How Health Care Performance Changed in Kentucky^b

- Indicators That Improved
- Indicators That Worsened
- Indicators with Little or No Change

How Kentucky Compares to All States

The Best and Worst in Kentucky

Best Performance

- Potentially avoidable emergency department visits ages 18–64
- Preventable hospitalizations ages 18–64
- Children who did not receive needed mental health care

Improved the Most

- Preventable hospitalizations ages 18–64
- Hospital 30-day readmission rate ages 18–64
- Children who did not receive needed mental health care

Worst Performance

- Adults who report fair or poor health
- Adults who have lost six or more teeth
- Adults without a dental visit

Worsened the Most

- Premature deaths from preventable causes
- Drug overdose deaths
- Central line-associated blood stream infection (CLABSI)

Notes

(a) The 2023 Scorecard rankings generally reflect 2021 data. The 2023 Scorecard added or revised several performance measures, including the addition of 12 measures specifically related to reproductive care and women’s health and the removal of most measures around state COVID-19 response, since the June 2022 Scorecard report; rankings are not comparable between reports.

(b) Trend data available for 50 of 58 total Scorecard indicators. Improved/worsened denotes a change of at least one-half (0.5) standard deviation larger than the indicator’s distribution among all states over the two time points. No change denotes no change in rate or a change of less than one-half standard deviation.

(c) Rates are for state’s low-income population, generally those whose household income is less than 200% of the federal poverty level (FPL).

(d) Income disparity is the difference between the state’s low-income and higher-income (generally 400%+ FPL) populations.

(e) Improvement indicates that the low-income rate improved and the disparity between low- and higher-income populations narrowed; worsening indicates that the low-income rate worsened and the disparity between low- and higher-income populations widened.

(f) Performance data not available for all groups in every state.

(g) State not ranked on health system performance for white people in this report; included for comparative purposes.

“—” means data not available.
