The purpose of this Addendum is to clarify further the requirements of the Plans and Specifications.

The Bidders shall be governed by the information in this Addendum as if included in the Plans and Specifications.

This Addendum does hereby become a part of the Contract Documents.

Each Bidder shall acknowledge receipt of this Addendum on the space provided in the Bid Form.

This A/E Addendum consists of two (2) pages.

A. Architectural

1. Refer to Written Questions included with Addendum 3. Replace and revise text in responses as follows for indicated Written Question #s:

46: Any steel exposed to occupant view as part of the completed structure shall be AESS. This includes the steel trellis/canopy framing, stair framing, any unwrapped steel columns, etcetera. Typical concealed floor beams and concealed columns are not to be AESS. Specification 051213-1.3-A. is revised elsewhere in the AE portion of this Addendum to clarify this and more explicitly identify some of the specific AESS components.

100: 084113 Basis-of-Design is EFCO 403T. Single source obligations are respective to each individual specification section. For example, “not multiple differing manufacturers for 084113”. 084113 and 084413 have different Basis-of-Design and products supplied are not required to be (but may be) the same
manufacturer provided all Basis-of-Design requirements are met or exceeded.

105: The basis of design is 7 3/8” depth and is the minimum. 7 ½” frame depth is acceptable. Contractor to coordinate any revised dimensions for proper alignment.

110: Refer to Architectural Addendum 3 revision to 12.7 mm (1/2”), tempered glazing is acceptable for baffle applications.

114: Refer to Sheet A0.10 Floor assembly and roof assembly for UL numbers associated with spray fireproofing. Detail 3/A6.3 specifies spray applied fireproofing at horizontal applications. The design does not specify intumescent fire coatings at horizontal decks. Detail 2/A6.4 should reference spray applied fireproofing at horizontal deck applications in lieu of intumescent. Beams in this detail shall remain intumescent.

118: Yes, refer to room finish groups. Finishes indicated refer to all surfaces within the space, unless noted otherwise, typical.

132: Refer to clarification below in Addendum 4.

134: Correct. Please note that only Elev B will have a back wall of tile. Elev A has a front and rear entrance. There is also CTW-6 base on all walls.

End of A/E Addendum
