automation (filters, programs writing programs). Prereq: CS 441 or consent of instructor.

CS 555 DECLARATIVE PROGRAMMING. (3)
The course covers fundamentals of propositional and predicate logic, and their uses in declarative programming to model and solve computational problems. Topics include propositional satisfiability, satisfiability testing techniques such as the DPLL algorithm, automated reasoning techniques for predicate logic such as resolution with unification, logic systems, and requirements specification. Prereq: CS 315 and CS 375 or consent of instructor.

CS 570 MODERN OPERATING SYSTEMS. (3)
Brief review of classical operating system concepts (process and memory management, process coordination, device drivers, files systems, starvation/deadlock). Modern topics of file systems (log-structured file systems, distributed file systems, memory-based file systems), operating system design (monolithic, communication-kernel, extensible/adaptive, distributed shared memory), multiprocessor issues (scheduling, synchronization, IPC), security (internet attacks, encryption, defenses). Inspection and modification of actual operating system code (Linux). Prereq: CS 470 and engineering standing.

CS 571 COMPUTER NETWORKS. (3)
Principles of computer networks using current Internet technologies and protocols as examples. Routing algorithms and protocols; end-to-end transport; flow control; congestion avoidance and control; mail, web, and file transfer protocols; designing and implementing applications using common network APIs. Advanced topics, included as time permits, include network security, multicast, and quality of service. Prereq: CS 471G or consent of instructor.

CS 575 MODELS OF COMPUTATION. (3)
The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Formal languages and machines as recognizers of languages. The Chomsky Hierarchy of language types. Topics may include Turing machines, types of basic models of computation; decidability and undecidability; basic complexity theory; finite automata and regular languages; pushdown automata and context-free languages. The course will cover primarily theory, including assignments that utilize concepts covered in lectures. Prereq: CS 375 and engineering standing, or consent of instructor.

CS 585 INTERMEDIATE TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)
Topics to be selected by staff. May be repeated to a maximum of six credits, but only three credits may be earned by a student under the same topic. Prereq: Restricted to computer science and electrical engineering majors. Others by permission.

CS 587 ADVANCED EMBEDDED SYSTEMS. (3)
An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as EE/CPE 587.)

CS 610 MASTER’S PROJECT. (3)
Design and implementation of a large computing project under the supervision of a member of the graduate faculty. Prereq: Satisfactory completion of the departmental foundational examinations.

CS 611 RESEARCH IN COMPUTER SCIENCE. (3-9)
Doctoral students conduct research work in computer science under supervision of a faculty member from the Department of Computer Science. May be repeated to a maximum of 4 semesters (18 credits, maximum). Prereq: 36 credit hours of graduate course work in computer science and approval of the Departmental Committee on Higher Degrees.

CS 612 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-3)
Reading course for graduate students in computer science. May be repeated to a maximum of nine credits. Prereq: Overall standing of 3.0, and consent of instructor.

CS 616 SOFTWARE ENGINEERING. (3)
This course provides an overview of the software engineering discipline: software requirements, software design, software construction, software management, and software quality. Testing and validation techniques will be emphasized throughout the course. Programs and program fragments will be developed and studied throughout the course to illustrate specific problems encountered in the lifecycle development of software systems. Prereq: At least nine hours of graduate computer science courses.

CS 617 REQUIREMENTS ENGINEERING. (3)
The course examines the requirements phase of the Systems Engineering and Software Engineering lifecycle in detail. Basic models, methodologies and tools will be presented. Prereq: Two 500 level CS courses, or consent of instructor. (Same as EE/CPE 617.)

CS 618 SOFTWARE DESIGN. (3)
This course provides an overview of the software design field: software design overview, software design process, a survey of software design method (such as structured design methods, object-oriented design methods, concurrent design methods), design reviews, as well as discussing current topics such as aspect-oriented programming, refactoring, and design patterns. Testing and validation techniques are emphasized throughout the course. Prereq: Nine hours of graduate study.

CS 621 PARALLEL AND DISTRIBUTED COMPUTING. (3)
This course provides graduate students in computer science and in other fields of science and engineering with experience of parallel and distributed computing. It gives an overview of programming languages and distributed computing systems and distributed architectures, languages, environments, communications, and parallel programming. Emphasis is on understanding parallel and distributed computers and portable parallel programming with MPI. Prereq: Two 500 level CS courses, or consent of the instructor.

CS 622 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA II. (3)
Numerical solution of matrix eigenvalue problems and applications of eigenvalues. Normal forms of Jordan and Schur. Vector and matrix norms. Perturbation theory and bounds for eigenvalues. Sparse matrices and distributed computing. The course addresses eigenvalues and eigenvectors; Hermitian eigenvalue problems and the singular value decomposition; stability and conditioning; and the accuracy of numerical linear algebra. Prereq: MA 522 or equivalent. (Same as MA 622.)

CS 623 PARALLEL ITERATIVE COMPUTING. (3)
The course will present advanced computational science techniques needed to support large scale engineering and scientific computations. Emphasis on iterative methods for solving large
sparse linear systems and parallel implementations of iterative techniques. Prereq: CS 537 or consent of the instructor.

**CS 630 FREE-FORM SOLID MODELING.** (3)

This course covers the path from a conceptual vision of a shape to a computer-based description that is suitable for manufacturing. It covers various solid modeling techniques, including free-form surface representation, boundary representations, instanciation and Boolean combinations of shapes, and procedural generation such as sweeps. It discusses effective data structures and consistent and unambiguous part description formats to transfer a shape from a designer to a fabrication house, as well as problems with maintaining unambiguous topology in the presence of finite-precision geometry. Prereq: CS 535 or consent of instructor.

**CS 631 COMPUTER-AIDED GEOMETRIC DESIGN.** (3)

Overview of current concepts and issues in CAGD with emphasis on free-form surface design; mathematics of free-form curve and surface representations, including Coons patches, Gregory patches, Bezier method, B-splines, NURBS, triangular interpolants, and their geometric consequences; creating objects with smooth surfaces, covering assembling spline patches, geometric and parametric continuity, texture mapping onto complex shapes, subdivision surfaces, surface evolution, and global optimization. Prereq: CS 535 and CS 321, or consent of instructor.

**CS 633 3D COMPUTER ANIMATION.** (3)

This course covers the underlying principles and techniques of 3D computer animation. The topics covered include (1) modeling: the process of building the forms that will be animated, (2) rendering: the process of defining how the final picture in the model will look, (3) animation techniques: the process of creating in-between frames and keyframes, (4) compositing and special effects: the process of assembling various pieces of an image to get special two-dimensional effects, and (5) recording the animation frames onto film or video. Prereq: CS 335 or CS 535, or consent of instructor.

**CS 634 MULTIMEDIA SYSTEMS.** (3)

This course covers fundamental techniques in multimedia systems for capturing, managing, accessing and delivering digital media over local, wide-area and wireless network technology. The core topics will emphasize the digital media (images, video, audio) and the algorithms to generate, store, access and process it. Network concepts will be presented at a high level only. Prereq: CS 335 or consent of instructor.

**CS 635 IMAGE PROCESSING.** (3)

The core outlines applications of image processing and addresses basic operations involved. Mathematics covered include image perception, transforms, compression enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as EE 635.)

**CS 636 COMPUTER VISION.** (3)

This course covers digital image processing as well as advanced topics in computer vision. Initial topics include image formation, digital filtering, sensor modeling and feature detection techniques. The course will discuss how these algorithms are used to address general computer vision problems including three-dimensional reconstruction, scene understanding, object recognition, and motion analysis. Prereq: CS 536 or consent of instructor.

**CS 637 EXPLORING VIRTUAL WORLDS.** (3)

This course covers a mixture of core techniques related to systems for constructing and modeling virtual environments, such as model-building, image-based rendering, head-mounted hardware, stereo image generation, head-tracking, and immersive display technology. The core topics will be presented using textbooks and papers from the current literature. A substantial group project will provide hands-on experience with the concepts, algorithms and technology. Prereq: CS 635 and CS 635.

**CS 642 DISCRETE EVENT SYSTEMS.** (3)

The objective of the course is to prepare students for research in the field of supervisory control of discrete event systems (DES's). Logical models, supervising control. Stability and optimal control of DES, complexity analysis and other related research areas will be covered. Prereq: Graduate standing or consent of instructor. (Same as EE 642.)

**CS 655 PROGRAMMING LANGUAGES.** (3)

Overview of programming-language styles: imperative, functional, declarative, object-oriented, concurrent, simulation, and non-local referencing environments, combinational control structures (backtracking, coroutines), higher-order types, lazy/eager evaluation. This course looks at features, not complete languages, touching on such languages as Ada, C, PL/I, Haskell, Icon, Lisp, ML, Modula-2, Modula-3, Pascal, Post, Prolog, Russell, Simula-67, and Smalltalk-80. Students will not become proficient in any of these languages, but rather will learn what contributions each has made to the state of the art in language design. Compiler-construction issues will be touched on in passing. Prereq: CS 4500 or consent of instructor.

**CS 660 TOPICS IN ARTIFICIAL INTELLIGENCE** (Subtitle required). (3)

Advanced topics chosen from the following: knowledge representation, knowledge acquisition, problem solving, very high-level programming languages, expert systems, intelligent and deductive databases, automated theorem proving. May be repeated to a maximum of six credits, but only three credits may be earned under the same topic. Prereq: CS 505 and CS 560 or consent of instructor.

**CS 663 ARTIFICIAL INTELLIGENCE.** (3)

Overview of modern artificial intelligence. Covers topics such as searching and game trees, knowledge representation techniques, methods to represent uncertain information and to reason about it, reasoning about action and planning, expert systems, machine learning and neural networks. Prereq: CS 555 or consent of instructor.

**CS 670 DISTRIBUTED OPERATING SYSTEM THEORY.** (3)

This course covers advanced distributed operating system algorithms and theory. Topics such as distributed mutual exclusion, distributed event ordering, distributed deadlock detection/ recovery, logical clock systems, consistent global snapshot collection, stable predicate detection, failure recovery, failure-tolerant consensus, leader election, process groups and group communication. Case studies of distributed operating systems such as LOCUS, Grapevine, V System, ISIS, Amoeba, Sprite, and Mach will be used as illustrations of the above algorithms. Prereq: CS 570 or consent of instructor.

**CS 671 ADVANCED COMPUTER NETWORKS.** (3)

This course is intended to provide students with a solid understanding of the state of the art in computer network systems and protocols. Topics are covered in some depth, including both abstract and concrete aspects. The course begins with a study of implementations of the current Internet Protocols (TCP, UDP and IP); this provides a concrete backdrop for the rest of the course. The emphasis is on learning by doing, with programming and other hands-on assignments associated with most topics. Prereq: CS 571 or consent of instructor.

**CS 673 ERROR CORRECTING CODES.** (3)

The problem of correct transmission of data in a noisy environment. The design and analysis of codes of color (bit errors, data rate and encryption and decryption speed) correct errors. Linear and nonlinear block codes, general encoding and decoding techniques, fundamental bounds, dual codes, cyclic codes. Specific codes will be studied, including Hamming, BCH, Reed-Muller, Reed-Solomon, trellis, and convolutional codes. Prereq: CS 515 or consent of the instructor.

**CS 674 HEURISTIC ALGORITHMS.** (3)

Solving problems that are intractable. Exact techniques such as search, integer programming and dynamic programming. Approximation techniques including local search, divide and conquer, and greedy algorithms. Methods based upon natural models such as force-directed iteration, simulated annealing, genetic algorithms, and neural networks. Examples will be selected from active research areas. Prereq: CS 515 or consent of instructor.

**CS 675 COMPUTABILITY AND COMPLEXITY.** (3)

The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Topics will include Turing machines or other basic models of computation; reductions; computable and computably enumerable sets; Rice’s Theorem; decidability and undecidability; basic complexity theory; NP-complete and notions of intractability. Additional topics may include primitive recursive functions and Grzegorczyk hierarchy; nondeterminism; the arithmetic hierarchy; formal complexity measures; time and space hierarchy theorems; the polynomial hierarchy and PSPACE; probabilistic complexity classes; circuit complexity. Prereq: CS 575 or consent of instructor.

**CS 677 COMPUTATIONAL GEOMETRY.** (3)

Design and analysis of algorithms and data structures for geometric problems. The particular groups of problems addressed include convex hull construction, proximity, Voronoi Diagrams, geometric search, intersection. Prereq: CS 580.

**CS 678 CRYPTOGRAPHY.** (3)

The study of security in communications and electronic computing. The encryption of data using public key systems, block ciphers, and stream ciphers. The basic tools for the design and analysis of such systems. Topics may include information theory, authentication, digital signatures, secret sharing schemes, complexity theoretic issues, probabilistic encryption, electronic commerce and others. Prereq: CS 515 or consent of instructor.

**CS 680 SEMINAR IN COMPUTER SCIENCE.** (2)

May be repeated to a maximum of four credits. Prereq: Consent of instructor, or two 500-level computer science courses.

**CS 683 FINITE-STATE MACHINES.** (3)

**CS 684 SPECIAL TOPICS IN VISION, GRAPHICS AND MULTIMEDIA (Subtitle required).** (3)

Advanced topics in computer graphics, computer vision, and multimedia systems. Specific topics include but are not limited to: isophotes, volume rendering, displacement mapping, geographic information systems (GIS), remote sensing topics, large scale sensor networks, video and audio encoding, visualization, immersive environments, and multimedia interfaces. May be repeated to a maximum of up to 6 credit hours, with no more than 3 in the same topic. Prereq: Consent of instructor.

**CS 685 SPECIAL TOPICS IN COMPUTER SCIENCE (Subtitle required).** (3)

Topics to be selected by staff. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or two 500-level computer science courses.
CSC 686 SPECIAL TOPICS IN THE THEORY OF COMPUTATION (Subtitle required). (3) Advanced topics in the theory of computation and the design and analysis of algorithms, including heuristic approaches for algorithm design, parallel computation, flow problems, parallel and concurrent processes and other areas of current research interest. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or CS 575 and CS 580.

CSC 687 SPECIAL TOPICS IN SYSTEMS. (3) This course is a special topics course. The topic and syllabus will change each time the course is offered, reflecting the interests of the instructor. Typically the course will survey new research in the topic area but may also look back at canonical and ground breaking work from the past. Example course topics might include things such as web operating systems, global file systems, distributed object-based systems, fault tolerance/distributed check pointing, high-speed networking, network security, active networking, group communication models, compilers for parallel/distributed computing, recent programming languages, and data mining. Prereq: Consent of instructor.

CSC 689 SPECIAL TOPICS IN NUMERICAL AND SCIENTIFIC COMPUTING (Subtitle required). (3) Advanced topics in numerical analysis, scientific computation, and complexity of continuous problems. Specific topics may include, but are not limited to: iterative methods, advanced parallel algorithms in numerical linear algebra, multivariate function approximation and integration. Prereq: CS 537 or consent of instructor.

CSC 690 OPERATING SYSTEMS THEORY. (3) An advanced study of operating systems theory including operating sequential processes, processor scheduling, paging systems, and memory management. Prereq: CS 570.

CSC 748 MASTER'S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CSC 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769: residence credit following the successful completion of the qualifying exams.

CSC 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CSC 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

CSC 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12) May be repeated indefinitely. Prereq: Consent of instructor.

CSC CLINICAL SCIENCES

CSC 528 LABORATORY TECHNIQUES FOR CLINICAL SCIENCES STUDENTS. (2) Basic clinical laboratory principles and techniques; includes laboratory safety, sterilization procedures, pipetting, microscopy, routine culture and staining procedures, charting laboratory methods, calculator and laboratory math calculations and statistics. Consent of instructor required for non-CS or non-CLL students.

CSC 600 HUMAN PATHOPHYSIOLOGY. (4) A study of disease processes, pathognomonic parameters, and pathologic factors that mediate disease. Diagnostic testing used to validate disease process will be used to emphasize to the student the role of clinical sciences in the diagnosis of these complex disease states. Variances in disease in relationship to age will be examined. Prereq: Admission to the Clinical Sciences graduate program or consent of the course faculty committee.

CSC 601 HEALTH CARE POLICY AND ETHICS. (3) The focus of this integrative course will be on policy and ethical issues confronting health care providers, health care systems, and particularly those issues specific to clinical sciences. Emphasis will be placed on current trends and anticipated challenges in providing humane and cost-effective health care services, with particular reference to the medically underserved and other at-risk populations. The different needs of special populations such as the aging, socioeconomically disadvantaged, insured and uninsured persons, ethically and culturally diverse groups such as recent immigrants and minorities will be explored. Discussion of technology dissemination delivery models, funding sources, human resources required to provide health care, alternative methods of coordinating these resources, and shifting from an “illness” orientation to a “wellness” approach will be included. The bioethics of health care delivery addressed will also include global considerations relative to health care, population dynamics, health care rationing, health care economics and assisted reproduction and transplantation issues.

CSC 602 CLINICAL SCIENCES SEMINAR (Subtitle required). (1) Provides skills required of successful scientist to communicate effectively with peers, clients and general public. Each student will demonstrate an ability to interact with community function in an educator role by investigating a topic and preparing and delivering a presentation to the class and a community group. May be repeated up to five times. Prereq: Admission to the Clinical Sciences graduate program or consent of instructor.

CSC 603 QUALITY ASSURANCE AND LABORATORY REGULATIONS. (3) Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 604 HUMAN PATHOLOGY: ORGAN SYSTEMS. (3) Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 605 EPIDEMIOLOGY AND BIOSTATISTICS. (3) Applications-based statistical and analytical software is used to demonstrate Continuing Quality Improvement (CQI) adherence to Federal regulation, NCCLS/IFCC protocols, and other accrediting agency requirements. Special emphasis is on defining and controlling unstable error through a statistical modeling approach. Documentation structures for quality operations policy; and processes, procedures and implementation of a quality system are examined with special attention to assuring quality of point-of-care testing. Detailed computerized study of method comparison includes receiver operator charting (ROC). Computerized diagnostic and therapeutic programs are used to simulate disease sensitivity, specificity, and predictive values. Utilization of management systems to track expenses, budget, personnel management, employee scheduling, productivity evaluations, process improvement and restructuring are demonstrated. Computerized performance management systems and innovations in compliance strategies are featured. Student evaluation will be based on examinations, projects, and papers.

CSC 615 REPRODUCTIVE LABORATORY SCIENCE. (1) The course includes basic cell biology and principles of genetics; a review of the male reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation.

CSC 616 ANDROLOGY. (1) The course will include a review of male physiology, spermatogenesis and fertilization. The procedures appropriate for evaluation of male fertility will be presented and conditions and diseases associated with male factor infertility will be discussed. Basic and advanced andrology tests and procedures for both diagnostic and treatment purposes will be reviewed. Microscopy, dilution, dilution and testing sperm will be introduced. Prereq: CSC 528, CSC 615 or consent of the instructor.

CSC 617 REPRO MICROBIOLOGY AND IMMUNOLOGY. (1) The course includes basic immunology, allergy, skin disease, immune response in the elderly and the use of immunomodulatory agents to treat immunological disease. Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 618 LABS IN ANDROLOGY, REPRODUCTIVE MICROBIOLOGY AND IMMUNOLOGY. (1) A review of basic immunology will be covered including an overview of the organs, tissues and functions that comprise the immune system, different forms of immunity and the basis of the immune response. The reproductive immunology segment will focus on antibodies associated with infertility and reproductive failure, and also will include properties of the immune system during pregnancy. Microbiology will be covered as it pertains to assisted reproductive technology, focusing on: (1) causes of infertility may be transmitted in the assisted reproductive technology (ART) laboratory and (3) prevention of contamination in the ART facility. Prereq: CSC 528, CSC 615 or consent of instructor.

CSC 619 CLINICAL SCIENCE: MANAGEMENT AND RECORDS. (1) Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 620 ANDROLOGY. (3) Review of the male reproductive system including hormonal control, early development, oogenesis and fertilization. Basic and advanced andrology procedures will be discussed and laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Advanced andrology procedures, including the sperm penetration assay and the hemi-zona assay, will be discussed and protocols provided. Reproductive Immunology: Students will perform procedures for detecting antisperm antibodies in semen and in serum. Sperm-cervical mucus testing and cross-testing will be performed using controlled donor semen and bovine cervical mucus. Reproductive Microbiology: Organisms associated with sexually transmitted diseases, infertility, and reproductive failure will be demonstrated with representative demonstrations consisting of: stained slide of bacteria, fungi and parasites and electron micrographs of viruses; organisms on appropriate culture media; examples of testing for identification. Students will use data from the demonstrations to develop summaries for the correct isolation and identification of these organisms. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor.

CSC 621 EMBRYOLOGY/ASSISTED REPRODUCTIVE TECHNOLOGY. (3) Review of female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation. Assisted reproductive technology procedures will be discussed with the aid of photographs and videos and...
laboratories will focus on culturing and manipulating mouse embryos. Prereq: BIO 549, CSC 620.

CSC 623 REPRODUCTIVE IMMUNOLOGY. (1)
Immunology associated with fertilization, implantation, and early development in humans. Various procedures for detecting antibodies associated with reproduction will be discussed and the laboratories will assess both direct and indirect antibodies on spermatozoa. Prereq: BIO 494G, CSC 620, CSC 621.

CSC 624 CRYOPRESERVATION OF REPRODUCTIVE TISSUES. (2)
Principles of methods of cryopreservation will be covered and procedures for freezing human oocytes, embryos, and ovarian and testicular tissues will be detailed. Legal, ethical and policy issues associated with cryopreservation will be introduced. Laboratory sessions will focus on freezing human spermatozoa and mouse gametes and embryos. Prereq: CSC 620 and CSC 621.

CSC 625 POLICY, MANAGEMENT, ETHICAL AND LEGAL ISSUES IN ASSISTED REPRODUCTION. (2)
Current and anticipated regulations of assisted reproductive technology will be discussed. Legal and ethical concerns associated with ART will be introduced and case studies will focus on specific issues. Prereq: CSC 620, 621, 624.

CSC 626 CLINICAL PRACTICUM IN ANDROLOGY LABORATORY. (2)
Students must complete the checklist procedures while working under supervision. Andrology procedures will include semen analysis, sperm function tests, microbiology, preparation for artificial insemination, and cryopreservation of male gametes. Prereq: CSC 620, 621, 623, 624, 625.

CSC 627 CLINICAL PRACTICA IN ART LABORATORY. (3)
Students must complete the checklist procedures while working under supervision. All ART procedures including in vitro fertilization, ICSI, zona hatching and cryopreservation of gametes and embryos will be practiced under supervision using appropriate models for practice. Prereq: CSC 620, 621, 623, 624, 625.

CSC 628 RLS SEMINAR. (1)
Students in the RLS seminar will critique research papers in the field, will develop and present PowerPoint presentations on subjects covering andrology, ART, cryopreservation of human reproductive tissue, management issues in the reproductive laboratory, and policy, ethical and legal issues in ART. May be repeated for total of two credits. Prereq: CSC 528, CSC 615, CSC 616, CSC 617, CSC 618, CSC 619, CSC 621, CSC 624 or consent of instructor.

CSC 630 RLS RESEARCH. (1-5)
Research projects for students in Reproductive Laboratory Science. Students will complete web-based modules, “The Scientific Method and the Art of Research” prior to project initiation. Projects should be related to the student’s individual interest and should address an area in reproductive laboratory science. Projects should be under the supervision of a faculty member with expertise in the project area. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor. Additional CSC courses in the RLS track may be required as prerequisites depending on the nature of the research project.

CSC 670 HISTOCOMPATIBILITY AND IMMUNOGENETICS. (3)
In-depth study of the human histocompatibility polymorphisms will include genetic inheritance, allelic, typing methodologies, and matching requirements for solid organ and tissue transplantation. The human leukocyte antigen (HLA or MHC) system and its role in transplant rejection will be the major focus, however minor histocompatibility systems will also be examined. The course will include and identify correlation of didactic information will be integrated with case studies to explore current concepts of immunologically-based molecular methods of antigen detection and their impact on clinical practice. Prereq: Immunology course.

CSC 671 MOLECULAR IMMUNOPATHOGENESIS.

CSC 672 TRANSPLANTATION SCIENCE. (3)
Course content includes immunological, biochemical and genetic concepts and molecular biology related to the clinical process of transplantation. Cellular and molecular mechanisms will be an intense focus of this course. Solid organ and tissues transplantation, the need for donor organs and tissues, compatibility requirements for successful transplantation of each type of organ and tissue, immunosuppressive therapy, and research opportunities that may impact successful transplantation and tissue availability will be examined. Literature review and presentation of papers on assigned topics will be required. Prereq: CSC 670 or consent of instructor.

CSC 673 FLOW CYTOMETRY. (3)
This course focuses on principles, applications and quality assurance of flow cytometry in research and clinical use in hematology and transplantation. Emphasis is placed on the biological and physical principles underlying flow cytometry, specimen processing, operation and specific application in the identification of various hematopoietic and other cells. The use of flow cytometry to screen transplant recipients, cross-match donor and potential recipient post-transplant monitoring, identifying HLA antigens, diagnosing hemoproliferative disorders, monitoring immunosuppressive therapy and stem cell isolation is presented. Evolving applications in other disciplines such as microbiology and clinical chemistry, will also be explored. Prereq: CSC 670, or CSC 674 and CSC 675, or consent of instructor.

CSC 674 HEMOPROEISIS. (3)
Normal and abnormal hemopoiesis is examined. Special emphasis is placed on understanding the relationship of hemopoiesis to hemoproliferative and immunologic disease; transplantation science, and medical applications. Prereq: Course(s) in hematology and hemotologic disease, or consent of instructor.

CSC 675 MYELOPROLIFERATIVE DISORDERS. (3)
This course will review current knowledge and hypotheses regarding both hypo and hyper coagulable states, drug induced disorders of hemostasis, treatment regimes, and the present state of the art in laboratory testing for high-risk individuals. Prereq: Course in hemostasis including normal mechanisms and pathological states, or consent of instructor.

CSC 676 ADVANCED HEMOSTASIS. (3)
This course will review current knowledge and hypotheses regarding both hypo and hyper coagulable states, drug induced disorders of hemostasis, treatment regimes, and the present state of the art in laboratory testing for high-risk individuals. Prereq: Course in hemostasis including normal mechanisms and pathological states, or consent of instructor.

CSC 677 ERYTHROCYTE DISORDERS. (3)
Advanced review of inherited and acquired disorders of erythrocyte production, destruction and loss including the hemoglobinopathies. The course will address the pathophysiology, laboratory testing and treatment of each disorder. Prereq: CSC 674.

CSC 690 CLINICAL SCIENCES THESIS RESEARCH. (1-6)
Research, design, protocol development and production of thesis are included. Grade will be reported following evaluation of written product by the thesis committee. Prereq: Successful completion of final/comprehensive examinations for the Clinical Sciences graduate program.

CSC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of CSC 769 residence credit following the successful completion of the qualifying exams.

CSC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CSC 789 RESEARCH APPRENTICESHIP. (1-4)
The goal of this course is to ensure that the student understands and can apply research methods to identifying a research problem, developing a proposal, conducting an investigation, and preparing a journal-quality research paper. Students will work closely with a clinical sciences researcher to develop these research skills. The course requirements and format will vary depending upon the student’s prior experience. Prereq: Admission to the Clinical Sciences doctoral program.

CSC 790 CLINICAL SCIENCES DISSERTATION RESEARCH. (0-12)
Research design, protocol development and production of written dissertation after completion of the dissertation research. Grade will be issued following evaluation of the dissertation by committee. Candidates for the degree must complete nine credit hours in each of two successive semesters of dissertation research. Prereq: Successful completion of the Clinical Sciences qualifying examinations.

CSD Communication Sciences and Disorders

CSD 220 AMERICAN SIGN LANGUAGE AND THE CULTURE OF THE DEAF COMMUNITY IN AMERICA. (3)
An introductory course in American Sign Language (ASL), the native language of the Deaf community in America, this course lays a foundation for effective, respectful, participation in a culturally and linguistically diverse society. The course will employ an immersive approach to develop basic skills in conversational ASL and fingerspelling, as well as an appreciation of the basic grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, and the role of Deaf culture in society. Prereq: CSD or HHS majors or permission of the instructor.

CSD 277 INTRODUCTION TO COMMUNICATION DISORDERS. (3)
An introduction to disorders of speech, language, and hearing. The course includes definitions, symptomatology, etiologies, and basic intervention principles for these disorders.

CSD 285 APPLIED PHONETICS. (3)
Study of the phonetic structure of the English language with requirement of mastery of the International Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in communication disorders, communications, telecommunication, and theater.

CSD 320 AMERICAN SIGN LANGUAGE I AND THE CULTURE OF THE DEAF COMMUNITY IN THE US. (3)
An intermediate level course in American Sign Language (ASL), the native language of the Deaf community in America, this course will use an immersion approach to develop skills in conversational ASL and fingerspelling, as well as an appreciation of the grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, and the role of Deaf culture in society. Prereq: Successful completion of CSD 220 (ASL 1) or permission of instructor.

CSD 378 ANATOMY AND PHYSIOLOGY OF SPEECH. (3)
A detailed investigation of structures and functions supporting speech production: respiration, phonation, articulation, and resonance. Neural bases of speech and language will also be introduced. Prereq: CSD major or permission of instructor.

**University of Kentucky**

2016-2017 Undergraduate Bulletin

429
CSD 659 CLINICAL ROTATION IN SPEECH-LANGUAGE PATHOLOGY. (1-12)
Supervised clinical experience in the evaluation and management of children and adults. Up to 40 laboratory hours per week (at site all day). May be repeated up to 36 hours. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 661 PHONOLOGICAL DEVELOPMENT AND DISORDERS. (3)
A comprehensive course in phonological theory, assessment, and treatment. Advanced principles of diagnosis and remediation for patients across the age span and from culturally and linguistically diverse backgrounds. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 670 VOICE DISORDERS. (3)
Assessment and management of adults and children with disorders of voice and resonance. Includes laryngectomy. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 674 DISORDERS OF FLUENCY. (3)
Analysis, identification and management of fluency disorders. Prereq: Permission of instructor.

CSD 675 LOW INCIDENCE COMMUNICATION DISORDERS (Subtitle required). (1)
Assessment and management of adults and children with low incidence communication disorders including disorders of fluency, craniofacial anomalies and tracheostomy. Topics may vary depending on current trends in the discipline. Prereq: Graduate status in CODI or consent of instructor.

CSD 677 APHASIA AND RELATED DISORDERS. (3)
Identification, appraisal, diagnosis, and clinical management of persons with aphasia and related disorders. Primary emphasis is given to aphasia and apraxia of speech in adults. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 701 RESEARCH METHODS IN COMMUNICATION DISORDERS. (3)
Principles and methods for designing research in communication sciences and disorders. Topics include: introduction to the scientific method, research designs, measurement techniques, formulating research questions, writing and evaluating research reports, and ethics of research. Prereq: Graduate standing in Communication Disorders.

CSD 710 COGNITIVE COMMUNICATION DISORDERS. (3)
The class will focus on the neuroanatomy and pathology of traumatic brain injury, right hemisphere disorders, and dementia. Students will learn current theory regarding differential diagnosis and treatment of these disorders. Prereq: CSD 571 or permission of instructor.

CSD 744 ADULT SWALLOWING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of adult neurogenic disorders of speech and swallowing. Emphasis will be placed on clinical management of adult dysphagia and the concomitant communication and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 745 PEDIATRIC FEEDING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of pediatric disorders of speech, feeding and swallowing. Emphasis will be placed on clinical management of dysphagia and the concomitant communication, feeding and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 747 SEMINAR IN LANGUAGE DEVELOPMENT IN CHILDREN. (3)
A contemporary overview of processes governing language acquisition and their role in atypical language development. Topics include: theories of language acquisition; roles of perception, cognition, social interaction, and genetics on language acquisition; and influence of atypical situations on language. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CSD 761 APPLIED PHONOLOGY: DEVELOPMENT AND DISORDERS. (3)
Critical review and discussion of clinical and developmental phonology research and phonological theories. Study of the bases for normal and disordered phonological development from birth through age twelve. Study of procedures for assessment and treatment of children with phonological disorders including the development of individualized remediation plans for expediting intelligibility gains. Course will include information regarding second language acquisition and oral and written language as these relate to phonological systems. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CSD 771 DYSPHAGIA. (3)
This course includes an overview of the anatomy and physiology of normal deglutition; the nature and characteristics of swallowing disorders; methods of evaluation and management of dysphagia in adults and children; and consideration of medical conditions such as aspiration pneumonia, tracheostomy, and other complicating factors associated with dysphagia. Also included is a brief review of professional issues relating to efficacy of treatment; third party reimbursement; and roles and responsibilities of other health care professionals in feeding and swallowing. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 772 ADVANCED SEMINAR IN APHASIA. (3)
A review and discussion of the literature concerning literate language. Topics include: 1) characteristics of literate language; 2) differences between literate and oral language; 3) emergent literacy; 4) theories of the reading and writing processes; 5) components, development, strategies, and factors involved in typical reading and writing; 6) literate language and speaking; and 7) issues pertaining to atypical readers and writers. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 775 SEMINAR IN LITERATE LANGUAGE. (3)
This seminar provides a comprehensive review of basic research on aspects of literacy development in children. Topics include: 1) the reading of print; 2) the writing of print; 3) reading and writing development; 4) the role of oral language in literacy development; 5) developmental aspects of reading and writing; and 6) the role of reading, writing, and language in educational development. Prereq: Graduate standing in Communication Disorders or consent of instructor.

CSD 788 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)
In-depth study of a current problem or issue related to the communication disorders profession. May be repeated to a maximum of nine credits. A title is assigned each time the course is offered. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 789 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)
Independent study for graduate students with an interest in a specific problem in communication disorders. May be repeated to a maximum of 12 credits. Lecture, 1-6 hours; laboratory, 2-12 hours per week. Prereq: Graduate status and consent of instructor.

DES Design

DES 100 DESIGN IN YOUR WORLD. (3)
Understanding how design unfolds from and informs culture, students garner appreciation for and creatively experiment with the embedded practice of design as a basic human response for inhabitation, work, play, and worship. Prereq: For students in all colleges except for the College of Design.

DHN Dietetics and Human Nutrition

DHN 101 HUMAN NUTRITION AND WELLNESS. (3)
Food composition, digestion, absorption and metabolism as related to selection of nutrients essential for human life, growth, reproduction, lactation, wellness and physical activity. Not open to DHN majors except hospitality management students.

DHN 212 INTRODUCTORY NUTRITION. (3)
An elementary study of the principles of nutrition and the application of these principles to providing adequate nutrition to humans. The chemical and physiological approach to nutrition is emphasized. Prereq: CHE 105 or CHE 103 or CHE 108; plus, or past concurrent BIO 103 or BIO 148 or BIO 152 or BIO 208.

DHN 241 FOOD SERVICE SANITATION. (1)
This course covers the principles of food microbiology, important food borne diseases, standards that are enforced by regulatory agencies, and applied measures for the prevention of food borne diseases and other microbiological problems. It leads to certification from the National Restaurant Association.

DHN 301 DIETETICS PRACTICE. (2)
This course provides a study of dietetic practice including professional ethics, standards of practice, scope of practice, educational pathways, credential attainment and maintenance, competencies required for entry level practice, responsibilities as a professional. Experiences allow exploration of dietetics practice in medical nutrition therapy, food service management and delivery of nutrition services. Prereq: DHN 212 and completion of dietetics premajor requirements with a cumulative GPA of 2.4.

DHN 302 PRINCIPLES OF FOOD PREPARATION. (3)
The physical and chemical principles involved in the preparation of foods and the application of these principles to control for quality outcomes. Laboratory experiences link theory to practice to ensure that the standards of safety and overall quality factors are applied to maximize nutrient retention while maintaining the acceptability and nutritional qualities of foods produced for individuals and groups. Lecture, 4 hours; laboratory, 4 hours. Prereq: DHN 241; limited to DHN and Family and Consumer Science (FCS) department majors and with permission of instructor.

DHN 304 EXPERIMENTAL FOODS. (3)
Chemical and physical properties of food and the changes resulting from processing and preparation. Experimental study of variations in ingredients and preparation methods on food quality. Design, execute and report an independent research project. Lecture, two hours; laboratory and discussion, three hours per week. Prereq: DHN 302; CHE 230 or CHE 236.

DHN 311 NUTRITIONAL BIOCHEMISTRY. (3)
An introductory study of the biochemical basis of nutrition—the physiochemical properties of nutrients and other essential biochemicals and their role in physiological and metabolic processes. Prereq: CHE 230 or CHE 236 must be completed prior to DHN 311; PYG 206 must be taken concurrently or prior to DHN 311.
DHN 312 NUTRITION AND WELLNESS IN THE LIFE CYCLE. (3)
A study of the physiological changes occurring in the life cycle with associated nutrient needs. The course focuses on assessment and determination of nutrient requirements for individuals from infancy to geriatrics. Prereq: DHN 212, limited to Dietetics and Human Nutrition majors only.

DHN 315 NUTRITION ISSUES IN PHYSICAL ACTIVITY. (3)
This course explores the special nutritional needs of a person engaged in regular physical activity. Emphasis will be placed on selecting a diet to achieve optimal performance and overall wellness. Athletic performance enhancing supplements will be examined to determine the efficacy and safety of such products. Prereq: DHN 212 and restricted to Dietetics or Human Nutrition majors only.

DHN 316 HUNGER, FOOD BEHAVIOR, AND THE ENVIRONMENT. (3)
This course brings together the role of the biological processes that influence hunger with the physiological responses to cues in the social and neighborhood environment that influence what we eat. The connection between what we eat and lifelong health consequences of dietary patterns can be seen at the individual, familial, and community level. Topics in this course will include hunger and satiety, taste preferences and food aversions, food policy, sustainability, the role of the food environment, and nutrition policy. Prereq: DHN 101, DHN 212, or consent of instructor.

#DHN 319 SEMINAR IN HUNGER STUDIES. (1)
This course provides a multi-disciplinary approach to hunger studies. Students will develop a written paper and professional seminar on a current hunger-related issue. Prereq: DHN 318: Hunger, Food Behavior, and the Environment.

#DHN 320 EXPERIENTIAL LEARNING IN HUNGER STUDIES. (2)
Students will engage in experiential learning in a pre-approved volunteer, internship, study abroad, or paid work experience related to the world fight against hunger and social injustice. Prereq: DHN 318: Hunger, Food Behavior, and the Environment.

DHN 340 INSTITUTIONAL PURCHASING. (3)
Fundamental principles and purchasing techniques for the selection of food and nonfood items in a food service system. Prereq: ECO 201 or 202; limited to Dietetics and Hospitality Management and Tourism majors only.

DHN 342 QUANTITY FOOD PRODUCTION. (4)
An introduction to the production and service of food in quantity, to include the application of production techniques and controls, menu planning and service. Lecture, two hours; laboratory, 4.5 hours per week. Prereq: DHN 302 or HMT 308; DHN 241; limited to Dietetics and Hospitality Management and Tourism majors.

DHN 346 HUMAN RESOURCES MANAGEMENT FOR THE FOOD AND HOSPITALITY INDUSTRIES. (3)
Explores the student to all aspects of human resources management in the hospitality and health care industry context. Topics covered include planning, selection, placement, training, disciplining employees, labor relations and compensation. Prereq: Hospitality and Tourism major or Dietetics major.

DHN 374 RESEARCH AND WRITING IN DIETETICS. (3)
Study of research, ethics, and methodology for designing, managing, and synthesizing evidence based research in dietetics. Students develop critical thinking, writing, and oral communication skills through scientific literature searches, interpretation of data, and development of a news brief, narrative literature review with accompanying oral presentation. Prereq: DHN 212 and STA 210; limited to Dietetics majors only. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 403 COMMUNITY NUTRITION AND WELLNESS. (3)
Study of nutrition education programs on a community level. Experience is provided for presenting nutrition in health clinics, health camps, schools, state institutions, family resource centers, and corporate wellness programs. Attention is paid to special populations, including pregnant women, children, adults, the elderly, and persons with disabilities. Prereq: DHN 312.

DHN 408G SEMINAR IN DIETETICS AND HUMAN NUTRITION. (1)
Investigation of recent research in dietetics and human nutrition. May be repeated to a maximum of three credits. Nutritional Sciences graduate students may not enroll for graduate credit. Prereq: DHN 510 or consent of instructor.

DHN 474 RESEARCH IN NUTRITION: THEORY. (3)
A required course which allows the student to explore research opportunities in the health field, identify potential funding sources, review institutional review board requirements, and develop a grant proposal based on their own interests in nutrition. Prereq: Human Nutrition majors only. Senior standing. DHN 311 (may be taken concurrently with consent of instructor). This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 475 RESEARCH IN NUTRITION: APPLICATION. (3)
A required course which allows the student to design a research study, write a grant, prepare a comprehensive literature review, design a survey, conduct statistical analyses on collected data, and prepare a professional article and poster to present at University and regional events. Prereq: Human Nutrition majors only. Grade of C or better in DHN 474. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 480 DIETETICS PRE-PROFESSIONAL PRACTICE. (1-6)
Pre-professional experiences are designed to allow students to apply knowledge and skills in assessing, planning, implementing, and evaluating nutrition care in various health delivery systems. Student experience will include opportunities to link theory and practice while developing the skills and attitudes essential to practice in the dietetics profession. Placement of experiential settings must have the approval of the appropriate Director of Dietetics in Nutrition and Food Science. A minimum of 60 supervised practice hours will constitute one semester credit hour with prior approval. May be repeated to a maximum of six credits. Prereq: Consent of instructor and senior status in the Dietetics Didactic Program.

DHN 510 ADVANCED NUTRITION. (3)
Application of biochemistry, physiology and nutrition to the understanding of the utilization and function of nutrients in the body as related to the structure, function and metabolic needs of cells/organ systems. Prereq: DHN 311 or BC1/4 (ROG) or equivalent; PYG 206; Dietetics and Human Nutrition Majors only.

DHN 512 MEDICAL NUTRITION THERAPY I. (4)
This course explores changes in nutrient metabolism related to biochemical and physiological alterations in disease conditions and application of the Nutrition Care Process. Content includes case study evaluations, medical nutrition therapies for disease conditions, and current research in the field. Prereq: DHN 311 and 312; plus, past or concurrent DHN 510. Enrollment is restricted to dietetics majors only.

DHN 514 DIETETICS: COUNSELING AND COMMUNICATION THEORIES AND APPLICATIONS. (3)
Counseling and communication theories are combined to study specific applications which include disease prevention, disease management and refinement of communication skills to enhance effectiveness as a practicing RD. Students will enhance their capacity to motivate others to practice healthy food behaviors. Active learners will develop a conceptual framework for future professional practice in dietetics as ethical counselors and facilitators of behavior change. Three credit hours. Prereq: DHN 403, DHN 510, DHN 512; must be taken concurrently with DHN 517. Enrollment is restricted to Dietetics majors.

DHN 515 MEDICAL NUTRITION THERAPY II. (5)
This capstone course explores changes in nutrient metabolism related to biochemical, physiological, and pathophysiological alterations in disease conditions, application of the Nutritional Care Process and Model, and development of medical nutrition therapy intervention. Content includes case study evaluations, nutritional therapies for disease conditions, including enteral and total parenteral nutrition, and current research in the field. Prereq: DHN 311, 312, 403, 510 and 514. Enrollment is limited to dietetics majors.

DHN 516 MATERNFAL AND CHILD NUTRITION. (3)
Food selection for optimal nutrition during pregnancy and lactation and for infant and child development through preadolescence. Cultural, social, and psychological aspects of food selection and dietary patterns, as they relate to mental and physical development. Prereq: DHN 312 or consent of instructor.

DHN 517 MEDICAL NUTRITION THERAPY I. (3)
This course continues study of medical nutrition therapy topics, including trauma and enteral and parenteral nutrition. Content includes more advanced case study evaluations, medical nutrition therapies, and current research in the field. Prereq: DHN 512 and concurrent with DHN 514 and enrollment is limited to dietetics majors.

DHN 518 EVALUATION OF DIETETIC ISSUES AND LEADERSHIP. (2)
Course provides opportunities for the development of competencies, attitudes and values expected of the entry level professional. Lectures, presentation of individual case studies and research projects are conducted. Opportunities are provided for transfer of theory to practice, interpretation of research, discussion of professional literature and application of leadership and communication skills in addressing issues of professional dietetic practice. This web enhanced didactic course is taught via distance learning coupled with on campus sessions. Prereq: Admission to the Coordinated Program or Dietetic Internship.

*DHN 520 MEDICAL NUTRITION THERAPY I: SUPERVISED PRACTICE. (5)
Supervised practice in health care facilities. Course focuses on patient assessment, diet planning, care plan implementation, and nutritional evaluation. Fulltime medical nutrition therapy experience at an assigned facility with the opportunity to gain entry level experience while seeing a variety of patients with varied disease states. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

*DHN 522 FOOD SERVICE SYSTEMS MANAGEMENT: SUPERVISED PRACTICE. (5)
Supervised practice in foodservice systems management in a variety of foodservice operations. Experience involves participation in management functions including procurement, production, financial and human resources management, marketing, and training. Prereq: Admission to UK DHN Supervised Practice Program (SPP).
Course Descriptions

*DHN 524 FOOD SERVICE SYSTEMS MANAGEMENT II: SUPERVISED PRACTICE. (3)
In-depth application of foodservice systems management in a variety of food service operations. Provides variety of experience in operations, financial, and managerial aspects of food services. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

*DHN 526 MEDICAL NUTRITION THERAPY II: SUPERVISED PRACTICE. (3)
This course provides an in-depth clinical application of the principles of dietetics. The course will focus on the team concept of patient care and provide advanced dietetics practice with the opportunity to test and evaluate results. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

*DHN 528 COMMUNITY NUTRITION I: SUPERVISED PRACTICE. (1-3)
This course provides an introductory supervised practice in community nutrition. Experiences include public and private agencies/organizations that provide food and nutrition services, public policy and program development, and nutrition education for various socioeconomic groups. Full-time community nutrition experience as a member of the community health delivery team at assigned community and health related agency. The student will have opportunities to manage nutrition care for population groups across the lifespan; develop community based food and nutrition programs; and develop health promotion/disease prevention intervention projects. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

*DHN 530 COMMUNITY NUTRITION II: SUPERVISED PRACTICE. (2)
This course provides an introductory supervised practice in community nutrition. Experiences include public and private agencies/organizations that provide food and nutrition services, public policy and program development, and nutrition education for various socioeconomic groups. Full-time community nutrition experience as a member of the community health delivery team at assigned community and health related agency. The student will have opportunities to manage nutrition care for population groups across the lifespan; develop community based food and nutrition programs; and develop health promotion/disease prevention intervention projects. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 591 SPECIAL PROBLEMS IN DIETETICS AND HUMAN NUTRITION. (1-3)
Intensive work on an independent project related to dietetics and human nutrition. Senior or graduate standing. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

DHN 600 RESEARCH METHODS IN NUTRITION AND FOOD SYSTEMS. (3)
Students will study accepted research methodologies and scientific approaches in human nutrition and food systems. Emphasis is placed on understanding the research methods, study design, data collection, and evaluation of various nutrition-related studies. Discussions include development of research aims and hypothesis, internal review board, collecting of primary and secondary data, measurement approaches, study designs, and key considerations in developing a thesis for publication. Prereq: Admission to program and selection of graduate faculty mentor with approved research topic.

DHN 603 ADVANCED COMMUNITY PROGRAM DEVELOPMENT. (3)
The course focuses on concepts and theories of program development, use of planned goals and objective. Components include goal setting, program design, data collection, and program evaluation. Prereq: DHN 591 or equivalent.

DHN 605 FOOD SYSTEMS AND SOCIETY. (3)
Food Systems and Society tracks food from farm to table, including growing, harvesting, processing, packaging, transporting, marketing, consumption, and disposal. Policy and culture determine who eats what and who benefits and loses in any given food system. As a result food systems vary considerably across the world with each evolving to affect overall health. The course will assess sustainability of food systems and explore the ethical, economical, socio-ecological, and environmental factors that affect local, regional, national, and global food system development. Content includes case study evaluations and current research in the field. Prereq: Graduate standing.

DHN 607 FOOD RELATED BEHAVIORS. (3)
This team-taught course will provide background in topics and methods in food related behaviors to students in Nutritional Sciences and other interested students. The course will follow a problem-based learning approach, and will consist of 3 out of 4 modules in any given year. The four modules will be Social and Cultural Perspectives on Food, Psychological Perspectives on Food and Food Behaviors, Challenges to Community Food Security, and International Issues in Nutrition.

DHN 608 CHRONIC DISEASE MANAGEMENT AND PROCESS. (3)
This course focuses on the etiology and pathophysiology of nutrition-related chronic diseases and conditions including obesity, hypertension, dyslipidemia, heart disease, diabetes, and cancer. Emphasis is placed on the biochemical and physiological mechanisms involved by which nutrients impact the prevention, nutrition care process-diagnosis, assessment, implementation of care, monitoring and evaluation, and progression of chronic diseases and conditions. Prereq: Graduate standing and minimum 3 credit hours of upper level advanced nutrition or DHN 510.

DHN 610 MARKETING IN HOSPITALITY AND DIETETICS. (3)
This course overviews the discipline of marketing as it relates to the hospitality and dietetics professions. Special emphasis will be placed on the analysis of the marketing environment, marketing strategies and the diversity of marketing practices used by the hospitality industry and dietetics profession. This course will provide opportunities for students to develop appropriate marketing approaches in today’s increasingly competitive and complex global marketplace. Prereq: MKT 300 or HMT 320 or equivalent course.

DHN 620 NUTRITION AND AGING. (2)
Emphasis on current research in nutrition and aging, nutrition needs of the elderly and nutrition-related diseases associated with aging. Prereq: DHN 510 and 511 or equivalent. (Same as NS 620.)

DHN 630 ADVANCED COMMUNITY NUTRITION. (3)
Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: DHN 510, DHN 511 or equivalent. (Same as NS 640.)

DHN 640 NUTRITION: ASSESSMENT. (3)
Evaluation of administrative practices in dietetics. This course will examine topics related to managing dietetic services including medical nutrition therapy protocols, dietetics outcomes research, parenteral and enteral support, clinical pathways, JCAHO requirements, state and institutional policy controls, reimbursement for dietetics services, in-patient and out-patient quality management, and hospital outreach programs. Prereq: Admission to graduate program. Lecture only course.

DHN 648 MANAGEMENT OF HOSPITALITY AND DIETETICS ORGANIZATIONS. (3)
This course will engage students with the theories and their application in the area of leadership and management of people, resources, finances, information and internal and external customers as they relate to dietetics, food service and hospitality professions. Prereq: Admission to graduate program, DHN 346 or equivalent course.

DHN 690 ADVANCED WORK IN DIETETICS. (3)
Evaluation of administrative practices in dietetics. This course will examine topics related to managing dietetic services including medical nutrition therapy protocols, dietetics outcomes research, parenteral and enteral support, clinical pathways, JCAHO requirements, state and institutional policy controls, reimbursement for dietetics services, in-patient and out-patient quality management, and hospital outreach programs. Prereq: Admission to graduate program. Lecture only course.

DHW 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as CNU/NS 704.)

DHN 748 ADVANCED COMMUNITY PROGRAM DEVELOPMENT. (3)
Investigation of recent research in Hospitality and Dietetics Administration. May be repeated to a maximum of six credits. Prereq: DHN 640 or equivalent.

DHN 772 CURRENT TOPICS IN HOSPITALITY AND DIETETICS ADMINISTRATION. (1)
This course will focus on the latest in nutrition and food systems research. Students will be expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies in nutrition and food systems through weekly readings, presentations, and class discussions. Prereq: Graduate standing and upper level graduate statistics.

DHN 772 SEMINAR IN HOSPITALITY AND DIETETICS ADMINISTRATION. (1-6)
Faculty from different disciplines will provide in-depth coverage of selected topics in Hospitality and Dietetics Administration. Prereq: Graduate standing and upper level graduate statistics.

DHN 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NS 782.)

DHN 784 SPECIAL PROBLEMS IN FINANCIAL MANAGEMENT. (3)
A current events approach to the financial and accounting decision-making process in dietetics and hospitality administration. The course will prepare advanced students in dietetics and hospitality administration to analyze and make sound financial decisions in settings relevant to the dietetics profession and the hospitality industry. Prereq: Admission to graduate program, ACC 201, ECO 201 and either FIN 300 or (DHN 340, DHN 342, and DHN 346).

DHN 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NS 790.)
DIP 600 SPECIAL TOPICS. (1-3)
This course will vary in content depending on special needs or faculty availability.

DIP 700 DYNAMICS OF DIPLOMACY. (3)
This course explores the historical evolution of diplomacy, then focuses on post WWII diplomatic practice and especially the dynamics of diplomacy since the end of the Cold War. Emphasis will be placed on diplomacy’s role in the international system, new tasks for diplomacy, and enhancing diplomatic skills in a new paradigm. Prereq: Permission of instructor.

DIP 710 GREAT BOOKS OF WORLD POLITICS.

DIP 712 WEEK STAGES AND INTERNATIONAL SECURITY. (3)
This course covers how the policy community has measured the weak state, revealing discrepancies in the quantifiable parameters, definitions, and categorizations, and analyzes the efforts to address state weakness, particularly foreign economic and security assistance. It will review the five theoretical approaches to the weak state in the literature, which are informed by the international community’s concerns with state weakness: development intervention, post-colonialism, globalization and terrorism. The theory will be applied to specific cases of weak states in several regions (e.g., Africa, Asia, the Balkans, Latin America, the Middle East, and the Former Soviet States) and analyzes the threats they pose to international security.

DIP 715 DEMOCRACY AND INTERNATIONAL AFFAIRS. (3)
Discussion of the impact of the global spread of democracy on foreign policy and war. Prereq: Graduate status and consent of instructor. (Same as PS 575.)

DIP 716 INTERNATIONAL TRADE POLICY AND PRACTICE. (3)
This course is designed to prepare students to function comfortably in either the trade policy formulation (public trade policy producers) or commercial environment (policy consumers). Although the course is organized in two discrete sections throughout the course, the implications of policy on commercial practice and the reverse will be stressed.

DIP 720 ECONOMIC STATECRAFT. (3)
This seminar course will explore how economic values and choices shape economic options, and the techniques used to pursue them in the diplomatic arena. Trade and fiscal techniques, financial policies, and sanctions will be explored in relationship to the interplay between economic and political international relations theory, and the relevance of economic statecraft to achieving both economic and noneconomic goals.

DIP 725 GEOPOLITICAL MODELING. (3)
Course uses large user friendly computer model of world’s political/economic systems to explore topics such as globalization, development, energy security, and political instability from a theoretical and quantitative viewpoint. Prereq: STA 570 or permission of instructor.

DIP 726 INTRODUCTION TO INTELLIGENCE. (3)
This course will introduce the student to the role of intelligence in U.S. national security policy-making.

DIP 727 ANALYTICAL METHODS FOR INTELLIGENCE ANALYSIS. (3)
This course will introduce the student to the role of intelligence analysis in U.S. national security policy-making. It will be discussed and put to practical use the various analytical methods and techniques that are used by analysts within the Intelligence Community.

DIP 730 CROSS-CULTURAL NEGOTIATION AND BARGAINING. (3)
A multidisciplinary graduate course using contemporary studies of negotiation and bargaining from the individual to the international level. Uses both public (Diplomatic) and private (Commercial) examples, including case studies and practice negotiations. Group and national differences are explored as well as the content and environment of negotiations. Prereq: Any one graduate course plus consent of instructor.

DIP 734 AFRICA’S DEVELOPMENT CHALLENGES. (3)
Examination of challenges facing sub-saharan African countries in developing economic and politically sustainable societies.

DIP 735 ENERGY SECURITY. (3)
This course uses the tools of economic analysis and economic statecraft to examine energy security. It will look at the connection between energy and the economy in both the U.S. and other states and the connections between energy and military security and power. It will include a detailed review of the U.S. energy system, the international energy market, the economies of the major Middle Eastern states, and the Russian economy. At the end of the course each student will understand the history of energy security, be aware of the data sources for current policy analysis, be able to use the relevant tools of economic analysis including economics, and be familiar with the energy security policy debate both in the United States and in key foreign countries. Prereq: DIP 740 or ECO 672 or at least two semesters of undergraduate economic theory with grades of B or better. DIP 720 and DIP 750 recommended.

DIP 740 GLOBALIZATION. (3)
This course examines the phenomenon of globalization by applying core theories of the international political economy. Subjects to be covered include economic and political definitions of globalization, the technological, economic, and political causes of globalization, and the effects of globalization on national politics and wealth. By the end of the course, students should be able to apply the basic international political economy analysis to both trade and financial issues, giving them the necessary skills to prepare convincing policy analyses, political advocacy programs, and business plans. Lecture/Discussion hours per week. Prereq: Graduate status, a modest undergraduate or graduate background in Foreign Affairs or permission of the instructor.

DIP 742 NATIONAL SECURITY POLICY. (3)
This course provides a foundation in the major debates on national security policy.

DIP 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

DIP 750 DEFENSE STATECRAFT. (3)
Students will gain familiarity with the key military policy issues that confront government officials, and they will learn to evaluate the claims of journalists and advocacy organizations that confront informed American opinion on a day-to-day basis. Prereq: Graduate status.

DIP 755 POLITICS AND DIPLOMACY OF THE MIDDLE EAST. (3)
Analyzes the interplay between politics and diplomacy in the Middle East. Prereq: Permission of instructor.

DIP 756 DIPLOMACY OF NUCLEAR WEAPONS. (3)
This course explores diplomatic issues with developing and maintaining, securing, restricting and eliminating nuclear weapons.

DIP 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

DIP 777 RESEARCH PROBLEMS IN INTERNATIONAL RELATIONS. (3)
This seminar focuses on research strategies that can be utilized in dealing with problems in international relations. May be repeated once with consent of instructor. Prereq: PS 674 or consent of instructor.

DIP 780 INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY. (3)
A multidisciplinary graduate course that investigates policy questions and the policy process surrounding developments in international sciences and technology. This course will focus on the intersection of scientific research, technological applications and change, and business and governmental activities in these areas that impact upon international relations. Prereq: Consent of instructor.

DIP 795 SPECIAL PROBLEMS IN DIPLOMACY AND INTERNATIONAL COMMERCE. (3)
Specially designed independent study course taken under the supervision of various instructors. May be repeated to a maximum of six credits. Prereq: Permission of instructor.

DIS Decision Science and Information Systems

DIS 600 PRODUCTION MANAGEMENT. (3)
This course exposes the MBA generalist to the functional area of production in both manufacturing and service sectors. Topics include tactical decisions in production and operations and relationships with corporate strategy. The course emphasizes operations planning and control. Prereq: Graduate standing; MGT 611, ECO 610, ACC 628, DIS 650, ECO 611, FIN 600, DIS 651, MKT 600.

DIS 611 THE MANAGEMENT OF COMPUTER INTEGRATED MANUFACTURING.

DIS 612 SUPPLY CHAIN OPERATIONS. (3)
An introduction to the terminology, concepts, and skills related to supply chain management. Students develop an understanding of the complexities associated with the movement of goods and information, and how they affect the mission of the firm. Discussions address the various processes and activities within an organization and how they interface with other members of the supply chain.

DIS 620 MANAGEMENT INFORMATION SYSTEMS IN DECISION MAKING. (3)
In-depth consideration of the value of information in managerial decision making. Topics include issues in design and evaluation of management information systems, decision support systems, and business expert systems. Prereq: DIS 651.

DIS 621 BUSINESS EXPERT SYSTEMS. (3)
Introduction to expert systems and artificial intelligence in the business setting. Discussions include past and current applications of expert systems in business and considerations of future application possibilities. Prereq: DIS 620.

DIS 622 BUSINESS DATA SYSTEM ANALYSIS AND DESIGN. (3)
An introduction to the comparative analysis and business use of various data models. Topics include the theory and design of information storage and retrieval procedures in the context of business information needs. Prereq: DIS 620, CS 101 or consent of instructor.

DIS 623 BUSINESS DECISION SUPPORT SYSTEMS. (3)
Discussion of business decision support system concepts and the applications of these concepts in business organizations. The theoretical development of the decision support system...
system concept is analyzed through review of important literature in this area. Emphasis is placed on the impact of technological advances which form the basis of decision support system software. Current decision support systems are studied and likely future applications considered. Prereq: DIS 620.

DIS 624 MANAGEMENT OF INFORMATION RESOURCES. (3)
The course is designed to prepare students to understand and analyze major issues related to the management of information resources, evaluate the current state of information resources management within an organization, and participate in the management of such resources. Prereq: DIS 620 or consent of instructor. (Same as MGT 624.)

DIS 651 QUANTITATIVE ANALYSIS IN BUSINESS DECISION MAKING. (3)
A study of key problem formulation and solution procedures in business decision making. The topics studied include statistical techniques integrated in decision making under uncertainty, decision tree analysis, combinatorics, and value of information. A major segment of the course is devoted to the study of linear programming problems, sensitivity analysis, assignment problems and transportation problems. Prereq: MBA standing.

DIS 695 INDIVIDUAL WORK IN DSIS. (3)
Students confer individually with instructor. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

DIS 700 TOPICS IN OPERATIONS MANAGEMENT. (3)
To review the various topics in operations management and to survey the status of the art research in each topic area. Research methodology and research opportunities in each topic area will be identified. May be repeated to a maximum of nine credits.

DIS 720 MANAGEMENT INFORMATION SYSTEMS THEORY. (3)
A theoretical consideration of the role of MIS in managerial decision making. Emphasis is placed on current research in MIS and interrelationships with management science and operations management. Prereq: Consent of instructor.

DIS 753 SEMINAR IN MANAGEMENT SCIENCE. (3-6)
Each semester some topic in management science such as simulation, queueing theory, stochastic processes, numerical methods, and Bayesian Decision Theory will be studied intensively. Prereq: DIS 751, 752.

DIS 780 STUDIES IN DECISION SCIENCE AND INFORMATION SYSTEMS. (3)
This course will analyze the current research topics of interest in the decision sciences. Possible areas of study may include: network management, multiple-criteria decision making; data envelopment analysis, combinatorics, and models for service organizations. May be repeated to a maximum of nine credits. Prereq: DIS 751 or consent of instructor.

DIS 790 SPECIAL TOPICS IN MANAGEMENT DECISION SYSTEMS (Subtitle required). (3)
This is a variable topic course enabling focused doctoral student investigation of current research areas. It is anticipated that the course grade will be based on individual student semester research papers in the course topic area. May be repeated to a maximum of 12 credits under different subtitles. Prereq: Consent of instructor.

DMT Interior Design, Merchandising, and Textiles

DMT 520 TEXTILES FOR INTERIORS. (3)
Selection, cost, expected performance and care of textiles used in residential and commercial interiors. Prereq: MAT 120.

DR Diagnostic Radiology

DR 815 FIRST-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-3)
With the advice and approval of his or her faculty advisor, the first-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

DR 825 SECOND-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-4)
With the advice and approval of his or her faculty advisor, the second-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of advisor.

DR 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the Third and Fourth Year Curriculum and Student Progress Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by the permission of Third and Fourth Year Curriculum and Student Progress Committee.

Approved electives:
DR 650 FOURTH-YEAR ELECTIVE IN DIAGNOSTIC RADIOLOGY
DR 851 RESEARCH IN DIAGNOSTIC RADIOLOGY
DR 655 NUCLEAR MEDICINE
DR 856 PEDIATRIC RADIOLOGY
DR 890 OFF-SITE CLERKSHIP IN DIAGNOSTIC RADIOLOGY

DSP Discovery Seminar Program

DSP 110 SOCIAL SCIENCES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 120 HUMANITIES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP humanities requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 130 NATURAL SCIENCES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 200 GENERAL RESEARCH SKILLS: (Subtitle Required). (3)
Course provides the basic skills required to conduct research and other scholarly activities. Prereq: All students must be actively engaged (for an average of at least ten hours per week) in research or other scholarly activity under the mentorship of a UK faculty member through the UK Undergraduate Research Program (UKURP).

EAP Education Abroad Program

EAP 400G EDUCATION ABROAD ON UK-Sponsored Program. (1-18)
A course designed for undergraduate, graduate and non-degree students who participate in a UK-Sponsored Education Abroad Program. Registration in the course would constitute full-time status. This course may only be taken Pass-Fail. Students will be enrolled in the course upon payment of the non-refundable program fee deposit. The balance of the program fees will be charged as an EAP 500 course fee. The suffix indicates the particular UK-sponsored program. Upon completion of the program, Education Abroad at UK will submit to the Registrar the credit and grades given by the Program Director for the approved program courses. Prereq: Approval by each student’s academic advisor, the program director and Education Abroad at UK.

EAP 431G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees. Prereq: Approval by each student’s academic advisor and Education Abroad at UK.

EAP 432G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLM. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLM-Tuition/Lodging/ Meals.

EAP 433G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLO. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLO-Tuition/Lodging.

EAP 434G EDUCATION ABROAD ON EXCHANGE PROGRAM: TMO. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK.
**Course Descriptions**

**ECO 101 CONTEMPORARY ECONOMIC ISSUES.**
A basic course in the analysis of contemporary economic issues with emphasis on current economic topics such as inflation, unemployment, economic growth, international dependencies, and how public policy deals with them. A critical understanding of the U.S. and global economies will enhance your value as a manager or executive of a business (whether for-profit or non-profit), as a family member dealing with jobs and financial decisions, and as a voter in a democracy. The course will allow you to become knowledgeable of, and able to critically think about macroeconomic issues of unemployment, jobs, recessions, economic growth, inflation, deflation, oil prices, monetary policy, the Federal Reserve, fiscal policy, budget deficits, the national debt, international trade, international finance, and the financial system. Prereq: ECO 201.

**ECO 370 THE GLOBAL ECONOMY.**
This course explores the theoretical foundations of International Trade including the basics of why countries trade, factors that explain the pattern of trade, the effects of trade on welfare and the distribution of income, and various policy issues. The course also provides an examination of topics in International Finance such as how international financial markets are structured and how currencies across countries relate to each other in foreign exchange markets. Prereq: Courses include ECO 201 AND ECO 202. Students who have already taken ECO 471 or ECO 472 may not take ECO 370 and ECO 370 may not be taken concurrently with ECO 471 or ECO 472. Students majoring in economics may NOT take ECO 370.

**ECO 379 THE ECONOMICS OF PUBLIC POLICY, LAW, AND GOVERNMENT.**
This course develops the economics view of the role of government from both normative and positive perspectives. Conditions under which markets perform well are presented, as well as cases where there is market failure. Legal and social institutions that support markets are discussed, as are government policies to intervene in markets. Economic models of the operation of government are developed to understand possible shortcomings of government action, as well as further linkages of economics to law. The economics perspective on income redistribution is presented along with examples from specific government programs. Prereq: ECO 201.

**ECO 391 ECONOMIC AND BUSINESS STATISTICS.**
A survey of statistical techniques relevant to modern economics and business, with major emphasis on correlation and regression, Bayesian decision theory, index numbers, time series analysis, and forecasting models. Prereq: STA 291 or equivalent.

**ECO 395 INDIVIDUAL WORK IN ECONOMICS.**
Students confer individually with the instructor. Written paper usually expected and filed in chairperson's office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson. TPE-Tuition/Plus Other. TMO-Tuition/Meals.

**EAP 435G EDUCATION ABROAD ON EXCHANGE PROGRAM: TPE.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TPE. Tuition/Plus Other.

**EAP 436G EDUCATION ABROAD ON EXCHANGE PROGRAM: ISEP.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. ISEP.

**EAP 437G EDUCATION ABROAD ON EXCHANGE PROGRAM: DES.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. DES.

**EAP 438G EDUCATION ABROAD ON EXCHANGE PROGRAM: HSC.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. HSC.

**EAP 440G EDUCATION ABROAD ON EXCHANGE PROGRAM: BUS.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BUS.

**EAP 441G EDUCATION ABROAD ON EXCHANGE PROGRAM: BAE.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BAE.

**EAP 442G EDUCATION ABROAD ON EXCHANGE PROGRAM: EGR.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. EGR.

**EAP 443G EDUCATION ABROAD ON EXCHANGE PROGRAM: CHS.**
(0-1) A course designed for undergraduate, graduate and non-degree students who participate in a UK Education Abroad Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. CHS.

**EAP 599 STUDY ABROAD.**
(1) A course designed for undergraduate and graduate students who go abroad for study following a plan developed as part of their academic program and who are not otherwise registered at the University during the period overseas. Registration in the course would constitute full-time status. The course may be taken on a pass-fail basis for undergraduate students and audited by graduate students. Evaluation by the academic adviser will be an element of the plan. May be repeated to a maximum of three credits. Prereq: Approval by each student's academic advisor upon submission of the required application materials to Education Abroad at UK. UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. May be repeated to a maximum of three credits. Prereq: Approval by each student's academic advisor upon time of offering.

**ECO 201 PRINCIPLES OF ECONOMICS I.**
The study of the allocation of scarce resources from the viewpoint of individual economic units. Topics include household and firm behavior, competitive pricing of goods and resources, and monopoly power.

**ECO 202 PRINCIPLES OF ECONOMICS II.**
A study of how society's needs are satisfied with the limited resources available. Topics include contemporary issues such as inflation, unemployment, economic growth, international dependencies, and how public policy deals with them. A critical understanding of the U.S. and global economies will enhance your value as a manager or executive of a business (whether for-profit or non-profit), as a family member dealing with jobs and financial decisions, and as a voter in a democracy. The course will allow you to become knowledgeable of, and able to critically think about macroeconomic issues of unemployment, jobs, recessions, economic growth, inflation, deflation, oil prices, monetary policy, the Federal Reserve, fiscal policy, budget deficits, the national debt, international trade, international finance, and the financial system. Prereq: ECO 201.

**ECO 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY.**
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as MA 327.)

**ECO 370 THE GLOBAL ECONOMY.**
This course explores the theoretical foundations of International Trade including the basics of why countries trade, factors that explain the pattern of trade, the effects of trade on welfare and the distribution of income, and various policy issues. The course also provides an examination of topics in International Finance such as how international financial markets are structured and how currencies across countries relate to each other in foreign exchange markets. Prereq: Courses include ECO 201 AND ECO 202. Students who have already taken ECO 471 or ECO 472 may not take ECO 370 and ECO 370 may not be taken concurrently with ECO 471 or ECO 472. Students majoring in economics may NOT take ECO 370.
Course Descriptions

ECO 461 MARKET STRUCTURE AND ANTI-TRUST POLICY. (3)
A study of the relationship between industry performance and market structure, and the role and effect of the government’s anti-trust policies. Prereq: ECO 401 or equivalent.

ECO 465G COMPARATIVE ECONOMIC SYSTEMS. (3)
This course deals with the theoretical underpinnings of the major economic systems in existence today. The classical model of competitive market capitalism will be reviewed first, followed by the Marxist and neo-Marxist (Leninist) critique of capitalism. Next, the contemporary Keynesian and the neo-Keynesian models are analyzed. This course concludes with a review of the Lange model of decentralized (market) socialism. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 467 AMERICAN ECONOMIC HISTORY. (3)
The development of the American economic will be examined within the general framework of economic theory. Major themes will be given to the long-run process of economic growth of the economy from the colonial period to the present. Prereq: ECO 401 or equivalent.

ECO 471 INTERNATIONAL TRADE. (3)
This course is advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as a means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. (Same as AEC 471.)

ECO 472 INTERNATIONAL MONETARY ECONOMICS. (3)
This course deals with macroeconomic and financial aspects of the open economy. Main subjects include the balance of payments, exchange rate determination, and macroeconomic theory and policy in the context of an open economy. Students are exposed to basic concepts such as purchasing power parity, interest parity, monetary models of the exchange rate, and the Mundell-Flemming model. Current issues for discussion include currency crises, pros and cons of international capital flows, and the choice of exchange rate regime. Prereq: ECO 402 or consent of instructor.

ECO 473G ECONOMIC DEVELOPMENT. (3)
A comparative study of economic progress in selected countries; growth patterns, theories of development and capital formation, interaction of social and economic change. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 477 LABOR ECONOMICS. (3)
Application of economic principles to analyze the operation of labor markets. Topics covered include: theories of labor movements, comparative analysis of unions in different economies, labor supply, labor demand, human capital, collective bargaining, public policy and the operation of labor markets. In addition, selected topics such as female and minority employment, social security, and industrial conflict will be covered. Prereq: ECO 401 or equivalent.

ECO 479 PUBLIC ECONOMICS. (3)
An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as AEC 479.)

ECO 491G APPLIED ECONOMETRICS. (3)
Provides the student with a firm foundation in the design and estimation of economic models, empirical analysis of economic relationships, and forecasting. Emphasizes the structure and utilization of economic models. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 499 SEMINAR IN ECONOMICS (Subtitle required). (3)
Reading, research and discussion in a seminar format to illuminate problems of historical and contemporary interest in areas of special faculty competence. May be repeated to a maximum of nine credits, but may not be repeated under the same subtitle. Will be limited to a maximum of 15 students. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 590 INTRODUCTION TO QUANTITATIVE ECONOMICS. (3)
An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in comparative statics. Prereq: ECO 401 and MA 113, or consent of instructor. (Same as AEC 590.)

ECO 601 ADVANCED MICROECONOMIC THEORY. (3)
An intensive course covering microeconomic theory and its various methodological and analytical techniques. Prereq: ECO 401 or consent of instructor.

ECO 602 MACROECONOMIC THEORY. (3)
An analysis of a market clearing, general equilibrium macroeconomic model. Emphasis on theoretical foundations of relevant behavioral functions and qualitative static and comparative statics. Not open to those with credit in ECO 761. Prereq: ECO 402 or consent of instructor.

ECO 603 RESEARCH METHODS AND PROCEDURES IN ECONOMICS. (3)
The basic procedures and methods of research in economics are considered from the standpoint of their applicability to problems solving and discovery of new scientific facts and generalizations in economics. Definition of the problem, statement of hypothesis, research design, data collection methods, and data analysis constitute the major topics. Attention is given to proper style and preparation of research reports in economics.

ECO 610 MANAGERIAL ECONOMICS. (3)
Analysis of applications of economic theory to management decision making. Such problems as demand and cost determination, pricing, and capital budgeting are treated. Prereq: Graduate standing, MA 123 or its equivalent.

ECO 619 SKILL DEVELOPMENT FOR APPLIED ECONOMIC ANALYSIS. (3)
Calculators, matrices, algebra, and statistics to understand basic economic models and applications and the fundamentals of econometric analysis. The intent of this course is to provide and develop the tools the students will need to engage in applied economic analysis and that will be used in subsequent courses in the MS in Economics Program. Prereq: MA 114 or its equivalent or consent of the instructor.

ECO 621 APPLIED MICROECONOMICS. (3)
This course covers essential microeconomic models and issues for the advanced applied economist and is the foundational course for the microeconomics in the applied track of the MS in economics program. The focus is on topics and methods most frequently used and relied upon in applied business and policy problems. By doing so, the course will prepare students for subsequent coursework for the applied MS track. Additionally, it will strive for students to gain strong intuitive skills regarding how to approach applied economics problems and their related empirical applications. Prereq: ECO 401 or its equivalent or consent of the instructor.

ECO 622 MICROECONOMICS FOR APPLIED ECONOMISTS. (3)
An applied analysis of macroeconomic conditions useful to a professional business economist is presented. Previous courses in microeconomic models of the economy with data to interpret current conditions, prospects for future conditions, and monetary and fiscal policies that influence these conditions. Prereq: ECO 402 (Intermediate Macroeconomics) or an equivalent course.

ECO 623 ECONOMETRICS FOR APPLIED ECONOMICS. (3)
This course examines a variety of topics in applied econometrics. The course begins with a review of the classic linear regression model and ordinary least squares estimation. The primary focus of the class is to examine how estimation can be done when the classic model doesn’t apply. Topics include endogenous regressors and instrumental variables, limited dependent variables model and maximum likelihood estimation, unobserved heterogeneity and panel data methods. Prereq: ECO 491 or equivalent or consent of instructor.

ECO 624 EMPIRICAL DATA MANAGEMENT. (3)
This course will cover the basic ways that economic data can be obtained. The course will cover obtaining data from data from the web, from APIs, and from colleagues in various formats including raw text files, binary files and databases. It will also cover the basics of data cleaning and how to make data operational. Organized data dramatically speeds downstream data analysis tasks. The course will also cover the components of a complete data set including raw data, processing instructions, codebooks, and processed data. The course will cover the basics needed for collecting, cleaning and sharing data. Particular points of emphasis will include machine learning, data cleaning techniques, data cleaning, creating, changing and labeling variables and values, automating your work, combining and reshaping files, processing observations across subgroups, do file programming, and programming using .ado files. Prereq: ECO 491 or its equivalent or consent of the instructor.

ECO 625 PREDICTIVE MODELS AND FORECASTING. (3)
This course provides students with an overview of modern techniques in the forecast of time series used in a variety of applications in the private and public sectors including revenue and sales forecasting. As an applied course the techniques will be motivated by specific practical problems and will be put to use in forecasting practices. The course covers auto-regressive and moving average models, distributed lags models, forecasting, Vector Auto-Regression, unit roots and testing, and auto-regressive conditional heteroskedasticity. Prereq: ECO 623 or its equivalent.

ECO 631 BUSINESS ECONOMICS. (3)
ECO 631 studies the economics of organizations and the economics of strategy. The first half of the course applies transactions costs and principal-agent theories to study the internal organization of the firm. Topics to be covered include the boundaries of the firm, corporate governance, choice of production process, and internal incentive systems. The second half of the course applies economic tools to the analysis of firm strategy. Topics to be covered include basic cost and demand conditions, economies of scale and scope, product differentiation, entry, exit and mobility conditions, price discrimination and commodity bundling, vertical control, and trade policies. Basic tools of game theory and asymptotic information are integral parts of this course. Prereq: ECO 621 or its equivalent or consent of the instructor.

ECO 652 PUBLIC POLICY ECONOMICS. (3)
Principles and practices of economical resource management in the governmental sector: tax and expenditure types, intergovernmental fiscal cooperation, debt financing, budgeting and financial planning. Prereq: ECO 201 or equivalent and MPA or MPP program status or permission of department. (Same as PA 652.)
ECO 653 HEALTH ECONOMICS. (3)
This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of incentives and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefits-cost analysis, and reformed health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and H/PA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as PA 636.)

ECO 654 BENEFIT-COST ANALYSIS. (3)
Principles, practices and applications of applied welfare analysis are the content of this course. The basic theory of benefit-cost analysis is presented and the relevance of implementation analysis in policy analysis is established. Prereq: PA 652. (Same as PA 680.)

ECO 670 ECONOMICS OF INTERNATIONAL FINANCIAL INSTITUTIONS. (3)
An analysis of trade patterns and the role of government policy on trade, in the light of both economic theory and empirical findings. Prereq: Successful completion of an upper division undergraduate or graduate level economics course.

ECO 674 AGRICULTURE AND ECONOMIC DEVELOPMENT. (3)
Analytical consideration of the role of agriculture in economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to agricultural development in underdeveloped agrarian economies with varying resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as AEC 626.)

ECO 679 ECONOMICS OF THE PUBLIC SECTOR. (3)
Topics and methods for students who wish to become policy practitioners as well as for those who will deal with policy makers. Focus is on role of the federal, state, and local government in the economic with both the expenditure and revenue sides of the government budget examined. Substantial material from standard public finance courses including welfare measures and cost-benefit analysis, program evaluation, and tax analysis. Prereq: ECO 621 or equivalent or consent of the instructor.

ECO 692 ECONOMETRICS FOR POLICY ANALYSTS. (3)
Maximum likelihood estimation, ordinary least squares (OLS) regression, instrumental variables (IV) regression, heteroscedasticity-consistent regression, fixed and random effects models, probit, logit and tobit models, and identification and two-state least squares estimation of simultaneous equations models. Prereq: Any undergraduate statistics course. MPA, MPP or PUAD program status for priority registration, other students with permission of instructor. (Same as PA 692.)

ECO 697 FINAL PROJECT IN APPLIED ECONOMICS. (3)
The purpose of this course is to assist the student in developing and completing a research study applying the tools and institutional knowledge obtained in other courses in the Applied Economics courses to evaluate an important economic policy or concern in either the public or private sector. While much of the work in the course is done independently students will meet together to discuss their progress as well as meet with the instructor individually. Prereq: ECO 623 or its equivalent or consent of the instructor.

ECO 700 TEACHING METHODS IN BUSINESS. (1)
A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as BA 700.)

ECO 701 NEOCLASSICAL MICROECONOMIC THEORY. (3)
The neoclassical theory of consumer behavior, production, market equilibrium and imperfect competition. Prereq: ECO 601 and ECO 590, or consent of instructor.

ECO 702 ADVANCED MACROECONOMIC THEORY. (3)
Analysis of general equilibrium macroeconomic models and factors responsible for deviations from general equilibrium. Emphasis on issues from recent professional literature. Prereq: ECO 602 or consent of instructor.

ECO 703 INTRODUCTION TO ECONOMETRICS. (3)
The first course in the introduction to econometrics. A comprehensive survey of the general linear regression, autocorrelation, errors in variables and distributed lag models. Prereq: ECO 590 and either ECO 603 or STA 525, or consent of instructor.

ECO 704 GENERAL EQUILIBRIUM ANALYSIS AND WELFARE ECONOMICS. (3)
Existence, stability, efficiency and Pareto satisfactions of competitive equilibrium. Recent developments in general equilibrium and welfare theory. Prereq: ECO 701 or consent of instructor.

ECO 705 MACROECONOMIC DYNAMICS. (3)
Theoretical and empirical assessment of dynamic issues in macroeconomics. Topics include neoclassical and endogenous growth models and vector autoregressions. Prereq: ECO 702 or consent of instructor.

ECO 706 INTRODUCTION TO ECONOMETRICS II. (3)
The second course in the introduction to econometrics. A comprehensive survey of identifi- cation, estimation and hypothesis testing in the context of simultaneous equations model. Prereq: ECO 703 or consent of instructor.

ECO 707 RESEARCH SEMINAR IN ECONOMICS. (3)
This course will help students develop research skills by requiring them to work through an independent project from start to finish. The student will review the literature and select a topic in an area of economics of interest. The student will then complete the project under the guidance of the instructor. Students will discuss their ongoing work in class with other students and in individual meetings with the instructor. The final output of the course will be a finished paper suitable for submission to a scholarly journal for publication. Prereq: Passing the Theory Exams or permission of the instructor.

ECO 710 ECONOMICS OF ORGANIZATION. (3)

ECO 711 ECONOMICS OF FIRM STRATEGY. (3)

ECO 721 ENVIRONMENTAL ECONOMICS, REGULATION AND POLICY. (3)
This course takes a balanced practitioner approach to the problems of the environment and environmental regulation. Efficiency aspects will be developed carefully, so as to provide a background for an extensive coverage of various available alternative policies. Prereq: PA 652 and MPA or economics program status or consent of instructor. (Same as PA 727.)

ECO 724 ENVIRONMENTAL ECONOMICS. (3)
This seminar in environmental economics examines market failure, benefit-cost analysis, no market failure, valuations of environmental changes, and selected topics in environmental economics. Central to the course is valuing changes in health risks, risk perception, and behavior related to health risk. Selected topics include international issues, environmental equity and markets for environmental quality. This course and ECO 725 Health Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. Program in Economics. Prereq: ECO 601 and ECO 703 or consent of instructor.

ECO 725 HEALTH ECONOMICS. (3)
This course rigorously examines the organization, financing, and management of the U.S. health care system and programs, and emphasizes economic analysis contemporary health policy concerns. By the end of the semester, students should have the institutional knowledge and analytic tools needed to contribute to current public policy debates about health and medical care. This course and ECO 724 Environmental Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. Program in Economics. Prereq: ECO 601 and 703 or consent of instructor.

ECO 726 ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3)
This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and other market failures, environmental policies, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 (or equivalent courses), or consent of instructor. (Same as AEC 745.)

ECO 731 LABOR ECONOMICS. (3)
The theory and estimation of the demand for and the supply of labor are introduced. Topics include demographic changes, minimum wages, retirement, and secular trends in labor force participation. The concept of human capital is examined, including applications to income distribution. Theory and evidence on the structure of wages in the U.S. is considered. Topics include compensating wages and race and gender differences. Prereq: ECO 601 or consent of instructor.

ECO 732 LABOR ECONOMICS II. (3)
Dynamic and cyclical labor demand are examined theoretically and empirically. Models of unemployment are considered, including search theory and the implicit contract model. Aspects of labor unions are examined including changes in union membership, strikes, and union wages and employment. The incentive effects of compensation are discussed, including sorting models and the principal-agent problem. Prereq: ECO 601 or consent of instructor.

ECO 741 THEORY OF THE FIRM AND MARKET STRUCTURE. (3)
A study of firms and markets covering such topics as organizational structure and objectives of firms; product selection, advertising and quality; price discrimination; vertical control; entry, accommodation and exit; cost structure and market organization, market structure and performance; and public policy. Prereq: ECO 601 or consent of instructor.

ECO 742 INDUSTRIAL ORGANIZATION. (3)
A comprehensive survey of the literature in industrial organizations including static theories of oligopoly, dynamic theories of oligopoly, information about strategic behavior, research and development, patents, and adoption of new technology.

ECO 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 709 residence credit following the successful completion of the qualifying exams.
Course Descriptions

ECO 751 PUBLIC ECONOMICS. (3)
An advanced study of both how government activities influence location, relative prices and welfare, and what role a proper role of the public sector in resource allocation. Relevant topics include: public goods, externalities, tax incidence, optimal taxation, benefit-cost analysis, public pricing, fiscal federalism, state-municipal finance and public choice. Prereq: ECO 601 or consent of instructor.

ECO 752 ADVANCED TOPICS IN PUBLIC FINANCE. (3)
Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism; international public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as PA 754.)

ECO 753 URBAN AND REGIONAL ECONOMICS. (3)
An intensive study of the theory, evidence and policy concerning urban areas and regions. Topics typically covered include: nature of regions and urban areas, size and distribution of cities, location decisions, housing, transportation, migration and regional growth. Prereq: ECO 601 or consent of instructor.

ECO 761 MACRO AND MONETARY ECONOMICS I. (3)
Advanced study of business cycle fluctuations. Theoretical and empirical investigations of the causes of business cycles; evaluating the effectiveness of monetary, fiscal, and other policies to affect inflation, unemployment, and short-run economic goals. Emphasis on current academic research. Prereq: ECO 701, ECO 702 or consent of instructor.

ECO 762 MACRO AND MONETARY ECONOMICS II. (3)
Advanced study of long-run macroeconomic issues. Theoretical and empirical examinations of the determinants of economic growth; analysis of government policies, country endorsements, and institutional factors in determining growth rates and income levels. Emphasis on current academic research. Prereq: ECO 702 or consent of instructor.

ECO 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ECO 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ECO 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

ECO 771 INTERNATIONAL ECONOMICS: INTERNATIONAL MONEY AND FINANCE. (3)
International finance and open economy macroeconomics; the balance of payments; theory of exchange rate determination; macroeconomic policy issues in open economies. Prereq: ECO 602.

ECO 772 INTERNATIONAL ECONOMICS: TRADE THEORY AND POLICY. (3)
Theory and empirical analysis of the effects of trade and trade policy. Prereq: ECO 601.

ECO 773 OPEN ECONOMY MACROECONOMICS. (3)
Development of rigorous models to enhance knowledge of open economies. Topics include: impact on an economy of changes in trade, the current account balance, exchange rates, and international financial markets. Prereq: ECO 702.

ECO 790 TIME SERIES ANALYSIS. (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, auto-regressive and mixed auto-regressive-moving average processes; linear nonstationary models, minimum mean square error forecasts and their properties; model identification, estimation and diagnostic checking. Prereq: STA 422G or its equivalent. (Same as STA 626.)

ECO 796 SEMINAR. (1-6)
An extended original investigation of some specific topic with a view to giving training in methods of research and studying intensively a particular subject in the field of economics. May be repeated to a maximum of six credits.

ECO 797 RESEARCH PROBLEMS IN ECONOMICS. (1-9)
Students confer individually with the instructor. May be repeated to a maximum of nine credits. Prereq: Permission of the Director of Graduate Studies is required.

EDC 317 INTRODUCTION TO INSTRUCTIONAL MEDIA. (1)
An introductory instructional media experience including basic production and utilization techniques for media materials and operation of commonly used educational media equipment. Topics include graphic preservation, transparency production, audio materials, motion pictures, 35mm photographic techniques, and an introduction to videotape television. Prereq: Admission to a Teacher Education Program.

EDC 322 ELEMENTARY PRACTICUM. (1-3)
Planned and supervised practicum in teaching elementary science, reading, social studies, and mathematics. Observation, selection of objectives and materials, questioning strategies, learning centers, instructional units, and assessment techniques will be emphasized. May be repeated to a maximum of three credits. Lecture, one hour; laboratory, six to twelve hours per week. Prereq: Admission to Early Elementary TEP. Concur: EDC 323, EDC 326, SEM 328, SEM 337, and EDC 339.

EDC 323 CLASSROOM MANAGEMENT AND DISCIPLINE. (3)
EDC 323 should be taken in conjunction with EDC 329. Prereq: Admission to Teacher Education Program.

EDC 326 TEACHING SOCIAL STUDIES IN THE ELEMENTARY SCHOOL. (3)
A study of methods and materials for teaching social studies at the elementary level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques for elementary social studies. Consideration will be given to addressing the individual needs of a diverse student population. Special emphasis is placed on instruction in grades K-4. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 15 hours of social sciences. Coreq: EDC 327.

EDC 327 READING IN THE CONTENT AREAS. (3)
A study of materials and techniques useful in the diagnostic teaching of reading and other language arts with students in grades 5-9. The course will emphasize materials, techniques, and procedures, which diagnose individual strengths and weaknesses, and prescriptive instruction based on the diagnosis. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to teacher education or permission of instructor.

EDC 329 TEACHING READING AND LANGUAGE ARTS. (3)
Development of competencies for the teaching of reading and other language arts to groups. Course will also provide an overview of the nature of reading and language arts development from grade K-8. Twenty hours of laboratory work in the schools are required. Prereq: Admission to Early Elementary Education TEP or Middle School TEP.

EDC 330 WRITING IN THE CONTENT AREAS. (3)
Development of competencies for the teaching of writing and other language arts, including digital texts and other 21st century platforms, to groups. This course is in conjunction with a four-week field experience, consisting of 2-week placements in the candidate’s areas of content concentration. Prereq: EDC 327, or permission of instructor.

EDC 334 ORAL AND WRITTEN LANGUAGE DEVELOPMENT IN THE ELEMENTARY SCHOOL. (3)
A study of language differences, methods for teaching children with language differences, ways to integrate oral language instruction with the total curriculum, ways to enhance students’ expressive writing abilities, and ways to teach grammar, spelling, and handwriting through functional and creative writing activities. Prereq: EDC 329 and admission to the elementary teacher education program.

EDC 339 DESIGNING A READING AND LANGUAGE ARTS PROGRAM FOR THE ELEMENTARY SCHOOL. (3)
A study of materials and procedures for developing reading and language arts skills with elementary students, with an emphasis on grades K-4. Course will emphasize how to diagnose individual student skill strengths and weaknesses and build a prescriptive program based upon the diagnosis. Prereq: EDC 329; admission to the TEP or permission of instructor. Coreq: EDC 322.

EDC 341 THE EARLY ADOLESCENT LEARNER AND METHODS IN MIDDLE LEVEL EDUCATION. (3)
An examination of the nature of early adolescents as well as the history and characteristics of the schools designed to teach them. Focus is on responsive pedagogy, especially the rationale behind the middle school concept and the generic techniques of teaching as an individual and a member of an interdisciplinary team. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to Teacher Education or permission of instructor.

EDC 342 STUDENT TEACHING IN ART. (3-12)
Designed to observe the student practical experiences through observation, planning, teaching, and evaluating procedures. The student works with children on all grade levels under the guidance of the supervising teacher. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.

EDC 343 METHODS AND MANAGEMENT IN MIDDLE LEVEL EDUCATION. (3)
A study of classroom management in theory and practice, with a focus on planning and assessment in middle level classrooms. This course is in conjunction with a four-week field experience, consisting of 2-week placements in the candidate’s areas of content concentration. Prereq: EDC 341, or permission of instructor.

EDC 346 METHODS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)
Introduction to theory, research, purposes, methods and materials appropriate to social studies instruction in the middle grades. This course is in conjunction with a four-week field experience, consisting of 2-week placements in the candidate’s areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in approved social studies courses, or permission of instructor.

<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDC 347</td>
<td>METHODS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS.</td>
<td>(3)</td>
<td>This course introduces teacher candidates to the fundamentals of theory and practice for teaching English Language Arts at the middle level (grades 5-9) as they develop an understanding of state and national standards. Course work includes current issues and recent developments in curriculum and methodology in the teaching of middle level English Language Arts with emphasis on the integration of reading, writing, listening, speaking, and language use. Course includes a four-week field experience in middle school settings. Prereq: Admission to Teacher Education, 9 hours in English, or permission of instructor.</td>
</tr>
<tr>
<td>EDC 362</td>
<td>FIELD EXPERIENCES IN SECONDARY EDUCATION.</td>
<td>(1-3)</td>
<td>Supervised experiences in schools, other education agencies, and the community. Required of all students receiving a bachelor’s degree in secondary education. Includes field trips, work in schools, and involvement in community projects.</td>
</tr>
<tr>
<td>EDC 377</td>
<td>STUDENT TEACHING IN MUSIC.</td>
<td>(3-12)</td>
<td>A course planned for teachers who expect to become either instructors or supervisors of music in the public schools. Observation, teaching, work on research problems, and conferences with the supervising teacher included. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.</td>
</tr>
<tr>
<td>EDC 421</td>
<td>SURVEY OF SECONDARY MATHEMATICS CURRICULUM.</td>
<td>(3)</td>
<td>This course will examine the content of the mathematics curriculum of the secondary school and issues related to that curriculum. Students are expected to demonstrate competency in this area.</td>
</tr>
<tr>
<td>EDC 433</td>
<td>STUDENT TEACHING IN THE ELEMENTARY SCHOOL.</td>
<td>(3-12)</td>
<td>A course designed to give the student experience with and practice in the program of an elementary school. Actual work with children in all learning situations is the basic part of the course. A required weekly seminar will include sessions on: beginning teacher internship, school law and students' rights, administrative organization, and professional development. Offered on a pass-fail basis only. Prereq: Must meet the published college requirements for student teaching.</td>
</tr>
<tr>
<td>EDC 446</td>
<td>APPLICATIONS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES.</td>
<td>(3)</td>
<td>This course emphasizes analyzing and assessing teaching and learning appropriate to inquiry-based social studies instruction in the middle grades. This course is in conjunction with an eight-week field experience. Prereq: EDC 346 or permission of instructor.</td>
</tr>
<tr>
<td>EDC 501</td>
<td>TEACHING INTERNSHIP.</td>
<td>(1-12)</td>
<td>Supervised practice teaching under competent leadership. Observation, instruction, independent study, which parallels field experience, and conferences with supervising instructor included. This course is designed primarily for students in Allied Health Professions, Education, Library and Information Science, Home Economics, and Social Work. May be repeated to a maximum of 12 hours. Prereq: EDC 500 or permission of instructor.</td>
</tr>
<tr>
<td>EDC 504</td>
<td>LITERATURE AND RELATED MEDIA FOR YOUNG ADULTS.</td>
<td>(3)</td>
<td>A study of literature and related materials for use with young people in grades 6-12. Emphasis is placed on the special characteristics and needs of young people and the evaluation of materials for this age group. (Same as LIS 514.)</td>
</tr>
<tr>
<td>EDC 509</td>
<td>COMPOSITION FOR TEACHERS.</td>
<td>(3)</td>
<td>A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to produce a total of 20 pages of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 509.)</td>
</tr>
<tr>
<td>EDC 513</td>
<td>TEACHING ENGLISH AS A SECOND LANGUAGE.</td>
<td>(3)</td>
<td>This course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 513.)</td>
</tr>
<tr>
<td>EDC 514</td>
<td>TESL MATERIALS AND METHODS.</td>
<td>(3)</td>
<td>An extension to EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. The course will explore the content and methodology of materials and their use. Prereq: EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 514.)</td>
</tr>
<tr>
<td>EDC 520</td>
<td>ASSESSMENT AND ACCOUNTABILITY IN MIDDLE LEVEL EDUCATION.</td>
<td>(3)</td>
<td>This capstone course is taken during the student teaching experience and is taught via an online modality. The purpose of the course is to investigate and document teaching effectiveness. Candidates design an integrated unit of study, pre and post test student teaching, analyze learning gains drawn on formative and summative measures, and make modifications and accommodations based on the results. Prereq: Admission to Teacher Education.</td>
</tr>
<tr>
<td>EDC 522</td>
<td>PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS.</td>
<td>(3)</td>
<td>Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDP/EPE 522.)</td>
</tr>
<tr>
<td>EDC 533</td>
<td>TEACHING LITERACY ACROSS THE DISCIPLINES.</td>
<td>(3)</td>
<td>This course provides an in-depth study of theories and teaching methods for integrating literacy (including digital literacy) into the curriculum area classrooms at the K-12 levels. Instructional strategies, procedures, and assessments designed to increase vocabulary learning and comprehension of expository texts are emphasized. Prereq: Graduate standing or consent of the instructor.</td>
</tr>
<tr>
<td>EDC 534</td>
<td>READING AND STUDY SKILLS IN ENGLISH.</td>
<td>(3)</td>
<td>This course promotes the thoughtful examination of writing instruction at the middle and high school levels. Throughout the course, learners are introduced to strategies and skills they can use to enhance their own writing and the writing of their students. Using a process approach, students learn how to communicate ideas effectively in a variety of genres and for a multitude of purposes. Based on the most current research in the field, this course explores such topics as writing workshop, conferencing, assessment of struggling writers, reading/writing connections, writing in the disciplines, revision and editing, the use of digital media to support writers, and the management of writing instruction. This course is offered in conjunction with an eight-week clinical field experience. Prereq: EDC 347, graduate standing, or permission of instructor.</td>
</tr>
<tr>
<td>EDC 541</td>
<td>READING AND UNDERSTANDING EDUCATIONAL RESEARCH.</td>
<td>(3)</td>
<td>The purpose of this course is to learn how to critically read, analyze, and reflect upon educational research from quantitative, qualitative, and mixed methods perspectives.</td>
</tr>
<tr>
<td>EDC 543</td>
<td>DIGITAL GAME BASED LEARNING AND INSTRUCTION.</td>
<td>(3)</td>
<td>Digital game-based applications as prominent video-game-based vehicles for distance education and multimedia development through multi-user and virtual platforms. Classroom scenarios and digital development basics are presented together with production skills including the use of graphical and video assets, flash animations, storyboarding, equipment, terminology and systems, message design issues and research on DGBL.</td>
</tr>
<tr>
<td>EDC 544</td>
<td>USE AND INTEGRATION OF INSTRUCTIONAL MEDIA.</td>
<td>(3)</td>
<td>Students use a range of traditional, interactive, and emerging technological interventions in analog and digital formats. Students gain skill in the operation, production, and integration of basic media such as video, graphics, videodisk, and CD-ROM in a variety of instructional settings (training, exploratory learning, on-line databases, etc.). Students demonstrate skills via the composition and production of several media documents using available tools and resources.</td>
</tr>
<tr>
<td>EDC 547</td>
<td>TECHNOLOGY INSTRUCTION PRACTICE.</td>
<td>(3)</td>
<td>Students use instructional computing applications and understand the roles and uses of computers in instruction. Students select and use instructional computing hardware and software appropriate to instructional goals and settings. Students use electronic networks for instructional purposes. Students demonstrate skill using basic productivity software through structured assignments and collaborative projects.</td>
</tr>
<tr>
<td>EDC 548</td>
<td>INSTRUCTIONAL TECHNOLOGY LEADERSHIP.</td>
<td>(3)</td>
<td>Students develop skill in advanced aspects of the operation and use of the range of instructional technologies from desktop to distributed computing environments. Students use operating systems, learn network administration, do technology planning, and work with basic authoring tools. Skill is demonstrated through a series of projects including development of a technology plan for a specified work setting and authorship of a prototype program.</td>
</tr>
<tr>
<td>EDC 549</td>
<td>MIDDLE LEVEL STUDENT TEACHING.</td>
<td>(3-15)</td>
<td>This course provides candidates with the opportunity to participate in a full-time, supervised internship in middle school classrooms. The student teaching experience occurs in a 5-9 school setting. Offered on a pass-fail basis only. Repeated for up to 15 hours. Prereq: Must meet published college requirements for student teaching.</td>
</tr>
<tr>
<td>EDC 550</td>
<td>EDUCATION IN A CULTURALLY DIVERSE SOCIETY.</td>
<td>(3)</td>
<td>This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nourished. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as AAS 550.)</td>
</tr>
<tr>
<td>EDC 554</td>
<td>CULTURE, EDUCATION AND TEACHING ABROAD.</td>
<td>(3)</td>
<td>Introduction to theory and practice of intercultural communication, cross-cultural (especially international experience), and teaching with a global perspective, plus an opportunity for country-specific research. Required for those wishing to student teach overseas. (Same as EPE 554.)</td>
</tr>
<tr>
<td>EDC 556</td>
<td>MODERN EDUCATIONAL PROBLEMS. (GENERAL CURRICULUM).</td>
<td>(3 e.a.)</td>
<td>This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as AAS 561.)</td>
</tr>
</tbody>
</table>
Course Descriptions

**EDC 602 CURRICULA AND PROGRAMMING FOR THE GIFTED.** (3)
Study of the design and development of distributed learning systems in education and training. Topics include: foundations of distance education, distance learning research, and the design and development of e-learning courses and workshops. Student involvement in the design of an e-learning course or workshop will be emphasized.

**EDC 605 DISTANCE LEARNING RESEARCH AND DESIGN.** (3)
Introduction to the instructional design process from needs assessment and goal definition through evaluation. Each student will design prototype instructional materials based on an instructional design model and/or procedures. The course will also introduce students to the field of instructional design and technology.

**EDC 607 INSTRUCTIONAL DESIGN I.** (3)
Critical analysis of instructional design models and their theoretical foundations including the impact of various models and perspectives on the practice and the products of instructional design. Prereq: EDC 607 or consent of instructor.

**EDC 609 INTERACTIVE MULTIMEDIA AND USER DESIGN.** (3)
The goal of this course is to examine the theoretical foundations and best practices involved in multimedia research and interface design. These investigations are anchored in user-centered design and the methodology explored in the course is research to practice in usability testing and iterative program design. Prereq: EDC 544.

**EDC 610 DISCIPLINE AND CLASSROOM MANAGEMENT.** (3)
The course is designed to examine the causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher. The course content is designed around two approaches: (1) identifying prevalent problems and exploring specific solutions to them; (2) presenting selected strategies and applying them to a variety of problems. In both cases, alternatives are considered in the light of relevant theory, law, research and experience. Prereq: Teacher certification and EDP 203.

**EDC 611 AUTHORIZING APPLICATIONS FOR TECHNOLOGY-BASED INSTRUCTION.** (3)
Focuses on individual and collaborative authoring applications for technology-based instructional materials. Topics include linear and non-linear information structures, instructional message design, compositional issues related to audience focus, information density, language control, and organization, and prototype production with industry standard authoring software. Prereq: EDC 547 and EDC 607 or consent of instructor.

**EDC 612 INSTRUCTIONAL DESIGN AND TECHNOLOGY FOUNDATIONS.** (3)
Provides an in-depth survey of the field of instructional design and technology. Topics covered include the history of instructional design and technology, critical issues, current trends and future prospects for the field, instructional development, research, certification, and professional development.

**EDC 615 ADVANCED INSTRUCTIONAL APPLICATIONS FOR THE EARLY ADOLESCENT LEARNER.** (3)
This course for middle school teachers examines the complex nature of the 10 to 14 year old student. Analysis of recent research-based effective instructional strategies to meet the needs, interests, and characteristics of these students will be included. Prereq: Teacher Certification or consent of instructor.

**EDC 616 THE MIDDLE SCHOOL.** (3)
The purpose of this course is to provide middle school teachers with an in-depth analysis of the characteristics of effective middle school facilities. An examination of current curricular models, issues, trends, and exemplary middle schools will comprise the primary focus of this course. Prereq: EDC 615 or consent of instructor.

**EDC 618 ADVANCED STUDY IN THE TEACHING OF READING.** (3)
An advanced course for classroom teachers which focuses on selection and implementation of reading assessment and instructional procedures. The theoretical bases of the reading process and the knowledge of research in reading will be related to the design of classroom instruction. This course is to become an option in Area 7 of both the Elementary and Secondary Standard Certification programs. Prereq: EDC 330 or 339 or 533 or equivalent.

**EDC 619 ASSESSMENT OF READING GROWTH AND DEVELOPMENT.** (3)
Clinical techniques for the diagnosis of reading disabilities. A course designed to develop both theoretical understanding and operational skills in clinical diagnosis of reading problems. Classroom application of the techniques is discussed. Prereq: EDC 330, or EDC 533, or EDC 534, or permission of instructor.

**EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION.** (3)
Clinical techniques used in the remediation of reading problems. It is a course designed to develop individualized procedures related to diagnosis. Classroom applications of the instructional procedures are discussed. This course is a combination of lecture and application with a student client. Prereq: EDC 619, or permission of instructor.

**EDC 625 LITERACY LEADERSHIP P-12.** (3)
The purpose of this course is to prepare literacy professionals to facilitate positive change in school and community settings through program development and evaluation, mentoring, and advocacy. Students will: understand and assume various roles as literacy leaders; learn how to develop, implement, and evaluate effective research-based literacy programs and practices; learn how to diagnose, facilitate, lead, and evaluate effective professional development programs for professional educators; learn how to mentor colleagues and work collaboratively with families, teachers, administrators, policymakers, and community members in individual and group contexts; and learn how to influence local, state, and national policy decisions related to literacy education.

**EDC 626 CURRENT ISSUES IN LITERACY EDUCATION.** (3)
Current Issues in Literacy Education (EDC 626) is an advanced course for graduate students, which focuses on contemporary matters in literacy education and learners. An emphasis on social, historical, and political factors affecting the literacy learning is included.

**EDC 628 THEORETICAL FOUNDATIONS: ISSUES IN LITERARY DIFFICULTIES.** (3)
The purpose of this course is three fold. First, to acquaint students with the most current thinking about reading and learning processes relative to young, low progress, ‘at-risk’ students. Second, to acquaint students with the seminal research and theories which have influenced reading difficulties. Third, to help students relate recent seminal theories of learning and, in particular, reading difficulties, to young students who are hard for us to teach. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627

**EDC 629 LEADERSHIP PRACTICUM FOR TEACHER LEADERS, ADVANCED.** (3)
Careful attention to implementation is critical for a successful intervention. Reading Recovery has worked to develop context-sensitive and evolving mechanisms for ensuring quality implementation. Teacher leaders play a critical role in maintaining the quality of each implementation. In order to provide effective leadership, teacher leaders must be knowledgeable about the design principles of the intervention and skillful in problem solving issues that arise. Teacher leaders collect and analyze data to evaluate and strengthen the implementation of Reading Recovery. They create awareness, work collaboratively with stakeholders, and cultivate support for Reading Recovery at the building, district, site, and state levels. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627.

**EDC 632 SOCIAL STUDIES PEDAGOGY IN THE SECONDARY SCHOOL.** (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning social studies and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

**EDC 633 BUSINESS PEDAGOGY IN THE SECONDARY SCHOOL.** (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning business and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

**EDC 635 ENGLISH PEDAGOGY IN THE SECONDARY SCHOOL.** (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning English and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

**EDC 636 METHODS OF TEACHING FOREIGN LANGUAGE, K-12.** (3)
**EDC 637 CLASSROOM MANAGEMENT IN SECONDARY EDUCATION.** (1)
The Classroom Management component course is designed to prepare future teachers to effectively manage aspects of their instruction, interactions with students, and student behavior in the secondary classroom. Causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher will be examined. Prereq: Admission to the M.A. Education (Secondary Education with Initial Certification).

**EDC 638 TECHNOLOGY IN SECONDARY EDUCATION.** (1-3)
This course emphasizes the effective use of technology for problem solving—problem solving that occurs on several levels: (1) instructional problem solving (using technology to support various kinds of learning outcomes for students), (2) content problem...
solving (using games/software/websites to learn to solve problems that reflect the principles and core concepts in your discipline), (3) assessment problem solving (using technologies to support authentic challenging assessments that support evaluation of what students know and are able to do).

EDC 639 MULTICULTURALISM IN SECONDARY EDUCATION. (1)
This course explores the influence of self-concepts and past experiences on current attitudes, perceptions and behaviors; investigates the effects of cultural traditions, political mandates, educational trends and school curriculums on student achievement; and develops strategies to create equitable teaching/learning environments in secondary education that validate, stimulate, and nurture all students. Prereq: Admission to M.A. in Education (Secondary Education with Initial Certification).

EDC 642 RESEARCH AND THEORY IN LITERACY EDUCATION. (3)
The purpose of this course is to critically examine, analyze, and reflect upon research and theory pertaining to the production and understanding of oral and written language (reading, writing, speaking, listening, viewing, and visually representing). Prereq: EDC 641 or equivalent course in research foundations.

EDC 676 PRACTICUM IN GIFTED EDUCATION. (2-3)
A course designed for educators who are preparing to supervise teachers and who wish to analyze their own practice. Research, policies, and trends are examined and practices analyzed in the context of how to promote effective teaching. Principles apply to elementary and secondary education.

EDC 709 SOCIAL MEDIA AND INTERACTIVE SYSTEMS DESIGN. (3)
The purpose of this course is to examine the growing research and design literature for on-line communities and networked learning groups that support cooperative, collaborative and social instructional activities. Framed by concepts from Activity Theory, Social Networking Theory and Social Learning Models students will read current books, research articles and be introduced to research methods and tools (such as tracking utilities and on-line data collection) for examining these communities. Students will design and collect data for an original research project as part of required course work. Prereq: EDC 608, EDC 662, or consent of instructor.

EDC 710 ADVANCED TOPICS IN INSTRUCTIONAL DESIGN. (3)
An identification and analysis of current theories and programs of research in instructional systems design. Students will develop the skills necessary to conduct and write a scholarly literature review and identify potential areas and questions needing further study. Prereq: EDC 608, EDP 610, EDC 662, or consent of instructor.

EDC 712 THE ELEMENTARY SCHOOL. (3)
Recent research and modern trends in teaching the skills and content subjects in the elementary school. Planned for supervisors, superintendents, principals, and teachers for better understanding of an elementary school.

EDC 714 THE SECONDARY SCHOOL. (3)
A course designed to acquaint the secondary teacher and the administrator with the nature and function of the secondary school.

EDC 724 GUIDING AND ANALYZING EFFECTIVE TEACHING. (3)
A course designed for educators who are preparing to supervise teachers and who wish to analyze their own practice. Research, policies, and trends are examined and practices analyzed in the context of how to promote effective teaching. Principles apply to elementary and secondary education.

EDC 726 CURRICULUM INQUIRY MIXED METHODS RESEARCH. (3)
A mixed methodology conceptual framework is used to examine various approaches for designing, implementing, and analyzing practitioner data generated in a variety of instructional settings. Topics include epistemological, methodological, and ethical issues involved in action research, classroom discourse analyses, and mixed methods curriculum inquiry. Prereq: EDP/EPE 558 and EPE 663 or permission of instructor.

EDC 730 PROBLEMS OF THE SCHOOL CURRICULUM. (3)
Problems in the field of the school curriculum and in the preparation of instructional materials. Students enrolling in this course are required to leave on file with the College of Education a complete report of each problem studied. May be repeated once for a maximum of six credits.

EDC 731 SOCIAL STUDIES SEMINAR: HISTORY EDUCATION. (3)
Advanced study of the purposes and practices that characterize K-12 history education in diverse settings, critical analysis of research on the development of children’s and adolescents’ historical thinking and the introduction of classroom-based techniques for assessing students’ historical understanding. Prereq: Graduate standing.

EDC 732 CURRICULUM DESIGN FOR LEARNING AND LEADING. (3)
Critical analysis, design, and implementation of curricula. Survey of theoretical foundations, in-depth applied research experiences, design of curriculum resource materials, and implementation of curriculum designs.

EDC 733 LEADERSHIP IN ADVANCED INSTRUCTIONAL PRACTICE. (3)
Course participants will develop leadership skills in curriculum and instruction through a variety of research-based analytic practices such as lesson study, observation, mentoring, dialogic and collaborative work in the context of a school learning community. Clinical/field practicum experiences provide experience identifying a research problem, planning a course of action, and implementing and evaluating the action plan to improve learning results in K-12 classrooms. This course is designed as a hybrid workshop as follows. The class begins with a one-week intensive summer experience. Online and distance learning instruction will be conducted throughout the fall semester as students engage in their course work through clinical/field/practicum experiences. During the semester, two in-class meetings will serve as midpoint and final assessments of student progress toward meeting course objectives. Clinical/field work will be conducted in school classrooms. Prereq: Graduate-level course curriculum, graduate-level assessment course, and a minimum of two years' K-12 teaching experience.

EDC 740 PRACTICUM IN TEACHING READING AND RELATED LANGUAGE ARTS. (3)
Supervised practicum in analyzing problems in reading and related language arts and providing remedial work. Requires six hours per week in practicum with individual children or groups, plus two hours per week in seminar. May be repeated to a maximum of six credits. Prereq: EDC 619, 620.

EDC 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL. (0-9)
Students will teach in their subject areas in the schools full-time, meet regularly to discuss teaching effectiveness and strategies for improvement and develop their professional portfolios. May be repeated to a maximum of nine credits. Lecture, 3-6 hours; laboratory, 6-18 hours per week. Prereq: The appropriate methods course in the subject area (SEM 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary). (Same as SEM 746.)

EDC 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 research credit following the successful completion of the qualifying examination.

EDC 750 INTERNSHIP IN INSTRUCTIONAL SYSTEMS DESIGN. (3)
Students will apply their knowledge of instructional systems design in a real-life setting. The work setting will be selected based on the professional goals of each student and student work will be supervised and reviewed by the internship coordinator. May be repeated to a maximum of nine credits. Prereq: Consent of program coordinator.

EDC 755 INSTRUCTIONAL SYSTEMS DESIGN RESEARCH COLLOQUIUM. (1)
Students and faculty will discuss current research and related issues in instructional systems design. May be repeated to a maximum of two credits. Prereq or concur: EDC 547 and EDC 608.

EDC 767 DISSERTATION RESIDENCY CREDIT. (1-3)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDC 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (0-12)
May be repeated indefinitely.

EDC 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EDC 777 SEMINAR IN CURRICULUM AND INSTRUCTION (Subtitle required). (1-3)
A critical analysis of recently developed materials and techniques in curriculum and instruction for precollege education. Includes analysis of evaluative research related to new materials and techniques. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDC 781 INDEPENDENT STUDY IN CURRICULUM AND INSTRUCTION. (1-3)
An independent study course for graduate students who have completed at least half of the program core requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDC 791 RESEARCH PROBLEMS IN CURRICULUM AND INSTRUCTION. (1-3)
A research problems course for graduate students who have completed at least half of the program core requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDL 401 THE PROFESSIONAL TEACHER: LEGAL PERSPECTIVES. (1)
Study of legal concerns of public school teachers. Emphasizes legal rights and responsibilities of teachers and pupils. Lecture, two hours per week for eight weeks. Prereq: Admission to the Teacher Education Program.

EDL 402 PRINCIPLES OF LEADERSHIP. (3)
This course is designed to provide an introduction to leadership. Its focus is the development of successful leadership. The introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership skills and styles and strategies for success, and 3)
Course Descriptions

**EDL 403 LEADERSHIP AND COMMUNICATION.** (3)
This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as CLD 402.)

**EDL 404 CONTEMPORARY LEADERSHIP APPLICATIONS.** (3)
This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as CLD 403.)

**EDL 571 DESIGN THINKING IN EDUCATION.** (3)
This course exposes students to many facets of design thinking and provides them with an interdisciplinary perspective about the role of design in addressing the world’s challenges. This course also raises awareness about the value and power of design thinking our culture. Students will work in collaborative teams on semester-long projects in collaboration with client organizations, field liaisons, and a set of multidisciplinary experts. Students are exposed to the process of human-centered design, and hone their skills in need finding, problem definition, brainstorming, prototyping, and user testing. The course will consist of lecture, hands-on practice, and guest speakers.

**EDL 601 INTRODUCTION TO SCHOOL LEADERSHIP AND ADMINISTRATION.** (3)
Study of school leadership and administrative responsibilities, with emphases on understanding schools as complex organizations and facilitating leadership to create a work climate supportive of excellence in teaching and learning.

**EDL 610 SCHOOL LEADERSHIP PRACTICUM I.** (1)
Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed, or consent of instructor.

**EDL 611 SCHOOL LEADERSHIP PRACTICUM II.** (1)
Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610 completed, or consent of instructor.

**EDL 612 SCHOOL LEADERSHIP PRACTICUM III.** (1)
Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610, EDL 611 completed, or consent of instructor.

**EDL 625 SCHOOL SAFETY AND DISCIPLINE LEADERSHIP.** (3)
Study of processes and programs effective in promoting school wide safety and discipline. Emphasis on school connections to community security and resources. Prereq: Admission to Department Program or Consent of instructor.

**EDL 627 SCHOOL FINANCE AND SUPPORT SERVICES.** (3)
Study of concepts in school finance and school business management. Attention is given to national, state, and local issues. Emphasis is also given to school support services including transportation, facility planning and maintenance, food service, and risk management. Prereq: Program status or consent of instructor.

**EDL 628 SCHOOL LAW AND ETHICS.** (3)
Study of legal and ethical issues as related to practical problems of school administration. Constitutional provisions and court decisions are examined as they impact education. Prereq: Program status or consent of instructor.

**EDL 631 LEADERSHIP FOR SCHOOL PROGRAM COLLABORATION.** (3)
This course prepared school leaders to administer integrated instructional support programs in schools and districts. Attention is also given to leadership requirements needed to facilitate collaboration among school and community-based programs that provide and support student learning. Prereq: Program status or consent of instructor.

**EDL 634 LEADERSHIP FOR HUMAN RESOURCES DEVELOPMENT IN SCHOOLS.** (3)
Study of human resources development practices in school systems, with emphasis on central office and school unit responsibilities for attracting, selecting, developing, evaluating, and retaining competent faculty and staff. Prereq: Program status or consent of instructor.

**EDL 638 THE SUPERVISOR OF INSTRUCTION.** (3)
A study of the role and responsibilities of the supervisor of instruction as a member of the leadership team for the school district. Prereq: Admission to program or consent of instructor.

**EDL 646 SCHOOL AND COMMUNITY COLLABORATION LEADERSHIP.** (3)
Study of issues in administering integrated support programs in schools and districts serving specific student or community populations while increasing school and community collaboration. Prereq: Program status or consent of instructor.

**EDL 661 SCHOOL TECHNOLOGY LEADERSHIP.** (3)
This course provides an introduction to the study of school technology leadership with an emphasis on educational administrators developing a shared vision, planning, and implementing policies and utilizing resources for the comprehensive integration of technology at the school, district, and state levels. Prereq: Admission to the program or consent of instructor.

**EDL 662 DIGITAL AGE LEARNING AND SCHOOL TECHNOLOGY LEADERSHIP.** (3)
This course focuses on the role of educational administrators in creating and sustaining a culture of learning that ensures all students have access to an academically rigorous, relevant, and engaging education through the use of appropriate digital technologies. Prereq: Admission to the program or consent of instructor.

**EDL 663 LEADERSHIP FOR SCHOOL PROGRAM IMPROVEMENT.** (3)
This course addresses the role of the educational administrator in providing professional development that supports communities of practice and the adoption of contemporary technologies and digital resources to enhance student academic learning. The course introduces students to principles of adult learning that characterize effective professional development and planning as it relates to technology adoption at the school, district and state-levels of education.

**EDL 664 SCHOOL TECHNOLOGY LEADERSHIP FOR SCHOOL IMPROVEMENT.** (3)
This course focuses on educational administrators’ use of technology to support data-driven decision-making to support continuous improvement and change at the school, district, and state levels of education. Prereq: Admission to the program or consent of instructor.

**EDL 665 SCHOOL TECHNOLOGY LEADERSHIP FOR DIGITAL CITIZENSHIP.** (3)
This course examines school administrators’ social, ethical, and legal issues and responsibilities all students, including those with disabilities and special needs, for digital citizenship. Facilitates understanding of evolving virtual school environments and modeling digital citizenship at the school, district, and state levels are also addressed. Prereq: Admission to the program or consent of instructor.

**EDL 666 LEADERSHIP FOR CREATIVE PROBLEM SOLVING.** (3)
Study of diverse strategies and protocols used to identify authentic problems of practice in educational settings, diagnose potential options, determine innovation solutions, and assess impact by using diverse data sources.

**EDL 667 THE SCHOOL SUPERINTENDENCY.** (3)
Role of the school district superintendent is studied including: historical and current job responsibilities of the position; knowledge, skills and dispositions necessary to serve successfully in the position; future challenges of the position. Prereq: Admission to the program and consent of instructor.

**EDL 677 SCHOOL SYSTEM ADMINISTRATION.** (3)
Study of overall school district management and operations including administration of auxiliary services, federal programs, financial management, and human resources. Prereq: Admission to program or consent of instructor.

**EDL 678 STRATEGIC MANAGEMENT IN EDUCATION.** (3)
Study of strategic management procedure applications in school administration utilized at both the school district and individual school site levels. Prereq: Admission to program or consent of instructor.

**EDL 679 SCHOOL SUPERINTENDENT PRACTICUM I.** (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendency certificate program or consent of instructor.

**EDL 680 SCHOOL SUPERINTENDENT PRACTICUM II.** (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendency certificate program and completion of EDL 679 or consent of instructor.

**EDL 681 SCHOOL SUPERINTENDENT PRACTICUM III.** (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendency certificate program and completion of EDL 679 plus EDL 680, or consent of instructor.

**EDL 682 LEADING DISTRICT CHANGE AND INNOVATION.** (3)
This course focuses on understanding the role of the school district superintendent in leading system-wide change and innovation, educational reform in national, state, and local contexts and change models and processes. Students will collaborate with a superintendent mentor in completing field-based, work-embedded assignments. Prereq: Admission to the Superintendent Certification Program or consent of instructor.

**EDL 694 LEADERSHIP IN CAREER AND TECHNICAL EDUCATION.** (3)
A course designed for supervisors, high school principals, and other leaders. Its purpose is to prepare administrators and supervisors for leadership in career and technical education. (Same as CLD 694.)

**EDL 700 KNOWLEDGE BASE FOR LEADERS.** (3)
This course reviews the quest for a knowledge based in educational administration. It begins with a survey of the history of education and organizational thought in the United States,
EDP 518 CONTEMPORARY TOPICS IN UNIVERSITY RESIDENTIAL LIVING. (3)

An exploration of topics such as conflict mediation, crisis management, communication skills, student development theories, and wellness designed to provide new Resident Life Advisors with the skills and knowledge essential for being successful. Prereq: PST 100, PST 215, or EDP 202 and must be a Residence Life Advisor.

#EDP 520 PROGRAM EVALUATION.

This course is an application-focused course that provides an overview of program evaluation. This course will cover the types of evaluation, the theory associated with evaluation, and the tools most commonly applied to the evaluation process. Students will develop an appreciation for the flexibility needed in order to perform evaluation tasks in practical situations related to their area of expertise. (Same as EDC/EPSE 520.)

EDP 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)

Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examination criteria, and other rating systems. (Same as EDC/EPSE 522.)

EDP 545 PSYCHOLOGY OF THE BLACK EXPERIENCE. (3)

EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational, School, and Counseling Psychology and is cross-listed with the Africana Studies program and Psychology department. It is designed to offer enrolled undergraduate and graduate student opportunities to survey, explore, and critique classic and contemporary theories and research articulating the psychologies that inform both social and academic experiences and observed behaviors of Black people. While there are multiple objectives for this upper-level undergraduate and graduate-level seminar course, one central objective for the course is to expose all students to literature and research pertaining to the Black experience in the United States in an effort to develop and refine ideas and mindsets that will foster and reflect the needs and abilities of exceptional learners in order to make appropriate, reflective decisions about their instruction. Prereq: Admission to the Elementary Teacher Education Program and successful completion of EDP 202, or an equivalent.

EDP 568 CONTEMPORARY SCHOOLS IN A DIVERSE SOCIETY. (3)

This course will focus on the characteristics and needs of diverse populations. The course examines the roles and responsibilities of principals in mentoring and supervising a school’s instructional program, learning assessment, and evaluation and accountability processes to assure academic achievement by all students. Prereq: Admission to Ed.D. program or permission of instructor.

EDP 570 ORGANIZATIONAL LEARNING IN P12 SCHOOLS. (3)

EDP 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of EDP 769. Survey or writing the successful completion of the qualifying exams.

EDP 777 TOPICAL SEMINAR IN EDUCATIONAL LEADERSHIP. (1-3)

A variable topic seminar on selected topics in educational leadership. Activities are designed to improve skill in planning, data-informed decision making, organizing, communicating, evaluating, negotiating, and problem solving will be provided as appropriate. Educational innovations and processes of implementing change may be analyzed. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDP 778 INDEPENDENT WORK IN EDUCATIONAL LEADERSHIP. (3)

Includes research on a practical problem in educational leadership. Open only to students with at least one semester of graduate work in education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDP 792 RESEARCH IN EDUCATIONAL LEADERSHIP AND RELATED FIELDS. (3)

Critical examination of representative research studies in leadership and related fields. Emphasis upon the students’ defining and delimiting an appropriate problem in educational leadership, generating a design appropriate to the problem and selecting appropriate techniques of analysis. Prereq: Admission to program.

EDU 701 LEADERSHIP IN EDUCATIONAL ORGANIZATIONS. (3)

A study of leadership with particular emphasis on understanding the nature, defining characteristics, responsibilities, contextual determinants, and importance of leadership within educational organizations. Prereq: Admission to program or consent of instructor.

EDU 702 LEADERSHIP FOR ORGANIZATIONAL LEARNING. (3)

This course examines theories associated with organizational learning and change processes that can be used by leaders of 21st century educational systems. Theories are then used to examine prevailing practices within organizations and to inform the development of action plans appropriate for improved organizational performance. Prereq: Admission to Department program or consent of instructor.

EDU 703 LEADING ORGANIZATIONAL CHANGE. (3)

This course focuses on understanding the field of organizational change as well as emphasizing the nature, characteristics, responsibilities, and contextual determinants that influence a leader’s role in changing educational organizations. Prereq: Admission to Department program or consent of instructor.

EDU 704 POLITICS OF EDUCATIONAL LEADERSHIP. (3)

This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Gradate standing. (Same as EDF 603.)

EDU 705 INTERNATIONAL PERSPECTIVES ON EDUCATIONAL REFORM. (3)

This course focuses on international education reform, the function of schools in national social, economic, and political development, as well as emerging perspectives on educational leadership and professional preparation. Prereq: Admission to a doctoral degree program at the University of Kentucky, completion of EPF 555, its equivalent, or consent of the instructor.

*EDU 706 CONTEMPORARY SCHOOL LEADERSHIP. (3)

EDU 706 examines leadership and administrative responsibilities in contemporary P12 schools with emphasis on a principal’s role in creating a learning-centered culture focused on student achievement and school excellence. Hybrid delivery that features face-to-face and online sessions. Prereq: Admission to Ed.D program or permission of instructor.

*EDU 707 LEARNING IN LEARNING-CENTERED SCHOOLS. (3)

EDU 707 examines theories associated with learning-centered leadership in P12 educational organizations with emphasis on the roles and responsibilities of principal in supervising and monitoring a school’s instructional program, learning assessment, and evaluation and accountability processes to assure academic achievement by all students. Prereq: Admission to Ed.D. program or permission of instructor.

EDU 708 ORGANIZATIONAL LEARNING IN P12 SCHOOLS. (3)

EDU 708 examines theories associated with organizational learning and change processes that can be used by principals to create learning-centered schools. Students conduct disciplined inquiry within P12 schools to identify current practices and then develop action plans to improve school performance.

EDU 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of EDP 769. survey or writing the successful completion of the qualifying exams.

EDU 751 FOUNDATIONS OF INQUIRY. (3)

Introductory study of assumptions and procedures of systematic inquiry used to investigate administrative, leadership and supervisory phenomena in education. Issues regarding quantitative, qualitative and mixed methods models of inquiry are included.

EDU 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDU 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)

May be repeated indefinitely.

EDU 770 TOPICAL SEMINAR IN EDUCATIONAL LEADERSHIP. (1-3)

Advanced graduate students enroll in this topical seminar to enhance their portfolios for educational leadership through concentrated study of innovations in the specialized functions of leadership. These specializations include, but are not limited to, the study of curriculum and instructional leadership, educational law, personnel administration, school and community relations, education for diverse populations, budgeting and financing of schools. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDU 771 SEMINAR IN LEADERSHIP. (1-3)

A variable topic seminar on selected topics in educational leadership. Activities are designed to improve skill in planning, data-informed decision making, organizing, communicating, evaluating, negotiating, and problem solving will be provided as appropriate. Educational innovations and processes of implementing change may be analyzed. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDU 785 INDEPENDENT WORK IN EDUCATIONAL LEADERSHIP. (3)

Includes research on a practical problem in educational leadership. Open only to students with at least one semester of graduate work in education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDU 789 RESEARCH IN EDUCATIONAL LEADERSHIP AND RELATED FIELDS. (3)

Critical examination of representative research studies in leadership and related fields. Emphasis upon the students’ defining and delimiting an appropriate problem in educational leadership, generating a design appropriate to the problem and selecting appropriate techniques of analysis. Prereq: Admission to program.
Course Descriptions

EDP 548 EDUCATIONAL PSYCHOLOGY. (3)
An introduction to the application of principles of psychology to classroom learning and teaching problems.

EDP 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3)
This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate of Education; or consent of the instructor. (Same as EPE 557.)

EDP 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)
The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EDP/EPE 557 or equivalent. (Same as EPE 558.)

EDP 570 INTRODUCTION TO PSYCHOLOGICAL SERVICES IN SCHOOLS. (3)
A review of the historical development and models of organization and administration in the field of school psychology and the relationship between school psychology and other educational and psychological specialties. Prereq: Admission to School Psychology Program or consent of instructor.

EDP 580 INTRODUCTION TO GIFTED EDUCATION. (3)
A survey of human development across the life span of the individual from conception to death. Content includes changes in motor skills, biological growth and decline, learning behavior, language, social, emotional, moral, and intellectual development as well as the roles of the family, the school, peers, and work in relation to individual development. Critical evaluation of current theories which describe human development.

EDP 600 LIFE SPAN HUMAN DEVELOPMENT AND BEHAVIOR. (3)
A survey of human development across the life span of the individual from conception to death. Content includes changes in motor skills, biological growth and decline, learning behavior, language, social, emotional, moral, and intellectual development as well as the roles of the family, the school, peers, and work in relation to individual development. Critical evaluation of current theories which describe human development.

EDP 603 HUMAN COGNITIVE DEVELOPMENT. (3)
Theory and research concerning the development of attitudes, motives, self-concept and other cognitive processes are presented and the educational implications explored. Prereq: EDP 548 or EDP 610 or EDP 600.

EDP 604 LIFESPAN GENDER DEVELOPMENT. (3)
An in-depth examination of theory, research, and personal attitudes concerning gender development across the lifespan. Interaction of gender with effective personal functioning in family, educational, and work-related settings. Prereq: EDP 600 and 601 or equivalent.

EDP 605 INTRODUCTION TO COUNSELING: TECHNIQUES I. (3)
A survey of counseling psychology, philosophy, procedures and practices. Consideration of the roles of the counselor in relation to counseling services in the community and educational settings. In-depth training in initial counseling skills, interviewing (listening) and relationship building skills. Prereq: Acceptance to the graduate program in counseling psychology with the following major codes: RECO, ECGO, CPEC, ECPY, ECPC, CNPS, ESPY, ESP, ECPP, ECPE, or consent of instructor via permit.

EDP 606 COUNSELING PSYCHOLOGY PROFESSIONAL IDENTITY, ISSUES, AND RESEARCH METHODS. (3)
Foundational doctoral seminar in counseling psychology. Addresses professional identity, historical perspectives, training issues, and current issues in counseling psychology. Provides an introduction to counseling psychology research methodology related to evidence-based practice. Prereq: Enrollment in the doctoral program in counseling psychology.

EDP 610 THEORIES OF LEARNING IN EDUCATION. (3)
Consideration of the theoretical origins of learning within the context of education. Topics include major learning theories, learning, physiological bases for learning, relationships between learning theory and instruction, and major applications of learning theories in educational settings.

EDP 611 HUMAN COGNITIVE LEARNING. (3)

EDP 612 DEVELOPMENT OF CREATIVITY AND CRITICAL THINKING. (3)

EDP 613 SOCIAL ASPECTS OF BEHAVIOR. (3)
This course is designed to meet the needs of graduate students in the College of Education, particularly those in educational, school, and counseling psychology, for a course in theory and principles of social psychology. The course will cover the basic concepts and theories in social psychology. The theories of attitude formation, group dynamics, and biases will be surveyed, with an application to the professional fields of psychology. In addition to the theories and principles of social psychology, research paradigms, social change, social influence, system consultation, and community issues as they relate to social psychological considerations will be addressed. Prereq: One course in psychology or consent of instructor.

EDP 614 MOTIVATION AND LEARNING. (3)
This course will provide a review of current educational and psychological theories of motivation. After examining various approaches to motivation (self-efficacy, expectancy X value), the course will examine applications of these theories to contemporary issues such as violence, substance abuse, dropping out of school, health maintenance, etc.

EDP 615 PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)
A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in department of Psychology or department of Educational and Counseling Psychology. (Same as PSY 620.)

EDP 616 MULTICULTURAL PSYCHOLOGY. (3)
This course is designed to increase one’s sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one’s skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as AAS 616.)

EDP 620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluation studies. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EPE 620/SOC 622.)

EDP 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE ANT 621 or equivalent; consent of instructor.

EDP 630 PRINCIPLES OF PSYCHOLOGICAL ASSESSMENT. (3)
An overview of the principles and methods of psychological assessment including observation methods, interviewing, behavioral analysis, and standardized psychological testing as a means of arriving at a comprehensive individual analysis and of creating a treatment plan for both children and adults. Students develop skills in selection and evaluation of psychological tests (personality, interests, and aptitudes), integration of multi-modal assessment methods, and report writing. Prereq: Acceptance to the graduate programs in Educational and Counseling Psychology with the following major codes: CPEC, ECPY, ECPC, CNPS, ECPP, ECPE, ESPY, ECP, ECPP, ESP or consent of the instructor via permit.

EDP 640 INDIVIDUAL ASSESSMENT OF COGNITIVE FUNCTIONING. (3)
This course provides theoretical material and advanced laboratory practice in the measurement of intelligence by individual techniques. Lecture, two hours; laboratory, two hours. May be repeated to a maximum of six credits. Prereq: PSY 535 (with a grade of “B” or better) or equivalent, enrollment in a professional program in Educational, School, and Counseling Psychology or consent of instructor.

EDP 642 INDIVIDUAL ASSESSMENT OF PERSONALITY FUNCTIONING. (3)
An in-depth study of the nature and measurement of human emotion, temperament and personality. Laboratory and field experience in the administration, scoring, and interpretation of tests related to personality functioning and underlying dynamics of personality. May be repeated to a maximum of six credits. Prereq: Successful completion of PSY 535 (or equivalent) with a grade of “B” or better and enrollment in a professional program in Educational, School, and Counseling Psychology.

EDP 649 GROUP COUNSELING. (3)
An overview of the theoretical bases and practical procedures used in the organization, and effective use of group counseling in the facilitation of psychological and educational goals. Prereq: EDP 605, EDP 652 and EDP 661 (all with grades of “B” or better), or consent of instructor.

EDP 650 DIAGNOSIS AND PSYCHOPATHOLOGY IN COUNSELING PSYCHOLOGY. (3)
An integrative seminar in diagnosis and application of theories, techniques and assessment tools that are used in counseling psychology. Special consideration of classification of psychological states and characteristics including DSM-IV temperament, analysis, and other research methods of integrating assessment and treatment alternatives. Prereq: PSY 535 or equivalent, EDP 652, and EDP 661 (all with a “B” or better) and admission to a program in Educational, School, and Counseling Psychology or consent of the instructor.

EDP 652 THEORIES OF COUNSELING. (3)
A survey of theories and methods in facilitating personality growth, character maturation, problem solving, decision making, crisis resolution, and behavior change, through individual and group counseling. Prereq: Acceptance to a graduate program in EDP with the following major codes: EGCO, CPEC, ECPY, ECPC, ESP, ECPP, ECPE, ESP, ECPP, ESP, or consent of instructor via permit.

EDP 656 RESEARCH METHODS. (3)
An introduction to research methods applicable to education, the scientific method, research designs, measurement techniques, statistical analysis, and writing the research report. Prereq: EDP/EPE 557, EDP/EPE 558, or equivalent, but preferred EDP/EPE 558.
EDP 657 MAJOR THEORIES IN LEARNING IN SECONDARY EDUCATION. (3)
This course will provide an overview of some of the major theories of human learning as they relate to formal education and schooling. We will attempt to examine such theories of human learning while paying close attention to the roles that philosophy, history, the humanities, the natural sciences, and psychology have played in their development. Also, throughout the course, we shall attempt to explore current topics in the formal educational experiences of elementary, secondary, and postsecondary students in order to link such theories to known educational practice. Finally, in the interest of advancing the current learning theories, we will offer critical evaluations of the presented learning theories and use these in the development of our own ideas, conceptualizations and theoretical developments regarding human learning. Prereq: Admission to the M.A. in Education (Secondary Education with initial certification option).

EDP 658 PROBLEMS IN EDUCATIONAL PSYCHOLOGY. (1-3)
Special topics in psychological theories and research applicable to educational practices. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)
This is a statistics-oriented course that focuses on various aspects of regression analysis (general and generalized linear models). Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with and without interaction/interaction terms, with and without nonlinear terms, contrast variable coding for categorical predictors, nested model comparison for hierarchical regression, etc.), regression diagnostics (outlying and influential cases identification and assessment, logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), among other things. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) from a set of candidate models, and interpreting regression analysis results using the right language. Students will gain requisite foundation knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals and the mass media. Students will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, Stata, or R). Prereq: EPE/EDP 555 or consent of instructor. (Same as EPE 660.)

EDP 661 TECHNIQUES OF COUNSELING II. (3)
Practice in interview, simulated problems, observational techniques, role of the counselor. Study of films, tapes and transcripts of leading practitioners of several schools of counseling. Supervised practice with selected clients. Lecture, two hours; laboratory, two hours. Prereq: EDP 652, PSY 535 (both with a grade of “B” or better), and consent of instructor.

EDP 662 DOCTORAL PRE-PRACTICUM SEMINAR. (1)
Preparation for UK Counseling Center Doctoral Level practicum will include starting to develop an integrative understanding of theory, assessment, ethics, and practice as it relates to effective work with university students. The course introduces the application of traditional individual and group psychotherapy and the provision of effective outreach and consultation on a university campus. Lecture, one hour, fifteen minutes. Prereq: Approval for doctoral-level practicum at UK Counseling & Testing Center.

EDP 664 PRE-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (3-6)
Supervised experience in application of diagnostic and interviewing techniques in a counseling service. May be repeated to a maximum of 12 credits. Lecture, three hours; laboratory, eight hours per three credit hours. Prereq: All required counseling coursework, EDP 605, PSY 535 or equivalent, EDP 652, EDP 688, and EDP 661 (minimum competency courses with grades of “B” or better), application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 665 POST-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (1-6)
Supervised experience in application of diagnostic and interviewing techniques in a counseling service. May be repeated to a maximum of 12 credits. Prereq: PSY 535 or equivalent, EDP 605, EDP 652, EDP 661, EDP 669, and EDP 688 or equivalent (all with grades of “B” or better). Application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 666 PSYCHOLOGY OF CAREER COUNSELING. (3)
A survey of theories and methods used in Career Counseling. Contemporary approaches to career counseling are studied with development and decision-making frameworks. Prereq: EDP 652 and PSY 535 or equivalent (both with a grade of “B” or better).

EDP 669 DIAGNOSTIC CLASSIFICATION IN SCHOOL PSYCHOLOGY. (3)
Review of theory and research related to individual differences in physical, intellectual, social, and emotional development of preschool and school-aged children and adolescents. Compares psychological and educational approaches to diagnostic classification of such differences. Prereq: PSY 533 or consent of instructor.

EDP 670 PSYCHOEDUCATIONAL STRATEGIES OF INTERVENTION. (3)
A general review of and development of basic competence in the major intervention strategies applicable to the amelioration of children’s common learning and adjustment difficulties in the school setting. Prereq: EDP 640, EDP 669 and Admission to School Psychology Program.

EDP 671 SEMINAR IN PSYCHOEDUCATIONAL CONSULTATION IN SCHOOLS. (3)
A study of the rationale and techniques used in consultation with teachers, parents, administrators, and other school personnel for the purpose of both preventing and alleviating the learning and adjustment difficulties of individual or groups of school-aged children. Prereq: Admission to School Psychology Program, advanced standing in a professional educational program or permission of the instructor.

EDP 674 SCHOOL-BASED PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)
Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a clinic, school, or community setting. Requires three hours of on-site activities per credit hour. Students will have a primary supervisor at their school site. Students will attend class meetings in a didactic format. Students will have a university supervisor who will serve as a secondary supervisor and communicate and coordinate on-going communication with the school-based supervisor. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 675 PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)
Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a clinic, school, or community setting. Requires three hours of on-site activities per credit hour and weekly supervision meetings. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 676 PRACTICUM IN GIFTED EDUCATION. (3)
This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales, scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction and the use of affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EPE/EDP 660, EPE 621, or equivalent. (Same as EPE 679.)

EDP 680 PARENT AND CHILD COUNSELING. (3)
Theories, methods, and techniques of counseling psychology as applied to planned interventions with parents and their children. Contemporary approaches to family and child dysfunctioning are studied within a framework of human development; applied practice utilizing simulated problems. Prereq: EDP 652 and EDP 661 (both with a grade of “B” or better) and consent of instructor.

EDP 683 TOPICS IN COUNSELING PSYCHOLOGY. (1-3)
Counseling for special problems with special methods. Topics may vary from semester to semester. Seminar, one-three hours per week. May be repeated to a maximum of 12 credits. Prereq or coreq: EDP 652 and consent of instructor.

EDP 685 ISSUES AND TECHNIQUES IN THE COUNSELING OF WOMEN. (3)
The course is designed to improve students’ knowledge of the special counseling needs of women and to facilitate students’ development of highly skilled techniques for counseling with women. Included in knowledge acquisition are such topics as rape, spouse abuse, mastectomy, career, assertiveness, single parenting, and sex discrimination. Prereq: EDP 652 and EDP 661 (both with a grade of “B” or better) or corequisite EDP 604 or consent of instructor.

EDP 686 THEORY AND METHODS IN MARRIAGE AND FAMILY THERAPY. (3)
A survey of theories and methods used in marriage and family therapy. Designed to provide students with a knowledge of the theoretical bases for marriage and family therapy, including an introduction to procedures used to assess, diagnose and treat marriage and family dysfunctions. Prereq: Consent of instructor and EDP 661 (with a grade of “B” or better).

EDP 688 ETHICAL AND LEGAL ISSUES IN PSYCHOLOGY. (3)
This course is designed to educate students about ethical and legal issues related to the practice of psychology. An emphasis is placed on learning the current APA ethical code of conduct, mental health laws, and ethical decision-making models. Prereq: EDP 605 and 661, or consent of the instructor.

EDP 701 COGNITIVE-BEHAVIORAL COUNSELING. (3)
An advanced seminar covering theories, issues, methods and techniques used in supervision of counseling and psychotherapy and in consultation with groups and organizations. Seminar topics will vary depending on the interests of the professor and students. May be repeated to a maximum of six credits. Prereq: EDP 652, EDP 661, and EDP 665 or equivalent.

EDP 704 SOCIAL JUSTICE CONSULTATION AND EVALUATION. (3)
This course focuses on theoretically grounded social justice consultation and evaluation in
counseling psychology. The purpose of this course is to help students develop beginning competencies in social justice consultation, advocacy, and program evaluation as counseling psychologists. Doctoral students in counseling psychology will practice beginning skills in interprofessional collaboration and community partnerships. Prereq: Students cannot enroll until they have completed the first year of the counseling psychology doctoral program.

EDP 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3) Multivariate analysis will prepare students to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EPE 707.)

EDP 708 INTERNSHIP IN EDUCATIONAL, SCHOOL, AND COUNSELING PSYCHOLOGY. (0-9) Full-time practice in an operational setting such as a school or government agency, with on-site supervision provided by the host agency and with academic supervision provided by a University faculty member. Practicum: full-time field experience. May be repeated to a maximum of 12 credits. Prereq: Completion of a minimum of one year of graduate study in the department and consent of instructor.

*EDP 711 ADVANCED QUANTITATIVE METHODS. (3) This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologies used in methodologically-oriented studies in educational evaluation, education, and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: EDP 767 or consent of instructor. (Same as EPE 711.)

#EDP 712 ADVANCED PSYCHOMETRIC METHODS. (3) This course will provide students with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies in educational measurement and evaluation techniques. The goal of this course is to prepare students to analyze data using advanced psychometric methods. It covers topics in the areas of Rasch Modeling, Item Response Theory, Structural Equation Modeling, Advanced Survey Techniques, and Latent Variable Modeling (as well as additional techniques). Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: Intermediate Statistics. (Same as EPE 712.)

EDP 748 MASTER'S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDP 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769; research credit following the successful completion of the qualifying exams.

EDP 750 INDEPENDENT STUDY IN COUNSELING PSYCHOLOGY. (1-4) Independent study course for advanced graduate students who desire to investigate special problems in counseling psychology. May be repeated to a maximum of six credits. Prereq: One year of graduate work in counseling psychology and consent of instructor.

EDP 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDP 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

EDP 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12) May be repeated indefinitely.

EDP 770 LEGAL ETHICAL PSYCHOLOGY. (3) The goal of this course is to provide students with knowledge of ethics and law that pertain to the theory, research, and practice of school psychology. This course will provide experiential and problem-based learning in the areas of professional standards and ethics for the field of school psychology. Professional standards and ethics will be drawn from the codes of the American Psychological Association, the National Association of School Psychologists, and the Association of State and Provincial Psychology Boards. Students will translate ethical principles and standards into guidelines for decision making and practice. Prereq: Admission to School Psychology graduate program or permission of instructor.

EDP 776 SEMINAR IN SCHOOL PSYCHOLOGY. (Subtitle required) (3) Topical consideration of philosophical, technical, professional and theoretical positions in school psychology theory and practice. May be repeated to a maximum of nine credits under different subtitles. Prereq: Graduation standing in School Psychology or consent of instructor.

EDP 777 SEMINAR IN COUNSELING PSYCHOLOGY. (1-3) Topical consideration of philosophical, technical and theoretical positions in counseling theory and practice. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP 778 SEMINAR IN EDUCATIONAL PSYCHOLOGY. (Subtitle required) (3) Intensive study of selected topics in human learning and development. Particular emphasis on research topics. Students will design sample studies in their areas of interest. May be repeated to a maximum of nine credits under different subtitles. Prereq: Doctoral standing in the College of Education or consent of instructor.

EDP 782 INDEPENDENT STUDY IN EDUCATIONAL PSYCHOLOGY. (1-3) Independent study course for advanced graduate students who desire to investigate special problems and conduct research in educational psychology. May be repeated to a maximum of 12 credits. Prereq: One year of graduate work in educational psychology and consent of instructor.

EDS Special Education

EDS 357 INITIAL PRACTICUM IN SPECIAL EDUCATION. (1) An introductory supervised field experience for special education majors. Students will participate in two special education programs as teacher aides. Placements will include public schools and other agencies serving children with disabilities. May be repeated to a maximum of three credits. Lecture, one hour; field experience, three hours per week. Prereq or concurrent: EDS 357 (may be a co-requisite); restricted to declared majors in Learning and Behavioral Disorders (SELB) and Moderate and Severe Disabilities (SEMS).

EDS 375 INTRODUCTION TO EDUCATION OF EXCEPTIONAL CHILDREN. (3) An introduction to the various contemporary areas of special education. Topics include special education diagnostic categories, programming, service delivery models, career education, child advocacy and litigation affecting public education for students with disabilities.

EDS 395 INDEPENDENT STUDY IN SPECIAL EDUCATION. (1-6) An independent study course for undergraduate students with an interest in a specific problem in special education. Offered by appointment.

EDS 447 STRATEGIES FOR INCLUDING STUDENTS WITH DISABILITIES IN THE ELEMENTARY CLASSROOM. (2) Supervised student teaching experience utilizing the special techniques used in working with individuals with exceptional educational problems such as speech handicaps, physical handicaps, visual impairments, hearing disabilities, neurological impairments (learning disabilities), mental retardation, and the gifted. To be offered only on a pass-fail basis. Prereq: Must complete the published College requirements for admission to student teaching; admission to the Teacher Education Program; permission of instructor.

EDS 513 LEGAL ISSUES IN SPECIAL EDUCATION. (3) A review of pertinent legislation concerning human and constitutional rights related to persons with disabilities. Teachers' specific responsibilities and liabilities are described and related to current requirements for development of appropriate educational programs. Emphasis is given to how, through active parent participation, teachers can facilitate each student's developmental progress. Prereq: EDS 375 or consent of instructor.

EDS 514 INSTRUCTIONAL TECHNOLOGY IN SPECIAL EDUCATION. (3) An overview of ways technology can be used to facilitate the education of students with disabilities. Topics include personal computer operation, personal productivity tools, instructional software evaluation and integration into the curriculum, multimedia applications, telecommunications, and emerging technologies. Lecture, three hours; laboratory, two hours per week. Prereq: EDS 375 or EDP 203.

EDS 516 PRINCIPLES OF BEHAVIOR MANAGEMENT AND INSTRUCTION. (3) Basic principles of applied behavior analysis and modification which employ social learning theory and operant conditioning models are taught. Emphasis is placed on designing individualized behavior management systems and the application of behavior management strategies, writing behavior objectives, and performing task analyses. Prereq: EDS 375 or permission of the instructor.

* "EDP" = new course  * = course changed  † = course dropped  ‡ = course purged
Course Descriptions

**EDS 517 ASSISTIVE TECHNOLOGY IN SPECIAL EDUCATION.** (3)
A general introduction to the theory, need, and use of assistive devices in the classroom. Review of physical disabilities and basic operation, maintenance, and trouble shooting techniques will be presented. Service personnel typically associated with training in the use of assistive devices will be discussed. Students will be required to simulate a disability and use an assistive device. Prereq: EDS 375 or permission of instructor.

**EDS 522 CHILDREN AND FAMILIES.** (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EC 522.)

**EDS 526 EDUCATIONAL ASSESSMENT FOR STUDENTS WITH MILD DISABILITIES.** (3)
Procedures for administering formal and informal tests to determine specific educationally relevant strengths and deficits of children with learning and behavior disorders. The characteristics of children with learning and behavior disorders are surveyed, as they relate to special education programming. Lecture, three hours; field experience, two hours. Prereq: EDS 375, EDS 516 and admission to the Teacher Education Program; or consent of instructor.

**EDS 529 EDUCATIONAL PROGRAMMING FOR STUDENTS WITH MILD DISABILITIES.** (3)
Design, implementation, and evaluation of individualized programs based on the educationally relevant characteristics of children with mild disabilities. Includes educational assessment and programming in reading, math, and language. Prereq: Admission to the Teacher Education Program, EDC 329, EDS 513, and 516, or consent of instructor; or prereq or concurrent: EDS 528. This course is a graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**EDS 530 MODERATE AND SEVERE DISABILITIES.** (3)
Special education issues with individuals exhibiting moderate to severe intellectual and developmental disabilities. A critical examination of contemporary research with regard to the educational, behavioral, developmental issues of individuals exhibiting moderate to severe intellectual and developmental disabilities. Issues and research describing the full educational inclusion of persons with moderate to severe intellectual and developmental disabilities will be addressed. Lecture, three hours; field experience, three hours. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**EDS 546 TRANSDISCIPLINARY SERVICES FOR STUDENTS WITH MULTIPLE DISABILITIES.** (3)
This course will focus on the philosophical issues related to teaching students with deaf-blindness and other multiple disabilities. Professionals will discuss pertinent information related to providing specialized instruction to students exhibiting multiple disabilities. Specific emphasis will be placed on the development of instruction, physical management, health, sensory input, and vitality. Students will utilize information obtained to plan for a student with deaf-blindness or other multiple disabilities. Strategies presented for planning will include transdisciplinary assessment, person-centered planning, and activity-based instruction. Prereq: EDS 375 or EDS 600.

**EDS 547 COLLABORATION AND INCLUSION IN SCHOOL AND COMMUNITY SETTINGS.** (3)
This course will provide knowledge of students with moderate to severe disabilities in all aspects of school and community life, with special consideration given to the individual student planning variables that must be addressed in meeting the needs of each school-age student and for preparing students to function as fully and independently in their communities as possible. The course is designed to meet the needs of those pursuing certification in Moderate and Severe Disabilities and pursuing degrees in Elementary and Secondary Education, Vocational Rehabilitation, School Psychology, Social Work, Physical Therapy, Communication Disorders, and related disciplines. Prereq: Consent of instructor. (Same as RC 547.)

**EDS 548 CURRICULUM DESIGN FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES.** (3)
Educational and adaptive behavior assessment and curriculum prescription for individuals exhibiting moderate intellectual and development disabilities. The course participant will acquire skills in the use of current formal and informal educational and adaptive behavior assessment procedures for use in prescribing curriculum, instructional, behavioral intervention with individuals exhibiting moderate intellectual and developmental disabilities. Specific attention will be focused on procedures for using assessment data and curriculum prescription that enhances the full inclusion of school-age individuals with disabilities with their non-disabled peers. Lecture, three hours; field experience, four to six hours per week. Prereq: EDS 516, 530, or consent of instructor.

**EDS 549 METHODS FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES.** (4)
The course participant will serve as a teacher aide in a classroom or other service delivery setting under the supervision of a person certified to teach students with moderate to severe disabilities. Course requirements include application of direct observation, formal and informal assessment of pupil performance, and instruction and behavioral intervention in both individualized and small group settings. Practicum settings used by course participants will model best practices with regard to instruction, behavior management, and the full inclusion of persons with moderate to severe disabilities with their non-disabled peers. Lecture, two hours; field experience, six to eight hours per week. Prereq: Admission to the Teacher Education Program, EDS 516, 548, or consent of instructor.

**EDS 550 STUDENT TEACHING: MODERATE/SEVERE DISABILITIES.** (6-12)
Student teaching in the low-incidence disabilities classroom. Supervised student teaching in a classroom for students identified as having moderate to severe disabilities. To be offered on a letter grade basis only. Prereq: Must complete the published College requirement for admission to student teaching, including admission to the Teacher Education program; or consent of instructor.

**EDS 558 ISSUES IN SPECIAL EDUCATION.** (1-9)
In-depth study of a current and topical problem or issue in the education of exceptional children and youth. May be repeated to a maximum of nine credits. A title is assigned each time the course is offered.

**EDS 570 EMOTIONAL AND BEHAVIORAL DISABILITIES.** (3)
The emotional and behavioral problems of exceptional children and youth are considered in the context of normal child development. A survey of the major categories of emotional and behavioral disabilities includes identification, description, and etiology, with material drawn from clinical, theoretical, and research sources. Approaches to remediation cover both community resources and the roles of various professional personnel. Prereq: EDS 375 or equivalent.

**EDS 580 INTRODUCTION TO VISUAL IMPAIRMENTS.** (3)
This course will provide an introduction to the educational programs and services for students with blindness and visual impairments. Content of this course will focus on the historical foundation of the field, the developmental and psychosocial aspects of individuals with visual impairments, an overview of legislation, influential agencies, and service delivery methods. The impact of vision loss on early childhood development will also be covered. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission required.

**EDS 581 METHODS FOR TEACHING STUDENTS WITH VISUAL IMPAIRMENTS.** (3)
This course is designed to examine how to teach and modify the core curriculum for students who are blind or visually impaired. Topics will include: adaptation of general education classroom materials, IEP development and implementation, lesson planning, and braille literacy. Prospective teachers will develop organization skills and strategies necessary to deliver services as a teacher of the visually impaired. This course requires one weekend at the Kentucky School for the Blind in Louisville as well as attendance at the Kentucky AER Conference. Prereq: Admission to the Teacher Preparation Program in Visual Impairments and successful completion of EDS 580 or instructor permission.

**EDS 582 ANATOMY AND PHYSIOLOGY OF THE EYE.** (3)
This course will cover the anatomy and physiology of the eye, including visual development. Causes of ocular and neurological visual impairment will be addressed, treatments, and their impact on learning. Course topics will include optics, low vision devices and services, ophthalmic options will be explored. Instruction strategies for teaching technology skills will be presented for planning will include transdisciplinary assessment, person-centered planning, and activity-based instruction. Students will have the opportunity to directly observe a low vision evaluation and will learn the components of a functional vision assessment. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission required.

**EDS 583 BRAILLE CODES I.** (3)
This course is designed to teach the literary braille code. Students will become proficient in transcription of printed and contracted braille utilizing the Braille, slate and stylus, and six-key entry computer software with proper formatting. Students will also learn appropriate techniques for reading braille both tactually and visually. In addition, the history of the braille code will be covered as well as current resources. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

**EDS 584 BRAILLE CODES II.** (3)
This course studies braille codes with a special emphasis on the Nemeth Code (Braille Mathematics). Other codes covered are music, foreign language (French, German, and Spanish), and computer braille. Braille formats will also be taught, including how to correctly transcribe and format materials for braille users, including preparing worksheets and tests for students. Competency in using the Crammer Abacus will also be mastered. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

**EDS 585 ASSISTIVE TECHNOLOGY FOR STUDENTS WITH VISUAL IMPAIRMENTS.** (3)
This course introduces a wide variety of technologies for people who are blind or visually impaired. Students will learn about Universal Design for Learning (UDL) as it relates to technology, as well as proprietary software and hardware. Technologies covered include, but are not limited to: Screenreaders, screen magnification, electronic notetakers, refreshable braille displays, translation programs, magnification hardware, scanning and OCR programs, and accessible digital book options. A wide variety of computers, tablets, and smart phone options will be explored. Instructional strategies for teaching technology skills will be emphasized. In-state students are required to attend class at the Kentucky School for the Blind in Louisville and will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the Out-of-Campus section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.
#EDS 586 EXPANDED CORE CURRICULUM FOR BLIND AND VISUALLY IMPAIRED.
(3)
The Expanded Core Curriculum (ECC) is the body of knowledge and skills that are needed by students with visual impairments due to their unique needs. This course will explore nine areas of the ECC including: compensatory or functional academic skills, orientation and mobility, social interaction skills, independent living skills, recreation and leisure skills, career education, use of assistive technology, sensory efficiency skills and self-determination. Participants will have the opportunity to observe and work with students in a summer program and teach skills from the ECC. In-state students are required to attend class at the Kentucky School for the Blind in Louisville as well as complete practicum hours at various locations throughout the state. In-state students will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the distance learning section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#EDS 587 VISUAL IMPAIRMENTS AND MULTIPLE DISABILITIES.
(3)
This course is designed to provide students with knowledge and skills necessary to design and implement programs for persons who have visual impairments and additional disabilities. Topics include assistive technology, augmentative and alternative communication, literacy instruction, sensory processing, adaptive behavior, and self-help skills. An emphasis will be placed on adaptations that enhance functioning for persons with developmental delays, autism, medical conditions, deaf-blindness, communication disorders, and those with common syndromes and eye disorders related to multiple disabilities. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#EDS 588 ASSESSMENT OF STUDENTS WITH VISUAL IMPAIRMENTS.
(3)
This course covers various types of assessments used to evaluate students who are blind or visually impaired. Participants will discuss testing and assessment including the development of standards, and the applicability for individuals with visual impairments, as well as alternate assessments. Students will practice assessing and planning educational programs for students with visual impairments by completing a Functional Vision/Learning Media Assessment, as well as assessments in assistive technology and the Expanded Core Curriculum. This course is designed to be taken in conjunction with student teaching/internship in visual impairments. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 589 FIELD EXPERIENCES: MILD DISABILITIES.
(3-12)
Supervised pre-student teaching experiences with children having learning and behavioral disabilities, including practica experience with public school students in at least two different special education sites. Approximately two hours lecture-discussion and two three-hour observations and/or practica per week. Prereq: EDS 513, 516, admission to the Teacher Education Program; or consent of instructor. Prereq. or conc: EDS 528. Must take EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).

#EDS 590 STUDENT TEACHING/FIELD EXPERIENCE IN VISUAL IMPAIRMENTS.
(3)
This is a supervised student teaching/field experience working with children, preschool through high school age, who are blind or visually impaired. Candidates will apply best practices for working with children who are blind or have low vision, including those with additional disabilities. Successful completion of this course will demonstrate the candidate’s ability to apply methods of teaching that include assessment, program planning and implementation, appropriate environmental and academic modifications, and instruction in the Expanded Core Curriculum. Candidates must also demonstrate appropriate class organization and classroom management strategies based on their placement. Prereq: Successful completion of EDS 580, 581, 582, 583, 584, 585, 586, and 587 or instructor permission.

EDS 600 SURVEY OF SPECIAL EDUCATION.
(3)
A survey of current status of the field of special education. Emphasis is on analysis of the major research literature pertaining to exceptional children and their education. Prereq: Graduate standing.

EDS 601 APPLIED BEHAVIORAL ANALYSIS.
(3)
The focus of this course is on the technology of applied behavioral analysis, including the functional analysis of children’s behavior and the development, implementation, evaluation of behavioral management programs with children and youth. Prereq: Completion of EDS 516 or equivalent, with a grade of “B” or better.

EDS 602 ADMINISTRATION AND PROGRAMS IN SPECIAL EDUCATION.
(3)
The organization, management and supervision of programs for exceptional children at the local, state and national levels. Roles and functions of the special education administrator are considered. Examples drawn from special residential, private and public day schools are studied. Prereq: Certification in special education; six hours of course work in educational administration and supervision.

EDS 603 BEHAVIORAL CONSULTATION IN THE SCHOOLS.
(3)
Principles and techniques of behavioral consultation with classroom teachers and other school personnel, with particular emphasis on supporting children in mainstream educational programs. The consultant’s role in providing indirect service to children, through inservice teacher training and consultation, is emphasized. Lecture, two hours; laboratory, two hours.

Prewrite: EDS 601, or equivalent; EDP 671 (may be taken concurrently); or permission of instructor.

EDS 604 SPECIAL EDUCATION FOR SECONDARY EDUCATION.
(1)
This course is designed for secondary teachers who encounter students who require special education services. As such, it is intended to provide an in-depth examination of issues in the education of individuals with disabilities. The course is organized in a seminar format with the intent of creating a dialogue among the participants and the instructors. Emphasis will be placed on the development of concepts and the acquisition of a body of knowledge, which relate to issues, processes and procedures to facilitate the inclusion of all student and collaboration across disciplines. The course takes a broad view of inclusion in all aspects of school and community life. Special consideration is given to the individual student planning variables that must be addressed in meeting the needs of each school-age student with a disability in a variety of integrated school and community settings. Prereq: Admission to the M.A. in Education – Secondary with Initial Certification.

#EDS 605 PRACTICAL APPLICATIONS OF APPLIED BEHAVIORAL ANALYSIS.
(3)
In this course students will expand their understanding of Applied Behavior Analysis (ABA) by learning how to design and evaluate behavior-based programs that address academic (e.g., learning to learn), adaptive (e.g., self-care), communication (e.g., naturalistic strategies; verbal behavior), social (e.g., initiations), and other related skills (e.g., imitation; self-management) in persons with or at-risk for disabilities and provide training and feedback when working with families and professionals. In addition, students will receive training in writing and modifying behavioral intervention plans, with particular focus on conducting functional analyses. Prereq: EDS 601 (or equivalent); EDS 630 recommended.

EDS 610 ADVANCED EDUCATIONAL ASSESSMENT FOR STUDENTS WITH MILD DISABILITIES.
(3)
This course examines factors that contribute to the reliable and valid measurement and diagnosis of students with mild disabilities. Emphasis is placed on evaluating standardized, norm-referenced instruments according to their technical characteristics and merits, developing curriculum-based measures for each course, and critiquing grading systems of determining eligibility for special education. Prereq: EDS 528 or consent of instructor.

EDS 611 CONTEMPORARY TRENDS AND ISSUES IN THE EDUCATION OF STUDENTS WITH MILD DISABILITIES.
(3)
This course examines trends and issues in the education of students with mild disabilities (e.g., learning disabilities, mild cognitive disability, ADHD, and emotional/behavioral disabilities). The professional literature is examined to identify emerging methods of effective instruction as well as points of controversy in identification, placement, and service. Prereq: EDS 529 and EDS 610 or consent of instructor.

EDS 612 ADVANCED PRACTICUM: SPECIAL EDUCATION.
(1-6)
Intensive clinical experience with exceptional children in day and residential schools, hospitals and private agencies. Students engage in prescriptive teaching with persons with disabilities in individualized, small group and special class settings. Laboratory, 6-12 hours per week. Prereq: Graduate standing; major in special education.

EDS 613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION.
(3)
This course is designed as a required course for certification in the school administration program or elective in graduate or post baccalaureate degree. Essential course questions will consider the delivery of a free appropriate public education for children with disabilities within a practical application format that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as well as the legal and programmatic implications for children with disabilities and their families. Finally, the course will model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administrator preparation program, or received permission of instructor. (Same as RC 613.)

EDS 614 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS.
(1)
This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Req to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 615 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS II.
(1)
This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Req to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.
EDS 616 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS III. (1)
This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 620 ADVANCED METHODS FOR TEACHING STUDENTS WITH DISABILITIES. (3)
An intensive study of the principles and procedures used in programming learning activities for students with disabilities, including those with autism spectrum disorders. Topical areas include the acquisition of stimulus control and programming for the generalization and maintenance skills. Lecture, three hours. Prereq: EDS 601 and consent of instructor.

EDS 631 ADVANCED PROGRAMMING FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)
This course will review current literature on how to deliver distance education content with attention to developing materials, setting delivery timelines, facilitating interactions, and using appropriate teaching strategies. Prereq: Master’s degree. (Same as CJT 650.)

EDS 632 ADVANCED PRACTICUM: MODERATE AND SEVERE DISABILITIES. (1-12)
Intensive educational experience with students with moderate and severe disabilities in educational settings and/or environments. Site and practicum responsibilities will be based on students’ competencies and area of interest. May be repeated to a maximum of 21 credits. While enrolled in this course, students will be required to apply for the Teacher Education Program. Prereq: Admission to the Master’s program in Special Education or permission of the instructor.

EDS 633 SINGLE SUBJECT RESEARCH DESIGN. (3)
Principles and methods in designing single subject research, including those involving students with disabilities. Students will be required to design a research proposal. Prereq: EDS 601 or 630 or consent of instructor.

EDS 634 LEADERSHIP IN SPECIAL EDUCATION. (3)
Students will select from a variety of options that demonstrate leadership in the field of education. Between the course instructor and each student’s master’s committee, students will complete a variety of activities and experiences that will assist them in completing the capstone requirement. Prereq: EDS 601, 630, 633.

EDS 640 ADVANCED ASSISTIVE TECHNOLOGY. (3)
An advanced study of assistive technology devices and services for individuals with learning, cognitive, physical, and sensory disabilities. The course includes lecture, hands-on experiences, and discussions of current trends and issues in assistive technology consideration and implementation for teachers, families, and administrators. Prereq: EDS 600 or equivalent or permission of instructor.

EDS 641 ASSISTIVE TECHNOLOGY ASSESSMENT. (3)
A study in the evaluation of students with learning, cognitive, physical, and sensory disabilities for assistive technology devices and services. Students implement data-based assistive technology decisions for students with disabilities, locate assistive technologies through a variety of sources, and develop assistive technology implementation plans for individuals with disabilities. Prereq: EDS 640, or permission of instructor.

EDS 645 HYPERMEDIA DEVELOPMENT FOR SPECIAL EDUCATION. (3)
Students will study ways that hypermedia/multimedia can be developed for use in special education programs. Students will examine how theories of human learning and principles of universal design provide a foundation for designing instructional programs that meet the unique needs of all students. Topics will include theories of human learning, principles of universal design, hypermedia/multimedia concepts, interface design guidelines, computer graphics programs, digital imaging of images, accessible text, sound effects, use of digital movies, and multimedia authoring tools. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 647 SEMINAR IN SPECIAL EDUCATION TECHNOLOGY (Variable topic). (1-3)
A topical seminar on technology applications in special education. Seminars will address different topics of timely interest, current issues, and various approaches to providing assistive technology and instructional technology services for people with disabilities. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 648 COORDINATING ASSISTIVE TECHNOLOGY PROGRAMS. (3)
Students will study procedures for planning and implementing assistive technology programs in schools. Topics will include use of planning models, philosophy and mission development, generating program goals and objectives, procedures for preparing strategic plans, establishing policies and procedures, identifying resource requirements, managing program implementation, evaluation of program effectiveness, and preparation of proposals for funding. Prereq: EDS 640 and EDS 641 or permission of instructor.

EDS 649 ADVANCED PRACTICUM: SPECIAL EDUCATION TECHNOLOGY. (1-9)
This course is designed to superintend supervision of on-campus activities associated with the delivery of technology services to individuals with disabilities. Practicum settings may include schools, rehabilitation agencies, clinics, hospitals, technology resource centers, administrative offices, and other facilities involved in the development or delivery of technology services. May be repeated to a maximum of nine credits. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 651 DISTANCE EDUCATION: DELIVERY. (3)
This course has been designed for those faculty or future faculty who plan to teach via distance education technology. This course is designed to address the delivery of distance education content with attention to developing materials, setting delivery timelines, facilitating interactions, and using appropriate teaching strategies. Prereq: Master’s degree. (Same as CJT 650.)

EDS 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)
This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master’s degree. (Same as CJT 652.)

EDS 660 OVERVIEW OF CHARACTERISTICS AND INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH ASD. (3)
This course introduces students to the characteristics, classification systems, etiology and environmental considerations, diagnostic issues, assessment approaches, and research-based interventions related to individuals with autism spectrum disorders. Practical classroom strategies, such as visual strategies and environmental arrangements will also be reviewed. The primary goal of the course is to provide students with a foundational knowledge of the strengths and needs characteristic of individuals with ASD, as well as to provide students with a comprehensive array of research-based instructional approaches for individuals with ASD, and to provide the criteria for determining which approach to use. Prereq: EDS 601.

EDS 661 ADVANCED INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH ASD. (3)
This course builds on topics previously learned in EDS 660. Teachers will learn to critically analyze current trends, issues, and therapies used with individuals with ASDs. Practical classroom strategies detailing what to teach based on assessment results, how to use data-based decision-making to guide instruction, and an overview of alignment to state standards based on alternate assessments will also be reviewed. The primary goal of the course is to provide teachers with a comprehensive array of research-based instructional approaches for individuals with ASDs, criteria for determining which approaches to use, and planning for access to the general education curriculum for all students across the spectrum. Completion of this course sequence (in combination with EDS 660, EDS 662, and EDP 671) will prepare teachers for applications in the ASD Institute (EDS 663). Prereq: EDS 601 and EDS 660.

EDS 662 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS. (3)
This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as CSD 649.)

EDS 663 SERVING INDIVIDUALS WITH ASD INSTITUT. (3)
Students will connect content knowledge with skills from courses taken in the Autism Certificate courses (EDS 660, EDS 661, EDS 662, and EDP 671). Students will demonstrate skills in areas such as implementing research-based strategies and/or behavior supports, collaborating for planning and delivery of instruction, working with diverse families and service providers, and evaluating appropriate technologies based on student needs. Students will demonstrate proficiency via role-play, case studies, video examples, and/or direct observation of individuals with ASD. Students will have an opportunity to learn from one another and experts in the field in a face-to-face format. Prereq: EDS 601 and EDS 660, EDS 661, EDS 662, EDP 671.

EDS 701 SEMINAR FOR EDSCF LEADERSHIP PERSONNEL. (1)
Study of issues and topics affecting the preparation of Rehabilitation Counseling, Special Education, and Early Childhood personnel and of research issues involving persons with disabilities and educational and rehabilitation programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 701.)
EDS 710 SEMINAR IN MILD DISABILITIES. (3)
Advanced study of issues related to mild disabilities in children, including etiology, assessment, intervention, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 711 SEMINAR IN MODERATE AND SEVERE DISABILITIES. (3)
Advanced study of issues related to moderate and severe disabilities, including problems of identification and assessment, program alternatives, curriculum, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 712 SEMINAR IN EDSRC PROFESSIONAL SERVICES. (3)
Education and Rehabilitation professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 712.)

EDS 713 DESIGNING CLASSROOM-BASED INTERVENTION RESEARCH IN SPECIAL EDUCATION. (3)
The purpose of this course is to acquaint students with methods for designing and conducting experimental and quasi-experimental intervention studies in school-based settings. Students will have the opportunity to conceptualize a study based on their interests and propose procedures for implementing it. Although knowledge of basic statistics would increase understanding, the substance of the course focuses primarily on designing studies that test for the presence of a distinct cause-and-effect relationship between variables.

EDS 720 SEMINAR IN EDSRC TEACHER PREPARATION. (3)
Rehabilitation Counseling and Special Education college/university professor preparation, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 720.)

EDS 721 PRACTICUM IN EDSRC PERSONNEL PREPARATION. (1-9)
Professional preparation of Rehabilitation Counselors or Special Education Teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising rehabilitation counselors or special education student teachers, and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 721.)

EDS 730 SEMINAR IN SPECIAL EDUCATION ADMINISTRATION. (3)
Administration of special education programs at the local and state levels. Emphasis is on program planning, staffing, fiscal management and program evaluation. Prereq: EDS 602 and admission to the Ed.S. or Ed.D. program in special education or consent of instructor.

EDS 731 ADVANCED PRACTICUM: SPECIAL EDUCATION ADMINISTRATION. (1-9)
Supervised practicum experiences related to the administration of special education programs at the local and state levels, and project management, including staff management and development, program planning, evaluation, fiscal management, organization, reporting, communications, and coordination. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to the Ed.S. or Ed.D. program in special education administration or in certification program for special education administrators.

EDS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769/689 credit following the successful completion of the qualifying exams.

EDS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 767.)

EDS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EDS 769 RESIDENCE FOR THE DOCTORAL DEGREE. (0-12)
May be repeated indefinitely.

EDS 779 SEMINAR IN SPECIAL EDUCATION (Variable topic). (1-3)
Study of philosophy, principles, trends and research in education of exceptional children. Students will carry on an extensive study of a problem dealing with education of the exceptional child. May be repeated to a maximum of nine credits.

EDS 789 INDEPENDENT STUDY IN EARLY CHILDHOOD/SPECIAL EDUCATION/REHABILITATION COUNSELING RESEARCH. (1-6)
An independent study supervised research course for advanced graduate students in Rehabilitation Counseling, Special Education, or Early Childhood with a focus in a specific research problem. Class hours determined with supervising instructor. Note: For Rehabilitation Counseling doctoral students this course will satisfy CACREP internship requirements in the Research core area. Additional internship in 3 additional core areas are also required. Prereq: Admission to EDSRC Doctoral Program or approval of instructor. (Same as RC 789.)

EDU Education

EDU 300 SPECIAL COURSE. (1-9)
This course is an opportunity for experimental, topical, or interdisciplinary experience for up to 9 hours of credit without creating a permanent course. The description and course subtitle will be submitted each time the course is offered. Subtitle required.

EDU 305 CONTEMPORARY ISSUES FACING THE AT-RISK SCHOOL-AGE/adolescent child. (3)
To provide background information, experience, and skills for undergraduate students to interact with elementary and middle school children in a consulting role. Special emphasis will address the needs of the “at-risk” student population. The “at-risk” student is associated with families with incomes below the poverty level, as well as other significant problems which plague contemporary society—e.g., homelessness, child abuse/neglect, single parent homes, non-English speaking parents, fetal alcohol or substance abuse syndrome, mentally or physically handicapped parents or siblings, and high incidence of academic achievement declines and dropout rates. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

EDU 645 FOUNDATIONS OF PEDAGOGICAL THEORY AND PRACTICE IN THE SECONDARY SCHOOL. (0-9)
Students will participate with other secondary education majors in a variety of disciplines in the reflective study of adolescent behavior, secondary school curriculum, school law, learning theory, learning styles, effective teaching and learning, instructional technology, working with special populations, cultural diversity in the schools, school context, and professional development. Students will spend time in the schools applying concepts. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDU 745 INTERDISCIPLINARY INSTRUCTION IN THE SECONDARY SCHOOL. (0-3)
Students will participate with other secondary education majors from a variety of disciplines in the reflective study of the context of schooling, classroom management, individual student differences, and professional development. Students will be in the schools applying concepts on a full-time basis. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDV Vocational Education

AGRICULTURAL EDUCATION
EDV 580 MATERIALS AND METHODS FOR TEACHING VOCATIONAL AGRICULTURE. (3)
Designed to develop teacher competency in methods of teaching with emphasis on the problem-solving procedure and use of demonstrations, field trips, and audiovisual materials. Evaluation of teaching-learning is emphasized. A study of facilities and instructional materials needed by a department of vocational agriculture is made. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

BUSINESS EDUCATION
EDV 626 CLASSIFICATION AND POSSIBLE USE OF COMMUNITY RESOURCES IN BUSINESS EDUCATION. (3)
Course provides for community analysis, and the development of possible ways and means to supplement the business education course in the secondary school with a study of vital community resources.

DISTRIBUTIVE EDUCATION
EDV 517 DETERMINING TEACHING CONTENT IN MARKETING AND DISTRIBUTIVE EDUCATION. (1)

EDV 528 TECHNIQUES OF TEACHING MARKETING AND DISTRIBUTIVE EDUCATION. (2)
Course Descriptions

**EE 101 CREATIVITY AND DESIGN IN ELECTRICAL AND COMPUTER ENGINEERING.**
This course provides an introduction to the process and application of creative design and problem solving within science and engineering. Emphasis is placed on applications and case studies in the areas of electrical and computer engineering. Several laboratory-based engineering problems are used to provide practical settings in which to apply and evaluate constraint- and product-focused strategies for creative design and problem solving. In addition to technical and aesthetic considerations, ethical and cultural influences on the creative process will also be discussed.

**EE 167 FUNDAMENTALS OF NANOTECHNOLOGY AND APPLICATIONS IN RENEWABLE ENERGY.**
In 6 lecture modules and 4 observational visits to laboratories on UK campus, this course covers: effects of small size (1 nm to 100 nm) on the electro-optical properties of materials; fundamental principles of quantum mechanics; applying quantum mechanics to understand the changes in material properties like color, luminescence and electrical conductance at nanoscale; operating principles, basic theory and design issues in solar cells; nanotechnology applications for enhancing the performance of renewable energy generation and storage systems, especially solar cells and batteries. Prereq: Proficiency in mathematics, physics and chemistry at the high school graduate level.

**EE 211 CIRCUITS I.**
Fundamental laws, principles and analysis techniques for DC and AC linear circuits whose elements consist of passive and active components used in modern engineering practice including the determination of steady state and transient responses. Prereq: MA 114; precon or concur: PHY 232, 242.

**EE 221 CIRCUITS II.**
Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project involving modern design practices. Prereq: EE 211. Concur: MA 214.

**EE 222 ELECTRICAL ENGINEERING LABORATORY.**
Laboratory exercises in the use of measuring instruments. Experiments in R-L-C circuit analysis. Lecture, one hour; laboratory, three hours. Prereq or concur: EE 221.

**EE 223 AC CIRCUITS.**
Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project and laboratory experiments involving modern design practices. Prereq: EE 211. Concur: MA 214.

**EE 280 DESIGN OF LOGIC CIRCUITS.**
Boolean algebra; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using standard integrated circuits. Prereq: CS 115 or EGR 102.

**EE 281 LOGICAL DESIGN LABORATORY.**
A laboratory involving the design and implementation of logic circuits. Combinalional and sequential (both synchronous) design examples using small and medium scale integrated circuits. Lecture, one hour; laboratory, one three-hour session. Prereq: EE 280.

**EE 282 DIGITAL LOGIC DESIGN.**
Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Prereq: EGR 102 or equivalent programming course. (Same as CPE 282.)

**EE 287 INTRODUCTION TO EMBEDDED SYSTEMS.**
Introduction to Embedded Systems teaches students to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, programming, and interfacing and lab projects will back up that theory with hands-on design experiments using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/O, and basic real-time processing. Prereq: EE/CPE 282 and prerequisite or concurrent: CS 215 or prerequisite or concurrent: Prereq: CS 215 or CPE/CPE 380 or EE 280. (Same as CPE/CSE 380.)

**EE 305 ELECTRICAL CIRCUITS AND ELECTRONICS.**
A service course covering electrical engineering principles for engineering or science students with majors outside of electrical engineering. Topics include: AC and DC circuits analysis. Prereq: MA 114, PHY 232.

**EE 360 INTRODUCTION TO SEMICONDUCTOR DEVICES.**
Electronic properties of solid-state materials and calculation of charge carriers in semiconductors; structure and physical model of p-n junctions and various diode devices, bipolar transistors, field-effect transistors; semiconductor fabrication technologies and microelectronics manufacturing issues. Prereq: PHY 232 and CHE 105.

**EE 383 INTRODUCTION TO EMBEDDED SYSTEMS.**
A course in the hardware and software of microprocessors. Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CSE 380. (Same as CS 383.)

**EE 395 INDEPENDENT WORK IN ELECTRICAL ENGINEERING.**
Special research and problems for individual students who are capable of pursuing independent investigations. May be repeated to a maximum of six credits. Prereq: Consent of Instructor.

**EE 402 ELECTRONIC INSTRUMENTATION AND MEASUREMENTS.**
Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, theory and operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, three hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as PHY 402.)

**EE 415G ELECTROMAGNETICS.**
Study of electric machines and electromechanical systems. Prereq: EE 421 with a C or better and PHY 232.

**EE 416G ENERGY CONVERSION LABORATORY.**
Laboratory practice and experimental studies related to EE 415G. Lecture one hour; laboratory, three hours. Prereq or concur: EE 415G.

**EE 421G SIGNALS AND SYSTEMS.**
An introduction to continuous and discrete signal and system models and analyses. Topics include discrete and continuous convolution, Fourier series, Fourier transforms, and Laplace transforms and Z-transforms with application examples including AM modulation and the sampling theorem. Prereq: MA 214 and a C or better in EE 221.

**EE 422G SIGNALS AND SYSTEMS LABORATORY.**
Lectures and laboratory exercises on signal and system modeling. Topics include noise models and analysis, filter design, modulation techniques, sampling, discrete Fourier Transforms, State Variable Models, and feedback design with an emphasis on using computer software for analysis and simulation. Prereq: EE 421G, MA 320.

**EE 461G INTRODUCTION TO ELECTRONICS.**
Analysis and design of electronic circuitry incorporating nonlinear electronic elements such as transistors, FET’s, and vacuum tubes. Applications to amplifiers. Prereq: A grade of C or better in EE 221.

**EE 462G ELECTRONIC CIRCUITS LABORATORY.**
Experimental exercises in the design and analysis of useful electronic circuits incorporating semiconductor devices: transistors, tunnel and Zener diodes; also, vacuum tubes, integrated circuits and operational amplifiers. Lecture, one hour; laboratory, three hours. Prereq: EE 422 and EE 461G.

**EE 468G INTRODUCTION TO ENGINEERING ELECTROMAGNETICS.**
Applications of electromagnetic theory; electrostatic and magnetostatic fields; Maxwell’s field

**EDV 535 PRINCIPLES AND PHILOSOPHY OF VOCATIONAL EDUCATION.**
Study is made of philosophy, accepted principles, and legislation affecting programs in vocational education. May be repeated to a maximum of six credits.

**EDV 749 DISSERTATION RESEARCH.**
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769. Indefinitely.

**EDV 767 DISSERTATION RESIDENCY CREDIT.**
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**EDV 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.**
May be repeated indefinitely.
equations; plane waves; transmission lines and waveguides; antennas and radiation. Prereq: MA 213; prereq or concourse EE 221.

**EE 480 ADVANCED COMPUTER ARCHITECTURE.** (3)
This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessing memory access and cache, and processor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CPE 480 and CS 480G.)

**EE 490 ECE CAPSTONE DESIGN I.**
The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacturing process, including considerations of economics, safety, and communication. Students are expected to formally propose a design project that includes a problem definition that incorporates engineering standards and realistic constraints. Students work in teams to develop and complete the designs. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and completion of all other required 400-level EE/CPE courses, excluding EE/CPE 491. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**EE 491 ECE CAPSTONE DESIGN II.** (3)
The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: EE/CPE 490 completed in the previous semester and Engineering standing. (Same as CPE 491.)

**EE 511 INTRODUCTION TO COMMUNICATION SYSTEMS.** An introduction to the basic signal processing operations in communications systems. Topics include frequency and time domain signal and system representation, random signals, modulation, sampling, pulse modulation, information theory. Prereq: EE 421G, MA 320, and engineering standing.

**EE 512 DIGITAL COMMUNICATION SYSTEMS.** (3)
A treatment of the basic signaling concepts involved in the communication of digital information. Topics to include transmission requirements and distortion of digital signals; discrete amplitude, frequency, and phase modulation; error control coding. Prereq: EE 421G, EE 422G, engineering standing or consent of instructor.

**EE 513 AUDIO SIGNALS AND SYSTEMS.** (3)
An introduction to digital signal processing and classification methods for audio signals. Topics include signal analysis and system design using correlation functions, power spectra, difference equations, and transfer functions; implementations of filters, classifiers, and audio effects; characteristics and modeling of common audio signals such as speech, music, and noise. Prereq: EE 422G, engineering standing.

**EE 517 ADVANCED ELECTROMECHANICS.** (3)

**EE 518 ELECTRIC DRIVES.** (3)

**EE 521 INTRODUCTION TO WIRELESS COMMUNICATIONS.** (3)
Study of analog RF electronics for wireless communications through a combination of course and laboratory work. Topics covered in the course include: modulation/demodulation, filters, RF transformers, mixers, transistor switches and amplifiers, class A, B, AB, C, D, E, and F amplifiers, quartz crystals, transmission lines, impedance inverters, acoustics, oscillators, audio circuitry, noise and inter-modulation, and antennas. Prereq: Engineering standing.

**EE 522 ANTENNA DESIGN.** (3)
Principles of radiation, potential solution to Maxwell’s equations for current in empty space, electrically small antennas, antenna arrays, wire antenna principles, introduction to numerical methods, aperture antennas, frequency scaling antennas, receiving properties of antennas, antenna measurement techniques. Prereq: EE 468G and engineering standing.

**EE 523 MICRO Wave CIRCUIT DESIGN.** (3)
Physical and mathematical descriptions of wave propagation in guided structures; microstrip lines; microwave integrated circuits; passive components; two-terminal devices; four-terminal devices; S-parameter concept; equivalent circuit concept; solid state microwave amplifiers and oscillators. Prereq: EE 468G and engineering standing.

**EE 524 SOLID STATE PHYSICS.** (3)
Introductory solid state physics with emphasis on the properties of electrons in crystals; crystal structure, crystal distortion, reciprocal lattice, lattice vibrations and phonons, free electron theory, energy bands in solids, semiconductors. Prereq: PHY 520, or consent of instructor. Engineering standing required for EE 524. (Same as PHY 524.)

**EE 525 NUMERICAL METHODS AND ELECTROMAGNETICS.** (3)
This course covers the basics of numerical methods and programming with applications in electromagnetics. Examples range from statics to radiation/scattering problems involving numerical solutions to integro-differential and finite difference equations. Prereq: EE 468G and engineering standing, or consent of instructor.

**EE 526 LEAN OPERATIONS MANAGEMENT.** (3)
This course will cover topics in basic lean system operations as well as the management system to support the attainment of highest customer satisfaction with respect to Safety, Quality, Cost, Productivity, Delivery and Human Resource Development. The instructional method employs discovery learning techniques and consists of in-class presentations with a focus on hands-on activities, and selected outside assignments to teach and demonstrate the development of a lean operations environment and the management system to support it. Working in teams, students apply fundamental lean tools and concepts to develop a lean operations environment capable of driving continuous improvement in a simulated factory. As the operational environment evolves, key management principles and tools are explored using the scenarios of Taiichi Ohno and others considered to be the pillars of the Toyota Production System. Prereq: Enrollment restricted to junior-level or above students. (Same as ME/MFS 526.)

**EE 527 ELECTROMAGNETIC COMPATIBILITY.** (3)
Design of electronic systems to minimize 1) emission of electromagnetic signals that cause interference in other electronic systems, 2) the susceptibility of that system to electromagnetic signal from other electronic systems, and 3) the susceptibility of that system to its own, internally generated signals. A set of brief laboratory experiments demonstrate the design principles and provide familiarity with modern test equipment. Prereq: EE 468G and engineering standing.

**EE 531 ALTERNATIVE AND RENEWABLE ENERGY SYSTEMS.** (3)
Study of non-traditional, electric generating systems, and the use of renewable energy sources. Energy sources include solar, wind, hydro, and biomass/biogas. Generating technologies include both inverter based equipment and rotating machinery. Prereq: EE 415G, Engineering Standing or consent of instructor.

**EE 532 SMART GRID: AUTOMATION AND CONTROL OF POWER SYSTEMS.** (3)
This course covers introduction to smart grid, key technologies in transmission and distribution systems enabling smart grid, power market structure, and real-time pricing. Prereq: Engineering standing, or consent of instructor.

**EE 533 POWER SYSTEMS: GENERATION, OPERATION AND CONTROL.** (3)
This course covers essential aspects of the energy management system of power systems. Will cover topics: power system economics, state estimation, power system stability, power quality, and fault location. Prereq: EE 537 or concurrent, and Engineering Standing.

**EE 536 POWER SYSTEM FAULT ANALYSIS AND PROTECTION.** (3)
This course teaches computer-based methods for performing fault analysis of power systems, and principles for protecting power systems. Prereq: EE 537, or concurrent, and Engineering Standing.

**EE 537 ELECTRIC POWER SYSTEMS I.** (3)
A study of power flow, elements of power factor correction, the one-line diagram, the per-unit system, transformer modeling, generator modeling, transmission line modeling, transmission line performance calculations from equivalent circuits, and general methods for network calculations. Prereq: EE 468G and engineering standing.

**EE 538 ELECTRIC POWER SYSTEMS II.** (3)
Introduction to modern power system practices, basic transient and steady-state stability analysis with emphasis on digital techniques. Prereq: Engineering standing and consent of instructor.

**EE 539 POWER DISTRIBUTION SYSTEMS.** (3)
Study of electric utility distribution power systems. Topics include configurations, equipment, customer class data, load flow, phase balancing, capacitor placement, system protection, power quality, and distributed generation. Prereq: EE 537, engineering standing or consent of instructor.

**EE 546 ELECTRIC POWER SYSTEM FUNDAMENTALS.** (3)
Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EGR 546.)

**EE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS.** (3)
This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as ME/MSE 555.)

**EE 560 SEMICONDUCTOR DEVICE DESIGN.** (3)
Theory, development, and discussion of equivalent circuit models of transistor devices, negative resistance, semiconductor devices and pracetronic devices based on electronic processes in solid state elements. High and low frequency, as well as the Ebers-Moll and charge control
switching models and their application in computerized electronic circuit analysis will be developed. Prereq: EE 461G or equivalent, and engineering standing.

**EE 561 ELECTRIC AND MAGNETIC PROPERTIES OF MATERIALS.**

EE 562 ANALOG ELECTRONIC CIRCUITS. (3)

Feedback amplifiers, tuned and untuned amplifiers, oscillators, AM and FM transmitters. Prereq: EE 360, EE 461G and engineering standing.

**EE 564 DIGITAL ELECTRONIC CIRCUITS.**

EE 570 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)

Study of packaging systems which interconnect, support, power, cool, protect, and maintain electronic components. The course will address systems at the chip, board, and product levels. Topics include design, properties, materials, manufacture, and performance of various packaging systems. Laboratory will provide familiarity with design software and production equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of instructor. (Same as MSE 568.)

EE 580 HARDWARE DESCRIPTION LANGUAGES AND PROGRAMMABLE LOGIC. (3)

A study of hardware description languages including netlist, VHDL and Verilog; their use in digital design methodologies including modeling techniques, design verification, simulation, synthesis, and implementation in programmable and fabricated logic devices. Programmable logic topics include CPLD and FPGA architectures, programming technologies and techniques. Prereq: EE/CS 380 and engineering standing.

**EE 566 ENGINEERING OPTICS.**

EE 568 FIBER OPTICS. (3)

The course presents theory and practice related to (a) fiber optic cable and their fabrication, (b) fiber optic transmitters and detectors, (c) fiber optic communication systems and (d) fiber optic remote sensors. Prereq: EE 468G. (Same as MSE 568.)

EE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)

Study of packaging systems which interconnect, support, power, cool, protect, and maintain electronic components. The course will address systems at the chip, board, and product levels. Topics include design, properties, materials, manufacture, and performance of various packaging systems. Laboratory will provide familiarity with design software and production equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of instructor. (Same as MSE 569.)

EE 570 FUNDAMENTALS OF NANO-ELECTRONIC DEVICES AND MATERIALS. (3)

Energy bonds in crystals; heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostructures; current topics in nanoscale devices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as ME/MSE 570.)

EE 571 FEEDBACK CONTROL DESIGN. (3)

System representation via transfer function and state variables, root locus analysis; Bode plots; compensation by root-locus and frequency response methods; state variable feedback; sensitivity analysis; tracking via output feedback; digital control systems. Prereq: EE 421G. EE 422G, engineering standing, and consent of instructor.

EE 572 DIGITAL CONTROL OF DYNAMIC SYSTEMS. (3)

Zero and first order hold, theory of analog to digital and digital to analog conversion. Z-transform analysis, discrete state variable analysis, discrete estimation techniques, error analysis of discrete systems. Prereq: EE 422G, engineering standing.

EE 575 INDUSTRIAL CONTROL. (3)

Control technologies for industrial and process control systems, including sensors, actuators, PLCs, and hydraulic and pneumatic control elements. Prereq: Engineering standing or graduate standing.

EE 579 NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)

A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as BME 579.)

**EE 580 EMBEDDED SYSTEM DESIGN.**

Embedded System Design covers the design and implementation of hardware and software for embedded computer systems. Topics include architectural support for embedded systems, power management, analog and digital I/O, real-time processing design constraints and the design of embedded systems using real-time operating systems. Prereq: EE/CPE 287, EE/CPE 380, and engineering standing or consent of instructor. (Same as CPE 580.)

**EE 581 ADVANCED LOGICAL DESIGN.**

EE 599 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (2-3)

A detailed investigation of a topic of current significance in electrical engineering such as biomedical instrumentation, digital filter design, active networks, advanced electrical devices, digital communications, display of electronics. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the EE 599 number. Prereq: Equivalent of two 400-level courses in electrical engineering, consent of instructor and engineering standing.

**PREREQUISITE FOR GRADUATE WORK:** Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor’s degree in electrical engineering or its equivalent.

**EE 601 ELECTROMAGNETIC ENERGY CONVERSION.**

Generalized electric machine theory; parameter determination. Energy conversion in continuous media including magneto-hydrodynamics. Prereq: Consent of instructor.

**EE 603 POWER ELECTRONICS.**

A study of solid-state power electronic devices and their applications. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. This course may not be used to satisfy degree requirements if credit is earned in EE 503. Prereq: EE 517 and EE 571 or consent of instructor.

**EE 604 SWITCH MODE CONVERTERS.**

Study of analysis techniques for switching mode converters and associated control practices. Boost, buck, buck-boost, flyback, and Cuk topologies in both continuous and discontinuous conduction modes are presented. Numerical solution, state-space averaging, and linearization techniques are applied to predict performance and formulate transfer characteristics. Prereq: EE 517 or consent of instructor.

**EE 605 MODELING, SIMULATION AND CONTROL FOR MANUFACTURING.**

The purpose of this course is to examine methods and systems from the perspectives of modeling, simulation, and control of manufacturing facilities. The emphasis will be primarily on techniques that can be used to model and evaluate performance of systems. Students are encouraged to think critically about available technologies, identify relative strengths and weaknesses, and analyze the technologies toward developing improved solutions to factory control and information management problems. Prereq: Graduate Standing. (Same as ME/MFS 605.)
Course Descriptions

EE 606 GLOBAL ISSUES IN MANUFACTURING. (3)
The need to increase quality, productivity, efficiency and sustainability in manufacturing operations spanning the product, process and systems (manufacturing systems as well as supply chain) domains is essential for companies to be successful. The increased globalization of markets and manufacturing operations, declining natural resources and negative consequences of some manufacturing practices as well as increased legislation in many regions has led to many new challenges that companies must overcome to be successful in competitive markets. This seminar will introduce students to a variety of global issues in manufacturing through presentations by leading national and international experts in these domains. The seminars will cover a broad range of manufacturing related topics relevant to many disciplines including manufacturing, mechanical and electrical engineering. The course also helps graduate students identify topical issues that need further investigation and could become potential research topics. (Same as ME/MEFS 606.)

EE 611 DETERMINISTIC SYSTEMS. (3)
Concepts of linear systems, singularity functions, convolution and superposition integrals, state-variable method for linear systems, relation between transfer function and state-variable equations, fundamental matrix, state-transition matrix, unit-impulse response matrix, and transmission matrix. Prereq: EE 421G.

EE 613 OPTIMAL CONTROL THEORY. (3)
State-space modeling of control systems; variational techniques; system optimization by maximum principle, dynamic programming. Hamilton-Jacobi equations design of linear optimal systems; computational methods for solving boundary value problems. Prereq: EE 611.

EE 614 ADAPTIVE CONTROL. (3)
Real-time parameter estimation, deterministic self-tuning regulators; stochastic and predictive self-tuning regulators; model-reference systems; auto-tuning; gain scheduling; practical issues; design and simulation projects. Prereq: EE 611.

EE 619 PROBLEMS SEMINAR IN OPERATIONS RESEARCH. (3)
In this course, the student is exposed to the art of applying the tools of operations research to real world problems. The seminar is generally conducted by a group of faculty members from the various disciplines to which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor.

EE 621 ELECTROMAGNETIC FIELDS. (3)
Development of electromagnetic field theory from the basic postulates of Maxwell's equations in differential and integral forms, solution to static, quasistatic, and wave-propagation problems. Radiation from dipole antenna elements. Prereq: EE 468G.

EE 622 ADVANCED ELECTRODYNAMICS. (3)
Solution methods for applied electrodynamics problems; uniqueness, equivalence, duality, reciprocity; linear space methods; wave solutions in separable coordinate systems; classical problems in cartesian, cylindrical, and spherical coordinates. Prereq: EE 468G.

EE 624 COMPUTATIONAL ELECTROMAGNETICS: THE FINITE-DIFFERENCE TIME-DOMAIN. (3)
A course on the application of the finite-difference time-domain (FDTD) technique for the full-wave simulation of time-dependent electromagnetic waves in complex media. Representative topics in the course include: The Yee algorithm, numerical dispersion and stability, physical source models, absorbing boundaries and perfectly matched layered media, near-field to far-field transformations, modeling of microwave circuits and antennas, parameter extraction, lumped load models, non-uniform and non-orthogonal grid methods, and current topics in FDTD. Prereq: EE 621 or consent of instructor.

EE 625 COMPUTATIONAL ELECTROMAGNETICS. (3)
This advanced course in computational electromagnetics primarily covers moment method and finite element method solutions to scattering problems. Representative topics of the course include surface and volume equivalence principles, scattering by material cylinders, scattering by periodic structures and absorbing boundary condition models. Prereq: EE 525, EE 621, or consent of instructor.

EE 630 DIGITAL SIGNAL PROCESSING. (3)
An introductory treatment of the basic concepts of signal processing via time and frequency domain (Z-transform) methods and a survey of procedures for designing, implementing and using digital signal processors. Prereq: EE 512 or consent of instructor.

EE 633 IMAGE PROCESSING. (3)
The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression, enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as CS 635.)

EE 639 ADVANCED TOPICS IN SIGNAL PROCESSING AND COMMUNICATIONS. (3)
Advanced topics in signal processing and communications research and design topics of current interest, such as optical processing, pattern recognition, satellite systems, and digital communication networks. Prereq: EE 512 or consent of instructor. A review and extension of current literature and selected papers and reports. May be repeated to a maximum of nine credits. Prereq: Advanced graduate standing.

EE 640 STOCHASTIC SYSTEMS. (3)
Random variables, stochastic processes, stationary processes, correlation and power spectrum, mean-square estimation, filter design, decision theory, Markoff processes, simulation. Prereq: EE 421G.

EE 642 DISCRETE EVENT SYSTEMS. (3)
A study of the design of computer systems and control systems using computer simulation. Prereq: Consent of instructor.

EE 661 SOLID-STATE ELECTRONICS. (3)
A study of semiconductor fundamentals including crystal structure, basic quantum mechanics, energy-band theory, carrier distributions, carrier transport, and recombination-generation. Analysis of semiconductor devices including PN junction diodes, bipolar-junction transistors, metal-semiconductor diodes, and metal-oxide semiconductor field effect transistors. Prereq: EE 360 and EE 461G or consent of instructor.

EE 663 OPTOELECTRONIC DEVICES. (3)
Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting diodes and display devices, nanocrystalline structures and organic semiconductors applications in optoelectronic devices. Prereq: EE 360 or MSE 402G, consent of instructor and/or graduate standing. (Same as MSE 663.)

EE 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or consent of instructor. (Same as CHE/CME/MSE 664.)

EE 664 INTRODUCTION TO COMPUTER AIDED DESIGN OF VLSI CIRCUITS. (3)
Computer aided design of Very Large Scale Integration (VLSI) circuits. Topics include: VLSI technology, CMOS circuit characteristics, computer aid in the design of VLSI circuits, use of various CAD tools for layout, circuit design, logic design, and functional design, and the use of VLSI circuits in the system design. A design project is required. Prereq: EE 581 and EE 461G or consent of instructor.

EE 685 DIGITAL COMPUTER STRUCTURE. (3)
Study of fundamental concepts in digital computer system structure and design. Topics include: computer system modeling based on instruction set processor (ISP) and processor-memory-switch (PMS) models, design and algorithms for ALU, processor, control unit and memory system. Special topics include floating-point arithmetic, cache design, pipeline design, and parallel computer architectures. Prereq: EE 380 and EE 581 or consent of instructor.

EE 686 ADVANCED COMPUTER ARCHITECTURE DESIGN. (3)
A study of current diverse advanced architectures such as microprogrammed, parallel and vector, networked, and distributed architectures; applications and example systems employing these architectures; matching applications to architectures; consideration of architectures of the future. Prereq: EE 685.

EE 699 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (3)
A detailed study of a topic of current interest in electrical engineering. May be repeated to a maximum of six credits, but only three credits may be earned under the same subtitle. A particular topic may be offered at most twice under the EE 699 number. Prereq: Consent of instructor.

EE 748 MASTER'S THESIS RESEARCH. (0-12)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EE 749 DISSERTATION RESEARCH. (0-12)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 residence credit following the successful completion of the qualifying exams.

EE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EE 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (0-12)
May be repeated to a maximum of 12 hours.

EE 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

EE 780 ADVANCED PRACTICE IN ELECTRICAL AND COMPUTER ENGINEERING. (1-3)
Apply advanced training in electrical/computer engineering to solve complex practical problems through analysis, design, implementation, experiments, and/or developments subject to approval of the course instructor. This course may be repeated for a maximum of six credit hours in combination with EE 783. Prereq: 18 hours of graduate courses.

EE 783 SPECIAL PROBLEMS IN ELECTRICAL ENGINEERING. (1-3)
Open to graduate students only. Individual work on a problem assignment approved by the chairperson of the department. May be repeated to a maximum of nine credits.
EES 110 ENDANGERED PLANET: AN INTRODUCTION TO ENVIRONMENTAL GEOLOGY. (3)
An introductory course that applies basic geological concepts to current environmental issues including the availability and use of water and soil resources, pollution causes, effects and solutions, and causes and prediction of environmental hazards including floods, landslides, subsidence, earthquakes and volcanoes.

EES 120 SUSTAINABLE PLANET: THE GEOLOGY OF NATURAL RESOURCES. (3)
An introduction to the geologic and societal controls that govern the distribution and cost of using geologic resources: minerals, soils, and energy and industrial materials. Topics include the geological processes responsible for forming these resources, controls on their distribution, quality and abundance, economic factors that drive their recovery, and the legal/political arena in which we attempt to utilize them.

EES 130 DINOSAURS AND DISASTERS. (3)
More than 65 million years ago, dinosaurs and their kin dominated the earth and relegated our mammalian ancestors to positions of unimportance for nearly 155 million years. This course traces the history of dinosaurs from early vertebrate ancestors to their final extinction and surveys the evolutionary, paleogeographic, environmental, and possible extraterrestrial causes for the rise to dominance and sudden fall. Along the way a fire-and-water, dinosaur-interactions with other organisms and the environment, as well as their indirect influence on mammals, particularly on the much later evolution of humankind, will be examined.

EES 150 EARTHQUAKES AND VOLCANOES. (3)
An introduction to earthquakes and volcanoes through theory, active learning assignments, and case studies. Using the basic principles of plate tectonics, students will learn why, where and how earthquakes and volcanoes occur. The hazards associated with earthquakes and volcanic eruptions will be discussed, as well as their societal implications in both the United States and developing world. Earthquake and volcanic hazard mitigation techniques will be addressed. In addition, earthquake hazards in the central United States will be discussed.

EES 151 EARTH DYNAMICS. (3)
A basic problem solving approach to quantifying and predicting how Earth changes through time. Involves application of math skills of sufficient level for UK admission. Satisfies the General Education Quantitative Reasoning requirement; no prerequisites.

EES 155 EARTHQUAKES AND QUANTITATIVE REASONING. (3)
Earthquake phenomena will be introduced in a manner that will allow students to learn why, where, and how earthquakes occur using elements of fundamental topics in algebra and trigonometry. These quantitative foundations will be used to investigate the origins and hazards associated with earthquakes, as well as their societal implications in both the United States and developing world. Students will often work in small groups to increase confidence in their ability to effectively communicate their mathematical skills and defend their logic, as well as providing an opportunity to consider alternative problem solving strategies.

EES 160 GEOLOGY FOR TEACHERS. (3)
The basic principles of geological processes, materials, and history with primary emphasis on inquiry-based laboratory and field activities. The course is designed in conjunction with PHY 160 to provide basic concepts of earth science, astronomy and physics appropriate for elementary and middle school teachers. Both courses are taught with an emphasis on inquiry-based, laboratory activities. Lecture, two hours per week; laboratory, three hours per week. Not available for credit to students who have received credit for EES 220.

EES 170 BLUE PLANET: INTRODUCTION TO OCEANOGRAPHY. (3)
Survey of oceanography, including the geologic evolution of the ocean floor; composition and dynamics of ocean water; interaction of lithosphere with hydrosphere; ocean-atmosphere interaction and oceanic controls on climate dynamics; marine life and ecosystems; impact of human activity on marine ecosystems.

EES 180 GEOLOGY OF THE NATIONAL PARKS. (3)
The American system of national parks and monuments provides a natural and exciting basis for learning about geology, the scientific study of the Earth. These spectacular, diverse natural classrooms will be used to uncover the origin and variety of Earth materials, probe the dynamic processes that have produced and continue to modify internal and surficial environments over geologic time, critically examine the effects of changing patterns of land use on the natural environment, and recount the conservation efforts that have preserved these unique natural environments for future generations. The course includes a required, two-day (Saturday-Sunday) field trip to Mammoth Cave National Park.

EES 185 QUANTIFYING THE BLUEGRASS WATER SUPPLY. (3)
This course develops the ability to locate and identify data, critically evaluate the data, develop probabilistic models, and present the results of their research. Geology provides important information on the origins of natural resources and the amounts available for exploration and use. Course focuses on the issues surrounding the water supply and demand in the central Kentucky Bluegrass region, and the impact of global climate change.

EES 200 INTRODUCTION TO ENVIRONMENTAL GEOLOGY. (4)
Field and laboratory methods for identification and description of rocks and minerals with emphasis on sedimentary rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, three hours per week. Eight days in the field. Prereq: EES 220.

EES 205 FUNDAMENTALS OF GEOLOGY I. (3)
Field and laboratory methods for identification and description of rocks and minerals with emphasis on igneous and metamorphic rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, four hours per week. Four days in the field. Prereq: EES 220 and 230. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be available for automatic transfer credit to UK.

EES 230 FUNDAMENTALS OF GEOLOGY II. (3)
Laboratory and field methods for identification and description of rocks and minerals with emphasis on sedimentary and metamorphic rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, four hours per week. Four days in the field. Prereq: EES 220 and 230. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be available for automatic transfer credit to UK.

EES 235 FUNDAMENTALS OF GEOLOGY III. (3)
Laboratory and field methods for identification and description of rocks and minerals with emphasis on igneous and metamorphic rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, four hours per week. Four days in the field. Prereq: EES 220 and 230. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be available for automatic transfer credit to UK.

EES 236 MINERALOGY. (3)
The study of mineral structure and composition, and mineral classification through crystallographic and crystal chemical techniques. Laboratory work includes study of minerals via crystallography, X-ray diffraction, mineral chemical analysis, and optical petrographic techniques. Lecture, three hours per week; laboratory, three hours per week. Prereq: CHE 105 and EES 220. Prereq or concur: EES 230 or EES 235.
Course Descriptions
EES 385 HYDROLOGY AND WATER RESOURCES.
(3)
The occurrence, movement, and quality of fresh water in the water cycle, including environmental problems and possible solutions. Case studies are explored through readings, videos,
and required field trips. Prereq: EES 220.

EES 570 SEMINAR IN GEOLOGICAL SCIENCES (Subtitle required).
(1)
A general seminar in a broad range of topics in the geological sciences. May be repeated to a
maximum of six credits under different subtitles. Prereq: Senior or graduate standing in
Geological Sciences.

EES 395 SPECIAL PROBLEMS IN GEOLOGY.
(1-3)
Individual work on a special problem in geology. Report required. May be repeated to a
maximum of six credits. Prereq: Consent of instructor.

EES 585 HYDROGEOLOGY.
(3)
A study of the physical aspects of groundwater, including regional flow, well hydraulics, and
computer simulation. Prereq: EES 220 and MA 113 or 123.

EES 399 WORK EXPERIENCE IN GEOLOGICAL SCIENCES.
(1-6)
Professional-level, pre-planned learning experience in geological sciences in the work place
under the supervision of a faculty member. The student will complete work of the type done
by professional geoscientists in the same setting. May be repeated to a maximum of six credits.
Pass/fail only. Prereq: Approval of learning contract by faculty supervisor, director of
undergraduate studies, and department chair.

EES 610 TOPICS IN HYDROGEOLOGY
AND SURFICIAL PROCESSES (Subtitle required).
(3)
Study of topics in hydrogeology and surficial processes. Recent topics include: models of
surface processes; contaminant hydrogeology; modeling in hydrogeology. May be repeated
to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 401G INVERTEBRATE PALEOBIOLOGY AND EVOLUTION.
(3)
Basic ecologic and evolutionary framework of common fossil invertebrate taxa. Major
principles of paleontology, ecology, systematics, and evolution; and the use of fossils in
paleoecology and biostratigraphy. Laboratory work in classification of common fossils.
Lecture, two hours; laboratory, three hours per week. Prereq: EES 102/112.
EES 420G STRUCTURAL GEOLOGY.
(4)
EES 450G SEDIMENTARY GEOLOGY.
(4)
Basic principles and concepts of stratigraphy and sedimentation. Lithologic correlation and
the interpretation of geologic history and paleogeography. Field and laboratory analysis of
sedimentary rocks including megascopic and microscopic methods. Lecture, three hours per
week; laboratory, three hours per week. Prereq: EES 230 and EES 360.
EES 461 IGNEOUS AND METAMORPHIC PETROLOGY.
(4)
Classification and origins of the common igneous and metamorphic rocks. Lecture material will
emphasize the mineralogical, chemical, and physical equilibria within the earth. Laboratory
topics will stress hand-specimen and microscopic petrography. Lecture, three hours; laboratory, three hours per week. Prereq: EES 230 and 235 and EES 360. This course is a Graduation
Composition and Communication Requirement (GCCR) course in certain programs, and hence
is not likely to be eligible for automatic transfer credit to UK.
EES 480 ADVANCED TOPICS IN GEOLOGICAL SCIENCES
(Subtitle Required).
(1-6)
Advanced topical course in the geological sciences. May be repeated to a maximum of six credits
under different subtitles. Prereq: Consent of instructor.
EES 490 EARTH DYNAMICS.
(3)
Basic planetary changes through geological time, including continental drift, formation of
supercontinents, paleoclimate, and the growth of the earth’s crust. Students will be required
to take the Fundamentals component of the ASBOG professional geologist certification exam
(fee required). Prereq: Senior standing with at least 30 credits in a Geological Sciences
curriculum.
EES 511 PETROLEUM GEOLOGY.
(3)
Survey of the origin, chemical composition, occurrence in the context of stratigraphy, structure,
and reservoir types of natural hydrocarbons; exploration methods and production techniques;
environmental impacts of exploration and production. Prereq: EES 450G, EES 420G, or
equivalent, or consent of instructor.
EES 530 LOW TEMPERATURE GEOCHEMISTRY.
(3)
An introduction to sedimentary and environmental geochemistry, including carbonate equilibria, coal and petroleum geochemistry, and the geochemistry of aqueous contaminants. Prereq:
EES 360, MA 114, or consent of instructor.
EES 550 FUNDAMENTAL GEOPHYSICS.
(3)
Survey of active geophysical measurements and passive geophysical observations and their
relation to Earth’s structure and composition. Investigation of the relationship between Earth’s
elastic, potentiometric, and thermodynamic properties and traditional geophysical methods
for measurement (e.g., gravity, magnetics, seismic, and heat flow). Material will help students
improve their quantitative problem-solving abilities, but will also emphasize the visual learning
skills commonly developed in the broader geology curricula. Prereq: MA 113, PHY 211 or 213,
or consent of instructor. (MA 114 suggested).
EES 555 STRATIGRAPHY.
(3)
Principles of stratigraphy, depositional systems, sequence stratigraphy, and tectonic framework of sedimentation. Prereq: EES 450G.
EES 560 GEOPHYSICAL FIELD METHODS.
(4)
An introduction to the principles and applications of geophysics in the field. The course will
present the geophysical methods used to assess the configuration and physical properties of
the Earth’s subsurface, as well as to explore for natural resources. Designed for geology students
(upper-division or first-year graduate) and other science or engineering students without prior
formal instruction in geophysics. To understand the discussions and exercises, the student
should be familiar with first-year calculus and physics. Prereq: MA 113, 114; PHY 211, 213
or PHY 231, 232 or consent of instructor. MA 114, PHY 213 or PHY 232 may be taken
concurrently.

University of Kentucky
KEY:

# = new course

EES 620 TECTONICS.
(3)
A study of the structural features of the earth’s crust with an analysis of the mechanics involved.
Prereq: PHY 211, 213; EES 420G.
EES 624 ADVANCED STRUCTURAL GEOLOGY.
(3)
An advanced study of the theory, principles, and application of structural geology. Prereq: EES
420G.
*EES 625 TOPICS IN GEOPHYSICS.
(3)
Special topics in geophysics such as advanced seismology, seismic processing, seismic
stratigraphy, earthquake seismology, geologic hazards, gravity fields, magnetic fields, heat
flow, geodynamics, planetary geophysics, quantitative methods, inverse methods, geophysical modeling. May be repeated to a maximum of nine credits under different subtitles. Prereq:
Consent of instructor.
EES 626 GRAVITY AND MAGNETIC METHODS.
(3)
Theory and practice of the gravity and magnetic methods of geophysical exploration as applied
to geological, archeological, environmental, and planetary exploration problems. The course
includes principles of instrumentation, surveying, reduction of anomalies, and their interpretation. Prereq: MA 113, MA 114; PHY 211 and PHY 213 or PHY 231 and PHY 232; or consent
of instructor. MA 114 and PHY 213 or 232 may be taken concurrently.
EES 645 TOPICS IN PETROLOGY
AND GEOCHEMISTRY (Subtitle required).
(3)
Study of selected topics in petrology and geochemistry. Past topics include: Carbonate
Petrology; Igneous Petrology; Organic Petrology; Isotope Geochemistry. May be repeated to
a maximum of nine credits under different subtitles. Prereq: Consent of instructor.
EES 652 TECTONICS AND STRATIGRAPHY.
(3)
Use of stratigraphic data in the interpretation of tectonic framework of sedimentation, tectonic
controls on paleogeography, and interactions between sedimentary rocks and geologic
structures. Prereq: EES 420G and 450G or equivalent.
EES 670 EXPLORATION SEISMOLOGY.
(3)
Advanced study of the acquisition, processing and interpretation of reflected and refracted
seismic waves in layered media with applications to energy and geotechnical exploration.
Prereq: EES 550 or EES 560 or consent of instructor.
EES 675 EARTHQUAKE SEISMOLOGY.
(3)
A study of the principles and methods of earthquake and engineering seismology. Specifically,
the course will focus on the concepts of the seismic source, path, and site effects phenomena,
as well as the practical aspects of seismic hazard assessment. Prereq: EES 550 or consent of
instructor.
EES 685 GROUNDWATER MODELING.
(3)
This course teaches the basic concepts in groundwater modeling and provides basic exposure
to standard modeling software. Prereq: EES 585 Hydrogeology; or consent of instructor.
¶EES 703 PALEOECOLOGY/PALEONTOLOGY SEMINAR (Subtitle required).
EES 715 COAL GEOLOGY SEMINAR.
(2)
Seminar discussion and presentation of current work in coal geology from current literature or
ongoing research. May be repeated to a maximum of eight credits. Prereq: EES 515 or 617 or
consent of instructor.
EES 730 SEMINAR IN TECTONICS
AND STRATIGRAPHY (Subtitle required).
(3)
Seminar in Tectonics and Stratigraphy. Past topics include: Tectonics and Stratigraphy of the
Appalachians; Tectonics and Sedimentation; Basin Analysis. May be repeated to a maximum
of nine credits under different subtitles. Prereq: Consent of instructor.
EES 735 TOPICS IN STRUCTURE AND TECTONICS.
(3)
Seminar or new course offering in Structure and Tectonics. May be repeated to a maximum of
nine credits under different subtitles. Prereq: Consent of instructor.
EES 741 ENVIRONMENTAL CLAY MINERALOGY.
(3)
A comprehensive study of the crystal structures of clay minerals commonly found in soils and
sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: EES 360 or
consent of instructor. (Same as PLS 741.)

2016-2017 Undergraduate Bulletin
* = course changed

† = course dropped

¶ = course purged

456


EES 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EES 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EES 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EES 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

EES 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

EES 782 INDIVIDUAL WORK IN GEOLOGY. (1-3) Problems involving independent laboratory and/or library study concerning to the student’s special interest under the direction of an appropriate staff member having proficiency in the area selected. May be repeated to a maximum of nine credits. Prereq: Geology major with graduate standing.

EES 790 RESEARCH IN GEOLOGICAL SCIENCES. (0-6) Research in the geological sciences. May be repeated to a maximum of twelve credits. Prereq: Approval of instructor and Director of Graduate Studies.

EGR 101 ENGINEERING EXPLORATION I. (1) Engineering Exploration I introduces students to the engineering and computer science professions, College of Engineering degree programs, and opportunities for career path exploration. Topics and assignments include study skills, team development, ethics, problem solving and basic engineering tools for modeling, analysis and visualization. Open to students enrolled in the College of Engineering. Students who received credit for EGR 112 are not eligible for EGR 101. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Students who received credit for EGR 112 are not eligible for EGR 101.

EGR 102 FUNDAMENTALS OF ENGINEERING COMPUTER PROGRAMMING. (2) Fundamentals of Engineering Computing introduces students to the practice and principles of computer programming and computational problem solving. Students will engage in hands-on project-based problem solving using modern computer software and hardware, with a particular emphasis on problems and techniques commonly appearing in various domains of engineering. Open to students enrolled in the College of Engineering. Prereq: EGR 101 or equivalent; or prereq or concur: MA 113.

EGR 103 ENGINEERING EXPLORATION II. (2) Engineering Exploration II focuses on a semester long engineering design project with students working in teams to apply the skills and tools introduced in EGR 101 or EGR 112 for transfer students and EGR 102. Topics and assignments include more in depth exploration of engineering tools for modeling, analysis, visualization, programming, hardware interfacing, team development, documentation and communication. Students gain experience in project management, identifying constraints, iteration and technical report writing. Prereq: EGR 102 or equivalent; or prereq or concur: MA 113.

EGR 111 SUCCESS IN ENGINEERING. (1) EGR 111 reserved for Freshman College of Engineering students who have been admitted into the Engineering Living Learning Community. For registration information contact 859-257-0552.

EGR 198 PLTW CREDIT. (1-6) This course grants college credit if Lead the Way to Pathway to Engineering graduates from PLTW Certified high schools. University of Kentucky EGR 198 students may earn one college credit for each of the PLTW Pathway to Engineering courses (JED, POE, DE, CIB, CSE, CEA, ES, AE) completed while enrolled in secondary school(s), up to a maximum of six UK College of Engineering credits. Three of these credits may be used in approved engineering majors as support electives. Additional credits past three can be used for fulfill free electives in approved engineering majors. Criteria to obtain the credit include: • Graduation from a PLTW Certified secondary school. • Completing each PLTW course with a average of B. • Scoring in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam. • Enrolling in the UK College of Engineering. • Paying any designated University of Kentucky tuition and fees. Prereq: Process to obtain the credit: • be a graduate of a PLTW Certified secondary school; • received 4 or 5 (or better) in the PLTW course in high school; • scored in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam for that course; • be enrolled in the UK College of Engineering; and • pay any designated University of Kentucky tuition and fees.

EGR 199 TOPICS IN ENGINEERING: TITLE TO BE ASSIGNED. (1-6) An experimental, topical or interdisciplinary course devoted to special topics of interest in engineering. Course offerings must be approved by the Deans and Chairpersons of all cospowering academic units. A particular title may only be offered twice under the EGR 199 number. Students may not repeat this course under the same title. May be repeated to a maximum of twelve hours. Prereq: Enrollment in the College of Engineering, or permission of the instructor.

EGR 201 LITERATURE, TECHNOLOGY, AND CULTURE. (3) EGR 201 focuses on human endeavors in science as refracted through literature. The course brings together two distinct traditions: the study of literature and the practice of technical communication. The course operates from several assumptions: (1) that imaginative treatments of technological subjects offer powerful and fruitful insights into the human condition, (2) that authors who are physicists both work from written conventions – genres and other tropes – that frame knowledge, (3) that writers benefit from scrutiny of generic conventions, and (4) that creative play with conventional literary genres can inspire engineers to “think outside the box.” The course explores the creative works of various authors about their own designs and projects and about innovations and ways of presenting their work. Prereq: Students must have successfully completed the first course in the General Education Communication sequence (or its transfer equivalent) and must have completed at least 30 hours of course work.

EGR 240 GLOBAL ENERGY ISSUES. (3) This is a cross-disciplinary course open to all majors. This course critically examines energy associated with the technical, economic, societal, environmental, and geopolitical aspects of the world. The course is taught through lectures, discussions, and invited speakers.

EGR 390 EXPERIENTIAL LEARNING IN ENGINEERING OR COMPUTER SCIENCE. (0-3) Participation in team development exercises, seminars, company visits, and activities associated with the BS/MBA program. Prereq: Admission to the BS/MBA program.

EGR 399 COOPERATIVE ENGINEERING EDUCATION. (1) A course designed for undergraduate students who, through the cooperative engineering education office, secure full-time, salaried, career-related positions under the supervision of professional engineers. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and may be repeated on a rotational basis to a maximum of six credit hours. Prereq: Approval of Coordinator of Cooperative Engineering Education.

EGR 401 CAREER PLANNING/EMPLOYMENT SEMINAR. (1) This course will introduce students to the various elements involved in obtaining a position in their chosen field of engineering. Prereq: Engineering standing.

EGR 537 NUMERICAL ANALYSIS. (3) Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Basic numerical integration: Newton’s Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent, or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS/MA 537.)

EGR 540 POWER ECONOMICS AND PUBLIC POLICY. (1) This course provides an introduction to the theories and industry practices related to power economics and public policy. Topics studied include: U.S. power markets, electric utility industry deregulation, electricity, utility environmental regulation, public policy theory, political science theory, development of new electric generation facilities, utility business operation, engineering influence on public policy, and engineering economic analysis. Prereq: Engineering standing, graduate standing, or consent of instructor.

EGR 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3) Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity.
Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as CME 542.)

EGR 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)
Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as E.E. 546.)

EGR 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3)
This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as CE 553.)

ELS 599 TOPICS IN ENGINEERING (Subtitle required). (1-3)
An experimental, interdisciplinary course devoted to a topic of interest to students in several departments of the college. Only three credits may be earned under the same title; students may register for one section each semester. A particular topic may be offered at most three times under the EGR 599 number. Prereq: Variable, given when topic is identified.

EGR 601 INTRODUCTION TO RESEARCH IN ENGINEERING. (3)
Introduction to scientific research, applied to engineering. Characterization of scientific research, the definition of a research project, and methodology in research. Discussion includes management, organization, and execution of a research project, scientific writing, information related to research ethics and data management, national policies, and intellectual properties. Case studies. Introduction to share research tools such as high performance computing or scanning electron microscopy. Prereq: Graduate standing or consent of instructor.

EGR 611 BOUNDARY ELEMENT METHODS IN ENGINEERING. (3)
Introduction to boundary element methods for use in solving common engineering equations, such as the Laplace equation, the Poisson equation, and the diffusion equation. Both theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: EGR 537 or consent of instructor. (Same as ME 611.)

*EGR 649 POWER AND ENERGY EXPERIENCES. (3)
This course will provide unique experiences through visits to a variety of energy-related sites and presentations from topical experts. The course begins with preparations through readings, videos, and assignments. The course then has a week-long tour of selected energy-related sites, which include: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power operation center, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. in the region. More than simply tours, these visits include presentations by industry technical personnel. Students prepare for these visits in advance through preliminary assignments, and students then do a written summary and reflection journal on these visits afterwards. This course may not be used to satisfy degree requirements if credit is earned in EGR 549. Prereq: EGR 542 or EGR 546, or consent of the instructor. Due to the nature of this class, enrollment is limited. Students pursuing the Graduate Certificate in Power and Energy may be given preference in enrollment.

ELS 600 LEADERSHIP IN LEARNING-CENTERED SCHOOLS. (3)
ELS 600 is a study of school leadership responsibilities assumed by teachers working collaboratively with colleagues and principals to create learning-centered schools that assure all students learn at their highest potential.

ELS 601 BUILDING A PROFESSIONAL LEADERSHIP COMMUNITY. (1)
ELS 601 is the study of characteristics of school-based professional learning communities with emphasis on shared vision, values and goals, collective inquiry, collaborative teams, action orientation for continuous improvement of student learning.

ELS 602 LEADERSHIP ROLES IN PROFESSIONAL LEADERSHIP COMMUNITIES. (1)
ELS 602 is the study of professional learning communities with emphasis on essential roles of collaborative leaders (i.e., principals, teachers, students, parents) in creating and sustaining continuous improvement of student learning.

ELS 603 LEADERSHIP FOR STUDENT LEARNING. (1)
ELS 603 is the study of professional learning communities with emphasis on understanding strategies used by collaborative leaders to ensure all students learn at high levels, with emphasis on establishing instructional priorities, building capacity, planning, data analysis, resource allocation, monitoring, and communicating with stakeholders.

ELS 604 LEADERSHIP IN PROFESSIONAL LEARNING COMMUNITIES. (3)
ELS 604 is an introduction to the study of professional learning communities and collaborative leadership roles intended to bring about significant school changes that contribute to all students’ learning at high levels.

ELS 605 LEGAL RIGHTS AND RESPONSIBILITIES OF STUDENTS. (1)
Students have both legal rights and responsibilities within the school environment, which teachers must both respect and enforce. ELS 605 provides an overview of rights and responsibilities of students within classrooms (e.g., student expression, discipline, harassment, discrimination, attendance, instruction, and testing, privacy).

ELS 606 LEGAL RIGHTS AND RESPONSIBILITIES OF TEACHERS. (1)
Teachers are both primary recipients and implementers of educational laws. Given this front line position, a wealth of legal rights and responsibilities are bestowed on teachers. Likewise, teachers are confronted with myriad policies and procedures to follow (e.g., certification, employment, collective bargaining, termination) and with rights to protect (e.g., expression, privacy, discrimination). An overview of these rights and responsibilities for teachers is examined in ELS 606.

ELS 607 TEACHER RESPONSIBILITIES IN SCHOOL-BASED DECISION MAKING. (1)
School-Based Decision Making (SBDM) Councils have been an integral part of school governance since passage of the 1990 Kentucky Educational Reform Act. Role and responsibilities of SBDM Council are examined with focus on how teachers can use their local Council to assure successful school improvement efforts.

ELS 608 SCHOOL LAW AND GOVERNANCE FOR TEACHERS. (3)
ELS 608 is the study of school operations from a legal perspective with particular focus on mandates of the Kentucky Legislative affecting students, teachers, and schools. Teachers are introduced to the governing regulations of schools to begin to understand how schools and classrooms legally operate and their rights and responsibilities, as well as the rights and responsibilities of other stakeholders and their leadership roles.

ELS 609 TECHNOLOGY LEADERSHIP IN SCHOOLS. (1)
The Information Revolution fundamentally changed the way schools operate at the beginning of the 21st century—not only has technology facilitated improved school operations, but also is radically changing how students learn inside and outside of the classroom. ELS 609 emphasizes the role of the teacher leader in improving the school-wide technology integration and use of technology beyond the classroom to link people and resources to integrate more innovation into the school environment.

ELS 610 DISTRIBUTED LEADERSHIP IN SCHOOLS. (1)
ELS 610 is the study of distributed leadership research and related teacher leadership roles and responsibilities through readings, assignments, and collegial discussion. Emphasis placed on building connections between course concepts and activities and students’ professional work.

ELS 611 CURRENT ISSUES FOR EDUCATION LEADERSHIP. (1)
ELS 611 is a study of selected issues that face school leaders and reflect differences among community citizens about who schools should serve (equity and justice), what curriculum should be taught (knowledge and literacy), and how schools should be organized and governed (environment).

ELS 612 LEADERSHIP FOR TECHNOLOGY AND INNOVATION. (3)
Successful implementation of innovation in schools requires broad-based leadership. ELS 612 (a) highlights current issues provoking educational innovation nationally and locally, (b) explores how innovations require students and teachers to become technologically competent, and (c) explores distributed leadership research and concepts for improving leadership practice through distributed roles and responsibilities for teacher leaders and other stakeholders.

ELS 613 LEADERSHIP IN THE PUBLIC CONTEXT OF EDUCATION. (1)
ELS 613 is a study of the role of teacher leader whose influence and responsibility transcends school walls to include community and civic leadership.

ELS 614 PARTNERSHIPS FOR CLOSING ACHIEVEMENT GAPS. (1)
ELS 614 is a study of strategies that teacher leaders may utilize for mobilizing school, community, and family resources toward eliminating achievement gaps among students.

ELS 615 LEADERSHIP FOR RESPONSE TO INTERVENTION CLASSROOMS. (1)
ELS 615 is a study of roles of teacher leaders in the Response to Intervention (RTI) model, which serves as both a strategy for providing assistance to children having learning difficulty, as well as a method for diagnosing learning disabilities.

ELS 616 LEADERSHIP FOR SCHOOLS AS INCLUSIVE COMMUNITY. (1)
ELS 616 is a study of evolving perspectives of the purposes of public education, leadership within and beyond the school building to support family-community partnerships and networks, and leadership to ensure inclusive classrooms. Curriculum includes how diverse personnel ensure school-wide safety.

ELS 617 TEACHER LEADERSHIP FOR INSTRUCTIONAL TEAMS. (1)
ELS 617 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.
Course Descriptions

ELS 618 INTRODUCTION TO LEADING ACTION RESEARCH FOR SCHOOL RENEWAL. (1)
ELS 618 is the study of teacher roles and responsibilities within instructional teams at the classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

ELS 619 EVIDENCE-BASED DECISION MAKING. (1)
ELS 619 is the study of teacher roles and responsibilities when analyzing evidence of student outcomes at classroom and school levels and examination of a model and tools for data analysis and team-based discussions, reflection, and decision making.

ELS 620 LEADING ACTION RESEARCH IN SCHOOL RENEWAL I. (3)
ELS 620 is the first course in a two-part sequence that presents concepts and procedures for conducting systematic inquiry to investigate phenomena in classrooms and schools toward learning excellence. Emphasis is placed on developing a proposal for disciplined inquiry in classrooms or schools that will be conducted in ELS 621, the second course in the sequence. Prereq: Admission to M.Ed. program or consent of instructor.

ELS 621 LEADING ACTION RESEARCH IN SCHOOL RENEWAL II. (3)
ELS 621 is the second course in a two-part sequence in which action research proposed in ELS 620 is conducted. Emphasis is placed on appropriate use of data for making informed decisions about classroom and school practices. Prereq: Successful completion of ELS 620 or consent of instructor.

ELS 624 LEADERSHIP PRACTICUM: MONITORING LEARNING, ASSESSMENT, AND ACCOUNTABILITY. (3)
ELS 624 is a field-based practicum to explore distributed leadership roles and responsibilities for monitoring assessments and accountability results to guide decisions about curricular or instructional modifications. Students work closely with school principal and leadership team at a P-12 school to examine specific site issue and provide recommendations for action. Prereq: Successful completion of ELS 620 or consent of instructor.

ELS 691 LEGAL PERSPECTIVES FOR TEACHERS. (1)
This course introduces legal concerns for public school teachers. It emphasizes legal rights and responsibilities of both teachers and pupils. Course coverage includes an introduction to governance, liability, church and state, instructional issues, student rights, student discipline, student abuse, teacher rights, and teacher discipline.

EMB Executive Master of Business Administration

EMBA 605 ECONOMICS II. (2)
This course will apply economic theory to managerial decision making and analysis. It will employ many of the traditional tools of microeconomics to see how they can be used to evaluate practical business problems. Markets and market structures will be studied including competitive markets, monopoly and pricing with market power, and oligopoly, rivalry, and strategic behavior. Particular attention will be paid to the strategy of firms in the marketplace. Prereq: Admission to the joint EMBA program.

EMBA 606 FINANCIAL ACCOUNTING. (2)
This course provides an overview of financial accounting information and the role of that information in the economy. It focuses on the recognition and measurement concepts underlying financial accounting, but also covers the mechanics of recording and reporting accounting information to outside parties. The first portion of the course presents an overview of the accrual accounting model, how information is presented and the mechanics of keeping track of financial accounting information. Prereq: Admission to the joint EMBA program.

EMBA 607 BUSINESS INTELLIGENCE. (2)
This course is an introduction to the field of Business Intelligence (BI), a field that encompasses the use of business performance monitoring, querying/reporting, online analytical processing (OLAP), and business analytics, with particular emphasis on the latter. Prereq: Admission to the EMBA program.

EMBA 608 MANAGERIAL ACCOUNTING. (2)
This course reviews the tools needed by managers to plan and control (evaluate) personnel and operating costs of the firm. It provides a framework for understanding when and why managers select specific types of accounting information to both facilitate their decision making and influence the decisions of their employees. Techniques covered include: product costing, activity-based costing, planning and controlling costs, budgeting, standard cost systems, new production philosophies and analytical techniques for decision making. Prereq: Admission to the EMBA program.

EMBA 609 FINANCIAL MANAGEMENT I. (2)
The goal of this course is to provide an overview of modern corporate financial methods with an emphasis on practical financial decision that financial managers in the real world need to make on a regular basis. Emphasis will be placed on the investment decision (how firms should spend money). This course takes the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to the EMBA program.

EMBA 610 MARKETING MANAGEMENT I. (2)
This course will help develop the skills, knowledge and experience required to critically solve marketing problems. It will rely on a mixture of lectures, applications, and cases to add well-established and proven marketing concepts and frameworks to your managerial arsenal. The course is intended to be practical and is focused on developing your ability to be an effective decision maker. Prereq: Admission to the EMBA program.

EMBA 611 FINANCIAL MANAGEMENT II. (2)
This course provides an overview of modern corporate financial methods with an emphasis on practical financial decisions that financial managers in the real world need to make on a regular basis. It will emphasize the financing decision (how firms optimally raise money). Topics will include the cost of capital, capital structure, valuation, and issuing securities. The course will take the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to the EMBA program.

EMBA 612 MARKETING MANAGEMENT II. (2)
This course provides students with insights into how profitable branding strategies can be created by addressing three important questions: (1) How do you build brand equity? (2) How do you capitalize on brand equity to expand your business? (3) How can brand equity be measured? Prereq: Admission to the EMBA program.

EMBA 613 LEADING ORGANIZATIONS. (2)
This course will apply economic theory to managerial decision making and analysis. Traditional tools of microeconomics will be employed to see how they can be used to evaluate practical business problems. Prereq: Admission to the joint EMBA program.

EMBA 614 MANAGING GLOBAL CHALLENGES. (2)
This course will familiarize students with the foundations of the global economy, current trends in the global business environment, and issues facing countries and individual firms (e.g., foreign market entry modes, global supply chain configurations, new global product development, international joint venture formation, and global competitive rivalry). It will introduce the fundamental principles of international economics, discuss positive and negative impacts of globalization on the domestic economy, labor and product markets. Prereq: Admission to the EMBA program.

University of Kentucky 2016-2017 Undergraduate Bulletin 459

KEY:  # = new course  * = course changed  † = course dropped  ¶ = course purged
Course Descriptions

EMBA 615 OPERATIONS MANAGEMENT. (2)
This course addresses how to design and operate a manufacturing or service company. The underlying fundamental and powerful concepts include (1) design of a system, (2) operations of a system, and (3) measuring and controlling the performance of a system from effectiveness (e.g., quality of a product) and efficiency (e.g., cost of producing a product) viewpoints. Prereq: Admission to the EMBA program.

EMBA 616 CORPORATE ENTREPRENEURSHIP. (2)
This course introduces entrepreneurship in the corporate setting. The difference between individual entrepreneurial activities and corporate entrepreneurial activities is examined. Models of entrepreneurial activities in established organizations are presented. Prereq: Admission to the EMBA program.

EMBA 617 BUSINESS STRATEGY AND PUBLIC POLICY. (2)
This course will examine how public policy decisions are made at the federal and state level and how they influence business decision making. A managerial perspective is used to examine the interface between business and the external political environments in which they operate. Public policies, from tax or trade policies to regulatory policies affecting the environment, intellectual property, human resources and tort liability are discussed. Prereq: Admission to the EMBA program.

EMBA 618 COMPLEX ORGANIZATIONAL CHANGE. (2)
This course examines both the content and process of complex organizational change. The first part of the course is dedicated to content issues, including an introduction to a systems view of organizations and organization structure, an examination of the role of organizational structure in creating competitive advantage, and understanding how structure and strategy need to be aligned within various environmental constraints. The second part of the course focuses on the complexity and intricacies of the change process, including working with internal and external change agents. Prereq: Admission to the EMBA program.

EMBA 619 NEGOTIATIONS AND CONFLICT RESOLUTION. (2)
This course focuses on negotiation skills and making the student a more confident and judicious negotiator. By the conclusion of this course, you will have improved your daily ability to diagnose negotiation situations, strategize and plan upcoming negotiations, and engage in more fruitful negotiations when you are dealing with difficult negotiation partners. Prereq: Admission to the EMBA program.

EMBA 620 STRATEGIC MANAGEMENT. (2)
This course is an integrative capstone course—the only course that challenges students to study and experience sets of multifunctional problems that confront top management. The course requires students to bring together all of their learned functional skills (i.e., accounting, finance, marketing, etc.) and use them to study organizational problems within the context of hands-on-exercises/stimulations, real-world business case studies, and open discussion forums. Prereq: Admission to the EMBA program.

EMBA 650 SPECIAL TOPICS IN BUSINESS ADMINISTRATION (Subtitle required). (2)
This course is designed to illuminate current top issues of special interest to executives in today’s organizations. May be repeated a maximum of 6 credit hours when taken under separate subtitles. Prereq: Admission to the joint EMBA program.

END Endodontics

END 820 ANTERIOR ENDOdontics. (2)
This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontics in anterior teeth. Lecture, 10 hours; laboratory, 30 hours. Prereq: RSD 812 and RSD 814, or consent of course director.

END 821 CLINICAL ENDODONTICS I. (1)
In this course, students will treat two clinical endodontic cases, one of which shall be a molar. Thirty hours clinic, total. Prereq: END 820.

END 822 POSTERIOR ENDOdontics II. (2)
This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontics in posterior teeth. Lecture, 10 hours; laboratory, 30 hours; OSCE, one hour (competency/evaluation of preclinical concepts). Prereq: END 820 and RSD 824, or consent of course director.

END 830 ENDodontics II. (1)
This course concerns the diagnosis and treatment of endodontically related problems. Traumatic injuries, controversies in instrumentation and filling procedures, periodontic-endodontic considerations, surgical endodontics and other selected topics are discussed in-depth. Lecture, 20 hours. Prereq: END 821.

END 831 CLINICAL ENDODONTICS II. (1)
In this course students will treat routine endodontic cases. Clinic, 54 hours. Prereq: END 821.

END 841 CLINICAL ENDODONTICS III. (1)
This course offers dental students further experience in providing endodontic treatment. Clinic, 40 hours. Prereq: END 831 or consent of instructor.

END 880 CLINICAL ENDODONTICS SEMINAR. (1)
This course is designed to give a more in-depth hands-on view of some of the newest concepts in endodontics. Seminars will be presented including new concepts of instrumentation and root canal obturation. Demonstrations and hands on class participation will supplement the seminars. Note: scheduling for this course will take place outside of regularly scheduled class/clinic time. Prereq: END 830, 831, ranked in the upper half of the class, and consent of instructor.

END 898 ENGLISH FOR SPEAKERS OF OTHER LANGUAGES. (3)
This course is a writing course designed to provide international undergraduate students with a firm basis in the rhetorical patterns of written English and in the grammatical structures and expressions associated with those patterns. It also serves as an introduction to the analysis and organization of information as found in English paragraphs and essays. Emphasis is placed upon writing beyond the sentence level. Students must attain at least a C in order to enter ENG 899. The course may be repeated up to six credits. Students cannot count this credit toward the Freshman Composition requirement or toward the graduation requirement. Lecture, five hours per week.

ENG 101WRITING I. (3)
A course in writing emphasizing argument. Instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Includes grammar and mechanics review. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

^NOTE: ENG 101 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 102 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

^ENG 102WRITING II. (3)
Argumentative writing. Emphasis on development of a fluent, precise, and versatile prose style. Continued instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Prereq: ENG 101 or equivalent. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

^NOTE: ENG 102 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 101 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

^ENG 107WRITING CRAFT: INTRODUCTION TO CREATIVE WRITING. (3)
This course introduces students to literary works of various styles that deal with current social and creative applications. Topics vary by semester and are chosen to give a broad-based understanding of literary works, genres, creative techniques, or cultural trends (e.g., Literature and Other Art Forms; Film, Art, & Social Protest; Creative Writing, Mixed Media, & Social Media). See departmental listings for different offerings per semester. Fulfills ENG premajor requirement or provides ENG Major or Minor Elective credit.

ENG 130 LITERARY ENCOUNTERS. (3)
This course introduces students to literary works of various styles that deal with current social and creative applications. Topics vary by semester and are chosen to give a broad-based understanding of literary works, genres, creative techniques, or cultural trends (e.g., Literature and Other Art Forms; Film, Art, & Social Protest; Creative Writing, Mixed Media, & Social Media). See departmental listings for different offerings per semester. Fulfills ENG premajor requirement or provides ENG Major or Minor Elective credit.

ENG 142 GLOBAL SHAKESPEARE. (3)
Global Shakespeare will expose students to selected productions and adaptations of Shakespeare’s plays by authors and acting companies from Asia, the Middle East, Africa, the Americas, and from European nations other than Great Britain. In our globally connected age, Shakespeare has crossed borders, occupying an honored place in the school curricula and cultural aspirations of many formerly colonized nations. In a post-colonial age, he has become the medium through which multiple cultures articulate their own values and enter into equal intellectual and aesthetic exchange with the English-speaking west. Students in the course will be asked to ponder what there is about Shakespeare that makes his plays such rich raw material for these encounters and exchanges. Prereq: None. Does not fulfill ENG premajor requirement or provide ENG Major or Minor Elective credit.

ENG 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY. (3)
This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz composition as philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealism and existentialist artistic movements in modern and postmodern cultural contexts. Artists to be discussed include James Baldwin, Harryette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative
trends, and political connotations specific to African American literature and culture. (Same as AAS 168.)

ENG 251 SURVEY OF AMERICAN LITERATURE I. (3)
A survey of American literature from its colonial origins to the Civil War, with emphasis on different genres, periods, and cultural characteristics of the American Colonies and antebellum United States. The course explores both the social conditions in which American literature was produced—such as the Roaring 20’s, the Cold War, and the upheaval of the 1960’s—and several key literary movements, such as the Harlem Renaissance, Modernism, and Postmodernism. Texts and authors covered may include the Augustan poetry of John Dryden and Alexander Pope; the works of Ralph Waldo Emerson and Henry David Thoreau; and the early and later Romantic movements; novelists and poets of the Victorian period such as Charles Dickens, Alfred Tennyson, and Elizabeth B. Browning; the early-twentieth-century Modernism of Virginia Woolf and T.S. Eliot; and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 332.

ENG 252 SURVEY OF AMERICAN LITERATURE II. (3)
A survey of American literature from the Civil War to the present, with an emphasis on different genres, periods, and cultural characteristics of later periods in U.S. history. The course explores the changing social conditions in which American literature was produced—such as the Roaring 20’s, the Cold War, and the upheaval of the 1960’s—and several key literary movements, such as the Harlem Renaissance, Modernism, and Postmodernism. Texts and authors covered may include Hubert H. Humphrey’s House of Mirth, Nella Larsen’s Quicksand, Ernest Hemingway, Toni Morrison, the poetry of Marianne Moore and Elizabeth Bishop, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 332.

ENG 207 BEGINNING WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)
A beginning workshop in the craft of writing, teaching students how to read critically and how to revise work in progress. Students provide confidence for each other’s work. Exercises involve practice in aspects of craft and promote experimentation with different forms, subjects, and approaches; outside reading provides models and inspiration. May be repeated under different subtitles to a maximum of 6 credits. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 209 THE STRUCTURE AND USE OF ENGLISH. (3)
A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversial topics. Offered for UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG pre-major requirement and ENG minor credit. (Same as LIN 209.)

ENG 210 HISTORY OF THE ENGLISH LANGUAGE. (3)
A survey of the historical development of English from its Indo-European origins to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as LIN 210.)

ENG 221 INTRODUCTION TO LINGUISTICS: THEORETICAL FOUNDATIONS AND ANALYSIS. (3)
First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisite: for most 500 level LIN courses. This course is primarily designed for Linguistics major and minor students, but it is also suitable for students pursuing a major in the following disciplines: English, Modern and Classical Languages, and Communication Science Disorders, or consent of instructor. (Same as LIN 221.)

*ENG 230 INTRODUCTION TO LITERATURE (Subtitle required). (3)
An introduction to literary analysis through close reading and argumentative writing. The course involves studying selected texts from several genres and investigating a unified theme or set of texts in two courses. Students will learn to read closely, how to relate texts to one another, and how to use basic literary terms and concepts. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG pre-major requirement. Provides ENG minor credit. Prerequisite: Graduation Requirement Course – credit is awarded to students meeting the GWR prerequisites.

ENG 241 SURVEY OF BRITISH LITERATURE. (3)
A survey of British literature from the Anglo-Saxon period to the later seventeenth century, with emphasis on different genres, periods, and cultural characteristics of the early English literary tradition. Texts and authors covered may include Beowulf and Old English elegiac poetry; Middle English poetry and selections from Geoffrey Chaucer’s Canterbury Tales; Renaissance lyrics, sonnets, and narrative poetry; the drama of Shakespeare; selections from John Milton’s Paradise Lost; and more. Lecture. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 331.

ENG 242 SURVEY OF BRITISH LITERATURE II. (3)
A survey of British literature from the seventeenth century to the present, with emphasis on different genres, periods, and cultural characteristics of the later English literary tradition. Texts and authors covered may include the Augustan poetry of John Dryden and Alexander Pope; the work of the Romantic poets; novelists and poets of the Victorian period such as Charles Dickens, Alfred Tennyson, and Elizabeth B. Browning; the early-twentieth-century Modernism of Virginia Woolf and T.S. Eliot; and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 332.

ENG 260 INTRODUCTION TO BLACK WRITERS. (3)
An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Tom Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prerequisite: Graduation Requirement Course – credit is awarded to students meeting the GWR prerequisite. (Same as AAS 264.)

ENG 265 SURVEY OF AFRICAN-AMERICAN LITERATURE I. (3)
A survey of African-American literature from the mid-eighteenth century to Reconstruction and after, with emphasis on selected genres, periods, and thematic characteristics of the early African-American cultural and literary experience. Topics include colonialism and abolitionism, African-American folk and oral cultures, the history of slavery, and American slave narratives. Authors covered may include Jupiter Hammon, Phillis Wheatley, William Wells Brown, George Moses Horton, Martin Delany, Frederick Douglass, Harriet Wilson, Ellen Craft, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 266 SURVEY OF AFRICAN-AMERICAN LITERATURE II. (3)
A survey of African-American literature from post-Reconstruction to the Black Arts Movement and beyond, with emphasis on selected genres, periods, and thematic characteristics of the later African-American cultural and literary experience to the present day. Topics include literature of the Reconstruction; poetry and dialect poetry, the “plantation tradition” and black musical traditions; Black Modernism and the Harlem Renaissance; the Black Power movement and Civil Rights. Authors may include Pauline Hopkins, Frances Harper, Saturn Griggs, Oscar Micheaux, W.E.B. DuBois, Langston Hughes, Countee Cullen, Zora Neale Hurston, Richard Wright, Gwendolyn Brooks, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 271 THE BIBLE AS LITERATURE. (3)
A course investigating selections from the Christian Bible (Old and New Testaments) in English, and from related sacred texts, as literary and cultural documents of great significance and literary achievement. Emphasis is on the careful analysis of literary forms and themes within a broadly historical and non-denominational context. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 274 CLASSICS OF WESTERN LITERATURE. (3)
A study of selected works by major Western authors from the Bible and ancient Greek literature through the Renaissance and Enlightenment to the Romantic Period and later. Emphasis is on the study of genres, themes, characters, and literary forms that have had an enduring presence in Western culture. Texts may include Homer’s Iliad and Odyssey; selections from the Old Testament; classical Greek drama; Virgil’s Aeneid; Dante’s Divine Comedy; Cervantes’s Don Quixote; and
others. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 280 INTRODUCTION TO FILM. (3) An introduction to the study of films as art and cultural documents. The course involves viewing and analyzing films from different genres and investigating a unified theme or set of topics. Students will learn how to view films closely, how to relate films to their contexts, and how to employ the basic terms and concepts of film analysis. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. Viewing films outside of class is required. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill the ENG Historical Survey requirement. May be repeated to a maximum of 6 hours of credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. Does not fulfill ENG Major Elective credit and ENG minor credit. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 281 INTRODUCTION TO FILM. (3) A chronological survey of narrative film (primarily American) from World War II to the present, concentrating on both canonical films (such as Hitchcock’s Vertigo) and often overlooked examples of cult, low budget, and independent film. Many paradigms of the major genres are included: musical, film noir, gangster, screwball comedy, horror and science fiction, western, and more. This survey also examines more idiosyncratic work of auteurs (Nicholas Ray, Jane Campion), films capturing a specific sociopolitical moment (e.g. Spike Lee’s Do the Right Thing), and larger cinematic movements such as Italian neo-realism, French New Wave cinema, and the New Hollywood of the 70’s. Lecture. Viewing films outside of class is required. Does not fulfill ENG Historical Survey requirement. Can be taken for ENG Major Elective requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 382.

ENG 290 INTRODUCTION TO WOMEN’S LITERATURE. (3) An introduction to the rich traditions of women’s writing, focusing on some important issues and representative examples. Students will read canonical and non-canonical works, discuss continuities and differences among women writers, and master some of the concepts of gender studies. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG Historical Survey requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 390. Prereq: Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite.

ENG 301 STYLE FOR WRITERS. (3) This course is designed for those who wish to improve their own writing style or the style of others. While the course may include some account of historical changes in prose style and require analytic reading of literary texts, the emphasis is on editing contemporary prose both in exercises and in the students’ own writing. Students will learn and practice principles such as economy, coordination, subordination, precision, parallelism, balance, coherence, rhythm, clarity, and grace. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. (Same as WRD 301.)

ENG 310 AMERICAN ENGLISH. (3) The study of the varieties of modern American English: regional, social, and ethnic varieties, gender differences in communication, creoles and pidgins, stylistic variation. History and methods of American dialect study. No prerequisites. Provides ENG Major Elective credit and ENG minor credit. (Same as LIN 310.)

*ENG 330 TEXT AND CONTEXT (Subtitle required). (3) The core course in the English Major focusing on the close reading and analysis of a single major literary text, or a focused set of texts, in historical and critical context. Students will develop analytical and critical thinking skills that depend on both close reading and conceptual understanding of literature, as well as their skills of critical reading, writing, and presentation. See departmental listings for different offerings per semester. ENG major and minor requirement. Repeatable for up to six hours of credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent, and either ENG 107, or ENG 209, or ENG 230. This course is a Graduate Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENG 337 LITERATURE AND GENRE: (Subtitle required). (3) An advanced course exploring one or two literary genres or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. the short story; lyric poetry; epic and mock-epic; autobiography; the bildungsroman; protest literature) or a genre specific to a particular period (e.g. mid-century American crime novels; Elizabethan songs and sonnets; Victorian drama). May be repeated up to 9 hours under different subtitles. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. Provides ENG Major Elective credit and ENG minor credit. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester.

ENG 338 TOPICS IN LITERATURE (Subtitle required). (3) An advanced course exploring a focused literary topic across various periods, genres, styles, and media. It focuses on the creative connections in literature unifying a shared set of themes or topical concerns (e.g., narratives of travel; the family through history; stories about work and play; ethnic identities; nature and the natural world). Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 339 AUTHOR STUDIES (Subtitle required). (3) An advanced course exploring the works of a single important author of English literature, or literature in translation, from any period or nationality. It focuses on developing a strong familiarity with the oeuvre of a specific important writer. Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 341 CHAUCER AND HIS CONTEMPORARIES. (3) A course covering medieval English literature from around the years 1350-1450 and centering on the works of Geoffrey Chaucer (c. 1340-1400), particularly his early dream-visions and The Canterbury Tales. Other authors and texts may include William Langland’s Piers Plowman; the poetry of John Gower; Sir Gawain and the Green Knight and the works of the Pearl-Poet; Thomas Hoccleve; Margery Kempe; anonymous romances and Arthurian narratives; and more. Topics include courtly love and chivalry, Christian spirituality; women and gender roles; feudal politics and Edward III’s court. Does not fulfill ENG Historical Survey requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 342 SHAKESPEARE. (3) A course offering advanced study of a representative selection of Shakespeare’s plays across the length of his career. It situates Shakespeare within Renaissance theatre culture: the playhouses and audiences he wrote for, the structure of his acting company, and the patronage system that supported their business. Students will learn how his plays developed and the ways in which they received ideas about dramatic genres and in some instances set new standards for how certain types of plays should look and feel. Students will also gain a sense of how interpretations of individual plays have changed over time and how later periods and audiences continue to make Shakespeare their own. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Credit will not be given to students who already have credit for ENG 340. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 343 RENAISSANCE DRAMA AND SOCIETY. (3) This course studies Elizabethan and Jacobean drama by Shakespeare’s predecessors and contemporaries. Although most people identify Shakespeare as the representative Renaissance playwright, he was only one member of a distinguished generation. Students will encounter a variety of popular dramatic genres in which Shakespeare either did not work or only worked briefly, genres that played an important role in defining the theatrical system that supported their business. Students will learn how his plays developed and the ways in which they received ideas about dramatic genres and in some instances set new standards for how certain types of plays should look and feel. Students will also gain a sense of how interpretations of individual plays have changed over time and how later periods and audiences continue to make Shakespeare their own. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Credit will not be given to students who already have credit for ENG 340. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 345 BRITISH POETRY. (3) This course provides a selective encounter with the poetry of the British tradition. Texts and topics may be drawn from the later Renaissance (16th c.) through the present day, exploring the depth, history, and continued vitality of British poetry. Particular attention is paid to the formal aspects and skills of reading poetry in different periods and styles. Reading may include works such as The Rime of the Ancient Mariner, The Waste Land, and the plays of Shakespeare. Does not fulfill ENG Historical Survey requirement. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 347 THE RISE OF THE BRITISH NOVEL. (3) What is the novel and how did it begin? Why did it develop at a specific moment in history and what counted as fiction before that time? What makes one novel “literature” and another “trash”? In this course we explore the early decades of the novel to better understand prose fiction and how it came to be a dominant genre in English literature. Readings include works by Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Laurence Sterne, Frances Burney, Mary Shelley, Jane Austen, Charles Dickens, and more. Topics can include the novel in history and the history of the novel; the evolving cultural practices of novel-reading; eighteenth-century fiction and contemporary popular culture.
ENG 349 MODERNISM. (3) A course on Modernist Literature: British, Irish and American writing from the first half of the twentieth century. Virginia Woolf once tried to explain modernism by claiming, “On or about December 1910 human character changed.” Much of the writing of the period might be read as an attempt to record and understand that change. Texts include the fiction, poetry, drama, and essays from writers such as Woolf, James Joyce, T.S. Eliot, W.B. Yeats, Ezra Pound, Wyndham Lewis and Gertrude Stein. The literature of the period will be examined in relation to various contexts and backgrounds, including the experience of war, the breakup of empire, and other major events and upheavals. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 352 AMERICAN LITERATURE AND CULTURES UNTIL 1900. (3) This course focuses on selected literary movements and their relationships to American culture up through 1900. Authors studied may include Susanna Rowson, Nathaniel Hawthorne, Herman Melville, Walt Whitman, Harriet Jacobs, and Henry James. Topics may include American imperialism, slavery and abolition, the rise of the historical novel, Sentimentalism, Romanticism, and the emergence of psychological realism. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 353 AMERICAN LITERATURE AND CULTURES POST-1900. (3) This course focuses on selected literary movements and their relationships to American culture since 1900. Authors studied may include Edith Wharton, F. Scott Fitzgerald, Allen Ginsberg, Ralph Ellison, Toni Morrison, Thomas Pynchon, and others. Topics may include the literatures of the Cold War, the Beat Generation, the New Social Movements of the 1960’s, Postmodernism, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 355 AMERICAN POETIC TRADITIONS. (3) A course investigating contrasting traditions of American poetry from the nineteenth and twentieth centuries. Several poets are examined within historical and literary contexts, and their poems examined in detail through close reading, with attention paid in particular to stylistic, formal characteristics. Poets studied may include Whitman, Dickinson, Williams, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 360 LITERATURE OVER AFRICAN-AMERICAN HERITAGE. (3) This course explores the rich literary heritage of the Commonwealth of Kentucky and the larger Appalachian region, surveying its local history and diversity as well as its wider significance for American art. Authors covered may include early figures such as William WellsBrown, the first African-American novelist, and John Fox Jr., the first million-selling novelist; Robert Penn Warren, first Poet Laureate of the United States and author of All the King’s Men; Elizabeth Madox Roberts; Harrietie Arnow, winner of the National Book Award in 1954 for The Dollmaker; counter-cultural writers of the 60’s and 70’s such as Hunter S. Thompson, Gurneyantupee, MurielSchafer, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 361 EARLY AFRICAN-AMERICAN LITERATURE. (3) This course investigates selected writers of the early African-American tradition, primarily from the mid-eighteenth century to post-Reconstruction. Inquiry focuses on the literary modes and genres that were central to the creation of a distinct African-American literary voice and canon, including slave narratives, folklore, poetry, drama, and more. Authors include Phyllis Wheatley, Frederick Douglass, Harriet Jacobs, William WellsBrown, Frances Harper, Charles Chesnutt, Martin Delaney, Sojourner Truth, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265 or 266 are recommended but not required.

ENG 362 FLIGHTS TO FREEDOM: LITERATURE OF THE GREAT BLACK MIGRATIONS. (3) Between 1910 and 1930 more than one million African-Americans migrated from the rural South to the urban North. This course focuses on the development of African-American migration narratives from the slave era to the contemporary moment. It examines literary, musical, artistic, and journalistic representations of the Great Migrations that capture the experiences of African-Americans as they moved not only from the South to the North, but also from the South to the Midwest and the West in pursuit of better economic opportunities and political freedom. Readings are drawn from writers such as William and Ellen Craft, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, James Weldon Johnson, Jean Toomer, Nella Larsen, Ann Pettry, Dorothy West, Pearl Cleage, August Wilson, Toni Morrison, Ishmael Reed, Colson Whitehead, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265, or 266 are recommended but not required.

ENG 366 CONTEMPORARY AFRICAN-AMERICAN VOWELS. (3) A course on contemporary African-American voices. Encompassing an array of genres and forms, this course examines black culture, literature, and performance from mid-20th century to present. It engages aesthetic, critical, and political issues related to seminai periods such as the Black Arts Movement of 1960’s, the Third Renaissance of 1980’s-90’s, and the ascent of the first U.S. president of African descent. This course examines how forms of performance such as folklore and work songs, the blues, jazz, rap, and all shape cultural and literary production. Authors may include Lorraine Hansberry, Ernest Gaines, Gloria Naylor, Ice Cube, Cornell West, Marilyn Riggs, Tupac, India Arie, Percival Everett, Nikki Finney, Natasha Trethewey, Barack Obama, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 368 CONTEMPORARY AFRICAN-AMERICAN VOICES. (3) A course on contemporary African-American voices. Encompassing an array of genres and forms, this course examines black culture, literature, and performance from mid-20th century to present. It engages aesthetic, critical, and political issues related to seminai periods such as the Black Arts Movement of 1960’s, the Third Renaissance of 1980’s-90’s, and the ascent of the first U.S. president of African descent. This course examines how forms of performance such as folklore and work songs, the blues, jazz, rap, and all shape cultural and literary production. Authors may include Lorraine Hansberry, Ernest Gaines, Gloria Naylor, Ice Cube, Cornell West, Marilyn Riggs, Tupac, India Arie, Percival Everett, Nikki Finney, Natasha Trethewey, Barack Obama, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.
Course Descriptions

ENG 395 INDEPENDENT WORK. (1-3)
For undergraduate majors in English with high standing. Students pursue an independent course of study, tutorial, or directed project under the guidance of a faculty member, with appropriate assessment and grading (e.g., term paper(s), examinations, final project). Projects are generally proposed and arranged by students themselves, reflecting individual interests and goals. Limited enrollment. Prereq: ENG major with a major GPA of 3.0 or above; prior permission of faculty advisor and ENG chairperson; approved Learning Contract. May be repeated to a maximum of credits. Contact the Director of Undergraduate Studies for information. Provides ENG Major Elective credit.

ENG 399 INTERNSHIP IN ENGLISH-RELATED WORK EXPERIENCE. (1-3)
The Department of English internship is available for qualified students to receive academic credit toward the Bachelor of Arts or Bachelor of Science in English through applied and practical experience with a variety of private and public entities, including but not limited to the University Press of Kentucky. The student will identify a field-, community-based, practical or applied educational experience and locate a sponsor to host their internship, which will be supervised by the designated supervisor on site. Credit based on 60 hours of work per semester. The internship will provide supervised professional experience in public and private sector positions and is intended to introduce students to the skills and working environments of careers for graduates of the English Dept. Students should consult with an English faculty member in advance of registering for this class. A learning contract must be completed by the student, the faculty supervisor, and the on-site internship supervisor, then filed with the English Dept.’s Director of Undergraduate Studies (DUS) in order to receive credit for this course. Credits: 1-3 credit hours, depending on the time required and nature of the internship. Approximately 10 hours a week of internship work equals three credit hours. At midterm, the faculty and on-site supervisor will review progress about the student’s progress so that the faculty member can submit an mid-term grade. English 399 will be graded only on a pass-fail basis. Repeatable for a total of up to 6 credit hours. Prereq: To be eligible for the internship, students must (1) be sophomores, juniors, or seniors, and (2) have completed both parts of the CCR composition and communication requirement.

*ENG 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3)
Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature. Topics taken from law and justice. Topics announced from one semester to the next. May be repeated under different subtitles to a maximum of six credits. Does not fulfill ENG major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: Completion of UK Core Composition and Communication II requirement or equivalent. (Same as WRD 401.)

ENG 405 EDITING ENGLISH PROSE. (3)
This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student’s own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and preparation of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Does not fulfill ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as WRD 405.)

ENG 407 INTERMEDIATE WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)
Continued studies in the writer’s craft, focusing on student work but with increased emphasis on outside reading. Areas of workshop practice include Poetry, Fiction, and Creative Non-Fiction. Prereq: ENG 207 or consent of instructor. May be repeated to a maximum of 9 credits. Provides ENG Major Elective credit and ENG minor credit. Can count only once for ENG Major 400-level course requirement. Required for ENG Imaginative Writing Option. (Same as WRD 407.)

ENG 425 ENVIRONMENTAL WRITING. (3)
Students will consider the way writers address environmental issues by exploring various forms of environmental writing, from personal narrative to literary nonfiction to advocacy. Students will be required to take a mandatory day long field trip to UK’s Robinson Forest. All students must participate in this field trip. Prereq: Completion of Composition and Communication requirement or consent of instructor.

ENG 440G STUDIES IN BRITISH LITERATURE: (Subtitle required). (3)
An advanced British Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 450G STUDIES IN AMERICAN LITERATURE: (Subtitle required). (3)
An advanced American Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit.

ENG-460G STUDIES IN AFRICAN-AMERICAN LITERATURE: (Subtitle required). (3)
An advanced African-American literature course on a period, a theme, a genre, or one or more authors. Possible areas of study include transatlantic connections, diasporic communities, or comparisons between English language authors and foreign authors in translation. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major Elective credit and ENG minor credit.

ENG 470G COMPARATIVE AND TRANSLATIONAL STUDIES IN LITERATURE: (Subtitle required). (3)
An advanced literature course focusing on comparative or transnational periods, themes, and authors or national or ethnic traditions, or one or more authors. Possible areas of study include transatlantic connections, diasporic communities, or comparisons between English language authors and foreign authors in translation. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major Elective credit and ENG minor credit.

ENG 480G STUDIES IN FILM (Subtitle required). (3)
An advanced course in the history, analysis, criticism, and theory of film. Viewing of films outside of class is required. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. ENG 280 strongly recommended. Provides ENG Major Elective credit and ENG minor credit.

ENG 490G STUDIES IN LITERATURE AND GENDER: (Subtitle required). (3)
An advanced course focusing on any aspect of gender in literary studies, such as gender and genre, gender issues in a particular literary period, masculinity, minority women writers, or feminist literary theory. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 491G STUDIES IN THEORY: (Subtitle required). (3)
An advanced course on any aspect of literary or critical theory, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 492C CULTURAL STUDIES: (Subtitle required). (3)
An advanced course on any aspect of cultural studies, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 495 MAJOR HONORS SEMINAR (Subtitle required). (3)
An advanced undergraduate seminar in literature, film, or cultural study. Honors seminar topics will be announced the preceding year. Required for graduation with Departmental Honors in English. Enrollment limited to junior and senior ENG majors. May be repeated up to 9 hours under different subtitles. Fulfills ENG Major Elective credit. Prereq: ENG major, completion of premajors requirements and ENG 330; ENG major GPA of 3.5 or above. Enrollment limited to junior and senior ENG majors.

ENG 507 ADVANCED WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)
For the student who has shown marked talent and commitment, this course provides a rigorous workshop among peers and includes additional attention to outside reading. Each student will produce a chapbook of poems or stories. See departmental listings for different offerings per semester. May be repeated to a maximum of 6 credits. Required for the ENG Imaginative Writing Option under two different subtitles. Provides ENG Major Elective credit and ENG minor credit.

ENG 509 COMPOSITION FOR TEACHERS. (3)
A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do quite a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC 509.)

*ENG 512 ANALYSIS OF ENGLISH SYNTAX. (3)
Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: LIN 221 or graduate standing. (Same as LIN 512.)

ENG 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as related to other disciplines, (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 513.)

ENG 514 TEXTUAL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 514.)
Course Descriptions

ENG 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE. (3) This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English(s), culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. Fulfills the ENG Early Period requirement. Provides ENG Major Elective Credit and ENG Minor credit. (Same as LIN 518.)

ENG 519 INTRODUCTION TO OLD ENGLISH. (3) An introduction to the study of the Old English language and its literature from the 5th to the 11th centuries. Emphasis on learning the basic vocabulary and grammar of Old English in the West Saxon standard written dialect. Readings include excerpts from prose and poetry, the basics of Old English verse forms and alliterative poetry, and some historical and cultural background. The course is particularly recommended for students of European languages (especially German) and Linguistics; some basic background in Linguistics is recommended but not required. Fulfills ENG Major Early Period Requirement. Provides ENG Major Elective credit and ENG Minor credit.

ENG 570 SELECTED TOPICS FOR ADVANCED STUDIES IN LITERATURE (Subtitle required). (3) Study of special topics that cut across the normal divisions of genre or periods, such as the relations of literature to other disciplines; metaphor and symbolism; interpretative theory. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor.

PROSEMINARS: The purpose of the proseminar courses (600 level) is to impart through lectures and discussion both the facts of literary history and the techniques of literary analysis. They are, therefore, designed to go beyond the mere information level to techniques of contemporary literary criticism and scholarship.

ENG 600 BIBLIOGRAPHY AND METHODS OF RESEARCH. (3) An introduction to descriptive and enumerative bibliography, textual criticism, and historical scholarship.

ENG 601 ESSAYS AND CREATIVE NONFICTION. (3) Study and practice in nonfiction writing, including literary nonfiction, literary journalism, personal essays, and creative nonfiction. May not be repeated for graduate credit. Prereq: Admission to the graduate program or consent of instructor.

ENG 605 EDITING. (3) ENG 605 offers instruction in the history of U.S. publishing and extensive practice in verification of sources, fact checking, copy editing, and manuscript preparation. Prereq: Admission to Graduate School or consent of instructor.

ENG 607 GRADUATE WRITING WORKSHOP (Subtitle Required). (3) A course for experienced writers who have some knowledge of contemporary American literature. Equal emphasis on students’ original work and outside reading. Each student will produce a chapbook of poems or stories and write a short introduction to it. May be repeated with the same subtitle to a maximum of six credits. Prereq: Consent of instructor. #ENG 608 CRAFT OF WRITING (Subtitle required). (3) This course examines the craft, emphasizing techniques, style, and structure. May be offered in each genre offered in the MFA degree program. At least 6 hours of courses related to the study of creative writing genres such as Craft of Poetry, Fiction, or Nonfiction, with emphasis on themes such as: Ekphrastic Writing, Experimental Forms, Working Class Themes, etc. Prereq: This course is open only to MFA in Creative Writing candidates or by permission of the instructor.

ENG 609 COMPOSITION FOR TEACHERS. (3) A course in the theory and practice of teaching English composition at the college level. Required of first-year teaching assistants in the Department of English, the course is structured to match the ordering of English 101 so that the practical work of college writing and the theoretical considerations of English 609 will be mutually reinforcing.

ENG 610 STUDIES IN RHETORIC. (3) This course introduces theories of rhetoric with readings drawn from major rhetoricians and rhetoricians; applies theory to the practice of teaching college writing, with special emphasis on argumentation, the subject of English 102; and provides an opportunity for teaching assistants to get help from the teacher and from their peers in responding to and evaluating students’ written work. This course, required of second semester teaching assistants in the Department of English, continues the work of English 609. Prereq: ENG 609 or equivalent.

ENG 611 LITERATURE TEACHING SEMINAR. (3) This seminar prepares graduate students to teach literature classes at the University of Kentucky and elsewhere. It offers instruction and guidance in curriculum design, syllabus creation, reading and work exercises, and more. Students develop a portfolio of course materials and refine skills for teaching literature and film at the introductory as well as advanced levels of an undergraduate curriculum. This course is not a requirement for completing the Ph.D. degree, but if required for graduate instructor candidates to be approved to teach their own introductory-level literature and film classes in the University of Kentucky English Department curriculum.

ENG 612 STRUCTURE AND STYLISTICS OF FRENCH. (3) A study of the history and structure of French with an emphasis on contemporary features. (Same as Fr/Lin 612.)

ENG 619 BEOWULF. (3) Translation and study of Beowulf. ENG 518 or ENG 519 recommended as background courses.

ENG 620 STUDIES IN MIDDLE ENGLISH LITERATURE. (3) A study in depth of selected writers and movements.

ENG 621 STUDIES IN CHAUCER. (3) A study in depth of selected works of Chaucer, especially Troilus, in relation to aspects of the medieval literary tradition.

ENG 622 STUDIES IN RENAISSANCE LITERATURE: 1500-1600. (3) Intensive study of selections from the drama, poetry, and prose of the period.

ENG 625 STUDIES IN RENAISSANCE DRAMA EXCLUSIVE OF SHAKESPEARE. (3) Intensive study of one or more major authors and the relevant criticism and scholarship. Prereq: ENG 425 or ENG 426 or ENG 428 or equivalent.

ENG 630 STUDIES IN ENGLISH LITERATURE: 1660-1720. (3) Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG 631 STUDIES IN ENGLISH LITERATURE: 1720-1780. (3) Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG 633 STUDIES IN ROMANTICISM. (3) Readings in selected authors and relevant scholarship.

ENG 638 STUDIES IN VICTORIAN LITERATURE. (3) Readings in the poetry and prose non-fiction of the period with relevant scholarship.

ENG 642 STUDIES IN MODERN BRITISH LITERATURE. (3) Selected writers, works, and movements in the modern period with concentration on the period from 1890 to 1945.

ENG 651 STUDIES IN AMERICAN LITERATURE BEFORE 1860. (3) A study in depth of selected writers and movements.

ENG 652 STUDIES IN AMERICAN LITERATURE: 1860-1900. (3) A study in depth of selected writers and movements.

ENG 653 STUDIES IN AMERICAN LITERATURE SINCE 1900. (3) A study in depth of selected writers and movements.

ENG 656 BLACK AMERICAN LITERATURE. (3) An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as AAS 656.)

ENG 660 MODERN CRITICAL THEORY (Subtitle required). (3) Detailed examination of one or another topic in contemporary theory of interpretation, such as literature and analytical philosophy, phenomenology and literature, structuralism, Marxism, psychoanalysis. May be repeated up to 6 credit hours under different subtitles.

ENG 661 STUDIES IN FILM. (3) Comprehensive study of the history, theory, and criticism of film, with concentration on a series of major American and foreign films. Viewing of films outside of class is required. May be repeated up to 9 credit hours under different subtitles.

ENG 682 STUDIES IN FICTION. (3) A study in depth of selected types of fiction.

ENG 690 STUDIES IN LITERATURE AND GENDER (Subtitle required). (3) This course focuses on gender as a primary category for literary analysis. Topics will vary, from a group of authors, an historical period or an aesthetic movement, to a genre, an theme, or an aspect of literary theory. May be repeated under different subtitles to a maximum of six credits.

ENG 691 READINGS IN RHETORIC (Subtitle required). (1) This reading course allows graduate students to integrate readings in Rhetoric and Composition scholarship and provides an opportunity to discuss research with faculty associated with Rhetoric and Composition. In addition to readings, students will be expected to keep a reading journal or complete a brief annotated bibliography. May be repeated to a maximum of three credits. Prereq: ENG 609 and ENG 610 or consent of instructor.

ENG 700 TUTORIAL FOR PH.D. CANDIDATES. (3) This course allows Ph.D. candidates who have completed all coursework requirements to work together under the direction of a senior faculty member in preparing for and taking the Qualifying Examination. May be repeated to a maximum of fifteen credits. Prereq: Admission to the Ph.D. program and instructor’s consent.

ENG 720 SEMINAR IN MEDIEVAL LITERATURE. (3) Recent topics: medieval fiction; Chaucer and the Gothic mind. May be repeated to a maximum of six credits.
Course Descriptions

ENG 722 SEMINAR IN RENAISSANCE STUDIES (Subtitle required). (3)
Advanced work on a specific author or topic. Recent topics: Eco-Milton, Romance narrative. May be repeated to a maximum of nine credits.

ENG 730 SEMINAR IN 18TH CENTURY LITERATURE. (3)
Recent topics: neoclassic satire. May be repeated to a maximum of six credits.

ENG 735 SEMINAR IN ROMANTIC LITERATURE. (3)
Recent topics: Keats; Wordsworth. May be repeated to a maximum of six credits.

ENG 738 SEMINAR IN VICTORIAN LITERATURE. (3)
Seminar in Victorian literature. May be repeated to a maximum of six credits.

ENG 740 SEMINAR IN 20TH CENTURY BRITISH LITERATURE. (3)
Seminar in 20th century British literature. May be repeated to a maximum of six credits.

ENG 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ENG 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ENG 750 SEMINAR IN COLONIAL LITERATURE. (3)
Seminar in Colonial Literature; may be repeated to a maximum of six credits.

ENG 751 SEMINAR IN AMERICAN LITERATURE: 1800-1860. (3)
Seminar in American literature 1800-1860. Recent topics: Emerson and Melville; Hawthorne. May be repeated to a maximum of six credits.

ENG 752 SEMINAR IN AMERICAN LITERATURE: 1860-1900. (3)
Seminar in American literature 1860-1900. Recent topics: Whitman and Dickinson. May be repeated to a maximum of six credits.

ENG 753 SEMINAR IN AMERICAN LITERATURE SINCE 1900. (3)
Seminar in American literature since 1900. Recent topics: Faulkner, Wolfe, and Warren. May be repeated to a maximum of six credits.

ENG 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ENG 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ENG 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ENG 771 SEMINAR IN SPECIAL TOPICS (Subtitle required). (1-3)
Seminar in special topics; includes genres and subject matters such as symbolism which cover more than one period of literature. Recent topics: symbolism and allegory. May be repeated up to 9 credit hours under different subtitles.

ENG 780 DIRECTED STUDIES. (1-6)
Independent work devoted to study and research on specific subjects and problems according to the interests and needs of individual students. May be repeated to a maximum of nine credits. Permission of chairperson required.

*ENG 781 SEMINAR IN FILM (Subtitle required). (3)
Seminar in special topics in film, such as directors, genres, historical periods, film and literature, film theories, and film movements. Viewing of films outside of class is required. May be repeated under different subtitle to a maximum of nine credits.

ENS Environmental Studies

ENS 200 INTRODUCTION TO ENVIRONMENTAL STUDIES. (3)
A broad-ranging multidisciplinary introduction to current environmental issues and problem solving presented through a series of case studies. Case studies incorporate contemporary environmental themes including industrialization, resource use, and pollution; changing land use patterns; global warming and deforestation; biodiversity; political regulation; economic resources; cultural attitudes toward nature. Each case study will present environmental issues as scientific problems with social, political, philosophical, and economic causes and consequences. Emphasis is placed on understanding and combining different approaches to environmental problems and on proposing public policy solutions.

ENS 201 ENVIRONMENTAL AND SUSTAINABILITY STUDIES I: HUMANITIES AND SOCIAL SCIENCES. (3)
This course will introduce the core ideas, theoretical concerns and practical approaches to environmental studies framed within the disciplines of the humanities and social sciences. Students will study human interactions with the environment, both natural and built, and inter-human relations conditioned by local and global environmental factors. Students will obtain a basic conceptual and historical understanding of the nature and value of their local, regional, and global environment.

ENS 202 ENVIRONMENTAL AND SUSTAINABILITY STUDIES II: NATURAL SCIENCE AND POLICY. (3)
This is an introduction to natural science and policy as they pertain to understanding environmental studies. The course will address the scientific foundation to understanding the nature of current environmental issues and how they might be addressed individually and through governmental regulation.

ENS 300 SPECIAL TOPICS (Subtitle required). (1-4)
Special topics in environmental studies. This course permits the offering of special topics in order to take advantage of faculty specialists. Course topic must be approved by the Environmental Studies Program Director. Prereq: Variable, when topic is identified.

ENS 395 INDEPENDENT WORK. (1-4)
Under special conditions selected students may investigate specific environmental issues and problems. The instructor and the student will agree on a formal semester plan/learning contract, which will be filed with the Environmental Studies Program Director and will include weekly reports to the instructor. Prereq: Environmental Studies minor, 3.0 G.P.A., consent of instructor.

ENS 400 SENIOR SEMINAR (Subtitle required). (3)
This course will draw on your interdisciplinary understanding of environmental issues and your problem-solving capacities developed while fulfilling Environmental Studies Minor requirements. It is a participatory capstone seminar designed to utilize and test your critical ability for independent thinking organized around specific environmental issues. Independent library work and writing assignments will be required in order to prepare for weekly, interactive topical seminar meetings. Group projects will culminate in individual term papers/projects on different aspects of the environmental issues under discussion. Specific topics will vary. Prereq: ENS 200 and 12 hours of course work from approved Environmental Studies courses (or instructor’s consent). This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENT Entomology

ENT 110 INSECT BIOLOGY. (3)
Overview of the biology of insects. Emphasizes how this enormously abundant and important group of animals has resolved the basic challenges of survival and reproduction. Principles of physiology, behavior, ecology, and evolution are introduced using insects as examples. The roles of both beneficial and detrimental insects will be discussed. [Offered in fall, spring and summer.]

ENT 300 GENERAL ENTOMOLOGY. (3)
Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as BIO 300.) [Offered in fall only.]

ENT 310 INSECT PESTS OF FIELD CROPS. (3)
Identification, life histories and control of insects attacking field crops, especially those of importance to Kentucky. The damage that these insects cause, the reasons for their abundance, and alternatives in control practices will also be emphasized. Lecture, two hours per week; laboratory, two hours per week. [Offered in fall only.]

ENT 320 HORTICULTURAL ENTOMOLOGY. (2)
A detailed coverage of the insects and mites attacking turf, ornamentals, greenhouse plantings, vegetables and fruits, with emphasis on field recognition of the pests and their damage. Lecture, two hours per week; laboratory, two hours per week. [Offered in fall only.]

ENT 340 LIVESTOCK ENTOMOLOGY. (2)
Biology and behavior of insects and other pests attacking livestock, poultry, pets and wildlife. Current control methods are discussed. For students interested in livestock production, farm management, dairy science, poultry science, and preveterinary medicine, as well as general agriculture. [Offered in spring only.]

*ENT 360 GENETICS. (3)
The basic principles of heredity as currently understood from evidence accumulated in classical, cytogenetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: BIO 148, BIO 152 and CHE 105 or consent of instructor. (Same as ABT 360.) [Offered in fall only.]

ENT 395 INDEPENDENT WORK. (1-3)
Special problems for individual students who are capable of pursuing independent investigations in the various areas of entomology. May be repeated to a maximum of six credits. Prereq: ENT 300. [Offered in fall, spring and summer.]

ENT 399 FIELD BASED/COMMUNITY BASED EDUCATION. (1-6)
Field-based or community-based experience in entomology under supervision of a faculty member. Pass/Fail only. Prereq: Permission of faculty member and department chairperson.
and completion of a departmental learning agreement before registration. [Offered in fall, spring and summer.]

ENT 402 FOREST ENTOMOLOGY. (3)

The principles of forest entomology, including the detection, collection, identification, appraisal of damage, and control of forest insect pests. Lecture, two hours; laboratory, two hours. Prereq: One year of biology or consent of instructor. (Same as FOR 402.) [Offered in fall only.]

ENT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)

Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription, and translation of DNA, as well as RNA processing, recombination and the theoretical underpinnings of genetic engineering. Prereq: ABT/ENT 360 or BIO 304 or consent of instructor. (Same as ABT 460.) [Offered in spring only.]

ENT 461 INTRODUCTION TO POPULATION GENETICS. (3)

This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/FOR 461.) [Offered in spring only.]

ENT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY. (3)

An introduction to modern evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). (Same as ABT 505.)

ENT 530 INTEGRATED PEST MANAGEMENT. (3)

Principles of insect damage, populations and distributions. Various types of natural and applied control, including problems of insecticide toxicity, resistance and residues. Prereq: ENT 300 or ENT 310 or ENT 320.

ENT 550 SPIDER ECOLOGY AND BEHAVIOR. (3)

Spiders are fascinating in their own right, and also are major predators in terrestrial food webs. This course covers the ecology and behavior of spiders as model predators in systems ranging from undisturbed forests and meadows to agroecosystems and the urban landscape. While focusing on spiders, the course also interweaves two general sub-themes: (1) the advantages of employing diverse approaches (e.g., field and laboratory experiments, non-manipulative observations, and meta-analyses) in ecological and behavioral research; and (2) the strengths, and limitations, of using model organisms to develop and test theory. Prereq: One year of undergraduate biology.

ENT 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)

Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: One year of biology. (Same as BIO 561.) [Offered in fall – odd years.]

ENT 563 PARASITOLOGY. (4)

Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as BIO 563.)

ENT 564 INSECT TAXONOMY. (4)

A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as BIO 564.) [Offered in fall – even years.]

ENT 568 INSECT BEHAVIOR. (3)

The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as BIO 568.) [Offered in spring – odd years.]

ENT 574 ADVANCED APPLIED ENTOMOLOGY. (4)

The objective of this course is to present the student with advanced concepts of applied entomology in a system-specific context. Each week, the insect problems associated with a different commodity/production system will be presented so as to illustrate a different broadly-based theme. Prereq: An introductory entomology course and consent of instructor.

ENT 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (3)

This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/FOR 606.)

ENT 607 ADVANCED EVOLUTION. (2)

This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/FOR 607.) [Offered in fall only.]

ENT 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)

This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/FOR 608.)

ENT 609 POPULATION AND COMMUNITY ECOLOGY. (3)

This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/FOR 609.) [Offered in fall only.]

ENT 625 INSECT-PLANT RELATIONSHIPS. (3)

This course examines the natural history, ecology, and evolution of insect-plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multiple-pest level interactions, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as BIO 625.) [Offered in spring – odd years.]

ENT 635 INSECT PHYSIOLOGY. (4)

Study of insect physiological processes including development, digestion, reproduction, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq: Consent of instructor. (Same as BIO 635.) [Offered in spring – even years.]

ENT 636 INSECT MOLECULAR BIOLOGY. (3)

Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq: ENT/BIO 635 or consent of instructor. (Same as BIO 636.) [Offered in spring – odd years.]

ENT 660 IMMATURE INSECTS. (3)

Bionomics, structure and classification of immature stages of insects; practice in their identification. Lecture, one hour; laboratory, six hours. Prereq: BIO 570 or ENT 564, or consent of instructor.

ENT 665 INSECT ECOLOGY. (3)

The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as BIO 665.) [Offered in fall – even years.]

ENT 667 INVASIVE SPECIES BIOLOGY. (3)

This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/FOR 667.) [Offered in fall – odd years.]

ENT 670 SCIENTIFIC PUBLISHING: PROCESS AND ETHICS. (2)

An introduction to scientific publishing, including types of scientific journals, choosing where to publish, the structure of scientific papers, the peer review process, data management and archiving, post-publication promotion of research, metrics of scientific impact such as impact factors and altmetrics, and publication ethics.

ENT 680 BIOLOGICAL CONTROL. (3)

Principles related to the use of arthropods to suppress populations of arthropod pests and weeds. Includes historical perspective, ecological relationships, and contemporary issues related to the conservation and manipulation of arthropod predators, parasitoids, and herbivores. Prereq: ENT 300 or equivalent. [Offered in spring – even years.]

ENT 684 PHYLOGENETIC SYSTEMATICS. (3)

Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as BIO 684.)

ENT 695 SPECIAL TOPICS IN ENTOMOLOGY (Subtitle required). (3)

Special topical or experimental courses in entomology for graduate students. Special title required and must be approved by the chairperson of the Department of Entomology. A particular title may be offered twice at most under ENT 695. Students may not repeat under the same subtitle. Prereq: Will be set by instructor. [Offered in fall and spring.]

ENT 748 MASTER’S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall and spring.]
Course Descriptions

ENT 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ENT 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall and spring.]

ENT 678 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

ENT 679 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely. [Offered in fall and spring.]

ENT 770 ENTOMOLOGICAL SEMINAR. (1) Discussion of current research problems in entomology. May be repeated to a maximum of six hours. [Offered in fall and spring.]

ENT 780 SPECIAL PROBLEMS IN ENTOMOLOGY AND ACAROLOGY. (2-3) Investigations of chosen insect problems, including original work. Discussion and assignment of current insect subjects. May be repeated to a maximum of six credits. Prereq: Consent of instructor. [Offered in fall and spring.]

EPE 522 PSYCHOLOGICAL AND EDUCATIONAL TESTING AND MEASUREMENTS. (3) Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examination criteria for evaluation and marking, and other rating systems. [Same as EDC/EDP 522.]

EPE 525 CULTURE, EDUCATION AND TEACHING ABROAD. (3) Introduction to theory and practice of intercultural communication, cross-cultural (especially international experience), and teaching with a global perspective, plus an opportunity for country-specific research. Required for those wishing to student teach overseas. (Same as EDC 554.)

EPE 555 COMPARATIVE EDUCATION. (3) Analytic and comparative study of contemporary education in selected countries, with emphasis on the historical development and total cultural context of educational programs in non-Western countries. Informal as well as formal agencies and programs will be studied with particular attention to recent reforms and innovations. Prereq: Junior, senior or graduate status, or consent of instructor.

EPE 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3) This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate of Education; or consent of the instructor. (Same as EDP 557.)

EPE 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3) The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EPE/EPS 557 or equivalent. (Same as EDP 558.)

EPE 571 WRITING SEMINAR IN EDUCATIONAL RESEARCH. (3) This course is intended to familiarize students with the academic writing process and expectations. Topics include: qualitative writing, quantitative writing, and program evaluation report writing. Other specific writing topics may also be explored.

EPE 600 SOCIAL FOUNDATIONS TOPICS FOR SECONDARY EDUCATION. (1-3) Study of philosophical, historical, and sociological dimensions of contemporary educational policy issues. Topical policy controversies, such as equality of educational opportunity, tuition tax credits, and religious education, will be examined.

EPE 601 PROSEMINAR. (1) Introductory survey of the bibliographic parameters and research approaches to educational policy studies and evaluation. Graduate faculty resources and typical research problems are introduced. Emphasis upon significance and importance of thesis writing and dissertation in graduate studies. Required, first semester of study, for all degree students in the department. Prereq: Graduate standing or consent of instructor.

EPE 602 SOCIAL POLICY ISSUES AND EDUCATION. (1-3) Study of philosophical, historical, and sociological dimensions of contemporary educational policy issues. Topical policy controversies, such as equality of educational opportunity, tuition tax credits, and religious education, will be examined.

EPE 603 POLITICS OF EDUCATIONAL LEADERSHIP. (3) This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Graduate standing. (Same as EDL 704.)

EPE 612 INTRODUCTION TO HIGHER EDUCATION. (3) This course is intended to give the student a broad overview of contemporary higher education. The course examines major trends, issues, and problems facing colleges and universities from a variety of perspectives, including historical, administrative, public policy, governance, and faculty. The primary objectives of the course are to assist the student in developing an understanding of 1) various components and operations of higher education and 2) the interaction of these components and operations.

EPE 619 SURVEY RESEARCH METHODS IN EDUCATION (Subtitle required). (3) Survey research is one of the most common and useful methods for gathering data in educational research. Obtaining valid and reliable survey results requires the administration of instruments that provide valid and reliable measures of the variables selected for observation. This course will focus on principles of measurement and procedures for developing a variety of survey
instruments and for determining their validity and reliability. It is designed to teach students both how to improve the questions and design instruments. The theory and practice of survey research techniques are introduced, with a focus on psychology, sociology, statistics, and computer science. The purpose of this course is to familiarize participants with basic features of the design and implementation of surveys, and acquaint them with some principles and underlying theory from disciplines that have traditionally used surveys most heavily. The course will cover major stages of the survey process, including hypothesis and problem formulation, study design, sampling, questionnaire design, interviewing techniques, pretesting modes of data collection, and data cleaning, management, and analysis. The course involves lectures, readings, and discussions. Students are encouraged to bring materials related to their own research interests. The course will provide an overview of the theoretical and experimental literature related to question and questionnaire design as well as focusing on practical issues in the design, critique, and interpretation of survey questions that are often not taught in formal courses. There will be exercises both in and outside of class to reinforce both theory and practice.

Prereq: EPE/EDP 557 or an equivalent course; an introductory statistics course.

EPE 620 TOPICS AND METHODS OF EVALUATION. (3)

An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed, and to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EDP 620/SOC 622.)

EPE 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)

An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as ANT/EDP 621.)

EPE 622 COLLEGE AND UNIVERSITY FACULTY. (3)

This course considers college and university faculty in their roles as researchers, teachers, and community/institutional servants. The class considers from various theoretical perspectives faculty who faculty are, what they do, and how they relate to the environments and cultures in which they work. Prereq: EPE 612 or consent of instructor.

EPE 628 ETHICS AND EDUCATIONAL DECISION MAKING. (3)

Examination of ethical theories upon which educational evaluations are based and upon which they become the basis for educational policies. Theories considered include classical and rule utilitarianism, Rawlsian social justice, behavioristic, critical, and hermeneutic theories of value. Prereq: EPE 603 or consent of instructor.

EPE 632 STUDENT SERVICES. (3)

This course focuses on students services (broadly defined) and those who work with college and university students outside of the academic arena. The course not only surveys the history of student services but critically examines its theoretical bases and current practices with special attention paid to the relationship between student services and other segments of campus. Prereq: EPE 612 or consent of instructor.

EPE 640 PHILOSOPHY OF EDUCATION. (3)

This course is designed to enhance the professional educator’s competence in analyzing and evaluating educational policies and programs. Theoretical frameworks, philosophical methods, and current educational debates are examined. May be repeated one time for a maximum of six credits. Prereq: Two semester hours in education or permission of instructor.

EPE 651 HISTORY OF EDUCATION IN THE UNITED STATES. (3)

A history of the growth and development of education in the United States from earliest colonial times to the present, including recent movement and trends.

EPE 652 HISTORY OF EDUCATIONAL THOUGHT. (3)

Description and critical examination of the core ideas of leading educational theorists in the history of Western culture. Emphasis upon the societal and cultural conditions in which the ideas emerged, and the relevance of these ideas to contemporary educational policy concerns.

EPE 653 HISTORY OF HIGHER EDUCATION. (3)

Social and institutional history of higher education which will include selected topics in European culture and education and which will emphasize the development of the American college and university. An investigation of distance learning (DL) courses that will be offered via formats and media provided by the University of Kentucky Distance Learning Center. It will be asynchronous in character, using standard Distance Learning internet capabilities.

EPE 655 COMPARATIVE HIGHER EDUCATION. (3)

This seminar will explore comparative methods and theoretical frameworks in international higher education research. Students will examine questions of access, quality, and accountability in tertiary education, student mobility within nations and internationally, and the process of internationalization and regional collaborations in higher education in the US and abroad.

EPE 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)

This is a statistics-oriented course that focuses on various aspects of regression analysis (general and generalized linear models). Topics to be covered include: bivariate correlation and regression, simple and multiple regression, logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), among other things. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) for the data in hand, and interpreting regression analysis results using the right language. Students will gain requisite foundation knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals. The course will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, STATA, or R). Prereq: EPE/EDP 558 or consent of instructor. (Same as EDP 660.)

EPE 661 SOCIOLOGY OF EDUCATION. (3)

A study of schooling and education using basic analytic paradigms of sociology. Emphasis on schools as formal organizations and education in a changing, technologically oriented and stratified society. Prereq: SOC 101 or equivalent. (Same as SOC 661.)

EPE 663 FIELD STUDIES IN EDUCATIONAL INSTITUTIONS. (3)

Field research in an educational setting. Questions of theory, method, and application examined. Students plan and implement a study under faculty supervision. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EPE 665 EDUCATION AND CULTURE. (3)

An analysis of the cultural role and function of educational institutions and processes. Topics include education as cultural transmission, the community context of education, cross-national studies of schools, and implications of anthropological approaches for teacher training.

EPE 667 EDUCATION AND GENDER. (3)

The course examines the relationships between gender and education in U.S. society. The focus will be on the formation and enactment of gender within social and educational institutions. Using a variety of source materials and theories, we will address the following questions: How and what do educational institutions teach about gender? And how do females and males respond to these learning contexts? In what ways are social class, race and ethnicity important in engendering our lives? How does schooling contribute to the differential experiences of women and men in their transitions to adult work in the domestic and waged labor forces? How can education contribute to societal changes in sex equity?

EPE 669 ORAL HISTORY. (3)

This course is an introduction to oral history methodology and theory. It is designed for persons intending to use oral and life history interviews in historical or other qualitative research. The course examines how: oral history projects are initiated, projects are administered, interviews are conducted, and oral history interviews are preserved in archives and libraries. The course also explores the reliability of memory and the utilization of oral histories in public presentations. Readings in the course focus on the development of oral history as a research methodology. Assignments and discussions will provide experience with interviewing, recording and transcribing, editing and publishing oral histories.

EPE 670 POLICY ISSUES IN HIGHER EDUCATION. (3)

A survey of modern tendencies in higher education; scope and development, objectives, organization, administration, curricula, finance, faculty and student personnel. Designed primarily for prospective college administrators, teachers, and registrars.

EPE 672 COLLEGE TEACHING AND LEARNING. (3)

A study of all phases of instruction at the college level. The course will include methods and principles of teaching, utilization of materials in teaching, a consideration of the teaching-learning process as it relates to the individual student, and the evaluation of student progress. A comprehensive course for prospective college teachers.

EPE 674 THEORIES OF STUDENT DEVELOPMENT. (3)

A study of college student behavior, relationship of student personnel to total college program, organization and administration, evaluation, and research of college student personnel.

EPE 675 SOCIOLOGY OF HIGHER EDUCATION. (3)

A study of higher education and society using sociological views and policy perspectives. Topics include inequality and diversity in higher education; universities and colleges as social organizations and cultural institutions; the academic profession, academic departments and disciplines; the social and academic lives of students; as well as the impact of higher education and its relations to labor markets.

EPE 676 ORGANIZATION AND ADMINISTRATION OF HIGHER EDUCATION. (3)

Purposes and scope of higher education, organization, general administration, faculty administration, inter-institutional cooperation, allocation of financial resources, state systems of higher education.

EPE 678 ECONOMICS OF HIGHER EDUCATION. (3)

This course addresses issues of equity and efficiency by analyzing 1) how students, faculty and institutions are influenced by markets and incentives, 2) the economic impact of higher education on students and society, and 3) the financial management of institutions.

EPE 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)

This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales,
Course Descriptions

scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EDP/EPE 660, EPE 621, or equivalent. (Same as EDP 679.)

EPE 680 POLITICS OF HIGHER EDUCATION. (3)
Survey and analysis of the political forces and processes which influence the development and implementation of higher education policies, financing and programs at the federal, state and institutional levels.

EPE 681 HISTORY OF THE UNIVERSITY: GOVERNANCE AND ITS LEGAL CONTEXT. (3)
Identification and analysis of the legal and governance issues in medieval, reformation and American colonial universities and their implications for contemporary issues of governance, autonomy and academic freedom.

EPE 682 HIGHER EDUCATION AND THE LAW. (3)
Case analysis regarding the university as a legal entity, private universities, the constitutionally autonomous university and other public universities, faculty rights, student rights, miscellaneous issues. Prereq: EPE 681 or consent of instructor.

EPE 683 AFFIRMATIVE ACTION AND FEDERAL REGULATION OF HIGHER EDUCATION. (3)
Affirmative Action as a legal concept, history and current application; sexual harassment; special codes; higher education desegregation cases and other miscellaneous issues including copyright, age discrimination, ADA and the Rehabilitation Acts. Prereq: EPE 682 or consent of instructor.

EPE 684 HIGHER EDUCATION AND ATHLETICS: A HISTORICAL ANALYSIS. (3)
Historical analysis of the politics, economics and philosophical implications of intercollegiate athletics programs as part of the American college and university.

EPE 685 THE RESEARCH UNIVERSITY. (3)
Historical analysis of the changing character, missions and roles of research universities in the United States. Emphasis will be on critical examination of large-scale sponsored research and graduate programs.

EPE 686 PHILANTHROPY AND HIGHER EDUCATION. (3)
Social, historical and philosophical development of philanthropy as a significant factor in the character of American higher education and non-profit sector.

EPE 690 THE COMMUNITY COLLEGE. (3)
Comprehensive analysis of community colleges: history, current activity and future; demography, budget, administration. Prereq: EPE 612 or consent of instructor.

EPE 703 PREPARING RESEARCH PROPOSALS. (3)
The goal of this seminar is to provide advanced graduate students with individualized guidance and direction on the preparation of successful research proposals. Typically such proposals will involve major papers, theses, doctoral dissertations, or various forms of sponsored research. Prior to enrolling in the seminar, students will be expected to have successfully completed graduate level courses in research methodology, data collection techniques, and qualitative and/or quantitative data analysis procedures. Prereq: 6 hours graduate level research methods courses.

EPE 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3)
Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EDP 707.)

*EPE 711 ADVANCED QUANTITATIVE METHODS. (3)
This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologies used in methodologically-oriented studies in educational evaluation, education and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, the student will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: EPE 663 or consent of instructor.

EPE 712 ADVANCED PSYCHOMETRIC METHODS. (3)
This course will provide students with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies in educational measurement and evaluation techniques. The goal of this course is to prepare students to analyze data using advanced psychometric methods. It covers topics in the areas of Rasch Modeling, Item Response Theory, Structural Equation Modeling, Advanced Survey Techniques, and Latent Variable Modeling (as well as additional techniques). Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: Intermediate Statistics. (Same as EDP 712.)

EPE 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EPE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EPE 763 ADVANCED FIELD STUDIES. (3)
This course continues an exploration of qualitative research methods in the study of education. It focuses on advanced data collection techniques and particularly on methods of data analysis, representation and writing. The course revolves around an experiential core of individual student research products. May be repeated to a maximum of six credits. Prereq: EPE 663, other introductory qualitative research methods courses or instructor’s permission.

EPE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EPE 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EPE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EPE 773 SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Examination of selected problems in educational policy studies and evaluation. May be repeated to nine credits but no more than three credits may be earned under the same title. Prereq: Consent of instructor.

EPE 778 SEMINAR IN HISTORY OF EDUCATION IN KENTUCKY. (3)
Emphasis upon implications of major trends in national historiography for needed research in education in Kentucky. Prereq: A graduate-level course in the history of education or consent of instructor.

EPE 785 INDEPENDENT STUDIES IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Independent study experience for advanced graduate students to investigate special problems and conduct research in educational policy studies and evaluation. Prereq: Permission of department chairperson required.

EPE 790 INTERNSHIP IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-6)
Formal assignment to a policy analysis or policy research project in an appropriate educational setting. Prereq: Supervision by a departmental faculty member. Prereq: Consent of instructor.

EPE 797 HISTORICAL RESEARCH ON EDUCATION (DL FORMAT). (3)
Advanced historical research and writing on issues in the study of education taught in Distance Learning (DL) asynchronous format.

EPE 798 SEMINAR IN HIGHER EDUCATION. (3)
A critical study of selected problems in higher education. May be repeated to a maximum of nine credits but no more than three credits may be earned under the same title. Prereq: Consent of instructor.
EQM 101 INTRODUCTION TO THE HORSE AND THE HORSE INDUSTRY. (2)
An introduction to the horse and its basic biology, behavior and conformation. Additional subjects related to breeds, activities, the industry and current issues will also be covered. Prereq: Restricted to Equine Science and Management majors. [Offered in fall only.]

EQM 105 EQUINE BEHAVIOR AND HANDLING. (2)
This course covers basic equine behavior and how to handle horses safely in a variety of management situations. Students will use their understanding of equine behavior to develop management strategies and practices for all classes of horse. Prereq: EQM 101 and restricted to Equine Science and Management majors. [Offered in spring only.]

EQM 106 INTRODUCTION TO CAREERS IN THE EQUINE INDUSTRY. (1)
This course will introduce students to more than 30 equine industry-related jobs through guest lecturers, career research, and job shadowing. Guest lecturers will represent various jobs in different disciplines. They will explain how they ended up with the career they have and through question and answer sessions discuss how others can find similar careers and share career advice with the class. Students will also learn about benefits including insurance, retirement, 401K plans, housing, time off, etc. and they will study different career paths in relation to Myers-Briggs personality types. [Offered in spring only.]

EQM 205 EQUINE CAREER PREPARATION. (1)
This course will prepare students for careers in the equine industry by teaching them to prepare for, find, and apply for jobs. It will also help them learn to plan for and design their own business and related marketing, employee relations, and tax issues. [Offered in fall only.]

#EQM 300 TOPICS IN EQUINE SCIENCE AND MANAGEMENT. (1-6)
Study in special topics in equine science and management. May be repeated under a different subtitle to a maximum of fifteen credit hours. Hours are variable with each special course. Prereq: As specified by the instructor.

ES 600 ENVIRONMENTAL SYSTEMS SEMINAR. (1)
A series of presentations by experts in the field on environmental systems topics including topics from the fields of law, economics, social sciences, medicine, biology, engineering and physical sciences. May be repeated to a maximum of two credits.

ES 610 ENGINEERING AND PHYSICAL SCIENCES IN ENVIRONMENTAL SYSTEMS. (3)
Earth systems: environmental impacts of natural and human processes; the role of water systems on the earth including surface water systems, groundwater systems, and water quality and contamination systems; the role of atmospheric systems on earth including the nature and source of air pollutants, meteorological principles, radiation balance, climatology and air pollution, and air pollution control methodology; and processes and principles involved in waste producing organizations. Prereq: Freshman chemistry.

ES 620 ENVIRONMENTAL HEALTH. (3)
An introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as CPH 601.)
ESL 090 ENGLISH FOR INTERNATIONAL TEACHING ASSISTANTS. (3) ESL 090 English for International Teaching Assistants is designed for non-native English-speaking graduate students who either placed into or were recommended to take the course during IT A Language Screening conducted by the Graduate College. This course focuses on skills needed for international graduate teaching assistants to be successful in classroom teaching at the university level. Instruction in the course focuses on improving the communication and pronunciation skills of students with special emphasis on listening/speaking skills, presentation skills, negotiation skills, and other classroom management tools such as interactive and pedagogical communication. Students required to take ESL 090 will be reassessed at the completion of the semester to determine types of TA duties they may perform. Students may not count credit from ESL 090 toward their graduate degree requirements.

ESL 110 SPEAKING FOR ACADEMIC PURPOSES. (3) This course is designed to improve students’ speaking skills so they can participate in academic settings with competencies similar to their native-speaker peers. Prereq: COMPASS Test score determines enrollment.

EXP 455 CAPSTONE EXPERIENCE IN INNOVATION AND ENTREPRENEURSHIP. (3) EXP 455 is designed as the required capstone course to earn the interdisciplinary Certificate in Entrepreneurship Studies at the University of Kentucky. It is aimed at providing students with the opportunity to integrate the knowledge and skills they have acquired as part of the courses they have completed in entrepreneurship as well as provide experiences for students to focus on innovative processes that require entrepreneurial thinking. The course is based upon the National Science Foundation Innovation Corps program and Stanford’s Lean Launch Pad developed by Steve Blank. Students get out of the building, build a company, and test hypotheses related to the nine building blocks of the Business Model Canvas as they complete a capstone project that draws on prior entrepreneurial coursework. The experience culminates in a formal business plan and pitch. The course requires students to apply their critical thinking skills, they synthesize previous coursework and extend and develop their own original ideas in entrepreneurial thinking. By integrating their knowledge and skills, students will also demonstrate that they possess them. Prereq: COM 381 and consent of instructor.

EXP 510 INTERNATIONAL SERVICE-LEARNING. (1-12) This course is designed to introduce students to the theories, concepts, and practices of service-learning in an international setting. Service-learning engages the student in enhancing the common good through the application of learning to service. (Same as MC 500.)

EXP 650 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9) A community-based or field-based learning experience under the supervision of a faculty member. Letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

EXP 651 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9) A community-based or field-based learning experience under the supervision of a faculty member. Pass/Fail. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

FA 501 ARTS-STUDY TOUR. (3) Domestic or foreign tour for intensive study of the arts in major cultural centers. Seminars, tours, and performances are planned according to specific itineraries. Attendance at all scheduled seminars on campus and arts events during the tour plus maintenance of a journal completion of a substantial course project is required. May be repeated to a maximum of six credits.

FAM 253 HUMAN SEXUALITY: DEVELOPMENT, BEHAVIOR AND ATTITUDES. (3) An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. FAM 253 is a University Studies Program Course. Prereq: Three hours in social or behavioral science.

FAM 254 LIFE COURSE HUMAN DEVELOPMENT. (3) An introductory course in human development through the life course of the individual from conception to death, common life transitions, and social change shape people’s lives from birth to death. Roles of family, school, peers, and work will also be examined in relation to human development. Emphasis will be placed on the general theories of human development and their relation to the life course.

FAM 350 CONSUMER ISSUES. (3) An in-depth study of consumer issues, rights, and responsibilities. An examination of how individual and societal decisions affect quality of life, including consumer safety, and the interactions of consumption, health, law, government regulations and the economy. Consumer education and financial literacy will also be emphasized.

FAM 352 ISSUES IN FAMILY SCIENCES. (3) The scientific study of the family. Topics covered will include the important theoretical frameworks in family sciences, historical trends in marriage and family life, gender role theory, family life cycle theory, parenthood, communication, economics of family life, family wellness, capacity building, resource sustainability, integrative elements in life course development, conflict, divorce, stepfamilies and stepparenting, and family strengths. Students will analyze contemporary family issues and take informed, written positions on these issues. This course is required for all Human Environmental Sciences students and Family Sciences minors, and meets American Association of Family and Consumer Sciences accreditation standards. Prereq: Restricted to majors in Human Environmental Sciences; and Family Sciences minors only. Junior or senior standing required.
FAM 354 THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. (3)
Approaches the study of the family from a comparative perspective, emphasizing cross-cultural variability in the structure and function of family. Kinship, household formation, sex roles, and socialization are examined in the context of the family, as well as patterns of interaction, personality formation, and family pathology. Prereq: Declared majors or minors in Dept. of Family Sciences or SW. (Same as SW 354.)

FAM 357 ADOLESCENT DEVELOPMENT. (3)
This course conducts an in-depth analysis of adolescent development and adjustment using an ecological, multi-contextual framework. The primary focus is on scholarship and empirical evidence from a number of disciplines that have direct bearing on the study of adolescent development, with a particular interest in applying a cross-cultural/national comparative lens. Prereq: Declared majors or minors in Dept. of Family Sciences, CTED or consent of the instructor. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 380 INTRODUCTION TO FAMILY INTERVENTION: WORKING WITH FAMILIES AND INDIVIDUALS. (3)
Survey course to introduce students to the various skills, strategies and professional ethical standards used by family scientists in helping relationships. The emphasis will be on learning the skills required to provide support for families and individuals. Prereq: Declared majors or minors in Dept. Family Sciences. FAM 251, may be taken concurrently. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 390 INTRODUCTION TO RESEARCH METHODS. (3)
An introduction to research design, methodology, instrumentation, and data analysis with emphasis on a student’s ability to understand and critique research in human development and family relations. Prereq: Declared majors or minors in Family Sciences; STA 210. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 402 ISSUES IN FAMILY RESOURCE MANAGEMENT. (3)
Examination of family economics and management issues and analysis of their impact on the well-being of families across the major transitions of the family life-cycle. Particular emphasis will be given to family decision-making. Prereq: FAM 251 and declared majors and minors in Dept. Family Sciences.

FAM 403 MATE SELECTION THEORY AND RESEARCH. (1-3)
This course is designed to develop a basic understanding of mate selection theory and research. Processes in the U.S. and abroad will be explored. Sex, love, culture, values, and how these factors play into the process of mate selection will be covered. Students may enroll for 1, 2, or 3 credits.

FAM 473 FAMILY LIFE EDUCATION. (3)
Historical development, current programs, and emerging trends in family life education with particular emphasis on programs and techniques for teaching sex education, marital relations, parenting, and human development. Prereq: Declared majors and minors in Department of Family Sciences and FAM 360.

FAM 475 SPECIAL TOPICS IN FAMILY SCIENCES. (1-3)
Course will focus on selected topics drawn from various areas of family sciences taught by faculty members with special interests and competence. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

FAM 486 FIELD EXPERIENCES IN FAMILY RESOURCE MANAGEMENT. (3)
Field training in community setting. Opportunities for developing competencies in planning and conducting individual and small group experiences related to family resource management. Lecture, one hour; laboratory, seven hours per week. May be repeated to a maximum of six credits. Prereq: Senior standing and consent of instructor.

FAM 495 INDEPENDENT WORK IN FAMILY SCIENCES. (1-3)
Intensive independent scholarship or training in family sciences. May be repeated to a maximum of 12 credits. Prereq: Junior or senior standing.

FAM 499 INTERNSHIP IN FAMILY SCIENCES. (3)
Supervised internship, and capstone course for seniors, in a community, educational, Cooperative Extension, and/or research setting. Emphasis on observation, teaching, conceptualizing research problems, and developing competencies in providing service at the individual, family and/or community level. Students will be required to assist in designing, implementing, and evaluating research and programs related to family life. Presentations, research papers, outside speakers, and career guidance will be significant course components along with the laboratory hours. Lecture, two hours bi-weekly; laboratory, eight hours weekly. May be repeated for a maximum of six credits. Prereq: FAM 251, 352 and 360, and junior or senior standing. Family Sciences majors only.

FAM 502 FAMILIES AND CHILDREN UNDER STRESS. (3)
An investigation of the stressors and crises experienced by families and their members and their efforts to cope with them. Special attention is given to prevention, management and enrichment strategies. Implications for practitioners will be drawn from conceptual frameworks and recent research. Prereq: FAM 352 and declared majors or minors in Dept. of Family Sciences or consent of instructor.

FAM 509 THE U.S. FAMILY IN HISTORICAL PERSPECTIVE. (3)
Study of the evolution of the American family from prehistoric times to the present, with special emphasis on the family in the American Revolution and Civil War periods. Prereq: FAM 251 or consent of instructor.

FAM 544 CULTURAL DIVERSITY IN AMERICAN CHILDREN AND FAMILIES. (3)
Study of cultural and linguistic diversity in American children and families, with special emphasis on Kentucky children and families. Consideration of implications for working with young children and families in educational settings. Study of the variations in beliefs, traditions, values and cultural practices within American society, and their effects on the relationships between child, family, and school. Prereq: FAM 352; declared majors or minors in Dept. of Family Sciences or consent of instructor.

FAM 553 PARENT-CHILD RELATIONSHIPS ACROSS THE LIFECOURSE. (3)
Exploration of the parenting process from a lifespan perspective. Current theory and research, with childrearing application, will be emphasized. Emphasis will be on parent education methods and the changing parental role over the life cycle. Prereq: FAM 352; declared majors and minors in Dept. of Family Sciences or consent of instructor.

FAM 554 WORKING WITH PARENTS. (3)
Principles, techniques, and resources relevant to working with parents as individuals, couples, and families. Survey of related literature on parent effectiveness and parent education is included with relevant field experiences. Lecture, two hours; laboratory, two hours. Prereq: FAM 260 and six hours of 300 level or above in social and behavioral sciences or consent of instructor.

FAM 563 FAMILIES, LEGISLATION, AND PUBLIC POLICY. (3)
A study of the impact of legislation and public policies on the wellbeing of the family. Emphasis on the involvement of individual and families with policies and legal resources as a means for realizing satisfying life styles. Prereq: FAM 251, 352, and declared majors and minors in Dept. of Family Sciences or consent of instructor.

FAM 585 AGING AND ENVIRONMENT. (3)
Explores the elderly person’s changing experience of environment. Physiological, psychological, and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as GEO/GRN 585.)

FAM 600 WORKING WITH MILITARY FAMILIES. (3)
This course provides an overview of military work and family connections. Students will gain familiarity with the challenges unique to military individuals and families and the resources available to address them. Topics to be covered include: theoretical approaches to understanding the impact of military work on individuals and families; demographic profiles of and organizational demands on military service personnel and their families; military service and outcomes for children and adolescents, roles and challenges of military spouses; family policy in the military (including current formal and informal support structures and emerging trends in serving military families). Prereq: Graduate or advanced undergraduate standing and 6 hours of 300 level or above courses in social and behavioral sciences or consent of instructor.

FAM 601 FAMILY PROCESSES. (3)
Advanced study of typical family functioning across the family life course from a family process perspective, including examination of how “normal” differs according to family culture, structure, and history. Prereq: Family Science major.

FAM 622 THE FAMILY’S ROLE IN EARLY CHILDHOOD EDUCATION. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as ED 622.)

FAM 624 PERSPECTIVES ON HUMAN SEXUALITY. (3)
An examination and study of historical and current perspectives of sexuality as it relates to behavioral patterns, cultural attitudes, social policy and practice. Prereq: Knowledge of human behavior and personality theory highly recommended. (Same as SW 624.)

FAM 640 USING THE DSM IN CFT ASSESSMENT. (3)
Students will be trained to use the Diagnostic and Statistical Manual of Mental Disorders (DSM) in family therapy assessment and practice. This will include a basic understanding of the process and procedures for diagnosing individual and family disorders, with the intent that students working with families in the context of a traditional mental health milieu will be able to make appropriate, basic diagnoses. Emphasis on assessing and treating disorders relating to family violence, child abuse, addictions, and substance abuse will be included.

FAM 652 READINGS IN FAMILY THEORY AND RESEARCH. (3)
Entry level course for graduate study of family theory and research. Conceptual frameworks and theoretical approaches are introduced and applied to an array of contemporary family issues, as identified through extensive readings of the empirical research literature. Prereq: Family Science major.

FAM 654 THE LIFE COURSE PERSPECTIVE ON FAMILIES AND INDIVIDUALS. (3)
An investigation of the transitions and changes through the life span are examined using a life course perspective. The life course perspective emphasizes the interplay of human development, agency, linked lives, historical context, and timing of events. These five interlocking concepts will be understood through reading life course research and applying life course principles and concepts to issues in family sciences.
Course Descriptions

**FAM 657 FAMILY SYSTEMS THEORY.**

FAM 657 ADOLESCENT DEVELOPMENT. (3)

A survey of theory and research in adolescent development with particular emphasis on the role of families and implications for working with adolescents. Prereq: Six hours in social or behavioral science.

**FAM 660 AGING ISSUES AND FAMILY RELATIONS.**

The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various skin categories. (Same as SRN 660.)

**FAM 661 HEALTH AND FINANCIAL ISSUES OF AGING FAMILIES.**

This course is designed to discuss health and financial security of older adults and develop empirical research from the perspectives of economics of individual aging and family relations. Emphasis is placed on the following topics: health status of the elderly, economic well-being of older Americans, intergenerational transfers of time and money, family care, giving and work, living arrangements, and empirical research for aging and family. Prereq: STA 570 or equivalent, or consent of instructor.

**FAM 668 ALLOCATION OF FAMILY RESOURCES.**

Study of the contributors to and the recipients of family resources. Emphasis on the methods of assisting families to better allocate family resources through understanding money beliefs and attitudes and practicing financial planning strategies.

**FAM 673 FAMILY LIFE EDUCATION.**

Demographic, social, economic, political, and professional issues related to emerging trends in family life education will be examined. Emphasis will be placed on the development, implementation, and evaluation of family life education curriculum materials. Prereq: FAM 690; FAM 652 or FAM 664; or consent of instructor.

**FAM 685 PROFESSIONAL ISSUES IN COUPLE AND FAMILY INTERVENTION.**

Exploration and definition of the legal, ethical, and professional issues in the practice of couple and family intervention. Emphasis will be on developing professional skills, attitudes, and identity for couple and family intervention.

**FAM 686 THEORY AND METHODS IN COUPLE AND FAMILY THERAPY.**

A survey of theories and methods used in couple and family therapy. Designed to provide students with a knowledge of the theoretical bases for couple and family therapy, including an introduction to procedures used to assess, diagnose and treat couple and family dysfunctions.

**FAM 687 PRE-PRACTICUM: TREATMENT MODALITIES IN COUPLE AND FAMILY THERAPY.**

Phases of couple and family therapy process are presented both in theory and in case study analysis. The presenting problem, history of the problem, family history, identification of dysfunctional dynamics, goals, plan of treatment, and outcome/evaluation are emphasized within the context of organizing family therapy and phases of family therapy. Prereq: Admission to the CFT master’s program or consent.

**FAM 688 FAMILIES IN CRISIS: INTERVENTION STRATEGIES.**

The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as AED 110.)

**FAM 690 RESEARCH METHODS IN FAMILY SCIENCES.**

The study of research techniques and methodological problems involved in research on the family. Emphasis is placed on research concerning interrelations between the family and its environment, development within the family, and family dynamics. Prereq: Consent of instructor.

**FAM 699 FIELD EXPERIENCES IN FAMILY SCIENCES.**

Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

**FAM 703 ADVANCED THEORY AND RESEARCH IN FAMILY ECONOMICS AND MANAGEMENT.**

Advanced study of research and theories in family economics and management with special emphasis given to current issues. Conceptual frameworks developed by leaders in family economics and management are studied and applied through designing and carrying out an empirical study. Prereq: Graduate work in statistics and research methods.

**FAM 740 COUPLE AND SEX THERAPY.**

Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

**FAM 748 MASTER’S THESIS RESEARCH.**

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**FAM 749 DISSERTATION RESEARCH.**

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of FAM 769 residence credit following the successful completion of the qualifying exam.
**FCS 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION.** (3) 
Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as AED 362.)

**FCS 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION.** (3) 
This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. (Same as AED 371.)

**FCS 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION.** (1-3) 
Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as AED 395.)

**FCS 399 EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION.** (1-3) 
A field based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as AED 399.)

**FCS 535 PRINCIPLES AND PHILOSOPHY OF CAREER AND TECHNICAL EDUCATION.** (3) 
Study is made of philosophy, accepted principles, and legislation affecting programs in career and technical education.

**FCS 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION.** (3) 
Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as AED 580.)

**FCS 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION.** (3) 
Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as AED 583.)

**FCS 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION.** (3) 
Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as AED 586.)

**FCS 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION.** (12) 
Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as AED 592.)

**FCS 670 ADVANCED METHODS IN TEACHING CAREER AND TECHNICAL EDUCATION.** (3) 
The principles of method applied to teaching in the field of career and technical education. Prereq: Experience in teaching vocational education.

**FCS 671 YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION.** (3) 
A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as AED 671.)

**FCS 679 ADULT EDUCATION IN CAREER AND TECHNICAL EDUCATION.** (3) 
Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

**FCS 684 CURRENT TRENDS IN CAREER AND TECHNICAL EDUCATION.** (3) 
Class work in current trends and significant developments in career and technical education. May be repeated to a maximum of nine credits.

**FCS 686 INSTRUCTIONAL ASSESSMENT IN CAREER AND TECHNICAL EDUCATION.** (3) 
Instructional assessment of learning and achievement in Career and Technical Education. Middle and high school classrooms is addressed. Focus is placed on test writing, measurement and student achievement. (Same as AED 686.)

**FCS 693 SUPERVISION IN CAREER AND TECHNICAL EDUCATION.** (3) 
This course includes practice in teaching for observation by others, student teaching, and school visiting.

**FIN 250 PERSONAL INVESTING AND FINANCIAL PLANNING.** (3) 
An overview of financial planning, decision making and investing activities. Emphasis is on financial assets such as stocks, bonds, options and futures and their use in meeting investment goals. Discusses IRAs, 401(k)s and other retirement programs. Also considers mutual funds, real estate, insurance and other alternatives. Includes a discussion of asset selection and allocation strategies, risk management methods, and alternative wealth maximization strategies.

**FIN 300 CORPORATION FINANCE.** (3) 
An introduction to the basic principles, concepts, and analytical tools in finance. Includes an examination of the sources and uses of funding, budgeting, present value concepts and their role in the investment financing and dividend decision of the corporate enterprise. Prereq: ECO 201, ECO 202, ACC 201, ACC 202, MA 123, STA 291 or equivalent.

**FIN 360 PRINCIPLES OF REAL ESTATE.** (3) 
An overview of the basic concepts and principles of real estate in the private and public sectors. The course provides an introduction to real estate issues and a foundation for further study in the various specialized areas of real estate and urban development. The course will cover topics related to urban economics, mortgage finance, and real estate valuation.

**FIN 395 INDIVIDUAL WORK IN FINANCE.** (1-6) 
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

**FIN 405 CAPITAL INVESTMENT AND FINANCING DECISIONS.** (3) 
A study of the factors that drive firm decisions to invest in new plant, capital equipment or technology and/or to pursue acquisitions of other firms. Optimal strategies for financing such investments are also a focal point of this capstone course, which involves extensive application of financial concepts and tools. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 360.

**FIN 410 INVESTMENT ANALYSIS.** (3) 
Analysis of corporation statements for investment purposes; the security market; market influences on security prices; effect of interest changes on security prices; and the development of investment programs. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 300.

**FIN 423 INTERNATIONAL FINANCE.** (3) 
The course provides an overview of world trade, international monetary and trade theory, and the theory of exchange rate determination. Focus is on the management of short- and long-term international assets, with particular attention given to the direct investment decision and on financing international operations. Prereq: ACC 302 and a grade of C or better in FIN 405.

**FIN 430 FINANCIAL MODELING.** (3) 
The rapidly increasing computational power of personal computers in combination with the development of dynamic software solutions for computational needs have in the recent few years brought the advantage of fairly sophisticated financial models into the reach of a broader audience. The increasing flow of financial information is converting the skill of quantitative modeling using computers from an advantage into a necessity. This course is designed to provide students with the skills necessary to apply modern financial theories to real world applications using advanced spreadsheet and visual- based programming tools. Prereq: ACC 302 and a grade of B or better in FIN 410.

**FIN 432 PORTFOLIO MANAGEMENT.** (3) 
This course covers the complex characteristics and analysis of individual securities as well as the theory and practice of optimally combining securities into portfolios. Stressing the economic intuition behind the subject matter, this course presents advanced concepts of investment analysis and portfolio management. Prereq: ACC 302 and a grade of C or better in FIN 410.

<th>Prerequisites and Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 452</td>
<td>OPTIONS AND FUTURES.</td>
<td>3</td>
<td>A study of the options and futures markets including institutional aspects, pricing, and regulation. Primary emphasis will be on the uses and applications of options and financial futures. Prereq: ACC 302 and a grade of C or better in FIN 410. *FIN 464 REAL ESTATE FINANCE.</td>
</tr>
<tr>
<td>FIN 465</td>
<td>FINANCIAL INSTITUTIONS MANAGEMENT.</td>
<td>3</td>
<td>A study of the principles and cases in commercial banking practice. Financial institution management practices are studied within the economic, monetary, fiscal and legal framework of the American economy. Prereq: ACC 302, and a grade of C or better in FIN 410.</td>
</tr>
<tr>
<td>FIN 470</td>
<td>FINANCIAL RISK MANAGEMENT.</td>
<td>3</td>
<td>Financial risk is a form of unexpected movements in the foreign exchange rates, interest rates, and commodity prices and their impacts on a firm’s earnings, cash flows, value, and competitiveness are the focus of this course. Various financial derivatives such as forwards, futures, options, and swaps and different hedging techniques, principles, and strategies will be studied. The course also includes the design, development, execution, and evaluation of corporate risk management program. Lecture, discussion, readings, case study, and internet access approaches will be employed. Prereq: ACC 302, FIN 405, and FIN 410.</td>
</tr>
<tr>
<td>FIN 475</td>
<td>FIXED INCOME SECURITIES.</td>
<td>3</td>
<td>The course provides students with an introduction to the fundamentals of fixed income securities and markets. Topics covered include bond pricing, convexity, duration, the yield curve, the U.S. Treasury market, corporate bond markets and mortgage-backed securities. Prereq: A C or better in FIN 410.</td>
</tr>
<tr>
<td>FIN 480</td>
<td>MONEY AND CAPITAL MARKETS.</td>
<td>3</td>
<td>A study of the institutional structure and theory of the money and capital markets, including the types of financial claims traded in such markets, the major buyers and sellers, the regulatory environment, capital market theory, and the forces of supply and demand affecting the level and structure of interest rates. Prereq: ACC 302, and a grade of C or better in FIN 410.</td>
</tr>
<tr>
<td>FIN 485</td>
<td>APPLIED INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT.</td>
<td>3</td>
<td>The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio currently, making all buy/sell decisions. Prereq: Consent of Instructor.</td>
</tr>
<tr>
<td>*FIN 490</td>
<td>SPECIAL TOPICS IN FINANCE (Subtitle required).</td>
<td>3</td>
<td>Varieties by topic.</td>
</tr>
<tr>
<td>FIN 600</td>
<td>CORPORATE FINANCIAL POLICY.</td>
<td>3</td>
<td>A study of financial management from the viewpoint of the corporate financial officer. Areas studied include capital budgeting, capital structure, financing decisions, working capital management, dividend policy, and mergers and acquisitions. Prereq: Graduate standing: ECO 610, ACC 628, MGT 650.</td>
</tr>
<tr>
<td>FIN 623</td>
<td>INTERNATIONAL FINANCIAL MANAGEMENT.</td>
<td>3</td>
<td>This course provides an overview of financial management at the international level. Topics covered include: The nature and uses of international financial markets, the financial behavior of multinational corporations, exchange rates, and hedging in international business. Prereq: FIN 600 and consent of the instructor.</td>
</tr>
<tr>
<td>FIN 630</td>
<td>FINANCIAL MODELING AND ANALYSIS.</td>
<td>3</td>
<td>This course provides students with the skills necessary to apply modern financial theories to real world applications in both corporate finance and investments. Students will get hands-on experience implementing models from areas such as capital budgeting, financial planning, and asset valuation.</td>
</tr>
<tr>
<td>FIN 637</td>
<td>HEALTH FINANCE.</td>
<td>3</td>
<td>This course applies general principles of finance to the financial management of health care institutions. Themes: financial incentives which dictate how health care is delivered are studied and proposals to change these incentives are explored. Prereq: MBA/MPA program status and HA 601, HA 621, PA 623, HA 635.</td>
</tr>
<tr>
<td>FIN 645</td>
<td>CORPORATE INVESTMENT AND FINANCING POLICY.</td>
<td>3</td>
<td>Emphasizing both theory and practice, this course is an in-depth study of long-term corporate investment and financing decisions. Topics include valuation, capital budgeting, cost of capital, leasing, dividend policy, capital structure, and mergers and acquisitions. Prereq: FIN 600.</td>
</tr>
<tr>
<td>FIN 650</td>
<td>INVESTMENTS.</td>
<td>3</td>
<td>Analysis and valuation of securities and the effects on investment decisions. Prereq: Appropriate undergraduate courses in accounting and finance.</td>
</tr>
<tr>
<td>FIN 664</td>
<td>REAL ESTATE FINANCE.</td>
<td>3</td>
<td>A basic orientation in commonly used instruments, institutional structures, and real estate financing policies. Emphasis will be placed on mortgage instruments, mortgage types, effective cost of borrowing, construction lending, financial institutions, loan underwriting, and the secondary mortgage market. Analysis is primarily from the debt investor’s perspective. Prereq: FIN 600 and consent of instructor.</td>
</tr>
<tr>
<td>FIN 680</td>
<td>MONEY, INTEREST AND CAPITAL.</td>
<td>3</td>
<td>A study of the theory of money, interest and financial intermediation. In addition to the theory, the major financial markets, financial institutions and financial instruments will be examined. Finally, the governmental agencies which regulate the industry will be discussed and the overlapping nature of the regulatory process. Prereq: Completion of the first year MBA core or consent of instructor.</td>
</tr>
<tr>
<td>FIN 691</td>
<td>ADVANCED TOPICS IN FINANCE (Subtitle required).</td>
<td>1-3</td>
<td>The study of selected topics in finance for graduate students. Special title required. May be repeated for a maximum of nine credits under different subtitles. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>FIN 695</td>
<td>INVESTMENT MANAGEMENT.</td>
<td>1-6</td>
<td>Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of Instructor.</td>
</tr>
<tr>
<td>FIN 700</td>
<td>SEMINAR IN FINANCIAL THEORY.</td>
<td>3</td>
<td>Primary emphasis on the theory of financial asset valuation. Topics include utility theory, investor reaction to uncertainty, cost of capital theory, dividend theory, portfolio theory, and asset pricing in equilibrium.</td>
</tr>
<tr>
<td>FIN 701</td>
<td>SEMINAR IN FINANCIAL THEORY. II.</td>
<td>3</td>
<td>A continuation of FIN 700. Topics covered include state-preference theory, arbitrage pricing theory, agency theory, and the pricing of contingent claims.</td>
</tr>
<tr>
<td>FIN 740</td>
<td>SEMINAR IN THEORETICAL CORPORATE FINANCE.</td>
<td>3</td>
<td>This is an introduction course in theoretical corporate finance for Ph.D. students. This course has the objective of introducing doctoral students to theoretical research in corporate finance. The emphasis will be on incomplete information models, though a few models driven by other considerations will also be studied. The first part of the course will examine the fundamentals of corporate finance theory (e.g., the theory of the firm’s choice of its capital structure and dividend policy under alternative assumptions), as well as various tool areas in corporate finance (e.g., the notion of moral hazard and agency problems, adverse selection and signaling, various aspects of non-cooperative games with and without incomplete information, and the equilibrium concepts in such games). The second part of the course will focus on a couple of important related topics which are the focus of recent research in corporate finance. Prereq: FIN 600 and 650, or equivalent, or permission of instructor.</td>
</tr>
<tr>
<td>FIN 750</td>
<td>SEMINAR IN INVESTMENT THEORY.</td>
<td>3</td>
<td>Primary emphasis on the implementation of financial theory for the valuation and management of financial assets in an efficient capital market. Topics include mean-variance efficiency, development and testing of the capital asset pricing model, stochastic dominance, and option pricing theory as well as other topics in modern capital market theory. Prereq: FIN 700 or equivalent, or consent of instructor.</td>
</tr>
<tr>
<td>FIN 780</td>
<td>SEMINAR IN FINANCIAL INSTITUTIONS.</td>
<td>3</td>
<td>An examination of the role of financial institutions in the financial system and in the economy, with special emphasis on commercial banks. Topics covered include: theories of financial intermediation, asset-liability management, regulation and deposit insurance, structure of the financial institutions industry, and empirical models of banking. Prereq: FIN 700.</td>
</tr>
<tr>
<td>FIN 791</td>
<td>SEMINAR IN FINANCE (Subtitle required).</td>
<td>1-3</td>
<td>An intensive study of current theory and research in a topic in finance as discussed in scholarly journals. Examples of possible topics include: Capital structure, agency theory, market efficiency, contingent claims. May be repeated with a different subtitle for a maximum of 12 credits. Prereq: Consent of the instructor.</td>
</tr>
<tr>
<td>FIN 795</td>
<td>INDEPENDENT WORK IN FINANCE.</td>
<td>1-12</td>
<td>Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a total of 12 credit hours. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>FM 815</td>
<td>FIRST-YEAR ELECTIVE, FAMILY MEDICINE.</td>
<td>1-3</td>
<td>With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.</td>
</tr>
<tr>
<td>FM 825</td>
<td>SECOND-YEAR ELECTIVE, FAMILY MEDICINE.</td>
<td>1-4</td>
<td>With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Consent of the instructor.</td>
</tr>
</tbody>
</table>
and/or complements required course work in the second-year curriculum. Pass-fail only.
PreReq: Admission to second-year medical curriculum and approval of adviser.

FM 840 FAMILY AND COMMUNITY MEDICINE RESEARCH. (4)
The Department Family and Community Medicine (DFCM) Research Elective is a 4-week course for medical students in Year 4 to experience primary care and community medicine research. Under the mentorship and supervision of a qualified DFCM faculty member, students will develop specific plans for a research experience. Students will be expected to identify a DFCM faculty member and an associated research experience with this member prior to enrollment to this elective course. This experience may involve various aspects of a research experience continuum, such as specific aim and hypotheses generation, study design, literature reviews, implementing interventions, collecting data, data analyses, manuscript preparation, and submission. PreReq: (1) Fourth year medical student. (2) Has identified a Department of Family and Community faculty member and project.

FM 841 OFF-SITE PRECEPTORSHIP IN FAMILY MEDICINE. (1-6)
A senior selective in remote sites designed to acquaint the student with the functions, techniques, and experiences associated with a family physician. Students will function in an office-based practice of family physicians, will live in the community and practice primary health care one-half semester, with a 1/2 credit per week, not to exceed six weeks. PreReq: Admission to the fourth year, College of Medicine.

FM 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her fund of knowledge and clinical competence. PreReq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
FM 850 ACTING INTERNSHIP IN FAMILY MEDICINE
FM 851 CLINICAL CLERKSHIP IN FAMILY MEDICINE
FM 852 INTERDISCIPLINARY APPROACH TO SPORTS MEDICINE
FM 853 INTERNATIONAL CLERKSHIP IN PRIMARY CARE
FM 854 ACTING INTERNSHIP IN RURAL FAMILY MEDICINE
FM 855 HOSPICE AND PALLIATIVE CARE: A CONTINUUM OF CARING
FM 856 INTEGRATIVE MEDICINE

FOR Forestry

*FOR 100 FORESTS AND FORESTRY. (3)
This course covers the interrelated components of forests as well as their growth and importance. Also covered are the general fields of professional forestry including policies, management practices and utilization.

FOR 101 INTRODUCTION TO WILDLIFE CONSERVATION. (3)
An introduction to the history, concepts, and principles of wildlife biology and management. The role of wildlife in ecological systems and human-altered environments will be discussed. Lecture, two hours; laboratory, two hours per week.

FOR 110 NATURAL RESOURCE ISSUES. (1)
A communication intensive course in which students will learn to research current forestry and natural resource issues, interpret popular press and professional publications, evaluate opposing viewpoints, and discuss issues in a clear, effective and professional manner through a variety of communication media.

FOR 150 COMPUTER APPLICATIONS IN NATURAL RESOURCE PROFESSIONS. (2)
Use and application of standard computer software to solve problems. Emphasis will be placed on decision processes and algorithm construction. Additionally, students will learn to construct aesthetic graphs, diagrams, maps and other visual material and will gain experience communicating results in a variety of written formats.

*FOR 200 BASICS OF GEOSPATIAL TECHNOLOGY. (3)
A basic introduction to the various types of maps and their uses, field navigation skills, and map making. The course is heavily field and laboratory based, with an emphasis on hands-on learning and practice. Both traditional technologies, such as compasses, U.S. Geological Survey maps, and aerial photographs as well as newer technologies, such as global positioning systems and geographic information system databases will be employed in carrying out course exercises.

FOR 205 FOREST AND WILDLAND SOILS AND LANDSCAPES. (4)
A study of soil-plant-landscape relationships as related to forestry and the management of natural ecosystems. Emphasis will be on processes and processes of wildland soils, and on interrelationships between soils; composition and productivity of plant communities; and the structure, form, and functioning of landscapes. Lecture, three hours; laboratory, three hours per week. PreReq: At least three credits of biology and three credits of chemistry.

FOR 219 DENDROLOGY. (4)
A study of the basic concepts of botany related to woody species and their use, along with basic soil and site characteristics in the identification of trees and forest vegetation.

FOR 221 WINTER DENDROLOGY. (1)
Identification of 100 species of trees, shrubs, and lianas based upon bark, form, twig, and bud characteristics. Laboratory; four hours per week for one-half semester. PreReq: FOR 219.

FOR 240 FOREST AND NATURAL RESOURCE ETHICS. (2)
A study of the key ethical concepts of conservation, preservation, deep ecology, land ethic, spiritualism/religion, and multiculturalism and their systematics. Emphasis will be given to forest and natural resource issues. Students will gain an understanding of the ethical dilemmas faced by natural resource professionals, and will be able to identify ways of handling these dilemmas, including application of professional associations’ codes of ethics.

FOR 250 STATISTICS AND MEASUREMENTS I. (4)
The application of statistical concepts, computations, and software to forestry sampling and inventory problems. Land, individual tree and timber stand measurement techniques will be covered as will the design and implementation of sampling systems to derive information necessary to meet landowner objectives. PreReq: MA 109 or Calculus.

*FOR 255 FOREST FIRE. (1)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

FOR 260 FOREST PRODUCTS AND WOOD SCIENCE. (4)
An examination of basic material properties of wood, methods by which it is used, and issues and economic conditions in which domestic and global wood markets operate. Concepts covered include species identification, chemical and mechanical properties and their effect on utilization, utilization technologies and their linkage to silvicultural practices, and affiliated issues such as recycling, product certification, environmental concerns, and alternative products.

FOR 261 WOOD SCIENCE AND ANATOMY. (2)
A 2 credit hour course examining the basic structure of wood and how it affects wood’s physical properties. Topics include macroscopic wood properties, composition and structure of wood cells, hardwood and softwood structure, juvenile wood, reaction wood, wood and water relationships, wood deterioration and prevention, and specific gravity and density.

FOR 262 WOOD IDENTIFICATION. (2)
A 2 credit hour course covering the methods and techniques necessary for identifying common wood species. Topics include macroscopic wood properties, hardwood and softwood structure, and the systematic thought processes for successful identification of 27 wood species.

*FOR 280 FOREST RESOURCE POLICY AND LAW. (3)
This course provides a basic knowledge of United States policy and law as it applies to management and administration of forests and related resources on public and private land. Topics include the sources, development, and analysis of relevant laws, administrative regulations, and other policies. Judicial decisions addressing the management of National Forests, biodiversity, water resources, and other specific issues will be discussed.

*FOR 285 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES I. (1)
Course provides students with the knowledge and skills to communicate effectively in a variety of professional situations. Leaders from the forestry sector will meet with students in open seminar settings to discuss various internship and career opportunities, job requirements, and career paths. A key component of these presentations will emphasize the ideas, concepts, and skill sets students need to succeed in various forestry careers.

*FOR 286 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES II. (1)
The course provides students with the knowledge and skills to communicate effectively, written and orally, in a variety of professional settings. Students will meet with forestry and natural resource professionals at their place of business, professional conferences, and in class. PreReq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 166, or consent of the field semester coordinator.

*FOR 310 INTRODUCTION TO FOREST HEALTH AND PRODUCTION. (1)
Introduction to common forest health challenges in the central Appalachians. Identify symptoms associated with common biotic agents (e.g., hemlock woolly adelgid, emerald ash borer, chestnut blight, etc.) and abiotic stressors that affect the health of forested ecosystems. Understand and assess the effects these problems have on ecosystem processes and different management strategies for conserving forest resources while addressing these issues. Course incorporates components of forest entomology, forest pathology, abiotic stressors, and invasive species. PreReq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 166, or consent of the field semester coordinator.

FOR 320 FOREST VALUATION AND ECONOMICS. (3)
Apply economic concepts to silvicultural practices, land values, and values affiliated with forest resources. Cost-benefit analysis and the economic valuation of forest resources will be discussed. PreReq: MA 110 or Calculus.

*FOR 325 ECONOMIC BOTANY: PLANTS AND HUMAN AFFAIRS. (3)
A study of the economic aspects of plant life processes and their uses in human history. Emphasis will be given to the history, uses, and economics of certain important plant species. Students will gain an understanding of the basic principles of botany and their applications to the uses of plants in human affairs.

*FOR 385 INTRODUCTION TO WILDLAND FIRE. (1)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395 WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395A WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395B WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395C WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395D WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

*FOR 395E WILDLAND FIRE. (2)
Basic wildland fire behavior or including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.
For 350 Field-based Education in Forestry. (1-6)

This is a practical course designed to provide students with knowledge and skills related to the practice of forestry. Emphasis is placed on understanding the hydrologic cycle, plant-soil interactions from a land-use and landscape perspective, and the need for implementation of forestry best management practices. Prereq: Forestry spring field semester, or NRE 320, or consent of instructor.

For 461 Introduction to Population Genetics. (3)

This course surveys the population dynamics and equilibria of genes in nuclear, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as AEB/ENT 461.)

FOR 470 Interdependent Natural Resource Issues. (3)

Culmination of the student’s study of public concerns and problems related to natural resources. Work in teams to find and verify information on diverse topics, listen to and address public concerns, communicate natural resource information to a wide range of audiences, and be effective professionals in working toward solutions. Prereq: Senior Standing. This is a 4-credit course approved to fulfill the upper tier graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. Forestry majors must complete this course and FOR 400 to fulfill the upper tier graduation writing requirements.

For 480 Integrated Forest Resource Management. (5)

Capstone course. Students will be presented with a real life management scenario in a forested location in Kentucky. Working in teams, students will collect data, determine management objectives, and develop action plans for managing the forest according to the desires of the owner, subject to realistic legal, economic, ethical, and social constraints. Students will be required to produce a professional management plan and present the plan in a public forum at the end of the semester. Prereq: Completion of Field Semester, FOR 425, FOR 460, and Senior Standing. This course is a Graduation Composition and Communication Requirement (GCCR) course approved to count towards the designated Composition and Communication intensive assignments, and it fulfills the Graduation Composition and Communication Requirement (GCCR) for the forestry major in conjunction with FOR 480. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

For 510 Herpetology. (4)

This is a 4-credit, advanced biology and/or wildlife course about amphibians and reptiles for both undergraduate and graduate students. Lectures and labs follow two concurrent themes: 1) a survey of amphibians and reptiles, with special emphasis on Kentucky species, and 2) a general analysis of amphibian and reptile biology, ecology, conservation and management. Prereq: All students enrolled in FOR 510 should have taken at least one college-level Biology course.

Pharmaceuticals. Prereq: PLS 104, PLS 210, one year of introductory biology, or permission of the instructor.

For 330 GIS and Spatial Analysis. (3)

Principles and operations of Geographic Information Systems (GIS) applied to forestry and natural resources. Students will learn to collect necessary field data to create GIS maps and digital spatial data sets, perform basic spatial analysis, and integrate social and economic data to solve spatially related natural resource problems. Prereq: MA 109 or Calculus, and FOR 200, or consent of instructor.

For 340 Forest Ecology. (4)

The study of the forest as a biological community, covering ecosystem concepts such as energy flow, forest nutrition, nutrient cycling, and decomposition. Interrelationships between trees and other organisms comprising the community is also examined through concepts of disturbance, succession, population dynamics, biological and ecosystem diversity, ecosystem management, and ecosystem services. Prereq: BIO 103 or BIO 150.

For 350 Silviculture. (1)

A study of ecologically based manipulations of forests to achieve desired management objectives. Develop and apply silvicultural prescriptions and learn the effects of these prescriptions on timber and non-timber forest benefits, forest health and biodiversity, soil, and water resources as well as their effect on broader social, economic, and ecological issues. Prereq: FOR 219 and FOR 250.

For 356 Forest Soils and Hydrology. (1)

Prereq: All students enrolled in FOR 510 should have taken at least one college-level Biology Standing. This course is a Graduation Composition and Communication Requirement (GCCR)

Prereq: MA 109 or Calculus, and FOR 200, or consent of instructor.

For 378 Forest Mensuration. (1)

The use of field experience as an educational complement to classroom work. May be repeated to a maximum of 12 credits which are to be used as electives. Prereq: Permission of instructor and department chairperson. A departmental learning agreement must be completed prior to registration.
FOR 599 INDEPENDENT WORK IN FORESTRY. (1-3)
Study and independent work on selected problems related to allocation and utilization of natural resources. May be repeated to a maximum of six credits. Any combination of FOR 599 and FOR 781 cannot exceed six credits. Prereq: Senior or graduate standing and consent of instructor.

FOR 601 RESEARCH METHODS IN FORESTRY. (3)
A study of research methods, procedures, and techniques used in forestry. Major emphasis will be placed on problem analysis and methods of conducting organized research. Prereq: Graduate standing.

FOR 602 RENEWABLE NATURAL RESOURCES IN A GLOBAL PERSPECTIVE. (3)
An advanced course that examines world and transboundary issues related to renewable natural resources. Students will attend a series of lectures, discuss assigned readings, and identify issues for further study. Student research papers related to those issues will be presented and discussed in a seminar format. Prereq: Graduate standing.

FOR 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will be devoted to modeling in population and community biology, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 665.)

FOR 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 506 or consent of instructor. (Same as BIO/ENT 667.)

FOR 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: (a) the optimization approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/ENT 668.)

FOR 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/ENT 669.)

FOR 612 FOREST ECOSYSTEM DYNAMICS. (3)
The study of ecosystem structure and function with emphasis upon eastern deciduous forest ecosystems. Topics discussed will include energy flow, mineral cycling, the influence of disturbance upon ecosystem properties and dynamic processes in the development of ecosystems. Prereq: FOR 340 or BIO 451 and consent of instructor.

FOR 620 SPECIAL TOPICS IN FORESTRY (Subtitle required). (1-3)
Special topical or experimental courses in forestry for advanced graduate students. Special topics required and must be approved by the chairperson of the Department of Forestry. May be repeated to a maximum of six credits. Any combination of FOR 620 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FOR 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 622.)

FOR 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, photoreceptor mechanisms, and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 623.)

FOR 630 WILDLIFE HABITAT ANALYSIS. (3)
Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as AEC 662.)

FOR 667 INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/ENT 667.)

FOR 695 FIELD RESEARCH IN FORESTRY. (0)
Full-time research that requires the student to remain off-campus for extended periods. Students enrolled in this course remain in full-time academic status but may be repeated to a maximum of 2 semesters. Prereq: Graduate standing in the Forestry Graduate Program. For students whose research precludes them from taking courses on campus for a semester. Registration requires (a) approval of Research Contract by a committee of at least three Forestry faculty members established to consider a particular student’s Research Contract, (b) approval of Research Contract by Director of Graduate Studies, and (c) approval of Research Contract by Associate Dean for Academic Programs.

FOR 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All coursework toward the degree must be completed.

FOR 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of advisor and chairperson of the department.

FOR 770 FORESTRY SEMINAR (Subtitle required). (1)
Reports and discussions on recent research and current literature. Consent of instructor. Prereq: Consent of advisor.

FOR 781 SPECIAL PROBLEMS IN FORESTRY. (1-3)
Advanced study of selected problem areas in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FOR 791 RESEARCH IN FORESTRY. (1-3)
Involves original research in selected areas of interest in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FP Family Practice and Community Medicine

FP 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

FR French Language and Literature

FR 011 FRENCH FOR READING KNOWLEDGE. (3)
This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination.

FR 101 ELEMENTARY FRENCH. (4)
The study of basic French through grammar, reading and oral practice.

FR 102 ELEMENTARY FRENCH. (4)

FR 103 FRENCH CINEMA. (3)
A history of the French cinema from the early twentieth century to the present. Emphasis on the primary aesthetic movements of French cinematic expression in social and historical context. Attention given to the formal elements specific to film, techniques of film analysis, and the nature of visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 106 ELEMENTARY FRENCH REVIEW. (5)
A course equivalent in level to FR 102 designed to prepare students with two or three units of high school French for French 201 who, on the basis of the placement test, appear to lack
sufficient skill in French for that course. Prereq: Two years of high school French and the placement test.

FR 201 INTERMEDIATE FRENCH. (3)
Reading, conversation and oral comprehension are the basic aims of this course, which is structured around contemporary texts. Prereq: FR 102 or two years of high school French and placement test.

FR 202 INTERMEDIATE FRENCH. (3)
A continuation of FR 201. Prereq: FR 201 or three years of high school French and placement test.

FR 204 INTRODUCTION TO FRENCH AND FRANCOPHONE STUDIES. (3)
Introduces students to the concepts, questions, and methodologies that inform the study of the Francophone world. Includes an intensive French grammar review. Prereq: FR 202 or equivalent.

FR 205 THE FRENCH GRAPHIC NOVEL. (3)
Examines the rich tradition of graphic narrative in France where the modern comic form was invented in the early nineteenth century. Explores the technical aspects of graphic narrative and considers how the graphic novel has been linked to political questions of national identity in post-War France. Taught in English with no knowledge of French necessary.

FR 214 FRANCE TODAY. (3)
Explores the issues, debates, and conflicts that define culture and society in contemporary France. Emphasis on speaking and listening skills in French. Prereq: FR 202 or equivalent.

FR 215 VISUAL CULTURES. (3)
An interdisciplinary discussion of the centrality of the visual in French and Francophone society and culture. Representative examples of the kinds of visual media encountered might include medieval tapestries as well as twenty-first century web sites. Prereq: FR 202 or equivalent.

FR 225 FRENCH FILM NOIR. (3)
Examines the crime thriller and the “noir” style in French cinema during the 1940s and 50s. Emphasis on the aesthetic, philosophical, and historical origins of the crime film in France, the impact of French cinema on Hollywood film noir, and the role of noir in French visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3)
This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as AS 263.)

FR 307 FRENCH FOR BUSINESS AND ECONOMICS. (3)
Development of specialized conversational and written proficiency necessary to import-export business activities, banking, insurance, business regulation, etc., in the French-speaking world. Prereq: FR 204.

FR 310 FRENCH PHONOGENICS. (3)
Phonetics and phonemics, theory and practice. Advanced corrective pronunciation drill on an individual basis. Prereq: FR 204.

FR 311 INTRODUCTION TO FRENCH LINGUISTICS. (3)
An introduction to the study of language structure. Explores various aspects, levels, and components of verbal communication. Prereq: FR 204.

FR 324 STUDIES IN FRENCH LITERATURE (Subtitle required). (3)
An introduction to the major trends of the French literary tradition, with emphasis on textual analysis and critical approaches. May be repeated to a maximum of 6 hours with a different subtitle. Prereq: FR 204.

FR 325 FRENCH CINEMA (Subtitle required). (3)
An introduction to the analysis of film and to the major movements in the history of French cinema. May be repeated up to 6 hours with different subtitle. Prereq: FR 204.

FR 335 WAR, LITERATURE, FILM. (3)
This course examines the strategies used by French writers and filmmakers to translate the experience and memory of World War I and World War II into literary and cinematic form. Topics treated will include eyewitness testimony, uses of irony and humor, the representation of disfigurement, the question of documentary, collaboration with the enemy, and practices of commemoration. Taught in English, with no knowledge of French necessary.

FR 344 THE LITERARY TEXT (Subtitle required). (3)
An exploration of the concepts of textuality and identity in relation to the notions of authorship, form and formal experiment, theme and other questions at the heart of literary studies. May be repeated up to 6 hours with a different subtitle. Prereq: FR 204.

*FR 350 FRANCOPHONE CULTURES: (Subtitle required). (3)
Explores the social, historical, and political situation of French-speaking cultures outside metropolitan France. May be repeated up to 9 hours with a different subtitle. Prereq: FR 204 or equivalent.

FR 395 INDEPENDENT WORK IN FRENCH AND FRANCOPHONE STUDIES. (3)
Directed study in French and Francophone studies. Given in exceptional circumstances only. May be repeated up to 6 credit hours. Prereq: Major, junior or senior standing, 3.5 grade-point average in the major, consent of instructor, and approval of the Director of Undergraduate Studies.

FR 410 FRENCH IN PERFORMANCE. (3)
Deepens linguistic and analytical skills as well as cultural knowledge through the rehearsal and performance of texts and other cultural artifacts. Representative activities include theatrical and short cinematic productions. Prereq: Completion of 6 hours of 300-level or higher French course work.

FR 425 MEDIA STUDIES. (3)
Provides a set of skills for the critical analysis of different types of textual, audio, and visual media in the French-speaking world. Students will consider the relationship between information media and aesthetic media and explore the extent to which both “mediate” between what is called the real world and their reading, viewing, listening public. Prereq: Completion of 6 hours of 300-level or higher French course work.

FR 465G TOPICS IN FRENCH LITERATURE AND CULTURE IN TRANSLATION (Subtitle required). (3)
FR 470G TOPICAL SEMINAR I (Subtitle required). (3)
Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; Le nouveau roman; Literature and Film of Subsaharan African; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; Le poème ivre; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 9 hours of 300-level or higher French course work.

FR 471G TOPICAL SEMINAR II (Subtitle required). (3)
Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; Le nouveau roman; Literature and Film of Subsaharan African; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; Le poème ivre; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 9 hours of 300-level or higher French course work.

FR 495 SENIOR PAPER. (3)
FR 502 INTRODUCTION TO CRITICAL AND CULTURAL THEORY: THE FRENCH CONNECTION. (3)
Introduces upper-level undergraduate and beginning graduate students to the principles of critical and cultural theory. Explores topics of language, textuality, writing, subjectivity, culture, gender, everyday life, and power through the work of primarily, but not exclusively, French thinkers such as Saussure, Barthes, Fanon, Foucault, Derrida, Lyotard, Kristeva, Baudrillard, de Certeau. Taught in English with no knowledge of French necessary.

FR 504 TOPICS IN FRENCH LITERATURE AND CULTURE (Subtitle required). (3)
Intensive study of an author, genre, period or movement of French literature or an aspect of French culture. May be repeated to a maximum of nine credits under a different subtitle.

FR 507 INTERPRETATION AND STYLE. (3)
FR 510 LINGUISTIC STRUCTURE OF MODERN FRENCH. (3)
An introduction to the basic phonological, syntactic and semantic categories and processes of contemporary French as studied in the light of current linguistic theory and practice. Prereq: FR 306 or equivalent.

FR 550 FRANCE TODAY. (3)
A contrast between contemporary France in today’s Europe and the historical image of France. The impact of the “New Quiet French Revolution” and of the new institutions on French Society. Conducted in French. Prereq: FR 306 and consent of instructor.

FR 553 TEACHING OF FRENCH. (3)
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on French. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

FR 570 SEMINAR IN FRENCH LANGUAGE PEDAGOGY. (1)
A general seminar in a broad range of subjects in the area of French language pedagogy. May be repeated to a maximum of two credits. Prereq: Graduate student standing in French or consent of instructor.

FR 601 POETIC VISION (Subtitle required). (3)
FR 604 THE TRAGIC MODE (Subtitle required). (3)
FR 605 COMIC FICTION (Subtitle required). (3)
This course deals with the sensory evaluation methods used for food products based on flavor, odor, color, and texture. This includes techniques for measuring sensory attributes, instrumentation, and consumer acceptance of processed meat, dairy, and egg products. Lecture, three hours; laboratory, four hours. Prereq: BIO 108 and BIO 109 or equivalent.

FSC 553 FOOD ANALYSIS. (4) Techniques and instrumentation used to determine the chemical composition of foods. Emphasis is placed on the principles of chemical analysis as it relates to foods and food processing. Lecture, two hours; laboratory, four hours per week. Prereq: FSC 434G.

FSC 536 ADVANCED FOOD TECHNOLOGY. (5) Concepts of developing/improving new food products or food processing including: consumer awareness, marketing, ingredient specifications, product formulation, stabilization of product, packaging to meet shelf life goals, shelf testing of products, challenge testing, establishment of HACCP system, consumers testing, market testing, and introduction to the market. A capstone course, where all concepts of food science are used to extend or create new food products for the market place. Lecture, three hours; laboratory, two hours. Prereq: AEN 340, FSC 306, and FSC 335, or consent of instructor.

FSC 538 FOOD FERMENTATION AND THERMAL PROCESSING. (4) Thermal processing of foods. The use of microorganisms in the preservation of raw foods and the manufacture of new foods. Manipulation and improvement of cultures to ensure production of desirable end products. Lecture, three hours; laboratory, two hours. Prereq: BIO 108, BIO 109, BIO 476G, FSC 530 or consent of instructor.

FSC 540 FOOD SANITATION. (3) A study of sanitation principles and techniques for ensuring the safety and wholesomeness of our food supply. Prereq: FSC 530 or equivalent.

FSC 603 INTEGRATED NUTRITIONAL SCIENCES III. (2) This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as CNU/NS 603.)

FSC 630 ADVANCED MEAT SCIENCE. (4) Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as ASC 630.)

FSC 632 FOODBORNE DISEASE AGENTS. (3) Discussion of microorganisms, toxins and chemical involved in foodborne illnesses as well as procedures for controlling and investigating foodborne disease outbreaks. Prereq: FSC 530.

FSC 633 FOOD PACKAGING. (2) Detailed description of food packaging materials, composition and resistance to chemical and physical damage and their use in food systems as well as criteria for selection of packaging systems for specific food processing techniques will be presented. Methods of production, e.g.: blow mold, casting and extrusion; layering; lamination and co-extrusion; processing; and printing and sealing will be discussed. Prereq: FSC 536, FSC 538 or equivalent or consent of instructor.

FSC 638 FOOD PROTEINS. (3) This course deals with chemical, biochemical, and enzymatic significance of proteins in food systems; physiochemical and functional properties of animal and plant proteins; their interactions with lipids, carbohydrates, flavors, minerals and other food components during processing and storage, and resulting modifications of food quality. Prereq: FSC 434G or consent of instructor.

FSC 640 FOOD LIPIDS. (3) An advanced study of the physical, chemical, and biochemical significance of lipids in foods. Topics include the structure and function of lipids in post-harvest physiology, interaction with other food components, and the effects of lipids on the physical properties of foods during processing and storage. Prereq: One course in Food Chemistry or Biochemistry.

FSC 642 FOOD PIGMENTS. (3) Course deals with the chemistry and biochemistry of color of different food products which influence consumers' purchase decision. Lecture topics include fundamental basis of food color and pigments, manipulation of food color, influence of processing on food color, and regulatory issues related to food pigments. Prereq: FSC 434G.

FSC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4) May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 780.)
Course Descriptions

FSC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)
Problems involving original investigation. May be repeated for maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 790.)

GEN General Agriculture

GEN 100 ISSUES IN AGRICULTURE, FOOD AND ENVIRONMENT. (3)
An introductory course requiring critical analysis of the major social, economic, political and scientific issues in agriculture and related disciplines. The historical development of agriculture will be surveyed, followed by discussions of major issues related to agriculture, food and environment. Development of skills in information gathering, critical analysis of issues, and written and oral communication will be emphasized. Satisfies the U.S. Citizenship area of UK Core. Prereq: Students enrolled in the College of Agriculture, Food and Environment; freshmen only in fall semesters and transfer students only in spring semesters.

GEN 100 SPECIAL INTRODUCTORY COURSE. (Subject required). (1-6)
Interdisciplinary, topical or experimental courses offered at the introductory level to be approved by the Dean of the College of Agriculture, Food and Environment. A particular title may be offered at most twice under the GEN 100 number. Students may not repeat under the same title; repeatable to a maximum of twelve credit hours. Prereq: To be set by the instructor.

GEN 200 ISSUES IN AGRICULTURE: CONTEMPORARY PROBLEMS IN AGRICULTURE AND NATURAL RESOURCES. (3)
An intermediate course which extends the critical analysis of selected issues in agriculture and related disciplines begun in GEN 100. Continues the development of skills in information gathering, critical analysis, and written and oral communication. Students will be required to investigate scientific literature germaine to the issues covered and develop reviews, reports and position papers. Prereq: Sophomore enrolled in College of Agriculture.

GEN 300 SPECIAL COURSE. (1-3)
Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Agriculture. A particular course may be offered at most twice under the GEN 300 number, and no GEN 300 course may be given for more than three credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. Hours are variable with each special course. Prereq: As specified by the instructor.

GEN 301 AN INTRODUCTION TO CHINESE CULTURE THROUGH AGRICULTURE. (3)
This course is designed to introduce students to basic culture in China. Students will learn about Chinese agriculture, languages, customs, history, the political and educational system, geography and the economy. The culmination of the course is a three-week trip to China. Only students who have committed to go on the trip will be enrolled in the course. First priority for the trip is given to College of Agriculture students.

GEN 302 INTERNATIONAL EXPERIENCE IN AGRICULTURE AND NATURAL RESOURCES. (1-6)
Credit for international experiences and travel abroad related to College of Agriculture degree programs. Students must work with faculty to determine if the experience is appropriate for credit. Credit will be determined by Associate Dean of the College depending on type of activity and requirements to be completed by students. Student may not use more than six hours toward degree requirements.

GEN 305 GOVERNMENT IN AGRICULTURE, FOOD AND ENVIRONMENT. (3)
Course is an in-depth study of government in relation to agriculture, food and environment. Instructor and guest presenters will address the class on how government policy, regulations, laws and decision making affect all aspects of agriculture, food and environment. The origin and purpose of the land grant institution will also be discussed. Class will be very informative and time will be allotted each class period for questions/answers.

GEN 401 JOB SEARCH SEMINAR. (1)
This course will address the selection of appropriate career choices, job search activities, and the transition to the work world. It will emphasize the application of communicative and team building skills in the area of career development. Pass/Fail only. Prereq: Junior or senior standing in the College of Agriculture.

GEN 501 AGRICULTURAL AND ENVIRONMENTAL ETHICS. (3)
This course illuminates the major moral considerations of public policy issues concerning agriculture and the environment. The course will provide an overview of major moral theories, as well as opportunities to apply these theories to critical analysis of the major contemporary moral issues associated with agriculture and the environment. Prereq: Senior Standing.

GEO Geography

GEO 109 DIGITAL MAPPING. (3)
This course introduces the concepts, techniques, and histories behind mapping as a creative and artistic practice. It covers the centrality of the map in everyday life and the changing role of maps as society becomes increasingly saturated by digital information technologies such as geographic information systems (GIS) and global positioning systems (GPS). The course introduces principles in cartographic design and geovisualization culminating in a series of maps created by each student.

GEO 130 EARTH'S PHYSICAL ENVIRONMENT. (3)
A course exploring the fundamental characteristics of earth’s physical environment. Emphasis is placed on identifying interrelationships between atmospheric processes involving energy, pressure, and moisture, weather and climate, and terrestrial processes such as exogenous biomes, soils, and landscape formation and change. Fulfills General Education requirements for Inquiry in Natural Sciences, and elementary certification requirement in education.

GEO 133 SCIENCE AND POLICY OF NATURAL HAZARDS. (3)
This course examines the science of natural hazards such as hurricanes, earthquakes, landslides and floods, and the causes and effects of the natural hazards. It explores the relationships between the science of, and policy toward, such hazards, discusses their predictability, and examines how scientific knowledge influences policy-making.

GEO 155 GLOBAL CLIMATE CHANGE. (3)
This course provides a broad overview of the processes that have shaped the climate in which we live, and of consequences of changes to this climate. The principle functions of climate in relation to the hydrosphere and biosphere are introduced, and climate change over geological time is described. The basic data used by climate science to identify and explain historical climate change, paleoclimate change, and more recent climate trends are examined. The course also considers the difference between climate science and “pseudo science” and how to evaluate predictions of future climate change. Fulfills the Gen Ed Intellectual Inquiry – Natural/Physical/ Mathematical Sciences requirement.

GEO 152 REGIONAL GEOGRAPHY OF THE WORLD. (3)
A geographical study of the world by regions with a focus on the world’s physical and human landscapes. Emphasis on how regions are connected to each other. Also how each region is affected by, and affects, global issues such as economic restructuring, food production, and environmental change, will be examined. Time is described. The basic data used by climate science to identify and explain historical climate change, paleoclimate change, and more recent climate trends are examined. The course also considers the difference between climate science and “pseudo science” and how to evaluate predictions of future climate change. Fulfills the Gen Ed Intellectual Inquiry – Natural/Physical/ Mathematical Sciences requirement.

GEO 161 GLOBAL INEQUALITIES. (3)
This course focuses on basic spatial patterns of wealth and poverty at the global scale, comparing places and regions. Contemporary trends are identified and viewed in their historical context. Inequalities in access to basic human needs – food and water – are investigated through case studies drawn from around the world. The highly unequal world we live in raises serious questions of justice and sustainability, and these are considered in this course. Fulfills General Education requirements for Critical Thinking.

GEO 162 INTRODUCTION TO GLOBAL ENVIRONMENTAL ISSUES. (3)
This course addresses environmental questions of global importance, including population growth, resource consumption, environmental degradation, biodiversity conservation, toxic contamination and environmental justice. Fulfills Gen Ed Global Dynamics requirement.

GEO 163 GLOBAL CONFLICTS. (3)
This course will focus on the dynamics and effects of conflicts over boundaries, territory, environment, natural resources, and ideas and political rights. A geographic lens will be used to understand contemporary world conflicts. This course introduces students to an understanding of conflict as grounded both in localities and an effect of global interconnections – political, economic, and cultural. The course will focus on six major contemporary conflicts. Students will become versed in the debates and possible options for solution of these problems. While lectures will provide students with an understanding of the coordinates of the conflicts, recitations sections provide an opportunity for discussion and debate. The readings are chosen to supplement lecture material, providing a greater depth of understanding of the issues at stake. Fulfills the Global Dynamics requirement of General Education.

GEO 164 WORLDS: GLOBAL INFORMATION GEOGRAPHIES. (3)
This course examines the ways that existing and emerging information technologies are helping to transform places and the way in which the world interacts. It covers the intertwining of society and technology and how different cultures produce distinct technologies and use similar technologies in unique ways. Of particular focus will be the history and evolution of mapping technologies to present days systems such as global positioning systems (GPS), geographic information systems (GIS) and the geoweb. In addition the course will introduce the spatial implications of information technologies and contemporary debates on digital divides, surveillance and privacy, proximity and distance, democracy, and relationships between virtual, real-world and hybridized communities. Fulfills the Global Dynamics Requirement of General Education.

GEO 172 HUMAN GEOGRAPHY. (3)
An introduction to geographic perspectives on human political, economic, social, and cultural activities (such as trade, economic development, empire, colonization and nation building, environment, pollution, urbanization, population dynamics). Emphasis is on spatiality (including concepts of location, scale, globalization, maps, migration, and diffusion), place making and regions (including concepts of the cultural landscape, place meaning, race, class and gender identities, and territoriality), and nature/society relations (including concepts of environmental adaptation and modification, climate change, and sustainability). Fulfills Gen Ed Intellectual Inquiry – Social Science and elementary certification requirement for education.
GEO 200 ORIENTATION TO GEOGRAPHY. (3)
Introduces students to geographic perspectives, theories, research and professional opportunities. Applied quantitative and qualitative approaches to geographic research are reviewed and examples from current literature presented and discussed. Prereq: GEO 130, GEO 172.

GEO 220 U.S. CITIES. (3)
This course introduces salient contemporary U.S. urban topics as seen from and analyzed by a geographic perspective. Topics include migration, urban sprawl, city services, gentrification and urban redevelopment, school districts, parks, housing, financing, and others. The course examines key issues, problems, and debates facing diverse U.S. urban communities, and will address the possibilities for citizen engagement in their resolution. Fulfills the Gen Ed U.S. Citizenship requirement.

GEO 221 IMMIGRANT AMERICA: A GEOGRAPHIC PERSPECTIVE. (3)
This course uses a geographic and spatial perspective to introduce students to contemporary immigration to the United States, its origins, adaptation patterns, and long-term effects on American society. Current immigration debates, humanitarian migration, immigrants’ experiences (local and transnational), and questions of citizenship and civic participation of immigrants are central to the course.

GEO 222 CITIES OF THE WORLD. (3)
Focuses on the historical development, contemporary character, and alternative futures of cities in both developing and developed nations. The social, economic, and political processes of major world cities are studied and contemporary urban problems are discussed. Fulfills Gen Ed Global Dynamics requirement.

GEO 230 WEATHER AND CLIMATE. (3)
A survey of the atmospheric controls associated with local, regional, and global weather and climate variability. Includes fundamental coverage of the physics and chemistry of energy, gasses, pressure and moisture, with a goal of promoting understanding of general weather analysis and forecasting, severe storms, atmospheric pollution, descriptive climatology, and global climate change. Prereq: GEO 130 or consent of instructor.

GEO 231 ENVIRONMENT AND DEVELOPMENT. (3)
This course explores the intertwining of environment, development and sustainability. It analyzes the political economy of environmental destruction (at macro and micro levels) to understand its origins and strategies to prevent it.

GEO 235 ENVIRONMENTAL MANAGEMENT AND POLICY. (3)
An introduction to environmental systems such as weather and climate, vegetation, land forms and soils, and how the quality of these systems is modified by human use. Resource issues discussed include: atmospheric pollution and global warming; groundwater, flooding, and floodplain management; volcanic activity and earthquakes; and biophysical processes associated with deforestation and lake eutrophication. Case studies based upon important environmental problems illustrate how human activity and environmental systems interrelate. Fulfills USP Cross-Disciplinary requirement.

GEO 240 GEOGRAPHY AND GENDER. (3)
Adopts a geographic approach to the study of gender relations. The role of space and place in shaping the diversity of gender relations throughout the world will be considered. Through case studies the importance of gender relations in understanding a variety of issues will be stressed. Such issues include: the design and use of urban and rural environments; “Third World” development; regional economic restructuring; changing political geographies; and migration.

GEO 255 GEOGRAPHY OF THE GLOBAL ECONOMY. (3)
This course reviews the globalization of the world economy as a historical process with specific local, regional, and national outcomes. It introduces students to the factors and dynamics of ongoing globalization of the economy. Fulfills General Education requirements for Global Citizenship.

GEO 260 GEOGRAPHIES OF DEVELOPMENT IN THE GLOBAL SOUTH. (3)
The course focuses on differences between the richer global north and the poorer global south—sometimes referred to as the “Third World”. The basic global patterns of “development” are studied and the various explanations for development or lack thereof are examined critically. Differences between regions of the global south are investigated through selected case studies from Latin America, Asia, and Africa. Fulfills the Gen Ed Global Dynamics requirement.

GEO 261 GLOBAL DYNAMICS OF HEALTH AND DISEASE. (3)
This course is an introduction to health and disease from a geographical perspective. It provides an introduction to globalization; global health; epidemiology; the immune system; major pandemics of the 20th and 21st Centuries; and, global attempts to confront current and future pandemics. Connections are made to medicine, nursing, public health and related fields. Fulfills the Global Dynamics requirement of Gen Ed.

GEO 285 INTRODUCTION TO PLANNING. (3)
An introduction to the history, purpose, and objectives of planning with emphasis on urban and regional planning, planning processes, techniques, and legislation.

GEO 300 GEOGRAPHIC RESEARCH. (3)
Provides a detailed examination and discussion of the methods of initiating and executing research projects in human or physical geography. Includes identification of geographic dimensions of research topics, theoretical/conceptual frameworks, conduct of literature reviews, research designs, data collection/analysis and presentation. Prereq: GEO 130 or 152, 160 or 172, or consent of instructor.

GEO 305 ELEMENTS OF CARTOGRAPHY. (3)
Fundamental training in map drafting, compilation, symbolization, scales, projections, and map products. Includes emphasis on the conceptual planning and design of maps and graphs as a medium for communicating ideas.

GEO 309 INTRODUCTION TO GIS. (3)
This course introduces students to the use of geographic information systems and their basic principles. Topics addressed include data collection, processing and output. Students will learn about types of geographic information and data: sources, constraints, and uses; the range of secondary spatial data sets available; and the collection of primary spatial data using global positioning systems (GPS) and other technologies.

GEO 310 QUANTITATIVE TECHNIQUES IN GEOGRAPHY. (3)
The application of spatial techniques geographers use to collect, sample, map, and analyze data in human and physical geography. Students will be introduced to automated data processing.

GEO 311 QUALITATIVE METHODS IN GEOGRAPHY. (3)
This course is an introduction to qualitative methods in geographical research. Students will begin by learning the basic principles of research design, as well as ethical and procedural considerations of any research project using qualitative methods. The course primarily will focus on introducing students to basic qualitative methods used in geographic research, but pertaining also to social science research in general, potentially including (but not limited to): participant observation, archival analysis, interviews, surveys, focus groups, participatory action research, data coding and analysis, discourse and textual analysis, visual analysis, and content analysis.

GEO 316 ENVIRONMENT AND DEVELOPMENT. (3)
This is an introductory/intermediate level course on the relationships between environment and economic development. While this course emphasizes environmental concerns of the ‘Global South’, this course will also cover instances of ‘Global Northern’ peoples and places, particularly in less privileged areas such as Appalachia. The course examines the political economy and environmental destruction by asking why, despite much significant research on environmentally destructive development schemes continue. Although we understand at least the main contours of what it will take to become a sustainable society, little progress has been made in implementing even evidently necessary policies.

GEO 320 GEOGRAPHY OF THE UNITED STATES AND CANADA. (3)
A systematic review of the physical context, economic, historic, and cultural diversity that distinguish U.S. and Canadian regions. Topical emphasis on the geographic aspects of regional problems. Fulfills General Education requirements for U.S. Citizenship. Prereq: GEO 130 or 152 or 172, or consent of instructor.

GEO 321 LAND, PEOPLE, AND DEVELOPMENT IN APPALACHIA. (3)
Major themes revolve around regional diversity and regional development. Major topics examined include physical environmental context, historical development, and economic and population geography. The study region includes the upland areas between southern New York State and central Alabama. Prereq: GEO 130, 152 or 172, or consent of instructor.

GEO 322 GEOGRAPHY OF KENTUCKY. (3)
An examination of the cultural, economic, political, and environmental diversity of Kentucky. In addition to studying the state’s historical evolution, emphasis will be placed on contemporary problems facing the state. Kentucky’s regional, national, and international contexts are discussed. Prereq: GEO 130, 152, 160, or 172.

GEO 323 MEXICO: ENVIRONMENT, POLITICS AND SOCIETY. (3)
This course examines how politics, the environment, and socio-economic relations have shaped Mexico’s contemporary social and cultural geography. The course examines how historical and contemporary processes such as agrarianism, urbanization (Mexico City), the Mexican Revolution, migration, and development have shaped the politics of identity, community, and geography, with particular attention to questions of gender, indigenous peoples, and popular culture.

GEO 324 GEOGRAPHY OF CENTRAL AND SOUTH AMERICA AND THE CARIBBEAN. (3)
A study of the diversity of physical environments and human societies. The various historical geographies (pre-Columbian and after) of the region are presented as essential to an understanding of contemporary geographical patterns and processes in transport, agricultural, industrial and mining, urbanization, and population. Throughout the course case-studies are presented and students are guided as they develop their own case studies. Prereq: GEO 152 or 160 or 172.

GEO 326 GEOGRAPHY OF EUROPE. (3)
This course explores the physical, cultural, and political geography of the European continent. Diversity of populations and physical landscapes is stressed. The geographic context for current events that are changing the face of Europe are presented. Prereq: GEO 152 or 172.

GEO 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3)
A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region’s position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as AAS 328.)

GEO 329 GEOGRAPHY OF THE FORMER SOVIET UNION. (3)
A study of this region’s diverse human and physical landscapes, emphasizing the historical and contemporary interlinkages between the various states. Contemporary problems of the
post-Soviet era (such as environmental degradation, economic and regional restructuring, or the international position of the region) will be studied from a geographical perspective. Prereq: GEO 152, 160, or 172.

GEO 330 GEOGRAPHY OF THE INDIAN SUBCONTINENT. (3)
A study of the human, economic, and environmental aspects of India, Pakistan, Bangladesh, Himalaya, Nepal and Bhutan, and Sri Lanka. Topics include basic physical and cultural regionalisms, land use and population problems, and patterns of economic development involving urbanization, resources, and industrialization. Prereq: GEO 152 or 160 or 172.

GEO 331 GLOBAL ENVIRONMENTAL CHANGE. (3)
This course focuses on environmental processes (in the atmosphere, hydrosphere, lithosphere and biosphere) and the effects of historic and long-term environmental changes. Climatic change and natural system adjustments will be discussed, but the course will concentrate on human-induced environmental changes. Prereq: GEO 150 or equivalent, or consent of instructor.

GEO 332 GEOGRAPHY OF SOUTHEAST ASIA. (3)
A study of the cultural, economic, and political patterns and processes in mainland and island Southeast Asia. Major themes examined are how the region’s diverse physical geography, uneven natural resource base, cultural diversity, and colonial heritage provide a background to an understanding contemporary development. Prereq: GEO 152 or GEO 160 or GEO 172 or consent of instructor.

GEO 333 GEOGRAPHY OF EAST ASIA. (3)
Provides an understanding of the life and landscapes in East Asian nations, with special focus on China and Japan. Emphasis is placed on contemporary issues of sustainable development, environmental management, minority groups, human rights and gender relations. Prereq: GEO 152, GEO 160, GEO 172 or consent of instructor.

GEO 334 ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN. (3)
This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses Japan’s human and natural environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials; challenges to the management of environment and its resources; and Japan’s role in global economy. (Same as JPN 334.)

GEO 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)
This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and urban environments, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as AAS 336.)

GEO 351 PHYSICAL LANDSCAPES. (3)
A study of earth surface processes and land forms. The focus is on the analysis and interpretation of earth surface features and topography in terms of process-response mechanisms, and on an understanding of the fundamental physical, chemical, biological, and human processes which create and modify landscapes. The course emphasizes the dynamic nature of land forms and Landscapes, and the interrelationships between land forms and hydrology, climate, soils, and the biosphere. Prereq: GEO 130, or consent of instructor.

GEO 365 SPECIAL TOPICS IN REGIONAL GEOGRAPHY (Subtitle required). (3)
Offers coverage of world regions not usually covered in other geography courses, or in-depth examinations of specific subregions. Topics covered include: elements of climate and physical landscapes; economic systems and their historical development and dynamics; social and cultural processes and landscapes. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Any 100-level geography course or consent of instructor.

GEO 399 INTERNSHIP IN GEOGRAPHY. (3)
Provides supervised professional experience in public and private sector positions, and is intended to introduce students to the skills and working environments of careers in geography. Students should consult with a geography faculty member in advance of registering for this class. Prereq: Junior or senior standing in the major.

GEO 406 FIELD STUDIES IN GEOGRAPHY (Subtitle required). (3)
Field-based, regionally specific study of selected topics in cultural, economic, environmental, physical, political, social, or urban geography. May be repeated to a maximum of 8 credits with change in field site. Prereq: GEO 200.

GEO 409 ADVANCED GIS. (3)
This course is developed to introduce intermediate and advanced topics in geographic information science and spatial analysis including theoretical and applications areas. Building upon a range of GIS software systems this course covers geographic data collection, entry and editing, spatial analysis, interpolation and map development and display. Prereq: GEO 309 or consent of instructor.

GEO 415 MAP INTERPRETATION. (3)
An introduction to reading and interpreting maps. Special attention given to the study of physical and cultural geography as portrayed on large scale topographic maps. Emphasis on the relationship between the environmental setting and human activities, surveys and boundaries, transportation, urban and rural settlement and land use, and place names. Prereq: GEO 130 or 172 or consent of instructor.

GEO 419 INTRODUCTION TO REMOTE SENSING. (3)
This course offers an introduction to remote sensing technologies and their application to land use/land cover analysis, environmental monitoring, natural resources management, and urban planning. This course covers the fundamental remote sensing principles, overview of space/air borne sensors/data, essential techniques for digital image processing, and applications particular related to diverse land surfaces such as vegetation, water, urban, and soil bedrocks. Theoretical training and lab exercises are integrated components in this course. Prereq: GEO 309 or consent of instructor.

GEO 422 URBAN GEOGRAPHY. (3)
Examines the relationship between urbanization and the larger social and economic contexts within which city growth occurs. Surveys a range of theoretical perspectives on the internal socio-economic structure and built environment of cities, including the contributions by Chicago School, neoclassical, Marxist, and postmodern theorists. Emphasis also placed on relevant environmental, social, and political problems of cities. Primary focus is on North American cities, but includes cross-cultural comparisons. Prereq: GEO 152, 160, 172, or 222, or consent of instructor.

GEO 430G PHYSICAL GEOGRAPHY FOR TEACHERS. (3)
GEO 431 POLITICAL ECOLOGY. (3)
This course examines the relationship between political economies and the biophysical environment and seeks to understand the challenges of development, agriculture, gendered divisions of labor, and the representation of nature in the context of the globalization of economic relations.

GEO 442G POLITICAL GEOGRAPHY. (3)
This course covers how space and political activities are related. Major topics will include: history of political geographic thought; geopolitics; nationalism and identity; the territorial state; nation-building; conflict; border studies; and spatial models of political geography, at a range of scales.

GEO 451G FLUVIAL FORMS AND PROCESSES. (3)
An examination of erosion, deposition, and sediment transport processes associated with flowing water, landforms associated with fluvial processes, and landscape evolution in areas dominated by fluvial dissection and deposition. Field trips may be required. Prereq: GEO 351 or GLY 341.

GEO 452G WORLD GEOGRAPHY FOR TEACHERS. (3)
Approaches to teaching geographic themes and concepts within the context of the world’s major regions and countries in grade levels K-12. Addresses those issues and problems that affect world regions in the context of the following broad themes: location, place, movement, regions, and human-environment interactions. Among those discussed are the use and importance of maps and related resource materials in instruction, presentation of themes at different grade levels, and identification and utilization of a broad range of reference materials for student and teacher use. Lecture, ten hours per week for four weeks.

GEO 455 GLOBALIZATION AND THE CHANGING WORLD ECONOMY. (3)
This course provides an advanced review of the ongoing restructuring of the geography and organization of the capitalist global economy. Emphasis will be placed on contemporary issues such as industrial restructuring or the financial industry, and specific regions (such as Kentucky or China). Competing theories (classical, neoclassical, and marxian) and empirical and analytical aims in an explaining these patterns and processes are discussed and applied.

GEO 465 SPECIAL TOPICS IN GEOGRAPHY (Subtitle required). (3)
Offers coverage of issues and themes not covered in other geography courses, or in-depth examinations of specific issues and themes. Topics covered will commonly address emerging and global issues of both general and scholarly interest. May be repeated for a maximum of six credit hours (under different subtitles). Prereq: Any 100-level geography course or consent of instructor.

GEO 470G AMERICA’S CULTURAL GEOGRAPHIES. (3)
This course examines the diversity of cultural attributes (both tangible and intangible) in the American landscape through a range of perspectives, e.g., environmental, historical, political, economic, gender, race, etc., to understand how deeply held values manifest in minds and places. Prereq: GEO 172 or ANT 220.

GEO 475G MEDICAL GEOGRAPHY. (3)
An examination of the basic principles of the two major traditions of medical geography: disease ecology and medical care. Examined are the etiology, diffusion, and distribution of selected major diseases. Issues pertaining to the spatial-temporal distribution, accessibility, and utilization of medical care resources are presented. Prereq: GEO 172 or consent of instructor.

GEO 485G URBAN PLANNING AND SUSTAINABILITY. (3)
An analysis of urban and regional planning with emphasis on the contemporary urban and regional planning activities. Prereq: GEO 285 or consent of instructor.

GEO 490G AMERICAN LANDSCAPES. (3)
A review and analysis of America’s vernacular landscapes. Topics include: the history of settlement by Europeans, Africans, and others; evolving political allegiances; and the expansion of agricultural and industrial technologies in the context of diverse physical environments. The role of political philosophy in landscape development and historic preservation will be highlighted. Prereq: GEO 172 or consent of instructor.

GEO 491G JAPANESE LANDSCAPES. (3)
A study of the landscapes of Japan as vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as JPN 491G.)

University of Kentucky 2016-2017 Undergraduate Bulletin 484

KEY:  # = new course  * = course changed  † = course dropped  ⨿ = course purged
GEO 499 SENIOR RESEARCH SEMINAR. (3)
Course is intended to provide a capstone experience in geographical research and problem-solving through demonstrating students’ ability to identify an appropriate research topic, search for information, develop and implementing appropriate research strategy, and present research results. Prereq: GEO 406. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

GEO 505 PRACTICUM IN CARTOGRAPHY. (3)
Experience credit in which a small number of advanced students work under the direct supervision of the faculty or staff cartographer and in conjunction with other faculty members on departmental and contracted projects. May be repeated to a maximum of six hours. Prereq: GEO 305 and GEO 506 and consent of instructor.

GEO 506 INTRODUCTION TO COMPUTER CARTOGRAPHY. (3)
A basic introduction to computer-assisted cartography. Emphasis on basic computer graphics literacy and automated techniques for spatial data acquisition, storage, processing, and output. Introduction to current mainframe, workstation, and desktop mapping programs. Prereq: GEO 305 or permission of instructor.

GEO 509 WORKSHOP IN GEOSPATIAL TECHNOLOGIES. (3)
This course focuses on the development of applied GIS skills and follows a participatory workshop model with intensive, hands-on collaboration with community partners. The course covers a full range of collaborative GIS: working with team members and project partners to identify project goals, acquiring and preparing spatial data for GIS analyses, communicating with clients to assess progress, managing spatial data, and producing necessary maps and analyses. Prereq: GEO 309 or GEO 609 or consent of instructor.

GEO 530 BIOGEOGRAPHY AND CONSERVATION. (3)
An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, and cultural processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as BIO 530.)

GEO 531 LANDSCAPE ECOLOGY. (3)
This course explores the field of landscape ecology—the causes, development, importance of ecological processes, and the interactions of dynamic processes over broad spatial scales that can serve as foundation for decision-making and problem solving. Prereq: Six hours of physical geography or biology.

GEO 544 HUMAN POPULATION DYNAMICS. (3)
The study of human population distributions, densities, and growth patterns through analyses of the processes of fertility, mortality and mobility. Topical coverage includes the environmental, social, political, economic, and behavioral impacts on personal action and population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, with special attention given to issues of gender, race, and class.

GEO 545 TRANSPORTATION GEOGRAPHY. (3)
Tourism is the world’s fastest-growing economic sector, creating and transforming places, regions and broader geographies of travel, movement, and investment. The course will examine concepts, and methods behind the study of tourism and recreation. Selected topics include major travel flows and patterns; economic, environmental, and socio-cultural impacts; mass vs. “new” (e.g., eco-tourism, adventure tourism, extreme tourism) types of tourism; heritage tourism; marketing; place boosterism; tourism and recreation planning; and the politics of tourism. Local, national, and international examples in both developed and developing countries are discussed. Prereq: GEO 152, 172, 455, or consent of instructor.

GEO 550 SUSTAINABLE RESOURCE DEVELOPMENT AND ENVIRONMENTAL MANAGEMENT. (3)
A study of the theories and strategies for environmental management and sustainable development of resources. Topics covered include contemporary environmental degradation and resource use problems, political economy of resource use and environmental change, design and management of sustainable resource development, impact of sustainable development on gender issues and poverty, and environmental accounting. Prereq: GEO 130 or GEO 210 or consent of instructor.

GEO 551 JAPANESE MULTINATIONAL CORPORATIONS. (3)
A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinationals policies on the environment; and local economy. Prereq: Consent of Instructor. (Same as JPN 551.)

GEO 560 INDEPENDENT WORK IN GEOGRAPHY. (3)
Individualized study and/or research intended to provide opportunities for students to explore topics not otherwise offered in existing courses, or to address topics not covered in existing courses. Students work with a faculty supervisor in defining a specific area of study, appropriate learning objectives, and suitable evaluation criteria. Course format may range from critical reading of selected literatures to innovative research projects. Students should identify and consult with faculty supervisor well in advance of registration for this course. Prereq: Restricted to Geography majors with GPA of 3.0 or above in the department.

GEO 565 TOPICS IN GEOGRAPHY. (3)
Discussion, readings, and papers focusing on relevant topics in geography directed by a staff member having specific competence for the topics under study. Current research developments in particular geographic subfields will be stressed. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

GEO 585 AGING AND ENVIRONMENT. (3)
Explores the elderly person’s changing experience of environment. Physiological, psychological and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GRN 585.)

GEO 600 INTRODUCTION TO METHODS IN GEOGRAPHY. (3)
A broad survey of methods and methodological debates of research in human/physical geography. Emphasis on contemporary research examples. Prereq: Graduate standing.

GEO 609 GISCIENCE FUNDAMENTALS. (3)
This course introduces students to the use of geographic information systems and the science behind their use. Topics include an introduction to types of geographic information and data; the sources, constraints, and uses of data; the techniques for processing and visualizing spatial data and the methodological, epistemological and ontological issues associated with GIScience.

GEO 610 ANALYTICAL METHODS IN GEOGRAPHY. (3)
An introduction to the application of analytical methods to geographic problem solving. Topics cover sampling theory, probability theory and both parametric and nonparametric statistical techniques. Prereq: STA 570 or equivalent or consent of instructor.

GEO 619 REMOTE SENSING FUNDAMENTALS. (3)
This course covers the use of remote sensing technologies and their application in natural resource management, land use/land cover analysis, city and regional planning and environmental monitoring. This course covers the basic remote sensing principles, the range of space/air borne sensors/data, key techniques for digital image processing, and applications particular related to diverse land surfaces including the built environment, water, soil and vegetation.

GEO 655 SPECIAL STUDY OF SYSTEMATIC GEOGRAPHY. (3)
The application of the methods of systematic geography to particular special studies in topical areas, such as conservation, urban areas, climatology, cartography, or others. May be repeated to a maximum of six hours. Prereq: Appropriate 500-level course work in systematic or topical geography (e.g., conservation, urban, climatology, cartography).

GEO 700 ADVANCED ANALYTICAL METHODS IN GEOGRAPHY. (3)
GEO 702 CONCEPTS IN GEOGRAPHY. (3)
Contemporary geographic concepts and theories are examined with emphasis on concepts within human geography, especially with reference to the economic, urban, cultural, and population subfields within the discipline. Prereq: Graduate student status.

GEO 705 ADVANCED GEOGRAPHIC METHODS (Subtitle required). (3)
In-depth study and application of one or more research methods/techniques (e.g., qualitative methods, quantitative methods, textual analysis, visual analysis, GIS). Intended to offer M.A. and Ph.D. students advanced methodological specialization in geography. May be repeated to a maximum of six credits under different subtitles. Prereq: GEO 600 or equivalent.

GEO 706 ADVANCED FIELD STUDIES (Subtitle Required). (1-9)
Field-based, regionally specific study of selected topics in cultural, environmental, political, social, urban, or economic geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: Consent of instructor.

GEO 707 DEVELOPMENT OF GEOGRAPHIC THOUGHT. (3)
An analytical review of the evolution of geographic thought, in terms of concepts, methodologies and scholars, emphasizing the basic literature through a series of topics.

GEO 708 GEOGRAPHIC INFORMATION SYSTEMS RESEARCH METHODOLOGIES. (3)
Following a brief overview of GIS, remote sensing, GPS, and other relevant information technologies as information collection, presentation, and analytical aids, this course will consider current developments of geographic information technologies. These include, but are not limited to, field GIS, public participation GIS, participatory information technology, collaborative environments, and spatial decision-making. Discussion of these developments will be complemented by a rigorous examination of theoretical and methodological issues. Prereq: GEO 409G or its equivalent, or consent of instructor.

GEO 709 ADVANCED GISCIENCE. (3)
This course explores advanced applications and topics within GIScience including data mining, scripting, point pattern analysis, data interpolation, geospatial modeling and network analysis and the methodological, epistemological and ontological issues with the classification requirements and analytical capabilities of GIScience. Prereq: GEO 609 or consent of instructor.

GEO 711 CULTURAL STUDIES AND GEOGRAPHY (Subtitle required). (3)
Seminar in cultural studies and geography, including, for example, interpretation and analysis of the built environment; space and representation; the political economy of landscape production; regional imagery; media studies; popular culture; the social construction of...
community; historic preservation; recreation, tourism and society. May be repeated to a maximum of nine credits under different subtitles.

**GEO 712 DEVELOPMENT STUDIES AND GEOGRAPHY** (Subtitle required). (3)
Seminar in selected topics in the policies, practices, and processes of development, including, for example, political economy perspectives on development; anti-development and postcolonial theory; economic restructuring and transition economies; gender and development; the relations between development and migration, transportation and tourism; environmental management and sustainable development. May be repeated to a maximum of nine credits under different subtitles.

**GEO 713 ECONOMIC GEOGRAPHY:** (Subtitle required). (3)
A seminar in economic geography, including, for example, global, regional, and local economic restructuring; global financial systems; foreign direct investment and trade; geography of multinational corporations; geography of labor; spaces of production and spaces of consumption; gender and economic space; space-time convergence; information and communications. May be repeated to a maximum of nine credits under different subtitles.

**GEO 714 POLITICAL GEOGRAPHY:** (Subtitle required). (3)
A seminar in political geography, including, for example, electoral systems; state theory; post-Cold War democratization; the geography of revolutionary change; critical geopolitics; political economy of global movements; political economy of globalization discourses and practices. May be repeated to a maximum of nine credits under different subtitles.

**GEO 715 GEOGRAPHY AND SOCIAL THEORY** (Subtitle required). (3)
Seminar in geography and social theory, including, for example, theories of human spatiality; Marxist, neo-Marxist, and post-Marxist theory; postmodernism and poststructuralism; feminist theory; actor network theory; identity theory; geographic thought and society; technology and society. May be repeated to a maximum of nine credits under different subtitles.

**GEO 717 URBAN GEOGRAPHY** (Subtitle required). (3)
Seminar in urban geography, including, for example, urban morphology; urban systems; the local state; urban social fragmentation; conflicts over urban growth and development; urban transportation planning; urban historical geography; gender and urban space; race and urban space; urban landscapes. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**GEO 718 TOPICAL SEMINAR IN GEOGRAPHY OF ENVIRONMENT AND RESOURCES** (Subtitle required). (3)
Study of selected topics on agriculture resource allocation, resource conflict, public land policy, natural hazards, environmental management, energy and biogeochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**GEO 719 GEOSPATIAL TECHNOLOGIES** (Subtitle required). (3)
A seminar in the social construction of geospatial technologies and the implications of their use. Topics may include crowdsourcing, privacy and surveillance, open source software, code, space, censorship and control, copyright and locative media usage. May be repeated to a maximum of nine credits under different subtitles.

**GEO 720 REGIONAL STUDIES** (Subtitle required).

**GEO 721 TOPICAL SEMINAR IN PHYSICAL GEOGRAPHY (Subtitle required).** (3)
Examination of selected topics in geomorphology, hydrology, pedology, biogeochemistry, climatology, and earth system science. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**GEO 722 SOCIAL GEOGRAPHY** (Subtitle required). (3)
Seminar in social geography, including, for example, race and gender, feminist geography, health care, disease and society; the geography of AIDS; the geography of aging and the life cycle; poverty and social policy; human behavior in space and time; population and migration studies; spatial structure of social networks; transportation of disadvantaged groups. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**GEO 731 EARTH SURFACE SYSTEMS.** (3)
A treatment of earth surface systems from the perspective of complex systems theory. The course takes a holistic viewpoint, emphasizing interactions between the atmosphere, lithosphere, hydrosphere, and biosphere and the manifestations of those signatures in soils, landforms, and ecosystems. Prereq: Consent of instructor.

**GEO 740 RESEARCH INTERNSHIP** (Subtitle required). (1-6)
To provide students with course credit for faculty supervised internships with governmental and non-governmental organizations. May be repeated to a maximum of nine credits.

**GEO 741 TEACHING PRACTICUM.** (1)
Introduction to teaching, with particular focus on pedagogical issues in geography courses. Intended to provide students with background sufficient to enable them to assume full responsibility for university and college level courses.

**GEO 742 PREPARING FUTURE FACULTY IN GEOGRAPHY.** (1)
Introduction to the professoriate, with particular focus on geography within the academy. Intended to provide students with background sufficient to assume responsibility as new faculty members in universities and colleges.

**GEO 743 RESEARCH PROPOSALS AND GRANT WRITING.** (1)
Introduction to basic geographic research proposal design standards, with particular emphasis on the requirements of granting agencies.

**GEO 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**GEO 749 DISSERTATION RESEARCH** (Subtitle required). (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**GEO 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**GEO 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

**GEO 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.** (0-12)
May be repeated indefinitely.

**GEO 772 SPECIAL RESEARCH PROBLEMS IN GEOGRAPHY.** (1-6)
Open to doctoral candidates who have the necessary training and ability to conduct research on a selected problem. May be repeated to a maximum of 12 credits. Prereq: Approval of the director of graduate studies.

**GER German Studies**

**GER 011 GERMAN FOR READING KNOWLEDGE.** (3)
This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination, who need a reading knowledge of German in their minor, or who require a review of German grammar.

**GER 101 BASIC GERMAN.** (4)
Fundamentals of German with development of the four basic skills: reading, writing, listening, and speaking.

**GER 102 BASIC GERMAN.** (4)
Continuation of GER 101. Prereq: GER 101, or one year of high school German, or equivalent.

**GER 103 FAIRY TALES IN EUROPEAN CONTEXT.** (3)
Introduction to major types of fairy tales in European historical and literary context, covering the period from the Renaissance to the present. Taught in English.

**GER 104 TURNING POINTS:** (Subtitle required). (3)
An introductory course exploring the many ways in which art, architecture, literature and film have come to define and represent major urban centers in the German-speaking world. Focus in a given semester will be on an individual city such as Berlin, Vienna or Munich in times of innovation and upheaval during which it has contributed significantly to developments in literature and the visual arts and was or continues to be at the center of world historical events. May be repeated once with new subtitle.

**GER 105 GERMAN FILM TODAY.** (3)
This course examines contemporary German filmmaking from a global and cross-cultural perspective. It is not intended to be a history of German film, but an introduction to the interpretation of films produced in a specific national context outside of what is commonly referred to as Hollywood.

**GER 201 INTERMEDIATE GERMAN.** (3)
Systematic review of grammar and furthering of reading, writing, listening, and speaking skills based upon cultural and literary materials. Prereq: GER 102 or equivalent or placement test.

**GER 202 INTERMEDIATE GERMAN.** (3)
Continuation of GER 201. Prereq: GER 201 or equivalent or placement test.

**GER 205 READING AND WRITING PRACTICE.** (2)
This course concentrates on the development of reading and writing skills. Students learn to build vocabulary systematically and develop strategies for reading texts of varying kinds and levels of difficulty. Writing assignments range from brief descriptions and reports to translations and original compositions enabling students to develop and sharpen writing skills. Prerequisite for upper division courses. Prereq or conc: GER 201 or equivalent.

**GER 206 SPOKEN COMMUNICATION.** (3)
This course concentrates on the development of speaking and listening skills. Students learn to negotiate everyday communication situations by acquiring verbal strategies and idiomatic expressions needed for meaningful interaction in a German-speaking country. Emphasis is placed on skills and vocabulary needed to discuss topics related to German culture. Prereq: GER 201.
GER 211 GERMAN FOR READING KNOWLEDGE I. (3)
This is the first of a two-course sequence in German that will enable students to read any German texts they wish, from daily newspapers and magazines, to literary works, to scholarly prose in any discipline.

GER 212 GERMAN FOR READING KNOWLEDGE II. (3)
The course will confront students with a variety of texts of ever increasing difficulty. Students will be provided with the foundation necessary both for understanding the evolution of German literature, history, and culture, and with the reading skills necessary for them to use the language in their course work. Completion of the two-semester sequence will enable undergraduates to pursue a course of study leading to the proposed certificate in German studies. Prereq: GER 211, or GER 201 and permission of instructor or GER 202.

GER 263 THE GERMAN CULTURAL TRADITION I. (3)
An introduction to the social, intellectual and aesthetic traditions of German-speaking cultures from the Germanic past to the Enlightenment. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

GER 264 THE GERMAN CULTURAL TRADITION II. (3)
An introduction to the social, intellectual and aesthetic tradition of German-speaking cultures from the Enlightenment to the present. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

GER 307 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION I. (3)
This course develops listening, speaking and writing skills in German with emphasis on practical communicative needs. It includes a review of grammar, basic oral and written projects, class discussion, and practice in a variety of written forms. Prereq: GER 202 or equivalent.

GER 308 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION II. (3)
Continuation of GER 307. Prereq: GER 307, or equivalent.

GER 310 GERMAN FOR INTERNATIONAL BUSINESS AND PROFESSIONS. (3)
This course will develop written and conversational skills based on communicative needs of international business and professions in German-speaking countries, using materials from banking, computer science, export-import, journalism, government and the public sphere. Prereq: GER 307 or permission of the instructor.

GER 311 INTRODUCTION TO GERMAN LITERATURE: THEMES (Subtitle required). (3)
An introductory course that explores such themes in German literature as Fathers and Daughters, Fathers and Sons, Trials, Judgments and Justice, and Conceptions of the Self. Readings will be drawn from various periods and major genres. Themes vary and will be announced. May be repeated once for a total of six credits by nonmajors if theme changes. Prereq: GER 202 or equivalent.

GER 312 INTRODUCTION TO GERMAN LITERATURE: POPULAR FORMS. (3)
An introductory course that focuses on social, political, anthropological and aesthetic aspects of popular forms of German literature. Readings include fairy tales, folk songs and legends, children’s literature, detective stories, comics and other popular literary forms. Prereq: GER 202 or equivalent.

GER 317 HISTORY OF GERMAN CULTURE. (3)
An introduction to German culture with emphasis on the epochs important to the development of modern German-speaking countries. Readings in German from philosophy, the sciences, the arts, history, politics and literature. Visual materials documenting high culture and everyday life. Taught in German. Prereq: GER 205 or 206, or equivalent.

GER 319 CONTEMPORARY GERMAN LITERATURE AND CULTURE. (3)
Selected works of contemporary German literature by Austrian, German, and Swiss authors are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 307.

GER 342 WAR, PEACE, AND TERROR IN GERMANY AND EUROPE. (3)
This course explores the topics of war, peace, and terror in the context of Germany, Central Europe, and beyond; in the desire for peace and for war; from depictions of battle to reflections on policy and strategy; and from the logic of terror to its horrifying effects.

GER 352 GERMAN-SPEAKING EUROPE: (Subtitle required). (3)
This course will place an important aspect of German culture in the broader context of European cultural and historical developments. Focus in a given semester will be on a special topic through which significant developments in literature and the arts may be considered in relation to the historical context of such developments. Possible topics include Literature of the Holocaust, Terrorism in the German Context, The Culture of Sport, and Children’s Literature. All readings will be in English. May be repeated for a total of six credits by nonmajors or with a new topic. Prereq: GER 202 or equivalent.

GER 361 GERMAN CINEMA. (3)
A history of the cinema in the German-speaking world from its beginnings to the present, emphasizing the evolution of the production, distribution and reception of film in relation to changing political, social, economic, ideological and literary/artistic contexts. Some consideration of film theory and criticism in conjunction with class discussion of individual films. Viewing of films (silent or German dialogue with English subtitles) outside of class is required. Class taught in English.

GER 363 GERMANIC MYTHOLOGY. (3)
Overview of the mythological traditions of the Germanic peoples and their continuing presence in Western culture.

GER 385 INDEPENDENT WORK IN GERMAN. (1-3)
This course is designed for students who wish to do advanced work in German on any subject. May be repeated up to a maximum of six credit hours. Prereq: Major and a standing of 3.0 in the department.

GER 495 GERMAN STUDIES CAPSTONE. (1)
Further development of conversational skill and practice in writing stylistically appropriate German. Study of finer points of grammar. Discussion of special topics and theme writing. Prereq: GER 308 or equivalent.

GER 510 STUDIES IN MAJOR AUTHORS. (3)
Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors’ literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 516 STUDIES IN GENRE. (3)
One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 520 SPECIAL TOPICS SEMINAR. (3)
Investigation of a topic pertinent to the advanced study of German language, literature and culture. May be repeated once with new topic. Prereq: GER 415G, 416G, 420G or equivalent.

GER 532 HISTORY OF THE GERMAN LANGUAGE. (3)
This course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on German. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

GER 612 STUDIES IN LITERARY THEORY. (3)
Course will explore such fundamental issues as the definition of literature, interpretation and evaluation, the reading process, and literary life from the perspective of competing theoretical systems.

GER 615 STUDIES IN MAJOR AUTHORS. (3)
Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors’ literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits.

GER 616 STUDIES IN GENRE. (3)
One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of nine credits.

GER 620-630
Provides a general framework for the systematic study of German literature in its cultural setting and delimits various issues to be investigated further in corresponding 700-level courses. Readings and discussions focus on documents central to the literary life of a given period and to the understanding of its institutional and biographical basis as well as its regional, sociopolitical, motivational, poetological, and ideological diversity. Each course also emphasizes critical methodology and tools of scholarship and identifies new directions for basic research.

GER 620 STUDIES IN THE MIDDLE AGES. (3)
Enlightenments to Classicism.
GER 629 STUDIES IN THE 19TH CENTURY. (3) Romanticism to Naturalism.

GER 630 STUDIES IN THE 20TH CENTURY. (3) Turn-of-the-century Modernism to the present.

GER 650 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required.) (3) A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar focI will vary year to year, including such topics as "Individual and Collective Identity Formations in post-Enlightenment Germany," "Constructions of German Heimat," and "Fraid, Culture, Society." May be repeated to a maximum of six credits.

GER 653 RESEARCH AND ISSUES IN TEACHING GERMAN. (1) This course builds on GER 553. Methods of Teaching German. The course will address a range of educational issues beyond the teaching of foreign language skills as well as acquaint students with research methods in both a theoretical and practical manner. May be repeated to a maximum of four semesters. Coreq: GER 553.

Note: The course series 720-730 offers the opportunity for the more specialized and greater in-depth investigation of various topics encountered in the corresponding, but more broadly conceived, period courses of the 620-630 series. With changes in topic, each course number of the 720-730 series can be repeated a total of three times - thus enabling the student at the more advanced level to specialize within a particular period or periods.

GER 721 SPECIAL TOPICS IN GERMAN LITERARY AND CULTURAL HISTORY. (3) This course allows for the in-depth study of specific topics in German literary and cultural history encountered in the broadly conceived period courses of the 620-630 series. With changes in topic the course may be repeated to a maximum of nine credits. Prereq: Permission of Director of Graduate Studies.

GER 748 MASTER'S THESIS RESEARCH. (0-6) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GER 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

GER 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (1) May be repeated to a maximum of nine credits. Prereq: Admission to the Ph.D. program in Gerontology.

GER 781 INDEPENDENT STUDIES IN GERMAN. (1-3) Course allows individual students to pursue independent research on a selected aspect of German linguistic, literary or cultural history. May be repeated once if topic changes. Prereq: Permission of Director of Graduate Studies.

SCANDINAVIAN
(Offered as required)

GER 141 SWEDISH I.

GER 142 SWEDISH II.

GER 610 OLD ICELANDIC. (3) Rapid coverage of morphology, phonology and syntax of Old Icelandic, with some attention to linguistic affinities within the Indo-European and Germanic groups of languages. Prereq: Reading knowledge of German; consent of instructor.

GRN 612 BIOLOGY OF AGING. (3) A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as AHA/PBY 612.)

GRN 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MED SCIENCE TEACHING I). (2) A two (2) credit seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as PBY 615.)

GRN 616 TEACHING SEMINAR IN GERONTOLOGY. (2) The purpose of this seminar is to prepare doctoral students as classroom instructors, and to enhance instructional skills of those students with teaching experience. Emphasis is placed on developing the fundamental knowledge and skills needed to survive and excel in the classroom. Topics covered include: course development strategies; lecture preparation and delivery; interactive and group learning; writing for learning; student evaluation; student advising; and instructional ethics and responsibilities. Seminar activities include development of instructional materials, thematic discussion, and demonstrations/simulations of classroom experiences. Prereq: GRN 600 and GRN 620, or consent of instructor.

GRN 617 TEACHING PRACTICUM IN GERONTOLOGY. (3) This practicum provides a forum for continued development of teaching skills by concurrently combining classroom instruction experience with formal instructor debriefing sessions. Problematic and successful experiences will be discussed, and specific instructional concepts and issues will be addressed in depth. Prereq: GRN 616 and concurrent classroom teaching.

GRN 618 EPIEDEMIOLGY OF AGING. (3) This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and PHG605/PM620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as SPP 689.)

GRN 620 HUMAN AGING AND ADJUSTMENT. (3) The intent of GRN 620 is to provide continued development (from GRN 600) of critical interdisciplinary skills in studies of the aging process. Students will, as a group, identify a single central issue associated with aging and conduct comprehensive literature reviews and appropriate research to thoroughly address that issue. Prereq: GRN 600 and admission to the Ph.D. program in gerontology.

GRN 644 DEMOGRAPHY AND AGING. (3) This course examines the dynamics of human population distributions, densities, and growth patterns as they relate to population aging. The essential demographic processes of fertility, mortality, and mobility are addressed from multiple disciplinary perspectives, and topical coverage includes the environmental, social, political, economic, and cultural impacts on personal demographic behavior and population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, and how this diversity affects the patterns and consequences of aging across space and time.
GRN 650 RESEARCH DESIGN IN GERONTOLOGY. (4)
This course will provide training in research design appropriate for the study of aging and the aged and will critically assess special considerations involved in studying this population. Topics to be covered will include: philosophy of science; data sources for research on aging (including medical informatics and clinical epidemiology sources); the use of animal models in aging research; special design considerations for the study of aging (reconciling age, period, and cohort effects); longitudinal research; measurement tools for assessing the elderly (functional assessment, ADL, life satisfaction scales, etc.); issues in interviewing older people; qualitative methods in aging research; the ethics of research on aging and the aged. Prereq: Admission to Gerontology Ph.D. Program.

GRN 651 QUALITATIVE GERONTOLOGY. (3)
This course (1) critically evaluates different qualitative epistemologies including biography, phenomenology, grounded theory, ethnography and the case study; (2) assesses the value of alternative qualitative methodologies for gaining deeper understanding of the experience of elders; (3) explores practical issues in employing such methodologies; and (4) provides opportunities for participants to engage in different styles of qualitative research. Prereq: Graduate standing.

GRN 653 LABORATORY RESEARCH IN GERONTOLOGY. (3)
Students will be exposed to current biomedical techniques by conducting supervised research in a laboratory setting. Prereq: Permission of instructor.

GRN 656 INTEGRATIVE STUDIES IN GERONTOLOGY. (3)
This seminar is designed to provide gerontology doctoral students the opportunity to place individual dissertation topics within the broader field of gerontology, and to broaden the authority with which the students engage in their dissertation work. Although work will largely be independent driven, frequent class meetings provide ongoing feedback from the group on progress and allow all participants to learn from each other's work. Prereq: Completion of gerontology core requirements.

GRN 660 AGING ISSUES AND FAMILY RELATIONS. (3)
The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various kin categories. (Same as FAM 660.)

GRN 704 MENTAL HEALTH AND AGING. (3)
The aim of this class is to provide a broad and selected depth in the area of Mental Health and Aging, aimed at research perspectives. Various psychiatric syndromes will be evaluated in lectures and through the readings in relation to prevalence, assessment, etiology, and treatment in research to reference in older adults. Prereq: Graduate student status.

GRN 705 COGNITIVE AGING. (3)
This is a graduate level seminar on cognitive aging. Topics to be addressed include theories of aging, memory, sensation, and perception, attention, language, social cognition, intelligence, decision-making, and dementia.

GRN 706 HEALTH PROMOTION AND AGING. (3)
In this class health promotion in old age will be examined. The theory behind health promotion programs and the status of existing health promotion program for older adults will be reviewed and discussed. Finally, the knowledge acquired in class will be used to develop and demonstrate an innovative health promotion program for older adults. Prereq: Graduate student standing.

GRN 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA/PSY/PHA 710.)

GRN 715 HEALTH POLICY AND AGING.

GRN 720 GERONTOLOGY/GERIATRIC DENTISTRY. (1)
This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

GRN 731 ELDER MISTREATMENT. (3)
This course reviews major issues and trends related to elder mistreatment. The course emphasizes individual and systemic issues related to elder abuse, neglect, exploitation, and self-neglect on individual, local, state, and federal levels. Special consideration is given to dynamics that shape past, current, and future issues related to elder mistreatment. Prereq: Graduate student status and/or permission of instructor.

GRN 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

GRN 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GRN 768 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

GRN 770 SPECIAL TOPICS IN GERONTOLOGY. (1-3)
This course is designed to present contemporary topics in gerontology in either a lecture or seminar format. It is intended to provide students with opportunities to be informed of current issues in gerontology as well as to explore in-depth studies of particular gerontological topics. May be repeated to a maximum of twelve credits.

GRN 771 AGING IN RURAL ENVIRONMENTS. (3)
In the context of a changing rural environment, this seminar explores the life circumstances and life experience of rural elders in relation to the health and well-being of this population.

GRN 772 AGING AND THE LIFE COURSE. (3)
This seminar will establish a common foundation of knowledge through examinations of traditional “life courses” influencing individuals as they age through time, including household and family, education, and work, and housing. This foundation will be built upon using critical examinations of such themes as gender roles, spatial experience, cognitive change and memory, and structural effects on life trajectories. Emphasis will be placed on surveys of existing literature and on integrating various role-specific frameworks within social and behavioral theory.

GRN 773 ETHICS AND AGING. (3)
The focus of this class is on applied ethics and aging. We will address the following topics: mid/late life reproduction; research with older adults; spirituality/selfhood; legal issues; cultural issues; vulnerable older people; caregiving and community-based care; specific issues related to Alzheimer’s Disease; issues at the end of life, and other timely ethical issues that may arise during the course. The course will make use of provocative readings, case studies, supplementary professional articles, a presentation and paper, lively class discussion, and outside speakers who will share their expertise with you on a variety of ethical issues related to aging.

GRN 774 PUBLIC POLICY AND AGING. (3)
This course reviews major issues and trends in the economics of aging and social policy and aging. The course emphasizes health, economic, and welfare policies and considers their implications on federal, state, and local levels. Special consideration is given to dynamics that shape past, current, and future policy in the area of aging. Prereq: Graduate standing.

GRN 775 CLINICAL GERIATRICS. (3)
This course provides a perspective of clinical geriatrics. Basic concepts of geriatric care are presented, along with concepts of gerontology as applied to geriatric medicine. This course is designed for both clinicians and non-clinicians.

GRN 778 CURRENT TOPICS IN BRAIN AGING. (3)
Students will learn cellular and molecular changes that occur in the brain through AD progression in addition to the impact of these changes on individual lifestyle and on society.

GRN 780 APPLIED GERONTOLOGY PRACTICUM. (1-3)
This course is designed to provide students the opportunity to experience the practical application of gerontology in such domains as government, administration and clinical environments. In addition, the student will gain in-depth experience with the organization and an introduction to problems in applied research. Students will work under the supervision of a gerontology faculty member to coordinate efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of six credits. Approval of the Director of Graduate Studies required.

GRN 781 STUDENT DEVELOPMENT PRACTICUM. (1)
This practicum provides an opportunity for students to present and discuss their research findings in a venue that promotes skill development in the areas of preparation and delivery of research presentations. Students are required to enroll in GRN 781 during each of the first five semesters in residence. Prereq: Admission to Gerontology Ph.D. program.

GRN 782 WOMEN’S HEALTH AND AGING. (3)
This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as BSC 782.)

GRN 783 PUBLIC HEALTH AND AGING. (3)
Public Health and Aging is an elective course in the Graduate Center for Gerontology and Department of Health Behavior and is offered to students on the graduate level. The focus of the course is to help students identify a public health framework and a paradigm for addressing the issues of social, emotional, physical, and mental health in older adults, as well as a keen understanding and awareness of chronic disease prevention, mortality, and quality of life issues that are germane to aging in the United States. Prereq: Graduate standing.

GRN 785 INDEPENDENT RESEARCH IN GERONTOLOGY. (1-6)
Open to doctoral students who have the necessary training and ability to conduct research at an advanced level. Students will work under the supervision of a gerontology faculty member to coordinate research efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of 9 credits. Approval of the Director of Graduate Studies required.
GRN 786 INDEPENDENT READINGS IN GERONTOLOGY. (1-6) Open to doctoral students who have the necessary training and ability to work independently at an advanced level. Students will work under the supervision of a gerontology faculty member to identify readings appropriate for the student’s chosen topic, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of nine credits. Approval of the Director of Graduate Studies required.

GRN 790 PROFESSIONAL DEVELOPMENT IN GERONTOLOGY. (1) This seminar will cover elements of professional development in the areas of research, teaching, and service as students are prepared for obtaining positions and developing careers in gerontology. Emphasis will be placed on means of documenting progress and accomplishment (e.g., CV building, teaching portfolio development, evaluation), effective strategies for searching for and securing jobs (e.g., interview skills), and strategies for promoting quality performance and professional success in gerontology-related professions. Prereq: Admission to the Gerontology Ph.D. program.

GRN 791 INTEGRATIVE RESEARCH SEMINAR II.

**GS The Graduate School**

GS 600 SPECIAL TOPICAL GRADUATE COURSE. (1-3) An interdisciplinary, topical or experimental course to be approved by the Dean of the Graduate School. A particular course can be offered no more than twice under the number GS 600. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

GS 610 COLLEGE TEACHING. (1) This one-credit-hour seminar addresses teaching and learning issues in the college classroom. It is intended for graduate students who want to prepare for future academic careers and enhance current teaching activities. The seminar will examine pedagogical issues in a general format with opportunities for discipline-specific applications. This course can serve to augment any department-based programs.

GS 620 TEACHING IN THE 21ST CENTURY. (1-2) This seminar, part of the Preparing Future Faculty program, is a rotating series of 1-2 credit hour courses on various aspects of life in institutions of higher education. Participating graduate students from a range of disciplines will have the opportunity for an in-depth exploration of the research and practice surrounding a special topic in college teaching and learning. The seminars will involve both classroom activities and experience-based learning. For example, the course on first-year students will include a study of current research on the first-year experience, interviews with first-year students, and an experiential component where participants serve as mentors for first-year students. Participants will be asked to produce a paper that integrates the theoretical and experiential aspects of the course and develops implications for teaching in their content areas. May be repeated to a maximum of three enrollments.

GS 630 INSTRUCTIONAL TECHNOLOGY. (1) This seminar addresses pedagogically sound and effective applications of instructional technologies (IT) in college teaching. Course goals include examining the impact of IT on learning outcomes, teaching strategies, and instructional assessments; developing proficiency in creating PowerPoint presentations, designing and managing instructional Web sites, facilitating Internet dialogue, and conducting distance learning courses; and considering how IT affects faculty roles and responsibilities, the nature of the college classroom, and the future of higher education.

GS 640 GRANT WRITING. (3) This course prepares graduate students to be PI on a state, federal, other large competitive grant. Students prepare and critique proposal. Prereq: GS 650.

GS 650 PREPARING FUTURE FACULTY. (2) Preparing Future Faculty is designed to introduce graduate students to the roles and responsibilities of the college teacher and to assist them in understanding the variety of institutions in which effective teaching takes place. Students will focus on the academic expectations, institutional identities, and particular policies and procedures which characterize different types of institutions of higher learning. Skills to help students apply for positions and achieve success in their appointments will also be addressed. Lecture, two hours per week.

GS 660 BIOACTIVE INTERFACES AND DEVICES SEMINAR. (1) A multi-disciplinary seminar in Bioactive Interfaces and Devices. May be repeated to a maximum of four credits. Prereq: Graduate status.

GS 680 GRADUATE STUDENT LEAVE OF ABSENCE. (0) This course is intended for degree-seeking graduate students that have received permission to take a leave of absence for one or more semesters. By registering for GS 680 (0 credit) students remain officially enrolled in the Graduate School and will therefore be eligible to register for the subsequent semester. Prereq: Enrollment in a graduate degree-granting program.

GS 695 SPECIAL PROBLEMS IN COLLEGE TEACHING AND LEARNING. (1-3) This special problems course is designed to provide opportunities for graduate students and postdoctoral scholars pursing a Certificate in College Teaching and Learning to explore special problems related to college teaching that bridge or fall outside the domain of departmental efforts; graduate students exploring faculty development as a career option; and students who currently hold full-time teaching positions in colleges or universities and who are interested in professional development or credentialing in College Teaching and Learning. An “Independ-
manifests, poetry, and short stories, as well as classic works of feminist theory and cultural criticism.

GWS 350 INTRODUCTION TO FEMINIST THEORIZING. (3)
An interdisciplinary course that acquaints undergraduates with the central issues and texts in contemporary feminist theories. It will examine what feminist and womanist theories are and how they analyze and explain the workings of our social world. The course will clarify basic concepts in feminist thought such as gender, difference, patriarchy, and post-colonialism and will provide students with tools to analyze these theories and explore contemporary applications. Prereq: GWS 200 or GWS 201.

GWS 360 LGBTQ HISTORY IN THE UNITED STATES. (3)
Introduces changing perceptions of homosexuality over time, as well as the creation of LGBTQ identities and social movements; explores the meanings of same-sex love prior to the existence of current legal systems and, at times, after that, and the works of language developed; and examines the cultural context in which “homosexual” came to represent a person rather than a behavior in 19th century Euro-American culture and the concurrent medicalization of homosexuality and gender nonconformity.

GWS 395 UNDERGRADUATE RESEARCH IN GENDER AND WOMEN’S STUDIES. (1-3)
The purpose of this course is to give students the opportunity to engage in independent faculty-directed library or field research focused upon significant issues and problems confronting women in contemporary society. May be repeated to a maximum of 6 hours. Prereq: GWS 200 or GWS 201 and written agreement of a Women’s Studies Affiliated faculty member, who will direct the study.

GWS 399 INTERNSHIP IN GENDER AND WOMEN’S STUDIES. (1-6)
Provides field experiences in women’s studies through work in education, industry, government, or community organizations. Offered on a pass/fail basis only. Maximum six credit hours per placement to a maximum of twelve credit hours total. (Three hours can be counted toward the undergraduate Women’s Studies requirements.) Prereq: GWS 200 or GWS 201 and declared minor in Women’s Studies and consent of instructor.

GWS 400 DOING FEMINIST RESEARCH. (3)
In this course, we focus primarily on different kinds of qualitative research. Students will become familiar with a variety of methods used by Gender and Women’s Studies scholars, and reflect on the problems involved in gathering information. But primarily, students will BE the researcher: using all these methods to develop a variety of approaches to studying a Women’s Studies topic of choice. Each week, class participants will discuss the practicalities of conducting particular kinds of research and evaluate the studies; and they will share research findings in a workshop format. Prereq: GWS Major or permission of instructor.

GWS 410 INTRODUCTION TO QUEER THEORY. (3)
An introduction to theories of how people think about and enact genders and sexualities. Students will learn key scholarly concepts in order to differentiate between queer theory as an interdisciplinary approach to sexuality studies and disciplinary approaches to the study of sexuality, such as psychological, historical, anthropological, or sociological. We will apply critical theory to political debates, literary texts, and films in order to understand the contributions made by queer theory to the study of humanities, especially issues of human diversity and globalization. Prereq: GWS 201 or GWS 200.

GWS 430 GENDER, POWER, AND VIOLENCE. (3)
This course is organized around three selected but interrelated themes to help us examine the intersections between gender, power, and violence in different cultural settings. We will examine state, institutional, and interpersonal violence and critically analyze the ways in which gender and power intersect at these levels. In our discussions, we will pay special attention to the various forms (physical, psychological, economic, sexual, and symbolic) of violence may take and analyze the causes and consequences of different articulations of gender, power, and violence.

GWS 506 HISTORY OF SEXUALITY IN THE U.S. (3)
An overview of the history of beliefs about sexuality, sexual cultures and norms, and sexuality’s relationship to power in American society from the colonial period to the present.

GWS 595 ISSUES IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)
Discussion, readings, and papers focusing on relevant topics in Women’s Studies directed by a faculty member with expertise in the topic under study. Courses will be interdisciplinary, although they will also include materials from particular relevant disciplines. May be repeated under different subtitles to a maximum of six credits. Prereq: GWS 200 or GWS 201 or permission of instructor.

GWS 599 SENIOR SEMINAR (Subtitle required). (3)
This course provides a space for students to synthesize what they have learned about the methods and theories of GWS in a few different ways. Students will reflect on the ways in which one puts together an argument and writes as an interdisciplinary scholar on gender or women. Students will do this by writing a senior thesis and editing the theses of other students, and reading and discussing some materials which deal with research and writing in GWS. Prereq: Must be a declared major or minor in junior or senior year, or have written permission of the Chair in exceptional circumstances. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

GWS 600 TOPICS IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)
Selected topics of theoretical or substantive interest in women’s studies with special attention to topics of contemporary relevance. May be repeated to a maximum of nine credits under a different subtitle. Prereq: Graduate standing or permission of instructor.

GWS 610 WOMEN AND “MADNESS”. (3)
This course explores the social construction of mental illness as it pertains to gender. We will consult narratives from different disciplines: Literature, Psychology, Cultural Studies, Anthropology, History and Feminist Theory. Our focus will concern the ways in which all women are constructed as “sick” as well as the perspectives of women who feel a sense of psychiatric disability and disability in their lives. Readings by women of color and lesbians will suggest the particular ways culture defines such women as “abnormal.”

GWS 616 COLONIALISM/POST-COLONIALISM AND GENDER. (3)
This course is designed to expose students to a range of theories and debates centering on or pertinent to women, gender, and sexuality in the field of postcolonial studies. Here, the field is understood in its widest and most interdisciplinary sense, inclusive of studies of Empire, the independent so-called “Third World”, and diasporas. Topics for study will include classical texts in the field, current postcolonial readings on gender and sexuality in empire, representa- tion, trans/nationalism, and diasporas. Course credit may be used to help satisfy the international component of the Women’s Studies Graduate Certificate requirements.

GWS 620 COMPARATIVE CONSTRUCTIONS OF GENDER AND SEXUALITY. (3)
This course is designed to give students an understanding of an array of locally situated theories and debates about gender and sexuality mainly outside of mainstream U.S. culture. Countries/communities of focus will vary.

GWS 630 SEMINAR IN FEMINIST RESEARCH METHODS. (3)
This course presents a variety of research methods used by Gender and Women’s Studies scholars. The course examines how research has been conducted in a range of fields within Gender and Women’s Studies, presents basic skills, commonly used methods, ethical issues, and social applications.

GWS 640 HISTORY OF FEMINIST THOUGHT AND ACTION (Subtitle required). (3)
Course provides a historically organized, thematically focused examination of pioneering works of feminist argument and analysis, creative writing, art, memoir, and politics. Theme and time-period vary according to instructor, but time-span covers at least fifty years and content includes at least two national, ethnic, or geographical contexts. May be taken up to six credit hours under different subtitles.

GWS 650 FEMINIST THEORY. (3)
An interdisciplinary course addressing issues in contemporary feminist theory (such as intersections of race and gender, the body, ideology and representation, sexuality, etc.).

GWS 675 ADVANCED FEMINIST THEORY. (3)
An advanced topics course in feminist theory. Prereq: Permission of instructor.

GWS 690 GRADUATE RESEARCH IN GENDER AND WOMEN’S STUDIES. (3)
The purpose of this course is to provide graduate students the opportunity to engage in independent faculty-directed research in Women’s Studies. Prereq: Written agreement of a Women’s Studies Affiliated Faculty Member, who will direct the study.

GWS 700 TOPICAL SEMINAR IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)
Intensive work in particular topics in Gender and Women’s Studies. May be repeated four times with different subtitles. Prereq: Graduate standing in GWS, or consent of instructor.

GWS 710 LATIN AMERICAN AND U.S. LATINA WOMEN’S LIVES. (3)
This course employs an interdisciplinary perspective to critically examine the various identities and spaces created by, and imposed on, women in Latin America and Latinas in the U.S. We explore connections and divergences within and between these two groups of women, but begin by examining how the legacies of conquest in Latin America and the U.S. have shaped women’s experiences in the past. This course will also help us understand how women’s experiences have differed given the specific contexts in which their lives unravel.

GWS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GWS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Successful completion of the qualifying examination.

GWS 775 DOMESTIC VIOLENCE ACROSS CULTURES. (3)
This course focuses on domestic violence cross-cultural and from an interdisciplinary perspective. We discuss theories of domestic and gender-based violence, and how research and popular representations influence ideas regarding this phenomenon. We draw on specific experiences of intimate partner violence in different parts of Latin America, North America, Africa, Asia, and Europe. Topics include the impact of migration on women’s experiences of violence, state
responsions and law enforcement, women’s use of violence, the role of in-laws in women’s experiences of Violence, and women’s resistance.

HA  Health Administration

HA 601 OVERVIEW OF U.S. HEALTHCARE. (3)
This course provides an introduction to the U.S. health care system. It covers the history of health care, the organization of health care delivery, and the role of health care professionals in a technological society. The course will provide students with an understanding of the basic principles of health care delivery and the role of the health care provider in society.

HA 622 MENTAL HEALTH ADMINISTRATION. (3)
This course focuses on the administration of mental health agencies and the delivery of mental health services. Students will learn about the history of mental health services, the organization of mental health agencies, the delivery of mental health services, the role of the mental health professional, and the role of the mental health consumer.

HA 635 MANAGEMENT ACCOUNTING FOR HEALTH CARE ORGANIZATIONS. (3)
This course provides an introduction to management accounting for health care organizations. Students will learn about the financial management of health care organizations, including cost accounting, budgeting, and financial planning.

HA 666 HEALTH POLICY AND AGING. (3)
This course provides an introduction to the study of health policy and aging. Students will learn about the historical development of health policy, the current state of health policy in the U.S., the role of aging in health policy, and the role of the aging population in health policy.

HDI  Human Development Institute

HDI 350 UNIVERSAL DESIGN: APPLICATIONS IN THE BUILT, VIRTUAL AND LEARNING ENVIRONMENTS. (3)
This course provides an introduction to universal design in the built, virtual, and learning environments. The course will cover the basics of universal design, including the history, principles, and applications of universal design. Students will learn how to apply universal design principles to the design of buildings, virtual environments, and learning environments.

HDI 400 UNIVERSAL DESIGN PRACTICUM. (3)
This course provides experiential learning in universal design principles utilized in the built and virtual environments. Students will work in teams to design and build a universal design solution for a real-world problem. The course will cover the application of universal design principles to the design of buildings, virtual environments, and learning environments.

HDI 500 UNIVERSAL DESIGN PRACTICUM II: ADVANCED TECHNIQUES. (3)
This course provides advanced experiential learning in universal design principles utilized in the built and virtual environments. Students will work in teams to design and build a universal design solution for a real-world problem. The course will cover the application of advanced universal design techniques to the design of buildings, virtual environments, and learning environments.

HDI 600 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS. (2)
This course provides a basic understanding of the needs of persons with developmental disabilities and special health care needs. Students will learn about the history of developmental disabilities, the role of special health care needs, and the role of the individual with developmental disabilities and special health care needs.

HDI 601 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS: PRACTICUM. (2)
Participants engage in a wide range of structured visits and other university-based clinical and community-based learning experiences, related to services and supports for persons with developmental disabilities and special health care needs. Lecture: one hour; laboratory: eight hours per week.

HDI 602 INTERDISCIPLINARY SUPPORTS. (2)
This course will build on the disciplinary clinical competence of participating students and enhance their knowledge and skills related to specific issues regarding the needs of persons with developmental disabilities and other special health care needs. Topics covered include: Epidemiology, Prevention of Developmental Disabilities, Micro Environment, Early Childhood, School Age and Adult Issues, Cultural Diversity, the Rural and Underserved Population, Politics, Law and Health Care Reform Issues and Advocacy. Lecture, three hours per week.

HES  Human Environmental Sciences

HES 100 AN INTRODUCTION TO PROFESSIONS IN HUMAN ENVIRONMENTAL SCIENCES. (3)
This course provides an introduction to the study of human environmental sciences. Students will learn about the history of the field, the research methods used in the field, and the current state of the field.

HES 300 SPECIAL COURSE IN HUMAN ENVIRONMENTAL SCIENCES (Subtitle required). (1-3)
This course provides a special course in human environmental sciences. The course will cover a specific topic in human environmental sciences, and will be taught by a faculty member with expertise in that topic.

HES 596 SPECIAL PROBLEMS IN HUMAN ENVIRONMENTAL SCIENCES. (1-3)
This course provides a special problems course in human environmental sciences. The course will cover a specific problem in human environmental sciences, and will be taught by a faculty member with expertise in that problem.

HES 600 RESEARCH METHODOLOGY IN HUMAN ENVIRONMENTAL SCIENCES. (3)
This course provides an introduction to the research methods used in the study of human environmental sciences. Students will learn about the research methods used in the field, and will be introduced to the research process.

HHS  Human Health Sciences

HHS 101 SURVEY OF HEALTH PROFESSIONS. (1)
This course provides an introduction to the study of health sciences professions. Students will learn about the history of the field, the research methods used in the field, and the current state of the field.

HHS 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)
This course provides an introduction to the delivery of health and medical care. Students will learn about the history of the delivery of health and medical care, the research methods used in the field, and the current state of the field.

HHS 596 SPECIAL PROBLEMS IN HUMAN ENVIRONMENTAL SCIENCES. (1-3)
This course provides a special problems course in human environmental sciences. The course will cover a specific problem in human environmental sciences, and will be taught by a faculty member with expertise in that problem.
"HHS 350 HEALTH POLICY AND POLITICS."
This course will address the development of the past and current US health policies within the context of historical, economic, cultural, and political forces to delineate the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: HHS 101, HHS 102 and CLM 241. Student admitted to the CLM or HHS program or consent of instructor. (Same as CLM 350.) This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

"HHS 351 HEALTH SERVICES ADMINISTRATION."
Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as CLM-HSM 351.)

HHS 353 ETHICS IN HEALTHCARE.
The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practices of other health care providers will be examined. Code of ethics and the health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed. (Same as CLM 353.)

HHS 354 HEALTH LAW.
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, and issues concerning children, the elderly, the disabled, and the terminally ill. Prereq: Professional program status (which includes an earned Associate Degree in a health care field) and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM-HSM 354.)

HHS 356 SEMINAR IN INTERPROFESSIONAL HEALTHCARE.
A study of selected topics in health and wellness with a focus on the way individuals experience health and utilize resources within their individual nesting environments of health and social community. Exploration of individual perceptions of health, wellness, and quality of life throughout the lifespan and resources available to achieve health. Four hours of seminar is required, and at least one seminar must be taken in the final year of the program. Prereq: Admission to HHS Program or consent of instructor.

HHS 361 HEALTHCARE QUALITY AND PATIENT SAFETY.
This course provides students an opportunity to study how healthcare quality and patient safety has changed over the last 10 years, how human error and “high-reliability organizations” (e.g., hospitals) interact, how changes to our healthcare system have affected care, and how quality/safety/professionalism issues are impacting healthcare. Prereq: Admission to HHS Program or consent of instructor.

HHS 362 INTERDISCIPLINARY HEALTH ADVOCACY.
The course will provide experiences as a health navigator for students in the health sciences. Students will work with patients who are seeking advice about the availability of health resources, health services and health information. Students will be trained in skills needed to become effective health navigators, will work with communities to develop and maintain a healthcare resource data base that will serve as motivational tools for patients to attain healthy lifestyles. Prereq: Admission to the HHS Program or consent of instructor.

HHS 395 INDEPENDENT STUDY. (1-3)
Independent study for undergraduate students with an interest in a specific problem, topic, or issue in Human Health Sciences. Prereq: Admission to HHS Program or consent of instructor.

HHS 400G NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition-related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Undergraduate Students: Admission to HHS undergraduate degree program OR consent of instructor, 200 level physiology or equivalent. Graduate Students: Acceptance to nutrition, kinesiology, or other health-related graduate programs.

HHS 402G MUSCLE BIOLOGY. (3)
This course explores the gross as well as microscopic structural properties and the physiological function of skeletal muscle. Students will gain in-depth knowledge about not only normal muscle function, but also about the adaptability and plasticity of skeletal muscle under different environmental circumstances. The comparative biology of structure and function of skeletal muscle will be covered; also the relationship between muscle structure and function as it relates to human health-related issues will be examined and discussed. This course is for undergraduate as well as graduate students and will benefit those interested in healthcare-related fields (e.g., pre-physical therapy, pre-medicine) as well as students interested in the basic functioning of skeletal muscle. Prereq: One course of general biology (BIO 148, BIO 150 or BIO 152), a general anatomy/physiology (i.e., PGY 206) course or permission of instructor.

HHS 405 EPIDEMIOLOGY AND BIOSTATISTICS. (3)
This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiologic factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious disease; rates of morbidity and mortality, sensitivity, specificity, and predictive values’ strategies used in epidemiological studies to include case control and cohort studies, and cross-sectional. Prereq: Completion of CLM 241, HHS 350, and admission to the CLM Program or consent of instructor. (Same as CLM 405.)

HHS 443 HEALTH INFORMATION MANAGEMENT. (2)
This course provides students with an opportunity to understand and address the challenges associated with health care change and improvement intended by the Recovery Act of 2009. Students will focus on clinician and clinical leader roles in the implementation of an Electronic Medical Record. The course includes material relating to Personal Health Record (PHR) models, architectures, market forces, and law. Students will understand the advantages for using the electronic medical record and mechanisms for planning successful implementation. Prereq: Admission to HHS Program or consent of instructor.

HHS 450 INTRODUCTION TO DENTISTRY. (3)
This course is an introduction to the profession of dentistry and provides a brief overview of some pre-clinical dental courses that are taught in the first two years of dental school. The student will become familiar with basic dental terminology, current issues in dentistry and the latest techniques and technology used in clinical settings. The student will have the opportunity to develop manual dexterity and learn basic clinical etiquette and safety procedures. This course serves as a foundation for students interested in pursuing a career in dentistry or for those who want to enhance their knowledge of oral health prior to entering any health field. Prereq: Admission to HHS Program or consent of instructor.

HHS 451 INTRODUCTION TO MEDICINE. (2)
This course will provide students with an introduction to the field of medicine. Skills required to complete patient interviews and take the medical history as well as a limited number of physical examination maneuvers will be discussed. The focus will be on gaining an understanding of why a complete and accurate medical history and physical examination are key to quality medical practice. The course will cover the scope of practice and ethical codes for physicians and physician assistants. Prereq: Admission to HHS Program or consent of the instructor.

HHS 453 CULTURAL COMPETENCE IN HEALTHCARE. (3)
This course is designed to introduce the student to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias. Factors related to culturally and linguistically appropriate health care will be reviewed. Prereq: Admission to HHS Program or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HHS 454 RESEARCH IN HUMAN HEALTH SCIENCES. (3)
An introduction to basic methods for undertaking research on issues related to health, health care, and within health services organizations and systems. Students will become critical consumers of research by learning how to evaluate and apply the results of health research conducted by others. The course will also assist those who plan to conduct clinical research or program evaluation within health delivery systems. Prereq: Admission to HHS Program or consent of instructor.

HHS 455 RESEARCH EXPERIENCE IN HUMAN HEALTH SCIENCES. (1-3)
Students complete a mentored, self-directed research experience. Students work with faculty to develop an experience of mutual scientific interest. The nature of the experience and the subsequent activities and expected outcomes are defined and outlined in the research contract between the student and mentor. Prereq: Consent of instructor.

HHS 470 INTERNATIONAL EXPERIENCE IN HEALTH SCIENCES (Variable topic). (1-6)
This course provides students with opportunities to explore international issues in health care through study and international travel. Course content and organization will depend on the topic to be studied and the structure of the course. Prereq: Admission to the HHS Program or consent of instructor.

HHS 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as CLM 480.)

"HHS 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT."
(1-3)
Students will gain practical general training and experiences in the healthcare workplace with a focus on student experience in clinical leadership and management. The CLM faculty and the coordination with the practicum coordinator will arrange these experiences with the site employer/personnel and develop an individualized plan for the student at each site. The plan relates the workplace training and experiences to the student’s general and technical course of study. Prereq: Consent of instructor; HHS 102 and HHS 241; student must receive a grade of C or better in previous practicum to be able to re-enroll in this course. (Same as CLM 501.)
A historical introduction to the development of Christianity from social, cultural, and politico-economic perspectives. This course examines the role of religion in the formation of modern nation-states, and the impact of religious ideologies on contemporary political thought and practice. Emphasizes the period since the Industrial Revolution. (3)

2016-2017 Undergraduate Bulletin
University of Kentucky

HIS 112 THE MAKING OF MODERN KENTUCKY. (3)
An examination of the political, social, economic, and cultural developments that have shaped modern Kentucky. (Same as SIS 112.)

HIS 119 WAR AND SOCIETY, 1350-1914. (3)
“War and Society in the West, 1350-1914,” is the opening course in a three-course series on the history of warfare. The course begins in the late middle ages with the impact of gunpowder, and ends with the advent of the First World War. Topics covered include the impact of warfare on society, the connections between culture and warfare, the growth of the state power (Top Nation) and what problems this created.

HIS 120 THE WORLD AT WAR, 1939-45. (3)
A global overview of the events of the Second World War, including consideration of the conflict’s military, diplomatic, political, social, and economic dimensions. (Same as SIS 120.)

HIS 121 WAR AND SOCIETY, 1914-1945. (3)
“Total War” in the 20th century exerted a profound impact on social relations in a great many ways. This course provides you with the opportunity to think long and hard about the social impact of “total” warfare, from a transnational perspective. We will explore a number of social and cultural themes as they relate to the two World Wars, such as: the impact of total war on gender relations; military technology and ethics; the demonization of the enemy; war-time propaganda; the roots of the welfare state within the warfare state; and the postwar efforts to cope with the atrocities of total war.

HIS 122 WAR AND SOCIETY SINCE 1945. (3)
Historical studies of warfare around the world and their impact on society since 1945. This course provides an overview of the development of modern warfare, including the use of nuclear weapons, and the impact of these technologies on society. (Same as SIS 122.)

HIS 130 DRUGS AND ALCOHOL IN WESTERN CIVILIZATION, 1492 TO THE PRESENT. (3)
“Alcohol and Drugs in Western Civilization” is an overview of the history of drugs and alcohol, and the individual and social problems that surround their use. The course begins when new or newly widespread stimulants like coffee, tea, tobacco, chocolate, sugar, and distilled spirits joined beer and wine as European consumer goods. The course then goes on to the more modern problems of increasingly potent drugs like heroin, cocaine, and cigarettes, and responses to them such as regulation, taxation, Prohibition, Alcoholics Anonymous, and the “War on Drugs.” No prerequisites.

HIS 191 A HISTORY OF WORLD RELIGIONS (Subtitle required). (3)
A historical introduction to the development of Christianity from social, cultural, and institutional perspectives which demonstrates the evolution of the religion.
HIS 301 HISTORY WORKSHOP: INTRODUCTION TO THE STUDY OF HISTORY. (3)
An introduction to the skills of historical research writing. Preferably to be taken during the sophomore year. Required of all history majors. Prereq: Sophomore standing.

HIS 310 HISTORY THROUGH FICTION AND NON-FICTION. (3)
Texts contrast fictional (novels) and non-fictional accounts of events in U.S. History dealing with major themes and institutions since the American Revolution.

HIS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3)
This course will furnish upper level UK ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as AMS 320.)

HIS 323 THE HOLOCAUST. (3)
This course will attempt to help students understand the events that resulted in the virtual destruction of Europe’s Jews during the Second World War. Topics will include the history of anti-semitism, the ways in which Nazi policy against the Jews was implemented, Jewish resistance, response of non-Jews and other governments to the Holocaust.

HIS 330 A HISTORY OF WESTERN RELIGIOUS THOUGHT I. (3)
A history of Judeo-Christian religious thought from the rise of Judaism through the Protestant Reformation.

HIS 350 TOPICS IN U.S. HISTORY BEFORE 1789. (3)
Readings, research, and discussions in seminar format to illuminate problems of historical and contemporary significance, in areas of special faculty competence. May be repeated once. Lecture, two hours; conference, one hour.

HIS 351 TOPICS IN U.S. HISTORY SINCE 1789. (Same as HIS 350). (3)

HIS 352 TOPICS IN EUROPEAN HISTORY BEFORE 1789. (Same as HIS 350). (3)

HIS 353 TOPICS IN EUROPEAN HISTORY SINCE 1789. (Same as HIS 350). (3)

HIS 355 TOPICS IN NON-WESTERN HISTORY SINCE 1789. (Same as HIS 350). (3)

HIS 357 JAPAN AT WAR, 1850 TO THE PRESENT. (3)
This course covers military conflicts in modern Japan with particular focus on the Asia-Pacific War (1931-45) – Japan’s imperialist quest in China and Southeast Asia that ultimately expanded into the Pacific Theater of World War II. We will begin by a brief examination of Japan’s earlier wars in the modern period, including the Meiji Restoration (1867-8), the First Sino-Japanese War (1894-5), and the Russo-Japanese War (1904-5) in order to set Japan’s modern wars in context; of particular focus here will be the emergence and the development of Japan’s Emperor-centered, militaristic nationalism, which influenced every aspect of Japanese thought during the Asia-Pacific War. Themes covered will include both politics and culture of a nation at war. We will look not only at the political and military strategists and foreign relations, but also at the life on the battlefront and the home front. The cult of death, which centered around the belief that those who sacrificed their lives for the emperor for the sake of the nation will be honored as a god at Yasukuni Shrine, and which resulted in such fanatical actions as kamikaze attacks and mass suicides, will be investigated in detail. The last sessions of the class will cover the legacies of the Asia-Pacific War in the decades following Japan’s defeat. The course requires no prior knowledge of the history of modern Japan.

HIS 360 RACE AND SPORTS IN AMERICA. (3)
This reading seminar examines the history of race and sport in America. (Same as AAS 360.)

HIS 370 EARLY MIDDLE AGES. (3)
A survey of European history from the fourth through the mid-10th centuries.

HIS 371 LATER MIDDLE AGES. (3)
A survey of European history from the mid-10th through the 15th centuries.

HIS 385 HISTORY OF RUSSIA TO 1825. (3)
A broad survey of the life of the Russian people and the development of the state from the ninth century through the reign of Alexander I. Although emphasis will be placed on political, economic, and social trends, cultural and intellectual achievements will also be discussed.

HIS 386 HISTORY OF RUSSIA SINCE 1825. (3)
A continuation of HIS 285, this course covers the last century of the Tsarist regime (1825-1917) and the evolution of the Soviet system that followed. Emphasis will be placed on the problems that led to the collapse of the monarchy, on the revolutionary movement, and on the Communist state and society under Lenin and Stalin.

HIS 390 BACKGROUNDS TO AND EARLY HISTORY OF CHRISTIANITY TO 150 CE. (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 390.)

HIS 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in irregular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 391.)

HIS 395 INDEPENDENT WORK. (1-3)
Under special conditions selected students may investigate problems with weekly reports to the instructor. May be repeated to a maximum of six credits. Prereq: Major and a standing of 3.0 in the department.

HIS 404 U.S. WOMEN’S HISTORY TO 1900. (3)
U.S. women’s lives and experiences across cultures and regions from pre-settlement to 1900. Addresses current debates and scholarship in the field.

HIS 405 U.S. WOMEN’S HISTORY SINCE 1900. (3)
U.S. women’s lives and experiences across cultures and regions from 1900 to the present. Addresses current debates and scholarship in the field.

HIS 460 COLONIAL AMERICA TO 1763. (3)
This course explores a number of important themes in early America: the comparative view of Western European colonization efforts; the dynamics of a multiracial environment; the character of family, community and religious life; regional distinctiveness in social/economic life; and the maturation of the colonies in the 18th century.

HIS 461 THE AMERICAN REVOLUTION, 1763-1789. (3)
A study of the disagreement between Great Britain and the 13 colonies, the decision for independence, and the progress of revolutionary change through the ratification of the Federal Constitution.

HIS 462 THE NEW REPUBLIC, 1789-1820. (3)
An intensive study of the launching of the federal government, the rise of America’s first parties, and the conflict over the completion of the revolutionary experiment.

HIS 463 EXPANSION AND CONFLICT, 1820-1860. (3)
A social and political study of the United States from 1820 to 1860, with special attention to the growth of Jacksonian democracy, territorial expansion, and the rise of the sectional controversy over slavery.

HIS 464 CIVIL WAR AND RECONSTRUCTION, 1860 TO 1877. (3)
A study of events immediately preceding the outbreak of conflict, of the military campaigns, and of the social, economic, and political developments during the periods of war and reconstruction.

HIS 465 EMERGENCE OF MODERN AMERICA, 1877-1917. (3)
A study of the transformation of the U.S. from an agrarian society into an industrial nation covering the years from the Gilded Age to the American entry into World War I. This course emphasizes the growth of corporate capitalism, the emergence of modern political institutions, and the development of modern American foreign policy. It also explores how various Americans—workers, farmers, immigrants, women—responded to and were affected by industrialization.

HIS 466 MODERN AMERICAN HISTORY FROM WWI TO PEARL HARBOR, 1917-1941. (3)
A study of America in World War I and the interwar era, emphasizing political, economic, diplomatic, and social developments. The course examines the impact of the first world war and the great depression on America and the nature of the New Era and the New Deal.

HIS 467 MODERN AMERICAN HISTORY 1941-1974. (3)
An intensive study of the United States from 1941 to 1974, emphasizing America’s emergence as a global power and political, economic, and social developments.

HIS 468 CONTEMPORARY AMERICA: 1974 TO THE PRESENT. (3)
Examines the history of the United States since 1974 with particular emphasis on political, social, and economic developments.

HIS 499 SENIOR SEMINAR FOR HISTORY MAJORS (Subtitle required). (3)
All History majors must complete a senior seminar with a grade of C or better. Topics will vary, but a major is required. Prereq: HIS 301 or permission of instructor. Graduation Writing
Course Descriptions

**HIS 500 PRECLASSICAL AND CLASSICAL GREECE.** (3)
A history of Greece from earliest times to the death of Alexander the Great.

**HIS 501 FOUR-CENTURY GREECE AND THE HELLENISTIC WORLD.** (3)
A history of Greece and the Greek world from the death of Alexander to the Roman conquest of Egypt.

**HIS 502 A HISTORY OF THE ROMAN REPUBLIC.** (3)
A history of Rome from earliest times to the fall of the Republic. Emphasis will be placed upon the territorial expansion of Rome and the effects of this expansion on republican institutions.

**HIS 503 A HISTORY OF THE ROMAN EMPIRE.** (3)
A study of the foundation of the Roman Empire, the development of Imperial institutions, social and intellectual developments of the Greco-Roman world. The decline of Rome and the barbarian invasions of the fourth century.

**HIS 504 GREEK AND ROMAN MEDICINE.** (3)
An historical introduction to the development of Greek and Roman medicine, from the pre-Socratic philosophers through Oribasius and early medieval influences. Prereq: A course in ancient history, or classics, or ancient philosophy, or consent of instructor.

**HIS 506 HISTORY OF SEXUALITY IN THE U.S.** (3)
An overview of the history of beliefs about sexuality, sexual cultures and norms, and sexuality’s relationship to power in American society from the colonial period to the present.

**HIS 509 ROMAN LAW.** (3)
An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as CLA 509.)

**HIS 510 MEDIEVAL LAW.** (3)
This course examines the development of the various legal systems to which people in western Europe had recourse between the fourth century and the fourteenth century. Topics to be covered include the shift from oral to written law, the problems small communities faced in dealing with transgressors, the competition between various authorities for jurisdiction, the ways in which Judaic-Christian values and beliefs affected the orientation of medieval law, the use of procedures such as ordeals and inquisitions, the evolution of ideas about natural rights, and how law reflects the massive social and political reorganization of the west that occurred after the Roman Empire.

**HIS 511 BARBARIANS.** (3)
This course examines the peoples known to historians of Western Europe as the “Barbarians” who took up residence on the continent of Europe and whose politics replaced the central government of imperial Rome in the fifth and subsequent centuries, as well as those of the northern realms of the British Isles and Scandinavia. Topics to be studied include the ethnic and cultural identities of the Barbarians, their role in redefining the social and political institutions of Europe, the reasons for their political and military successes, and their hold on the imaginations of both sympathetic and unsympathetic historians.

**HIS 512 CAROLINGIAN EMPIRE.** (3)
This course examines the reconstitution of much of the former Roman empire in the western provinces under the hegemony of the Carolingian rulers of the eighth and ninth centuries. Among the topics to be studied are the dynamics between powerful ecclesiastical and secular leaders that produced a distinctive vision of a Christian empire, the relations between the Carolingian, Byzantine, and Islamic politics, the means of building royal legislative and judicial power in an environment of fragmented authority, the role of literary and artistic activity in creating a distinctive “Carolingian Civilization”, the military activities that consolidated the empire, and the fragility of the imperial enterprise.

**HIS 513 MEDIEVAL INSTITUTIONS SINCE THE MID-10TH CENTURY.** (3)
A survey of medieval political, social, economic and ecclesiastical institutions from the beginning of the High Middle Ages to the middle of the 15th century.

**HIS 514 SPAIN: FROM RECONQUEST TO EMPIRE, 1200-1700.** (3)
This course focuses on the expansion of the Christian kingdoms (Portugal, Castile, and Aragon) in the Iberian peninsula and across the Atlantic. Special attention will be paid to the interaction of Judaism, Christianity, and Islam; cultural transformations, including developments in music, literature, and the arts; political developments in Iberia and the emergence of Spain and Portugal; and the spread of Iberia’s trans-Atlantic empires.

**HIS 519 THE ERA OF THE RENAISSANCE.** (3)
An historical description and analysis of the development of political, economic, religious, intellectual and cultural institutions of Europe from Petrarch to Erasmus.

**HIS 520 THE ERA OF THE REFORMATION.** (3)
An historical description and analysis of the development of the religious, intellectual, cultural, political, economic and social institutions of Europe from Luther to the Treaty of Westphalia.

**HIS 521 EUROPEAN SOCIAL HISTORY, 1400-1800.** (3)
Survey of European social history in the early modern period, including analysis of demographic patterns, family and social structures, rural and urban economic patterns, and cultural and religious attitudes.

**HIS 522 EUROPE AND THE WORLD IN THE AGE OF REVOLUTION (1760-1815).** (3)
A study of the political, social, economic and cultural changes that transformed Europe during the age of the French Revolution and Napoleon, with special emphasis on the relations between Europe and the non-European world during this period.

**HIS 525 MODERN EUROPE: 1890-1939.** (3)
This course examines European history from 1890-1939. It focuses heavily on the Great War and its aftermath through an analysis of the political cultures of the era. Prereq: HIS 105 or consent of instructor.

**HIS 526 EUROPE SINCE 1939.** (3)
This course examines the major cultural, social, and political developments that have shaped Europe, European history, and Europe’s relationships with the world since the outbreak of World War II. Prereq: HIS 105 or consent of instructor.

**HIS 529 WOMEN IN MODERN EUROPE.** (3)
This course examines the historical, changing lives of women in Europe from the late eighteenth century to the present. It explores the historical contributions of both ordinary and famous women, as well as their participation in, and contributions to, major political, social, and cultural movements. The course will analyze changes and continues through the lens of gender.

**HIS 534 RUSSIA IN THE 19TH CENTURY.** (3)
This course examines the social, political, and cultural history of 19th Century Russia in depth, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

**HIS 535 RUSSIA IN THE 20TH CENTURY.** (3)
This course examines the social, political and cultural history of 20th century Russia in depth, focusing on the social conditions that caused the Revolution, the formation of the Soviet Union and its decline.

**HIS 536 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA TO 1800.** (3)
A study of Russian culture to 1800 emphasizing Slavic paganization, Orthodox Christian culture in Kiev, Novgorod, and Muscovy, and the impact of the West in the Seventeenth and Eighteenth Centuries.

**HIS 537 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA FROM 1800 TO THE PRESENT.** (3)
A study of Russian culture from 1800 to the present emphasizing the conservative as well as the revolutionary tradition, the Russian avant-garde, Stalinist culture, and the Dissident Movement.

**HIS 540 HISTORY OF MODERN FRANCE TO 1815.** (3)
The course of French history to 1815, including the development of French political, administrative, legal, social, economic and cultural achievements and institutions and their contribution to the modern world.

**HIS 541 HISTORY OF MODERN FRANCE SINCE 1815.** (3)
Continuation of HIS 540.

**HIS 542 GERMAN HISTORY, 1789-1918.** (3)
This course examines the political, social, and cultural history of Germany during the century when it arose from utter defeat by Napoleon to become the strongest economic and military power in Europe, then concludes with Germany’s fate in World War I.

**HIS 543 GERMAN HISTORY SINCE 1918.** (3)
This course examines the history of Germany from the end of World War I until the present, including the Weimar Republic, the Third Reich, the occupation regimes after World War II, East and West Germany from 1949 to 1990, and the reunified Germany since 1990. The main focus of coverage will be on political and social history, with lesser emphasis on cultural, diplomatic, and military history.

**HIS 546 THE BYZANTINE EMPIRE.** (3)
A study of Byzantine history from the time of Constantine the Great to the capture of Constantinople by the Turks in 1453. Prereq: HIS 104 or 247.

**HIS 549 HISTORY OF THE MIDDLE EAST: 1952 TO THE PRESENT.** (3)
Continuation of HIS 548. Emphasis is on the politics of Middle Eastern nationalism, Pan-Arabism and its demise, the Arab-Israeli conflict, the politics of oil and nuclear weapons, the Islamic revolution in Iran, and the development of the Islamic movement since 1967.

**HIS 550 STUDIES IN MID-EAST HISTORY AND POLITICS: (Subtitle required).** (3)
Selected topics on the history of the Middle East and its politics. The specific topics for a given semester will be listed in the class schedule book and the department’s website.

**HIS 552 TUDOR-STUART BRITAIN, 1485-1714.** (3)
An analysis of political, religious, cultural, and economic changes in Britain during the reign of the Tudor and Stuart kings and queens, a period when Britain became increasingly prominent in world affairs.

**HIS 553 EIGHTEENTH CENTURY BRITAIN.** (3)
An analysis of English society and politics in an important transition period when the country was transformed by the Industrial Revolution and challenged by the French Revolution.

**HIS 554 STUDIES IN WESTERN EUROPEAN HISTORY AND POLITICS: (Subtitle required).** (3)
Selected topics on the history of Western Europe and its politics. The specific topics for a given semester will be listed in the class schedule book and the department’s website.

**HIS 555 EUROPE SINCE 1945.** (3)
A continuation of HIS 540. Emphasis is on the politics of the international system, the Cold War, and the European Union.

**HIS 556 THE DIGITAL AGE.** (3)
A study of digital history and the use of digital tools in the study of history.

**HIS 557 DIGITAL HISTORY AND THE DIGITAL AGE.** (3)
A study of digital history and the use of digital tools in the study of history.
HIS 554 BRITISH HISTORY 1815-1901. (3)
A detailed study of Britain’s political, social, diplomatic and industrial development in the 19th century.

HIS 555 BRITISH HISTORY SINCE 1901. (3)
A detailed study of Britain in the 20th century with special consideration of Britain in World War I and World War II, and her position in the contemporary world.

HIS 556 THE BRITISH EMPIRE, 1822-1879. (3)
This course covers the rise, fall, and rise of the British empire from its extension into Scotland and Ireland till the beginning of the age of “New Imperialism,” explaining the means by which Britain came to dominate one-third of the globe, and its impact on the many cultures, economics, and geopolitical entities of the third world. It will further discuss how those cultures transformed Britain itself. Prereq: Prior experience in HIS 105 strongly recommended.

HIS 557 THE BRITISH EMPIRE AND COMMONWEALTH, 1880-2000. (3)
This course will trace the imperial theme, and the gradual decline and decomposition of Britain’s empire from Victoria’s day to the present; it will examine decolonization and the blending and clash of cultures, the effect of technology and western ideas on the subject peoples, and their impact on western civilization. Prereq: Prior experience in HIS 105 strongly recommended.

HIS 561 CULTURE, IDEAS, AND SOCIETY IN LATIN AMERICA. (3)
This course explores the interplay of culture, ideas, and society in the history of Latin America from Independence (1825) to the present. It takes an interdisciplinary approach and is attentive to issues of class, gender and sexuality, ethnicity and race, power, domination, and resistance. Major themes to be developed in the course are history of ideas, popular and elite cultures; material and visual culture; work, leisure, and consumption; and the politics of representation. Prereq: HIS 207 or LAS 201 are suggested.

HIS 562 MODERN MEXICO. (3)
Following a brief survey of Mexican political history from Independence to the present, this course will examine topically major historical themes, such as landholding and agrarian problems, church and state, and assessment of the 1910 Revolution.

HIS 563 THE HISTORY OF WOMEN IN LATIN AMERICA. (3)
This course will survey the history of women in Latin America from pre-Columbian period to the present. The emphasis will be mainly on the late nineteenth and twentieth centuries in order to understand the situation of women in Latin America today.

HIS 564 HISTORY OF BRAZIL. (3)
Study of Brazilian history from 1500 to the present, stressing the multiethnic dynamics of colonial society, the political transformations of independence, and the contemporary legacies of race, slavery, abolition, and gender.

HIS 572 AMERICAN LEGAL HISTORY. (3)
A history of law in the United States, emphasizing interrelationship of law and society. Particular attention given to law and economic growth, the criminal justice system, legal reform, the bar, and minorities and the law.

HIS 573 AMERICAN CONSTITUTIONAL HISTORY. (3)
A study of constitutional development in the United States from the colonial period to current times, with emphasis on the Supreme Court.

HIS 574 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES TO 1919. (3)
A survey designed to acquaint the student with the principles of American foreign policy and its historical evolution. Prereq: HIS 108 or equivalent.

HIS 575 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES SINCE 1919. (3)
A continuation of HIS 574. Foreign policy after the United States became a world power. Prereq: HIS 109 or equivalent.

HIS 576 FRONTIER AMERICA, 1400-1869. (3)
A study of the ways in which America’s people shaped and were transformed by the frontier; how they wrestled with the problems of nationhood, democracy, sacrifice, and innovation; and how the idealism and promise were fulfilled and betrayed, from the first settlers to the driving of the Golden Spike.

HIS 577 FRONTIER AMERICA, 1869-PRESENT. (3)
A survey of the many Westerners, women as well as men, Native Americans, Chinese, and Hispanics as well as whites, southerners as well as six-shooters, and of the many Wests, wild and not-so-wild, from the prairie homesteaders to the Sagebrush Rebellion; and how they made, inherited, and were imprisoned by the frontier heritage.

HIS 578 HISTORY OF THE OLD SOUTH. (3)
A study of the colonial beginnings and expansion of southern life, economics, and society. The growth of slavery, staple agriculture, and sectional politics will constitute the major interest. Prereq: HIS 108.

HIS 579 HISTORY OF THE NEW SOUTH. (3)
The evolution of southern life and society, agrarian politics, relationships with other sections, industrial growth, and new leadership.

HIS 580 HISTORY OF APPALACHIA. (3)
A survey of the social, economic, and cultural history of Appalachia from the colonial period to the present with emphasis on the interaction of this social state region with the broader forces of social change at work in modern America. Prereq: HIS 108, 109 or consent of instructor.

HIS 584 HEALTH AND DISEASE IN THE U.S. (3)
Examines the emergence of modern medicine and the allied health professions, from colonial times to the present. Emphasis will be placed on the social, institutional, and scientific contexts of medical thought, education, and practice. Also explores how social and professional thought and action shape the meaning of health and disease.

HIS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3)
This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as AAS 587)

HIS 593 EAST ASIAN HISTORY SINCE WORLD WAR II. (3)
A study of the revolutionary political, economic and social changes occurring in China, Japan, and Korea in the aftermath of World War II. Important political and institutional developments and their relations to pre-war trends will be emphasized.

HIS 594 USES OF THE PAST IN MODERN CHINA. (3)
The twentieth century has brought great change to the cultural landscape of China. This change is marked by a paradox: New China’s claim to political legitimacy has been based on both revolution and historical continuity. How is the past adapted for the present? This course will examine this dilemma through cultural relics: architecture, art, and artifact. Considering changes to the Chinese history, we will study how cultural relics have been understood in modern China. Prereq: Any course in Chinese history or consent of instructor.

HIS 595 STUDIES IN HISTORY. (3)
Professors will offer lecture and discussion courses in areas in which they have special teaching interest. May be repeated to a maximum of six credits. Prereq: To be denoted by the instructor.

HIS 597 WESTERNERS IN EAST ASIA, 1839 TO THE PRESENT. (3)
The history of interactions between the peoples of East Asia and those of Europe and North America in the nineteenth and twentieth centuries. The actions and goals of merchants, diplomats, missionaries, journalists, and soldiers will be examined, and such concepts as colonialism, imperialism, and cultural change will be discussed.

HIS 598 CHINA IN REVOLUTION, 1895-1976. (3)
After a brief survey of modern Chinese history, this course explores the ideas which inspired the organization of the “Nationalist and Communist parties and examines the social conditions which influenced the outcome of the Chinese civil war. The course also covers the attempts of some Chinese Communists to “continue the Revolution” after 1949.

HIS 606 HISTORICAL CRITICISM. (3)
Required of every entering graduate student in history. For history graduate students only.

HIS 613 READINGS IN EARLY MEDIEVAL HISTORY. (3)
The problems, major sources and secondary literature in the period from the beginning of the fifth century to the end of the 10th century will be covered. Primary emphasis will be given to the Latin West. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another.

HIS 615 MANUSCRIPT CULTURES. (3)
This course engages students with the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as CLA 615.)

HIS 616 PALEOGRAPHY. (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, to transcribe abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the “archaeology of the book.” The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as CLA 616.)

HIS 621 READINGS IN EARLY MODERN EUROPE, 1450-1648. (3)
This course is designed to give graduate students a grounding in the history of Europe from 1450 to 1648. Students should expect to familiarize themselves in the recent trends in political, social, cultural, religious, economic, and intellectual history of the period.

HIS 622 READINGS IN EARLY MODERN EUROPE, 1648-1815. (3)
This course is designed to give graduate students a grounding in the history of Europe from the conclusion of the Thirty Years War to the Era Of The French Revolution, with a focus on political, cultural, and intellectual history.
HIS 623 READINGS IN 19TH CENTURY EUROPEAN HISTORY. (3)
Intensive survey of the literature in the political, social, and cultural history of nineteenth-century Europe. May be repeated to the maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: Graduate status.

HIS 634 READINGS IN EUROPEAN HISTORY OF THE TWENTIETH CENTURY. (3)
A critical survey of problems and literature in the political, social, and cultural history of Twentieth Century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: An undergraduate course in European history.

HIS 625 BRITAIN, 1868-1815. (3)

HIS 626 BRITAIN, 1792-1914. (3)
This course will provide graduate students with a detailed overview of the history of Britain in the "long" nineteenth century. It will focus on such issues as the impact of the Industrial Revolution, the formation of a recognizably modern class society, the growth of working-class political consciousness, and the politics of class and gender. Prereq: Permission of instructor.

HIS 627 THE BRITISH EMPIRE, 1763-1914. (3)
This course provides graduate students with a detailed overview of several broad themes pertaining to the history of the British Empire, 1763-1914: the first imperial crisis, slavery and the slave trade, race as a category of imperial knowledge/power, women’s emancipation and the problem of empire, the post-colonial challenge to the “imperial mindset,” and the intensification of imperial awareness within Britain itself, c. 1880-1914. Prereq: Permission of the instructor.

HIS 628 COLLOQUIUM ON MODERN EUROPEAN HISTORY. (3)
This course will provide an overview of the major themes and events that have shaped Modern European History from the late 18th century to the present. We will analyze the various ways in which particular historical topics have been interpreted (and reinterpreted) over time, as well as the different methodologies and theories that have emerged. The major goal of the course is to introduce graduate students to significant works and historical debates in Modern European History.

HIS 637 READINGS IN COLONIAL LATIN AMERICAN HISTORY. (3)
Intensive survey of major themes and debates in colonial Latin American history from 1492 to the early nineteenth century. Includes political, economic, social, and cultural topics.

HIS 638 READINGS IN LATIN AMERICAN HISTORY. (3)
Intensive survey of the major themes and debates in Latin American History from 1850 to the present. Includes political, economic, social, and cultural topics. Prereq: Consent of instructor.

HIS 640 READINGS IN AMERICAN HISTORY TO 1877. (3)
Course will examine major scholarly debates in American history to 1877.

HIS 641 READINGS IN AMERICAN HISTORY SINCE 1877. (3)
Course will examine major scholarly debates in American history since 1877.

HIS 650 READINGS IN SPECIAL TOPICS IN HISTORY. (3)
Supervised reading at the graduate level of a selected bibliography of the essential literature of various special topics. May be repeated to a maximum of nine credits with different topics. Prereq: Consent of instructor.

HIS 651 READINGS IN U.S. FOREIGN RELATIONS SINCE 1900. (3)
This course will involve intensive reading in the history of United States foreign relations in the twentieth century. It will examine various theoretical approaches to the subject. It will analyze the sources and consequences of America’s global expansion as well as the historiography of important events such as World War I and II, Korea and Vietnam.

HIS 653 READINGS IN U.S. WOMEN’S HISTORY. (3)
This course will introduce students to the main currents in U.S. women's history in four broad chronological units: Traditional America, 1600-1820; Industrializing America—Part 1, 1820-1880; Industrializing America—Part II, 1890-1920; and Modern America, 1920-present. Within this framework, the course will explore such topics as: work, communities and public life; gender, families and sexuality; race and African-American experiences; and religion, reform and political culture. The course will also familiarize students with the ongoing theoretical debates within women's history.

HIS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY. (3)
Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as AAS 654.)

HIS 655 READINGS IN ANTEBELLUM SOUTHERN HISTORY. (3)
Introduces graduate students to the historical literature on the antebellum South and the major historiographical issues.

HIS 656 READINGS IN NEW SOUTH HISTORY. (3)
Introduces graduate students to the historical literature on the New South and the major historiographical issues.

HIS 657 RACE RELATIONS IN THE UNITED STATES. (3)
This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as AAS 657.)

HIS 673 READINGS IN AMERICAN HISTORY: THE GILDED AGE AND THE PROGRESSIVE ERA. (3)
An intensive survey of the major historiographical issues and the secondary literature of the Gilded Age and the Progressive Era.

HIS 695 INDEPENDENT WORK. (1-3)
Under special conditions selected students may investigate problems, with weekly reports to instructor. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

HIS 700 SPECIAL PROBLEMS IN HISTORY. (3)
Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

HIS 701 RESEARCH SEMINAR IN AMERICAN HISTORY. (3)
Graduate research seminar in American History. May be repeated to a maximum of 12 credits.

HIS 705 COLLOQUIUM IN PRE-MODERN EUROPEAN HISTORY. (3)
Graduate research seminar for students in pre-modern European History. Students will write a research paper of 20-30 pages using primary sources in the original languages. Class time will primarily involve discussion of works in progress, including works by the students and pre-modern European faculty members, as well as discussion of the mechanics of researching and writing history.

HIS 706 SEMINAR IN MEDIEVAL HISTORY. (3)
Directed research on a common problem. May be repeated to a maximum of 12 credits. Prereq: A reading knowledge of Latin or one European language or consent of instructor.

HIS 710 SEMINAR IN AMERICAN HISTORY, 1607-1815. (3)
May be repeated to a maximum of 12 credits.

HIS 711 SEMINAR IN AMERICAN HISTORY, 1815-1865. (3)
May be repeated to a total of 12 credits.

HIS 722 SEMINAR IN MODERN EUROPEAN HISTORY, 1870 TO THE PRESENT. (3)
May be repeated to a maximum of 12 credits.

HIS 730 SEMINAR IN MODERN BRITISH HISTORY. (3)
May be repeated to a total of 12 credits.

HIS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

HIS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

HIS 750 INTRODUCTION TO THE HISTORICAL PROFESSION. (1)
Introduces students to dissertation research expectations, the responsibilities of a new faculty member, and professional career options.

HIS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

HIS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

HIS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

HJS Hebrew and Jewish Studies

HJS 101 ELEMENTARY HEBREW. (4)
Coverage of Hebrew grammar designed to prepare students to use Hebrew for their particular needs and programs.

HJS 102 ELEMENTARY HEBREW. (4)
Continuation of JJS HJS 101. Prereq: HJS 101 or consent of instructor.
CONCERNING THE HUMANITIES. (1-3) Prereq: Gaines Fellowship Program; HMN 301. An interdisciplinary seminar in the humanities which will focus on contemporary issues. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of six credits under different subtitles.

HJS 325 JEWISH THOUGHT AND CULTURE II: FROM THE EXPULSION FROM SPAIN TO THE PRESENT. (3) A survey of Jewish intellectual and material civilization from its beginnings in ancient Israel to its efflorescence in the medieval period.

HJS 326 THE JEWISH EXPERIENCE IN AMERICA. (3) An investigation of the history, literature, and situation of Jewish life in America.

HJS 327 WOMEN IN JUDAISM. (3) An investigation of the history, literature, and experiences of women in Judaism.

HJS 425 TOPICS IN JUDAIC STUDIES (Subtitle required). (3) Variable in content, this course focuses on important texts and issues in Jewish history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

HJS 495 INDEPENDENT STUDY IN JUDAIC STUDIES. Independent study on a topic mutually acceptable to instructor and student in Judaic Studies. Prereq: Declared minor in Judaic Studies.

HJS 497 GAINES SENIOR THESIS. (3-15) An independent research course leading to an undergraduate thesis in the humanities, to be supervised by three faculty members, to be a minimum of 50 pages in length, and to be defended in an oral examination. A minimum of six credit hours must be taken in the fall semester. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Consent of instructor.

HMT Hospitality Management

HMT 120 INTRODUCTION TO HOSPITALITY MANAGEMENT AND TOURISM. (3) A survey of the historical development and management structure of organizations that comprise the hospitality and tourism industry. The course format includes presentation by industry representatives, lectures and student-led discussions.

HMT 210 HOTEL ROOMS DIVISION MANAGEMENT. (3) A comprehensive study of the management principles which apply to the rooms division of a hotel property that includes front desk and housekeeper operations, reservations and billing, accounting procedures and public relations. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 270 PRINCIPLES OF TRAVEL AND TOURISM. (3) An introduction to the structure, operation and characteristics of domestic and international tourism. Topics include transportation modes, destination planning and marketing, wholesale and retail travel agent agreements, geographic, social and cultural aspects of tourism. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 302 ADVANCED SEMINAR IN LODGING AND TOURISM. (3) This course provides an overview of the principles of food and beverage concepts, menu development and food service operations in various segments of the hospitality and tourism industries. Food and beverage demonstrations and labs are included. A fee to cover materials and activities may be assessed from students. Lecture, two hours; laboratory, two hours per week. Prereq: HMT 120; NFS 241; Hospitality and Tourism majors only.

HMT 380 PRINCIPLES OF FOOD AND BEVERAGE. (3) This course provides an overview of the principles of food and beverage concepts, menu development and food service operations in various segments of the hospitality and tourism industries. Food and beverage demonstrations and labs are included. A fee to cover materials and activities may be assessed from students. Lecture, two hours; laboratory, two hours per week. Prereq: HMT 120; NFS 241; Hospitality and Tourism majors only.

HMT 395 HOSPITALITY AND TOURISM INDEPENDENT STUDY. (1-3) Independent intensive work on specific topics in hospitality management or tourism. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

HMT 420 KENTUCKY BOURBON HOSPITALITY AND TOURISM. (3) Bourbon is big business in the Bluegrass State and is a distinctive spirit product of the United States. This class will introduce students to the basic manufacturing process while promoting an understanding and awareness of the bourbon industry to focus on the history, culture, and tourism learned in pre-requisite courses. Theory and principles will be applied to decision-making in the hospitality and tourism industry while emphasizing features and characteristics.
HMT 570 EVENT PLANNING AND COORDINATION. (3)
This course will provide the theoretical and practical foundations for effective twenty-first century event management. Students will learn how to research, design, plan, coordinate, and evaluate professional events. Specifically, this course deals with the horse industry activities in the state of Kentucky. Prereq: HMT 120, HMT 308 and HMT 210 or consent of instructor.

HMT 580 TRENDS ANALYSIS FOR THE HOSPITALITY INDUSTRY. (3)
The course is designed to acquaint the student with the major trends occurring in the hospitality industry and to develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Graduate student status or HMT 120, HMT 210, HMT 270 and HMT 308.

HMT 588 STRATEGIC MANAGEMENT IN THE HOSPITALITY AND FOOD SERVICE INDUSTRY. (3)
A course requiring students to use integrative skills to evaluate theories and applications regarding decision making, strategic planning and management concepts specific to hospitality and food service organizations. Prereq: Graduate student status or HMT 120, HMT 210, HMT 270, HMT 308, MGT 301 and MKT 300.

HMT 646 ADVANCED INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY. (3)
This course will engage students in the latest technology used by the hospitality industry for advancement of human, material and financial resources. Strategies and applications using technology to gain competitive advantage will be investigated. Students should be able to examine the problems of technology in the hospitality and tourism industries and to provide solutions. Prereq: Admission to the graduate program.

HMT 694 STRATEGIC PLANNING IN HOSPITALITY, LODGING AND TOURISM. (3)
This course is designed to shape students’ understanding of strategic planning as it relates to hospitality, lodging, and tourism. The concepts utilized to accomplish this objective represent several discipline areas such as: organizational theory, strategic management, and the function of management. Prereq: Admission to graduate program.

HMT 759 SPECIAL TOPICS IN HOSPITALITY MANAGEMENT AND TOURISM. (3)
Advanced work on a specific topic in hospitality management and tourism. May be repeated for a maximum of twelve credits under different subtitles. Prereq: Graduate standing.

HMT 781 ADVANCED TRENDS ANALYSIS IN HOSPITALITY AND TOURISM. (3)
The student will investigate the major trends occurring in the hospitality, lodging, and tourism industry and develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Admission to graduate program.

HMT 785 INDEPENDENT STUDY IN HOSPITALITY MANAGEMENT AND TOURISM. (1-6)
Problems involving independent library, studio, and/or laboratory study conforming to the student’s special interest under the direction of an appropriate faculty member having proficiency in the selected area selected. May be repeated up to a maximum of six credits under different subtitles. Prereq: Nine credit hours of graduate study, consent of instructor, contractual agreement.

HON 100 ACADEMIC ORIENTATION FOR HONORS STUDENTS. (1)
This course is designed to introduce Honors students within a variety of Honors programs, e.g., Singletary, Lewis Scholars, etc., to the scholarly life of the University and also to organize and execute community service as a cohort. Through guest lectures, discussions and out-of-the-classroom assignments, HON 100 helps Honors scholars gain an early understanding of opportunities at a research university, increase awareness and use of campus resources, reflect on community issues that they can address using the skills and talents specific to their cohort, and form beneficial relationship with students, faculty and staff. Prereq: Must be a UK Honors student (First priority given to Honors Scholarship programs cohorts, e.g., the Singletary Scholarship recipients, or the Lewis Scholarship recipients.)

HON 101 THE ANCIENT WORLD.

HON 105 THE MEDIEVAL AND RENAISSANCE WORLD.

HON 111 WORLD FOOD ISSUES I: SEEDS AND HARVESTS.

HON 115 WORLD FOOD ISSUES II: YOUR DAILY BREAD.

HON 121 HISTORY OF EMERGING TECHNOLOGIES IMPACT ON SOCIETY: A TIME TRAVEL.

HON 125 THE SCIENCE & ART OF SMALL: INTRODUCTION TO NANOTECHNOLOGY.

HON 131 SPACE, PLACE, AND CULTURE: AN INTRODUCTION.

HON 135 SPACE, PLACE, AND CULTURE: TOPICAL SEMINAR II (Subtitle required).

HON 141 THE SELF AND OTHERS.

HON 145 THE SOCIAL CONSTRUCTION OF HUMAN IDENTITY.

HON 151 HONORS IN HUMANITIES (Subtitle required).
Honors Humanities topics offered by various professors (topics announced the preceding semester). Whatever the topic, the Honors Humanities courses reflect on the human condition through works of art and literature (including folklore and film), philosophical and religious contemplation and argumentation, and historical narrative. They undertake interdisciplinary investigations of significant intellectual and cultural issues of our past and present (and thus of our future) and are designed to stimulate individual thought as well as develop writing, critical thinking, and small-group discussion skills. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 152 HONORS IN NATURAL, PHYSICAL, AND MATHEMATICAL SCIENCES (Subtitle required).
A hands-on, science course for Honors student in which they ask a question requiring scientific analysis, develop a related experimentation regimen, collect data, do the experimentation, analyze the results, draw conclusions and appropriately disseminate the results. Students will directly experience the scientific process to learn how scientists work. Prereq: Membership in Honors.

HON 153 THE WORLD AS HUMAN NETWORK AND AFFAIRS. (3)
The World as Human Network and Affairs. Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. Prereq: Membership in Honors.

HON 201 THE EARLY MODERN WORLD.

HON 205 THE CONTEMPORARY WORLD.

HON 211 WORLD FOOD ISSUES III: LIVING WITH LIMITS.

HON 221 SOCIAL IMPLICATIONS OF EMERGING TECHNOLOGY.

HON 231 SPACE, PLACE, AND CULTURE: TOPICAL SEMINAR II (Subtitle required).

HON 241 TOPICAL SEMINAR IN SOCIAL SCIENCES (Subtitle required).

HON 242 A SCIENTIFIC APPROACH TO UNCERTAINTY.

HON 251 HONORS IN SOCIAL SCIENCES (Subtitle required).
The World as Human Network and Affairs: Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 252 HONORS IN ARTS AND CREATIVITY (Subtitle required).
The creative process and its products and results are the focus of these Honors courses, and include but are not limited to, visual, verbal, musical, spatial, or kinesthetic forms of expression. Readings and final projects vary at the discretion of the faculty. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 301 PROSEMINAR. (3)
An interdisciplinary seminar in the history of culture; topics will vary from semester to semester, but a substantial research essay is always required. This course will satisfy the Honors program requirement for Independent Study. May be repeated to a maximum of six hours. Prereq: At least two Honors colloquia and membership in good standing in Honors Program or consent of instructor.

HON 333 JOURNAL/JOURNEY PROJECT. (1)
Special credit for Honors Program students who keep an intellectual journal for both fall and spring semesters, receiving one credit during the spring semester. Regular consultation with a designated advisor, several group meetings during the year. May be repeated to a maximum of five credits. Pass/Fail only. Prereq: Membership in the Honors Program.

HON 352 STUDY AND TRAVEL ABROAD (Subtitle required).
An experiential, travel-abroad course that requires pre-travel class preparation followed by travel abroad that will provide students with multi-cultural exposure, leadership, and a new frame of reference for understanding the world and their role in it. Prereq: Sophomore status.
and any two of the following: HON 151, 152, 251, 252, or departmental Honors course, section or option in the Inquiry areas, or permission of the Honors Program.

*HON 395 INDEPENDENT WORK. (1-6)
An independent research or creative project for 1-6 credits under the mentorship of a department faculty member in the field. May be repeated up to a maximum of 6 credits. A course research or creative proposal must be approved by the student and faculty member, must be approved by the Honors Program Director of Student Services. Prereq: Must have upper division standing and membership in the Honors Program. Exceptions must be approved by the Director of Student Services or the Program Director.

HON 398 SENIOR HONORS CAPSTONE. (3-15)
A formal thesis or creative project of the student’s choosing, to be directed by a professor in the student’s major department. Student must present this research in an appropriate public or professional venue. Prereq: Students of Junior-senior status, good standing in Honors Program and written permission from the Director of the Honors Program.

HON 399 HONORS SERVICE LEARNING AND COMMUNITY ENGAGEMENT. (1-15)
A service–or community-based learning experience in the field under the supervision of a faculty member. May be repeated to a maximum of 30 credits. Prereq: Consent of supervising faculty member and Honors Director, completion of an Honors Learning agreement and membership in the Honors Program.

HP 101 HISTORIC PRESERVATION: HOW THE PAST INFORMS THE FUTURE. (3)
An introduction to the theory and practice of historic preservation in the Commonwealth of Kentucky and beyond. The approach will be through an interdisciplinary lens, including architecture, interiors, history, urban planning, archaeology, geography, economic development, and community engagement. Lectures, readings, discussion, and field observations.

HP 501 SELECTED TOPICS IN HISTORIC PRESERVATION (Subtitle required). (3)
Seminars for investigations of selected topics in historic preservation. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

HP 601 INTRODUCTION TO HISTORIC PRESERVATION. (3)
HP 601 is an introduction to the field of historic preservation, focusing on the policies and practices of preservation in the United States. It covers preservation legislation and public and private preservation practice at local, state, and national levels. It emphasizes preservation as a publicly supported endeavor, and presents information about the workings of standard preservation program areas. The National Register of Historic Places, a program marking a threshold for preservation decisions in the United States, receives special attention in this course. Students in this course will experience the process of evaluating a property for listing in the National Register of Historic Places as a class project.

HP 602 HISTORIC PRESERVATION LAW. (3)
The goal of this course is to assist non-lawyers in understanding laws, policies, and procedures and how they impact your professional practice as preservationists, planners, archaeologists, and in other conservation related fields. Preservation law encompasses a number of practice areas including, but not limited to land use and zoning, real property, local government, constitutional, administrative, and environmental law, and as the conservation of archaeological resources. Prereq: HP 601 or consent of instructor.

HP 609 URBAN REVITALIZATION IN THE UNITED STATES: HISTORY, CONCEPTS, AND TECHNIQUES. (3)
This course explores the idea of historic preservation as a tool for economic development. Students will critically reflect on the relationship between historic preservation and issues such as low income housing, poverty, and gentrification. It will also introduce students to the tools and techniques used by preservationists, urban planners, private and non-profit developers, housing advocates, and others to promote the revitalization of economically distressed communities. These tools will include a variety of federal, state and local housing and economic development programs, the National Trust for Historic Preservation’s Main Street Program, and basic real estate decision-making tools that can be applied in both historic and non-historic contexts. Prereq: Enrollment in program or consent of instructor.

HP 610 AMERICAN ARCHITECTURE I. (3)
This course will trace architectural developments in America from colonial settlement until the middle of the 19th century. Examples will come from vernacular, professional and monumental contexts so that students become familiar with various design processes and types of architecture. The course will also cover the architectural development of America from the middle of the 19th century to the present, with a focus upon the creation of a new American architectural style. Students will learn about the emergence of modern architecture in the rest of the world. There will be special emphasis upon architectural professionalism and its impact on processes of design in all contexts. Field trips are required. Prereq: HP 610 or consent of instructor.

HP 612 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES. (3)
This course introduces students to basic research methods and techniques for gathering, recording, and interpreting information about historic buildings and sites. Class discussions and practical exercises focus on the National Register system’s documentation requirements, HABS conventions for drawing, and recording for survey and compliance purposes (e.g., Section 106). While engaging in field research to investigate historic buildings and sites, students will learn how, when and why to apply the everyday research and recording techniques used by professionals, including the development of a preservation plan, assessing the condition of a building through analysis, creating and evaluating physical evidence; developing building descriptions and historical narratives; producing measured drawings (plans); photographing buildings for reporting or archival purposes; and organizing results.

HP 613 HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS. (3)
An introduction to basic principles of traditional construction in stone, masonry, wood, and cast iron. The student will gain an understanding of the structural systems used with each of these building materials by preparing drawings and or studying such details as floor and roof framing, window and stair construction, and finishes. The course concludes with a discussion of traditional mechanical systems and strategies for inserting modern systems in older buildings. Field trip is required.

HP 614 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES II. (3)
This course reinforces concepts taught in HP 612 while introducing students to more advanced documentary and analytical techniques for evaluating historic sites and structures. Students will complete practical exercises in large format photography, advanced drafting skills including the production of elevations and sections, and new analytical and representation techniques using computer applications. Where HP 612 emphasizes research, interpretive, and recording methods, the emphasis for this course is on analyzing, synthesizing, illustrating, and communicating the results of building investigations. Prereq: HP 612 or consent of instructor.

HP 615 AMERICAN SETTLEMENT PATTERNS: HISTORY OF LAND DEVELOPMENT. (3)
A graduate seminar that explores the traditions, policies, practices and regulations that dictate the form of the built environment in the United States, from colonial times to the present, in rural, suburban, and urban contexts. Prereq: Enrollment in program or consent of instructor.

HP 616 HISTORIC PRESERVATION AND DESIGN. (3)
An introduction to architectural preservation and design, using sites in Kentucky. Design projects will focus on restoration, preservation, and adaptive reuse of historic structures, new urban infrastructures, and new strategies of historians that are relevant to contemporary contexts. Individual and team projects will interact with local preservation and planning groups. Course meets for 3 hours each week. Prereq: Enrollment in program or consent of instructor.

HP 617 HISTORIC PRESERVATION PLANNING. (3)
An introduction to historic preservation planning. Projects will introduce students to a variety of preservation planning tools, including neighborhood historic resource surveys, the creation of historic districts, the development of design guidelines, and the mapping of historic resources among others. The course will focus on historic sites and structures within Kentucky. Individual and team projects will involve interaction with local government and preservation groups. Class meets for three (3) hours per week. Prereq: Enrollment in program or consent of instructor.

HP 699 SUMMER INTERNSHIP. (1-6)
Summer internship either in or out of Kentucky, providing intensive, practical experience in historic preservation. Internships for which the student can apply in other states or countries will be encouraged to provide practical experience outside of Kentucky, and work at several sites is possible. Possible internship programs include those offered by the Smithsonian Institution, National Park Service, or in various foreign countries, depending on the student’s interest and subject to approval of the Director. Prereq: Two semesters of course work or consent of the Director.

HP 720 CASE STUDIES IN PRESERVATION. (3)
An elective seminar in which case studies of significant local, regional, national and international preservation projects will be presented, analyzed and evaluated. Site visits, lectures by preservationists, architects, developers, and agency officials. Case studies will vary each semester, focusing upon preservation projects of current interest, including individual structures, rural and urban preservation, and community preservation planning. Interaction with groups, analysis projects, student presentations. Prereq: HP 601 and HP 602 or consent of instructor.

HP 721 INTERPRETATION OF HISTORIC BUILDINGS AND SITES. (3)
This course addresses the issues and problems involved in documenting and establishing historic buildings and sites as local and national museums. Students will examine museum types, such as house museums, living history, and battlefield sites, methods of interpretation, and concerns for the handling and displaying of historic materials. Students will discuss specific museum types within a larger context, including social and political history and the issues associated with heritage tourism. Prereq: Consent of instructor.

HP 722 HISTORIC PROPERTIES MANAGEMENT AND ADMINISTRATION. (3)
An introduction to the theory and practice of historic preservation in the Commonwealth of Kentucky and beyond. The approach will be through an interdisciplinary lens, including architecture, interiors, history, urban planning, archaeology, geography, economic development, and community engagement. Lectures, readings, discussion, and field observations.
**Course Descriptions**

**HP 724 ADVANCED HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS CONSERVATION.** (3)
A practical discussion of the most effective methods for conserving buildings, organized by building material - wood, masonry, metals, and glass. Readings will be supplemented by site visits and discussion of actual projects. Prereq: HP 613 or consent of instructor.

**HP 725 PRESERVATION PRACTICUM.**

**HP 726 AMERICAN MATERIAL CULTURE.**

**HP 728 HISTORIC LANDSCAPE AND GARDEN RESTORATION AND INTERPRETATION.**

**HP 748 MASTER'S PROJECT RESEARCH.** (0)
Half-time to full-time work on master’s project. May be repeated for a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**HP 750 ARCHITECTURE DESIGN STUDIO.** (6)
An advanced studio in architectural design for students with academic preparation in design who intend to specialize in preservation. Projects include adaptive reuse of historic structures and the design of new structures within historic contexts, using sites in Kentucky as focal points. Individual and team projects of public interest, involving interaction with local preservation and planning groups and other professional and academic disciplines. Lecture, two hours; studio, 12 hours per week. Prereq: Consent of instructor or HP 616.

**HP 772 SEMINAR IN HISTORIC PRESERVATION (Subtitle required).** (3)
Seminar for the investigation of selected topics in historic preservation. The course requires a subtitle each time it is offered. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

**HP 785 INDEPENDENT STUDY IN HISTORIC PRESERVATION.** (3)
Independent investigation of selected topics in historic preservation under the supervision of a faculty member with proficiency in the investigation area. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study; written consent of instructor, and contractual agreement approved by Department Chair.

**HP 798 RESEARCH DESIGN.** (3)
This course will provide students with the basic tools needed for an in-depth analysis of a preservation project's design, policy issue, or scholarly question. This course, which must be taken prior to enrollment in HP 799, assists students in designing their Master’s Project and results in a Master’s Project proposal and selection of a Master’s Project Committee. Through readings and class discussions, this course will familiarize students with the problems of identifying, completing, and selecting a Master’s Project. Prereq: Completion of 9 credits of graduate study or consent of the instructor.

**HP 799 MASTER'S PROJECT.** (3)
Students work independently, but under the direction of the committee chair and Master’s Project committee suggested by the student and chosen in consultation with the department chair or DGS to complete the Master’s Project proposed in HP 798. Must be repeated to a maximum of six hours. Prereq: HP 798.

---

**HS Health Sciences**

**HS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES.** (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to 2 credits experiential/research). (Same as AT 500, CLS 500, CNU 500, CD 500, PAS 500.)

**HSE Health Sciences Education**

**HSE 101 SURVEY OF HEALTH PROFESSIONS.** (1)
An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HHS 101.)

**HSE 510 OLDER WOMEN AND THEIR HEALTH.**

**HSE 595 DIRECTED STUDIES.** (1-3)
Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 355, CLM 405, CLM 444, CLM 445, CLM 455, CLM 460, CLM 495, or consent of instructor. (Same as CLM 595.)

**HSE 880 SEMINAR IN ALLIED HEALTH (Variable topic).** (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for allied health educators. May be repeated to a maximum of six credits. Prereq: Admission to the College of Allied Health Professions Program or permission of instructor.

**HSM Health Services Management**

**HSM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS.** (3)
Review of the wellness-illness spectrum and the societal response to needs of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. (Same as CLM/HHS 241.)

**HSM 260 INTRODUCTION TO HEALTH ADMINISTRATION.**

**HSM 351 HEALTH SERVICES ADMINISTRATION.** (3)
Theories and practices of administration in health care institutions with special emphasis on organizational behavior and analyses of various administrative practices and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as CLM/HHS 351.)

**HSM 352 HEALTH ADMINISTRATION, PLANNING AND MANAGEMENT TECHNIQUES.** (3)
Review of quantitative and nonquantitative techniques used in health care settings for planning, implementation and control. Emphasis will be placed on health service area delineation, patient origin studies, research methods, management information systems such as PAS, HAS, I.C.D.A., and quality assessment systems. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor.

**HSM 354 HEALTH LAW.**
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HHS 354.)

**HSM 355 FINANCIAL MANAGEMENT OF HEALTHCARE INSTITUTIONS.** (3)
A review of financial management practices in health care institutions. Course will analyze regulatory and third-party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM 355.)

**HSM 450 HOSPITAL AND HEALTH SERVICES: INTERORGANIZATIONAL RELATIONSHIPS.**

**HSM 451 TOPICS IN HEALTH ADMINISTRATION (Subtitle required).**

**HSM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY.** (3)
Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor. (Same as CLM 452.)

**HSM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR.**

**HSM 511 INDEPENDENT STUDY IN HEALTH SERVICES ADMINISTRATION.**

**HSM 601 OVERVIEW OF U.S. HEALTHCARE.** (3)
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

**HSM 602 ORGANIZATIONAL CHANGE AND STRATEGIC PLANNING.**

**HSM 603 LEGAL ASPECTS OF HEALTH ADMINISTRATION.**

**HSM 622 MENTAL HEALTH ADMINISTRATION.** (3)
This course focuses upon the administration of local mental health agencies, facilities and planning groups and other professional and academic disciplines. Lecture, two hours; studio, 12 hours per week. Prereq: Consent of instructor or HP 616.

**HSM 650 HOSPITAL AND HEALTH SERVICES: INTERORGANIZATIONAL RELATIONSHIPS.**

---

**KEY:**

- * = course changed
- † = course dropped
- ¶ = course purged
HSM 637 HEALTH FINANCE.
HSM 660 DECISION MAKING IN HEALTH CARE ORGANIZATIONS.
HSM 775 SPECIAL TOPICS IN HEALTH ADMINISTRATION.
HSM 785 INDEPENDENT STUDY IN HEALTH ADMINISTRATION.
HSM 842 SEMINAR IN HEALTH ADMINISTRATION: PRE-PRACTICUM.
HSM 843 HEALTH ADMINISTRATION PRACTICUM.
HSM 844 SEMINAR IN HEALTH ADMINISTRATION: POST-PRACTICUM.

HSP Health, Society, and Populations

HSP 255 MEDICINE, HEALTH, AND SOCIETY. (3)
HSP/SOC 255 is an introduction to foundational social theories and concepts through the lens of health, healing, and medicine. Social science perspectives on health disparities across populations; how health and disease are defined and managed; and cultural experiences of illness provide a window into a broader understanding of social life. The course will focus on four major social theories – social constructionism, symbolic interactionism, conflict theory, and functionalism. We will use these theoretical foundations and related core concepts to explore topics like physician-patient interaction and the social organization and distribution of health care. HSP 255 will also provide an introduction to social science research through critical analysis of original scholarly work and exposure to conducting, analyzing, and presenting one’s own empirical findings. HSP/SOC 255 is ideal for those with career aspirations in medicine, nursing, or other health professions, and covers the sociology content included on the MCAT exam for pre-med students. This course also provides a critical foundation for those interested in learning about population health from the point of view of social science. Throughout the course, we will explicitly address the unique contributions of social science to a broader understanding of the etiology, treatment, experience, and consequences of illness and disease. (Same as SOC 255.)

HSP 499 HEALTH, SOCIETY AND POPULATIONS CAPSTONE (Subtitle required). (3)
This course provides an integrative experience for HSP majors in their junior or senior year. The seminar format fosters integration of the program’s interdisciplinary coursework, while providing the opportunity to focus on a particular area of interest within the topical theme of the seminar. Students will engage in a variety of activities designed to increase their understanding of the theoretical and methodological approaches that characterize the HSP perspective. They will then use this perspective to design or evaluate a project that addresses health change. The course will consist of seminar sessions, smaller peer group meetings, and individualized tutorial sessions. Students will learn to critically and respectfully engage with the work of their peers and effectively communicate the results of their projects. Prereq: Junior or Senior standing in HSP, or permission of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

IAS Interdisciplinary American Studies

IAS 301 TOPICS IN AMERICAN STUDIES. (3)
A team-taught seminar on a selected topic in American Studies, emphasizing approaches to interdisciplinary study in this field and the ways that different disciplines, when integrated, better complement an understanding of the topic. Possible topics include: slavery, racism, women’s rights, Native Americans, the West, the South, the city and industrialization. May be repeated to a maximum of six credits.

IAS 401 PERSPECTIVES IN AMERICAN STUDIES. (3)
A team-taught seminar on a selected period in American history, emphasizing how different disciplines complement and illuminate a perspective on that period. Possible periods for study: Colonial America, the Enlightenment Age in America, the Age of Jackson, Ante-bellum America, Civil War and Reconstruction, the Gilded Age, America between the Two Wars, and Contemporary America. May be repeated to a maximum of six credits.

IBS Integrated Biomedical Sciences

IBS 601 BIOMOLECULES AND METABOLISM. (3)
An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as BCH 607.)

IBS 602 MOLECULAR BIOLOGY AND GENETICS. (3)
An introductory graduate-level course focused on molecular biology and genetics (concepts and techniques) necessary for advanced graduate courses. The course will emphasize basic genetic principles and the molecular mechanisms that underlie the regulated expression of genes, including transcription, mRNA processing and translation, as well as mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches that are critical to molecular biology research will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 603 CELL BIOLOGY AND SIGNALING. (3)
An introduction to cell biology and signaling focused on cell types and architecture, membrane structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 604 MOLECULAR AND BIOCHEMICAL PRINCIPLES. (3)
IBS 604 and IBS 605 together provide the fundamental concepts of molecular biology and biochemistry necessary for advanced graduate study. Topics include: protein structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 605 MOLECULAR AND BIOCHEMICAL PRINCIPLES. (3)
IBS 604 and IBS 605 together provide the fundamental concepts of molecular biology and biochemistry necessary for advanced graduate study. Topics include: protein structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 606 PHYSIOLOGICAL COMMUNICATION. (3)
This course will consider the function of the mammalian organism from a perspective ranging from cellular to organism, with an emphasis on physiological communication between organ systems. It will build upon the Integrated Biomedical Sciences (IBS) series of courses to allow the student to develop a truly integrative appreciation of biologic function. Prereq: IBS 601 and IBS 602.

IBS 607 SEMINAR IN INTEGRATED BIOMEDICAL SCIENCES. (0)
Weekly seminar devoted to the presentation and discussion of classic and new research. May be repeated to a maximum of four times; two semesters are required as part of the IBS curriculum. Prereq: Admission to IBS curriculum.

IBS 608 SPECIAL TOPICS IN INTEGRATED BIOMEDICAL SCIENCES. (2)
IBS 608 is comprised of a series of 1/2 credit minicourses, each meeting for 1 hour/week for 2 weeks that will be taught during the Spring semester. Each minicourse will focus on a specific topic or area of research that is ongoing at UK or is particularly timely/exciting. Each student is required to participate in 4 of these minicourses for a total of 2 credit hours during the semester. Up to ten minicourses will be offered each semester. The particular topics (and participating faculty) may vary from year to year. Students will be expected to sign up for 6 courses in order of preference. Each course will be assigned one faculty member. Students will be required to take IBS601 and IBS602 can participate in this course. Non-IBS students can participate with permission of the Course Director. A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended.

IBS 609 RESEARCH IN INTEGRATED BIOMEDICAL SCIENCES. (1)
Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of two credit hours. Two semesters required as part of IBS curriculum. Prereq: Admission to IBS curriculum and consent of instructor.

IBS 610 CRITICAL SCIENTIFIC READINGS. (2)
The major emphasis of this course is to develop within students the ability to critically read, evaluate and critique papers in the areas of biochemistry, molecular biology, and genetics. Students will meet weekly for two hours in a small group setting to discuss papers, with all groups reading the same set of papers. Each group of students (5-6/group) will meet weekly with one faculty member during the course of the semester. Grading will be based on attendance, participation, mock manuscript reviews, and student-led classes. Prereq: Students are required to have taken IBS 601 and IBS 602 or to take IBS 601 and IBS 602 concurrently with this course.

IBS 611 PRACTICAL STATISTICS. (1)
Practical Statistics will introduce students to basic statistical concepts and applications that are used in majority of biomedical and translational research studies. The emphasis will be on “how” and “why” certain basic statistical applications are used rather than the theory behind various statistical methods. Students will cover materials using didactic lectures, examples of data from the primary literature, and homework problems. Prereq: A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended. It is also highly recommended that students have taken IBS601 and IBS602 or are taking IBS601 and IBS 602 concurrently with this course.

ICR Instructional Communication and Research

ICR 384 TEACHING AND COACHING PUBLIC ADDRESS. (3)
Teaching and Coaching Public Address is a course designed to develop the instructional abilities of students who are interested in teaching public speaking or becoming future forensics coaches at either the high school or collegiate level. Students will develop and practice the skills necessary to successfully teach and coach public address and limited preparation speaking events by actively constructing their own speeches and helping to coach those of their peers. The course will culminate in a public address portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.

ICR 385 TEACHING AND COACHING ORAL INTERPRETATION. (3)
Teaching and Coaching Oral Interpretation is a course designed to develop the instructional abilities of students who are interested in teaching oral interpretation or becoming future forensics coaches at either the high school or collegiate level. Oral interpretation is an interactive process that requires students to listen critically, evaluate and adjust their performances, and integrate their thoughts and emotions for optimal delivery. Students will develop and practice these skills by actively constructing their own speeches and helping to coach those of their peers. The course will culminate in an oral interpretation portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.
This course is intended to give students a solid background in databases, with a focus on the information profession within the context of information society issues is also explored.

This course studies the impacts of information and communication technology (ICT) on computer ethics, freedom of speech and expression online, information filtering, intellectual property, cyber law, and pertinent legal and political acts related to the present information communications and networks.

Emphasis will be placed on: organizational policy development, information ethics, information professionals and the subsequent impact of these issues on information and communication infrastructure. Included are features of relevant to professional practice in informatics and the information professions. It explores the digital law enforcement practices put in place to respond to them. The course will focus on how emerging technologies have led to the need and development of ICT as a discipline; its shared commonalities with other disciplines; its distinct characteristics; its applications in the workplace and personal contexts; and its impact and future implications on individuals, organizations, and societies.

This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term “information literacy.” Students will learn the theory and practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of how information and knowledge function in society and will discover methods of finding, accessing, evaluating, and using different information sources in an effective and ethical manner.

This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to personal and professional contexts. Included are features of hardware, types of software, commercial systems and search engines.

ICT 202 TECHNOLOGIES FOR INFORMATION SERVICES. (3)
This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to personal and professional contexts. Included are features of hardware, types of software, commercial systems and search engines.

ICT 205 ISSUES IN INFORMATION AND COMMUNICATION TECHNOLOGY POLICY. (3)
This course introduces students to the legal, political, and ethical issues confronting today’s information professionals and the subsequent impact of these issues on information and communication technology (ICT) policy and law development. The rapidly evolving ICT infrastructure and the global shift to an information society will provide the context for the course. Emphasis will be placed on: organizational policy development, information ethics, computer ethics, freedom of speech and expression online, information filtering, intellectual property, cyber law, and pertinent legal and political acts related to the present information and communication infrastructure.

ICT 300 ICT IN SOCIETY. (3)
This course studies the impacts of information and communication technology (ICT) on individuals and society. It examines current issues related to the flow of information in society including the impact of technology and the development of the information economy. The role of the information profession within the context of information society issues is also explored. This course is an intimate Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ICT 301 INTRODUCTION TO DATABASES. (3)
This course is intended to give students a solid background in databases, with a focus on relational database systems. Topics include data modeling, database design theory, data definition and manipulation languages, storage and indexing, query processing and optimization, and database programming interfaces.

ICT 302 CONTENT MANAGEMENT SYSTEMS. (3)
The course focuses on the practice and theory of designing, building and maintaining content management systems.

ICT 303 SYSTEMS ANALYSIS. (3)
This course examines and applies the principles of information systems analysis. It surveys management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system lifecycle, which starts with the conception of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scope information system. Prereq: IS 202. (Same as IS 163.)

ICT 307 COPYRIGHT. (3)
In the age of digital information, the technology, economics, and law of intellectual property are constantly in flux. In order to continue to effectively provide access to information, ICT professionals need to play a role in managing these changes. This introductory course examines the basic conceptual elements of copyright protection, and its adaptation and application to new media and information communication technologies.

ICT 325 ELECTRONIC INFORMATION RESOURCES FOR HEALTH PROFESSIONALS. (3)
This course is a survey of electronic information resources for health professionals, including databases and Web resources, but with a focus on MEDLINE. Discussion of relevant controlled vocabularies, their use in formulating and executing search strategies, and alternative interfaces to MEDLINE are addressed. The course also includes reference management software, an evidence based health care component, and discussion of systematic reviews. Prereq: STA 210 or equivalent. (Same as IS 126.)

ICT 327 CONSUMER HEALTH INFORMATION SEEKING. (3)
This course will provide students with a foundation in the history and development of consumer health information seeking and link to practical experience in locating, evaluating, and providing health information to diverse and special populations within educational and healthcare settings. Students will gain an understanding of the lifecycle of consumer health information—from policy development, to creation, to dissemination, and use—and the role of healthcare professionals in providing that information. Current issues and trends, as well as future directions in consumer health information provision and health information seeking will be discussed. (Same as IS 127.)

ICT 351 TECHNOLOGY SECURITY. (3)
An introduction to the various technical and administrative aspects of information security and assurance. This course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system with appropriate intrusion detection and reporting features.

ICT 390 SPECIAL TOPICS IN ICT. (3)
Intensive study of one aspect of information technology under the leadership of an authority in the area.

ICT 395 INDEPENDENT STUDY IN INFORMATION COMMUNICATION TECHNOLOGY. (3)
Opportunities for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor and approval of proposal.

ICT 406 E-COMMERCE REGULATION. (3)
Business and commercial transactions conducted via electronic means are subject to complex legislation and regulation that changes frequently. The relevant legislation and regulatory mechanisms govern commercial transactions as well as any electronic marketing, such as promotional emails or online newsletters. This course provides an overview of the regulatory framework governing e-commerce transactions, relevant standards and ethical considerations, protocols to ensure consumer protection, and emergent issues related to compliance and enforcement.

ICT 410 PRIVACY. (3)
As new information and communication technologies are developed, they increasingly raise public concern about the collection, use, storage and sharing of personally identifiable information. This course provides an overview of privacy, privacy laws, privacy-related technologies, and self-regulatory efforts to mitigate potential privacy risks. The study of privacy will be approached from philosophical, historical, legal, policy, and technical perspectives.

ICT 550 SECURITY INFORMATICS. (3)
This course introduces students to policy concerns relating to security informatics, and highlights theoretical and practical approaches to designing secure information and communication technology (ICT) systems. It addresses key issues such as authentication, risk analysis, access control, database and network security, and information assurance.

ICT 552 CYBERCRIME AND DIGITAL LAW ENFORCEMENT. (3)
The global reach of the Internet, the low marginal cost of online activity, and the relative anonymity of users have contributed to a wide escalation in cybercrimes. Consequently, information and communications technologies (ICT) are being increasingly employed to instigate threats to global civil society. This course provides an overview of cybercrime and the digital law enforcement practices put in place to respond to them. The course will focus on
on the types and extent of current cybercrimes, how the justice system responds to these crimes, the various constitutional protections afforded to computer users, the law and policies that govern cybercrime detection and prosecution, and related technologies.

ICT 596 INTERNSHIP IN ITC. (3)
Provides students with supervised work-and-learning experience in a professional environment under the direction of a University faculty member and an employee of a participating firm. One hundred forty (140) hours of student time are expected during the semester. Enrollments contingent upon the availability of internships. Students are selected on the basis of personal qualifications, including GPA, course selections, recommendations, and an interview.

ICT 600 INFORMATION COMMUNICATION TECHNOLOGY IN SOCIETY. (3)
We live in a world of rapid technological innovation. This innovation has allowed significant changes in the ways that we communicate and interact with forms of media. In fact, the technology and the information it carries have created a culture surrounding how we see, hear, read, and use information, and have significantly impacted politics, economics, policy, etc. This course studies the impacts of information and communication technology (ICT) on individuals and society, and the impact that society has on ICTs. It examines current issues related to the diffusion of new technologies in society as well as the obstacles to widespread use of individual ICTs. Students in this course will analyze the various theories related to the use of emerging communications forms, and consider the factors related to successful ICT deployment. Students will be required to look beyond the "good/bad" classification of new communication technologies, and conduct in-depth interrogations of ICTs, the issues that surround them and the environments in which ICTs are used.

ICT 601 INFORMATION SEEKING. (3)
This course provides an overview of the theory and practices of human information seeking behavior, including both basic models to understand user behavior, and techniques to effectively select, locate, evaluate, and use information to meet diverse information needs and facilitate human-computer interaction. (Same as LIS 601.)

#ICT 610 ICT RESEARCH METHODS. (3)
Information and Communication Technologies (ICTs) are pervasive in our increasingly global society, and, importantly, have the potential to improve lives and society. This course is designed to provide you with a sophisticated understanding of the philosophy, theory, design, and analysis of ICTs. Students attend lectures, participate in research and develop a research design capable of answering a question or hypothesis. During this course, you will be exposed to a variety of methodological designs and statistical procedures to allow you to complete your own research projects during your time as a graduate student here at the University of Kentucky. Using a variety of methods ranging from the foundational (e.g., interviews, surveys) to cutting-edge (e.g., big data analysis, geographic mapping) and readings from a variety of texts and crises, this course is designed to equip you with the research and methodological tools to understand how ICTs affect individuals, relationships, groups, organizations, social movements, and policies and to use these methodological tools in applied settings.

ICT 626 ELECTRONIC INFORMATION RESOURCES IN THE HEALTH SCIENCES. (3)
Survey of electronic information resources in the health sciences, including databases and Web sources. Discussion of relevant controlled vocabularies and their use in formulating and executing search strategies. The course also introduces the evidence-based health care component whereby students learn to analyze critically the biomedical literature and determine reference and research relevancy. (Same as LIS 626.)

ICT 627 CONSUMER HEALTH INFORMATION RESOURCES. (3)
History and development of consumer health information resources; role of professional and governmental agencies in provision of consumer health information; policy issues related to provision of consumer health information. Consumer health professional literature, user information needs, user resources, and information services. Identification, selection, utilization, and evaluation of consumer health information for special populations within specialized educational and healthcare settings. Trends and issues in consumer health informatics. (Same as LIS 627.)

ICT 630 INFORMATION RETRIEVAL. (3)
This course reviews important information retrieval (IR) theories and models; explores a brief history of IR research; and examines various IR applications. Students will get familiar with IR foundations such as document indexing or query expansion, optimization strategies, as well as understand overall system architectures for selected IR applications. Students will explore how to analyze and compare IR systems, how to select the best IR systems for particular tasks and how to design a prototype for an efficient IR system. Prereq or concur: LIS 636 or LIS 637 or LIS 638. (Same as LIS 630.)

ICT 636 INTRODUCTION TO COMPUTER INFORMATION SYSTEMS. (3)
A broad introduction to the use of computers as tools for creativity, communications, organizing information, and problem-solving. The basic concepts of computer hardware, software, networking, and the Internet are covered. Students also will be introduced to basic techniques for designing and creating a web site.

ICT 638 ADVANCED WEB DESIGN. (3)
This course serves as a hands-on introduction to advanced web design techniques. Topics include the web development process, creating dynamic content, advanced layout and design, client-side and server-side scripting languages, graphic file types and optimization, web forms, multimedia, and web servers and databases. Prereq: ICT 636, or consent of instructor.

ICT 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as CJT/LIS 640.)

#ICT 650 INTRODUCTION TO LEADERSHIP IN INFORMATION PROFESSIONS. (3)
The primary purpose of this course is to expose students to leadership strategies and challenges in the information professions. Primary attention is placed on: 1) the role of communication in effective leadership; 2) innovation and change in the information professions and the leadership styles available for addressing such changes; 3) ethical frameworks in communication leadership; 4) issues management and organizational planning; and 5) leadership communication strategies for managing conflict and crisis. Prereq: Graduate student status in the ICT, LIS, or CJT graduate programs.

ICT 651 TECHNOLOGY SECURITY. (3)
An introduction to information security including vocabulary and terminology, threats to information systems, cryptography, ethics, the legal environment, and risk management. Identification of exposures and vulnerabilities and appropriate countermeasures are addressed. The importance of appropriate planning, policies and controls is also discussed. It is expected that each student will possess some knowledge of programming, operating systems, and networking, although advanced knowledge in those areas is not necessary.

ICT 658 KNOWLEDGE MANAGEMENT. (3)
Organizational knowledge is a valuable strategic asset. Knowledge management refers to the systematic management of an organization's knowledge assets so that they can be leveraged for sustainable advantage. This course examines how knowledge is created, captured, organized, diffused, and implemented in an organization. Topics covered include knowledge management processes and practices, corresponding technologies, collaboration tools, and people and cultural issues. (Same as LIS 658.)

ICT 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (3)
Intensive study of one aspect of library and information science under the leadership of an authority in the area. (Same as LIS 690.)

#ICT 695 INDEPENDENT STUDY IN INFORMATION COMMUNICATION TECHNOLOGY. (3)
An opportunity for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor and approval of proposal.

ID Interior Design

ID 101 INTRODUCTION TO INTERIORS: PLANNING/STRATEGY/DESIGN. (1)
An introduction to the profession of Interiors: historical perspective, career specializations, and career opportunities.

ID 102 INTRODUCTION TO INTERIORS: PLANNING/STRATEGY/DESIGN. (1)
An examination of the Interiors profession focusing on professional practice, current issues, and future directions.

ID 121 INTERIORS FOUNDATION STUDIO I. (5)
An introduction to the design process and creative problem solving. Class assignments and discussions focus on theories of two and three dimensional design, spatial definition and organization, and provide a context for analyses of how design interacts with ecological, social, economic, and cultural contexts. The course is comprised of daily instruction periods and weekly lectures. Weekly lectures will introduce ideas, case studies, and approaches. Students are also introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components and field trips.

ID 122 INTERIORS FOUNDATION STUDIO II. (5)
Continuation of ID 121. Emphasis is on application of the design process on color, light, sustainability, and global perspectives. Projects also focus on design decisions within the parameters of ecological, socio-economic, and cultural contexts. Weekly lectures focus on contemporary issues and case studies. Students also are introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components and field trips. Prereq: ID 121.

ID 161 HISTORY AND THEORY OF INTERIOR ENVIRONMENTS I. (3)
A historical survey of the development of interior design and the decorative arts from prehistory to the 19th century. Emphasis is on the principles of aesthetic philosophy and design theory

ID 162 HISTORY AND THEORY OF INTERIOR ENVIRONMENTS II. (3)
A historical survey of the development of interior design and the decorative arts from the 19th century to the present. Emphasis is on the principles of aesthetic philosophy and design theory
and the socio-economic, political, and environmental influences affecting the design of the built environment. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

**ID 221 INTERIORS STUDIO I.** (5)
Investigation into how human experience and behavior are influenced by interior spaces. The focus is on design of spaces on multiple scales and exploration of how manipulation of spatial aspects such as scale, color, texture, proportion, light and spatial orientation alter human experience. Field trips are integrated into the studio experience and students are required to research and evaluate of existing spaces. Interior spaces are created and investigations of interior spaces are recorded using a variety of communication methods including digital media, sketching, and narratives. Research, use of digital media, sketching, analyses, discussions, critiques, field trips. Prereq: ID 122.

**ID 222 INTERIORS STUDIO II.** (5)
The application of design thinking to studio problems in interior design. Scenario-building with emphasis on human response to the interior environment. Interior modeling in various media and drawing skills required. Studio experiences, analyses, discussions, readings and field trips. Prereq: ID 221.

**ID 234 ENVIRONMENTAL THEORY.** (3)

**ID 264 COLOR THEORY AND INTERIOR SPACE.** (3)
The study of color theory and its application to the interior environment: the interactive aspects of color, light, and texture within an interior environment will be emphasized. The psychological and functional aspects of color application will be explored. The articulation and graphic communication of color concepts applied to an interior space will be stressed. Prereq: ID 274 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**ID 263 INTRODUCTION TO DIGITAL MEDIA.** (3)
An introduction to various digital media used as a tool within the design professions. Lectures, studio, readings, problem solving, research, field trips. Concur: ID 274.

**ID 275 INTERIOR CONSTRUCTION SYSTEMS.** (3)
A comprehensive review of professional career development needed in preparation for an interior design work experience or internship (CIDA II-1). Students will explore design opportunities in missed use projects. Sustainable design issues will be explored. Prereq: ID 222.

**ID 276 INTRODUCTION TO ESSENTIALS.** (3)
The development of custom design elements and studies within the framework of professional business practices and documents. Design problems will correspond to real world design opportunities considering contextual factors and design theories in relation to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

**ID 299 STUDENT-DIRECTED SEMINAR.** (1-3)
Problems involving independent studio and/or library study conforming to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

**ID 422 INTERIORS SENIOR THESIS.** (3-5)
Detailed research and programming for a comprehensive studio project. Development of a strong conceptual proposal with written, graphic, and oral presentation. Studio experiences in combination with on-site lectures and discussions provide opportunity for exploring and solving design problems considering contextual factors and design theories in relation to the locale and precedent. Nine credits earned during summer semester; twelve credits earned during fall semester. Prereq: ID 326, Interiors Experiential Preparation; successful completion of two ID 370 studios. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**ID 428 INTERIORS TRAVEL SEMINAR.** (9-12)
A study abroad program that investigates design in a foreign culture. Studio experience in combination with on-site lectures and discussions provide opportunity for exploring and solving design problems considering contextual factors and design theories in relation to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

**ID 446 INTERIOR DESIGN AND THEORY.** (3)
An analysis of regional variations in American furnishings, interior finishes, and architecture. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

**ID 450 INTERIORS ADVANCED PROBLEM SOLVING.** (5)
A study abroad program that investigates design in a foreign culture. Studio experience in combination with on-site lectures and discussions provide opportunity for exploring and solving design problems considering contextual factors and design theories in relation to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

**ID 589 RES/PRES I: INTRODUCTORY CONCEPTS OF RESTORATION AND PRESERVATION.** (3)
A study abroad program that investigates design in a foreign culture. Studio experience in combination with on-site lectures and discussions provide opportunity for exploring and solving design problems considering contextual factors and design theories in relation to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

**ID 641 REGIONAL VARIATIONS IN COLONIAL AMERICAN DESIGN.** (3)
An analysis of regional variations in American furnishings, interior finishes, and architecture from colonization to 1793; consideration will be given to historical, economic, social, political, and religious influences on design. Prereq: DMT 142 or consent of instructor.

---

**Course Descriptions**
ID 650 SURVEY OF CURRENT LITERATURE AND METHODOLOGIES. (3)
An intensive survey of literature and methodological inquiry used for problem solving related to the student’s desired area of design specialization. Emphasis will be placed on conducting a literature search and review in a specific area of interest. Prereq: Graduate standing.

ID 655 CREATIVE AND THEORETICAL DESIGN PROCESSES. (3)
This course will focus on creativity and the design process with emphasis on investigation of current topics in interior design and the built environment. Theoretical frameworks will be explored to advance understanding of creativity and help students form a knowledge base for developing an in-depth research topic. Prereq: Graduate standing.

ID 659 INTERIORS GRADUATE STUDIO. (3-6)
Advanced graduate-level comprehensive information gathering and analysis for identification of design issues associated with workplace and the human environment. Includes methods of inquiry and design thinking appropriate to a specific typology, design programs in conceptualization, studio experiences, discussions, and development of strategies resulting in a design or research deliverable for an Interiors industry driven problem. Prereq: Graduate standing.

ID 669 ADVANCED COLOR THEORY AND APPLICATION. (3)
Advanced color theory will examine the physical, psychological, historical and technical perspectives. Application of color theory to the built environment. Includes color forecasting, technical processes, color specification, and quality control. Prereq: Graduate standing.

ID 700 RESEARCH APPLICATIONS IN INTERIORS. (1-6)
Independent research for the exploration of a specific problem in interior design. May be repeated to a maximum of six credits. Prereq: Eighteen credit hours of graduate work.

ID 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ID 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ID 772 CURRENT ISSUES IN DESIGN. (3)
Investigation of current topics in interior design. May be repeated to a maximum of six credits.

ID 785 INDEPENDENT STUDY IN INTERIORS. (1-3)
Problems involving independent studio, and/or library study conforming to the student’s special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, consent of instructor, contractual agreement.

IEC Interdisciplinary Early Childhood Education

IEC 120 INTRODUCTION TO EARLY CHILDHOOD EDUCATION. (3)
An overview of the history of early child education and an overview of current laws and best practices. Discussions will include issues impacting families and current research in early childhood education.

IEC 255 CHILD DEVELOPMENT. (3)
An overview of the various aspects of development (physical, social, emotional, intellectual) in the social context for children prenatally through adolescence. Course will emphasize techniques of directed observation. Lecture, three hours, laboratory, one hour per week.

IEC 256 GUIDANCE STRATEGIES FOR WORKING WITH YOUNG CHILDREN. (3)
Examination of effective guidance strategies for use with young children in an early childhood setting; modifications of experiences for age level; ability, group and individual needs. Application and evaluation of guidance skills in laboratory experience. Prereq: PSY 223 (or FAM 254) or FAM 255.

IEC 260 CURRICULUM PLANNING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (4)
Theories, research and strategies for planning, implementing and evaluating learning experiences for young children (birth- five years). Application in practicum in an early childhood setting. Lecture, two hours; field work, four hours per week. Prereq: IEC 120, FAM 255, and IEC/FAM 256.

IEC 411 STUDENT TEACHING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (12)
Course designed to give students experience with supervised teaching at the preprimary level. Emphasis will be placed on observation and teaching individual, small and large group methods. One afternoon per week will be devoted to a discussion and analysis of problems in student teaching, Field work, two hours; laboratory 22 hours per week. To be offered pass-fail only. Prereq: Completion of professional sequence and formal admission to student teaching, admission to the Teacher Education Program or permission of instructor.

IEC 507 ASSESSMENT OF YOUNG CHILDREN. (3)
An introduction and application of assessment and measurement in children from birth to primary. Training in the development and use of commercially available and teacher made assessment devices and techniques suitable for teachers to administer. Includes observations, standardized tests, portfolio development, and transdisciplinary assessment, used by teachers of young children. Prereq: FAM 255, admission to Teacher Education Program or enrollment as a required elective course for IEC graduate students. Co-Requisite: To be taken with IEC 508, 509 and 510.

IEC 508 ADVANCED CURRICULUM PLANNING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Study of the child’s development of reasoning, concept formation, and perception of reality. Consideration of relevant research and theory and their applications to the education of preschool children. Examination of the methods and techniques for teaching pre-school children in the areas of math, science, social studies, English, arts and humanities, health education and physical education within various curriculum models. Prereq: Six hours of child development and admission to the Teacher Education Program or enrollment as required elective course for IEC graduate students. Coreq: IEC 507, 508 and 510.

IEC 509 INTERVENTION PLANNING FOR CHILDREN WITH SPECIAL NEEDS. (3)
An overview of the field of early childhood special education including discussions of historical and empirical support for providing early intervention services, screening, assessment, instructional programming, integration of children with and without disabilities, family involvement, and service delivery models. Emphasis is placed on assessment and promoting attainment of cognitive, language, social, self-help, and motor skills. Prereq: EDS 375 or EDS 203 and admission to the Teacher Education Program or enrollment as required elective course for IEC graduate students. Coreq: IEC 507, 509, and 510.

IEC 510 PRACTICUM IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
This course is the field based component of the Early Childhood block (IEC 507, 508 and 509) and is taught concurrently with these courses. This course provides an opportunity for students to demonstrate application of readings and content from the Early Childhood blocks. Prereq: Admission to Teacher Education Program or enrollment as required elective course for IEC graduate students. Co-requisite: IEC 507, 508, and 509.

IEC 512 LANGUAGE AND LITERACY FOR YOUNG CHILDREN. (3)
An overview of early language and emerging literacy skills in young children. Will prepare future early childhood service providers to evaluate and plan developmentally appropriate environments to promote oral and written language and literacy. Prereq: Admission to TEP or enrollment as required elective course for IEC graduate students.

IEC 522 CHILDREN AND FAMILIES. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 522.)

IEC 523 PRACTICUM IN EARLY CHILDHOOD ADMINISTRATION AND SUPERVISION. (3)
Field training in a community setting related to early childhood administration and supervision. Opportunities for developing competencies in program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding will be provided. Prereq: IEC 552 or consent of instructor.

IEC 546 TRANSDISCIPLINARY SERVICES FOR YOUNG CHILDREN. (3)
This course will focus on the philosophical issues related to teaching young children with multiple disabilities. Topics related to planning for the population of children, participants in the areas of communication, physical and motor development, health, vitality and sensory input will be presented. Strategies presented for planning will include transdisciplinary assessment persons centered planning and activity based instruction. Prereq: EDS 375 or EDS 600. (Same as RC 546.)

IEC 552 ADMINISTRATION AND SUPERVISION IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION PROGRAMS. (3)
A course designed for students preparing to become administrators and supervisors in Early Childhood Education Programs. Consideration is given to program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding. Prereq: IEC 260 or consent of instructor.

IEC 557 INFANT DEVELOPMENT. (3)
The development of the young child during the prenatal period, infancy and toddlerhood. Care and guidance of the child during the first two years of life. Lecture, two hours; laboratory, two hours per week. Prereq: Six hours of child development, psychology or equivalent.

IEC 558 SPECIAL TOPICS IN INTERDISCIPLINARY EARLY CHILDHOOD. (1-4)
In-depth study of a current and topical problem or issue in early care and education. May be repeated under a different subtitle for a maximum of nine credits. A title is assigned each time the course is offered and reflects current topics in the field.

IEC 620 ASSESSMENT IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Reviews policy and research implications that promote recommended practice in assessment and evaluation. A wide variety of formal and informal assessment instruments and strategies in the education of young children will be presented, used and discussed. Prepares students
Course Descriptions

IEC 621 ISSUES IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Students will review, discuss, and participate in issues related to early childhood education and learning experiences related to the preparation and leadership of early care and education teachers. Discussions will include issues in blended early care and education programs. Local, state, and federal initiatives related to early care and education will be explored. Students will explore socio-cultural, historical, and political forces in early childhood education. Prereq: EDS 375 or EDS 600 and IEC 659 or permission of instructor.

IEC 709 SEMINAR IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Advanced study of issues related to inclusive programs for all children and their families including etiology of disabilities, developmentally appropriate practice, assessment, intervention and instruction, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ph.D. in Special Education.

IEC 710 ADVANCED INSTRUCTIONAL METHODS IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
A study of how to design, implement, and evaluate a curricular framework in blended early childhood education environments using principles of universal design, tiered instruction, and responsive learning environments. Students will support curriculum development with evidence from empirically validated practices. Prereq: IEC 659 or consent of instructor.

INF 401G INFORMATICS FUNDAMENTALS. (3)
An introduction to the fundamentals of informatics for students in a broad array of disciplines. Fundamentals of computer science, including programming, operating systems, database management, and networking will be covered. Not accepted as credit towards a degree in computer science. Prereq. Junior standing.

INF 520 BIOINFORMATICS. (3)
An introduction to computer analysis of macromolecular structure information. This course describes how to access, process, and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as BIO 520.)

INT 350 SPECIAL TOPICS IN INTERNATIONAL STUDIES (Subtitle required). (1-3)
Course will focus on selected topics drawn from various areas of International Studies taught by faculty members with special interests and competence. The course is variable credit and may be repeated up to a maximum of 12 credits under different subtitles.

INT 399 INTERNSHIP IN INTERNATIONAL STUDIES. (1-3)
An individual community-based or field-based experience and/or internship with a corporation or government institution with a global/international focus under the supervision of a faculty member. This course is designed for undergraduates to gain first-hand experience of preprofessional positions such as internships, cooperative education, or business related experience in an area of international expertise. INT 399 may count toward either the Thematic Concentration or World Area of SIS major, but not both. May count for IS minor. To take the course, the student must have approval of the program director, negotiate a learning contract with an academic supervisor, and provide the program with a report on the internship. Pass-fail only. May be repeated for a maximum of 9 credits. Prereq. Approval by the International Studies Director.

INT 495 CAPSTONE SEMINAR FOR INTERNATIONAL STUDIES MAJORS (Subtitle required). (3)
In this capstone seminar students have to write a 20-25 page research paper. Each seminar has a subtitle of a broad theme to allow students working in different world areas and thematic concentrations to work on their projects. The class works both as a seminar where students learn different theoretical and methodological approaches to a broad topic and as a space where they learn to write their own research paper. Students will be required to present their paper in a power point presentation or another type of creative project. Prereq: Senior status. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

IPS 610 TRANS-DISCIPLINARY COMMUNICATION IN INTEGRATED PLANT AND SOIL SCIENCES. (1)
A one-credit companion course to IPS.625 specific for graduate students in the Integrated Plant and Soil Sciences program. This course exposes IPS students to critical skills in publication, grantsmanship, and public presentation. It requires IPS students to systematically evaluate research presentations from multiple disciplines, present a synthesis of the research topic addressed in IPS.625, and interact with other members of the college and the university on topics related to plant and soil science issues. The course may be repeated twice. Prereq. Graduate student status.

IPS 625 TRANS-DISCIPLINARY RESEARCH IN INTEGRATED PLANT AND SOIL SCIENCES. (2)
A two-credit course specific to students in the Integrated Plant and Soil Sciences Program. This course is designed to explore the foundations, principles, and philosophies of scientific research in a truly integrative manner with strong emphasis on the value of multidisciplinary approaches to a significant issue in plant and soil sciences. The course may be repeated twice. Prereq. Graduate student standing.

IS 200 INFORMATION LITERACY AND CRITICAL THINKING. (3)
This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term “information literacy.” Students will put this theory into practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of how information and knowledge function in society and will discover methods of finding,

University of Kentucky
2016-2017 Undergraduate Bulletin
508

KEY: # = new course  * = course changed  † = course dropped  ❌ = course purged
**Course Descriptions**

**ISC 201 PERSONAL KNOWLEDGE MANAGEMENT.** (3)
Gain knowledge about information sources, information retrieval and professional information management. Learn how information sources are described, organized, and disseminated using metadata standards and publishing practices. Acquire the skills to locate and retrieve quality sources of information with search engines and databases. Implement knowledge management technologies and apply an understanding of social factors in order to create efficient and usable organizational work flows. (Same as ICT 201.)

**ISC 202 TECHNOLOGIES FOR INFORMATION SERVICES.** (3)
This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to information problems. Included are features of hardware, types of software, commercial systems and search engines. (Same as ICT 202.)

**ISC 303 SYSTEMS ANALYSIS.** (3)
This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system life cycle, which starts with the concept of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scope information system. Prereq: IS 202. (Same as ICT 303.)

**#IS 326 ELECTRONIC INFORMATION RESOURCES FOR HEALTH PROFESSIONALS.** (3)
This course is a survey of electronic information resources for health professionals, including databases available with a focus on MEDLINE. Discussion of relevant control and vocabulary issues, their use in formulating and executing search strategies, and alternative interfaces to MEDLINE are addressed. The course also includes reference management software, an evidence based health care component, and discussion of systematic reviews. Prereq: STA 210 or equivalent. (Same as ICT 326.)

**ISC 327 CONSUMER HEALTH INFORMATION SEEKING.** (3)
This course will provide students with a foundation in the history and development of consumer health information seeking in addition to practical experience in locating, evaluating, and providing health information to diverse and special populations within educational and healthcare settings. Students will gain an understanding of the lifecycle of consumer health information—from policy development, to creation, to dissemination, and use—and the role of healthcare professionals in providing that information. Current issues and trends, as well as future directions in consumer health information provision and health information seeking will be discussed. (Same as ICT 327.)

**IS 402 COMPETITIVE INTELLIGENCE.** (3)
This course examines competitive intelligence models, functions, and practices; the roles of information professionals in CI, and the management of CI. Discussion and practice topics include: intelligence ethical and legal considerations; identifying intelligence needs; intelligence project management, research methods, analysis, production, and dissemination; the uses of intelligence; intelligence sources and tools; managing the intelligence function; and the evolution of CI.

**IS 404 HEALTH INFORMATICS.** (3)
Provides an overview of health care information systems, legal and ethical issues in health care, compliance and regulatory requirements, coding of health care data, quality management, HL7 data security, and HIPAA. Explores major applications and commercial vendors, decision support methods, evaluation of health-care information systems; and new opportunities and emerging trends. Prereq: IS 201, IS 202.

**ISC Integrated Strategic Communication**

**ISC 161 INTRODUCTION TO INTEGRATED STRATEGIC COMMUNICATION.** (3)
An introductory course in all phases of integrated strategic communication and its role in contemporary business and society. Includes an historical and socio-cultural overview of advertising, public relations, sales promotion and direct response marketing as well as an exploration of their interrelationships. Covers strategic planning for integrated communication, message approaches and their foundations in theories of persuasion and information processing, and characteristics of message delivery systems. Provides a discussion of ethics and regulation, and the economic and social impact of the industries. Prereq: ISC pre-major only or consent of instructor.

**ISC 261 STRATEGIC PLANNING AND WRITING.** (3)
Introduces students to the systematic planning processes and techniques of creative and persuasive message preparation for integrated strategic communication. Extensive practice in writing and visual communication for print and electronic vehicles in the disciplines of advertising, public relations, sales promotion and direct marketing. Lecture, two hours; laboratory, two hours per week. Prereq: ISC pre-major status; ISC 161; keyboarding 30 wpm.

**ISC 311 ETHICAL, LEGAL AND SOCIAL ISSUES IN ISC.** (3)
Course will focus upon the legal, ethical and social issues faced by ISC professionals. The course will also examine government regulation of direct response and public relations practices as well as the industry’s ethical standards and self regulation efforts. Emphasis will also be placed upon gaining an understanding of ISC’s role in society’s economic, social, and cultural systems. Topics will include potential societal consequences of persuasive communication practices and the ethical responsibilities of professionals in each of the ISC disciplines. Prereq: Major standing.

**ISC 319 WORLD MEDIA SYSTEMS.** (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as JOU/MAS 319.)

**ISC 321 RESEARCH METHODS FOR THE INTEGRATED STRATEGIC COMMUNICATION PROFESSIONAL.** (3)
Introduces students to applied research as a decision making tool for the integrated communications professional. Students acquire basic skills in: identification of information needs, stating of research objectives, selection of appropriate research technique(s), sample selection, questionnaire design, analysis procedures, report writing, and budget management. Topics prepare students to conduct small-scale survey research and to buy and evaluate studies from custom and/or syndicated research suppliers. Legal and ethical issues are also examined. Prereq: Major standing; one course in statistics.

**ISC 331 ADVERTISING CREATIVE STRATEGY AND EXECUTION.** (3)
Ideas and their translation into words and images which inform and persuade. Emphasis is on the design, strategic approach and making decisions for all media. Topics include setting objectives, selection of appeal, copy style, structure of different media, design principles, layout and storyboarding, and regulations affecting messages. Lecture, two hours; laboratory, two hours per week. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321.

**ISC 341 STRATEGIC PUBLIC RELATIONS.** (3)
A course introducing students to the basic concepts of public relations, including its theories and development, professional historical function in organizations, and role in society. This course meets the needs of those planning or currently involved in professional and managerial careers which require an understanding of public relations. Prereq: For ISC majors, concurrent or previous enrollment in ISC 311 and ISC 321; for all others, admission to upper-division in the College of Communications and Information Studies.

**ISC 351 INTEGRATED STRATEGIC COMMUNICATION ACCOUNT MANAGEMENT.** (3)
Development and management of ISC programs that coordinate advertising, public relations, direct/interactive marketing, and sales promotion tactics. Topics include structure of the strategic communication management function, planning, strategy, leadership, operations, evaluating the effectiveness of communications, company-agency relationships, and career development. Practical knowledge and fundamental management concepts are integrated to enhance understanding of communication management’s role and challenges in the business environment. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321. Cannot be taken concurrently with ISC 451.

**ISC 361 DIRECT RESPONSE TARGETING: MEDIA AND DATABASE MANAGEMENT.** (3)
This course will introduce students to direct marketing practices with emphasis on data base marketing, strategic business planning, importance of the offer, selection and selling merchandise, business-to-business direct marketing, fund raising, mailing lists, print and electronic media, co-ops, telemarketing, production lead generation, direct marketing math, idea development, research and integrating direct marketing into the overall marketing mix. The course will be practical rather than theoretical in nature. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321; cannot be taken concurrently with ISC 461.

**ISC 371 SPECIALIZED PUBLIC RELATIONS WRITING.** (3)
Audience and purposes of writing are assessed as students develop a formal strategy guide to target writing. Lectures introduce writing tasks including writing of position papers, speech writing, and writing for brochures, media releases, letters and newsletters. Social and ethical considerations are examined across all writing tasks. Lecture, two hours; laboratory, two hours per week. Prereq: ISC 341.

**#ISC 399 INTERNSHIP: ISC.** (1-3)
Qualified students enter the professional sector to refine skills and knowledge. Supervised internships approved by the School allow placements in industry, government, radio, television, print media, research agencies, etc. A signed contract must be completed prior to the start of the internship. Pass/fail only. Prereq: admission to upper-division, fulfillment of internship prerequisites for the major, and approval of internship director for the major. (Same as JAT 399.)

**ISC 431 ADVERTISING CREATIVE STRATEGY AND EXECUTION II.** (3)
Students refine their ability to meet strategic goals through creative message executions. Media options and their impact on message structure and preparation are explored more fully. Application is made of pertinent theoretical principles such as source credibility, selective exposure/perception, and learning theory. Presentation skills stressed. Portfolio preparation and review. Prereq: ISC 331.
### Course Descriptions

**ITA 0101 ITALIAN FOR READING.** (3)
Designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination or who need reading knowledge of Italian in their minor.

**ITA 101 ELEMENTARY ITALIAN.** (4)
Fundamentals of Italian with development of the four basic skills: listening, speaking, reading, writing.

**ITA 102 ELEMENTARY ITALIAN.** (4)
A continuation of ITA 101. Prereq: ITA 101, or one year of high school Italian, or its equivalent.

**ITA 201 INTERMEDIATE ITALIAN.** (3)
A continuation of ITA 102 and an introduction to readings of selected Italian works. Further development of listening, speaking, reading and writing. Prereq: ITA 102.

**ITA 202 INTERMEDIATE ITALIAN.** (3)
Review of grammar and further development of speaking, oral comprehension, writing and reading based on cultural and literary materials. Prereq: ITA 201.

**ITA 263 STUDIES IN ITALIAN CULTURE (Subtitle required).** (3)
A study of Italian culture through representative writers, directors and artists in their political and socio-economic context. Taught in English. Subtitle required. May be repeated once with a different subtitle.

**ITA 295 ITALIAN CONVERSATION AND COMPOSITION.** (3)
Italian conversation and composition. Prereq: ITA 202 or equivalent.

**ITA 300 ITALIAN CONVERSATION AND WRITING.** (3)
This course is mainly designed to help students improve their speaking, pronunciation and listening comprehension ability in the Italian language, along with their writing and reading skills. Prereq: ITA 202 or equivalent.

**ITA 301 ITALY FROM FASCISM TO THE PRESENT.** (3)
This course is designed to give students a comprehensive overview and a good understanding of contemporary Italy. Through group activities, oral presentations and written assignments based on various literary excerpts, movies, and cultural readings, students will analyze and reflect on the main historical events and characters, along with cultural and economic trends that shaped Italy in the 20th century, starting with the period of Fascism and WWII. Prereq: ITA 300 or consent of instructor.

**ITA 335 TOPICS IN ITALIAN CINEMA (Subtitle required).** (3)
This course introduces students to representative directors, genres and periods of the Italian cinema with a special focus on its interaction with various world cinemas. Taught in English. May be repeated once up to 6 credits with a different subtitle.

**ITA 395 INDEPENDENT STUDIES IN ITALIAN.** (3)
Directed study in Italian literature, culture or film. Student’s topic to be approved by director. May be repeated once. Prereq: Successfully completed ITA 202 and consent of instructor.

**ITA 410G SPECIAL TOPICS IN ITALIAN LANGUAGE (Subtitle required).** (3)
Special Topics in Italian Language offers students the opportunity to develop advanced competencies in Italian language. Course focuses and developing students’ linguistic proficiency in specific cultural content areas. Possible topics include business Italian, Italian stylistics, and Italian translation. May be repeated under different subtitles up to 9 credits. Prereq: 6 credits upper division ITA courses completed or instructor consent.

**ITA 417 ADVANCED ITALIAN LANGUAGE.**

**ITA 443G SURVEY OF ITALIAN LITERATURE.** (3)
A survey of Italian literature from its beginnings to the 17th century. Prereq: ITA 202.

**ITA 563 STUDIES IN DANTE.**

**ITA 566 LITERATURE OF THE ITALIAN RENAISSANCE.**

**ITA 569 TOPICS IN ITALIAN LANGUAGE, LITERATURE, OR CULTURE (Subtitle required).**

**JAT 241 COMMUNICATIONS PRACTICUM.** (1-4)
Supervised laboratory work in the media of mass communications, with meetings for evaluation of work, study of techniques, analyses of problems, and reports. May be repeated to a maximum of four credits. (Offered in Community College System only.)

**JAT 399 INTERNSHIP: ISC.** (1-3)
Designed for advanced students with research or special study problems. Regular consultation with the instructor. May be repeated to a maximum of six credits. Enrollment normally limited to juniors and seniors with a 3.0 standing in the major. These requirements may be waived by the department in exceptional circumstances. Prereq: Consent of instructor.

**JAT 399 INTERNSHIP: ISC.** (1-3)
Qualified students enter the professional sector to refine skills and knowledge. Supervised internships approved by the School allow placements in industry, government, radio, television, print media, research agencies, etc. A signed contract must be completed prior to the start of the internship. Prereq: admission to upper-division, fulfillment of internship prerequisites for the major, and approval of internship director for the major. (Same as ISC 399.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.
JOU 101 INTRODUCTION TO JOURNALISM. (3)
This course surveys the history and social theories of journalism and introduces students to contemporary journalistic practice. Students will learn about the function and operation of print, electronic and on-line news media. Issues and concepts to be covered include the relationship of government to media; press freedom and controls; media ethics, and the impact of global communications. The course also covers the relationship of journalism to advertising, public relations and telecommunications, particularly with regard to new technologies. Prereq: JOU pre-majors in primary window; all others in secondary window.

JOU 204 WRITING FOR THE MASS MEDIA. (3)
An introduction to the concepts and techniques of media writing. This course offers hands-on instruction in information gathering, organization, and writing for print, broadcast and on-line media. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 101, JOU pre-major status; ISC pre-majors may enroll if they’ve completed ISC 161.

JOU 250 ETYMOLOGY. (3)
A study of words and their fundamental values with reference to development of a writing vocabulary. (Same as ENG 201.)

JOU 301 NEWS REPORTING. (3)
A course designed to develop skills in information gathering, news judgment, organization and writing. Students will learn to cover breaking news and write features. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 204.

JOU 302 RADIO AND TV NEWS REPORTING. (3)
An introduction to principles of broadcast writing and reporting. Students will complete assignments in class and at WUKY-FM, where they will prepare segments for newscasts under the supervision of the station’s news director. Students also will learn to shoot and edit videotape and to prepare TV news reports. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 204.

JOU 303 NEWS EDITING. (3)
Instruction and practice in copy desk operation and the duties and ethics of copy editors. Topics include techniques for editing stories, handling wire copy, writing headlines and news judgment. Emphasis on electronic editing. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 204.

JOU 304 BROADCAST NEWS DECISION MAKING. (3)
This class is designed to either awaken students’ news judgment and teach them the skills they will need to become assignment editors and producers of radio and television newscasts. Students will study the content and selection of news stories, using audio materials from such sources as National Public Radio, and visual materials from CNN NewsSource. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 302.

JOU 319 WORLD MEDIA SYSTEMS. (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affects the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as ISC/MAS 319.)

JOU 330 WEB PUBLISHING AND DESIGN. (3)
This course is designed to teach students to code and display text and visual information effectively on the Internet and to understand the application of professional practices in Web site analytics and management. Visual communication theory and practice for photographs, illustrations, graphical and textual elements will be taught and highlighted, in addition to the basics of HTML and CSS. Students will use industry-standard software and work flows as they are introduced to basic techniques and strategies for publishing, designing and managing a Web site for a newspaper, magazine, television station, advertising agency, public relations firm or media start-up. Social media and geolocation for news and other media purposes will be highlighted. Lecture: two hours, laboratory: two hours per week. Prereq: JOU major. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

JOU 387 PHOTOJOURNALISM I. (3)
A hands-on introduction to the use of cameras and laboratory equipment in contemporary news photography. Selected readings on photographic methods and the ethics of photojournalism. Lecture, two hours, laboratory, two hours per week.

JOU 403 TV NEWSCAST PRODUCING AND DIRECTING. (3)
This class is designed to train students to become television newscast producers and directors. Students will prepare TV newscasts with consideration of news story placement as it relates to audience, viewing trends, and journalistic judgment. Students will learn critical thinking skills in producing and directing as it relates to newscast and story promotion, reaching to major news events and their coverage, and talent and time management. Students will be required to write, produce and direct news stories in different formats for different formats for different newscasts and address ethical and legal concerns of news stories. Prereq: JOU 302 for JOU Majors; MAS 312 for MAS majors. (Same as MAS 403.)

JOU 404 ADVANCED TV NEWS. (3)
Students in this class produce a half-hour, TV newscast shown on a cable channel to homes in the Lexington-Fayette County DMA. Students will hone their writing skills and their proficiency in shooting and editing video, serving as producers, writers, videographers, reporters and anchors. May be repeated for up to six hours credit, with permission of instructor. Lecture, one hour per week; laboratory, four hours per week. Prereq: JOU 302.

JOU 409 MAGAZINE ARTICLE WRITING. (3)
An advanced writing course designed to teach students to generate, report and write feature stories for magazines and to market free-lance articles. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 301.

JOU 410 PUBLICATIONS PRODUCTION. (3)
Study of theory and practice in the techniques of effective communication through print and/or the Web. Starting with typography, this course will cover design for newsletters, newspapers and news magazines, but other publications may be considered. Instruction in the processes of defining the purpose of, designing and producing a publication. These include: layout, design, article and photo selection, page layout, headline and title writing. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 301 and 303.

JOU 415 DESIGN AND LAYOUT: (Subtitle Required). (1)
This course will familiarize students with computer programs used in publication design. Students develop their skills through hands-on exercises and projects. May be repeated to a maximum of three credits under different subtitles. Prereq: Will be determined by topic of course.

JOU 430 MEDIA MANAGEMENT AND ENTREPRENEURSHIP. (3)
An introduction to news media management focusing on start-up, design and operation of newspapers and magazines. This course takes an intensive look at the editorial content, advertising, business and management side of journalism. Lecture, two hours per week; laboratory, two hours per week.

JOU 455 MASS MEDIA AND DIVERSITY: (Subtitle Required). (3)
This course will examine gender and minority issues in the media. The course offers a critical framework for analysis of socio-cultural issues pertaining to women, ethnic groups, disabled persons, and others, and of their presentation in the media. May be repeated to a total of nine hours under different subtitles.

JOU 460 JOURNALISM IN SECONDARY EDUCATION. (3)
A course designed to familiarize students with a variety of legal and ethical issues facing student journalists and media advisers in secondary schools. Prereq: JOU 301 or JOU 302.

JOU 485 COMMUNITY JOURNALISM. (3)
A study of all aspects of community news media, including editorial and business operations, and the conflicts that can arise between them, as well as the personal/professional conflicts that community journalists must manage to be successful in the field. Lecture, two hours; laboratory, two hours of independent, advanced reporting and writing, for online and possible print publication. May also include photography and broadcast journalism. Prereq: JOU 301 or JOU 302.

JOU 487 PHOTOJOURNALISM II. (3)
An in-depth study of the many facets of photojournalism from the photo editor’s perspective. Students will shoot assignments and will also probe the legal and ethical aspects of news photography. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 387.

JOU 497 SPECIAL TOPICS IN JOURNALISM: (Subtitle required). (1-3)
Course will focus on selected topics drawn from journalism and related fields. Title assigned each time course is offered. May be repeated with different subtitles to a maximum of six credits.

JOU 498 MULTIMEDIA STORYTELLING. (3)
A course designed to provide journalism majors advanced training in reporting and writing articles on current events, public issues, personalities, culture and entertainment on multiple publishing platforms. Students will cultivate a platform-agnostic view of publication as they maintain a daily multimedia news outlet. Lecture, two hours; laboratory, two hours per week. Prereq: Print/multimedia students: JOU 301 and JOU 303; JOU 330. Broadcast/multimedia students: JOU 302 and JOU 304; JOU 330.

JOU 499 ADVANCEDWRITING FOR THE MASS MEDIA: (Subtitle Required). (3)
A course designed to provide journalism majors advanced training in reporting and writing articles on current events, public issues, personalities, culture and entertainment for the print and electronic media. Areas of emphasis will vary each semester. These include reporting on business, the arts, government and sports. May be repeated to a total of nine credits with different subtitles. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 303 or JOU 302.

JOU 531 MEDIA LAW. (3)
A study of the legal issues facing the media. The course will focus on the rights, constraints and responsibilities under the U.S. Constitution, federal and state statutes, administrative law and common law. Specific topics include prior restraint, libel, privacy, student media, copyright, broadcast regulation, the court systems, commercial speech and access to courts and public records.

JOU 532 ETHICS OF JOURNALISM AND MASS COMMUNICATION. (3)
An examination of ethical challenges facing journalists on different platforms - print, online, broadcast and in social media. Students will reason through issues of value that arise in the practice of journalism.
JOU 535 HISTORY OF JOURNALISM. (3)
A study of the development of American journalism, with emphasis on the evolution of newspapers, magazines, and new media. Examination of principles and social theory underlying the practice of journalism.

JOU 541 THE FIRST AMENDMENT, INTERNET, AND SOCIETY. (3)
The course will focus on the legal and policy environment of the Internet. Particular attention will be paid to social media, libel, privacy, hate speech, obscenity, and copyright issues. How the First Amendment has been adapted to new media technologies is a central part of the class. The course also provides an introduction to the legal system and the basics of legal research. Prereq: JOU 541 will be restricted to JOU majors in primary window; open to other majors in the School in secondary window; open to other students during add drop.

JPN Japan Studies

JPN 101 BEGINNING JAPANESE I. (4)
A course in first semester Japanese language.

JPN 102 BEGINNING JAPANESE II. (4)
A course in second semester Japanese language. Prereq: JPN 101 or equivalent.

JPN 201 INTERMEDIATE JAPANESE I. (4)
A course in third semester Japanese language. Prereq: JPN 102 or equivalent.

JPN 202 INTERMEDIATE JAPANESE II. (4)
A course in fourth semester Japanese language. Prereq: JPN 201 or equivalent.

JPN 283 JAPANESE FILM. (3)

JPN 301 ADVANCED JAPANESE I. (3)
This course is primarily a course in contemporary Japanese culture, but serves as a third year language course. The "texts" will consist of contemporary written materials (books, magazines, newspapers) and visual materials (tv programs, movies) and will exercise the four skills (reading, writing, listening, speaking) studied in the first four semesters of the language. By building on the skills learned in the initial semesters, this course will continue and strengthen the oral and aural, written and reading skills in Japanese, for students who have studied the equivalent of two years of Japanese language. Further, this course will emphasize the speaking and listening skills. It is paired with JPN 302, a course emphasizing reading and writing skills. Thus, students who complete this course will be able to communicate at a rather sophisticated level of Japanese on a variety of contemporary topics within Japanese society. Prereq: JPN 202 or permission of instructor.

JPN 302 ADVANCED JAPANESE II. (3)
This course is primarily a course in contemporary Japanese culture, but serves as third year language course. The "texts" will consist of contemporary written materials (books, magazines, newspapers) and visual materials (tv programs, movies) and will exercise the four skills (reading, writing, listening, speaking) studied in the first four semesters of the language. By building on the skills learned in the initial semesters, this course will continue and strengthen the oral and aural, written and reading skills in Japanese, for students who have studied the equivalent of two years of Japanese language. Further, this course will emphasize the speaking and listening skills. It is paired with JPN 302, a course emphasizing reading and listening skills. Thus, students who complete this course will be able to communicate at a rather sophisticated level of Japanese on a variety of contemporary topics within Japanese society, and will be comfortable within Japanese print media. Prereq: JPN 301.

JPN 320 INTRODUCTION TO JAPANESE CULTURE, PRE-MODERN TO 1868. (3)
This course, taught in English, is designed as a general introduction to the culture of pre-modern Japan (up to the Meiji Restoration of 1868). Topics include: Shinto, Buddhism, and Confucianism in ancient Japan; feminine sensibilities in ancient literature; canons of medieval art; the culture of military strife; Christianity in pre-modern Japan; and encounters with the West.

JPN 321 INTRODUCTION TO JAPANESE CULTURE, MEIJI (1868) TO PRESENT. (3)
General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nation-building; Japan and the West; Japan and Asia (for the Meiji period 1868-1912); gender construction and class formation, urbanization and mass culture (for the Taisho period 1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as ANT 321.)

JPN 334 ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN. (3)
This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses Japan’s human and natural environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials; challenges to the management of environment and its resources; and Japan’s role in global economy. (Same as GEO 334.)

JPN 351 THE JAPANESE EXPERIENCE OF THE TWENTIETH CENTURY. (3)
General introduction to Japan from Meiji Restoration (1868) to the present, focusing mainly on the literary arts, but also including film, architecture and the fine arts.

JPN 365 INDEPENDENT WORK IN JAPANESE. (1-6)
Independent work to pursue special problems in reading and research. May be repeated to a maximum of six credits. Prereq: Instructor approval.

JPN 400G TOPICS IN JAPAN STUDIES (Subtitle required). (3)
Variable in content, this course focuses on important texts and issues in Japanese history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles. To be taught in English.

JPN 401 ADVANCED JAPANESE III. (3)
This course will further develop skills in sophisticated Japanese language use by exercising the four skills of language (reading, writing, listening, speaking). The course will include readings in authentic materials in a wide variety of writing styles, student writing for a variety of occasions, and development of speaking and listening fluency. Prereq: JPN 302 or equivalent.

JPN 402 ADVANCED JAPANESE IV. (3)
This course will further develop skills in sophisticated Japanese language use by exercising the four skills of language (reading, writing, listening, speaking). The course will include readings in authentic materials in a wide variety of writing styles, student writing for a variety of occasions, and development of speaking and listening fluency. Prereq: JPN 401 or equivalent.

JPN 405 SEMINAR IN JAPANESE AND ASIAN STUDIES (Subtitle required). (3)
An interdisciplinary seminar focusing on a topic in Japanese and Asian Studies. May be repeated to a maximum of six credits. Prereq: Instructor approval.

JPN 410 ADVANCED TOPICS IN JAPANESE LANGUAGE (Subtitle required). (3)
JPN 410 is an advanced Japanese language course focused on topics related to Japan, such as contemporary Japanese writings, Japanese society, mass media, and business. The course develops students understanding of different genres of Japanese writing as well as developing advanced writing, listening and speaking skills. The course may be repeated up to four times under different subtitles. Prereq: JPN 302 or instructor’s approval.

JPN 420G PRE-MODERN LITERARY AND VISUAL ARTS OF JAPAN. (3)
This course will introduce representative literary and visual arts of Japan, from antiquity until the mid-nineteenth century. This serves as an introduction to intellectual and societal undercurrents foundational to understanding Japanese society.

JPN 421G CONTEMPORARY LITERARY AND VISUAL ARTS OF JAPAN. (3)
This course will introduce the literary and visual arts of the last 150 years (since the Meiji period) of Japan. This serves as an introduction to intellectual questions that have enlivened Japanese society in the last century and a half, key to understanding contemporary Japanese culture.

JPN 430G SELF AND OTHER: THE POLITICS OF CULTURE IN JAPAN-U.S. RELATIONSHIP. (3)
This course explores changing ideas and images of America (the West) and Japan (the East) have had of one another during the modern century (roughly 1850s - 1980s) and in the more recent period of post-modernity (1990s - present) of their interactions. It examines the cultural politics of representations—images, ideas, and discourses—between Self and Other by viewing mutual constructions of “America” and “Japan” as its paradigmic example.

JPN 451G SOCIAL MOVEMENTS IN MODERN JAPAN. (3)
JPN 461G JAPANESE COLONIALISM AND ITS LEGACIES. (3)
This course will explore the making and unmaking of Japanese colonialism and its postwar legacies via a number of media. Geopolitically, the course will be organized in terms of the changing boundaries, and their representations, of the Japanese empire. We will also incorporate the following related perspectives in order to examine some of the basic problems of Japanese colonialism which contemporary Japan has not completely left behind.

JPN 491G JAPANESE LANDSCAPES. (3)
A study of the landscapes of Japan as vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as GEO 491G.)

JPN 520 JAPANESE LINGUISTICS AND SOCIETY. (3)
This course will introduce a wide range of topics in Japanese linguistics, including phonetics, phonology, morphology, syntax, semantics, and sociolinguistics. In this course, you will (1) learn the basic notions and terminology used in linguistics, (2) study major issues in Japanese linguistics, and (3) apply theoretical knowledge to the hands-on analysis of Japanese data. Prereq: JPN 102.

JPN 551 JAPANESE MULTINATIONAL CORPORATIONS. (3)
A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinationals policies on the environment; and local economy. Prereq: Consent of instructor. (Same as GEO 551.)
KHP 240 NUTRITION AND PHYSICAL FITNESS. (3)
Course focuses on the interrelationship between nutrition and physical fitness. The intent is to provide the student with the information necessary to formulate an individualized plan for the achievement and maintenance of adequate nutrition and physical fitness. Weight control will be discussed in this content. Team taught by nutrition faculty and health, physical education and recreation faculty. Lecture, two hours; laboratory, two hours.

KHP 250 TEAM SPORTS: (Subtitle required). (2)
This course is designed to familiarize the professional physical education student with the skills, practices, techniques, rules, and strategies of the sports of: soccer, volleyball, and team handball. The primary goal of the course is to equip the student with the skills necessary to effectively teach these three sports in both the upper elementary and secondary schools. Development of at least an intermediate skill level is expected of the students. Laboratory: Six hours per week for one semester. Prereq: KINE or PHED major.

KHP 252 WATER SAFETY LEADERSHIP. (2)
Leadership training in the teaching of swimming, lifesaving, diving, synchronized swimming, competitive swimming, camp waterfront, beach and pool operation and exhibition. Laboratory, four hours. Prereq: Current lifesaving certificate or equivalent.

KHP 260 INDIVIDUAL SPORTS: (Subtitle required). (2)
This course is designed to familiarize the professional physical education student with the skills, practices, techniques, rules, and strategies of the activities of: bowling, yoga, and badminton. The primary goal of the course is to equip the student with the skills necessary to effectively teach these three activities in both the upper elementary, middle, and secondary schools. Development of at least an intermediate skill level is expected of the students. Laboratory: Six hours per week for one semester. Prereq: KINE or PHED major.

KHP 263 CURRICULUM DESIGN AND DEVELOPMENTAL SKILLS FOR THE ELEMENTARY SCHOOL. (3)
The study of sports skills development and their inclusion in the elementary programs of games of low organization, lead-up games, and refined sports skills. Lecture, two hours; laboratory, two hours per week. Prereq: KINE/HEPR/PHED majors or permission of the instructor.

KHP 300 PSYCHOLOGY AND SOCIOLOGY OF PHYSICAL EDUCATION AND SPORT. (3)
A survey course in the social science foundation of sport. Study of the sociological and psychological concepts which are relevant in understanding of sport in this country and the world. After the successful completion of this course, the student should be able to define, discuss, and identify the basic social and psychological factors which are related to the pursuit of movement through sport. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

KHP 319 SPORTS OFFICIATING. (1)
This course will provide students with introductory knowledge, interpretations skills, and mechanical techniques of officiating. Prereq: KHP major or permission of instructor.

KHP 340 ATHLETIC TRAINING. (2)
Consideration is given to the prevention, treatment and rehabilitation of injuries. Films and other visuals, visiting physicians and team trainers will be used to supplement instruction. The student will have an opportunity to gain practical experience. Lecture, one hour; laboratory, three hours.

KHP 344 PHYSICAL EDUCATION IN THE SECONDARY SCHOOL. (3)
Required for teacher certification in physical education. Theory and practice in methods of teaching physical education activities and supervising programs in the secondary school. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to KHP Teacher Education Program.

KHP 360 PHYSICAL EDUCATION IN THE ELEMENTARY SCHOOL. (3)
An introduction to the necessary skills needed for the planning and conduct of modern elementary physical education programs. Emphasis is placed on teaching basic movement skills, fundamental rhythmic and sports skills. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to KHP Teacher Education Program.

KHP 361 FIELD EXPERIENCES. (1)
Field experiences with elementary school age children, P-12. Prereq: Admission to the KHP Teacher Education Program.

KHP 362 FIELD EXPERIENCES IN SECONDARY EDUCATION. (1)
For students who expect to teach and who meet the requirements for a major in physical education. Experience in working with children in physical education activities comprises basic part of course. Safety education also included. To be offered only on a pass-fail basis. Prereq: Admission to the Teacher Education Program or permission of instructor.

KHP 382 PHYSICAL EDUCATION FOR ELEMENTARY SCHOOL TEACHERS. (3)
A hybrid course that does meet the first day of class. The syllabus provides information about access to student services and that is discussed during the face-to-face course orientation. Provides physical education concepts and content to be taught to the elementary students. Includes instructional methods and management techniques appropriate for physical education programs at the elementary school level. Prereq: Admission to elementary or early childhood teacher education program or consent of instructor.
KHP 390 DANCE ACTIVITIES FOR SCHOOLS. (2) Designed to familiarize physical education preservice students with the skills, practices, techniques, theory of creative movement expression, and structured dance appropriate for K-12 physical education. State and national standards will be the foundation for the lesson plans developed in this course.

KHP 395 INDEPENDENT STUDY IN KINESIOLOGY AND HEALTH PROMOTION. (3) May be repeated to a maximum of 12 credits. Prereq: Major and 3.0 standing in area or consent of instructor.

KHP 396 DANCE PEDAGOGY FOR MIDDLE AND HIGH SCHOOL. (3) This is a comprehensive study of teaching methods and materials for teachers of middle and high school students. Prereq: KHP 390 and/or KHP 393.

*KHP 415 BIOMECHANICS OF HUMAN MOVEMENT. (4) The application of mechanical principles in the study of the internal and external forces acting on the human body and the effects produced by those forces. Prereq for Exercise Science majors: ANA 209, PGY 206, Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110. Prereq for KINE Cert majors: KHP 205, Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110.

*KHP 420G PHYSIOLOGY OF EXERCISE. (3) A study of the immediate and long-term effects of exercise on the human organism. The course will include topics such as the role of exercise in health related issues as well as physical training for fitness and sports performance. We will discuss current areas of research and controversies in exercise physiology. Prereq for KHP exercise science majors: ANA 209, PGY 206 or equivalent. Junior, senior or graduate standing. Prereq for KHP KINE-Cert teacher education majors and HEPR-Cert teacher education majors: KHP 205 or equivalent. Junior, senior or graduate standing.

KHP 430 METHODS OF TEACHING HEALTH EDUCATION. (3) A variety of contemporary teaching methods appropriate for use in grades K-12 will be presented. Students will be exposed to these methods through textbook and outside readings and through observation of the instructor, public school teachers, and peer teachers. Methods will be critically examined for effectiveness in the cognitive, affective, and behavioral areas. Prereq: KHP 220, 230, or equivalent, or consent of instructor via permit; and admission to Teacher Education Program or consent of instructor via permit.

KHP 445 INTRODUCTION TO TESTS AND MEASUREMENTS. (3) An analysis of written and motor performance tests in health, safety, physical education, and recreation. Laboratory experiences in the administration, scoring, and interpretation of motor performance tests are provided. Lecture, two hours; laboratory, two hours.

KHP 450 INTRODUCTION TO EXERCISE TESTING AND PRESCRIPTION. (3) The course addresses fundamental principles of Exercise Science specifically as they relate to the testing and exercise prescription of apparently healthy individuals with controlled disease. The class will review concepts essential for successful completion of the American College of Sports Medicine Certified Personal Trainer and Health Fitness Instructor exams. Prereq: ANA 209, PGY 206.

KHP 485 SPORT IN AMERICA. (1-3) A concentrated study in a specific sport or activity or field of emphasis in physical education. May be repeated to a maximum of six credits.

KHP 546 PHYSICAL EDUCATION WORKSHOP. (1-3) An analysis of research findings in the psychology of teaching and coaching with emphasis placed on those factors which influence the acquisition of motor skills as well as on the psychological benefits of exercise and sport. Prereq. Undergraduate psychology course and basic statistics or consent of instructor.

KHP 560 MOTOR DEVELOPMENT IN INFANTS AND YOUNG CHILDREN. (3) An analysis of the processes of learning to move and moving to learn in infants and young children. Emerging interrelationships among the motor, social, emotional, and cognitive forms of behavior are explored. Laboratory experiences are provided in early childhood education programs. Prereq: PSY 100.

KHP 579 ADAPTED PHYSICAL EDUCATION. (3) A study of programs of adapted and developmental physical education for individuals with disabilities. Experiences will include the appraisal of psychomotor functioning, design of instructional intervention, and program implementation and evaluation. Lecture, two hours; laboratory, two hours. Prereq: KHP 515 or consent of instructor.

GRADUATE COURSES

KHP 601 TEACHING EFFECTIVENESS AND LEADERSHIP IN KINESIOLOGY AND HEALTH EDUCATION. (3) This course will examine the current research relevant to teacher effectiveness. The development and implementation of practical methods for improving teacher effectiveness in Kinesiology constitute the primary emphasis of the course. The Kentucky Teacher Standards will be emphasized and used to guide this course.

KHP 644 RESEARCH TECHNIQUES APPLIED TO KINESIOLOGY AND HEALTH PROMOTION. (3) A critique of research procedures for purposes of developing more efficient research designs applicable to problems in kinesiology and health promotion. Should be preceded or accompanied by basic statistics and introduction to measurement.

KHP 676 CURRENT ISSUES AND PROBLEMS IN SPORT MANAGEMENT. (3) An in-depth analysis of pertinent issues and problems affecting the management of sport and fitness programs. Prereq: Admission to the program or consent from the instructor.

KHP 680 SPORT AND FITNESS MARKETING. (3) An introduction to the broad area of sport and fitness marketing to include a focus on marketing management as it applies to sport, the general nature of the sport and fitness consumer, pricing strategies and promotions, licensing, and the role of research in sport marketing.

KHP 681 FINANCIAL ASPECTS OF SPORT. (3) Course focuses on principles, practices and theories associated with financial planning and management of enterprises engaged in the provision of sport related services and/or products. Topics include budget planning and preparation, preparing and analyzing financial statements, revenue sources, money management, preparation of business plans and feasibility studies. Prereq: ACC 201 and 202 and HPER, KHPR majors or consent of instructor.

KHP 682 CONTEMPORARY SPORT LEADERS. (1-3) Using a team approach, students will engage in a variety of experiential learning projects with sport management and innovation as contextual themes. Special emphasis will be placed on self-reflection within sport leadership as well as real-life application in case studies, semi-structured interviews, and participant observation. Prereq: Consent of instructor.

KHP 685 SUPERVISION OF SPORT AND FITNESS PERSONNEL. (3) A study of the three major functions of the supervisor: planning, directing and controlling and their application to the area of organized sport. Prereq: Admission to the program or consent of the instructor.

KHP 686 SPORT MANAGER’S LABORATORY. (3) A combination of lectures, laboratory experiences, and discussions which enable the student to demonstrate competence in application of various applied management skills learned in other KHP courses. Prereq: Admission to the program or consent of the instructor.

KHP 687 PRACTICUM IN SPORT MANAGEMENT. (3-9) Extensive work experiences under the immediate supervision of qualified managers and sport management faculty coordinator. May be repeated to a maximum of nine credits. Prereq: HPER, KHPR majors (Sport Management) or consent of advisor.

KHP 695 INDEPENDENT STUDY IN KINESIOLOGY AND HEALTH PROMOTION. (1-3) A specific topic in physical education related to the student’s interests and program needs is selected for intensive study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

KHP 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

KHP 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

KHP 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

KHP 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

KHP 769 RESIDENCE CREDIT FOR THE DOCTORAL DEGREE. (0-12) May be repeated indefinitely.

KHP 782 INDEPENDENT RESEARCH IN KINESIOLOGY AND HEALTH PROMOTION. (3) Systematic investigation of a problem selected from the areas of kinesiology and health promotion. May be repeated to a maximum of nine credits.

SPORT MANAGEMENT

KHP 550 PRINCIPLES OF RESISTANCE TRAINING. (3) This course will provide students with the knowledge to design strength and conditioning programs for athletes. In addition, students will learn how to teach strength training, flexibility, and plyometric exercises. This class prepares students for the National Strength and Conditioning Association’s certifications. Prereq: KHP 120, ANA 209, PGY 206.
KHP 570 PLANNING AND MANAGEMENT OF FACILITIES FOR SPORT. (3)
An introduction to the planning and management of sports facilities. The course will focus on elements of planning, design, and management while examining functions related to maintenance, security, operations budgeting and evaluation. The course will be presented primarily in lecture format utilizing guest speakers but will also include facility visits as integral parts of the course. Prerequisite: Upper division KHP major or consent of instructor.

KHP 573 MANAGEMENT OF SPORT. (3)
An introduction to the five functions of management: planning, organizing, staffing, directing and controlling, and their application to organized sport settings. Prerequisite: Upper division PHED, KINE majors or HPER, KHPR majors or consent of instructor.

KHP 577 PRACTICUM IN KINESIOLOGY AND HEALTH PROMOTION. (3-6)
Extensive practical work experiences with qualified practitioners and KHP faculty. Repeatable up to 6 credit hours. Prerequisite: KINE, HPER, KHPR majors only.

*KHP 580 GROUP DYNAMICS IN SPORT AND PHYSICAL ACTIVITY. (3)
This course provides a comprehensive analysis of sport and physical activity from both a social psychological and group dynamics perspective. Sport and physical activity are highly social environments that can have wide and far reaching influence upon those who participate in them. Thus, students enrolled in this course will gain an advanced understanding of the major theories of group development, management, and maintenance, as well as the factors that determine how behavior and performance are affected by interactions with others in the context of sport and physical activity. Finally, students will learn and practically apply techniques related to team building, cohesion, and group work. Prerequisite: Upper division PHED, KINE majors or HPER, KHPR majors or consent of instructor.

KHP 585 FOUNDATIONS OF SPORT MANAGEMENT. (3)
An overview of the broad field of sport management with an emphasis on (1) the historical, political, socio-economic and demographic factors that influence sport, and (2) the issues related to sport and business in society and their application to sport organizations. Prerequisite: Sport Management graduate student or permission of instructor.

HEALTH PROMOTION

KHP 190 FIRST AID AND EMERGENCY CARE. (2)
This course is a study of the human body with first aid subject matter, demonstrations, and skill training in the event of sudden illness or injury. The course is delivered in a hybrid manner with the lecture material being taught on-line and first aid skills being taught once a week in face-to-face laboratory sessions. American Red Cross Certifications for CPR, AED, and Responding to Emergencies First Aid are awarded to those who meet the criteria.

KHP 220 SEXUALITY EDUCATION. (2)
This course is designed to prepare educators to teach sexuality education in the schools. Emphasis is placed on justifying sexuality education, relevant content, appropriate teaching techniques, and precautions to take when teaching sexuality education.

KHP 222 DRUG EDUCATION. (2)
This course is designed to prepare educators to offer drug education in the schools. Emphasis is placed on the prevalence of drug use by youth; physiological, psychological, and social effects of various drugs; effective and ineffective approaches to drug abuse prevention; appropriate teaching strategies; and evaluating drug curricula.

KHP 230 HUMAN HEALTH AND WELLNESS. (3)
The study of health promotion, wellness, and disease prevention concepts as applied to individual, familial, and community health.

KHP 270 INTRODUCTION TO HEALTH EDUCATION AND HEALTH PROMOTION. (3)
This course is designed to provide students with an overview of the emerging profession of health education and health promotion. This course will focus on the history of health, future trends in health, increasing students' knowledge and skill development in health, and improving the students' ability to make application in the areas of health education and health promotion.

KHP 310 APPLIED HEALTH EDUCATION PRACTICE. (3)
This course is designed to enhance the skills of students who will be health education teachers. The emphasis will be on increasing awareness of how schools operate and identifying the characteristics of effective teaching. In addition, emphasis will be placed on developing skills among students that will be effective teachers.

*KHP 325 COMMUNITY ORGANIZING IN HEALTH PROMOTION. (3)
This course is designed to provide students with an overview of community organizing and capacity building. There will be a focus on contextual frameworks and approaches used in community organization/building. Students will explore ways to conceptualize, promote and accomplish learning in various health promotion settings through community organizing and building across diverse groups and cultures, by advocating to influence public policy, and addressing ethical challenges that shape community organizing and capacity building. Prerequisite: KHP 270 — Introduction to Health Education and Health Promotion.

KHP 330 PLANNING AND IMPLEMENTING SCHOOL HEALTH EDUCATION PROGRAMS. (3)
A study of the foundations of school health education and the various factors that are involved in the processes of conceptualizing, planning, drafting, and implementing effective health education programs. Prerequisite: KHP 220 and KHP 230 or equivalents or permission of instructor.

KHP 371 STUDENT TEACHING IN HEALTH EDUCATION. (3-12)
For students who expect to teach and who meet the requirements for a teaching certificate in KINE, HPER, and KHPR majors. A study of objectives, content, testing, and methods for teaching health education. The course includes observation, practice, safety education, audio-visual aids and planning conferences with supervising teacher. Six to 24 lab hours per week. May be taken on a pass/fail basis only. Prerequisite: Admission to the Teacher Education Program in Health.

KHP 380 HEALTH EDUCATION IN THE ELEMENTARY SCHOOL. (2)
Provides an in-depth review of the school health program and a review of instructional methods appropriate to health education in the elementary school. Prerequisite: Admission to elementary or early childhood teacher education program or consent of instructor.

KHP 400 METHODS OF TEACHING HEALTH EDUCATION. (3)
A study of the many contemporary teaching methods appropriate for use in grades K-12 will be presented. Students will be exposed to these methods through textbook and outside readings and through observation of the instructor, public school teachers, and peer teachers. Methods will be critically examined for effectiveness in the cognitive, affective, and behavioral areas.

KHP 500 WORKSHOP IN HEALTH AND SAFETY. (1-3)
Designed as a variable topic course including aspects of school health or safety education with emphasis upon the needs of teachers. May be repeated to a maximum of six credits.

KHP 520 PROGRAM EVALUATION. (3)
A study of the planning and management of health education program and a review of instructional methods appropriate to health education in the elementary school. Prerequisite: Admission to elementary or early childhood teacher education program or consent of instructor.

KHP 590 ADVANCED HEALTH CONCEPTS. (3)
A study of the planning and management of health education program and a review of instructional methods appropriate to health education in the elementary school. Prerequisite: Admission to elementary or early childhood teacher education program or consent of instructor.
Course Descriptions

KHP 688 EVENT MANAGEMENT IN SPORT. (3)
The purpose of the course is to provide the student with an understanding of event management issues and problems related to the supervision, management, and business operations of various events. Prereq: Admission to the program or consent from the instructor.

EXERCISE SCIENCE

KHP 350 STRENGTH AND CONDITIONING FOR SPORTS. (3)
The course addresses the fundamental principles of Exercise Science specifically as they relate to the conditioning of athletes. The course will also review concepts essential for successful completion of the National Strength and Conditioning Association's CSCS exam. Prereq: ANA 209, PGY 206, KHP 120.

KHP 450 INTRODUCTION TO EXERCISE TESTING AND PRESCRIPTION. (3)
The course addresses fundamental principles of Exercise Science specifically as they relate to the testing and exercise prescription of apparently healthy individuals and individuals with controlled disease. The class will review concepts essential for successful completion of the American College of Sports Medicine Certified Personal Trainer and Health Fitness Instructor exams. Prereq: ANA 209, PGY 206.

KHP 600 EXERCISE STRESS TESTING AND PRESCRIPTION. (3)
Knowledge required for the administration of an exercise stress test with implications for writing an exercise prescription. Content covers healthy individuals as well as those with various health problems such as heart disease, hypertension, mental illness and diabetes. Course implements the Guidelines of the American College of Sports Medicine in preparing a specialist in exercise stress testing. Lecture, two hours; laboratory, two hours per week. Prereq: PGY 206, KHP 420G, consent of instructor.

KHP 610 MOTOR CONTROL I: MUSCLES, STRENGTH AND MOVEMENT. (3)
A research oriented, qualitative and quantitative investigation into the fundamental human movement patterns of ambulation, jumping, throwing, and striking. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in physics, KHP 515, and consent of instructor.

KHP 615 BIOMECHANICS OF FUNDAMENTAL MOVEMENTS. (3)
Application of conceptual frameworks to biomechanics of analysis of sports. Class will examine how motions are created and controlled to enable specific sport performances. Mechanics related to injury will also be investigated. Prereq: Undergraduate course in biomechanics or consent of instructor.

KHP 617 GAIT ANALYSIS. (3)
This course is a graduate level experience into the analysis of human gait. Walking, running, and pathological gait will be studied. Prereq: KHP 615 or similar course.

KHP 618 WORK HARDENING AND ERGONOMICS. (3)
Aimed at development of an in-depth understanding of the acute and chronic adaptations of the human body to the stress of exercise. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in physics, KHP 515, and consent of instructor.

KHP 620 ADVANCED EXERCISE PHYSIOLOGY. (3)
This course addresses the fundamental principles of Exercise Science specifically as they relate to the testing and exercise prescription of apparently healthy individuals and individuals with controlled disease. The class will review concepts essential for successful completion of the American College of Sports Medicine Certified Personal Trainer and Health Fitness Instructor exams. Prereq: ANA 209, PGY 206.

KHP 640 LAB METHODS IN EXERCISE SCIENCE. (3)
This course will provide an in-depth study of the basic methods of three-dimensional biomechanical analysis of human movement based on the inverse dynamics approach. Prereq: KHP 615 or consent of instructor.

KHP 715 THREE-DIMENSIONAL BIOMECHANICAL ANALYSIS OF HUMAN MOVEMENT. (3)
A study of the basic areas covered in sports medicine with readings and discussions of current international trends in the research and practice in this field. Prereq: Twelve semester hours, credit in the field of biological sciences; consent of instructor. (Same as AT 720.)

KHP 785 GRADUATE SEMINAR IN EXERCISE SCIENCE. (0-1)
Faculties, students, and invited speakers will present and discuss current research in Exercise Science. Students enrolled for credit will be required to present a seminar on their own research. Students presenting a seminar will be provided feedback by faculty and seminar participants. May be repeated to a maximum of 2 times for credit, unlimited times for zero credit. Prereq: Graduate standing in Ph.D. in Exercise Science program or consent of instructor.

LA 105 INTRODUCTION TO LANDSCAPE ARCHITECTURE. (3)
A survey of landscape architecture examining how the profession responds to societal needs in providing services to various public and private clients. Students will become aware of the potential for landscape architecture to transform the environments in which humans live, work, and play. Contemporary landscape architectural issues, practitioners and work are presented. Lecture, three hours per week.

LA 111 LIVING ON THE RIGHT SIDE OF THE BRAIN. (3)
Students in this course will gain an understanding and awareness of creative strategies that have been used in successful problem solving. These strategies will help to encourage creative thinking that will lead to more innovative and novel solutions. Students will practice a metacognitive strategy by reflecting on their own thinking in an effort to enhance self-regulation and ultimately realize their creative potential.

LA 121 LANDSCAPE ARCHITECTURE DESIGN STUDIO I. (3)
Introduction to the fundamental elements and principles of design. Emphasis is on the application of design thinking and creative process to a variety of design problems. Observation, communication, and critique are stressed as components of process. Lecture, three hours; studio, nine hours per week. Field trips may be required. Prereq: Student must be accepted in the Landscape Architecture Program and enrolled in LA 161 (or previous completion of equivalent graphics course).

LA 161 GRAPHICS I. (3)
A study of landscape architecture graphics including freehand sketching, plan, section, and perspective drawing. Rendering techniques in both black and white and color will be explored with a variety of media including pencils and markers. Lecture, two hours; studio, two hours per week. Prereq: Non-LA majors must have permission of instructor.

LA 162 DIGITAL REPRESENTATION I. (3)
This course provides students with a basic knowledge of computer-aided methodologies applied to site design and design articulation. It focuses on utilizing computer-aided drafting/design as a tool for producing the sequence of drawings commonly used in professional design offices. The interface of computer-aided drafting/design software with various other digital applications to produce representations of site information is also emphasized. Lecture, two hours, laboratory, two hours per week. Prereq: LA 161.

LA 205 HISTORY OF LANDSCAPE ARCHITECTURE. (3)
A study of landscape design from past civilizations and how these have influenced our present approach to dealing with our landscape.

LA 222 LANDSCAPE ARCHITECTURE DESIGN STUDIO II. (6)
LA 222 continues the core emphasis on process and design vocabulary from LA 121. The course is focused on the connections between landscape architectural design, place, and regional landscapes, along with the continued development of graphic, written, and oral communication skills. Lecture, three hours; studio, nine hours per week. Field trips may be required. Prereq: LA 121 with a minimum grade of "C" and enrollment in LA 162 (or previous completion of equivalent CAD course). This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

LA 223 LANDSCAPE ARCHITECTURE DESIGN STUDIO III. (6)
Design studio emphasizing design process applied to site programming, landscape analysis, and site planning. Use of actual sites to emphasize relationships between landscape analysis processes, landscape topology, and landscape ecology. Low impact site development practices are stressed. Field trips may be required. Lecture, three hours; studio, nine hours per week. Prereq: LA 121 with a minimum grade of "C"; LA 105, LA 162 or equivalent CAD course; and PL 366 or concurrent enrollment in PL 366. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

LA 262 GRAPHICS II. (3)
Study and application of graphic communication methods with emphasis on integration of analog and digital media and technology. Lecture, two hours; laboratory, two hours per week. Prereq: LA 162.

LA 271 DESIGN IMPLEMENTATION I. (4)
This course develops competency in solving problems relating to site grading, drainage systems, road alignment, and other aspects of site engineering. Field trips may be required. Lecture, two hours; studio, six hours per week. Prereq: LA 162 or permission of the instructor.

LA 305 DESIGN THEORIES IN LANDSCAPE ARCHITECTURE. (3)
This course will address a variety of viewpoints in design thinking as related to landscape architecture. Theoretical and philosophical foundations for environmental interventions will be explored and the process of design criticism as a form of inquiry will be emphasized. Prereq: LA 205 or permission of instructor.

LA 307 CULTURAL LANDSCAPE PRESERVATION. (3)
An introduction to cultural landscape preservation activities as design strategies. Exploration of regional landscape preservation case studies and applications of preservation methods to landscape preservation issues with an emphasis on research and process. Lecture, two hours; studio, two hours per week.
LA 308 REGIONAL LAND USE PLANNING SYSTEMS. (3)
An introduction to regional land use planning and its relationship to environmental, social, and economic systems. Students will develop an understanding of how land use decisions have impacted the development of the United States and how they are used to determine future development directions.

LA 324 LANDSCAPE ARCHITECTURE DESIGN STUDIO IV. (6)
Studio design course emphasizing site selection and programmatic analysis in landscape master planning for complex site programs. Field trips may be required. Lecture, three hours; studio, nine hours per week. Prereq: LA 223 with a minimum grade of “C”, PLS 366, and concurrent enrollment in PLS 320.

LA 345 DESIGN WITH PLANTS. (3)
The application of design principles to the functional and aesthetic use of plant materials in the landscape. Lecture, two hours; studio, two hours per week. Prereq: LA 161 and PLS 320, or permission of instructor.

LA 355 INTRODUCTORY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS. (3)
An introduction to the concepts and methods of compilation, management, analysis, and display of spatially-referenced and tabular data utilizing vector and raster data models. Lecture will be complemented with computer based laboratory exercises. Lecture, two hours; laboratory, four hours per week. Prereq: Third year or above LA major, junior/senior NRES major, or permission of instructor. (Same as NRE 355.)

LA 372 DESIGN IMPLEMENTATION II. (4)
A continuation of landscape architecture design implementation; construction materials, including wood, pavers, and walls, along with their applications: preparation of working drawings and materials specifications. Field trips may be required. Lecture, two hours; studio, six hours per week. Prereq: LA 271 with a minimum grade of “C”.

LA 373 DESIGN IMPLEMENTATION III. (6)
Advanced instruction and practicum in the design implementation drawings. Students will produce a comprehensive set of working drawings that apply the principles and techniques commonly used in the landscape architecture profession. Field trips may be required. Lecture, three hours; studio, nine hours per week. Prereq: LA 372 with a minimum grade of “C” and PLS 320.

LA 390 INTERNATIONAL STUDY. (3)
International study program led by faculty in Landscape Architecture. Program locations vary from year to year. Other international study experiences may be accepted as equivalent for graduation requirements with permission of the Department Chair. Three credits. This course may be repeated with additional credits applied as an elective.

LA 395 INDEPENDENT STUDY IN LANDSCAPE ARCHITECTURE. (1-6)
Topical studies in landscape architecture allowing for individual research or design experience coordinated with academic pursuits and faculty mentorship and oversight. May be repeated with additional credits applied as an elective. Prereq: Permission of faculty.

LA 397 SPECIAL TOPICS IN LANDSCAPE ARCHITECTURE. (Subtitle required).
Topical seminars on current issues of significance to landscape architecture. May be repeated to a maximum of six credits under different subtitles.

LA 399 INTERNSHIP IN LANDSCAPE ARCHITECTURE. (3)
This is a self-directed course that provides academic credit for a pre-approved internship relating to the practice of landscape architecture. Such an internship involved working for a minimum of eight weeks (320 hours) in a private or public landscape architecture office or in another professional setting associated with landscape architecture. Other experiences could include conservation work, research projects, or community engagement work. A practice portfolio, daily journal or professional engagement, and a summative presentation are required. This course may be repeated with additional credits applied as an elective. Prereq: LA 223 and completion of a Learning Contract.

LA 425 LANDSCAPE ARCHITECTURE DESIGN STUDIO V. (6)
Studio design course with emphasis on urban design and development, and associated public spaces. Field trips may be required. Lecture, three hours; studio, nine hours per week. Prereq: LA 324 with a minimum grade of “C”.

LA 426 LANDSCAPE ARCHITECTURE DESIGN STUDIO VI. (6)
Application of landscape architecture design process to address issues at a variety of scales with emphases on form generation, community engagement, and communication. Field trips may be required. Lecture, three hours; studio, nine hours per week. Prereq: LA 425 with a minimum grade of “C”.

LA 457 CONTEMPORARY REGIONAL LAND USE PLANNING APPLICATIONS. (3)
This course builds on the systems learned in LA 308 and applies them, through GIS technology, to real world situations. In this course we will deal with rural development, decision making, and comprehensive land use within the context of the physical environment. Lecture, two hours; studio, three hours per week. Prereq: LA 308 or LA 355, or permission of instructor.

LA 462 DIGITAL REPRESENTATION II. (3)
This course focuses on the visualization of essential elements of the landscape (structures, landscape/water, vegetation and atmosphere) in three dimensions utilizing a variety of software packages. Students learn about 3D modeling tools that will prepare them later in the course to experiment with a variety of visualization methods. Students will test the appropriateness of visualization methods in search of a balance between realistic representations and software limitations. Lecture, 2 hours; studio, 2 hours per week. Prereq: LA 262 or consent of the instructor.

LA 490 CAPSTONE AND PROFESSIONAL PRACTICE SEMINAR. (2)
A capstone course in which students will formally document their competency relative to knowledge, skills, and abilities developed in the landscape architecture major. This course will help students prepare to become practicing landscape architects and/or pursue additional formal education. Seminar, three hours per week; field trip(s) required. Prereq: LA 425.

LA 556 CONTEMPORARY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS. (3)
Advance concepts in data base analysis, model development, and ancillary functions in geographic information systems. Lecture, two hours; laboratory, four hours per week. Prereq: LA 355/NRE 355 and permission of instructor. (Same as NRE 556.)

LAS Latin American Studies

LAS 201 INTRODUCTION TO LATIN AMERICA. (3)
An interdisciplinary approach to the people, culture and development of the Latin American republics. Attention will be concentrated on significant aspects of the indigenous peoples, geography, economic processes, gender roles, social structures and politics of Latin America, with special attention paid to value structures and value conflicts. Musical, literary and artistic expression in Latin America will also be introduced. Team taught, with a course coordinator from the LAS faculty.

LAS 361 LATIN AMERICAN LITERATURE IN TRANSLATION (Subtitle required). (3)
This course examines particular authors, periods, regions, cultural events, or movements from Latin America. Special attention will be paid to links between literature and culture, politics and society through reading, discussion, and writing assignments to be conducted in English. Course may be repeated under different titles to a maximum of six credits. (Same as SPA 361.)

LAS 395 INDEPENDENT WORK IN LATIN AMERICAN STUDIES. (3)
Directed study for students wishing to do specialized work on a topic related to the Latin American Studies area. May be repeated to a maximum of six credits. Prereq: LAS 201 and six hours course work from approved LAS courses.

LAS 401 DIRECTED RESEARCH IN LATIN AMERICAN STUDIES. (3)
Research on an interdisciplinary topic approved by the LAS Advisory Committee in the area of Latin American Studies. Prereq: Major in Latin American Studies; senior standing.

LAS 601 INTERDISCIPLINARY SEMINAR IN LATIN AMERICAN, CARIBBEAN, AND LATINO STUDIES. (3)
This course introduces graduate students to Latin American Studies. It is a topical seminar, which engages a series of fundamental issues or problems of importance to scholars of Latin America. Coordinated by a LACLAS affiliated faculty member, it addresses these issues of concern with a scholarly interest from multiple disciplinary perspectives and examines the philosophy and methods of interdisciplinary research. The Interdisciplinary Seminar features guest appearances in the classroom by LACLAS affiliated faculty. Prereq: Graduate status or approval by professor.

LAW Law

LAW 801 CONTRACTS/SALES I. (3)

LAW 802 CONTRACTS/SALES II. (3)
Continuation of Contracts/Sales I - Statute of Frauds, performance, express and implied conditions, repudiation, impossibility. *LAW 804 LEGAL RESEARCH AND WRITING SKILLS. (0-4)
Training in legal research, legal writing, legal reasoning and analysis, legal citation, and oral advocacy. In the legal research portion of the course, students receive training in how to approach basic research tasks and how to use a variety of print and electronic resources for performing research. In the legal writing portion of the course, problem-based writing assignments are used to train students in effective legal writing, legal reasoning and analysis, and legal citation, and to introduce students to oral advocacy. Students are exposed to some of the types of legal documents that are commonly used by lawyers in practice and the different legal audiences for those documents. The four hours of academic credit for this year-long course are given in the spring.

LAW 805 TORTS. (4)
Intentional torts and defenses, negligence, causation, duties of occupants of land and landlords and vendors of chattels, contributory negligence, strict liability, deceit, defamation, malicious prosecution, interference with advantageous relations.

<tbody>
<tr>
<td>LAW 807</td>
<td>PROPERTY</td>
<td>(4)</td>
<td>Basic course in property, possession, gifts, bona fide purchasers of personality. Estates, uses, easements, and rights incident to ownership.</td>
</tr>
<tr>
<td>LAW 809</td>
<td>FEDERAL CRIMINAL LAW.</td>
<td>(2-3)</td>
<td>This course will cover federal white collar criminal issues, including RICO, mail and wire fraud, political corruption, bank secrecy laws, and false statement laws.</td>
</tr>
<tr>
<td>LAW 810</td>
<td>CRIMINAL LAW.</td>
<td>(3)</td>
<td>Jurisdiction; the criminal act; complete and incomplete; criminal intent, actual and constructive; duress and mistake of fact; of law; justification; parties in crime; crimes against the person and crimes against property.</td>
</tr>
<tr>
<td>LAW 811</td>
<td>CRIMINAL PROCEDURE I.</td>
<td>(3)</td>
<td>This course will cover search and seizure, the privilege against self-incrimination, confessions and identification procedures—in general, the constitutional cases arising out of the conflict between police practices and the Bill of Rights.</td>
</tr>
<tr>
<td>LAW 812</td>
<td>RACE, RACISM AND THE CRIMINAL LAW.</td>
<td>(3)</td>
<td>This course examines, through an interdisciplinary approach, the effects race has had and continues to have on the administration of criminal justice in the United States. The course begins by exploring the concept of race from different perspectives: biological, anthropological, sociological; psychological; and legal. The course then examines how these legal constructs shaped the role race played in American culture. The course then delves into how race and the criminal justice system have interacted from historical and contemporary perspectives. Accomplishing this requires probing critical issues encountered at key stages in the process governing the administration of criminal justice. These issues include: the existence of offenses based on racial status (crimes such as rape, capital murder, drug offenses, racial profiling; driving and flying while black); victimology; pre-trial practices (bail); trial practices (misconduct by prosecutors and defense attorneys, urban rage defense, evidentiary issues, such as cross-racial identification and jury deliberations); and post-conviction (incarceration rates, loss of franchise) consequences.</td>
</tr>
<tr>
<td>LAW 813</td>
<td>CAPITAL PUNISHMENT.</td>
<td>(3)</td>
<td>This course provides an examination of history, purpose and constitutionality of capital punishment. The course will also discuss death penalty eligibility offenses and will provide an international perspective.</td>
</tr>
<tr>
<td>LAW 814</td>
<td>CRIMINAL TRIAL PROCESS.</td>
<td>(3)</td>
<td>This course will cover in-depth the criminal trial process from the initial court appearance: grand jury proceedings, pretrial motions, discovery, trial, pleas, sentencing, appeals, double jeopardy and habeas corpus. Students who have taken LAW 813, Criminal Procedure II, may not take this course.</td>
</tr>
<tr>
<td>LAW 815</td>
<td>CIVIL PROCEDURE I.</td>
<td>(3)</td>
<td>Introduction to the civil action; personal and in rem jurisdiction; service or process and notice; subject matter jurisdiction; venue; choice of law; pleading.</td>
</tr>
<tr>
<td>LAW 817</td>
<td>CIVIL PROCEDURE II.</td>
<td>(2-3)</td>
<td>Joinder of claims and parties; discovery; summary judgment; right to jury trial; trials and posttrial motions; res judicata and collateral estoppel.</td>
</tr>
<tr>
<td>LAW 818</td>
<td>REMEDIES</td>
<td>(3)</td>
<td>Nature of damages; nature of specific relief; personal interests; contractual interests; property interests; specific relief and the government.</td>
</tr>
<tr>
<td>LAW 819</td>
<td>THE FEDERAL COURTS AND THE FEDERAL SYSTEM.</td>
<td>(3)</td>
<td>The nature of the federal judicial function and its development, distribution of power among federal and state courts, Supreme Court review of state court decisions, the law applied in federal district courts, federal question and diversity jurisdiction, federal habeas corpus, removal jurisdiction and procedure.</td>
</tr>
<tr>
<td>LAW 820</td>
<td>CONSTITUTIONAL LAW I.</td>
<td>(3)</td>
<td>Judicial interpretation of the Constitution; the federal system; powers of the national government; limitations on the exercise of state powers.</td>
</tr>
<tr>
<td>LAW 821</td>
<td>LITIGATION SKILLS.</td>
<td>(3)</td>
<td>The skills of litigation, including trial advocacy, interviewing and counseling, negotiation and pleading. Lecture, one hour; laboratory, five hours. Prereq or concur: LAW 890.</td>
</tr>
<tr>
<td>LAW 822</td>
<td>CONSTITUTIONAL LAW II.</td>
<td>(3)</td>
<td>Protection of individuals and organizations by the Bill of Rights, the fourteenth amendment, and other provisions of the Constitution.</td>
</tr>
<tr>
<td>LAW 823</td>
<td>CONFLICT OF LAWS.</td>
<td>(3)</td>
<td>Nature of the subject, penal laws, procedure, judgments, domicile, capacity, form, particular subjects, litigation, family law, inheritance, foreign administrators.</td>
</tr>
<tr>
<td>LAW 824</td>
<td>ALTERNATE DISPUTE RESOLUTION.</td>
<td>(3)</td>
<td>Methods of dispute resolution other than trial; statutory and judicial regulation; presenting a claim in different forums of ADR.</td>
</tr>
<tr>
<td>LAW 825</td>
<td>THE NEOTIATING PROCESS.</td>
<td>(2)</td>
<td>Analysis of the elements of bargaining power; exercises in the negotiating process in various contexts; basic techniques of negotiation; ethical norms of the lawyer-investigator. Lecture, one hour; laboratory, two hours per week.</td>
</tr>
<tr>
<td>LAW 826</td>
<td>LEGAL DRAFTING.</td>
<td>(2-3)</td>
<td>This course systematically explores drafting process and technique and provides drafting practice. Students complete drafting-related exercises which become the focus of class discussions. Students also complete major drafting projects. These may consist of a will, a contract, a piece of legislation or other common lawyer work product. Major drafting projects are the focus of class discussions and individual or small group meetings with the instructor.</td>
</tr>
<tr>
<td>LAW 827</td>
<td>FEDERAL APPELLATE ADVOCACY AND PROCEDURE.</td>
<td>(2-3)</td>
<td>This course provides an introduction to appellate practice and procedure in federal court. This course is designed to provide students the basic substantive knowledge and skills needed to advocate effectively in a federal court of appeals. The course begins with a discussion of the function of the court of appeals and the function and the determination of whether to appeal, including the effect of an appeal. The course discusses initiating and perfecting an appeal from state and federal courts, relief pending appeal, and the record on appeal. The course provides an intensive training in appellate skills and includes written and oral assignments. The writing assignments include the preparation of a notice of appeal, a brief, and various motions, including a motion for summary judgment for lack of jurisdiction and a motion for permission to file an appeal. The course also provides a comprehensive study of the Federal Rules of Appellate Procedure, including the standards and procedures for obtaining a writ of certiorari from the Supreme Court, and the local rules of the Court of Appeals for the Sixth Circuit, including electronic filing. The course includes instruction on oral advocacy, mock arguments on the briefs, and the opinions and procedures for obtaining further review of an adverse appellate decision. In addition, federal practitioners and federal appellate judges will be invited to discuss appellate advocacy. The course satisfies the College of Law’s Professional Skills requirement.</td>
</tr>
<tr>
<td>LAW 828</td>
<td>STATUTORY CIVIL RIGHTS.</td>
<td>(3)</td>
<td>This is a survey course designed to cover the entire field of federal antidiscrimination law. Topics to be covered may include employment discrimination (primarily focusing on race, sex, age, and disability issues and possibly affirmative action); housing discrimination (primarily focusing on race, disability, and family issues); other disability discrimination issues under the Americans with Disabilities Act; discrimination in public accommodations and government programs; voting rights litigation issues involving proof (e.g., how cases based on direct evidence of intent, circumstantial evidence of intent, and disparate impact differ from one another); special defenses, and remedies; and a brief survey of the more important questions that arise in Section 1983 litigation. Prereq: LAW 822.</td>
</tr>
<tr>
<td>LAW 829</td>
<td>STATE CONSTITUTIONAL LAW.</td>
<td>(3)</td>
<td>This course provides a comprehensive overview of the law of state constitutions. Course topics include the framing of state constitutions; state constitutional rights; state governmental powers; the structures of state government; and state constitutional change, including theories of popular constitutionalism and direct democracy. Each of these topics will be addressed in two ways: (1) through comparison of the treatment of the topics in different state constitutions and the federal Constitution; and (2) through focused experimentation of the topics as they are presented in the Kentucky Constitution and interpreted in Kentucky case law. Prereq: LAW 822 – Constitutional Law II.</td>
</tr>
<tr>
<td>LAW 830</td>
<td>HEALTH LAW I.</td>
<td>(3)</td>
<td>This course examines the regulation of health care access, cost and quality. It will cover public and private market rules controlling access to health care, cost containment rules, and regulations regarding the quality of health care.</td>
</tr>
<tr>
<td>LAW 831</td>
<td>BIOETHICAL ISSUES IN THE LAW.</td>
<td>(2-3)</td>
<td>This course will cover topics such as legal reasoning in bioethical situations, determination of death, issues in human reproduction, organ transplantation, genetic testing, clinical research with human subjects, and end-of-life decision-making. This second survey course in the health law area will provide students who take this course and Healthcare Organizations and Finance (LAW 830) with a broad understanding of this increasingly important area of the law. Neither class is a prerequisite for the other class. They may be taken concurrently or in any order chosen by the student. Students must take either this course or LAW 830 in order to enroll in the seminar entitled Healthcare Law and Policy Seminar.</td>
</tr>
<tr>
<td>LAW 832</td>
<td>MEDICAL LIABILITY.</td>
<td>(3)</td>
<td>This course examines the liability issues that arise from the provision of medical care. The course studies the physician/patient relationship, when it begins and how it can be terminated. It examines the extent of the duties owed by providers to patients, including requirements relating to confidentiality, informed consent and records disclosure. The course also provides a detailed treatment of the common law of provider liability, focusing on medical malpractice. The course also examines the question of legal education of medical liability.</td>

</table>
| LAW 833    | CIVIL PRETRIAL PRACTICE.                                                 | (2-3)        | Over 95% of the cases filed in courts today settle or are disposed of by motion. To be prepared properly for the practice of law, students aspiring to be civil litigators will need instruction in pretrial matters. This course is designed to provide the student with a working knowledge of both pretrial advocacy theory and fundamental pretrial skills involved in civil litigation. Students will receive instruction on all aspects of civil pretrial practice, primarily in federal court, including: case evaluation, interviewing, discovery, evaluation of evidence, gathering, depositions, and motion practice. The course will typically be based upon mock federal civil case files for which students will be divided into plaintiff and defendant counsel groups. In addition to discussion of pretrial methods, rules and procedures, the students will actually prepare the mock case by evaluating the case, interviewing witnesses, fact finding, and participating in both written and oral discovery as well as motion practice and pretrial conferences and/or mediation. By actively practicing the technique and theory learned, the students will be involved in problem solving, legal analysis,
LAW 835 PROFESSIONAL RESPONSIBILITY.  (2-3)
An examination of the varying roles played by lawyers in society and the conflicting pressures created by these roles. Such examination is paid to the Code of Professional Responsibility as a guide and control in the lawyer-client relationship. Also considered at length is the role of law in society and the place of the legal profession in society. Guest speakers are used to bring into focus employment options for lawyers and the viewpoints of varying types of practicing lawyers to the pervasive problems of the legal profession.

LAW 836 LAW AND ECONOMICS.  (2)
This course applies neoclassic economics concepts to the law. If offers economic explanations of legal rules (for example, explaining how legal rules tend to move society toward or away from economic efficiency). The course also explores normative issues, such as whether the pursuit of economic efficiency is morally attractive. The course looks at the following areas of the law: property, contracts, torts, family law, criminal law, employment law, corporate law, and securities law.

LAW 838 LAW AND RELIGION.  (3)
The relationship of law to religion with emphasis on the establishment and free exercise clauses of the First Amendment. Prereq: LAW 822.

LAW 839 WOMEN AND THE LAW.  (2-3)
Constitutional aspects of sex discrimination, employment discrimination. A criminal law unit covering women as victims and as offenders.

LAW 840 SUPREME COURT DECISION MAKING.  (2-3)
This course will focus on the mechanics of judicial decision making and opinion writing. Each week, students will read the lower court opinion and merits and selected amicus briefs of selected cases currently pending before the U.S. Supreme Court. The class will focus on these cases and deliberate the merits of each side's arguments, much like the Supreme Court does during its conferences. We will also explore theories of judicial decision making, interpretation and policy. At the end of each class, we will "vote" as to how we think the decision should come out. Students will be expected to write majority and dissenting opinions in one of the cases we discuss, which must include substantial original thought and research. The grade will be based primarily on these judicial opinions. Prereq: LAW 822 – Constitutional Law II.

LAW 842 SPORTS LAW.  (3)
Surveys regulatory and contractual aspects of this multi-billion dollar industry. Includes issues related to intercollegiate athletics; professional recruitment and contracting; labor and anti-trust issues; liability issues and other related topics.

LAW 845 JURISPRUDENCE.  (3)
This course presents a survey of the various schools of legal philosophical thought, with an emphasis on exploring how these intellectual "value systems" necessarily inform judges' decisions, and how they might therefore influence one's choice of legal arguments in a given case. The course will include readings from formalism, legal positivism, process theory, legal realism, law and economics, critical legal studies, feminist legal theory, and critical race theory, among others.

LAW 850 LEGAL ACCOUNTING.  (2-3)
This course is designed to introduce students to general bookkeeping and accounting principles. Class discussion will concentrate on the relevance of accounting judgments to legal issues rather than focusing on technical problems. Students will examine income statements, balance sheets, and other accounting documents. Emphasis will be placed on an understanding of accepted accounting principles (GAAP) and the abuses of GAAP. Students with undergraduate financial accounting can take this course only with permission of the professor.

LAW 851 BUSINESS ASSOCIATIONS.  (4)
Legal introduction to business organization; emphasis on nature and structure under modern American business corporation law. Areas: partnership planning (formation, property rights, dissolution and liquidation rights); steps for corporate organizing (including legal consequences of defective incorporation); nature of corporate entity concept; corporate control and management (including problems of close corporation); fiduciary duties of directors and controlling shareholders under state law; nature and characteristics of shareholders’ derivative suit. Prereq: Completion of first year of law study generally is expected.

LAW 853 CORPORATION FINANCE LAW.  (3)
A study of selected problems in advanced corporation law, including corporate promotion and capitalization; financial policy; control problems of the corporation; capital structure; quantitative capital structure; capital structure and the firm's market value; the flow of corporate funds; capital structure and growth; capital structure, taxes and the capital structure. Prereq: LAW 852; enrollment limited to 15 students.

LAW 855 BUSINESS PLANNING.  (3)
This course involves the planning of business transactions and combines the applicable corporate, tax, and securities considerations of such transactions in a single course. Emphasis will be on some of the more important types of corporate transactions, such as the organization of a private corporation, public corporation, Joint stock company, as a trust, partnership, or other form of business organization; formation of a business entity and the machinery of corporate organization; the corporation's contractual relations with its corporation; the corporation's business transactions, including the acquisition of other businesses and joint ventures; the corporation's financial structure, including capitalization, debts and capital structure; the corporation as a tax entity, taxation of corporate income and dividends; the corporation's regulatory aspects, including the relationship of bank holding companies and stock holding companies to the business corporation; internal corporation management, directors and officers; and the relationship of government to the corporation and its activities. Prereq: LAW 851; enrollment limited to 15 students.

LAW 856 ESTATE AND GIFT TAX.  (2-3)
The primary focus of this course is the federal taxation of wealth transfers, whether those transfers occur during lifetime or after death. Also examined will be the goal of balancing the minimization of clients’ transfer tax obligations with the other non-tax goals clients might have, as well as the policy goals behind imposing a wealth transfer tax, and the statutory and regulatory strategies used by the government to respond to impermissible avoidance techniques.

LAW 857 ENERGY AND MINERAL LAW AND POLICY.  (3)
Energy and Mineral Law and Policy will provide an introduction to energy and mineral law, regulation and policy in the United States. It will cover the regulatory environment, state and federal, for natural gas, electricity, coal, and nuclear power. It will explore the generation, distribution and regulation of electricity, coal, oil and gas, and renewable energy sources. Regulation of utilities will also be covered.

LAW 858 NONPROFIT ORGANIZATIONS.  (2-3)
This course introduces students to the laws and policies governing the formation and dissolution or conversion of nonprofit organizations, including charities, foundations, associations, and clubs. The class will cover the creation and governance of nonprofit organizations as well as federal tax law relating to charities and other nonprofit organizations. The class will include both lectures and practical exercises. Prereq: LAW 851 (Business Associations).

LAW 860 TAXATION I.  (3-4)
Problems in federal and state income taxation.

LAW 861 PARTNERSHIP TAX.  (2)
Federal income taxation of transactions between partners and their partnership and shareholders and their corporation; organization of partnerships and corporations; taxation of distributions of operating profits, liquidations, and sales of interests. Prereq: Taxation I (LAW 860).

LAW 863 TAXATION OF BUSINESS ENTERPRISES I.  (3)
Advanced problems of federal income taxation of corporations and partnerships; mergers and reorganizations; recapitalizations; affiliated corporations; consolidated returns. Prereq: Taxation I (LAW 860).

LAW 864 REAL ESTATE TRANSACTIONS.  (3)
This course covers numerous issues related to real estate conveying, including contractual issues, title assurance, and financing the transactions. Prereq: Property.

LAW 865 ESTATE AND GIFT TAX.  (3)
The primary focus of this course is the federal taxation of wealth transfers, whether those transfers occur during lifetime or after death. Also examined will be the goal of balancing the minimization of clients’ transfer tax obligations with the other non-tax goals clients might have, as well as the policy goals behind imposing a wealth transfer tax, and the statutory and regulatory strategies used by the government to respond to impermissible avoidance techniques.

LAW 866 ADVANCED ESTATE PLANNING.  (2-3)
This is a two-hour, problem-oriented, skills course. Problems will be distributed to the class involving detailed factual situations, e.g., owners of a small, closely held business; a middle income family with three minor children and a fiancé seeking a prenuptial agreement. Students will be expected to draft appropriate wills, trusts, and other legal documents for their clients. Role playing will be used to better simulate realistic situations. Students will learn some of the more sophisticated estate planning techniques, e.g., revocable trust agreements; trusts utilizing unified credit exemptions of both spouses; charitable remainder trusts; prenuptial agreements; post-nuptial agreements; planning for qualified pension plans; etc. Emphasis will be placed on teaching interviewing skills, communicating with clients, ethical considerations, financial planning and drafting skills. Enrollment is limited to a maximum of 16 students. Prerequisites: Estate and Gift Taxation and Planning (LAW 865) and Trusts and Estates (LAW 876).

LAW 871 ENERGY AND MINERAL LAW AND POLICY.  (3)
Energy and Mineral Law and Policy will provide an introduction to energy and mineral law, regulation and policy in the United States. It will cover the regulatory environment, state and federal, for natural gas, electricity, coal, and nuclear power. It will explore the generation, distribution and regulation of electricity, coal, oil and gas, and renewable energy sources. Regulation of utilities will also be covered.

LAW 872 LAND USE PLANNING.  (2-3)
A comprehensive survey of the basic legal devices to control the use of land, theories of land use planning, nuisance, private agreements, zoning and zoning procedure, the role of the federal government in land planning, exercise of eminent domain, and selected Kentucky problems, such as rural zoning and proposed New Towns for Appalachia.

LAW 874 BANKING LAW.  (2)
History of banking; overview of agencies which regulate bank activities; formation and regulation of bank holding companies; bank mergers and acquisitions; branch banking; antitrust considerations; trust operations conducted by banks; impact of securities legislation on bank loans and bank financing; the FDIC and its impact on a failing bank.

LAW 875 SECURITIES REGULATION.  (3)
The law governing the issuance, distribution and trading of securities under the Securities Act of 1933 and the Securities Exchange Act of 1934; the obligation to register securities; public offerings by issuers; secondary distributions; and registration requirements growing out of mergers, definition of a “security” and the exemptions from registration requirements; insider trading prohibitions; antifraud provisions in tender offers, self tenders, proxy solicitations and the purchase and sale of securities.

LAW 876 TRUSTS AND ESTATES.  (4)
An elective course for second-year law students. Examination of rules governing intestate distribution of property; formal requirements governing execution, alteration and revocation of wills; requisite elements of express trusts and requirements for their creation; special rules relating to charitable trusts and spendthrift trusts; rules concerning construction of wills and trusts and general rules governing administration of decedents' estates and trusts.

LAW 881 PAYMENT SYSTEMS.  (2-3)
This course focuses on the basics of payment transactions using check and other negotiable instruments. In the longer version of this course, coverage will also include the regulatory structure governing modern electronic payment systems. Prereq: Basic Uniform Commercial Code.

KEY:  # = new course  * = course changed  † = course dropped  ¶ = course purged
Course Descriptions

LAW 882 SECURED TRANSACTIONS. (3)
This course focuses on secured credit transactions and will include an examination of contemporary bank lending practices.

LAW 885 COMMERCIAL DEBTOR-CREDITOR RELATIONS. (2-3)
Minimizing risk of loss through bankruptcy by business creditors and debtors; Uniform Commercial Code versions of the federal Bankruptcy Act; nonbankruptcy creditors’ and debtors’ remedies in commercial context, including assignments and arrangements under state law; commercial bankruptcy; rehabilitation under Bankruptcy Act.

LAW 887 INSURANCE. (2-3)
Nature of contract, insurable interest, making the contract, concealment, representations, warranties, implied conditions of forfeiture, waiver and stoppage, rights under the contract, and construction of the policy.

LAW 890 EVIDENCE. (4)
Rules of admissibility, real, circumstantial, testimonial and documentary evidence, witnesses, hearsay rule and its exceptions, procedure of admissibility, law and fact, judge and jury, burden of proof of presumption, judicial notice, and parol evidence rule.

LAW 894 ANIMAL RIGHTS. (2)
This course provides an introduction to issues and laws pertaining to the rights of animals, including: the different statutory and non-statutory definitions of the term “animal,” their evolution, and the significance of these changes; the general and specific legal status of animals is considered; the history of the legal status of two or other types of property that belong to the tangible sentient personal property category (slaves and minor unemancipated children), and how these legal statuses evolved, and the interaction with the property owner’s right to decide ownership of personal property. The course will then examine specific contemporary “rights” of animals with respect to freedom from abuse, neglect and cruelty, in situations involving companion/pet animals, sporting (including fighting), racing, hunting, and entertainment.

LAW 895 EQUINE LAW. (2-3)
This course is directed at students with an interest in developing an in-depth knowledge of current issues in equine law. Equine law is the amalgamation of various areas of the law employed specifically in the advancement of the equine industry. The industry is founded on a tradition of handshake deals (which still take place at the highest level) but is increasingly sophisticated. This course will take a multi-disciplinary approach and investigate current topics, including: accounting, insurance, equine fraud, equine contract law, equine liability, fraudulent representations, and equine contractual remedies.

LAW 896 RESEARCH PROBLEMS. (2)
This is the law school’s independent research course. Students must have the approval of a sponsoring professor and the Associate Dean for Academic Affairs. Forms are available on the law school’s web site or from the Dean’s Office. Students must present a completed prospectus about their research and a signed approval form before they will be allowed to sign up for the course. The Associate Dean will then approve proposals submitted after the first day of class. A paper 25 pages or more in length, exclusive of footnotes, is required. This course may not be used to satisfy the Upperclass Writing Requirement.

LAW 898 ENVIRONMENTAL LAW. (3)
The role of the legal system in regulating the interrelated subsystems within the physical environment, including water and air pollution, solid waste disposal, and strip mining. Emphasis will be on the development of the legal systems in the context of constitutional limitations on the public’s power to implement planning proposals; relationships between federal, state and local governments; structures of agencies regulating environmental quality; standards for administrative discretion; the openness of regulatory proposals; proposals for new or revised actions; relationships among and between the constituent parties in the environmental justice system. Course topics will include such topics as the constitutional origins of environmental law, the evolution of environmental law, the growth and development of environmental law, and the current status of environmental law.

LAW 899 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 900 LAW SPECIAL COURSE. (2 or 3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. A particular course may be offered no more than twice under the LAW 900 number.

LAW 901 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 902 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 903 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 904 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 905 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 906 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 907 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 908 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 909 SPECIAL TOPICS IN LAW. (2-3)
Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 910 LAW. (3)
History, organization, and structure of American labor unions; obligations and prerogatives of employers; questions of representation; privileges and obligations of unions; collective bargaining and dispute settlement.

LAW 911 EDUCATION LAW. (3)
This course provides a comprehensive overview of the law as it affects the American primary and secondary education system. Course topics include education as an individual right and a state duty; campus safety; student and teacher rights relating to expression, religion, and privacy; educational policy development; copyright issues; education of students with disabilities; educational funding and accountability; and other topics as they timely emerge in the ongoing public debates over education policy and law. Students planning to take the Education Law Seminar are strongly recommended to take this course first. Recommended: Constitutional Law II (LAW 822).

LAW 912 EMPLOYMENT LAW. (3)
This course surveys and examines that multitude of important legal doctrines, statutes and rules that encompass those rights and responsibilities of employers and workers which are not controlled by collectively bargained agreements. The structures for administering the more important areas of such regulation are also studied. The subject matter of this course affects most dimensions of the manner in which over three quarters of our Gross Domestic Income is distributed. Course coverage includes: the law of individual employment contracts, special employment relations such as civil service, the employer’s rights relating to various forms of work products, the employer’s responsibility for job health and safety, protection of the worker’s property, worker responsibility for wrong-doing, wage-hour laws, vacation benefits, bonuses, retirement benefits, health insurance benefits, and unemployment compensation.

LAW 913 ADVANCED LEGAL RESEARCH. (2)
This two-credit course is designed to assist third-year law students improve their legal research skills by introducing them to a number of research tools not covered in first-year legal research instruction. Besides exposure to legal research material, students will apply research strategies to in-class and out-of-class assignments. Topics covered include: review of basics; secondary authority; international, foreign and transnational law; statutory and legislative history research; administrative law; tax research; securities law; environmental and criminal law; banking and labor law; family and employment law; and A.P.R. materials. These topics will be examined using traditional legal research methodology, as well as CD-ROM, INTERNET and on-line databases. Prereq: Open only to third-year students.

LAW 914 PRODUCTS LIABILITY. (2-3)
This course will focus on the law of products liability. It will cover all the causes of action for products liability, negligence, strict liability, and warranty, with detailed treatment of some or all of the following issues: design defects, failure to warn, hybrid transactions, federal preemption, comparative fault and assumption of risk, negligent marketing, causation, punitive damages, toxic tort and class action litigation.

LAW 915 FAMILY LAW. (2-3)
Contracts to marry; the marriage status; annulment, divorce and separation; parent and child; infants and incompetent persons.

LAW 916 CHILDREN AND THE LAW. (2-3)
When offered for two credit hours: allocation of rights between the state and parents, management/control of minor’s property, child protective services (abuse, dependency, and neglect) status offenses, and juvenile delinquency. When offered for three credit hours: allocation of rights between the state and parents, management/control of minor’s property, child protective services (abuse, dependency, and neglect), status offenses, termination of parental rights, foster care, and adoption. For offered for three credit hours: allocation of rights between the state and parents, management/control of minor’s property, child protective services (abuse, dependency, and neglect), status offenses, termination of parental rights, foster care, adoption, medical decision-making, education rights, and juvenile justice (transfer hearings, and sanctions).

LAW 917 ECONOMIC AND DIGNITY TORTS. (2-3)
This course is designed to cover in depth some of the important topics of tort law that often are not covered in basic Tort. These topics include economic torts such as tortious interference with contract and economic advantage and the economic loss rule. The major dignitary torts of Defamation and Right to Privacy are also covered.

LAW 918 IMMIGRATION LAW. (2-3)
This course is designed to examine and interpret federal immigration legislation and policy. The course will include such topics as the constitutional origins of immigration legislation, definitions of immigrant and non-immigrant categories, grounds for exclusion and/or deportation, and refugee and asylum law.
LAW 920 ADMINISTRATIVE LAW. (3)
Establishment of administrative tribunals, limits on discretion. Notice and hearing, orders, methods of judicial relief, scope of judicial review.

LAW 921 ELECTION LAW. (3)
This course looks comprehensively at the law governing the political process and democratic self-government. Topics covered include legislative redistricting, campaign financing laws, the regulation of political parties, the Voting Rights Act, and “direct democracy” initiatives (such as binding public referenda). The course also addresses the alternative electoral structures being explored by many U.S. cities, such as proportionate representation, cumulative voting and transferable vote systems. Students interested in law, government and democratic theory are encouraged to enroll.

LAW 923 INTERNATIONAL ENVIRONMENTAL LAW. (2-3)
This course will cover sources and forms of international environmental law developing principles and international responses to global environmental problems.

LAW 924 INTERNATIONAL TRADE LAW. (3)
This is a survey course on the legal regime of the World Trade Organization (“WTO”), which stands at the center of the current international debate about “globalization.” The course will examine, among other things, the legal structure of the WTO, dispute settlement, most favored nation and national treatment principles, trade in services, trade-related aspects of intellectual property rights, and linkages/conflicts between trade regulation and environmental protection, labor standards and other important areas of domestic policy. In addition, we will discuss various “hot topics” in international trade law, including the North-South divide over trade in agricultural products; national restrictions on importation of genetically modified organisms; the availability of patented pharmaceuticals in least developed countries; and “cultural” limits on trade in audiovisual products such as films, videos, and television programming.

LAW 925 INTERNATIONAL TAX. (3)
This course examines the U.S. federal income tax implications of international transactions, including copyrightable subject matter, standards for protection, registration and deposit requirements, the bundle of rights, remedies, standards for infringement, defenses to infringement including fair use, and a variety of other concepts. Intellectual Property is not a prerequisite. Grades will be based on three writing projects assigned during the semester.

LAW 926 INTERNATIONAL BUSINESS TRANSACTIONS COURSE. (3)
This course will cover the basic legal structure regulating international trade. Topics covered include: international sales contracts, international finance, international civil litigation and arbitration (jurisdiction, choice of law, enforcement of foreign judgments and arbitration awards), tariff and non-tariff trade barriers, export licensing, international aspects of intellectual property (patents, trademarks and copyrights), regulation of foreign investment, regional trade organization with emphasis on the EEC and North American Free Trade Area and fundamentals of taxation of international transactions.

LAW 927 LEGISLATION. (3)
This course provides an introduction to legislation and the legislative process, with an emphasis on federal legislation. Among the subjects considered are theories of representation by the legislature, including one-person-one-vote; legal process theory and the roles that judicial review and separation of powers play in that theory; and statutory construction, including the rules and canons of statutory construction and the use of legislative history in interpreting statutes.

LAW 928 EMPLOYEE BENEFITS LAW. (3)
This course provides a broad overview of federal law governing employee benefits. Topics covered include: origins and fundamentals of the pension system, origins of ERISA, taxation of employee benefits, fiduciary rules, and preemption. Students who take this course should have completed a basic tax course.

LAW 929 COPYRIGHT LAW. (3)
This course provides a broad understanding of most aspects of this branch of intellectual property including copyrightable subject matter, standards for protection, registration and enforcement and affirmative defenses against a charge of infringement; remedies; and international prosecution and patenting.

LAW 930 ANTITRUST LAW. (2-3)
The body of law structuring economic organization and activities in a free enterprise national system. Major matters considered in the course are government creation and regulation of the legal monopolies, control of collaborative conduct of competing economic entities, and legal controls over the vertical distribution of control of suppliers, dealers, and customers.

LAW 931 STATE AND LOCAL TAXATION. (2-3)
This course provides an introduction to the fundamentals of state and local taxation. Topics covered include: property taxation, sales taxation, corporate taxation, and constitutional limitations on state and local taxation.

LAW 932 INTERNET LAW. (3)
This is a survey course on the legal regime(s) governing the Internet. In a short period of time, the Internet has assumed a prominent place in the global economy, facilitating hundreds of billions of dollars worth of business-to-business and business-to-consumer transactions annually. At the same time, the Internet has become an important means of person-to-person and intra-organizational communication. This course will focus on many of the important legal questions that have arisen as a consequence of the rapid expansion of Internet use. Topics to be covered will include jurisdiction over, and choice of law in, the electronic marketplace; cybersquatting and protection of domain names; regulation of indecent or pornographic content; protection of personal information online; electronic contracting and electronic signatures; digital piracy and protection of intellectual property on the Internet, including the Napster case and the debate about open-source software; and electronic-payment systems. Wherever possible, we will focus on international and comparative legal perspectives on the problems posed by Internet regulation.

LAW 934 PATENT LAW. (2-3)
The course in patent law covers aspects of patent procurement with particular attention directed to the statutory requirements faced by an applicant including considerations of patent eligibility of the subject matter and its utility, novelty and nonobviousness; the specification and claims including disclosure requirements of the written description, such as enablement and best mode; post-grant procedures of reissue, reexamination, and disclaimer; patent enforcement and affirmative defenses against a charge of infringement; remedies; and international prosecution and patenting.

LAW 935 INTELLECTUAL PROPERTY. (2-3)
Analysis of the various common law unfair competition areas; examination of statutory relief in areas of trademarks, copyright, and misleading advertising; survey and analysis of various portions of Federal Trade Commission Act and Robinson-Patman Act.

LAW 936 INTERNATIONAL PROPERTY TRANSACTIONS. (2 or 3)
This course will cover the basic legal structure regulating international trade. Topics covered include: international sales contracts, international finance, international civil litigation and arbitration (jurisdiction, choice of law, enforcement of foreign judgments and arbitration awards), tariff and non-tariff trade barriers, export licensing, international aspects of intellectual property (patents, trademarks and copyrights), regulation of foreign investment, regional trade organization with emphasis on the EEC and North American Free Trade Area and fundamentals of taxation of international transactions.

LAW 940 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 941 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 942 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 943 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 944 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 945 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 946 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 947 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 948 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 949 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 950 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 951 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 952 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 955 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 956 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 957 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 958 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.

LAW 959 SEMINAR. (2)
Seminar in selected legal problems, as designated by the faculty.
Course Descriptions

LAW 960 TRIAL ADVOCACY BOARD. (1)
In the second year all students who successfully complete the intra-school competition and are asked to come a second time, the Board will require one hour of pass/fail credit at the end of the spring semester of the third year for meaningful participation in the activities of the Board, which includes national inter-school competitions and conducting the second year membership competition. Prereq: LAW 890.

LAW 961 MOOT COURT BOARD. (1-2)
Second year competition for one hour credit. Those selected for the Moot Court Board receive an additional two hours credit in the third year. Offered on a pass/fail basis only. May be repeated to a maximum of three credits.

LAW 962 KENTUCKY LAW JOURNAL. (1-3)
This course, required of all members of the Law Journal staff, offers experience in legal writing, editing, and the process of publication of a scholarly periodical. Offered on a pass/fail basis only.

LAW 963 JOURNAL OF NATURAL RESOURCES AND ENVIRONMENTAL LAW. (3)
The course required of all members of the Journal of Natural Resources and Environmental law, offers experience in legal writing, editing and the process of publication of a scholarly journal. Pass-fail only.

LAW 964 JUDICIAL EXTERNSHIP. (2)
Clerking for trial and appellate judges. May be repeated once with permission of the Dean. Offered on a pass/fail basis.

LAW 965 PROSECUTORIAL EXTERNSHIP. (2)
Supervised handling of criminal cases under the limited practice rule of the Kentucky Supreme Court. Instruction in practice and preparation, as well as trial advocacy. Open to third year students only. May be repeated once with permission of the Dean. Offered on a pass/fail basis.

LAW 966 MOOT COURT NATIONAL TEAM. (2)
Participation on Moot Court National Team. National Team members should sign for this course instead of 961 in their third year.

*LAW 967 PRISON EXTERNSHIP.

LAW 970 U.S. ATTORNEY APPELLATE DIVISION EXTERNSHIP. (2)
The goals of this externship are to develop practical appellate litigation skills, especially appellate briefing and oral argument skills; to provide practical experience in researching legal topics that have an impact on the prison population; and to increase understanding of the appellate process, especially as it relates to federal government litigation, and the rules of the U.S. Court of Appeals for the Sixth Circuit. Students will be supervised by attorneys in the U.S. Attorney’s Office Appellate Division. Students will be open to third year students only. May be repeated with permission of the Dean. Offered on a pass/fail basis.

LAW 971 DEPARTMENT OF PUBLIC ADVOCACY INNOCENCE PROJECT EXTERNSHIP. (2)
Students will work under the supervision of field instructors and mentors on investigating claims of innocence by inmates. The course includes a classroom component. Prereq: Completion of 2nd year of law school.

LAW 972 LEGAL CLINIC. (2-3)
This is a two to three hour practice-oriented course that provides third year law students with a unique opportunity to represent low income elderly individuals on a variety of legal matters. Under the Kentucky Supreme Court’s limited practice rule, and with the supervision of the clinic director, students will represent clients in negotiations with federal and state agencies, in administrative hearings or in court procedures. Students will also interview clients, draft legal documents, file pleadings, and conduct discovery.

LAW 973 CHILDREN’S LAW CENTER EXTERNSHIP. (2)
This externship develops students’ litigation, counseling and research skills under the supervision of the Litigation Director of the Lexington office of the Children’s Law Center, a 20-year-old foundation based in Northern Kentucky. The Center provides direct representation of children involved in high conflict custody cases, to children who are victims of sexual abuse and must be a witness in criminal proceedings, to children with disabilities in educational matters, and children who are homeless or have other dependency issues. Students will assist their supervising attorney on these cases. Students will be expected to work at least 100 hours during the semester, in addition to classroom time discussing substantive law, roundtable discussions and case status conferences. Enrollment is limited to three students. This externship is open only to students who are eligible for admission under the limited practice rule.

LAW 974 PUBLIC DEFENDER EXTERNSHIP. (2)
The goals of this externship course are to develop practical litigation skills; to give practical experience in researching legal topics; and to increase understanding of the criminal litigation process, especially as it relates to how lawyers representing the defendants in that system develop the case, identify a strategy for litigating the case, and implement that strategy. Students will be expected to complete 100 hours of work under the supervision of the Lexington Department of Public Advocacy Directing Attorney, in addition to a classroom component taught at the College of Law. Admission under the limited practice rule is not required but is strongly encouraged; lack of admission will limit the student’s ability to fully participate in externship opportunities. The expectation is that a very significant proportion of student work will be accomplished under the limited practice rule in cases before the Family Court and Juvenile Court, and in District Court misdemeanor cases. Prereq: Evidence (LAW 890).

LAW 975 UK HEALTHCARE EXTERNSHIP. (2)
Students will develop practical interviewing, counseling, strategic legal planning, litigation, and legal skills as interns in the University of Kentucky Healthcare (University Hospital) Risk Management Office, under the supervision of the Risk Management Director. Students will be expected to complete legal research and writing projects, attend legal proceedings and hospital committee meetings, and review clinical investigations. Each student must sign a confidentiality agreement covering, among other things, compliance with all statutory requirements governing patient confidentiality, including HIPAA, and an anticipatory conflict of interest agreement, which will include an agreement that the participant will be bound by SCR 3.130(1.9) and SCR 3.130(1.10) as if the participant were a practicing attorney at the time of the internship. Prereq: Second-semester, second-year status; Evidence (LAW 890); transfer students must have completed Torts (LAW 805). Recommended: Bioethical Issues and the Law (LAW 831), Medical Liability (LAW 852).

LAW 976 KENTUCKY ENERGY AND ENVIRONMENT CABINET EXTERNSHIP. (2)
The goals of this Externship course are to develop an understanding of legal and policy issues arising from energy development and environmental protection in Kentucky; to assess the legal implications of emerging energy strategies, including carbon sequestration from coal gasification; and to increase understanding of the role played by attorneys in the Energy and Environment Cabinet. Prereq: LAW 989 or consent of instructor.

LAW 977 CHILD ADVOCACY TODAY EXTERNSHIP. (2)
Child Advocacy Today (CAT) is operated in partnership with the Equal Access to Justice Foundation and Kentucky Children’s Hospital and is located in General Pediatrics at Kentucky Clinic. CAT Externship students become part of the healthcare team at Kentucky Children’s Hospital in order to assess patients’ legal needs. The students engage in interviews with patients and their families, and identify legal issues that adversely affect the health of the patients. Students will have the opportunity to assist clients, and prepare the matter for referral to outside counsel, where appropriate. Students will conduct legal research, write memos and prepare legal documents under the supervision of staff attorneys. Students will analyze and implement case strategies and prepare work plans for their cases. In addition, because the mission of the medical-legal partnership is to educate healthcare providers to recognize legal issues that are detrimental to their patients’ health, students will prepare a presentation on a topic of their choice to be presented to UK’s pediatrics residents. This course is limited to three students. Prereq: Third-year standing.

LAW 978 ADVANCED LEGAL CLINIC. (2-3)
Students in this advanced clinic course will continue their supervised casework from the previous semester, take on additional and more complex civil legal matters, including cases likely to go to trial, while helping the director supervise the new clinic students. Advanced clinic students will continue to develop their legal skills, improve their leadership and supervisory skills and increase their substantive and practical knowledge. Prereq: LAW 972 – Legal Clinic and consent of instructor.

*LAW 979 LEXINGTON CITY ATTORNEY EXTERNSHIP. (2)
This course provides the extern with an introduction to the practice of in-house counsel for a local government. The Law Department of the Urban County Government acts as counsel for the Mayor, the Urban County Council, and for all of the Urban County Government’s Departments and Divisions. The department drafts all legislation (ordinances and resolutions) and enforces a majority of the Urban County Government’s legislation. The extern will research and analyze written on legal issues that arise in a local government, attend court proceedings and witness meetings, participate in preparation of materials to respond to motions, briefs and appeals, and attend and participate in Urban County Government staff meetings as appropriate. Specific assignments and activities will be determined by supervising attorneys. Enrollment is upon application only; limit is two students per semester.

*LAW 980 FAYETTE COUNTY ATTORNEY EXTERNSHIP.

LAW 981 LONDON LAW: BRITISH LEGAL METHODS/SEMINAR.

LAW 982 LONDON LAW: ENGLISH LEGAL SYSTEM. (1)
This course will provide an introduction to the history and practice of the English legal system. The course will deal with the following topics: court structure, costs and legal aid, the judiciary, criminal procedure, the legal profession, structure of the U.K. Constitution, human rights in the U.K., and the judiciary. This is a graded one hour course that provides third year students.

LAW 983 LONDON LAW: LAW OF THE EUROPEAN UNION. (1)
This course will deal with the following topics: court structure, costs and legal aid, the judiciary, criminal procedure, the legal profession, structure of the U.K. Constitution, human rights in the U.K., and the judiciary. This is a graded one hour course that provides third year students.
LIN 209 THE STRUCTURE AND USE OF ENGLISH. (3)
A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversies. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG pre-major requirement and ENG minor credit. (Same as ENG 209.)

LIN 210 HISTORY OF THE ENGLISH LANGUAGE. (3)
A survey of the historical development of English from its Indo-European origins to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as ENG 210.)

*LIN 211 INTRODUCTION TO THE STUDY OF LANGUAGE. (3)
Designed to give students a broad introduction to the field of linguistics, the scientific study of human language. The first half of the course offers a basic foundation in the study of grammar, introducing the five core components of human grammar: syntax, morphology, phonetics, phonology, and semantics. The second half of the course builds upon this knowledge by surveying a number of subfields of linguistics, including historical linguistics, sociolinguistics, language acquisition, and language and the brain.

LIN 212 INTRODUCTION TO LINGUISTICS II. (3)
This course is the second semester of a two-semester sequence introducing the study of Linguistics, the scientific study of human language as a system. This course focuses on the social aspects of linguistic study. Semantics, pragmatics, conversational interaction, language variation and register, dialectology, language acquisition, and the acquisition of language by children. Prereq: ENG/LIN 211.

LIN 221 INTRODUCTION TO LINGUISTICS I: THEORETICAL FOUNDATIONS AND ANALYSIS. (3)
First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisites: LIN 220 or other foundations of linguistics courses. Prereq: ENG/LIN 211.

LIN 222 INTRODUCTION TO LINGUISTICS II: LANGUAGE IN CONTEXT. (3)
Second of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Builds upon the theoretical knowledge gained in LIN 221. Intense introduction to a number of branches of linguistics including historical linguistics, pragmatics, sociolinguistics, language acquisition, psycholinguistics. May be of use to students in other disciplines. Prereq: LIN 221.

LIN 310 AMERICAN ENGLISH. (3)
The study of the varieties of modern American English: regional, social, and ethnic varieties, gender differences in communication, creoles and pidgins, stylistic variation. History and methods of American dialect study. No prerequisites. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 310.)

LIN 311 APPALACHIAN ENGLISH. (3)
The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this region. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features the speech of Appalachia shares with others. We will examine the history, origins, and development of English in Appalachia and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as ANT 341/APP 311.)
necessary. By the end of the course students will have acquired a host of transferable skills for an increasingly digitally dominated job market. Prereq: LIN 221.

*LIN 512 ANALYSIS OF ENGLISH SYNTAX. (3)
Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: LIN 221 or graduate standing. (Same as ENG 512.)

LIN 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/ENG 513.)

LIN 514 TESL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG EDG 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/ENG 514.)

*LIN 515 PHONOLOGICAL ANALYSIS. (3)
This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as ANT 515.)

*LIN 516 GRAMMATICAL TYPOLOGY. (3)
This course examines the syntactic classification of languages according to their morphological and grammatical characteristics. Work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from non-Western languages. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as ANT 516.)

*LIN 517 SPECIAL TOPICS IN LINGUISTICS (Subtitle required). (3)
The focus will be on intensive study of problems and issues that do not fall under linguistics course headings. These may have an interdisciplinary emphasis, or they may concentrate on some special topics of current research. All topics will be subject to review by the director of the program. May be repeated under different subtitle to a maximum of six credits. Prereq: LIN 221.

LIN 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE. (3)
This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English(s), culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. Fulfills the ENG Early Period requirement. Provides ENG Major Elective Credit and ENG Minor credit. (Same as ENG 518.)

LIN 519 HISTORICAL LINGUISTICS. (3)
This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined on all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world’s languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 221 and LIN 222. (Same as ANT 519.)

LIN 520 SANSKRIT I. (3)
An introduction to the Sanskrit language. Includes a historical survey of the language: detailed study of the devanagari writing system, and of Sanskrit phonology and grammar; a recitation component; and the reading of selected Sanskrit texts. Prereq: Completion of the fourth semester of a foreign language.

LIN 521 SANSKRIT II. (3)
A continuation of LIN 520. Includes intensive study of the relationship of Sanskrit to other early Indic languages (especially Vedic and Pa li); discussion of the Indo-European ancestry of these languages; and the reading of selected texts in these languages. Prereq: LIN 520.

LIN 527 LANGUAGE INVESTIGATIONS (Subtitle required). (3)
This course presents a focused investigation of an individual language or a set of languages (in a language family or other defined grouping, e.g., connected by geopolitical area), examining genetic and typological features of the language(s) from a structural, historical, and/or sociolinguistic perspective. The course may be taken twice for up to six credits under different subtitles. Prereq: LIN 221 and LIN 222, or consent of instructor.

LIN 529 LANGUAGE CONTACT. (3)
This course provides a linguistic investigation of language contact, the interaction of two or more languages in situations of individual or community bilingualism/multilingualism. The full range of linguistic contact phenomena will be illustrated with examples from different languages, both historically and in the present day. We will discuss the outcomes of language contact—language maintenance (borrowing, code-switching, multilingualism), language shift (endangered languages, language death), and the creation of new languages (pidgins, creoles, mixed languages)—in a range of contexts, considering both the social factors in language contact and the effects of contact on the linguistic structure of the languages involved. Prereq: LIN 221 and LIN 222, or consent of instructor.

#LIN 550 LINGUISTIC FIELD METHODS. (3)
This course is an introduction to field methods for grammatical description. Working with a native speaker of an unfamiliar language, students will gain experience in eliciting and analyzing data in descriptive linguistics. We will consider general issues related to fieldwork, including choosing a field site and consultants, software for linguistic archiving and analysis, as well as the psychological, ethical, and practical considerations related to fieldwork. The bulk of the course, however, will focus on practical experience in describing the phonetics, phonology, morphology, and syntax of an unfamiliar language. LIN 540 must be taken concurrently. Prereq: LIN 221 or graduate standing in Linguistics; requires LIN 540 taken concurrently.

#LIN 600 ADVANCED PHONETICS. (3)
This course presents advanced study of linguistic phonetics, building on the material presented in LIN 500 (Linguistic Phonetics). The course will emphasize current questions in phonetic theory and experimental methods. Students will develop skills in using experimental and analytical techniques for conducting research that is relevant to current theoretical questions. This course requires concurrent enrollment in LIN 640 Advanced Laboratory in Linguistics: Phonetics. Prereq: LIN 500 (Linguistic Phonetics) or similar course approved by the Director of Graduate Studies. LIN 640 Advanced Laboratory in Linguistics: Phonetics must be taken concurrently.

LIN 601 RESEARCH METHODS IN LINGUISTICS. (3)
Students pursuing an MA degree in Linguistic Theory & Typology (MALT) must be equipped with a toolbox of suitable methods for gathering, analyzing, and modeling linguistic data. This course introduces a range of research methods which are widely applicable in scientific investigation but whose linguistic relevance we shall emphasize here. The methods are (1) statistical analysis, (2) computational modeling, (3) field work and (4) experimental techniques. Overarching all these methods is the scientific method: the inductive and cumulative process of gathering data and building, testing, and refining hypotheses, and interpreting all results. Some of the questions that students will learn how to answer are: Are my data collection methods sufficiently rigorous? Are the results of my data analysis statistically significant? Does my hypothesis control for variables? Is my hypothesis computationally tractable? Are my methods and their results replicable? The course also introduces students to major primary and secondary resources for linguistic research, including the principal bibliographic and indexing services, leading professional journals, major disciplinary organizations, significant traditional and online collections of linguistic data, etc. These resources will be discussed for each of the disciplinary strengths represented in the MALT program. Prereq: LIN 221 or equivalent.

LIN 605 ADVANCED MORPHOLOGY. (3)
Advanced morphology builds on the groundwork laid in LIN 505 (Linguistic Morphology). The focus shifts from fundamentals of morphology to theoretical morphology. Special emphasis is given to the inferential-realizational approach and centrality of the paradigm. The course will address issues such as the nature of rules in morphology, morphology’s place in the grammar and ‘challenging’ morphology, examples of which include deponency, syncrasis, heterocles, periphrasis and defectiveness. Prereq: LIN/ENG 509 or a similar course approved by the Linguistics Program director or DGS.

#LIN 606 ADVANCED SOCIOLINGUISTICS. (3)
Building upon the solid foundation in the broad principles of sociolinguistic inquiry developed in LIN/ANT/SOC 506, this course explores current theoretical debates in sociolinguistics by introducing a series of alternative frameworks, which may include paradigms like traditional, interpretive, or symbolic sociolinguists or the exploration of sociolinguistic concepts in social theory, and students will be responsible for assessing and critiquing each framework as presented. This course may require LIN 640 taken concurrently. Prereq: LIN/ANT/SOC 506 (Sociolinguistics) or similar course approved by the Director of Graduate Studies; may require LIN 640 taken concurrently.

*LIN 609 ADVANCED SEMANTICS. (3)
This course is an examination of current research in linguistic semantics. The course covers a range of central topics, including the syntax/semantics interface and the nature of semantic compositionality; the semantic analysis of specific linguistic phenomena, such as plural number, generics, valence-changing operations, reflexives and reciprocals, modality, counterfactual conditionals; referential vs cognitive approaches to semantics; and modern approaches to the analysis of core semantic and pragmatic phenomena. Prereq: LIN 509 (Formal Semantics) or similar course approved by the Director of Graduate Studies; may require LIN 640 taken concurrently.

#LIN 610 ADVANCED COMPUTATIONAL/CORPUS LINGUISTICS. (3)
Building on the theoretical, conceptual, and methodological overview of computational and corpus linguistics presented in LIN 510 (Corpus Linguistics) and LIN 511 (Computational Linguistics), this course engages students in advanced applications of computational and corpus linguistic techniques and methods, and closely related work in the study of human language. Topics explored may include one or more of the following: specialized computational methods of inquiry, statistical methods for specific linguistic subfields; frameworks for simulation, modeling, annotation/encoding of linguistic data; processing and analysis of digital multimodal linguistic resources. This course requires concurrent enrollment in LIN 640 Advanced Laboratory in Linguistics: Computational Corpus Linguistics. Prereq: LIN 510 (Corpus Linguistics) or LIN 511 (Computational Linguistics) or similar course approved by the Director of Graduate Studies. LIN 640 Advanced Laboratory in Linguistics: Computational Corpus Linguistics must be taken concurrently.
Course Descriptions

#LIN 611 QUANTITATIVE METHODS IN LINGUISTICS. (3)
An increasingly important method in linguistic research relies on measuring some quantity, and inferring some result based on such findings. This course presents such an approach, outlines the appropriate measures and the easiest, most reliable ways in which such measures can be used to draw inferences. This course requires concurrent enrollment in LIN 640 Advanced Laboratory in Linguistics: Quantitative Methods. Prereq: LIN 601 (Research Methods in Linguistics) or similar course approved by the Director of Graduate Studies; LIN 640 Advanced Laboratory in Linguistics: Quantitative Methods must be taken concurrently.

LIN 612 STRUCTURE AND STYLISTICS OF FRENCH. (3)
A study of the history and structure of French with an emphasis on contemporary features. (Same as ENG/FR 612.)

#LIN 615 ADVANCED PHONOLOGY. (3)
This course provides an introduction to current constraint-based theoretical approaches within phonology, emphasizing Optimality Theoretic approaches. Within this framework students will analyze individual features, sounds and prosodic units, all within world systems put together in class and at home. This course may require LIN 640 taken concurrently. Prereq: LIN 515 (Phonological Analysis) or similar course approved by the Director of Graduate Studies; may require LIN 640 taken concurrently.

LIN 617 ADVANCED TOPICS IN LINGUISTICS. (3)
Advanced investigation into a designated topic in linguistic theory and typology. May be repeated to a maximum of twelve credits under different subtitles. Prereq: A course in a cognate field at the LIN 500 level or equivalent, or by discretion of the DGS.

LIN 619 HISTORICAL SOCIOLINGUISTICS. (3)
This course investigates language variation and change in its socio-historical context, focusing on the effects of such parameters as age, gender, education, social class, and region on the historical development of language through time and space. The effects of socio-historical variables will be analyzed at all levels of language: morphological, syntactic, semantic, and lexical. The notions of "standard language" and "language standardization" will also be addressed from a historical sociolinguistic perspective. Prereq: LIN 221 and LIN 222 or equivalent, or consent of instructor. (LIN 506 and 519 recommended.)

#LIN 622 ADVANCED SYNTAX. (3)
The course builds on the groundwork laid in LIN 512 Analysis of English Syntax in two main ways: (1) by focusing the problems introduced in the first course within a non-Chomskian framework of assumptions found in constraint-based lexicalist grammars; and (2) by going beyond the confines of English to account for syntactic data from other languages. A fundamental shift from Chomskian to constraint-based lexicalist grammar is the rejection of syntactic derivations, or transformations, i.e. the assumption that there are distinct underlying and superficial forms, in which arena transformations/movement play a significant role. Topics covered include: formal grammar as unification grammar, headness, binding theory, aggregation, and the role of the lexicon in determining syntactic structure. This course may require LIN 640 taken concurrently. Prereq: LIN/ENG 512 (Analysis of English Syntax) or similar course approved by the Director of Graduate Studies; may require LIN 640 taken concurrently.

LIN 629 ADVANCED HISTORICAL LINGUISTICS. (3)
This course takes as its starting point the theoretical and conceptual overview of historical linguistics presented in LIN 519 and similar theoretical introductions to historical linguistics. Building on that foundation, we engage in advanced investigations in the study of language history. Topics taught in this course may include one or more of the following: specific focus on historical phonology, morphology, and/or syntax; application of specific theoretical frameworks to the study of historical language change; examination of quantitative and computational approaches to historical linguistic research; analysis of correlations between historical linguistic data and data from other fields (archeology, anthropology, genetics, etc.). Prereq: LIN 519 or consent of instructor.

#LIN 640 ADVANCED LABORATORY IN LINGUISTICS (Subtitle required) (1)
An advanced laboratory course offering students the opportunity for hands-on application of specialized theories and methods at the advanced level of graduate training in linguistic research. The lab environment will generally involve both individual and small group work, development both independent research skills and an ability to engage in collaborative linguistic investigation. May be repeated to a maximum of ten credits. Prereq: LIN 601 or permission of the Director of Graduate Studies; may require concurrent enrollment in an accompanying LIN lecture course.

LIN 695 DIRECTED STUDIES IN LINGUISTICS. (1-3)
This course allows students to undertake study of special topics in linguistics under faculty supervision. May be repeated to a maximum of six credits. Prereq: LIN 601 or permission of the instructor; a previous course at or above the 500 level in the relevant subdiscipline of linguistics is recommended. LIN 695 may not be entirely devoted to content that is regularly taught in another LIN course.

#LIN 700 ADVANCED SEMINAR IN PHONETICS (Subtitle required) (3)
This course is a seminar allowing advanced graduate students to pursue original research in linguistic phonetics. Each student will investigate a specific question or issue in the field phonetics: s/he will assign readings related to that topic and will lead discussions of those readings with other seminar participants. (I will likewise assign some readings and lead discussions of them.) Each student will conduct original research on the specific topic that s/he has chosen; this research will culminate in both a written paper and an in-class presentation of her/his findings, analyses and conclusions. The research may be theoretical, experimental or computational in nature. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 600 (Advanced Phonetics) or similar course approved by Director of Graduate Studies; may require LIN 740 taken concurrently.

LIN 701 RESEARCH SEMINAR IN LINGUISTIC THEORY AND TYPOLOGY. (3)
Students are trained in research and professionalization related to the discipline of linguistics. To that end students will create a 20-30 page research report as a culmination of a set of training milestones that include (1) producing an annotated bibliography, (2) writing an abstract, (3) reflecting on good practice in linguistics research, (4) publicly presenting research, and (5) reflecting on professional aspects of linguistics. Prereq: Second-year standing in the MA program in Linguistic Theory & Typology, LIN 601.

#LIN 705 ADVANCED SEMINAR IN MORPHOLOGY (Subtitle required) (3)
Seminar in special topics in morphological theory; examples of prospective topics include: morpho-phonetics, morphological complexity, morphological interfaces, paradigm-based morphology. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 655 (Advanced Morphology) or similar course approved by the Director of Graduate Studies; may require LIN 740 taken concurrently.

#LIN 706 ADVANCED SEMINAR IN SOCIOLINGUISTICS (Subtitle required) (3)
Advanced seminar in special topics in sociolinguistics; examples of prospective topics include: dialectology, world Englishes, sociophonetics, contact phenomena, historical sociolinguistics, and language and identity. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 666 (Advanced Sociolinguistics) or similar course approved by the Director of Graduate Studies; may require LIN 740 taken concurrently.

#LIN 709 ADVANCED SEMINAR IN SEMANTICS AND PRAGMATICS (Subtitle required) (3)
Advanced seminar in special topics in the semantics and pragmatics of natural languages; examples of prospective topics include: quantification, generic sentences, temporal semantics, converb constructions, impression management, anaphora. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 690 (Advanced Semantics) or similar course approved by the Director of Graduate Studies; may require LIN 740 taken concurrently.

#LIN 710 ADVANCED SEMINAR IN COMPUTATIONAL/CORPUS LINGUISTICS (Subtitle required) (3)
Advanced seminar in special topics in computational and corpus approaches to the study of language; examples of prospective topics include: data visualization, computational simulation and modeling, computational aspects of historical linguistic research; analysis of correlations between syntactic and semantic derivations and the role of the lexicon in determining syntactic structure. This course may require LIN 640 taken concurrently. Prereq: LIN/ENG 512 (Analysis of English Syntax) or similar course approved by the Director of Graduate Studies; may require LIN 640 taken concurrently.

#LIN 712 ADVANCED SEMINAR IN SYNTAX (Subtitle required) (3)
Advanced seminar in special topics in syntax; Examples of prospective topics include ellipsis and anaphora, the dative alternation, comparatives, island constraints, etc. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 666 (Advanced Sociolinguistics) or similar course approved by the Director of Graduate Studies; may require LIN 740 taken concurrently.

#LIN 715 ADVANCED SEMINAR IN PHONOLOGY (Subtitle required) (3)
Advanced seminar in special topics in phonology; examples of prospective topics include: prosodic categories, historical phonology, syllable structure, mergers and neutralization, coarticulation, etc. May be repeated under different subtitles to a maximum of six credits. This course may require LIN 740 taken concurrently. Prereq: LIN 651 (Advanced Phonetics) or similar course approved by the Director of Graduate Studies; may require LIN 740 taken concurrently.

#LIN 719 ADVANCED SEMINAR IN HISTORICAL LINGUISTICS (Subtitle required) (3)
Advanced seminar in special topics in historical linguistics; examples of prospective topics include: historical phonology; grammaticalization; analogical change; the evolution of affixation systems; language contact and language change; quantitative and computational approaches to historical linguistic research; analysis of correlations between historical linguistic data and data from other fields (archeology, anthropology, genetics, etc.). Prereq: LIN 519 or consent of instructor.

#LIN 740 LABORATORY FOR ADVANCED LINGUISTICS SEMINARS. (1)
A laboratory course tied directly to an advanced seminar in linguistics at the 700 level, offering students the opportunity for guided application of the advanced theories and methods focused on in the seminar. The lab will provide an environment for individualized work with tools specific to each student’s research question (within the framework of the seminar), while at the same time encouraging collaborative investigation and shared discovery. May be repeated to a maximum of five credits. Prereq: Concurrent enrollment in the accompanying LIN 700-level advanced seminar course.
LIN 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work towards the degree must be completed.

LIS Library and Information Science

LIS 510 CHILDREN’S LITERATURE AND RELATED MATERIALS. (3)
A survey of children’s literature, traditional and modern. Reading and evaluation of books with multimedia materials with emphasis on the needs and interests of children. Covers media for use by and with children from preschool through grade six.

LIS 514 LITERATURE AND RELATED MEDIA FOR YOUNG ADULTS. (3)
A study of literature and related materials for use with young people in grades 7-12. Emphasis is placed on the special characteristics and needs of young people and the evaluation of materials for this age group. (Same as EDC 504.)

LIS 600 INFORMATION IN SOCIETY. (3)
An introduction to the nature of information (both utilitarian and aesthetic) in contemporary society, and to the role played by libraries and other information organizations in disseminating that information. Emphasis is on developing perspective.

LIS 601 INFORMATION SEEKING. (3)
This course provides an overview of the theory and practices of human information seeking behavior, including both basic models to understand user behavior, and techniques to effectively select, locate, evaluate, and use information to meet diverse information needs and facilitate human-computer interaction. (Same as ICT 601.)

LIS 602 INFORMATION REPRESENTATION AND ACCESS. (3)
This course provides an introduction to principles and practices of information description, organization, access, and retrieval by examining the representation of information through metadata records, indexes, and abstracts, as well as the operations, standards, tools, systems of categorization, bibliographic systems and methods of organizing and retrieving information sources.

LIS 603 MANAGEMENT IN LIBRARY AND INFORMATION SCIENCE. (3)
An introduction to the elements of management and how these are applied to the effective administration of information systems. Focus will be placed on two major roles in a system, the person who is supervised as well as the manager or supervisor. Examination of the functions of planning, organization, staffing and controlling as well as the theories of management and the effective use of these in an information system.

LIS 604 LIBRARY AND BOOK HISTORY. (3)
Development of libraries and books from earliest time to the present with special reference to their relationship to contemporary social, economic, cultural and political trends. Emphasis is given to American libraries and information agencies.

LIS 605 INFORMATION POLICY AND TECHNOLOGY REGULATION. (3)
This course explores the socio-cultural, economic and political issues confronting communication and information professionals and the transformative impact of these issues on information policy development. The rapidly evolving communication and information infrastructure and the global shift to an information society will provide the context for the course. Within this context, emphasis will be placed on issues of access, which includes, universal service, intellectual freedom, intellectual property rights, privacy, security, advocacy, equity, and the role of library and information professionals and organizations in policy formulation.

LIS 608 METHODS OF RESEARCH IN LIBRARY AND INFORMATION SCIENCE. (3)
Basic tools, techniques and methods of research. Consideration is given to the role and purpose of research in library and information science and its relationship to research in other disciplines. Includes critical evaluation of current research in library and information science and the development of a research proposal. Prereq: LIS 601, LIS 602 or consent of instructor.

LIS 609 CURRENT PROBLEMS IN LIBRARY AND INFORMATION SCIENCE. (3)
A seminar which examines current philosophical and managerial issues in library and information science. Focus is on the analysis, origins, evaluation and current status of these issues. Prereq: Eighteen hours of graduate study in LIS or consent of instructor.

LIS 610 LIBRARY MATERIALS AND LITERATURE FOR CHILDREN. (3)
A survey and historical study of library materials and literature for children up to grade 6. Students will engage in extensive reading, and in the evaluation of books and some multimedia materials. Basic programming will be explored.

LIS 611 CRITICAL ANALYSIS OF CHILDREN’S LITERATURE. (3)
Advanced study of book evaluation, literary criticism, children’s book publishing, awards, and current trends in the field. Individual projects require extensive critical reading. Prereq: LIS 610 or LIS 614 or consent of instructor.

LIS 612 YOUTH LITERATURE FOR A DIVERSE SOCIETY. (3)
A survey and historical study of culturally diverse literature for youth of all ages. Students will engage in extensive reading, evaluation, and discussion of literature and the issues related to developing an understanding of various cultures and special populations within the United States. Prereq: LIS 610. Library Materials and Literature for Children (or comparable).

LIS 613 INFORMATION RESOURCES AND SERVICES FOR CHILDREN. (3)
A study of effective programming for children and young adults. Emphasis is placed on oral presentations. Literature-based activities and community outreach.

LIS 614 LIBRARY MATERIALS AND LITERATURE FOR YOUNG ADULTS. (3)
A study of literature and related materials for use with young people in grades 7-12. Emphasis is placed on the special characteristics and needs of young adults and the evaluation of materials for this age group.

LIS 615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS. (3)
This course provides an introduction to the theory and practice of information services and the role of information professionals in connecting people to the information they need, including information needs assessment, direct information provision, information literacy instruction, and intermediation for all stages of the information search process. Emphasis is placed on the roles played by information professionals to help diverse users define and negotiate their information needs, navigate user-system interfaces, formulate effective search strategies for information retrieval, and evaluate and select information. Attention is also given to the skills necessary to plan for, implement, and evaluate the delivery of information services in a wide variety of organizational contexts. The ethical foundations of information services are also considered. Prereq: LIS 601.

LIS 620 SOCIAL SCIENCE INFORMATION. (3)
Examination of important issues and developments relating to creation, packaging, dissemination and use of social science information by various segments of society. Emphasis on understanding information needs of those who use social science information in information systems, source and services available to satisfy those needs. Prereq: LIS 601 or consent of instructor.

LIS 623 ADVANCED REFERENCE SERVICES. (3)
This course provides advanced study of the theory and practice of information services, which are defined broadly as the activities in which information professionals engage to connect people to the information they need, including information needs assessment, direct information provision, information literacy instruction, and intermediation for all stages of the information search process. Emphasis is placed on the structure of information, information seeking, and information sources within disciplines. Students will be prepared to help advanced users define and negotiate their information needs, navigate user-system interfaces, formulate effective search strategies for information retrieval, and evaluate and select information. Ethical issues in information services are also considered. Prereq: LIS 601, LIS 622.

LIS 624 INFORMATION IN SCIENCE AND TECHNOLOGY. (3)
The content and structure of bibliographic and other information resources in science and technology. A consideration of formal and informal communication in science and technology, with emphasis on sources and services in agriculture, astronomy, biology, chemistry, mathematics, natural resources, zoology, and other closely related subjects. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 625 INFORMATION LITERACY INSTRUCTION. (3)
This course examines the theory and practice of instruction provided in information organizations to develop clients’ abilities to effectively locate, evaluate, select and use information. Attention is given to the nature of information literacy, systematic instructional design, needs assessment, methods of instruction, teaching and learning preferences, and the evaluation of learning and programs. This course is interdisciplinary and draws on theory from Library & Information Science, Instructional Communication, Education and Cognitive Psychology. We will examine and critique various instructional models, plan for and deliver instruction in both in-person and computer-aided venues, learn various methods for assessing teaching and learning, and discuss the managerial and political aspects of instructional delivery in various information agency contexts, with a special emphasis on those in academic settings. Prereq: LIS 601 or consent of instructor.

LIS 626 ELECTRONIC INFORMATION RESOURCES IN THE HEALTH SCIENCES. (3)
Survey of electronic information resources in the health sciences, including databases and Web sources. Discussion of relevant controlled vocabularies and their use in formulating and executing search strategies. The course also includes an evidence based health care component whereby students learn to analyze critically the biomedical literature and determine reference and research relevance. (Same as ICT 626.)

LIS 627 CONSUMER HEALTH INFORMATION RESOURCES. (3)
History and development of consumer health information resources; role of professional and governmental agencies in provision of consumer health information; policy issues related to provision of consumer health information. Consumer health professional literature, user information needs, user resources, and information services. Identification, selection, utilization, and evaluation of consumer health information for special populations within specialized educational and healthcare settings. Trends and issues in consumer health informatics. (Same as ICT 627.)

*LIS 629 INTRODUCTION TO MEDICAL INFORMATICS. (3)
This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical Informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including
LIS 630 INFORMATION RETRIEVAL. (3)
This course reviews important information retrieval (IR) theories and models; explores a brief history of IR research; and examines various IR applications. Students will get familiar with IR foundations such as document indexing or query expansion/optimization strategies, as well as understand overall system architectures for selected IR applications. Students will explore how to analyze and compare IR systems, how to select the best IR systems for particular tasks and how to design a prototype of an efficient IR system. Prereq or concurr: LIS 636 or LIS 637 or LIS 635 (Same as ICT 630.).

LIS 634 INFORMATION ARCHITECTURE. (3)
The course introduces the concepts and practices of information architectures (IA) for a Web site within the context of the organization it serves. It aims to acquaint students with principles and process of information architecture for user-centered design of websites. It also provides students the opportunity to develop practical skills related to the design of information organization and navigation systems. The course prepares students for the companion technical course of "content management systems" where they will apply the theories and techniques studied in this course to the implementation of a fully functional website.

LIS 636 FOUNDATIONS OF INFORMATION TECHNOLOGY. (3)
A study of the computing fundamentals necessary for the understanding and use of information technology. Focus is on examining computer systems in concept and practice, which is essential to information professionals. Topics include how computers represent, process, store and retrieve information; how operating systems control these processes, interpret commands, present the user interface, and create file systems; how databases are designed and created; and how general understanding of programming processes and productivity software skills is important in a variety of professional contexts. Productivity applications include the Office suite, Internet applications and web publishing, and database management systems.

LIS 637 INFORMATION TECHNOLOGY. (3)
Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer services, hardware evaluation and selection, and system security. Prereq: Consent of instructor. (Same as CJT 637.)

LIS 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)
A course examining the structure, development and evolution of the Internet; network protocols and client/server architecture issues; Web page design, authoring, and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTML and scripting languages; and Internet related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as CJT 638.)

LIS 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to: the healthcare system, public health information needs, information resources and the health sciences, controlled medical terminologies and classification systems, search and retrieval of information, issues in the management of collections and access to health libraries. (Same as CJT/ICT 640.)

LIS 641 LAW LIBRARIANSHIP. (3)
A study of the materials of legal research and reference work. Emphasis is placed on the methods of effective research and the actual use of legal materials in the solution of practical reference problems. The selection, cataloging, classification, and storage of materials in a law collection are considered. The specialized requirements of law librarianship and law library administration are treated. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 642 ORAL HISTORY. (3)
This course is an introduction to oral history as a research methodology and its role in library and archives collections. It is designed for persons intending to conduct oral history interviews to expand library and archival collections. It is also for persons responsible for the archival management of oral history collections. The course examines how oral history projects are initiated, how they are administered, how interviews are conducted, and how oral history interviews are preserved and made available to researchers. The course will also explore the use of technology in making oral histories available to researchers on the Web. Students will gain practical experience in oral history interviewing and related aspects of oral history, such as transcribing, editing, and publishing oral histories. Taught essentially same as EPE 669.

LIS 643 ARCHIVES AND MANUSCRIPTS MANAGEMENT. (3)
This course is designed to cover the management, care, and servicing of manuscript and archival material. Among topics covered will be criteria for building an archival manuscript collection in a repository and to the description and interpretation of its holdings in guides and catalogs for the use of researchers. Prereq: LIS 602 or consent of instructor.

LIS 644 ADMINISTRATION OF SCHOOL LIBRARY MEDIA CENTERS. (3)
Examines the philosophy behind current national and state guidelines for library media programs and addresses the roles of library media professionals in program and resource management in the K-12 school setting. Students will work on their individual exit portfolios and plan a practicum experience to meet requirements for performance-based certification by the Kentucky Department of Education.

LIS 645 PUBLIC LIBRARIES. (3)
Examines historical development of the public library and its roles in society. Topics considered include the environment of public libraries, organization and management; information needs of client groups; information resources and services provided to clients; and trends and developments in public libraries. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 646 ACADEMIC LIBRARIES. (3)
Examines historical development of academic libraries and their roles in higher education. Topics considered include the environment of academic libraries, organization and management needs of client groups, information resources and services provided clients; and issues, trends, and developments in academic libraries. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 647 CURRENT TRENDS IN SCHOOL MEDIA CENTERS. (3)
An intensive study of trends in school media centers with emphasis on research, technology, and the role of the school media specialist in the school curriculum.

LIS 648 TECHNOLOGY IN THE SCHOOL MEDIA CENTER. (3)
Consideration of new and emerging educational technologies that could be integrated into school curriculum. Includes hands-on experiences as well as critical reading and discussion on current issues relating to educational technology and the role of the media specialist in technology integration.

LIS 650 TECHNICAL PROCESSING SYSTEMS. (3)
A survey of manual and computer-based technical processing systems in libraries. Consideration given to circulation, acquisitions, cataloging and serial control systems. Trends and developments in technical processing include cataloging, file backups, records management, and technical processing procedures and activities are examined. Prereq: LIS 602 or consent of instructor.

LIS 653 PRESERVATION MANAGEMENT. (3)
This course reviews important information retrieval (IR) theories and models; explores a brief history of IR research; and examines various IR applications. Students will get familiar with IR foundations such as document indexing or query expansion/optimization strategies, as well as understand overall system architectures for selected IR applications. Students will explore how to analyze and compare IR systems, how to select the best IR systems for particular tasks and how to design a prototype of an efficient IR system. Prereq or concurr: LIS 636 or LIS 637 or LIS 635 (Same as ICT 630.)

LIS 655 ORGANIZATION OF KNOWLEDGE I. (3)
Theories and practice of bibliographic description and subject analysis. Covers the organization of both print and electronic information, including use of Anglo-American Cataloging Rules, Dewey Decimal Classification, Library of Congress Classification and Library of Congress Subject Headings. Prereq: LIS 602 or consent of instructor.

LIS 656 ORGANIZATION OF KNOWLEDGE II. (3)
In-depth coverage of the theories and practice of bibliographic description and subject analysis. Covers the organization of both print and electronic information and authority control. Emphasis is on problems in practice, special case studies, current issues and future trends of description, subject analysis and online authority control. Prereq: LIS 655, or consent of instructor.

LIS 658 KNOWLEDGE MANAGEMENT. (3)
Organizational knowledge is a valuable strategic asset. Knowledge management refers to the systematic management of an organization’s knowledge assets so that they can be leveraged for sustainable advantage. This course examines how knowledge is created, captured, organized, diffused, and implemented in an organization. Topics covered include knowledge management processes and practices, corresponding technologies, collaboration tools, and people and cultural issues. (Same as ICT 658.)

LIS 659 COLLECTION DEVELOPMENT. (3)
Intellectual and administrative aspects of building, maintaining and evaluating library collections. Topics include: library cooperation; national standards; the writing and implementation of collection policies; strategies of selection and evaluation; contemporary publishing and the book trade.

LIS 661 INTRODUCTION TO DATA SCIENCE. (3)
This course will provide a foundation in the area of data science based on data curation and statistical analysis. The primary goal of this course is for students to learn data analysis concepts and techniques that facilitate making decisions from a rich data set. Students will investigate data concepts, metadata creation and interpretation, general linear model, cluster analysis, and basics of information visualization. At the beginning, this course will introduce fundamentals about data and data standards and methods for organizing, curating, and preserving data for reuse. Then, we will focus on the inferential statistics: drawing conclusions and making decisions from data. This course will help students understand how to use data analysis tools, and especially, provide an opportunity to utilize an open source data analysis tool, R, for data manipulation, analysis, and visualization. Finally, in this course we will discuss diverse issues around data including technologies, behaviors, policies, organizations, and society.

LIS 662 INTRODUCTION TO DIGITAL LIBRARIES. (3)
This course focuses on the theoretical, technological, human factors and market driven components of digital library (DL) research and practice. Students will read and discuss literature on DLs, review existing technologies and proof-of-concept implementation projects, and work as a group to develop a prototype prototype of operational DL. This course is foundational for students wishing to engage seriously in the world of digital librarianship. Prereq: LIS 602, LIS 636.

LIS 663 INFORMATION SYSTEMS DESIGN. (3)
Study of concepts and methods of information system design and development with particular relevance to library and information center applications. Emphasis is given to modeling of
Course Descriptions

MA 108 INTERMEDIATE ALGEBRA. (3)
This course is remedial in nature and covers material commonly found in second year high school algebra. Specific topics to be discussed include numbers, fractions, algebraic expression, simplifying, factoring, laws of exponents, linear equations, simple graphs and polynomial algebra. This course is not available for degree credit toward a bachelor's degree. Credit not available on the basis of special examination. Prereq: One year of high school algebra. Recommended for students with a Math ACT score of 18 or less, or consent of department.

MA 109 COLLEGE ALGEBRA. (3)
Selected topics in algebra. Develops manipulative algebraic skills and mathematical reasoning required for further study in mathematics. Includes brief review of basic algebra, quadratic formula, systems of linear equations, introduction to functions and graphing. This course is not available for credit to persons who have received credit in many mathematics courses of a higher number with the exceptions of MA 111, MA 112, MA 123, MA 162, MA 201, or MA 202. Credit not available on the basis of special examination. Prereq: Two years of high school algebra and a Math ACT score of 21 or above or a Math SAT score of 510 or above; or MA 108R; or appropriate score on the math placement test or grade of C or better in MA 111.

*MA 110 ALGEBRA AND TRIGONOMETRY FOR CALCULUS. (4)
This is a course specifically designed for students intending to enroll in a calculus sequence. Topics will include trigonometric functions, exponentials and logarithms, graphs, polar coordinates and conic sections. Students may not receive credit for MA 110 and either of MA 109 or MA 112. This course is not available for credit to students who have received credit in any higher numbered mathematics course except for MA 111, MA 112, MA 162, MA 201, or MA 202. Credit is not available by special examination. Prereq: Two years of high school algebra and a Math ACT score of 23 or above, or two years of high school algebra and a Math SAT score of 540 or above, or appropriate score on the math placement test or grade of C or better in MA 111.

*MA 113 CALCULUS I. (4)
A course in one-variable calculus, including topics from analytic geometry. Derivatives and integrals of elementary functions (including the trigonometric functions) with applications. Lecture, three hours; recitation, two hours per week. Students may not receive credit for MA 113 and MA 137. Prereq: Math ACT of 27 or above, or Math SAT of 620 or above, or a grade of C or better in MA 109 and in MA 112, or a grade of C or better in MA 110, or appropriate score on math placement test, or consent of the department. Students who enroll in MA 113 based on their test scores should have completed a year of pre-calculus study in high school that includes the study of the trigonometric function. Note: Math placement test recommended.

MA 114 CALCULUS II. (4)
A second course in Calculus. Applications of the integral, techniques of integration, convergence of sequence and series, Taylor series, polar coordinates. Lecture, three hours; recitation, two hours per week. Prereq: A grade of C or better in MA 113, MA 137 or MA 132.

*MA 123 ELEMENTARY CALCULUS AND ITS APPLICATIONS. (4)
An introduction to differential and integral calculus, with applications to business and the physical and biological sciences. Not open to students who have credit in MA 113 or MA 137. Note: Math placement test recommended. Prereq: Math ACT score of 26 or above, or Math SAT of 600 or above, or a grade of C or better in MA 109, or appropriate math placement score, or consent of department. Note: Math placement test recommended.

MA 132 CALCULUS FOR THE LIFE SCIENCES. (3)
Introduction to integral calculus, integration of logarithmic and exponential functions. Applications to the life sciences including biochemical rates and reactions and radioactive decay. An introduction to biological models and their associated differential equations. Prereq: MA 123 or consent of instructor.

*MA 137 CALCULUS I WITH LIFE SCIENCE APPLICATIONS. (4)
A first course in one-variable calculus. Derivatives and integrals of elementary functions (including the trigonometric functions) with applications to the life sciences. Lecture, three hours; recitation, two hours per week. Students may not earn credit for MA 113 and MA 137. Note: Math placement test recommended. Prereq: Math ACT of 27 or above, or Math SAT of 620 or above, or a grade of C or better in MA 109 and in MA 112, or a grade of C or better in MA 110, or appropriate score on math placement test, or consent of the department. Students who enroll in MA 137 based on their test scores should have completed a year of pre-calculus study in high school that includes the study of the trigonometric function. Note: Math placement test recommended.

MA 138 CALCULUS II WITH LIFE SCIENCE APPLICATIONS. (4)
A second course in calculus. Techniques of integration, introduction to differential equations, geometry and differential calculus in several dimensions. Students may not receive credit for MA 114 and MA 138. Prereq: Grade of "C" or better in MA 113, MA 132 or MA 137.

MA 162 FINITE MATHEMATICS AND ITS APPLICATIONS. (3)
Finite mathematics with applications to business, biology, and the social sciences. Linear functions and inequalities, matrix algebra, linear programming, probability. Emphasis on setting up mathematical models from stated problems. Prereq: MA 109 or equivalent.

MA 193 SUPPLEMENTARY MATHEMATICS WORKSHOP I: (Subtitle required). (1-2)
Laboratory offered (only) as an adjunct to certain mathematics lecture courses. Offered only on a pass/fail basis. Coreq: Set by instructor.

MA 194 SUPPLEMENTARY MATHEMATICS WORKSHOP II: (Subtitle required). (1-2)
Laboratory offered (only) as an adjunct to certain mathematics lecture courses. Offered only on a pass/fail basis. Coreq: Set by instructor.

MA 201 MATHEMATICS FOR ELEMENTARY TEACHERS. (3)
Sets, numbers and operations, problem solving and number theory. Recommended only for majors in elementary and middle school education. Prereq: MA 109 or MA 111 or consent of department.

MA 202 MATHEMATICS FOR ELEMENTARY TEACHERS. (3)
Algebraic reasoning, introduction to statistics and probability, geometry, and measurement. Prereq: A grade of "C" or better in MA 201. Also recommended: a course in logic (e.g. PHIL 120) or a course in calculus (e.g. MA 123).

*MA 213 CALCULUS III. (4)
A course in multi-variable calculus. Topics include vectors and geometry of space, three-dimensional vector calculus, partial derivatives, double and triple integrals, integration on surfaces, Green’s theorem. Optional topics include the Stokes theorem and the Gauss divergence theorem. Lecture, three hours; recitation, two hours per week. Prereq: A grade of C or better in MA 114 or in MA 138 or equivalent.

MA 214 CALCULUS IV. (3)
MA 214 is a course in ordinary differential equations. Emphasis is on first and second order equations and applications. The course includes series solutions of second order equations and Laplace transform methods. Prereq: MA 213 or equivalent.

MA 241 GEOMETRY FOR MIDDLE SCHOOL TEACHERS. (3)
A course in plane and solid geometry designed to give middle school mathematics teachers the knowledge needed to teach a beginning geometry course. Cannot be counted toward the mathematics minor or major. Prereq: One semester of calculus or MA 201 with a grade of C or better.

University of Kentucky 2016-2017 Undergraduate Bulletin
Course Descriptions

MA 261 INTRODUCTION TO NUMBER THEORY. (3)
Topics from classical number theory, including discussions of mathematical induction, prime numbers, division algorithms, congruences, and quadratic reciprocity. Prereq: Grade of C or better in MA 114 or consent of instructor.

MA 308 MATHEMATICAL PROBLEM SOLVING FOR MIDDLE SCHOOL TEACHERS. (3)
Heuristics of problem solving. Practice in solving problems from algebra, number theory, geometry, calculus, combinatorics, and other areas. Primarily for middle school mathematics teachers. This course may not be counted towards a mathematics major or minor. Prereq: MA 123 or MA 113 or MA 137 or consent of the instructor.

MA 310 MATHEMATICAL PROBLEM SOLVING FOR TEACHERS. (3)

MA 320 INTRODUCTION TO PROBABILITY. (3)
Set-theory; fundamental concepts of probability, including conditional and marginal probability; random variables and probability distributions (discrete and continuous); expected values and moments; moment-generating and characteristic functions; random experiments; distributions of random variables and functions of random variables; limit theorems. Prereq: MA 213 or equivalent. (Same as STA 320.)

MA 321 INTRODUCTION TO NUMERICAL METHODS. (3)

MA 322 MATRIX ALGEBRA AND ITS APPLICATIONS. (3)

MA 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY. (3)
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as ECO 327.)

MA 330 HISTORY OF MATHEMATICS. (3)
A survey of the development of mathematics. Topics may include: the Egyptians and Babylonians, mathematics of the Greek Classical Age, Euclid and the Alexandrian School, the Renaissance, Fermat and the beginning of calculus, the work of Newton and Leibnitz, nineteenth century geometry, analysis and set theory. Prereq: MA 114.

MA 340 APPLICABLE ALGEBRA. (3)
Topics include: Euclid’s algorithm, unique factorization modulo arithmetic, Fermat’s and Euler’s theorems, Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotient rings, field extensions, finite fields and BCH codes. Prereq: MA 322 or MA 213. (Same as CS 340.)

*MA 341 TOPICS IN GEOMETRY. (3)
Selected topics in geometry including Euclidean and some non-Euclidean geometries. Prereq: MA 261 or consent of instructor.

*MA 351 ELEMENTARY TOPOLOGY I. (3)
A beginning course, with particular emphasis on point-set topology in Euclidean spaces. Prereq: MA 261 or consent of instructor. Coreq: MA 213.

MA 352 ELEMENTARY TOPOLOGY II. (3)
A continuation of MA 351, to include a discussion of metric spaces, completeness, general topological spaces, compactness, connectedness. Prereq: MA 351 or consent of instructor.

*MA 361 ELEMENTARY MODERN ALGEBRA I. (3)
A beginning course, with particular emphasis on groups and rings. Prereq: MA 261 or consent of instructor. Coreq: MA 322.

MA 362 ELEMENTARY MODERN ALGEBRA II. (3)
A continuation of MA 361 to include a discussion of fields and topics in linear algebra. Prereq: MA 361 or consent of instructor.

MA 375 COMMUNICATING MATHEMATICS. (3)
A course intended to provide understanding of and experience with contemporary mathematical communication in a modern instructional setting. Primarily intended for, but not restricted to, prospective school and college teachers of mathematics, including students who may intend to enroll in a graduate program and work as a graduate teaching assistant while pursuing an advanced degree. May not be counted as an upper division mathematics course in mathematics degree programs. Lecture, one hour; laboratory, four hours per week. Prereq: MA 261 or MA 214; and MA 322; and at least one of MA 351, MA 361, or MA 471G; and consent of instructor.

*MA 391 MATHEMATICS: COMPOSITION AND COMMUNICATION. (3)
Undergraduate topics course. The mathematical content will be selected at the discretion of the instructor. The course satisfies the Graduation Composition and Communication Requirement for mathematics majors. Prereq: The student must satisfy each of the following 5 conditions: (1) MA 213; (2) one of MA 261 or MA 214; (3) MA 322; (4) one of MA 321, MA 351, MA 361, or MA 471G; (5) at least 30 completed credit hours. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

MA 398, 399 INDEPENDENT WORK IN MATHEMATICS. (3 ea.)
Reading courses for upper division students of high standing. Prereq: Mathematics or mathematical sciences major and a standing of 3.0 in the department.

MA 415G LINEAR COMBINATORICS AND GRAPH THEORY. (3)
A basic course in the theory of counting and graph theory. Topics in enumerative combinatorics may include: generating functions, compositions, partitions, Fibonacci numbers, permutations, cycle structure of permutations, permutations statistics, Stirling numbers of the first and second kind, Bell numbers, inclusion-exclusion. Topics in graph theory may include: Eulerian and Hamiltonian cycles, matrix tree theorem, planar graphs and the 4-color theorem, chromatic polynomial, Hall’s marriage theorem, stable marriage theorem, Ramsey theory, electrical networks. Prereq: MA 213 or MA 322. (Same as CS 415G.)

*MA 416G INTRODUCTION TO OPTIMIZATION. (3)
The course is an introduction to modern operations research and includes discussion of modeling, linear programming, dynamic programming, integer programming, scheduling and inventory problems, and network algorithms. Prereq: MA 213 or equivalent. (Same as CS 416G.)

*MA 417G DECISION MAKING UNDER UNCERTAINTY. (3)
A continuation of MA 416 with topics selected from stochastic models, decision making under uncertainty, inventory models with random demand, waiting time models and decision problems. Prereq: CS/MA 416G and MA/STA 320, or consent of instructor. (Same as STA 417G.)

MA 422 NUMERICAL SOLUTIONS OF EQUATIONS. (3)
Linear equations: Gaussian elimination, special linear systems, orthogonalization, eigenproblem, iterative methods. Nonlinear equations: solutions of equations in one variable, solutions of systems of nonlinear equations. Optimization. Prereq: MA 261 or consent of instructor. Coreq: MA 322. (Same as CS 422.)

MA 432G METHODS OF APPLIED MATHEMATICS I. (3)
Partial differential equations, Jacobians, implicit function theorem, uniform convergence of series, line and surface integrals. Green’s and Stokes’ theorems. Prereq: MA 213 or equivalent.

MA 433G INTRODUCTION TO COMPLEX VARIABLES. (3)
Elementary complex variable theory with applications. Complex field, analytic functions, Cauchy theorem, power series, residue theorem. Prereq: MA 213 or consent of instructor.

MA 471G ADVANCED CALCULUS I. (3)
A careful and rigorous investigation of the calculus of functions of a single variable. Topics will include elementary topological properties of the real line, convergence limits, continuity, differentiation and integration. Prereq: MA 213 and MA 322; or consent of the instructor.

MA 472G ADVANCED CALCULUS II. (3)
A continuation of MA 471G to functions of several variables. A careful and rigorous investigation of the extensions of the concepts of the one variable calculus to n-dimensions. Prereq: MA 471G or consent of instructor.

MA 481G DIFFERENTIAL EQUATIONS. (3)
The fundamental goal is to cover those mathematical theories essential to the study of quantum mechanics (physics and mathematics students) and the qualitative and quantitative study of partial differential equations, especially the partial differential equations of mathematical physics (engineering graduate students). The course encompasses the following topics: uniform convergence, Picard’s existence proof, Power series techniques, regular singular point theory, Bessel’s equation, Legendre, Hermite and Chebychev polynomials, Orthogonal Functions, completeness, convergence in the mean, Sturm-Liouville theory, eigenvalues, eigenfunction expansions, Sturm comparison and oscillation theorems. Separation of variable techniques for the heat, wave, and Laplace’s equation. Prereq: One of MA 432G, MA 471G or equivalent, or consent of instructor.

MA 483G INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS. (3)
MA 483G is essentially an introductory course in partial differential equations designed to prepare undergraduate mathematics majors for serious work in partial differential equations and to provide Ph.D. candidates in engineering and science with an introduction to partial differential equations which will serve as a foundation for their advanced numerical and qualitative work (e.g., in computational fluid dynamics.) The course encompasses the following topics: first order linear equations, characteristics, Laplace’s equation, wave equation and heat equation, boundary value problems, Fourier series, Green’s identities and Green’s functions, general eigenvalue problems. Prereq: One of MA 432G, MA 471G, MA 481G, or equivalent, or consent of instructor.
MA 556 LINEAR ALGEBRA. (3)
Review of finite dimensional linear algebra, the rank of a matrix, systems of linear equations, bases, dimension, orthogonality, linear transformations and matrices, determinants, eigenvalues and characteristic polynomials, the simplicity of the ring of linear mappings of a finite dimensional vector space, the decomposition of a vector space relative to a group of linear mappings and selected topics of a more advanced nature. Prereq: MA 522 or consent of instructor.

MA 570 MULTIVARIATE CALCULUS. (3)
A self-contained course in n-dimensional analysis, including the general form of Stokes’ theorem. Prereq: MA 432G or equivalent.

MA 575 PRINCIPLES OF ANALYSIS. (3)
Real and complex numbers, sequences and series, continuity, differentiation, integration, and uniform convergence. Prereq: MA 471G or equivalent or consent of instructor.

MA 601 TEACHING COLLEGE MATHEMATICS. (1)
A seminar for teaching assistants on the basics of teaching mathematics at the college level as well as appropriate technology. Includes topics such as syllabus construction, lesson planning, grading assignments, web pages, typesetting mathematics with LaTeX. Required of all new graduate teaching assistants in mathematics. Prereq: Must hold teaching assistantship in mathematics or consent of the instructor.

MA 611 INDEPENDENT WORK IN MATHEMATICS. (3-9)
Reading course for graduate students in mathematics. May be repeated to a maximum of nine credits. Prereq: Major in mathematics, a standing of at least 3.0 and consent of instructor.

MA 613 PROBLEMS SEMINAR IN OPERATIONS RESEARCH. (3)
In this course the student is exposed to the art of applying the tools of operations research to “real world” problems. The seminar is generally conducted by a group of faculty members from the various disciplines to which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor. (Same as EE/STA 619.)

MA 614 ENUMERATIVE COMBINATORICS. (3)
An introduction to the basic notions and techniques in enumerative combinatorics. The material has applications to polytopal theory, hyperplane arrangements, computational commutative algebra, representation theory and symmetric functions. Topics include generating functions, the principle of inclusion and exclusion, bijections, recurrence relations, partially ordered sets, the Mobius function and Mobius algebra, the Lagrange inversion formula, the exponential formula and tree enumeration. Prereq: A graduate course in linear algebra or consent of instructor.

MA 618 COMBINATORICS AND NETWORKS. (3)
MA 622 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA II. (3)

MA 625 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS. (3)
Numerical solution techniques for boundary value problems for ordinary differential equations, and for parabolic and elliptic partial differential equations. Prereq: MA 624 or STA 503 or consent of instructor.

MA 628 APPLIED MATHEMATICS IN THE NATURAL SCIENCES II. (3)
A continuation of MA 528. Fourier and Laplace Transforms, the special functions (Bessel, Elliptic, Gamma, etc.) are discussed. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included. Prereq: MA/PHY 507 and 508. Prereq: PHY 404G or equivalent. (Same as PHY 507.)

MA 630 MATHEMATICAL FOUNDATIONS OF PROBABILITY AND STATISTICS. (3)
A modern treatment of stochastic processes from the measure theoretic point of view with applications to control theory; the basic notions of probability theory, independence, conditional expectations, separable stochastic processes, martingales, Markov processes, second order stochastic processes. Prereq: MA 432G and 670.

MA 633 THEORY OF PARTIAL DIFFERENTIAL EQUATIONS. (3)
A continuation of MA 533. Topics may include hypoelliptic operators and interior regularity of solutions; (P)D-convexity and existence theorems; regularity up to the boundary; applications of the maximum principle; semi-group theory for evolution equations; perturbation methods; well-posed and improperly posed problems; equations with analytic coefficients; a symmetric behavior of solutions; nonlinear problems. Prereq: MA 533.

MA 641 DIFFERENTIAL GEOMETRY. (3)
Tensor products, exterior algebra, differentiable maps, manifolds, geodesics, metric properties of curves in Euclidean fundamental forms, surfaces. Prereq: Consent of instructor.

MA 642 DIFFERENTIAL GEOMETRY II. (3)
Embedding of positive, compact spaces, uniform spaces and function spaces. Prereq: MA 551.
MA 654 ALGEBRAIC TOPOLOGY I. (3)
Homotopy and homology theories, complexes and applications. Prereq: MA 551, 561, 651 or equivalent.

MA 655 ALGEBRAIC TOPOLOGY II. (3)

MA 661 MODERN ALGEBRA II. (3)
Rings, fields of quotients, rings of polynomials, formal power series, modules, exact sequences, groups of homomorphisms, natural isomorphisms, algebras and tensor algebras. Prereq: MA 561 or consent of instructor.

MA 665 RINGS AND MODULES. (3)
This graduate course is a continuation of MA 661. Topics include modules over principal ideal domains, localization, primary decomposition, associated prime ideals, classes of rings and modules such as Noetherian rings and Dedekind domains, tensor and exterior products, exact sequences and resolutions, ideals and varieties, Hilbert’s Nullstellensatz. Prereq: MA 561 and MA 661 or consent from instructor.

MA 667 GROUP THEORY. (3)
A study of homomorphisms for groups, finite groups, solvable groups, nilpotent groups, free groups, and abelian groups. Prereq: MA 661.

MA 671 FUNCTIONS OF A COMPLEX VARIABLE I. (3)
Differentiation and integration, contour integration, poles and residues. Taylor and Laurent series, and conformal mapping. Prereq: MA 575 or consent of instructor.

MA 672 FUNCTIONS OF A COMPLEX VARIABLE II. (3)
A continuation of MA 671 to include the Riemann Mapping theorem, Dirichlet problem, multiple valued functions, Riemann surfaces and applications. Prereq: MA 671.

MA 676 ANALYSIS I. (3)
Sequences and series of real and complex numbers, sequences of functions. Riemann-Stieltjes integration, Lebesgue measure and integration. Prereq: MA 575 or consent of instructor.

MA 677 ANALYSIS II. (3)
Continuation of MA 676. Absolutely continuous functions on the real line, Lebesque spaces, beginning theory of Banach spaces including the Hahn-Banach closed graph, and open mapping theorems. Prereq: MA 676 or consent of instructor.

MA 681 FUNCTIONAL ANALYSIS I. (3)
General theory of normed linear spaces including the Hahn-Banach separation theorems, principle of uniform boundedness, dual spaces and representation theorem for linear functionals. Abstract measure theory and Riesz representation theorem for C(X). Prereq: MA 677 or consent of instructor.

MA 714 TOPICS IN DISCRETE MATHEMATICS. (Subtitle Required). (3)
Review of recent research in discrete mathematics. May be repeated to a maximum of nine credits. Prereq: Consent of the instructor.

MA 715 SELECTED TOPICS IN OPTIMIZATION. (3)
Review of current research in numerical analysis. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

MA 721 SELECTED TOPICS IN NUMERICAL ANALYSIS. (3)
Advanced topics in theory of ordinary (partial) and integral equations such as topological dynamics, almost periodic solutions, stochastic differential equations, integro-differential and differential-difference equations, generalized functions as solutions, non-linear partial differential equations, singular integral equations.

MA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

MA 751, 752 SELECTED TOPICS IN TOPOLOGY. (3 ea.)
Prereq: MA 651.

MA 761 HOMOLOGICAL ALGEBRA. (3 ea.)
Reports and discussion on recent advances in group theory, ring theory, and homological algebra. Prereq: MA 661 and consent of instructor.

MA 764, 765 SELECTED TOPICS IN ALGEBRA. (3 ea.)
MA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

MA 772 SELECTED TOPICS IN THE THEORY OF COMPLEX VARIABLES. (3)
May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MA 773 SELECTED TOPICS IN ANALYSIS. (3)
May be repeated once to a total of six credits. Prereq: Consent of instructor.

MA 777 MATHEMATICAL SEMINAR. (3)
May be repeated once to a total of six credits. Prereq: Consent of instructor.

MA 778 MATHEMATICAL SEMINAR. (3)
May be repeated once to a total of six credits. Prereq: Consent of instructor.

MAP 671 INTRODUCTION TO NEW MAPPING. (3)
This course introduces students to both the social and technical aspects of digital mapping in the 21st century. Students learn fundamental concepts and techniques in cartography and GIS, including file types, data classification, projections and coordinate systems and elementary analytical techniques in a range of desktop and web-based mapping platforms. In addition to providing the fundamental technical competencies necessary to create maps, students will develop the critical awareness required to effectively communicate complex social processes through maps.

MAP 672 PROGRAMMING FOR WEB MAPPING. (4)
This course introduces students to the fundamental concepts, and practice of web development and computer programming through web mapping. Students will become familiar with current web standards and proficient in manipulating the structural, stylistic, and behavioral elements of web maps through programming. Students will translate these practices to achieve objectives in web cartography such as the display of a base map, the thematic representation of data, and the employment of interaction to enhance visual communication and the presentation of information. Prereq: MAP 671 or consent of instructor.

MAP 673 DESIGN FOR INTERACTIVE WEB MAPPING. (4)
This course integrates the principles of geographic representation and web programming in order for students to develop high-quality interactive web maps. Students will design interactive web map projects that appropriately represent spatial data in order to serve end-user goals of map engagement and visual communication. The course will train students to compose interactive maps within the context of a coherent web page layout, including the development of supplementary content (such as text and metadata) to aid in visual storytelling. Prereq: MAP 672 or consent of instructor.

MAP 674 SPATIAL DATA ANALYSIS AND VISUALIZATION. (4)
This course will introduce students to advanced techniques for the quantitative analysis and visualization of spatial data. Students will become familiar with a broad spectrum of data cleaning, transformation, analysis, and visualization techniques helpful for answering in-depth questions based on geospatial data. Students will learn how to prepare raw source data and subsequently apply both global and local spatial statistical techniques, resulting in advanced, interactive data visualizations. Prereq: MAP 672 or consent of instructor.

MAP 675 COLLABORATIVE GEOVISUALIZATION. (4)
This course will enable students to build rich, user-centered web interfaces to promote the exploration and understanding of complex spatial datasets. Students will be able to critically engage with a variety of data sources (e.g., public data repositories, crowdsourced or volunteered data) and design interactive cartographic solutions in order to visualize geographic information. Students will be able to augment prototypical "slippy" web maps through more advanced cartographic enhancements and accompany information graphics. Prereq: MAP 673 or consent of instructor.

MAP 695 SPECIAL TOPICS IN DIGITAL MAPPING. (1-4)
This course offers a combination of readings, discussions, exercises and labs focusing on relevant topics in digital mapping. Course format may range from critical reading of selected literatures to innovative mapping methodologies. Current research developments and techniques in particular digital mapping subfields will be stressed. May be repeated under different subtitles to a maximum of eight credits. Prereq: Consent of instructor.

MAP 698 FINAL PROJECT PREPARATION. (3)
This course will enable students to design and prepare a web mapping workflow for a project of their own selection. This project is the masterwork for the Master’s degree program in digital mapping. Students will determine a geographic problem mapping can address, identify user needs, review relevant literatures, address ethical concerns, collect and prepare the data necessary for the project. Students will also propose strategies for data representation, user interface and online dissemination of the project. This course will culminate with a project design presentation and critique by peers and instructors. Prereq: All other course work toward the Master’s degree in digital mapping must be completed.
MAP 699 FINAL PROJECT IMPLEMENTATION. (3)
This course takes the project design developed in MAP 698 and develops a mapping project based on that design. Students will conduct data analysis and visualization, working collaboratively to review and improve the map user interface, produce written documentation on methods used and findings and engage in intense testing of the mapping solution with peers and targeted end users. At the end of the course, students will make a real time online oral presentation and defense of the project for a committee of faculty members. Prereq: All other course work toward the Master’s degree in digital mapping must be completed. With permission of the instructor 699 may be taken concurrently with 698.

MAP 701 HISTORY OF CRITICAL CARTOGRAPHY. (2)
This course outlines key moments and arguments in the history of cartography with particular attention to the development of digital mapping and GIScience. Students will review and discuss the epistemological and ontological tensions within the field and practice a range of philosophical approaches to cartographic representation and spatial analysis. Prereq: Consent of instructor.

MAP 719 SOCIAL IMPACTS OF NEW MAPPING. (3)
This seminar introduces social and cultural issues that have emerged alongside the growth of digital mapping and location-based services. It reviews the evolving nature of digital divides, expert versus crowdsourced knowledge, surveillance, privacy and the ethics of big geospatial data collection and use. Students will utilize these discussions of the social impacts of new mapping to challenge and contextualize their own mapping projects. Prereq: MAP 671 or consent of instructor.

MAS Media Arts and Studies

MAS 101 INTRODUCTION TO MEDIA AND CULTURE. (3)
This course focuses on the study of electronic mass media. It surveys the cultural industries from multiple perspectives, including history, economics, production processes, content, social effects, diversity, and globalization. It emphasizes the relationships among the electronic mass media, culture, and power.

MAS 201 COMMUNICATION TECHNOLOGIES AND SOCIETY. (3)
Historical survey of broadcasting, common carrier, and related electronic mediastechnologies, including the Internet. This course focuses on the social, political, and policy dimensions of the adoption and use of communication technologies. Special attention is paid to significant issues in contemporary public policy and practice, such as protection of privacy and personal information, information ownership, free speech, and censorship.

MAS 300 MEDIA STUDIES RESEARCH METHODS. (3)
An introduction to quantitative and qualitative social science research relating to media studies, including survey and experimental methods. Prereq: Media Arts & Studies major or minor status or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

*MAS 310 MEDIA POLICY AND REGULATION. (3)
A study of policy and regulation of media in the U.S., primarily broadcasting, cable, telephone, and the Internet. This includes traditional issues in the regulation of content, such as freedom of speech, copyright, ownership, and privacy. It also includes traditional areas in the regulation of the industry structure including monopolies, licensing, cross ownership rules, mergers, and illegal practices. Prereq: Media Arts & Studies major status.

MAS 312 VIDEO PRODUCTION I. (3)
An introduction to the fundamentals of studio video production, from conception to completed product. Practical training with essential production equipment will be offered. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 319 WORLD MEDIA SYSTEMS. (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as JOU 131.)

MAS 322 MULTIMEDIA I. (3)
Introduction to techniques of multimedia production and the basic principles of communication via multimedia. Practical, hands-on experience with various media used in computer-based multimedia including: text, still graphics, motion graphics, animation, sound, and hyperlinking. Includes introduction to single- and Web-based applications. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 355 COMMUNICATION AND INFORMATION SYSTEMS IN ORGANIZATIONS. (3)
An examination of the role of a variety of communication and information systems used in organizations. The study of communication processes across a variety of systems, including the telephone, e-mail, voice mail, and audio- and video-conferencing. It also includes an examination of the uses for a variety of information systems and technologies, including computer networks, integrated voice response systems, computer-telephony integration, call centers, automated attendants, voice recognition, and synthesis, database management systems, and a variety of additional hardware and software used in business today. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 390 SPECIAL TOPICS IN MEDIA PRODUCTION (Subtitle required). (3)
Course will focus on selected topics in the practice and theory of electronic media production. Course will be offered on demand. May be repeated to a maximum of six credits under a different subtitle. Prereq: Media Arts & Studies major or minor status or consent of the instructor.

MAS 403 TV NEWSCAST PRODUCING AND DIRECTING. (3)
This class is designed to train students to become television news cast producers and directors. Students will prepare TV news casts with consideration of news story placement as it relates to audience, viewing trends, and journalistic judgment. Students will learn critical thinking skills in producing and directing as it relates to news cast and story promotion, reaching to major news events and their coverage, and talent and time management. Students will be required to write, produce and direct new stories in different formats for different formats for different newscasts and address ethical and legal concerns of news stories. Prereq: JOU 302 for JOU Majors; MAS 312 for MAS majors. (Same as JOU 403.)

MAS 404 MEDIA ORGANIZATIONS. (3)
An examination of the structure of video entertainment and on-line communications organizations and industries. Includes the organization and management of various types of telecommunications properties, as well as their traditional and new competitors. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 412 VIDEO PRODUCTION II. (3)
A follow-up to MAS 312, this course is an advanced video production course focusing on electronic field production (EFP). This course features technical and creative aspects of directing, camera work, editing, and lighting. Lecture, three hours; laboratory, one hour per week. Prereq: MAS 312 or TEL 312 or consent of instructor.

MAS 420 ELECTRONIC MEDIA CRITICISM. (3)
Examination of each of several critical theories and approaches to the criticism of telecommunication program content. Practical experience in evaluating critical writing and in the writing of critical pieces. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 422 MULTIMEDIA II. (3)
This is an advanced course in computer-based interactive multimedia design and development. The course is designed to expand the student’s knowledge of, and ability to author, Web applications integrating audio, graphics, video, text, animation, and interactive components for education, entertainment, and business purposes. Prereq: MAS 322 or TEL 322 or consent of instructor.

#MAS 425 SOCIAL ENTREPRENEURSHIP FOR MEDIA. (3)
This course focuses on social entrepreneurship and how social entrepreneurs facilitate social change using media. The course covers social entrepreneurship explored in the course include communication, innovation, performance criteria, target market, launch, management and scale.

MAS 432 AUDIO PRODUCTION. (3)
Elements of audio production, including basic machines, microphones, patch panels, the production mixing. Different audio products are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 435 THE HISTORY OF VIDEO GAMES AND THE INDUSTRY. (3)
Provide an overview of the video game industry. The course focuses on a chronological understanding of the history of the video game industry, including key moments in the rise and fall (and the rise again!) of the industry and an examination of the technological advances in both software and hardware. Prereq: MAS major or minor status or consent of instructor.

#MAS 445 MUSIC INDUSTRY MANAGEMENT. (3)
This course provides an overview of the business of the music and recording industry, including the songwriting market, music publishing, music copyright, music licensing, unions, agents and attorneys, artist management, concert promotion, music merchandising, the record industry, record markets, recording contracts, record distribution and merchandising, studios and engineers, music in television, radio and advertising, music in film, and career development and options. Students will be introduced to industry professionals and may participate in promoting and producing a music event. Prereq: Media Arts and Studies major or minor status or consent of the instructor.

MAS 482 ELECTRONIC MEDIA SALES MANAGEMENT. (3)
The data and techniques of radio and television advertising, including problems of coverage and circulation, spot campaigns, testing, time buying, the agency, measuring broadcast effectiveness, merchandising radio and television advertising and time selling. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 490 SPECIAL TOPICS IN MEDIA INDUSTRY STUDIES (Subtitle required). (3)
Course will focus on selected topics in the study of media industries. Course will be offered on demand. May be repeated to a maximum of six credits under a different subtitle. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 505 MEDIA AND POPULAR CULTURE. (3)
A study of the interplay of communication media and popular culture. The course examines conceptual approaches to the production, forms, meanings, and influences of technologically mediated culture. The scope of the course includes the popular texts produced by the commercial media and entertainment industries as well as user-generated content circulated in online media.
MAT 520 SOCIAL EFFECTS OF THE MASS MEDIA. (3)
An examination of the political, social, cultural and behavioral effects of telecommunications systems in American society. Focus on theory and empirical research generated since 1940. Prereq: MAS 300 or TEL 300 or consent of instructor.

MAT 530 PRO-SEMinar in TELECOMMUNICATIONS. (3)
Discussion and reports on current trends in telecommunications industries and the behavioral, political and regulatory implications attending such trends. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAT 535 TELECOMMUNICATIONS NETWORK MANAGEMENT. (3)
The primary focus of this course is the design and management of telecommunications networks and resources. In a framework that includes both the technical and business aspects of telecommunications, the course examines the capabilities and limitations of a wide range of data network technologies in the context of needs assessments, design, implementation, and evaluation; the relative advantages and disadvantages of various technological configurations for specific business purposes; and the impact of human and organizational factors in network design. Prereq: Media Arts & Studies major or minor status or consent of instructor.

#MAS 540 SOCIAL MEDIA THEORY AND PRACTICE. (3)
This course examines the contexts and forms of a variety of social media platforms and applications, and interrogates the influence of social media on individuals, organizations, institutions, and society. It explores a variety of important conceptual and practical issues in relation to social media use and applications. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAT 555 THE INTERNET AND SOCIAL CHANGE. (3)
An critical examination of the political, cultural, technological, social, and behavioral aspects of Internet-mediated communication. Emphasis on research literature and theory on emerging platforms of new media technologies and applications. Prereq: MAS 300 or TEL 300 or consent of instructor.

#MAT 560 VIDEO GAME STUDIES. (3)
This course offers a critical overview of current scholarship and debates surrounding video games and game players. Topics include the video game industry, culture of gameplay, videogame narratives, uses and effects of games, controversial issues, the game production pipeline, and career opportunities. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAT 590 SPECIAL TOPICS IN SOCIAL-CULTURAL MEDIA STUDIES (Subtitle required). (3)
Course will focus on a single topical issue in the theory, research, and criticism of electronic media. Course will be offered on demand. May be repeated to a maximum of six credits under a different subtitle. Prereq: Media Arts & Studies major or minor status or consent of instructor.

**MAT Merchandising, Apparel and Textiles**

MAT 114 INTRODUCTION TO MERCHANDISING. (3)
An introduction to merchandising with emphasis on apparel and textiles. Examination of industry structures which facilitate the development, manufacturing, marketing and merchandising of goods and services in the domestic and international marketplace.

MAT 120 TEXTILES FOR CONSUMERS. (3)
A study of textiles with emphasis on consumer applications. Properties of fibers, yarns, fabric structures, colors, and finishes related to end use. Survey of legislation and of maintenance requirements.

MAT 122 TEXTILES LAB. (1)

MAT 232 APPAREL PRODUCTION STUDIO. (3)
An introduction to design and aesthetic principles as they are applied to promotional procedures of retail and wholesale organizations including methods of visual merchandising, special event promotion and public relations. Prereq: MAT 120 or consent of instructor.

MAT 247 DRESS AND CULTURE. (3)
A study of the social, cultural, physical, and psychological factors which influence apparel and apparel use in contemporary society. Prereq: Three hours in sociology or anthropology, three hours in psychology.

MAT 315 MERCHANDISE PLANNING AND CONTROL. (3)

MAT 359 SPECIAL TOPIC IN MERCHANDISING, APPAREL AND TEXTILES (Subtitle required). (1-3)
Exploration of topics in the field of merchandising, apparel and textiles. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor or prior to registration.
Course Descriptions

MAT 700 RESEARCH PROBLEMS IN INTERIOR DESIGN, MERCHANDISING AND TEXTILES. (3) Independent research for the exploration of a specific problem in interior design, merchandising and textiles. May be repeated to a maximum of six credits.

MAT 720 RURAL RETAIL DEVELOPMENT. (3) Characteristics of rural retail development; analysis of economic and related problems and potential for development. Prereq: Graduate student standing.

MAT 759 SPECIAL TOPICS IN MERCHANDISING, APPAREL AND TEXTILES (Subtitle required). (3) Advanced work on a specific topic in merchandising, apparel, and textiles. May be repeated under different topics to a maximum of 12 credits. Prereq: Graduate Standing or consent of instructor.

MAT 785 INDEPENDENT STUDY IN MERCHANDISING, APPAREL AND TEXTILES. (1-3) Problems involving independent laboratory, studio and/or library student conforming to the student’s special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, consent of instructor, and contract agreement.

MAT 790 RESEARCH PROBLEMS IN INTERIOR DESIGN, MERCHANDISING, AND TEXTILES. (3) Independent research for the exploration of a specific problem in interior design, merchandising, and textiles. May be repeated to a maximum of six credits.

MB Microbiology

MB 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769; candidate is required to complete the qualifying exams. (Same as MI 749.)

MB 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MB 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours. (Same as MI 768.)

MB 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (1-12) May be repeated indefinitely. (Same as MI 769.)

MBA Master of Business Administration

MBA 600 RAPID IMMERSION IN ACCOUNTING. (3) An immersive four-week introduction to the use of key financial and managerial accounting statements in analyzing business problems. Open only to students in the daytime MBA track.

MBA 601 RAPID IMMERSION IN DECISION MAKING. (3) An immersive four-week introduction to the use of key financial and managerial accounting statements in analyzing business problems. Open only to students in the daytime MBA track.

MBA 602 LEADERSHIP. (3) This course focuses on helping students develop leadership, communication and team building skills. The course is taught throughout the one-year accelerated MBA program and is open only to students in the program.

MBA 603 MARKETS—STRUCTURE AND DYNAMICS. (1) An immersive one-week course that explores how markets work. Open only to students in the daytime MBA track. Prereq: MBA 600, MBA 601 and MBA 602.

MBA 604 FINANCE. (2) This course is designed to increase understanding of the role of information systems in organizations. Open only to one year MBA students. Prereq: MBA 600, 601, 602.

MBA 605 ORGANIZATIONAL STRUCTURES AND STRATEGIES. (1) An immersive course that explores firms, internal allocation decisions and outsourcing decisions from a variety of social science perspectives. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602 and 603.

MBA 606 MANAGEMENT INFORMATION SYSTEMS. (1) This course is designed to increase understanding of the role of information systems in organizations and how they are used by managers. Open only to One Year MBA students. Prereq: MBA 600, 601, 602 and 603.

MBA 607 MARKETING. (1) An immersive course introducing students to the role of marketing within the firm and overview the components of a marketing plan. Open only to One Year MBA students. Prereq: MBA 600, 601 and 602.

MBA 608 HUMAN RESOURCES MANAGEMENT. (1) An immersive course to familiarize students with topics in Human Resource Management including topics on legal environment, recruitment, selection and compensation. Open only to One Year MBA students. Prereq: MBA 600, 601 and 602.

MBA 609 MANAGEMENT. (1) An experiential-based course that places students in teams that compete in a complex business simulation. Open only to one year students. Prereq: Acceptance in MBA program.

MBA 610 NEW PRODUCT DEVELOPMENT MARKETING. (3) An immersive course examining how market research and marketing strategy aid firms in their management of new product development. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

MBA 611 NEW PRODUCT DEVELOPMENT MANAGEMENT. (3) An immersive course which examines how firms manage the new product development or service process. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

MBA 612 BUSINESS FINANCE STRATEGIES. (3) An extensive, multidisciplinary examination of the mergers and acquisitions process from the role of the mergers in firm strategy to target identification, acquisition, and absorption issues. Also, covers the basic fundamentals of financial concepts in banking. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610 and 611.

MBA 613 FINANCE IN NEW PRODUCT DEVELOPMENT. (1) This course is designed to the concepts and techniques used to evaluate products and services in New Product Development. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

MBA 614 STRATEGIC INNOVATION, COMPETITIVE RIVALRY AND GLOBAL STRATEGY. (3) This course introduces students to the fundamental concepts, analytical tools, and framework related to the twin challenges of strategic management of innovation and competitive rivalry in the context of the global economy. As such, it serves as a complement to the study of new product development and supply chain management. Prereq: MBA 600 through MBA 609.

MBA 615 SUPPLY CHAIN STRATEGY. (3) An immersive study of the supply chain management involving the management of key business processes, the flow of goods and information, and relationships with fellow members of the supply chain. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

MBA 616 SUPPLY CHAIN OPERATIONS. (3) An immersive study of supply chain operations and the discipline of managing and directing physical/technical functions of an organization involving the planning, source, make, deliver and return functions. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

MBA 617 NEGOTIATIONS IN THE SUPPLY CHAIN. (1) This course focuses on developing negotiation skills in the supply chain involving the ability to diagnose situations, strategize, plan and engage in fruitful negotiations. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

MBA 618 GLOBAL STRATEGY. (1) This course introduces students to the fundamental concepts, analytical tools, and frameworks related to the challenges of globalization and international strategy. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

MBA 619 MANAGERIAL ACCOUNTING IN NEW PRODUCT DEVELOPMENT. (1) This course will examine how managerial accounting is employed in the new product development stage. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

MBA 620 RISK MANAGEMENT. (2) An examination of financial decision-making about the management of risk by corporations, recognizing the relationship between risk management and the overall goals of the firm. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 621 NEW VENTURE FINANCE. (1) The advantages and disadvantages of the sources of new venture capital are studied from the entrepreneur’s and the provider’s viewpoints. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 622 INTERNATIONAL FINANCIAL MANAGEMENT. (2) Overview of financial management at the international level. Topics include the structure of international trade and foreign direct investment, foreign exchange markets, and managing currency risk. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.
MBA 623 INTERNATIONAL MARKETING. (2)
An examination of the factors that shape international marketing decisions, including entry strategies, marketing mix decisions and product policies. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 624 ENTREPRENEURIAL MARKETING AND MANAGEMENT. (2)
An examination of how to market creatively on limited resources. Hands on experience in how to develop a marketing plan for a small firm. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 625 SALES MANAGEMENT. (1)
An examination of managerial approaches to the planning, implementation and control of personal contact programs. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 626 E-COMMERCE. (2)
A thorough examination of the major issues associated with the development of e-commerce solutions and applications. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 627 GLOBAL BUSINESS MANAGEMENT. (2)
Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 628 TECHNOLOGY MANAGEMENT. (2)
An examination of the management of technology, especially the critical role of technology as a strategic resource to enable management to achieve firm objectives. Topics include the technology life-cycle, technology forecasting, and emerging technologies. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

MBA 630 PROFESSIONAL DEVELOPMENT. (1)
Students complete five short modules to enhance their interpersonal, implementation or analytic skills. Topics vary by year. Open only to students in the daytime MBA track.

MBA 640 PROJECT CONNECT I. (4)
An immersive 16-week internship with a Project Connect partner. Open only to one-year MBA students.

MBA 642 PROJECT CONNECT II. (4)
An immersive 16-week internship with a Project Connect partner. Open only to one-year MBA students.

MBA 644 PROJECT CONNECT IN MERGERS AND ACQUISITIONS. (1)
An immersive five week internship with a Project Connect Partner where the student will work on an M&A project. Open only to One Year MBA students. Prereq: MBA 660 through MBA 618.

MBA 650 MBA CAPSTONE COURSE. (2)
This course is designed to culminate the one-year MBA program. The course is themed to cover a current, critical topic incorporating knowledge gained throughout the program. Prereq: MBA 660 through 612.

MC Medical Center

MC 500 INTERNATIONAL SERVICE-LEARNING. (1-12)
This course is designed to introduce students to the theories, concepts, and practices of service-learning in an international setting. Service-learning engages the student in enhancing the common good through the application of learning to service. (Same as EXP 510.)

MCL Modern and Classical Languages

MCL 100 THE WORLD OF LANGUAGE. (3)
This course introduces students to some of the objects and methods of inquiry common to the different language areas and fields of study in the Department of Modern and Classical Languages, Literatures and Cultures. Students will examine the structure and use of spoken language and written language as well as their sociocultural aspects and explore basic linguistic principles, the roles and function of language, and issues involved in first- and second-language acquisition. In the process they will develop a facility and vocabulary for the examination of the principal structures involved in systems of spoken and written language.

MCL 135 VAMPIRES: EVOLUTION OF A SEXY MONSTER. (3)
This course answers the following questions: What is a vampire? Where do they come from? Why do we have an obsession with the walking dead, especially with fanged monsters? How do we get rid of them (or attract them)? The course will explore the origin of the vampire in Slavic folklore and trace the movement of the legend across Europe into literature and then finally into today’s films and pulp fiction. We will learn about the legends, rituals and folk religious beliefs associated with the vampire phenomenon and how they have been interpreted over the centuries by various peoples. We will explore the myriad of approaches to the vampire from psychology, folkloristics, literature, physiology and anthropology. Taught in English.

MCL 190 TOPICS IN MODERN AND CLASSICAL LANGUAGES, LITERATURES AND CULTURES (Subtitle required). (3)
Examination of topics related to literature, cultural studies, or aspects of language. The course may be dedicated to the literature, culture or language of a particular group or nation or may compare literatures, cultures and languages. May be repeated up to 6 credits under different subtitles.

MCL 200 GLOBAL LITERACY. (3)
A humanities course for the 21st century; this class “goes global” in unprecedented ways. Team taught by expert instructors representing ten different linguistic and cultural traditions (Arabic, Chinese, French, German, Ancient Greek, Hebrew, Italian, Japanese, Ancient Roman, Russian), it trains students in the analysis of a wide range of media (literary text, folk tale, still image, film, etc.) that challenge cultural identities and cross national boundaries. Meets requirements for UK Core in the Humanities.

MCL 270 INTRODUCTION TO FOLKLORE AND MYTHOLOGY. (3)
Introduces the forms and functions of folklore and mythology, with particular emphasis on the Americas. Folklore opens up questions about the relationship of tradition to modernization, individualism, and community. The course explains how folklore is fundamental to human lives and relates these cultural traditions to identities and values in contemporary society. We give attention particularly to methods of ethnography and field collection to uncover symbols, structures, and functions in expressive culture. Satisfies the UK Course Intellectual Inquiry in the Humanities or Intellectual Inquiry in the Social Sciences requirement.

*MCL 300 CONTACT ZONES: CULTIVATING INTERCULTURAL COMPETENCE. (3)
This course aims to help students acquire skills and knowledge needed to promote understanding among various cultural groups, with individuals, in order to create a culture. The course examines the concept of “cultural difference.” Toward this end, this course will (1) utilize, as a guide/lead, the concept of “contact zones,” zones of exchange that divide but simultaneously connect “us” and “them”; and (2) have each student conduct a semester-long ethnographic project concerning the contact zone. Prereq: Students must have completed 30 hours of course work and completed the UK Core Composition and Communication I and II requirement before enrolling in MCL/SPA 300. (Same as SPA 300.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

*MCL 311 AUTOBIOGRAPHY AND WORLD LITERATURE. (3)
This course will examine and compare literary autobiographical writings (defined broadly to include text and image) from Asian and European historical traditions. In addition to learning to read and interpret autobiographies as literature, this course will consider the process of creating a literary self through activities and exercises designed to engage with the stylistic elements of autobiography as literature.

MCL 324 THE CITY IN THE TWENTIETH-CENTURY: TOKYO, SHANGHAI, PARIS. (3)
What does it mean to live somewhere else? This course examines three of the world’s greatest cities. These cities share a rich history of mutual influence and imagination, with artists from each city creating work that represents the other. We will look at the three different distinct languages and cultures to examine how city life and urbanity has been discussed, in general, and then how it has been imagined in the Japanese, Chinese, and French traditions.

MCL 343 GLOBAL HORROR. (3)
Global Horror is an introduction to the horror film that traces the genre’s development from its origins in European literature to a global film phenomenon in the 21st century.

*MCL 360 CATASTROPHES AND CALAMITIES IN THE GRECO-ROMAN WORLD AND AFTERWARDS. (3)
The participants in the course will get acquainted, by reading the ancient sources in English translation, with some of the greatest catastrophes and calamities in the Greco-Roman world as described by ancient authors. These events will be considered from the historical and cultural context in which they have occurred. Special attention will be paid to ways in which ancient people reacted to, explained, and tried to accept these calamities. Course participants will also explore, using archival material mainly from newspapers and periodicals, similar calamities that happened in the modern and indeed in the contemporary world. They will reflect on modern and contemporary reactions to adversity, and analyze disasters in the light of different conceptualizations of the moral and cosmological contexts of such events. This will involve discussion of distinct and opposing interpretive perspectives and schools of thought. Comparing the ancient and the modern attitudes will be an important part of the course. The course will also take in consideration human approaches to calamities represented in some motion pictures.

MCL 375 LANGUAGE STUDY ABROAD. (1-3)
This course will be used to award credit to UK students studying a language other than English, Spanish, or Portuguese at a recognized university or language institute outside the United States. Where the primary language of instruction is not English, MCL 375 will be awarded for courses that focus on language acquisition/development of language skills or linguistic knowledge and for which there are no clear UK equivalents. Prereq: UK student in good standing with two years (4 semesters) or equivalent of language study completed can receive credit for MCL 375. This is intended to be upper-division language instruction credit.
MCL 376 CULTURAL STUDIES ABROAD. (1-3) This course is used to award credit to UK students studying a language other than English, Spanish, or Portuguese at a recognized University or language institute outside the United States where the primary language of instruction is not English. MCL 376 will be awarded for courses that focus on the culture of the host country and/or countries sharing the same language and for which there is no clear UK equivalent. These may be literature, film, media and other such courses as commonly taught within MCL. Prereq: UK student in good standing with two years (4 semesters) of coursework in the target language or consent of instructor. MCL 376 is intended to be upper-division culture instruction in the target language (i.e. French Literature courses taught in French, Chinese Art History classes taught in Chinese).

MCL 390 TOPICS IN MODERN AND CLASSICAL LANGUAGES, LITERATURES AND CULTURES (Subtitle required) (3) Examination of a topic related to literary studies, cultural studies, or aspects of language. The course may be dedicated to the literature, culture or language of a particular group or nation or may compare literatures, cultures and languages. May be repeated up to 6 credits under different subtitles. This course counts as an elective for the MCL major. Prereq: Determined by instructor.

MCL 495 MODERN AND CLASSICAL LANGUAGES, LITERATURES AND CULTURES CAPSTONE. (3) MCL Capstone Research Project and Language Learning Portfolio. MCL 495 is a common Capstone experience shared by MCL majors in Arabic, Classics, Chinese, French, German, Japanese, and Russian. It is designed to provide an opportunity for majors to develop research projects in collaboration with their Capstone instructors to gain research experience in MCL Studies, as well as to allow majors to explore the various content areas and scholarly approaches represented in MCL so as to enhance their understanding of the value of work across disciplines. In addition, the course facilitates student completion of a language learning portfolio to document their level of proficiency in one of the fields of concentration in MCL Studies. Prereq: Declared major in one of the fields of concentration in the MCL major Senior standing (60 credit hours). (Exceptions to these prerequisites must be approved by the Director of Undergraduate Studies.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

MCL 510 TEACHING METHODS: YOUNG LEARNERS AND BEGINNING LEVEL STUDENTS. (3) The primary purpose of this course is to acquaint pre- and in-service teachers with the theoretical background and instructional strategies to effectively instruct second language learners who are younger (ages K - 6) and/or beginning level proficiency. The course is guided by the national standards for the five areas of second language acquisition for elementary learners as defined by the National Standards for Language Learning, Prereq: Admission into MATWL or TESL Program.

MCL 517 SECOND LANGUAGE ACQUISITION. (3) This course will offer students a survey of the primary concepts and phenomena that relate to the study of Second Language Acquisition (SLA) where second has reference to languages acquired after the first, or native, language. This course will provide a cursory look at a number of linguistic, psycholinguistic, and sociolinguistic issues at the heart of second language learning, as well as an overview of the complex processes and mechanisms that drive that learning. However, findings from SLA research may inform perspectives in second and foreign language education and, thus, will be included in class discussions when appropriate.

MCL 525 CRITICAL ISSUES IN ASIAN STUDIES. (3) This course is designed as an introduction to scholarly approaches in Asian Studies for students who are beginning graduate studies and to advanced undergraduates. This course will introduce crucial moments in the development of the field of Asian Studies. It focuses on some of the central problems, the major debates, and intellectual discussions that have emerged and continue to shape the scholarly, critical study of Asia. The course will prepare students to assess Asia as a region, as a history, as a discourse, and as a site of lived experiences, and to engage in the issues associated with its study. The seminar will consider the fundamental questions in the study of Asia: What is Asia? How do we approach its study? What are the issues determining our study of it? We will discuss the historical forces that have affected popular and scholarly thinking about “Asia.” The skills emphasized in this course are common to good scholarship in many fields: the ability to evaluate research, methodology, and approach using critical discursive and rhetorical skills, and the ability to craft a written essay with a clear and persuasive argument. Students are encouraged to think about the commonalities and differences among different disciplinary approaches to Asia as well as the specific history and interdisciplinary character of Asian Studies.

MCL 575 INTRODUCTION TO LINGUISTICS AND LANGUAGE STRUCTURE. (3) This course provides an introduction to the field of linguistics, with a focus on the major subfields of linguistics: phonetics (the sounds of language), phonology (the sound structure of language), morphology (the structure of words), and syntax (the structure of sentences). The class explores the relevance of linguistics for language teaching and careers in education. The English language will be the primary, but not exclusive, focus in this class.

MCL 591 LANGUAGE PRACTICUM (Subtitle required). (1-3) This Language Practicum course provides students the opportunity to engage in structured, focused, team based research in a specific topic. The course is completed by the submission of a research paper to the MCLLC. Some classes are conducted in English and some are conducted in the target language. Students must be enrolled in the English medium course to which this Language Practicum corresponds in order to be eligible for enrollment in this Practicum. The Practicum is intended to complement the English-medium course through a combination of target-language activities, including (but not limited to): reviewing terminology and concepts in the target language, summarizing English course discussions in the target language, supplementing English-language readings and other materials with parallel target-language materials. Course may be repeated up to 5 times for credit with different subtitles and tied to different English-medium courses. Prereq: A minimum of two years of college-level work or equivalent training in the target language or consent of instructor; concurrent enrollment in the corresponding MCLLC English-language course.

MCL 592 RESEARCH PRACTICUM (Subtitle required). (1-3) In this course students engage in directed research designed to broaden and deepen their experience in specific research areas, and to extend and refine their investigative and research skills. The research work may be performed alone or as a part of a team, and the research focus may include (but is not limited to): an independent topic/project in the students’ area(s) of study; a topic/project closely connected with an upper-level seminar in which the students are currently enrolled, or a topic/project within the research agendas of the faculty member offering the course. The research performed in this course will result in a report or in a paper to be presented in an appropriate public research venue (departmental symposium; campus-wide research publication or presentation; professional conference or publication; etc.). Course may be taken for up to 9 credits, with either multiple projects or a longer-term, ongoing single project. Prereq: Junior standing or higher (or consent of instructor).

MCL 593 INTERNSHIP. (1-6) In this course students engage in an internship under the supervision of a faculty member. The course is intended to help students apply, reinforce, and extend what they have learned in the classroom for their professional development. The production of a portfolio, project, or other form of summative work will allow the students to reflect on the semester’s work in a focused synthesis. 10 hours of internship per week (150 hours in a semester) are generally equated with 3 credit hours. Course may be repeated up to 12 credit hours. Prereq: Creation of a learning portfolio in collaboration with the department and an internship site.同意 could be given to up to 12 credits of internship time.

MCL 595 TOPICS IN FOLKLORE AND MYTH (Subtitle required). (3) An in-depth investigation of some aspect of folk culture (including artifacts, oral literature or oral traditions) and/or mythology with emphasis on a specific topic within a single cultural context or across cultures, e.g., the legend in European society, Chinese folklore in contemporary film, etc. MCL majors and graduate students will be expected to conduct part of their research in the target language. May be repeated up to six credits with different subtitles. Provides MCL Major Elective credit and MCL minor credit.

MCL 597 TOPICS IN COMPARATIVE LITERARY STUDIES (Subtitle required). (3) The purpose of this course is to explore the nature of the literary as an aesthetic, historical, and social category in a comparative context. Topics to be considered include: definitions of literature; literary studies as an academic discipline; theories of literary meaning; the connections between literature and ideas of modernity; and the relationships between the modern and the avant-garde; the importance of parallel connections in literary history and the usefulness of these connections; cross-cultural and cross-historical concepts of literary art. MCL majors and graduate students will be expected to conduct research in the target language. May be repeated up to six credits with different subtitles. Provides MCL Major Elective credit and MCL minor credit. Prereq: Consent of instructor.

MCL 598 TOPICS IN LINGUISTICS (Subtitle required). (3) An in-depth investigation of topics in the fields of theoretical and/or applied linguistics with emphasis on a particular country/region/linguistic population, language or language group. Possible topics include: history of a language or language group; sociolinguistics of a language or language group(s); structure of a language or language group; phonetics, phonology, morphology, syntax, semantics, pragmatics or discourse analysis of a language and/or its dialects; acquisition of pragmatic, cultural and/or communicative competence in a language. MCL majors and graduate students will be expected to conduct research in the target language. May be repeated up to six credits with different subtitles. Provides MCL Major Elective credit and MCL minor credit. Prereq: Consent of instructor. MCL 598 will be taught at the same time and in the same place as LIN 517.

MCL 601 WORLD LANGUAGE TEACHING INTERNSHIP P-12. (12) Three-credit hour Seminar taught in conjunction with a 14-week P-12 teaching Internship. Students will be interning in local schools and meeting once a week to discuss various aspects of their teaching needs and progress as well as issues encountered during their teaching experience. Prereq: EDP 500/600, EDC 610, EDS 600, MCL 510, and MCL 610.

MCL 610 L2 TEACHING METHODS: 9-12, ADULT AND ADVANCED LEARNERS. (3) This course is focused on current approaches, strategies and techniques in second language teaching, with a particular emphasis on intermediate and advanced language learners and adolescent or adult students. It is also a practicum course, so all students must have access to a second language classroom and a class aligning to engage in these concepts in an actual classroom setting.

University of Kentucky 2016-2017 Undergraduate Bulletin 536

KEY: # = new course * = course changed † = course dropped ¶ = course purged
MD 810 FOUNDATIONS OF INFECTION, DISEASE AND THERAPEUTICS. (10)

This course covers basic mechanisms that underlie many of the organ specific diseases, with a focus on biochemistry, genetics, infections, immune mechanisms of disease, inflammation and neoplasia. It will include the observations that lead to a psychiatric diagnosis, and to some of the pathophysiology, psychotherapeutic and psychosocial modes of treatment. Prereq: Admission to Medical School (first year).

*MD 811 INTRODUCTION TO CLINICAL MEDICINE. (8)

The goal of the Introduction to Clinical Medicine (ICM) course is to provide students with opportunities to develop knowledge, skills, and attitudes about the doctor/patient relationship that are necessary to practice patient-centered and evidenced-based care. Prereq: Admission to the College of Medicine.

MD 813 BEHAVIORAL BASIS OF MEDICINE. (3)

The Behavioral Basis of Medicine delivers key concepts from Psychiatry, Pharmacology and Behavioral Science in a mostly lecture-based format. Students are introduced to psychiatric observations that lead to a psychiatric diagnosis, and to some of the pathophysiology, psychotherapeutic and psychosocial modes of treatment. Prereq: Admission to Medical School (first year).

*MD 814 ANATOMY. (9)

This course consists of lecture, small group, laboratory, and team based learning exercises that provide a basic understanding of anatomical principles, organization and development as well as the core principles of histology. Anatomical structures are introduced as a basis for future medical correlates and principles are taught via laboratory discussion, prosections, dissections, films, and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

#MD 816 HEMATOLOGIC AND LYMPHATIC SYSTEMS. (5)

As part of the first-year organ system-based curriculum, this course covers the normal structure, development and function of the components of the hematopoietic and lymphoreticular systems; the pathophysiology of hematologic and lymphatic diseases and disorders; and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Admission to Medical School (first year).

MD 817 NEUROSCIENCES. (8)

This course is an integrated presentation of relevant topics in human neuroanatomy, neurophysiology, neuropathology, neuropharmacology, and some microbiology as well as introductory correlations with neuropsychology. Teaching methodology includes lecture, small group discussion, laboratory, and self-study units. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

#MD 818 MUSCULOSKELETAL AND INTEGUMENTARY SYSTEMS. (5)

As part of the first-year organ system-based curriculum, this course covers the normal structure, development and function of the components of the musculoskeletal / integumentary systems, the pathophysiology of diseases and disorders of these systems, and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Admission to Medical School (first year).

#MD 819 CELLULAR STRUCTURE AND FUNCTION: BIOCHEMISTRY AND GENETICS. (3)

This course serves as a bridge between the basic and clinical sciences by teaching students the knowledge and skills necessary to develop into excellent diagnosticians. The course focuses on the following skills: the ability to perform a history and physical examination, integration of basic laboratory and radiographic data, and differential diagnosis formulation. Learning activities include: formal lectures, textbook readings, small group tutorials, preceptorships, workshops, online modules, and written and practical testing. Prereq: Promotion to the second year of the M.D. program.

MD 822 MUSCULOSKELETAL AND INTEGUMENTARY SYSTEMS. (6)

As part of the second-year organ system-based curriculum, this course covers the normal physiology and histology of the musculoskeletal / integumentary systems, the pathophysiology of diseases and disorders of these systems, and the medical and pharmacologic approaches to diagnosis and treatment. Learning activities include lecture, dissection laboratory, panel discussion, small group, case-based learning, and clinical correlations. Prereq: Promotion to the second year of the M.D. program.

MD 823 HEMATOLOGIC AND LYMPHATIC SYSTEMS. (3)

As part of the second-year organ system-based curriculum, this course covers the normal structure, development, and function of the components of the hematopoietic and lymphoreticular systems; the pathophysiology of hematologic and lymphatic diseases and disorders; and the medical and pharmacologic approaches to diagnosis and treatment. Learning activities include lectures, labs, self-directed study, workshops and small groups. Prereq: Promotion to the second year of the M.D. program.

MD 824 ENDOCRINE AND REPRODUCTIVE SYSTEMS. (5)

As part of the second-year organ system-based curriculum, this team-taught course covers the normal physiology and histology of the endocrine and reproductive systems, the pathophysiology of diseases and disorders of these systems, and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

MD 825 RENAL AND URINARY SYSTEMS. (4)

As part of the second-year organ system-based curriculum, this team-taught course covers the normal physiology and histology of the kidney and urinary system, the pathophysiology of renal and urinary diseases and disorders, and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

MD 826 CARDIOVASCULAR SYSTEM. (5)

As part of the second-year organ system-based curriculum, this course will cover the normal structure and physiologic function of the cardiovascular system, the pathophysiology of common disorders and diseases of the heart and vascular system, and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.
MD 827 RESPIRATORY SYSTEM. (5)
As part of the second-year organ system-based curriculum, this course covers the normal structure and function of the respiratory system, the immunology and pathophysiology of respiratory diseases and disorders, and the medical and pharmacologic approaches to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

MD 828 GASTROINTESTINAL SYSTEM AND NUTRITION. (4)
As part of the second-year organ system-based curriculum, this course covers the normal histology and physiology of the gastrointestinal system, the pathophysiology of gastrointestinal diseases and disorders, and the medical and pharmacologic approaches to diagnosis and treatment. The course also includes instruction on the principles of nutrition. Prereq: Promotion to the second year of the M.D. program.

MD 829 MULTISYSTEM AND INTEGRATIVE CONCEPTS. (3)
This course serves as the capstone course for the first- and second-year organ system-based curriculum. Students synthesize and apply the knowledge and concepts learned on an organ-based level to the multisystems level. Prereq: Promotion to the second year of the M.D. program.

MD 830 PEDIATRICS. (8)
This clinical course would provide an opportunity for students to care for the pediatric patient in multiple settings, including inpatient wards, newborn nursery and in the primary care setting. Students participate in daily clinical teaching. Students interview, examine, and formulate treatment plans for patient problems under the direct supervision of their residents and faculty preceptors. Laboratory, 40 hours per week. Prereq: Admission to third year of medical curriculum.

MD 831 INTERNAL MED/EMED INTEGRATED CLERKSHIP. (4)
This course will provide students with an introduction to the field of Emergency Medicine, Emergency Medical Services (EMS), and the approach to the acutely ill or injured patient. The students will complete an ACLS class during this rotation. Clinical, 40 hours per week. Prereq: Admission to third year of medical curriculum.

MD 832 CLINICAL NEUROSCIENCE: NEUROLOGY. (4)
The course will diagnose the common, acute, and emergency problems of disease of the central nervous system. Prereq: Completion of 2nd year of medical school.

MD 833 CLINICAL NEUROSCIENCES/PSYCHIATRY. (4)
This course provides opportunity for third year medical students to recognize, treat, and understand the etiology and pathology of common psychiatric disorders and emergencies. Laboratory, forty hours per week. Prereq: Admission to third year of medical curriculum.

MD 834 PRIMARY CARE/FAMILY AND COMMUNITY MEDICINE. (4)
This course introduces third year medical students to primary care family practice in rural and urban settings. Students participate in patient-centered teaching during which they work with primary care Family Physicians seeing ambulatory patients in their offices. Students are allowed to interview, examine, and formulate treatment plans for patient problems under the direct supervision of their faculty preceptors. Prereq: Admission to third year of medical curriculum.

MD 835 INTERNAL MEDICINE/EMERGENCY MEDICINE INTEGRATED CLERKSHIP. (12)
This course is an introduction to the concepts of internal medicine in both inpatient and outpatient settings. Students interview, examine and formulate treatment plans for patient problems under the direct supervision of faculty preceptors. The course will use didactic, computer simulated problems as well as clinical material and experiences to integrate basic sciences into the practice of medicine. Clinical, 40 hours per week. Prereq: Admission to third year of medical curriculum.

MD 837 MEDICAL SURGICAL CARE/SURGERY. (8)
This course is an introduction to the concepts in surgery. It is designed around the principles of Problem Based Learning to help students solve complex surgical problems. The course will use didactic exercises, computer simulated problems and clinical material and experiences to integrate basic sciences into the practice of medicine and surgery. Laboratory, 40 hours per week. Prereq: Admission to third year of medical curriculum.

MD 838 OBSTETRICS AND GYNECOLOGY. (4)
The clerkship will provide an opportunity for students to see the cycle of birth and neonatal care and to observe the mother/infant relationship through the outpatient clinic, labor and delivery, the newborn nursery, and the follow-up examination. Laboratory, 40 hours per week. Prereq: Admission to third year of medical curriculum.

MD 840 TRANSITION TO RESIDENCY. (4)
This course is designed to provide fourth year medical students with the foundational knowledge and skills in preparation for the supervised practice of medicine. Students will be divided into small groups dedicated to practice areas to hone the skill specific to their intended area of future practice. Within each group, students will review the foundational science and clinical applications of that knowledge. Simulation using both standardized patients and high fidelity simulators will provide realistic clinical scenarios to practice the wide range of skills necessary for medical practitioners. Prereq: Admission to fourth year of medical curriculum.

MD 841 GERONTOLOGY. (4)
This course combines several teaching techniques to provide students with basic skills necessary to care for elderly patients in a variety of clinical settings. Fourth year students participate in a four-week block rotating at locations in Lexington, with emphasis on assessment and rehabilitation. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical curriculum.
ME 330 FLUID MECHANICS. (3) Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows including derivation and application of the Navier-Stokes equations. Flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing, ME 220, and MA 214.

ME 344 MECHANICAL DESIGN. (3) Fundamentals of design with methods of approximation. Introduction to optimum design considerations. Synthesis and problems on the design of various mechanical elements. Prereq: ME 151, EM 302, engineering standing; concur: EM 313.

ME 358 ECONOMIC ANALYSIS OF MECHANICAL SYSTEMS. (3) Formulation of economic relationships. Familiarization with alternate mechanical systems and application of economic principles of selection of alternatives. Prereq: ME 321, engineering standing or consent of instructor.

ME 380 TOPICS IN MECHANICAL ENGINEERING (Variable topics). (3) A lecture-recitation course on a topic of current interest. Modern developments in mechanical engineering will be stressed. Offered as a technical elective in mechanical engineering. May be repeated to a maximum of nine credits. Prereq: Variable, given when topic identified and engineering standing.

ME 395 INDEPENDENT WORK IN MECHANICAL ENGINEERING. (1-3) Special research and problems for individual students who wish to pursue independent investigations. Variable credit: may be repeated to a maximum of six credit hours for technical electives. A final report is required. Prereq: Consent of department chairperson via permit. *ME 407 ENGINEERING ETHICS.

ME 408 SAFETY ENGINEERING. ME 411 ME CAPSTONE DESIGN I. (3) The first semester of the capstone design sequence in mechanical engineering. Topics important in product design and manufacturing are included, including consideration of economics, safety, and communication. Students will develop a project plan concerned with the design of a complex system of current interest to mechanical engineers. Students will work in small groups and emphasis will be on original work. Lecture, two hours; laboratory/independent team work, three hours per week. Prereq: Engineering standing; prereq: ME 310, ME 325, ME 340, ME 344.

ME 412 ME CAPSTONE DESIGN II. (3) Second semester of the capstone design sequence in mechanical engineering. Students will complete a project concerned with the design of a complex system of current interest to mechanical engineers. Students will work in small groups and emphasis will be on original work. Topics include engineering ethics, design and communication. Lecture, 1 hour; lab-4 hours per week. Prereq: ME 411 and engineering standing. Course is to be taken semester immediately following ME 411.

ME 490 HEATING, VENTILATING AND AIR-CONDITIONING. (3) An introductory course emphasizing the building systems aspects of thermal environmental design. Principles and applications of building energy requirements and thermal comfort criteria. Prereq: ME 325 and Engineering standing or consent of instructor. (Same as AEN 480G.)

ME 501 MECHANICAL DESIGN WITH FINITE ELEMENT METHODS. (3) This course emphasizes mechanical design techniques based on the finite element method, using machine design software at the starting point. Techniques for modeling machine elements will be shown in relation to the basic FEM theory. Emphasis will be on quantitative loads, the resulting stress and deflection, and relating them to design allowable, leading to an acceptable design solution. Prereq or concur: Engineering Standing, ME 344 and ME 205; or Graduate standing or consent of instructor. (Same as MFS 501.)

ME 503 LEAN MANUFACTURING PRINCIPLES AND PRACTICES. (3) This course will introduce students to the fundamental concepts of production improvement utilizing lean manufacturing principles and practices. In addition to the lectures, web-based simulation-inspired games will be used to help learn the application of the tools supported by industry case studies. A Capstone Simulation will be used to demonstrate the collective application of all the tools and techniques (details included below). An application project is also included where students will work in teams to study a real-life manufacturing or service environment to assess the current state, identify improvement opportunities and develop countermeasures for implementation. Prereq: Engineering standing or with instructor permission. (Same as MFS 503.)

ME 505 MODELING OF MANUFACTURING PROCESSES AND MACHINES. (3) This course is designed to provide the undergraduate and graduate students in mechanical and manufacturing engineering basic knowledge and understanding of the major manufacturing processes for modeling, monitoring and control of these processes through a series of analytical and experimental techniques and tools, including group work for assignments and experiments. Prereq: EM 302, EM 313, and engineering standing; or graduate standing with instructor consent. (Same as MFS 505.)

ME 506 MECHANICS OF COMPOSITE MATERIALS. (3) A study of the structural advantages of composite materials over conventional materials, considering high-strength-to-weight and stiffness-to-weight ratios. Fiber reinforced, laminted and particulate materials are analyzed. Response of composite structures to static and dynamic loads, thermal and environmental effects, and failure criteria are studied. Prereq: EM 302, engineering standing or consent of instructor. (Same as EM/MSE 506.)

ME 507 DESIGN FOR MANUFACTURING. (3) This course will provide a strong foundation in the concepts, theories and applications of design engineering methodologies for effective manufacture of high quality products at low costs and high productivity. In addition to the lectures, the assembly and design analysis of “product based assembly kits” will be used to apply and help learn the tools presented in class. The final project includes the application of these tools to re-design a given product from a manufacturing and assembly perspective. Prereq: ME 344 or instructor permission. (Same as MFS 507.)

ME 510 VIBRO-ACOUSTIC DESIGN IN MECHANICAL SYSTEMS. (3) Application of basic acoustics and vibrations to engineering problems in vibro-acoustic design. The objective is to acquaint the student with the tools used in industry for noise and vibration control to improve the student’s knowledge of the major applications of these tools in the automotive, aerospace, and consumer product industries. Prereq: ME 310, ME 340. This course is open only to graduate students or undergraduates with engineering standing.

ME 512 MANUFACTURING SYSTEMS. (3) This course introduces students to fundamentals of design, planning and control of manufacturing systems aided by computers. Concepts of control hardware, NC programming languages, software aspects related to NC manufacturing, programmable controllers, performance modeling of automated manufacturing systems, group technology and flexible manufacturing systems, etc., will be addressed. Prereq: Engineering standing. (Same as MFS 512.)

ME 513 MECHANICAL VIBRATIONS. (3) The analysis of vibrational motion of structural and mechanical systems. Single-degree-of-freedom systems; free vibrations; nonperiodic excitation; harmonic excitation. Modal analysis of multiple-degree-of-freedom systems. Vibration of continuous bodies, including strings and bars, (axial, torsional and flexural modes). Energy methods. Prereq: EM 313 and EM 302, engineering standing or consent of instructor. (Same as MFS 513.)

ME 514 COMPUTATIONAL TECHNIQUES IN MECHANICAL SYSTEM ANALYSIS. (3) The analysis of vibrational motion of structural and mechanical systems. Single-degree-of-freedom systems; free vibrations; nonperiodic excitation; harmonic excitation. Modal analysis of multiple-degree-of-freedom systems. Vibration of continuous bodies, including strings and bars, (axial, torsional and flexural modes). Energy methods. Prereq: EM 313 and EM 302, engineering standing or consent of instructor. (Same as MFS 513.)

ME 515 ROTORDYNAMICS OF TURBOMACHINERY. (3) An introductory course emphasizing the building systems aspects of thermal environmental design. Principles and applications of building energy requirements and thermal comfort criteria. Prereq: ME 325 and Engineering standing or consent of instructor. (Same as AEN 480G.)

ME 516 SYSTEMS ENGINEERING. (3) Systems Engineering is a discipline necessary for cost-effective development of complex multi-disciplinary systems. Optimal design of modern systems for defense, transportation, telecommunications and energy, among other industries, requires a different perspective than the design of subsystems operating within them. This course presents principles and the practice of Systems Engineering, along with its origins in the aerospace and software industries, historical perspective and case studies of current interest. Topics include system life-cycle, cost estimation, modeling, performance, trade studies, design optimization (with minimal information), risk management, proposal writing and others. Guest lecturers and case studies provide a realistic setting for understanding the application of course materials. Prereq: Engineering Standing.

ME 526 LEAN OPERATIONS MANAGEMENT. (3) This course will cover topics in basic lean system operations as well as the management system that supports the attainment of highest customer satisfaction with respect to Safety, Quality, Cost, Productivity, Delivery and Resource Development. The fundamental focus of the management system employs discovery learning techniques and consists of in-class presentations with a focus on hands-on activities, and selected outside assignments to teach and demonstrate the development of a lean operations environment and the management system to support it. Working in teams, students apply fundamental lean tools and concepts to develop a lean operations environment capable of driving continuous improvement in a simulated factory. As the operational environment evolves, key management principles and tools are explored using the
Course Descriptions

teachings of Taichi Ohno and others considered to be the pillars of the Toyota Production System. Prereq: Enrollment restricted to junior-level or above students. (Same as EE/MFS 526.)

**ME 527 APPLIED MATHEMATICS IN THE NATURAL SCIENCES I.**
Construction, analysis and interpretation of mathematical models applied to problems in the natural sciences. Physical problems whose solutions involve special topics in applied mathematics are formulated, various solution techniques are introduced, and the mathematical results are interpreted. Fourier analysis, dimensional analysis and scaling rules, regular and singular perturbation theory, random processes and diffusion are samples of selected topics studied in the applications. Intended for students in applied mathematics, science and engineering. Prereq: MA 432G or three hours in an equivalent junior/senior level mathematics course, or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as MA 527.)

ME 530 GAS DYNAMICS.
Consideration of the mass, energy and force balances applied to compressible fluids. Isentropic flow, diabatic flow, flow with friction, wave phenomena and one-dimensional gas dynamics. Applications to duct flows and to jet and rocket propulsion engines. Prereq: ME 321, ME 330 and Engineering standing.

ME 531 FLUID DYNAMICS I.
Stress at a point (introduced as a tensor of rank two). Equation of conservation of mass, rate of strain tensor, derivation of Navier-Stokes equation, source-sink flows, motion due to a doublet, vortex flow, two- and three-dimensional irrotational flow due to a moving cylinder with circulation, two-dimensional airfoils. Prereq: ME 330, ME 432G and Engineering standing. (Same as EM 531.)

**ME 548 AERODYNAMICS OF TURBOMACHINERY.**
Aerodynamic analysis and design of turbomachines (pumps, compressors and turbines). Blade element performance (deflection and losses), and models for performance prediction are present. Special topics - rotating stall and surge, and aeromechanical considerations. Prereq: ME 321 and ME 330. This course is open only to graduate students or undergraduates with engineering standing.

**ME 549 POWER GENERATION.**
Modern powerplants for electric power generation and cogeneration. Thermodynamic analysis of different concepts of powerplants. Design studies of specific powerplants. Prereq: ME 321 and ME 330. This course is open only to graduate students or undergraduates with engineering standing.

**ME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS.**
Theory and practice as related to the chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325, or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as CME/MFS/MSE 554.)

**ME 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS.**
This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as EE/MSE 555.)

**ME 556 INTRODUCTION TO COMPOSITE MATERIALS.**

**ME 560 ENGINEERING OPTICS.**
Fundamentals of geometrical and physical optics; applications as related to problems in engineering design and research, details of some optical measurement techniques; introduction to lasers; techniques for determining optical properties. Prereq: Engineering standing. (Same as EE 566.)

**ME 563 BASIC COMBUSTION PHENOMENA.**
Simultaneous application of fluid mechanics, heat and mass transfer, chemical kinetics and thermodynamics to combustion. Topics covered include chemical kinetics, chain and thermal explosion, detonation and deflagration, flammability limits, stirred reactors. Flame stabilization in high and low velocity streams, laminar and turbulent diffusion flames, droplet burning, and metal combustion. Prereq: ME 321, ME 330, ME 325 and engineering standing; or graduate standing.

**ME 565 SCALE MODELING IN ENGINEERING.**
A study of concepts of scale modeling in engineering applications. The course will include dimensionless numbers, scaling laws, and their application in engineering design and research. Prereq: ME. 310, ME 321, ME 325. This course is open only to graduate students or undergraduates with engineering standing.

**ME 570 FUNDAMENTALS OF NON ELECTRONIC DEVICES AND MATERIALS.**
Energy bonds in crystals, heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostuctures; current topics in nanoscale devices. Prereq: ME 310, ME 321, ME 325. This course is open only to graduate students or undergraduates with engineering standing. (Same as EE/MSE 570.)

**ME 580 HEATING, VENTILATING AND AIR CONDITIONING.**
A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in thermal environmental design. Building energy requirements will be computed and thermal comfort criteria will be studied. Prereq: BAE 427 or ME 321, or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as BAE 580.)

**ME 585 FOURIER SERIES AND BOUNDARY VALUE PROBLEMS.**
An introductory treatment of Fourier series and its application to the solution of boundary value problems in the partial differential equations of physics and engineering. Orthogonal sets of functions, Fourier series and integrals, solution of boundary value problems, theory and application of Bessel functions and Legendre polynomials. Prereq: MA 432G or equivalent. This course is open only to graduate students or undergraduates with engineering standing. (Same as MA 485G.)

**ME 599 TOPICS IN MECHANICAL ENGINEERING (Subtitle required).**
A detailed investigation of a topic of current significance in mechanical engineering such as: computer-aided manufacturing, special topics in robotics, and current topics in heat transfer. May be repeated under different subtitles to a maximum of nine credits. A particular topic may be offered at most twice under the ME 599 number. Prereq: Variable; given when topic is identified. This course is open only to graduate students or undergraduates with engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics.

**ME 601 ADVANCED CAE APPLICATIONS.**

**ME 602 DYNAMICS OF DISTRIBUTED MECHANICAL SYSTEMS.**
Applications of small-oscillation shell theory to continuous mechanical systems modeled by shells, plates, rings, arches, membranes, beams, etc. Study of natural frequencies, modeshapes, forced-vibration characteristics, system dampings, dynamic influence function, combination of subsystems, active and passive vibration controls and dampings. Prereq: ME 540 or EM 513, or consent of instructor.

**ME 603 MECHANICS OF PLASTIC SOLIDS I.**
Permanent changes in shape of solid materials occur as plastic deformations in many engineering applications, such as extrusion, forging and rolling. This course examines the experimental basis and fundamental theoretical framework for plastic materials. The analysis of plastic deformations in simple bending, torsion, tension and compression, and some two dimensional problems are presented. Connection between mechanics parameters, design variables and metallurgical phenomena are discussed. Limit analysis is studied. Prereq: EM 601 or ME 651 or consent of instructor.

**ME 605 MODELING, SIMULATION AND CONTROL FOR MANUFACTURING.**
The purpose of this course is to examine methods and systems from the perspectives of modeling, simulation, and control of manufacturing facilities. The emphasis will be primarily on techniques that can be used to model and evaluate performance of systems. Students are encouraged to think critically about available technologies, identify relative strengths and weaknesses, and analyze the technologies toward developing improved solutions to factory control and information management problems. Prereq: Graduate Standing. (Same as EE/MFS 605.)

**ME 606 GLOBAL ISSUES IN MANUFACTURING.**
The need to increase quality, productivity, efficiency and sustainability in manufacturing operations spanning the product, process and systems (manufacturing systems as well as supply chain) domains is essential for companies to be successful. The increased globalization of markets and manufacturing operations, declining natural resources and negative consequences of some manufacturing practices as well as increased legislation in many regions has led to many new challenges that companies must overcome to be successful in competitive markets. This seminar course will introduce students to a variety of global issues in manufacturing through presentations by leading national and international experts in these domains. The seminars will cover a broad range of manufacturing relevant topics relevant to many disciplines including manufacturing, mechanical and electrical engineering. The course can also help graduate students identify topical issues that need further investigation and could become potential research topics. (Same as EE/MFS 606.)

**ME 607 ANALYSIS OF METAL CUTTING PROCESSES.**
Advanced topics in metal cutting involving the mechanics of metal cutting including cutting forces, tool–wear/tool-life and temperature analysis, surface finish and integrity, chip control, machinability assessments and advances in cutting tool technology. Prereq: ME 505. (Same as MFS/MSE 607.)
ME 610 ENGINEERING ACOUSTICS. (3)
A comprehensive study of wave propagation in fluids; derivation of the scalar wave equation and study of its elementary solutions for time harmonic and transient waves in one, two and three dimensions. Radiation and scattering of waves at fluid and solid boundaries. Integral equation solution of the scalar velocity wave potential; numerical methods. Prereq or concurr: MA 432G.

ME 611 BOUNDARY ELEMENT METHODS IN ENGINEERING. (3)
Introduction of boundary element methods for use in solving common engineering equations, such as the Laplace equation, the Poisson equation, the wave equation, and the diffusion equation. Both the theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: MA 537 or consent of instructor. (Same as EGR 611.)

ME 613 NONLINEAR OSCILLATIONS. (3)
Many physical systems exhibit some nonlinear behavior. This course presents some methods of analyzing discrete, nonlinear, dynamical systems and applies the methods to typical mechanical systems. Various kinds of nonlinear behavior, including resonance phenomena such as harmonics, parametric excitation, and discontinuous jumps in amplitude are considered. Lyapunov stability criteria and Floquet and Routhian procedures for performing stability analyses of systems are introduced, and their physical interpretations for various systems are studied. Prereq: EM/ME 513.

ME 620 ADVANCED ENGINEERING THERMODYNAMICS. (3)
Critical treatment of the laws of thermodynamics, relations among thermodynamic properties; stability of systems; thermodynamic processes; selected special topics. Prereq: ME 321.

ME 626 ADVANCED HEAT CONVECTION. (3)
Comprehensive study of heat convection; derivation of equations of convection of mass, momentum, and energy; boundary layer equations; classical solutions of laminar convection problems; turbulent convection; analogies between momentum and energy. Prereq: ME 325, MA 432G or concurrent.

ME 627 RADIATION HEAT TRANSFER. (3)
Principles of thermal radiation, the determination of radiation properties, and the analysis of radiation heat transfer. Results of recent radiation researches are included in the discussions. Prereq: ME 325, MA 432G or concurrent.

ME 628 BOILING AND CONDENSATION. (3)

ME 631 FLUID DYNAMICS II. (3)
A continuation of ME 531 with emphasis on viscous flow. Exact and approximate solutions, boundary lay theory. Jets, wakes, rotating systems, compressible boundary layer and hydrodynamic stability. Prereq: ME 531 or consent of instructor.

ME 634 TURBULENT FLOWS. (3)
Physical and analytical description of turbulent flows, isotropic turbulence, boundary layers and shear flows, free turbulence in jets and wakes. Measurement techniques. Prereq: ME 531; prereq or concurr: ME 631.

ME 640 ADVANCED ANALYSIS AND SIMULATION OF DYNAMIC SYSTEMS. (3)
A brief review of vectors and an in-depth discussion of tensors and tensor calculus. Stress, deformation and strain. Continuum balance principles of mass, momentum and energy, the equations of motion and the energy equation. Entropy, the principles of material frame indiffERENCE and material symmetry. Various constitutive models, including elasticity (linear and/or non-linear), plasticity and viscoelasticity. Thermoelasticity, hyperelasticity, hypoelasticity, and electroelasticity may also be addressed. Prereq: EM 531 or ME 532 or consent of instructor.

ME 644 ADVANCED DYNAMICS. (3)
Many physical systems in engineering involve rigid bodies in translation and rotation. Such motions are studied in this course by the use of Euler’s Laws. The kinematical description of the motions utilize the concept of reference frames. The inertia properties of rigid bodies, and the energy functions for rigid bodies are covered. Analytical and numerical solutions of dynamical systems of engineering interest are considered. Prereq: EM 313; prereq or concurr: MA 432G.

ME 645 ADVANCED CONTROL SYSTEM ANALYSIS. (3)
Conceptual development and study of complex systems; their synthesis and design; analysis and optimization of system parameters. Input-output relationships; formulation of mathematical models, parameters and constraints on physical systems. Prereq: ME 440 or instructor consent.

ME 647 SYSTEM OPTIMIZATION. I. (3)
Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g., biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as BAE 647.)

ME 651 MECHANICS OF ELASTIC SOLIDS I. (3)
Many engineering applications involve the use of materials that behave elastically when performing their designed function. This course concerns the general analysis of small deformations, stress, and stress-deformation relations for elastic bodies. The solution of typical problems frequently encountered in engineering applications, e.g., extension, bending, and torsion of elastic bars, stress concentrations and thermoelastic behavior, are studied. Some modern computational methods currently used in engineering practice are introduced. Prereq: MA 432G or consent of instructor.

ME 652 MECHANICS OF ELASTIC SOLIDS II. (3)
Continuation of EM 651 with more attention to the fundamental structure of and important historical and contemporary contributions to elastic theory. Extensive use of modern computational methods that were introduced in the first course will provide familiarity with the solution of larger scale, industrially important elasticity problems. Application of the boundary integral equation method (BIE) will be emphasized. Some use also will be made of the finite element method, primarily for comparison with BIE. Instruction will include “hands-on” experience with digital-computer program packages. Prereq: EM 651 or consent of instructor.

ME 653 METHODS OF APPLIED DIFFERENTIAL EQUATIONS. (4)
Theory and implementation of main algorithms widely used for solving multi-dimensional partial differential equations arising in engineering applications such as fluid dynamics, heat and mass transfer, semiconductor simulation, etc. Numerical solution of steady and time-dependent linear partial differential equations on rectangular domains via finite difference techniques. Linearization methods for treatment of nonlinear problems. Numerical grid generation, transforming irregular domains into rectangular computational grids. Prereq: MA 537, or consent of instructor, and competence with a high-level programming language.

ME 691 CFD I - INCOMPRESSIBLE FLOWS. (3)
This course will cover a control-volume CFD approach for the conservation of momentum, heat and mass transfer. The emphasis will be on the discretization of the transport equations in general coordinates and its application in both structured and unstructured grid arrangements. Modern numerical schemes and pressure solution algorithms will also be covered. An introduction of turbuNCe modeling will be provided. At the end of the lecture, the students not only are able to understand the basics of commercial software but also will be able to write a general coordinate code for fluid flow, heat and mass transfer applications. Prereq: ME 531.

ME 692 CFD II - COMPRESSIBLE FLOWS. (3)
This second course shall focus on the solution of the compressible Navier-Stokes equations. The Van-Leer’s and Roe’s approaches will be discussed to derive the discretization equations. Modern shock capturing schemes, such as FCT, TVD and ENO will be introduced. The solution techniques such as ADI, DDAI and line-relaxation will be used to solve the system of equations. Multi-grid acceleration techniques will be introduced to speed up the rate of convergence. Finally, the parallelization of CFD codes using shared and distributed computers will be discussed. Prereq: ME 531 and ME 691.

ME 699 TOPICS IN MECHANICAL ENGINEERING (Subtitle required). (3)
A detailed investigation of a topic of current significance in mechanical engineering. May be repeated to a maximum of nine credits under different subtitles. A particular topic may be offered at most twice under the ME 699 number. Prereq: Variable, given when topic is identified.

ME 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester for which the examination is given. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ME 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ME 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ME 780 SPECIAL PROBLEMS IN MECHANICAL ENGINEERING. (3)
This course consists of individual work in one of the various fields of mechanical engineering. May be repeated three times for a maximum of 12 credits. Prereq: Approval of instructor.

ME 790 RESEARCH IN MECHANICAL ENGINEERING. (1-9)
Work may be taken in any field of mechanical engineering, subject to the approval of the director of graduate studies. May be used to satisfy pre-qualifying examination residency credit. May be repeated to a maximum of 18 hours.
Course Descriptions

MED 610 BIOLOGY AND THERAPY OF CANCER. (3)
Biology of cancer will be discussed at the molecular, cellular and organ systems level. Emphasis will be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects tumor cell behavior and its interactions with the host immune system. The biology of hematopoietic cells will also be included. Clinicians active in treatment and research of various types of cancer will be invited to participate in the lectures. Prereg: BCH 501, 502, BIO 685.

MED 815 FIRST-YEAR ELECTIVE, MEDICINE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereg: Admission to first year, College of Medicine.

MED 825 SECOND-YEAR ELECTIVE, MEDICINE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereg: Admission to second-year medical curriculum and approval of adviser.

MED 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereg: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

MFS 505 MODELING OF MANUFACTURING PROCESSES AND MACHINES. (3)
This course is aimed at providing the undergraduate and graduate students in mechanical and manufacturing engineering basic knowledge and understanding of the major manufacturing processes for modeling, monitoring and control of these processes through a series of analytical and experimental techniques and tools, including group work for assignments and experiments. Prereg: EM 302, EM 313, and engineering standing; or graduate standing with instructor consent. (Same as ME 505.)

*MFS 907 DESIGN FOR MANUFACTURING. (3)
This course will provide a strong foundation in the concepts, theories and applications of design engineering methodologies for effective manufacture of high quality products at low costs and high productivity. In addition to the lectures, the assembly design and analysis of “product based assembly kits” will be used to apply and help learn the tools presented in class. The final project includes the application of these tools to re-design a given product from a manufacturing and assembly perspective. Prereg: ME 344 or instructor permission. (Same as ME 507.)

*MFS 909 LEADERSHIP FOR A LEAN ENTERPRISE. (3)
Perhaps the most difficult part of a so-called “lean” transformation is to establish an appropriate culture which is greatly influenced by actions of leadership. The goal of leadership is to foster the creation of a culture which allows team member engagement and drives continuous improvement focused on creating the highest value for the customer. This is accomplished by developing a “True Lean” operational environment in which the group by themselves uses systematic problem solving to improve the work they do to help meet the organizations’ targets and goals without the need for direct management involvement. The challenge is to understand how this can be accomplished. This is a distance learning course designed to provide an introduction to important leadership thinking and activities required to create and sustain a lean culture within an organization as practiced by Toyota. The primary content for this course comes from the internationally recognized University of Kentucky Lean System Program’s Public Lean Executive Leadership Institute and Lean Certification courses. In addition to weekly presentations by experienced Toyota executives and others, there will be weekly activities/designs designed to explore each topic in more depth. Topics will include: understanding the True Lean destination and core thinking, management led problem solving and implementing the path to True Lean, and developing a vision and strategy to achieve it. Other important topics discussed include the pillars of a lean business philosophy, the people side of lean, system operations management structure and measurement systems that support and sustain an ongoing lean transformation. Prereg: Student Lean Certification, or MFS 503 (Lean Principles and Practices), or MFS 526 (Lean Operations Management), or consent of instructor.

MFS 512 MANUFACTURING SYSTEMS. (3)
This course introduces students to fundamentals of design, planning and control of manufacturing systems aided by computers. Concepts of control hardware, NC programming languages, software aspects related to NC manufacturing, programmable controllers, performance modeling of automated manufacturing systems, technology and flexible manufacturing systems, etc. will be addressed. Prereg: Engineering standing. (Same as ME 512.)

*MFS 513 MECHANICAL VIBRATIONS. (3)
The analysis of vibrational motion of structural and mechanical systems. Single-degree-of-freedom systems; free vibrations; nonperiodic excitation; harmonic excitation; Modal analysis of multi-degree-of-freedom systems. Vibration of continuous systems, including strings and bars (axial, torsional and flexural modes). Energy methods. Prereg: EM 313 and EM 302, engineering standing or consent of instructor. (Same as ME 513.)

*MFS 515 ROTORDYNAMICS OF TURBOMACHINERY. (3)
Review of dynamic characteristics unique to high speed rotating shafts in turbomachinery. Equations of motion for a rotor, including gyroscopic effects; computational methods, including finite element; effects of bearings and nonlinearities, stability; application to design situations in high-speed equipment, including aerospace, energy generation, and other industrial applications. Prereg: EM 313 and Engineering standing, or consent of instructor for Western Kentucky University students: ME 415 and ME 344; pre/co-requisites for UK students: ME 344 and ME 501; or Graduate Standing or consent of instructor. (Same as ME 515.)

*MFS 525 ORGANIZATIONAL LEARNING FOR LEAN MANUFACTURING. (3)
Learning organizations are skilled at creating, acquiring, and transferring knowledge, and at modifying their behavior to reflect the new knowledge and insights. In this context, this course will discuss leadership styles, adult learning principles, communication, organizational learning, and a structure for learning. Prereg: MFS 503 or consent of instructor.

*MFS 526 LEAN OPERATIONS MANAGEMENT. (3)
This course will cover topics in basic lean system operation as well as the management system to support the attainment of highest customer satisfaction with respect to Safety, Quality, Cost, Productivity, Delivery and Human Resource Development. The instructional method employs discovery learning techniques and consists of in-class presentations with a focus on hands-on activities, and selected outside assignments to teach and demonstrate the development of operations environments within the manufacturing system to support it. Working in teams, students apply fundamental lean tools and concepts to develop a lean operations environment capable of driving continuous improvement in a simulated factory. As the operational environment evolves, key management principles and tools are explored using the teachings of Taiichi Ohno and others considered to be the pillars of the Toyota Production System. Prereg: Enrollment restricted to junior-level or above students. (Same as EE ME 526.)
**MFS 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS.** (3) Theory and practice of chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as CME/ME/MSE 554.)

**MFS 563 SIMULATION OF INDUSTRIAL PRODUCTION SYSTEMS.**

**MFS 599 TOPICS IN MANUFACTURING SYSTEMS ENGINEERING (Subtitle required).** (3) A detailed investigation of a topic of current significance in manufacturing systems engineering such as: computer-aided manufacturing, special topics in robotics, and lean/ agile manufacturing. May be repeated under different subtitles to a maximum of six credits. A particular topic may be offered at most twice under the MFS 599 number. Prereq: Variable; given when topic is identified.

**MFS 603 MANAGEMENT FOR A LEAN SYSTEM.**

**MFS 605 MODELING, SIMULATION AND CONTROL FOR MANUFACTURING.** (3) The purpose of this course is to examine methods and systems from the perspectives of modeling, simulation, and control of manufacturing facilities. The emphasis will be primarily on techniques that can be used to model and evaluate performance of systems. Students are encouraged to think critically about available technologies, identify relative strengths and weaknesses, and analyze the technologies toward developing improved solutions to factory control and information management problems. Prereq: Graduate Standing. (Same as EE/ME 605.)

**MFS 606 GLOBAL ISSUES IN MANUFACTURING.** (3) The need to increase quality, productivity, efficiency and sustainability in manufacturing operations spanning the product, process and systems (manufacturing systems as well as supply chain) domains is essential for companies to be successful. The increased globalization of markets and manufacturing operations, declining natural resources and negative consequences of some manufacturing practices as well as increased legislation in many regions has led to many new challenges that companies must overcome to be successful in competitive markets. This seminar course will introduce students to a variety of global issues in manufacturing through presentations by leading national and international experts in these domains. The seminars will cover a broad range of manufacturing related topics relevant to many disciplines including manufacturing, mechanical and electrical engineering. The course can also help graduate students identify topical issues that need further investigation and could become potential research topics. (Same as EE/ME 606.)

**MFS 607 ANALYSIS OF METAL CUTTING PROCESSES.** (3) Advanced study of metal cutting involving the mechanics of metal cutting including cutting forces, tool wear, tool life and temperature analysis, surface finish and integrity, chip control, machinability assessments and advances in cutting tool technology. Prereq: ME 505. (Same as ME/ME 607.)

**MFS 611 MANAGING EFFECTIVE ORGANIZATIONS.** (3) A critical examination of behavior and performance within organizations and between organizations. Special attention is paid to the problem of performance at the individual, group, and formal organizational level. (Same as MGT 611.)

**MFS 612 DESIGN OF LEAN MANUFACTURING SYSTEMS.** (3) Technical design of manufacturing systems in accordance with lean manufacturing principles. Topics include models for characterization and analysis of factory flow dynamics, production flow analysis, work cell design, and design of pull-based production control systems. Prereq: MFS 503 Lean Manufacturing Principles and Practices.

**MFS 613 SUSTAINABILITY, ETHICS, AND LEADERSHIP IN MANUFACTURING ORGANIZATIONS.** (3) This course is intended to provide future manufacturing managers and leaders a basic understanding of important theories and practices necessary to successfully manage and lead teams to achieve manufacturing organizational objectives. The course is organized into several modules. The modules will focus on developing an understanding and capability to approach ethical and sustainability concerns confronted by manufacturing organizations. This will include coverage of tools to help identify and address societal and environmental obligations of manufacturing organizations and issues confronting them that span multiple cultures and nations. Because people are one of the most important resources in any organization, the second and third modules will address organizational behavior (O&B) and individual effectiveness. O&B theories and practices that can be used to increase the capability to observe, understand, and manage people’s behavior will be covered. The last module considers safety and ergonomic as they relate to manufacturing organizations. Coverage will include tools and techniques that can be used to analyze the manufacturing workplaces and ensure its ergonomic design as well as an overview of the current state of occupational safety and health regulations. Prereq: Graduate standing.

**MFS 681 SUSTAINABLE QUALITY SYSTEMS DESIGN.** (3) This course provides the theory and principles of sustainable quality production systems as originally developed by Shewhart and Deming. The course will focus on statistical methods from the viewpoint of quality control: at the product specification level; at the product production level; and at the judgment of quality at the inspection level. Prereq: Basic statistics.

**MFS 699 TOPICS IN MANUFACTURING SYSTEMS ENGINEERING (Subtitle required).** (1-3) A detailed investigation of a topic of current significance in manufacturing systems engineering such as: computer-aided manufacturing, special topics in robotics, and lean/ agile manufacturing. May be repeated under different subtitles to a maximum of six credits. A particular topic may be offered at most twice under the MFS 699 number. Prereq: Variable; given when topic is identified.

**MFS 748 MASTER’S THESIS RESEARCH.** (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**MFS 768 RESIDENCE CREDIT FOR MASTER’S DEGREE.** (1-6) May be repeated to a maximum of 12 hours.

**MFS 780 SPECIAL PROBLEMS IN MANUFACTURING SYSTEMS ENGINEERING.** (3) Course consists of specialized individual work in manufacturing systems engineering. Laboratory, nine hours. May be repeated to a maximum of nine credits. Prereq: Approval of instructor.

**MFS 784 RESEARCH PROJECT IN MANUFACTURING SYSTEMS ENGINEERING.** (3) Individual study related to a special research project supervised by the student’s advisor. A final written report on the project is required. This course is open only to and required by students pursuing the M.S. in MFS degree with a non-thesis option (Plan B). The course cannot satisfy part of the required thirty hours of course work for Plan B. Prereq: Approval of student’s advisor.

**MGT Management**

**MGT 292 INTRODUCTION TO ENTREPRENEURSHIP.** (3) This course provides a broad overview of the art and science of entrepreneurship and venture creation. The essential elements of the entrepreneurial process will be covered including: business planning, business model analysis, entrepreneurial marketing, entrepreneurial finance, legal issues (e.g. managing intellectual property, legal forms of organization), new venture alliances and deals, and social entrepreneurship.

**MGT 301 BUSINESS MANAGEMENT.** (3) A study of planning, organizing and controlling; an interdisciplinary approach; actual decision-making cases. Prereq: STA 291, ECO 201, 202 and ACC 202, or consent of instructor.

**MGT 309 INTRODUCTION TO INTERNATIONAL BUSINESS.** (3) The course focuses on the management of international businesses, investigating the effects of differences in national requirements, and cultural expectations on management. Prereq: MGT 301.

**MGT 320 SURVEY OF HUMAN RESOURCE MANAGEMENT.** (3) Survey of the field of Human Resource Management. Includes an introduction to the topics of labor law, workforce planning, recruitment, selection, training, performance management, compensation, and labor relations. Prereq: MGT 301.

**MGT 340 ETHICAL AND REGULATORY ENVIRONMENT.** (3) This course focuses on ethical principles, the nature of the capitalist-liberalist/postmodernist viewpoint, government influence on business, and the responsibility of business to society. Topics to be covered include: major approaches to ethical reasoning, antitrust law, social regulation, and the economic and social theories that undergird the concept of the social responsibility of business. Prereq: Junior standing or consent of instructor.

**MGT 341 BUSINESS LAW I.** (3) An introduction to the United States legal system and its application to the business community. Topics to be considered include: contracts, agency, commercial paper, and real property. Prereq: Junior standing or consent of instructor.

**MGT 390 SPECIAL TOPICS IN MANAGEMENT (Subtitle required).** (3) Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in management. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the MGT 390 number. Prereq: Consent of instructor.

**MGT 395 INDEPENDENT STUDY IN MANAGEMENT.** (1-6) Course designed to accommodate students’ independent exploration of specific topics within management. Course must be under the supervision of an instructor. May be repeated to a maximum of six credits. Prereq: GPA of 3.0, upper division status, approval of instructor and chairperson.
Course Descriptions

MGT 410 ANALYSIS OF ORGANIZATIONAL BEHAVIOR. (3) This course draws on a variety of pedagogical sources—ranging from social psychological theories to in-depth case analyses and organizational simulations—to help students better manage the human and interpersonal challenges they confront in the contemporary workplace. Prereq: MGT 301.

MGT 430 SERVICES MARKETING MANAGEMENT. (3) This course addresses marketing and management issues and problems faced by service organizations. Marketing and management concepts are broadened and applied to the service organizations. Topics related to service quality, the marketing mix, and service delivery are covered. Prereq: MKT 300, MGT 301. (Same as MKT 430.)

MGT 450 NEGOTIATIONS AND CONFLICT RESOLUTION. (3) This course focuses on developing your negotiating skills and making you a more effective negotiator. Topics covered include diagnosing negotiation situations, strategizing, planning future negotiations, improving your preferred negotiating style, dealing with difficult negotiation partners, buying cars and houses, negotiating job offers, dealing with agents, multi-issue negotiations, multi-party negotiations, ethical considerations in negotiation, and global negotiations. The course emphasizes in-class role playing as a learning tool; thus, class attendance is mandatory. Prereq: MGT 301.

MGT 491 SMALL BUSINESS MANAGEMENT. (3) An examination of the problems and decisions inherent in the establishment, financing, and management of small business firms. Prereq: MKT 300, MGT 301, MGT 340 and FIN 300.

MGT 492 ENTREPRENEURSHIP AND VENTURE CREATION. (3) This course examines the key issues that are associated with the discovery and development of entrepreneurial opportunities as it applies to venture creation. Some emphasis is placed on the role of the entrepreneur in society as it pertains to increasing economic and social welfare for others. Students will develop an understanding of entrepreneurship as it relates to the people, opportunity, context, and deals of the new venture creation process. Prereq: Senior standing and MGT 300, MGT 301, MGT 340 or MGT 341 and FIN 300.

MGT 499 STRATEGIC MANAGEMENT. (3) This course focuses on the unique challenges of managing the full range of business functions and processes in single-business and diversified companies. It actively involves students in the exploration of current strategic management concepts, frameworks, and techniques commonly used by top-level managers to gain competitive advantage over rivals. Prereq: MGT 300, MGT 301, MGT 340, FIN 300 and senior standing.

MGT 608 COMPARATIVE INTERNATIONAL MANAGEMENT. (3) A comparison of management concepts and practices in different countries and the role of management in economic development; an interdisciplinary approach emphasizing the impact of sociological-cultural factors, legal-political factors and education on management development. Prereq: MGT 301 or consent of instructor.

MGT 610 GLOBAL MANAGEMENT. (3) This course examines the problems of managing a business enterprise which spans international boundaries. Students will develop an understanding of the political, social, economic, and technological factors driving globalization and will consider the impact of these forces on competition, markets, industry structure, and organization.

MGT 611 MANAGING EFFECTIVE ORGANIZATIONS. (3) A critical examination of behavior and performance within organizations and between organizations. Special attention is paid to the problem of performance at the individual, group, and formal organizational level. (Same as MPS 611.)

MGT 612 NEGOTIATION AND CONFLICT RESOLUTION. (3) An action learning course devoted to developing the project management and business process analysis skills necessary to diagnose and solve real-world business problems.

MGT 620 PERSONNEL AND INDUSTRIAL RELATIONS. (3) A broad overview of the art and science of entrepreneurship, venture creation and business start-ups. It covers the essential elements of the entrepreneurial process including entrepreneurial marketing, business planning, business model analysis, legal issues, new venture financing, new venture alliances and deals, and social entrepreneurship.

MGT 640 LEGAL AND REGULATORY ENVIRONMENT. (3) A study of various legal issues in the accounting profession. Among the topics covered are accountant’s liability, commercial transactions, business organizations, property concepts and other issues in the legal environment that will be encountered in accounting practice. Prereq: Admission to MSACC program or consent of DGS.

MGT 690 STRATEGIC THINKING AND ANALYSIS. (3) This course trains students in the art and science of formulating an integrated perspective and approach toward the general management of an entire enterprise; teaches fundamental tools and methods for balancing the competing demands and often conflicting priorities facing strategic managers; will address economic, cultural, operational, financial, organization, technological, political, interpersonal, and other issues impacting the overall performance of firms.

MGT 695 INDIVIDUAL WORK IN MANAGEMENT. (1-6) Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

MGT 697 LEADERSHIP, COMMUNICATIONS AND ETHICS. (3) An examination of the problems and decisions inherent in the establishment of organizations. Prereq: MGT 301 or consent of instructor.

MGT 699 BUSINESS POLICY AND STRATEGY II. (3) Strategic issues associated with multi-industry, multi-national, multi-business and start-up management; strategy implementation and institutionalization; planning systems. Prereq: MGT 698 or the equivalent.

MGT 700 ADMINISTRATIVE SCIENCE. (3) Prereq: MGT 699 or the equivalent.

MGT 712 ORGANIZATIONS AND INDIVIDUAL BEHAVIOR. (3) Examination of current theory and empirical research regarding the behavior of individuals in organizations. Topics are divided into three phases: major behavioral processes, applied models of individual choice behavior, and specific areas of individual choice and decision.

MGT 713 SEMINAR IN ADVANCED ORGANIZATION THEORY. (3) Seminar will examine broad range of organization theory and research from a multiple paradigm perspective. Interpretive and critique views and research literature will be among those examined. Prereq: Graduate status or consent of instructor.

MGT 714 SEMINAR IN MANAGEMENT THEORY AND POLICY. (3) A broad range of literature on organization strategy and structure is examined. Conceptual frameworks and research relating to the Business Policy decision processes are reviewed and critiqued. Prereq: Permission of instructor.

MGT 763 RESEARCH, DESIGN AND ANALYSIS. (3) This course deals with the design and analysis of business research. Emphasizes the practical application of analysis of variance and correlations techniques to problems in business research. Focus will be on design, implementation, and interpretation of research. Prereq: MGT/MKT/FIN 762. (Same as MGT 763.)

MGT 780 ADVANCED SOCIAL NETWORK ANALYSIS. (3) The focus of this course is on the theoretical concepts and methodology of social network analysis, both from a research and applied perspective. The course involves in-depth training in the hands-on analysis of social networking data using specialized social network analysis software. Prereq: Consent of instructor.

MGT 781 INDEPENDENT WORK IN MANAGEMENT. (1-6) Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a total of six credits. Prereq: Consent of instructor.

MGT 790 DOCTORAL COLLOQUIUM. (1-2) The doctoral colloquium is intended to be a professional socialization course for the Ph.D. students in Management. The course features a mix of topics related to the Management Ph.D. program, including research, teaching and service, major transitions in the program, preparation for the professoriate, as well as special research topics such as philosophy of science and guest research lectures.

MGT 795 SPECIAL TOPICS IN MANAGEMENT (Subtitle Required). (3) Analysis of a specialized topic in management. May be repeated to a maximum of 12 credits when taken under different subtitles. Prereq: Consent of instructor.

MI Microbiology and Immunology

MI 494G IMMUNOBIOLOGY. (3) A survey of theories and mechanisms of immunity, including: nature of antigens and antibodies, antigen-antibody reactions, immunocompetent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as BIO 494G.)

MI 495G BACTERIAL PATHOGENESIS. (3) This course will examine the pathogenic mechanisms used by bacteria to cause human disease. Bacterial virulence factors and host susceptibility factors will be discussed, with an emphasis on understanding the techniques that can be used to identify these traits in newly emerging pathogens. Prereq: BIO 308, BIO 315, BCH 401 recommended. Or permission of instructor. (Same as BIO 495G.)

MI 582 VIROLOGY. (3) Physical, chemical and biological properties of viruses. Modes of replication and control of gene product formation displayed by representative plant, animal, and bacterial viruses. Prereq: BIO 304 and biochemistry or equivalent strongly recommended, or consent of instructor. (Same as BIO 582.)

MI 590 CELLULAR AND MOLECULAR PHYSIOLOGY.
MI 595 IMMUNOBIOLOGY LABORATORY. (2)
Laboratory in immunology and serology. Preparation, standardization, and uses of biological products; serology; Laboratory; four hours. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as BIO 595.)

MI 598 CLINICAL MICROBIOLOGY. (3)
An introduction to the concepts of clinical microbiology through a survey of the microbial diseases of man using an organ system approach. Prereq: BIO 208 and 209, BIO 476G recommended, CHE 230 or 236, or consent of instructor. (Same as PAT 598.)

MI 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BUCH/BIOL/PPA 661.)

MI 611 BIOPHYSIOLOGY. (3)
This course will develop the student’s ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g. IBS 602) or consent of instructor. (Same as BUCH/BIOL 615.)

MI 616 BIOLOGY AND THERAPY OF CANCER. (3)
Biology of cancer will be discussed at the molecular, cellular and organismic level. Emphasis will be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects tumor cell behavior and its interactions with the host immune system. The biology of hematopoietic cells will also be included. Clinicians active in treatment and research of various types of cancer will be invited to participate in the lectures. Prereq: BCH 502, 502, BIO 685S. (Same as MED/PHA 616.)

MI 618 MOLECULAR NEUROBIOLOGY. (3)
MI 685 IMMUNOBIOLOGY, INFECTION AND INFLAMMATION. (3)
An introductory level graduate course surveying current trends in immunology including the organization of the immune system, cells important for immunity and inflammation; types of immune responses, cellular inflammation, molecular immunology, self-nonself discrimination, vaccines and immune mediated diseases. Prereq: BCH 401G, or BCH 501 or 502, IBS 501 or equivalent or consent of the course director. (Same as BIO 685.)

MI 707 CONTEMPORARY TOPICS IN IMMUNOLOGY. (3)
This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 685 or equivalent or consent of instructor. (Same as BUCH 707.)

MI 710 SPECIAL TOPICS IN MICROBIOLOGY. (2)
A variety of topics relating to modern molecular and cell biology. Prereq: Consent of instructor.

MI 720 MICRORBIAL STRUCTURE AND FUNCTION. (3)
Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture growth, division, and differentiation. Prereq: (to reflect appropriate IBS course). (Same as BIO 720 and OBI 720).

MI 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MI 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769; residence credit following the successful completion of the qualifying exams. (Same as MB 749.)

MI 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the fall of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MI 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. (Same as MB 768.)

MI 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (1-12)
May be repeated indefinitely. (Same as MB 769.)

MI 772 SEMINAR IN MICROBIOLOGY. (0-1)
Review of current literature in microbiology; presentation of papers on work in progress in the department or on assigned topics; reports on meetings of national and international scientific and professional societies and symposia. Required of all graduate students. Two hours per week. May be repeated nine times for a maximum of 10 credits. (Same as BUCH 772.)

MI 798 RESEARCH IN MICROBIOLOGY. (1-9)
May be repeated to a maximum of 24 credits. Prereq: Consent of instructor. (Same as BIO 798.)
tion costs at both the channel and retail level. The course is also concerned with the legal and socio-economic impact of distribution trends and practices. Prereq: MKT 300.

MKT 324 DATABASE MANAGEMENT. (3)
Databases are the backbone of information systems. Almost every modern organization uses database technology to support its routine operations such as inventory management, customer relationship management, human resources management, and electronic commerce. Database technology is also the foundation of data-driven decision-making that has permeated the business world. With the proliferation of data-driven decision-making and end-user computing, understanding database technologies is necessary. Business students to remain competent in the modern business environment. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as AN 324.)

MKT 330 PROMOTION MANAGEMENT. (3)
The objectives of the Promotion Management course are to develop awareness and understanding of the role and functions of promotion within firms and within society and to explicitly attempt to develop student thinking skills, i.e., problem identification, problem analysis, and problem solving, in the area of promotion. Prereq: MKT 300 and MKT 310 or permission of instructor.

MKT 340 INTRODUCTORY MARKETING RESEARCH. (3)
Managerial applications of research in marketing decision making. The course objective is to provide students with expertise in defining information needs, selecting information sources and organizing information in decision-making contexts. Application of major concepts will be illustrated in marketing policy areas. Prereq: MKT 300, ECO 39.

MKT 390 SPECIAL TOPICS IN MARKETING (Subtitle required). (1-3)
Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in marketing. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most twice under the MKT 390 number. Prereq: Consent of instructor.

MKT 395 INDIVIDUAL WORK IN MARKETING. (1-6)
Student develops a specific program with instructor. One or more papers is typically expected. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

MKT 403 PRODUCTION AND INVENTORY SYSTEMS. (3)
This course is an advanced introduction to the complexities of managing production and inventory systems. An enterprise’s success in today’s highly competitive, often global business environment, depends on effectively managing its production activities and the related inventories at various production-process stages. Because such decisions are invariably tied to demand forecasts, the course begins with an examination of forecasting. Students are then led through the topics of production planning, master scheduling, material requirements & manufacturing-resources planning, production activity control, capacity management, and sequencing & scheduling. The course culminates with a coverage of contemporary trends toward just-in-time manufacturing systems and lean manufacturing systems. Applications of analogous systems and principles in the service sector are also addressed throughout the course. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as AN 403G.)

MKT 406 PRODUCTIVITY AND QUALITY MANAGEMENT. (3)
This course is an advanced treatment of two related concepts that are vital to the success of an enterprise: quality and productivity. As a key ingredient of competitive strategy, quality encompasses many attributes of a product or service—such as its design, its features, fit and finish, durability, safety, and customer treatment. In highly competitive settings, a firm that achieves and sustains high quality levels for its goods and/or services, while remaining at least as efficient as competitors in processes used to produce these outputs, tends to outperform its competitors. Beginning with an examination of connections between quality and productivity, this course examines their underlying philosophies, strategic, and human issues. The coverage includes emergent practices for continuous improvement including Kaizen, Six Sigma, customer relationship management, and strategic planning. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as AN 406G.)

MKT 410 PERSONAL SELLING. (3)
A detailed exposure to personal selling techniques. Emphasis placed on sales process, especially planning and delivery of sales presentations. Selected sales management topics include recruiting, training, motivating and evaluating sales people, as well as ethical and legal issues. Prereq: MKT 300 and marketing majors only.

MKT 420 DATA MINING. (3)
Data mining is concerned with tools and techniques to help a data/business analyst numerically and visually explore vast data sets, classify data, predict outcomes, or identify associations, patterns, and exceptional events. In practical terms, such capabilities allow firms to better segment markets, evaluate and classify stocks, identify prospective customers, forecast contingencies and catastrophes, identify defaulters and fraudulent transactions, measure churn, identify threats, perform service requests, bundle goods and services, recognize how events (e.g., purchases) are likely to unfold over time, and so on. Such capabilities often make the
difference between survival and demise in today’s increasingly global, increasingly competitive, and increasingly volatile business settings. Prereq: Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as AN 420G.)

MKT 430 SERVICES MARKETING MANAGEMENT. (3)
This course addresses marketing and management issues and problems faced by service organizations. Marketing and management concepts are broadened and applied to the service organizations. Topics related to service quality, the marketing mix, and service delivery are covered. Prereq: MKT 300, MGT 301. (Same as GNT 430.)

MKT 435 INTERNATIONAL MARKETING. (3)
The primary objectives of this course are to: 1) familiarize the student with selected strategic marketing issues and problems in a multinational environment, 2) examine alternative ways by which a firm can expand internationally, and 3) help the student develop a systematic approach for dealing with global and international marketing issues. Prereq: MKT 300.

MKT 440 TOPICS IN ANALYTICS. (3)
This course covers contemporary topics in enterprise data analysis, and decision-making. Past coverage has included Data Mining, Data Communications, and Valuation of Information. The topics covered would also be valuable to students from programs such as Computer Science, Telecommunications, Statistics and Engineering. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as AN 440G.)

MKT 445 SPORTS MARKETING. (3)
The purpose of the course is to develop an understanding of strategic marketing concepts and activities as they apply to the context of sports. Marketing concepts and activities related to the marketing mix, consumer/fan behavior, and business organization-sport organization relationships will be examined. Prereq: MKT 300 and Marketing majors only.

MKT 450 MARKETING STRATEGY AND PLANNING. (3)
As the capstone course for marketing majors, this class examines analytical processes for managerial marketing decisions. Topics will include such problem areas as product planning, distribution systems, advertising strategies, information systems, pricing decisions and buying behavior. Prereq: MKT 300, MKT 310, MKT 340 and one other marketing elective.

MKT 600 MARKETING MANAGEMENT. (3)
This course is designed to provide students with an understanding of: the role of marketing function in an organization; the types of marketing decisions and analytical procedures involved in each decision; the overall marketing planning process; and, the impact of the social, economic and legal environment on marketing decisions. Prereq: Completion of first semester of MBA program, graduate standing, MGT 611, ECO 610, ACC 628, MGT 650.

MKT 601 MARKETING RESEARCH. (3)
MKT 601 entails a vigorous examination of research methodology applicable to marketing situations. Emphasis is placed on 1) experimental design, 2) survey design and administration, and 3) analytical procedures. Practical application of marketing research is stressed. Legal and social issues are also examined. Prereq: MKT 600, MKT 650, and MKT 651.

MKT 611 NEW PRODUCT DEVELOPMENT. (3)
An examination of how firms manage the new product development or service process. Topics covered include ideation, screening, design and prototyping, production planning, new product launch and product acceptance. Prereq: DIS 651; ECO 610; MKT 600.

MKT 622 SALES MANAGEMENT. (3)
MKT 622 entails a comprehensive examination of the planning, implementing, and controlling of personal contact programs designed to achieve the sales objectives of the firm. Managerial decision-making is emphasized through the application of lecture material, readings, and case studies. Prereq: Completion of first year of MBA program or permission of instructor.

MKT 623 MARKETING IN SERVICE AND NONPROFIT ORGANIZATIONS. (3)
The purpose of the course is to broaden and apply the conceptual system of marketing to the marketing problems of service and nonprofit organizations. Concepts such as marketing mix, marketing segmentation, market positioning, channels of distribution and others will be applied to the problems of service and nonprofit organizations. Prereq: MKT 600 or permission of the instructor.

MKT 624 INTERNATIONAL MARKETING MANAGEMENT. (3)
Examines the broad implications for marketing strategy and decision making of the firm in an international context. Addresses comprehensive survey of firm entry strategies, marketing mix decisions, product policies, and environmental factors in a global context. Context-based problems such as implicit borders to entry through distribution channel management will also be addressed. Prereq: MKT 600 or permission of instructor.

MKT 695 INDIVIDUAL WORK IN MARKETING. (1-6)
Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MKT 700 SEMINAR IN MARKETING MANAGEMENT. (3)
A doctoral seminar directed toward the basic decision areas of marketing management. Emphasis is on traditional, classic, and contemporary literature that presents important conceptualizations of marketing practices and empirical research in marketing management. Prereq: Consent of instructor.
MKT 710 SEMINAR IN CONSUMER BEHAVIOR. (3) The seminar is specifically designed for the needs of doctoral students in marketing in that it emphasizes empirical research, theory and methodology as they relate to consumer behavior. The objectives of the seminar are (1) to familiarize the students with the literature of consumer behavior, (2) to stimulate critical thinking about existing research, and (3) to evaluate existing theories, conceptualizations, and models of buyer behavior. Prereq: Consent of instructor.

MKT 720 SEMINAR IN MARKETING THEORY. (3) A survey, analysis and evaluation of the current research in marketing theory. Detailed attention is given to problems of determining the meaning and boundaries of marketing theory. Emphasis is placed on introducing the student to the substantive content of marketing theories and their methodologies. Prereq: MKT 600 or consent of instructor.

MKT 763 RESEARCH, DESIGN AND ANALYSIS. (3) This course deals with the design and analysis of business research. Emphasizes the practical application of analysis of variance and correlational techniques to problems in business research. Focus will be on design, implementation, and interpretation of research. Prereq: MGT/MKT/FIN 762. (Same as MGT 763.)

MKT 771 SEMINAR IN BUSINESS ADMINISTRATION. (3) Each semester some topic currently discussed in scholarly journals in business administration will be studied intensively. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

MKT 781 INDEPENDENT WORK IN MARKETING. (1-6) Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

KEY: # = new course * = course changed †= course dropped ¶= course purged
MNG 101 INTRODUCTION TO MINING ENGINEERING. (1)
Orientation to the mining engineering profession; introduction to key mining engineering activities and functions; mining methods and equipment; health and safety subsystems.

MNG 191 MINE GRAPHICS. (1)
This course is designed to provide students an understanding of CAD core functionality and features so that they can create, edit, and organize their engineering drawings. It covers essential CAD commands and functions, including coordinate systems, drawing tools, layer management, dimensioning, undoing, and editing. Moving and duplicating, arrays, blocks, viewpoints, file maintenance, measurement and calculations, plotting, and printing. The course emphasizes hands-on experience with CAD software and practical applications in mining and processing applications.

MNG 201 MINING ENGINEERING FUNDAMENTALS. (3)
Introduction to the fundamentals of mining engineering and the profession. Prospecting and exploration concepts introduced including ore reserve estimation techniques. Underground and surface mining methods will be introduced to applications to given deposit types and spatial constraints. General mine plan, sequence of development and cycle of operations for each method evaluated along with required auxiliary operations and equipment.

*MNG 211 MINE SURVEYING. (2)
Surveying as applied to mining engineering, including the use and care of surveying instruments, measurement of horizontal and vertical distances, angles and direction, collection of ground and underground data for the design and layout of surface and underground mining workings; and some aspects of the precision determination of position and direction for survey control. Prereq: MNG 101 or EGR 101 or MA 113 or consent of instructor.

*MNG 264 MINING METHODS. (3)
A study of the principal underground and surface mining methods practiced in coal and hard rock mines; methods classification; support and equipment requirements; general mine planning; sequence of development, cycle of operations, and method application and variation. Prereq: MNG 101 or EGR 101 or consent of instructor.

*MNG 291 ELEMENTS OF MINE DESIGN. (3)
Practical knowledge of computational tools used in mine design projects for both underground and surface mining, including a programming language and geology/mining modeling software. Geologic and mining engineering modeling through the manipulation of software packages commonly used by mining engineers. Projects will cover the areas of surveying, geology, economics, and mining. Prereq: MNG 191, MNG 201, or consent of instructor.

MNG 301 MINERALS PROCESSING. (3)

MNG 302 MINERALS PROCESSING LABORATORY. (1)
Application of the principles studied in MNG 301. Laboratory, two hours. Prereq or concur: MNG 301.

MNG 303 DEFORMABLE SOLIDS LABORATORY. (1)
Experimental studies of the mechanical properties of materials and structural elements. Laboratory, four hours per week for three-fourths of the semester. Prereq or concur: EM 302.

*MNG 311 ELECTRICAL CIRCUITS AND MINING MACHINERY. (3)
Analysis of ac electrical circuits, single-phase and three-phase circuits, transformers, and ac and dc rotating machinery used in the mining industry. Prereq: MA 114, PHY 232.

*MNG 322 MINE SAFETY AND HEALTH MANAGEMENT AND PROCESSES. (2)
History and overview of mine health and safety; effective health and safety management systems; building a health and safety culture; hazard anticipation and identification, risk management and hazard control; Federal processes for health and safety system management; mine safety and health resources; mine laws, including safety regulations and interpretations for mining engineers and supervisors; and contemporary issues in mine safety. Prereq: MNG 101 or EGR 101; concur: MNG 264.

MNG 331 EXPLOSIVES AND BLASTING. (2)
Drilling and drill performance, types and properties of commercial explosives, initiation and priming, explosives selection, blast design, explosives applications, environmental effects, and safety and regulatory compliance. Prereq: MNG 264 or consent of instructor.

MNG 332 MINE PLANT MACHINERY. (3)
Theory and practice of mine haulage, hoisting, and drainage and pumping. Application of engineering principles to the analysis and selection of materials handling mediums for the minerals industry. Prereq: MNG 264, PHY 231; concur: EM 221 and ME 330 or CME 330.

MNG 335 INTRODUCTION TO MINE SYSTEMS ANALYSIS. (3)
An introduction to probability, statistics, and statistical inferential reasoning. Probability distributions for discrete and continuous random variables; descriptive statistics and claims arising from them; construction and evaluation of claims arising from formal statistical inference conveyed in confidence intervals and hypothesis tests; analysis of variance; information literacy for statistical inferential reasoning. The course emphasizes mining applications. Prereq: MA 113, or equivalent quantitative foundations course, and MNG 201, or consent of instructor.

MNG 341 MINE VENTILATION. (3)
Hazards of dust and gaseous contamination of mine atmosphere, air dilution requirements, flow distribution in mine network, computer analysis of the ventilation network, natural ventilation and fans. Lecture, two hours; laboratory, three hours. Prereq: Engineering standing and prerequisite or concurrent ME 330.

*MNG 351 UNDERGROUND MINE DESIGN. (3)
Principles of underground excavations designs related to metallic, coal and industrial mineral deposits including underground mine layouts, stability of the underground excavations, material handling and drainage control. Underground mine planning, scheduling, equipment selection, and cost estimation. Prereq: MNG 211, MNG 291, MNG 331, Engineering Standing, or consent of instructor.

*MNG 371 PROFESSIONAL DEVELOPMENT OF MINING ENGINEERS. (3)
Development of professional skills important to the practice of mining engineering. Topics include written and oral communication skills, understanding ethical responsibility and appropriate ethical conduct, real world problem formulation and solution skills, exercise of abilities important to lifelong learning, knowledge of contemporary issues important to mining engineering. Prereq: Engineering standing. WRD 110/CIS 110 and WRD111/11S 111 or WRD 112 or CIS 112. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

MNG 395 INDEPENDENT WORK IN MINING ENGINEERING. (1-6)
Individual work on some selected problem in the field of mining engineering. May be repeated for a maximum of six credits. Prereq: Consent of department chairperson and the instructor, engineering standing.

MNG 431 MINING ENGINEERING ECONOMICS. (2)
Engineering economics including discounted cash flow, opportunity cost of capital, cost (incremental, sunk, etc.), net present value and rate of return, and uncertainty; topics in mineral economics. Prereq: Engineering standing.

MNG 435 MINE SYSTEMS ENGINEERING AND ECONOMICS. (4)
Optimization of mining systems and investment decisions based on the time value of money and the application of deterministic and stochastic models. Application of advanced features in spreadsheet programming for solving mine systems problems. Prereq: MNG 335 and Engineering Standing.
Course Descriptions

MNG 463 SURFACE MINE DESIGN. (3)
Principles of surface excavations designs related to quarries and mines; including orebody description, pit layouts and excess spoil disposal areas, stability of the slopes, material handling and surface drainage control. Surface mine planning and scheduling, equipment selection, cost estimating, optimization. Prereq: MNG 211, MNG 291, MNG 331, Engineering Standing.

MNG 511 MINE POWER SYSTEM DESIGN. (3)
A study of mine power distribution systems, major power system components, and techniques of power system analysis. Topics include per-unit analysis; symmetrical component analysis; grounding, including ground-bed design, ground-resistor sizing, and ground wire monitoring; cable and transformer sizing; and load-flow analysis. Course may not be used to satisfy degree requirements in electrical engineering if credit is earned in EE 538. Prereq: EE 305 or equivalent and engineering standing.

MNG 531 ADVANCED BLAST DESIGN AND TECHNOLOGY. (3)
Advanced theory and application of explosives in excavation; detailed underground blast design; specialized blasting including blast casting, construction and pre-splitting. Bulk systems for blasting, electronic detonators, and introduction to demolition blasting. Introduction to blasting research. Examination of field applications. Prereq: MNG 331, engineering standing.

#MNG 553 ENVIRONMENTAL CONTROL SYSTEM DESIGN AND RECLAMATION. (3)
Introduction to the principles of sustainable mine planning with a focus on environmental control system design, reclamation and restoration design, and environmental monitoring systems. Topics will include culvert and diversion design, hydrologic inputs, catchment delineation and routing, sedimentologic inputs, erosion control and best management practices. Design of sediment pond design, design of silt fences, grass filters, and sediment ditches, weep berm and vegetated filter strip design, reforestation, grassland/wildlife establishment, stream restoration, wetlands/ponds, environmental monitoring system design, and community integration. Prereq: MNG 291, MNG 463, and engineering standing or consent of instructor. (Same as BAE 535.)

MNG 541 COMPUTER DESIGN OF MINE VENTILATION SYSTEMS. (3)
Computer methods applied to the design and analysis of mine ventilation networks; flow distribution, location and size of regulators and fans; evaluation of existing ventilation systems and application of correction methods to improve effectiveness of ventilation system. Prereq: MNG 341 with a C or higher.

MNG 551 ROCK MECHANICS. (4)
Determination of the physical properties of rocks, rock mass classification, stress around mine openings, strain and displacement of the rock mass, rock reinforcement and support, stress interaction and subsidence, strata control. Lecture, three hours; laboratory, three hours per week. Prereq: EM 302, MNG 303, GLY 220, and engineering standing.

#MNG 552 GROUND CONTROL SOFTWARE AND ANALYSIS. (3)
Evaluation and design of ground control plans for various mining conditions through the use of several computer programs with an emphasis placed on sedimentary tabular deposits. Variables including pillar stress, pillar strength, convergence, and others are investigated. Prereq: MNG 551 – Rock Mechanics or consent of instructor.

MNG 561 MINE CONSTRUCTION ENGINEERING I. (3)

MNG 563 SIMULATION OF INDUSTRIAL PRODUCTION SYSTEMS. (3)
Design a coal preparation plant by integrating unit operations preceded by certain back-up laboratory experiments. Cost sensitivity analysis of competing design schemes will be determined on a selected coal. Lecture: two hours; laboratory: three hours per week. Prereq: MNG 301 or equivalent, engineering standing.

MNG 580 MINERAL PROCESSING PLANT DESIGN. (3)
Design of mineral processing plants including the associated unit operations; flowsheet development, unit selection, sizing and number, water/mass flow balancing. Prereq: MNG 301, 302; engineering standing.

*MNG 591 MINE DESIGN PROJECT I. (1)
First course of a two-part capstone design project. Emphasis is on ore reserve evaluation, development of a preliminary mine plan, design of auxiliary processes, teamwork, and oral and written communication. Movable reserves will be quantified and quality distribution assessed. An appropriate mining technique will be selected and implemented into a proposed mine design. Laboratory, three hours per week. Prereq: MNG 211, MNG 291, MNG 463, MNG 351, and engineering standing.

MNG 592 MINE DESIGN PROJECT II. (3)
Students will undertake a major design project such as the overall design of a mining system, including design of major components of the system and economic evaluation. Students will write reports documenting this design, which will also be presented orally before a group of peers and invited experts. Prereq: MNG 332, MNG 341, MNG 551, MNG 591, and engineering standing.

MNG 599 TOPIC IN MINING ENGINEERING. (2-3)
A detailed investigation of a topic of current significance in mining engineering. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the MNG 599 number. Prereq: Engineering standing and consent of instructor.

MNG 611 MINE POWER SYSTEM PROTECTION. (3)
A study of components and methods for providing protection to mine electrical systems. Review topics include power distribution arrangements, per-unit system, and symmetrical components. Course topics include sources of transients and faults, protective equipment, phase Overcurrent relay, and ground fault protection. Prereq: MNG 511.

MNG 621 INSTRUMENTATION FOR BLASTING AND BLAST MITIGATION. (3)
In depth coverage of instrumentation utilized for commercial mine blast analysis as well as instrumentation used in blast mitigation testing. The course includes hands on operation of advanced instrumentation systems in a laboratory setting. Prereq: MNG 331 or MNG 531.

MNG 641 ADVANCED MINE VENTILATION. (3)
Planning, designing and redesigning the ventilation systems using computers; data acquisition (ventilation survey); non-steady state flow in mine openings; influence of the ventilation conditions upon the dynamics of the methane concentration; automation of the ventilation system. Lecture, two hours; laboratory, two hours. Prereq: MNG 341.

MNG 690 ADVANCED MINERAL BENEFICIATION ENGINEERING. (3)

MNG 691 SIMULATION OF MINERAL PROCESSING CIRCUITS. (3)
Flowsheet modeling and analysis for coal preparation and ore dressing plants. Topics include unit models for comminution, gravity separation, and froth flotation; relevant techniques for solving systems of nonlinear equations; convergence acceleration techniques; sequential modular, simultaneous modular, and equation-solving flowsheeting frameworks; flowgraph techniques for analysis of certain classes of mineral processing circuits. Prereq: MNG 575.

MNG 699 TOPICS IN MINING ENGINEERING (Subtitle required). (3)
A detailed investigation of a topic of current interest in mining engineering. May be repeated to a maximum of six credits, but only three credits may be earned under the same subtitle. A particular topic may be offered only twice under the MNG 699 number. Prereq: Consent of instructor.

MNG 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MNG 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

MNG 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MNG 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MNG 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

MNG 771 SEMINAR IN MINING ENGINEERING. (1)
Review of current research in specific areas of mining engineering. Required of all graduate students. Prereq: Graduate classification.

MNG 780 SPECIAL PROBLEMS IN MINING ENGINEERING. (1-6)
Individual work on some selected design problems in one area of mining engineering. May be repeated to a maximum of six credits. Prereq: Approval of the chairperson of the department.

MNG 790 SPECIAL RESEARCH PROBLEMS IN MINING ENGINEERING. (1-9)
Individual work on some selected problems in one of the various fields of mining engineering. Laboratory and field measurements, six hours. May be repeated to a maximum of nine credits. Prereq: Approval of the Director of Graduate Studies.
MSE 101 MATERIALS ENGINEERING. (1)
An introduction to the materials engineering profession. Professional growth, conduct, ethics
and organizations. Introduction to the techniques of materials engineering.

MSE 201 MATERIALS SCIENCE. (3)
Microscopic and macroscopic structure as related to the properties of materials with
engineering applications. Prereq or concur: MA 114 and freshman chemistry.

MSE 202 MATERIALS SCIENCE LABORATORY. (1)
To teach students the basic materials characterization laboratory techniques and demonstrate
the difference in properties between different types of materials. Prereq: Concurrent enroll-
ment in MSE 201.

MSE 212 ELECTRONIC PROPERTIES OF MATERIALS. (3)
Introduction to processing of polymer, ceramic and composite materials; relating the structure
and bonding in these materials to their properties; considerations in choosing appropriate
materials for engineering applications. Prereq: MSE 201, or consent of instructor.

MSE 351 MATERIALS THERMODYNAMICS. (3)
Solution thermodynamics; partial molar quantities; ideal and non-ideal solutions; application
of thermodynamics to phase equilibrium; heterogeneous equilibrium; free energy-composition
relationships; temperature-pressure relationships. Prereq: MSE 201, MA 213 or concurrent.

MSE 395 INDEPENDENT WORK IN MATERIALS ENGINEERING. (1-3)
Research for undergraduate departmental students. May be repeated to a maximum of 12
credits. Prereq: Department major and approval of chairperson.

MSE 401G METAL AND ALLOYS. (3)
Crystalline structures, phase-diaeuses, diffusion, nucleation and growth, deformation, recovery,
recrystallization and grain growth are discussed to understand the structure-property relations
in metals and alloys. Prereq: MSE 201, 301 and Engineering Standing.

MSE 402G ELECTRONIC MATERIALS AND PROCESSING. (3)
This course will examine electron behavior in a variety of materials and the processing methods
used for integrated device production. Additional topics will include thin film growth, diffusion,
oxidation, electronic device principals, defect control, and a survey of current challenges to the
semiconductor industry. Prereq: MSE 201, MSE 301 or related engineering-science senior/
graduate level courses with instructor permission.

MSE 403G CERAMIC ENGINEERING AND PROCESSING. (3)
Microstructure of crystalline ceramics and glasses, and role of thermodynamics and kinetics
in its formation. Effect of microstructure on mechanical and physical properties. Prereq: MSE
201, MSE 301 or consent of instructor, Engineering standing.

MSE 404G POLYMERIC MATERIALS. (3)
Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and
thermal properties, crystallinity, polymer blends, evaluation of polymers for specific
applications (aerospace, automotive, biomedical), laboratory activities for each of the above.
Prereq: Engineering standing. CHE 230 or CHE 236. MSE 301 or consent of instructor. (Same
as CME 404G.)

MSE 407 MATERIALS LABORATORY I. (3)
Various laboratory experiments that demonstrate behavior of polymers, metals, ceramics, and
electronic materials. Includes instruction and practice in use of numerous instruments and
equipment, typical of the materials engineering discipline. Data reduction, analysis, and
interpretation is covered, as well as correct writing of reports. Prereq: MSE 202, MSE 301,
MSE 351, Engineering standing. This course is a Graduation Composition and Communication
Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for
automatic transfer credit to UK.

MSE 408 MATERIALS LABORATORY II. (3)
Various laboratory experiments that illustrate crystal structure, behavior of multi-component
systems, and failure modes. Provides hands-on experience with some more advanced
characterization methods of polymers, metals, and ceramics. Includes data reduction, analysis,
and interpretation, as well as correct writing of reports. Prereq: MSE 402, MSE 407.

MSE 436 MATERIAL FAILURE ANALYSIS. (3)
A review of common engineering materials, their potential failure mechanisms and correspond-
ing technology developed to avoid these failures. This course illustrates applications of current
technology to practical industrial problems and is designed for engineers of all disciplines.
Prereq: MSE 201 and EM 302 and Engineering standing.

MSE 480 MATERIALS DESIGN. (3)
A capstone engineering design experience involving analysis, with some treatments of
engineering economics of real processes, design of materials, fabrication problems and
techniques, and prediction of model material systems. Prereq: MSE 408.

MSE 506 MECHANICS OF COMPOSITE MATERIALS. (3)
A study of structural advantages of composite materials over conventional materials,
considering high strength-to-weight and stiffness-to-weight ratios. Fiber reinforced, laminated
and particulate materials are analyzed. Response of composite structures to static and dynamic
loads, thermal and environmental effects, and failure criteria are studied. Prereq: EM 302,
engineering standing or consent of instructor. (Same as EM/ME 506.)

MSE 531 POWDER METALLURGY. (3)
Study of the principles of powder metalurgy relating to alloys of unusual compositions, metal
and nonmetal combinations, porous and laminated products, composite metals, and high-
melting alloys. Prereq: Consent of instructor.

MSE 535 MECHANICAL PROPERTIES OF MATERIALS. (3)
Introductory elasticity and plasticity theory; crystallographic nature of slip and twinning;
fracture. Prereq: MSE 201, EM 302 and engineering standing or consent of instructor.

MSE 538 METALS PROCESSING. (3)
Solidification of molten alloys; fundamentals of metal working; application of metal working
theories to forging, rolling, extrusion, drawing and sheet forming. Prereq: Engineering standing.

*MSE 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3)
Prereq: MSE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3)
This course provides an overview of micromachined structures with an emphasis on
operational theory and fabrication technology. Prereq: Engineering standing or consent of
instructor. (Same as EE/ME 555.)

*MSE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3)
Modern composite materials and their applications. Basic concepts and definitions. Funda-
mental properties of fibers and polymer resins. Manufacturing methods. Analysis and design of
laminated and chopped fiber reinforced composites. Micro- and macro-mechanical analysis of
elastic constants. Failure theory of composite materials. Computational design of composites.
Prereq: Engineering Standing, and EM 302 or with instructor permission. (Same as MSE/
ME/MEFS 554.)

*MSE 561 ELECTRIC AND MAGNETIC PROPERTIES OF MATERIALS. (3)
Applications of electromagnetic field theory to materials and systems. Prereq: MSE 201, MSE
301 or consent of instructor. (Same as EE/ME 561.)

*MSE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)
Study of packaging systems which interconnect, support, power, cool, protect, and maintain
electronic components. The course will address systems at the chip, board, and product levels.
Topics include design, properties, materials, manufacture, and performance of various
packaging systems. Laboratory will provide familiarity with design software and production
equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of
instructor. (Same as EE 569.)

*MSE 570 FUNDAMENTALS OF NANOELECTRONIC DEVICES AND MATERIALS. (3)
Modern composite materials and their applications. Basic concepts and definitions. Funda-
mental properties of fibers and polymer resins. Manufacturing methods. Analysis and design of
laminated and chopped fiber reinforced composites. Micro- and macro-mechanical analysis of
elastic constants. Failure theory of composite materials. Computational design of composites.
Prereq: Engineering Standing, and EM 302 or with instructor permission. (Same as MSE/
ME/MEFS 554.)

*MSE 599 TOPICS IN MATERIALS SCIENCE AND ENGINEERING (Subtitle required). (1-4)
A detailed investigation of a topic of current significance in engineering and materials science
such as: biomedical synthetics, electronic properties of materials, advances in metal working,
history of materials technology, quantitieal metallography. Theory of disclinations, scanning
electron microscopy. May be repeated to a maximum of eight credits, but only four credits can
be earned under the same title. A particular topic may be offered at most twice under the MSE
599 number. Prereq: Variable; given when topic identified.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following
courses should have a thorough working knowledge of chemistry, physics and mathematics.

MSE 601 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING. (3)
The purpose of this course is to provide a general background in the field of materials science
and engineering for graduate level students. Fundamental topics include chemical bonding in
materials, crystal structure and defects, diffusion and phase diagrams. The mechanical,
electrical and optical properties of materials will be discussed in the context of processing
history and application. Important concepts such as anisotropic properties of materials and
their tensor representation will be introduced. The course covers major materials systems
(metals, ceramics, polymers, composites, and electronic materials) and offers examples of
materials applications (aerospace, automotive, biomedical). Prereq: Graduate standing in
chemical engineering or materials science and engineering, or consent of instructor.
MSE 607 ANALYSIS OF METAL CUTTING PROCESSES. (3) Advanced study of metal cutting involving the mechanics of metal cutting including cutting forces, tool-wear/too-life and temperature analysis, surface finish and integrity, chip control, machinability assessments and advances in cutting tool technology. Prereq: ME 505. (Same as ME/MFS 607).

MSE 620 COMPUTATIONAL MATERIALS SCIENCE ENGINEERING. (3) The effective use of existing computer software in the area of materials science engineering. Use of computers to model processes and examine and predict materials properties at the macroscopic and atomistic level. Prereq: Graduate standing in physical sciences and engineering, strong background in material properties and structure similar to the material covered in MSE 401G, MSE 403G, and MSE 404G, and some programming experience in C or FORTRAN; or consent of instructor.

MSE 622 PHYSICS OF POLYMERS. (3) Classification of solids, atomic structure and bonding, relation of structure to properties, deformation behavior and failure. Prereq: Consent of instructor.

MSE 635 ADVANCED MECHANICAL METALLURGY. (3) Theory of dislocations in crystals and their role in strength, plasticity, work hardening and fracture of crystalline solids. Prereq: Consent of instructor.

MSE 636 DISLOCATION THEORY. (3) Fundamentals of dislocation theory and the kinematics of dislocation motion: straight dislocations, curved dislocation, self energies, interactions with other crystal defects, dislocation multiplication. Prereq: MSE 535 or EM 531 or equivalent.

MSE 650 ADVANCED MATERIALS THERMODYNAMICS. (3) Study of reactions of materials with chemical environments. Introduction to irreversible thermodynamics. Emphasis on current literature. Prereq: Consent of instructor.

MSE 663 OPTOELECTRONIC DEVICES. (3) Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting diodes and display devices, nanocrystaline structures and organic semiconductors applications in optoelectronic devices. Prereq: EE 360 or MSE 402G, consent of instructor and/or graduate standing. (Same as EE 663.)

MSE 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3) A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing technologies. Typical topics include sensors, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/CME/EE 664.)

MSE 699 ADVANCED TOPICS IN MATERIALS SCIENCE AND ENGINEERING (Subtitle required.) (3) A detailed investigation of an advanced topic of current significance in materials science and engineering such as (1) nanometer materials, (2) structures of superconductors and (3) materials characterization under high rates of deformation. May be repeated under different subtitles to a maximum of nine credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the MSE 699 number. Prereq: Variable, given when topic is identified.

MSE 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on a thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MSE 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

MSE 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MSE 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

MSE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

MSE 771 SEMINAR. (0) Review of current literature in the field of metallurgical engineering and presentation of papers thereon. Presentation of talks on departmental research. Group and panel discussions. Required of all graduate students every semester. Lecture, one hour per week.

MSE 781 SPECIAL PROBLEMS, LITERATURE AND LABORATORY. (1-3) Literature research and planning of research programs, shop problems and technical writing, including a term paper, as required. Consultation and lecture by appointment. May be repeated to a maximum of nine credits.

MSE 782 SPECIAL PROBLEMS, LITERATURE AND LABORATORY. (3) A continuation of MSE 781. Laboratory, six hours; consultation and lecture by appointment. May be repeated to a maximum of nine credits.

MSE 790 RESEARCH IN MATERIALS SCIENCE. (3-9) Active research (experiments, library work, theory) toward Ph.D. degree. May be repeated indefinitely.

MUC Class Instruction in Music

MUC 110 DOUBLE REED MAKING LAB. (1) This lab is designed for double reed players to learn how to make and adjust the reeds used to play the oboe and bassoon. May be repeated to a maximum of eight semesters. Prereq: Concurrent registration in MUP oboe or bassoon, or with consent of the instructor.

MUC 150 CLASS INSTRUCTION IN PIANO. (1) A beginning course in the fundamentals of playing the piano. Lecture, two hours. Prereq: For music majors; other students by consent of instructor.

MUC 151 CLASS INSTRUCTION IN PIANO. (1) A beginning course in the fundamentals of playing the piano. For music majors; other students by consent of instructor. Lecture, two hours. Prereq: MUC 150.

MUC 152 CLASS INSTRUCTION IN PIANO. (1) A course in the fundamentals of playing the piano. For music majors; others by consent of instructor. Lecture, two hours. Prereq: MUC 151.

MUC 153 CLASS INSTRUCTION IN PIANO. (1) A course in the fundamentals of playing the piano. For music majors; others by consent of instructor. Lecture, two hours. Prereq: MUC 152.

MUC 155 VOICE CLASS FOR NON-MUSIC MAJORS. (1) Applied voice group instruction for non-music majors with emphasis on basic breathing and vocal technique, elements of music notation, and diction. May be repeated to a maximum of two credits. Laboratory, two hours per week. Prereq: Consent of instructor.

MUC 157 CLASS INSTRUCTION IN PERCUSSION INSTRUMENTS. (1) A beginning course in the fundamentals of playing and teaching percussion instruments. Instruction, three hours. Prereq: For music majors only; others by consent of instructor.

MUC 158 CLASS INSTRUCTION IN WOODWIND INSTRUMENTS. (1) A beginning course in the fundamentals of playing and teaching woodwind instruments. May be repeated to a maximum of two credits. Prereq: For music majors; others by consent of instructor.

MUC 161 CLASS INSTRUCTION IN STRING INSTRUMENTS. (1) A beginning course in the fundamentals of playing and teaching violin, viola, cello and string bass. May be repeated to a maximum of two credits. Prereq: For music majors; others by permission of instructor. For non-string majors who take this course for two semesters, it must be taken sequentially beginning in the fall semester.

MUC 163 CLASS INSTRUCTION IN BRASS INSTRUMENTS. (1) A beginning course in the fundamentals of playing and teaching brass instruments. Lecture, three hours per week. May be repeated to a maximum of two credits. Prereq: For music majors; others by consent of instructor.

CHAMBER MUSIC ENSEMBLES

MUC 170 STRING ENSEMBLE. (1) The study of string instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 171 BRASS ENSEMBLE. (1) The study of brass instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 172 WOODWIND ENSEMBLE. (1) The study of woodwind instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 173 PERCUSSION ENSEMBLE. (1) The study of percussion instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 174 UNIVERSITY CHORALE. (1) An auditioned chamber ensemble for the study of choral literature through performance. Class will meet for five hourly rehearsals per week. May be repeated to a maximum of eight credits. Prereq: Audition and consent of instructor.

MUC 176 PIANO ENSEMBLE. (1) Study of piano ensemble chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.
**Course Descriptions**

**MUC 177 GUITAR ENSEMBLE.** (1)
The study of guitar ensemble music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

**LARGE MUSICAL ORGANIZATIONS**

**MUC 175 JAZZ ENSEMBLE.** (1)
Study of jazz through performance. May be repeated to a maximum of eight credits. Laboratory, three hours. Prereq: Consent of instructor.

**MUC 187 CONCERT BAND.** (1)
A large concert band primarily for the general student desiring continuation of instrumental music experience. Laboratory, three hours. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

**MUC 188 SYMPHONIC BAND.** (1)
A select band engaged in preparation and performance of a variety of music composed for this medium. May be repeated to a maximum of four credits. Laboratory, four hours. Prereq: Audition and consent of instructor.

**MUC 189 WIND ENSEMBLE.** (1)
The University’s select band for performance of challenging literature in the wind repertoire. May be repeated to a maximum of eight credits. Prereq: Audition and consent of instructor.

**MUC 190 ATHLETIC BAND.** (1)
Preparation for and performance at University athletic functions, primarily basketball and volleyball events. May be repeated to a maximum of eight credits. Prereq: Audition and permission of instructor.

**MUC 191 ORCHESTRA.** (1)
Students who have demonstrated the required ability are given an opportunity to study and perform standard orchestral literature. May be repeated seven times for a total of eight credits. Prereq: Audition and consent of instructor.

**MUC 192 UNIVERSITY CHORISTERS.** (1)
Ordinarily for music majors only. Three one-hour meetings per week. May be repeated seven times for a total of eight credits. Prereq: Audition and consent of instructor.

**MUC 196 OPERA WORKSHOP.** (1)
Study of the principles and techniques of opera production through class presentation of scenes and complete works. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

**MUC 197 MOVEMENT FOR SINGERS.** (1)
A course to teach movement and coordination of the body for singers. Course will also introduce different styles of movement required for singers in opera and musical theatre. May be repeated to a maximum of 8 times. Prereq: Consent of instructor.

**MUC 198 OPERA PRODUCTION PRACTICUM.** (1)
The study and practice of production techniques through rehearsal and performance participation. May be repeated to a maximum of 4 credit hours (1 credit hour per semester). Prereq: Consent of instructor.

**MUC 423G FUNCTIONAL GUITAR SKILLS.** (1)
This course is designed to impart basic guitar skills with emphasis on folk guitar, group leading, and accompanying skills. This course is geared toward music therapy majors, but is open to other students space permitting. Prereq: Permission of the instructor.

**MUC 570 ADVANCED CHAMBER MUSIC ENSEMBLE.** (1)
Study of chamber music through performance. May be repeated to a maximum of six credits. Laboratory, two hours. Prereq: Consent of instructor.

**MUC 596 OPERA WORKSHOP.** (1-3)
Study of the principles and techniques of opera production and direction through class presentation of scenes and complete works. May be repeated to a maximum of six hours. Prereq: Consent of instructor.

**MUC 679 JAZZ ENSEMBLE.** (1)
Study of jazz through performance. Laboratory, two hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

**MUC 689 WIND ENSEMBLE.** (1)
The University’s select band for performance of challenging literature in the wind repertoire. Laboratory, three hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

**MUC 691 ORCHESTRA.** (1)
Students who have demonstrated the required ability are given an opportunity to study and perform standard orchestral literature. Laboratory, five hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

**MUC 692 UNIVERSITY CHORISTERS.** (1)
The course offers students the opportunity to learn and perform the best choral literature in the repertoire. Laboratory, three hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

**MUP Music Performance**

**SPECIAL FEE**

**Note:** Students enrolled in MUP courses for two or more credit hours may be required to attend performance classes as well as lessons. See individual course syllabus for more information.

Consult the School of Music before enrolling.
MUS 330 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Course will include preparation of operatic as well as art song literature. Repertoire suitable for the individual student will be assigned by the voice teacher and prepared in this course by the vocal coach only after the music has been technically prepared by student’s individual voice teacher. May be repeated to a maximum of six credits. Prereq: Permission of vocal instructor.

MUS 430 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Course will include preparation of operatic as well as art song literature. Repertoire suitable for the individual student will be assigned by the voice teacher and prepared in this course by the vocal coach only after the music has been technically prepared by student’s individual voice teacher. May be repeated to a maximum of six credits. Prereq: Permission of vocal instructor.

MUS 440 UNDERGRADUATE DEGREE RECITAL. (0)
This course provides a capstone senior experience. B.M. Performance majors must present a full senior recital with a duration of a minimum of 50 minutes and consists largely of solo compositions. B.M.M.E. students must present a senior recital with a duration of a minimum of 25 minutes of music and consists largely of solo compositions. Prereq: Approval of Applied Professor and passing of pre-recital hearing.

MUS 530 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Course will include preparation of operatic as well as art song literature appropriate to designated course level. May be repeated to a maximum of six credits. Prereq: Permission of vocal opera instructors.

MUS 558 CONDUCTING. (1-4)
Private instruction in advanced conducting. Prereq: MUS 358 or MUS 364 or MUS 365 or consent of instructor.

MUS 630 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Course will include preparation of operatic as well as art song literature appropriate to designated course level. May be repeated to a maximum of six credits. Prereq: Permission of vocal opera instructors.

MUS 640 GRADUATE DEGREE RECITAL. (0)
This course provides capstone experience for M.M. and D.M.A. in Performance majors who must present full recitals and lecture-recitals that consist of a minimum of 50 minutes and consists mainly of solo and chamber compositions. Prereq: Approval of applied professor and passing of pre-recital hearing.

MUS 658 CONDUCTING. (1-4)
Private instruction in advanced conducting. Prereq: MUS 358 or MUS 364 or MUS 365, or consent of instructor.

MUS 730 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Course will include preparation of operatic as well as art song literature appropriate to designated course level. This course may only be taken after all applied vocal lesson requirements have been met. Prereq: Permission of vocal opera instructors.

MUS 758 CONDUCTING. (1-4)
Private instruction in advanced conducting. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

One-Hour Credit
The following may register for one-hour credit performance courses:
1) Music majors electing a secondary instrument or a major instrument credit by direction of the adviser to fulfill degree performance requirements.
2) Students from other divisions of the University desiring elective credit but only upon approval of the School of Music.

Students in one-hour credit performance courses for secondary instrument credit may be taught in studio groups of four or less. Each undergraduate one-hour course may be repeated twice for credit. Each graduate one-hour course may be repeated three times for credit.

Two-Hour Credit
The following may register for two-hour credit performance courses:
1) Music majors in the Music Education or B.A. in Music degree programs;
2) Music minors;
3) Graduate students by direction of the adviser.

Each undergraduate two-hour course may be repeated twice for credit. Each graduate two-hour course may be repeated three times for credit.

Three-Hour Credit
The following may register for three-hour credit performance courses:
1) Music majors in the B.M. or M.M. in performance degree programs;
2) D.M.A. students by direction of the adviser.

Each undergraduate three-hour course may be repeated twice for credit. Each graduate three-hour course may be repeated three times for credit. Not offered during the summer session.

Four-Hour Credit
Only graduate students in the music performance programs may register for four-hour courses. These courses are available only at the 600- and 700-levels. Doctoral students only may register for 700-level courses. Four-hour credit courses may be repeated three times for credit. Not offered during the summer session.
MUS 200 MUSIC FOR LIVING. (3)
This course is designed for undergraduate students who wish to gain a global perspective and understanding of the role of music in life and culture, advancements in music, and the impact of music on our own lives. Students will gain a broad musical vocabulary, explore the elements of music relevant to various cultures across time, and contemplate the role of music in their own lives and society through assignments and a collaborative creative project. Prereq: Sophomore standing.

MUS 201 MUSIC IN WESTERN CULTURE TO 1700. (3)
MUS 202 MUSIC IN WESTERN CULTURE, 1700-PRESENT. (3)
a survey of music from 1700 (Vivaldi, Bach, Handel) to the present, in the context of artistic, cultural, political, and social changes in the Western cultural community. Music majors may not use this course to fulfill either University Studies or degree requirements.

MUS 203 HISTORY OF MUSIC I. (3)
Survey of the history of music from the Medieval through the Baroque period (approximately 800-1750). Required of all music majors. Prereq: For music majors, sophomore standing; non-music majors, consent of instructor.

MUS 206 AMERICAN MUSIC. (3)
a history of music in America from c. 1620 to the present. Will require listening to recordings, reading about the music, and suggested readings in books, periodicals and documents. Students should become aware of important names, places, events and styles in music as well as important historical trends and movements.

MUS 220 SYMPHONIC MUSIC. (3)
a survey of the symphonic repertoire from the Classical through the Contemporary Periods. Emphasis will include the development of the concept of the symphony and a sense of the role of the orchestra in the development of the modern arts. Music majors may not use this course to fulfill University Studies or degree requirements.

MUS 221 SURVEY OF VOCAL MUSIC: OPERA, ART SONG, CHORAL MUSIC. (3)
Through lectures, discussions, and class participation in musical activities, students will be introduced to the fundamental elements of rock music, the artists and stylistic periods in rock history, and the cultural and social issues that rock has raised in the United States. The course will promote a better understanding of the way creativity impacts rock, its compositional processes, and the role that rock has played in society.

MUS 222 CREATIVITY AND INNOVATION IN ROCK MUSIC. (3)
Comprehensive study of the history, style, and significance of rock music in America. Emphasis will be placed on the role of rock music in society and culture. Prereq: MUS 206.

MUS 265 INSTRUMENTAL MUSIC METHODS AND MATERIALS SEMINAR II. (3)
A study of the organization and administration of the school instrumental music program. A study of the technique and practice of fundamentals of conducting. Prereq: Junior standing.

MUS 266 TEACHING MUSIC IN ELEMENTARY GRADES. (3)
Continuation of secondary instrument performance and group teaching. Prereq: MUS 263.

MUS 269 VOCAL MUSIC METHODS AND MATERIALS. (3)
A study of the organization and administration of the school instrumental music program. A study of the technique and practice of fundamentals of conducting. Prereq: Junior standing.

MUS 270 THEORY II – AURAL THEORY. (2)
Development of aural responsiveness to all elements of music, and of sight-singing techniques as an aid to music comprehension and performance. Prereq: MUS 172; prereq or concur: MUS 271.

MUS 271 THEORY II – WRITTEN THEORY. (2)
A continuation of the acquisition of harmonic vocabulary and development of part-writing techniques, elementary counterpoint, free composition, and analysis. Prereq: MUS 171, 173.

MUS 272 THEORY II – AURAL THEORY. (2)
Development of aural responsiveness to all elements of music, and of sight-singing techniques as an aid to music comprehension and performance. Prereq: MUS 270; prereq or concur: MUS 273.

MUS 273 THEORY II – WRITTEN THEORY. (2)
The continuation of the work of MUS 271. Three class hours per week. Prereq: MUS 271.

MUS 300 HISTORY OF JAZZ. (3)
A listening survey course covering the chronological evolution of jazz from its West African and European roots, through its development in America, to the present. Emphasis will be on the various styles and functions of jazz, particularly as they have been affected by changing social-cultural patterns during the twentieth century. (Same as AAS 100.)

MUS 301 APPALACHIAN MUSIC. (3)
A survey of musical genre and styles in the Southern Appalachian region. Vocal and instrumental, sacred and secular materials will be covered, together with the interactions between black and white contributions.

MUS 302 HISTORY OF MUSIC II. (3)
A survey of the history of European music during the Classic and Romantic periods of the 18th and 19th centuries. Required of all music majors. Prereq: For music majors, MUS 203 and junior standing; non-music majors, consent of instructor.

MUS 303 HISTORY OF MUSIC III. (3)
A survey of the history of music from the Twentieth century including vernacular and cultivated musical expression of the United States. Required of all music majors. Prereq: Music majors - junior standing; non-music majors - consent of instructor.

MUS 304 MUSIC COMMUNICATION I: ORAL COMMUNICATION OF MUSIC. (1)
This course is the first of a two-course sequence (with MUS 305), designed to develop students’ written and oral communication skills and information literacy in music. MUS 304 focuses on oral communication. To be taken simultaneously with MUS 302. With MUS 305, satisfies the Graduation Composition and Communications Requirement. Prereq: Junior standing in music; MUS 302 and MUS 304. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

MUS 305 MUSIC COMMUNICATION II: WRITTEN COMMUNICATION OF MUSIC. (1)
This course is the second of a two-course sequence (with MUS 304), designed to develop students’ written and oral communication skills and information literacy in music. MUS 305 focuses on written communication. To be taken simultaneously with MUS 303. With MUS 304, satisfies the Graduation Composition and Communications Requirement. Prereq: Junior standing in music; MUS 302 and MUS 304. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

MUS 317 MUSIC TECHNOLOGY. (3)
An introductory instructional media experience including basic production and utilization techniques for multimedia materials and operation of commonly used educational multimedia equipment. Topics include audio/video materials, notation software, music sequencing software, website design software, Internet/web-based education, and electronic portfolios. Prereq: Admission to the Teacher Education Program (TEP).

MUS 325 SHAKESPEARE AND MUSIC. (3)
The study of music inspired by the plays of Shakespeare, Shakespeare’s use of music in his plays, and an overview of music in Elizabethan times. The course is designed for non-majors.

MUS 330 MUSIC IN THE WORLD (Subtitle required). (3)
This course examines the music of a chosen country or region of the world. The study of the historical, stylistic, theoretical, and functional aspects of the music will be related to the socio-historical, philosophical and other cultural aspects of the people in that country or region. Prereq: Junior standing or permission of the instructor.

MUS 335 EXPLORING WORLD MUSIC AND ETHNOMUSICOCLOGY. (3)
This course explores the culture and music of various countries and cultures around the world, including that of China, Bulgaria, Ireland, India, Sub-Saharan Africa, Korea, Native America, Bali and Cuba. There will also be an emphasis on performance and music participate, community-based learning and applied ethnomusicology. We will also explore methodologies such as participant-observation, site-specific fieldwork and small-scale service activities. Be prepared to embody the music as much as possible through in-class singing, playing, dancing and taking part in performance workshops. This class is designed for students with some musical background. Prereq: Junior standing or permission of instructor.

MUS 350 MUSIC EDUCATION WORKSHOP. (1-2)
Intensive study of specialized methods and materials in one of the following areas of music education: elementary and general music, piano; orchestra, band, jazz or choir. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

MUS 358 CONDUCTING I. (2)
A study of the technique and practice of fundamentals of conducting. Prereq: Junior standing in music.

MUS 360 GENERAL MUSIC. (3)
A study of the philosophy, the curriculum, and the process involved in promoting educational development of children in the elementary, middle, and high school environment. A field experience is required. Prereq: Junior standing in music.
MUS 361 GENERAL MUSIC II. (3)
Methods, materials and techniques of teaching general music with emphasis on activities for
the early childhood and elementary children. A field experience is required. Prereq: MUS 360.

MUS 362 VOCAL MUSIC METHODS AND MATERIALS SEMINAR III. (3)
A continuation of 262 and 264. Study of performance practice and rehearsal techniques for the
choral music of each historical period. Conducting/study of the literature for the high school
chorus. A study of the organization and administration of the school choral program. Prereq:
MUS 262, 264.

MUS 363 INSTRUMENTAL MUSIC METHODS AND MATERIALS SEMINAR III. (3)
A continuation of MUS 263. Developing the ability to lead groups and to work with different
styles (social, jazz, band, and orchestral). A combination of lecture and laboratory instruction
will be utilized. Prereq: Consent of instructor.

MUS 365 INSTRUMENTAL MUSIC METHODS AND MATERIALS SEMINAR IV. (3)
Advanced conducting; emphasis on advanced rehearsal techniques with use of instrumental
materials and advanced music for the high school ensemble. Continued observation in the public schools with
options for teacher-aide assignment. Prereq: MUS 363.

MUS 366 MARCHING BAND TECHNIQUES. (2)
A study of techniques, styles and trends with emphasis on drill writing, music arranging, and
administrative/instructional methods as they relate to the contemporary marching band. A
combination of lecture and laboratory instruction will be utilized. Prereq: Consent of instructor.

MUS 370 THEORY III - ADVANCED HARMONY AND COUNTERPOINT. (3)
A study of the 19th century harmonic idioms through projects in analysis and composition.
Lecture, three hours. Prereq: MUS 273.

MUS 371 INSTRUMENTATION AND ARRANGING. (2)
A basic course in instrumentation and arranging for typical school instrumental and vocal
ensembles. Prereq: MUS 273.

MUS 372 MUSICAL ANALYSIS. (2)
A study of musical style through structural, harmonic and melodic analyses. Prereq: MUS 273.

MUS 390 TOPICS IN MUSIC HISTORY (Subtitle required). (3)
Studies of a specific composer, genre, school of composers, or a topic crossing the traditional
boundaries of music history. May be repeated to a maximum of six credits when identified by different
course subtitles. Prereq: MUS 263, 302, and 303, or consent of instructor.

MUS 395 INDEPENDENT WORK IN MUSIC. (1-3)
May be repeated to a maximum of six credits. Prereq: Major in music and a standing of 3.0 or
consent of instructor.

MUS 400G MUSIC HISTORY AND REVIEW. (3)
A review of music history from the Medicinal period through the twentieth century. May not be
used to satisfy major requirements for Bachelor of Arts in the College of Fine Arts. Prereq:
Provisional graduate standing.

MUS 430G MUSIC THERAPY FOUNDATIONS AND PRINCIPLES I. (3)
This course is directed toward developing entry-level competencies needed in the field of music
therapy. Prereq: Permission of instructor.

MUS 431G MUSIC THERAPY FOUNDATIONS AND PRINCIPLES II. (3)
This course is a continuation of Music Therapy Foundations and Principles I and is directed
ward toward developing entry-level competencies needed in the field of music therapy. Prereq: MUS 430G or permission of instructor.

MUS 432G MUSIC THERAPY APPLICATIONS. (3)
This course is directed toward developing entry-level competencies needed in the field of music
therapy. MUS 432G builds on the music therapy principles and foundations established in
MUS 430G and 431G, specifically focusing on professional applications. Prereq: MUS 430G
and 431G or permission of instructor.

MUS 433G MUSIC THERAPY CLINICAL INTERNSHIP. (3)
This course involves off-site clinical experiences in a student-selected area of interest. Students
will complete a minimum of 90 hours of internship based clinical training in medical, psychiatric, special education, geriatric or other clinical music therapy
setting. Prereq: All music therapy equivalency course work must be completed prior to
introduction.

MUS 434G MUSIC THERAPY CLINICAL SKILLS. (2)
This course is designed to teach clinical applications of music skills (folk/rock, guitar, percussion
skills) and group leading/therapeutic interaction skills for music therapy practice. Students will
have the opportunity to develop these skills in the classroom setting and implement the skills
in community-based experiences. Special emphasis will be placed on developing the ability to
simultaneously implement both music and group leading/interaction skills. Prereq: Permission of the instructor.

MUS 435G ANATOMY FOR MUSIC THERAPY PRACTICE. (3)
This course is an introduction to basic terminology related to human anatomy with an added
emphasis on applications of this information to multiple aspects of the practice of music
therapy. Students will learn to identify important physical components of anatomical systems
and relate knowledge of human systems to personal health and wellness, needs of client
populations, music performance, music therapy research, and human physiology. Prereq:
Music therapy major or permission of instructor.

MUS 470G REVIEW OF HARMONY. (1)
A review of common practice diatonic and chromatic harmony, through written work and
analysis. May not be used to satisfy major requirements for Bachelors degrees in the College
of Fine Arts. Lecture; two hours per week. Prereq: Provisional graduate standing.

MUS 471G REVIEW OF AURAL SKILLS. (1)
A review and continued development of basic listening skills, and the ability to comprehend
aurally harmonic function within a tonal framework and musical structures, both micro-
structures and macro-structures. May not be used to satisfy major requirements for Bachelor's degrees in the College of Fine Arts. Lecture; two hours per week. Prereq: Provisional graduate standing.

MUS 500 MUSIC OF THE MIDDLE AGES. (3)
The development of Western music through the 14th century. Prereq: MUS 203 or consent of instructor.

MUS 501 MUSIC OF THE RENAISSANCE. (3)
A survey of vocal and instrumental music of the 15th and 16th centuries. Prereq: MUS 203 or consent of instructor.

MUS 502 MUSIC OF THE BAROQUE ERA. (3)
The history of vocal and instrumental music in the Baroque style from 1600 to 1750. Prereq:
MUS 302 or consent of instructor.

MUS 503 MUSIC OF THE CLASSIC PERIOD. (3)
The development of music in the Classic style from the early 18th century to 1800. Prereq:
MUS 302 or consent of instructor.

MUS 504 MUSIC OF THE 19th CENTURY. (3)
A study of master works of music composed in the 19th century. Prereq: MUS 303 or consent of instructor.

MUS 505 MUSIC OF THE 20th CENTURY. (3)
A stylistic study of representative compositions of the 20th century. Prereq: MUS 303 or consent of instructor.

MUS 506 HISTORY OF AMERICAN MUSIC. (3)
A survey of cultivated and vernacular musical styles in America from Colonial times to the
present. Prereq: MUS 302 and 303 or consent of instructor.

MUS 507 TOPICS IN MUSIC HISTORY AND LITERATURE (Subtitle required). (3)
A focused study of the music of a single composer, genre, or musical topic. May be repeated, with different
subtitles, for up to 9 credits. Prereq: Junior or graduate standing in music. MUS 203, 302, and 303, or permission of instructor.

MUS 520 VOCAL SOLO LITERATURE. (3)
A stylistic study of solo vocal music from the Baroque to the present. Prereq: MUS 302 and 303 or consent of instructor.

MUS 521 ORGAN LITERATURE. (3)
A course of study designed to give the organ student a practical knowledge of the development of
the organ, its construction, the standard literature, and teaching materials. Prereq: MUS 302 and 303 or consent of instructor.

MUS 522 PIANO LITERATURE TO 1830. (3)
A review of master works of music composed in the 18th century. Prereq: MUS 302 or consent of instructor.

MUS 523 PIANO LITERATURE SINCE 1830. (3)
A historical and analytical study of music written for the piano from the inception of the
Romantic period to the present, from the parallel perspectives of changes in the approach to
the instrument and stylistic developments as they are reflected in piano writing. Prereq: MUS 302 or permission of instructor.

MUS 540 APPLICATIONS OF MUSIC TECHNOLOGY. (3)
Applications of music technology hardware and software, including but not limited to MIDI
systems, sequencing, notation software, and computer code. Emphasis will be on use of technology
as tools for creativity and productivity. Content will be continually updated. No prior
knowledge of computer or MIDI experience assumed; space preference given to music majors. Prereq:
Nonmusic majors must obtain permission of instructor; ability to read music required.

MUS 550 TOPICS IN MUSIC EDUCATION (Subtitle required). (1-3)
In-depth study of a designated topic, special issue, philosophy, or methodology of music
education. May be repeated, with different course subtitles. Prereq: Music education major or permission of instructor.
MUS 555 SOUNDS OF MUSIC: PSYCHOLOGY AND PERCEPTION. (3)
This course focuses on the roles of music in human life. Issues and research findings regarding what makes music and how human beings perceive and respond to musical sounds are examined. Critical thinking and reflection on topics such as music preferences, musical performance, and listening to music are meant to encourage the student to identify the relationship between music and human behavior. This course is suitable for students who are curious to learn about the influence of music on people. It is open to all students with or without musical training.

MUS 560 ORFF SCHULWERK. (1-3)
The study of the philosophy and the pedagogy of the Orff Schulwerk method through movement, discussion, performance, improvisation, composition, and demonstration. Number of credits awarded will depend on total number of hours of participation and the amount of work in musical arrangement, orchestration, and composition. May be repeated to a maximum of six credits. Prereq: Junior standing in music or approval of instructor.

MUS 561 ORFF CERTIFICATION: LEVEL I, II, OR III. (2)
An intensive and systematic study of the philosophy and the pedagogy of the Orff Schulwerk method based on the curriculum recommended by the American Orff Schulwerk Association. The three main components are ensemble, recorder, and movement. Participants must demonstrate competency in orchestration, recorder, and pedagogy in order to obtain certification. Lecture, two hours; laboratory, two hours per week. May be repeated in sequence to a maximum of six credits. Prereq: Junior standing in music or approval of instructor.

MUS 566 PIANO PEDAGOGY. (3)
Investigation of techniques and materials for teaching piano in groups and to individual students, both children and adults. Prereq: Consent of instructor.

MUS 570 ORCHESTRATION. (2)
This course includes a study of the individual instruments of the orchestra and band with practice in scoring for these instruments. Prereq: MUS 571.

MUS 571 ORCHESTRATION. (2)
A continuation of MUS 570. Prereq: MUS 570.

MUS 572 COUNTERPOINT. (3)
A study of 16th century contrapuntal techniques and of contrapuntal influences in common-practice music. Prereq: MUS 273 or equivalent.

MUS 573 COUNTERPOINT. (3)
A study of 18th century contrapuntal techniques and of contrapuntal influences in Romantic and 20th century music. Prereq: MUS 273 or equivalent.

MUS 574 COMPOSITION. (2)
A basic course in original composition and orchestration. Prereq: MUS 371.

MUS 575 COMPOSITION. (2)
A continuation of MUS 574. Prereq: MUS 574.

MUS 578 ANALYSIS AND STYLE SURVEY. (3)
Studies in analytical terminology and methodology; survey of major stylistic practices of Western music. Prereq: MUS 372 or equivalent.

MUS 600 RESEARCH I. (3)
A course designed to acquaint students with basic techniques and tools used in music education research.

MUS 601 FOUNDATIONS IN MUSIC EDUCATION. (3)
An historical survey of thought concerning the place and significance of music in the education of the individual and the group.

MUS 618 RESEARCH METHODS. (3)
A survey of basic research techniques and materials in musicology and theory. Prereq: A reading knowledge of elementary German.

MUS 620 ADVANCED VOCAL REPERTORY (Subtitle required). (3)
An intensive study of the stylistic and interpretive characteristics of solo vocal literature of a specified repertory. May be repeated as desired with different subtitles. Prereq: Graduate standing or consent of instructor.

MUS 622 SYMPHONIC LITERATURE. (3)
An intensive study of orchestral literature from the classical period to the present. Prereq: Graduate standing in music or consent of instructor.

MUS 623 OPERA LITERATURE I. (3)
An intensive study of the history and literature of opera from its origins around 1600 through the early Romantic period. Prereq: Graduate standing in music or consent of instructor.

MUS 624 CHAMBER MUSIC LITERATURE. (3)
An intensive study of the development of instrumental chamber music. Prereq: Graduate standing in music or consent of instructor.

MUS 625 CHORAL LITERATURE. (3)
An intensive study of choral literature from the Renaissance period to the present. Prereq: Graduate standing in music or consent of instructor.

MUS 627 OPERA LITERATURE II. (3)
An intensive study of the history and literature of opera from the early Romantic period through the present. Prereq: Graduate standing in music or consent of instructor.

MUS 630 MEDICAL MUSIC THERAPY. (3)
This course is directed toward developing advanced competencies in medical music therapy objectives. Current research related to medical music therapy, current laws and regulations governing medical practice, and current music therapy theory related to the practice of music therapy in a medical setting will be addressed. Prereq: Permission of the instructor.

MUS 631 MUSIC IN COUNSELING. (3)
This course is directed toward developing advanced competencies in music therapy theory and clinical skills. Specifically, the use of music in counseling and the development of counseling techniques appropriate in music therapy will be addressed. Prereq: Permission of the instructor.

MUS 633 GRADUATE CLINICAL PLACEMENT IN MUSIC THERAPY. (1-3)
This course is directed toward the development of advanced clinical skills in music therapy in an area chosen by the student in consultation with program faculty. Prereq: Permission of instructor and satisfactory completion of MUS 433G.

MUS 648 MUSIC SOFTWARE TECHNOLOGY. (3)
This course is directed toward developing advanced competencies in music technology common to the fields of music education and music therapy. Supervised projects will be a large component of this course and projects will be individualized based on students' educational track and career goals. All course instructional materials are conducted online but there are three face-to-face meetings during the second half of the course. Two of these meetings are individual conferences with the instructor, and one is for presentation of the project on Saturday morning of the last week of class schedule. Prereq: Permission of instructor.

MUS 650 MUSIC EDUCATION WORKSHOP. (1-4)
Intensive study of advanced methods and materials in one of the following areas of music education: elementary and general music; the school orchestra, the school band, choral music. May be repeated once for a total of two, three or four credits.

MUS 660 ADVANCED MUSIC EDUCATION METHODS AND MATERIALS (Subtitle required). (3)
An in-depth study and analysis of the methodology and materials and their development in music education. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: Graduate standing or consent of instructor.

MUS 662 DALCROZE APPROACH I. (3)
This course is especially designed for music teachers who wish to acquire knowledge and skills in Dalcroze pedagogy and musicmanship. There are two parts of this course: on-site participation and a Blackboard component. Students will be immersed in the principal subjects of the Dalcroze approach: eurhythmics, solfège, and improvisation. The on-site session provides creative experiences of hands-on activities and the Blackboard component covers assignments related to the philosophy, history, composition, lesson designs, and discussion of the Dalcroze approach in music education.

MUS 663 DALCROZE APPROACH II. (3)
This course is especially designed for music teachers who wish to acquire knowledge and skills in Dalcroze pedagogy and musicmanship. There are two parts of this course: on-site participation and a Blackboard component. Students will be immersed in the principal subjects of the Dalcroze approach: eurhythmics, solfège, and improvisation. The on-site session provides creative experiences of hands-on activities and the Blackboard component covers assignments related to the philosophy, history, composition, lesson designs, and discussion of the Dalcroze approach in music education. Prereq: Successful completion of MUS 662 or equivalence and permission by instructor.

MUS 664 MUSIC AND SPECIAL LEARNERS. (3)
This course provides an overview of the characteristics and instructional needs of special learners. Students will be introduced to administrative issues and laws governing special educational practices in the public school setting. Educational strategies and adaptations/modifications will be addressed with emphasis on applications in the music setting. Teaching adult learners and gifted students will be included, as will therapeutic uses of music appropriate for music therapists working in special education settings. A field experience is required. Prereq: Consent of instructor.

MUS 665 PHYSIOLOGY AND FUNCTIONING OF THE SINGING VOICE. (3)
Detailed study of vocal physiology and acoustics of the singing voice. Major historical sources and recent scientific research form the basis of the course. Designed for professional voice teachers and music educators who work with singers. Prior study of acoustics recommended.

MUS 666 ADVANCED ORFF SCHULWERK. (1-3)
For experienced music teachers who already had basic Orff Schulwerk training. This course enables students to advance their music leadership, refine pedagogic techniques, and do research in Orff Schulwerk. Prereq: MUS 561 – equivalent to Level Two Orff-Schulwerk Teacher Training or permission of the instructor.

MUS 667 MATERIALS, TECHNIQUES AND LITERATURE OF VOICE TRAINING. (3)
Survey of currently published books, anthologies, and other materials for voice teaching. Various approaches to teaching vocal technique will be examined; other pertinent literature explained. Prereq: MUS 665.

Course Descriptions
MUS 669 INDEPENDENT DALCROZE PROJECT. (3)
This course is especially designed for music teachers who have acquired adequate knowledge and skills in Dalcroze pedagogy and musicianship and are ready to demonstrate independence in designing and completing an instructional or research project that exemplifies the Dalcroze approach. The student is guided at a distance by the instructor at all phases of the project and carry out the study at his or her own school or location. Prereq: a) Successful completion of MUS 665 (or equivalent) and permission by instructor, or b) successful completion of MUS 668.

MUS 671 ANALYSIS OF TONAL MUSIC II. (3)
Introduction to the theories of Heinrich Schenker, their application to the analysis of tonal music and to performance. Intensive analytical work and selected readings. Prereq: MUS 578 or equivalent.

MUS 672 ANALYSIS OF MUSIC SINCE 1900 I. (3)
An introduction to and exploration of analytical techniques and issues relevant to the music since 1900, addressing as well the performance implications of analytical decisions insofar as possible. Various musical dimensions will be studied including motivic structure, meter/ rhythm, harmonic syntax, formal processes and text/music relationships. Prereq: MUS 578 or equivalent.

MUS 673 ADVANCED COMPOSITION. (2)
May be repeated to a maximum of six credits. Prereq: MUS 575.

MUS 674 PEDAGOGY OF THEORY. (3)
Examination of resources and techniques of teaching undergraduate music theory (aural and written components). Extensive review of the textbook literature, study of the application of contrasting theoretical approaches, and the examination of relevant Computer Assisted Instruction materials. Requirements to include practice teaching and observation of undergraduate music theory classes (MUS 171-173, 271-273; 170-172; 270-272). Prereq: MUS 578 or equivalent.

MUS 675 INTERNSHIP IN THEORY PEDAGOGY. (1)
An internship providing pedagogical experience in undergraduate music theory (written and aural). Internship is conducted under the supervision of a faculty member who is teaching an undergraduate music theory course (MUS 170, 171, 172, 173, 270, 271, 272, or 273). May be repeated to a maximum of four credits.

MUS 676 ADVANCED ANALYTICAL TECHNIQUES. (3)
Study of the most significant approaches to music analysis of the 20th century, including Schenkerian analysis, Forte set theory, and others. Prereq: MUS 578 or equivalent.

MUS 677 CONTEMPORARY MUSIC IDIOMS. (3)
A survey of theoretical concepts from the Greeks through 19th century English and German theorists. Prereq: MUS 578 or equivalent.

MUS 680 BAND HISTORY AND LITERATURE. (3)
A study of the heritage of the wind band through its leaders and literature, from its earliest roots to the present, with emphasis on the period from 1950 to the present. Prereq: Consent of instructor.

MUS 681 ADVANCED REHEARSAL TECHNIQUES—BAND. (3)
The development of effective rehearsal skills in the secondary school and university band settings, with emphasis on performance orientation, the development of aural concepts and advanced rehearsal analysis and techniques. Prereq: MUS 365, teaching experience or permission of instructor.

MUS 684 ADVANCED STRING METHODS AND MATERIALS. (3)
The study of string pedagogy through historical perspectives as it relates to the individual instruments as well as to class instruction. Prereq: Graduate standing in music or approval of instructor.

MUS 690 TOPICS IN MUSICOLOGY (Subtitle required). (3)
Investigation of critical and historical problems in musicology; intensive study of a specific composer, genre, or school of composers. May be repeated to a maximum of six credits when identified by different course subtitles. Prereq: Graduate standing and consent of instructor.

MUS 693 WORLD MUSIC FOR TEACHERS. (3)
This course provides a comprehensive survey of world music for teachers, an introduction to theories and methodologies of ethnomusicology and preparation for developing a more in-depth knowledge of a given musical region. Prereq: Graduate standing or consent of instructor.

MUS 694 INTERNSHIP IN SACRED MUSIC. (1)
An internship to provide students in the Master of Music in Sacred Music program with a practical field experience in a sacred setting. The internship is identified and conducted under the supervision of a UK School of Music faculty supervisor and on-site coordinator. Students must file a Learning Contract with the School of Music DGS. May be repeated to a maximum of three credits. Prereq: Completion of 12 hours in the M.M. in Sacred Music program or by consent of instructor.

MUS 695 INDEPENDENT WORK IN MUSIC. (1-3)
Study of an individually selected topic relevant to a student’s academic development. For work in musicology, theory, music education, or vocal literature, students should enroll in the designated independent work courses listed separately. May be repeated to a maximum of six credits. Prereq: Graduate standing in music and consent of instructor.

MUS 700 MEDIEVAL AND RENAISSANCE NOTATION. (3)
The study and transcription of the notation of medieval and Renaissance polyphony, and of the various keyboard and lute tablatures of the 16th and 17th centuries. Prereq: Consent of instructor.

MUS 702 SEMINAR IN MUSICOLOGY. (3)
Study and research in specific musicological problems. May be repeated to a maximum of eighteen hours. Prereq: Consent of instructor.

MUS 703 PROSEMINAR IN MUSICOLOGICAL METHODS. (3)
An introductory exploration into the methodologies currently utilized in the field of musicology. Prereq: Consent of instructor.

MUS 705 RESEARCH II. (3)
A course designed to lead the student in music education to do experimental research in the area of music education. Prereq: MUS 600.

MUS 706 MUSIC LEARNING AND BEHAVIOR. (3)
This course is intended for graduate students in music education with the major focus of the class involved in learning behavioral principles, learning observational categories pertaining to classroom reinforcement and role playing and practicing techniques to be employed later in the classroom. Prereq: Graduate standing in music.

MUS 707 TESTS AND MEASUREMENTS IN MUSIC. (3)
This course is designed to provide students with knowledge in measurements and evaluation in the field of music education and research. Topics include principles of measurement, administration and evaluation of published standardized and teacher-made tests, interpretation of test results, and test construction. Prereq: MUS 600.

MUS 710 INTRODUCTION TO ETHNOMUSICOLOGY. (3)
An introduction to the materials and methodologies of the field of ethnomusicology. Prereq: Graduate standing in music.

MUS 711 SEMINAR IN ETHNOMUSICOLOGY (Subtitle required). (3)
Intensive research-based study of specific problems and topics in ethnomusicology. May be repeated under a different subtitle to a maximum of twelve credits. Prereq: Graduate standing in music.

MUS 719 INDEPENDENT WORK IN MUSIC THERAPY. (1-3)
May be repeated to a maximum of six hours. Prereq: Four to six hours of graduate credit in the area of specialization and consent of instructor.

MUS 730 INDEPENDENT WORK IN MUSIC THERAPY. (1-3)
This course is directed toward developing individualized advanced competencies in music therapy in one of the following areas: Music Therapy Theory, Research, Musical Development and Personal Growth, and Clinical Administration. Prereq: Permission of instructor.

MUS 731 MUSIC PERCEPTION AND COGNITION. (3)
This course is designed for doctoral students with a concentration in music education and will cover the physiological, sensory, and organizational processes involved in music perception and cognition. It is also directed toward developing advanced competencies in understanding how music can be used to treat neurological disorders and stroke. Prereq: Permission of instructor.

MUS 732 SEMINAR: TOPICS IN MUSIC THERAPY. (3)
This course is directed toward developing advanced competencies in various topics in and related to music therapy. Topics will include supervision, leadership skills, research, current theories of practice and clinical administration. Prereq: Permission of instructor.

MUS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MUS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
Course Descriptions

MUS 750 INDEPENDENT WORK IN MUSIC EDUCATION. (1-3) May be repeated to a maximum of six hours. Prereq: Four to six hours of graduate credit in area of specialization and consent of instructor.

MUS 760 MUSIC RESEARCH III. (3) This course is directed toward developing advanced competencies in research methods common to the fields of music education and music therapy. MUS 760 will build upon and expand the foundations established in MUS 600 and MUS 705, covering topics such as mixed methods research, integrative or advanced statistical analyses, and social/behavioral science designs and medical research designs. Supervised research projects will be a large component of this course and projects will be individualized based on students’ educational track and career goals. Prereq: MUS 600 Research I and MUS 705 Research II and permission of instructor.

MUS 762 MUSIC IN HIGHER EDUCATION. (3) Historical and comparative studies in the teaching and administration of music in colleges and universities. Includes case studies in administration, music in European higher education and the relationship of music to all other elements of the academic program. Prereq: MUS 751.

MUS 766 SEMINAR IN MUSIC EDUCATION. (3) Advanced professional study in the theory and practice of music education. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MUS 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MUS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

MUS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

MUS 770 PSYCHOLOGY OF MUSIC. (3) A study of the processes of musical thinking and the effects of music on human behavior.

MUS 772 SEMINAR IN THEORY. (3) Individual and group study of theoretical problems and areas of inquiry. May be repeated to a maximum of nine credits. Prereq: Graduate standing in Theory, or consent of instructor.

MUS 780 DIRECTED RESEARCH IN VOCAL LITERATURE. (1-3) Individual directed research. Elective course for master’s degree students. Required for doctoral voice majors; topics assigned at discretion of instructor in proportion to credits undertaken. May be repeated to a maximum of 12 credits. Prereq: MUS 618 and MUS 620 or permission of instructor.

MUS 799 INDEPENDENT WORK IN MUSIC THEORY. (1-3) May be repeated to a maximum of six hours. Prereq: Four to six hours of credit in area of specialization and consent of instructor.

NEU Neurology

NEU815FIRST-YEAR ELECTIVE, NEUROLOGY. (1-3) With the advice and approval of his her faculty adviser, the first-year student may choose approved electives offered by the Department of Neurology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

NEU825 SECOND-YEAR ELECTIVE, NEUROLOGY. (1-4) With the advice and approval of his her adviser, the second-year student may choose approved electives offered by the Department of Neurology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

NEU 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6) With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his knowledge and clinical competence. Prereq: Admission to the fourth-year College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:

NEU 850 ACTING INTERNSHIP IN NEUROLOGY
NEU 851 CHILD NEUROLOGY INDEPTH
NEU 852 RESEARCH IN NEUROLOGY
NEU 853 NEUROLOGY CONSULTATION
NEU 854 CLINICAL NEUROPHYSIOLOGY (EEG, EMG, AND EVOKED POTENTIALS)

NRE Natural Resources and Environmental Science

NRE 201 NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (3) An introductory course in management of natural resources as supported by environmental science at an ecosystem level. Students will write a range of papers about natural resource issues. An overnight field trip is required. Prereq: CIS/WRD 111 or equivalent (ENG 101, ENG 102, and COM class) and sophomore standing.

NRE 320 NATURAL RESOURCE AND ENVIRONMENTAL ANALYSIS. (3) A field-oriented course taught of campus as a three-week summer camp in August. Emphasis is placed on methodologies for field data collection necessary to evaluate a variety of natural resources on forest, agricultural, and surface mined lands. Students will become familiar with sampling instrumentation, collection, preservation, analysis and data interpretation. Lecture, 10 hours; laboratory, 30 hours per week (Monday–Friday) for three weeks. Prereq: BIO 150/152 and CHE 105.

NRE 355 INTRODUCTORY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS. (3) An introduction to the concepts and methods of compilation, management, analysis, and display of spatially-referenced and tabular data utilizing vector and raster data models. Lecture will be complemented with computer based laboratory exercises. Lecture, two hours; laboratory, four hours per week. Prereq: Third year and above LA major, junior/senior NRES major, or permission of instructor. (Same as LA 355.)

NRE 381 NATURAL RESOURCE AND ENVIRONMENTAL POLICY ANALYSIS. (3) This course examines the historical development of natural resource and environmental policy, provides an overview of the policy process and key federal agencies which manage natural resources or implement environmental regulations, and introduces basic policy analysis techniques so students can prepare and present a case-specific analysis of existing resource or environmental policy.

NRE 390 SPECIAL TOPICS IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (1-3) This course focuses on unique and timely topics in natural resources and environmental science. May be repeated under a different subtitle for a maximum of six credits. Prereq: NRE 301 or consent of instructor.

NRE 395 INDEPENDENT STUDY IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (3) Study and independent work on selected problems related to natural resources and environmental science conducted under the supervision of a faculty member and with clear relevance to the student’s Environmental Systems Emphasis Area. The goal of NRE 395 is for students interested in research to have an authentic research experience, working directly with a faculty member or graduate student in data collection and analysis, as well as conducting a portion of the research independently. Prereq: Consent of appropriate faculty and a plan of learning objectives approved by the NRCM Internship Coordinator. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

NRE 420G TAXONOMY OF VASCULAR PLANTS. (4) A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local spring flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 148 and BIO 152 or one course in introductory botany or consent of instructor. (Same as BIO 420G.)

NRE 450G BIOGEOCHEMISTRY. (3) A lecture and lab course emphasizing the role of microbial processes on elemental and pollutant cycling in terrestrial soils and aquatic sediments. Soils and sediments from different ecosystems are evaluated for microbial community composition and biogeochemical cycling of organic and inorganic nutrients and pollutants using advanced molecular and laboratory techniques. Several all day field trips and laboratory exercises required. Limited to eight students at the senior or higher level standing. Prereq: CHE 105, 107, 111, 113. (Same as PLS 450G.)

NRE 455G WETLAND DELINEATION. (3) Basic concepts of natural wetlands ecoregions, their functions, environments, and major features used for their identification and classification. Application of basic hydrology, hydrophytic vegetation and hydric soil indicators for identification of jurisdictional wetlands utilizing
Course Descriptions

NS Nutritional Sciences

NS 601 INTEGRATED NUTRITIONAL SCIENCES I. (3)
The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism; (2) the impact of nutritional influences on macronutrient metabolism to health and disease; (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: IBS 601, PGY 206. (Same as CNU 601.)

NS 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as ASC/CNU 602.)

NS 603 INTEGRATED NUTRITIONAL SCIENCES III. (2)
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as CNU/ASC 603.)

NS 604 LIPID METABOLISM. (3)
Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas are: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G, and BCH 401 G or equivalent or consent of instructor. (Same as ASC/CNU/PT 605.)

NS 606 MOLECULAR BIOLOGY APPLICATIONS IN NUTRITION. (2)
Focus will be on the use of the most recently developed techniques and model systems in molecular biology for studying nutrient regulation of gene expression. Examples include current problems in nutrition such as models for engineering plants containing more desirable nutrient sources (fats); for studying effects of various nutrients in transgenic mice on tumor suppressor genes and oncogene expression, that are important in cancer prevention; and for studying nutrient effects on genes that modulate obesity. Prereq: BCH 501 and 502 or equivalent; or BCH 401 G and consent of instructor. (Same as CNU 606.)

NS 608 NUTRITIONAL IMMUNOLOGY. (3)
Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from experimental and clinical perspectives. A lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: PGY 412G and CNU 601, or consent of instructor. (Same as CNU 608.)

NS 609 ETHICS IN CLINICAL SCIENCES RESEARCH. (1)
Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as CNU 609.)

NS 620 NUTRITION AND AGING. (3)
NS 623 PROFESSIONAL DEVELOPMENT FOR SCIENTISTS IN TRAINING. (3)
The purpose of this course is to introduce graduate students to useful topics in their quest to attain and retain a tenure track researcher position (or equivalent) at some point in their scientific future. These subjects are not always taught by mentors or through a traditional curriculum, but they are of utmost importance in a successful career. A breadth of issues will be presented that many principal investigators would say they wished they learned in graduate school and should give students the resources to become competitive scientific professionals. (Same as PHA 623.)

NS 630 ADVANCED COMMUNITY NUTRITION. (3)
NS 640 HUMAN NUTRITION: ASSESSMENT. (3)
Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: NPS 510, NPS 511 or equivalent. (Same as NS 640.)

NS 651 TOPICS IN NUTRITIONAL SCIENCES I. (4)
NS 652 TOPICS IN NUTRITIONAL SCIENCES II. (4)
Selected topics in nutritional sciences as related to health and chronic diseases, e.g., gastrointestinal disease, cancer, AIDS, diabetes, cardiovascular disease, obesity, including drug-nutrient interactions. Prereq or concur: NS/CNU 601, NS/ASC 602. (Same as CNU 701.)

NS 702 CLINICAL WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3)
A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer options in therapeutic nutrition, and or health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services e.g. surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CNU 601, NS/ASC 602, NS/CNU 701, NS/CNU 610 and graduate status or consent of instructor. (Same as CNU 702.)

NS 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as CNU/NFS 704.)

NS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. (Same as NSF 748.)

NS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

NS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

NS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. (Same as NSF 768.)

NS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

NS 771 GRADUATE SEMINAR IN NUTRITIONAL SCIENCES. (0-1)
Reports and discussion on recent research and current literature in nutritional sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing and consent of instructor for non-NS students enrolled for one credit.

NS 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NFS 782.)

NS 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NFS 790.)
on providing quality and safe nursing care that contributes to optimal patient outcomes. Lecture, 3 hours; clinic, 9 hours per week. Prereq: Junior year standing in nursing, NUR 201 or NUR 221. NUR 210 with a minimum grade of C in each course; current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 300.

NUR 310 RESEARCH FOR EVIDENCE-BASED NURSING PRACTICE. (3)

This course provides an introduction to the research methodology essential to providing evidence-based nursing care. Students will acquire the fundamental basics in quantitative and qualitative nursing research. Legal and ethical issues are discussed. The students will also develop the knowledge and skills necessary to appraise research and apply to evidence-based nursing practice, including up-to-date electronic resources. Students learn to apply this knowledge through evidence-based practice processes. Students will then communicate an evidence-based project to their peers. Prereq: STA 210 or BST 330, or consent of instructor. RN-BSN Prereq: NUR 350, STA 210 or BST 330 or equivalent, or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

NUR 311 NURSING CARE OF CHILDBEARING FAMILIES. (5)

This course is designed to provide classroom and clinical experiences to enable the student to provide continuity of nursing care for families when children and adolescents experience a variety of health problems. Lecture, two hours; laboratory, 6 hours per week. Prereq: NUR 871, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 313.

NUR 313 NURSING CARE OF CHILDBEARING FAMILIES. (5)

This course is designed to provide classroom and clinical experiences to enable the student to provide continuity of nursing care for families when children and adolescents experience a variety of health problems. Lecture, two hours; laboratory, 6 hours per week. Prereq: NUR 871, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 311.

NUR 350 CONCEPTS IN PROFESSIONAL NURSING. (5)

This course will provide students with an opportunity to explore and understand theories from other disciplines that influence nursing practice. Students will learn how to practice in a manner that encompasses the assessment of the learner and consideration of the learner’s needs in various health care situations. The student will learn to develop a teaching plan and will demonstrate effective teaching strategies. Students will expand their knowledge of cultural diversity and evidence-based practice to promote quality and safe, patient-centered care. This course is taught in an online format. Students must be active, self-directed learners to be successful in this class. Students will practice skills of critical thinking and writing within the discipline. Prereq: Admission to College of Nursing RN-BSN option. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

NUR 351 HEALTH ASSESSMENT. (2)

This health assessment course offers essential assessment and skill development opportunities for nursing. It includes intensive work on the principles and techniques of performing a health assessment in the context of developmental, physiological, psychological, and environmental perspectives. Individual and families with diverse populations; case studies will be used to analyze family assessment models. Clinical emphasis will be placed on the assessment of individual clients. Prereq: Admission to College of Nursing RN-BSN option.

NUR 352 PHARMACOLOGY. (3)

This is a general introductory course to drugs and drug therapy. Various drugs will be studied and categorized in the context of clinical pathological disorders or problems. The general approach will involve a review of the pathophysiology of specific disorders and the categories of drugs currently employed in the treatment of these problems. The students will learn mechanism of action, therapeutic effect, side effects, drug interactions, and toxicities of these drugs, and will be provided with examples of commonly used drugs in each category of drugs discussed. RN-BSN Prereq or coreq: NUR 364.

NUR 354 PATHOPHYSIOLOGY. (3)

This course addresses pathophysiological concepts basic to nursing practice. Concepts essential for understanding major health problems which occur across the life span and that are encountered in multiple care settings are discussed. Emphasis is on understanding how and why various pathophysiologic signs and symptoms occur. RN-BSN coreq: NUR 352.

NUR 380 ENERGY HEALING LAB. (1)

This course is designed to introduce students to the use of self as a healing force and to a variety of biofield energy healing techniques from the modalities of Therapeutic Touch, Reiki, Pranic Healing, Healing Touch, Bowen Therapy, Polarity Therapy, and from the work of Rosalyn Bruyere. The format of this course will be controlled, laboratory setting for the demonstration and practice of these techniques; students will practice the techniques on each other and on other volunteers from the community. Research involving these techniques will be read and discussed and faculty will share clinical experiences in the use of these techniques. Prereq: Admission to the College of Nursing or consent of instructor.
NUR 381 NURSING PRACTICE INTERNSHIP. (1) This seminar is designed to enhance the nursing knowledge gained throughout the nursing curriculum. Students will study major nursing concepts in-depth, roles of the professional nurse and apply them to their clinical practice experiences. Prereq: NUR 210 and NUR 211 or NUR 221.

NUR 382 SPECIAL TOPICS IN NURSING. (1-3) Study and analysis of current and topical problems and issues in nursing. Directed by a faculty member with expertise in the topic under study. May be repeated to a maximum of 18 credits.

NUR 384 INTRODUCTION TO PERIOPERATIVE NURSING. (1) This course will introduce the student to the perioperative nursing process. Students will learn basic information about planning patient care for all three perioperative phases—preoperative, intraoperative, and postoperative. Class meets four hours per week. Prereq: NUR 301.

NUR 386 EMERGENCY NURSING ELECTIVE. (1) The course focuses on critical thinking, planning, documentation and evaluation in the nursing management of patients requiring emergent trauma care. This course provides a foundation of trauma nursing and focuses on application of scientific process to needs of trauma patients. Prereq: Successful completion of NUR 300 and 301 or licensed RN or permission of instructor.

NUR 391 NURSING RESEARCH INTERNSHIP. (1-3) This nursing research internship is an independent study elective designed to provide students with experience in conducting nursing research. Students will work with a nursing research faculty mentor on a research project. Prereq: Admission to the professional nursing program.

NUR 393 NURSING RESEARCH INTERNSHIP. (1-3) This nursing research internship is an independent study elective designed to provide students with experience in conducting nursing research. Students will work with a nursing research faculty mentor on a research project. Prereq: Admission to the professional nursing program.

NUR 395 ELECTIVE STUDY IN NURSING. (1-4) An independent study project investigating an area of interest under the guidance of faculty. May encompass library study or patient care utilizing aspects of scientific approach. May be repeated to a maximum of four credits.

NUR 397 NURSING SKILLS LAB INTERNS. (1-3) This nursing skills laboratory internship is an independent study elective designed to provide students with experience in implementing the teaching learning process. Students will work with nursing skills laboratory instructors as mentors as they assist beginning nursing students in learning clinical nursing and med-skill skills. Prereq: NUR 211 or NUR 221.

NUR 399 STUDENT NURSE ACADEMIC PRACTICUM. (3) A 10 week clinical practicum (summer only) that allows student nurses to apply in clinical setting what they have learned to date. Emphasis will be placed on critical thinking, management of responsibilities, and professionalism in the clinical setting. Prereq: Currently enrolled in an accredited school of nursing, within 2 semesters of graduation with either BSN or ADN. Cumulative GPA of 2.75 and GPA of 2.75 in all NUR courses; current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Students must meet the employment requirements of UK HealthCare Enterprise.

NUR 400 LEADERSHIP/MANAGEMENT IN NURSING CARE DELIVERY. (3) This course is designed to advance the student’s ability to use leadership and management theory in nursing practice within current and emerging organizational systems. The professional nurse’s role in management of care will be examined. Responsibilities for resource management and management of legal and ethical dilemmas in various organizational systems also will be covered. Prereq: NUR 350, NUR 310, NUR 311 and NUR 313 with a minimum grade of C in each, or consent of instructor. RN-BSN prerequisite: NUR 350.

NUR 401 PSYCHIATRIC-MENTAL HEALTH NURSING. (5) This course is designed to develop students’ skills in the use of psychiatric/mental health concepts to provide nursing care to clients across the lifespan and in a variety of settings. Lecture, three hours; clinic, six hours per week. Prereq: HSM 241, NUR 300, NUR 310, NUR 311, NUR 313 with a minimum grade of C in each, and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 403.

NUR 403 PUBLIC HEALTH NURSING. (5) This course is designed to develop students’ skills in applying health promotion and disease prevention frameworks and in using epidemiological and public health concepts to deliver nursing care with diverse populations in a variety of settings. Emphasis will be placed on the effect of changing health care delivery systems on nursing practice. Lecture, three hours; clinic, six hours per week. Prereq: NUR 300, NUR 310, NUR 311, NUR 313, HSM 241 with a minimum grade of C in each, and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 401, RN-BSN prerequisite: NUR 350, NUR 310 or consent of instructor and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations.

NUR 410 CAREER MANAGEMENT IN NURSING. (2) The course provides students with the skills for ongoing professional development and success in nursing. Prereq: NUR 400, NUR 401, NUR 403 or consent of instructor. Coreq: NUR 411 or NUR 413.

NUR 411 HIGH ACUITY NURSING. (5) The course emphasizes critical thinking and data analysis skills in the nursing management of patients with complex health problems with unpredictable outcomes. Students will collaborate with other health care professionals to plan, implement, and evaluate family-centered nursing care across the lifespan in high-acuity settings. Lecture, four hours; clinic, three hours per week. Prereq: All University and College of Nursing course requirements except NUR 410, NUR 411, and NUR 413, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 410 and NUR 413 seminars.

NUR 413 SYNTHESIS OF CLINICAL KNOWLEDGE FOR NURSING PRACTICE. (6) This course was designed to provide opportunity to develop independence and competence in applying principles of care management and leadership to nursing practice in a variety of clinical settings. Lecture, one hour; clinic, 15 hours per week. Graded pass/fail. Prereq: All other courses in the curriculum, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Completion of NUR 413 seminars and NUR 411 before beginning the clinical component of NUR 413. Coreq: NUR 410 and NUR 411 for the first half of the semester. RN-BSN prerequisite: All other courses in the RN-BSN curriculum, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

NUR 451 POPULATION HEALTH FOR REGISTERED NURSES. (5) Registered nurses should not enroll in NUR 403 for public health nursing; registered nurses should enroll in NUR 451. Registered nurses enrolled in the RN-BSN option will develop public health nursing skills in this undergraduate distance learning nursing course. Students will apply principles of health promotion and disease prevention that are evidence-based while delivering care within a population-centered care to diverse populations in a variety of settings. Emphasis will be placed on current local, national, and global health issues in the context of public health nursing practice that builds on current skill sets of the registered nurse (RN). Prereq: Admission to RN-BSN option.

NUR 452 LEADERSHIP AND MANAGEMENT FOR REGISTERED NURSES. (3) Registered nurses should not enroll in NUR 400 Leadership Management in Nursing Care Delivery; registered nurses should enroll in NUR 452. This course is designed to advance the RN student’s ability to use leadership and management theory in nursing practice within current and emerging organizational systems and across the continuum from health, illness, and returning to health. Leadership responsibilities, strategies, and skills for facilitating a healthy work environment that provides optimum patient/family outcomes and the development and self-actualization of staff will be addressed. Prereq: Admission to the RN-BSN program.

NUR 453 NURSING PRACTICE CAPSTONE FOR REGISTERED NURSES. (6) Registered nurses should not enroll in NUR 413 Synthesis of Clinical Knowledge for Nursing Practice; registered nurses should enroll in NUR 453. NUR 453 is a capstone graduation course designed for RN students working toward completion of the Bachelor of Science in Nursing degree. The course provides the opportunity to apply principles of patient safety, quality improvement, interprofessional teamwork, informatics, leadership, and evidence-based research to nursing practice in a variety of settings. Prereq: All other nursing courses in RN-BSN curriculum which include NUR 350, NUR 351, NUR 352, NUR 354, NUR 451, NUR 450, NUR 452 (NUR 450 and 452 are new course numbers also under review simultaneously.

NUR 510 OLDER WOMEN AND THEIR HEALTH. (5) END OF LIFE CARE IN THE ACUTE CARE SETTING. (3) This course is designed to provide insight into the special needs of adult and pediatric patients in the acute care setting who are near the end of life. This course will cover pain and symptom management; ethical issues in palliative care nursing; cultural considerations in end-of-life care; communication, loss, grief, and bereavement; achievement of quality care at end-of-life; and preparation for and care at the time of death. Prereq: Admission to Nursing Program or consent of instructor.

NUR 512 COMPLEMENTARY/ALTERNATIVE APPROACHES TO HEALTH CARE. (3) Using a holistic approach to wellness, this course is an overview of alternative ways of conceptualizing health and illness. Non-traditional methods of managing illness and promoting health and well-being will be discussed. Practitioners of these methods will participate in presentations and involve students in experiencing some of these practices. Alternative methods that reflect use in a number of other cultures will be explored as complementary to the traditional western style of medicine which is used almost exclusively in this country. Prereq: Junior level. Consent of instructor for students outside the health professions.

NUR 520 SPECIAL TOPICS IN NURSING (Subtitle required). (2-4) Exploration of selected topics or issues in nursing. Directed by a faculty member with expertise in the topic under study. Lecture, 0-4 hours; laboratory, 0-12 hours per week. May be repeated with different topics to a maximum of nine credits. Prereq: Variable, specified when topic identified.

**Course Descriptions**

**NUR 601 THEORETICAL BASIS FOR ADVANCED PRACTICE NURSING.**
Selected concepts and theories useful for guiding advanced practice nursing are examined. The concepts and theories are drawn from nursing science as well as from other disciplines. All are discussed within the context of the nature of nursing knowledge and the expanding scientific basis for advanced practice nursing. Prerequisite: Enrollment in graduate program in Nursing or consent of instructor.

**NUR 602 RESEARCH METHODS IN ADVANCED PRACTICE NURSING.**
This course provides the knowledge and skills essential for using research to support clinical and organizational decision-making. The strengths and limitations of various research designs and methods are reviewed for their utility in answering clinical questions, evaluating care delivery and patient outcomes, and making clinical decisions. Prerequisite: Graduate statistics course and NUR 924, admission to DNP program, graduate programs in nursing, or consent of instructor. (Same as NUR 925.)

**NUR 603 CLINICAL REASONING IN ADVANCED PRACTICE NURSING.**
The intent of this course is for students to enhance their abilities to think logically, use clinical evidence and research findings in making clinical decisions. Concepts and principles from the biopsychosocial sciences, clinical epidemiology, informatics, and ethics will be developed as they apply to clinical reasoning. Students will develop a framework for evaluating evidence from various sources. Prerequisite: Enrollment in graduate program in Nursing or consent of instructor. (Same as NUR 926.)

**NUR 604 LEADERSHIP IN ADVANCED PRACTICE NURSING.**
This course focuses on leadership and management of health care delivery by advanced practice nurses. Emphasis will be placed on leadership change related to improving health outcomes, especially in relation to those areas targeted by national health care objectives. Students will critically analyze theory and research from nursing and related sciences to understand social, cultural, economic, and political issues in the health care environment. Legislative and regulatory environments related to the practice of advanced nursing will be examined, with an emphasis on understanding how to promote the health of the public within appropriate legal boundaries and within the context of interdisciplinary practice. Students will use selected frameworks for evaluating organizational and public policies affecting health. Prerequisite: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students enrolled in graduate program in Nursing; or consent of instructor.

**NUR 605 EVIDENCE-BASED NURSING PRACTICE.**
This course provides the opportunity to apply knowledge of the research process, research utilization and program evaluation models, or evidence-based practice to address a clinical problem. Under the guidance of a faculty advisor, students are expected to work with clinical staff to identify and address a clinical problem. A written scholarly report reflecting the process and outcomes of the activity is the final product. Prerequisite: NUR 602, enrollment in graduate program in Nursing or consent of instructor. Co-req: NUR 708, NUR 714, NUR 724, NUR 727, or NUR 734 (depending on student’s specialty area.)

**NUR 613 RESEARCH APPLICATIONS IN NURSING.**

**NUR 614 PRACTICUM IN CLINICAL NURSING I.**

**NUR 615 PRACTICUM IN CLINICAL NURSING II.**

**NUR 620 PROBLEMS IN CLINICAL NURSING.**
This course provides opportunity for the study of nursing problems in particular clinical areas and for the further development of techniques of nursing intervention. Ratio of discussion / laboratory hours will vary according to designated clinical problems. May be repeated to a maximum of 12 credits. Prerequisite: Admission in graduate program in nursing or consent of instructor.

**NUR 627 ISSUES IN RURAL NURSING AND HEALTHCARE DELIVERY.**
This course will focus on the exploration of models for providing preventive, primary health care, acute care, and chronic health care services in rural areas, including nursing care delivery models. Model standards for implementing the national health objectives in rural communities will be the primary focus. Demographic characteristics and organization of the community will be considered in assessing appropriateness and effectiveness of models for improving access to service and reducing disparity among subpopulations. Prerequisite: Enrollment in graduate program in nursing or consent of instructor.

**NUR 629 EPIDEMIOLOGICAL PRINCIPLES APPLIED TO HEALTHCARE AND NURSING PRACTICE.**

**NUR 630 EXPLORING MEDICAL MISSIONS: A MULTIDISCIPLINARY PERSPECTIVE.**
Health Care Systems from an Interprofessional Perspective provides a review and analysis of health care systems, the wellness-illness spectrum, and interprofessional collaborative practice. Areas of appraisal include the nature and functions of health services, agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces on health care delivery and population outcomes. The course provides a unique opportunity for students to evaluate major health issues and related health care programs from an interprofessional perspective. Working collaboratively with others, students will assess and plan evidence-based interventions that optimize health outcomes and improve quality of care and safety. Undergraduate prerequisite: This is a required course in the undergraduate nursing curriculum. Students must have completed NUR 211 or 221 with a minimum grade of C or receive approval to take NUR 540 from the faculty of record. Graduate prerequisite: There are no graduate prerequisites. This course may be taken as an elective course by graduate students.

**NUR 631 APPLICATIONS OF ADVANCED HEALTH ASSESSMENT.**
This advanced health assessment course offers comprehensive assessment of the individual within the context of the family and community. It includes comprehensive (systematic) history, physical, and psychological assessment of signs and symptoms, pathophysiological changes, and psychosocial variations of the individual patient. Assessments are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Emphasis is placed on developing a thorough understanding of the individual patient and differentiating normal and abnormal findings to determine current health status. Course requires four hours per week clinical laboratory. Prerequisite: Admission to DNP program, graduate program in nursing. Prerequisite: NUR 921 or consent of instructor. (Same as NUR 923.)

**NUR 632 COMPREHENSIVE PATIENT MANAGEMENT I.**
This clinical course places an emphasis on the role of the advanced practice nurse as a member of the health care team across a variety of settings. The clinical experience focuses on comprehensive patient assessment, diagnosis and management of health problems for individuals and their families. Prerequisite: NUR 631, NUR 706 or NUR 726 or NUR 722 (depending on the student’s specialty track).

**NUR 633 COMPREHENSIVE PATIENT MANAGEMENT II.**
This clinical experience focuses on synthesis of theoretical, scientific, and clinical knowledge to develop and refine clinical skills in health assessment and management of existent and pre-clinical health problems based on appropriate standards of care. Emphasis will be placed on the collaborative and leadership roles of the advanced practice nurse in health care delivery. Prerequisite: NUR 707, 726 or 723.

**NUR 635 FOCUSED ADVANCED HEALTH ASSESSMENT.**
This advanced health assessment course focuses on health assessment techniques that are commonly used in specialty areas of advanced nursing practice. Assessments are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Prerequisite or co-requisite: NUR 631.

**NUR 640 BEST PRACTICES IN NURSING INSTRUCTION.**
This course is designed to assist graduate nursing students to develop the abilities to teach in educational institutions or healthcare agencies. Using a variety of learning theories and teaching methods students will learn how to develop a course syllabus and design appropriate learning activities, develop and deliver a lecture using a variety of active learning techniques, use simulation, teach on-line, work with students in the clinical setting, and assess student performance. The legal aspects of teaching will be addressed along with advantages and disadvantages of distributed learning, use of multimedia, and strategies for effectively engaging students in the learning process. Prerequisite: Six credit hours of elective courses in education, Admission to Certificate in teaching nursing or consent of instructor.

**NUR 641 BEST PRACTICES IN CLINICAL TEACHING.**
This course will give students the opportunity to plan, initiate, and evaluate learning activities with a focus on the practice of nursing. These activities may include lecture, seminar, simulation, on-line teaching, evaluating clinical performance and evaluating a syllabus. Students who plan to teach nursing in an academic setting will have a mentor who is a faculty member in a nursing program. Students who plan to teach nursing in other health care settings will have a mentor appropriate to their field. Prerequisite: Six credit hours of elective courses in education, NUR 640, Admission to Certificate in teaching nursing.

**NUR 652 PHARMACOLOGIC APPLICATIONS IN PRIMARY CARE.**
This course is designed to prepare nurse practitioners, nurse midwives, and other health professionals for prescribing drugs within their scope of practice. Basic pharmacologic and pathopharmacologic actions of the major drug classes will be discussed in relation to pathophysiologic systems with emphasis on the application of these agents to primary care, nurse midwifery practice, and other health professions. Prerequisite: Graduate level pathophysiology course, admission to DNP program, graduate programs in nursing or consent of instructor.

**NUR 653 PATHOPHYSIOLOGY.**
This course is designed to present an orientation to disease as disordered physiology. It is intended to enable the nurse practitioner to understand how and why the symptoms and signs of various conditions appear. In approaching disease as disordered physiology, this course analyzes the mechanism(s) of production of the symptoms and signs of different disease syndromes. In doing so, it recognizes the practitioner’s need to understand the mechanism(s) underlying the disease and its clinical manifestations so that rational therapies can be devised. Thus, appropriate screening and diagnostic laboratory evaluative methods will also be included. Prerequisite: Admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 921.)

**NUR 658 RISKY BEHAVIORS AND HEALTH.**

**NUR 662 CLINICAL NURSING PRACTICE IN EXPANDED ROLES I.**

**NUR 672 CLINICAL NURSING PRACTICE IN EXPANDED ROLES II.**

**NUR 682 CLINICAL NURSING PRACTICE IN EXPANDED ROLES III.**
NUR 704 ADULT-GERONTOLOGY CLINICAL NURSE SPECIALIST IN PROMOTING HEALTH AND WELLNESS ACROSS THE LIFE SPAN OF THE ADULT. (3)
This course is designed to identify the role of the Adult-Gerontology Clinical Nurse Specialist (CNS) in promoting health and wellness in the adult gerontological individual using advanced practice nursing skills in contemporary health care settings and systems.

NUR 712 ADVANCED PARENT-CHILD SEMINAR. (3)
The student will focus on evaluation of relevant beliefs, concepts, and theories related to individual’s perceptions of health and illness, preventative lifestyle behaviors, adherence to therapeutic regimes and lifestyle changes will be presented. This course will address how students will utilize the role of the Adult-Gerontology CNS using effective strategies to assist individuals in adopting and maintaining behaviors as they apply to a healthy lifestyle. Prereq: Graduate level pathophysiology, NUR 924, pre or corequisite: NUR 922, NUR 927, NUR 925, NUR 923 admission to DNP program, graduate nursing programs, or consent of instructor.

NUR 713 ADVANCED NURSING CARE FOR FAMILIES, PRE-CONCEPTION THROUGH ADOLESCENCE. (4-6)
The students in this course will test concepts and theories relevant to families. Collaboration with the family and other health care disciplines related to clinical decision making is expected. Students will apply knowledge with a variety of populations. Prereq: NUR 712, enrollment in graduate program in Nursing or consent of instructor.

NUR 714 ADVANCED NURSING CARE FOR FAMILIES, PRE-CONCEPTION THROUGH ADOLESCENCE II. (4-6)
Knowledge of families, pre-conception through adolescence, leadership, and clinical skill assessment applied to provide advanced nursing care to a selected population. Emphasis is placed on maximizing health and resolving actual or potential health problems for the individual and the family. Analysis of system problems in health care delivery is conducted. Prereq: NUR 713, enrollment in graduate program in Nursing or consent of instructor. Pre- or coreq: NUR 904.

NUR 722 ROLE AND PRACTICE ISSUES FOR THE ADVANCED PRACTICE PSYCHIATRIC NURSE. (3)
The focus of this course is on concepts, theories and research underlying advanced practice psychiatric nursing (APPN). The scope and standards of psychiatric-mental health nursing practice frame study of APPN functions—psychotherapy, psychopharmacology interventions, community interventions, case management activities and consultation-liaison activities. Epidemiology, definitions, and classification models for mental health and mental illness are explored as a base for ethical, clinical decision making in advanced psychiatric nursing practice. Psychological, biological, social, and cultural influences on coping responses of individuals and families across the lifespan for groups and communities of people/populations at risk are explored. Intervention models including prevention are introduced. Prereq: Pathophysiology and Health Assessment, admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 965.)

NUR 723 ADVANCED PRACTICE PSYCHIATRIC NURSING I. (6)
This course provides the opportunity for study of conceptual frameworks, theories, and research relevant to the clinical practice of the psychiatric nurse. Emphasis is placed on the use of evidence-based practice. The student will focus on evaluation of relevant beliefs, concepts, and theories related to individual’s perceptions of health and illness, preventative lifestyle behaviors, adherence to therapeutic regimes and lifestyle changes will be presented. This course will address how students will utilize the role of the Adult-Gerontology CNS using effective strategies to assist individuals in adopting and maintaining behaviors as they apply to a healthy lifestyle. Prereq: Graduate level pathophysiology, NUR 924, pre or corequisite: NUR 922, NUR 927, NUR 925, NUR 923 admission to DNP program, graduate nursing programs, or consent of instructor.

NUR 724 ADVANCED PRACTICE PSYCHIATRIC NURSING II. (4)
This course builds on knowledge and skills acquired in NUR 723 (Practionum I) and provides the student with the opportunity to integrate and apply knowledge acquired in other course work. Theory of group therapy structure and process, practice models, and collaboration with mental health consumer/advocacy groups are introduced and emphasized to fit with emerging health care delivery systems. Mental health policy and practice implications are reviewed as well as the fiscal consequences of public policy on mental health service delivery. Diagnosis of common physical illnesses that mimic psychiatric illness and common psychiatric symptoms that occur in physical illness are studied. Ethical dilemmas in practice are studied. Prereq: NUR 723, NUR 652, enrollment in the graduate program or consent of instructor. Co-requisite: NUR 650.

NUR 725 ADVANCED PRACTICE NURSING SEMINAR FOR NURSE PRACTITIONERS. (3)
This course provides an overview of advanced practice nursing. Select physical, pathophysiologic, social and cultural influences on health, wellness, and health promotion. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 725. Prereq or coreq: NUR 631 and 652 for students enrolled in graduate program in Nursing; or consent of instructor.

NUR 726 PRIMARY CARE ADVANCED PRACTICE NURSING SEMINAR. (1-3)
This course focuses on the advanced practice nurse’s management of common, acute health problems of individuals across the lifespan and determining the effect of the illness on families. Emphasis will be on differentiating a variety of signs and symptoms to formulate possible diagnoses. Students will demonstrate proficiency in assessing, diagnosing, managing, and evaluating common, acute health problems. Emphasis is on analysis of the role of the nurse practitioner as a collaborative member of the health care team, and on the nurse practitioner’s contributions to health, wellness, and health promotion. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students enrolled in graduate program in Nursing; or consent of instructor.

NUR 727 PRIMARY CARE ADVANCED PRACTICE NURSING SEMINAR. (2-5)
Seminar (2 credits): This course focuses on the advanced practice nurse’s management in select common and stable chronic health problems of individuals across the lifespan. Emphasis will be placed on differentiating signs and symptoms to formulate possible diagnoses and determining the effect of the illness on the family. In addition, the nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Practicum (3 credits): Students will demonstrate proficiency in assessing, diagnosing, managing and evaluating selected chronic health problems based on appropriate standards of care. Prereq: NUR 632 and NUR 726 or NUR 722. Co-requisite: NUR 723 (psychiatric nurse practitioner students only).
NUR 732 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING ASSESSMENT SPECIALTY SEMINAR. (3) The course builds upon knowledge gained in NUR 600 to complete a three-course sequence. Emphasizes knowledge and skills as identified by the Public Health Service of the U.S. This seminar addresses the core function of assessment in advanced practice nursing practice in public health with emphasis on the role of logical analysis and critical thinking in the evaluation and dissemination of information about the health conditions, risks and resources in communities, as well as an understanding of public health care environments. Prereq: Admission to the graduate program in nursing or consent of instructor.

NUR 733 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING PRACTICUM: POLICY. (3) This course addresses the second public health core function: the use of assessment data in the analysis and implementation of policy and program plans to meet the needs of communities and populations for improvement of health conditions. Students will evaluate the use of policy as an aggregate-level intervention strategy and determine the extent to which a nursing intervention can be used to categorize policy strategies. Policies will be evaluated in relation to current national and state health objectives for populations. Students will evaluate the potential impact of policies affecting communities and populations in targeted health care environments. Prereq: Admission to the graduate program in nursing or consent of instructor.

NUR 734 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING: PRACTICUM II: ASSURANCE. (3-4) This course focuses on the third core public health function of monitoring health services to communities, collaborating with other health disciplines in the delivery and delivery of resources to communities. Students will learn to use surveillance, evaluation, and performance improvement techniques in assuring cost-effective health services for communities and targeted health care environments such as home health or managed care. Prereq: Admission to the graduate program in nursing or consent of instructor.

NUR 736 OCCUPATIONAL/ENVIRONMENTAL HEALTH NURSING I (OEHN): PRINCIPLES AND PRACTICE. (3) This course is designed to provide a basic understanding of occupational and environmental health nursing (OEHN). The course is a prerequisite to NUR 737. Prereq: Admission to the PhD or DNP program or consent of instructor.

NUR 761 OCCUPATIONAL/ENVIRONMENTAL HEALTH NURSING II (OEHN): RESEARCH AND POLICY. (3) This course will prepare graduate nursing students with knowledge and skills needed to improve health outcomes of populations in occupational environments. Emphasis will be placed on research and policy development using nursing and interdisciplinary lenses. Further, this course will provide knowledge and skills needed to apply evidence-based nursing practice, including up-to-date electronic resources. Prereq: Admission to the PhD or DNP program or consent of instructor.

NUR 767 DISSERTATION RESIDENCY CREDIT. (2) Prereq: Admission to the PhD or DNP program or consent of instructor.

NUR 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

NUR 770 PHILOSOPHICAL FOUNDATIONS OF NURSING SCIENCE. (3) The study of science as a way of reasoning and knowing, its relationship to scientific method, the roles of science in the development of nursing, and the nature of nursing science. Prereq: Consent of instructor.

NUR 771 RESEARCH EXPERIENCE. (1-3) Students work closely with a faculty research mentor to develop specific research skills by actively participating in a research study. Prereq: Admission to the PhD or DNP program or consent of instructor.

NUR 776 SPECIAL TOPICS SEMINAR (Subtitle required). (2-4) May be repeated to a maximum of eight credits.

NUR 781 INDEPENDENT STUDY IN NURSING. (1-3) An elective course which gives the student an opportunity to explore a topic of special interest. May be repeated to a maximum of eight credits.

NUR 790 KNOWLEDGE DEVELOPMENT IN NURSING. (3) A seminar course that will provide graduate nursing students with a basic understanding of occupational and environmental health nursing (OEHN). The course is a prerequisite to NUR 791. Prereq: Admission to the PhD or DNP program or consent of instructor.
NUR 791 QUALITATIVE METHODS IN NURSING RESEARCH. (3)
The focus of this course is exploration of qualitative approaches to developing clinical nursing research. The relationship of data production and analysis strategies to underlying assumptions, theories, and research goals are considered. Applications of qualitative methods to research questions relevant to nursing science are explored. Prereq: NUR 790 or consent of instructor.

NUR 792 QUANTITATIVE METHODS IN NURSING RESEARCH. (3)
This course focuses on the application of quantitative research designs and methods for testing hypotheses in clinical nursing research. Students develop skills in critical evaluation of both intervention and nonintervention studies. Emphasis is placed on the identification and control of competing hypotheses in quantitative research. Prereq: STA 570 or consent of instructor.

NUR 793 MEASUREMENT OF NURSING PHENOMENA. (4)
This course focuses on measurement issues in conducting nursing research. Methods of instrument development and assessment of reliability and validity are discussed. The psychometric properties of instruments and measurement methods used in research are analyzed. Students conduct pilot psychometric research related to their dissertation topic. Prereq: NUR 790, 791, 792.

NUR 794 ANALYSIS, INTERPRETATION, AND PRESENTATION OF QUANTITATIVE DATA. (3)
This course provides opportunities for skill development in the application of a variety of analysis strategies to existing datasets. Students will identify hypotheses and/or research questions, test them using appropriate statistical methods, and interpret the results of their secondary analyses. Students will also gain experience in the presentation of findings via narrative, tabular, and oral formats. Prereq: STA 671 or equivalent, doctoral standing, and consent of instructor.

NUR 824 CLINICAL DECISION MAKING IN PROFESSIONAL NURSING I. (6)
The focus of this course is methods for making clinical decisions. Emphasis will be on how to collect and utilize data in formulating judgments about patient states and in choosing nursing actions for patients with health problems with predictable outcomes. Lecture, four hours; laboratory, six hours per week. Prereq: Junior standing in the RN-BSN curriculum in the College of Nursing. Prereq or coreq: NUR 831 and NUR 833.

NUR 825 CLINICAL DECISION MAKING IN PROFESSIONAL NURSING II. (6)
NUR 831 BIOLOGICAL CONCEPTS: THREATS TO HUMAN HEALTH. (3)
NUR 832 EPIDEMIOLOGIC CONCEPTS FOR HEALTHCARE. (3)
NUR 833 EPIDEMIOLOGIC CONCEPTS FOR HEALTHCARE. (3)
NUR 834 FAMILY HEALTH CONCEPTS. (3)
NUR 835 MENTAL HEALTH CONCEPTS. (3)
NUR 836 NURSING RESEARCH. (3)
NUR 841 ISSUES IN NURSING. (3)
NUR 843 NURSING ETHICS. (3)
NUR 846 LEADERSHIP AND MANAGEMENT IN NURSING. (3)
NUR 900 PROCESS OF NURSING LEADERSHIP. (3)
Students synthesize theoretical leadership concepts with personal and professional values and gain an appreciation for the changing socio-cultural context in which clinical leadership is practiced. Issues of power, creativity, innovation, ethics and gender concerns are addressed. Self-reflection and self-mastery are two themes that underpin the entire course of study and support interpersonal skills that enhance leadership. Prereq: Admission to DNP program or consent of instructor.

* NUR 902 NURSING LEADERSHIP IN HEALTH CARE. (3)
Students use theories of leadership, motivation, power, influence, and relationships to evaluate current practices and initiate future practices within health care, educational, and research organizations. Shared visions, advocacy, relationships and change management are addressed. Students study the change process in health related organizations by critically analyzing demographic, cultural influences, and current trends that affect practice, education, and research. Prereq: Enrollment in DNP program or consent of instructor.

* NUR 903 APPLIED BIOSTATISTICS FOR OUTCOMES EVALUATION. (3)
This course provides opportunities for the application of a variety of quantitative analysis strategies in the evaluation of clinical outcomes. Statistical and other quantitative methods, including bivariate analysis, multiple regression, logistic regression, survival analysis and cost-benefit analysis are discussed. Students will apply these methods in the analysis of existing outcome data, using SPSS. Students also will gain experience in the interpretation and presentation of findings via narrative and tabular formats. Prereq: Enrollment in DNP program; approved graduate level statistics course, STA 570 or STA 580 or STA 569 or equivalent within the past 3 years, or consent of instructor.

NUR 904 EPIDEMIOLOGY APPLIED TO THE DESIGN AND EVALUATION OF NURSING AND HEALTH SERVICES. (3)
This course applies and integrates the principles and tools of epidemiology to the decision-making in a health care environment. It is intended for epidemiologists, managers, and clinical nurse executives and leaders who want to understand the value of epidemiology and population-based health care to the process of rational decision-making. The course builds upon fundamental epidemiologic principles and theory, with specific applications to nursing and public health services.

Prereq: Enrollment in DNP program, approved graduate level statistics course, or consent of instructor.

# NUR 905 DOCTOR OF NURSING PRACTICE SEMINAR. (1)
This seminar will provide students with an overview of the Doctor of Nursing Practice (DNP) degree, with a focus on historical development and contemporary practice issues. Roles of the advanced practice nurse (APN) with a DNP degree will be analyzed in the context of current policy statements from accrediting and professional organizations. Core competencies of APNs with DNP degrees will be applied to students’ specialty roles. Portfolio development will be discussed. Prereq: Admission to DNP program or consent of instructor.

# NUR 906 PROPOSAL DEVELOPMENT. (1)
This course focuses on writing and critical thinking skills for development of a proposal for funding. Students will apply their knowledge related to evaluation of evidence and data collection to develop a proposal based on critical review of the literature that identifies gaps in knowledge and appropriate methods to address specific aims and objectives. Prereq: NUR 915, NUR 916, and STA 569 or 570.

NUR 910 CLINICAL RESIDENCY. (3)
This course provides students with the tools to evaluate and improve health care programs and clinical outcomes. Students develop feasible and reliable program evaluation designs. Students analyze the nature of, and explanations for variations in clinical practice patterns and clinical outcomes. Emphasis is on the use of program evaluation for improvements in clinical outcomes, efficiency, resource allocation, and cost reduction. Requires 12 hours per week residency time. Course must be repeated to a minimum of six credits. Graded pass/fail. Prereq: Completion of all DNP required course work with the exception of NUR 930.

* NUR 914 ECONOMIC AND FINANCIAL ASPECTS OF CLINICAL AND POPULATION-BASED HEALTH CARE DELIVERY SYSTEMS. (3)
This course focuses on the application of economic and financial principles and practices to health care. Within this framework, content related to finance and economics, health care reimbursement models, incentive structures, market dynamics, economic evaluations, and quantification of outcomes are examined. The emphasis will be on critically analyzing the actual and potential impact of these dynamics on the structure and functioning of the health care system. Prereq: NUR 903 Applied Biostatistics, or consent of instructor.

* NUR 915 EVALUATING EVIDENCE FOR RESEARCH AND EVIDENCE-BASED PRACTICE. (3)
This course focuses on critical evaluation and synthesis of the comprehensive evidence base including interventional and non-interventional research and non-research sources of evidence to elucidate the best available evidence and state of the science in a particular focused area to provide a foundation for the development of practice change based on best evidence, and to illuminate significant gaps in current knowledge to support the development of research studies. This course is designed to provide the tools to evaluate, translate and integrate evidence for scholarly inquiry and/or practice improvement. Prereq: NUR 925 or awarded MSN degree; and STA 570 or 569, or consent of instructor.

* NUR 916 PROGRAM PLANNING AND EVALUATION FOR IMPROVEMENT IN PRACTICE AND HEALTH OUTCOMES. (3)
This course provides students with the knowledge and tools to develop, implement and evaluate evidence-based clinical and administrative programs to improve healthcare and system outcomes. Students will use evidence to develop a program implementation and evaluation plan using the philosophies, theories, research and evidence-based clinical practices in nursing and related fields. Emphasis is on a strategic view of health care systems and effective clinical program planning/implementation evaluation within integrated care delivery systems and use of evidence for effective decision making. Further emphasis is on the use of program evaluation for improvements in clinical outcomes and efficiency. Prereq: NUR 925 or MSN degree, and STA 569 or consent of instructor.

NUR 917 TECHNOLOGY FOR TRANSFORMING NURSING AND HEALTHCARE. (3)
This course focuses on information systems technology as applied to nursing and healthcare. Knowledge and skills necessary for utilizing information systems and technology for the advancement of practice and health services research are emphasized. The use of computer systems and technology will be explored. Course requires four hours per week clinical. Prereq: Admission to DNP program or consent of instructor.

NUR 918 PROTECTION OF HUMAN SUBJECTS. (1)
This course provides an overview of the institutional review board process. Included are scientific integrity and ethics in clinical scholarship. Prereq: Enrollment in Doctor of Nursing Practice program; prereq: NUR 916, NUR 919 and written capstone proposal approved by student’s DNP advisory committee or consent of instructor.

* NUR 919 QUALITY AND SAFETY IN NURSING AND HEALTHCARE. (3)
This course provides the foundation to improve health outcomes for patient populations. National strategies, theories and methods to improve health outcomes will be explored. Emphasis will be placed on the systematic analysis of systems of care to promote safe, timely, effective, efficient, equitable, patient-centered care. Students will learn how to optimize the translation of evidence into clinical practice to enhance quality and safety. Students will gain knowledge to lead quality improvement and patient safety initiatives in health care systems. Prereq: Admission to DNP program or consent of instructor.
Course Descriptions

NUR 920 ADVANCED NURSING PRACTICE IN DYNAMIC HEALTH CARE SYSTEMS (Subtitle required). (3)
This synthesis warrants focuses on evolving nursing interventions in advanced clinical and administrative practice. Based on student’s specialty/role, these interventions encompass direct care of individuals, management of individuals or populations, healthcare administration and health policy issues. Emphasis is on ways for expert nurse clinicians and administrators to solve problems and improve care in a dynamic healthcare system. This course requires eight hours per week clinical practice time. Prereq: NUR 914 and 917; coreq: 914 or consent of instructor.

NUR 921 PATHOPHYSIOLOGY. (3)
This course is designed to present an orientation to disease as disordered physiology. It is intended to enable the nurse practitioner to understand how and why the symptoms and signs of various conditions appear. In approaching disease as disordered physiology, this course analyzes the mechanism(s) of production of the symptoms and signs of different disease syndromes. In doing so, it recognizes the practitioner’s need to understand the mechanism(s) underlying the clinical manifestations so that rational therapies can be devised. Thus, appropriate screening and diagnostic laboratory evaluative methods will also be included. Prereq: Admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 653.)

*NUR 922 ADVANCED PHARMACOLOGY FOR ADVANCED PRACTICE NURSES: (Subtitle required). (4)
This course is designed to prepare advanced practice nurses to prescribe drugs within their scope of practice. Basic pharmacologic principles and the pharmacologic actions of the major drug classes will be discussed in relation to physiologic systems with emphasis on the application of these agents in practice. Prereq: Graduate level pathophysiology course, admission to DNP program, graduate programs in nursing or consent of instructor.

NUR 923 APPLICATIONS OF ADVANCED HEALTH ASSESSMENT. (3)
This advanced health assessment course offers comprehensive assessment of the individual within the context of the family and community. It includes comprehensive (systemic) history, physical, and psychosocial assessment of signs and symptoms, pathophysiologic changes, and psychosocial variations of the individual patient. Assessments are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Emphasis is placed on developing a thorough understanding of the individual patient and differentiating normal and abnormal findings to determine current health status. Course requires four hours per week of clinical practice time. Prereq: Admission to DNP program, graduate program in nursing. Prereq: NUR 921 or consent of instructor. (Same as NUR 631.)

NUR 924 CONCEPTS, THEORIES, AND MODELS FOR ADVANCED PRACTICE NURSING. (3)
Students will examine the processes underlying the development of models, theories and conceptual framework. Selected models, theories and conceptual frameworks from nursing and other disciplines will be evaluated for their utility in advanced nursing practice. All are discussed within the context of the nature of nursing knowledge and the expanding scientific basis for advanced practice nursing. This course serves as a foundation for clinical courses in which models, theories, and conceptual frameworks are used to develop and evaluate new approaches to the clinical practice of advanced nursing practice. Prereq: Admission to DNP program or consent of instructor.

NUR 925 RESEARCH METHODS IN ADVANCED PRACTICE NURSING. (3)
This course provides the knowledge and skills essential for using research to support clinical and organizational decision-making. The strengths and limitations of various research designs and methods will be reviewed for their utility in answering clinical questions, evaluating care delivery and patient outcomes, and making clinical decisions. Prereq: Graduate statistics course, and NUR 924, admission to DNP program, graduate programs in nursing, or consent of instructor. (Same as NUR 602.)

NUR 926 SYSTEMS APPLICATION OF ADVANCED HEALTH ASSESSMENT. (3)
This systems level advanced health assessment course offers comprehensive assessment and skill development opportunities for Advanced Practice Public Health Nurses and Nurse Executives. It includes intensive work on the principles and techniques of performing a comprehensive systems health assessment in the context of aggregate, population, community, and organizational parameters. Aggregate, population, community, and organizational models are analyzed for use with diverse/ varied systems. Emphasis is placed on working with diverse stakeholders for achievement of aggregate, population, community or organizational health related goals. Prereq: Admission to DNP program or consent of instructor.

NUR 927 SPECIAL TOPICS IN PHARMACOLOGY: (Subtitle required). (1)
This course is designed to introduce the Advanced Practice Registered Nurse (APRN) student to the application of pharmacologic principles to special populations and specialized therapeutic areas. Students will enroll in section related to their nursing specialty: family-primary care, pediatrics-primary care, adult-gero primary care, or family psychiatric mental-health. Prereq: Graduate pharmacology course, enrollment in the graduate program in Nursing, or consent of instructor. Required coreq: NUR 922.

NUR 930 PROBLEMS IN ADVANCED PRACTICE NURSING (Subtitle required). (1-5)
This course provides opportunity for study of clinical problems encountered in particular clinical areas of advanced nursing practice. Application of the scope and standards of specialty practice, application of evidence-based practices, and development of techniques for nursing interventions are emphasized. Course requires four hours per week clinical time for each credit hour enrolled. Prereq: Completion of second DNP specialty course with clinical experience (5 credit) or consent of instructor.

*NUR 940 ROLES, ISSUES, AND HEALTH PROMOTION FOR ADULT GERO-ONTOLOGY ACUTE CARE NURSE PRACTITIONER. (3)
This introductory course provides an overview of advanced practice nursing and the adult-gerontology acute care nurse practitioner role-evolution. Professional issues and trends at the state and national levels will be analyzed. This course will focus on the adult-gerontology acute care nurse practitioner’s contributions to health, wellness, and health promotion among adult-gerontology clients and their families. Course requirements include a small group discussion, written assignments, and a final presentation. Prereq: NUR 923, NUR 924. Prereq or coreq: NUR 921, NUR 922 and NUR 923.

*NUR 941 ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER SEMINAR I. (3)
This didactic Adult Gerontological Acute Care Nurse Practitioner course focuses on the role of the Adult-AGNP in the complex care of acute and critically ill adult and geriatric patients. Content includes the diagnosis and management of episodic and chronic illness; diagnostic tests; technologic and therapeutic interventions. The patient population of the Adult-Gerontology ACNP includes young adults (including late adolescents and emancipated minors), adults and older adults in all contexts of complex acute and chronic illness. Particular attention is given to providing evidence-based, comprehensive, individualized, ethical, and collaborative care that takes into consideration health quality, costs, and outcomes for the acutely ill patient population. Prereq: NUR 940, 921, 923, and 922; coreq: NUR 943.

*NUR 942 ADULT-GERONTOLOGY-ACUTE CARE NURSE PRACTITIONER SEMINAR II. (3)
This Adult Gerontology Acute Care Nurse Practitioner didactic course focuses on the assessment, differential diagnosis and management of complex critically ill adults who are physiologically unstable, technologically dependent, and/or are highly vulnerable to complications. Particular attention is given to providing evidence based, comprehensive, individualized, and collaborative care that takes into consideration health quality, costs, and outcomes for the acute and critically ill adult/geriatric patient and their family. This course prepares the student to assess and diagnose episodic and chronic highly acute and critical illnesses, interpret diagnostic tests, and use technologic and therapeutic interventions through admission, transition, and discharge. Trauma, end-of-life care, leadership, critique of the Adult-AGNP role and clinical scholarship/ inquiry are addressed in this course. Prereq: NUR 940, 941, 921, 922, and 923; coreq: NUR 944.

*NUR 943 ADULT-GERONTOLOGY-ACUTE CARE NURSE PRACTITIONER CLINICAL PRACTICUM I. (3)
This is the first Adult Gerontology Acute Care Nurse Practitioner clinical course focusing on the physical, cultural, spiritual, and ethical care of the adult acutely and critically ill patient. Settings include all units where highly acute and critically ill patients’ individual needs can be met and their outcomes optimally achieved. Students conduct an inclusive history and physical examination, document findings, and then assist with planning and implementing a comprehensive evidence-based plan of care. This course prepares the student to assess and diagnose complex episodic and chronic acute and critical illness, interpret diagnostic tests, and utilize technologic and therapeutic interventions. Prereq: NUR 940, 941, 921, 922, and NUR 923; coreq: NUR 941.

*NUR 944 ADULT-GERONTOLOGY-ACUTE CARE NURSE PRACTITIONER CLINICAL PRACTICUM II. (3)
This is the second Adult Gerontology Acute Care Nurse Practitioner clinical course focusing on the physical, cultural, spiritual, and ethical care of the adult acutely and critically ill patient. Settings include all units where highly acute and critically ill patients’ individual needs can be met and their outcomes optimally achieved. This Adult Gerontology Acute Care Nurse Practitioner clinical course focuses on the clinical assessment and care of complex adult patients who are physiologically unstable, technologically dependent, and/or are highly vulnerable to complications. This course prepares the student to assess and diagnose complex episodic and chronic highly acute and critical illnesses, interpret diagnostic tests, and utilize technologic and therapeutic interventions. Prereq: NUR 940, 941, 922, and NUR 923; coreq: NUR 944.
Practice includes young adults (including late adolescents and emancipated minors), adults and older adults (including young-old, old, and old-old adults) in all contexts of care. A foundation of knowledge related to individuals’ perceptions of health, preventative lifestyle behaviors, adherence to therapeutic regimes and lifestyle changes will be presented. This course will address how students will learn and practice the role of the Adult-Gerontology CNS using effective strategies to assist individuals in adopting and maintaining behaviors as they apply to a healthy lifestyle. Prerequisite: Graduate level pathophysiology; NUR 924; or precore: NUR 922, NUR 921, NUR 923 and admission to DNP program, graduate nursing programs, or consent of instructor.

* NUR 946 ADULT-GERONTOLOGICAL CLINICAL NURSE SPECIALIST PROVIDING ACUTE CARE ACROSS THE LIFE SPAN OF THE ADULT. (3)

This course provides content for advanced practice nursing care for adults and geriatrics with acute illnesses in a variety of settings in complex health care systems. The patient population includes young adults (including late adolescents and emancipated minors), adults and older adults (including young-old, old, and old-old adults) in all contexts of care. Emphasis is on developing clinical expertise in a specialty area to interpret and manage acutely ill patients and their clinical problems. Planning, directing, delivering, and evaluating care is based on theory and research. Students will combine didactic learning with clinical experiences. Prerequisites: NUR 921, NUR 922, NUR 945 or consent of the instructor; corequisite: NUR 948.

* NUR 947 ADULT-GERONTOLOGICAL CLINICAL NURSE SPECIALIST PROVIDING CHRONIC CARE ACROSS THE LIFE SPAN OF THE ADULT. (3)

This course provides content for advanced practice nursing care for adults and geriatrics with chronic illnesses in a variety of settings in complex health care systems. The patient population includes young adults (including late adolescents and emancipated minors), adults and older adults (including young-old, old, and old-old adults). Emphasis is on developing clinical expertise in a specialty area to interpret and manage chronically ill patients and their clinical problems. Planning, directing, delivering, and evaluating care is based on theory and research. Students will combine didactic learning with clinical experiences. Prerequisites: NUR 945, NUR 946, or consent of instructor; corequisite: NUR 949.

# NUR 948 CLINICAL PROBLEMS IN ACUTE CARE ACROSS THE ADULT GERI LIFE SPAN IN ADVANCE PRACTICE NURSING. (3)

This course provides opportunity for application of evidence-based interventions for clinical problems encountered in the acute care setting clinical practice of advanced nursing practice. Application of the scope and standards of specialty practice, application of evidence-based practices, and development of techniques for nursing interventions are emphasized. This course prepares the student to conduct comprehensive, holistic wellness/illness assessments, obtain data necessary to formulate differential diagnoses/plans of care and evaluate outcomes using advanced clinical judgment to diagnose, treat, and evaluate patient care problems in the acute care setting. Prerequisites: NUR 945, or consent of instructor; corequisite: NUR 946.

# NUR 949 CLINICAL PROBLEMS IN CHRONIC CARE ACROSS THE ADULT GERI LIFE SPAN IN ADVANCE PRACTICE NURSING. (3)

This course provides opportunity for application of evidence-based interventions for clinical problems encountered in chronic care of the Adult-Gero patient in clinical practice of advanced nursing practice. Application of the scope and standards of specialty practice, application of evidence-based practices, and development of techniques for nursing interventions are emphasized. This course prepares the student to conduct comprehensive, holistic wellness/illness assessments, obtain data necessary to formulate differential diagnoses/plans of care and evaluate outcomes using advanced clinical judgment to diagnose, treat, and evaluate patient care problems in complex health care settings. Prerequisites: NUR 945, or consent of instructor; corequisite: NUR 947.

* NUR 950 PRIMARY CARE ADVANCED PRACTICE CLINICAL: (Subtitle required)

This clinical experience focuses on comprehensive patient assessment, diagnosis and management of health problems commonly seen in primary care. Emphasis will be placed on differentiating signs and symptoms to formulate possible diagnoses and determining the effect of the illness on the family. Students will demonstrate competence in assessing, diagnosing, managing and evaluating selected health problems based on appropriate standards of care. Health promotion and disease prevention strategies will be emphasized. In addition, the primary care nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Course requires 12 hours per week clinical. Prerequisite: Admission to DNP Program; NUR 960 or NUR 955. Corequisites: NUR 956, 957, 961 or 962.

NUR 955 ADVANCED PARENT-CHILD SEMINAR. (5)

The student will focus on evaluation of relevant beliefs, concepts, and theories related to maximizing the health of the family from pre-conception through adolescence. Using evidence-based literature, the student will explore physiologic, pathophysiologic, cognitive, behavioral, and psychosocial concepts, theories, and issues for their relevance in providing innovative approaches to family health care. Attention will be directed toward economic, ethical, cultural, legal, political and geographic factors that influence health behavior and care delivery. Family and child developmental theories will be used as an integrating framework. Prerequisite: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students admitted to graduate nursing program; NUR 924 and NUR 925 for students admitted to the DNP program or consent of instructor. (Same as NUR 712.)

* NUR 956 PNP-PRIMARY CARE: ACUTE ILLNESS MANAGEMENT. (3)

This course allows the Post-Master’s Certificate or the practice-doctorate pediatric, primary care nurse student the opportunity to incorporate other health care disciplines and engage clinical decision-making skills into the planning of care for the child with common, acute minor illnesses seen in primary care. Health restoration strategies will be incorporated into the management of common deviations from health as they occur in children (birth to 21 years). This course focuses on applying knowledge gained from nursing, medicine, pharmacology, and social/behavioral sciences and its incorporation into the framework of advanced practice nursing. Developmental, pathophysiologic, cognitive, behavioral, and psychosocial concepts will be applied in assessing children of various ages (birth to 21 years) using a variety of modalities integrating current research and evidence-based findings into planned clinical care. Prerequisites: Admission to DNP program and NUR 921, NUR 922, NUR 923 and NUR 955. Corequisites: NUR 950 (3 credit hour clinical).

* NUR 957 PNP-PRIMARY CARE: CHRONIC ILLNESS AND SPECIAL NEEDS MANAGEMENT. (3)

This course allows the Post-Master’s Certificate or the practice-doctorate pediatric, primary care nurse student the opportunity to examine the impact of children and adolescents (birth through 21 years) with special health care needs and those with complex (stable), chronic health deviations on the pediatric client, their families, and the community. By incorporating the role of the primary care PNP into the process of utilizing clinical decision-making skills, interdisciplinary collaboration, management and intervention strategies, the student will plan collaborative care for the pediatric client with chronic health deviations or special healthcare needs in the primary care or tertiary care setting. Current evidence-based, research and management guidelines will be analyzed using the synthesis of knowledge gained from collaborative sciences and applied to the framework of advanced practice nursing. Prerequisites: NUR 956; for students admitted to the Post-Master’s Certificate (PC-PNP) or pediatric primary care nurse practitioner BSN-DNP program; consent of the instructor. Corequisite: NUR 950 (3 credit hour clinical course).

NUR 958 PNP-ACUTE CARE: ACUTE/COMPLEX ILLNESS MANAGEMENT. (3)

This course allows the graduate pediatric nursing student to collaborate with other health care disciplines and incorporate clinical decision-making into the provision of care and management of the child with complex, acute/chronic illnesses seen in the acute care setting. Current evidence and practice guidelines will be integrated into the role of the PNP in the management of acute illnesses commonly seen in children (birth to 21 years) and applied to health restoration strategies in various acute clinical settings. Focus will be given to the synthesis of knowledge obtained from nursing, medicine, pharmacology and the social/behavioral sciences and its incorporation into the framework of advanced practice nursing. Developmental, pathophysiologic, cognitive, behavioral, and psychosocial concepts will be applied in assessing children of various ages (birth to 21 years) using a variety of modalities integrating current research and evidence-based findings into clinical practice. This course includes 12 hours of clinical practice per week. Prerequisite: NUR 955, NUR 930 for students admitted to the DNP program; or consent of the instructor.

NUR 959 PNP-ACUTE CARE: CHRONIC ILLNESS AND SPECIAL NEEDS MANAGEMENT. (3)

This course allows the graduate pediatric nursing student the opportunity to examine the impact of children and adolescents (birth through 21 years) with special health care needs and those with complex/critical, chronic health deviations on the pediatric client, their families, and the community. By incorporating the role of the PNP into the process of utilizing clinical decision-making skills, interdisciplinary collaboration, management and intervention strategies, the student will provide collaborative care to the pediatric client with acute/critical/chronic health deviations or special healthcare needs in the acute care setting. Current evidence-based, research and management guidelines will be analyzed using the synthesis of knowledge gained from collaborative sciences and applied to the framework of advanced practice nursing. Collaboration with the child, family, and interprofessional teams will be integrated throughout the course. This course includes 12 hours of clinical practice per week. Prerequisite: NUR 958 for students admitted to the DNP program; or consent of the instructor.

NUR 960 HEALTH PROMOTION AND ROLE DEVELOPMENT FOR PRIMARY CARE NURSE PRACTITIONERS. (3)

This course provides an overview of the primary care nurse practitioner’s role in the health care delivery system. The nurse practitioner’s contributions to health promotion, clinical prevention and population health will be explored. Selected physical, pathophysiologic, social, mental health, behavioral, cultural, and ethical concepts will be discussed as a basis for clinical decision-making. Professional issues and trends in health and nursing at national and state levels will be analyzed. Emphasis will be on the role of the primary care nurse practitioner as a collaborative member of the health care team. Prerequisites and corequisites: NUR 921, NUR 922, NUR 923 and admission to DNP Program or consent of instructor.

* NUR 961 EPISTEMIC HEALTH PROBLEMS IN ADULT AND GERIATRIC PRIMARY CARE. (3)

This course focuses on the primary care nurse practitioner’s assessment, diagnosis and management of epistemological health problems of adult and geriatric individuals. Emphasis will be on differentiating a variety of signs and symptoms and interpreting data to formulate differential diagnoses. Students will synthesize evidence-based clinical practice guidelines to assist in the development, implementation, and evaluation of the plan of care will be emphasized. The impact of epistemological health problems on the family as a whole will be analyzed. In addition, the primary care nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Prerequisites: Admission to DNP Program and NUR 921, NUR 922, NUR 923 and NUR 960. Corequisites: NUR 950 (3 credit hour clinical).
Course Descriptions

NUR 962 CHRONIC HEALTH PROBLEMS IN ADULT AND GERIATRIC PRIMARY CARE. (3) This course focuses on the primary care nurse practitioner’s assessment, diagnosis, and management of common chronic health problems of adult and geriatric individuals. Emphasis will be on differentiating a variety of signs and symptoms and interpreting data to formulate differential diagnoses. The use of evidence-based clinical practice guidelines will assist in the development, implementation, and evaluation of the plan of care will be emphasized. The impact of chronic health problems on the family will be analyzed. Prereq: Admission to DNP program, and NUR 961. Coreq: NUR 950 (3 credit hour clinical).

#NUR 963 PRIMARY CARE OF CHILDREN AND CHILDBEARING FAMILIES. (3) This course focuses on the Family Nurse Practitioner’s role in the assessment, diagnosis, and management of selected acute and chronic health problems among children in the primary care setting as well as the provision of well child care and postpartum care and the impact of health problems on the family will be emphasized. Prereq: NUR 921, NUR 922, NUR 927, NUR 923, NUR 960, admission to DNP program or consent of instructor.

NUR 965 ROLE AND PRACTICE ISSUES FOR THE ADVANCED PRACTICE PSYCHIATRIC NURSE. (3) The focus of this course is on concepts, theories and research underlying advanced practice psychiatric nursing (APN). The scope and standard of psychiatric-mental health nursing practice framework study of APN functions – psychotherapy, psychopharmacologic interventions, consultation liaison activities, and interdisciplinary team approaches will be emphasized. The use of evidence-based clinical practice guidelines will assist in the assessment and management of acute and chronic health problems that will be explored. Growth and development, child/adolescent health, and developmental issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for patients with psychiatric illness and medication substance abuse will be discussed. Prereq: NUR 921, NUR 923 and 965. Coreq: NUR 969.

#NUR 966 DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC ILLNESSES IN ADULTS AND ELDERLY. (3) This course focuses on the study of conceptual frameworks, theories, and research related to common psychiatric disorders among adults and elderly patients. Concepts related to diagnostic criteria, assessment, treatment, evaluation, and recovery from psychiatric illness in adult and elderly patients will be emphasized. The course will also focus on biological and pharmacologic theories, treatment issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for active duty military service personnel and veterans with psychiatric illnesses will be discussed. Prereq: NUR 965, 966, 968. Coreq: NUR 969.

#NUR 967 DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC ILLNESSES IN CHILDREN, ADOLESCENTS AND YOUNG ADULTS. (3) This course focuses on the study of conceptual frameworks, theories, and research related to common psychiatric disorders among children, adolescents, and young adults. Concepts related to diagnostic criteria, assessment, treatment, evaluation, and recovery from psychiatric illness in children, adolescents, and young adult patients will be emphasized. The course will also focus on biological and pharmacologic theories, treatment issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for active duty military service personnel and veterans with psychiatric illnesses will be discussed. Prereq: NUR 965, 966, 968. Coreq: NUR 969.

#NUR 968 CLINICAL MANAGEMENT OF PSYCHIATRIC DISORDERS IN ADULTS AND ELDERLY. (3) This course will provide students with clinical experiences in the treatment of adults and elderly patients with psychiatric illnesses. During clinical experiences, foundational competencies for advanced nursing practice will be addressed and practiced. Students will conduct comprehensive and systematic psychiatric assessments, diagnose common psychiatric illnesses, implement pharmacologic and psychosocial interventions, and evaluate treatment outcomes for children, adolescents and young adults. A variety of settings across the healthcare continuum will be utilized. Multidisciplinary and interprofessional collaboration as functions of the Advanced Practice Psychiatric Nurse is incorporated into clinical work. Prereq: NUR 921, NUR 922, NUR 927, and 965. Coreq: NUR 969.

NUR 970 SYSTEMS APPLICATION OF ADVANCED HEALTH ASSESSMENT: SEMINAR. (3) This course is a companion to NUR 976. It provides directed clinical/practicum experiences wherein the student is able to apply content from NUR 974. The focus of this course will be to enhance student ability to integrate assessment data with evidence-based clinical practice guidelines to assist in the assessment and management of acute and chronic health problems among children, adolescents, and adults. Emphasis will be on determining appropriate management of patients with common psychiatric disorders among adults and elderly patients. Concepts related to diagnostic criteria, assessment, treatment, evaluation, and recovery from psychiatric illness will be explored. Growth and development, child/adolescent health, and developmental issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for active duty military service personnel and veterans with psychiatric illnesses will be emphasized. Prereq: Admission to DNP program, and NUR 961. Coreq: NUR 950 (3 credit hour clinical).

NUR 974 POPULATIONS AND ORGANIZATIONAL SYSTEMS LEADERSHIP II: HEALTHY PRACTICE ENVIRONMENTS. (3) This course is a companion to NUR 976. It provides directed clinical/practicum experiences in the assessment and management of acute and chronic health problems among children, adolescents, and adults. Concepts related to diagnostic criteria, assessment, treatment, evaluation, and recovery from psychiatric illness will be explored. Growth and development, child/adolescent health, and developmental issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for active duty military service personnel and veterans with psychiatric illnesses will be emphasized. Prereq: Admission to DNP program, and NUR 961. Coreq: NUR 950 (3 credit hour clinical).

NUR 975 POPULATIONS AND ORGANIZATIONAL SYSTEMS LEADERSHIP III: CLINICAL: MANAGEMENT OF POPULATION HEALTH IN COMPLEX HEALTHCARE SYSTEMS. (3) This course is a companion to NUR 974. It provides directed clinical/practicum experiences designed so the student is able to apply content from NUR 974. The focus of this course will be to enhance student ability to integrate assessment data with evidence-based clinical practice guidelines to assist in the assessment and management of acute and chronic health problems among children, adolescents, and adults. A variety of settings across the healthcare continuum will be utilized. Multidisciplinary and interprofessional collaboration as functions of the Advanced Practice Psychiatric Nurse is incorporated into clinical work. Prereq: NUR 921, NUR 923 and 965. Pre or coreq: NUR 922. Coreq: NUR 969.

NUR 976 POPULATIONS AND ORGANIZATIONAL SYSTEMS LEADERSHIP III: SEMINAR: SYSTEMS AND COMMUNITY DIMENSIONS OF CRISIS AND DISASTER PREPAREDNESS. (2) This course will provide directed clinical/practicum experiences designed so the student is able to apply content from NUR 974. The focus of this course will be to enhance student ability to integrate assessment data with evidence-based clinical practice guidelines to assist in the assessment and management of acute and chronic health problems among children, adolescents, and adults. Concepts related to diagnostic criteria, assessment, treatment, evaluation, and recovery from psychiatric illness will be explored. Growth and development, child/adolescent health, and developmental issues, psychotherapeutic modalities, and primary prevention of psychiatric illness in this population. Treatment approaches for active duty military service personnel and veterans with psychiatric illnesses will be emphasized. Prereq: Admission to DNP program, and NUR 961. Coreq: NUR 969.

Course Descriptions

OMD 814 ORAL DIAGNOSIS/ORAL MEDICINE AND TREATMENT PLANNING. (2)
This course is designed to prepare the student dentists to do overall patient evaluation which would include medical history, dental history, social history, family history and to understand the significance of proper head and neck examination which would ultimately help them in diagnosis and treatment planning. It will also help them in understanding the different needs and extra precautions needed for certain medically complex patients and special needs patients and hands on clinical training in patient examination. It will consist of lectures, stimulated case presentations, hands on clinical examination training in groups, self-practice time and handouts. Prereq: 1st Year University of Kentucky, College of Dentistry student.

OMD 820 ORAL AND MAXilloFACIAL RADIOLOGY AND DIAGNOSTIC IMAGING. (2)
This course presents the principles of radiographic anatomy, extra-oral projections (including panoramic film and lateral skull film), radiography of caries and periodontal disease, digital radiology, advanced imaging techniques (including CBCT), and the process of radiographic interpretation. Lecture, 24 hours; seminar, 4.5 hours; practicum, 24 hours (three days). Prereq: ODM 810.

OMD 821 CLINICAL ORAL DIAGNOSIS I. (1)
This course consists of two components: 1) examination, diagnosis, and treatment planning for patients assigned to dental students in general clinics; and 2) an emergency clinic assignment in which the students will diagnose and treat patients with acute oral problems. Clinic, 30 hours. Prereq: CDS 815; Coreq: CDS 824.

OMD 830 MANAGEMENT OF THE MEDICALLY COMPROMISED DENTAL PATIENT. (3)
This course will provide students with the knowledge required to manage medically compromised patients in the outpatient dental office. Basic clinicianpathological information about commonly occurring medical disorders, the impact medications that these patients take have, the special problems they have, and their effects on dental health care will be presented. Critical thinking is encouraged so that the students can use their diagnostic skills in the appropriate manner to identify and manage patients with systemic disorders. Lecture, 43 hours; laboratory, 4 hours. Prereq: Approval of dean and/or his designee for academic affairs and the course director.

OMD 831 CLINICAL ORAL DIAGNOSIS II. (1)
This course is a continuation of ODM 821 and also consists of two components: 1) examination, diagnosis and treatment planning for patients assigned to dental students in general clinics; and 2) emergency clinic assignments in which the students will diagnose and treat patients with acute oral problems. Clinic, 40 hours. Prereq: ODM 821; Coreq: CDS 832.

OMD 841 CLINICAL ORAL DIAGNOSIS III. (1)
This course is a continuation of ODM 831 and also consists of two components: 1) examination, diagnosis and treatment planning for patients assigned to dental students in general clinics; and 2) emergency clinic assignments in which the students will diagnose and treat patients with acute oral problems. Clinic, 40 hours. Prereq: ODM 830 and ODM 831.

OFP Orofacial Pain

OFP 634 CURRENT CONCEPTS IN TEMPOROMANDIBULAR DISORDERS. (3)
This course provides the student with information on the anatomy, physiology and function of the masticatory system. The etiology, diagnosis and treatment of temporomandibular disorders will be emphasized. Lecture, 41 hours; laboratory, 15 hours per semester. Prereq: Acceptance into the College of Dentistry M.S. Program and/or consent of the College of Dentistry’s Director of Graduate Studies and the course director.

OFP 636 CLINICAL MANAGEMENT OF TEMPOROMANDIBULAR DISORDERS. (3)
This course provides the student with clinical experience in the diagnosis and management of temporomandibular disorders. The student will provide treatment for patients referred to the Orofacial Pain Center under the supervision of the course director. Lecture, 8 hours; practicum, 24 hours. Prereq: Acceptance into the College of Dentistry M.S. Program and/or consent of the College’s Director of Graduate Studies and the course director.

OFP 700 OROFACIAL PAIN TREATMENT PLANNING SEMINAR. (2)
This course will provide the student with experience in diagnosing and treatment planning for various orofacial pain patients. Lecture; 32 hours per year or 16 hours per semester. Prereq: Acceptance into the College of Dentistry M.S. Program and/or consent of the College’s Director of Graduate Studies and the course director.

OFP 734 CURRENT CONCEPTS IN OROFACIAL PAIN. (3)
This course provides the student with information on the masticatory orofacial pain problems. The etiology and differential diagnosis of head and neck pain will be emphasized. The student will learn the dentist’s role in the management and/or referral of complex facial pain problems. Prereq: OFP 634 and OFP 636.

OFP 736 CLINICAL MANAGEMENT OF OROFACIAL PAIN. (3)
This course provides the student with clinical experience in the diagnosis and management of complex orofacial pain problems. The student will provide treatment for referred patients assigned to the Orofacial Pain Center under the supervision of the course director. Lecture, 114 hours. Prereq: OFP 634 and OFP 636.

OFP 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be requested to a maximum of six (6) semesters. Prereq: All course work toward the degree must be completed.

OFP 768 RESIDENT’S CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated for a total of 12 hours. Prereq: Admission to the Orofacial Pain graduate program and consent of the Director of Graduate Studies.

OFP 790 RESEARCH IN OROFACIAL PAIN. (1-6)
This course provides credit hours for graduate students’ independent research efforts. May be repeated to a maximum of 12 hours. Prereq: Admission to the Orofacial Pain Graduate Program and consent of the Director of Graduate Studies in the College of Dentistry.

OHP Oral Health Practice

OHP 850 INDEPENDENT WORK IN ORAL HEALTH PRACTICE. (1-3)
An elective course offered by the department of Oral Health Practice. Students may work on individual projects in one or more of the disciplines encompassed by this department under the direction of a faculty member. The work should involve independent laboratory or clinical research and include supporting literature searches. The end result should be either a table clinic approval or a paper suitable for publication. The number of hours to be spent on the project and the means of evaluation will be decided before beginning the project. May be repeated a maximum of 12 credits. Prereq: Specific course prerequisites and year in dental school will depend on the nature of the proposed project; consent of instructor.

OHS Oral Health Science

OHS 850 INDEPENDENT WORK IN ORAL HEALTH SCIENCE. (1-3)
An elective course offered by the Department of Oral Health Science. Students may work on individual projects in one or more of the disciplines encompassed by this department under the direction of a faculty member. The work should involve independent laboratory or clinical research and include supporting literature searches. The end result should be either a table clinic presentation or a paper suitable for publication. The minimum number of hours to be spent on the project and the means of evaluation will be decided before beginning the project. May be repeated a maximum of 12 credits. Prereq: Specific course prerequisites and year in dental school will depend on the nature of the proposed project; consent of instructor.

OPH Ophthalmology

OPH 815 FIRST-YEAR ELECTIVE, OPHTHALMOLOGY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Ophthalmology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

OPH 825 SECOND-YEAR ELECTIVE, OPHTHALMOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Ophthalmology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

OPH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop a fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
OPH 850 CLINICAL CLERKSHIP IN OPHTHALMOLOGY
OPH 851 RESEARCH IN OPHTHALMOLOGY
OPH 852 ADVANCED CLINICAL CLERKSHIP IN OPHTHALMOLOGY
OPH 890 OPHTHALMOLOGY OFF-SITE

OPT Oral Pathology

OPT 650 GRADUATE ORAL PATHOLOGY. (1-3)
A seminar course in advanced oral pathology in which students study the microscopic, radiographic, and clinical features and the management of diseases that affect oral and perioral tissues. A case study format is used to discuss common and rare conditions that illustrate all major disease categories and to provide a framework for developing a systematic approach to disease diagnosis. Lecture: 36 hours. Prereq: Dental degree and enrollment in a College of Dentistry postgraduate program; consent of instructor.
ORT 651 GRADUATE ORAL PATHOLOGY II. (2)
This course is a continuation of ORT 650. It is a seminar in advanced oral pathology in which students study the microscopic, radiographic, and clinical features and the management of diseases that affect oral and perioral tissues. A case study format is used to discuss both common and rare conditions that illustrate all major disease categories and to provide a framework for developing a systematic approach to disease diagnosis. Lecture: 36 hours. Prereq: ORT 650 or consent of instructor.

ORT 820 GENERAL PATHOLOGY FOR STUDENT DENTISTS. (3)
This basic course covers general pathology, which will prepare the student dentist to concentrate on the specialized area of oral pathology. Emphasis is placed on cell damage, inflammation and repair, neoplasia and hemanstasis, as well as the in-depth study of selected systemic diseases that may affect dental patient management. Prereq: Enrollment in the College of Dentistry and second year class standing, ANA 530, ANA 534, or consent of course director.

ORT 652 ORAL PATHOLOGY I. (3)
This is a comprehensive lecture course on oral and paraoral diseases. The course deals mainly with the clinical aspects of oral disease, with emphasis on clinical and/or radiographic appearance, etiology, management and prognosis. Lecture, 41 hours, and 5 one-hour examinations. Prereq: STA 524 or consent of instructor.

ORT 832 ORAL PATHOLOGY II. (1)
This course teaches the dental student an effective approach to patients with oral lesions. It will stress the following: development of a reasonable differential diagnosis list, procedures to be used in obtaining a definitive diagnosis, management of the patient after a diagnosis has been made, and treatment if indicated. Lecture/Seminar, 26 hours and 1 two-hour final exam. Prereq: OPT 830.

ORT 840 ORAL PATHOLOGY III. (1)
This is an advanced course in oral pathology in which various diseases and abnormal conditions of the head, neck, and oral cavity are presented. The pertinent information on several selected cases will be available online and posted in a display case for a week. Subsequently, an associated seminar will concentrate on the development of a differential diagnosis, establishment of a definitive diagnosis, and discussion of treatment and prognosis. Seminar, 19 hours and 1 1/2 hour exam. Prereq: OPT 832.

ORT 850 ORAL PATHOLOGY ELECTIVE. (1-10)
Elective courses offered by the Department of Oral Pathology provide opportunities for further study of oral or experience in various aspects of oral pathology. Topics may include principles of clinical and histologic diagnosis, the management of patients with oral disease, and discussion of specific oral diseases. Hours variable, ranging from a minimum of 16 hours lecture/discussion to a maximum of 10 weeks clinical experience. May be repeated to a maximum of 10 credits. Prereq: The minimum year in dental school and any course prerequisites will be announced for each topic.

OR Operations Research

ORT 524 PROBABILITY. (3)
Sample space, random variables, distribution functions, conditional probability and independence, expectation, combinatorial analysis, generating functions, convergence of random variables, characteristic functions, laws of large numbers, central limit theorem and its applications. Prereq: MA 213 and MA 322. (Same as STA 524.)

ORT 525 INTRODUCTORY STATISTICAL INFERENCE. (3)
Simple random sampling, statistics and their sampling distributions, sampling distributions for normal populations; concepts of loss and risk functions; Bayes and minimax inference procedures; point and interval estimation; hypothesis testing; introduction to nonparametric tests; regression and correlation. Prereq: STA 320 or STA 524 or consent of instructor. (Same as STA 525.)

ORT 624 APPLIED STOCHASTIC PROCESSES. (3)
Definition and classification of stochastic processes, renewal theory and applications, Markov chains, continuous time Markov chains, queuing theory, epidemic processes, Gaussian processes. Prereq: STA 524 or STA 623 or consent of instructor. (Same as STA 624.)

ORTH Orthodontics

ORT 610 CRANIO-FACIAL FORM. (2)
This is a two-credit-hour seminar course that introduces students to the basic concepts and principles of cephalometrics in orthodontic diagnosis and treatment. The course reviews historical literature as well as contemporary articles. Prereq: Admission to graduate dental programs; D.D.S. or D.M.D. degree.

ORT 620 ORAL-PHYARYNGEAL FUNCTION, PART I. (2)
Basic and applied physiology for graduate students in dentistry. Class, two and one-half hours. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

ORT 621 ORAL-PHYARYNGEAL FUNCTION, PART II. (2)
A continuation of ORT 620, emphasizing speech physiology and language development. Lecture, two and one-half hours. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.
OGS 651 ANATOMICAL RELATIONSHIPS IN SURGERY. (1)
A seminar course for dental graduate students in areas other than surgery, emphasizing anatomical and surgical principles applicable to all dental specialties. Prereq: Admission to graduate or post-doctoral programs of College of Dentistry; D.D.S. or D.M.D. degree.

*OGS 820 ORAL SURGERY I. (1)
This course is designed to introduce the student to principles of oral and maxillofacial surgery and to prepare them for their clinical rotations. OSG 830, 831 and 841. Emphasis is placed not only on the technical aspects of surgery, but also on the integration of basic sciences to form a scientific basis for the clinical practice of surgery.

OGS 830 ORAL SURGERY II. (1)
This course is an overview of the specialty of oral surgery. The student is introduced to the surgical management of congenital and acquired abnormalities of the oral structures and associated parts. Management of odontogenic infection, cysts and tumors is presented, as well as the role of the dentist in the care of head and neck cancer patients. The diagnosis and management of facial fractures also are presented, particularly as they relate to the general practitioner. Lecture, 25 hours. Prereq: OSG 820 or consent of course director.

OGS 831 ORAL SURGERY ROTATION. (1-10)
This course teaches the management of the ambulatory oral surgical patient. It includes patient evaluation, control of pain and anxiety, performance of minor oral surgical procedures, treatment of acute and chronic oral infections and of complications associated with oral surgery, and the use of the problem-oriented record. Slide-text programs and reading assignments supplement the outpatient clinical experience. Clinic, 48 hours. Prereq: CDS 821 and OGS 820 or consent of course director.

OGS 841 ORAL SURGERY ROTATION II. (2)
In this course students learn the management of oral surgical patients in a hospital. It consists of a full-time rotation on the oral surgery hospital service, including standing in-hospital night call with the oral surgery house staff. Students assist in patient care and perform procedures such as exodontia and biopsy. Oral surgical management of comprehensive care patients is in the outpatients rotation included. Clinic, two weeks. Prereq: OGS 830 and OGS 831.

OGS 850 ORAL SURGERY ELECTIVE. (1-10)
Oral Surgery provide opportunities for further study of or experience in various aspects of oral surgery. Topics may include hospitalized and ambulatory patient management, emergency care, operating room experience, pain and anxiety control, and surgical technique. Hours variable, ranging from a minimum of 16 hours lecture/discussion to a maximum of 10 weeks clinical school experience. May be repeated to a maximum of 10 credits. Prereq: Minimum year in dental school and any course prerequisites will be announced for each topic.

OTH Orthopedics

OTH 856 ORTHOPEDICS FOR THE PRIMARY CARE PHYSICIAN. (4)
Students will spend time in sports medicine orthopedic clinic, two-and-a-half days a week, observing in the operating room a half day a week and half day a week working with physical therapists in the clinical setting or athletic trainers at the high school. Each student will have the opportunity to evaluate and treat patients under the supervision of the attending physician. Students will attend and participate in didactic interactive sessions at weekly sports medicine conferences and on campus at orthopedic conferences one afternoon per week. Prereq: Successful completion of all third year clerkships; priority will be given to those students not pursuing orthopedics training, or those already signed up for an orthopedics AI.

PA Public Administration

PA 602 STRATEGIC PLANNING AND ORGANIZATIONAL CHANGE IN THE PUBLIC AND NONPROFIT SECTORS. (3)
This course focuses on the potential for change and future directions for public and nonprofit organizations. It covers the basics of strategic planning for organizations providing public value and operating in a political context. It addresses such topics as environmental assessments, stakeholder analysis, identification of strategic issues, strategy formulation and implementation, performance measurement and evaluation, and key features of organizational change processes. Prereq: PA 621 and PA 651.

PA 621 QUANTITATIVE METHODS OF RESEARCH. (3)
A survey of behavioral science research methods for the public administrator. Emphasis is placed upon problem selection and identification, research design, and data analytic techniques. Lecture, two hours; laboratory, one hour per week. Prereq: MPA or MHA program status.

PA 622 PUBLIC PROGRAM EVALUATION. (3)
This course is designed to provide students with the conceptual and analytical tools to evaluate the effectiveness of public programs and policies. The focus will be on program monitoring and evaluation. Of particular concern will be program process and outcome measurement, quasi-experimental design, multiple regression analysis, and analysis of variance models. Prereq: PA 621.

PA 623 DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS. (3)
An introduction to organizational decision making under conditions of certainty, uncertainty, risk and multiple objectives. Concepts of analysis and evidence, the fundamentals of mathematics, probability, and statistics will be utilized in terms of administrative decision making in public administration. Course work includes use of various management information systems with a focus on how such systems can be used to support and inform decision making. Lecture, two hours; laboratory, one hour per week. Prereq: PA/HA 621, PUAD or HLA-D program status or consent of instructor.

PA 624 GOVERNMENT INFORMATION SYSTEMS. (3)
Provides an overview of information strategies and management approaches to government functions and public policy programs. It illustrates and analyzes the interaction between information technology and information systems with management and policy decisions in the public and non-profit sectors by using large data. Prereq: MPA or MPP program status.

PA 625 GOVERNMENTAL ACCOUNTING AND FINANCIAL CONDITION ANALYSIS. (3)
The course will examine the characteristics of governmental and nonprofit accounting emphasizing the various fund types and account groups, review and evaluation of presently recommended accounting and financial reporting procedures (GAAP) and an exploration of practical governmental and nonprofit accounting practices and methods. The course will introduce students to public financial accounting concepts and how to apply governmental (fund) and not-for-profit accounting theory to accounting and reporting for state and local governments and other non-profit institutions.

PA 626 APPLICATIONS IN GOVERNMENTAL ACCOUNTING AND AUDIT. (3)
Students will gain hands-on experience with case studies designed to simulate real-world scenarios and common problems in today’s public sector. This course goes beyond the theory and will demonstrate how to navigate the key issues that arise in governmental and not-for-profit accounting and auditing, expanding on concepts developed in PA 671. Prereq: PA 625.

PA 627 GOVERNMENTAL AUDIT. (3)
This course focuses on components of the governmental audit process unique to the public sector. Students will gain an understanding of the Government Auditing Standards (GAGAS), traditional and modern government audit techniques and audit evidence, the fundamentals of interviewing and reporting techniques, the preparation of audit working papers, as well as how to interpret audit findings and elements based on qualitative and quantitative evidence and communicate those findings to non-financial audiences.

PA 631 PUBLIC FINANCIAL MANAGEMENT. (3)
An analysis of budget structure and process; revenue structure and administration; and public capital acquisition and debt management. This course emphasizes an applied focus and comparative analysis of alternative budget, revenue, and debt management structures and strategies. Prereq: PUAD or PHD program status or consent of instructor.

PA 632 PUBLIC FUNDS MANAGEMENT. (3)
A study of the management of public funds including the accumulation, management and investment of such funds and the accounting for those transactions. It will also include topics such as fund accounting, cash forecasting, cash management practices and public funds investment strategies. Prereq: MPA program status.

PA 633 MUNICIPAL SECURITIES. (3)
An analysis of the theoretical and operational issues associated with the municipal securities industry. Prereq: PA 632 or the equivalent and Ph.D. or M.P.A. program status or consent of instructor.

PA 636 HEALTH ECONOMICS. (3)
This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefit-cost analysis, and reform health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and HA/ PA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as ECO 653.)

*PA 642 PUBLIC AND NONPROFIT ORGANIZATION THEORY AND BEHAVIOR. (3)
A course which examines the interaction of both external and internal resources and constraints upon the administrative decision processes in a number of public organizational settings. The objective is an understanding of the practice of administration in public organizations. Prereq: MPA/MHA program status.

PA 651 THE POLICY PROCESS. (3)
Broad-based course in public policy formulation and social planning. Emphasis is on the parameters of policy formulation as well as the social planning and impact variables. Both policy processes and relevant content areas will be stressed. Prereq: MPA program status.

PA 652 PUBLIC POLICY ECONOMICS. (3)
Principles and practices of economical resource management in the governmental sector: tax and expenditure types, intergovernmental fiscal cooperation, debt financing, budgeting and financial planning. Prereq: ECO 201 or equivalent and MPA or MPP program status or permission of department. (Same as ECO 652.)
PA 653 LOCAL ECONOMIC DEVELOPMENT. (3)
The course develops the capacity to employ the theories, practices and philosophies of economic development to specific issues in local areas. The primary geographic focus of the course is the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as AEC 653.)

PA 660 PUBLIC POLICY OF THE NONPROFIT SECTOR. (3)
This course offers an overview of practical, legal, ethical, and theoretical issues faced by the nonprofit sector and organizations that exist today and over time.

PA 661 FINANCIAL MANAGEMENT OF NONPROFIT ORGANIZATION. (3)
This course explores the techniques and principles of financial management including budgeting, finance, and investment decision making for nonprofit organizations.

PA 662 NON-PROFIT MANAGEMENT. (3)
A graduate level management course focusing on the most significant tenets of management, including those that differentiate a non-profit organization from others. Theory and practice will be included. Students will select a non-profit organization to explore and evaluate specific management functions. Prereq: MPA program status or permission of the instructor.

PA 665 PUBLIC POLICY AND POLITICAL ECONOMY IN AN INTERNATIONAL CONTEXT. (3)
The goal of this course is to introduce students to policy analysis and political economy issues in an international setting. This will involve the study of particular aspects of economic policy in individual countries and regions, as well as the development of fundamental principles of economic policy which can be used to analyze the impacts of alternative policies and the processes by which policies are made. Prereq: PA 652 or equivalent or consent of the instructor.

PA 667 POLICYMAKING IN AN INTERNATIONAL CONTEXT: POLITICAL AND ORGANIZATIONAL DIMENSIONS. (3)
This class provides students with an understanding of the political systems of the world and the implementation of policy in nations around the world. We begin by comparing the political systems and the bureaucracies of the U.S. and Canada, which will serve as the backdrop for learning relevant concepts from modern political science and public administration. Having mastered these concepts, we will then use them to examine Mexico, Brazil, the People’s Republic of China, India, Japan, Nigeria, Russia, the United Kingdom, Germany, and finally, the European Union as an entity. In all cases, our country studies will focus on who decides on policies and how, and then on how policies are implemented. In selected class sections, the instructor will provide practical information on working in, and with professionals from the countries featured in this class. Prereq: PA 652 or their equivalents or permission of the instructor.

PA 673 HEALTH POLICY. (3)
An analysis of the development and implementation of health policy on a national, state, local and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values, and political and community factors affecting policy development and program implementation. Prereq: HA 636, MPA program status or consent of instructor. (Same as CPH 785.)

PA 675 EDUCATION: ECONOMICS AND POLICY. (3)
This course will provide an overview of current policy issues in education. The course will cover basic education policy issues with a particular emphasis on the economics and policy analytic perspectives. Many of the issues will be examined both conceptually and empirically and will expose the student to policy evaluation tools and techniques. We will examine questions such as why schooling is provided publicly in the U.S., look at ways to evaluate the current quality of schooling, and think about reform alternatives. Prereq: PA 621 and PA 652 or their equivalents or permission of the instructor.

PA 680 BENEFIT-COST ANALYSIS. (3)
Principles, practices and applications of applied welfare analysis are the content of this course. The basic theory of benefit-cost analysis is presented and the relevance of implementation analysis in policy analysis is established. Prereq: PA 652. (Same as ECO 654.)

PA 681 CAPSTONE IN PUBLIC ADMINISTRATION. (3)
This course provides an opportunity for students to integrate their studies with professional practice. Case studies and special projects require students to integrate knowledge from the core curriculum in the analysis of public management and policy problems. Prereq: MPA program status and completion of 33 credit hours.

PA 683 TAX POLICY. (3)
Tax policy is analyzed from an economic perspective: efficiency and distributional effects of taxation, especially in state, local and international contexts. Prereq: PA 652 or equivalent; PUAD program status or permission of instructor.

PA 684 ENVIRONMENTAL POLICY. (3)
This course examines environmental policymaking, primarily in the context of the United States. Concepts and models will be given to how environmental policy is adopted and implemented in a federal system. In addition, environmental regulations will be evaluated and policy alternatives will be analyzed. This course will take you through the important players in the environmental policy process, the significant factors related to policy development, adoption and implementation and a series of current environmental issues.

PA 690 PUBLIC POLICY ANALYSIS OVERVIEW. (3)
Economic and political foundations of policy analysis are considered in a survey fashion, followed by specific techniques used in the practice of policy analysis. Prereq: Graduate standing and MPA program status.

PA 691 ETHICS AND PUBLIC POLICY. (1)
This course provides an introduction to ethical theory, explores the ethical dimensions of practice in the public sector, and examines ethics in connection with policy development. Prereq: Graduate standing and MPA program status.

PA 692 ECONOMETRICS FOR POLICY ANALYSTS. (3)
Maximum likelihood estimation, ordinary least squares (OLS) regression, instrumental variables (IV) regression, heteroscedasticity-consistent regression, fixed and random effects models, probit, logit and tobit models, and identification and two-state least squares estimation of simultaneous equations models. Prereq: Any undergraduate statistics course, MPA, MPP or PUAD program status for priority registration, other students with permission of instructor. (Same as ECO 692.)

PA 694 PUBLIC PENSIONS AND INSURANCE. (3)
This course provides participants with an in-depth understanding of the conceptual and practical issues involved in the design and implementation of public pensions and insurance programs. The course draws on US state and local data, analysis and trends. It is designed to introduce public financial managers and other stakeholders to the latest developments in fiscal analysis and revenue forecasting. This course introduces students to the tools to formulate tax budgeting plans. Through the use of lectures, case studies, presentations, etc. students will learn the statistical techniques, forecasting methods and revenue estimation models.

PA 696 LEGAL ISSUES IN PUBLIC FINANCIAL MANAGEMENT. (3)
Public finance law refers to legislation and regulations relating to the financial activities of government or public sector organizations. This topical course is designed to provide the public financial manager insight into the ever-changing legal responsibilities of government activities touching on financing strategies, public/private partnerships as well as employment financial issues and financial data security.

PA 697 SPECIAL TOPICS IN PUBLIC FINANCIAL MANAGEMENT. (3)
The course offers a detailed investigation of contemporary topics in fields of public financial management using cases, articles and guest lectures. Students will be able to draw meaningful and meaningful conclusions about the efficiency and effectiveness of federal, state and local financial management systems. Topics will include budget reform, changing accounting requirements, internal audit reform, and other issues impacting the ever-changing world of public financial management.

PA 711 INTERNSHIP IN PUBLIC ADMINISTRATION. (3)
Practical field experience in an administrative setting under the direction of an academic and a workplace supervisor. Prereq: MPA program status or consent of instructor.

PA 722 POLICY AND PROGRAM EVALUATION. (3)
This is a doctoral course concerning policy and program evaluation. Major emphasis will be given to specifying the relationship between evaluation and management functions, evaluation concepts and processes and research methods applicable to evaluation systems and processes. Prereq: MKT 762 or PS 671, or equivalent and Ph.D. program status or consent of instructor.

PA 727 ENVIRONMENTAL ECONOMICS, REGULATION AND POLICY. (3)
This course takes a balanced practitioner approach to the problems of the environment and environmental regulation. Efficiency aspects will be developed carefully, so as to provide a foundation for an extensive coverage of various available alternative policies. Prereq: PA 652 and MPA or economics program status or consent of instructor. (Same as ECO 721.)

PA 731 FISCAL AND BUDGETARY POLICY. (3)
This course examines public budgeting and finance in the public sector. Included is an analysis of economic, managerial, and political approaches to public budgeting and finance. These approaches are then used to analyze several current topics in public finance. Prereq: PA 631 or equivalent, and Ph.D. program status or consent of instructor.

PA 742 THEORY OF PUBLIC ORGANIZATIONS. (3)
This course provides doctoral students an in-depth knowledge of the various aspects of public organization theory. It will attempt to integrate the work on public organizations which is currently spread over the fields of organization theory and behavior, executive and bureaucratic theory, public choice economics and policy analysis. Prereq: PA 642 or equivalent, and Ph.D. program status or consent of instructor.

PA 750 INTRODUCTION TO ECONOMICS FOR PUBLIC POLICY. (3)
Introduction to microeconomic theory and mathematical methods for policy analysis. Prereq: PUAD Master’s or Ph.D. program status or permission of the instructor.
Course Descriptions

PA 751 PUBLIC POLICY FORMULATION AND IMPLEMENTATION. (3)
The major goals of this course are to examine how public issues become policy proposals, how various proposals are filtered into (or out of) the political process, shaped by political institutions and rules, and the process by which policy is implemented. Prereq: PA 651, or equivalent and Ph.D. program status or consent of instructor.

PA 752 THE ECONOMICS OF POLICY ANALYSIS. (3)
This course examines economic approaches to policy analysis. Included is an analysis of the major concepts of economic analysis and their application to a number of policy problems. Prereq: PA 652 and PA 750 or equivalent and Ph.D. program status or consent of the instructor.

PA 754 ADVANCED TOPICS IN PUBLIC FINANCE. (3)
Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism; international public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as ECO 752.)

PA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research or the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PA 795 SPECIAL TOPICS IN PUBLIC ADMINISTRATION. (1-3)
Analysis of specialized topics in public administration of particular interest to practitioners. May be repeated to a maximum of six credits. Prereq: MPA program status or consent of instructor.

PA 796 INDEPENDENT STUDY IN PUBLIC ADMINISTRATION. (1-3)
Tutorial course of directed readings, discussion, and analysis of special topics on public administration. May be repeated to a maximum of six credits. Prereq: MPA program status and consent of instructor.

PAS Physician Assistant Studies

PAS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course introduces the concepts of both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CLS 500, CNU 500, CD 500.)

PAS 610 RESEARCH METHODS AND EPIEMIOLOGY IN PA STUDIES. (3)
An introductory course designed to introduce students to research applicable to the health care sciences and the field of epidemiology. The course will include a description of the scientific method, research design, measurement techniques, and statistical analysis. Emphasis will be placed on both clinical research and population-based studies. Students will learn how to critically review literature and how to design a research protocol. Prereq: Completion of STA 570, admission to the Physician Assistant Program, or consent of instructor.

PAS 640 SURVEY OF GERIATRIC MEDICINE. (3)
Overview of physician assistant practice with geriatric patients. Emphasis is placed on the practice of geriatric medicine including the anatomy and physiology of normal aging; pathology of aging; health care aspects of geriatric management; the diagnosis, treatment and prevention of geriatric problems; and research aspects of geriatric practice. Prereq: Admission to the Physician Assistant graduate program or consent of the instructor.

PAS 645 MASTER’S PROJECT. (1)
A 4-week course designed to introduce students to methods of identifying and analyzing a health care delivery issue that can be studied through a scientific literature search. The analysis of the topic and writing of a research paper will occur during the student’s clinical clerkships. Prereq: STA 570, PAS 610, completion of the first year of the Physician Assistant graduate program.

PAS 646 MASTER’S PROJECT 2. (2-6)
This variable credit hour course is designed to allow PA students to complete a Master’s Project while under the guidance of a faculty advisor. Students will identify a health care issue topic, conduct appropriate library research on the topic, develop a research paper on the topic, and make an oral presentation of their project at the conclusion of the Master of Science in Physician Assistant Studies Program. Students will be responsible for developing appropriate audiovisuals, handouts, etc. for the oral presentation. Prereq: Admission to the Physician Assistant Program.

PAS 650 CLINICAL METHODS. (4)
The PAS 650 course is designed to deliver content specific to the principles of obtaining medical histories as well as performing physical examinations. Further, students will be introduced to health care communication in both a lecture as well as laboratory format.

PAS 651 INTRODUCTION TO THE PA PROFESSION. (2)
This course provides an overview of selected health care delivery issues affecting primary care practice and the role of the physician assistant. The first half of the semester is devoted to examination of the history and evolution of the PA profession, current PA practice demographics and regulations, principles of quality assurance, risk management, and medical literature evaluation. The second half of the semester is devoted to the study of the ethical dimensions of PA practice. Topics include moral principles and ethical theories, as well as a series of seminar discussions on contemporary ethical issues confronting primary care providers in the 20th and 21st centuries. Prereq: Enrollment in the Physician Assistant Program.

PAS 653 INTRODUCTION TO HEALTH AND DISEASE. (3)
An overview of the etiology, distribution, and prevention of basic disease processes. Prereq: Enrollment in Physician Assistant Program.

PAS 654 CLINICAL LECTURE SERIES I. (4)
A study of diseases and disorders seen in primary care physician assistant practice. Emphasis is placed on identifying the etiology, clinical presentation, laboratory and x-ray abnormalities, management, and prevention of diseases/disorders of the cardiovascular, pulmonary, renal, gastrointestinal, hematological, endocrine, and neurological systems. Research aspects of selected diseases is also presented. Prereq: Enrollment in the Physician Assistant Studies Program.

PAS 655 PSYCHOSOCIAL FACTORS IN PRIMARY HEALTH CARE. (3)
This course provides a broad overview of the role of psychosocial factors (behavioral, cultural, and environmental) in the nature, cause, course, distribution, prevention, and treatment of illness. It develops the student’s communication skills for clinical practice and presents psychosocial theories and research, and is organized into four areas: general behavioral concepts, communications skills, client and client development issues, and psychopathology. Prereq: Enrollment in the Physician Assistant Program.

PAS 656 PATIENT EVALUATION AND MANAGEMENT. (3)
The PAS 656 course is combination of lecture, formal presentations, laboratory practice sessions, and supervised patient care experiences involving patient evaluation and management skills. Prereq: Enrollment in Physician Assistant Program or consent of instructor.

PAS 657 CLINICAL LABORATORY PROCEDURES. (3)
This is a survey laboratory course covering common laboratory procedures performed in the primary care clinical setting. Emphasis will be placed on performing and interpreting basic clinical tests. Lecture, two hours; laboratory, two hours per week. Prereq: Enrollment in the Physician Assistant Studies Program.

PAS 658 CLINICAL LECTURE SERIES II. (4)
Emphasis placed on student research and presentation of selected diseases/disorders associated with orthopedics, dermatology, emergency medicine, pediatrics, and obstetrics and gynecology. Prereq: Enrollment in the Physician Assistant Program.

PAS 660 FAMILY MEDICINE CLERKSHIP. (3)
This is an eight-week clinical course designed to provide physician assistant students with experience in evaluation and treating common problems encountered in Family medicine. Experience is provided at the level of primary care physician assistant, and emphasis is placed on performing a prenatal history and physical exam, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on clinical problems, performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the curriculum.

PAS 661 PEDIATRIC CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluation and treating common problems encountered in pediatrics. Experience is provided at the level of primary care physician assistant, and emphasis is placed on performing a prenatal history and physical exam, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on pediatric problems, performing selected procedures, and establishing tentative treatment plan. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the PA curriculum.

PAS 662 OBSTETRICS AND GYNECOLOGY CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluation and treating common problems encountered in obstetrics and gynecology. Experience is provided at the level of primary care physician assistant, and emphasis is placed on performing a prenatal history and physical exam, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on gynecologic problems, and performing selected procedures, and establishing tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 663 SURGERY CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluating and treating surgical problems. Experience is provided at the level of primary care physician assistant, and emphasis is placed on performing a surgical history and physical exam, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on surgical problems, and performing selected surgical procedures. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the PA curriculum.

University of Kentucky 2016-2017 Undergraduate Bulletin 574

KEY: # = new course * = course changed † = course dropped ¶ = course purged
Course Descriptions

PAS 664 GERIATRIC CLERKSHIP. (3)
A 4-week physician assistant clinical clerkship in geriatric medicine. Objectives involve the development of knowledge and skills in the evaluation, management, and prevention of common geriatric disorders and diseases. Principles of business management, evidence-based medicine, research, and use of ancillary medical services are also covered. Prereq: Admission to the Physician Assistant graduate program, or consent of instructor.

PAS 665 CLINICAL PRACTICUM IN PHYSICIAN ASSISTANT STUDIES. (1-6)
This field assignment offers supervised clinical experience appropriate to the PA student’s chosen area of practice. May be repeated to a maximum of 12 credits; 40 hours per week. Prereq: Enrollment in Physician Assistant Program.

PAS 680 INTERNAL MEDICINE CLERKSHIP. (6)
This is an eight-week clinical course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in Internal Medicine. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical exam, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, and performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the PA curriculum.

PAS 670 EMERGENCY MEDICINE CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in emergency medicine. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical exam, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, and performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the curriculum.

PAS 671 PSYCHIATRIC CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience evaluating and treating common problems encountered in psychiatry. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical exam, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, and performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the PA curriculum.

PAS 672 PHARMACOLOGY I. (3)
This course is designed to prepare students for the pharmacological requirements of practice as a primary care physician assistant. Emphasis is placed on a description of drug categories, prescription writing, drug abbreviations and equivalents, principles of drug research, and the laws on ethics of drug use in primary care medicine. Prereq: Enrollment in the Physician Assistant Program.

PAS 673 PHARMACOLOGY II. (3)
This course is designed to prepare students for the pharmacological requirements of practice as a primary care physician assistant. Emphasis is placed on utilizing specific drugs and drug combinations for specific diseases, and performing literature reviews on current pharmacological problems. Principles of drug interactions and presentation is required addressing a specific pharmacological problem that occurs in primary care physician assistant practice. Prereq: Enrollment in the Physician Assistant Program.

PAS 678 HEALTH PROMOTION AND DISEASE PREVENTION. (2)
This course is designed to focus on health promotion and disease prevention in primary care medical practice. The course reflects concerns expressed in Healthy People 2010 which call for an increased emphasis on preventive medicine and reflects the need for additional disease education for physician assistant students. The course will address topics such as immunizations, genetic counseling, complementary and alternative medicine, and health and wellness. Prereq: Enrollment in the Physician Assistant Program.

PAS 680 SEMINAR IN PHYSICIAN ASSISTANT STUDIES. (2)
A study of selected topics and contemporary issues regarding physician assistant practice. Emphasis will be placed on review of selected medical topics, research in primary care, principles of managed care, job search, and interview skills. Prereq: Enrollment in the Physician Assistant program and successful completion of the didactic portion of the PA curriculum.

PAS 689 PA CLERKSHIP. (3-6)
This variable credit, 1 to 2 month course is intended to allow MPAS students with a prior baccalaureate degree in PA studies to engage in clinical work relevant to their chosen area of concentration. Course objectives will be developed to include acquiring knowledge in clinical knowledge and library research. It is expected that students will use this course to develop and implement their final Master’s Project. Students will be responsible for developing appropriate audiovisuals, handouts, and other presentation materials. Prereq: Completion of PAS 645 admission to the Physician Assistant Program, or consent of instructor.

PAS 867 PRECEPTORSHIP I.
PAS 868 PRECEPTORSHIP II.
child, clinical management of the child with cleft lip/cleft palate, speech pathology, burns affecting the oral cavity, the use of antimicrobials, and medical compromising conditions affecting oral health care. Prereq: Enrollment in the College of Dentistry’s Master of Science degree program in the Pediatric Dentistry track, and completion of PDO 610.

**PDO 630 PEDIATRIC DENTISTRY SEMINAR III.** (2)
This seminar course is the third in a series of four such seminars that discuss essential aspects of clinical pediatric dentistry, with emphasis on the scientific evidence supporting contemporary practice. These four consecutive seminar courses over four semesters (two academic years) provide the pediatric dentistry graduate student with a conceptual basis for caring for the oral health of children. This third seminar in the series consists of sixteen two-hour sessions (32 hours) and addresses: deleterious oral habits, orthodontic correction of malocclusions, esthetic dentistry of the child, abnormal development of the dentition, and elements of managing a successful pediatric dental practice. Prereq: Enrollment in the College of Dentistry’s Master of Science degree program in the Pediatric Dentistry track, and completion of PDO 610 and 620.

**PDO 640 PEDIATRIC DENTISTRY SEMINAR IV.** (2)
This seminar course is the fourth and last of a series of four such seminars that discuss essential aspects of clinical pediatric dentistry, with emphasis on the scientific evidence supporting contemporary practice. These four consecutive seminar courses over four semesters (two academic years) provide the pediatric dentistry graduate student with a conceptual basis for caring for the oral health of children. This fourth seminar in the series consists of sixteen two-hour sessions (32 hours) and addresses: deleterious oral habits, orthodontic correction of malocclusions, esthetic dentistry of the child, abnormal development of the dentition, and elements of managing a successful pediatric dental practice. Prereq: Enrollment in the College of Dentistry’s Master of Science degree program in the Pediatric Dentistry track, and completion of PDO 610 and 620.

---

## Course Descriptions

**Approved electives:**

- PED 850 NEONATAL INTENSIVE CARE
- PED 852 PEDIATRIC RENAL-IMMUNOLOGY
- PED 853 INFECTIOUS DISEASE
- PED 854 GASTROENTEROLOGY
- PED 859 ACTING INTERNSHIP IN PEDIATRICS - UK
- PED 865 SLEEP MEDICINE
- PED 869 PEDIATRIC ALLERGY AND CLINICAL IMMUNOLOGY
- PED 870 PEDIATRIC CARDIOLOGY
- PED 871 GENETICS/ENDOCRINOLOGY/METABOLISM
- PED 872 ACTING INTERNSHIP IN MED-PEDS
- PED 876 DYSMORPHOLOGY/GENETICS
- PED 877 PEDIATRIC DEVELOPMENTAL DISABILITIES
- PED 878 PEDIATRIC INTENSIVE CARE
- PED 879 ADOLESCENT MEDICINE
- PED 885 PEDIATRIC PULMONOLOGY
- PED 890 COMMUNITY PEDIATRICS
- PED 899 LEGISLATIVE ADVOCACY

### Periodontics

**PER 626 ADVANCED CONCEPTS IN GENERAL DENTISTRY.** (1)
This course presents, by seminar, lecture or continuing education courses, advanced concepts in general dentistry that are essential to the clinical practice of periodontists. It includes advanced instruction in orthodontics, periodontal prosthesis, prosthodontics and oral surgery. May be repeated to a maximum of four credits. Prereq: Admission to a postdoctoral program of the College of Dentistry or consent of course director.

**PER 661 MODERN CONCEPTS IN PERIODONTICS.** (2)
A seminar course designed to present the present understanding of the etiology of periodontal disease and current techniques for treatment of periodontal problems. Prereq: Admission to graduate program of College of Dentistry; D.D.S. or D.M.D. degree.

**PER 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**PER 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated for a total of 12 hours. Prereq: Admission to the Periodontics postdoctoral program and consent of director of graduate studies.

**PER 770 TREATMENT PLANNING SEMINAR.** (2)
In this seminar course, graduate students present and discuss diagnosis, prognosis, ideal treatment plans and alternative treatment plans for patients with periodontal disease. Each student gives at least eight case presentations. May be repeated to a maximum of eight credits. Lecture, 40 hours. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

**PER 772 PERIODONTAL BIOLOGY AND PATHOLOGY.** (2)
Seminar discussions, review and evaluation of the literature covering periodontal anatomy, periodontal biology, the pathology of periodontal diseases and etiological factors in periodontal disease. The subject area will be covered in four semesters. May be repeated four times for a maximum of eight credits. Lecture, 40 hours. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

**PER 774 PERIODONTICS SURGICAL SEMINAR.** (1)
This course is designed for periodontists present, discuss and critique surgical procedures that have been accomplished in the clinic. Reading assignments from the literature augment the clinical discussions and students are encouraged to use the literature to justify their procedures. Cases are presented on a rotating basis. May be repeated to a maximum of four credits. Prereq: Admission to Periodontics postdoctoral program or consent of course director.

**PER 776 PERIODONTAL THERAPY SEMINAR.** (1)
This is an advanced series of seminars on the clinical aspects of periodontal therapy. During the course, the students will learn about various modalities of periodontal therapy as presented in the periodontal literature, e.g., mucogingival treatment, implants and curettage. May be repeated to a maximum of two credits. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

**PER 790 RESEARCH IN PERIODONTICS.** (1-3)
This course involves direct student participation in a research project. Projects and thesis are approved by the course director and may be clinical, laboratory experimental or related to dental education. Projects may include original or ongoing research within the Department of Periodontics or other departments of the Medical Center. May be repeated to a maximum of six credits. Prereq: Admission to the Periodontics postdoctoral program and consent of the department involved.

**PER 810 PERIODONTICS.** (1)
This course is an introduction to periodontology. Emphasis is on recognition of healthy gingival characteristics and early disease progression. The student is also introduced to etiology, epidemiology and immunology related to periodontal assessments, and plaque control measures. Lecture, two hours; laboratory, nine hours; CANVAS, 8 hours total. Prereq: CDS 815 or consent of instructor.
Course Descriptions

PER 820 PERIODONTICS II. (3)
This course presents the components of the first stages of periodontal therapy. Emphasis is on diagnosis, prognosis, treatment planning and non-surgical treatment of the periodontally involved patient. Lectures, 36 hours; laboratory, 24 hours. Prereq: PER 810 or consent of instructor.

PER 821 CLINICAL PERIODONTICS II. (2)
This is a course designed to provide the student with clinical experience so that he can obtain a minimal competence in the applications of periodontal procedures. Therapeutic procedures involving initial periodontal therapy will be performed by each student. Clinic, 50 hours. Prereq: PER 811, or consent of instructor.

PER 830 PERIODONTICS III. (2)
This is a surgically oriented course which presents information necessary for the diagnosis, treatment planning and treatment of surgical cases. The information gained is applied to planning treatment for actual surgical cases. Lecture, 27 hours; laboratory, 3 hours. Prereq: PER 820 or consent of course director.

PER 831 CLINICAL PERIODONTICS III. (2)
This is a clinical course which offers the student the opportunity to treat patients with more advanced periodontal disease. Therapeutic procedures will be performed by each student as his patients' needs dictate. Clinic, 50 hours. Prereq: PER 821; corequisite: PER 830; or consent of instructor.

PER 841 CLINICAL PERIODONTICS IV. (4)
This clinical course is a continuation of PER 831. The student receives further instruction and experience in diagnosing, planning treatment and treating patients with periodontitis and mucogingival problems. Prereq: PER 830 and PER 831, or consent of instructor.

PGY Physiology

PGY 206 ELEMENTARY PHYSIOLOGY. (3)
An introductory survey course in basic human physiology. Prereq: One semester of college biology.

PGY 207 CASE STUDIES IN PHYSIOLOGY. (1)
Group discussions of clinical cases and clinical applications relevant to human physiology. Prereq: PGY 206 or its equivalent. May be taken concurrently.

PGY 312 CELL PHYSIOLOGY AND PATHOPHYSIOLOGY. (3)
PGY 312, Cell Physiology and Pathophysiology, is a 3 credit-hour course that will provide students with an understanding of the structure and diverse functions of human cells. The general purpose of the lectures is not only to provide a fundamental overview of structure and function of human cell organelles in the context of cellular homeostasis, but also to discuss genetic and/or environmental factors that can impact the structure and function of one or multiple cell organelles. Discussion will include examples of human diseases such as cystic fibrosis, myopathy, and Diabetes Mellitus, wherever possible. Prereq: An introductory college-level Biology course (e.g., BIO 148).

PGY 401G HUMAN REPRODUCTION, TECHNOLOGY, AND SOCIETY. (3)
The objective of this course is to cultivate a student's curiosity in the field of human reproductive biology, modern technological advancements such as contraception, assisted reproduction and stem cell research, and the social, economic, and ethical challenges and issues they create. Class topics will include basic reproductive processes from gametogenesis, fertilization, pregnancy, and embryogenesis, issues that may hamper reproductive success, and technological advancements in reproductive medicine such as contraceptives, assisted reproductive technologies, prenatal genetic diagnosis, and stem cells. The social impacts of current and future reproductive medicine will also be discussed. Prereq: Elementary Physiology (e.g., PGY 206) or Biochemistry (BCH 401G) or consent by the instructor.

PGY 412G PRINCIPLES OF HUMAN PHYSIOLOGY LECTURES. (4)
The objective of this course is to provide the basic physiological mechanisms of human body function and physiological integration of the organ systems to maintain homeostasis. Students will be learning what the different organ systems do and how they do it. With this knowledge a student should be able to form a general understanding of how the body functions in health and disease. The general purpose of the lectures is to reinforce and expand upon the material presented in the text. In addition to focusing on concepts and problem solving skills. Lectures will be further developed with reading assignments and discussion. Prereq: One year biology or PGY 206.

PGY 413G CRITICAL THINKING IN PRINCIPLES OF HUMAN PHYSIOLOGY. (1)
This is a 1 credit course designed for current and former students in PGY 412G, Principles of Human Physiology. This is a companion course for PGY 412G, Principles of Human Physiology. The objective of this course is to guide students to reinforce and apply physiological concepts to real-life scenarios. Through interactive group discussion formats, students will enhance their critical thinking and problem solving skills using questions, problems and/or case studies corresponding to PGY 412G material. Prereq: Students must have completed or be concurrently enrolled in PGY 412G.

PGY 417 GENOMICS AND EPIGENETICS. (2)
This advanced course is designed for students who desire to become research scientists in any area that makes use of molecular biology, molecular physiology, or molecular systems biology. It teaches the study of cell and tissue function by global analysis of gene expression and gene regulation. By incorporating both lecture and computer lab exercises, it emphasizes both the technical aspects of measuring gene expression and gene regulation and the conceptual basis for these global analyses. It also teaches experimental design and other statistical concepts necessary to perform genomic and epigenetic experiments. Prereq: At least one course in Cell Biology or Molecular Biology.

PGY 502 PRINCIPLES OF SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (5)
Advanced survey of major mammalian physiological systems at the systems, cellular and molecular level; lectures, assigned reading, advanced texts or monographs, demonstrations and problem-oriented study questions. Prereq: One year each, physics, general chemistry; PGY 206 or its equivalent. (Same as BIO 502.)

PGY 504 INDEPENDENT WORK IN PHYSIOLOGY. (2-4)
A study of some advanced problems in physiology under the direct supervision of the instructor. Discussion period, one hour; laboratory, four hours. May be repeated to a maximum of eight credits. Prereq: Consent of instructor.

PGY 512 EVOLUTIONARY MEDICINE. (3)
This online course surveys the consequences of evolution on human function and disease. Lecture materials, online discussions, and reading and writing assignments will expand on examples of the repercussions of evolutionary processes on health. Prereq: BIO 150-153 or equivalent introductory biology sequence, BIO 315 or equivalent, and an introductory physiology course (PGY 206, BIO 350, or PGY 412G).

PGY 533 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR. (3)
The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as BIO 533.)

PGY 560 PATHOPHYSIOLOGY: INTEGRATIVE STUDY IN PHYSIOLOGY AND MEDICINE. (1)
This course aims at the development of an integrative conception of the human organism, and involves the study of medical case histories. The complex network of physiological interactions which underlie disease states is investigated. The physiological bases of health, illness, dying, and death are explored. May be repeated to a maximum of three credits. Prereq: PGY 412G, PGY 502 or consent of instructor.

PGY 590 CELLULAR AND MOLECULAR PHYSIOLOGY. (3)
PGY 601 MAMMALIAN ENDOCRINOLOGY. (3)
An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 401G and BIO 350 or equivalents. (Same as ASC 601.)

PGY 602 READING IN SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (3)
A critical evaluation at the advanced level of the literature of the major mammalian physiological systems at the cellular and molecular level. The course is intended to be taken with and to complement PGY 502. It includes a critical reading of the primary literature. Prereq: One year each of physics, general chemistry; PGY 206 or equivalent.

PGY 603 DESIGN AND ANALYSIS. (3)
This is a course for students in the biomedical sciences interested in understanding the principles and aspects of experimental design and data analysis. The course focuses on why specific experimental design and analysis strategies are applied. Prereq: Consent of instructor. An introductory statistics course is recommended, e.g., STA 570 or STA 580.

PGY 604 ADVANCED CARDIOVASCULAR PHYSIOLOGY. (3)
The objective of this course is to examine in-depth the various functions of the cardiovascular system and their proposed mechanisms. Prereq: PGY 502 or consent of instructor.

PGY 605 NEUROBIOLOGY OF CNS INJURY AND REPAIR. (3)
The objective of the course will be to provide a general overview of the current state of knowledge concerning the pathophysiology and therapeutic approaches to central nervous system injury. The course will provide a strong working background concerning the issues, technical aspects of measuring gene expression and gene regulation. By incorporating both lecture and computer lab exercises, it emphasizes both the technical aspects of measuring gene expression and gene regulation, and death are explored. May be repeated to a maximum of three credits. Prereq: PGY 412G, PGY 502 or consent of instructor.

PGY 608 ADVANCED RENAL PHYSIOLOGY. (3)
This course will examine in-depth the physiology and pathophysiology of the renal system, as well as provide an understanding of advanced renal physiological techniques. Prereq: PGY 412G, PGY 502 or consent of instructor.

University of Kentucky
2016-2017 Undergraduate Bulletin

577

KEY: # = new course  * = course changed  † = course dropped  ‡ = course purged
Course Descriptions

PGY 609 ADVANCED RESPIRATORY PHYSIOLOGY. (3)
This course will examine in-depth the physiology and pathophysiology of the respiratory system. Prereq: PGY 412G, PGY 502 or consent of instructor.

PGY 611 ADVANCED MEDICAL PHYSIOLOGY. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/BIO/GRN 612.)

PGY 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MED SCIENCE TEACHING). (2)
A two (2) credit seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as GRN 615.)

PGY 616 PRACTICUM IN TEACHING MEDICAL SCIENCE (MED SCIENCE TEACHING). (2)
A two (2) credit experimental course in which students will directly participate in the teaching of Physiological sciences under supervised conditions. May be repeated to a maximum of six credits. Prereq: PGY 615 may be taken concurrently.

PGY 617 PHYSIOLOGICAL GENOMICS. (2)
The study of function by global analysis of gene expression. Teaches the concepts, techniques, and functional significance of analyzing gene expression patterns. The technical emphasis is on the design and analysis of DNA microarray experiments. Examples of normal function or disease states in which gene expression profiling has had a significant impact are also taught. Prereq: IBS 604 and IBS 602 or equivalents. (Same as PHA 617.)

PGY 618 MOLECULAR NEUROBIOLOGY. (3)
Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as BIO 650.)

PGY 625 MUSCLE FORUM. (1)
Muscle Forum is a course that will allow students to develop critical evaluatory skills for seminars and grant writing in the field of Muscle Biology. Prereq: Students need to be enrolled in the Rehabilitation Sciences doctoral program, one of the graduate programs of the Integrative Biomedical Sciences, or with permission of the course director. (Same as RHB 625.)

PGY 627 PROSEMINAR IN PHYSIOLOGICALPSYCHOLOGY. (3)
An in-depth examination of theories, methods of investigation, and current developments in the field of physiological psychology. Prereq: Graduate standing or consent of instructor. (Same as PSY 627.)

PGY 630 ADVANCED TOPICS IN PHYSIOLOGY. (1-3)
Contemporary topics in physiology. Course designed to utilize the special research interests of resident and visiting faculty. May be repeated to a maximum of six credits. Prereq: PGY 502 or consent of instructor.

PGY 638 DEVELOPMENTAL NEUROBIOLOGY. (3)
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cellular biological and molecular approaches to cell differentiation, neuronal pathfinding and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 553 or consent of instructor. (Same as ANA/BIO/PSY 638.)

PGY 650 ANIMAL PHYSIOLOGY LABORATORY. (2)
Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as BIO 650.)

PGY 660 BIOLOGY OF REPRODUCTION. (3)
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as ANA 660 and ASC 660.)

PGY 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences in encouraged. (Same as ANA/GRN/PHA 710.)

PGY 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PGY 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PGY 766 TOPICAL SEMINAR BEHAVIORAL NEUROSCIENCE. (3)
A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the psychology and Physiology graduate programs. (Same as PSY 766.)

PGY 767 TOPICAL SEMINAR IN BEHAVIORAL NEUROSCIENCE. (3)
A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the psychology and physiology graduate programs. (Same as PSY 767.)

PGY 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PGY 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PGY 771 PROSEMINAR IN CELL PHYSIOLOGY. (2)
A comprehensive discussion of topics in cellular physiology and biophysics using advanced texts and readings in the original literature. Includes such topics as biological membranes, transport mechanisms, effects of hormones on membranes. Prereq: Graduate student in physiology and biophysics or consent of Director of Graduate Study.

PGY 774 GRADUATE SEMINAR IN PHYSIOLOGY. (1)
A discussion-based course for physiology graduate students and other advanced students interested in physiology. The students learn how to understand and critique research papers and how to review a research manuscript. The full potential of the course is realized in conjunction with the Physiology Seminar Series, because the material of the course prepares the students for these Seminars. Students are encouraged to participate until they are heavily involved in their research project.

PGY 781 RESEARCH IN PHYSIOLOGY. (1-15)
May be repeated to a maximum of 15 credits. Prereq: Consent of instructor.

PGY 813 NEUROPHYSIOLOGY. (1)
The brain uses electrical signals to process all information it receives and analyzes. Individual neurons encode complex information into simple electrical signals; the meaning behind these signals is derived from the specific interconnections of neurons. The purpose of neurophysiology is to describe how the neuron produces electrical and chemical signals and illustrate how these signals are involved in the functional organization of neural circuits. This course also describes how the central nervous system analyzes and integrates the various inputs, elicits command decisions that determine the motor and/or endocrine responses. Lecture: three hours per week for five weeks. Prereq: Admission to the College of Dentistry, or consent of the Course Director. (Same as OBI 813.)

PGY 814 PRINCIPLES OF HUMAN PHYSIOLOGY FOR DENTAL STUDENTS. (4)
This course enables student dentists to understand the basic principles of human physiology, especially as it relates to the practice of dentistry. The introduction of the course presents the basic physiology of cells, conducting and contracting tissues, lining and secretory tissues, and other special tissues. The course focuses on the major physiological systems and presents them at the system, cellular, and molecular levels; and emphasizes those aspects particularly relevant to dentistry - dentin sensitivity, dental and pulpal pain, muscle dysfunction, ischemic and, hypertensive heart disease, oral manifestations of endocrine abnormalities, temperature regulation, calcium-phosphate homeostasis, and the dental mineralized tissues. Upon successful completion of the course, student dentists will be able to rationally and scientifically apply basic cell, tissue, organ, and organ system function to clinical decision-making. Lectures with assigned reading: 68 hours. Prereq: OBI 818 or consent of the course director. (Same as OBI 814.)

PGY 815 FIRST-YEAR ELECTIVE, PHYSIOLOGY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Physiology and Biophysics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

PGY 818 HUMAN FUNCTION. (8)
This course provides in-depth instruction on the physiological mechanisms of body function from the single cell to the organism level. The course is taught by medical scientists and clinicians. Teaching methodologies include didactic and Socratic lectures, small group discussion, demonstrations and live model and computer simulated laboratories. Lecture, 20 hours per week. Prereq: Admission to medical school (first year). (Same as OBI 814.)

PGY 825 SECOND-YEAR ELECTIVE, PHYSIOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Physiology and Biophysics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.
Course Descriptions

PGY 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved elective
PGY 850 RESEARCH IN PHYSIOLOGY

PHA Pharmacology

PHA 200 PHARMACOLOGY: DRUGS AND HUMAN HEALTH. (3)
This course will give the student a background to understand how drugs impact human health and guide their appropriate use. Lectures will focus on how drugs function, how they impact our lives, and how new targets for drugs are discovered. This course will provide a history of drug development, design, and drug discovery, and examine the uses and actions of commonly prescribed and over-the-counter drugs. This course will also cover drugs of abuse and those used in treatment for performance enhancement. Students will learn how and why these agents should be used, conditions under which their use is prudent, and how to obtain accurate information regarding use, benefits and risks of new drugs. This class will give students valuable scientific insights into drug actions and provide a basis for lifelong learning to better protect and inform health care choices. Prereq: One semester of College Biology.

PHA 422G PHARMACOLOGY OF TREATING HUMAN DISEASE. (3)
This course will provide students with a fundamental understanding of the actions of drugs most commonly used in the treatment of the major human diseases, drugs of abuse, and those used in sports to enhance performance. This course is geared toward the pre-professional and others interested in a career in health care and research. Prereq: BIO 350 and BIO 315.

PHA 612 QUANTITATIVE PHARMACODYNAMICS: PHARMACOKINETICS. (3)
Quantitative treatment of dynamics of drug absorption, distribution, metabolism and excretion, including development of both mathematical models and model-independent approaches for describing these processes. Prereq: MA 114 and consent of instructor. (Same as PHS 612.)

PHA 616 BIOLOGY AND THERAPY OF CANCER. (3)
Biology of cancer will be discussed at the molecular, cellular and organismic level. Emphasis will be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects tumor cell therapies. Interactions with the host immune system. The biology of hematopoietic cells will also be included. Clinicians active in treatment and research of various types of cancer will be invited to participate in the lectures. Prereq: BCH 501, 502, BIO 685. (Same as MED/MI 616.)

PHA 617 PHYSIOLOGICAL GENOMICS. (2)
The study of function by global analysis of gene expression. Teaches the concepts, techniques, and functional significance of analyzing gene expression patterns. The technical emphasis is on the design and analysis of DNA microarray experiments. Examples of normal function or disease states in which gene expression profiling has had a significant impact are also taught. Prereq: IBS 604 and IBS 602 or equivalents. (Same as PGY 617.)

PHA 621 PRINCIPLES OF DRUG ACTION. (3)
The objective of this course is to familiarize graduate students with the principles and mechanisms of drug action in biochemical and physiological systems. Students will discuss the quantitative approaches to assessing drug responses, metabolism and toxicity. Prereq: Consent of instructor.

PHA 622 MOLECULAR DRUG TARGETS AND THERAPEUTICS. (1-4)
PHA 622 is an advanced course designed to provide graduate students with state of the art information regarding drugs, drug action and targets for drug action. Emphasis will be placed on drugs that interact with the cardiovascular system (section 001), the central nervous system (section 002), chemotherapeutic agents (section 003), and other important drug classes such as nonsteroidal anti-inflammatory agents, steroid hormones, antiabetic agents and toxicology (section 004). Each section is designed to be a separate one hour course. Students may take any combination of sections from one to all four sections. For each agent, emphasis will be placed on the cellular mechanisms of action, the receptors or cellular targets at which they act, therapeutic issues and potential toxicities. This information is intended to be integrated with other disciplines, including anatomy, biochemistry, physiology, psychology and molecular biology. Prereq: IBS 601-609 and PHA 621.

PHA 623 PROFESSIONAL DEVELOPMENT FOR SCIENTISTS IN TRAINING. (3)
The purpose of this course is to introduce graduate students to useful topics in their quest to attain and retain a tenure track position (or equivalent) at some point in their scientific future. These subjects are not always taught by mentors or through a traditional curriculum, but they are of utmost importance in a successful career. A breadth of issues will be presented that many principal investigators would say they wished they learned in graduate school and should give students the resources to become competitive scientific professionals. (Same as NS 623.)

PHA 630 SPECIAL TOPICS IN PHARMACOLOGY. (1-3)
Detailed examination of current, significant topics in pharmacology such as: contemporary neuroscience methodology, molecular and cellular pharmacodynamics, transmembrane signal-
**Course Descriptions**

**PHI 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

**PHI 317 EXISTENTIALIST THOUGHT AND LITERATURE.** (3)
A survey of existentialism as a literary movement as well as a philosophical one, with emphasis upon their intersection and interaction. The course will trace the emergence of existentialist themes in modern thought and culture, and will analyze and assess the movements' continuing significance.

**PHI 320 SYMBOLIC LOGIC I.** (3)
A systematic study of sentential logic, elementary quantification, and the logic of identity. The student will acquire specific skills in symbolic methods of analysis which are necessary for further study in logic as well as useful for addressing complex issues in philosophy and other areas.

**PHI 330 ETHICS.** (3)
An examination of fundamental issues in ethics, such as duty, character, virtue and vice, evil, moral responsibility, free will, the good life, the emotions, skepticism, and rationality.

**PHI 332 PROFESSIONAL ETHICS.** (3)
A study of ethical issues related to professional roles, especially those of physicians and lawyers. Among the topics to be considered are the nature and justification of professional responsibilities and duties; obligations of professions to society; the professional-client relationship and its rights and obligations; enforcement of codes of ethics.

**PHI 334 BUSINESS ETHICS.** (3)
An introduction to moral problems that arise in contemporary business practice and the ethical frameworks proposed to resolve them. Topics will include areas such as truth-telling and integrity; social responsibility; property rights and their limitations; and justice in personnel and labor practices.

**PHI 335 THE INDIVIDUAL AND SOCIETY.** (3)
An examination of several incompatible views concerning the relation between the individual and society, including radical individualism and collectivism, as well as more moderate theories. Attention will be given to contemporary as well as classical spokesmen for these views and emphasis will be placed upon relating these theories to contemporary social, cultural, and political issues.

**PHI 336 ENVIRONMENTAL ETHICS.** (3)
An introduction to moral problems that arise in human interaction with the natural environment. Topics to be addressed include questions such as: what is man's place in nature? Do nonhuman animals or ecosystems have intrinsic moral worth, and if so, how can it be respected? What problems and ambiguities arise in attempting to live in an environmentally responsible fashion? How can we adjudicate conflicts between social and environmental values?

**PHI 337 INTRODUCTION TO LEGAL PHILOSOPHY.** (3)
A general introduction to basic concepts, institutions, and mechanisms of law. Understanding of the legal system and its methods is promoted through discussion of topics which include: basic legal reasoning, the function of the legal process, fundamental legal concepts and categories (such as property, crime, and contract).

**PHI 340 INTRODUCTION TO MINIMISM AND PHILOSOPHY.** (3)
Introduction to basic feminist thought from a philosophical perspective explored through topics such as gender roles, images of women in society, violence against women, and male socialization. Emphasis on causes of and solutions to the oppression of women. This course fulfills the UK Core Requirement: Community, Culture, and Citizenship in the USA.

**PHI 343 ASIAN PHILOSOPHY.** (3)
An introduction to the main concepts, assumptions, problems and texts of one or more Asian philosophical traditions, such as Hinduism, Buddhism, Taoism, and Confucianism.

**PHI 350 METAPHYSICS AND EPistemology.** (3)
An examination of fundamental issues in metaphysics and epistemology, such as causation, the nature of space and time, personal identity, free will, the existence of God, the nature and types of knowledge, the character of human existence, skepticism, and rationality. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**PHI 361 BIOLOGY AND SOCIETY.** (3)
A study of the implications of biology for understanding and changing society. Emphasis is on sociobiology and the value of viewing social behavior as a product of adaptive evolution by natural selection. Representative philosophical issues include biological constraints on human nature and society, genetic engineering, reductionism, the scientific method, and bioethics. Prereq: A college course in biology or consent of instructor.

**PHI 380 DEATH, DYING AND THE QUALITY OF LIFE.** (3)
A philosophical and interdisciplinary investigation of a cluster of prominent issues about the meaning of life and death, caring for dying persons, and the quality of life of the terminally ill. Among topics included are: death definitions and criteria; allowing to die vs. killing; euthanasia and suicide; life prolongation, ethics of care of the terminally ill; and rights of the dying.

**PHI 393 PHILOSOPHY OF FILM.** (3)
An examination of the aesthetics of film from the early 20th Century to the present, with a focus on how the experience of film as a medium changes our relation to the world of objects as well as our relation to other people, and how changes in the medium of film itself have altered aesthetic theories.

---

**PHI Philosophy**

**Note:** Prior to the priority registration period each semester, the Department of Philosophy publishes information on courses (200 level and above) to be offered for the next semester. This information includes details on course topics and materials to be used in each course. Students are encouraged to obtain the information to assist them in course selection.

**PHI 100 INTRODUCTION TO PHILOSOPHY: KNOWLEDGE AND REALITY.** (3)
An introduction to philosophical studies with emphasis on issues of knowing, reality, and meaning related to human existence.

**PHI 210 INTRODUCTORY LOGIC.** (3)
A course which treats argumentation, syllogistic, and sentential logic. The focus will be on the use of formal methods in the construction and criticism of actual arguments, the aim being to inculcate standards of good reasoning, e.g., clarity, consistency and validity. Credit is not given to students who already have credit for PHI 320.

**PHI 130 INTRODUCTION TO PHILOSOPHY: MORALITY AND SOCIETY.** (3)
An introduction to philosophical studies with emphasis on a critical study of principles of moral action and social and political values.

**PHI 205 FOOD ETHICS.** (3)
An examination of philosophical issues about food, including whether taste is subjective or objective, why different foods are acceptable to eat in some cultures but not in others, the moral permissibility of eating animals and animal products, and the impact of food production on the environment.

**PHI 245 INTRODUCTION TO PHILOSOPHY OF RELIGION.** (3)
An introduction to the philosophical study of religion, with attention to issues such as the nature of religious language, religious experience, concepts of God, science and religion, religious pluralism, miracles and revelation, death and the afterlife, and the problem of evil.

**PHI 251 PHILOSOPHY AND CLASSICAL PHYSICS.** (3)
Western philosophy from ancient through late medieval times including systematic work in logic, metaphysics, epistemology and ethics by such philosophers as Plato, Aristotle, Augustine and Aquinas.

**PHI 270 HISTORY OF PHILOSOPHY II: FROM THE RENAISSANCE TO THE PRESENT ERA.** (3)
An introductory study of the development of Western philosophy from early modern to recent times including systematic work in logic, metaphysics, epistemology and ethics by such philosophers as Occam, Descartes, Hume and Kant.

**PHI 300 SPECIAL TOPICS IN PHILOSOPHY (Subtitle required).** (1-3)
Topics that cross traditional systematic or historical lines in philosophy or that relate philosophy to topics or periods in other disciplines. May be repeated under a different subtitle to a maximum of seven credits. Prereq: Determined by instructor.

**PHI 305 HEALTH CARE ETHICS.** (3)
A consideration of the ethical issues and difficult choices generated or made acute by advances in biology, technology, and medicine. Typical issues include: informed consent, healer-patient relationships, truth telling, confidentiality, problem of birth defects, abortion, placebos and health, allocation of scarce medical resources, genetic research and experimentation, cost containment in health care, accountability of health care professionals, care of the dying, and death.

**PHI 310 PHILOSOPHY OF HUMAN NATURE.** (3)
An introductory philosophy course for upper division students that analyzes various ways that philosophers have attempted to define the human individual. It pursues diverse methods of inquiry into questions such as these: Do humans beings have a fixed and definable human nature? What differentiates the properly human from the nonhuman? Are human actions free or determined? How are human beings essentially related to history, culture, society and the natural environment?

**PHI 315 PHILOSOPHY AND SCIENCE FICTION.** (3)
An examination of fundamental questions in metaphysics and epistemology through a comparison of works of philosophy and science fiction. Questions will be discussed such as: Can there be time travel? Can computers think? Can there be non-human persons, and if so, how would we identify them? Can there be ways of knowing that are radically different from our own, and what might they be like? How much can a person change while remaining the same person?

---

**University of Kentucky**

2016-2017 Undergraduate Bulletin

580
**PHI 395 INDEPENDENT WORK.** (3)
Open only to students who have distinguished themselves in philosophy or in allied subjects. May be repeated to a maximum of 12 credits. Prereq: Major and standing of 3.0 in department.

**PHI 399 EXPERIENTIAL LEARNING.** (1-6)
To provide the opportunity for students to earn credit for work-study experience. The student must work with a faculty member to describe the nature of the experience, the work to be performed, the accompanying philosophical reflection and study, appropriate course credit for the work, and criteria by which the work may be evaluated. This information must be written and filed in the Philosophy Department and the Office for Experiential Education prior to the student's registration for the course. May be repeated to a maximum of 12 credits. Pass-fail only. Prereq: Consent of instructor and department chairperson; completion of a departmental learning agreement.

**PHI 500 TOPICS IN PHILOSOPHY (Subtitle required).** (1-3)
Topics that cross traditional systematic or historical lines in philosophy or that relate philosophy to topics or periods in other disciplines. May be repeated to a maximum of seven credits.

**PHI 520 SYMBOLIC LOGIC II.** (3)
An intermediate course in symbolic logic which reviews sentential logic, develops further the logic of quantification, and introduces metatextual issues such as the construction, consistency, and completeness of deductive systems. Prereq: PHI 320 or consent of instructor.

**GROUP A**

**PHI 503 TOPICS IN ANCIENT PHILOSOPHY.** (3)
A study of representative texts and issues in Ancient Philosophy with special attention to historical continuity and the interrelations of thinkers and problems. Possible Topics: Pre-Socratic Philosophers, Plato, Aristotle, Stoicism, Epicureanism, Scepticism. May be repeated to a maximum of six credits. Prereq: PHI 260 or consent of the instructor.

**PHI 504 ISLAMIC AND JEWISH PHILOSOPHY AND THE CLASSICAL TRADITION.** (3)
A study of representative texts and issues in Islamic and Jewish philosophy with special attention to the historical continuity with the Greek philosophical tradition and the interrelations of thinkers and problems. Possible topics: the commensurability of philosophy and (revealed) law, the creation or eternity of the world, the nature of prophecy, the human good, the nature of God and divine language. Prereq: PHI 260 or consent of instructor.

**PHI 506 TOPICS IN MEDIEVAL PHILOSOPHY.** (3)
An investigation of issues in Medieval Philosophy. Topics will be chosen which illustrate continuity both with Ancient Greek Sources and with problems in Modern Philosophy. Possible Topics: Neoplatonism, Faith and Reason, Freedom and Determinism, Universals, the Existence of God, Renaissance reactions. May be repeated to a maximum of six credits. Prereq: PHI 260 or the consent of the instructor.

**PHI 509 TOPICS IN THE HISTORY OF MODERN PHILOSOPHY.** (3)
A selective study of representative issues and texts in modern philosophy, with special emphasis upon historical continuity and interrelation of thinkers and problems. Possible topics: British empiricism; Leibniz and Locke; Descartes and his critics; Hobbes and Rousseau; Hume and Kant; philosophy and the rise of modern science. May be repeated to a maximum of six credits. Prereq: PHI 270 or the consent of the instructor.

**PHI 513 NINETEENTH CENTURY PHILOSOPHY.** (3)
An examination of the major topics and trends in 19th century philosophy. Prereq: PHI 270 or consent of instructor.

**PHI 514 AMERICAN PHILOSOPHY.** (3)
A study of the development of philosophy in America from colonial to recent times with attention to religious, political, literary and social influences on American thought. The focus will be on the pragmatic spirit that was the moving force from 19th century idealism to 20th century naturalism, with emphasis on the works of such thinkers as Royce, Peirce, James and Dewey.

**PHI 515 CONTEMPORARY PHILOSOPHY: THE ANALYTIC TURN.** (3)
A survey of several 20th century philosophical movements, such as logical positivism and ordinary language philosophy, whose members agree that careful attention to language is one of the keys to the resolution of philosophical problems. The works of representative thinkers such as Moore, Russell, the Vienna Circle, Wittgenstein and Austin will be studied. Prereq: PHI 320 or 350 or the consent of the instructor.

**PHI 516 CONTEMPORARY PHILOSOPHY: PHENOMENOLOGICAL DIRECTIONS.** (3)
A study of 20th century philosophies represented by the works of thinkers such as Husserl and Heidegger, Gadamer and Ricoeur, Habermas and Apel. Generally based in a reflection on human experience, these philosophies undertake a radical criticism of common conceptions of human nature while vigorously emphasizing rationality, ontology, language, and social and historical context. Prereq: PHI 270 or consent of instructor.

**PHI 517 EXISTENTIALISM.** (3)
A systematic study of the fundamental concepts and problems of existentialism. Readings selected from such philosophers as Kierkegaard, Nietzsche, Sartre, Marcel, Heidegger, and Jaspers. Prereq: PHI 270 or the consent of the instructor.

**GROUP B**

**PHI 519 CRITICAL SOCIAL THOUGHT.** (3)
This course provides a pluralistic introduction to major 20th-century paradigms of critical social thought. Critical social thought in philosophy comprises those authors and schools that use conceptual and methodological tools and focus on the analysis of social conditions and/or on sociocultural methods and questions on the study of philosophy. These include feminist philosophy, Marxist-influenced social theory, poststructuralism, critical race theory, and post-analytic philosophy. Prereq: For undergraduates, PHI 270, 335, or 340 or consent of instructor. For graduate students outside the philosophy department, permission of the instructor.

**PHI 530 ETHICAL THEORY.** (3)
A study of ethical theories by detailed examination of a few selected works. Topics considered may include naturalism, intuitionism, noncognitivism, utilitarianism, universalizability, and natural law. Prereq: PHI 130, 330, or 335 or the consent of the instructor.

**PHI 531 ADVANCED TOPICS IN ETHICS (Subtitle required).** (3)
A topical study in ethics, emphasizing, but not restricted to, contemporary issues. Topics may include the nature of practical reason, justification of moral theories, moral luck, amorality and immorality, moral language, and weakness of will. May be repeated to a maximum of six credits under different subtitles. Prereq: One of the following: PHI 130, 305, 330, or 550; or graduate standing.

**PHI 535 SOCIAL AND POLITICAL PHILOSOPHY.** (3)
A critical examination of some philosophical problems concerning the nature and evaluation of social and political organizations. For example, questions concerning the nature, justification, and limits of political power may be explored in connection with a study of important classical positions. Prereq: PHI 130, 330, or 335 or the consent of the instructor.

**PHI 537 PHILOSOPHY OF LAW.** (3)
Concept of law; relations between law and morals; nature of legal reasoning; analysis of legal concepts; justification of punishment. Pass/fail basis only for law students. Prereq: PHI 130, 330, or 335 or the consent of the instructor.

**PHI 540 FEMINIST PHILOSOPHY.** (3)
An introduction to feminist philosophical theory, including feminist treatments of various questions in metaphysics, epistemology, logic, and value theory, such as: the nature (if any) of the self; the role of perspectives in knowledge; the nature of reason and the criteria for justification in argumentation; feminist theories of morality and feminist theories of social justice.

**PHI 545 PHILOSOPHY OF RELIGION.** (3)
An analysis of the philosophical issues raised by religion, such as the problem of religious knowledge, the nature of religious language, science and religion, concepts of God, death, and evil. Prereq: PHI 100, 260, or 270 or the consent of the instructor.

**PHI 592 AESTHETICS.** (3)
Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. Lectures, discussions, reports. (Same as A-H 592.)

**GROUP C**

**PHI 559 PHILOSOPHICAL PROBLEMS IN KNOWLEDGE AND REALITY.** (3)
Critical examination of issues regarding the foundations of knowledge, the nature of reality and the relation between the two. Evidence, belief, certainty, perception and justification will be among problems considered. Understandings of truth, existence, causality, freedom, time, space and matter will also be attended to. Prereq: PHI 100, 260, 270, or 350 or the consent of the instructor.

**PHI 560 PHILOSOPHY OF SCIENTIFIC METHOD.** (3)
An examination of the logical and epistemological foundations of empirical science, including fundamentals of concept formation, criteria of cognitive significance, issues of explanation, interpretation, and prediction, and testing and confirmation of theories and laws. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

**PHI 561 PHILOSOPHICAL PROBLEMS IN THE NATURAL SCIENCES (Subtitle required).** (3)
A systematic examination of selected conceptual and/or metaphysical problems in the natural sciences. Possible topics include: reductionism, teleology, causality and determinism, the structure of space-time, and the “anthropic principle” in cosmology. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

**PHI 562 PHILOSOPHICAL PROBLEMS IN THE SOCIAL AND BEHAVIORAL SCIENCES.** (3)
An examination of various methodological issues and broader philosophical questions of special concern in the social sciences. Among the topics to be studied: the structure of theories and the roles of mathematics and experimentation in the social sciences, the possibility of an objective or value free social science, and the conceptions of human nature presupposed by different schools of social science. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

**PHI 565 PHILOSOPHY OF LANGUAGE.** (3)
An investigation of problems current in the philosophy of language such as meaning and reference, the nature of analysis, linguistic relativity and the relation of linguistics to philosophy. Prereq: PHI 320 or 350 or the consent of the instructor.
**Course Descriptions**

**PHI 570 PHILOSOPHY OF HISTORY.**
- An examination of the theories and methods utilized by historians with special attention to the problems of laws and explanations in history, the nature of historical knowledge and narrative, and the roles of causal judgments and historical understanding. Attention will also be given to theoretical interpretations of history as offered by Marx, Hegel, Toynbee and others. Prereq: PHI 100, 260, or 270 or the consent of the instructor.

**PHI 575 PHILOSOPHY OF MIND.**
- An examination of problems current in the philosophy of mind, such as the concept of person, the relation of mind and body, the relation of minds and machines, knowledge of other minds, and the roles of dispositions and volitions in human action. Attention will be given to the philosophical analysis of each psychological category as consciousness, feeling, emotion, perception, imagination, thinking and will. Prereq: PHI 100 or 350 or the consent of the instructor.

**Graduate Seminars**

**PHI 630 SEMINAR IN VALUE THEORY.**
- A specialized graduate course in value theory that treats the history of value theoretical issues and doctrines, or emphasizes contemporary methodological discussions, or examines the concrete societal implications of major theories, or combines these approaches. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

**PHI 650 SEMINAR IN METAPHYSICS AND EPISODESTOMY (Subtitle required).**
- A specialized advanced study of topics in traditional areas of metaphysics and epistemology or contemporary topics, some of which may cut across or even challenge the framework of those traditional domains. Topics may include such issues as the nature of human action, problems of reference and modality, conceptions of time and space, and the sociology of knowledge. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**PHI 680 SPECIAL TOPICS IN PHILOSOPHY.**
- Studies in philosophical problems which either cut across or lie outside the standard areas of philosophical inquiry. May be repeated to a maximum of six credits.

**PHI 700 SEMINAR IN ANCIENT PHILOSOPHY.**
- Intensive study of original works of such major classical philosophers as Plato and Aristotle. May be repeated to a maximum of six credits. Prereq: PHI 260 or equivalent.

**PHI 705 SEMINAR IN MEDIEVAL PHILOSOPHY.**
- An intensive study of the issues treated by one or more medieval philosophers, e.g., Augustine, Aquinas, Scotus or Ockham. May be repeated to a maximum of six credits. Prereq: PHI 506.

**PHI 710 SEMINAR IN MODERN PHILOSOPHY.**
- Intensive study in the major works of such prominent philosophers of modern times as Descartes, Locke, Hume, Kant, and Hegel. May be repeated to a maximum of six credits. Prereq: PHI 270 or equivalent.

**PHI 715 SEMINAR IN RECENT PHILOSOPHY.**
- Intensive study of major philosophers of the 20th Century such as Russell, Wittgenstein, J.L. Austin, and Merleau-Ponty. May be repeated to a maximum of six credits. Prereq: PHI 515 or equivalent.

**PHI 740 PROSEMINAR ON TEACHING METHODS.**
- An introduction to teaching methods for graduate students.

**PHI 749 DISSERTATION RESEARCH.**
- Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

**PHI 755 TUTORIAL IN INTERDISCIPLINARY ISSUES.**
- As a tutorial, this course is structured individually to a student’s research and study projects. Topics and issues are to be chosen and pursued in work that integrates philosophical methods and ideas within other disciplinary areas. May be repeated to a maximum of nine credits. Prereq: Approval of the Student’s Advisory Committee.

**PHI 767 DISSERTATION RESIDENCY CREDIT.**
- Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**PHI 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**
- May be repeated to a maximum of 12 hours.

**PHI 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.**
- May be repeated indefinitely.

**PHI 790 RESEARCH IN PHILOSOPHY.**
- This course is primarily intended for advanced students who desire and are prepared to do research in philosophy. May be repeated to a maximum of 12 credits.
#PHR 922 FOUNDATIONS IN PHARMACEUTICAL SCIENCE II: PHARMACEUTICS AND BIOPHARMACEUTICS. (3)

The goal of this course is to introduce students to the principles that underlie drug delivery. The course is divided into three components: 1) basics of drug preformulation, including solubility and stability; 2) dosage form design and properties; and 3) formulation and manufacturing of dosage forms.

#PHR 923 WELLNESS AND HEALTH PROMOTION. (3)

This course will focus on the importance of wellness and health promotion in the delivery of patient care. Students will learn the principles of wellness and health promotion and how to incorporate them into their practice.

#PHR 926 INTEGRATED DRUGS AND DISEASE 1: INFECTIOUS DISEASES. (6)

This course will explore the pharmacology, medicinal chemistry, pathophysiology, and therapeutics associated with commonly encountered infectious diseases so that students can design and manage drug-related care plans for patients with these disease states. Prereq: Successful completion of the PY1 year.

#PHR 927 INTEGRATED DRUGS AND DISEASE 1: GI AND NUTRITION. (2)

This course will focus on the pharmacology, medicinal chemistry, pathophysiology, and therapeutics associated with gastrointestinal and nutritional disorders so that students can design and manage drug-related care plans for patients with these disease states. Prereq: Successful completion of fall semester PY1 courses in the PharmD program.

#PHR 928 INTRODUCTORY PHARMACY PRACTICE EXPERIENCE I (AMBULATORY CARE). (2)

This course is designed to provide students with a structured, supervised program of participation in the practice of pharmacy and the clinical use of drugs in an ambulatory care setting. The primary goal is to provide early exposure to the pharmacy practice setting and to introduce students to the principles of patient-centered care and to the students' experience. This 3 credit course provides an introduction to leadership in pharmacy practice. It includes an introduction to leadership development, leadership fundamentals, leadership skills in various settings and discussions with professional leaders as well as assignments requiring interaction with pharmacy leaders. Prereq: Successful entry into the spring semester of the second professional year (PY2).

#PHR 930 PATIENT-CENTERED CARE EXPERIENCE 3. (3)

This is the third course in the six-semester Patient-Centered Care Experience (PaCE) course sequence that is part of the pre-APPE curriculum. The PaCE course structure integrates PY1, PY2, and PY3 students into concurrent weekly laboratory sessions and intermittent complementary experiential fieldwork experiences. The course is designed to assist in developing the knowledge, skills, and attitudes necessary to provide patient-centered care and manage the medication use system. Prereq: PaCE 2 (PHR 920). Coreq: PHR 936, PHR 937, PHR 938. The experiential component requires the student to be registered with the Kentucky Board of Pharmacy as a Pharmacy Intern.

#PHR 933 PHARMACEUTICAL OUTCOMES, POLICY AND PUBLIC HEALTH. (3)

This course provides an overview of the interaction between pharmaceuticals and public health policy. The course will begin with an introduction to public health, including an overview of public health metrics and research methods. The rest of the course is devoted to public policy formulation, implementation and analysis. The impact of health-related policy will be explored from local, state, national and global perspectives. The course is designed to develop knowledge and skills related to population health and health policy, with specific emphasis on policies associated with pharmaceuticals. A variety of educational methods will be employed, including "live" and electronic didactic lectures, case studies, simulations, and simulated health policy development analysis activities. Prereq: PHR 913 Wellness and Health 1, PHR 914 Clinical Reasoning, PHR 915 Pharmacy as a Profession.

#PHR 936 INTEGRATED DRUGS AND DISEASES 2: NEUROLOGY. (4)

This course integrates knowledge from distinct scientific disciplines (pharmacology, medicinal chemistry, pathophysiology and therapeutics) to progressively lead students toward understanding, mastering and designing patient care plans for patients with commonly encountered neurological diseases. The methods of teaching and learning employed in this course will challenge the student to develop independent thought processes and self-directed learning skills. Prereq: Successful completion of PY1 and Fall PY2 courses in the PharmD program.

#PHR 937 INTEGRATED DRUGS AND DISEASES 2: RHEUMATOLOGY. (2)

This course meets for 4 weeks – 1/4 semester. This course will describe the pathophysiology, pharmacology, medicinal chemistry, therapeutics and non-drug therapies associated with rheumatic diseases so that students can assess the specific disease, design and manage both lab assays and other indicative tests and drug- as well as non-drug related care plans for patients with these disease states. Prereq: Completion of the PY1 year.

#PHR 938 INTEGRATED DRUGS AND DISEASES 2: ENDOCRINE DISEASES. (4)

This course meets for 8 weeks – 1/2 semester. This course will describe the pharmacology, medicinal chemistry, pathophysiology, and therapeutics associated with commonly encountered endocrine diseases so that students can design and manage drug-related care plans for patients with these disease states. Prereq: Successful completion of the PY1 curriculum.

#PHR 940 PATIENT-CENTERED CARE EXPERIENCE 4. (3)

This is the fourth course in the six-semester Patient-Centered Care Experience (PaCE) course sequence that is part of the pre-APPE curriculum. The PaCE course structure integrates PY1, PY2, and PY3 students into concurrent weekly laboratory sessions and intermittent complementary experiential fieldwork experiences. The course is designed to assist in developing the knowledge, skills, and attitudes necessary to provide patient-centered care and manage the medication use system. Prereq: PaCE 3 (PHR 930). Coreq: PHR 946, PHR 947, PHR 948. The experiential component requires the student to be registered with the Kentucky Board of Pharmacy as a Pharmacy Intern.

#PHR 945 LEADERSHIP IN PHARMACY. (3)

This course will include multiple modes of instruction (didactic lecture, group assignment, student presentations, and in-class discussion) to introduce the key concepts of effective leaders and leadership participation in corporations and to the students' experience. This 3 credit course provides an introduction to leadership in pharmacy practice. It includes an introduction to leadership development, leadership fundamentals, leadership skills in various settings and discussions with professional leaders as well as assignments requiring interaction with pharmacy leaders. Prereq: Successful entry into the spring semester of the second professional year (PY2).

#PHR 946 INTEGRATED DRUGS AND DISEASES 3: CARDIOLOGY. (6)

This course will focus on the pharmacology, medicinal chemistry, pathophysiology, and therapeutics associated with commonly encountered disease states in cardiology so that students can design and manage drug-related care plans for patients with these disease states. Prereq: Successful completion of ALL required courses in the Doctor of Pharmacy degree program sequence leading up to IDD 3: Cardiology.

#PHR 947 INTEGRATED DRUGS AND DISEASES 3: GENITOURINARY. (2)

This course meets for 8 weeks – 1/2 semester. This course will describe the pharmacology, medicinal chemistry, pathophysiology, and therapeutics associated with commonly encountered genitourinary (GU) disorders so that students can design and manage drug-related care plans for patients with these disease states. Prereq: Successful completion of all required PY1 courses in the PharmD program.

#PHR 948 INTEGRATED DRUGS AND DISEASES 3: PULMONARY. (3)

This course will meet twice per week for 12 weeks. A cornerstone of good pharmaceutical care is advanced pharmacotherapy competency. The successful practitioner must critically analyze knowledge from the areas of epidemiology, pathology, pharmacology, pharmacology, and safety. This course will introduce the principles of effective treatment and the role of the pharmacist in patient management.

#PHR 950 PATIENT-CENTERED CARE EXPERIENCE 5. (4)

This is the fifth course in the six-semester Patient-Centered Care Experience (PaCE) course sequence that is part of the pre-APPE curriculum. The PaCE course structure integrates PY1, PY2, and PY3 students into concurrent weekly laboratory sessions and intermittent complementary experiential fieldwork experiences. The course is designed to assist in developing the knowledge, skills, and attitudes necessary to provide patient-centered care and manage the medication use system. Prereq: PaCE 4 (PHR 940). Coreq: PHR 956, PHR 957, PHR 954. The experiential component requires the student to be registered with the Kentucky Board of Pharmacy as a Pharmacy Intern.

#PHR 960 PATIENT-CENTERED CARE EXPERIENCE 6. (4)

This is the sixth course in the six-semester Patient-Centered Care Experience (PaCE) course sequence that is part of the pre-APPE curriculum. The PaCE course structure integrates PY1, PY2, and PY3 students into concurrent weekly laboratory sessions and intermittent complementary experiential fieldwork experiences. The course is designed to assist in developing the knowledge, skills, and attitudes necessary to provide patient-centered care and manage the medication use system. Prereq: PaCE 5 (PHR 950). Coreq: PHR 966, PHR 967. The experiential component requires the student to be registered with the Kentucky Board of Pharmacy as a Pharmacy Intern.
PHS 510 MODERN METHODS IN PHARMACEUTICAL ANALYSIS. (5)
A course which deals with the application of modern analytical methods, primarily instrumen-
tal methods, in the determination of the strength, purity, and quality of drugs and pharmaceuti-
cal. Laboratory exercises include analysis of raw materials and finished dosage forms. Lecture, three hours; laboratory, four hours. Prereq: CHE 226.

PHS 530 RADIOPHARMACEUTICS. (3)
Basics of radioactive decay and detection. Labelling of molecules and cells with radiouclide.
Imaging systems and clinical aspects of radiopharmaceuticals. Radioanalytical applications in
pharmaceutical sciences, including positron tomography and gamma scintigraphy. Develop-
ment of new radiopharmaceuticals and absorbed dose calculations. The principles of radiation
safety and radiobiology. Prereq: Consent of instructor.

PHS 545 STERILE PARENTERALS AND DEVICES. (2-3)
The course will describe the fundamental concepts, principles and techniques involved in the
characterization, development, evaluation and preparation of sterile products. Lecture, two
credits; lecture with laboratory, three credits. Prereq: Consent of instructor.

#PHS 556 PRINCIPLES OF DRUG DESIGN. (3)
Introduction to medicinal chemistry will be explored through rational biochemical and physical
organic chemical approaches to drug design, action and development. Structural features,
physical properties, mechanism of action and metabolism of drug like molecules, forces that
govern interaction of drug-like molecules with their targets, enzyme mechanisms and inhibition
and xenobiotic metabolism will be illustrated with specific examples showing how drugs function
at the molecular level. Prereq: CHE 230, CHE 232, BIO 148, BIO 152. (Same as BCH 556/ CHE 580.)

PHS 612 QUANTITATIVE PHARMACODYNAMICS: PHARMACOKINETICS. (3)
Quantitative treatment of dynamics of drug absorption, distribution, metabolism and excretion,
including development of both mathematical models and model-independent approaches for
describing these processes. Prereq: MA 114 and consent of instructor. (Same as PHA 612.)

#PHS 622 ADVANCED BIOPHARMACEUTICS. (3)
Kinetics of reactions of pharmacological interest; mechanisms of drug decomposition and
theoretical approaches to stabilization and preservation; accelerated stability analysis. Prereq:
MA 213, CHE 538, CHE 548 and PHR 631.

PHS 631 EQUILIBRIUM PHENOMENA IN PHARMACEUTICAL SYSTEMS. (3)
An advanced study in special topics of a physical chemical nature which are applicable to
pharmacy, with special emphasis on physical properties and molecular structure, solubility,
complexation and equilibria in solution. Prereq: Physical chemistry.

PHS 632 THE PRACTICE OF DRUG METABOLISM. (3)
The purpose of this course is to teach students about practical aspects of drug metabolism
research. This includes addressing the function and purpose of drug metabolism studies, how
those studies are carried out, why and how they are done, how metabolites are characterized,
and some discussion of the limits and utility of the various approaches used in drug metabolism
research.

PHS 649 ADVANCED MOLECULAR PHARMACOLOGY. (2)
This course will provide in-depth coverage of the molecular pharmacology of growth factors,
transcription factors, receptors, and ion channels. Emphasis will be placed on both the normal
functions of these cell-signaling molecules and perturbations that result in several prevalent
human diseases, including cancer, Alzheimer’s, diabetes, osteoporosis, and inherited human
illnesses. Students will be challenged to apply experimental approaches to diagnosing and treating
these illnesses in the light of our evolving knowledge of molecular pharmacology. Prereq: IBS 601-606 or consent of instructor. (Same as PHA/TOX 649.)

PHS 660 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/
secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as BCH 620/PLS 642.)

PHS 662 BIOORGANIC MECHANISMS. (3)
An in-depth discussion on the bioorganic chemistry aspects of the active sites of enzymes and
drug receptors, the molecular basis of drug design, and principles of drug metabolism. Within
these topics, the mode of action of some of the major coenzymes and drugs will be discussed
from a mechanistic chemistry point of view. Prereq: CHE 538, CHE 633, BCH 501 or consent
of instructor.

PHS 663 MOLECULAR NEUROBIOLOGY OF ABUSED DRUGS. (3)
This course is designed to review major topics, concepts and issues pertinent to the molecular
neurobiology of drug abuse and dependence. The proposed course of study will provide a strong
background in neuroscience and students will be informed about current trends in our
understanding of the molecular neurobiology of drug abuse research. Prereq: IBS 601 or consent
of instructor.

#PHS 711 FUNDAMENTALS OF BIOETHICS. (2)
Research scientists require an understanding of the fundamental principles guiding the ethical
and scientific conduct and reporting of their research. Through case studies and a review
of the current literature, students will gain a greater understanding of the ethical and regulatory
considerations in research design, conduct, and publication as well as the regulatory landscape
governing fiscal compliance, scientific misconduct, research involving vulnerable populations,
tissue banking, genetics/genomics, intellectual property, privacy, and data security. The
importance of inclusion and diversity of individuals from underrepresented groups, those with
disabilities, and individuals from economically disadvantaged backgrounds as investigators is
also discussed. Students engage in didactic lectures, small-group breakout discussion sessions,
and out of class learning activities to facilitate in-depth training and greater understanding of
the relevant issues. Prereq: Consent of instructor.

PHS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq:
All course work toward the degree must be completed.

PHS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters.
Prereq: Registration for two full-time semesters of 769 residence credit following the successful
completion of all the qualifying exams.

PHS 750 PHARMACEUTICAL SCIENCES JOURNAL CLUBS. (1)
Discussion and presentations of foundation or current literature and emerging topics in
pharmaceutical sciences. Topics vary by section. May be repeated to a maximum of 5 credit
hours. Prereq: Consent of instructor.

PHS 760 TOPICS IN PHARMACEUTICAL SCIENCES. (1-4)
Pharmaceutical sciences which are not being covered in other courses. May be repeated to a
maximum of 24 hours. Prereq: Consent of instructor.

PHS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register
for this course in the semester of the qualifying examination. A minimum of two
semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation
is completed and defended.

PHS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PHS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PHS 778 SEMINAR IN PHARMACEUTICAL SCIENCES II. (1)
Reports and discussion of pertinent research and literature in a disciplinary area of the
pharmaceutical sciences. May be repeated to a maximum of eight credits. Prereq: Graduate
standing.

PHS 780 SPECIAL PROBLEMS IN PHARMACEUTICAL SCIENCES. (1-6)
Selected problems of laboratory or literature nature in which a student pursues a topic of interest
to him under the supervision of a faculty member particularly qualified in that area. May be
repeated once. Prereq: Consent of instructor.

PHS 790 RESEARCH IN PHARMACEUTICAL SCIENCES. (1-12)
Research work to be conducted in selected areas of pharmaceutical sciences. May be repeated
indefinitely. Prereq: Approval of student’s special committee and consent of instructor.

PHS 911 PHYSIOLOGICAL BASIS FOR THERAPEUTICS. (4)
Integrated concepts of human organ system functions with particular emphasis on the
physiology of the central and autonomic nervous system, the cellular and molecular mecha-
nisms of neurotransmission and transduction and the response of target tissues. The course
includes an introduction to the pathophysiology of each system and the pharmacodynamics
of therapeutic agents as a framework for discussion. Variable mixtures of lecture, group
discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 912 PHYSIOLOGICAL CHEMISTRY AND MOLECULAR BIOLOGY. (1)
The first of a two course sequence covering integrated concepts of human biochemistry from
a physiological viewpoint, functional group chemistry essential to biology, key structural
and functional relationships of the biomolecules in living systems, energy metabolism emphasizing
inter organ relationships and an in depth discussion of information storage and transfer. The
course includes an introduction to common metabolic diseases and the therapeutic agents used
in those diseases as a framework for discussion. Variable mixture of lecture, group discussion
and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 914 BASIC PRINCIPLES OF PHARMACEUTICAL SCIENCE: PHARMACEUTICS AND BIOPHARMACEUTICS. (3)
The first of a two course sequence in basic principles of Pharmaceutical Science concentrating
on absorption, distribution, metabolism, excretion and bioavailability of drugs; and
an introduction to dosage forms, oral drug delivery systems, drug solutions and drug solids,
bioequivalence determinations and ratings, and official compendia. Variable mixtures of
lectures, discussions and independent study. Prereq: Admission to the first year, College of
Pharmacy.
PHS 921 PHYSIOLOGICAL BASIS FOR THERAPEUTICS II. (4)
A continuation of PHS 911 covering integrated concepts of human organ system functions with particular emphasis on the physiology of the cardiovascular, renal, pulmonary and endocrine systems. The course includes an introduction to the pathophysiology of each system and the pharmacodynamics of prototype therapeutic agents as a framework for discussion. Variable mixture of lecture, group discussions and independent study. Prereq: PHS 911 and admission to the first year, College of Pharmacy.

PHS 922 PHYSIOLOGICAL CHEMISTRY AND MOLECULAR BIOLOGY II. (3)
A continuation of PHS 912. Variable mixture of lectures, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy and PHS 912.

PHS 924 BASIC PRINCIPLES OF PHARMACEUTICAL SCIENCE: PHARMACEUTICS AND BIOPHARMACEUTICS II. (3)
The second of a two course sequence in the basic principles of Pharmaceutical Science concentrating on modified release oral dosage forms; modified release parenteral dosage forms; nasal, buccal, rectal, vaginal and ophthalmic delivery systems; aerosols and pulmonary delivery systems, and the drug development process. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 931 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: NERVOUS SYSTEM. (5)
A study of human disease processes and rational pharmacotherapeutics relating to the autonomic, central and peripheral nervous system including a discussion of the factors influencing the development of substance dependence and the strategies for risk reduction. Emphasis is placed on the principles of pathophysiology, pharmacology, toxicology and therapeutic interventions. These principles will be applied in the clinical application of modern drug therapy, and how these principles can be utilized in pharmacy practice. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the second year, College of Pharmacy.

PHS 932 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: IMMUNOLOGY AND BIOTECHNOLOGY. (3)
A study of the immune system, immunopathologies and select autoimmune diseases and their treatment. Includes discussion of immunizations, immunology of cancer, malignancies and an introduction to antineoplastic therapy. The course concludes with a discussion of biotechnology and its application to the production and use of pharmaceuticals, diagnostic agents and advanced therapies. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the second year, College of Pharmacy.

PHS 933 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: ENDOCRINE SYSTEMS. (5)
A study of the pathophysiology of the major disorders affecting the endocrine system concentrating on hypertension and the pharmacology of the therapeutic agents used to treat those disorders, including discussions of the rational use of endocrine agents and their congeners in the treatment of non-endocrine diseases. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the second year, College of Pharmacy.

PHS 944 BASIC PRINCIPLES OF MEDICINAL CHEMISTRY. (3)
The rational design of molecules to produce safe and effective therapeutic responses in humans; molecular changes in drug molecules that affect affinity and activity at drug receptors and influence the metabolism, excretion, and stability of drugs; and the properties of drug molecules which are important in their formulation into drug products. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the second year, College of Pharmacy.

PHS 947 APPLIED BIOPHARMACOLOGY AND PHARMACOKINETICS. (4)
The theoretical and practical considerations of the processes of drug absorption (including dosage formulation), distribution, metabolism and excretion, and the compartmental models that describe these processes including the formulation of dosage regimens for patients with problems ranging from simple-to-complex. A variable mixture of computer-assisted learning, formal lecture, interactive lecture and problem-based learning laboratory experiences. Prereq: Admission to the second year, College of Pharmacy.

PHS 951 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: CARDIOPULMONARY AND RENAL SYSTEMS. (5)
a study of the pathophysiology of the major disorders affecting the cardiovascular, renal and respiratory systems concentrating on the pharmacology of the therapeutic agents used to treat these disorders. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the third year, College of Pharmacy.

PHY 100 PHYSICS TODAY. (3)
The close relationship between physical science, technology and our everyday lives will be illuminated by examination of the technology we purchase and use and by observations of natural phenomena we can make using only the informed mind and eye.

PHY 105 PHYSICS AND ASTRONOMY TODAY. (3)

PHY 120 HOW THINGS WORK. (3)

PHY 130 SCIENCE AND TECHNOLOGY FOR THE FUTURE. (3)
This course will explore the energy issues of today and tomorrow, including where the energy comes from, the future of nuclear, renewable, and fossil fuels, the potential of renewable energy sources, and the future of coal, showing how these are affected by history, geography, politics, technology, and the laws of physics and economics.

PHY 140 QUANTUM THEORY FOR EVERYONE. (3)
A lecture course to explore the surprising nature of the nanoworld. Wave properties of matter, probabilistic interpretation, duality, causality, uncertainty principle and quantum entanglement. Technologies and discoveries which exploit quantum effects will be selectively covered.

PHY 151 INTRODUCTION TO PHYSICS. (3)
A lecture demonstration course covering the mechanics of solids, liquids, gases, heat, and sound. Credit is not given to students who already have credit for PHY 201, 211 or 231. Prereq: Two years of high school algebra, and an ACT math score of 19 or above, or a SAT math score of 515 or above, or MA 108R or higher.

PHY 152 INTRODUCTION TO PHYSICS. (3)
A laboratory demonstration course covering electricity, magnetism, optics, atomic and nuclear physics. Credit is not given to students who already have credit for PHY 203, 213 or 232. Prereq: Two years of high school algebra or MA 108R.

TPHY 153 LABORATORY FOR MIDDLE SCHOOL TEACHERS. (3)

PHY 160 PHYSICS AND ASTRONOMY FOR TEACHERS. (3)
The basics of electric circuits, magnetism, object motion, naked-eye astronomy and light behavior. The course is designed in conjunction with GYL 160 to provide basic concepts of earth science, astronomy and physics appropriate for elementary and middle school teachers. Both courses are taught with an emphasis on inquiry-based, laboratory activities. Lecture, one hour; laboratory, five hours per week.

PHY 170 BLACK HOLES AND TIME TRAVEL. (3)
The course will discuss basic concepts in physics prior to the 20th century and the backdrop to the emergence of the Special Theory of Relativity. Elements of Special and General Relativity will be discussed at a non-technical level. These concepts will be used to explain how very massive stars inevitably collapse to form black holes. Their observational signatures will be discussed. The work of Hawking leading to the prediction that black holes emit faint radiation will be explained. Finally, the possibility of existence of wormholes leading to time travel will be explored.

PHY 210 SPECIAL LABORATORY FOR GENERAL PHYSICS PHY 201. (1)
Special laboratory for students who have completed PHY 201 and later determine that they need an accompanying laboratory. Laboratory, two hours per week. Prereq: PHY 201.

PHY 211 GENERAL PHYSICS. (5)
First part of a two-semester survey of classical and modern physics, focusing on the motion of solids and fluids as governed by Newton’s Laws and by the conservation laws of energy, momentum, and angular momentum. Lecture, two hours; recitation, two hours; laboratory, two hours. Credit is not given to students who already have credit for PHY 231 and 241. Prereq: A working knowledge of algebra as obtainable in MA 109 or MA 110 or MA 112, or an ACT math score of 25 or above, or a SAT math score of 590 or above.

PHY 212 SPECIAL LABORATORY FOR GENERAL PHYSICS PHY 203. (1)
Special laboratory for students who have completed PHY 203 and later determine that they need an accompanying laboratory. Laboratory, two hours per week. Prereq: PHY 203.

PHY 213 GENERAL PHYSICS. (5)
Continuation of PHY 211, covering electrostatics, de circuits, magnetism, Maxwell's Equations, electromagnetic radiation, light and some modern physics. Lecture, two hours; recitation, two hours; laboratory, two hours. Credit is not given to students who already have credit for PHY 252 and 242. Prereq: PHY 211 or equivalent.

PHY 228 OPTICS, RELATIVITY AND THERMAL PHYSICS. (3)
A lecture and problems course covering the principles of geometrical optics, special relativity, and thermal physics. Prereq or concur: MA 114.

PHY 231 GENERAL UNIVERSITY PHYSICS. (4)
First part of a two-semester survey of classical physics. Consequences of the principles of mechanics are developed conceptually, analytically and quantitatively. Lecture, three hours; recitation, one hour per week. Prereq or concur: MA 113.

PHY 232 GENERAL UNIVERSITY PHYSICS. (4)
A general course covering electricity, magnetism, electromagnetic waves and physical optics. Lecture, three hours; recitation, one hour per week. Prereq: PHY 231; concur: MA 213.

PHY 241 GENERAL UNIVERSITY PHYSICS LABORATORY. (1)
A laboratory course offering experiments in mechanics and heat, framed in a small group environment that requires coordination and team work in the development of a well-written lab report. Prereq or concur: PHY 231.

PHY 242 GENERAL UNIVERSITY PHYSICS LABORATORY. (1)
A laboratory course offering experiments in electricity, magnetism, and light, framed in a small group environment that requires coordination and team work in the development of a well written lab report. Prereq: PHY 241; concur: PHY 232.
Course Descriptions

PHY 306 THEORETICAL METHODS OF PHYSICS. (3)
A lecture and problems course on the applications in physics of vector calculus, Fourier series and transforms, special functions and asymptotic forms. Prereq or concur: MA 214.

PHY 335 DATA ANALYSIS FOR PHYSICISTS. (1)
A computational methods course in the theory and techniques of data analysis and error propagation, with emphasis on applications common to the physical sciences: the treatment of statistical errors, the maximum-likelihood method, the chi-square distribution, and curve fitting. Students will learn computer programming, and they will prepare a set of analysis programs for use in subsequent lab courses. Concur: MA 213, PHY 242. (Same as STA 335.)

PHY 361 PRINCIPLES OF MODERN PHYSICS. (3)
An introduction to the foundations of quantum mechanics and selected topics in atomic, nuclear, particle, solid state, and statistical physics. Prereq: MA 213; PHY 232 or, with consent of instructor, PHY 213.

PHY 395 INDEPENDENT WORK IN PHYSICS. (1-3)
Students may select an approved topic for study under the direction of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.

PHY 401G SPECIAL TOPICS IN PHYSICS AND ASTRONOMY FOR ELEMENTARY, MIDDLE SCHOOL AND HIGH SCHOOL TEACHERS. (1-4)
Selected topics in physics and astronomy of special interest to teachers will be discussed. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory will be announced. Lecture-discussion, two-four hours; laboratory, zero-four hours. May be repeated to a maximum of eight credits. Prereq: Open only to elementary, middle school and high school teachers.

PHY 402G ELECTRONIC INSTRUMENTATION AND MEASUREMENTS. (3)
Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, theory and operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, three hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as EE 402G.)

PHY 404G MECHANICS. (3)
A lecture and problem course covering the fundamental laws of mechanics. Typical topics include Newton’s Laws, Kepler’s Laws, oscillatory motion and an introduction to Lagrangian methods. Prereq: PHY 232, or with permission of Director of Undergraduate Studies, PHY 213; concur: MA 214.

PHY 416G ELECTRICITY AND MAGNETISM. (3)
First of two lecture and problem courses covering: the theory of electrostatic fields in the presence of conductors and dielectric materials, magnetic fields due to steady currents in the presence of magnetic materials, electromagnetic induction, and electromagnetic fields due to time-varying currents. Prereq: PHY 306; MA 214 with a grade of C or better.

PHY 417G ELECTRICITY AND MAGNETISM. (3)
Second of two lecture and problem courses covering: the theory of electrostatic fields in the presence of conductors and dielectric materials, magnetic fields due to steady currents in the presence of magnetic materials, electromagnetic induction, and electromagnetic fields due to time-varying currents. Prereq: PHY 416G.

PHY 422 COMPUTATIONAL PHYSICS LABORATORY. (3)
An introductory laboratory and lecture course covering the application of numerical methods to the solution of problems encountered in classical mechanics and electrodynamics. Students will be expected to write computer programs, but no previous programming experience is required. Lecture, one hour; laboratory, four hours per week. Prereq: MA 214, PHY 404G.

PHY 435 INTERMEDIATE PHYSICS LABORATORY. (3)
An intermediate-level laboratory course emphasizing quantum phenomena in atomic, solid state and nuclear systems. Laboratory techniques include optical spectroscopy, gamma-ray and particle detection, atomic and nuclear collisions, and interferometry. This course satisfies the Graduation Writing Requirement. Prereq: PHY 335, PHY 361. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PHY 460G HANDS-ON PHYSICS FOR MIDDLE SCHOOL AND HIGH SCHOOL TEACHERS. (2)
An exploration of classical and modern physics, in a laboratory setting. This course may be taken twice for credit. Prereq: PHY 228 and PHY 361.

PHY 472G INTERACTION OF RADIATION WITH MATTER. (3)
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radiative, nonradiative, and autodetected, energy transfers. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as RAS/RM 472G.)

PHY 477 PHYSICS AND ASTRONOMY SEMINAR. (PHY 495 SENIOR THESIS. (3)
With mentoring from faculty member(s), advanced undergraduate students propose and execute an independent research project. A final report will be written and a presentation will be made in a forum such as a professional meeting, a student group such as regional or national Society of Physics Students meeting, or a small group of faculty. May be repeated to a maximum of six credits. Prereq: Advanced standing.

PHY 504 ADVANCED MECHANICS. (3)

PHY 506 METHODS OF THEORETICAL PHYSICS I. (3)
The course and its sequel (MA-PHY 507) are designed to develop, for first-year graduate students, the mathematical tools useful in physics. Topics include variational coordinates, infinite series, integrating and solving differential equations of physics, and methods of complex variables. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included as a part of MA-PHY 506 and 507. Prereq: PHY 404G or equivalent. (Same as MA 506.)

PHY 507 METHODS OF THEORETICAL PHYSICS II. (3)
Continuation of MA-PHY 506. Fourier and Laplace Transforms, the special functions (Bessel, Elliptic, Gamma, etc.) and associated problems. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included as a part of MA-PHY 506 and 507. Prereq: MA-PHY 506. (Same as MA 507.)

PHY 508 COMPUTATIONAL PHYSICS. (3)
A laboratory and lecture course using computational and numerical methods to investigate different phenomena in selected topics of physics. Lecture 2 hours; laboratory, 2 hours per week. Prereq: PHY 361.

PHY 520 INTRODUCTION TO QUANTUM MECHANICS I. (3)
A lecture and problem course providing an introduction to the concepts and formalism of quantum mechanics. Primary emphasis is on the time-independent Schrodinger equation and its applications to simple systems such as the harmonic oscillator, the square-well potential, and the hydrogen atom without spin. Prereq. PHY 361, MA 214.

PHY 521 INTRODUCTION TO QUANTUM MECHANICS II. (3)
A continuation of PHY 520, introducing the quantum description of systems with spin, and approximation methods. Principles of quantum mechanics will be illustrated by their application to model systems selected from the fields of atomic, solid state, nuclear and particle physics. Prereq. PHY 520.

PHY 522 THERMODYNAMICS AND STATISTICAL PHYSICS. (3)
Temperature, heat, and entropy, and the Laws of Thermodynamics, as applied to simple systems. Introduction to statistical mechanics and the description of thermodynamic quantities in terms of ensemble averages. Prereq: PHY 361 and MA 214.

PHY 524 SOLID STATE PHYSICS. (3)
Introductory solid state physics with emphasis on the properties of electrons in crystals; crystal structure, crystal diffraction, reciprocal lattice, lattice vibrations and phonons, free electron theory, energy bands in solids, semiconductors. Prereq: PHY 520, or consent of instructor. Engineering standing required for EE 524. (Same as EE 524.)

PHY 525 CONDENSED MATTER PHYSICS. (3)
Optical, magnetic, and transport properties of metals, semiconductors, superconductors, and dielectrics; cooperative phenomena and phase transitions. Prereq: PHY 524 or consent of instructor.

PHY 535 ADVANCED PHYSICS LABORATORY. (3)
An advanced laboratory course emphasizing quantum phenomena in atomic, solid state and nuclear systems. Laboratory techniques include optical spectroscopy, gamma-ray and particle detection, optical pumping, atomic and nuclear collisions, and interferometry. Prereq: PHY 335, PHY 361. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PHY 545 RADIATION HAZARDS AND PROTECTION. (3)
An analysis of common radiation hazards encountered in medicine, research, industry, and the environment. Regulations and procedures for the safe use of ionizing and nonionizing radiations. Lecture, two hours; laboratory, two and one-half hours. Prereq: PHY/RM 472G or consent of instructor. (Same as RM/RAS 545.)

PHY 546 GENERAL MEDICAL RADIOLOGICAL PHYSICS. (3)
The uses and dosimetric aspects of radiation in medicine will be analyzed, including many basic applications in the fields of diagnostic radiology physics, therapy physics, and nuclear medical physics. Prereq or concur: RM/PHY 472G or consent of instructor. (Same as RM/RAS 546.)

PHY 554 FUNDAMENTALS OF ATOMIC PHYSICS. (3)
A continuation of introductory quantum mechanics with application to atomic systems. Topics include angular momentum, perturbation theory, variational principles, interaction of particles with matter, atomic spectra and the Zeeman and Stark effects. Prereq: PHY 520.

PHY 555 FUNDAMENTAL NUCLEAR PHYSICS. (3)
Topics covered include nuclear systematics, the nucleon-nucleon interaction, nuclear models, radioactivity, nuclear reactions, fission and fusion. Prereq: PHY 520.

PHY 556 FUNDAMENTAL PARTICLE PHYSICS. (3)
Introduction to elementary particle physics. Topics include: particle interactions and families, the quark model, symmetries and conservation laws, particle reactions and decays, quark dynamics, and elements of quantum chromodynamics and electroweak interactions. Prereq: PHY 520.
Course Descriptions

PHY 567 INTRODUCTION TO LASERS AND MASERS. (3)
Basic principles of laser action, atomic transitions; population inversion; two- and three-level systems; oscillators; pumping methods; applications. Prereq: EE 360, EE 468G, or PHY 417G, or consent of instructor. (Same as EE 567.)

PHY 570 SEMINAR ON TEACHING PHYSICS. (1)
A seminar course for teaching assistants focused on developing the art and science of teaching physics. Journal articles, books and other texts will be studied to serve as sources of discussion about the teaching and learning activities in the Department of Physics and Astronomy. Prereq: Consent of instructor.

PHY 571 SEMINAR ON TEACHING PHYSICS LABORATORIES. (1)
A seminar course for teaching assistants focused on developing the art and science of teaching physics laboratories. Journal articles, books and other texts will be studied to serve as sources of discussion about the teaching and learning activities in the laboratory classes in the Department of Physics and Astronomy. Prereq: Consent of instructor.

PHY 591 ASTROPHYSICS I—STARS. (3)
The physics of stars from star formation to stellar death. Topics include stellar structure and evolution, energy generation and transport, the later stages of stellar evolution and stellar remnants. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as AST 591.)

PHY 592 ASTROPHYSICS II—GALAXIES AND INTERSTELLAR MATERIAL. (3)
The physics of galaxies and of the interstellar medium. Topics include galaxy formation, evolution and interaction, phases of the interstellar medium, and physical processes in the interstellar medium. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as AST 592.)

PHY 600 SELECTED TOPICS IN ADVANCED PHYSICS. (2-3)
An advanced seminar course on topics related to departmental research programs. Topics may include astrophysics, atomic physics, condensed matter physics, nuclear physics and particle physics. May be repeated to a maximum of nine hours. Prereq: Consent of instructor.

PHY 605 GRAVITY. (3)
An introduction to the general theory of relativity, covering tensor analysis, Einstein’s equations, experimental tests, black holes, and cosmology. Prereq: PHY 504 and PHY 417G, or permission of instructor.

PHY 611 ELECTROMAGNETIC THEORY I. (3)
A lecture and problem course treating electrostatics, boundary conditions, potential problems, energy in electric and magnetic fields, magnetic materials and Maxwell’s equations. Prereq: PHY 416G; MA 214.

PHY 613 ELECTROMAGNETIC THEORY II. (3)
Continuation and extension of PHY 611. Includes theory of electromagnetic waves and applications to optical phenomena and radiation. Special theory of relativity and the covariant treatment of Maxwell’s equations will be discussed. Prereq: PHY 611.

PHY 614 QUANTUM MECHANICS I. (3)
A lecture and problem course dealing with the description of quantum systems in the forms of wave mechanics, matrix mechanics and state vectors. Also includes angular momentum and its addition, and approximation methods for bound states. Prereq: PHY 520.

PHY 615 QUANTUM MECHANICS II. (3)
Continuation of PHY 614 covering time dependent perturbation theory, symmetry, and invariance principles, and elementary scattering theory including the method of partial waves. Prereq: PHY 614.

PHY 616 QUANTUM FIELD THEORY I. (3)
An introduction to field theory and many-body theory. Topics include path integral quantization, second quantization, relativistic field theory of bosons and fermions, Green’s function and perturbation theory, field theories on the lattice, renormalization of scalar fields and applications to critical phenomena. Prereq: PHY 615, PHY 632.

PHY 624 CONDENSED MATTER PHYSICS. (3)

PHY 630 TOPICS IN NUCLEAR AND INTERMEDIATE ENERGY PHYSICS (Subtitle required). (3)
A course in nuclear physics, hadron physics and particle physics. Emphasis is placed on topics related to departmental research activities at Jefferson laboratory and elsewhere. Such topics include study of the structure and interactions of hadrons in terms of quarks and gluons. They also include low energy tests of Standard Model predictions. (PHY 630 may be repeated to a maximum of six hours when taken under different subtitles.) Prereq: PHY 629.

PHY 632 STATISTICAL MECHANICS. (3)
A lecture and problem course dealing with the thermal properties of matter from the standpoint of statistical mechanics. Topics include thermodynamic properties, perfect gases, and Fermi-Dirac statistics. Prereq: PHY 504, 520, 522.

PHY 639 PHYSICAL PROCESSES IN ASTROPHYSICS. (3)
A lecture and problem course covering the physical processes encountered in astrophysics. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 592 or consent of instructor. (Same as AST 639.)

PHY 716 QUANTUM FIELD THEORY II. (3)
A continuation of PHY 616. Topics include approximation methods in many body theory and applications to condensed matter and nuclear systems, quantum electrodynamics, radiative corrections, Higgs mechanism and applications to particle physics and superconductivity, introduction to non-Abelian gauge fields and the standard model. Prereq: PHY 616.

PHY 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PHY 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PHY 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PHY 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PHY 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PHY 770 COLLOQUIUM. (1)
A weekly meeting of the staff and advanced students for the discussion of recent developments in physics and of work in progress in the department. Credit is given to those who satisfactorily present papers. May be repeated to a maximum of eight credits.

PHY 781 INDEPENDENT WORK IN PHYSICS. (1-9)
May be repeated to a maximum of 18 credits. Prereq: Graduate standing in Physics.

PHY 790 RESEARCH IN PHYSICS. (3)
May be repeated to a maximum of six credits.

PHY 791 RESEARCH IN PHYSICS. (5)
May be repeated to a maximum of 10 credits.

PLS Plant and Soil Science

PLS 100 AN INTRODUCTION TO HORTICULTURE PROFESSIONS. (1)
A survey of horticulture as a profession; to inform students of opportunities and to develop an appreciation of horticultural science as it relates to the human environment. Offered on a pass/fail basis only.

PLS 103 PLANTS, SOILS, AND PEOPLE: A GLOBAL PERSPECTIVE. (3)
Only a few things are essential to life, and food is one of them. What people eat is about what they need to be healthy, what they want to eat (personal preference and culture), and what they have available or can afford to eat. Agriculture plays a vital role in human food security. Many experts feel the world is facing a food supply crisis. Knowledge and application of the principles of plant and soil sciences will have a dramatic effect on human food security, now and into the future, both locally and globally. However, these issues will also be impacted by future human population growth, urbanization, consumer preferences, human decisions regarding civic duties, and climate change. Students successfully completing this course will have an understanding of the need to sustainably expand the world’s food supply, the basic principles of plant and soil science and their application to this problem, and their own potential role in determining our ability to meet this challenge. Students may not receive credit for both this course and PLS 104.

PLS 104 PLANTS, SOILS, AND PEOPLE: A SCIENCE PERSPECTIVE. (3)
An introduction to the looming world food crisis and the scientific basis governing our ability to sustainably meet it. The course explores the biological and environmental constraints on food production, the ways that agricultural science has dealt with these in the past and possible ways for the future, as well as societal and cultural issues, such as population growth, human health, education, and food definitions, that also impact food security. Intended for any student interested in these topics. Students may not receive credit for both this course and PLS 103.

PLS 210 THE LIFE PROCESSES OF PLANTS. (3)
This course is intended to provide a basic understanding of the natural products and processes that shape the nature of modern plants, and govern their interactions with the environment and other organisms, that give plants, and develop a basic understanding of how these plant attributes relate to organismic function. Emphasis will be placed on exploring the nature of the major plant biomes of the Earth, their community dynamics, and how member plants compete for space and other resources. Development of optimal plant strategies for reproductive success, plant interaction with other living systems as well as abiotic factors and their defense from predation and attack will also be considered.

<tbody>
<tr>
<td><strong>PLS 240 INTRODUCTION TO FLORAL DESIGN.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>The students in this class will be introduced to design theory and basic techniques of floral design.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 330 HERBACEOUS HORTICULTURAL PLANTS I.</strong></td>
<td>(2)</td>
</tr>
<tr>
<td>The identification and cultural requirements of herbaceous plants. A designated number of annuals, perennials, commercial cut flowers, flowering pot plants, bulbs, and foliage plants readily available in the fall will be covered.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 332 HERBACEOUS HORTICULTURAL PLANTS II.</strong></td>
<td>(2)</td>
</tr>
<tr>
<td>The identification and cultural requirements of herbaceous plants. A designated number of annuals, perennials, commercial cut flowers, flowering pot plants, bulbs, and foliage plants readily available in the spring will be covered.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 335 DISTILLATION, WINE AND BREWING SCIENCE.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>Broad introduction to wine, brewing, and distillation science. Information includes viticulture (growing grapes for wine), wine making (production), wine flavor chemistry, commodities for fermentation, brewing science (beer making to distribution) and distilling. This class is not based on consumption, but rather the combination of science and management strategies needed to produce quality products. A structured vocabulary is associated with production, marketing and distribution of wine, brewing and distilled products. An overarching outcome of this course is that students can describe the chemistry, biology and technology involved in fermented beverages and apply these skills in a problem solving setting. The course will focus on introductory concepts, career paths available and problem solving skills required in each element of the production chain.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 336 INTRODUCTION TO VITICULTURE – GRAPE PRODUCTION.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>This class is designed for students interested in pursuing a career in the commercial grape and wine industry. Topics will include the history of grape production in Kentucky, basic grapevine physiology and anatomy, vineyard design and establishment, important pathogens of grapevines, and economics of grape production. Lecture, three hours per week.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 337 INTRODUCTION TO ENOLOGY: WINE PRODUCTION.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>This course is designed to provide students with an understanding of procedures used to produce commercial wines in Kentucky. Topics to be discussed include: the impact of vineyard management practices on wine quality, chemical constituents of wines, production procedures specific to various wine styles using both small and large scale equipment, and economics of wine production. Lecture, three hours per week.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 340 FLORAL DESIGN FOR LIFE’S EVENTS.</strong></td>
<td>(2)</td>
</tr>
<tr>
<td>Students will explore the use of flowers in life’s events such as weddings, funerals, birthdays and various celebrations. Advanced floral techniques and styles will be taught and executed. The significance of flowers used in events of different cultures will be examined.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 352 NURSERY PRODUCTION.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>An introduction to the production practice of container and field grown nursery stock as they relate to management and operation of a nursery business. A two to three-day field trip is required. Lecture, two hours; laboratory, three hours per week.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 366 FUNDAMENTALS OF SOIL SCIENCE.</strong></td>
<td>(4)</td>
</tr>
<tr>
<td>Study of the physical, chemical and biological properties of soils and how these properties relate to plant nutrient availability and plant growth, land-use planning and management issues, and soil and water quality issues. Lecture, three hours; laboratory, three hours.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 386 PLANT PRODUCTION SYSTEMS.</strong></td>
<td>(4)</td>
</tr>
<tr>
<td>In-depth analysis of the underlying principles of plant production systems. Successful strategies, based on application of the principles developed by lecture and laboratory activities, will be discussed in either agronomic or horticultural contexts. Special attention will be given to minimizing the environmental impact of the plant production techniques employed.</td>
<td></td>
</tr>
<tr>
<td><strong>PLS 389 WINE APPRECIATION.</strong></td>
<td>(3)</td>
</tr>
<tr>
<td>Wine has been produced and enjoyed for thousands of years. It can play an important role in culture, business and social events. While appreciation of wine can be as simple as whether you like a wine, knowledge of the history of wine, aspects of wine aromas and tastes, wine grapes, and winemaking processes opens up a world of deeper appreciation for experiencing wine. This course will introduce students to these topics plus the major wine producing areas of the world and their wines. The overall goal of the course is to serve as a first step in a life-long journey of learning about and appreciating wines. Prereq: Students must be 21 years of age to enroll.</td>
<td></td>
</tr>
</tbody>
</table>
PLS 470G SOIL NUTRIENT MANAGEMENT. (3)
Soil reaction, cycling of elements essential for plant growth, rates, timing and placement of
nutrient sources in relation to crop / soil management systems; plant and soil sampling and analysis
to diagnose plant nutrient stress. Prereq: CHE 105, PLS 366 and PLS 386 or consent of
instructor. (Same as NRE 470G.)

PLS 490 TOPICS IN PLANT AND SOIL SCIENCE. (3)
A capstone course for majors in Plant and Soil Science to be taken near the conclusion of the
student’s academic career. The course provides the student the opportunity to integrate
knowledge acquired in previous courses in the plant and soil science and support areas.
Emphasis will be placed on problem solving, synthesizing and integrating information, critical
thinking, group activities, and written and oral communication. Instructional methods may
include formal lectures, laboratories or supervised individual research. The specific nature of
the course depends upon the student’s Area of Emphasis within the Plant and Soil Science
major. All topics offered will be approved by the Undergraduate Education Committee in the
Area of Emphasis. Prereq: Senior in Plant and Soil Science. This course is a Graduation
Composition and Communication Requirement (CCCR) course in certain programs, and hence
is not likely to be eligible for automatic transfer credit to UK.

PLS 502 ECOLOGY OF ECONOMIC PLANTS. (3)
Study of the physical environment (radiation, temperature, precipitation, and evapotranspi-
ration) in which crops are grown and the effect of the environment on crop growth and yield.
Both micro- and macro-climatic relationships are considered.

PLS 510 FORAGE MANAGEMENT AND UTILIZATION. (3)
Critical study of grassland plants and the biological and physical factors operative in utilization
of natural and cultivated grasslands by domestic animals. Lecture, three hours. Prereq: PLS 386,
or consent of instructor.

PLS 512 GRAINS AND OILSEEDS. (3)
Management and production of major grains and oilseeds in Kentucky. Prereq: PLS 366, PLS 386,
or similar courses; senior or graduate student.

PLS 514 GRASS TAXONOMY AND IDENTIFICATION. (3)
Overview of the grass family, concentrating on taxonomic issues and identification skills for
200 species (turf, forages, weeds, etc.). Lecture: two hours; laboratory: two hours per week.
Prereq: PLS 220 or permission from instructor.

PLS 515 TURF MANAGEMENT. (3)
A study of the selection, culture, and management of certain turf species used for home lawns,
golf courses, athletic fields, and highway slopes. Lecture, two hours; laboratory, two hours.
Prereq: PLS 210 and PLS 366.

PLS 520 FRUIT AND VEGETABLE PRODUCTION. (4)
Commercial production practices for major fruits and vegetables. Prereq: PLS 386.

PLS 525 NURSERY AND FLORICULTURE CROP PRODUCTION. (4)
This course presents advanced methods and concepts for the commercial production of selected
nursery and floriculture crops under field, greenhouse and controlled environments. Field trips
for this course may end up to one hour later than the scheduled time due to distances traveled to
commercial greenhouses and nursery firms. Prereq: PLS 366 and PLS 440.

PLS 531 FIELD SCHOOLS IN CROP PEST MANAGEMENT. (2)
A course for the Plant Pest Management option in Plant and Soil science to reinforce the
concepts of pest management learned in previous courses. Emphasis will be placed on
integrating information to develop pest management strategies. Instructional methods will
include formal lectures and laboratories in the field. Prereq: ENT 300 or ENT 310 or ENT 320;
PLS 404 and PPA 400G; or consent of instructor.

PLS 556 SEED PRODUCTION AND TECHNOLOGY. (3)
A study of seeds of improved cultivars as a delivery system for plant genetics. Principles of
seed production, harvesting and conditioning for agronomic and horticultural crops with in
outside of the region of adaptation. Seed multiplication systems, seed testing and the laws
and regulations related to marketing high quality seed. Lecture, two hours; laboratory, four hours
for 12 weeks. Prereq: PLS 386 or consent of instructor.

PLS 557 SEED VIGOR. (2)
Study of the concept of seed vigor, methods for seed vigor testing, and the relationship of seed
vigor to seedling emergence and crop performance. Prereq: An introductory crop production
or basic botany course.

PLS 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY. (4)
Emphasis will be placed on the physiological and toxicological effects of chemicals on natural
biota, including considerations at cellular, organismal, population, and community levels. This
will include assimilation and metabolism of pollutants by animal species, with emphasis upon
biochemical and physiological mechanisms involved in stress-induced responses and stress
reduction. Additional areas of concern will include the transport, fate, and effects of chemical
stressors on the structure and function of biotic communities and will include introductions to
toxictology and environmental regulatory strategies. Prereq: CHE 105, CHE 107, BIO 150,
BIO 133 and BIO 315 or BIO 350 or PGG 502 or equivalents or consent of instructor. (Same as
TOX 560.)

PLS 566 SOIL MICROBIOLOGY. (3)
The nature and biochemical activities of soil microflora; their significance in soil genesis
structure and their role in soil fertility. Prereq: PLS 366 or an introductory microbiology course
or consent of instructor.

PLS 567 METHODS IN SOIL MICROBIOLOGY. (1)
Methods in Soil Microbiology will be a laboratory course dedicated to introducing upper
division students to the methods and techniques used by microbiologists and other soil
scientists to examine organisms, interactions, and processes in soil systems. Laboratory, three
hours per week. Prereq: PLS 366 or introductory microbiology course.

PLS 573 SOIL MORPHOLOGY AND CLASSIFICATION. (3)
Study of concepts of soil horizons, soil profiles and soilscapes; morphological, physical,
chemical and mineralogical parameters useful in their characterization. Soil forming factors
and processes. Basic principles of soil classification. Characterization of selected Kentucky soils
and their placement in the modern system; practical field problems in soil identification,
characterization and classification. Lecture, two hours; laboratory, three hours per week.
Prereq: PLS 366 and PLS 367 or consent of instructor.

PLS 575 SOIL PHYSICS. (3)
This course deals with the state and movement of matter, and with the fluxes and transforma-
tions of energy, in soil systems. Its objectives are to develop a basic theoretical understanding
of soil physical properties and processes (with emphasis on the statics and dynamics of soil
water), and to demonstrate how this understanding can be applied under field conditions to
make sound management decisions concerning both agricultural and non-agricultural uses
of soils. Prereq: MA 113 or MA 123, PHY 201 or PHY 211, PLS 366 or consent of instructor.

PLS 576 LABORATORY IN SOIL PHYSICS. (1)
This course consists of laboratory and field exercises designed to increase understanding
of important soil physical properties and processes. Its objectives are to develop familiarity
with standard methods of measuring soil physical parameters, and to instill scientific methods
of data collection, analysis and interpretation. Prereq: PLS 367, concurrent enrollment in PLS 575,
or consent of instructor.

PLS 581 CHEMICAL ANALYSIS OF SOILS AND PLANTS. (3-1-3)
Special topical or experimental courses in crop science, soil science or related areas of
horticulture, or plant physiology for graduate and advanced undergraduate students. Special
supervision required and must be approved by the chair of Agronomy or Horticulture. A particular
subtitle may be offered twice under PLS 581. Students may not repeat under the same subtitle.
Prereq: Permission of instructor.

PLS 597 SPECIAL TOPICS IN PLANT AND SOIL SCIENCE. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

PLS 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three
formal lectures each and participate in numerous informal contacts with graduate students.
The emphasis is on the presentation of the most current advances (often unpublished) in selected
topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same
as BCH/MUI/PPA 601.)

PLS 602 PRINCIPLES OF YIELD PHYSIOLOGY. (3)
Critical study of the physiological factors and processes involved in determining economic
yield in grain crops. The focus will be on factors operating at the whole plant and plant
community level as opposed to physiological processes at the cellular or subcellular level.
A logical, analytical description of the process of economic yield production by grain crops will
be developed and related to traditional changes in crop yields and the potential for increasing
yields in the future. Prereq: PLS 368 and BIO 430G or consent of instructor.

PLS 605 PHYSIOLOGICAL MECHANISMS IN HORTICULTURAL PLANTS. (3)
The course will consider the chemical constituents of plants (with emphasis on biologically
or nutritionally significant compounds unique to plants), their biosynthesis, contribution to
key metabolic and defense processes and the regulation of their synthesis. Included will be
discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids,
nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional
secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or
consent of instructor. (Same as BCH/MUI/PPA 605.)

PLS 615 ADVANCED PLANT GENETICS AND GENOMICS. (3)
Genomics is reshaping the life sciences, providing high-throughput tools to decipher function
and structure of individual genes and to characterize their regulation and interactions. This course
will introduce graduate students to most recent advances in the areas of plant genetics and
genomics. The topics will include structural and functional analysis of plant genomes, genome evolution,
application of genomics tools to crop improvement, and basic concepts of bioinformatics.
Prereq: Introductory courses in genetics and biochemistry.

PLS 620 PLANT MOLECULAR BIOLOGY. (3)
This course is intended to be a treatment of current concepts of plant molecular biology.
It will be an advanced course, supplemented by handouts and reading lists. The course will deal
as much as is possible with topics that are unique to plants. Current aspects of molecular biology
that are relevant to the course content will be covered in the first part of the course; however,
these lectures will not be a review of topics that should have been retained from introductory
genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology

KEY: # = new course * = course changed † = course dropped ¶ = course purged
course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as BIO 620.)

PLS 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concurrent: BCH 607. (Same as BIO/FOR 622.)

PLS 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concurrent: BCH 607. (Same as BIO/FOR 623.)

PLS 640 IDENTIFICATION OF PLANT DISEASES. (3)
Recognition and identification of plant diseases and their causes and development. The course is designed to give students practical experience in dealing with a wide array of plant diseases. Symptoms, expression, causal agents and interactions with environmental factors encountered in the difficult task of identifying plant diseases. May be repeated to a maximum of nine credits. Lecture, one hour; laboratory, six hours. Prereq: PPA 400G or equivalent or consent of instructor. (Same as PPA 640.)

PLS 642 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as BCH/PHR 620.)

PLS 650 SOIL-PLANT RELATIONSHIPS. (3)
An advanced course on the relationships between media and the root systems of plants growing therein. Prereq: PLS 366, BIO 430G (or equivalent), or consent of instructor.

PLS 655 SPATIAL AND TEMPORAL STATISTICS. (3)
Opportunities for spatial and temporal monitoring strategies, the diagnosis and analysis of spatial and temporal agricultural and ecosystem processes are taught. Methodology is based on Statistical Time Series Analysis and Geostatistics. Prereq: STA 570 or other prerequisite in agreement with the instructor.

PLS 657 SEED BIOLOGY. (3)
Structure, development and function during plant reproductive development and seed ontogeny, including fertilization, embryogenesis and endosperm development, seed formation, maturation, germination, dormancy and deterioration. Prereq: ABT 360, BIO 430G or consent of instructor.

PLS 660 ADVANCED SOIL BIOLOGY. (2)
A critical evaluation of the current research status in selected aspects of soil biology. Prereq: PLS 566 or consent of instructor.

PLS 664 PLANT BREEDING I. (3)
The application of advanced genetic principles to plant improvement. An in-depth study of existing plant breeding procedures and their applications and consideration of new techniques that can be applied to plant breeding and crop improvement. Prereq: STA 570 or consent of instructor.

PLS 671 SOIL CHEMISTRY. (4)
A study of the chemical characteristics of the soil and of the more important chemical processes in the soil. Lecture and discussion, three hours; laboratory, two hours. Prereq: PLS 470G, 581; CHE 442G, or consent of instructor.

PLS 676 QUANTITATIVE INHERITANCE IN PLANT POPULATIONS. (3)
After a brief review of population genetics theory, the course is divided into two sections which cover methods of estimating genetic variances and selection methods in population improvement. The course will focus on handling and interpretation of actual data sets through data analysis and discussion of current literature. Prereq: STA 570, STA 671, and STA 672. (Same as STA 676.)

PLS 697 SPECIAL TOPICS IN PLANT AND SOIL SCIENCE (Subtitle required). (1-3)
Special topic or experimental course in cross science, horticulture, plant physiology or soil science for advanced graduate students. Special topic required and must be approved by the chairpersons of the Departments of Agronomy and Horticulture. A particular title may be offered twice, at most, under PLS 697. Students may not repeat under the same title. May be repeated to a maximum of six hours. Prereq: Consent of appropriate instructor before registering.

PLS 712 ADVANCED SOIL FERTILITY. (4)
An integration of the effects of soil, climate, species and management on the nutrition and dry matter accumulation of plants. Lecture, three hours; laboratory, two hours per week. Prereq: PLS 470G or PLS 650 or consent of instructor.

PLS 741 ENVIRONMENTAL CLAY MINERALOGY. (3)
A comprehensive study of the crystal structures of clay minerals commonly found in soils and sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: GLY 360 or consent of instructor. (Same as EES 741.)

PLS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PLS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 residence credit following the successful completion of qualifying exams.

PLS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester after the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PLS 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PLS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PLS 772 SEMINAR IN PLANT AND SOIL SCIENCE (Subtitle required). (1)
Reports and discussion of problems and research in crops, soils, horticultural science and plant physiology. May be repeated three times for a maximum of four credits.

PLS 799 RESEARCH IN PLANT AND SOIL SCIENCE. (1-4)
May be repeated for a maximum of 12 credits. Prereq: Consent of instructor.

PM Preventive Medicine and Environmental Health

PM 602 OCCUPATIONAL AND ENVIRONMENTAL HEALTH. (4)
A continuation of topics in PM 601. Lecture, three hours; laboratory, two hours per week. Prereq: PM 601 or consent of instructor.

PM 621 ADVANCED EPIDEMIOLOGY.

PM 661 INDUSTRIAL HYGIENE SAMPLING. (3)
This course, using lectures and laboratory exercises, will cover sampling and analysis techniques for industrial hygiene assessment and monitoring. The laboratory experiments are intended to simulate typical industrial hygiene measurement situations and to provide a basis for selection of sampling techniques and critical evaluation of laboratory results. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of the instructor.

PM 663 PRACTICUM IN ADVANCED INDUSTRIAL HYGIENE.

PM 670 CLINICAL EPIDEMIOLOGY.

PM 675 RESEARCH DESIGN IN PUBLIC HEALTH.

PM 770 SEMINAR IN PREVENTIVE MEDICINE AND PUBLIC HEALTH. (1-3)
A special seminar focusing each semester on an important topic, such as health problems of special working groups, cancer control, and health policy issues. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

PM 780 SPECIAL PROBLEMS IN PREVENTIVE MEDICINE AND PUBLIC HEALTH. (1-3)
Organized study or tutorial focused on special problems or issues. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PM 815 FIRST-YEAR ELECTIVE, PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Preventive Medicine and Environmental Health. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first-year, College of Medicine.

PM 825 SECOND-YEAR ELECTIVE, PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Preventive Medicine and Environmental Health. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

PM 841 PREVENTIVE MEDICINE CLERKSHIP SELECTIVE. (1-6)
The medical student working singly or in small groups will, with Preventive Medicine faculty advice, identify a question in the broadest sense in “medicine” which can best be answered by a population-based study. This could include comparison of therapeutic techniques, status of knowledge by health provider or consumer about certain conditions or costs of care, problems
of organizing health services, ethical problems, or any other population-based question amenable to study. Building on the second year experience, the project will involve identification of a question, design and conduct of the study, appropriate analysis of data, and a written and oral presentation. Prereq: Admission to College of Medicine.

PM 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
PM 850 PREVENTIVE MEDICINE OFF-SITE ELECTIVE
PM 852 RESEARCH IN PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH

PPA  Plant Pathology

PPA 395 INDEPENDENT STUDY IN PLANT PATHOLOGY. (1-4)
Independent study in Plant Pathology under the supervision of a faculty member. Prereq: Consent of appropriate instructor.

*PPA 400G PRINCIPLES OF PLANT PATHOLOGY. (3)
To present students with the principles of plant pathology. The causes, effects, control and nature of plant diseases will be studied; the laboratory will expose students to common diseases and pathogens, and give them hands-on experience. Emphasis will be given to diseases important in Kentucky. Lecture, two hours; laboratory, two hours. Prereq: BIO 148 and BIO 152, or BIO 210/PLS 210, or consent of instructor.

PPA 500 PHYSIOLOGY OF PLANT HEALTH AND DISEASE. (3)
First-semester graduate students and upper class undergraduates will gain a basic understanding of physiology, structure and development of plants and their associated fungi, viruses, bacteria and nematodes, and to appreciate how interactions with symbionts and pathogens influence plant health and disease. Prereq: PPA 400G (can be concurrent).

PPA 600 CRITICAL METHODS IN PLANT-MICROBE INTERACTIONS. (2)
The course will provide instruction on experimental methods commonly used in Plant-Microbe Interactions and will train students in critical thinking, grant writing, scientific ethics and seminar presentation. Prereq: PPA 500.

PPA 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/BCH/MI/PLS 601.)

PPA 609 PLANT BIOCHEMISTRY. (3)
The course will consider the chemical constituents of plants (with emphasis on biochemically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or consent of instructor. (Same as BCH/PLS 609.)

PPA 620 FUNGICIDES, ADVANCED CONCEPTS. (3)
An in-depth exploration of diverse factors that affect field performance of fungicides, as well as environmental and toxicological dimensions of these disease-control chemicals. Prereq: Principles of Plant Pathology (PPA 400G) or the equivalent, or permission of the instructor.

PPA 630 INTRODUCTION TO GENETICALLY ENGINEERED CROPS, RISKS AND BENEFITS I. (1)
This is Part I of a two-part series of one-credit, graduate-level courses exploring GMO (genetically engineered) crops. In Part I (PPA 630), students will be introduced to what they are; how GMO crops are similar to, and different from, other crops. In Part II (PPA 631), students will explore perceived risks and benefits to the use of these technologies. Prereq: A Bachelor’s degree in any subject; a college-level course in biology or permission of the instructor.

*PPA 631 INTRODUCTION TO GENETICALLY ENGINEERED CROPS, RISKS AND BENEFITS II. (1)
This is Part II of a two-part series of one-credit, graduate-level courses exploring GMO (genetically engineered) crops. In Part I (PPA 630), students will be introduced to what they are; and how GMO crops are similar to, and different from, other crops. In Part II (PPA 631), students will explore perceived risks and benefits to the use of these technologies. Prereq: A Bachelor’s degree in any subject; a college-level course in biology or permission of the instructor.

PPA 640 IDENTIFICATION OF PLANT DISEASES. (3)
Recognition and identification of plant diseases and their causes and development. The course is designed to give students practical experience in dealing with a wide array of plant diseases, symptom expressions, causal agents and interactions with environmental factors encountered in the difficult task of identifying plant diseases. May be repeated to a maximum of nine credits. Lecture, one hour; laboratory, six hours. Prereq: PPA 400G or equivalent or consent of instructor. (Same as PL 640.)

PPA 641 PLANT DISEASE, POPULATION BIOLOGY, AND BIOTECHNOLOGY. (1)
To understand implications of deployment of biotechnology and other disease management practices at the level of host and pathogen populations. Prereq: PPA 400G.

PPA 650 FUNGAL BIOLOGY. (3)
The Fungal Biology course introduces basic mycological concepts, including systematics, anatomy, cell biology, metabolism, developmental biology, ecology, population genetics, and reproduction. There is a focus on modern molecular approaches to these concepts. Students will also learn about the use of fungi in research and biotechnology. Prereq: Undergraduate courses in biology, genetics, and chemistry.

PPA 670 PLANT BACTERIOLOGY. (1)
Bacterial mechanisms underlying pathogenesis and virulence in interactions causing plant disease, and symbiotic compatibility in mutualisms. Prereq: PPA 400G, PPA 500, PPA 600, PPA 640 can be concurrent.

PPA 671 ADVANCED PLANT VIROLOGY. (2)

PPA 673 ADVANCED PLANT DISEASE RESISTANCE. (1)
Bacterial mechanisms underlying pathogenesis and virulence in interactions causing plant disease, and symbiotic compatibility in mutualisms. Prereq: PPA 400G, PPA 500, PPA 600.

PPA 700 PLANT PATHOLOGY LABORATORY VISITS. (1-3)
Semester-long rotations in Plant Pathology laboratories other than the students’ “home lab”. An opportunity will be provided to apply new approaches that are utilized in those labs to the students’ research problems. May be repeated to a maximum of six credit hours.

PPA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PPA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 and a residence credit following the successful completion of the qualifying exams.

PPA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PPA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PPA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PPA 770 PLANT PATHOLOGY SEMINAR. (1)
Reports and discussion of problems and investigations of problems in plant pathology. May be repeated to a maximum of four credits.

PPA 784 SPECIAL PROBLEMS IN PLANT PATHOLOGY. (1-3)
May be repeated to a maximum of nine credits. Prereq: PPA 400G or equivalent or consent of instructor.

PPA 794 RESEARCH IN PLANT PATHOLOGY. (1-9)
May be repeated to a maximum of 30 credits. Prereq: PPA 400G or equivalent or consent of instructor.

PPA 799 TEACHING IN PLANT PATHOLOGY. (1-2)
Discussion of, and experience with, various instructional techniques in plant pathology; effective preparation, presentation and evaluation of lectures and laboratories focusing on plant diseases; practical experience in lectures, teaching laboratories and/or mentoring undergraduate research projects. May be repeated to a maximum of four credits. Prereq: PPA 400G or equivalent.
Course Descriptions

PPH Population Health

PPH 355 SOCIOLOGY OF HEALTH AND ILLNESS. (3)
Who defines health and illness? Why is disease and premature death unequally distributed in society? What social forces cause individuals to get sick or stay healthy? How have changes in the medical profession, the health care system, and public policy affected treatment outcomes and illness experiences? This course addresses these questions through a presentation of important concepts and substantive issues the sociology of health and illness (or medical sociology), and an introduction to major classic and contemporary research in this area. We will compare and contrast sociological perspectives on health with the perspectives offered by biomedicine, psychiatry, and allied disciplines. The course has two major sections: The first covers the social origins of illness—the social construction of illness and biomedical knowledge, social epidemiology, and social influences on personal experiences of illness. The second section covers social and institutional responses to illness and the impact of these on physician-patient interactions, health outcomes, and the distribution of disease. In this section we will examine the medical profession, the health care system, health policy, and the changing nature of these. Class sessions will emphasize group discussions and exercises based on original scholarly writings. Discussions and exercises are designed to encourage the development of analytic skills, recognition of the benefits of collaborative approaches to complex problems, and independent exploration of course material. (Same as SOC 355.)

PPH 499 POPULATION HEALTH CAPSTONE (Subtitle required). (3)
This course provides an integrative experience for Population Health majors in their junior or senior year. The seminar format fosters integration of the program’s interdisciplinary coursework, while providing the opportunity to focus on a particular area of interest within the topical theme of the seminar. Students will engage in a variety of activities designed to increase their understanding of the theoretical and methodological approaches that characterize the Population Health perspective. They will then use this perspective to develop, or to critically analyze, a project that addresses health change. The course will consist of seminar sessions, smaller peer group meetings, and individualized tutorial sessions. Students will learn to critically and respectfully engage with the work of their peers and effectively communicate the results of their projects. Prereq: Junior or Senior standing in Population Health; or consent of instructor.

PPS Pharmacy Practice and Science

PPS 101 PILLS, POTIONS AND POISONS: WHAT YOU NEED TO KNOW ABOUT MEDICATIONS. (3)
Students will examine basic principles of drug action, characteristics of drug dosage forms, important features of a variety of common drug classes, legal requirements of drugs, and contemporary issues with the use of prescription and over-the-counter drugs. These concepts will be discussed with an emphasis on applying this information in common, everyday life situations. Prereq: BIO 152 or equivalent; CHE 105 or equivalent; CHE 107 or equivalent.

PPS 102 COMPLEMENTARY AND ALTERNATIVE MEDICINE: WHAT YOU NEED TO KNOW ABOUT DIETARY SUPPLEMENTS. (3)
Students will learn basic principles of herbs and dietary supplements used for common conditions, how they are regulated by the federal government, marketing of these products, and contemporary issues that have occurred with use of dietary supplements. These concepts will be discussed with an emphasis on applying this information in common, everyday life situations. Prereq: BIO 152, BIO 142 or equivalent; CHE 105 or equivalent; CHE 107 or equivalent.

PPS 520 SPECIAL TOPICS IN PHARMACY LAW. (2)
A broad overview of the regulatory and scientific principles employed in pharmaceutical development including the regulatory framework, and pre-clinical experimentation necessary to initiate a first time in human (Phase I) trial through the objectives, principles, study designs, methods and reporting to evaluate a new pharmaceutical in human. Students will develop an understanding of how certain forms of translational, or “bench to bedside” research must be organized and executed. Prereq: Enrollment in the Colleges of Pharmacy, Dentistry, Law, Medicine or Public Health, the NIH K-30 program, a junior or senior undergraduate, or consent of instructor.

PPS 605 PHARMACOECONOMICS AND DECISION ANALYSIS. (2)
Pharmaceutical Economics and Decision Analysis is designed to equip students with a basic working knowledge and understanding of the application of pharmacoeconomic analysis and the results can be applied to clinical practice. Prereq: ECO 201, PPS 940 and/or permission of instructor.

PPS 665 ETHICAL ISSUES IN CLINICAL RESEARCH. (3)
Based on NIH guidelines for Responsible Conduct of Research, this course will present ethical and regulatory guidelines for conducting clinical research. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills, or permission of instructor. (Same as CPH 665.)

PPS 700 INTRODUCTION TO PHARMACEUTICAL OUTCOMES AND POLICY. (2-3)
This course provides an overview of approaches to the study of pharmaceutical outcomes and public policy. The course is designed to give students an introduction to the field, provide an opportunity to conduct introductory research in one of the various approaches, and experience the research environment through three half day research rotations in selected areas. Prereq: Graduate standing and permission of instructor.

PPS 701 PHARMACOEPIEMIOLOGY. (3)
This course will provide an overview of the field of pharmacoepidemiology and its relationship to health care research. Various topics including methodology and analytical issues relevant to the conduct of pharmacoepidemiologic research will be covered. Time will also be spent reviewing existing papers in the field of pharmacoepidemiology. Prereq: CPH 605 and STA 580 or equivalent; may be concurrent. (Same as CPH 713.)

PPS 702 PHARMACEUTICAL HEALTH POLICY. (2-3)
The purpose of this course is to enable students to think systematically about the pharmaceutical health policy problems and the various strategies for their resolution. This course will cover a range of theoretical and empirical literature on health care and public policy. Topics covered will include a basic understanding of the policy process and policy analysis, and a historical development of the health care system with special focus on quality, access, and cost. In addition, the course covers a range of reform initiatives focused on pharmaceutical policy and regulation. Prereq: Graduate standing and permission of instructor.

PPS 704 PHARMACY INFORMATICS. (2-3)
This course explores the theory and methods of measuring the performance and quality of pharmaceutical health outcomes emphasizing evidence-based practice and quality improvement approaches. Particularly, the course focuses on the use of data and information systems to measure quality, performance, and outcomes. Topics covered include designing and testing outcome based measures, measuring and evaluating satisfaction, measuring and evaluating treatment, risk adjustment, survey methods, patient records, encounter data, administrative data, claims data, and an assessment of the current outcome based standard National Committee on Quality Assurance, HEDIS 2009. Prereq: Graduate standing and permission of instructor.

PPS 706 INTERMEDIATE PHARMACEUTICAL OUTCOMES AND DECISION ANALYSIS. (3)
This course is designed to equip students with a working knowledge and understanding of the application of pharmacoeconomic analysis with an emphasis on critical review of the literature. Prereq: Graduate standing and permission of instructor.

PPS 710 TECHNIQUES IN SECONDARY DATA RESEARCH. (3)
A successful pharmaceutical outcomes and policy researcher must have the ability to independently assess the literature in order to identify a clinically relevant research question, design a study that will address the question and analyze and present the results appropriately to the scientific community. This course will provide an introduction to the conduct of pharmaceutical outcomes and policy research through in-depth didactic and practical instruction on the development, design, and presentation of relevant research study. The course will have two components. Approximately half of the course will involve didactic instruction on specific topics related to the conduct and execution of pharmaceutical outcomes and policy research and half will be a hands-on experience in which the learner develops their own research question and hypothesis, designs a study and begins to analyze an existing healthcare dataset in order to answer a relevant pharmaceutical outcomes and policy question and present the results. Prereq: BST 580 or equivalent.

PPS 750 PHARMACEUTICAL OUTCOMES AND POLICY JOURNAL CLUB. (1)
Pharmaceutical Outcomes and Policy journal club is a weekly meeting scheduled for scholarly discussion and presentation of journal articles and relevant topics (new methodologies, current pharmaceutical policy drugs issues, etc.) pertaining to the fields of pharmaceutical policy and pharmaceutical outcomes.

PPS 760 SPECIAL TOPICS IN PHARMACY PRACTICE AND SCIENCE. (1-4)
This course deals with emerging concepts in Pharmacy Practice and Science which are not covered in other courses. May be repeated under a different subtitle to a maximum of twelve credits. Prereq: Graduate standing and permission of instructor.

PPS 764 DRUG DEVELOPMENT REGULATION AND CLINICAL RESEARCH. (3)
A study of the pharmaceutical development process and its regulation, including a detailed examination of clinical research methodologies. Students will demonstrate their competence by developing a clinical trial protocol. Prereq: Enrollment in the Pharmaceutical Sciences graduate program or consent of instructor.

PPS 773 DISSERTATION RESIDENCY CREDIT. (1)
The opportunity to complete a dissertation under the direction of a faculty member. Prereq: Consent of instructor.

PPS 777 SEMINARS IN PHARMACY PRACTICE AND SCIENCE. (1)
Reports and discussion of pertinent research and literature in pharmaceutical outcomes and policy. Required of all graduate students. Prereq: Graduate standing and permission of instructor.

PPS 790 RESEARCH IN PHARMACY PRACTICE AND SCIENCE – PRE QUAL. (1-12)
Research work to be conducted in selected areas of pharmacy practice and science. Prereq: Graduate standing and permission of instructor.
PPS 910 INTRODUCTION TO PHARMACY PRACTICE. (3)
An introduction to the practice of pharmacy within the major practice settings. Includes an introduction to the profession and discussions of the pharmacist within the health care system, professional pharmacy organizations, models and sites of practice, postgraduate educational settings and the justification, establishment and evaluation of clinical pharmacy services. Prereq: PHR 831, PPS 848.

PPS 913 PHARMACOLOGICAL BASIS OF THERAPEUTICS: ANTIBIOTICS. (3)
A study of the pathophysiology and microbiology of infectious diseases concentrating on the pharmacology of the therapeutic agents (antibiotics) used to treat those diseases, including discussion of their rational use. Variable mixture of lecture, discussions and independent study. Prereq: Admission to the first year College of Pharmacy.

PPS 916 NONPRESCRIPTION PHARMACEUTICALS AND SUPPLIES. (2)
A study of various nonprescription pharmaceuticals, medical and surgical supplies and appliances commonly found in ambulatory pharmacy practice sites, their rational use and therapeutic efficacy. Decision making skills for ambulatory patient triage are emphasized. The use of home remedies and their limitations in the treatment of minor ailments is considered. Variable mixture of lecture, discussions and independent study. Prereq: Admission to the first year College of Pharmacy.

PPS 919 PATIENT CARE LABORATORY I. (1)
An integration and application of the skills needed to fill the professional responsibilities of pharmacy practice as they relate to patient centered care and the patient care process, utilizing principles taught in the corequisite courses to provide the contextual framework for the skills considered. Prereq: Admission to the first year College of Pharmacy. Coreq: All concurrent PHR 91X series courses.

PPS 920 COMMUNICATION AND BEHAVIOR IN PHARMACY PRACTICE. (3)
An introduction to the social and behavioral issues that impact health including their influence on the pharmacist-patient relationship and the ability of the pharmacist to provide patient care. Includes discussions of stress and stress coping, communication with patients and other health care professionals, cultural and religious influences on patient compliance and disease management, and required community service experiences. Prereq: PPS 910 and PPS 919.

PPS 922 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: NUTRITION, HEALTH PROMOTIONS. (3)
Consideration of the role of the pharmacist in health promotion and disease prevention including both pharmacologic and non-pharmacologic methods. Major problems of nutrition and certain metabolic/chronic disorders for which nutrition plays a pivotal role will be addressed including hypertension, cancer, and eating disorders. In addition the pharmacology of drugs affecting the gastrointestinal tract and drugs used to treat common gastrointestinal problems are discussed. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PPS 926 NONPRESCRIPTION PHARMACEUTICALS AND SUPPLIES II. (2)
A continuation of PPS 916. Variable mixture of lecture, group discussions and independent study. Prereq: Admission to the first year, College of Pharmacy and PPS 916.

PPS 929 PATIENT CARE LABORATORY II. (1)

PPS 930 LEGAL, ETHICAL, AND ACCESS ISSUES IN PHARMACY. (4)
The legal, ethical and access issues affecting the practice of pharmacy. Course includes community service experiences. Prereq: PPS 920.

PPS 939 PATIENT CARE LABORATORY III. (2)
A continuation of PPS 929. Prereq: PPS 929. Coreq: All concurrent PHR 93X series courses.

PPS 940 EVIDENCE BASE FOR PHARMACY PRACTICE. (4)
A discussion of the evidence base for pharmacy practice including sources of drug information, drug study design, applied data analysis, and biostatistics in the interpretation and critical analysis of biomedical literature and the purpose of developing evidence based care recommendations for a given patient or patient population. The course is implemented using a variety of educational methods including lectures, structured reading of biomedical literature, and practice in developing protocols to address various health-related research questions. Course includes community service experiences. Prereq: PPS 930.

PPS 946 ADVANCED PHARMACOTHERAPY I. (5)
An advanced study of the pathiology, pharmacology and optimal treatment of common diseases. Through a series of case studies students will acquire and or reinforce their skill at understanding diseases and developing and evaluating optimal treatment plans for successfully managing those diseases. The case studies utilized will integrate relevant pathophysiological, pharmacokinetic, pharmacoeconomic and pharmacological concepts with appropriate patient specific parameters. Students will be expected to communicate and defend their decisions, including the process followed in making those decisions, in understandable, appropriate written and verbal formats. Variable mixture of discussion, lecture, independent study and laboratory. Prereq: PHR 93X series courses; coreq: PHS 947 and PPS 949.

PPS 948 INTRODUCTORY PHARMACY PRACTICE EXPERIENCE II. (4)
A continuation of PPS 928 – Introductory Pharmacy Practice Experience I. Prereq: Successful completion of required PHR 940 series courses and consent of instructor.

PPS 949 PATIENT CARE LABORATORY IV. (1)

PPS 950 PHARMACEUTICAL POLICY AND PUBLIC HEALTH. (4)
An introduction to health economics, pharmaceutical policy and public health, including issues of access to and disparities in healthcare and pharmaceuticals, health and disease indicators, health promotion, emergency preparedness, and the involvement of the pharmacist in public health and pharmaceutical policy. Course includes community service experiences. Prereq: PPS 940.

PPS 953 CURRENT TOPICS IN PHARMACY SEMINAR. (1)
A seminar course dealing with some of the current clinical and nonclinical issues affecting health care and health care practitioners. Prereq: PPS 940.

PPS 957 ADVANCED PHARMACOTHERAPY II. (5)
A continuation of PPS 946. Variable mixture of discussion, lecture, independent study and laboratory. Taught part of term. Prereq: Admission to third year, College of Pharmacy. co-reg: PPS 959.

PPS 959 PATIENT CARE LABORATORY V. (2)

PPS 960 PHARMACY PRACTICE MANAGEMENT. (5)
A discussion of pharmacy practice management in both community and health system practice settings including general business, human, financial, and operations management, and quality assurance/risk management issues. Course includes community service experiences. Prereq: PPS 959.

PPS 966 ADVANCED PHARMACOTHERAPY III. (5)
A continuation of PPS 957. Variable mixture of discussion, lecture and independent study. Taught part of term. Prereq: Admission to the third year, College of Pharmacy; PPS 957, 959; co-reg: PPS 969.

PPS 967 ADVANCED PHARMACOTHERAPY IV. (5)
A continuation of PPS 966. Variable mixture of discussion, lecture and independent study. Taught part of term. Prereq: Admission to third year College of Pharmacy; PPS 957, 959; co-reg: PPS 969.
Course Descriptions

PPS 969 PATIENT CARE LABORATORY VI. (2)

PPS 971 INTRODUCTION TO ANTIACOGULATION. (2)
The intent of this eight week, two credit hour, elective course is to provide students with a working knowledge of basic anticoagulation concepts sufficient to enhance their participation in advanced pharmacy practice experiences and in practice as a pharmacist. Students should expect to spend approximately four hours per week on class related activities. Preq: Students must be enrolled for the summer session and have satisfactorily completed all requirements of the PY2 year. Students will be expected to employ knowledge and understanding of material from all previous and concurrent courses in the College of Pharmacy.

PPS 972 INTRODUCTION TO THE ADVANCED PHARMACOTHERAPY GATEWAY AND PHARMACY RESIDENCY TRAINING. (2)
This course introduces students to the concepts of the pharmacist’s involvement in research, education, post-graduate training, and to local sites of scholarly clinical pharmacy practice. The course will provide information and tools for pursuing post-graduate training, including a curriculum vitae and foundational education on human subject protection and residency training. Preq: Student in good standing in the second professional year of the College of Pharmacy curriculum.

PPS 973 INTRODUCTION TO CRITICAL CARE PHARMACY. (2)
Advanced, clinically-focused course building on critical care foundation provided in PPR 956/PPS 957. Preq: Successful completion of PPR 956/PPS 957.

PPS 974 CLINICAL ASPECTS OF PRESCRIPTION MEDICATIONS. (2)
A discussion of the clinical aspects of prescription medications designed to supplement, integrate and enhance the material covered in the Patient Care Laboratory course series (PPR 919-969) and the Advanced Pharmacy course sequence (PPS 946, PPR 956, PPS 957, PPS 966 and PPS 967). Emphasis is placed on 1) critical analysis of the important difference between various drugs, drug classes, and 2) refining drug information and clinical communication skills through simulated written drug consuls and oral exams involving other health care practitioners. Preq: PPR 956 and PPS 957. Coreq: PPS 960, 966, 967 and 969.

PPS 975 EMERGENCY MEDICINE. (2)
Emergency Medicine is an evolving and increasingly recognized practice area for clinical pharmacists. As interest and professional opportunities continue to expand in this therapeutic arena, it is imperative for students to become cognizant of the various aspects of this unique specialty. Emphasis of this course will be on the collection of various therapeutic areas, so this course will not only serve to expose the learner to many new and exciting topics but also serve as a refresher of many topics that are briefly covered in the regular curriculum with an added emphasis on the rapid treatment of the undifferentiated patient. Preq: PY3.

PPS 976 COMPUTER AND INFORMATION TECHNOLOGIES IN PHARMACY. (2)
A discussion and introduction to the use of computer and other information technologies, such as Personal Data Assistants (PDAs) and patient management software, as aids to providing more effective and efficient pharmaceutical care services. Lecture: 1 hour; laboratory, 2 hours per week. Preq: Admission to the second or third year, College of Pharmacy.

PPS 977 HERBS AND DIETARY SUPPLEMENTS. (2)
This Blackboard-based elective course focuses on herbs and dietary supplements used for common conditions. The evidence-based course includes readings with weekly quizzes and sets of discussion questions. The course prepares pharmacy students to assist patients in the appropriate use of these products. Preq: Admission to IPP 1, College of Pharmacy.

PPS 978 PEDIATRIC PHARMACOTHERAPY. (2)
This course explores additional information relating to pediatric drug therapy and factors that build on the existing knowledge base of the student, to prepare students to address drug-related problems in the pediatric patients and to demonstrate competency in evaluating patient drug therapy in at least two patients as well as numerous case scenarios. Since the class size is kept at about 15 students, a seminar and hands on approach to simulations will be done along with didactic teaching and group discussion. Materials will be provided to supplement classroom interaction; at least one laboratory experience is planned. Discussions will be provided to allow the interchange necessary to explain individual judgments. Active learning processes will be employed in order to facilitate inter-professional communication skills and to allow student’s exposure to a variety of pediatric pharmacy practitioners. The course is presented in a series of therapeutic modules facilitated with the use of Blackboard® technology. Preq: Permission of instructor.

PPS 979 TOXICOLOGY IN CLINICAL PRACTICE. (2)
Potentially any substance can be considered a poison if enough of it is ingested, and patients who ingest chemicals, drugs and dietary supplements are commonly seen in clinical practice. This elective course will help develop the pharmacy student’s knowledge of the toxic effects of chemicals and drugs when humans are exposed to these agents in acute/toxic overdoses. In addition, the course will emphasize how to prevent exposures, and drug therapy associated with each type of ingestion. This elective is highly recommended for students interested in critical care and/or emergency medicine as clinical toxicology consultations are an element of practice in these areas. Coreq: PY 3 core courses.

PPS 980 BEHAVIOR MODIFICATION COACHING. (2)
This elective course is a companion course to the Behavior Modification Project that is part of the PPS 923 Nutrition, Health Promotion, Disease Prevention course. Each student will serve as the coach for a group of 5-6 PY1 students as they complete their semester long project. Coaches will conduct weekly meetings, review student record keeping, provide motivation and accountability to PY1 students, and serve as role models in behavior modification. Coaches also develop skills in human resource management. Preq: Admission to PPS 923 Nutrition, Health Promotion, Disease Prevention.

PPS 981 THINKING CREATIVELY FOR INNOVATION. (2)
This 2 credit course revolves around developing the creative and critical thinking skills necessary for innovation and change. This involves exercises and activities to help students develop original and creative solutions to problems. The objective of this course is to equip students with skills to think through, develop and present original, creative ideas that have the potential to contribute to improvement and/or innovation in the healthcare professions. Preq: Advancement to PY 2 or PY 3 year in the College of Pharmacy.

PPS 982 INTRODUCTION TO ISSUES IN CLINICAL RESEARCH AND THE INVESTIGATIONAL DRUG SERVICE. (2)
This course is designed to introduce elements of the Investigational Drug Service (IDS) and clinical research operations from a pharmacy perspective. The course will present an overview of clinical research operations and the regulatory bodies that govern research in both hospital and outpatient settings, while focusing on the roles of pharmacists and the interactions of the IDS with the other members of the clinical research team. Emphasis is on 1) an analysis of the investigational drug service, clinical research operations and the many roles involved, 2) opportunities for pharmacists in clinical research and potential pathways to those opportuni- ties. Preq: Successful advancement to the third professional year (PY3) in PharmD program, or with permission of the instructor if a current PY2 student.

PPS 984 PRACTICAL APPLICATIONS OF PHARMACY PRACTICE. (2)
This course is intended for students who want to enhance their knowledge of therapeutics and apply it to patient cases. Dosing and preparation of medications will also be a focus, since these topics are not covered in depth in other courses. The other primary emphasis of this class will be on introducing the students to other common topics that will come up while they are on their various student rotations (e.g., IV compatibilities, infusion pumps, ventilator settings, etc.)

PPS 985 CONTROVERSY IN EMERGENCY MEDICINE. (2)
Emergency Medicine is a potential area of practice for pharmacists. Emergency Medicine involves and interrelates to a number of pharmacy therapeutic areas. This course will address in more detail several topics that are briefly covered in the PharmD curriculum and emphasize how to make clinical decisions with limited information and at a moment’s notice. This course will also provide students with insight into some of the controversies surrounding some of the more common controversies in this practice setting and give them experience analyzing the primary literature.

PPS 986 INTRODUCTION TO ACADEMIC PHARMACY. (2)
Students will learn about basic elements of a career in academia, including faculty appointments and professional program accreditation. Students will also learn the fundamentals of teaching in higher education, including distance learning, lesson planning, and student engagement. This course will culminate with a final presentation, including a lesson plan, on a pharmacy topic of the student’s choice. Preq: Admission to U.K College of Pharmacy third academic year (PY3) and/or permission of instructor.

PPS 988 ADVANCED PHARMACY PRACTICE EXPERIENCE. (3-6)
A clinical experience in the use of drugs in the diagnosis, treatment and management of diseases. Emphasis is placed on a rationale of drug therapy, the provision of contemporary pharmaceutical care services and functioning as a member of an interdisciplinary health care team. Experiences will be obtained in a variety of areas and may involve on-call and evening/weekend responsibilities. May be repeated to a maximum of 48 credits. Laboratory, 40 or more hours per week. Preq: Admission to the fourth year, College of Pharmacy and permission of instructor.

PPS 990 SUBSTANCE USE DISORDERS: HEALTH IMPLICATIONS, POLICIES AND PREVENTION STRATEGIES. (3)
This course provides an overview of the impact of alcohol, tobacco, and other drug use disorders on individuals and populations from the local, state, national and international perspectives. Topics include methods for measuring the impact of substance use disorders, risk and protective factors, prevention strategies and policies, “harm reduction”, and the relationship between substance use disorders and crime. Preq: Professional student status.

PPS 991 ADVANCED COMMUNITY PRACTICE. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in the community setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Preq: Admission to the fourth year, College of Pharmacy and permission of instructor.

PPS 992 ADVANCED COMMUNITY HOSPITAL. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in the community hospital setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Preq: Admission to the fourth year, College of Pharmacy and permission of instructor.

University of Kentucky
2016-2017 Undergraduate Bulletin
594
PS 993 AMBULATORY CARE PRACTICE.  (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in an ambulatory setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PS 994 ACUTE CARE/INPATIENT PRACTICE.  (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in an acute care/inpatient setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PS 995 PATIENT CARE PRACTICE ELECTIVE.  (6)
This course is an advanced pharmacy practice experience (APPE) elective focused on the prevention, diagnosis, treatment and management of disease in patients receiving care in a variety of settings, including community, hospital, long-term care, and specialized clinics. Emphasis is placed on integrating knowledge of therapeutics and pathophysiology in the provision of care to patients, providing drug therapy management, delivering contemporary patient care services, and functioning as a member of an interdisciplinary health care team. Prereq: Admission to the fourth year, College of Pharmacy, and permission of the instructor.

PS 996 NON-PATIENT CARE PRACTICE ELECTIVE.  (6)
This course is an advanced pharmacy practice experience (APPE) that allows the student to sample pharmacy practice opportunities outside of the required experiences. An elective experience may be selected (but not limited to) in the following areas: Practice management administration, pharmacy education, pharmacoeconomics, pharmacopidemiology, research, pharmaceutical industry, association management, governmental, and international experiences. Prereq: Admission to the fourth year, College of Pharmacy, and permission of the instructor.

PRO Prosthodontics

PRO 820 PRECLINICAL COMPLETE DENTURE PROSTHODONTICS (LECTURE).  (2)
This preclinical lecture course provides an introduction to basic concepts of diagnosis and treatment planning, placement and maintenance of complete dentures, as well as the related biological and mechanical factors that must be incorporated for living tissue to be compatible with complete dentures. Prereq: Advancement to Second Year standing or consent of course director. Coreq: PRO 822.

PRO 821 CLINICAL COMPLETE DENTURE PROSTHODONTICS.  (1)
The treatment of a patient with complete maxillary and mandibular denture needs is performed in the clinic by the student. The student will assist an upper level student in the examination of a complete denture and a removable partial denture recall patient. Clinic, 52 hours. Coreq: PRO 820.

PRO 822 PRECLINICAL COMPLETE DENTURE PROSTHODONTICS (LAB).  (2)
This preclinical laboratory course provides an introduction to basic concepts of fabrication of complete dentures as well as the related biological and mechanical factors that must be incorporated for living tissue to be compatible with complete dentures. Prereq: Advancement to Second Year standing or consent of course director. Coreq: PRO 820.

PRO 824 REMOVABLE PARTIAL DENTURES.  (2)
This course is designed to teach the student the basic principles and the practical procedures in providing a therapeutic and functional removable restoration. The course also presents the laws and effects of leverages as related to removable partial dentures as well as the considerations for support, occlusion, and health of all oral structures. Lecture, 19 hours; laboratory, 45 hours. Prereq: PRO 820.

PRO 830 ADVANCED REMOVABLE PROSTHODONTICS.  (1)
This course is a continuation of PRO 820. It presents more advanced technique and treatment planning for complex prosthodontic needs. Subjects included are immediate dentures, overdentures and dental implants. Lecture, 21 hours. Prereq: PRO 820 and PRO 824.

PRO 831 CLINICAL REMOVABLE PROSTHODONTICS.  (2)
A patient with complete denture needs is treated by the student clinically in the course. The student may opt to treat a patient with intermediate, incomplete or overdenture needs. He may initiate and/or complete the treatment of two patients with removable partial denture needs. The student may also treat an optional, additional patient in need of a complete or removable partial denture. The student will recall a minimum of two removable prosthodontic patients and perform on treatment planning for these patients. Clinic, 110 hours. Prereq: PRO 821; coreq: PRO 830.

PRO 834 PRECLINICAL RESTORATIVE DENTISTRY III.  (4)
This is a preclinical course with emphasis on dental hard tissue surgery and restorative procedures for anterior and posterior fixed prosthodontics. Contemporary principles of fixed prosthodontics, including the long term maintenance of dental health, are presented in lectures and applied in practice using manikins. Knowledge gained in previous restorative dentistry courses are applied to more extensive restorations. Lecture, 24 hours; laboratory, 84 hours. Prereq: RSD 822, 823, 824, 825 and 826.

*PRO 836 ADVANCED FIXED PROSTHODONTICS AND TREATMENT PLANNING.  (2)
This course is a lecture series concerning diagnosis and treatment planning for fixed prosthodontics and the principles of providing that care. The relationship of tooth restoration and replacements to occlusion, periodontics, orthodontics and removable prosthetics in both treatment planning and treatment is emphasized. Lecture, 30 hours. Prereq: PRO 824, PRO 834, and DS 833; and consent of course director.

PRO 841 ADVANCED CLINICAL REMOVABLE PROSTHODONTICS.  (2)
This course covers basically the same area as PRO 831 with the exception that the student is to treat patients with complete denture needs with less supervision from the instructors. If not done previously, the student must initiate and complete the treatment of two patients with removable partial denture needs. The student will recall three removable prosthodontic patients and will perform any treatment necessary for these patients. Clinic, 114 hours. Prereq: PRO 831.

PS Political Science

Note: It is assumed that all prerequisites include, in addition to any specific course listed, the phrase “or equivalent,” or “consent of instructor.”

PS 101 AMERICAN GOVERNMENT.  (3)
A survey of national government and the political process in the United States, with emphasis on the Constitution, the President, Congress, and the judicial system.

PS 210 INTRODUCTION TO COMPARATIVE POLITICS.  (3)
A general introduction to the domestic politics of countries in the various regions of the world, with an emphasis on the concepts used to understand why political issues and processes differ across developed and developing nations. Students also learn how domestic politics are shaped by super-national institutions and by national integration into a global economy.

PS 230 INTRODUCTION TO INTERNATIONAL RELATIONS.  (3)
An introduction to world politics, with an emphasis on conflict and compromise at the international level but also considering domestic political interactions with global consequences. Students learn how social scientists analyze international relations in a variety of settings, including both military/defense and economic.

PS 240 INTRODUCTION TO POLITICAL THEORY.  (3)
An introduction to modern political thought as it relates to debates over the meaning of democracy, citizenship, justice, authority, and identity. Readings and discussions center on the themes and ideologies dominant in Western political theory, but also will explore contemporary challenges to that tradition, such as feminist political theory and the work of theorists concerned with what is popularly called globalization.

PS 360 POLITICS OF LAW AND COURTS.  (3)
A survey of the actors in American government and society who shape the meaning of the law, focusing especially on the judiciary. The course will outline the structure of the judicial system including both state and federal courts as well as the judicial process followed within that system. Prepares students for advanced study in public law and judicial politics. Prereq: UN2 status.

PS 363 CRIMINAL COURTS AND PROCESS IN THE U.S.  (3)
The course is an introduction to the criminal-court process in the United States. The course covers how the criminal process is organized, outlines the steps and actors in the criminal process, and explores the impact of criminal justice on society. Prereq: UN2 status.

PS 372 INTRODUCTION TO POLITICAL ANALYSIS.  (3)
Introduction to the basic knowledge of research methodology in political science; a review of methods of data collection; historical, quantitative and comparative techniques of analysis. Prereq: UN2 status; PS majors only.

PS 381 SPECIAL TOPICS IN POLITICAL SCIENCE (Subtitle required).  (3)
Course will focus on selected topics drawn from various areas of political science taught by faculty members with special interests and competence. May be repeated in courses of differing topics to a maximum of 12 credits. Prereq: UN2 status.

PS 395 INDEPENDENT WORK.  (1-6)
Consent of instructor. May be repeated to a maximum of 12 credits. Prereq: A standing of 3.0 in political science courses.

PS 399 INTERNSHIP IN GOVERNMENT.  (1-6)
This course is designed for students who are participating in a state, local or federal internship program with which the political science department is associated. The student must have approval of the department chairperson upon the recommendation of the Committee on Internship and Experiential Education to take the course, negotiate a learning contract with a departmental academic advisor, and provide the department with a report or a paper on his internship. Pass/Fail only. May be repeated to a maximum of 12 credits.
PS 410 TOPICS IN REGIONAL POLITICS (Subtitle required). (3)
A survey of politics and government in one region of the world. The course will consider the
region’s unique political character, but also explain how and why nations within the region differ
from each other politically. Some sections will compare and contrast a region’s political
systems in general, whereas others may be more specialized topicially. May be repeated to a
maximum of 12 credits under differing subtitles. Prereq: PS 210 or PS 212.

PS 415G COMPARATIVE JUDICIAL POLITICS. (3)
A comparison of the judicial institutions operating across a wide variety of political systems.
Emphasis will be on topics such as why different nations or regions evolve different types of
courts, how those courts gain legitimacy with the public, and what forces shape the behavior
of judges serving in these various court systems. Prereq: PS 210, PS 212, or PS 360.

PS 417G SURVEY OF SUB-SAHARAN POLITICS. (3)
A survey of sub-Saharan government and politics intended to give the student broad knowledge
about the setting of African politics, precolonial African political systems, the political legacies
of major European colonial powers, and problems of political development. Prereq: PS 210
or 212. (Same as AAS 417G.)

PS 419G THE GOVERNMENTS AND POLITICS OF EASTERN ASIA. (3)
A comparative analysis of the modern political experiences of China and Japan, exploring
their responses to the West, the development of differing political elites in each country, and
contemporary problems of the Chinese Communist and Japanese politics. Prereq: PS 210 or
212.

PS 420G GOVERNMENTS AND POLITICS OF SOUTH ASIA. (3)
A comparative analysis of contemporary political development in India, Pakistan, Bangladesh
and Sri Lanka, with emphasis on political cultures, participation, institutions and the
capabilities of these political systems. Prereq: PS 210 or 212.

PS 427G EAST EUROPEAN POLITICS. (3)
This course is meant to provide an opportunity for advanced undergraduates and graduate
students to (1) understand the historical, socioeconomic and philosophical context of the
communist party states in Eastern Europe, (2) to learn who governs in Eastern Europe and the
structures through which they rule, (3) to assess the “dynamics” of communist politics, i.e.,
factors contributing to political change via a vis-political continuity. Prereq: Junior or senior
standing and instructor’s written permission.

PS 428G LATIN AMERICAN GOVERNMENT AND POLITICS. (3)
A study of contemporary Latin American political institutions and of the dynamics of the Latin
American political process. Prereq: PS 210 or 212.

PS 429G GOVERNMENT AND POLITICS IN RUSSIA
AND THE POST-SOVIET STATES. (3)
Analysis of political development in the Soviet Union with emphasis on party-government
relations, Communist ideology, and major approaches to the study of Soviet politics. Prereq:
PS 210 or 212.

PS 430G THE CONDUCT OF AMERICAN FOREIGN RELATIONS. (3)
The formulation of American foreign policy from several analytic perspectives, with somewhat
more emphasis on inputs and process than on substantive outputs. Prereq: PS 101 or consent
of instructor.

PS 431G NATIONAL SECURITY POLICY. (3)
The organization and formulation of military policy; the theory and practice of deterrence,
and the problems of disarmament and arms control. Prereq: PS 235 or consent of instructor.

PS 433G POLITICS OF INTERNATIONAL ECONOMIC RELATIONS. (3)
The course examines contending theoretical approaches to global political economy. These
approaches are used to analyze various issues of global political economy, such as the
international monetary system, multinational corporations, foreign aid, and trade. Prereq:
PS 235.

PS 436G INTERNATIONAL ORGANIZATION. (3)
a study of the evolution of international organizations in the 20th Century. Examination of
the increasing size, complexity, and diversity of contemporary global and regional international
organizations. The role of international organizations in future world order.

PS 437G DYNAMICS OF INTERNATIONAL LAW. (3)
An examination of the politics of the development of international law and its operation in a
multicultural world. Legal principles and international political processes are discussed through
illustrative issue areas: management of conflict; distribution of territorial resources; environ-
mental problems; and human rights. Prereq: PS 235 or PS 360.

PS 439G SPECIAL TOPICS IN INTERNATIONAL RELATIONS
(Subtitle required). (3)
Course will focus on selected advanced topics in international relations drawn from various
areas of that field of political science, taught by faculty members with special interests and
competence. May be repeated in courses of differing topics for a maximum of 9 credits. Prereq:
PS 235.

PS 441G EARLY POLITICAL THEORY. (3)
A survey of political theorists in the Western political tradition from classical Greece to the
Renaissance. The formative influences upon our conceptions of politics, citizenship, justice,
and natural rights will be highlighted and key issues in controversies over rhetoric and
philosophy, time and political order, education and the body politic, and political action and
human artifice will be illuminated.

PS 442G MODERN POLITICAL THEORY. (3)
Western political theory from Machiavelli to Marx and Weber with emphasis on the impact
of early modern culture and liberalism upon contemporary views of power, individualism,
community, and political consciousness. Key contributions of modern political theorists to
dependent debates on power and the intellectual, institutional bases of modern constitutional-
ism, human nature and aggression, the sources of alienation, and the relation of modern science
and technology to contemporary forms of domination will be explored.

PS 456G APPALACHIAN POLITICS. (3)
A study of the interrelationships of the Southern Appalachian region and its people with the
larger American political system, culture, and economy. Selective examination of public
policies and major issues and their development in the politics of the region.

PS 458 AMERICAN STATE AND LOCAL GOVERNMENT. (3)
A comparative examination of subnational governments, especially state governments but also
smaller units such as cities, counties, and school districts. Readings and discussions will explore
the variety of institutions and policies found across the United States, seeking an understanding
of why places differ from each other politically. The course also will examine the relationship
between the national government and the states. Prereq: PS 101; UN2 status.

PS 461G CIVIL LIBERTIES. (3)
A study of the philosophy and development of civil liberties in the U.S. Major concentration
on the interpretation of constitutional guarantees by the Supreme Court. Prereq: PS 360.

PS 463G JUDICIAL POLITICS. (3)
A survey of how political influences, and in turn is influenced by, the behavior of judicial
institutions and the judges who staff them. Draws heavily on the social science literature
studying judicial behavior, the structure of the court system, and the implementation of legal
rulings. Prereq: PS 101 and UN2 status.

PS 465G CONSTITUTIONAL LAW. (3)
A non-chronological study of major Supreme Court decisions and recent issues relating to
separation of powers, federalism, the commerce clause, taxes, criminal justice and other non-
civil liberties areas. Prereq: PS 360.

PS 470G AMERICAN POLITICAL PARTIES. (3)
An analysis of American national and state party systems, organization, and functions;
nominations and elections; and voting patterns. Prereq: PS 101; UN2 status.

PS 471 RACE, ETHNICITY AND POLITICS. (3)
An examination of the role that race and ethnicity play in the political arena. Students will
explore the nature of race, racism, and ethnocentrism, as well as their impact on political
institutions and public policy. Particular attention will be given to elections, public opinion,
media and social movements in the United States. (Same as AAS 471.)

PS 472G POLITICAL CAMPAIGNS AND ELECTIONS. (3)
An analysis of individual voting behavior and candidate strategies during presidential and
congressional elections. The effect of the mass media, political action committees, and political
advertising on the vote decision is examined. Attention is also devoted to candidates’ campaign
organizations and communication strategies. Prereq: PS 101; UN2 status.

PS 473G PUBLIC OPINION. (3)
An introduction to the nature and content of public opinion, how polls are conducted, the
political effects of polling, and the role of public opinion in the policymaking process. Prereq:
PS 101; UN2 status.

PS 474G POLITICAL PSYCHOLOGY. (3)
An exploration of different models of political behavior, based on concepts of psychoanalysis,
behaviorism, humanism, and social psychology. Prereq: PS 101 and PSY 100 or equivalent,
or consent of instructor.

PS 475G POLITICS AND THE MASS MEDIA. (3)
The ways the modern mass media affect the dynamics of politics in the United States are
examined in this course. Specific topics include the impact of television on political discourse;
the structure and ownership of mass media; how news is made and how it influences our political
attitudes and behaviors; the role of the media in campaigns, elections and policy making.
Prereq: PS 101.

PS 476G LEGISLATIVE PROCESS. (3)
A study of Congress and the state legislatures, covering the legislative power structure, legislative
committees, the selection of legislators and the roles they play, decision making, and
the relations of the legislative and executive branches. Prereq: PS 101; UN2 status.

PS 479 WOMEN AND POLITICS. (3)
A study of the role of women as political actors in the United States including the status of
women in American society and the contribution of government policy to maintaining or
changing that status. The political behavior of women at the mass and elite level will be examined.

PS 480G GOVERNMENT AND THE ECONOMY. (3)
This course analyzes the relationship between political and economic systems in the modern,
democratic, capitalist state. While the focus is primarily upon the United States, other political/
economic systems as well as more general theoretical statements will be considered. Prereq:
PS 101 and ECO 101 or equivalent.
PSY 195 ORIENTATION TO PSYCHOLOGY.
(1)
An orientation to educational issues and career planning for students who have declared psychology as a major. Topics include career paths and opportunities, professional resources and issues, and educational planning. Pass/Fail only. Prereq: Declared major in Psychology, or consent of instructor.

PSY 215 EXPERIMENTAL PSYCHOLOGY.
(4)
A study of the application of scientific methods to psychological research. Special emphasis is placed on the critical evaluation of contemporary research in experimental psychology. Particular attention is focused on the design, execution, and written report of laboratory research. Lecture, three hours; laboratory, two hours. Prereq: PSY 100 or equivalent and PSY major or PSY minor, or consent of instructor. Registration is open only to PSY majors during the priority registration window.

PSY 216 APPLICATIONS OF STATISTICS IN PSYCHOLOGY.
(4)
An introduction to statistical procedures used in making decisions based on psychological data. May not be used to satisfy the laboratory requirement in the College of Arts and Sciences. Lecture, three hours; laboratory, two hours. Prereq: PSY 100 or equivalent and PSY major, or consent of instructor.

PSY 223 DEVELOPMENTAL PSYCHOLOGY.
(3)
An introduction to the principles of developmental psychology as seen in human growth over the entire lifespan, with the primary focus on infancy through adolescence. Emphasis is placed on theory and data relating to the developmental aspects of cognition, language and personality. Prereq: PSY 100 or equivalent.

PSY 302 PSYCHOLOGY IN BUSINESS AND INDUSTRY.
(3)
Survey of the many applications of psychological principles and methods to problems in business and industry. Topics include consumer research and marketing, personnel selection, performance appraisal, employee training, motivation, leadership, dynamics of work groups, job stress, and person-machine interactions. Prereq: PSY 100 or equivalent.

PSY 305 INTRODUCTION TO NEUROSCIENCE TECHNIQUES.
(4)
This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent. (Same as ANA/BIO 305.)

PSY 311 LEARNING AND COGNITION.
(3)
Theory and experimental techniques in the study of learning and cognition. Emphasis on research in the biological basis of learning, perceptual processing, classical conditioning, instrumental conditioning, memory, and language. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

*PSY 312 BRAIN AND BEHAVIOR.
(3)
An introduction to structural and functional characteristics of the nervous system. The emphasis is on exploring the relationship between brain and behavior. Topics range from simple structures and behaviors to more complex functions. The biological basis of normal and abnormal behavior is explored from a multidisciplinary perspective. Prereq: PSY 100 or equivalent and PSY 215 or PSY 216 or STA 296 and declared major or minor in psychology or neuroscience. Registration is open only to psychology and neuroscience majors during the priority registration window.

PSY 313 PERSONALITY AND INDIVIDUAL DIFFERENCES.
(3)
An introduction to the psychology of individual differences, theories of personality and personality development. Individual differences in cognitive ability and personality will be addressed. Differing theoretical approaches to personality will be covered. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

PSY 314 SOCIAL PSYCHOLOGY AND CULTURAL PROCESSES.
(3)
A selective survey of classic and contemporary theories and research in social psychology from a multicultural perspective. Topics will include social perception, the self, attitudes, aggression, prejudice, and group processes. Credit is not given to students who already have credit for PSY/SOC 344. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

PSY 320 INTRODUCTION TO FORENSICS: PSYCHOLOGY AND LEGAL ISSUES.
(3)
This course examines the implications of psychological theory and methods for law and the criminal justice system. There is a concentration on psychological research on legal topics (e.g., confessions, eyewitness testimony, jury decision-making, sentencing), social issues (e.g., theories of crime, the death penalty, children and the legal system, race and legal issues, victims of crime), and on psychologists as an important component of the legal system (assessing insanity, competence to testify, criminal profiling).

*PSY 331 THE PSYCHOLOGY OF ADJUSTMENT.
(3)
Theoretical and empirical analysis of how people adjust to positive and negative life stressors (e.g., immigration, marriage, death loss, and diagnosis of a chronic disease). Topics will include hope, personality, mindfulness, post-traumatic stress, substance use, and social support. Prereq: PSY 100 or equivalent.
PSY 333 ABNORMAL PSYCHOLOGY. (3) A study of the major mental disorders, such as anxiety, mood, substance use, personality, and psychotic disorders, and the biological, psychological, and sociological factors which contribute to their causation. Prereq: PSY 100 or equivalent and one of the following: PSY 215, 216, or 223.

PSY 344 SOCIAL PSYCHOLOGY. (3) Theoretical and empirical analysis of individual behavior in the social setting with particular emphasis on social learning, motivation, and the measurement, formation, and changing of social attitudes. (Note: Not open for graduate credit to graduate students in Psychology and Sociology.) Credit is not given to students who already have credit for PSY 314. Prereq: PSY 100 or equivalent or permission of instructor. Credit may not be received for both PSY 344 and PSY 352.

#PSY 350 CAREERS IN PSYCHOLOGY. (3) This course is designed as an introduction to various career opportunities for students earning a BA or BS in Psychology. In addition, the course will cover various skills (e.g., resume development, interviewing skills, library research) that are necessary for applying for an advanced degree or a job. Cannot receive credit for both PSY 350 and A&S 350. Prereq: Psychology major or Psychology minor.

PSY 393 RESEARCH IN NEUROSCIENCE. (1-3) An independent research project in an area of neuroscience under the direction of a faculty member. A research contract must be signed by the student and the Faculty Research Mentor. May be repeated to a maximum of 12 credits, in combination with other independent research credit hours. They should be capable of doing “independent research” in the sense that they can conduct the experiments with little direct supervision. Students are expected to become familiar with related research in the current literature by regularly reading scientific journals. Prereq: PSY 312, BIO 302 or equivalent or permission of the Faculty Research Mentor.

#PSY 394 RESEARCH IN PSYCHOLOGY. (3) An independent research project in an area of Psychology under the direction of a Faculty Research Mentor. A research contract must be signed by the student and the Faculty Research Mentor. May be repeated to a maximum of 12 credits, in combination with other independent research credit hours. Students should be capable of doing “independent research” in the sense that they can conduct the experiments with little direct supervision. They are expected to become familiar with related research in the current literature by regularly reading scientific journals. Prereq: PSY 215 and 216 or permission of Faculty Research Mentor.

*PSY 395 INDEPENDENT WORK IN PSYCHOLOGY. (1-3) Designed for advanced students who assist faculty members on research projects that are conducted in regular consultation with the faculty member. May be repeated to a maximum of 12 credits, in combination with other independent research credit hours. Pass-Fail only. Prereq: Psychology or Neuroscience major and permission of faculty research mentor. A signed contract between student and faculty member must be filed prior to enrollment in the course.

*PSY 399 FIELD BASED/COMMUNITY BASED EDUCATION. (1-6) A community-based or field-based experience in psychology, under the supervision of a faculty member. May be repeated to a maximum of 12 credits (if applicable). Pass-Fail only. Prereq: Permission of faculty sponsor and department chair or director of advising; filing of a learning contract with department office; completion of 12 hours in psychology with an average GPA of 2.5 in psychology courses. PSY majors, juniors and seniors only.

PSY 427 COGNITIVE PROCESSES. (4) A general introduction to cognitive psychology through lecture and lab. Emphasis is placed on theory and research in information processing, memory, decision-making, language and the means by which cognitive psychology is applied to our lives. The lab is designed to provide an opportunity to individually experience with research equipment and methodology in cognitive psychology. Lecture, three hours per week; laboratory, two hours per week. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, and 311. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 430 RESEARCH IN PERSONALITY. (4) A lecture-lab course intended to introduce students to the field of contemporary personality psychology. Includes a survey of the methods used and issues examined by current personality psychologists. Lectures will focus on selected current theories and issues, whereas labs will involve an in-depth examination of scale construction and the correlation approach to research. Lecture/discussion, three hours per week; laboratory, two hours per week. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, and 314. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 440 RESEARCH IN SOCIAL PSYCHOLOGY. (4) An advanced course in research methods in social psychology. Emphasis will be placed on learning and applying experimental and nonexperimental methods to social psychological issues. In the laboratory component, students will design, conduct, and write up their own social psychological study. Lecture/discussion, three hours per week; laboratory, two hours per week. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, and 313. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 450 LEARNING. (4) The contemporary theoretical and empirical bases of conditioning and learning in humans and nonhumans will be studied through an integration of lectures and intensive, hands-on laboratory experiences. Lecture, three hours per week; laboratory, two hours per week. Prereq: Declared major in psychology, PSY 195, PSY 215, 216, and 311. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 456 BEHAVIORAL NEUROSCIENCE. (4) An intensive investigation of the neural basis of behavior using an integrated lecture and laboratory format. Principles of neuroanatomy, neurophysiology and neuropsychology are applied to behavioral processes such as perception, movement, learning, motivation and emotion. Lecture, three hours per week; laboratory, two hours per week. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, 312, BIO 103, or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 459 NEUROPHARMACOLOGY: DRUGS AND BEHAVIOR. (3) Examination of the general principles of drug action, including pharmacokinetic and pharmacodynamic considerations, emphasizing the effects of recreational and psychotropic drugs (including plant-derived and synthetic drugs) on signaling in major neurotransmitter systems. Includes discussion of selected issues such as sex differences, developmental toxicity and medication development. Prereq: PSY 215 and PSY 312, or BIO 148 or equivalent.

PSY 460 PROCESSES OF PSYCHOLOGICAL DEVELOPMENT. (4) A systematic examination of the major theoretical issues and the logic and methods of the scientific study of developmental psychology. The course is organized around theoretical perspectives that have directed the study of developmental processes. In the laboratory component, students will engage in demonstration exercises designed to illustrate selected topics and research techniques. Students will be required to design and implement a research project. Lecture/discussion, three hours per week; laboratory, two hours per week. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, and 223. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

PSY 495 SENIOR THESIS SEMINAR. (4) This course focus will be on the development and presentation of a research question, and the design of an experimental test of the question. The course will use a seminar format. Students will be expected to give both an oral and written presentation of their research proposal and to participate in the discussion of the proposals of other students. Prereq: Major in psychology, senior status, research sponsor, approval of instructor.

PSY 496 SENIOR THESIS RESEARCH. (4) This course focus will be on the oral and written presentation of research results. The course will use a seminar format. Students will complete their thesis research, prepare a written report, and present it to the seminar. Prereq: PSY 495.

PSY 499 SENIOR INTERNSHIP IN PSYCHOLOGY. (3) Designed as a senior-capstone course for psychology majors to integrate classroom learning, theory, and practice in the context of a research or field-based experience in psychology under the supervision of a psychology faculty member. Students spend nine hours weekly in the placement site and meet weekly as a group with the course instructor to discuss placements, readings, and writing assignments. Prereq: Declared major in Psychology, seniors only; consent of instructor; contract with department; faculty supervision; and completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 500 HISTORY AND SYSTEMS OF PSYCHOLOGY. (3) The course reviews the historical context, influences, and individuals instrumental in the development of psychological research, theories, and systems. Readings and discussions of original sources and contemporary research are emphasized. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 534 CHILD PSYCHOPATHOLOGY. (3) The course is designed to cover issues in the classification, assessment, and treatment of the major childhood behavior disorders, including attention deficit and conduct disorders, learning disabilities, depression, and child abuse. In addition, issues relating to parent-child relations, divorce, and children’s attributions will be covered. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 460, 465, or 552.

PSY 535 PSYCHOLOGICAL TESTING. (3) A general orientation to the field of psychological testing. Introduction to the principles and methods of psychological testing, and a survey of the various kinds of psychological tests. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 460, 465, or 552.

PSY 552 EVOLUTIONARY PSYCHOLOGY. (4) The course deals with sociobiology, the evolutionary basis of behavior. It examines a range of behavior from responses that are genetically predisposed to the highly flexible conceptual behavior shown by humans, including the origins of belief systems. A required laboratory component consists of applications of techniques used to study flexible animal behavior. Students will be expected to train an animal to perform several tasks including a stimulus discrimination. Prereq: Declared major in Psychology, PSY 195, PSY 215, 216, 311, or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

#PSY 558 BIOLOGY OF MOTIVATION.
Course Descriptions

PSY 561 ADVANCED TOPICS IN FOUNDATIONS OF CLINICAL PSYCHOLOGY (Subtitle required). (3)
Selected topics in clinical psychology such as health psychology and introduction to clinical psychology. Course topics will vary from year to year, providing students with a diversity of material in the area of clinical psychology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 562 ADVANCED TOPICS IN COGNITIVE PSYCHOLOGY (Subtitle required). (3)
This course is designed to provide in-depth study of a specialized topic within cognitive psychology. Topics will vary from year to year and may include: theories of memory; theories of reading; cognition and emotion; connectionist modeling; engineering and environmental psychology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 563 ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY (Subtitle required). (3)
This course is designed to provide in-depth study of a specialized topic in developmental psychology. Topics will vary from year to year and may include: cognitive development; development of memory and attention; development of reasoning and problem solving; and media use and children’s development. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 564 ADVANCED TOPICS IN LEARNING (Subtitle required). (3)
The course will provide in-depth study of specialized topics in the area of higher learning in animals. Topics will vary from year to year and may include concept learning, memory, imitation, language, and cooperation. The course will also examine these processes from the perspective of sociobiology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 565 ADVANCED TOPICS IN NEUROSCIENCE (Subtitle required). (3)
Advanced coverage of recent research in the field of behavioral neuroscience. The course will provide in-depth coverage of one topic, such as developmental neuroscience, neurobiology of learning and memory, or the biological basis of reward. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 566 ADVANCED TOPICS IN SOCIAL PSYCHOLOGY (Subtitle required). (3)
Selected topics exploring aspects of social psychology. The content of the course will vary from year to year, focusing on topics such as social cognition, the self, cross-cultural psychology, personal relationships, consumer and organizational psychology, and nonverbal communication. Class format will be determined by the instructor, with some years having a small seminar structure and other years having a more traditional lecture format. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 603 PSYCHOPATHOLOGY. (3)
An examination of the descriptive, theoretical, and research material relevant to the major classes of disturbed behavior. Special attention is devoted to the stylistic features of neurotic and psychotic communication and behavior. Prereq: Enrollment in the graduate program in clinical psychology.

PSY 610 PSYCHOMETRICS. (3)
Analysis and interpretation of human measurements. The course deals with the application of basic inferential procedures to the analysis and interpretation of psychological data. Required of all graduate students in psychology. Prereq: A course in statistics.

PSY 611 PSYCHOLOGICAL RESEARCH. (3)
The course deals with the design of psychological experiments. Emphasis is upon issues concerning choice of appropriate designs for psychological research. Both experimental and correlational research designs are studied. Required of all graduate students in psychology. Prereq: PSY 610 or permission of instructor.

PSY 616 RESEARCH DESIGN IN CLINICAL PSYCHOLOGY. (3)
Concentrates on current methodologies utilized in clinical research and on the application of sophisticated techniques to traditional research problems. Students are expected to master critical skills for the evaluation of research designs and are encouraged to explore creative approaches to research in important clinical areas. Prereq: Enrollment in the graduate program in clinical psychology.

PSY 620 PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)
A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in Department of Psychology or Department of Educational and Counseling Psychology. (Same as EDP 615.)

PSY 621 PROSEMINAR IN LEARNING. (3)
An intensive treatment of concepts, methodology, and current developments in the field of learning.

PSY 622 PROSEMINAR IN PERSONALITY. (3)
An intensive treatment of theories, methods of investigation and current developments in the area of personality. Prereq: Enrollment in graduate program in Psychology or consent of instructor.
PSY708 INTERNSHIP IN CLINICAL PSYCHOLOGY.

Full-time practice in an APA-accredited internship setting, with on-site supervision provided by the internship setting and with academic supervision provided by the Director of Clinical Training at the University of Kentucky. May be repeated twice. Prereq: All course work in doctoral program in clinical psychology, approved dissertation proposal, and consent of Director of Clinical Training.

PSY710 TOPICAL SEMINAR IN CLINICAL PSYCHOLOGY.

A selected topic course designed to cover content areas which are not being met by the current faculty; may be taught by persons with special qualifications from the community or by existing faculty exploring new areas. The topics, which may be offered as the need arises, may include, on a semester basis mental retardation, intensive psychoanalytic theory, psychopharmacology, etc. May be repeated to a maximum of six credits. Prereq: As specified by instructor.

PSY766 TOPICAL SEMINAR IN BEHAVIORAL NEUROSCIENCE.

A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the psychology and physiology graduate programs. (Same as PGY 767.)

PSY767 DISSERTATION RESIDENCY CREDIT.

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PSY772 TOPICAL SEMINAR IN LEARNING.

The study of selected topics in the learning area with emphasis on the recent experimental and theoretical literature. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PSY776 SEMINAR IN DEPENDENCY BEHAVIOR.

The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse, dependence on other psychoactive substances, institutional dependency, dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/SOC/BSC 776.)

PSY778 TOPICAL SEMINAR IN DEVELOPMENTAL PSYCHOLOGY.

An advanced seminar in selected topics in human development, including cognition, learning, language, personality, socialization, life span issues, and developmental aspects of psychopathology. Prereq: PSY 625 and enrollment in graduate psychology program; or consent of instructor. May be repeated a maximum of six credits.

PSY779 TOPICAL SEMINAR IN SOCIAL PSYCHOLOGY.

Each semester some topic in the field of social psychology, such as attitudes and beliefs, structures and function of social groups, social determinants of behavior, leadership, and morale will be studied intensively. May be repeated to a maximum of six credits. (Same as SOC 779.)

PSY780 PROBLEMS IN PSYCHOLOGY.

This number is used for topical seminars taught on an experimental basis or covering special material that may not be presented again. May be repeated to a maximum of 12 hours credit.

PSY781 RESEARCH PARTICIPATION.

Emphasis on the team approach to research. Designed primarily for first year graduate students. May be repeated to a maximum of four credits. Laboratory, two to four hours. Prereq: Enrollment in the graduate program in psychology.

PSY790 RESEARCH IN PSYCHOLOGY.

A minimum of three hours per credit a week is required on research conducted in consultation with the instructor. May be repeated as necessary with the approval of the Director of Graduate Studies.

PT 603 PHARMACOLOGY I.

Fundamental concepts of pharmacology and their impact on the physical therapy management of patients. This course focuses on the integration of basic science, research, and clinical intervention. Prereq: Admission to the Physical Therapy Professional program and successful completion of the spring and summer semesters in the first year.

PT 604 PHARMACOLOGY II.

This course will build on the material covered in PT 603, Pharmacology I, in Physical Therapy, focusing on how drug classes influence rehabilitation treatment strategies. Prereq: Successful completion of PT 603.

PT 605 WELLNESS AND SPORTS NUTRITION.

Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas are: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G, and BCH 401G is equivalent or consent of instructor. (Same as CNU/NS 605.)

PT 610 ETHICS IN CLINICAL SCIENCES RESEARCH.

PT 628 GERONTOLOGY FOR PHYSICAL THERAPY STUDENTS.

PT 628 will utilize biological aspects of aging as the foundation, and integrate psycho-social-spiritual characteristics associated with aging, health and function through the use of lectures, discussions, case studies, service learning, panel discussions and clinical experience. Students will work closely with older adults in terms of PT management for those with functional limitations and in health care promotion and prevention. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year.

PT 645 RESEARCH AND MEASUREMENT IN PHYSICAL THERAPY.

An analysis of various procedures and measuring instruments used in clinical practice and research in physical therapy. Emphasis is placed on the theory, application, and interpretation of the measurements in the evaluation of published materials. Basic statistical techniques and their appropriate use will be presented. Prereq: Admission to the Physical Therapy Professional program and to the Graduate School.

PT 650 DYSFUNCTION OF PERIPHERAL JOINTS.

This course is an advanced approach to assessment and therapeutic management of musculoskeletal problems involving peripheral joints. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

PT 651 DYSFUNCTION OF VERTEBRAL JOINTS.

This course concentrates on advanced theories and techniques of assessment and therapeutic management of musculoskeletal problems of the back. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

PT 652 PATHOMECHANICS.

An application and research oriented investigation into the science of abnormal human movement. The course involves the pathologic aspects of neural control, muscle contraction, assessment and motion analysis, joint mechanics, and noncontractile tissue as they relate to human movement and kinetics. Lecture, two hours; laboratory, two hours per week. Prereq: HPR 515 or consent of instructor.

PT 654 MOTOR CONTROL THEORY AND INTERVENTION.

This course explores current knowledge regarding the neurophysiological mechanisms involved in motor control from birth to adulthood. The course also explore a variety of therapeutic interventions with motor control as a foundation. Prereq: Admission to the PT professional program or consent of the instructor.

PT 655 NEUROMOTOR DEVELOPMENT.

This is an advanced course on normal neuromotor development and the deviations from normal with emphasis on the infant. Prereq: Consent of instructor.

PT 668 RESEARCH TOPICS IN PHYSICAL THERAPY: ANALYSIS.

This course is intended to introduce the student to methods of analyzing data and problems of writing a scientific paper for publication. Students will analyze data they have collected as it relates to their research problems. Their written manuscripts will be due at the end of this course. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year or permission of the instructor.

PT 669 RESEARCH TOPICS IN PHYSICAL THERAPY: OUTCOMES.

This course is intended to introduce students to the process of turning a finished research manuscript into an oral research presentation. Students will be responsible for audiovisuals, handouts, and any other methods used to make their presentations. In addition to faculty advisor input and grading, students will critique their own presentations and gain experience in critique of other professional research presentations. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy Professional program and successful completion of the second year or permission of the instructor.

PT 676 ELECTROPHYSIOLOGICAL TESTING AND THERAPEUTICS.

The student is introduced to the principles of electricity, how it affects the muscle and nerve, its use in physical therapy for patient assessment and management, and its safety aspects. Lectures and laboratory exercises are included. Students in the professional program will enroll for at least one credit in the first year of the professional program and at least one credit in the second year of the professional program. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first two semesters of the program.

PT 686 SPECIALTY ELECTIVES.

Introduction to emerging specialty areas within the physical therapy profession. Students will select multiple specialty areas under faculty direction. Course may be repeated a maximum of 4 credit hours. Prereq: Admission to the Physical Therapy Professional program and active enrollment in the first semester of the professional curriculum or beyond or consent of the instructor.

PT 694 RESEARCH AND MEASUREMENT IN PHYSICAL THERAPY.

This course will build on the material covered in PT 603, Pharmacology I, in Physical Therapy, focusing on how drug classes influence rehabilitation treatment strategies. Prereq: Successful completion of PT 603.

This course is an advanced approach to assessment and therapeutic management of musculoskeletal problems involving peripheral joints. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

PT 695 INDEPENDENT STUDY IN PHYSICAL THERAPY.

Independent work devoted to specific problems or area of interest in physical therapy. Work to be supervised by a graduate faculty member proficient in the area under study. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PT 705 SKELETAL MUSCLE PHYSIOLOGY AND ADAPTABILITY.

This course is designed to present a broad series of topics central to the understanding of human skeletal muscle physiology and therapeutic interventions. Course emphasis will include

University of Kentucky
2016-2017 Undergraduate Bulletin
601

KEY: # = new course * = course changed † = course dropped ¶ = course purged
Course Descriptions

muscle physiology rather than anatomic factors enabling the clinical implications of the dynamic alterable nature of muscle to be central. Included in these implications are aging, disease and injury processes, and therapeutic interventions/strategies. Prereq: Admission to the graduate program in Physical Therapy, or the Rehabilitation Sciences Ph.D. program or consent of instructor.

PT 748 MASTER’S THESIS RESEARCH.

PT 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.

PT 770 SEMINAR IN PHYSICAL THERAPY
PUBLIC HEALTH AND WELLNESS ISSUES.

Each semester a contemporary topic in the field of physical therapy will be studied intensively. Lecture, two to three hours per week; laboratory, zero to two hours per week. May be repeated to a maximum of nine credits.

PT 804 BEHAVIORAL FACTORS IN HEALTH AND DISEASE ACROSS THE LIFESPAN.

This course studies human behavior relating to health and disease and the organization of health care as a social system. Selected psychological and social science concepts are presented in a biobehavioral frame of reference across the lifespan and are applied to the consideration of specific problems in physical therapy. Prereq: Admission to the Professional Physical Therapy program.

PT 805 NORMAL FUNCTIONAL ANATOMY.

A regional study of the normal functional aspects of the neuromusculoskeletal systems, including the basic principles of biomechanics and human locomotion. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy Professional program and successful completion of the spring semester (first year of the professional program).

PT 814 FOUNDATIONAL SKILLS.

A course that lays the foundation for specific physical therapy procedures, basic to the delivery of care and professional development. Prereq: Admission to the Physical Therapy education program and consent of the instructor.

PT 815 BASIC CLINIC SKILLS.

Theory, techniques, rationale, physiological effects, and indications of basic physical therapy therapeutic procedures of hydrotherapy, thermal therapy, cryotherapy, muscle testing and goniometry evaluations, gait analysis, muscle function are presented in lecture. Techniques are demonstrated and practiced in laboratory. Prereq: Admission to the Physical Therapy Professional program and successful completion of the spring semester (first year of the professional program).

PT 821 MANAGEMENT OF VASCULAR AND INTEGUMENTARY DISORDERS.

The theoretic and clinical framework for physical therapy assessment and management of patients with disorders of the vascular and integumentary system, (i.e., open wounds, burns, etc.) are discussed. The student will utilize a problem solving approach to select, implement, tests and measurements as well as therapeutic interventions. Prereq: Admission to the Physical Therapy Professional program and successful completion of the spring semester (first year of the professional program).

PT 825 PROSTHETICS.

This course will prepare the student to perform physical therapy evaluation and provide patient management as part of a prosthetic team. Lecture, 18 hours; laboratory, 34 hours. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year.

PT 826 ORTHOTICS.

This course will prepare the student to perform the physical therapy evaluation and provide patient management as part of a prosthetic or orthotic team. Lecture, 18 hours; laboratory, 30 hours. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year.

PT 827 SPINAL CORD INJURY.

This course will apply material and techniques from prior classes to the acute and chronic treatment of the spinal cord injured individual. Use of evaluation skills, body mechanics, knowledge of anatomy and physiology and program planning will play major roles in the course. In addition, you will be encouraged to view the patient as a whole. Experiences will include patient demonstrations, videotapes, and personal experiences that will help you appreciate the lifestyle change that is inevitable after a severe injury. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year.

PT 830 DIAGNOSTIC IMAGING, SCREENING AND INSTRUMENTATION.

This course presents diagnostic screening processes utilized in PT. Included are the applications of results from specialized imaging instrumentation. Prereq: Successful completion of the previous second year courses in physical therapy.

PT 831 CLINICAL NEUROPHYSIOLOGY.

The study of the regional organization of the brain and spinal cord, the ways in which they connect and how these connectivities influence human behavior with emphasis on motor behavior. The effect of disease states on normal brain and spinal cord function will be discussed. Prereq: Admission to the Physical Therapy professional program and successful completion of the spring and summer semesters in the first year.

PT 834 INTRODUCTION TO PHYSICAL THERAPY AND BIOETHICS.

An orientation to the profession of physical therapy including history, professional organization, role in health care, elementary patient care skills, use of the medical library and professional documentation. Bioethics will be introduced in relationship to moral issues in health care. Prereq: Admission to the Physical Therapy professional program.

PT 835 PHYSICAL THERAPY INTEGRATED CLINICAL I.

The student receives campus based clinical and classroom preparation for clinical experience. The student then observes patient treatment by experienced staff members and is supervised in the performance of elementary procedures involved in patient care. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two semesters of the professional program.

PT 836 PHYSICAL THERAPY INTEGRATED CLINICAL II.

Through an integrated model of classroom and clinical activities, students progress from performance of basic skills under close supervision to performance of those skills with more independence and adding more opportunities for evaluation and treatment experiences. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first three semesters of the professional program.

PT 837 PHYSICAL THERAPY INTERNSHIP I.

This course is the first clinical internship. Students remain under supervision of clinical instructors but have increasing independence in evaluation, examination, treatment and discharge planning in a variety of clinical settings at selected sites. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two years of the professional program.

PT 839 PHYSICAL THERAPY INTERNSHIP III.

This course is the third of four clinical internships but students continue to increase their repertoire of clinical skills and meet higher passing standards while receiving two additional weeks of clinical experience. Students will continue to perform physical therapy evaluation, examination, treatment and discharge planning for those with medical and physical therapy management of neurological problems, including fractures, soft tissue injuries, scoliosis, joint replacements, muscle transplants and tendon repairs, will be presented. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two years of the professional program.

PT 840 PHYSICAL THERAPY INTERNSHIP IV.

This course is the final course of four clinical internships. Structure is similar to previous internships. Students continue to increase their repertoire of clinical skills over 12 weeks. Students are placed in appropriate sites throughout the Commonwealth and the United States. International experiences are available for selected students. Offered on a pass/fail basis only. Prereq: All program course work preceding this in the professional doctorate program.

PT 846 MEDICAL AND PHYSICAL THERAPY MANAGEMENT OF ORTHOPEDIC PROBLEMS.

Medical and physical therapy management of neurological problems, including the neurological examination, seizures, degenerative and neurological diseases, will be presented. Lecture/ laboratory, patient contact, and case study formats will be used. Lecture, two hours; laboratory, two hours. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 847 MANAGEMENT OF NEUROLOGICAL SYSTEMS I.

Medical and physical therapy management of neurological problems, including the neurological examination, seizures, degenerative and neurological diseases, will be presented. Lecture/ laboratory, patient contact, and case study formats will be used. Lecture, two hours; laboratory, two hours. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 850 ADVANCED MANUAL INTERVENTIONS.

A combined lecture and lab series focusing on advanced manual interventions, their indications, contraindication, anticipated goals and expected outcomes. Topics will include spinal mobilization and manipulation, manual lymph drainage, soft tissue, neural tissue and connective tissue mobilization along with current topics introduced through advancement of knowledge in the profession. Prereq: Admission to the PT program and successful completion of the second year or the consent of the instructor.

PT 854 PATHOLOGY AND CLINICAL APPLICATION.

An introduction to medical procedures, including history, physical exam, laboratory data, radiographic film and medical and physical therapy management of orthopedic problems, including fractures, soft tissue injuries, scoliosis, joint replacements, muscle transplants and tendon repairs, will be presented. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 856 THERAPEUTIC EXERCISE I.

An introductory course provides an overview of therapeutic exercise and its relation to patient management, and development of skill in basic therapeutic exercise approaches for improving muscle performance, relaxation and mobilization. Lecture and laboratory sessions are included. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy professional program.

University of Kentucky
2016-2017 Undergraduate Bulletin

602

KEY:
# = new course  * = course changed  † = course dropped  ‡ = course purged
Therapy professional program and successful completion of the spring semester in the first year.

PT 860 DIAGNOSIS AND MANAGEMENT OF COMPLEX PATIENTS. (3)
Lecture and case-based small group discussion of patients who have complex management needs in the biomedical, physical, psychosocial, and/or spiritual realms. Prereq: Successful completion of all prior course work in the PT program.

PT 867 RESEARCH TOPICS: DESIGN. (1)
This course will focus on designing hypothesis-driven and/or goal oriented research projects in the area of Physical Therapy. This will include determining the research area and question, choosing the correct research design for the research question, assessing the feasibility of the proposed project, gaining knowledge and experience in writing a research proposal, and estimating the potential outcomes of a project. This course will re-emphasize, build upon, and apply knowledge obtained in PT 645 (Research Design and Measurement). This course will also enable the student to write a comprehensive research or project proposal for implementation. While students are given flexibility (based on advisor input) to design a project, all projects are expected to incorporate outcomes measurements. Prereq: Admission to the Physical Therapy program, successful completion of PT 645 or permission of the course instructor.

PT 877 CARDIOPULMONARY PHYSICAL THERAPY. (3)
A combined lecture, laboratory series about the theoretical and practical foundations necessary for entry-level physical therapists to conduct examinations and interventions for individuals with primary or secondary cardiac and/or pulmonary dysfunction. Case studies, demonstrations and laboratory experiences are used to help the student. Prereq: Students must have successfully completed the first year of program.

PT 887 INTRODUCTION TO PHYSICAL THERAPY MANAGEMENT. (1)
An introduction to basic management techniques including purpose, goals and objectives; contracts, task statement and analysis; position descriptions; medical; quality assurance; placement services. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy program and successful completion of the first year.

PT 888 ADVANCED PHYSICAL THERAPY MANAGEMENT. (3)
Emphasis is placed on operational aspects of physical therapy department including relationship to total facility operation, designing and equipping a department, contracts, salaries, fees, personnel policies, records, data processing, budget process, medical-legal implication, continuing education, and the consultative process. Prereq: PT 887 or consent of instructor.

PT 890 PROFESSIONAL SEMINAR. (1)
This course will provide a framework for preparation and completion of the comprehensive examination upon fulfillment of all other requirements for graduation from the physical therapy doctoral program. Students will be guided toward information that will increase their effectiveness in preparing for the exam which in turn provides an effective foundation for completion of professional certification after graduation from this program. Prereq: Admission to the Physical Therapy program, completion of all course requirements in the program or permission of the course instructor.

PT 902 INTEGRATION OF EVIDENCE BASED PRACTICE. (3)
This course is designed to provide the participant with knowledge and hands-on experience in the integration of an evidence-based approach into practice. Students will learn how to critically review the literature and will acquire skills to integrate evidence into practice. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional–entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist.

PT 904 HEALTH PROMOTION AND DISEASE PREVENTION. (2)
This 2 credit course is designed to increase the depth and breadth of the practitioner’s knowledge regarding health promotion, wellness and disease prevention, particularly as it is appropriate within the scope of PT practice. Utilizing valid theoretical constructs for behavioral change, the course will focus on clinical application and program design for effective promotion of health, wellness, and disease prevention for the individual and for the community. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional–entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902.

PT 906 ADVANCED PHYSICAL THERAPY DIAGNOSIS AND SCREENING. (2)
This course is designed to provide the PT practitioner with increased expertise in analysis and interpretation of multidisciplinary tests, measures, and screens in order to enhance PT diagnostic and screening skills. Instrumentation related to imaging techniques such as radiology, magnetic resonance, PET scans, and ultrasound will be addressed. In addition, specific foci will include nerve conduction velocity examination, as well as the use of the computer enhanced equipment (e.g. Biodes, Cybex, BTE, Neurocom) for assessing strength, endurance, balance and function. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional–entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902.

PT 908 CLINICAL DECISION MAKING FOR PATIENTS WITH COMPLEX PROBLEMS I. (3)
This course is designed to enhance the diagnosis and management skills of PT practitioners in providing care to individuals with complex problems related to chronic illness and/or neuromuscular pathology. This includes deepening practitioners’ knowledge base regarding pathology and clinical application, as well as enhancing their understanding regarding biopsychosocial-spiritual aspects of coping and adaptation as experienced by patients with multiple diagnoses and problems. Foundational material related to pharmacology, reimbursement, care environments, and cardiopulmonary pathology and management will be presented. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional – entry level physical therapy program and successful achievement of licensure.

PT 910 CLINICAL DECISION MAKING FOR PATIENTS WITH COMPLEX PROBLEMS II. (2)
This course is designed to enhance the diagnosis and management skills of PT practitioners in providing care to individuals with complex problems related to acute illness and/or musculoskeletal pathology. This includes deepening practitioners’ knowledge base regarding pathology and clinical application, as well as enhancing their understanding regarding biopsychosocial-spiritual aspects of coping and adaptation as experienced by patients with multiple diagnoses and problems. Material foundational to this course is presented in PT 908. The two courses are linked, taught in modular format sequentially. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional – entry level physical therapy program and successful achievement of licensure.

RAS Radiation Sciences

RAS 472G INTERACTION OF RADIATION WITH MATTER. (3)
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radioactivity, energetics of decay. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as PHY/RM 472G.)

RAS 545 ADVANCED RADIATION DOSIMETRY AND HAZARDS PROTECTION. (2)
An analysis of common radiation hazards encountered in medicine, research, industry, and the environment. Regulations and procedures for the safe use of ionizing and nonionizing radiations. Lecture; two hours; laboratory, two and one-half hours. Prereq: PHY/RM 472G or consent of instructor. (Same as PHY/RM 545.)

RAS 601 ADVANCED RADIATION DOSIMETRY. (2)

TRAS 610 ETHICS IN CLINICAL SCIENCES RESEARCH.

RAS 647 PHYSICS OF DIAGNOSTIC IMAGING I. (3)
Specialized and advanced topics in diagnostic imaging, including modulation transfer function analysis, image processing algorithms, acceptance testing. CT, NMR, ultrasound, etc. Prereq: PHY/RM/RAS 546 or consent of instructor. (Same as RM 647.)

RAS 648 PHYSICS OF DIAGNOSTIC IMAGING II. (3)
A continuation of RAS 647. Specialized and advanced topics in nuclear medicine imaging physics, including position emission tomographic procedures, emerging new modalities, and quality control. Prereq: RM/RAS 647 or consent of instructor. (Same as RM 648.)

RAS 649 PHYSICS OF RADIATION THERAPY. (3)
Specialized external beam and brachytherapy treatment planning; advanced Bragg-Gray cavity applications, including Ngs and TG-21; calibration, acceptance testing, and quality control of therapy physics equipment. Prereq: RAS/RM/RM 546 and RAS/RM 601, or consent of instructor. (Same as RM 649.)
RC 515 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES I.
(3)
This course is designed to prepare rehabilitation and mental health counselors, social workers, and students in related fields with a working knowledge of the medical and psychosocial aspects of disability and chronic illness, and to provide students with the knowledge and understanding necessary to function and serve effectively in rehabilitation counseling and related interdisci-
plinary, allied health, and mental health settings. Topic areas include: human body systems, medical terminology, medical, functional, environmental and psychosocial aspects of disab-
abilities and chronic illness, human sexuality and disability, spirituality, and religious aspects; transition issues as they relate to family, school, employment, aging, and disability; social and learning needs of individuals across the life span, and ethical and legal issues impacting individuals and families related to adjustment and transition. Prereq: Admission to the Rehabilitation Counseling Program or consent of instructor.

RC 516 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES II.
(3)
This course is designed to prepare rehabilitation and mental health counselors, social workers, and students in related fields with a working knowledge of the medical and psychosocial aspects of disability and chronic illness, and to provide students with the knowledge and understanding necessary to function and serve effectively in rehabilitation counseling and related interdisci-
plinary, allied health, and mental health settings. Topic areas include: human body systems, medical terminology, medical, functional, environmental and psychosocial aspects of disab-
ilities and chronic illness, professional ethics, assistive technology, diagnostic classification systems, psychopharmacology, functional capacity, and wellness and illness prevention concepts and strategies. Specific disabilities covered in this course include neurological, hearing, vision, intellectual disabilities, developmental disabilities, autism and Asperger’s, learning disabilities, attention deficit disorders, and substance abuse. Prereq: College level courses in biology and psychology or consent of instructor. (Same as SW 515.)
**RC 546 TRANSDISCIPLINARY SERVICES FOR YOUNG CHILDREN.** (3)
This course will focus on the philosophical issues related to teaching young children with multiple disabilities. Emphasis will be placed on the integration of children, participants in the areas of communication, physical and motor development, health, vitality and sensory input will be presented. Strategies presented for planning will include transdisciplinary assessment process centered planning and activity-based instruction. Prereq: EDS 375 or EDS 600. (Same as IEC 546.)

**RC 547 COLLABORATION AND INCLUSION IN SCHOOL AND COMMUNITY SETTINGS.** (3)
This course will focus on inclusion of students with moderate to severe disabilities in all aspects of school and community life, with special consideration given to the individual student planning variables that must be addressed in meeting the needs of each school-age student and for preparing students to function as fully and independently in their communities as possible. The course is designed to meet the needs of those pursuing certification in Moderate and Severe Disabilities and pursing degrees in Elementary and Secondary Education, Vocational Rehabilitation, School Psychology, Social Work, Physical Therapy, Communication Disorders, and related disciplines. Prereq: Consent of instructor. (Same as EDS 547.)

**RC 558 SPECIAL TOPICS IN REHABILITATION COUNSELING.** (1-3)
Study of a selected topic within the field of rehabilitation. Topic to be chosen annually in accordance with student needs and interests. May be repeated to a maximum of six credits.

**RC 560 SUPPORTED EMPLOYMENT, INDEPENDENT LIVING, AND TRANSITION.** (3)
This course is designed to provide a basic knowledge and understanding of the origins, development, and underpinnings of supported employment, transition, and independent living for persons with disabilities. Emphasis will be placed on the rehabilitation and clinical mental health counselors. The contents of the course will be provided to the student with the following information: philosophies for transition and supported employment programs; the concept of Person Centered Planning; a model for developing a transitional process in the community; vocational training and placement concepts of transition and supported employment; perspectives and roles within supported employment and transition for rehabilitation and clinical mental health counselors; and major elements of independent living rehabilitation. Prereq: Admission to the Rehabilitation Counseling Program or consent of instructor.

*RC 610 CASE MANAGEMENT IN CLINICAL REHABILITATION COUNSELING AND CLINICAL REHABILITATION COUNSELING IN MENTAL HEALTH.** (3)
This course emphasizes the basic principles of helping persons with disabilities within the rehabilitation and clinical mental health processes. The course fosters both an appreciation and understanding of the etiology and consequences of problem behaviors as they relate to the rehabilitation and clinical mental health counseling techniques. The course explores the roles or functions that rehabilitation and clinical mental health counselors play as they work in different clinical rehabilitation and counseling programs and agencies. Prereq: RC 520 or consent of instructor.

**RC 613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION.** (3)
This course is designed as a required course for certification in the school administration program or elective in graduate or post baccalaureate degree. Essential course questions will emphasize the delivery of a fair and appropriate public education for children with disabilities within a practical application that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as well as the legal and programmatic implications for children with disabilities and their families. Prereq: Admission to the course; a model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administrator preparation program, or received permission of instructor. (Same as EDS 613.)

*RC 620 ASSESSMENT IN REHABILITATION AND CLINICAL MENTAL HEALTH.** (3)
This course includes effective methods and techniques used in determining the academic, intellectual, emotional, and aptitude potential of persons with disabilities. Content also includes exploring the ethical practice of assessment and evaluation, test development, reliability, validity, and psychometrics, report writing, use of commercial evaluation systems, and the role of assessment in rehabilitation and mental health counseling programs and agencies. Prereq: A vocational theories course and RC 520 or consent of instructor.

*RC 630 CAREER DEVELOPMENT AND PLACEMENT SERVICE IN REHABILITATION AND CLINICAL MENTAL HEALTH COUNSELING.** (3)
This course is designed to prepare rehabilitation and clinical mental health counselors in the development of skills for placement of persons with disabilities into a variety of settings including competitive employment, supported employment, and independent living. The course covers placement and career theory and development, pre-placement analysis, job readiness assessment, job development, job analysis, job engineering (work accommodations and modifications), employer attitudes, business rehabilitation, and social security disability. Occupational information and its use in the placement process including labor market analysis and procedures for analyzing client residual and transferable work skills will be addressed. Prereq: A vocational theories course, RC 520 and 620 or consent of instructor.

**RC 640 REHABILITATION IN BUSINESS AND INDUSTRY.** (3)
This course is designed to provide rehabilitation and clinical mental health counseling students with a comprehensive knowledge of rehabilitation in business environments. Skills to develop a professional working relationship between the rehabilitation and clinical mental health counseling professional, employers, the insurance industry, and other professionals will be taught. A thorough overview of worker compensation, related legislation, and other insurance will be presented. The roles and functions of the rehabilitation professional in business rehabilitation will be discussed. Prereq: Twelve hours of study in rehabilitation counseling or consent of instructor.

*RC 650 CLINICAL REHABILITATION AND MENTAL HEALTH COUNSELING THEORY AND PRACTICE I.** (3)
This is a two-semester course sequence. This course is designed to provide an overview of theories and techniques of rehabilitation mental health counseling and how they can be applied to a wide variety of circumstances within clinical mental health counseling and rehabilitation counseling with persons with disabilities. A goal of this course is to acquire knowledge about clinical mental health theoretical orientations and to integrate theory with practice. Emphasis will be on helping students clarify concepts of mental health counseling, personal and professional ethics and values, and personal style, and connecting these concepts and values to various mental health counseling theories, as well as identifying commonalities across theories as these relate to clinical rehabilitation and mental health counseling. Prereq: Twelve hours of study in rehabilitation counseling program or consent of instructor.

*RC 660 CLINICAL REHABILITATION AND MENTAL HEALTH COUNSELING THEORY AND PRACTICE II.** (3)
This course represents one course of a two-semester course sequence. Together, these courses provide an overview of the techniques and theories of counseling and how they can be applied in a Clinical Rehabilitation and Mental Health Counseling context. These courses also allow the student to acquire knowledge about theoretical orientations and to develop skill in integrating theory with counseling practice. Emphasis will be on helping students clarify beliefs, values, and personal style, and connecting these to the beliefs and values of the various theories; and identifying commonalities across theories as these relate to clinical rehabilitation and mental health counseling. We will also focus on helping to recognize culture, class, and gender component. Prereq: RC 650 or consent of instructor.

*RC 670 GROUP AND FAMILY MENTAL HEALTH COUNSELING** (3)
This course is designed to prepare rehabilitation and clinical mental health counselors and other human service providers to become knowledgeable of counseling theory and skills used in group and family counseling techniques, with a focus on concerns related to disability and rehabilitation and clinical mental health counseling. The course will cover the history of group and family counseling, related counseling theories, elements of leadership in group counseling, family life cycle and models of healthy and unhealthy characteristics of families, culturally diverse perspectives of counseling, and ethical, legal, and professional issues. Students will gain practical experience with group counseling leadership and participation. Prereq: Admissions to the rehabilitation counseling or other human services program, and have counseling theories and techniques course, and consent of instructor.

**RC 680 MENTAL HEALTH DIAGNOSIS AND TREATMENT PLANNING FOR COUNSELORS.** (3)
This course provides a comprehensive overview of the techniques and theories of counseling and mental health counselors in the disorders that are encountered by rehabilitation clinical mental health counselors, and other mental health professionals in various treatment settings. Specific attention is given to the etiology, prevalence, symptoms, and treatment of these disorders. Students will develop a better understanding of the DSM and the International Classification of Diseases. This course introduces both national and international standards and perspectives of psychological disorders. Prereq: A knowledge-base of theories and techniques of counseling is preferred by not required.

**RC 701 SEMINAR FOR EDSRC LEADERSHIP PERSONNEL.** (1)
Study of issues and topics affecting the preparation of Rehabilitation Counseling, Special Education, and Early Childhood personnel and of research issues involving persons with disabilities and educational and rehabilitation programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 701.)

*RC 710 CLINICAL PRACTICUM IN REHABILITATION AND MENTAL HEALTH COUNSELING.** (3)
The course is designed to provide the student with clinical learning experiences under faculty supervision in a community- or state rehabilitation mental health agency. The student is expected to demonstrate knowledge and skills in the application of rehabilitation and mental health counseling methods, techniques, and vocational knowledge in working with persons with disabilities. In addition, the student is required to perform all tasks in accordance to ethical and legal standards in clinical rehabilitation counseling. Prereq: A minimum of 12 graduate hours in Rehabilitation Counseling and consent of instructor.

**RC 711 SEMINAR IN ADVANCED REHABILITATION PRACTICES AND PROCEDURES.** (3)
Advanced study of issues related to rehabilitation counseling, theory, research and practice including problem identification and assessment, program alternatives, services delivery models, theoretical and conceptual frameworks, the translation of theory and research into practice. Prereq: Admission to the doctoral program in Special Education and Rehabilitation Counseling.

**RC 712 SEMINAR IN EDSRC PROFESSIONAL SERVICES.** (3)
Education and Rehabilitation professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 712.)
Course Descriptions

RC 715 ADVANCED SEMINAR IN PSYCHOSOCIAL ASPECTS OF CHRONIC ILLNESS AND DISABILITY. (3)
This course is a doctoral seminar designed to provide advanced knowledge and understanding of psychosocial aspects of chronic illness and disability (CID), including theoretical, practical, and research approaches to the processes of adaptation to CID, coping, self-management and health decision making, historical and sociological perspectives on disability and cultural and global perspectives, responses, and attitudes about disability, developmental and lifespan issues, and evidence-based practice and interventions in professional rehabilitation counseling, practice, policy, and education. Students will engage in advanced analysis and synthesis of relevant theories and their application, and develop knowledge, skill, and experience in the application and teaching of related content in rehabilitation counseling education, research, policy, and practice. Prereq: Admission to the Ph.D. program in Special Education and Rehabilitation Counseling or permission of instructor.

RC 720 SEMINAR IN ED/SC TEACHER PREPARATION. (3)
Rehabilitation Counseling and Special Education college/university professor preparation, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 720.)

RC 721 PRACTICUM IN ED/SC PERSONNEL PREPARATION. (1-9)
Professional preparation of Rehabilitation Counselors or Special Education Teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising rehabilitation counselors or special education student teachers, and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 721.)

RC 770 ADVANCED SEMINAR IN REHABILITATION COUNSELING THEORY, PRACTICE, AND EDUCATION. (3)
This course is a doctoral seminar designed to provide advanced knowledge and understanding of personality and counseling theories and techniques and their application in professional rehabilitation counseling practice and education, rehabilitation counseling process and outcome research, and the application of counseling theory across diverse populations and settings. Students will engage in advanced analysis and synthesis of counseling theories and their application and teaching of related content in rehabilitation counseling education, research, and practice. Prereq: Admission to the Ph.D. program in Special Education and Rehabilitation Counseling.

RC 782 DIRECTED INDEPENDENT STUDY. (3)
Study of an individually selected topic relevant to a student’s academic development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

RC 789 INDEPENDENT STUDY IN EARLY CHILDHOOD/SPECIAL EDUCATION/REHABILITATION COUNSELING RESEARCH. (1-6)
An independent study supervised research course for advanced graduate students in Rehabilitation Counseling, Special Education, or Early Childhood with an interest in a specific research problem. Class hours determined with supervising instructor. Note: For Rehabilitation Counseling doctoral students this course will satisfy CACREP internship requirements in the Research core area. Additional internship in 2 additional core areas are also required. Prereq: Admission to EDSRC Doctoral Program or approval of instructor. (Same as EDS 789.)

RHB Rehabilitation Sciences

RHB 625 MUSCLE FORUM. (1)
Muscle Forum is a course that will allow students to develop critical evaluative skills for seminars and grant writing in the field of Muscle Biology. Prereq: Students need to be enrolled in any of the Rehabilitation Sciences doctoral programs, one of the graduate programs of the Integrative Biomedical Sciences, or with permission of the course director. (Same as PGY 625.)

RHB 701 REHABILITATION THEORIES AND APPLICATION THROUGH THE LIFE SPAN. (3)
Explores the theories common to all the rehabilitation therapies (PT, CD, OT) and that form a foundation for the rehabilitation sciences. Included are theories specific to rehabilitation, attachment, adaptation and resilience, cognition, motor learning, empowerment, loss and grief, psycho-immunology, and the societal responses to stigmatized groups. Topics are applied to rehabilitation practice and research design across the life span. Prereq: Admission to the Rehabilitation Sciences Ph.D. program or consent of the instructor.

RHB 710 NEUROPLASTICITY IN REHABILITATION. (3)
This course will examine the neurological principles utilized by each of the rehabilitation disciplines (PT, OT, SLP) in the context of current research data and determine whether these principles hold up to scientific examination. The format of this course will utilize formal lectures on current theories of neuroplasticity and class discussion on current literature in each of these areas. Case studies will be utilized to apply current theories to practical application within each of the listed disciplines. Prereq: Course in Neuroanatomy. Admission to the Rehabilitation Sciences Doctoral Program or by consent of the instructor.

RHB 712 PHARMACOLOGY IN REHABILITATION. (2-3)
This course will provide the basic science background necessary to understand the effects of medications on patients treated in the rehabilitation setting and the influence on treatment. Topics will include mechanisms of drug action, side effects, and how age and disease alter those mechanisms. The course will also address newly developing drug treatment strategies, including those in clinical trials. Students may either take the course for two credits or complete an additional advanced project for 3 credits, as outlined in the syllabus. The advanced project will enable the more interested student to pursue a topic in greater depth. Prereq: Admission to the Rehabilitation Sciences Doctoral Program or consent of instructor.

RHB 714 CRITICAL APPRAISAL OF RESEARCH IN REHABILITATION SCIENCES. (3)
This course will introduce the student to critical appraisal of all forms of research in the Rehabilitation Sciences. The purpose of this course is to further develop the student’s competence in carrying out and evaluating research. The student will develop the skills necessary to find, critically evaluate, and synthesize the available research.

RHB 720 RESEARCH IN THE REHABILITATION SCIENCES. (3)
The purpose of this course is to provide a critical review of the current practices in research methodologies in rehabilitation and investigate the consequences of selecting various research methodologies and analytic strategies.

RHB 744 ADVANCED TOPICS IN MOTOR DEVELOPMENT. (3)
Investigation of motor development, control, and learning and teaching strategies in pediatrics. In-depth analysis of movement for specific function tasks and motor dysfunction with identification of both primary and secondary designated problem areas in children with neurodevelopmental concerns. Prereq: Admission to the Rehabilitation Sciences Ph.D. program or consent of the instructor.

RHB 749 DISSERTATION RESEARCH IN REHABILITATION SCIENCES. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Admission to the Rehabilitation Sciences Ph.D. program.
RM 472 INTERACTION OF RADIATION WITH MATTER. (3)
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radioactivity, energetics of decay. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as PHY/RAS 472.)

RM 545 RADIATION HAZARDS AND PROTECTION. (3)
An analysis of common radiation hazards encountered in medicine, research, industry, and the environment. Regulations and procedures for the safe use of ionizing and non-ionizing radonations. Lectures, laboratories, two and one-half hours. Prereq: PHY/RAS 472G or consent of instructor. (Same as PHY/RAS 545.)

RM 546 GENERAL MEDICAL RADIOPHYSICAL. (3)
The uses and dosimetric aspects of radiation in medicine will be analyzed, including many basic applications in the fields of diagnostic radiology physics, therapy physics, and nuclear medical physics. Prereq: or concur: RM/RM 472G or consent of instructor. (Same as PHY/RAS 546.)

RM 601 ADVANCED RADIATION DOSIMETRY. (2)

RM 647 PHYSICS OF DIAGNOSTIC IMAGING I. (3)
Specialized and advanced topics in diagnostic imaging, including modulator transfer function analysis, image processing algorithms, acceptance testing, CT, NMR, ultrasound, etc. Prereq: PHY/RM/RAS 546 or consent of instructor. (Same as RAS 647.)

RM 648 PHYSICS OF DIAGNOSTIC IMAGING II. (3)
A continuation of RM 647. Specialized and advanced topics in nuclear medicine imaging physics, including positron emission tomographic procedures, emerging new modalities, and quality control. Prereq: RM/RM 647 or consent of instructor. (Same as RAS 648.)

RM 649 PHYSICS OF RADIATION THERAPY. (3)
Specialized external beam and brachytherapy treatment planning; advanced Bragg-Gray cavity applications, including Naga and TG-21, calibration, acceptance testing, and quality control of therapy physics equipment. Prereq: RAS/RM/RAS 546 and RAS/RM 601, or consent of instructor. (Same as RAS 649.)

RM 650 PHYSICS OF RADIATION THERAPY II: BRACHYTHERAPY PHYSICS. (2)
The course includes consideration of all aspects of brachytherapy dosimetry and treatment planning as well as modern and cutting-edge brachytherapy clinical practice. Characteristics of interstitial, intracavitary, and intraluminal implants, as well as remote afterloaders, are considered. Prereq: RAS/RM/PHY 546; PHY/RAS 472G; RAS/RM 649 (may be co-requisite). (Same as RAS 650.)

RM 660 GRADUATE PRACTICUM IN RADIATION MEDICINE. (1-6)
Applied field work at the graduate level in the sciences relating to radiation medicine. May be repeated to a maximum of six credits. Prereq: Graduate standing in the bioradiation or medical sciences, plus consent of instructor.

RM 695 RESEARCH IN THE HEALTH-RELATED RADIATION SCIENCES. (1-4)
Independent directed research on theoretical and practical problems in the health-related radiation sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing in one of the radiation-related sciences, plus consent of instructor. (Same as RAS 695.)

RM 740 MAMMALIAN RADIATION BIOLOGY. (2)
The physical and biological sequelae of radiation effects will be discussed emphasizing human and mammalian responses and radiation health. Emphasis will be for health and medical workers. Prereq: Consent of instructor; BIO/RM 540 or RM 546 or equivalent background. (Same as BIO 740.)

RM 815 FIRST-YEAR ELECTIVE, RADIATION MEDICINE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Radiation Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first-year, College of Medicine.

RM 825 SECOND-YEAR ELECTIVE, RADIATION MEDICINE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Radiation Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

RM 842 RADIATION ONCOLOGY. (1)
Use of radiation therapy in clinical treatment of malignancy. Staging, histology, spread, treatment techniques, acute and late effects of radiation therapy. Prereq: RM 740 and an introductory anatomy course, or equivalent, and consent of instructor.

RM 848 PRACTICUM IN BRACHYTHERAPY PHYSICS. (1-3)
This course offers practicum training in the professional use of therapy physics and health physics in brachytherapy. May be repeated to a maximum of three credits. Laboratory: 40 hours per week. Prereq: RM/HRS 649, or equivalent, and consent of instructional staff.

RM 849 PRACTICUM IN EXTERNAL BEAM THERAPY PHYSICS. (1-6)
This course offers practicum training in the professional use of therapy physics in external beam radiation therapy. May be repeated to a maximum of six credits. Laboratory: 40 hours per week. Prereq: RM/HRS 649, or equivalent, and consent of instructor.

RS 130 INTRODUCTION TO COMPARATIVE RELIGION. (3)
Comparative study of major world and selected regional religions with emphasis on analysis of belief, ritual, artistic expression and social organization. Eastern and Western religions are considered. (Same as ANT 130.)

RSC Reproductive Sciences
RS 700 MAMMALIAN REPRODUCTION. (3)
The course will introduce students to the mammalian reproductive system and its function. The objective is to provide students with knowledge on the anatomy, endocrine regulation and physiology of reproduction. Comparison of reproductive function will be made among species and the scientific research methods used to investigate these systems will be introduced. Prereq: BIO 150 and BIO 152 or consent of the Course Director.
**Course Descriptions**

**RSC 701 ADVANCED REPRODUCTIVE IMMUNOLOGY.** (3) Immune mechanisms involved during pregnancy will be covered with a focus on the interactions between the placenta and the maternal immune system. The role of the immune system on defects during pregnancy will be discussed, including the role in pre-term labor, implantation, and pre-eclampsia. The response of the normal immune system on the developing fetus will be covered. Prereq: Admission into the Ph.D. in Reproductive Sciences program or consent of instructor.

**RSC 702 MOLECULAR REPRODUCTION.** (3) The in-depth structure and function of the mammalian reproductive system will be studied as it relates to the understanding of human reproduction at the molecular level. Both male and female reproductive organs and associated hormones and behaviors will be studied. Experts in relevant fields will give lectures and students will be involved in discussions with the lecturers. Prereq: Admission into the Reproductive Sciences Ph.D. program or permission of the course director and/or IBS 601.

**RSC 703 BIOLOGY AND THERAPY OF REPRODUCTIVE CANCERS.** (3) This course will introduce students to the fundamentals of biological and molecular events related to disease progression, and to current therapeutic modalities for the treatment of reproductive cancers. This course will include lectures for each topic area. In addition, there will be discussions and student presentations on related topics. Prereq: Admission to the Ph.D. program in Reproductive Sciences, or consent of the instructor. Courses in cell biology, molecular biology and cancer therapy are helpful prerequisites.

**RSC 767 REPRODUCTIVE SCIENCES POST-QUALIFYING RESEARCH.** (2) Research in Reproductive Sciences following successful completion of the qualifying examination. Research initiated in RSC 790 will be expanded to answer a proposed research question or questionaire. Following acceptance of the collection of data, the student will write a dissertation and defend the dissertation at an oral defense. In addition the student must submit his/her findings to a peer-reviewed scientific publication journal. Prereq: Successful completion of the qualifying examination.

**RSC 790 REPRODUCTIVE SCIENCES PRE-QUALIFYING RESEARCH.** (1-5) Research in Reproductive Sciences prior to the pre-qualifying examination. Students will identify a research problem, develop research skills, apply research methods and write a research proposal. Prereq: Successful completion of year 1 and 2 of the RSC Ph.D. curriculum, including rotations in a minimum of 5 different research laboratories.

---

**RSD Restorative Dentistry**

**RSD 810 FUNDAMENTALS OF OPERATIVE DENTISTRY I.** (3) This lecture course in operative dentistry is designed to provide a beginning student with basic knowledge about cavity preparation and restorative techniques for composites, amalgam, and other direct restorative materials. This course, together with a complementary laboratory course, RSD 814, is directed at preparing the student with knowledge and skills in the diagnosis and treatment of various lesions necessary for patient care in operative dentistry. Coreq: RSD 814.

**RSD 811 PRINCIPLES OF DENTAL ANATOMY, MORPHOLOGY AND OCCLUSION.** (3) This introductory lecture course is designed to provide the dental student with a basic understanding of the anatomy, morphology, and occlusion of the mouth. This course will provide the student with an understanding of the relationship of the dentition to the occlusal system and the functional needs of the patient. Prereq: Admission to the college or consent of the course director. Coreq: RSD 812.

**RSD 812 PRINCIPLES OF DENTAL ANATOMY, MORPHOLOGY AND OCCLUSION (LABORATORY).** (1) This introductory laboratory course is designed to provide the beginning dental student with basic knowledge of oral anatomy, oral morphology, and oral occlusion. This course will provide the student with an understanding of the relationship of the dentition to the occlusal system and the functional needs of the patient. Prereq: Admission to the college or consent of the course director. Coreq: RSD 811.

**RSD 813 DENTAL CARIOLOGY.** (1) This course is designed to review the biological basis for the concepts and treatment procedures of dental caries as an infectious disease and will provide didactic foundational knowledge for the clinical management of dental caries.

**RSD 814 PRECLINICAL OPERATIVE DENTISTRY I.** (3) This first-year preclinical laboratory course in operative dentistry is designed to provide a beginning student with basic skills for cavity preparation and restorative techniques for amalgam and resin composite. This course, together with the complementary lecture series course, RSD 810, is directed at preparing the student with knowledge and skills necessary for patient care in operative dentistry. Coreq: With RSD 810 (Lecture component).

**RSD 816 ESTHETIC DENTISTRY.** (1) This lecture course is designed to provide a beginning student the basic principles of cavity preparation and restoration with esthetic dental materials. Materials include resin composite, resin ionomer, and glass ionomer. This course, together with the complementary laboratory course, RSD 818, is directed at preparing the student with knowledge and skills in the diagnosis and treatment of defective tooth structure associated with anterior teeth. Prereq: RSD 812, RSD 810, RSD 814 or the consent of the course director.

**RSD 818 PRECLINICAL ESTHETIC DENTISTRY.** (1) This first-year preclinical course in esthetic dentistry is designed to provide a beginning student with the basic skills for cavity preparation and restorative techniques for tooth-colored restorative materials. This course, together with the complementary lecture series course, RSD 816, is directed at preparing the student for patient care in esthetic dentistry. Prereq: RSD 812, RSD 810, RSD 814 or consent of the course director.

**RSD 821 CLINICAL RESTORATIVE DENTISTRY I.** (3) This course emphasizes clinical applications of the principles taught in preclinical courses. Concepts of diagnostic and therapeutic procedures as well as preventive measures are applied in the clinic with an emphasis on the demonstration of competency in rendering primary care type treatment procedures. Prereq: RSD 814; coreq: RSD 824.

**RSD 822 PRINCIPLES OF DENTAL OCCLUSION AND ARTICULATION.** (3) This course is directed toward the examination, diagnosis, treatment planning, and treatment of various occlusal problems. The student will learn the skills needed to analyze the dental occlusion of patients and to plan successful occlusal therapy including restorative procedures and fixed prosthodontic treatment. The course will concentrate on developing technical skills and learning assessment criteria related to mounted study casts, occlusal examination and analysis, selective occlusal adjustment, diagnostic pre-waxing and planning, and the fabrication of a muscle relaxation occlusal splint. Lecture, 23 hours; laboratory, 27 hours; clinic, 27 hours. Prereq: CDS 815, RSD 812, or with approval of the course director.

**RSD 823 PRECLINICAL RESTORATIVE DENTISTRY II.** (1) This is a didactic course with an emphasis on the basic knowledge required for tooth preparation and indirect single tooth dental restoration. The materials science and correct manipulation of dental stones, alloys and luting agents are emphasized. Prereq: RSD 812, RSD 810, RSD 814, or consent of instructor.

**RSD 824 PRECLINICAL RESTORATIVE DENTISTRY III.** (2) This preclinical course places emphasis on dental hard tissue surgery and on their restoration to meet the biological needs of the patient. Tooth preparation and extracoronal restorations are performed on manikins and extracted teeth. The materials science and correct manipulation of investments, alloys and cements used to make case restorations are emphasized. Knowledge gained in dental morphology and occlusion is applied in the course. Laboratory: 54 hours. Prereq: RSD 812, RSD 814 or consent of instructor.

**RSD 825 PRECLINICAL RESTORATIVE DENTISTRY IV.** (1) This course continues the training in RSD 823 with emphasis on single tooth indirect intracoronal restorations and restorations of the endodontically treated tooth. Prereq: RSD 823.

**RSD 826 PRECLINICAL RESTORATIVE DENTISTRY V.** (1) This is a preclinical course with emphasis on dental hard tissue surgery and restorative procedures for single tooth indirect restorations. Clinical simulation procedures are performed on manikins and extracted teeth. Prereq: RSD 823, RSD 824, or consent of course instructor. Coreq: RSD 825.

**RSD 827 DENTAL BIOMATERIALS.** (2) In this course, the materials science, proper manipulation and biocompatibility of a wide variety of dental biomaterials are examined. The durability and biocompatibility of similarly utilized material is compared. Diagnosis of the causes of clinical materials-related failures is emphasized. Lecture, 40 hours. Prereq: RSD 820 and RSD 824 or consent of course director.

**RSD 831 CLINICAL RESTORATIVE DENTISTRY II.** (4) A continuation of RSD 821 as well as some clinical application of principles taught in RSD 824. The emphasis continues to be on the delivery of primary care type treatment with increasing competency and proficiency. Some emphasis is directed toward elementary experiences in rehabilitative type treatment procedures and occlusal dysfunctions. Clinic, 120 hours. Prereq: RSD 821 and RSD 824; coreq: RSD 836 and RSD 834.

**RSD 835 ADVANCED ESTHETICS IN RESTORATIVE DENTISTRY.** (2) This course is designed to introduce current concepts in esthetic restorative dentistry to undergraduate dental students in their third year. The techniques presented will build upon previously developed restorative didactic and clinical knowledge, but incorporate additional dental techniques and materials developed specifically for esthetic dentistry. Current dental materials being used by this discipline will be discussed as they apply to specific topics. Lecture, 16 hours; laboratory, 27 hours. Prereq: RSD 810, 812, 814, 816, 821, 822, 823/825, 824, 826, and 827.

**RSD 840 RESTORATIVE DENTISTRY UPDATE.** (1) Students are provided current information on advanced restorative dentistry clinical procedures and materials. Emphasis will be given to diagnosis, treatment planning and treatment of the complex restorative dentistry patient. The format of the course will be clinical case presentation. Prereq: RSD 836 and RSD 834.

**RSD 841 CLINICAL RESTORATIVE DENTISTRY.** (3) As the final phase in the undergraduate clinical continuum, this course continues to emphasize primary care concepts and proficiency. In addition, more complicated rehabilitative type care and occlusal dysfunction problems are encountered by the student under faculty supervision. Clinic, 145 hours. Prereq: RSD 836, RSD 831, and RSD 834.

---

**KEY:** # = new course  * = course changed  † = course dropped  ‡ = course purged
Course Descriptions

RSD 880 COMPACTED GOLD RESTORATIONS. (1)
This course introduces the student to the use of compacted gold as a restorative material. The restoration of Class III and Class V lesions is performed in the laboratory. Students are required to purchase gold they use in the course. Note: scheduling for this course will be outside of regularly scheduled class/clinic time. Prereq: RSD 824, third year standing.

RSD 882 ESTHETIC DENTISTRY ELECTIVE. (1)
This course is designed to introduce current concepts in esthetic restorative dentistry to undergraduate dental students in their 4th academic year. The techniques presented will build upon previously developed restorative didactic and clinical knowledge, but incorporate additional dental techniques and materials developed specifically for esthetic dentistry. Current materials being used by this discipline will be discussed as they apply to specific topics. Lecture, nine hours. Note: scheduling for this course will be outside of regularly scheduled class/clinic time. Prereq: RSD 810, 814, 816, 818, 821, 822, 823/824, 825/826, 827 or consent of course director.

RSD 883 INTRODUCTION TO SPORTS DENTISTRY. (1)
Introduction to Sports Dentistry is an elective course designed to educate about the opportunities available to become involved with sports teams in your community. The course topics will include: Types of dental injuries related to athletics, prevention of injuries, role of team dentist, types of sports guards and methods of fabrication of sports guards. Lecture: 10 hours; laboratory 6 hours, per course. Prereq: 4th year dental student in good standing; consent of course director. Note: Scheduling of this course will be outside the regularly scheduled class/clinic time.

RTM Retailing and Tourism Management

*RMT 340 PROFESSIONAL PRACTICE. (1)
Self-assessment of student’s strengths, limitations, and career aspirations. Preparation of reference files, letters, and resumes. Identification of, application to, and acceptance by department-approved agencies for completion of internship experience. Prereq: "C" or above in HMT 120 or MAT 114, HMT 210 or MAT 120, and HMT 270 or MAT 237.

RMT 345 SERVICE MANAGEMENT. (3)
A survey of the special characteristics, problems, and methods for managing service-oriented organizations. Students will learn principles of service management in order to see how they can be used in managing any service organization. The course also introduces quantitative techniques associated with managing organizations in the service sector. Upon completion of the course, the students will be able to apply the concepts to their work experiences.

*RMT 425 HUMAN RESOURCE MANAGEMENT. (3)
Demonstrate knowledge of human resource management and its role in retail business including: employment and recruitment, management and supervision, performance management, compensation, and providing a safe, ethical and fair environment. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

RMT 499 RETAILING AND TOURISM MANAGEMENT INTERNSHIP. (6)
Provides prospective HMT and MAT professionals a 320-hour, 8-week learning experience in a selected agency or organization, under the joint supervision of a qualified manager and a university internship supervisor. More specific details are available in the RTM Internship Manual. Prereq: "C" or better in HMT 120 or MAT 114, HMT 210 or MAT 120, HMT 270 or MAT 237, RMT 350 or MAT 315, RMT 340 and RMT 345 plus 100 approved hours of pre-internship experience.

RMT 600 RESEARCH METHODOLOGY IN HUMAN ENVIRONMENTAL SCIENCES. (3)
Students will study scientific techniques and accepted research methodologies in human environmental science research. Emphasis is placed on understanding the research process and developing the skills necessary to evaluate and implement research methods and design procedures. Prereq: Graduate standing. (Same as HES 600.)

RMT 650 SURVEY OF CURRENT THEORIES AND LITERATURE. (3)
An intensive survey of the theoretical and empirical literature related to areas of merchandising, apparel, and textiles and to hospitality management and tourism. Emphasis will be placed on research literature and theory building. Prereq: Graduate standing.

RMT 690 INDUSTRY EXPERIENCE IN RETAILING AND TOURISM MANAGEMENT. (6)
Supervised industry experience with a cooperative establishment in the student’s formal option of study. Students will complete a 400-hour, 10 week learning experience under the joint supervision of a faculty member supervisor and a qualified industry professional. Prereq: Graduate student standing. Approval of department and student’s plan of work committee.

RMT 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters.

RMT 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 credit hours. Prereq: All course work must be completed before registration for the course.

RTM 772 SEMINAR IN RETAILING AND TOURISM MANAGEMENT. (3)
Current investigation of topics relevant to both retailing and tourism management. May be repeated to a maximum of six credit hours.

RUS Russian

RUS 101 ELEMENTARY RUSSIAN. (4)
The students are introduced to the language through grammatical explanations, recitation practice, and oral as well as written exercises. The emphasis is on the spoken language of everyday use, reading of graded Rusian texts, vocabulary building and accurate pronunciation. Extensive work with tape recordings. Lecture, three hours; supervised recitation, one hour per week. Prereq: Russian Placement Exam. All students who have had two or more years of high school Russian or an native speaker of Russian and are enrolling in college-level Russian for the first time must take the Russian Placement Exam.

RUS 102 ELEMENTARY RUSSIAN. (4)
A continuation of RUS 101. Lecture, three hours; supervised recitation, one hour per week. Prereq: RUS 101 or RAE 101, Russian Placement Exam or equivalent.

RUS 125 MAPPING RUSSIA (Subtitle required). (3)

RUS 201 INTERMEDIATE RUSSIAN. (4)
Systematic study of grammar. Introduction through simplified texts to the life and culture of Tsarist and Soviet Russia. Dictation, composition, conversation, and extensive oral practice. Lecture, three hours; recitation, one hour per week. Prereq: RUS 102 or RAE 102, Russian Placement Exam or the equivalent. (Required.)

RUS 202 INTERMEDIATE RUSSIAN. (4)
A continuation of RUS 201. Lecture, three hours; recitation, one hour per week. Prereq: RUS 201 or RAE 201, Russian Placement Exam or equivalent. (Required.)

RUS 261 INTRODUCTION TO RUSSIAN STUDIES. (3)
A study of Russian literature from its beginning to the present using selected major works of prose, poetry and drama. No knowledge of Russian is required.

RUS 275 RUSSIAN FILM. (3)
This course will introduce students to the major films and film makers of the Soviet Union and Russia. It will trace the major artistic, political, cultural, and social influences and movements that shaped Russian and Soviet film. Students will view not only Russian feature films, but also documentary films and animation. Students will explore how the history and products of Russian and Soviet film are woven into the larger context of world cinema and into (Soviet) Russian history and society. Students will consider how the components of the films themselves contribute to their notoriety and lasting appeal. Taught in English.

RUS 301 CONVERSATION AND COMPOSITION I. (3)
A course designed to increase students’ skills in the areas of listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic grammar. Development of students’ lexicon through more advanced reading and writing, conversation, watching films, listening to audio materials, etc. Prereq: RUS 202 or equivalent.

RUS 302 ADVANCED INTERMEDIATE RUSSIAN II. (3)
A course designed to increase students’ skills in the areas of listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic grammar. Development of students’ lexicon through more advanced reading, conversation, watching films, listening to tapes, etc. Prereq: RUS 301 or equivalent.

RUS 370 RUSSIAN FOLKLORE (in English). (3)
Central issues of Russian folk culture, particularly related to ritual, material culture, and oral lore; patterns and functions of folk architecture, clothing, and crafts in 19th C. peasant life. Taught in English.

RUS 371 RUSSIAN CULTURE 900-1900. (3)
An introduction to and survey of Russian culture from its origins until the 20th century that acquaints students with the roots of Russian religion, the arts, architecture, music, folklore, and everyday life. Taught in English.

RUS 372 RUSSIAN CULTURE 1900-PRESENT. (3)
An introduction to and survey of Russian culture since 1900 that acquaints students with the development of Russian and Soviet culture as manifested in the arts, architecture, music, folklore, religion, and everyday life. Taught in English.

*RUS 380 LOVE AND DEATH IN 19TH CENTURY RUSSIAN LITERATURE. (3)
A survey of Russian literature of the 19th Century. Emphasis is on the development of romanticism, the rise of realism, and end-of-century decadence. All readings, lectures, and discussions are in English. Students taking the course for Russian major credit are expected to do outside work in Russian.

*RUS 381 WRITING, REVOLUTION & REACTION IN MODERN RUSSIAN LITERATURE. (3)
An in-depth examination of Russian literature since 1900, with special attention given to modernist trends, Socialist Realism, non-conformism, Russian literature abroad. Course taught in English. Students taking the course for Russian major credit will be assigned readings in Russian.
Course Descriptions

RUS 395 INDEPENDENT WORK IN RUSSIAN. (1-3) Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

RUS 400G RUSSIAN CULTURAL STUDIES (Subtitle required).

RUS 401 ADVANCED RUSSIAN I. (3) Detailed study of complex grammatical forms. Continued emphasis on speaking, reading, listening, and writing on the advanced level. Prereq: RUS 302 or equivalent, consent of instructor.

RUS 404 ADVANCED RUSSIAN II. (3) Detailed study of complex grammatical forms. Continued emphasis on speaking, reading, listening, and writing on the advanced level. Prereq: RUS 401 or consent of instructor.

RUS 410G RUSSIAN FOR SPECIAL PURPOSES (Subtitle required). (3) This course focuses on specialized aspects of Russian, including, but not limited to, translation and interpretation, business Russian, stylistics, structure of Russian, etc. May be repeated under different subtitles for up to 9 hours. Prereq: Completion of RUS 302 or equivalent or by permission of the instructor.

RUS 420G READINGS IN RUSSIAN LITERATURE (Subtitle required). (3) Subtitle Required. Repeatable up to 6 credits. This course examines in depth a particular author, genre, or literary movement that is central to understanding the dynamics of the history of Russian Literature from its earliest texts and movements to the present. Topics may include, but are not limited to, “Soviet Satire,” “The Novels of Dostoievsky,” “Chekhov’s Plays,” “Russian Symbolism,” etc. Readings will be in both Russian and English, class conducted in Russian. Prereq: RUS 401 or permission of the instructor.

RUS 460G MAJOR RUSSIAN WRITERS: (Subtitle required).

RUS 463 RUSSIAN FILM AND THEATER: (Subtitle required).

RUS 495G ADVANCED INDEPENDENT WORK IN RUSSIAN STUDIES. (1-3) Independent research in Russian Studies on an advanced level for undergraduates and for graduate students outside the discipline. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of RUS 395 and 495G. Prereq: Consent of instructor.

RUS 499 RUSSIAN STUDIES CAPSTONE SEMINAR (Subtitle required).

RUS 501 STRUCTURE OF RUSSIAN. (3) An in-depth study of the history and structure of Russian in a variety of textual contexts. Historical changes that have led to significant contemporary features will be emphasized. Taught in Russian. Prereq: RUS 404 or consent of instructor.

RUS 502 STRUCTURE OF RUSSIAN. (3) An overview of the sound system, morphological system, and syntax of contemporary Russian. Prereq: RUS 501 or permission of instructor.

RUS 520 RUSSIAN TRANSLATION. (3) An in-depth study of a specific aspect of Russian or Soviet literature, e.g., works of a single author or of several authors, a particular time period, a specific genre or theme, etc. Students taking the course for Russian credit will be expected to do readings and research in Russian. May be repeated for up to 6 credits with different subtitles.

RUS 530 BUSINESS RUSSIAN. (3) This course is designed to introduce a variety of critical approaches used in the study of visual culture in Russian culture. The course may focus on various visual media such as film, image (in media, photography and propaganda), architecture and art. The course may focus on one particular aspect of visual culture or may compare visual genres or may compare visual media to other aspects of culture. Students taking the course for Russian credit will be required to read and do research in Russian. May be repeated for up to 6 credits with different subtitles.

RUS 535 RUSSIAN VISUAL STUDIES (Subtitle required). (3) This course is designed to introduce a variety of critical approaches used in the study of visual culture in Russian culture. The course may focus on various visual media such as film, image (in media, photography and propaganda), architecture and art. The course may focus on one particular aspect of visual culture or may compare visual genres or may compare visual media to other aspects of culture. Students taking the course for Russian credit will be required to read and do research in Russian. May be repeated for up to 6 credits with different subtitles.

RUS 555 TOPICAL SEMINAR ON RUSSIAN STUDIES (Subtitle required). (3) An interdisciplinary seminar in Russian Studies. Content may include comparative study of cultural phenomena or products or cross-disciplinary approaches to one topic. MCL/Russian major/minors taking the course for Russian credit will be required to read and research in Russian. May be repeated for up to 6 credits with different subtitles.

RUS 670 TOPICS IN RUSSIAN CULTURE AND FOLKLORE (Subtitle required). (3) An investigation of the 1800’s to the present, with emphasis on specific topics. May be repeated up to nine credits under different subtitles.

RUS 680 TOPICS IN RUSSIAN/SOViet LITERATURE (Subtitle required). (3) An in-depth examination of the classics of Russian and/or Soviet literature using original texts. Conducted in Russian. MATWL students will learn how to present Russian literary works in their language curriculum. May be repeated to a maximum of nine credits under different subtitles.

RUS 690 SPECIAL TOPICS IN RUSSIAN STUDIES (Subtitle required). (3) An in-depth exploration of a particular literary, cultural, cinematic topic in Russian cultural history. Students will be expected to conduct part of their research using Russian materials. MATL students will learn how to synthesize content-based material into their language curriculum. Taught in Russian. May be repeated to a maximum of six credits under a different subtitle.

RUS 695 INDEPENDENT STUDY IN RUSSIAN STUDIES. (1-3) Independent work devoted to specific problems or areas of interest in Russian language, literature, culture, or pedagogy. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

SAG Sustainable Agriculture

SAG 101 INTRODUCTION TO SUSTAINABLE AGRICULTURE. (3) Broad introduction to the environmental, economic and cultural components of sustainable food production and marketing. The definition, emergence, and growth of sustainable agriculture are discussed along with pertinent soil, crop and livestock management practices. Relationships between environmental stewardship, producer profitability, and community-based food systems are emphasized.

SAG 201 CULTURAL PERSPECTIVES ON SUSTAINABILITY. (3) Examines cultural dimensions within the concept of sustainability through a close reading of texts addressing the relationship between people and nature. The application of cultural constructs used by individuals and societies in experiencing, interpreting and impacting the natural environment will be studied. Insights and observations of noted writers on environmental issues are discussed in relation to the interdependence between individuals, civilizations, and nature. Prereq: SAG 101. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

SAG 386 PLANT PRODUCTION SYSTEMS. (4) In-depth analysis of the underlying principles of plant production systems. Successful strategies, based on application of the principles developed by lecture and laboratory activities, will be discussed in either agronomic or horticultural contexts. Special attention will be given to minimizing the environmental impact of the plant production techniques employed. Prereq: PLS 210 and PLS 366 or concurrently or consent of instructor. (Same as PLS 386.)

SAG 390 AGROECOLOGY. (3) A general introduction to ecological processes and principles applied to agricultural ecosystems, including interactions between plants, soils, and animals on population, community and ecosystem levels. Course components will be applied to agricultural ecosystems that are of economic importance and ecological significance to the state of Kentucky. Emphasis will be placed on understanding how an ecological perspective can inform sustainable land management, the ecological basis for best management practices, and the interdisciplinary nature of agroecosystem management. (Same as PLS 390.)

SAG 395 RESEARCH IN SUSTAINABLE AGRICULTURE. (1-6) Independent research related to some aspect of sustainable agriculture under the direction of a research mentor. The research may be conducted in the College of Agriculture, some other unit on campus, or at an approved off-campus entity. Projects can include, but are not limited to, laboratory experiments, field-based research, and studies involving sociology, economics, anthropology, or related disciplines. There is a clear expectation that quantitative data collection and analysis will be an integral part of the research project. Prereq: Consent of instructor and approval of Learning Contract.

SAG 397 APPRENTICESHIP IN SUSTAINABLE AGRICULTURE. (1) Provides students with hands-on experience operating an organic community supported agriculture producer, produce farm and marketing its harvest in the local community. Students receive training across the full range of production and marketing activities under the guidance of the Course Coordinator and the professional staff of the farm management team. Prereq: SAG 101 and SAG 201, or consent of instructor.

SAG 490 INTEGRATION OF SUSTAINABLE AGRICULTURE PRINCIPLES. (3) Examination of the complex scientific and social issues involving sustainable agriculture systems, including interactions between plants, soils, and animals on population, community and ecosystem levels. Course components will be applied to agricultural ecosystems that are of economic importance and ecological significance to the state of Kentucky. Emphasis will be placed on understanding how an ecological perspective can inform sustainable land management, the ecological basis for best management practices, and the interdisciplinary nature of agroecosystem management. (Same as PLS 390.)
### Course Descriptions

#### SEM 110 INTRODUCTION TO STEM EDUCATION.
Through course and school-based experiences, students will learn how to engage adolescents in learning mathematics, science, computer science, and engineering. This course will introduce the foundations of STEM Education, learning environments, curriculum and instruction, standards and assessment, as well as contemporary issues related to the field. The roles, responsibilities, and daily life of teachers, schools and students will be examined. This course includes 30 hours of experience in the field.

#### SEM 328 TEACHING SCIENCE IN THE ELEMENTARY SCHOOL.
A critical analysis of a variety of objectives, instructional materials and evaluation techniques for teaching elementary school science, with a special emphasis on grades K-4. Consideration will be given to addressing the individual needs of a diverse student population. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 12 hours of science. Coreq: EDC 322.

#### SEM 337 TEACHING MATHEMATICS IN ELEMENTARY SCHOOLS.

#### SEM 345 METHODS OF TEACHING MIDDLE LEVEL MATH.
A study of theoretical models and methodological strategies for teaching arithmetic, informal geometry, and introductory algebra at the middle school level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques. Consideration will be given to addressing the individual needs of a diverse student population. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in Mathematics, or permission of instructor.

#### SEM 348 METHODS OF TEACHING MIDDLE LEVEL SCIENCE.
A study of theoretical models and methodological strategies for teaching science at the middle school level. This course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques. Special needs of individuals in a diverse middle school population are emphasized. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in science, or permission of instructor.

#### SEM 421 STEM EDUCATION METHODS I.
This course is intended to help future STEM Education teachers build a theoretical background and develop the practical skills needed to begin to develop themselves as effective teachers in the secondary classroom. Students will be introduced to, and gain hands-on experience with a variety of instructional materials appropriate for teaching STEM Education at the secondary level. Students are encouraged to be creative and reflective in developing, implementing, and evaluating practices associated with teaching STEM concepts and skills. A strong emphasis is placed upon helping students to develop an understanding of the processes of inquiry teaching, the processes of science and mathematics, as well as a deep conceptual understanding of their respective content area(s). This is part of a two course sequence. This course requires a minimum of 100 hours of observation. Prereq: EDP 202, SEM 110, Admission into STEM PLUS Program.

#### SEM 422 STEM EDUCATION METHODS II.
This course, the second in a two course series, is intended to further develop the practical skills needed to develop effective STEM Education teachers in the secondary classroom. Students will build upon the knowledge and experience they gained in SEM 421 by delving deeper into students' mathematical thinking, through field experiences, implementation of a variety of instructional materials, and development of curricula appropriate for teaching STEM Education at the secondary level. Students are encouraged to be creative and reflective in developing, implementing, and evaluating practices associated with teaching STEM concepts and skills. A strong emphasis is placed upon helping students to develop an understanding of the processes of inquiry teaching, the processes of science and mathematics, as well as a deep conceptual understanding of their respective content area(s). This is part of a two course sequence. This course requires a minimum of 100 hours of observation. Prereq: SEM 421 and admission into the STEM PLUS Program.

#### SEM 423 ASSESSMENT IN STEM EDUCATION.
The work in this course will help prepare future STEM teachers to create, examine, analyze, and critically utilize a variety of assessments found in K-12 education. Specific focus will be given to present day assessment issues and will also include the following interconnected components in relation to assessment: equity (high expectations and strong support for all students); curriculum (coherent, focused, comprehensive, and culturally inclusive); teaching (focus on understanding what students know and need to learn); learning (active construction of knowledge); and technology (incorporation of technological changes in the teaching-learning process). Prereq: Admission into STEM PLUS Program. Taken concurrently with SEM 435.

#### SEM 435 STEM STUDENT TEACHING IN THE SECONDARY SCHOOL.
SEM 435 is a ten credit hour course taken concurrently with student teaching. The purpose of student teaching is to help student teachers continue to develop their knowledge, strategies, and the skills necessary in order to become successful and productive secondary teachers capable of being a leader in the profession. With the support of cooperating teachers in area schools, the course instructor, and university field supervisors, student teachers will apply the theories, methods, and techniques they have learned in the past in addition to what they will learn during their concurrent student teaching experiences. Prereq: Consent of Program Advisor and admission into STEM PLUS Program.

#### SEM 445 APPLICATIONS OF TEACHING MIDDLE LEVEL MATH.
A study of theoretical models and methodological strategies for teaching mathematics at the middle school level. The course will include a critical analysis of equity issues in middle school mathematics, using manipulative-based techniques to promote adolescents’ curiosity in mathematics. This course is in conjunction with an eight-week field experience. Prereq: SEM 345 or permission of instructor.

#### SEM 448 APPLICATIONS OF TEACHING MIDDLE LEVEL SCIENCE.
A study of applied models and methodological strategies for teaching science at the middle school level. This course will include applications such as project based learning, engineering design-based science, interdisciplinary science, and other innovative methods for applying national and state science standards to real-world contexts. Special emphasis will be given to lesson study and peer teaching and evaluation. This course is in conjunction with an eight-week field experience. Prereq: SEM 348 or permission of instructor.

#### SEM 504 DESIGNING PROJECT-BASED ENVIRONMENTS IN STEM EDUCATION.
Students will design STEM projects that engage students in the investigation of real-world phenomena, focusing on the development of STEM projects that reflect research-based “best practices” in STEM education.

#### SEM 575 SEE BLUE MATHEMATICS CLINIC.
This course focuses on strategies for working with K-12 students who are struggling with and/or have disabilities in learning mathematics. It is a course designed to develop both theoretical understandings and operational skills in working with students who struggle in mathematics, using manipulatives and hands-on techniques are discussed. This course is a combination of lecture and application with a student client.

#### SEM 603 CURRICULUM AND INSTRUCTION IN STEM EDUCATION.
This course introduces the fundamental issues related to curriculum and instruction in STEM programs. Major topics addressed will include (but will not be limited to), defining STEM education, its curricula, purposes, and past and present social and political influences affecting the development and focus of STEM education. Additional discussion will address the development of STEM education standards and their relationship to national and state science and mathematics standards. Special emphasis will also be given to the development, testing, implementation, and assessment of STEM curricula. A major focus of the course will be on the review of selected STEM curricular programs that reflect research-based “best practices” in STEM education.

#### SEM 604 HISTORY OF STEM EDUCATION.
The History of STEM Education course will begin with researching the background and development of each individual component of STEM (i.e., Science, Technology, Engineering, and Mathematics) Education. This will follow with a historical comparison of these components highlighting their similarities as well as their differences. The course will conclude with a study of the entity, STEM Education, from the early 19th century America to the present focusing on reports and documents that have connected the Science, Technology, Engineering, and Mathematics disciplines and shaped current research and reform efforts.

#### SEM 610 TEACHER LEADERSHIP IN STEM EDUCATION.
This course introduces fundamental issues related to classroom research, especially through the lens of action research, and what it means to be a teacher leader in the areas of STEM. Practical application will be the primary focus simultaneously with learning and learning to lead. Collaboration and group work is a hallmark of action research; students in this course will demonstrate their abilities to design, diagnose, plan, implement, observe, and reflect in cooperation with classmates. The various roles and skills necessary to be an effective researcher will be discussed, as well as important issues related to empowerment, contextualization, ethical considerations, and validity. In addition, students will examine action research through the lens of innovation and their role as a future teacher leader.
SEM 613 EFFECTIVE USE OF TECHNOLOGY FOR MODELING-BASED INQUIRY IN STEM EDUCATION. (3)
This course is designed to teach effective uses of educational technologies towards engagement in modeling-based inquiry in STEM Education. Students will learn the key components of facilitating modeling-based inquiry through their own building of accurate conceptual models of explanations of key STEM theories and underlying concepts. Utilizing technologies implemented in authentic STEM practice, students will learn how to facilitate pupils’ use of technologies in how to develop controlled observations, analyze data, recognize patterns, propose and revise their models of explanation, and communicate their models to their peers. Prereq: EDC 317 and/or EDC 607 or its equivalent or permission of instructor.

SEM 620 EQUITY IN STEM EDUCATION. (3)
This course will be a seminar designed to study equity issues in the teaching and learning of STEM disciplines in P-20 education. A primary focus will be on enhancing teachers’ ability to use research and reflection for learning and leading. Throughout the course the relationship between theory and practice will be emphasized in an attempt to understand some of the complexities and challenges in addressing issues of equity in mathematics learning and teaching. Prereq: Graduate standing.

SEM 631 MATHEMATICS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning mathematics and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours, laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

SEM 634 SCIENCE PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning science and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours, laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

SEM 670 ADVANCED STUDY IN THE TEACHING OF ELEMENTARY SCHOOL MATHEMATICS. (3)
New developments in modern elementary mathematics for teachers in the elementary schools will be reviewed. Special emphasis will be given to a study of new teaching methods, application of published research, techniques and trends in mathematics in the elementary school. Prereq: Graduate standing.

SEM 674 ADVANCED STUDIES IN TEACHING ELEMENTARY SCHOOL SCIENCE. (3)
An advanced course for classroom teachers that focuses on implementation of instructional strategies and assessments for teaching elementary science. A review of contemporary research in teaching and learning science will be closely related to classroom instruction. Specific focus will be given to technology integration, assessment, and addressing the needs of diverse student populations. Prereq: Graduate standing.

SEM 701 HISTORY OF MATHEMATICS EDUCATION. (3)
A study of mathematics education from early 19th century America to the present focusing on forces that connected mathematics, psychology, psychometrics, sociology, and technology. Prereq: EPE 651 or permission of the instructor.

SEM 702 THEORETICAL FOUNDATIONS OF MATHEMATICS EDUCATION. (3)
A survey of constructivism, cognitive science, and sociological and anthropological perspectives as fundamental theories for mathematical learning and an overview of research context where these theories guide inquiries. Prereq: EDP 610 (Theories of Learning) or consent of instructor. Many concepts and theories in SEM 702 are related to learning theories. Past students felt better prepared for SEM 702 after taking EDP 610.

SEM 703 ADVANCED RESEARCH IN MATHEMATICS EDUCATION. (3)
An advanced seminar focusing on current critical research issues in mathematics education, the way research impacts education policies and practices, various methodological pursuits of researchers, and theory building.

SEM 706 RESEARCH IN STEM EDUCATION. (3)
Students will have the opportunity to learn about the research paradigms guiding STEM education research throughout history with critical analysis of those most utilized across the modern STEM education research communities. Students will acquire knowledge and skills that allow them to develop a research proposal with explicit discussion of their research assumptions and that targets meaningful and timely research questions in STEM education. Prereq: ELD 651, or EDP/EPE 557 and EPE 570, or EDP/EPE 660 or permission of instructor.

SEM 708 ENGINEERING IN STEM EDUCATION. (3)
SEM 708 will introduce students to the field of engineering and give them the opportunity to explore engineering concepts, engineering design, different fields of engineering, engineering curricular materials for K-12 students, research on including engineering in K-12 education, and assessments necessary in designing and developing research-based, interdisciplinary, engineering-design curricula for K-12 students and teachers. In SEM 708 students will experience, evaluate, and design interdisciplinary, engineering-design based curricula to be used within STEM classrooms. Prereq: EDC 707 or permission of instructor.

SEM 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL. (0-9)
This course is designed to teach effective uses of educational technologies towards engagement in modeling-based inquiry in STEM Education. Students will learn the key components of facilitating modeling-based inquiry through their own building of accurate conceptual models of explanations of key STEM theories and underlying concepts. Utilizing technologies implemented in authentic STEM practice, students will learn how to facilitate pupils’ use of technologies in how to develop controlled observations, analyze data, recognize patterns, propose and revise their models of explanation, and communicate their models to their peers. Prereq: The appropriate methods course in the subject area (SEM 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education). (Same as EDC 746.)

SEM 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

SEM 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

SEM 770 SPECIAL TOPICS IN STEM EDUCATION (Subtitle required). (1-4)
This course is a seminar of topical offerings with variable topics in the study of philosophy, principles, and research associated with STEM Education. This seminar is designed to cover topical issues around current research and strategies in STEM Education as they relate to P-20 implementation. STEM Education is transdisciplinary and constantly changing. This course will address content specific and transdisciplinary issues within the context of new directives and initiatives. May be repeated to a maximum of twelve credits. Prereq: SEM 603 and/or SEM 706 or permission of instructor.

SEM 781 INDEPENDENT STUDY IN STEM EDUCATION. (1-3)
An independent study course for graduate students. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies and Program Advisor.

SOC Sociology

SOC 101 INTRODUCTION TO SOCIOLOGY. (3)
Introduction to the concepts and methods of sociology. Topics shall include socialization; group processes, social inequalities; social institutions; and social change. This course or its equivalent (RSO 102) serves as a prerequisite to all other Sociology courses. Students may not receive credit for both this course and RSO 102.

SOC 180 GLOBAL SOCIETIES IN COMPARATIVE PERSPECTIVE. (3)
A sociological study of the effects of globalization processes on contemporary societies. Particular emphasis is given to economic, political, and cultural globalization in relationship to two non-US societies (to be identified each semester by the instructor) as well as the Appalachian region of the United States.

SOC 235 INEQUALITIES IN SOCIETY. (3)
This course seeks to promote an understanding of inequalities in American society by considering them in the context of the social origins, development, and persistence of inequalities in the United States and other societies. Issues of inequality that may be considered include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as AAS 235.)

SOC 255 MEDICINE, HEALTH, AND SOCIETY. (3)
SOC 255 is an introduction to foundational social theories and concepts through the lens of health, healing, and medicine. Social science perspectives on health disparities across populations, how health and disease are defined and managed, and cultural experiences of illness provide a window into a broader understanding of social life. The course will focus on four major social theories – social constructionism, symbolic interactionism, conflict theory, and functionalism. We will use these theoretical foundations and related core concepts to explore topics like physician-patient interaction and the social organization and distribution of health care. SOC 255 will also provide an introduction to social science research through critical analysis of original scholarly work and exposure to conducting, analyzing, and presenting one’s own empirical findings. SOC 255 is ideal for those with career aspirations in medicine, nursing, or other health professions, and covers the sociology content included on the MCAT exam for medical schools. This course also provides a critical foundation for those interested in learning about population health from the point of view of social science. Throughout the course, we will explicitly address the unique contributions of social science to a broader understanding of the etiology, treatment, experience, and consequences of illness and disease. (Same as HSP 255.)

SOC 299 INTRODUCTORY TOPICS IN SOCIOLOGY (Subtitle required). (1)
An introductory study of a selected topic in sociology.

SOC 302 SOCIOLOGICAL RESEARCH METHODS. (3)
A focus on issues of social and behavioral research design, covering such topics as the relationship between theory and research, the ethics of social science research, units of analysis, identification of variables and statement of hypotheses, sampling, measurement, and modes of social observation. Required for majors. Prereq: Sociology majors and minors only; SOC 101 or CLD 102 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.
University of Kentucky

Course Descriptions

SOC 303 QUANTITATIVE SOCIOLOGICAL ANALYSIS. (3)
This course focuses on the use of quantitative analysis techniques and software in social and behavioral research, covering such topics as univariate and bivariate analysis, parameter estimation, and hypothesis testing. Required for majors. Prereq: SOC 302 or PSY 215.

SOC 304 CLASSICAL SOCIOLOGICAL THEORY. (3)
A survey and analysis of the theories of human social interaction and society from the nineteenth and early twentieth centuries. Works of theorists, such as Marx, Weber, Durkheim, Simmel, and Mead will be considered. Emphasis is on the development of sociology as a discipline. Required for majors.

SOC 305 CONTEMPORARY SOCIOLOGICAL THEORY. (3)
A survey and analysis of the major schools of contemporary sociological theory. Works of major theorists are included. Emphasis is on the conceptual structure of the different theories and the way in which they are applied in contemporary sociological analysis. Prereq: SOC 304.

SOC 334 SOCIOLOGY OF FAMILIES. (3)
A sociological study of the concepts, theories, issues, and research findings on families and the dynamics of family life, with an emphasis on the social context and diversity of families. Prereq: SOC 101 or CLD 101.

SOC 335 SOCIOLOGY OF GENDER. (3)
A sociological study of gender as a socially and culturally constructed phenomenon. Topics shall include the intersection of gender and race/ethnicity and class; sexualities; gender and social movements; sociological theories concerning gender; feminist theory; and research on the relevance of gender to various subfields of sociology. Prereq: SOC 101 or CLD 102.

SOC 337 JUVENILE DELINQUENCY. (3)
A study of the many social factors that shape juvenile delinquency and its control (including race, ethnicity, socioeconomic class, and gender). Students learn about past and present theories, research, and practices in order to address the issue of juvenile delinquency from a sociological perspective. Prereq: 6 hours of social science credit or consent of the instructor.

SOC 338 FAMILY VIOLENCE. (3)
This course examines various forms of family violence, including intimate partner violence and child abuse, by reviewing the theoretical and empirical literature on these problems. The course material addresses such topics as risk and protective factors, and both legal and therapeutic responses to family violence.

SOC 339 INTRODUCTION TO CRIMINOLOGY. (3)
A sociological study of the extent and nature of crime, delinquency, and more general deviant behavior. Topics may include the sociological theories and typologies of crime and deviance; sociological theories of crime and deviance; and crime/deviance typologies. Prereq: SOC 101 or CLD 102.

SOC 340 COMMUNITY INTERACTION. (3)
Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attitudes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or SOC 101 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as CLD 340.)

SOC 342 ORGANIZATIONS AND WORK IN SOCIETY. (3)
A sociological study of the roles of formal organizations and workplaces in society, including consideration of their structures and processes. Topics may include contemporary issues in the sociology of organizations and work, including bureaucratic and alternative structures; opportunities for worker participation; the role of leadership and decision making; and the exercise of power in organizations. Prereq: SOC 101 or CLD 102.

SOC 343 POLITICAL SOCIOLOGY. (3)
A sociological study of the causes and consequences of the distribution of power in society. Topics may include the means by which social movements challenge power; the political institutions in which power is exercised; and the relationship of the political arena to other social institutions and policies. Prereq: SOC 101 or CLD 102.

SOC 345 GLOBAL DIVISIONS OF LABOR: WORK AND ORGANIZATIONS IN THE WORLD ECONOMY. (3)
This course examines employment processes, unemployment in the global economy, and the theories of the division of labor beginning with Marx, Durkheim, and Weber. This is followed by an analysis of jobs in the current global economy. First, it examines the processes by which jobs are created and destroyed; and then various processes such as outsourcing and offshoring; second, it looks at lean production and evidence-based medicine as forms of rationalization that emerged from scientific management and other processes. Third, it looks at how the Internet and robotics are transforming work. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 347 INTERNATIONAL MIGRATION IN GLOBAL PERSPECTIVE. (3)
This course examines migration in a global perspective. It looks at immigration, emigration, and naturalization. It includes both legal and illegal immigration. All the major regions of the world are considered in a broad perspective, and then more specific forms of migration in specific countries are considered. Integration and naturalization processes are an important part of the mix. Both qualitative and quantitative evidence will be considered.

SOC 349 ECONOMIC SOCIOLOGY: CONSUMPTION, PRODUCTION AND THE SOCIAL CONSTRUCTION OF MARKETS. (3)
This course examines the field of economic sociology. It looks at consumption and production behavior in a variety of industries. It examines the labor market and how people are trained and find jobs. It looks at how people establish businesses and use investment to socially construct production. It looks at how markets are socially constructed and how market failures occur. Finally, it looks at the constructive role that government can play in controlling and promoting markets. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 350 TOPICS IN SOCIOLOGY (Subtitle required). (3)
Current research and conceptual developments in a selected topic or subfield of sociology. May be repeated to a maximum of six credits under different subtitles.

SOC 351 GLOBAL SOCIOLOGICAL TOPICS (Subtitle required). (3)
Current research and conceptual developments in a selected topic or subfield of sociology related to international issues or globalization. Topics will facilitate an understanding of the relationship between local and global processes. May be repeated to a maximum of six credits under different subtitles. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 355 SOCIOLOGY OF HEALTH AND ILLNESS. (3)
Who defines health and illness? Why is disease and premature death unequally distributed in society? What social forces cause individuals to get sick or stay healthy? How have changes in the medical profession, the health care system, and health policy affected treatment outcomes and illness experiences? This course addresses these questions through a presentation of important concepts and substantive issues the sociology of health and illness (or medical sociology), and an introduction to major classic and contemporary research in this area. We will compare and contrast sociological perspectives on health with the perspectives offered by biomedicine and other health care professionals. The course has two major sections: The first covers the social origins of illness—the social construction of illness and biomedical knowledge, social epidemiology, and social influences on personal experiences of illness. The second section covers social and institutional responses to illness and the impact of these on physician-patient interactions, health outcomes, and the distribution of disease. In this section we will examine the medical profession, the health care system, health policy, and the changing nature of these. Class sessions will emphasize group discussions and exercises based on original scholarly writings. Discussions and exercises are designed to encourage the development of analytic skills, recognition of the benefits of collaborative approaches to complex problems, and independent exploration of course material. (Same as PPH 355.)

SOC 360 ENVIRONMENTAL SOCIOLOGY. (3)
A sociological study of the inter-relationships between human societies and the natural environment. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as CLD 360.)

SOC 363 ENVIRONMENTAL JUSTICE. (3)
This course focuses on environmental injustices and movements for social justice both within the United States and abroad. It examines the extent to which disadvantaged groups, including people of color, low-income communities, and people of the Global South, bear a disproportionate share of environmental toxins and hazards in the world. It also examines the emergence and characteristics of environmental justice movements grassroots and community-based efforts to deal with environmental threats. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 380 GLOBALIZATION: A CROSS-CULTURAL PERSPECTIVE. (3)
A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as CLD 380.)

SOC 395 INDEPENDENT WORK. (1-3)
Independent study of a project under the supervision of a faculty member. Students must identify both a project topic and a sociology faculty mentor who has agreed to supervise this project. Students taking this course must be Sociology majors or minors and have a 3.0 GPA in the department. A learning contract must be filed in the department in order to receive a grade for this course. May be repeated to a maximum of six credits. Prereq: SOC 101 or CLD 102, SOC major or minor, GPA of 3.0 or above in the department, consent of faculty mentor and learning contract.

SOC 399 PRACTICUM IN SOCIOLOGY. (1-12)
A service learning or internship experience in sociology under the supervision of a faculty member. May be repeated to a maximum of 12 credits. Maximum of six hours of SOC 399 will count toward Sociology Major requirements; maximum of 3 hours of SOC 399 will count toward Sociology Minor requirements. Pass/fail only. Prereq: SOC 101 or CLD 102, SOC major or minor, consent of instructor and learning contract.

SOC 420 SOCIOLOGY OF COMMUNITIES. (3)
A sociological study of issues relevant to communities. Topics may include: conceptual approaches to community; organizational and institutional linkages within and beyond the community; social inequality and social processes within communities such as social networks, social capital, power and decision-making, and social change. Prereq: SOC 101 or RSO 102 or CLD 102; and one of the following: SOC 302 or 304 or CLD 405; or consent of instructor. (Same as CLD 420.)

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 432</td>
<td>RACE AND ETHNIC RELATIONS.</td>
<td>(3)</td>
<td>Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as AAS 432.)</td>
</tr>
<tr>
<td>SOC 435</td>
<td>TOPICS IN SOCIAL INEQUALITIES (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: Six hours of social science or consent of instructor. (Same as AAS 433.)</td>
</tr>
<tr>
<td>SOC 437</td>
<td>SOCIOLINGUISTICS.</td>
<td>(3)</td>
<td>This class explores the fundamental roles that law plays in organizing contemporary social life. It considers various ways of understanding law's complex presence in society: how law shapes and enables social interaction, how law constructs differences among people and their actions, how law mediates and enforces power relationships, and how law matters for the kind of society we have. Official legal institutions (courts) and actors (judges, police, lawyers, etc.) will be examined, as well as how law works as a complex array of norms, symbols, discourses, and practices. Prereq: SOC 339 or six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 438</td>
<td>CROSS-NATIONAL CRIME.</td>
<td>(3)</td>
<td>The purpose of this course is to teach students how to describe and explain geographic and historical variations in the amounts and types of crime across countries and to understand contemporary transnational crime problems. Students will critically examine the data, methods, and theories used to measure and explain crime across nations and over time. They will learn how to make informed comparisons across a broad range of countries and world regions. Additionally, students will be introduced to the complexities of studying large-scale international and transnational crimes, like genocide. Prereq: SOC 101 or CLD 102 or consent of instructor.</td>
</tr>
<tr>
<td>SOC 439</td>
<td>TOPICS IN CRIME, LAW AND DEVIANCEN.</td>
<td>(3)</td>
<td>A sociological study of a special topic central to the scientific study of crime, law, or deviance. May include such topics as deviant subcultures; substance use; social control of crime; sociology of law; and philosophies of punishment. May be repeated to a maximum of six credits under different subtitles. Prereq: Six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 440</td>
<td>COMMUNITY PROCESSES AND COMMUNICATION.</td>
<td>(3)</td>
<td>This course examines the relationship between community organization and change and the media. Special emphasis is given to the place of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD/SOC 340 or consent of instructor. Primary registration access limited to majors and remaining seats opening during secondary registration. (Same as CLD 440.)</td>
</tr>
<tr>
<td>SOC 442</td>
<td>TOPICS IN WORK, ORGANIZATIONS AND ECONOMY (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of selected topics related to work and organization. Topics may include decision-making and leadership in organizations; environmental impacts of organizations on the future of unions and workplace democracy; and changes in labor markets. May be repeated to a maximum of six credits under different subtitles. Prereq: Six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 444</td>
<td>TOPICS IN POLITICAL SOCIOLOGY (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of topics related to politics and government. Topics may include national and supra national government; citizenship; political parties; interest groups; social movements; and globalization. May be repeated to a maximum of six credits under different subtitles. Prereq: Six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 445</td>
<td>PUBLIC SOCIOLOGY.</td>
<td>(3)</td>
<td>This course explores strategies for using sociological research tools to make a tangible impact on real-world social problems. It focuses on &quot;Public Sociology&quot; as a &quot;brand&quot; of sociology in which scholars seek to engage with the wider public by addressing social issues and seeking to share the results of their research with individuals and organizations who can utilize it for the solution of social problems. Students will be involved in a public sociology project as they fulfill course requirements. Prereq: SOC 302 or consent of instructor.</td>
</tr>
<tr>
<td>SOC 446</td>
<td>CRIMINALITY.</td>
<td>(3)</td>
<td>This course examines the causes and consequences of mass imprisonment in the United States of America. Special attention is given to social context and political policies that led to the era of mass incarceration, the social factors that shape and describe the phenomenon of mass incarceration, and its consequences to society at the personal and societal levels. Prereq: Six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 447</td>
<td>DRUGS IN SOCIETY.</td>
<td>(3)</td>
<td>This course examines the use and abuse of alcohol and other drugs through a sociological lens. Topics may include the intersection of substance use with race, class and gender; prevention; treatment; development of social policies; and theoretical explanations pertaining to the use of psychoactive substances in American society. Prereq: Six hours of social science or consent of instructor.</td>
</tr>
<tr>
<td>SOC 506</td>
<td>SOCIOLINGUISTICS.</td>
<td>(3)</td>
<td>This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as ANT/LIN 506.)</td>
</tr>
<tr>
<td>SOC 508</td>
<td>DISCOURSE ANALYSIS.</td>
<td>(3)</td>
<td>This course is an introduction to the methods used in various approaches to discourse and textual analysis. The course examines an introduction to Speech Act Theory, Conversation Analysis, Ethnographic Discourse Analysis, Discourse Pragmatics, Interactional Sociolinguistics, Variation Analysis, and Critical Discourse Analysis. Special attention is given to practical experience analyzing both spoken and written discourse. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN 508.)</td>
</tr>
<tr>
<td>SOC 517</td>
<td>RURAL SOCIOLOGY.</td>
<td>(3)</td>
<td>A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; and the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as CLD 517.)</td>
</tr>
<tr>
<td>SOC 534</td>
<td>SOCIOLINGUISTICS.</td>
<td>(3)</td>
<td>A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/CLD 534.)</td>
</tr>
<tr>
<td>SOC 535</td>
<td>ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of selected topics related to work, organizations, and the economy. Topics may include economic sociology; sociology of occupations and professions; and sociology of organizational administration. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 539</td>
<td>ADVANCED TOPICS IN CRIME, LAW AND DEVIANCEN. (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of special topics related to the scientific study of crime, law or deviance. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 541</td>
<td>ADVANCED TOPICS IN WORK, ORGANIZATIONS, AND ECONOMY (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of selected topics related to work, organizations, and the economy. Topics may include economic sociology; sociology of occupations and professions; and sociology of organizational administration. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 550</td>
<td>ADVANCED TOPICS IN SOCIOLINGUISTICS (Subtitle required).</td>
<td>(3)</td>
<td>A sociological study of topics, theories, or research findings from selected sociolinguistic subfields. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 565</td>
<td>INDEPENDENT WORK.</td>
<td>(1-3)</td>
<td>Independent sociological study of a topic under the supervision of faculty. Students must identify both a project topic and a sociology faculty mentor who has agreed to supervise this project. A learning contract must be filed in the department in order to receive a grade for this course. Prereq: May be repeated to a maximum of six credits. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 603</td>
<td>SEMINAR IN TEACHING SOCIOLOGY.</td>
<td>(1-3)</td>
<td>A pedagogical and professional development seminar to prepare skillful, effective sociology instructors. Prereq: Graduate standing in sociology or consent of instructor.</td>
</tr>
<tr>
<td>SOC 610</td>
<td>PROSEMINAR IN COMPLEX ORGANIZATION.</td>
<td>(3)</td>
<td>A systematic examination of the sociological concepts, literature and current developments in the field of complex organizations. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>SOC 622</td>
<td>TOPICS AND METHODS OF EVALUATION.</td>
<td>(3)</td>
<td>An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to: provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EDP/EPE 620.)</td>
</tr>
<tr>
<td>SOC 630</td>
<td>PROSEMINAR IN DEVIANT BEHAVIOR.</td>
<td>(3)</td>
<td>A systematic examination of the sociological concepts, literature, and current developments in the field of deviant behavior. Prereq: Graduate standing; SOC 436 or equivalent.</td>
</tr>
<tr>
<td>SOC 635</td>
<td>SEMINAR IN SOCIAL INEQUALITIES.</td>
<td>(3)</td>
<td>This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classical and contemporary works on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking a specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as AAS 635.)</td>
</tr>
</tbody>
</table>
SOC 638 STRATIFICATION AND MOBILITY.

SOC 637 SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT.

Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and development, and of alternative policies for the world of the future. Consider the possible roles for social scientists in policy formulation and application. Prereq: Six graduate credits in social sciences or consent of instructor. (Same as ANT 637.)

SOC 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT.

An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT/CLD 640.)

SOC 641 GENDER ISSUES IN DEVELOPMENT.

An examination of gender issues in domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as ANT 641.)

SOC 642 THE SOCIOLOGY OF WORK, OCCUPATIONS AND LABOR MARKETS.

This course covers the study of work and occupations; the industrial structure of the labor force, the nature of mental and manual labor; the structure of labor markets including unemployment, underemployment, and segmentation; occupational mobility and status attainment; worker resistance and informal groups; worker participation and teamwork; labor and management relations; and state and national legislation regarding work, conflict, safety, and discrimination. Prereq: Graduate standing in sociology or other graduate department.

SOC 645 TOPICS IN POLITICAL SOCIOLOGY.

This course examines how states, capital, and other relevant social groups interact to produce new or stabilize old frameworks for work or other aspects of society. Its topics may include many different areas including: employee representation; health and safety issues; race and gender discrimination; corporate relocation and the international division of labor. No matter what topic chosen for the course, the basic aspects of political sociology including pluralist, elite, neo-corporatist, and citizenship theories will be covered. Prereq: Graduate standing in sociology or other graduate department.

SOC 646 SOCIAL MOVEMENTS AND SOCIAL CHANGE.

This seminar focuses on literature pertaining to collective, extra-institutional efforts to form new or maintain old forms of social order in the United States and other countries. While specific content might vary in response to instructors' interests and department demands, attention will be given to such issues as movement emergence, maintenance, and transformation, labor and resource mobilization, social networks, organization cultures, movement identities and ideologies, social problems construction, strategies and tactics development, as well as the relative success of social movement activities. The seminar can include illustrative material from a variety of social movements and counter-movements (e.g., political, lifestyle, religious, etc.) Prereq: Graduate standing in sociology or other graduate department.

SOC 650 CONCEPTS AND THEORIES IN SOCIOLOGY.

Consideration of central conceptual issues underlying the construction of various sociological theories and their explanatory frameworks. A systematic exploration of the development and application of central conceptual frameworks of the discipline. Prereq: Consent of instructor.

SOC 651 CLASSICAL SOCIOLOGICAL THEORY.

Intensive examination of the ideas and continuing significance of leading nineteenth century sociological theorists. The work of Marx, Weber, Durkheim, and Simmel or Mead is given particular attention. Discussion concerns the contents of their writings, the sociohistorical context in which they were developed, and their applicability to contemporary society. Prereq: Consent of instructor.

SOC 653 FAMILY THEORY.

A survey and critical evaluation of family macro and micro theories. The course will include (a) a historical perspective on the development of family theory; (b) the prevalent macro theories/conceptual frameworks in use in the field; and (c) current trends in the development of micro, or middle-range, family theories. Prereq: FAM 652. (Same as FAM 653.)

SOC 661 SOCIOLOGY OF EDUCATION.

A study of schooling and education using basic analytic paradigms of sociology. Emphasis on schools as formal organizations and education in a changing, technologically oriented and stratified society. Prereq: SOC 101 or equivalent. (Same as EPE 661.)

SOC 665 PROGRAM DEVELOPMENT AND EVALUATION.

Course is designed to help students design, implement, and evaluate educational and social programs using a logic-based framework. (Same as CLD 665.)

SOC 675 THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY.

This course is designed to explore the dynamics of community development and leadership communication within both geographic-bound communities and communities of choice. (Same as CLD 675.)

SOC 680 SOCIAL INVESTIGATION.

This course is a core research design course in the Sociology graduate program. The primary objective is to help you understand the process of social science research and (b) build your skills to develop an original research project in sociology or related social science disciplines. The course is organized around “sociology in action”, covering such topics as developing effective research questions, selecting appropriate research methods and theoretical framing, writing and revising a proposal, acquiring an IRB approval for your research, and developing and managing your research budget and time. Prereq: Graduate student standing, or consent of instructor.

SOC 681 RESEARCH DESIGN AND ANALYSIS.

Problem definition and delimitation, design appropriate to problem and data, and selection of appropriate analysis techniques; critical examination of representative research studies. Prereq: Elementary statistics.

SOC 682 SPECIAL TOPICS IN ADVANCED SOCIOLOGICAL METHODS.

(1-3)

A focused treatment of one or more issues, topics, or problems in sociological methods such as time-series analysis, causal analysis, participant observation, conduct of experiments, methodological methods, scale construction, etc. May be repeated to a maximum of nine credits. Prereq: SOC 681 or equivalent.

SOC 684 FARMING SYSTEMS RESEARCH METHODS.

A critical analysis of the concepts, methods, and practices of farming systems research. Design and carry out an FSR project. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT 684.)

SOC 685 COMMUNITY DEVELOPMENT THEORY AND PRACTICE.

This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as CLD 685.)

SOC 691 SOCIOLOGY OF FOOD AND AGRICULTURE.

This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changes in social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as AES CLD 691.)

SOC 730 SPECIAL TOPICS IN DEVIANT BEHAVIOR.

(1-3)

A focused treatment of one or more issues, topics, or problems in the field of deviant behavior such as delinquency, sociology of law, criminal justice and corrections, radical criminology, and methodological issues in deviance research. May be repeated to a maximum of nine credits. Prereq: SOC 630 or equivalent or consent of instructor.

SOC 735 TOPICAL SEMINAR IN SOCIAL INEQUALITIES.

Advanced study of topics of current importance in the study of social inequalities and stratification. May be repeated under different subtitles to a maximum of 12 credits. Prereq: SOC 635 or consent of instructor.

SOC 737 CULTURE, ENVIRONMENT AND DEVELOPMENT.

This seminar explores the interrelationships between social processes, development and the environment. It provides the graduate student with the necessary theoretical and analytical tools to examine the social and cultural processes of environmental degradation and change. Topics include political ecology, health impacts of development, deforestation, resource tenure systems, environmental grassroots movements and large-scale development organizations. Prereq: Consent of instructor. (Same as ANT 736.)

SOC 748 MASTER'S THESIS RESEARCH.

(0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

SOC 749 DISSERTATION RESEARCH.

(0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

SOC 751 CONTEMPORARY SOCIOLOGICAL THEORY.

A survey of major theoretical perspectives in modern sociology, focusing on twentieth century developments in European and American sociological theory. The principal contributions of selected theorists are considered and their role in the establishment of contemporary sociology is assessed. Prereq: SOC 651 or consent of instructor.

SOC 752 SEMINAR IN FAMILY THEORY CONSTRUCTION.

(3)

An advanced seminar focusing on the definition, evaluation and construction of family theory. Inductive and deductive theory construction strategies are surveyed, evaluated and applied. Prereq: FAM 652.

SOC 766 CONCEPTS IN MEDICAL SOCIOLOGY.

(3)

A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as BSC 766.)
SPA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

SPA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

SPA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

SPA 772 TOPICAL SEMINAR IN SOCIOLOGY. (1-3)
Advanced study of topics of current importance in sociology, such as structural strain and social change, game theory, decision processes, communication and power structure. May be repeated under different subtitles to a maximum of 12 credits. Prereq: At least nine hours in the social sciences, preferably in sociology.

SPA 773 TOPICAL SEMINAR. (3)
Analysis of topics of scientific interest in rural sociology, selected from such fields as the following: criticism of research; sociological factors in land use; migration; rural social ecology of the South; highland societies. May be repeated to a maximum of six credits.

SPA 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/BSC 776.)

SPA 777 SEMINAR IN MENTAL ILLNESS CONCEPTS, RESEARCH AND POLICY. (3)
Advanced study of contemporary concepts of mental health and mental illness, and their historical development; major forms of response to mental illness. Prereq: Consent of instructor. (Same as BSC 777.)

SPA 779 TOPICAL SEMINAR IN SOCIAL PSYCHOLOGY. (3)
Each semester some topic in the field of social psychology such as attitudes and beliefs, structure and function of social groups, social determinants of behavior, leadership, and morale will be studied intensively. May be repeated to a maximum of six credits. (Same as PSY 779.)

SPA 780 SPECIAL PROBLEMS IN SOCIOLOGY. (1-6)
May be repeated to a maximum of 10 credits.

SPA 781 QUANTITATIVE DATA ANALYSIS II. (3)
This intermediate statistics course emphasizes the fundamentals of multivariate regression. The goal is to develop a foundational toolkit to model a variety of dependent variables. This course will teach students how to make decisions about how to model data, how to estimate equations, and how to solve common problems with multivariate regressions. This is an applied course that will utilize Stata to analyze quantitative social science data. Prereq: SOC 681, PS 572 or consent of the instructor.

SPA 785 COMPARATIVE HEALTH CARE SYSTEMS. (3)
This seminar will focus on concepts, issues, and research pertaining to health care systems in comparative perspective. It will deal with the following questions. (1) What are the core analytical dimensions of a health care system? (2) How do health care systems connect with the other institutional domains of a society, with its value system, and with its major cultural and historical trends? and (3) Within the health care system, how are the main constituents of modern medicine related to each other? Prereq: Consent of instructor. (Same as BSC 785.)

SPA 790 RESEARCH IN RURAL SOCIOLOGY. (1-3)
Individual graduate research with correlated study of rural social research types and methods. May be repeated for a maximum of six credits.

SPA 792 RESEARCH IN SOCIOLOGY. (1-6)
Individual research and reading in particular fields of sociology, under staff supervision. Open to advanced students who are prepared for intensive study beyond that offered in regular classes in each field. May be repeated to a maximum of 10 hours.

SPA 797 COMMUNITY DEVELOPMENT PRACTICUM. (1-9)
Supervised experiences in the application of sociological concepts and techniques to problems of program development in a community or state agency, organization, or department. Learning contract required. May be repeated to a maximum of 9 credits. Prereq: Approval of the Director of the Community Development Program.

SPA Hispanic Studies

SPA 011 SPANISH READING FOR GRADUATE STUDENTS. (3)
Designed for those graduate students who wish to acquire a rapid reading knowledge of Spanish. Emphasis on rapid vocabulary building, the Spanish idiom, and the verb systems. Lecture, three hours.

SPA 101 ELEMENTARY SPANISH I (spoken approach). (4)
This course is designed to introduce basic modes of communication in Spanish. The emphasis is on everyday language which the students will learn by applying essential grammatical structures to vocabulary. Both listening and reading comprehension are stressed. The textbook provides instructional assignments and self-correctional exercises. Not open to students who have credit for SPA 141.

SPA 102 ELEMENTARY SPANISH II (spoken approach). (4)
A continuation of SPA 101. Not open to students who have credit for SPA 142. Prereq: SPA 101 or consent of the department and placement test.

SPA 103 HIGH BEGINNER SPANISH. (3)
This course is designed to expand upon the students’ already existing knowledge of Spanish in order to prepare them for intermediate level courses. The textbook and supplementary material will develop students’ abilities in the four basic skills of language learning (speaking, listening, reading and writing). Prereq: Placement exam. Contact department office at (859) 257-1565 to make appointment for placement test.

SPA 111 THE HISPANIC CARIBBEAN. (3)
This course will examine the culture, literature, arts and historical issues of the Hispanic Caribbean – Cuba, Puerto Rico and the Dominican Republic – from Columbus’ arrival to the contemporary period. The students will gain understanding of the convergence of the three ethnic groups that make up this region – the indigenous population, the European colonizers and the enslaved Africans – frameworks that help us understand the Hispanic Caribbean and its place in a global society and the unique identity of the Hispanic Caribbean in the context of Latin America; music, emigration and the U.S. Caribbean Hispanic communities. This UK Core course will be taught in English and will consist of readings, lectures, multi-media resources, writing assignments, student presentations and small discussion groups.

SPA 151 SPANISH FOR HEALTH PROFESSIONALS. (3)
The course will teach Spanish terminology and basic grammar related to medical patients, including vocabulary for diagnosis and treatment. Prereq: Prior college or high school Spanish or other experience with the Spanish language roughly equivalent to one semester of college study.

SPA 201 INTERMEDIATE SPANISH III (spoken approach). (3)
Review and reinforcement of grammatical and phonological patterns. Emphasis will be given to developing reading, listening and speaking skills based on contemporary texts. Not open to students who have credit for SPA 241. Prereq: SPA 102 or consent of department and placement test.

SPA 202 INTERMEDIATE SPANISH IV (spoken approach). (3)
Continuation of SPA 201. Not open to students who have credit for SPA 242. Prereq: SPA 201 or consent of department and placement test.

SPA 203 HIGH INTERMEDIATE SPANISH. (3)
This course is designed to advance students’ knowledge of Spanish at the intermediate level by fine-tuning the skills of reading, speaking, listening, and writing. The goal of the course will be to focus on useful vocabulary, to practice functional grammar, to further explore cross-cultural analysis and to develop students’ communicative competence in Spanish. Not open to Students from SPA 102 or 103. This course is designed for students’ transition directly from high school Spanish to second-year college Spanish. Prereq: Placement exam. Contact department office at (859) 257-1565 to make appointment for placement test.

SPA 205 SPANISH FOR BILINGUAL STUDENTS. (3)
This course is the entry level for the “Spanish for Bilingual Students” track. It will cater to the specific academic and communicative needs of two types of students: those described as “heritage speakers/learners” and those who are “advanced non-native speaker of Spanish”. This course is exclusively designed for these students and its purpose is to build on the students’ existence competence of the native language and to further develop oral, written, reading, and cultural competence for use in different communicative situations. Prereq: Placement exam and oral interview.

SPA 208 U.S. LATINO CULTURE AND POLITICS. (3)
This course studies U.S. Latino history and culture, with an emphasis on the evolution of the politics of immigration and the use of Spanish in the U.S. These broader issues will be studied with the express intent of determining what they mean for central Kentucky.

SPA 210 SPANISH GRAMMAR AND SYNTAX. (3)
Introduction to advanced Spanish grammar and syntax and development of Spanish vocabulary and writing skills. Concurrent enrollment in SPA 211 is encouraged. Prereq: SPA 202, SPA 203 or equivalent.

SPA 211 INTERMEDIATE SPANISH CONVERSATION. (3)
Oral-aural practice in the spoken language. Spectral emphasis placed on the acquisition of idioms and vocabulary. Prereq: SPA 202, 203 or equivalent or consent of chair.

SPA 215 WRITTEN SPANISH FOR BILINGUAL STUDENTS. (3)
This course builds upon the pedagogical basis of SPA 205. It is exclusively designed for bilingual speakers and its purpose is to further refine reading, lexical, and grammatical skills through intensive writing practice in contexts that are meaningful to these speakers. This course will be taught entirely in Spanish. SPA 215 is the equivalent of 210 and 211 and fulfills the pre-major course requirements. Students taking 203 should refrain from taking this course. Prereq: Approve SPA 205 with a grade of B or higher (or placement exam and oral interview).
SPA 262 HISPANIC LITERATURES IN TRANSLATION *(Subtitle required).*
This course includes major discursive authors, periods, regions, cultural events, or movements from Spain and Latin America. Special attention will be paid to links between literature and culture, politics and society through reading, discussion, and writing assignments to be conducted in English. Course may be repeated under different titles for a maximum of six credits. Prereq: WRD 110 and WRD 111 or CIS 110 and CIS 111.

*SPA 300 CONTACT ZONES: CULTIVATING INTERCULTURAL COMPETENCE.*
This course aims to help students acquire skills and knowledge needed to promote understanding of individuals from diverse backgrounds, without reinforcing stereotypes in the name of “cultural difference.” Toward this end, this course will (1) utilize, as a guide/lead, the concept of “contact zones,” zones of exchange that divide but simultaneously connect “us” and “them”; and (2) have each student conduct a semester-long ethnographic project concerning the contact zone. Prereq. Students must have completed 30 hours of course work and completed the UK Core Composition and Communication I and II requirement before enrolling in MCL/SPA 300. (Same as MCL 300.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

SPA 302 SPANISH FOR BUSINESS PROFESSIONALS.
This course prepares business and Spanish minors/majors for successful communication in the Hispanic commercial world by building upon their existing knowledge and emphasizing practical, real-life use of oral and written Spanish. This course is designed to introduce students to essential business terminology and language situations in common business contexts, reinforcing strategies for understanding, interpreting, and responding to new information. This course also helps the student to be alert to the importance of cultural awareness in doing business in Spanish-speaking countries or with Hispanics in the United States. Prereq: SPA 210 and 211, or 215.

SPA 310 SPANISH COMPOSITION THROUGH TEXTUAL ANALYSIS.
Critical readings and interpretation of texts in Spanish. Text may include literary, political, sociological, and cultural documents. Emphasis on mastery of written Spanish. This course is required of all majors. Prereq. SPA 210 and 211, or 215 with a B or better or consent of the instructor.

SPA 312 CIVILIZATION OF SPAIN.
This course is designed to acquaint students with Spain’s intellectual, cultural and historical development. Conducted primarily in Spanish. Prereq. SPA 210 and 211, or 215, or consent of instructor.

SPA 313 ADVANCED SPANISH LANGUAGE.
A course designed to practice language skills at an advanced level. Preparation of oral and written presentations in Spanish. Selected readings will be treated for their language content. Conducted primarily in Spanish. Prereq. SPA 210 and 211, or 215, and a 300-level Spanish course.

SPA 314 CIVILIZATION OF SPANISH AMERICA.
This course is designed to acquaint students with Spanish America’s intellectual, cultural and historical development. Conducted primarily in Spanish. Prereq. SPA 210 and 211, or 215, or consent of instructor.

SPA 315 INTRODUCTION TO HISPANIC LITERATURE.
This course provides students with a basic background for reading Hispanic literature and focuses on the development of a method for reading critically. Students will identify and discuss themes, plots and structure and poetic tropes such as symbols, metaphors, and allegory. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 320 LITERATURE, LIFE AND THOUGHT OF SPAIN.
A study of the literature that reflects the life and thought of Spain from the Middle Ages to the present. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 322 LITERATURE, LIFE AND THOUGHT OF SPANISH AMERICA.
A study of the literature that reflects the life and thought of Spanish America from the Colonial period to the present. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 323 INTRODUCTION TO SPANISH TRANSLATION.
This course allows students to deepen their understanding of Spanish and English as they consider how best to translate structures, words, text, and discourse styles unique to each respective language while simultaneously acquiring a valuable and highly marketable skill. Translation tasks will be primarily from Spanish to English. Prereq: SPA 310 completed (no concurrent enrollment). This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

SPA 324 THE THEATRE IN SPAIN AND SPANISH AMERICA.

SPA 330 SPANISH AND GLOBALIZATION.
This course examines “globalization” and its effect on a world language like Spanish. We will trace some of the debates and discussions surrounding language issues in a global era, attempting to identify those aspects of globalization of particular interest when it comes to explaining language behavior. We will seek to identify some of the key agents acting as the forces of globalization on language processes and will discuss the nature of this relationship. We will also discuss how far any globalization and world languages are of any particular and specific relevance to an understanding of the case of Spanish and the languages of what is commonly referred to as the Spanish-speaking world.

SPA 332 SPANISH AND LATIN AMERICAN BUSINESS ENVIRONMENTS.
This course presents a balanced analysis of the economic, social, and political events in the past years that have shaped the business and investment climate in Spain and Latin America. The goal is to increase student awareness of and familiarity with the role played by the incorporation of Spain in the European Union, and the implementation of Free Trade agreements in Latin American economies. The student who successfully completes this course will not only better understand these socio-economic phenomena but will also hone their communicative and argumentative skills in Spanish. Prereq. SPA 310 and 302.

SPA 350 HISPANIC CITIES *(Subtitle required).*
This course is designed to provide students with a basic knowledge of the historical, cultural, and social development of modern Hispanic cities. Contemporary aspects of cities such as their rise to prominence; their role in national identity formation; and their representation in a variety of cultural forms are some of the topics to be explored. Prereq: SPA 210 and SPA 211, or consent of instructor.

SPA 361 LATIN AMERICAN LITERATURE IN TRANSLATION *(Subtitle required).*
This course examines particular authors, periods, regions, cultural events, or movements from Latin America. Special attention will be paid to links between literature and culture, politics and society. The class will be conducted entirely in Spanish. Course may be repeated under different titles to a maximum of six credits. (Same as LAS 361.)

SPA 371 LATIN AMERICAN CINEMA: *(Subtitle required).*
An introduction to the analysis and interpretation of cinema in general and Latin American cinema in particular. Open to majors and non-majors. The course will focus on films from the Latin American schools of cinema which will be studied in their social, political, and cultural context and introduce students to basic critical vocabulary. Viewing of films (with English subtitles) outside of class is required. Class lectures in English; sections in English or Spanish depending on the language ability of student. Course cannot be repeated.

SPA 372 SPANISH CINEMA: *(Subtitle required).*
An introduction to the analysis and interpretation of cinema in general and Spanish cinema in particular. Open to majors and non-majors. The course will focus on films from the Spanish schools of cinema which will be studied in their social, political and cultural context and introduce students to basic critical vocabulary. Viewing of films (with English subtitles) outside of class is required. Class lectures in English; sections in English or Spanish depending on the language ability of student. Course cannot be repeated.

SPA 397 INDEPENDENT WORK IN SPANISH.
May be repeated once. Prereq: Major and standing of 3.0 in the department.

SPA 399 FIELD BASED/COMMUNITY BASED EDUCATION. *(1-15)*
A community- or field-based experience in Spanish under the supervision of a faculty member. Approval of the Arts and Sciences dean required for credits above six per semester. May be repeated to a maximum of 15 credits. Pass-fail only. Prereq: Permission of the instructor and departmental chairperson; completion of departmental learning agreement.

SPA 400 SPECIAL TOPICS IN HISPANIC LITERATURES AND LANGUAGES *(Subtitle required).*
Detailed investigation of a given topic, author, or theme. Topics announced the preceding semester. Conducted in Spanish. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: One 300-level Spanish literature course.

SPA 410 ADVANCED SPANISH GRAMMAR.
The purpose of this course is to discuss from a theoretical and practical perspective the most relevant grammatical aspects of contemporary Spanish, such as: sentence structure, most frequently used verbal tenses and aspects, syllable structure, agreement (subject-verb; noun and noun modifiers), etc. This course is aimed to develop in the students interest and skills for research in Spanish grammar through searching and compiling digital linguistic corpora. Prereq. SPA 310 and other 300 level course.

SPA 413 SPANISH PHONETICS.
This course is designed to emphasize early attention to pronunciation and oral fluency by introducing students to Spanish phonetics. It provides intensive practice in oral Spanish so that students increase and maintain oral fluency in Spanish by emphasizing refinement of intonation and pronunciation. The class will be conducted entirely in Spanish. Prereq. SPA 310 and other 300 level course.

SPA 420 SPANISH IN THE WORLD.
Offers a chronological overview of the importance of the Spanish language. Connects historical facts to the development of Spanish to a world language. Investigates the role of Spanish in the international organizations and in media. Prereq. SPA 310 and one more 300 level course.

SPA 423 ADVANCED SPANISH TRANSLATION.
As a follow-up to SPA 323, students will perform translations from English to Spanish and will also engage in interpretation. Students will deepen their understanding of basic translation theory and will receive orientation as to professional certifications and employment opportunities. Prereq. SPA 323; no concurrent enrollment.
Course Descriptions

SPA 424 MEDIEVAL AND EARLY MODERN SPANISH STUDIES (Subtitle required). (3)
Readings and analysis of texts from and about Medieval and Early Modern Spain, with emphasis on cultural production within social and historical contexts. May be repeated to a maximum of six credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive B or better in SPA 310.

SPA 430 INTRODUCTION TO SPANISH LINGUISTICS. (3)
Offers an introduction to Spanish linguistics; establishes the basis for future application of linguistic principles. Provides students with a level of knowledge that enables them to make connections between the structure of Spanish and relevant issues in contemporary Hispanic Linguistics. Prereq: SPA 310 or two more 300-level courses.

SPA 432 18TH AND 19TH CENTURY SPANISH STUDIES (Subtitle required). (3)
Reading and analysis of Spanish literary and cultural works from the 18th and 19th century. The course may cover multiple genres, authors, periods, regions, or topics. Course may be repeated under different titles to a maximum of six credits. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 434 SPANISH LITERATURE OF THE 20TH CENTURY. (3)
A study of the works of the Generation of '1898 and representative works of recent writers. Conducted in Spanish. Prereq: SPA 310 or one 300-level Spanish literature course.

SPA 438G LITERATURE OF SOCIAL PROTEST IN SPANISH AMERICA. (3)
Analysis and study of the use of sociopolitical elements in selected works by Spanish-American poets, novelists and dramatists. Conducted in Spanish. Prereq: One 300-level Spanish literature course.

SPA 444 20TH AND 21ST CENTURY SPANISH STUDIES (Subtitle required). (3)
Reading and analysis of Spanish literary and cultural works from the 20th and 21st century. The course may cover multiple genres, authors, periods, regions, or topics. Course may be repeated under different titles to a maximum of six credits. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 454 COLONIALISM AND 19TH CENTURY SPANISH-AMERICAN STUDIES (Subtitle required). (3)
A topics course in Latin American literature and culture from the colonial period through the 19th century. Special emphasis on the interaction between literature, historical and social developments. Taught in Spanish. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 464 CONTEMPORARY SPANISH-AMERICAN STUDIES (Subtitle required). (3)
A topics course in 20th century Latin American literature and culture. Special emphasis on the interaction between literature, historical and social developments and popular culture. Taught in Spanish. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 474 TOPICS IN HISPANIC STUDIES (Subtitle required). (3)
Reading and analysis of Hispanic literature and culture organized by topics. May cover multiple genres, authors, periods, regions or topics. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 480 HISPANIC KENTUCKY. (3)
The study of U.S. Latino history, with primary emphasis on the evolution of the politics of immigration and Spanish in the U.S. These issues will be studied with the primary intent of determining what they mean to Central Kentucky. This course is conducted in Spanish and incorporates a service learning component which is finalized the first week of the semester. Prereq: SPA 310 or consent of instructor.

SPA 497 HISPANIC STUDIES HONORS THESIS. (3)
An independent research course leading to an undergraduate thesis in Hispanic Studies (research thesis, technology-based project, translation project) for majors in the Department of Hispanic Studies to be supervised by one/two faculty member(s) on topics dealing with Spanish and/or Latin American studies (literature, culture, civilization, visual studies), Hispanic Linguistics, or the teaching of Spanish. Prereq: 15-19 hours of Spanish courses at the 300+ level.

SPA 501 SPANISH PHONETICS, PRONUNCIATION AND PHONEMICS. (3)
Introduction to Spanish descriptive linguistics with intensive study of variant speech sounds and established norms in the major cultural areas of the Hispanic world with discussions of the theory and isolation of phonemes. Prereq: SPA 210 and SPA 211, and a 300-500 level Spanish course.

SPA 506 INTRODUCTION TO COMPARATIVE SPANISH, PORTUGUESE, AND ITALIAN LINGUISTICS. (3)
An introduction to the historical development of Spanish, Portuguese and Italian from a common source, with an emphasis on the comparison of related lexical, phonological and morphological items. Prereq: Reading knowledge of Spanish or Italian (fourth semester of course work).

SPA 519 THEMES IN MEDIEVAL AND EARLY MODERN SPANISH LITERATURE AND CULTURE (Subtitle required). (3)
This course is a topics course in Medieval and Early Modern Spanish Literature and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different subtitles. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 520 THEMES IN MODERN AND CONTEMPORARY SPANISH LITERATURE, CULTURE AND FILM (Subtitle required). (3)
This course is a topics course in Modern and Contemporary Spanish Literature, Film and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different topic. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 539 THEMES IN LATIN AMERICAN LITERATURE, CULTURE AND FILM (Subtitle required). (3)
This course is a topics course in Modern and Contemporary Latin American Literature, Film and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different subtitle. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 533 TEACHING OF SPANISH. (3)
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on Spanish. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

SPA 600 HISTORY OF THE SPANISH LANGUAGE. (3)
Introduction to the historical development of the Spanish language. The central focus of this course will be the dialogic and dialectic processes that gave rise the historical, cultural, phonological, morphological and lexical transformations of the Castilian languages, with particular emphasis on the changes that Castilian underwent as it evolved from Latin into modern Castilian.

SPA 601 STUDIES IN SPANISH PEDAGOGY (Subtitle required). (1)
An one credit course that may or may not run concurrently with the 553 course on Spanish Pedagogy. Seminar topics may include an overview of second language acquisition theories as applicable to English learners of Spanish; contemporary teaching methodologies for instructors of Spanish language; integration of technology into curriculum; issues in testing and assessment. May be repeated to a maximum of 3 credits when taught under different subtitles.

SPA 602 STUDIES IN SPANISH LINGUISTICS: (Subtitle required). (3)
Readings and discussion of issues in Spanish linguistics and the teaching of Spanish. May be repeated to a maximum of 9 credits taught under different subtitles.

SPA 603 SPANISH APPLIED LINGUISTICS. (3)
A survey of the many sub-disciplines that constitute Applied Linguistics, a field dedicated to the study of language-based problems. This class will expose students to issues in the Spanish-language context and will equip them with the tools necessary to critically analyze these “problems”. Prereq: Introduction to Hispanic Linguistics.

SPA 604 SOCIOLINGUISTICS OF THE SPANISH-SPEAKING WORLD. (3)
An introduction to sociolinguistic theory and its application to issues related to Spanish in Spain, Latin America, and the United States. It will focus on both quantitative and qualitative research on language variation and language contact in the Spanish-speaking world. Prereq: Introduction to Hispanic Linguistics.

SPA 605 HISTORY OF THE SPANISH LANGUAGE. (3)
Offers an overview of the diachronic evolution of Spanish from spoken Latin. Topics covered include the following: Vulgar Latin and Proto-Romance, the Old Spanish phonological system, morpho-syntactic changes from Latin to Spanish. Prereq: Introduction to Hispanic Linguistics.

SPA 606 INTRODUCTION TO CRITICAL THEORY AND CULTURAL STUDIES. (3)
Survey of major trends in critical and cultural theory since the early 20th century, from Formalism and New Criticism through Cultural Studies. Required of all new graduate students.

SPA 607 SPECIAL TOPICS IN CRITICAL THEORY AND CULTURAL STUDIES: (Subtitle required). (1)
Readings and discussion of special topics in critical theory and cultural studies. May be taught in English or Spanish. May be repeated to a maximum of 3 credits when taught under different subtitles.

SPA 608 SPECIAL TOPICS IN SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Readings and discussion in essay, film and cultural production of Spain and Spanish America. May be taught in English or Spanish. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 609 SPECIAL TOPICS IN LATIN AMERICAN AND U.S. SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Intensive study of an author, genre, period, or movement of Latin American or U.S. Spanish literature, or an aspect of Latin American or U.S. Hispanicism or culture. Taught in English or Spanish. May be repeated to a maximum of 9 credits when taught under different subtitles.
SPA 610 STUDIES IN MEDIEVAL SPANISH LITERATURE: (Subtitle required). (3)
Readings and discussion of Spanish literature from the 13th century through the 15th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 620 STUDIES IN EARLY MODERN AND BAROQUE SPANISH LITERATURE: (Subtitle required). (3)
Readings and discussion of Spanish literature and culture from the 16th and 17th centuries. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 630 STUDIES IN 18TH AND 19TH CENTURY SPANISH LITERATURE: (Subtitle required). (3)
Readings and discussion of Spanish literature and culture from the 18th and 19th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 640 STUDIES IN 20TH AND 21ST CENTURY SPANISH LITERATURE: (Subtitle required). (3)
Readings and discussion of contemporary Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 650 STUDIES IN COLONIAL LATIN AMERICAN LITERATURE: (Subtitle required). (3)
Readings and discussion of Colonial Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 653 STUDIES IN SPANISH PEDAGOGY: (Subtitle required). (3)
Offers students a theoretical and practical overview of L2 Spanish pedagogy as a means to empower them as language instructors who can intelligently select and evaluate pedagogical theories and practices. Students will have the opportunity for hands-on implementation of theory in their own classroom practice. Prereq: SPA 603.

SPA 654 SPANISH DIALECTOLOGY. (3)
Explore current linguistic research on Spanish dialects through the discussion and analysis of their theoretical and empirical frameworks. Prereq: SPA 604.

SPA 655 COMPARATIVE-HISTORICAL ROMANCE LINGUISTICS. (3)
Analyzes the complex interplay of structural, social, and cultural factors in the evolution of the Romance Languages. Provides insights into which language features can be considered typically Romance, and how far languages can diverge from these typical patterns and still be considered of the same language type. Prereq: SPA 605.

SPA 660 STUDIES IN 19TH CENTURY LATIN AMERICAN LITERATURE: (Subtitle required). (3)
Readings and discussion of 19th century Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 668 STUDIES IN CONTEMPORARY SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Readings and discussion of contemporary Spanish literature and culture through the first half of the 20th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 670 STUDIES IN U.S. HISPANIC LITERATURE AND CULTURE: (Subtitle required). (3)
Readings and discussion of U.S. Latino literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 690 STUDIES IN SPANISH AND/OR LATIN AMERICAN FILM: (Subtitle required). (3)
Viewings and discussion of Spanish or Latin American film, emphasizing its political, social, economic, and cultural contexts of the Hispanic world. Viewing of films (in Spanish) outside class is required. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 703 SEMINAR IN SLA THEORY IN SPANISH L2 LEARNING. (3)
Offers a closer look at the primary concepts of Second Language Acquisition (interlanguage, learner variables, SLA theory, input, output, etc.) with a particular focus on the Spanish language. The acquisition of specific Spanish L2 structures and phenomena will be directly addressed, e.g., tense/aspect, mood, clitics, etc. Prereq: SPA 605.

SPA 704 SEMINAR IN LINGUISTIC ANALYSIS OF SPANISH DISCOURSE (Subtitle required). (3)
Analysis from a sociolinguistic and discourse analysis perspective of the relationship between language and power in the Spanish-speaking world. It would imply the discussion of a theoretical framework and its application to non-canonical texts produced in Spanish. Prereq: SPA 604.

SPA 705 SEMINAR IN HISTORICAL LANGUAGE CONTACT IN THE SPANISH SPEAKING WORLD. (3)
Offers a study of language contact in the Spanish-speaking world including not only the study of bilingualism, but also explorations into subfields like geolinguistics and language planning. Prereq: SPA 605.

SPA 706 ADVANCED READINGS IN CRITICAL THEORY AND CULTURAL STUDIES: (Subtitle required). (3)
Advanced readings and discussion of contemporary issues in critical theory and cultural studies. Taught in Spanish or English. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 708 CRITICAL PERSPECTIVES ON SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Advanced readings and discussion of Spanish literature and culture: open topic with preference for cross-disciplinary or trans-historical subjects. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 709 CRITICAL PERSPECTIVES ON LATIN AMERICAN AND U.S. HISPANIC LITERATURE AND CULTURE: (Subtitle required). (3)
Advanced readings and discussion of Latin American and U.S. Hispanic literature and culture. May deal with a single author’s work, a genre or a cultural phenomenon: open topic with preference for cross-disciplinary or trans-historical subjects. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 710 SEMINAR IN MEDIEVAL SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in Spanish literature and culture from the 13th through the 15th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 712 SEMINAR IN EARLY MODERN AND BAROQUE SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in Spanish literature and culture of the 15th and 16th centuries. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 713 SEMINAR IN 18TH AND 19TH CENTURY SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in 18th and 19th century Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 714 SEMINAR 20-21ST CENTURY SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in contemporary Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 715 SEMINAR IN 19TH CENTURY SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in 19th century Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 720 SEMINAR IN MEDIEVAL SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in 16th and 17th century Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 721 SEMINAR IN EARLY MODERN SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in early modern Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

SPA 723 SEMINAR IN MEDIEVAL SPANISH LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in medieval Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.
Course Descriptions

SPA 782 SPECIAL STUDIES IN SPANISH. (1-3) Selected studies and investigations in the Spanish language and Hispanic literature, permitting the student to work in areas of special interest and providing opportunity for original endeavor. May be repeated to a maximum of six credits. Prereq: Graduate standing.

SPA 785 SEMINAR IN U.S. HISPANIC AND BORDER LITERATURE AND CULTURE: (Subtitle required). Special and intensive study of related topics in U.S. Hispanic and Border literature and culture. May be taught in Spanish or English. May be repeated to a maximum of 9 credits when taught under different subtitles.

ST 500 INTRODUCTION TO SOCIAL THEORY. (3) Multidisciplinary introduction to social theory for advanced undergraduate and graduate students. Overall goal is to substantiate the idea that social theory comprises a set of ontological and epistemological issues about human existence which are nondisciplinary-specific. The course will (1) examine what different social fields take as their central theoretical issues and concerns, and (2) conduct multidisciplinary explorations of key problem areas in contemporary social thought such as the nature of objectivity, the construction of gender, the role of space and time in social life, and modernity and postmodernity. Prereq: Either a prior theory course in any social discipline or a prior course in such a discipline that discussed theoretical issues. Exceptions will be permitted only after consultation with the instructor.

ST 600 MULTIDISCIPLINARY PERSPECTIVES IN SOCIAL THEORY (Subtitle required). (3) An advanced multidisciplinary seminar in social theory for graduate students taught by a team of faculty members. Topics change from year to year; examples include: individual and society, the social construction of gender, modernity and postmodernity, space and time in social life, objectivity and its other, etc. Focus is on the cross-disciplinary investigation of such issues in the social sciences and humanities. May be repeated to a maximum of nine credits under different subtitles. Prereq: ST 500 or permission of instructor.

ST 610 disClosure EDITORIAL COLLECTIVE. (1) Course provides editorial experience in the production of disClosure, a multidisciplinary social theory journal operated by students. Activities include: soliciting manuscripts, overseeing the external review process, communicating with authors, accepting and rejecting manuscripts, producing and distributing a single issue. May be repeated to a maximum of three credits. Lecture, two hours per week. Prereq: ST 500 or permission of instructor.

ST 690 TRANSDISCIPLINARY PERSPECTIVES IN SOCIAL THEORY. (3) An advanced seminar in transdisciplinary social theory, taught jointly by a faculty member representing the humanities and the social sciences, respectively. Social Theory encompasses the theoretical study of social life and the substantive knowledge informed by such theory. Transdisciplinary Social Theory seminars may focus on such topics as Space and Representation, Frankfurt School and Contemporary Critical Theory, or The University in Theory and in a Global Context. In each case, the seminar substantially and theoretically links the articulation of that particular topic as has occurred within both the social sciences and humanities. Prereq: Successful completion of ST 500 or ST 600 or permission of instructors.

STA 200 STATISTICS: A FORCE IN HUMAN JUDGMENT. (3) This course is concerned with the interaction of the science and art of statistics with our everyday lives emphasizing examples from the social and behavioral sciences. The student will not be required to learn mathematical formulas. Topics include the nature of statistics, uses and misuses of statistics, the scope and limitations of statistics, criteria by which published statistics may be judged, interpretation of probability and the art of decision making. Prereq: Completion of the mathematics basic skills requirement.

STA 210 MAKING SENSE OF UNCERTAINTY: AN INTRODUCTION TO STATISTICAL REASONING. (3) The goal of this course is to help students develop or refine their statistical literacy skills. Both the informal activity of human inference arising from statistical constructs, as well as the more formal perspectives on statistical inference found in confidence intervals and hypothesis tests are studied. Throughout, the emphasis is on understanding what distinguishes good and bad inferential reasoning in the practical world around us.

STA 281 PROBABILITY AND STATISTICS USING INTERACTIVE COMPUTER TECHNIQUES. (3) The role of chance in experimental outcomes. Simple discrete and continuous probability distributions; combinatorics; moments and expectations; normal and binomial distributions; computer simulation and simple Monte Carlo methods. Descriptive statistics, charts, and graphs, and elements of statistical inference using interactive statistical packages (e.g., SCSS and/or MINITAB). Prereq: CS 150, CS 102, or CS 221; coreq: MA 114 or 132.

STA 291 STATISTICAL METHODS. (3) Theoretical distributions, statistical estimation, and hypothesis testing. Introduction to simple linear regression and correlation. Introduction to categorical data analysis and ANOVA. Prereq: MA 113, MA 123, MA 137 or equivalent.
STA 570 BASIC STATISTICAL ANALYSIS. (4)
Primarily in biological, behavioral and social sciences. Introduction to methods of analyzing data from experiments and surveys; the role of statistics in research, statistical concepts and models, probability and distribution functions; estimation; hypothesis testing; regression and correlation; analysis of single and multiple classification models; analysis of categorical data. Lecture, three hours; laboratory, two hours. Prereq: MA 109 or equivalent. For graduate students; undergraduates must have consent of instructor.

STA 580 BIOSTATISTICS I. (2)
STA 580 covers univariate statistical methods commonly encountered in public health studies. This includes descriptive statistics, hypothesis testing, paired and unpaired tests, ANOVA, contingency tables, log rank test, regression and correlation. Prereq: MA 109 or higher. (Same as CPH 580.)

STA 600 COMMUNICATING IN STATISTICS. (0)
Pedagogical skills for teaching assistants in undergraduate statistics courses and effective communication skills for professional statisticians. Topics include: basic teaching techniques, use of writing assignments to increase understanding of statistical concepts, writing and grading effective exams, and recording and analyzing grades with the aid of software. Videotaped sessions will be conducted and critiqued. May be repeated a maximum of three times. Prereq: STAT major.

STA 602 INTRODUCTION TO STATISTICAL METHODS. (4)
Sampling distributions, statistical models, point estimates and confidence intervals, significance testing. Experimental Design (randomized blocks, nested/hierarchical models, Latin Squares), ANOVA (one, two, and multiway factorials, fixed and random effects), multiple comparison procedures, rank-based analyses, linear and nonlinear regression, power and sample size calculations, professional presentation of results. Lecture, three hours; laboratory, two hours per week. Prereq: Graduate Standing in Statistics.

STA 603 INTRODUCTION TO LINEAR MODELS AND EXPERIMENTAL DESIGN. (4)
Multivariate normal distribution, linear models in matrix notation, multiple linear regression (distributional results, categorical predictors, interactions, connection to ANOVA, sums of squares, diagnostics, ridge and nonparametric regression). Generalized linear models (binomial, poisson, and gamma regression), overdispersion, mixed models, diagnostics, professional presentation of results. Prereq: STA 602; coreq: STA 606.

STA 605 COMPUTATIONAL INFERENCEx. (3)
Statistical Packages, numerical methods in maximization and integration, bootstrapping, simulation methods, multivariate normal distribution. Prereq: Graduate Standing in Statistics.

STA 606 THEORY OF STATISTICAL INFERENCEx. (3)

STA 607 THEORY OF STATISTICAL INFERENCEx. (3)

STA 612 SEQUENTIAL ANALYSIS. (3)

STA 616 DESIGN AND ANALYSIS OF SAMPLE SURVEYS. (3)
Estimation and testing when the functional form of the population distribution is unknown; rank and sign tests; tests based on permutations of observations; power of nonparametric tests; optimum nonparametric tests and estimators. Prereq: STA 606.

STA 623 THEORY OF PROBABILITY. (3)
Axioms of Probability, conditional probability, distribution functions, density and moment generating functions, expected values, discrete and continuous distributions, joint, marginal, and conditional distributions, transformations, covariance and correlation, inequalities, properties of sums from a random sample. Prereq: Graduate Standing in Statistics.

STA 624 APPLIED STOCHASTIC PROCESSES. (3)
Definition and classification of stochastic processes, renewal theory and applications, Markov chains, continuous time Markov chains, queueing theory, epidemic processes, Gaussian processes. Prereq: STA 524 or STA 623 or consent of instructor. (Same as OR 624.)

STA 626 TIME SERIES ANALYSIS. (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, autoregressive and mixed autoregressive-moving average processes; linear nonstationary models, minimum mean square error forecasts and their properties; model identification, estimation and diagnostic checking. Prereq: STA 422G or equivalent. (Same as ECO 626.)

STA 630 BAYESIAN INFERENCE. (3)
Likelihood principles, sufficiency, natural conjugate and hierarchical priors, empirical Bayesian analysis for estimation and testing. Prereq: STA 606.

STA 632 LONGITUDINAL DATA ANALYSIS. (3)
This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models and an introduction to nonlinear models as they apply to the analysis of correlated data. Prereq: BST 682 and BST 676 or equivalent. (Same as BST 762.)

STA 635 SURVIVABILITY AND LIFE TESTING. (3)

STA 643 ADVANCED EXPERIMENTAL DESIGN. (3)
Linear Model interpretation in vector spaces and projections, use of generalized inverses, identifiability and estimability of contrasts, normal equations, Gauss-Markov Theorem, MVUE, distribution theory for quadratic forms, complex designs such as crossover, split-plot and repeated measures, asymptotics for general linear models, familiarity with nonparametric regression models. Prereq: STA 603.

STA 644 ADVANCED LINEAR AND NONLINEAR MODELS. (3)

STA 645 COMPUTATIONAL THEORY AND DATA VISUALIZATION. (3)
This course aims to teach students to use programming to gain intuition about statistical theory and fundamental concepts and to visualize data appropriately. Specifically, computational methods covered include simulation methods and numerical methods in maximization and integration. Appropriate graphical displays of statistical and simulation results will be emphasized. Statistical concepts covered include sampling distributions, confidence intervals and p-values, the central limit theorem, expectation, and maximum likelihood estimation. Student understanding of course ideas will rely heavily on performing simulation studies and discussing the assimilated class results online. Prereq: Graduate status in Master of Applied Statistics.

STA 646 FOUNDATIONS OF PROBABILITY AND INFERENCE. (4)
This course introduces probability, random variables, independence, and distribution theory. Inference topics include, but are not limited to, estimation, hypothesis testing, likelihood ratio tests, confidence intervals, sufficiency, and efficient estimators. Prereq: Graduate status in Master of Applied Statistics. Coreq: STA 645.

STA 647 STATISTICAL COMPUTING WITH SAS. (2)
This course aims to teach students to use the SAS statistical programming language and to apply this knowledge appropriately in a variety of settings. Student achievement in the course will rely heavily on performing computational tasks, data management, editing data, running basic statistical procedures, and producing reports using SAS. Prereq: Graduate status in Master of Applied Statistics.

STA 648 REGRESSION METHODS. (4)
Statistics (STA) 648 is an applied regression course that emphasizes data analysis and interpretation. Generally, regression is a collection of methods for determining and using models that explain how a response variable (dependent variable) relates to one or more explanatory variables (predictor variables). This course aims to teach students about different regression models, their corresponding assumptions, and how to interpret the estimated models. Understanding underlying causal relationships will be central to understanding material in this course as the student will be required to perform analyses on real datasets using the learned methods. Prereq: STA 645 and admission to the Master of Applied Statistics program or permission of the instructor.

STA 649 DESIGN OF EXPERIMENTS. (4)
Statistics (STA) 649 is an introduction to the principles of experimental design. Many statistics courses are taught from the perspective of analyzing data that has already been collected. However, problems that occur at the analysis stage (e.g., violations of assumptions, too small a sample, etc.) could have been avoided if the experimenter had consulted a statistician before the experiment was conducted and the data collected. This course will introduce common experimental designs so that when the data are collected, the aforementioned shortcomings are avoided. The course will provide equal treatment to both the conceptualization of the designs and the analysis of the subsequent experiment. Prereq: STA 647, STA 648, and admission to the Master of Applied Statistics program or permission of the instructor.
STA 650 APPLIED MULTIVARIATE STATISTICS. (3)
The main objective of this course is to equip students with the traditional and modern multivariate statistical methods. Students will learn the motivation behind these methods, how to apply them and interpret the results obtained. Focus will be on understanding distributional results rather than the technical derivations. Students will gain competency in writing R scripts for applying the multivariate methods learned. Prereq: Graduate status in Master of Applied Statistics, STA 646, STA 648; corequisite: STA 649.

STA 651 ADVANCED PROGRAMMING WITH R. (1)
Statistics (STA) 651 discusses advanced programming techniques using the R language. Programming topics include how to handle various facets of data structures in R, how to produce simple and advanced graphics in R, and how to synthesize the necessary components of simulation studies. Prereq: STA 645 and admission to the Master of Applied Statistics program or permission of the instructor.

STA 652 ADVANCED STATISTICAL MODELING. (3)
This course aims to teach students to use advanced statistical modeling techniques and to interpret the results in context. Specifically, the statistical methods covered include general linear models and linear mixed models, semiparametric regression, nonlinear models, mixed models in ANOVA, generalized linear models, ridge regression, and repeated measures experiments. Prereq: STA 649 and graduate status in Master of Applied Statistics.

STA 653 CLINICAL TRIALS. (3)
Design and analysis of Phase-I to III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalence, mixed models, and meta-analysis. Coreq: STA 603. (Same as BST 713.)

STA 654 APPLIED BAYESIAN INFERENCE. (3)

STA 655 INTRODUCTION TO STATISTICAL GENETICS. (3)
BST 655 presents an introduction to the statistical methodologies used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used (and freely available) software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical human genetics literature. Prereq: STA 580 or equivalent. (Same as BST 655.)

STA 656 STATISTICAL QUALITY CONTROL. (3)
Dimensions of quality, numerical and graphical descriptions of data, discrete and continuous distributions, basic reliability concepts, control charts for variables and attributes, process capability studies, and selected additional topics as time permits such as cusum charts, acceptance sampling. Prereq: STA 645 and admission to the Master of Applied Statistics program or permission of the instructor.

STA 659 ADVANCED STATISTICAL METHODS. (3)
Supervised reading, discussion, and practice of a selected statistical methodological area. Prereq: STA 646, STA 648, and graduate status in Master of Applied Statistics.

STA 661 MULTIVARIATE ANALYSIS I. (3)
Characterization and properties of the multivariate normal distribution, random samples from this distribution; multivariate analysis of variance, related distribution theory; factor analysis. Prereq: STA 603.

STA 662 RESAMPLING AND RELATED METHODS. (3)
Theory and application of the bootstrap, jackknife and other resampling methods. Prereq: STA 605 and STA 606.

STA 665 ANALYSIS OF CATEGORICAL DATA. (3)
Multinomial and product-multinomial models; large-sample theory of estimation and testing, Pearson chi-square and modified chi-square statistics, Pearson-Fisher Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as BST 763.)

STA 671 REGRESSION AND CORRELATION. (2)
Simple linear regression, elementary matrix algebra and its application to simple linear regression; general linear model, multiple regression, analysis of variance tables, testing of subhypotheses, nonlinear regression, step-wise regression; partial and multiple correlation. Emphasis upon use of computer library routines; other special topics according to the interests of the class. Lecture, three hours per week; laboratory, two hours per week for seven and one half weeks. Offered the first or second half of each semester. Prereq: STA 570 or STA 580.

STA 672 DESIGN AND ANALYSIS OF EXPERIMENTS. (2)
Review of one-way analysis of variance; planned and unplanned individual comparisons, including contrasts and orthogonal polynomials; factorial experiments; completely randomized, randomized block, Latin square, and split-plot designs: relative efficiency, expected mean squares; multiple regression analysis for balanced and unbalanced experiments, analysis of covariance. Lecture, three hours per week; laboratory, two hours per week for seven and a half weeks. Offered the first or second half of each semester. Prereq: STA 671.
STA 705 ADVANCED COMPUTATIONAL INFEREN CE. (3)

STA 707 ADVANCED DATA ANALYSIS. (3)
Theory and data analysis involving likelihood functions, mixed models, missing responses. Prereq: STA 643.

STA 709 ADVANCED SURVIVAL ANALYSIS. (3)

STA 715 READINGS IN STATISTICS AND PROBABILITY
(Subtitle required). Supervised reading and discussion of a selected research topic. May be repeated to a maximum of nine credits. Prereq: STA 701 and STA 703 and consent of instructor.

STA 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

STA 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769/769 credit following the successful completion of the qualifying exams.

STA 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

STA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

STA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

SUR Surgery

SUR 815 FIRST-YEAR ELECTIVE, SURGERY. (1-3) With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Surgery. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

SUR 825 SECOND-YEAR ELECTIVE, SURGERY. (1-4) With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Surgery. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

SUR 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6) With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
SUR 851 ACTING INTERNSHIP IN ORTHOPEDIC SURGERY
SUR 852 ACTING INTERNSHIP IN PEDIATRIC SURGERY
SUR 853 ACTING INTERNSHIP IN OTOLARYNGOLOGY-HEAD AND NECK SURGERY
SUR 854 ACTING INTERNSHIP IN UROLOGY
SUR 855 ACTING INTERNSHIP IN PLASTIC SURGERY
SUR 857 ACTING INTERNSHIP IN TRANSPLANTATION SURGERY
SUR 862 ACTING INTERNSHIP IN GENERAL SURGERY
SUR 863 ACTING INTERNSHIP IN CARDIOTHORACIC SURGERY
SUR 865 ACTING INTERNSHIP IN SURGICAL INTENSIVE CARE
SUR 866 RESEARCH IN SURGERY
SUR 869 ACTING INTERNSHIP IN TRAUMA SURGERY
SUR 870 ELECTIVE IN HEARING, SPEECH AND LANGUAGE
SUR 871 FOURTH YEAR CLERKSHIP IN SURGERY
SUR 872 OUTPATIENT MANAGEMENT IN SURGICAL SPECIALTIES
SUR 873 HAND/UPPER EXTREMITY SURGERY
SUR 875 MAXILLOFACIAL DISEASE FOR THE HEALTH CARE PROFESSIONAL
SUR 876 ACTING INTERNSHIP IN ORAL AND MAXILLOFACIAL SURGERY
SUR 890 SURGERY OFF-SITE

Course Descriptions
SW 422 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II. (3) This foundation course is the second in the sequence of two social work courses that focuses on theory as a tool for understanding human behavior on multiple interacting levels, including individual, family, small group, organization, community and society. The course will explore the interrelatedness of biological, social, cultural, psychological and environmental factors in human behavior and development. Particular attention will be given to exploring the impact of racism, sexism, ethnocentrism, classism and homophobia on human behavior at each level. Prereq: Open to Social Work Majors; completion of SW 300, SW 421.

SW 430 SOCIAL WELFARE POLICY: THEORY AND IMPLEMENTATION. (3) This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. It explores what enables individuals collectively and individually to perpetrate genocide. Prereq: Open to Social Work Majors; consent of instructor.

SW 435 FOUNDATIONS OF PROFESSIONAL ETHICS IN SOCIAL WORK. (3) This course introduces students to the fundamentals of ethical decision making in generalist professional social work practice. The major ethical formulations that are utilized to understand ethical reasoning and decision-making skills in dealing with moral problems and dilemmas that arise in entry-level social work practice. Prereq: Open to social work majors, SW 300, SW 421.

SW 444 EDUCATIONAL PRACTICUM I. (5) This is an introduction to social work field education under faculty direction in the teaching-learning center. Students will begin to apply knowledge from prerequisite courses in experiences which utilize social work practice skills with emphasis on individuals, families and small groups, toward goals of prevention, restoration and enhancement of social functioning. This course includes 18 hours per week of seminar and experiential learning. Prereq: Open only to social work majors, SW 300, SW 420, SW 430.

SW 445 EDUCATIONAL PRACTICUM II. (8) This course continues the process of social work practicum under faculty direction in a Teaching-Learning Center. Students will continue to develop knowledge and skills to practice in environments which utilize social work practice skills with individuals, families, and small groups as well as with organizations and communities toward the goals of prevention, restoration, and enhancement of social functioning. Includes 24 hours per week of seminar and experiential learning. Prereq: Open only to social work majors, SW 400, SW 444, SW 450.

SW 450 SOCIAL WORK RESEARCH. (4) An introductory study and application of the processes of research in building social work knowledge and developing effective social work practice. Prereq: Open only to social work majors, basic statistics course, SW 444, SW 445.

SW 460 UNDERSTANDING BEHAVIOR FROM A SOCIO-CULTURAL PERSPECTIVE: THEORIES OF PSYCHOPATHOLOGY. (3) Problematic behavior is discussed employing a social work perspective. Students are introduced to a bio-psycho-socio-cultural assessment model and the DSMIV-TR criteria for mental health disorders. Students learn to respect the person in their or her environment and not to categorize people by their disorders or diagnoses. Risk, resiliency and strengths perspectives are utilized to understand mental disorders within a socio-cultural context. Emphasis is placed on understanding how theoretical models explain psychopathology and inform interventions in social work practice. Prereq: Open to Social Work Majors; SW 350, SW 422, SW 444.

SW 470 SENIOR SEMINAR. (3) An integrative professional seminar for senior majors in social work, usually taken in the last semester of course work. Social work issues of an educational, professional and practice nature are examined in a critical, integrative fashion. Open only to social work majors, completion all fall level social work courses, but SW 445 prerequisite or concurrent. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to count toward graduation for an eight credit program. Prereq: Open only to social work majors.

SW 505 CHILD WELFARE SERVICES. (2-3) This course provides a comprehensive introduction to child abuse and neglect, including historical perspectives, indicators of maltreatment, theories about its etiology, and effective interventions on the micro and macro levels. Students will learn about child protective services and the social worker’s roles and responsibilities.

SW 510 MENTAL HEALTH KNOWLEDGE FOR THE SOCIAL PROFESSIONS. (3) This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. Prereq: Open to students with a minimum of sophomore status and an introductory social science course, or consent of instructor.

SW 511 GENOCIDE: INTERVENTION WITH SURVIVORS AND GLOBAL PREVENTION. (3) This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. Prereq: Open to students with a minimum of sophomore status and an introductory social science course, or consent of instructor.

SW 512 SOCIAL WORK IN THE CRIMINAL JUSTICE SYSTEM. (3) This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. Prereq: Open to students with a minimum of sophomore status and an introductory social science course, or consent of instructor.

SW 514 ALCOHOLISM AND PROBLEM DRINKING. (2-3) This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. Prereq: Open to students with a minimum of sophomore status and an introductory social science course, or consent of instructor.

SW 515 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES I. (3) This course is designed to prepare rehabilitation and mental health counselors, social workers and related fields with a working knowledge of the medical and psychosocial aspects of disability and chronic illness, and to provide students with the knowledge and understanding necessary to function and serve effectively in rehabilitation counseling and related interdisciplinary, allied health, and mental health settings. Topic areas include: human body systems, medical terminology, medical, functional, environmental and psychosocial aspects of disabilities and chronic illness, professional ethics, assistive technology, diagnostic classification systems, psychopharmacology, functional capacity, and wellness and illness prevention concepts and strategies. Specific disabilities covered in this course include neurologic, hearing, vision, intellectual disabilities, developmental disabilities, autism and Asperger’s, learning disabilities, attention deficit disorders, and substance abuse. Prereq: College level courses in biology and psychology or consent of instructor. (Same as RC 515.)

SW 516 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES II. (3) This course is designed to prepare rehabilitation and mental health counselors, social workers, and related fields with a working knowledge of the medical and psychosocial aspects of disability and chronic illness, and to provide students with the knowledge and understanding necessary to function and serve effectively in rehabilitation counseling and related interdisciplinary, allied health, and mental health settings. Topic areas include: human body systems, medical terminology, medical, functional, environmental and psychosocial aspects of disabilities and chronic illness, professional ethics, assistive technology, diagnostic classification systems, psychopharmacology, functional capacity, and wellness and illness prevention concepts and strategies. Specific disabilities covered during this semester include psychiatric and psychological impairments, endocrine, gastroenterology, cancer, burns and skin disorders, blood and the immune system, respiratory, kidney and renal function and musculoskeletal. Prereq: College level courses in biology and psychology or consent of instructor. (Same as RC 516.)

SW 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICE IN AMERICA. (2-3) This course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as AAS 523.)

SW 530 RESPONDING TO MILITARY AND VETERAN POPULATIONS. (3) This course provides an overview of social work practice with military members, veterans, and military families. Students will learn to appreciate the unique experiences and stresses of military members and their families, and resultant implications for helping professionals serving this population. Topics to be covered include: (a) Warfare’s historical role in shaping public policy, (b) the military as a distinct subculture of American society, (c) common psychosocial problems and stresses experienced by military members, veterans, and military families, (d) a survey of evidenced-based treatments for common psychopathologies and psychosocial problems experienced by this population, (e) an overview of systems of care serving this population, including the roles of social workers within these systems, and special ethical considerations for social workers serving military and veteran populations. Prereq: Open to graduate and upper division undergraduate students.

SW 571 SOCIAL WORK AND THE LAW. (3) This course examines the lawyer’s method and the legal system; the organization and ethics of the practicing bar; the impact of legal decision-making and lawyers on society in such selected situations as civil rights, juvenile and criminal justice and consumer debtor-creditor relationships; and working relationships between social workers and lawyers.

SW 580 TOPICAL SEMINAR IN SOCIAL WORK. (1-4) Study of issues of current and special significance for social work practice. Issues selected in accordance with the needs and interests of students enrolled. May be repeated to a maximum of eight credits. Prereq: Open to the student of social work or consent of instructor.

SW 595 COOPERATIVE SOCIAL WORK EDUCATION. (0) A course designed for social work students who, through the cooperative education office, secure full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and repeated with the permission of the cooperation education office. Prereq: Approval of the Cooperative Education Coordinator.
SW 600 THEORY-INFORMED PRACTICE WITH INDIVIDUALS. (3)
This course introduces students to the history and philosophy of the social work profession and social work practice theory. It enhances analytical thinking that underlies engagement, assessment, intervention, and evaluation with individuals, and focuses on mastering social work skills for professional practice with individuals. Special attention is paid to the NASW Code of Ethics and the social worker’s obligations toward populations-at-risk. Prereq: Acceptance into the MSW program.

SW 601 THEORY-INFORMED PRACTICE WITH FAMILIES. (3)
This course introduces students to family social work and the theoretical perspectives and concepts that underlie social work with families. The course emphasizes the development and application of skills and techniques for conducting family assessments and for conceptualizing, theory-based and research-informed intervention plans for families in need. The course addresses diverse family forms, cultural competence, and multi-problem families within the contexts of neighborhoods, schools, and communities. Prereq: SW 600 or concurrent.

SW 602 THEORY-INFORMED PRACTICE WITH GROUPS. (3)
This course introduces students to the place of group work in professional social work practice, the theoretical and philosophical formulations that underlie group work and the concepts and techniques derived from these formulations. The course emphasizes group dynamics, development, and techniques needed to be a successful group leader. Prereq: Admission into the MSW program, SW 600, SW 601, SW 635.

SW 603 SOCIAL WORK PRACTICE WITH CHILDREN AND YOUTH. (3)
This course critically analyzes approaches to group practice in social work emphasizing group dynamics, development, and techniques needed to be a successful group leader. Prereq: Admission into the MSW program.

SW 606 SEMINAR IN CRIMINAL JUSTICE PROCESSES. (2)
Criminal justice processes are studied and evaluated emphasizing system aims, theories of criminality and societal reactions, the consequences and alternatives for offenders, and society's current policies to control and prevent crime. Traditional and innovative community and institutional programs for adult and juvenile offenders will be examined.

SW 611 SOCIAL WORK PRACTICE IN MENTAL HEALTH. (3)
This course critically analyzes approaches to group practice in social work emphasizing group dynamics, development, and techniques needed to be a successful group leader. Prereq: Admission into the MSW program.

SW 613 URBAN ECOLOGY AND AGING. (2 or 3)
Effects of an urban environment upon the aging population, including community design, city planning, housing, transportation, relocation, and mobility. The impact of technological advances will be examined from the point of view of theory, current research, and the process of man-environmental relationships.

SW 616 SOCIAL WORK PRACTICE IN SCHOOL SETTINGS. (2-3)
A presentation and examination of school social work practice. Emphasis will be placed on roles, competencies and skills necessary for effective service provision. The differences in services to children in schools will be contrasted with those in primary social service settings. Focus will also be given to the impact of school legislation and regulations on the choice of populations served and programs provided.

SW 617 FAMILY VIOLENCE: SOCIAL WORK INTERVENTIONS. (2-3)
The development of a knowledge based framework for understanding, preventing and intervening in family violence as seen in child, spouse and elder abuse.

SW 618 SOCIAL WORK PRACTICE WITH GAY AND LESBIAN PEOPLE. (2-3)
This course is designed to expand the knowledge and understanding of students about the theories and dynamics of homophobia, heterosexism, and homonegativity. The effects of living with prejudice and discrimination among the gay and lesbian support systems available. Micro and macro social work intervention strategies will be studied as they relate to overall themes. Prereq: SW 600 or 601 or consent of instructor.

SW 623 SOCIAL WORK PRACTICE WITH GROUPS. (2-3)
This course critically analyzes approaches to group practice in social work emphasizing group dynamics, development, and techniques needed to be a successful group leader. Prereq: Admission into the MSW program.

SW 624 PERSPECTIVES ON HUMAN SEXUALITY. (3)
An examination and study of historical and current perspectives of sexuality as it relates to behavioral patterns, cultural attitudes, social policy and practice. Prereq: Knowledge of human behavior and personality theory highly recommended. (Same as FAM 624.)

SW 626 FORENSIC MENTAL HEALTH: EVALUATION AND TREATMENT. (2-3)
An intensive analysis and study of forensic mental health including court evaluation, courtroom testimony and treatment of the victim. Students who wish to take this course for three credits will be expected to make an in-depth study of a specific content area. Lecture, two hours; laboratory (only for those taking the course for three hours), two hours per week. Prereq: Knowledge of behavior and personality theory is highly recommended.

SW 627 COLLABORATIVE PRACTICE: SUBSTANCE ABUSE, MENTAL HEALTH AND SOCIAL SERVICE. (3)
This course reviews the history of the substance welfare system and emphasizes the analysis of social programs and policies and of the policy-making process. An important focus of the course is to identify and understand the impact of a wide range of social policies on social work clients and the human service delivery system within a social justice framework. The course content reflects the interdisciplinary efforts of the social, political, legal, economic, and administrative processes which are vital to policy making at all levels. Prereq: Acceptance into the MSW program.

SW 635 INTRODUCTION TO PROFESSIONAL ETHICS IN SOCIAL WORK. (3)
This course introduces students to the place of ethics in professional social work practice, the philosophical formulations that underlie ethics and relevant concepts derived from these formulations. The course emphasizes the development of ethical reasoning and decision-making. Prereq: SW 600 or concurrent.

SW 640 FOUNDATION PRACTICUM. (3)
Students in this course engage in a generalist social work field placement under the direction of a faculty field professor and an agency field director. Through field education seminars students integrate knowledge, skills, and behaviors from prerequisite and concurrent courses, to demonstrate foundation social work practice with individuals, families, small groups, organizations and communities. The course focuses on ethical considerations, the application of theory, and the use of research-informed interventions. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 600, 601, 602, 630, 635, 650 or concurrent.

SW 642 PSYCHOLOGICAL ASPECTS OF HUMAN AGING. (3)
Description and explanation of behavior, socialization and personality differentiation during the post-maturational developmental period: emotional aspects of aging; perception; intelligence; learning; motivation; normal and abnormal behavior; sexuality; life style. Prereq: SW 620 or equivalent, or consent of instructor.

SW 650 RESEARCH METHODS IN SOCIAL WORK. (3)
Introduction to the systematic approaches to scientific thinking necessary for building knowledge and evaluating one’s own practice. Includes critical use of scientific inquiry, critical appreciation of quantitative and qualitative methodologies, and use of research for program evaluation. Prereq: Open only to students admitted to the graduate Social Work program.

SW 660 SPECIAL PROBLEMS IN SOCIAL WORK PRACTICE. (2-6)
Current issues that have special significance for social work practice. Selected problems in accordance with the needs and interests of the students registered for the course. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

SW 701 ASSET-BASED AND SUSTAINABLE COMMUNITY ASSESSMENT AND DEVELOPMENT. (3)
This course is designed to enhance students’ clinical judgment and decision making with populations at high risk for victimization or perpetration of violence and substance misuse. It provides contemporary scientific and clinical knowledge and explores the associations of violence, child abuse, and mental disorders with substance misuse. Theories of addiction are explored with attention to genetic, familial, gender, geographical, and cultural contributions. Neurochemical and neuroanatomical correlates of addiction are explored. Assessment approaches and major interventions are analyzed and applied in practice sessions. Prereq: Completion of SW 600, SW 601, and SW 635, or admission to the MSW program with advanced standing, or permission of instructor.

SW 711 ADVANCED LEADERSHIP ROLES IN SOCIAL WORK. (3)
Advanced study and analysis of leadership roles in social work practice with emphasis upon administration and supervision. Some attention is given to consultation, staff development and teaching, and review of theories of adult learning. Prereq: SW 701 or consent of instructor.

SW 718 CLINICAL DECISION MAKING AND JUDGMENT FOR SOCIAL WORK. (3)
This course provides the foundation for decision and judgment processes necessary for effective clinical social work practice, and is usually taken concurrently with the Psychopathology II course. Prereq: Admission to the Clinical Social Work concentration.

SW 720 SOCIAL WORK PERSPECTIVES ON HUMAN AND CULTURAL DIVERSITY. (2)
This second required course in the human behavior and social environment sequence builds upon the foundation course. The focus of this course is upon the effects of discrimination and oppression experienced by diverse population groups with special attention to the effects of racism, sexism, ageism, classism and geography upon vulnerable groups; and upon institutionalized societal and cultural themes in diversity; with implications for social work practice. Prereq: SW 620 or advanced standing in the MSW program. (Same as AAS 720.)
SW 721 POVERTY AND INEQUALITY. (3)
Poverty and inequality are among the most pervasive social problems of our time. According to the NASW, poverty, especially, is a primary goal for social workers. The course aims to unmask the complexities of poverty and inequality by introducing students to the nature and characteristics of poverty, examining the predominant explanations of poverty and inequality, exploring the consequences of poverty and inequality, and surveying historical and contemporary approaches to poverty reduction. Diverse perspectives will be presented throughout the course. Special attention will be given to issues related to values and ethics including social justice, human rights and well-being. Prereq: Admission to the Community and Social Development Concentration.

SW 722 PSYCHOPATHOLOGY FOR SOCIAL WORK PRACTICE. (3)
This course offers a survey of the major mental disorders typically encountered by social workers in clinical practice, protective services, family services, and other practice areas. It is designed to increase the social worker’s working familiarity with diagnostic classifications, criteria, etiologies, and natural histories of disorders and social work treatments of disorders. Prereq: Admission into the MSW program with advanced standing or completion of SW 600, SW 601, and SW 635.

SW 724 ASSESSMENT AND TREATMENT PLANNING IN SOCIAL WORK. (3)
This course is designed to prepare the social worker to conduct structured, semi-structured and observational clinical assessments of adults, children, families and groups. Special attention will be paid to diagnostic assessments, substance use evaluations, lethality assessments, motivational interviewing, and other evidence-based and evidence-informed approaches. This course is designed to be taken after or concurrently with the Clinical Decision Making course. Prereq: Admission to the clinical social work concentration; SW 718, SW 726 or concurrent.

SW 726 PSYCHOPATHOLOGY FOR CLINICAL SOCIAL WORK. (3)
This course provides the Master’s level social work student an opportunity for advanced study of differential diagnostic assessment using the current edition of the Diagnostic and Statistical Manual of Mental Disorders. The course also provides an opportunity for more detailed study of the more common mental disorders seen in social work practice. In conjunction with the Clinical Decision Making course it provides an opportunity for advanced study of clinical decision making as it pertains to current mental health assessment. Prereq: SW 722, SW 702, admission to the Clinical Social Work concentration, SW 718 or concurrent.

SW 728 COMPARATIVE TREATMENT MODALITIES. (3)
This course builds on previous content related to clinical decision-making, psychopathology and clinical assessment, and is designed to 1) apply a range of intervention theories to children, adults, families and groups; 2) facilitate the student’s capacity to conduct a comparative analysis of the approaches across common, conceptual, clinical, cultural and ethical domains; and to provide the forum for a critique of each approach using the latest empirical evidence on efficacy and effectiveness. Prereq: SW 718, SW 724, SW 726.

SW 730 EVIDENCE-BASED PRACTICE FOR SOCIAL WORKERS. (3)
This course offers an intensive study of three evidence based practices one for adult, one for children and one group intervention. It is designed to increase the social worker’s familiarity with evidence based practices for social work treatment of mental health disorders. Prereq: SW 718, SW 724, SW 728, SW 737.

SW 731 ADVANCED SOCIAL WELFARE POLICY AND ANALYSIS. (3)
This course builds on the social justice tradition and the policy analysis framework provided in SW 630 to prepare students to engage in the policy-making processes that impact and are impacted by the family and community service delivery system. Controversial issues within the child welfare, school social work, aging, and community development policy arenas are examined. Prereq: SW 721, SW 737.

SW 733 COMMUNITY-INFORMED ORGANIZATIONAL INTERVENTIONS. (3)
This course is an advanced Master’s level class designed to explore the organizational context for creating change in communities. Students will be introduced to practice behaviors related to designing programs that respond to changing community demographics and needs and that promote inclusion of diverse community constituencies. The course emphasizes using community-based data and assessments and reflective learning models to evaluate programing and design program modifications and innovations that will benefit the community. Prereq: SW 721, SW 737, SW 701 or concurrent.

SW 734 CLINICAL SOCIAL WORK PRACTICUM I. (3)
This seminar is taken by MSW students in their last semester to prepare for the comprehensive examination. Foundation level and concentration course content and practice behaviors will be reviewed to assist students to integrate their course of study. Prereq: SW 724 or concurrent.

SW 735 COMMUNITY AND SOCIAL DEVELOPMENT INTEGRATIVE SEMINAR. (3)
This seminar is taken by MSW students in their last semester to prepare for the comprehensive examination. Foundation level and concentration course content and practice behaviors will be reviewed to assist students to integrate their course of study. Prereq: SW 743 or concurrent.

SW 737 NON-PROFIT MANAGEMENT IN HUMAN SERVICE ORGANIZATIONS. (3)
This course focuses on social work management practices and leadership skills required in the development and management of non-profit organizations. With a particular focus on the human services delivery system, this course emphasizes achievement of human service goals and objectives through management control processes such as strategic planning, human resource management, program development and evaluation, finance, and advisory board governance. Prereq: SW 721 or concurrent.

SW 738 GUIDED INDEPENDENT WORK: MILITARY AND VETERAN POPULATIONS. (3)
This guided independent study is a graduate student-directed learning experience, for which the student will work with an advisor. Participation in SW 738 requires critical thinking and reflection regarding relevant material, conceptualization of an independent study project and the development of an electronic portfolio which addresses each learning outcome. Students will meet with the course instructor and/or other certificate-seeking students via electronic resources such as Echo 360, Adobe Connect, or Skype. The seminar instructor will determine the most effective means of communication with students, considering access to various web-based communication tools. Prereq: Admission to the Graduate Certificate in Military Behavioral Health; SW 530, FM 759.

SW 740A CLINICAL SOCIAL WORK PRACTICUM. (4)
This field-based course prepares students to practice as social workers at the advanced level in an area of concentration. Students perform a variety of tasks including assessment, case management, psycho-education, as well as individual, family, and community-based interventions. Placement in a human service agency and experiential learning of 300 hours including weekly seminars. Prereq: SW 640 or advanced standing.

SW 741 CSD PRACTICUM I. (3)
Students in this course engage in learning that prepares them to practice as social workers at the advanced level in public and private settings. Students work in government and non-profit community based agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and groups. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSD concentration courses and will be engaged in work that provides opportunities to become competent social work practitioners at the individual and macro levels. Students will perform a variety of tasks including in-depth agency/organizational assessment, policy analysis, and review of contexts that shape practice at the organizational level. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 721, 737 or concurrent. This class is to be taken concurrently with the SW 751 research course.

SW 741A FAMILY AND COMMUNITY CONCENTRATION PRACTICUM I. (3)
This field-based course prepares students to practice as social workers at the advanced level in an area of concentration. Students perform a variety of tasks including assessment at the individual and community level, case-management, and individual, family, and community-based interventions. Placement in a human service agency and experiential learning of 300 hours including weekly seminars. Prereq: SW 721, 737 or concurrent. This class is to be taken concurrently with the SW 751 research course.

SW 742 CLINICAL SOCIAL WORK PRACTICUM II. (3)
This course builds on the experiences and activities of SW 740. Students in this course engage in learning that prepares them to practice as clinical social workers at the advanced level. Students work in public and private agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and groups. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSD concentration courses in field settings that provide opportunities to practice advanced clinical social work. Students will perform a variety of tasks including clinical decision-making, assessment and treatment planning. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 740, SW 750, SW 758, SW 730 or concurrent.

SW 743 COMMUNITY AND SOCIAL DEVELOPMENT PRACTICUM. (3)
This course builds on the experiences and activities of SW 740. Students in this course engage in learning that prepares them to practice as social workers at the advanced level in public and private settings. Students work in government and non-profit community based agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and groups. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSD concentration courses and will be engaged in work that provides opportunities to become competent social work practitioners at the organizational and macro levels. Students will perform a variety of tasks including in-depth agency/organizational assessment, policy analysis, and review of contexts that shape practice at the organizational level. Includes 300 hours per semester of seminar and experiential learning. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 740, SW 751, SW 701, SW 731, and SW 733 or concurrent.

SW 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 or residence credit following the successful completion of the qualifying exams.
SW 750 CLINICAL SOCIAL WORK RESEARCH. (3)
This course builds on the introductory research class designed to study the processes of research in the social work field, knowledge and developing effective social work practice. This course helps students develop the skills necessary to become sophisticated consumers of clinical research; execute single subject designs in clinical practice to assess and monitor progress, and participate in clinical intervention studies to test the efficacy and effectiveness of interventions. Prereq: SW 650 or advanced standing. This course is designed to be taken concurrently with SW 740.

SW 751 RESEARCH SKILLS FOR COMMUNITY AND SOCIAL DEVELOPMENT. (3)
This is an intermediate level course with an emphasis on program evaluation. The course will provide instruction in research methodology as well as research design. In addition, there is an emphasis on developing competencies and skills that will allow students to work with multifaceted research teams in diverse settings. Prereq: SW 650 or advanced standing. This course is designed to be taken concurrently with SW 741.

SW 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

SW 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Successful completion of qualifying exam.

SW 770 DOCTORAL RESEARCH I. (3)
This course focuses on the role of research in the profession, the logic of research, the major strategies and techniques for conducting research in social work settings, and preparation of a research proposal. This is the first of a two-course sequence with a primary focus on quantitative methods. Prereq: Admission into the Social Work doctoral program.

SW 771 DOCTORAL RESEARCH II. (3)
In this second of two required research methods courses, students will conduct and report on the quantitative research project proposed in the first semester. They will also conduct a meta-analysis, test a research instrument’s reliability and validity, conduct an exercise using qualitative methodology, and explore large public databases. Prereq: SW 770.

SW 773 DOCTORAL STATISTICS II. (3)
This social work course aims to help students understand and apply multivariate techniques in the fields of social welfare and social work research. Topics covered will include multivariate regression, factor analysis, path analysis, event history analysis, as well as logit and probit analysis. Prereq: STA 570 or other graduate level statistics course.

SW 774 MENTAL HEALTH RESEARCH METHODS. (3)
This course will explore the principles and procedures that govern mental health research by examining the different ways researchers study mental health phenomena. In this course, students will learn the skills to engage in the scientific investigation of significant mental health problems, and dissemination strategies utilized to transfer empirical findings into mental health practice and policy development. This course emphasizes aspects of methodological design essential for conducting meta-analysis, treatment, prevention and epidemiological research that may be outside the scope of a general research course. Prereq: SW 770 and SW 771 (SW 771 may be taken concurrently).

SW 780 INDEPENDENT WORK. (1-6)
Organized study, research and/or tutorial focused on special issues or problems. May be repeated to a maximum of six credits. Prereq: Major, graduate standing of 3.0 overall GPA, or consent of dean, and consent of adviser and instructor.

SW 781 THEORY DEVELOPMENT IN THE SOCIAL WORK PROFESSION. (3)
Explores the nature of knowledge, how it is generated and acquired. Students will distinguish explanatory practice theory, understand paradigms as bases for ideas, recognize and formulate concepts, understand relational statements, theoretical statements, and how these relate to theory and data. Strategies for building knowledge will be discussed. Students will analyze theories into their components, construct mini-theories, and propose how they can be tested in social work practice. Prereq: Admission into the doctoral program or consent of the program director.

SW 782 ADVANCED ANALYSIS OF SOCIAL PROBLEMS, POLICY AND PRACTICE. (3)
This course provides students with the theoretical and conceptual framework for understanding social problems and their implications for macro social work practice. Critical perspectives related to social science theory will be identified, assumptions assessed, values examined, and empirical evidence analyzed. Theories covered will be drawn from sociological, socio-cultural, political, economic, historical and other perspectives. Students will be expected to develop their abilities to analyze and critique social problems and macro social work practice. Prereq: Admission into the doctoral program.

SW 783 HUMAN BEHAVIOR AND CHANGE THEORIES IN SOCIAL WORK PRACTICE. (3)
A critical analysis of theories that seek to explain human behavior and serve as foundations for current clinical change interventions; includes an examination of the empirical support for and efficacy of major treatment modalities used in social work practice. Prereq: Admission to the doctoral program.

SW 784 ETHICS, SOCIAL WORK AND SOCIETY. (3)
This course will identify and articulate the philosophical formulations of relevant ethical traditions and how they influence social work. Students will examine approaches to ethical analysis as well as major ethical problems facing contemporary social work. The course will emphasize the development of advanced ethical reasoning and decision-making skills. Prereq: Admission to the doctoral program and SW 781.

SW 785 PROSEMINAR IN SOCIAL WORK RESEARCH. (1)
This seminar introduces beginning doctoral students to the research activities of social work faculty and advanced students. Presentations will familiarize students with practical issues in the conceptual development and conduct of current research. May be repeated to a maximum of two credits. Prereq: Completion of first year of doctoral program.

SW 786 DOCTORAL RESEARCH PRACTICUM. (3-6)
Provides the doctoral student opportunity to conduct social work research under the supervision of a chosen faculty member. This experience is expected to result in one or more reports suitable for submission to a scholarly journal at conclusion of the practicum. Prereq: Completion of first year of doctoral study.

SW 787 DOCTORAL TEACHING PRACTICUM. (3-6)
Supervised teaching and other classroom experiences designed to prepare doctoral students to be social work educators. Prereq: Completion of first year of doctoral study.

SW 788 RESEARCH IN SOCIAL WORK SEMINAR. (3)
This course is designed to facilitate the student’s completion of the dissertation prospectus and the dissertation itself. Students will make formal presentations on their research plans and will address available literature, measurement and methodological issues, analysis of data, limitations, and importance of the investigation. Prereq: Six hours doctoral level research.

SW 790 SEMINAR IN TEACHING AND LEARNING. (3)
Students will facilitate seminar sessions drawing upon educational theory and relevant literature, create syllabi, observe each other teaching, and develop papers elucidating their grading practices and philosophy of teaching. Prereq: Admission into the doctoral program or consent of instructor.

SW 795 ADVANCED DOCTORAL SEMINAR IN SOCIAL WORK (Subtitle required). (3)
Topics of current importance in Social Work research and practice, including philosophical, theoretical, ethical, and technical considerations. May be repeated to a maximum of twelve credits under different subtitles. Prereq: Admission to the joint Ph.D. program.

TA Theatre

TA 110 THEATRE: AN INTRODUCTION. (3)
This course provides an introduction and investigation in the analysis, research, production, and creative techniques central to the art of theatre. Students will read performance texts, attend live performances, and create a public performance. This online hybrid course will meet face-to-face one session per week.

TA 120 CREATIVITY AND THE ART OF ACTING. (3)
This course provides students with the tools to create their own, short, original works of theatre. Students will explore recent and current trends in theatre that allow performers to become creators of their own works. Students will examine the ways they can interpret language, literature, poetry, and dramatic texts to develop new ways to communicate their ideas in performance through the idiom of an ensemble.

TA 126 ACTING I: FUNDAMENTALS OF ACTING. (3)
A broad spectrum of skills will be explored in the creative process of acting ensemble. These skills include improvisation, movement disciplines (including theatre games, modern dance, and characterization), emotional and sensory awareness, and the process of integrating these into a clearly defined stage technique. Lecture, three hours; laboratory, two hours per week.

TA 150 CREATIVITY AND THE ART OF DESIGN AND PRODUCTION. (3)
A comprehensive study of the basic organizational structure, processes and techniques involved in theatre design, technology and management with particular reference to the UK Theatre.

TA 220 SHAKESPEARE PAGE TO STAGE. (3)
Shakespeare’s plays were written to be performed, not read, and this course explores how to direct, act, and design his plays. The course explores techniques in directing, acting, and design, and examines famous stage and film productions of the last hundred years. The class culminates in design projects and student performances.

TA 225 VOCAL PRODUCTION FOR THE STAGE. (3)
The theory and practice of stage diction. Mastery of these vocal techniques will lead the student to the eradication of regional speech patterns, an appreciation of vocal craft and discipline and an awareness of the diversity of vocal expression.

TA 236 ACTING: COMEDY STYLES. (3)
This course introduces student actors to a variety of comedy acting styles and techniques. Prereq: TA 126 or TA 120 or permission of instructor.
## Course Descriptions

**TA 237 ACTING: SCENE STUDY.** (3)
An advanced lecture/laboratory course concentrating on acting techniques integral to the successful execution of scene work, including text analysis, character construction, improvisation, and stage behavior. Prereq: TA 120 or TA 126.

**TA 260 STAGECRAFT.** (3)
Study of theory, principles and techniques of stage construction. Assignments in laboratory and backstage during rehearsals and performances. Lecture, two hours; laboratory, five hours.

*TA 265 COSTUME PRODUCTION.** (3)
A study of the principles and techniques of costume construction. Lecture, one hour; laboratory, three hours per week.

**TA 267 LIGHTING AND SOUND TECHNOLOGY.** (3)
An introduction to lighting and sound practice in today’s theatre. Lighting topics include use and maintenance of lighting equipment, photometrics, basic theatrical wiring and modern theatre systems. Sound topics include use of sound equipment for enhancement and reinforcement of theatrical productions and basic sound editing. Lecture, three hours; laboratory, two hours per week.

**TA 275 STAGE MANAGEMENT.** (3)
This lecture-studio course explores the role and responsibilities of the stage manager in academic, community, regional, and professional theatre settings.

**TA 286 SOCIAL ACTION THEATRE.** (3)
This course will explore applications of theatre practice and performance as they contribute to various cultures and/or community groups.

**TA 300 SPECIAL PROJECTS IN THEATRE (Subtitle required).** (1-3)
Reading, research, lecture and experimentation in a particular area of theatre history, theory, design and/or performance. This course will enable the student to link theory and practice to develop a role, or performances study for the stage. May be repeated to a maximum of twelve credits. Prereq: By audition or permission of instructor.

**TA 311 AUDITION TECHNIQUES.** (3)
This course is an introduction to basic audition techniques. Prereq: TA 126 or TA 120 or equivalent.

**TA 326 ADVANCED ACTING (Subtitle required).** (3)
A course of advanced study focusing on a specific acting style or performance tradition. Repeatable up to six credit hours. Prereq: TA 267 and TA 237 or permission of instructor.

**TA 330 THEATRE DIRECTING I.** (3)
Discussion and practice of the director’s basic techniques, methods and responsibilities. Study of movement, interpretation of line, use of stage areas, use of levels, script analysis, and understanding dramatic action. Lecture, two hours; laboratory, two hours per week. Prereq: Major or consent of instructor.

**TA 336 ADVANCED ACTING: CLASSICAL STYLES.** (3)
A course of advanced study focused on three classical western acting styles from ancient Greece, Elizabethan England, Restoration England, or Neo-classic France. Prereq: TA 126 or TA 120; and TA 237.

**TA 348 MUSICAL THEATRE TECHNIQUE.** (3)
Musical Theatre Technique will provide students with a basic understanding of the specialized acting techniques required to perform in the genre of musical theatre. Utilizing the literature of Musical Theatre, students will learn to coordinate dialogue, melody, lyrics, and staging for performance. Students will be exposed to a basic framework of musical theatre history, including notable directors, innovations, styles, and productions.

**TA 350-352 TOPICS IN THEATRE.** (3)
Reading, research, lecture and/or discussion in various areas of theatre history, technology and practice. May be repeated up to a maximum of 12 hours when identified by different course subtitles. Prereq: Major or consent of instructor.

**TA 361 GRAPHICS FOR THEATRE.** (3)
A studio course to develop the graphic skills in relation to theatrical design and technology. Sketching, rendering, mechanical drafting, pattern drafting, CAD, and relative computer programs are explored. May be repeated to a maximum of six hours. Prereq: TA 115 or TA 150 or consent of instructor.

**TA 364 STAGE MAKEUP.** (3)
Studio course in the application and design of makeup for the stage.

**TA 365 COSTUME DESIGN.** (3)
A lecture/studio course to teach basic skills in costume design through analysis, collaboration, research, and rendering. Lecture, one hour; studio, four hours per week. Prereq: TA 115 or TA 150 or consent of instructor.

**TA 367 LIGHTING DESIGN.** (3)
Theory, practice and design of lighting for the theatre. Examination of the practical and aesthetic requirements of lighting through research and analysis. Application of theory to light in a variety of contexts including theatre, opera, musicals and concerts. Lecture, three hours; laboratory, three hours per week. Prereq: TA 115 or TA 150 or TA 267 or consent of instructor.

**TA 368 VISUAL STORYTELLING.** (3)
Explore communicating a story through non-text based means using the visual medium of puppet and mask theatre and its associated techniques. May be repeated to a maximum of six hours.

**TA 369 SOUND DESIGN FOR THE THEATRE.** (3)
More sophisticated sound systems in movies theatres and home audio-visual systems raise the expectation of an integrated soundscape in theatrical productions. Our use of sound in theatre is rapidly changing and advancing; in the past 20 years we have gone from reel to reel tape recorder technology to ITunes to a fully digital design process. In this class you will learn how we develop and implement a sound design for a theatre production. This class will cover reading a script for sound, choice and acquisition of sound effects and music, recording and playback systems and integration of sound in the production process. Prereq: TA 267.

**TA 370 STAGING HISTORY.** (3)
A one-semester course dedicated to the research, development and creation of a “Docu-Drama” or Documentary Play based on a local, regional or national historic event, era or site.

**TA 374 SCENE DESIGN.** (3)
Process of evolving a scenic design through play analysis, research, metaphysical association and the assimilation of theatrical art forms against practical prescribed limitations. Practice in developing floor plans, elevations and simple sketching techniques. Lecture, two hours; laboratory, two hours. Prereq: TA 115 or TA 150 or consent of instructor.

**TA 383 PLAY ANALYSIS.** (3)
Student actors, designers, directors, playwrights and dramaturges will be introduced to critical methodologies that can be applied to in-depth analysis of a variety of styles and genres of dramatic literature and performance. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**TA 384 BLACK THEATRE WORKSHOP.** (3)
A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as AAS 384.)

**TA 385 WORLD THEATRE I.** (3)
A multicultural and intercontinental exploration of the history, theory, dramatic literature, and practices of theatre from its earliest origins to 1800 c.e.

**TA 386 WORLD THEATRE II.** (3)
A multicultural and transnational examination of the history, theory, dramatic literature, and practices of theatre from 1800 to the present day. The second of two courses in a two semester sequence of World Theatre.

**TA 387 SEMINAR IN DRAMATIC LITERATURE (Subtitle required).** (3)
Advanced reading and discussion in theatre literature, theory and criticism. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: Major or permission of instructor.

**TA 388 HISTORY OF THE AMERICAN MUSICAL.** (3)
Beginning with the 1866 production of The Black Crook, the American Musical has appealed to audiences of every type. This course examines the history and development of the musical and analyzes the various types and styles of musical productions, including musicals that have been made into films. Particular attention is paid to investigating the musical as a manifestation of social, political, cultural values and norms.

**TA 390 THEATRE PRACTICUM.** (1)
The study and practice of production, performance, or directing techniques through rehearsal and performance. May be repeated to a maximum of eight credit hours. At least four hours production related activities per week. Pass/fail only. Prereq: Consent of instructor and filing of prospectus.

**TA 395 INDEPENDENT WORK.** (1-3)
For undergraduate majors in theatre arts. Pursue independent work under the guidance of a staff member. Write a paper embodying the results of his research study and take an examination. May be repeated to a maximum of 12 credits. Prereq: Major, filing of prospectus at time of registration, and consent of chairperson.

**TA 399 FIELD BASED/COMMUNITY BASED EDUCATION.** (1-15)
A community-based or field-based experience in theatre, under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Prereq: Consent of instructor and department chairperson; completion of departmental learning agreement. (Approval of Dean of Fine Arts required for more than six credits per semester.)

**TA 465 ADVANCED COSTUME EXPLORATION: (Subtitle required).** (3)
Advanced techniques in costume design, production and history are explored in a focused and specialized environment. Hands on projects are designed to stimulate creativity in a closely mentored atmosphere. Maybe repeated up to nine hours under a different subtitle. Prereq: TA 265 or TA 365 or consent of instructor.

**TA 470 ADVANCED PROJECT IN DESIGN.** (3)
A continuation of course work in a student’s chosen area of design and production (scenery, costumes, or lighting). The first half of the course will focus on the design, and the second half on the production of design. Lecture, one hour; studio, four hours per week. May be repeated to a maximum of six credits. Prereq: TA 260; TA 265; TA 267, and one of the following: TA 365, TA 367, TA 374, and consent of the instructor.
Course Descriptions

TA 485 FRENCH THEATRE: CULTURE, TEXT AND PERFORMANCE. (3)
This course will focus on a particular period or playwright’s work from the canon of French Dramatic Literature, and explore the social and cultural world of the period and playwright. Course work will include a public performance, using both English and French languages. May be repeated to a maximum of six hours. Prereq: Premajor requirements must be completed, or consent of instructor. Some knowledge of French is helpful.

TA 490 SENIOR CAPSTONE. (1)
A capstone course in theatre. This course measures, through a comprehensive examination and rigorous exercises, the theatre student’s retention of knowledge from the undergraduate experience and their preparedness for further education or the profession. Prereq: Senior standing, completion of core curriculum.

TA 499 PROFESSIONAL THEATRE INTERNSHIP. (1-12)
A professional theatre internship, which provides students with experiential learning in the area of theatre arts. The internship is identified and conducted under supervision of a Theatre Department faculty member. Students must file a learning contract with the College of Fine Arts. May be repeated to a maximum of 12 credits. Prereq: Overall GPA 2.5, upper division standing in major, or consent of instructor.

TA 516 PLAYWRITING. (3)
A course designed for students interested in creative drama. The completion of at least one play is required. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

TA 526 PLAYWRITING II. (3)
An advanced workshop in the art and craft of playwriting. Prereq: TA 516.

TA 530 EXPERIMENT IN DIRECTING. (3)
This course exposes students to the directing styles of leading avant-garde 20th and 21st century stage directors from around the world. Each student will select a particular director to research, to document in writing, and to recreate the selected individual’s directing style as an applied exercise. A student may repeat this three credit course selecting both a different time period and director to study; therefore, this course may be taken for up to six credit hours. Prereq: TA 530.

TA 584 ASIAN THEATRE. (3)
An in-depth study of the major forms and styles of traditional and contemporary theatre and dance performances in India, China, Japan, and southeast Asia. Prereq: Junior, senior, or graduate standing, or permission of instructor.

TA 587 GENDER AND PERFORMANCE (Subtitle required). (3)
An examination of the ways in which gender is performed, according to various theoretical constructs. Topics may include feminist performance of gender, queer theories of gender, and masculinist theory in relationship to performance. Prereq: Junior status.

TA 600 ADVANCED STUDIES IN SCRIPT ANALYSIS. (3)
An advanced study of dramatic literature in its context as a basis for theatrical production. Textual interpretation is considered from the viewpoint of all members of the artistic team. The course requires practical application of analytical theories. Prereq: Graduate standing.

TA 610 CRITICAL THEORIES AND PERFORMANCE. (3)
This class introduces students to critical theories of performance and production and to the various issues raised by the professional production of selected plays. May be repeated to a maximum of six credits.

TA 620 APPLIED RESEARCH IN THEATRE (Subtitle required). (3)
This course focuses on the application of performance-production research to the actual production of a dramatic text. Students will investigate the work of a selected writer, examine critical and historical materials relative to that writer, and then apply this research to the production of one play. The play will be produced as a part of the department’s Studio Season. May be repeated to a maximum of six credits.

TA 625 ADVANCED STYLES OF ACTING. (3)
The rehearsal and performance of scenes and class exercises in improvisation to develop creative imagination as a basis for acting. Lecture, three hours, laboratory, two hours. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

TA 630 DRAMATURGY. (3)
Study of conceptual collaboration while working within the production environment. Prereq: TA 600.

TA 650 TOPICS IN AMERICAN THEATRE (Subtitle required). (3)

TA 660 ADVANCED STUDIES IN DESIGN/TECHNOLOGY; (Subtitle required). (3)
Advanced problems in design and technology. Subtitle required. Course may be repeated to a maximum of twelve hours when identified under different subtitles. Prereq: Graduate standing in Theatre.

TA 690 PRODUCTION PRACTICUM. (1)
The study and practice of production techniques through rehearsal and performance. May be repeated to a maximum of two credits. Prereq: Consent of instructor and filing of prospectus.

TA 691 PERFORMANCE PRACTICUM. (1)
The study and practice of acting and directing through rehearsal and performance. May be repeated to a maximum of two credits. Prereq: Consent of instructor and filing of prospectus.

TA 692 DIRECTING/DRAMATURGY PRACTICUM. (1-3)
The practice of directing or acting as dramaturg for a selected play script through various rehearsal and performance phases. May be repeated to a maximum of six credits. Prereq: TA 730, consent of instructor and filing of prospectus.

TA 725 SPECIAL PROBLEMS IN ACTING; (Subtitle required). (3)
Advanced practice and research in acting theory and technique for the director or dramaturg. May be repeated to a maximum of six credits when identified by a different subtitle. Lecture: 3 hours; laboratory: 2 hours per week. Prereq: Graduate Standing in Theatre.

TA 730 ADVANCED STUDIES IN DIRECTING; (Subtitle required). (3)
Seminar and research in the aesthetics, history, style, and directional techniques required for theatrical production. May be repeated to a maximum of six credits when identified by a different subtitle. Lecture: 3 hours; laboratory: 2 hours per week. Prereq: TA 600.

TA 739 INTERNSHIP IN THEATRE. (3-6)
A field based learning experience in the student’s area of expertise conducted at a nationally or regionally recognized professional venue. The internship appointment is secured by the student with the consent and supervision of a faculty advisor. May be repeated to a maximum of 12 hours. Prereq: Completion of course requirements in Ph. D. program, consent of instructor, and filing of prospectus.

TA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

TA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of 6 semesters. Prereq: Registration for 2 full-time semesters of TA 769 following successful completion of qualifying examination.

TA 760 THEATRE PRACTICE: EFFECTIVE ARTISTIC COMMUNICATION. (3)
This course is designed to foster collaboration among members of the artistic team, examine each member’s role, and develop communication skills through practical application. Prereq: Graduate standing in Theatre.

TA 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 credits.

TA 769 RESIDENCE CREDIT. (0-12)
Residence Credit for the Doctoral Degree. May be repeated indefinitely.

TA 770 SEMINAR IN THEATRE: (Subtitle required). (3)
Intensive study in a designated area of theatre. Subtitle required. May be repeated to a maximum of nine hours when identified under different subtitles. Prereq: Graduate standing in Theatre.

TA 771 ADVANCED STUDIES IN THEATRE HISTORY: (Subtitle required). (3)
Seminar designed to provide extensive reading and research over historical issues relating to dramatic literature and theatre practices of a designated period. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Graduate standing in Theatre.

TA 780 INDEPENDENT STUDY IN THEATRE. (1-3)
Study and research on specific topics and problems according to the interests and needs of individual students. Normally offered as an independent work course. May be repeated to a maximum of six credits.

TA 790 RESEARCH SYMPOSIUM. (0-1)
This course is for doctoral students to present current research projects. Students in the M.A. program may register for 0 credit. May be repeated to a maximum of three credits. Prereq: Graduate Standing in Theatre.

TAD 140 INTRODUCTION TO DANCE. (3)
This course will provide students with an introduction to the history, theory and principles of dance as a cultural and aesthetic form of expression. The class will provide students with fundamentals of movement while providing an opportunity to express themselves creatively through the use of improvisation, composition, and choreography. Creative results of these explorations will be shown as part of a public performance at the end of the semester.

TAD 141 MODERN DANCE I. (2)
Foundations course in basic movement concepts of time, space, and energy, emphasizing technical development and creative exploration.

TAD 142 BALLET I. (2)
Fundamentals of ballet technique designed to acquaint students with the dance form’s basic principles, through exercises at the barre, center work, and movement combinations. Students will learn to observe, analyze, and perform classical ballet movements and acquire fundamental understanding of vocabulary, theory, and aesthetics of the art form.

TAD 143 JAZZ DANCE I. (2)
Study of the technique and choreography of jazz dance genre from the early 20th century to present.
Course Descriptions

TAD 147 BEGINNING MUSICAL THEATRE DANCE. (2)
Beginning Musical Theatre Dance will provide students with a basic understanding of theatre dance fundamentals, styles and history. Students will gain a basic knowledge of fundamental dance technique. Utilizing vocabulary from ballet to jazz styles, students will hone basic dance skills and be exposed to a variety of theatre dance styles and "period" dances (relating to specific eras in dance history), and gain understanding of the basic framework of theatre dance history, including notable choreographers, innovations, styles and shows.

TAD 241 MODERN DANCE I. (2)
A continuation of Modern Dance I. Expands technique and theory through increasingly complex combinations and movement analysis, and introduces new technical vocabulary, style, and presentation. Prereq: TAD 141.

TAD 242 BALLET II. (2)
A continuation of Ballet I, with extended technical and artistic ballet skills and the use of increasingly complex combinations, technical vocabulary, and emphasis on style and presentation. Prereq: TAD 142.

TAD 243 JAZZ DANCE II. (2)
Intermediate jazz dance emphasizing contemporary techniques and styles. Prereq: TAD 143 and permission of instructor.

TAD 244 DANCE IMPROVISATION. (1)
This course will investigate essential elements of dance composition (time, space and energy) to create dances in and of the moment. Students will cultivate individual and ensemble awareness, and enhance their performance skills at the introductory level. Prereq: TAD 141 and permission of instructor.

TAD 245 CHOREOGRAPHY. (1)
This course explores the process of making dances, and studies the elements of dance composition, including the development of solo and group studies for class presentation. Prereq: TAD 141 or permission of instructor.

TAD 345 CHOREOGRAPHY II. (2)
Choreography II is a course designed to continue to develop choreographic tools in duets and small groups in various dance genres. Focus is on structuring sophisticated choreographic works. Emphasis is placed on different kinds of creative processes and relationships between dancers. Prereq: TAD 245.

TAD 347 ADVANCED MUSICAL THEATRE DANCE. (2)
An in-depth approach to Musical Theatre Dance, this course emphasizes technical and artistic skills based on a foundation of correct body alignment, movement isolation, rhythm, awareness, musicality, intermediate to advanced vocabulary, auditioning and performance focus, strength, stamina, and flexibility at the intermediate/advanced level. Dynamic range of Musical Theatre influences ranging from 19th century to present will be explored. Prereq: TAD 147.

TAD 370 DANCE HISTORY. (3)
The study of the evolution of dance through the cultural periods of history and the interrelation of the arts of social structure and dance forms.

TAD 392 DANCE PRACTICUM. (1)
The study and participation of dance production and performance through the rehearsal process of a dance concern or dance performance. The dance practicum is designed to give the student practical experience for general skills necessary for a career in the dance field. May be repeated up to 8 credits.

TAD 447 STUDIES IN DANCE: (Subtitle required). (2)
Exploration and study of a particular style and/or genre of dance technique. Prereq: Permission of instructor.

TOX Toxicology

TOX 350 INTERDISCIPLINARY FORENSIC SCIENCES. (3)
This course broadly introduces the interdisciplinary field of Forensic Science. The class will survey the areas of (i) legal/scientific considerations in evidence collection, (ii) physico-chemical, biological-medical, computational, and sociological methods in evidence analysis and in the interpretation of the application of these methods. Students will research, evaluate, and present information on, and lead discussion about, how the proper exercise of Forensic Science relates to representations of this discipline in popular media. Prereq: BIO 148 (lecture) + BIO 155 (lab) and CHE 105 (or by permission of the instructor).

#TOX 395 INDEPENDENT RESEARCH. (3-6)
An independent experiential research project for 3-6 credits in a contemporary area of Toxicology. Under the direction of the Graduate Coordinator, the student will conduct experiments. Students will prepare a final report on their research project, which will be presented at the annual Graduate Research Conference and at national and international conferences. Students will be under the direction of a GCT faculty member, who will supervise the student's efforts on a research project. The student will be trained not only in the "hands on" techniques but also in how to independently design and interpret research experiments. Students will prepare a final report on their research project, which will be designed to provide instruction and training in preparing "publication-style" research reports. This course is distinct from "topical seminar" or "library survey" courses, since such courses are not "hands on" in experimental methods. May be repeated to a maximum of six credits. Laboratory, two-six hours per week. Prereq: Status as upperclass undergraduate, post bac, or graduate student.

TOX 508 RESEARCH METHODS IN TOXICOLOGY. (1-3)
The course provides students with "hands on" experience in research methods used to solve toxicological problems. Students will be under the direction of a GCT faculty member, who will supervise the student's efforts on a research project. The student will be trained not only in the "hands on" techniques but also in how to independently design and interpret research experiments. Students will prepare a final report on their research project, which will be designed to provide instruction and training in preparing "publication-style" research reports. This course is distinct from "topical seminar" or "library survey" courses, since such courses are not "hands on" in experimental methods. May be repeated to a maximum of six credits. Laboratory, two-six hours per week. Prereq: Status as upperclass undergraduate, post bac, or graduate student.

TOX 509 ENVIRONMENTAL AND REGULATORY TOXICOLOGY. (2)
Presentation of basic and advanced concepts to provide an integrated description of toxicology, its scope, the unique application of principles that characterize it as a science, and its professional practice. Emphases will include an extensive treatment of relationships between toxicology and environmental exposures and the influence of federal regulations on the practice of toxicology. Prereq: CHE 105, CHE 107, BIO 150, BIO 153 and BIO 315 or BIO 350 or PGY 502 or equivalents or consent of instructor. (Same as PLS 560.)

TOX 600 ETHICS IN SCIENTIFIC RESEARCH. (1-2)
The course will commence with an overview of good laboratory practices and present them as the basis of good scientific research, along with an overview of quality assurance and quality control. Emphasizes and problems in toxicology and environmental exposures and the influence of federal regulations on the practice of toxicology. Prereq: CHE 105, CHE 107, BIO 150, BIO 153 and BIO 315 or BIO 350 or PGY 502 or equivalents or consent of instructor. (Same as PLS 600.)

TOX 649 ADVANCED MOLECULAR PHARMACOLOGY. (2)
This course will provide in-depth coverage of the molecular pharmacology of growth factors, transcription factors, receptors, and ion channels. Emphasis will be placed on both the normal functions of these cell-signaling molecules and perturbations that result in several prevalent human diseases, including cancer, Alzheimer's, diabetes, osteoporosis, and inherited human illnesses. Students will be introduced to experimental approaches to diagnosing and treating these illnesses in the light of our evolving knowledge of molecular pharmacology. Prereq: IBS 601-606 or consent of instructor. (Same as PHA/PHR 649.)

TOX 670 CHEMICAL CARCINOGENESIS.

TOX 680 MOLECULAR TOXICOLOGY AND CARCINOGENESIS. (3)
An intensive examination of (1) the key molecular and cellular mechanisms related to toxicity and carcinogenesis, and (2) the established relationships between exposures to toxicants and development of cancer and other human diseases. Prereq: TOX 509, TOX 663 or consent of Director of Graduate Studies.

TOX 690 PRACTICAL ANALYTICAL TOXICOLOGY. (3)
An evaluation of techniques for the isolation, identification, and quantitation of drugs, pesticides and other toxicants in biological samples. Concepts and theory will be presented in the lecture portion, while the laboratory will be devoted to actual sample analysis by the students. Lecture, 1 hour; laboratory, six hours. Prereq: Consent of the instructor and graduate standing in toxicology. (Same as VS 690.)

TOX 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

TOX 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 799 residency credit following the successful completion of the qualifying exam.

TOX 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

University of Kentucky
2016-2017 Undergraduate Bulletin

630

KEY: # = new course  * = course changed  † = course dropped  ¶ = course purged
TOX 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.  (1-6)
May be repeated to a maximum of 12 hours.

TOX 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.  (0-12)
May be repeated indefinitely.

TOX 770 TOXICOLOGY SEMINAR.  (0-2)
A specialized seminar focusing on current topics of toxicological significance. Registration each fall and spring semesters required of all toxicology majors until residency requirements for the degree have been completed. May be repeated to a maximum of three times during a semester and for a maximum number of two credits during entire graduate course work.

TOX 780 SPECIAL PROBLEMS IN TOXICOLOGY.  (2)
Exposure to actual research experience in an area of toxicology other than that encountered by students in their thesis and dissertation research. May be repeated to a maximum of six credits. Prereq: Consent of graduate adviser.

*TOX 790 RESEARCH IN TOXICOLOGY AND CANCER BIOLOGY.  (1-6)  
Research in Toxicology and Cancer Biology. Research will be conducted in specific areas of toxicology and cancer biology. Learning Outcomes: 1. Conduct independent, hypothesis driven research; 2. Demonstrate the ability to read, understand and apply the scientific literature that is relevant to the research activities; 3. Demonstrate the ability to develop original hypotheses, develop strategies and design experiments to test hypotheses; 4. Demonstrate competency in the collection, analysis and interpretation of data that is relevant to the research activities. Prereq: Consent of Director of Graduate Studies.

TSL 560 LITERACY DEVELOPMENT IN THE ESL CLASSROOM.  (3)  
This course is designed to introduce students to theory, research and teaching applications of second language literacy development in the ESL classroom. This is a field-based course and students will study current teaching methods of literacy instruction and apply those ideas in a practicum ESL classroom.

TSL 597 ESL TEACHING PRACTICUM.  (3)  
This course provides students with a supervised ESL teaching experience of 45 hours, and an additional 15 hours of course meetings with the supervisor to explore instructional strategies, classroom management, and to reflect upon their own development as teachers. The course is designed as the culmination of the TESL Graduate Certificate, and can be taken in the fall, spring or summer terms. ESL teaching placements must be approved by the course instructor. Prereq: Students must be enrolled in the TESL Graduate Certificate course of study.

TSL 675 ENGLISH GRAMMAR: ANALYSIS AND PEDAGOGY.  (3)  
This course is designed to deepen students’ explicit understanding of English grammar, with particular attention paid to grammatical structures most challenging for English language learners. The course explores the development of language learners, with a primary focus on the development of English grammatical competence. Issues in the teaching of English grammar are studied and applied to ESL teaching techniques and curriculum.

TSL 697 ESL INTERNSHIP.  (3-9)  
This course provides TESL MA students with a supervised ESL teaching experience of 90 hours, and an additional 15 hours of course meetings with the supervisor to explore instructional strategies, classroom management issues and reflection upon their development as ESL teachers. The course is designed as the culmination of the TESL MA program, and can be taken as a variable credit course (3-9 credits) in the fall, spring or summer terms. In order to fulfill the program internship requirements, a total of 9 credits must be completed. Prereq: Student must be in good standing in the TESL MA program.

TSM 220 PRINCIPLES OF INTERNAL COMBUSTION ENGINES.  (3)  
Principles of selection of internal combustion engines. Operating principles of internal combustion engines including fuel injection, ignition, lubrication and maintenance. Power transmission application and efficiency are considered. Lecture, two hours per week; lab, two hours per week. (Same as AEN 220.)

TSM 252 FABRICATION AND CONSTRUCTION FOR TECHNICAL SYSTEMS.  (3)  
Lecture, 1 hour; laboratory 4 hours. Wood and metal work, including reading engineering drawings, welding, power woodworking tools, soldering and pipe work. Prereq: Major in agricultural education, or Individualized Agriculture Curriculum (TSM), or a minor in TSM, or consent of instructor. (Same as AEN 252.)

*TSM 340 PRINCIPLES OF FOOD ENGINEERING.  (4)  
The functional requirements and principles of operation of systems for the handling and processing of food and agricultural products are studied. The areas covered are mass and energy balances, fluid mechanics, heat transfer, refrigeration, food freezing, evaporation, drying and special topics such as extrusion and microwave heating. Prereq: Completion of PHY 211 and MA 125 or MA 113 or MA 137 and junior standing in Food Science major or Technical Management option in AICU. (Same as AEN 340.)

#TSM 341 BREWING SCIENCE AND TECHNOLOGY.  (3)  
Introduction to the science and technology associated with the brewing of beer. Topics will include the history of beer, varieties of beer, and production of beer. Within the discussions about the production of beer, the effect of raw materials, processing, microbiology, and storage on the taste and appearance of the beer will be studied. The class will also cover beer appreciation and sensory perception, which will complement the discussions of science and technology in the production of beer. Prereq: All students must be 21 by the first day of class. (Same as AEN 341.)

#TSM 370 FUNDAMENTALS OF OCCUPATIONAL SAFETY AND HEALTH.  (3)  
Basic principles of occupational safety and health that managers and technologists should know to operate knowledgeably and productively in a business environment. Topics will include the history of occupational safety and health, key laws and government agencies with an emphasis on the Occupational Safety and Health Administration (OSHA), accident/injury causation, safety behavior and psychology, hazard control, system safety, incident investigation, industrial hygiene, risk reduction, ergonomics, fire safety, hazardous materials, and the role of management at various levels. Although the class is not intended to create occupational safety and health professionals (specialists), it will provide important background should an employee of a small company be required to assume occupational safety and health responsibilities as part of larger job responsibilities.

TSM 461G BIOMETEOROLOGY.  (3)  
An introduction to the impact and relationship of the atmosphere on living organisms. Emphasis on the practical application of meteorology to everyday problems within the biosphere. Weather analysis, interpretation, psychrometrics of the atmosphere, and the impact of weather and climate on animals, plants and man are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Junior, Senior, or Graduate standing. (Same as AEN 461G.)

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>UKC 100-109</td>
<td>INQUIRY IN ARTS AND CREATIVITY</td>
<td>3</td>
<td>An inquiry-based, experimental course which may be used toward fulfillment of the arts and creativity requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 110-119</td>
<td>INQUIRY IN HUMANITIES (Subtitle required)</td>
<td>3</td>
<td>An inquiry-based, experimental course which may be used toward fulfillment of the humanities requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 120-129</td>
<td>INQUIRY IN NATURAL/PHYSICAL/MATHEMATICAL SCIENCES (Subtitle required)</td>
<td>3</td>
<td>An inquiry-based, experimental course which may be used toward fulfillment of the natural/physical/mathematical science requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 130-139</td>
<td>INQUIRY IN SOCIAL SCIENCES (Subtitle required)</td>
<td>3</td>
<td>An inquiry-based, experimental course which may be used toward fulfillment of the social science requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 140-149</td>
<td>COMPOSITION AND COMMUNICATION I (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the composition and communication requirement in the UK Core curriculum. All proposals must demonstrate that the course engages students in composing and communicating ideas using speech, writing, and visuals in an active learning environment. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 150-159</td>
<td>COMPOSITION AND COMMUNICATION II (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the composition and communication II requirement in the UK Core curriculum. All proposals must demonstrate that the course engages students in composing and communicating ideas using speech, writing, and visuals in an active learning environment. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 160-169</td>
<td>QUANTITATIVE FOUNDATIONS (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the quantitative foundations requirement in the UK Core curriculum. All proposals must demonstrate that the course has an applications-driven, problem-solving focus, with particular attention to problems of potential real-life relevance. Students should be actively engaged in modeling and problem-solving. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 170-179</td>
<td>STATISTICAL INFERENTIAL REASONING (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the statistical inferential reasoning requirement in the UK Core curriculum. All proposals must demonstrate that the course is focused on the student’s ability to evaluate the efficacy of claims based on statistical constructs and to understand and articulate important risks that these claims offer, using statistical reasoning and human inference. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 180-189</td>
<td>U.S. CITIZENSHIP, DIVERSITY, COMMUNITY (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the US citizenship, diversity and community requirement in the UK Core curriculum. Proposals must show the course provides a foundation for effective and responsible participation in a diverse society by preparing students to make informed choices in the complex or unpredictable cultural contexts that can arise in U.S. communities. Proposal must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 190-199</td>
<td>GLOBAL DYNAMICS (Subtitle required)</td>
<td>3</td>
<td>An experimental course which may be used toward fulfillment of the global dynamics requirement in the UK Core curriculum. Proposals must show how the course focuses on the student’s civic role and place in the world and the dynamic interaction between locale (place and people) and global processes (international and transnational). Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 200-209</td>
<td>INQUIRY IN ARTS AND CREATIVITY UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, inquiry-based, experimental course which may be used toward fulfillment of the arts and creativity requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 210-219</td>
<td>INQUIRY IN HUMANITIES UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, inquiry-based, experimental course which may be used toward fulfillment of the humanities requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 220-229</td>
<td>INQUIRY IN SOCIAL SCIENCES UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, inquiry-based, experimental course which may be used toward fulfillment of the social science requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 230-239</td>
<td>INQUIRY IN NATURAL/PHYSICAL/MATHEMATICAL SCIENCES UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, inquiry-based, experimental course which may be used toward fulfillment of the natural/physical/mathematical science requirement in the UK Core curriculum. All proposals must demonstrate that the course provides an environment for substantive, meaningful inquiry and must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 240-249</td>
<td>COMPOSITION AND COMMUNICATION I UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, experimental course which may be used toward fulfillment of the composition and communication I requirement in the UK Core curriculum. All proposals must demonstrate that the course engages students in composing and communicating ideas using speech, writing, and visuals in an active learning environment. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>

<td>UKC 250-259</td>
<td>COMPOSITION AND COMMUNICATION II UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division, experimental course which may be used toward fulfillment of the composition and communication II requirement in the UK Core curriculum. All proposals must demonstrate that the course engages students in composing and communicating ideas using speech, writing, and visuals in an active learning environment. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 260-269</td>
<td>QUANTITATIVE FOUNDATIONS UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division experimental course which may be used toward fulfillment of the quantitative foundations requirement in the UK Core curriculum. All proposals must demonstrate that the course has an applications-driven, problem-solving focus, with particular attention to problems of potential real-life relevance. Students should be actively engaged in modeling and problem-solving. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>
</tr>
<tr>
<td>UKC 270-279</td>
<td>STATISTICAL INFERENTIAL REASONING UPPER DIVISION (Subtitle required)</td>
<td>3</td>
<td>An upper-division experimental course which may be used toward fulfillment of the statistical inferential reasoning requirement in the UK Core curriculum. All proposals must demonstrate that the course is focused on the student’s ability to evaluate the efficacy of claims based on statistical constructs and to understand and articulate important risks that these claims offer, using statistical reasoning and human inference. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated to a maximum of 6 credits under a different subtitle.</td>

</table>
statistical constructs and to understand and articulate important risks that these claims often address, using statistical reasoning and human inference. Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated up to a maximum of 6 credits under a different subtitle.

UKC 380-389 U.S. CITIZENSHIP, DIVERSITY, COMMUNITY UPPER DIVISION (Subtitle required). (3)
An upper-division experimental course which may be used toward fulfillment of the US citizenship, diversity and community requirement in the UK Core curriculum. Proposals must show the course provides a foundation for effective and responsible participation in a diverse society by preparing students to make informed choices in the complex or unpredictable cultural contexts that can arise in U.S. communities. Proposal must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated up to a maximum of 6 credits under a different subtitle.

UKC 390-399 GLOBAL DYNAMICS UPPER DIVISION (Subtitle required). (3)
An upper-division experimental course which may be used toward fulfillment of the global dynamics requirement in the UK Core curriculum. Proposals must show how the course focuses on the student’s civic role and place in the world and the dynamic interaction between local (place and people) and global processes (international and transnational). Proposals must be approved by the Associate Provost for Undergraduate Education. Students may not repeat under the same subtitle. May be repeated up to a maximum of 6 credits under a different subtitle.

USP University Studies Program

USP 100-109 NATURAL SCIENCES (Subtitle required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

USP 110-119 SOCIAL SCIENCES (Subtitle required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

USP 120-149 HUMANITIES (Subtitle required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP Humanities requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

VS Veterinary Science

VS 307 GENETICS OF HORSES. (3)
This course covers the basic principles of genetics and genomics with specific applications to the horse including evolution, coat color genetics, hereditary diseases, cytogenetics, genetics of performance, population genetics of horse breeds and the genetic relationship among members of the order Perissodactyla. Prereq: BIO 148, BIO 152, CHE 107, CHE 113 or consent of instructor.

VS 350 INTRODUCTORY ANATOMY, PHYSIOLOGY, AND ANIMAL HYGIENE. (3)
A study of anatomy and physiology as related to courses in livestock production, judging, nutrition, meats and diseases, and introduction to the basic mechanism of animal disease and the relationship of animal hygiene.

VS 351 PRINCIPLES OF ANIMAL HYGIENE AND DISEASE CONTROL. (3)
A study of animal sanitation and disease control management. The course will acquaint students with the more important infectious, toxic, metabolic, and parasitic diseases of domestic animals and will emphasize preventive concepts.

VS 395 SPECIAL PROBLEMS IN VETERINARY SCIENCE. (1-4)
Prereq: VS 350, 351, and consent of instructor. May be repeated to a maximum of six credits.

VS 500 ADVANCED EQUINE REPRODUCTION. (3)
A study of reproductive anatomy and physiology of the horse with emphasis on normal and abnormal reproductive function in this species. Normal reproductive management and diseases affecting the reproductive system will be considered in detail. Prereq: ASC 364.

VS 597 SPECIAL TOPICS IN VETERINARY SCIENCE. (1-3)
Special topical or experimental courses in Veterinary Science for graduate and advanced undergraduate students. Special subtitle required and must be approved by the chair of Veterinary Science. Students may not repeat under the same subtitle. Prereq: Determined by instructor.

VS 600 ETHICS IN SCIENTIFIC RESEARCH. (1-2)
The course will commence with an overview of good laboratory practices and present them as the basis of good scientific research, along with an overview of quality assurance and appropriate practices in data analysis and data interpretation. The course will then move to the ethics of human and animal experimentation and discuss the concepts of data and intellectual property, their ownership and access to them. The problems of reviewing other workers’ intellectual property such as grant applications, research papers and other intellectual property will be addressed. Prereq: Research experiences; consent of instructor. (Same as TOX 600.)

VS 690 PRACTICAL ANALYTICAL TOXICOLOGY. (3)
An evaluation of techniques for the isolation, identification, and quantitation of drugs, pesticides and other toxicants in biological samples. Concepts and theory will be presented in the lecture portion, while the laboratory will be devoted to actual sample analysis by the students. Lecture, 1 hour; laboratory, six hours. Prereq: Consent of the instructor and graduate standing in toxicology. (Same as TOX 690.)

VS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

VS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769: residence credit following the successful completion of the qualifying exams.

VS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

VS 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
Residence credit while completing research and writing thesis. Prereq: Completion of course requirements for the MS. May be repeated to a maximum of 12 hours.

VS 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

VS 770 VETERINARY SCIENCE SEMINAR. (1)
Required of graduate students in veterinary science. May be repeated to a maximum of six credits. Prereq: Consent of staff.

VS 777 CURRENT LITERATURE IN EQUINE REPRODUCTION. (1)
Advanced study of current topics in equine reproduction. The course is comprised of student-led discussions based upon readings taken from current and classic literature in the discipline. Emphasis will be placed on the critical analysis and understanding of the experimental basis for current concepts in equine reproduction.

VS 781 CORRELATIVE PATHOLOGY. (1-3)
Supervised experience in the use of clinical, gross and histopathological techniques in the differential and definitive diagnosis of diseases. May be repeated to a maximum of nine credits. Prereq: Pathology in D.V.M. curriculum or equivalent and consent of staff.

VS 782 ADVANCED VIROLOGY. (3)
Current trends in virology. Typical topics include DNA tumor viruses, RNA tumor viruses, persistent virus infections, and interference. Emphases of molecular mechanisms. Prereq: BIO 582. Adequate biochemistry and genetics strongly recommended, or consent of instructor. (Same as BIO 782.)

VS 785 ADVANCED VETERINARY PARASITOLOGY. (3)
Experimental methodology and host-parasite relationships of the protozoan and helminth parasites of domestic animals. Prereq: Parasitology in D.V.M. curriculum or equivalent and approval of staff.

VS 786 ADVANCED VETERINARY PATHOLOGY. (3)
Advanced instruction in techniques and interpretations of pathology and pathologic anatomy. Emphasis will be upon evaluation of lesions for understanding the pathogenesis of disease processes in the living animal. Prereq: Pathology in D.V.M. curriculum or equivalent and approval of staff.

VS 791 TECHNIQUES IN VETERINARY MICROBIOLOGY. (1-9)
Independent research in veterinary microbiology. May be repeated to a maximum of 24 credits. Prereq: Consent of staff.

VS 792 TECHNIQUES IN GENERAL VETERINARY PATHOLOGY. (1-9)
Independent research in veterinary pathology. May be repeated to a maximum of 24 credits. Prereq: Consent of staff.
Course Descriptions

WRD 110 COMPOSITION AND COMMUNICATION I. (3)
Composition and Communication I is the introductory course in a two-course sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

WRD 111 COMPOSITION AND COMMUNICATION II. (3)
Composition and Communication II is the second of two general education courses focused on integrated oral, written, and visual communication skill development emphasizing critical inquiry and research. In this course, students will explore issues of public concern using rhetorical analysis, engage in deliberation over those issues, and ultimately propose solutions based on well-developed arguments. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and work effectively in groups (dyads and small groups). A significant component of the class will consist of learning to use visual and digital resources, first to enhance written and oral presentations and later to communicate mass mediated messages to various public audiences. Over the course of the semester, class members can expect to work independently, with a partner, and in a small group (team) to investigate, share findings, and compose and deliver presentations, as well as to practice and evaluate interpersonal and team dynamics in action. Prereq: CIS 110 or WRD 110.

WRD 112 ACCELERATED COMPOSITION AND COMMUNICATION II (WRD). (3)
WRD 112 is an accelerated version of the Composition & Communication II UK Core requirement. WRD 112 focuses on integrated oral, written, and visual communication skill development and emphasizes critical inquiry and research. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and use interpersonal skills to work effectively in groups. Prereq: AP English Composition score of 4 or 5, an ACT English score of 32 or higher, an SAT verbal score of 720 or higher, or acceptance into the University’s Honors Program.

WRD 130 INTRODUCTORY WORKSHOP (Subtitle required). (1-3)
Flexible course hours that supplement an existing course or provide introductory training in a particular area of writing, rhetoric, or digital studies. Repeatable up to 6 hours.

WRD 203 BUSINESS WRITING. (3)
Instruction and experience in writing for business, industry, and government. Emphasis on clarity, conciseness, and effectiveness in preparing letters, memos, and reports for specific audiences. Prereq: Completion of University Writing requirement or new general education Communications (6 hour) sequence. Prerequisites are a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

WRD 204 TECHNICAL WRITING. (3)
Instruction and experience in writing for science and technology. Emphasis on clarity, conciseness, and effectiveness in preparing letters, memos, and reports for specific audiences. Prereq: Completion of University Writing requirement. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

WRD 205 WRITING AND RHETORIC (Subtitle required). (3)
An open topics writing course focused on rhetorical analysis of issues of academic, political, social, or cultural significance. Students will interpret, analyze, and evaluate rhetorical strategies employed in print and digital texts. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 208 MULTIMEDIA WRITING. (3)
This course develops a practical understanding of writing and rhetoric through multimedia platforms and artifacts. Students will produce and publish to the web in a range of media such as digital video and photography, blogs, wikis, podcasts, and comics. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 210 SOCIAL MEDIA: THEORY, CULTURE, POLITICS, PRACTICE. (3)
The course examines how social media and the writing practices we employ influence notions of what it means to participate in community, society, and public discourse. Students will compose across different social media platforms and explore theoretical literature to examine the ways these tools are evolving. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 225 CRAFT WRITING. (3)
Instruction and practice in writing for the food and beverage industry. Emphasis on the history and culture of the craft beer industry and common practices in written and digital communication, argumentation and persuasion, narrative, and engagement with social media. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 300 INTRODUCTION TO WRITING, RHETORIC, AND DIGITAL STUDIES. (3)
This course introduces students to the theory of rhetoric and composition. Students may examine the theoretical, ethical, and stylistic issues connected to writing in various rhetorical situations, including digital environments. The course forms a theoretical foundation for all other WRD courses and is required for all WRD majors. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 301 STYLE FOR WRITERS. (3)
This course is designed for those who wish to improve their own writing style or the style of others. While the course may include some account of historical changes in prose style and require some stylistic analysis of literary texts, the emphasis is on editing contemporary prose, both in exercises and in the students’ own writing. Students will learn and practice principles such as economy, coordination, subordination, precision, parallelism, balance, coherence, rhythm, clarity, and grace. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

WRD 302 THE ESSAY. (3)
Intensive writing and reading in the genre of the essay. The course will explore the conventions of the essay and may analyze historical changes in the genre or survey well-known essayists such as Montaigne and Woolf. Students will write essays and analyze the stylistic choices of professional essayists in order to inform their own writing in the genre. Prereq: Completion of Composition and Communication requirement and consent of instructor.

WRD 304 WRITING IN THE SOCIAL SCIENCES. (3)
Instruction and practice with the major genres and argumentative structures of writing in the social sciences. Special emphasis on – and practice with – the written argument, that shape disciplinary knowledge in social scientific fields. Prereq: Completion of Composition and Communication requirement or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

WRD 305 WRITING PUBLIC SCIENCE. (3)
Instruction and practice with popular audience genres and arguments in and about science, intended for both science and non-science majors. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 306 INTRODUCTION TO PROFESSIONS IN WRITING. (3)
This course offers an introduction to and preparation for careers in the teaching of writing, professional writing, publishing, and editing. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 308 VISUAL RHETORIC. (3)
This course introduces visual rhetoric, covering its history, current practice, and possible futures. Utilizing the disciplinary tools of rhetoric, students will compose in textual and visual modes, learning a variety of methods with which to create and critique visuals. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 311 HISTORY OF THE DOCUMENTARY. (3)
This course is designed to trace the evolution of the documentary film. Although the emphasis will be on the development of the American documentary, students will also be looking into contributions from across the world. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 312 INTRODUCTION TO DOCUMENTARY. (3)
This course is dedicated to critical examination of approaches to the documentary, and the construction of a document of one’s own. Students will examine different strategies, structures, and topics, with an eye to production. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 320 RHETORICAL THEORY AND HISTORY. (3)
This course introduces students to the scholarly study of rhetoric by exploring the interrelationship of theory, criticism, and practice within a particular historical context. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 322 RHETORIC AND ARGUMENT. (3)
This course examines theories of rhetorical argument. Students read rhetorical theorists who speculate about what makes certain speech persuasive, as well as contemporary rhetoricians who are actually creating persuasive written and oral texts. Students use these theories to analyze and construct original arguments. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 324 WRITING CENTER PEER TUTORING. (3)
An undergraduate seminar that prepares qualified undergraduate students to become engaged and effective peer consultants in the UK Writing Center. Students in the course are actively involved in reading, writing, listening, observing, speaking, researching, and presenting as they become immersed in the theory and practice of Writing Center consulting. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 395 INDEPENDENT STUDY. (1-3)
For undergraduate majors in WRD with a standing of 3.0 in the major and permission of the Director of Undergraduate Studies. Each student pursues a course independently under the guidance of a faculty member and produces at least one major project. Prereq: Standing of 3.0 in the major and permission of the Director of Undergraduate Studies.

University of Kentucky
2016-2017 Undergraduate Bulletin
WRD 399 INTERNSHIP. (1-6) Internship in the community that brings together the student’s critical and practical knowledge of writing, rhetoric, or digital media. In addition to evaluation by the internship supervisor for the course grade, the students will produce a reflective research project that may be presented in an annual public research forum. Repeatable up to 6 hours. Prereq: Completion of Composition and Communication requirement and consent of Internship Supervisor.

*WRD 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3) Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature, cultural critique, and composing law and justice. Topics announced the preceding semester. May be repeated under different subtitles to a maximum of six credits. Does not fulfill ENG major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement and consent of instructor. (Same as ENG 401.)

WRD 402 AUTOBIOGRAPHICAL COMPOSITION (Subtitle required). (3) A special topics course which examines a particular medium of autobiographical composition (textual, digital, or performative) and/or the ways autobiographical composing is used in particular contexts or communities. Students study and produce autobiographical composition. Mode of composing (print, digital, performance, or a combination) is at the discretion of the instructor. Repeatable up to 6 hours under different subtitles. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 405 EDITING ENGLISH PROSE. (3) This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student’s own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and preparation of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Does not fulfill ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as ENG 405.)

WRD 406 TOPICS IN PROFESSIONAL WRITING (Subtitle required). (3) This course addresses contemporary genres of professional writing, including professional correspondence, reports, and social media most often found in business, technical, and scientific communities. The course also addresses the common tools and technologies of professional writing production and practice. Prereq: WRD 204 or WRD 306 or consent of instructor.

WRD 408 DIGITAL COMPOSING. (3) This course provides grounding in the analysis and theory of digital composition, which will inform personal, professional, or community-based projects. Projects will encourage students to work flexibly across various digital platforms. Prereq: WRD 308 or consent of instructor.

#WRD 410 RHETORIC AND POPULAR CULTURE (Subtitle required). (3) Special topics exploring rhetoric and popular culture, with a focus on the everyday persuasion and influence generated through films, music, television, social media, and other forms of public discourse. Repeatable up to 6 hours. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 412 INTERMEDIATE DOCUMENTARY PRODUCTION. (3) This course explores a range of documentary approaches and styles, after which workshop and production of students’ own documentaries will be emphasized. Students will focus on particular approaches and subjects to develop their individual signatures and styles. Prereq: Completion of WRD 312 or consent of the instructor.

WRD 420 RHETORICAL TRADITIONS (Subtitle required). (3) This course offers a detailed examination of the history and theory of a specific rhetorical tradition or group of traditions. Students will gain familiarity with key concepts and terms in a rhetorical tradition, compare and contrast culturally situated definitions of rhetoric, and better understand the way rhetorical historiography influences how rhetorical traditions are defined and taught. Repeatable up to 6 hours under different subtitles. Prereq: Completion of WRD 320 or consent of instructor.

WRD 422 PUBLIC ADVOCACY (Subtitle required). (3) This course examines the work that writing does in the world by connecting the study of persuasion in specific social movements, campaigns, and genres with opportunities for students to create texts and campaigns. This course may offer a historical or contemporary focus, and may examine local, regional, national, or transnational movements. Prereq: Completion of WRD 320 or WRD 322 or consent of the instructor.

WRD 425 ENVIRONMENTAL WRITING. (3) Students will consider the ways writers address environmental issues by exploring various forms of environmental writing, from personal narrative to literary nonfiction to advocacy. Prereq: Completion of Composition and Communication requirement or consent of instructor.

WRD 430 ADVANCED WORKSHOP (Subtitle required). (1-3) Flexible course hours that supplement an existing course or provide advanced training in a particular area of writing, rhetoric, or digital studies. Prereq: Completion of Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.
