

RUNNERS NEEDED FOR RESEARCH STUDY

Are you a recreational or competitive runner? Have you been recently diagnosed with a lower extremity stress fracture? Researchers at the University of Kentucky College of Health Sciences are inviting you to participate in a study that monitors how you recover following a stress fracture. This study involves 5 research visits in the BioMotion Lab at the University of Kentucky with each visit lasting up to 2 hours. Research visits will involve questionnaires, muscle strength assessments, and 3D running gait analyses. Participants will be compensated \$50 upon completion of the study.

You may be eligible to participate if you:

- Are between ages 14-50 years
- Run at least 10 miles per week (prior to injury)
- Diagnosed with a lower extremity stress fracture
 - Sacrum, pelvis, femur, tibia, foot
