

**University of Kentucky – Med Center  
Custodial Master Plan  
PART B**

**Last Updated: September 13, 2012**

## OVERVIEW

Core Management Services has been selected as a strategic partner by the University of Kentucky Med Center custodial organization.

The strategic role of Core Management Services is to design and implement a program to increase the effectiveness of the housekeeping organization throughout the campus.

This Master Plan represents the program designed specifically for the University of Kentucky Med Center custodial organization.

It began with the standard Core Management design plan, which is based on professional production rates, standardized cleaning procedures, continuous improvement techniques and work-place ergonomics. The standard Core Management design plan also includes the best features of both area cleaning and team cleaning methodologies. Most importantly, it redirects cleaning efforts from “general” areas – non-critical areas with less than daily cleaning needs, to “primary” areas – critical areas in need of full daily cleaning, to maximize department resources.

This particular Master Plan has evolved into its current version as the academic needs of the University of Kentucky have been identified and addressed.

## PART A

*Section 1* contains a set of specifications designed to standardize the processes throughout the campus while meeting the specific needs of each area.

*Section 2* contains daily, interim and restorative professional cleaning procedures designed to standardize techniques, enhance productivity and increase safety awareness.

*Section 3* includes a quality audit sample. It is included in the Master Plan to set a consistent expectation level and to provide a tool for future continuous improvement.

## PART B

*Part B* outlines the Med Center organizational structure as it relates to the new program design. It is intended to develop an awareness of the overall structure and to demonstrate equity among the job assignments. It also includes a detailing of the individual job assignments within the Med Center organization. It includes important information about when, where and how to fulfill the requirements of the various assignments.

This Master Plan is by no means the “final” version. It is hoped that everyone involved will work to make it a continuously improving document.

# Med Center – General Position Description for Custodial and Utility Workers

The Custodial and Utility Workers provide cleaning services and trash collection and works as a team with the Med Center custodial organization to provide a total cleaning package in assigned areas. Utility Workers focus more on floor care. Cleanable areas are grouped as follows:

## 1. Fully Cleaned Every Day

The Custodial or Utility Worker delivers a full range of daily cleaning services (including trash collection) in the following areas: entrances, lobbies, elevators, dining, restrooms, locker rooms, conference/admin areas, parking garages, laundry rooms and medical areas. Immediate exterior areas are also given daily attention. These areas are listed in the **“Areas to Receive Full Cleaning Daily”** section of each individual cleaning assignment sheet.

## 2. Reduced Daily Cleaning Combined with Cycle Cleaning

The following areas receive some daily services (such as trash removal and spot cleaning of the floors) but they receive detail cleaning on a cycled, weekly basis: Corridors, Break/Kitchenettes, Lounges, Library Areas, Classrooms, “Daily” Labs, Fitness Areas, Auditoriums and Computer Rooms. Stairwells are policed daily and fully cleaned every other week. The daily cleaning duties for these areas are listed in the **“Areas to Receive Reduced Daily Cleaning & Cycle Cleaning”** section of each individual cleaning assignment sheet, while the cycled cleaning duties are listed under **“Cycle Cleaning Schedule, Full Clean.”**

## 3. Cycle Cleaning

Offices are cleaned once per week and are only included in the **“Cycle Cleaning Schedule, Full Clean”** section of each individual cleaning assignment sheet. Labs receive trash removal three days per week and floor dust mopping and damp mopping weekly. Low-use areas such as storage, housekeeping and mechanical rooms will be cleaned intermittently.

The Custodial and Utility Workers provide interim and restorative project work during appropriate times throughout the year. Additionally, the Custodial and Utility Workers will remove snow and ice as directed by the Supervisor and if needed, help to respond to emergencies/work orders and support vacant service runs.

**Summary:** The individual cleaning assignment sheets found within Part B of the Master Plan are to be used as a helpful reminder. However, the Custodial and Utility Workers are responsible for cleaning each area type according to the detailed Cleaning Specification (tasks and frequencies) found in Part A of the Master Plan and will be held accountable to that specification.

<b>Service Position:</b> <b>Team 4, Position 4-12</b>	Project Floater - Full-time <b>All Team 4 Buildings (Project Floater)</b>
Shift:	7:00 a.m. – 3:30 p.m. Monday - Friday
Service Area:	All Team 4 Buildings

<b>Position Description:</b>	<p>The Floater primarily provides absentee replacement cleaning duties in any building or run that the Team 4 Supervisor wishes to send him or her. When covering for an absent co-worker, the Floater performs cleaning services and trash collection and works as a team with other Custodial, Utility and Grounds Workers to provide a total cleaning package in assigned areas.</p> <p>This service provider’s cleaning assignment will vary depending on the run that he or she is covering. The Floater refers to the Individual Assignment of the absent coworker to understand what duties are to be performed on a given day. When not being substituted for absent coworkers, this service provider renders interim and restorative cleaning assistance and also performs event-related duties, such as set-ups and tear-downs.</p>
