

2002 Garden Flower Trials

Results of Annual Flower Evaluations by Kentucky Master Gardeners

Robert G. Anderson, Extension Floriculture Specialist and Master Gardeners from McCracken, Warren, Hardin, Pulaski, Jefferson, Fayette, Boone and Campbell Counties

Annual and perennial garden flowers have been evaluated for many years at the University of Kentucky. Trials have occurred at the University of Kentucky Arboretum since 1993. These trials were expanded at the Horticulture Research Farm in 1999 and 2000 with grants from the Kentucky Department of Agriculture, the Kentuckiana Greenhouse Association and the USDA New Crop Opportunities Center.

Demonstration gardens have been established at eight locations across the state. We wish to thank the Extension agents and Master Gardeners at these garden locations for planting, maintaining and evaluating the annual flowers in these trials.

- Purchase Area Master Gardener Garden, Paducah
- UK West Kentucky Research and Education Center, Princeton
- Warren Co. Master Gardener Garden, Bowling Green
- Hardin Co. Master Gardener Garden, Elizabethtown
- Louisville Zoo, Louisville
- UK Arboretum, Lexington
- Boone Co. Master Gardener Garden, Burlington
- Campbell Co. Master Gardener Garden, Highland Heights
- Pulaski Co. Master Gardener Garden, Somerset

Please take some time next year to visit these trial and demonstration gardens:

Selected annual flowers were grown in Lexington and distributed to the demonstration gardens in May. The Master Gardeners and Extension agents planted the flowers in their trial garden and evaluated them four times during the summer (mid July, early August, late August, mid September). All gardens were mulched with wood chip mulch; drip irrigation was used throughout the summer and plants were fertilized during the summer. Plant performance was evaluated on a 1 to 5 scale with 1 = poor and 5 = excellent. The evaluation was based only on the individual gardener's determination of the quality of the plants. Although personal tastes are reflected in individual evaluations, the overall evaluation was accurate for the plant performance in each garden. The demonstration gardens seem to be a good educational activity for the Master Garden educational program. It is the goal of this program to allow Master Gardeners to see new flowers and compare them to the reliable annual flowers seen in Kentucky gardens.

Photos and details about plant performance are continually added to the Kentucky Garden Flowers web site:
