

University of Kentucky Tobacco-free Initiative Implementation Guidelines for Compliance

Effective November 19, 2009, the University of Kentucky (UK) Tobacco Policy is changed to create a tobacco-free campus that encompasses the entire Lexington campus and all properties owned, operated, leased, or controlled by UK in Fayette County, Kentucky. These guidelines are intended to assist employees, students, and medical trainees (house staff) in the implementation of this change. The new policy states:

University of Kentucky Tobacco Policy, Administrative Regulations 6:5

For areas located within Fayette County, Kentucky, the use of all tobacco products is prohibited on all property that is owned, operated, leased, occupied, or controlled by the University, ...“Property” for purposes of this paragraph includes buildings and structures, grounds, parking structures, enclosed bridges and walkways, sidewalks, parking lots, and vehicles, as well as personal vehicles in these areas.

Violation of the Policy is defined as using **any** tobacco products, including e-cigarettes and other non-combustible tobacco products, within the prohibited areas.

Successful implementation of the Policy will engage everyone in creating a culture of compliance. Employees, student leaders, and medical trainees will be trained to provide clear, compassionate yet firm messages to communicate the policy.
