**Important: Warranty Disclaimer for Plans**

For the convenience of our clientele, this website makes available conceptual plans that can be helpful in planning buildings, facilities, or other structures. They were developed over many years by engineers at Land Grant universities through the former USDA Cooperative Farm Buildings Plan Exchange. *Regardless of the original intent, these are older plans that provide conceptual information only, and are not to be considered or used as construction plans.*

These plans do not claim to represent the most current technology or the most recent construction techniques, standards, or codes. For example, over the years there have been changes in the National Design Specifications for Wood Construction, changes in the strengths and types of building materials, and changes in fasteners, among other things. Those changes, along with variations in climate, building codes, and other factors, make it imperative that professional services be utilized for your specific project. Suggested services include, but are not limited to, structural design, assurance of compliance with codes and regulations, site selection, construction supervision, and provision for utilities, waste management, and access. *These plans do not replace the need for competent design assistance in developing safe, legal, and well-functioning agricultural buildings and systems.*

*Neither the University of Kentucky, the Midwest Plan Service, the United States Department of Agriculture, nor any of the cooperating Land Grant universities, warranty these plans. They are for conceptual use only and are not for use as construction plans.*
TWO STORY REMODELED STALL
DAIRY BARN

1. CONCRETE WALLS ARE POOR INSULATION KEEP TEMPERATURES LOW OR ADD INSULATION
2. VENTILATE WITH EXHAUST FANS
3. PROVIDE AIR INLET SLOT
4. PROVIDE END DOORS FOR TRACTOR CLEANING
   USE GUTTER CLEANER FOR SEMI-MANUAL CLEANING
5. GATES AND HEADSTOCKS MAY BE WOOD OR STEEL

ONE STORY INSULATED BARN

1. INSULATE 3½" IN WALLS, UP TO 6" IN CEILING
2. VENTILATE WITH EXHAUST FANS WITH OR WITHOUT AUXILIARY HEAT
3. INLETS MAY BE CEILING SLOTS OR PLASTIC TUBE POWER INLETS
4. HEAT WILL BE NEEDED FOR TEMPERATURES ABOVE 50°F IN WINTER
5. BARN MAY BE KEPT COLD WITH NO INSULATION
   USE OPEN EAVES AND RIDGE VENT, 4 IN 12 SLOPE
