

Test Zone Selection Procedure

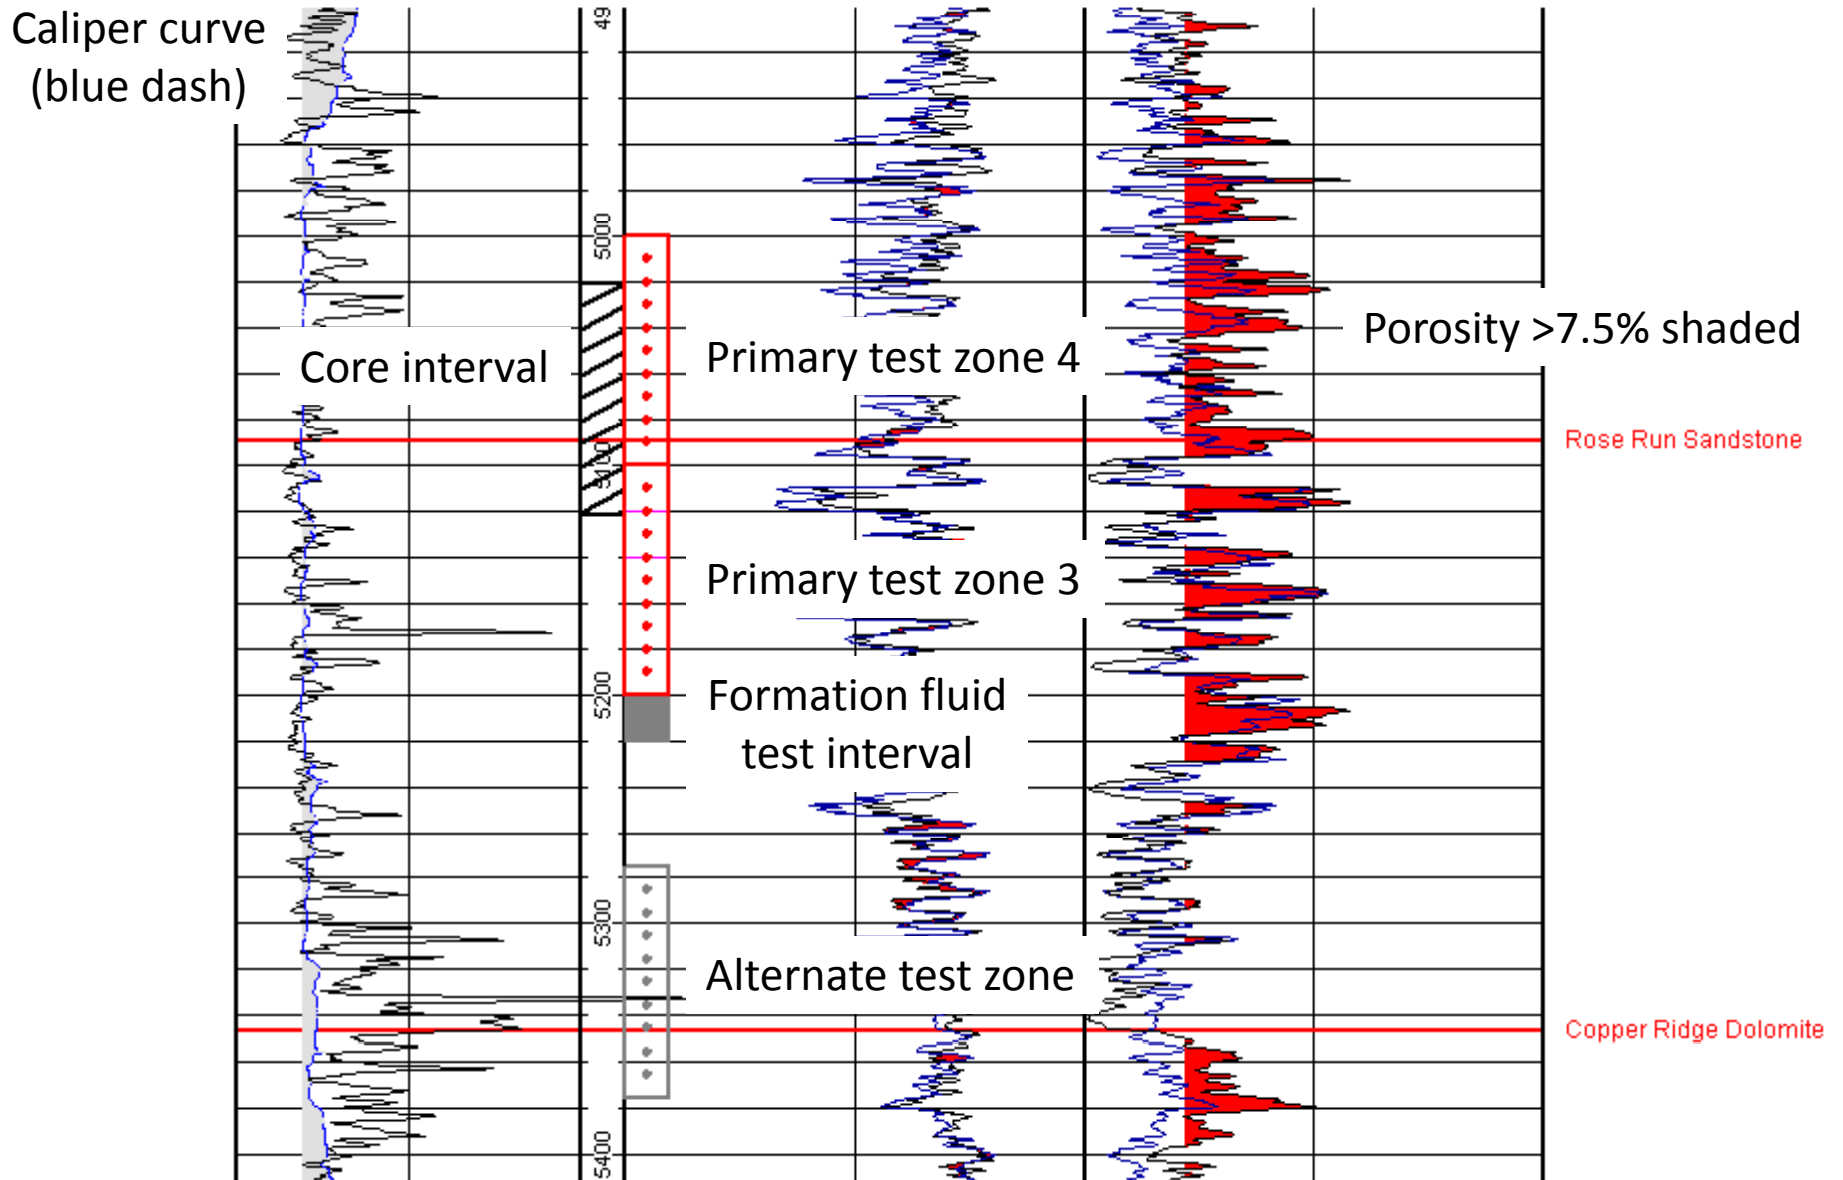

Rick Bowersox

July 21, 2009

Procedure

- 100 ft intervals
 - Alternates for each test interval
 - 300 ft lowest test zone in basal Copper Ridge fractured interval
- Indications of porosity on the electric logs
- Indications of porosity on imaging log
- Cored interval
- Little borehole rugosity
- Log characteristics that could be correlated to other areas

Test intervals 3-4

Imaging Log
