Greetings from Lexington. It is has been an exciting year. The class of 2015 has recently completed their education and clinical responsibilities and several are employed and several are seeking to begin the next phase of their professional careers. They are ready, they are prepared, and better than anything they will be fantastic ambassadors of UK. Graduation is a time for personal validation and mindful appreciation. It is an opportunity to meet the parents of our students. It provides an opportunity for me to consider the reasons for my professional employment: To provide educational and clinical experiences for preparation of the next generation of AT professionals, To continue to challenge myself and our faculty to deliver the best educational experiences they are capable, To develop new knowledge through the scientific process, To mentor, cajole, lead by example and develop young professionals to be Loyal, Act with Integrity, and be Accountable. When you face a child's parents and see the pride in their eyes for sons and daughters who have earned a masters' degree with hard work, it reminds me that our work is significant and more meaningful than the best research project ever written. Teaching is an art and a science. We are lucky to have one of UK's GREAT Teachers in our program. Dr. Tim Uhl was awarded a UK Great Teacher Award. Special thanks to Jennifer Warner and Sharon Frank for nominating him for such a prestigious honor.

Dr. Lephart is an athletic trainer and he is Principal/Senior investigator leading Department of Defense Human Performance Research initiative. Dr. Lephart's research interests include musculoskeletal sports and military injury prevention and performance optimization.

Dr. Lephart has more than 25 years of experience in neuromuscular and biomechanical analysis of human movement associated with musculoskeletal injury, surgery, rehabilitation, and prevention. His research has resulted in more than 125 published papers and more than 250 national and international presentations. He has been invited to deliver 20 keynote lectures at professional events round the world.

Dr. Lephart is leading Department of Defense research grants to establish Warrior Human Performance Research Center installations to study injuries and performance of our most elite warriors. We are sad to see Dr.'s Jennifer and Alex Howard leave to become members of the faculty at Appalachian State University. Jennifer was my advisee as a masters' and doctoral student. Upon her return she created and developed the infrastructure and software to collect patient recorded outcomes in Sports Medicine. Her dissertation and the work that evolved has elevated the evidence we collect and synthesize for patients. It is evidence that allows us to provide better treatment and patient care. We wish them all the best as they continue in their successful career and personal journey. In addition, I will miss having dinner with my little buddies Nathanial and Brayden.

We welcomed a new Dean to the College of Health Sciences. Dr. Scott Lephart started in March 2015.

I look forward to catching up in St. Louis. Have a healthy and restful summer. Carl
This March marked the 18th anniversary of my arrival to the University of Kentucky campus. To say things have changed would be a HUGE understatement. Just a few bullet points to more clearly define the changes are listed below:

- Full-time staff ATC’s have increased from SIX (6) to TEN (10) as of the beginning of this fall.
- Graduate Assistant ATC’s have increased from FIVE (5) to TEN (10).
- Graduate Athletic Training Curriculum students have increased from FIVE (5) to TWENTY-TWO (22) counting on-campus and off-campus clinically assigned graduate students.
- Graduate Athletic Training Faculty have increased from TWO (2) to FOUR (4).
- Team Physicians have increased from TWO (2) to SIX (6).
- Fellows assisting the team physicians have increased from ONE (1) to FIVE (5).
- New Athletic Facilities/Venues have been built for Softball, Soccer, Basketball, Tennis, Golf and Track.....with further construction slated to begin for Football and Baseball.
- A second Commonwealth Stadium renovation is currently underway and can be viewed at the ukathletics.com website.
- Former FT assistants or GA’s are in Director’s positions at Arkansas, Alabama, Purdue, Florida, and Marshall.
- Former FT assistants or GA’s are in Head of Sport positions at Florida, North Carolina, Washington, Maryland, Kentucky, Penn State, Ohio State, Texas A & M, Fresno State, Utah, Arizona State, Kansas, Delaware, Louisville, Duke, and Colorado just to name a few in the just the Power-5 conferences.
- Former GA’s are in the NFL with the Chicago Bears and Miami Dolphins.
- And....probably a few more I am leaving out.

A special thanks to our Graduate Education Faculty.....especially the TWO OLD GUYS (Dr’s. Mattacola and Uhl) who have been here since the program’s inception....for educating the graduate students to be EXTREMELY competitive interview candidates, thus being responsible for our program’s placement success. Of course, we can’t leave out the students themselves for “buying in” and carrying the UK Banner with them as they represent this great institution.

A new Full-time staff addition includes Sean Stryker who replaces Ian McElhenney with baseball. Sean comes to us from the University of Delaware where he was a graduate assistant and an additional two years as the seasonal intern with the Major League Team Baltimore Orioles. Welcome to the family Sean!!!

Lastly, I encourage each of you to stay in contact with us regarding your professional growth. Carry the UK Banner with you and REPRESENT! We are proud of ALL of our graduates and former assistants for it is through you that UK Athletic Training has the name it does. **Go Big Blue!!**

---

**Wedding Bells…**

**Eric Yochem** married Amy Hambrick on May 22, 2015.

**Minda McCullough-Yray (2014)** and husband Darrick Yray were married on July 12, 2014 in Madera, CA.

**Julie Iannicelli (2014)** is engaged to John Burland.

**Carl Mattacola** married Kathleen Eastland on June 14th, 2014 in Lexington, KY.

**Tiffany Snyder (2013)** married Eric Haub on July 12, 2014 in Corydon, IN.

**Conrad Gabler** (PhD student) married Kaitlin Osborne on June 14, 2014.

**Angie McLendon** and husband welcomed Jaxson Abel on April 3rd, 2015: 9lbs, 14 oz and 20.25 in.

**Andrea Cripps** and husband welcomed Kacey Michelle Martin on March 23rd, 2015: 6lbs, 12.7 oz and 20 in.

**Kristie Law** and husband Chris are welcomed Johnny Law June 24th, 2014.

**Shawn Love** and wife Jacki welcomed Beckett Carolina Love on June 9th, 2014; 6lbs, 9oz and 18 inches. (Pictures on page 12 and 13)
Kyle Kosik, PhD student, received a research grant from Southeast Athletic Trainers’ Association for his work related to understanding the corticomotor excitability alterations associated with chronic ankle instability, using a novel “brain-mapping” analysis.

Caitlin Whale, PhD candidate, and Dr. Mattacola her advisor were awarded a Center for Clinical and Translational Science seed grant to support the investigation of “Post-Surgical Isometric Quadriceps Strength Outcome after a 12-week Neuromuscular Electrical Stimulation Treatment in Articular Cartilage Repair Patients”

Conrad Gabler, PhD candidate, and Dr. Mattacola his advisor were awarded a Center for Clinical and Translational Science seed grant to support the investigation on Electrical Stimulation for Quadriceps Neuromuscular Control Outcomes After ACL Repair.

Jennifer Howard, PhD, ATC, was a guest editor for the Journal of Sport Rehabilitation along with several colleagues from England and Australia.

Jordan Light, ATC had an article titled “Don’t forget to fuel young athletes with hydration and nutrition” published in the Lexington Herald-Leader.

Ariel Allman is from the University of South Florida and will be working at Asbury College.

Jed Crots is from the University of Toledo and will be working with UK Sports Medicine.

Sarah Eisnenhut is from Pennsylvania State University and will be working with UK Women’s Soccer/Men’s Tennis

Rachel Evans is from Central College and will be working with UK Sports Medicine.

Emma Gay is from Boston University and will be working at Scott County High School.

Dylan Koesling is from the Florida State University and will be working with UK Football.

Margaret Pelton is from the University of Wisconsin-Madison and will be working at Centre College.

Monica Soyk is from the University of Wisconsin–La Crosse and will be working with UK Sports Medicine

Gabriel Sombelon is from the University of Florida and will be working with UK Sports Medicine.

Xavier Thompson is from The Ohio State University and will be working with UK Track and Field.

Welcome! The Class of 2017:

Congrats to the Class of 2015!

Dr. Scott Lephart

Dr. Jennifer Howard and PhD candidate Caitlin Whale
WHERE ARE THEY NOW?
Class of 2004

Where are you living right now and what are you up to these days?

Michelle Boling: I currently live in Jacksonville, Florida. I am an Associate Professor and the Director of the Undergraduate Athletic Training Program at the University of North Florida.

Crystal (Pearson) Lanning: I live in my hometown of Hastings, MN and work at the University of Wisconsin-River Falls as the Associate Athletic Director/Senior Woman Administrator and Athletic Trainer.

Mario DiMattia: I currently live in Mentor Ohio (suburb of Cleveland) and I am working at Precision Orthopaedic Specialties Inc. located in Chardon Ohio. I have been there for almost 11 years and it is my first job out of grad school. We are a private company with six physicians that vary from orthopaedics and sports medicine to podiatry and physical medicine. I work as a physician extender in the office and get contracted out to West Geauga High School (Chesterland, Ohio) where I cover their sports team. I recently took over the Durable Medical Equipment and Purchasing position at the beginning of the year, so I am in charge of fitting and ordering all DME and custom braces.

Jennifer Tymkew: I live in Evanston, IL and work at Northwestern University as the staff athletic trainer for women’s basketball and women’s golf.

Stacy Downar: I live in Wilmington, NC. I’m the Associate Athletic Trainer at UNC Wilmington and work with the women’s soccer team. I also teach in the Department of Health and Applied Human Sciences.

John Kelly: We live in Mechanicsville, VA outside of Richmond. My wife and I own a health, life, & medicare insurance business.

Eugene “Chico” Dupas: I currently live in Knoxville, TN and have been in TN since I graduated. I currently teach part-time at Carson-Newman, which includes a graduate level course for a teaching degree which focuses on injury prevention and acute care. I am also involved in real-estate and property management. Actively looking to get back into AT full-time, but it has to be an opportunity that allows me to keep my family a priority.

Tell me about how your time as an Athletic Trainer at UK has prepared you for your future.

Boling: There probably is not a day that goes by that I do not think about my time as a graduate student at UK. I could not have asked for better mentors in Dr. Mattacola, Dr. Uhl, Jim Madaleno and Keith Webster. I definitely would not be the person I am today without their guidance as a graduate student. I have had a handful of students attend UK for graduate school and I am sure that these students would say they see a lot of UK in the way I teach and mentor my students.

Lanning: Working at Centre College, I gained a lot of valuable hand-on experience. I was the lead athletic trainer for multiple sports and that experience definitely prepared me to work professionally at the Division III level.

DiMattia: I learned a lot from the professors at UK, not only the technical aspect of athletic training but also the “between the lines” stuff like time management, dealing with other professionals that you come into contact with, and always being educated on the most current topics.
Tymkew: UK helped me become a humble yet driven athletic trainer. My 2 years taught me to constantly strive for information and look for new ways of doing things. My patient care improved as my confidence in my skill set and knowledge increased. I am forever grateful for the UK internal voice that continues to ask “why?”

Downar: Loyalty and accountability are the two big points that will always stay with me. I definitely left feeling more prepared as a clinician. I also feel my critical thinking skills improved, and I gained better understanding of reading/performing/applying research.

Kelly: It taught me a lot about life. How to deal with people, take yourself out of the equation, and manage your time. The lessons learned from both the training room and academic side can be used in anything you do in life.

Dupas: The primary way UK prepared me is it turned me into a professional. The primary way it turned me into a professional is that my experience there taught me how to be successful at any job regardless of previous training. During my time there I learned how to research and tap into resources that were available to me. I feel very confident that I can excel at any job if you allow me time to research it and give me an opportunity to tap into relevant resources and people. The best example is that several years ago I was offered the Athletic Training Education Program Director position. I had no previous experience in this area but with research and consultation, I was able to transform the program into a quality and respected program on campus and obtain reaccreditation. I accredit my success with this venture and many others to Kentucky preparing me on how to be a successful professional.

What are some of your favorite memories of being at UK?

Boling: Wow…I have a lot of great memories from my time at UK! Some of my favorite memories include the Don Ho Christmas parties, football tailgates, and all my days in Shively.

Lanning: Classmate birthday parties, playing dominos, Don Ho parties

DiMattia: I have wonderful memories of my time in Lexington. Graduate school was tough, but the people I met and my fellow classmates are awesome, and made it very enjoyable! Just hanging out with my classmates are the best memories, whether it was out at a bar, or just over someone’s apartment/condo.

Tymkew: Anatomy lab (long days and even longer nights), Don Ho parties, thesis work with Cale Jacobs, spending class time and free time with my classmates.

Downar: Great times with my classmates! Cookouts and birthday parties on Big Bear, learning how to tailgate properly, Pazzo’s Pizza nights, Don Ho, summer gross anatomy class, and turning in my thesis.

Kelly: All the great times I had with my fellow GAs, colleagues, and friends both in the training room, classroom, and out-and-about in Lexington. I really enjoyed experiencing SEC football Stadiums, Rupp Arena, Keeneland, & the Derby.

Dupas: There are so many, but to narrow it down was the family I made there. My classmates became my family. While we don’t talk much, when we do, it is just like we were still in school.

What is your family life like now? What hobbies are you involved with these days?

Boling: I am married and have two step-sons and just had one of my own. My son, Cameron, was born in September 2014. My husband and I enjoy traveling with our family any chance we get and spending time at the beach in Amelia Island.

Lanning: My husband Shane and I have been married for 10 years and we have a 7 year old daughter, Addison, and a 5 year old son, Marshall. I started a side cake decorating business a couple years ago and enjoy working on cakes in my “spare time”.

DiMattia: I am recently engaged to my Fiancé Chelsea Tuckey. She is a physical therapy assistant for the company I work at. We are getting married in summer of 2016. We have a dog named Riley who is full of energy and keeps us active! I enjoy hiking and biking and just hanging out with Chelsea and Riley. I also
Kelly: I have been married for almost 8 years to my beautiful wife Andrea. We enjoy spending time with our dog Tavish.

Dupas: I have been married for almost ten years and have a 5 year old son and 3 year old daughter. I spend most of my time with my family and church related activities. Also invest lot of quality time with friends doing various activities.

What advice do you have for incoming and current athletic trainers at UK?

Boling: The best advice I can give is to not let an opportunity pass you by that you could learn something. The professors, clinical staff, physicians, and Misty :) are some of the best people you will meet in life and you can learn a lot from each of them. Your time in graduate school goes by very fast, so make the most of it!

Lanning: The UK athletic training program has the best of the best; learn as much as you can from your classmates, professors, and clinical staff.

DiMattia: Be prepared to work hard, but also take the time to enjoy what Lexington has to offer! Take the time to get to know everyone that you can and do all that you can do, because your time at UK is short! The people working with you (professors and other students) are all amazing people who have a lot to offer!

Tymkew: Soak up as much class time, clinical time, lab time, and fun time as possible. Never be afraid to ask a question. Keep your notes (you’d be surprised how many times I’ve gone back to them trying to remember what Mattacola or Uhl said)

Downar: It’s not supposed to be easy. Soak up every bit of information and experience now. It will be over before you know it, and you won’t get another opportunity like this again. Work hard, have fun, and take lots of pictures!

Kelly: My advice is to be like a sponge and soak up everything you can while you’re there both in regards to athletic training and more importantly to life because the life lessons and experiences you learn there can help you in whatever you do.

Dupas: Trust the program!!! They will do everything they can to prepare you for your goals. If you trust them and do what they say, you will be rewarded. The process is a grind and it is a marathon. Just be sure that you keep running and don’t stop before the race is over.

THANK YOU CLASS OF 2004!
Congratulations to our Doctoral Graduate!

Enrique Smith-Forbes:

Welcome to the most recent staff athletic trainers!

Katy Poole, Sean Stryker, Taylor Eavenson, and Lydia Johnson have recently joined UK as staff athletic trainers!

What sport(s) do you currently work at UK?

Taylor: Football and I oversee Men’s/Women’s Tennis and Cheerleading
Sean: I currently work with UK Baseball.
Katy: Volleyball, Women’s Golf, and oversee Gymnastics.
Lydia: Cross country and track and field.

Where are you from and what are your previous work experiences?

Taylor: I’m from West Virginia, went to undergrad at West Virginia University, received my masters at Louisiana State University, and this is my first job.
Sean: Prior to joining the staff at UK I worked the 2013 and 2014 seasons with the Baltimore Orioles. I also worked two years as a graduate assistant with baseball at the University of Delaware.
Katy: From State College, PA, went to undergrad at Penn State and grad school at UK. I worked a variety of sports and camps while at Penn State before coming to UK to work volleyball and Women’s Golf as a GA. Also did an internship with the Pittsburgh Pirates in their minor league.
Lydia: I’m from the mountains of Asheville, NC. I previously worked as a GA for track and field then moved into the full-time position after I completed my master’s degree.

What are your favorite things about the University of Kentucky and Lexington?

Taylor: I love the family atmosphere amongst the staff! Lexington is a fun town with lots to see and do!
Sean: My favorite thing about UK is working in the best baseball conference in the country. Outside of work I enjoy golfing, biking, and going on hikes.
Katy: My favorite thing about Lexington is that it’s a college town with hints of a city. Working at UK has allowed me to be a part of an athletic department that always strives to be better. Most of all, it has given me the opportunity to work for Jim who is the best in the business.
Lydia: I love the family feel that the athletic training department has and I like working for Jim. Lexington is awesome because I can drive about 10 minutes in any direction and drop a hook in some water.

Q&A with Dr. Scott Lephart

Dr. Scott Lephart joined the University of Kentucky College of Health Sciences as Dean on March 1, 2015. He also serves as a professor and as Endowed Chair of Orthopaedic Research for UK.

Scott Lephart, PhD, ATC completed his undergraduate degree at Marietta College (Marietta, OH) and both his master’s and doctoral degrees in Sports Medicine at the University of Virginia.

Dr. Lephart served formerly as a Distinguished Professor and Chair of the Department of Sports Medicine and Nutrition and as the founding Director of the Neuromuscular Research Laboratory at the University of Pittsburgh. Dr. Lephart is the Principal/Senior investigator leading Department of Defense Human Performance Research initiative. Dr. Lephart’s research interests include musculoskeletal sports and military injury prevention and performance optimization.

Q: What impressed you most about UK and CHS?
A: I was impressed by the sense of pride in this institution – unlike any that I had experienced. I found the enthusiasm and pride for the Commonwealth’s flagship University to be palpable. During my first interview, I took a two-hour walk around campus to observe and interact with students, who I believe are the fabric of any university. Their pride and optimism confirmed my belief that this was an environment where I wanted to be, and where I could contribute to the momentum. During my interviews, I found a similar enthusiasm displayed by University leadership and the CHS faculty and staff.

Q: What do you want potential or current CHS students to know about the College?
A: CHS is an exciting environment for future health care professionals. In fact, we will be referring to many of our programs as the “Gateway to the Health Professions.” We will balance our mission of teaching, research and service to enable our students to optimize their experience by participating in all aspect of these educational endeavors. As our research enterprise expands, I foresee our students playing integral roles in the discovery and translation of new information to enhance the delivery of health care. I am particularly excited about our newly approved Undergraduate Research Certificate, which will be available starting early this summer. I hope our students take full advantage of working side-by-side with our world-class research faculty in innovative laboratories, centers and institutes with cutting-edge facilities.

Q: What are your interests outside of your career?
A: I am a sports enthusiast, both as a participant and fan. Until about 10 years ago, I was a competitive amateur golfer. I hope to return to that on some level once settled in Lexington – of course now on the senior circuit!
Honors & Awards

Dr. Uhl Received UK’s Great Teacher Award

Dr. Uhl was one of six teachers at UK to receive the Great Teacher Award for 2015. The Great Teacher Award, started in 1961, is UK’s longest-running award recognizing teaching. Educators must first be nominated by a student, then the UK Alumni Association Great Teacher Award Committee makes the final decisions.

Jenna Kennedy wins Bill Knightley Assist Award

Jenna Kennedy, MS, ATC wins Bill Knightley Assist Award at the Wildcat Athletic Awards CATSPYs.

Tom Reed receives President’s Award at Arizona Athletic Training Association

Tom was instrumental in securing a grant from the NFL and the Arizona Cardinals to help improve athletic training services for high schools in the state that normally would not have athletic training services.

Position Changes

Jennifer and Alex Howard
Alex Howard has accepted a position at Appalachian State University in North Carolina as the Director of Wellness and Preventative Services. He will also be serving as a faculty member in the College of Health Sciences. While at the University of Kentucky, Alex served as the Clinical Assistant Professor in the Department of Health Behavior. He also served as the Director of Practice and Service along with the Director of Undergraduate Studies in Public Health. Jennifer has accepted a position at Appalachian State University as the Clinical Assistant Professor in the Department of Health and Exercise Science. She will primarily serve in the area of Athletic Training. While at the University of Kentucky, Jennifer served as the Assistant Research Professor in the Department of Orthopaedics and Sports Medicine in the College of Medicine. She also instructed students in the Division of Athletic Training and Rehabilitation Sciences Doctoral Programs.

Lindsey and Adam Lepley
Lindsey has accepted a position at the University of Connecticut as an Assistant Professor in the Department of Kinesiology. While at the University of Kentucky, Lindsey served as a postdoctoral fellow in the Department of Rehabilitation Sciences, working directly with Dr. Timothy Butterfield. Adam has also accepted a position at the University of Connecticut as an Assistant Professor in Residence in the Department of Kinesiology.
