

LEAN ERGONOMICS: IT'S AN EFFICIENCY ISSUE!

Steve Davis and Luther Cottrell
Central Appalachian Regional ERC

April 22, 2020 | 12 - 1 PM Pacific | 3 - 4 PM Eastern

Register: coeh.berkeley.edu/20ew0422

About the Webinar:

This webinar will review a brief history of the Toyota Production System, the foundation for the University of Kentucky, True Lean Program. Learners will also explore the core tenants of True Lean, and how to systematically merge the four categories of risk factors to create measurable process improvement.

Objectives:

At the completion of this activity, the learner will be able to:

- Describe the Toyota Production System and how they became True Lean
- Recognize current drivers for good ergonomics and critical effects of an aging workforce
- Identify four foundation tenets of lean and how they translate to efficiency and good ergonomics
- Describe how ergonomic risk factors are not addressed separately, but as part of the lean continuous improvement process

Speaker Biographies:

Steve Davis, Ergonomics Practitioner, and Luther Cottrell, Lean Practitioner, University of Kentucky College of Engineering, True Lean Program.
