UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

**Curriculum Policies**

Students are expected to be familiar with the requirements for the degree of Bachelor of Science in Nursing and to confer with advisors in the College of Nursing when selecting courses. Since the health needs of the nation are constantly changing, an effective curriculum requires continuous review and evaluation, which may necessitate revision of courses and requirements. Thus, there can be no guarantee that course content will be identical in each subsequent academic year. Furthermore, to continue to meet the changing emphasis in nursing education, some courses will require educational experiences for students in community facilities outside of Lexington.

---

**ACCELERATED BACHELOR OF SCIENCE IN NURSING**

**Prerequisites for A.B.S.N. Degree**

The admission requirements/prerequisites include:

- Completion of all UK Core; 2nd degree students meet this requirement by virtue of the first degree
- Foreign Language Requirement – 2 years in high school or one year in college of same language

**College Requirements**

**Graduation Composition and Communication Requirement (GCCR)**

- NUR 321 Introduction to Health Promotion for ABSN Students 2
- NUR 328 Research for Evidenced Based Nursing Practice for the ABSN Track 3
- NUR 426 Synthesis of Clinical Nursing Knowledge for the ABSN Track 3-5

**College Requirements**

- BIO 208 Microbiology (required prior to first semester) 3
- DHN 212 Introductory Nutrition (taken in first semester) 3
- STA 210 Making Sense of Uncertainty: An Introduction to Statistical Reasoning 3
- BST 230 Statistical Thinking in Public Health 3
- STP 080 Statistical Methods and Motivations 3

**Graduation Composition and Communication Requirement hours (GCCR)** 8-10

**Major Requirements**

- NUR 320 Transition to Baccalaureate Nursing for Students in the ABSN Track 2
- NUR 322 Transition from LPN to BSN for LPN Students in the ABSN Track 3
- NUR 321 Introduction to Health Promotion for ABSN Students 2
- NUR 323 Introduction to Health Assessment for ABSN Students 3
- NUR 324 Fundamentals of Adult Nursing Care for ABSN Track 3-5
- NUR 325 Fundamental Pathopharmacology for ABSN Track 2

Graduate Study

The Doctor of Nursing Practice (D.N.P.) program is a professional clinical doctorate program which focuses on development of advanced competencies for complex practice, and research utilization for the improvement of clinical care delivery, patient outcomes, and system management. Graduates will be expert in designing, implementing, managing, and evaluating health care delivery systems and will be prepared to lead at the highest clinical and executive ranks.

There are two entry points to the D.N.P. program: the post-Master’s of Science in Nursing (M.S.N.) entry option for those with an awarded master’s degree in nursing that are already prepared in the role of an advanced practice nurse; and the post-Baccalaurate of Science in Nursing (B.S.N.) entry option. This option builds on the B.S.N. degree and prepares individuals for an APRN role. Both options culminate with the D.N.P. degree.

Application Deadline

Application materials are due by January 15 for fall admission. Applications received after this date will be considered if space is available. For additional requirements for application, including the application forms, go to www.uky.edu/nursing/.

Post M.S.N. - D.N.P. in Nursing

Graduates of the post-M.S.N. -D.N.P. option are expected to be experts in designing, implementing, managing and evaluating healthcare delivery systems. Simultaneously, they will know how to manage the complex balance between quality of care, access and fiscal responsibilities. Individuals have the option of a Clinical Leadership focus or an Executive Leadership option.

Admission Criteria

- Graduate grade-point average of 3.3 on a 4.0 grading scale
- Master’s degree in nursing from a nationally accredited program
- Goal Statement: In one to three double-spaced pages, discuss your reasons for seeking doctoral study, including your short- and long-term professional goals. Discuss a system or population you are interested in working with and identify/discuss a system or health problem in that population that you wish to study as a practice inquiry project.
- An example of scholarly written work, completed within two years of application, related to nursing that demonstrates excellent writing skills and the ability to communicate clearly and logically. Samples of scholarly work: formal research paper written in M.S.N. program; published article on a nursing issue; or paper written on nursing issue of interest to applicant
- Three references attesting to the applicants’ expertise in nursing or health care. Faculty prefer professional references from nursing faculty advisor if available or a nursing faculty member who knows the applicant, one from a doctorally prepared Registered Nurse, and no more than one from peer.
- Unencumbered licensure to practice in Kentucky or in the state in which clinicals will occur (prerequisite to clinical experience)
- Interview(s) with D.N.P. faculty
- A minimum of 460 clinical practice hours from a formal graduate program and certification as applicable. (Applicants who cannot demonstrate a minimum of 460 clinical clock hours of practice will be expected to complete clinical course work beyond the proposed curriculum.)
- Current vita

NOTE: EPE 557/STA 569/STA 570 required for admission.
Admission Criteria

• Undergraduate grade-point average of 3.3 on a 4.0 grading scale

• Three references (forms provided) attesting to the applicants’ expertise in nursing or health care. Faculty prefer professional references from nursing faculty advisor if available or a nursing faculty member who knows the applicant, one from a doctorally prepared Registered Nurse, and no more than one from peer.

• Personal interview(s)

• Unencumbered licensure as a registered nurse in the state in which clinicals will occur (prerequisite to clinical experience)

• Clinical nursing experience prior to the first D.N.P. clinical course

• Goal Statement: In one to three double-spaced pages, discuss your reasons for seeking doctoral study, including your short- and long-term professional goals. Discuss a system or population you are interested in working with and identify/discuss a system or health problem in that population that you wish to study as a practice inquiry project.

• An example of scholarly written work, completed within two years of application, related to nursing that demonstrates excellent writing skills and the ability to communicate clearly and logically. Samples of scholarly work: formal research paper written in B.S.N. program; published article on a nursing issue; or paper written on nursing issue of interest to applicant.

• Current vita.

Admission to the certificate option is made on a competitive basis by specialty.

The primary objective of this option is to prepare advanced practice registered nurses for national certification eligibility and licensure in a new or additional specialty area of practice through a formal, organized curriculum that focuses on specialty courses in the students’ area of interest.

Post-Master of Science in Nursing, Post-Doctor of Philosophy in Nursing and post-Doctor of Nursing Practice individuals are eligible to apply.

Students enrolled in this option are assessed the professional doctoral tuition and fee rates.

Specialties Available for the Certificate Option

• Adult Gerontology Acute Care Nurse Practitioner

• Family Nurse Practitioner

• Psychiatric Mental Health Nurse Practitioner*

• Pediatric Acute Care Nurse Practitioner*

• Pediatric Primary Care Nurse Practitioner*

• Executive Nursing Leadership

*The specialty course sequence for these specialties is offered every OTHER year.

Application Deadline

Application materials are due by January 15.

Applications received after this date will be considered if space is available. Admission decisions are made on a competitive basis. Requirements and forms are available at: www.uknursing.uky.edu

Admission Criteria

• Master of Science or doctoral degree in nursing. Doctoral degree preferred.

• Completed application to the UK College of Nursing Certificate Option.

• Minimum score of 550 (or 213 on computer-based test, or 79 on iBT) on Test of English as a Foreign Language (TOEFL) for all applicants whose native language is not English.

• Unencumbered registered nurse licensure in the state where clinical work will take place.

• Two references, one of which must be from your current supervisor, the other from your master’s or doctoral degree program advisor preferred, or other nursing faculty member.

• Interview(s) with graduate faculty member(s).

Admission to the certificate option is made on a competitive, space-available basis.

College of Pharmacy

The College of Pharmacy offers a professional degree program, a four year curriculum leading to the Doctor of Pharmacy (PharmD). The PharmD degree allows one to sit for the national licensing exam to become a licensed, practicing pharmacist. The College of Pharmacy also offers training for postdoctoral and research fellows, residency programs and graduate training (Ph.D.) in all areas of the pharmaceutical sciences and in pharmaceutical outcomes and policy through the Graduate School. The professional program is fully accredited by the Accreditation Council for Pharmacy Education and satisfies all educational requirements for licensure. Residency programs are accredited by the American Society of Health-System Pharmacists (ASHP).

ADMISSIONS OVERVIEW – PharmD PROGRAM

The College of Pharmacy’s primary mission is to develop pharmacy practitioners and research scholars to improve patient outcomes and human health. The College recognizes that a geographically and culturally diverse student body contributes to more robust exchange of creative ideas and experiences, one that benefits all students. The UK College of Pharmacy, therefore, strives to admit a talented and diverse student body that enhances the educational process while serving the needs of the Commonwealth and the pharmacy profession.

Admission to the professional program is competitive. The number of students admitted to the Doctor of Pharmacy program depends upon the availability of resources such as faculty, clinical facilities and space for implementation of a quality educational program. Consideration for admission will be based on a holistic review of the applicant’s previous academic record, potential for academic achievement, assessment of communication skills, contribution to diversity, integrity, commitment, motivation, character, maturity and emotional stability. Each applicant must have the physical, mental and emotional ability to learn and accomplish those competencies required of a pharmacy practitioner, as well as the character and thought processes necessary to make professional judgments that benefit the patient.

The Admissions Committee believes the applicant should base a decision to enter the pharmacy profession on more solid reasoning than merely an interest in science courses. The applicant should research opportunities available to pharmacy graduates, services provided by pharmacists and obligations of pharmacy practitioners to the people they serve.

Work experience is not a requirement for admission. However, applicants are strongly advised to shadow a pharmacist and volunteer in a pharmacy or health care environment prior to entering a pharmacy program. Students who have prior work, shadowing or volunteer experience in a pharmacy setting generally enhance their performance during the admissions interview process and in the PharmD program if later admitted.

The Admissions Committee cannot consider applications from students in other colleges of pharmacy when the applicant has previously been denied admission to the UK professional program or when the maximum number of students is already enrolled in the program.

Individuals who have been dropped for academic or other reasons applying for reinstatement in the College will have their application considered, but on a competitive basis with new applicants. Students applying for admission should be able to meet the technical standards for students in the College. These standards should be reviewed in the College Bulletin, under “Academic Progress and Promotion.”

Any student may be denied admission or permission to continue enrollment in the College of Pharmacy if, in the opinion of the faculty, the moral or ethical character of the student casts grave doubts upon his or her potential capabilities as a pharmacist. Any type of involvement in the illegal use of drugs or other illegal or unethical acts relating to the practice of pharmacy are examples of incidents which would provide cause for considering denying admission or for dismissal of a student from the College.

ACADEMIC PREPARATION – PharmD ADMISSION REQUIREMENTS

A minimum of 70 semester credit hours of prepharmacy course work is required for admission. Approximately 45-55 of those hours are in required subjects; the remaining credit hours can be elective courses of the student’s choice. Students are encouraged to take elective courses that satisfy their major requirements. Highly recommended electives include biochemistry, genetics, and physics. Other electives to consider: courses required by major; UK Core courses; PharmD Dual Degree prerequisites (if needed); medical terminology; healthcare-related courses; undergraduate courses in Human Health Sciences (HHS), Public Health (CPH), Clinical Leadership and Management (CLM).

Prepharmacy courses should be completed by the end of the spring semester prior to the desired fall enrollment. If admitted, a student may petition the Admissions Committee to determine if a prerequisite may be completed during the summer prior to College of Pharmacy matriculation. See the chart on page 313 for the number of semester credit hours required in each prepharmacy subject area and the exact courses as offered at UK. Students may complete the prepharmacy course work at any regionally-accredited college or university.

English Requirement for Students Interested in Pharmacy

UK students must take courses which satisfy the Composition and Communications I and II requirements. Non-UK students must take two semesters of English writing/composition and one semester of basic public speaking.

PharmD Admission Requirements: Suggested Prepharmacy Schedule

Below is a suggested three-year schedule for UK students on a prepharmacy track. For a two-year, more aggressive prepharmacy schedule, contact the Prepharmacy Advisor at: pharmacyadvising@uky.edu.

FIRST PREPHARMACY YEAR

Fall Semester
MA 109 College Algebra .................................... 3
CHE 105 General College Chemistry I ............ 4
CHE 111 General Chemistry I Laboratory .......... 1
CIS/WRD 110 Composition and Communication I 3

Elective ................................................................. 3
TOTAL ............................................................ 14

University of Kentucky
2019-2020 Undergraduate Bulletin

University of Kentucky
Structured Admissions Interview

To be considered for admission, applicants must be selected for and complete a structured interview process. Interview selection is based on information submitted during the application process. The interview itself is structured to assess the applicant’s communication skills, confidence, integrity, maturity, commitment to the field of pharmacy, motivation, character and ability to interact with others. Students selected for an interview can expect to spend about four hours interviewing. The interview is structured to follow the style of the multiple mini interview (MMI). Students will be interviewed by faculty, practitioners and current students in the format of both individual interviews and collaborative scenarios with other interviewees.

Note: Interview dates for each admission cycle are set in early summer by the College of Pharmacy Admissions Office (dates may vary annually; it is strongly suggested that candidates apply by August 5 for maximum consideration). Applicants are strongly encouraged to begin the application process 13 months (July) in advance of intended start date or as soon as possible thereafter due to a rolling admissions process.

Rolling Admissions Process/ Application Timelines

Rolling Admissions: Please note that the UK College of Pharmacy uses a rolling admissions process. The College screens applications, schedules interviews and makes acceptance decisions on a continual basis, which makes it necessary to complete the application process as early in the admissions cycle as possible. Review of applications specifically begins with Early Decision in late August/early September.

Early Decision (ED): Applicants are strongly encouraged to apply by August 5 for Early Decision consideration. Many positions in the class will be filled through the ED process which will limit the number of seats available through Regular Decision. Early Decision applications receive maximum consideration.

Required Admission Applications, Documents and Verification Process

1. PharmCAS Online Application – www.pharmcas.com (opens July 18, 2019), including “Program Materials” and all sections required by UK College of Pharmacy as indicated in the PharmCAS application.
2. UK College of Pharmacy Application Fee – pharmacy.uky.edu/pharmd-admission-steps.

Note: Deadlines for receipt of application materials may vary annually depending on PharmCAS requirements. For the most current listings of application deadlines and procedures, review both the PharmCAS and UK College of Pharmacy websites in June, approximately 14-months prior to intended start date.

Admission Committee Decisions/ Conditional Acceptance

The Admissions Committee convenes and admission decisions are made at the conclusion of each round of interviews. Selected candidates are then “conditionally accepted” based on a holistic review of GPA (weighing the science GPA most heavily), interview performance, references, leadership/volunteer/service activities, written essays, character, contribution to diversity and an assessment of other characteristics as described under “Admissions Overview.” The total number of students admitted each year will depend upon the availability of resources.

All acceptances remain conditional until final matriculation and fall enrollment in classes.

Final Matriculation/Fall Enrollment Requirements

Before final matriculation and fall enrollment can be approved, all conditionally accepted students must submit a non-refundable tuition deposit, signed copies of specified acceptance forms, pass a criminal background check/drug screen with acceptable results, attend orientation programs and meet other enrollment requirements as set forth by the College prior to the first day of classes.

Individuals who are being reinstated to the full course of study following their removal for academic or other reasons must also submit a non-refundable tuition deposit.

Criminal Background Check and Drug Screen: Applicants should be aware that both criminal background checks (CBC) and drug screens (DS) are becoming common requirements for participation in specific course work in the College of Pharmacy and for eventual licensure as a pharmacist. As a result, CBC/DS are requirements for those students conditionally accepted for admission and must be completed with satisfactory results prior to matriculation to the College. Instructions for completion of CBC/DS requirements will be forwarded immediately following conditional acceptance to the College. The types of tests required as well as the cost involved are subject to change and beyond the control of the College of Pharmacy. The expense for background checks and drug screens will be borne by the individual applicant and/or student.

To view the official UK College of Pharmacy Criminal Background Check/Drug Screen Policy, visit: http://pharmacy.uky.edu/pharmd-admission-steps.

Student Assessment

PharmD students are formally assessed at the conclusion of the second and third professional years through the MileMarker1 and MileMarker2 examinations. These exams allow students to gauge their progress and learning across a professional year and will afford the ability to identify potential areas of weakness that could be remediated before progression to the next professional year.

General/Contact Information

The College of Public Health

The College of Public Health (CPH) is one of the six Health Professions Colleges at the University of Kentucky. Faculty within CPH work closely with the UK Healthcare, and local and regional clinical, research and translational centers. CPH takes seriously its responsibility to the communities and individuals that comprise the Commonwealth of Kentucky. Further, CPH values students highly and, in all its actions, strives to build an environment where students can succeed and thrive. It takes pride in a collegial community of faculty and staff who are encouraged and supported in their work to solve the pressing public health problems that plague the region and the nation. Diversity of thought and diversity among students, staff and faculty, is woven into the fabric of the CPH culture. Given Kentucky’s ranking as one of the unhealthiest states in the nation, the College continues its mission to help reduce the burdens and disparities of health problems on individuals, families and communities in the Commonwealth. Several professional and academic programs are offered at CPH including doctoral programs in gerontology and epidemiology and biostatistics; master’s programs in public health and health administration; an undergraduate program in public health; and an accelerated BPH/MPH degree program that is part of the UK University Scholars Program. Further, CPH has partnerships with other units across campus to offer joint degree programs, including MD/MPH, PharmD/MPH and JD/MHA. Graduate certificates are also offered in the following: biostatistics, gerontology, global health, public health management, and improving healthcare value.

Accreditation

The College of Public Health is nationally accredited by the Council for Education in Public Health (CEPH). The Masters of Health Administration program is accredited by the Commission on Accreditation of Healthcare Management Education.

Bachelor of Public Health

This program is for the student seeking a broad-based, scientifically grounded, and professionally-oriented foundation for impacting societal health. Public Health connects populations from an integrated approach of identifying behaviors that affect health and changing these behaviors; education on the science of primary prevention of disease; promoting healthcare equity, quality and accessibility; and advocating for improved healthcare systems. Completion of a Bachelor of Public Health degree prepares students for the public health workforce and equips them to find effective and meaningful solutions to real-world health problems. The College has strong ties to the public health practice community, both regionally and nationally, and provides students with opportunities to engage with professionals across the country. BPH graduates are well-positioned to pursue entry-level positions in community and public health and healthcare organizations, as well as for graduate study in public health and a variety of other health professions. Students enrolled in the BPH program should have both a belief in making positive changes and a devotion to making a difference in the health status of communities.

ADMISSION POLICY

Admission to the University as an incoming freshman is sufficient for admission to the Pre-Bachelor of Public Health (pre-BPH) program. Current University students and transfer students must meet the BPH grade-point average (GPA) admission criteria to be admitted as a pre-BPH student. Admission to the pre-BPH program does not guarantee admission to the Bachelor of Public Health (BPH) program. Students may apply to the pre-BPH program at any time. The application is available at: https://cph.uky.edu/admissions/bachelor-public-health-admissions/bachelor-public-health-applications.

BPH admission is necessary in order to be granted a baccalaureate degree from the College of Public Health. Students who have attained a 2.75 or higher cumulative GPA and have completed all required premajor requirements (see below) with a combined GPA of 3.0 or higher will be eligible for admission into the BPH program. To be considered for admission to the BPH program, students must fulfill the following requirements:

1. Admission to BPH program;
2. Cumulative GPA of 3.2 or higher;
3. Major GPA of 3.5 or higher;
4. A minimum of 12 free elective hours available during the final year of BPH course work; and
5. Submission of an application to the CPH MPH program in accordance with their admissions process and deadlines.

Applications to the Accelerated BPH/MPH Degree Program

The College of Public Health offers an Accelerated BPH/MPH Degree Program which provides high achieving students an opportunity to complete both a BPH and MPH degree in five years. This program is in accordance with UK’s University Scholars program. In addition to the admission criteria outlined above, students wishing to apply for the accelerated degree program must fulfill the following requirements:

1. Admission to BPH program;
2. Cumulative GPA of 3.2 or higher;
3. Major GPA of 3.5 or higher;
4. A minimum of 12 free elective hours available during the final year of BPH course work; and
5. Submission of an application to the CPH MPH program in accordance with their admissions process and deadlines.

Admission Appeals Process

Students who do not meet the GPA criteria for admission to the Bachelor of Public Health program, but have extenuating circumstances that prevented them from reaching their academic
Academic Requirements section of this Bulletin. The appeal guidelines are available at http://cph.uky.edu/admissions. For questions regarding appeals, contact:

Dr. Sarah Vos
111 Washington Avenue, Suite 105C
sarah.vos@uky.edu

Dean’s List
Full-time undergraduate students who have a term grade-point average of 3.5 or greater will appear on the Dean’s List.

Probation and Academic Suspension
University of Kentucky probation and suspension rules apply for all university undergraduate students. These rules may be reviewed in the Academic Requirements section of this Bulletin.

The following additional rules apply to students in CPH:

1. Any student who fails to maintain a cumulative UK GPA of 2.5 shall be placed on academic probation within CPH.
2. A student will be removed from academic probation when a cumulative GPA of 2.5 or higher is obtained.
3. A student shall be dismissed from the college if he/she fails to achieve a cumulative GPA of 2.5 or higher within two consecutive semesters following being placed on probation.
4. A student who earns a term GPA of 2.5 or higher for each semester following placement on probation will continue in probationary status until a cumulative GPA of 2.5 or higher is obtained.
5. A student who is on academic probation within CPH may transfer to other colleges or departments provided the student meets eligibility criteria.
6. A student who has been dismissed from CPH for academic reasons and has remained outside the program for at least a semester and a summer session may petition for reinstatement.
7. A student who has been dismissed for academic reasons and reinstated shall, upon reinstatement, be placed on academic probation.
8. No student will be readmitted to the College via reinstatement request more than twice.

Graduate Programs in Public Health
The College of Public Health offers the following graduate degrees: Master of Public Health, Master of Health Administration, Ph.D. in Epidemiology/Biostatistics and a Ph.D. in Gerontology. Additional information may be obtained from the Office of Student Engagement, Advising and Success in the College of Public Health and/or from the Graduate School. There is an application deadline for each program and current information can be located on the College website at http://cph.uky.edu

Students who want to earn advanced degrees must be admitted to the University of Kentucky Graduate School. For complete information, students should refer to The Graduate School Bulletin or contact:

Student Success
Student success is a priority in the College of Public Health and relies on collaboration between students, faculty and staff. The College looks forward to working with you on a rewarding academic venture. Admitted students are assigned to an advisor within the College. Curriculum plans are determined in the first semester of enrollment and updated each semester. For questions regarding progression through the program, contact:

Jennifer Stevens
Academic Advisor
111 Washington Avenue, Suite 120
Lexington, KY 40536-0003
859-323-5998
email: jennifer.stevens@uky.edu

All students within CPH must adhere to the Health Care Colleges Code of Student Professional Conduct, as well as the UK Student Code of Conduct.

Required for Degree ....................................................... 120

*Course may also be used toward completion of a UK Core requirement.

Curriculum Policies

Students are expected to be familiar with the requirements for the degree of Bachelor of Public Health and to confer with their advisor for selecting courses. An effective curriculum requires continuous review to remain current and applicable to changing health needs. This may result in revision of courses and requirements; therefore, there can be no guarantee that course content will be identical in each subsequent academic year.
The BPH Program Learning Outcomes are:

- Demonstrate knowledge of public health from an interdisciplinary perspective.
- Show competency in ethical issues, social responsibility, and problem solving using evidence-based concepts in core public health areas.
- Show competency in relationship-building and team dynamics to plan and promote public health and reduce health disparities.
- Apply theories and concepts to communicate the interconnectedness among the physical, social, and environmental aspects of population health.
PUBLIC POLICY

The Martin School of Public Policy & Administration’s Bachelor of Arts in Public Policy is a program that teaches students how to use scientific methods to make evidence-based decisions on problems that affect the public sector and societal welfare and how to design and implement public policy in a complex environment. It develops leadership skills that enable graduates to lead public and nonprofit organizations. Coursework draws on diverse perspectives that enable students to examine critical public and social problems and measure the effects of proposed and existing policy solutions to those problems. Armed with a sophisticated understanding of how governments and markets work, public policy majors will learn to read critically, think analytically, and write concisely in preparation for careers in the nonprofit, private, and public sectors or to pursue graduate study in public policy and administration, international affairs, law, or other social science fields.

Bachelor of Arts with a major in PUBLIC POLICY

Choose 20 hours of free electives ................................. 20

Total Minimum Hours Required for Degree .................. 120
Social work is the only helping profession that emphasizes both human well-being and social justice. Social workers strive to empower others to make the changes they desire in their lives and advocate to bring about social change on both the individual and community level. Social workers help communities provide maximum equality of opportunity for all; help vulnerable individuals address needs more effectively; and seek continually to strengthen and improve the institutional systems responsible for education, justice, health, business, labor, and welfare so that people are better served.

The social work profession has one of the fastest growing job outlooks in the nation; dedicated professionals make a difference daily in the lives of individuals, families, and communities. Social work students learn to assess and critically examine needs and available resources to create maximum opportunities for people of all ages.

The College of Social Work prepares students to become professional social workers through a liberal arts foundation and social work courses that include multiple service opportunities and field placement in social service agencies. Our alumns work in a variety of settings including schools, hospitals, child welfare, mental health agencies, and social welfare organizations and with a diversity of populations including the elderly, the impoverished, the homeless, veterans, and their families, children and adolescents, and refugees and immigrants. This includes services designed to protect, promote or restore the well-being of people.

Program Accreditation
Both the Bachelor of Arts in Social Work and the Master of Social Work degree programs are fully accredited by the Council on Social Work Education.

Licensing
Social work graduates are eligible for professional licensure. In Kentucky, social workers are licensed through the Kentucky Board of Social Work. For additional information on licensure visit bsw.ky.gov or the website for the licensing board in the state where you plan to practice.

Undergraduate Program in Social Work
The University of Kentucky grants the following degree in the College of Social Work:

- Bachelor of Arts in Social Work

Undergraduate Certificate in Social Work
The University of Kentucky grants the following undergraduate certificate in the College of Social Work:

- Diversity and Inclusivity Awareness

THE UNDERGRADUATE PROGRAM OF EDUCATION FOR SOCIAL WORK
The principal objective of the undergraduate program is to prepare students for beginning social work practice. Additionally, it prepares students for graduate professional education, whether in social work or other helping professions such as law or medicine.

All social work majors will participate in field education under faculty direction in a variety of community agencies. Students will complete the social work program with practical social work experience from their practicum placements.

Courses in social work contribute to the practice foundation of all students and help prepare them to be more effective practitioners in a complex society in which social welfare issues and programs are of increasing importance.

Advising
Every student is assigned an academic advisor who assists them in preparing for registration each semester. Undergraduate advisors are assigned by the Director of the Undergraduate Program, 631 Patterson Office Tower, 859-323-0586.

Undergraduate Admission Policy
Admission to the University of Kentucky is sufficient for admission to the College of Social Work as a premajor. Social work students must successfully complete the premajor course requirements before applying to the BASW degree program and maintain a 2.5 GPA. The premajor course requirements are: SW 124 and SW 222; PSY 100; SOC 101; and BIO 103.

An application must be filed with the College of Social Work in order for a student to be considered for admission as a full major. In general, admission as a major depends upon the qualifications and preparation of the applicant, as well as the availability of resources for maintaining quality instruction.

Admission Criteria to the Bachelor of Arts in Social Work Professional Program
In order to be admitted to the BASW degree program as a major, applicants must fulfill the following requirements:

1. Admission to the University of Kentucky (students are considered for acceptance by the College only after acceptance by the University);
2. A grade of B or better in both SW 124 and SW 222, or equivalent (or a grade of B or better in SW 322);
3. Submission of an application form;
4. Minimum of a 2.5 cumulative grade-point average on all college work attempted as computed by the Registrar’s Office;
5. Submission of essay based on criteria established by the College of Social Work;
6. A passing grade in PSY 100, SOC 101, and BIO 103.

Applications for admission are available online at: https://socialwork.uky.edu/basw/basw-application-information/; deadlines are August 1 for the fall semester, and December 1 for the spring semester.

Individuals who do not meet the admissions criteria may submit a petition for consideration of exception to the College’s Admissions Committee. Admission may be granted if there is persuasive evidence of both the capability and motivation to successfully undertake the BASW degree program.

BACHELOR OF ARTS IN SOCIAL WORK

Degree Requirements
The College of Social Work requires students to earn a minimum of 120 hours for the B.A. in Social Work with a minimum grade-point average of 2.5. In addition, students must earn a grade of C or better in all professional social work core classes. Students may take additional hours in accordance with stated University policy.

In addition to fulfilling UK Core requirements, students must complete the program requirements listed below.
UK Core Requirements
See the UK Core section of this Bulletin for the complete
UK Core requirements. The courses listed below are (a)
recommended by the college, or (b) required courses that also
fulfill UK Core areas. Students should work closely with their
advisor to complete the UK Core requirements.

Probation, Dismissal and Reinstatement Policy

An undergraduate social work major or graduate student may be dismissed from the College of Social Work for failure to make satisfactory progress. In the Social Work program, the college continuously monitors the progress of all social work students. Consistent with University regulations and the CSWE requirements that social work programs have policies for “terminating a student’s enrollment . . . for reasons of academic and professional performance,” the following rules apply in the College of Social Work: Academic Performance.

For students accepted to the Bachelor of Arts in Social Work (BASW) program, the rules for academic probation, dismissal and reinstatement are comparable to those established by the University for undergraduate colleges and also include criteria for student performance in required social work courses:

| a | A student must earn a C or better in all social work core courses (SW 300, SW 350, SW 400, SW 421, SW 422, SW 430, SW 435, SW 444, SW 450, SW 460, SW 445, SW 470) in order to complete the major requirements and advance through sequential social work courses. A grade lower than a C will require the student to repeat that course and obtain a C or better to meet major requirements. |
| b | Any student who fails to maintain a cumulative UK GPA of 2.5 shall be placed on academic probation within the College of Social Work. |
| c | A student can be removed from academic probation when a cumulative GPA of 2.5 is obtained. |
| d | A student shall be dismissed from the College if he/she fails to achieve a cumulative GPA of 2.5 or higher within two consecutive semesters of being placed on probation or fails to earn a term GPA of 2.5 or higher for any two consecutive semesters following his/her placement on academic probation. |
| e | A student who earns a term GPA of 2.5 or higher for each semester following placement on probation will continue in probationary status until a cumulative GPA of 2.5 or higher is obtained. |
| f | A student may not graduate from the College of Social Work while on academic probation. |
| g | Students who are on academic probation within the College of Social Work may transfer to other colleges or departments provided the student meets eligibility criteria. |
| h | A student who has been dismissed from the College for academic reasons and has remained outside the program for at least a semester and a summer session may petition for reinstatement. Petition for reinstatement is to be made in writing to the Dean and shall include a written statement by the student specifying why he/she should be considered for reinstatement. After consultation with the Director of Undergraduate Studies and other faculty as appropriate, the Dean may choose to accept or deny the petition. The Dean may require that the student agree to certain conditions in order to be reinstated (i.e. take additional course work, complete a writing class, obtain tutoring, etc.). The Dean shall inform the student in writing that he/she has been reinstated or reasons for denial of the petition for reinstatement. No student will be readmitted to the College via reinstatement request more than twice. |
A student who has been dismissed for academic reasons and reinstated shall, upon reinstatement, be placed on academic probation and be subject to the academic performance expectations outlined in this policy.

COURSES FOR NONMAJORS
Students from other departments are eligible to take certain social work courses offered to enrich the content of their basic major and/or to increase their knowledge and understanding of the society of which they are a part. They may take SW 124, Introduction to Social Work and Diverse Populations; SW 222, Development of Social Welfare Policy; SW 322, Social Work and Social Welfare; and elective social work courses.

GRADUATE PROGRAMS
The College of Social Work offers graduate curricula leading to the Master of Social Work degree and to the Ph.D. in Social Work. An MSW is a prerequisite to Ph.D. admission.

MASTER’S applicants holding the baccalaureate degree in social work may be eligible for the 30-credit advanced standing option. Others will be considered for the regular 60-credit MSW program.

For further information, see The Graduate School Bulletin or the College of Social Work Bulletin.

UNIVERSITY SCHOLARS PROGRAM (USP)
The University Scholars Program offers students the opportunity and challenge of integrating their undergraduate and graduate courses of study into a single, continuous program leading to both a baccalaureate and master’s degree. The student’s particular requirements will determine the amount of time needed to complete the program, but the two programs can be completed in less time and tuition than that required in a conventional program. Students with a 3.8 social work GPA and 3.5 UK cumulative GPA are eligible to apply following the completion of their first practicum.

Departmental Honors
The College of Social Work recognizes those undergraduate students who attain a 3.6 overall University of Kentucky GPA as having Departmental Honors which is indicated on the final transcript.

Dean’s List
Full-time (as defined by 12 hours at the University of Kentucky) students who achieve a 3.6 GPA for the semester will be recognized by the College of Social Work as having made the Dean’s List for that semester.

Undergraduate Certificate in Diversity and Inclusivity Awareness

The undergraduate certificate in Diversity and Inclusivity Awareness provides an enriching, multidisciplinary academic experience for UK students through exposure to a variety of cultures and lived experiences within the academic context. This certificate allows opportunities for students to engage with diverse content, views and experiences in order to gain preparedness for a worldview and a future that promises interconnectedness in all that we do. The certificate is designed to provide a depth and breadth of exposure to the diverse human experience, better preparing global citizens through a variety of courses: designed to enrich and value diversity and inclusivity.

The Diversity and Inclusivity Awareness certificate is multidisciplinary and requires coursework from at least two disciplines. Students must complete a total of 12 hours at the 200-level or above taken for a letter grade with a minimum of 6 credit hours at the 300-level or above. All courses must have a C grade or above to successfully complete the certificate criteria. The Diversity and Inclusivity Awareness certificate will enable students to better understand differences in cultures and lived experiences, social influences resulting from those differences as well as how those influences shape a student’s awareness and ability to connect with a worldview that values diversity and models inclusivity for all.

Required Course
SW 325 Social Justice Foundations ................................. 3

plus a minimum of three of the following (which must include courses from two different departments and at least one must be at the 300-level or above):

EPE 301 Education in American Culture ......................... 3
EDS 375 Introduction to Education of Exceptional Children .............................................. 3
EDS 530 Moderate and Severe Disabilities ........................ 3
EDP 545 Psychology of the Black Experience .................. 3
KHP 220 Sexuality Education ........................................ 2
KHP 325 Community Organizing in Health Promotion ............ 3
KHP 576 LGBTQ+ Health Promotion .............................. 3
KHP 579 Adapted Physical Education .............................. 3
RC 515 Medical and Psychosocial Aspects of Disabilities I .............. 3
RC 516 Medical and Psychosocial Aspects of Disabilities II .......... 3
RC 520 Principles of Rehabilitation Counseling and Rehabilitation Counseling in Mental Health ................. 3
RC 525 Human Growth, Disability, and Development Across the Lifespan .......................... 3
RC 530 Cultural Diversity in Rehabilitation Counseling .......... 3
RC 554 Rural Rehabilitation ......................................... 3
SOC 235 Inequalities in Society ...................................... 3
SOC 335 Sociology of Gender ........................................... 3
SOC 380 Globalization: A Cross-Cultural Perspective ............ 3

University of Kentucky 2019-2020 Undergraduate Bulletin 320
Additional Learning Opportunities

ADDITIONAL LEARNING OPPORTUNITIES

There are plenty of ways students can earn credit at the University of Kentucky. To learn more, see the information below. Distance Learning Programs are administered by the Office of the Associate Provost for Undergraduate Education; all other programs are administered by the Assistant Provost for Enrollment Management.

UK ONLINE PROGRAMS

UK Online Programs, a unit of the Teaching and Academic Support Center (TASC), provides a wide variety of faculty and student support services to enable development and delivery of credit courses and programs throughout the Commonwealth of Kentucky and around the world, with over 10,000 enrollments annually. UK Online students enroll in 15 full degree programs, over 700 courses, 5 certificates and state-mandated training while residing in over 200 cities and towns in more than 100 Kentucky counties. UK Online Programs delivers course work in cooperation with Teaching and Academic Support Center staff, UK academic departments and colleges, and other institutions of higher education statewide and nationally. Available advanced delivery modes include online instruction, interactive video, video-desktop conferencing, videostreaming, Web 2.0 technologies and hybrid models.

Specific support includes:

- online and hybrid course development and support;
- technical coordinators at interactive video and videoconferencing sites;
- extensive online faculty and student support services;
- exploration of new technologies for distance learning delivery/modeling;
- strategic planning with academic units;
- support for collaborative distance learning programming;
- marketing for UK Online courses and programs; and
- coordination with Distance Learning Library Services.

For more information on UK Online Programs, call 859-257-3377; or visit:

www.uky.edu/academics/online-programs.

SUMMER SCHOOL

UK’s summer school consists of a single 12-week term. Most courses will not meet for the entire twelve weeks but will follow standard meeting blocks: 1st 4-weeks, 2nd 4-weeks, 3rd 4-weeks; 1st 6-weeks, 2nd 6-weeks, 1st 8-weeks, etc. Summer School courses provide educational enrichment and give students the opportunity to accelerate their academic progress. Information regarding admission procedures and Summer School calendar dates are listed in the University Calendar at the front of this Bulletin.

The Summer School Schedule of Classes can be viewed online in early December. For information about summer school, contact:

Summer School
859-257-3382
www.uky.edu/registrar/content/summer-sessions

WINTER INTERSESSION

Winter Intersession classes for 2019-20 begin on December 23, 2019 and end on January 14, 2020. For more information on Winter Intersession courses, please contact:

Winter Intersession
859-257-8725
email: asout2@email.uky.edu
www.uky.edu/registrar/winter-intersession
The number system reflects the level of course material and associated rigor. With the exception of upper graduate level and professional courses, any prerequisite restrictions limiting the level of a student accepted into a course shall be specified in a course prerequisites. Courses shall be numbered as follows:

- **001-099** — No credit, non-degree and/or developmental courses;
- **100-199** — Freshmen level course; undergraduate credit only;
- **200-299** — Sophomore level course; undergraduate credit only;
- **300-399** — Junior level course; undergraduate credit only;
- **400-499** — Advanced junior and senior level course; undergraduate credit only;
- **400G-499G** — Senior and first year graduate level course; graduate credit for non-majors only;
- **500-599** — First year graduate level course; undergraduate and graduate credit;
- **600-799** — Upper graduate level course; open only to graduate students;
- **800-999** — Professional Programs course; open only to students in professional colleges and to students in other colleges offering professional degrees as defined by the Council on Postsecondary Education.

**R** — The letter R following the course designation and number indicates a remedial course. No course designated with an R will be counted as credit toward a bachelor’s degree at the University of Kentucky.

Courses may be approved for variable credits, e.g., (1-3), (2-6), etc. In no case, however, may the total credits exceed the maximum number authorized for the course.

Repeated registration in a course may be allowed if the course description carries the statement: “May be repeated to maximum of . . . credits.” However, a student may enroll only one time in a specific course during a given semester. Courses with the same number are not considered to be the same course if different identifying titles are an integral part of the record.

_Unless indicated in the course description, the number of credits for a course indicates the number of lecture or discussion or class hours._

Exceptions to the requirements for admission to courses may be made as follows:

Seniors with superior ability or preparation may be admitted to courses numbered between 600 and 799, upon approval of the instructor, the dean of the student’s college and the Dean of The Graduate School.
BOARD OF TRUSTEES

13 KAR 2:045.
DETERMINATION OF RESIDENCY STATUS FOR ADMISSION AND TUITION ASSESSMENT PURPOSES.

RELATED TO: KRS Chapter 13B, 164.020, 164.030, 164A.330(6), 38 U.S.C. 3301-3325

STATUTORY AUTHORITY: KRS 164.020(8)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedures and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

Section 1. Definitions.

(1) “Academic term” means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.

(2) “Continuous enrollment” means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student’s control, such as serious personal illness or injury, or illness or death of a parent.

(3) “Degree level” means enrollment in a course or program that could result in the award of a

(a) Certificate, diploma, or other program award at an institution;
(b) Baccalaureate degree or lower, including enrollment in a course by a nondegree-seeking post baccalaureate student;
(c) Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry, or “Pharm. D”; or
(d) Professional degree in law, medicine, dentistry, or “Pharm. D”.

(4) “Dependent person” means a person who cannot demonstrate financial independence from parents or persons other than a spouse and who does not meet the criteria for independence established in Section 5 of this administrative regulation.

(5) “Determination of residency status” means the decision of a postsecondary education institution that results in the classification of a person as a Kentucky resident or as a nonresident for admission and tuition assessment purposes.

(6) “Domicile” means a person’s true, fixed, and permanent home and is the place where the person intends to remain indefinitely, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.

(7) “Full-time employment” means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.

(8) “Independent person” means a person who demonstrates financial independence from parents or persons other than a spouse and who meets the criteria for independence established in Section 5 of this administrative regulation.

(9) “Institution” means an entity defined by KRS 164.001(12) if the type of institution is not expressly stated and includes the Kentucky Virtual University, the Council on Postsecondary Education, and the Kentucky Higher Education Assistance Authority.

(10) “Kentucky resident” means a person determined by an institution for tuition purposes to be domiciled in, and a resident of, Kentucky as determined by this administrative regulation.

(11) “Nonresident” means a person who:

(a) Is domiciled outside Kentucky;
(b) Currently maintains legal residence outside Kentucky; or
(c) Is not a Kentucky resident as determined by this administrative regulation.

(12) “Parent” means one (1) of the following:

(a) A person’s father or mother; or
(b) A court-appointed legal guardian if:
   1. The guardianship is recognized by an appropriate court within the United States;
   2. There was a relinquishment of the rights of the parents; and
   3. The guardianship was not established primarily to confer Kentucky residency on the person.

(13) “Preponderance of the evidence” means the greater weight of evidence or evidence that is more credible and convincing to the mind.

(14) “Residence” means the place of abode of a person and the place where the person is physically present most of the time for a noneducational purpose in accordance with Section 3 of this administrative regulation.

(15) “Student financial aid” means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at an institution, and includes student employment by the institution or a graduate assistantship.

(16) “Sustenance” means:

(a) Living expenses, such as room, board, maintenance, and transportation; and
(b) Educational expenses, such as tuition, fees, books, and supplies.

Section 2. Scope.

(1) State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.

(2) In accordance with the duties established in KRS 164.020, the Council on Postsecondary Education may require a student who is neither domiciled in, nor a resident of, Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.

(3) Unless otherwise indicated, this administrative regulation shall apply to all student residency determinations, regardless of circumstances, including residency determinations made by:

(a) The state-supported institutions for prospective and currently-enrolled students;
(b) The Southern Regional Education Board for contract spaces;
(c) Reciprocity agreements, if applicable;
(d) The Kentucky Virtual University;
(e) Academic common market programs;
(f) The Kentucky Educational Excellence Scholarship Program; and
(g) Other state student financial aid programs, as appropriate.

Section 3. Determination of Residency Status; General Rules.

(1) A determination of residency shall include:

(a) An initial determination of residency status by an institution:
   1. During the admission process;
   2. Upon enrollment in an institution for a specific academic term; or
   3. For admission into a specific academic program;
(b) A reconsideration of a determination of residency status by an institution based upon a changed circumstance; or
(c) A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.

(2) An initial determination of residency status shall be based upon:

(a) The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution;
(b) Information derived from admissions materials;
(c) If applicable, other materials required by an institution and consistent with this administrative regulation; and
(d) Other information available to the institution from any source.

(3) An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.

(4) A determination of residency status shall be based upon verifiable circumstances or actions.

(5) Evidence and information cited as the basis for Kentucky domicile and residency shall be substantiated by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.

(6) In accordance with the duties established in KRS 164.020, the Council on Postsecondary Education may require a student who is neither domiciled in, nor a resident of, Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.

(7) A student may apply for a review of a determination of residency status once for each academic term.
(8) If an institution has information that a student’s residency status may be incorrect, the institution shall review and determine the student’s correct residency status.

(9) If the Council on Postsecondary Education has information that an institution’s determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.

(10) An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty or sanction may also include:

(a) Student discipline by the institution through a policy written and disseminated to students; or
(b) Criminal prosecution.

Section 4. Presumptions Regarding Residency Status.

(1) In making a determination of residency status, it shall be presumed that a person is a nonresident if:

(a) A person is, or seeks to be, an undergraduate student and admissions records show the student to be a graduate of an out-of-state high school within five (5) years prior to a request for a determination of residency status;

(b) A person’s admissions records indicate the student’s residence to be outside of Kentucky when the student applied for admission;

(c) A person moves to Kentucky primarily for the purpose of enrollment in an institution;

(d) A person moves to Kentucky and within twelve (12) months enroll at an institution more than half time;

(e) A person has a continuous absence of one (1) year from Kentucky; or

(f) A person attended an out-of-state higher education institution during the past academic year and paid in-state tuition at that institution.

(2) A presumption arising from subsection (1) of this section shall only be overcome by preponderance of evidence sufficient to demonstrate that a person is domiciled in and is a resident of Kentucky.

Section 5. Determination of Whether a Student is Dependent or Independent.

(1) In a determination of residency status, an institution shall first determine whether a student is dependent or independent. This provision shall be predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent, and therefore, lacks the ability to form the requisite intent to establish domicile. A determination that a student is independent shall be one (1) step in the overall determination of whether a student is or is not a resident of Kentucky.

(2) In determining the dependent or independent status of a person, the following information shall be considered, as well as other relevant information available when the determination is made:

(a) 1. Whether the person has been claimed as a dependent on the federal or state tax returns of a parent or other person for the year preceding the date of application for a determination of residency status; or

2. Whether the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and

(b) Whether the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person’s own sustenance.

(3) An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.

(4) Domicile may be inferred from the student’s permanent address, parent’s mailing address, or location of high school of graduation.

(5) Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.

(6) Financial assistance from, or a loan made by, a parent or family member other than an independent spouse, if used for sustenance of the student:

(a) Shall not be considered in establishing a student as independent; and

(b) Shall be a factor in establishing that a student is dependent.

Section 6. Effect of a Determination of Dependent Status on a Determination of Residency Status.

(1) The effect of a determination that a person is dependent shall be:

(a) The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person; and

(b) The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky, regardless of which parent has legal custody or is entitled to claim that person as a dependent pursuant to federal or Kentucky income tax provisions.

(2) If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky, but subsequently move from the state:

(a) The dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled; and

(b) The dependent person’s residency status shall be reassessed if continuous enrollment is broken or the current degree level is completed.

Section 7. Member or Former Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status.

(1) A member, spouse, or dependent of a member whose domicile and residency was Kentucky when inducted into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:

(a) During the member’s time of active service; or

(b) If the member returns to this state within six (6) months of the date of the member’s discharge from active duty.

(2) A member of the armed services on active duty for more than thirty (30) days and who has a permanent duty station in Kentucky shall be considered a Kentucky resident and shall be entitled to in-state tuition, as shall the spouse or a dependent child of the member.

(3) Membership in the National Guard or civilian employment at a military base alone shall not qualify a person for Kentucky residency status under the provisions of subsections (1) and (2) of this section. If a member of the Kentucky National Guard is on active duty status for a period of not less than thirty (30) days, the member shall be considered a Kentucky resident, as shall the spouse or a dependent child of the member.

(4) A person eligible for benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, 38 U.S.C. 3301-3325, or any other educational benefits provided under Title 38 of the United States Code shall be entitled to Kentucky resident status for purposes of tuition charged at state-supported institutions.

(5) A person’s residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

Section 8. Status of Nonresident Aliens; Visas and Immigration.

(1) (a) A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.

(b) Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.

(2) A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a parent with an H-1 visa, I, K, L, N, R, shall establish domicile and residency the same as another person.

(3) (a) An independent person holding a nonimmigrant visa with designation B, C, D, F, H-2, H-3, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD, or TN shall not be classified as a Kentucky resident because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.

(b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.

(c) A dependent person holding a visa described in subsection (2) of this section or paragraph (a) of this subsection, if a parent is a citizen of the United States and is a resident of and domiciled in Kentucky, shall be a resident of Kentucky for the purposes of this administrative regulation.

(4) A person shall be a Kentucky resident for the purpose of this administrative regulation if the person graduated from a Kentucky high school and:

(a) Is an undocumented alien;

(b) Holds a visa listed in subsections (2) or (3)(a) of this section; or

(c) Is a dependent of a person who holds a visa listed in subsections (2) or (3)(a) of this section.

(5) Except as provided in paragraph (b) of this subsection, a person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been granted by the federal government.
Subject to the provisions for continuous enrollment, if applicable.

Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust.
A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(6).

Section 10. Criteria Used in a Determination of Residency Status.
(1) A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions. A single fact shall not be paramount, and each situation shall be evaluated to identify those facts essential to the determination of domicile and residency.
(a) A person shall not be determined to be a Kentucky resident by the performance of an act that is incidental to fulfilling an educational purpose or by an act performed as a matter of convenience.
(b) Mere physical presence in Kentucky, including living with a relative or friend, shall not be sufficient evidence of domicile and residency.
(c) A student or prospective student shall respond to all requests for information regarding domicile or residency requested by an institution.
(d) The following facts, although not conclusive, shall have probative value in their entirety and shall be individually weighted, appropriate to the facts and circumstances in each determination of residency:
   (a) Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;
   (b) Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;
   (c) Filing a Kentucky resident income tax return for the calendar year preceding the date of application for a change in residency status; or
   (d) Payment of Kentucky withholding taxes while employed during the calendar year for which a change in classification is sought;
   (e) Full-time employment of at least one (1) year while living in Kentucky;
   (f) Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;
   (g) Abandonment of a former domicile or residence and establishing domicile and residency in Kentucky with application to or attendance at an institution following and incidental to the change in domicile and residency;
   (h) Obtaining licensing or certification for a professional and occupational purpose in Kentucky;
   (i) Payment of real property taxes in Kentucky;
   (j) Ownership of real property in Kentucky, if the property was used by the student as a residence preceding the date of application for a determination of residency status;
   (k) Marriage of an independent student to a person who was domiciled in and is resident of Kentucky prior to the marriage; and
   (l) The extent to which a student is dependent on student financial aid in order to provide basic sustenance.
(3) Except as provided in subsection (4) of this section, the following facts, because of the ease and convenience in completing them, shall have limited probative value in a determination that a person is domiciled in and is a resident of Kentucky:
   (a) Kentucky automobile registration;
   (b) Kentucky driver’s license;
   (c) Registration as a Kentucky voter;
   (d) Long-term lease of at least twelve (12) consecutive months of noncollegiate housing; and
   (e) Continued presence in Kentucky during academic breaks.
(4) The absence of a fact contained in subsection (3) of this section shall have significant probative value in determining that a student is not domiciled in or is not a resident of Kentucky.

Section 11. Effect of a Change in Circumstances on Residency Status.
(1) If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by the institution.
(2) Upon transfer to a Kentucky institution, a student’s residency status shall be assessed by the receiving institution.
(3) A reconsideration of a determination of residency status for a dependent person shall be subject to the provisions for continuous enrollment, if applicable.

Section 12. Student Responsibilities.
(1) A student shall report under the proper residency classification, which includes the following actions:
   (a) Raising a question concerning residency classification;
   (b) Making application for change of residency classification with the designated office or person at the institution; and
   (c) Notifying the designated office or person at the institution immediately upon a change in residency.
(2) If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student’s residency status.
(3) If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made.
   (b) Notification shall be made by registered mail, return receipt requested.
   (c) Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.
(4) The formal hearing conducted by an institution and the final recommended order shall be a final administrative action with no appeal to the Council on Postsecondary Education.
(b) A formal administrative hearing conducted by the Council on Postsecondary Education for residency determinations related to eligibility for the Academic Common Market and Regional Contract Programs shall be conducted pursuant to the provisions of KRS Chapter 13B and 13 KAR 2:070. The recommended order issued by the President of the Council shall be a final administrative action.
(5) A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

Section 13. Institutional Responsibilities.
Each institution shall:
(1) Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer’s determination;
(2) Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal;
(3) Establish a formal hearing process as described in Section 14 of this administrative regulation; and
(4) Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:
   (a) Approved by the institution’s governing board;
   (b) Made available to all students; and
   (c) Filed with the council.

(1) A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.
(2) If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer shall:
   (a) Be a person not involved in determinations of residency at an institution except for formal hearings; and
   (b) Not be an employee in the same organizational unit as the residency appeals officer.
(3) An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:
   (a) A hearing officer to make a recommendation on a residency appeal;
   (b) Guarantees of due process to a student that include:
      1. The right of a student to be represented by legal counsel; and
      2. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency; and
   (c) A recommendation to be issued by the hearing officer.
(4) An institution’s formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.
Section 15. Cost of Formal Hearings.

(1) An institution shall pay the cost for all residency determinations including the cost of a formal hearing.

(2) A student shall pay for the cost of all legal representation in support of the student’s claim of residency.

Revised Effective July 13, 2015

For further information about residency, please contact the Office of Undergraduate Admission and University Registrar, Funkhouser Building, University of Kentucky, Lexington, KY 40506-0054.

Policy subject to change without notice.
Drug-Free Policy

Policy Statement as a Drug-Free Institution

The University of Kentucky is committed to providing a healthy and safe environment for its students, faculty and staff. The University has defined conduct in relation to the unlawful possession, use, dispensation, distribution or manufacture of alcohol or illicit drugs. Conduct which is violative of this definition poses unacceptable risks and disregard for the health, safety, and welfare of members of the University community and shall result in disciplinary action up to and including suspension or termination.

As a recipient of federal grants and contracts, the University of Kentucky gives this notice to students, faculty and staff that it is in compliance with and shall continue to be in compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act. Students, faculty and staff are herein notified of the standards of conduct which shall be applicable while on University of Kentucky property, on University business, and/or at University sponsored activities.

Standards of Conduct

By University regulations, by federal law, by state law, and, in some instances, by local ordinance, students, faculty and staff are prohibited from the unlawful possession, use, dispensation, distribution, or manufacture of illicit drugs on University property, on University business and/or at University sponsored activities.

Under University regulations, students, faculty and staff are required to abide by state laws concerning alcoholic beverages. Basically, Kentucky laws state that if one is under the age of 21, it is unlawful to:

1. possess or consume alcoholic beverages,
2. misrepresent one’s age for the purpose of purchasing alcoholic beverages,
3. use a fake ID in an attempt to purchase alcoholic beverages.

No matter what one’s age, Kentucky law states that it is unlawful to:

1. procure any alcoholic beverages for anyone under 21 years of age or
2. drink or to be drunk in a public place.

University campuses and buildings are considered as public places for purposes of these laws, except for a facility licensed to serve alcoholic beverages, and except for a facility used as a private residence, unless University regulations state otherwise.

Ordinances of the Lexington-Fayette Urban County Government basically parallel the state laws.

Any member of the University student body, faculty, or staff who violates these defined standards of conduct shall be subject to appropriate disciplinary action up to and including suspension and/or termination. The specifically defined standards of conduct, the disciplinary procedures, and the appropriate sanctions are detailed in the codes of student conduct and in the Administrative Regulations 6:4, and Human Resource Policy & Procedures Numbers 13.0 and 14.0.

In addition, it is a violation of state law to operate a motor vehicle while under the influence of any substance which may impair one’s driving ability (drugs or alcoholic beverages).

Sanctions

Under University regulation, students who violate this standard of conduct are subject to disciplinary action from a minimum of a warning to a maximum of suspension from the University. Students who reside in University Housing are subject to further disciplinary action which may vary from a warning to termination of their housing contract.

Faculty and staff are subject to disciplinary action from a minimum of a warning to a maximum of termination from University employment.

Under state and federal drug laws, the gravity of the sanction depends on the classification of the controlled substance, the particular activity involved (possession or trafficking which includes manufacture, sale and possession with intent to sell), and whether or not multiple convictions are involved.

Specific penalties under federal and state laws for trafficking in various controlled substances are outlined in Appendix A to this policy.

Notice of Drug-Related Conviction

In compliance with the Federal Drug-Free Workplace Act of 1988, any employee shall notify the immediate supervisor if the employee is convicted of a criminal drug offense occurring in the workplace or while on University business within five (5) days of the conviction. The University shall take appropriate sanction and remedies in accordance within its policies. The provisions of this section are applicable to students who are employees of the University. If the employee is under a federal contract or grant, the University shall notify the contracting or granting agency of the conviction and of its actions. This section of this policy is also applicable to students who receive a Pell grant (federal grant).

Health Risks

The scope and impact of health risks from alcohol and drug abuse are both alarming and well-documented, ranging from mood-altering to life-threatening, with consequences that extend beyond the individual to family, organizations and society at large. The University of Kentucky, therefore, conducts regular programs to educate its students, faculty and staff that consumption and use of drugs may alter behavior, distort perception, impair thinking, impede judgment, and lead to physical or psychological dependence.

Alcohol and/or drugs and/or drug abuse may lead to the deterioration of physical health by causing or contributing to various health conditions including but not limited to fatigue, nausea, personal injury, insomnia, pathological organ damage, some forms of cancer, pancreatitis, heart attack, respiratory depression, birth defects, convulsions, coma, and even death. Alcohol and drug abuse may also result in deterioration of mental health by causing or contributing to various conditions such as increased aggression, hallucinations, depression, disorientation, and psychosis.

A detailed list of the effects and health risks associated with the use of many specific drugs appears as Appendix B to this policy.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident.
Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person’s ability to learn and remember information.

Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Training and Counseling Resources

Continuous efforts are made to make students, faculty and staff aware of the on-campus and off-campus programs which provide information and professional services on matters related to the abuse of alcohol and drugs.

Lists of sources for information and counseling for students are published in the Kernel regularly. Students are encouraged to contact the Dean of Students and/or the Office of Residence Life for information and appropriate referral.

Counseling is provided by such areas as the University Health Services Counseling Center, Educational, School, and Counseling Psychology, the Medical Student Support Services program (MS3), and On-Call Counselors in the residence halls system.

For faculty and staff, the REFER Counseling program provides information as to resources specifically available to employees.

Other counseling, treatment, and rehabilitation services are available in the Lexington community as well as communities throughout the state in which College of Agriculture employees are located.

- Comprehensive Care Centers offer both counseling and treatment. (Visit www.bluegrass.org for locations and contact information.)
- In the Lexington area, the number for Alcoholics Anonymous (AA) is 859-225-1212. (Check local telephone directory for listings.)
- The Chrysalis House Inc. 859-977-2501 offers long term, half-way house residential treatment for recovering chemically dependent women.
- University of Kentucky Family Center: 859-257-7755.
- REFER Counseling Program: 859-257-1467.

Many other services are available and may be located by looking in the local telephone directory yellow pages under “Social Services” or “Alcohol Abuse & Addiction – Information & Treatment” or in the section at the front of the telephone directory. Services may also be located by searching on-line.

Policy Review

This policy statement and any revisions thereto shall be distributed annually to students and employees. Distribution shall be the responsibility of the Vice President for Student Affairs and the Associate Vice President for Human Resources.

Annual Review Policy – The Vice President for Student Affairs and the Associate Vice President for Human Resources shall review and interpret policies and procedures relevant to this policy statement. These two administrators shall jointly be responsible for maintaining records of the annual review of the policy statement.

Christina J. Stowe, Associate Professor, Ph.D., Texas A&M, 2002
Richard L. Trimble, Extension Professor Emeritus, Ph.D., Michigan State, 1973
Lionel Williamson, Extension Professor Emeritus, Ph.D., Missouri, 1977
Timothy Woods, Extension Professor, Ph.D., Michigan State, 1996
Yuqing Zheng, Associate Professor, Ph.D., Auburn, 2006

ANIMAL AND FOOD SCIENCES

Richard D. Coffey, Chair

Debra K. Aaron, Professor, Ph.D., Oklahoma State, 1984
Curtis W. Absher, Extension Professor Emeritus, Ph.D., Tennessee, 1969
Sunday Adedokun, Assistant Professor, Ph.D., Purdue, 2007
Glen E. Aiken, Adjunct Associate Professor, Ph.D., Florida, 1989
Donna M. Amaral-Phillips, Extension Professor, Ph.D., Iowa State, 1988
Leslie H. Anderson, Extension Professor, Ph.D., Ohio State, 1996
Kenneth Andries, Adjunct Assistant Professor, Ph.D., Kansas State, 1996
Tsoyung Ao, Adjunct Assistant Professor, Ph.D., Kentucky, 2005
W. Luke Beatrigh, Professor, Ph.D., Arkansas
James A. Boling, Professor Emeritus, Ph.D., Wisconsin, 1967
Kristen M. Brennan, Adjunct Assistant Professor, Ph.D., Washington State, 2008
Phillip J. Bridges, Associate Professor, Ph.D., West Virginia, 1999
K. Darlh Bullock, Extension Professor, Ph.D., Georgia, 1992
Walter R. Burrell, Extension Professor Emeritus, Ph.D., Kentucky, 1974
Fernanda Camargo, Extension Associate Professor, Ph.D., Kentucky, 2007
George H. Cantor, Associate Professor Emeritus, Ph.D., Cornell, 1974
Joao H. Cardoso Costa, Assistant Professor, Ph.D., British Columbia, 2015
Richard D. Coffey, Extension Professor, Ph.D., Kentucky, 1994
Robert J. Coleman, Extension Associate Professor, Ph.D., Alabama, 1998
Victor S. Cortese, Adjunct Assistant Professor, D.V.M., Michigan State, 1980
Nancy M. Cox, Professor, Ph.D., North Carolina State, 1982
William L. Crist, Extension Professor Emeritus, Ph.D., Ohio State, 1970
Gary L. Croda, Ph.D., Purdue, 1994
Karl A. Dawson, Adjunct Professor, Ph.D., Iowa State, 1979
Robert A. Dwyer, Professor, D.V.M., Iowa State, 1985
Lee A. Edgerton, Associate Professor Emeritus, Ph.D., Purdue, 1970
Donald G. Ely, Professor, Ph.D., Kentucky, 1966
Michael D. Flythe, Adjunct Assistant Professor, Ph.D., Cornell, 2006
David L. Harmon, Professor, Ph.D., Nebraska, 1983
Robert J. Harmon, Professor Emeritus, Ph.D., Guelph, Ontario, 1977
George Heersche, Jr., Extension Professor, Ph.D., Kansas State, 1975
Carmie Helesen, Senior Lecturer, Ph.D., Michigan State, 2004
Bernhard Hemmig, Professor, Ph.D., Iowa State, 1982
Clair L. Hicks, Professor Emeritus, Ph.D., Wisconsin, 1974
Mieke Holder, Assistant Research Professor, Ph.D., Kentucky, 2012
James L. Klotz, Adjunct Assistant Professor, Ph.D., Tennessee, 2004
Bruce E. Langlois, Professor Emeritus, Ph.D., Purdue, 1962
Laurie M. Lawrence, Professor, Ph.D., Colorado State, 1982
Jeffrey W. Lehmkühler, Extension Associate Professor, Ph.D., Missouri, 2001
Merlin D. Lindemann, Professor, Ph.D., Minnesota, 1981
C. Oran Little, Professor Emeritus, Ph.D., Iowa State, 1960
James C. Matthews, Professor, Ph.D., Virginia Tech, 1995
Alan J. McAllister, Extension Professor Emeritus, Ph.D., Ohio State, 1975
Kyle R. McLeod, Associate Professor, Ph.D., Kentucky, 1985
George E. Mitchell, Jr., Professor Emeritus, Ph.D., Illinois, 1956
William G. Moody, Professor Emeritus, Ph.D., Missouri, 1963
Melissa C. Morgan, Associate Professor, Ph.D., Kentucky, 1990
Joseph O’Leary, Associate Professor Emeritus, Ph.D., Minnesota, 1974
Gary R. Parker, Extension Professor Emeritus, Ph.D., Kentucky, 1975
Anthony J. Pescatore, Extension Professor, Ph.D., Texas A&M, 1981
James L. Pierce, Adjunct Assistant Professor, Ph.D., Kentucky, 1999
Gregg K. Rentfrow, Extension Associate Professor, Ph.D., Missouri, 2005
John C. Robertson, Professor Emeritus, Ph.D., Kentucky, 1960
Mary G. Rossano, Associate Professor, Ph.D., Michigan State, 2003
Rachel R. Schendel, Assistant Professor, Ph.D., Karlsruhe Institute of Technology, 2014
Keith K. Schillo, Associate Professor Emeritus, Ph.D., Wisconsin, 1981
Herbert J. Strobel, Adjunct Associate Professor, Ph.D., Cornell, 1990
Surendranath Suman, Professor, Ph.D., Connecticut, 2006
Fred A. Thrift, Professor Emeritus, Ph.D., Oklahoma State, 1968
James H. Tidwell, Associate Professor Emeritus, Ph.D., Mississippi State, 1987
Juan M. Tricario, Adjunct Assistant Professor, Ph.D., Kentucky, 2001
Ray E. Tucker, Professor Emeritus, Ph.D., Kentucky, 1966
Kristine L. Urschel, Associate Professor, Ph.D., Alberta, 2007
Eric S. VanZant, Associate Professor, Ph.D., Kansas State, 1993
Paul P. Vijayakumar, Extension Assistant Professor, Ph.D., Oklahoma State, 2014
Jacqueline L. Wahrmund, Lecturer, Ph.D., Oklahoma State, 2011

**BIOSYSTEMS AND AGRICULTURAL ENGINEERING**

Michael D. Montross, Chair

Akinbode A. Adedeji, Assistant Professor, Ph.D., McGill, 2010
Carmen T. Agouridis, Extension Associate Professor, Ph.D., Kentucky, 2004
Carl H. Bolster, Adjunct Assistant Professor, Ph.D., Virginia, 1999
Matthew E. Byers, Adjunct Assistant Professor, Ph.D., Nebraska, 1990
Manuel Castillo, Adjunct Associate Professor, Ph.D., University of Murcia, 2002
Donald G. Colliver, Professor, Ph.D., Purdue, 1979
Carena Crofoot, Professor, Ph.D., Kentucky, 2001
George A. Duncan, Extension Professor Emeritus, Ph.D., Kentucky, 1979
Joseph S. Dvorak, Associate Professor, Ph.D., Kansas State, 2012
Dwayne R. Edwards, Professor, Ph.D., Oklahoma State, 1988
Robert L. Fehr, Extension Professor Emeritus, Ph.D., Iowa State, 1976
William Ford, Assistant Professor, Ph.D., Kentucky, 2014
Richard S. Gates, Adjunct Professor, Ph.D., Cornell, 1984
Morgan D. Hayes, Extension Assistant Professor, Ph.D., Iowa State, 2012
Stephen F. Higgins, Adjunct Assistant Professor, Ph.D., Kentucky, 2004
Joshua J. Jackson, Extension Assistant Professor, Ph.D., Kentucky, 2015
Kevin W. King, Adjunct Professor, Ph.D., Texas A&M, 2000
Samuel G. McNeill, Extension Associate Professor, Ph.D., Tennessee, 1996
Michael D. Montross, Professor, Ph.D., Purdue, 1999
Sue E. Nokes, Professor, Ph.D., North Carolina State, 1990
Douglas G. Overhults, Extension Professor Emeritus, Ph.D., Nebraska, 1982
Blaine F. Parker, Professor Emeritus, Ph.D., Michigan State, 1954
Frederick A. Payne, Professor Emeritus, Ph.D., Kentucky, 1980
Michael Peterson, Professor, Ph.D., Northwestern, 1994
Mark Purschwitz, Extension Professor, Ph.D., Purdue, 1989
Michael Sama, Associate Professor, Ph.D., Kentucky, 2013
Scott A. Shearer, Professor Emeritus, Ph.D., Ohio State, 1986
Jian Shi, Assistant Professor, Ph.D., North Carolina State, 2007
Ashutosh Singh, Adjunct Assistant Professor, Ph.D., McGill, 2014
Timothy S. Stombaugh, Extension Professor, Ph.D., Illinois, 1998
Joseph L. Taraba, Extension Professor Emeritus, Ph.D., Ohio State, 1978
Linus R. Walton, Professor Emeritus, Ph.D., Tennessee, 1974
Richard C. Warner, Extension Professor Emeritus, Ph.D., Clemson, 1982
Larry G. Wells, Professor Emeritus, Ph.D., North Carolina State, 1975
Gerald Martin White, Professor Emeritus, Ph.D., Purdue, 1960
Stephen R. Workman, Professor, Ph.D., North Carolina State, 1990

**COMMUNITY AND LEADERSHIP DEVELOPMENT**

Robert Wesley Harrison, Chair

Charles W. Byers, Professor Emeritus, Ph.D., Ohio State, 1972
C. Milton Coughenour, Professor Emeritus, New York University, Missouri, 1953
Patricia H. Dyk, Associate Professor, Ph.D., Utah State, 1990
Rebekah B. Epps, Associate Professor, Ph.D., Ohio State, 2010
Lorraine E. Garkovich, Professor Emeritus, Ph.D., Missouri, 1976
Bryan Hains, Associate Professor, Ph.D., Purdue, 2007
Gary L. Hansen, Extension Professor Emeritus, Ph.D., Iowa State, 1978
Rosalind P. Harris, Associate Professor, Ph.D., Penn State, 1990
Ronald J. Hustede, Extension Professor, Ph.D., Warf, 1988
William J. Jackman, Adjunct Assistant Professor, Ph.D., Virginia Tech, 1991
Kenneth R. Jones, Extension Professor, Ph.D., Penn State, 2004
Daniel W. Kahl, Assistant Extension Professor, Ph.D., Kansas State, 2012
Richard C. Maurer, Extension Professor Emeritus, Ph.D., Ohio State, 1977
Alissa L. Meyer-Rossi, Senior Lecturer, Ph.D., Penn State, 2008
Martha Nall, Extension Professor Emerita, Ed.D., North Carolina State, 1983
Laura Rice, Assistant Professor, Ph.D., Penn State, 2015
Kristina Ricketts, Extension Associate Professor, Ph.D., Florida, 2005
Karen E. Rignall, Assistant Professor, Ph.D., Kentucky, 2012
Lindsay Shade, Lecturer, Ph.D., Kentucky, 2017
Darryl Strodle, Adjunct Assistant Professor, Ph.D., Kentucky, 2012
Keiko Tanaka, Professor, Ph.D., Michigan State, 1997
Rodney W. Tulloch, Associate Professor Emeritus, Ph.D., Penn State, 1972
Quentin R. Tyler, Adjunct Assistant Professor, Ph.D., Kentucky, 2011
Stacy K. Vincent, Associate Professor, Ph.D., Missouri, 2010
Paul D. Warner, Extension Professor Emeritus, Ph.D., Ohio State, 1973
Randy D. Weckman, Associate Professor Emeritus, Ph.D., Minnesota, 1989
Deborah B. Witham, Professor Emerita, Ph.D., Indiana, 1981
Julie N. Zimmerman, Extension Professor, Ph.D., Cornell, 1997

**DIETETICS AND HUMAN NUTRITION**

Janet Mullins, Interim Chair

Kwaku Addo, Associate Professor Emeritus, Ph.D., Washington State, 1991
Sandra Bastin, Extension Professor, Ph.D., R.D., L.D., Kentucky, 1995
Dawn P. Brewer, Assistant Professor, Ph.D., R.D., L.D., Georgia, 2009
Lilian Brislenn, Adjunct Assistant Professor, Ph.D., Kentucky, 2017
Ching K. Chow, Professor, Ph.D., Illinois-Urbana, 1969
Elizabeth L. Combs, Lecturer, M.S., R.D., L.D., Kentucky, 2010
Kyle Flack, Assistant Professor, Ph.D. Virginia Polytechnic Institute and State University, 1994
Hazel Waldron Forsythe, Associate Professor Emerita, Ph.D., R.D., Oklahoma State, 1987
Lisa Gaetke, Professor Emerita, Ph.D., R.D., Kentucky, 1994
Alison Gustafson, Associate Professor, Ph.D., R.D., L.D., North Carolina, 2010
Jessica Houlihan, Lecturer, PA-C, Kentucky, 2014
Yolanda Jackson, M.S., R.D., L.D., Kentucky, 2012
Janet Kurzynski, Extension Professor Emerita, Ph.D., R.D., Tennessee, 1975
Heather Norman-Burgdorf, Extension Assistant Professor, Ph.D., Kentucky, 2017
Janet Tietjen Mullins, Extension Professor, Ph.D., R.D., L.D., Kansas State, 1993
Julie Plascencia, Assistant Professor, Ph.D., R.D., L.D., Michigan State, 2016
Aaron K. Schwartz, Lecturer, M.S., Kentucky, 2014
Robin Shoemaker, Assistant Professor, Ph.D., Kentucky, 2015
Tammie J. Stephenson, Associate Professor, Ph.D., Kentucky, 2001

**ENTOMOLOGY**

Subba Reddy Palli, Chair

Ricardo T. Bessin, Extension Professor, Ph.D., Louisiana State, 1990
Grayson C. Brown, Professor Emeritus, Ph.D., Washington State, 1978
Douglas Lee Dahlman, Professor Emeritus, Ph.D., Iowa State, 1965
Zachary Devries, Assistant Professor, Ph.D., North Carolina, 2017
Stephen Dobson, Professor, Ph.D., California-Berkeley, 1996
Luke E. Dodd, Adjunct Assistant Professor, Ph.D., Kentucky, 2010
Julian Dupuis, Assistant Professor, Ph.D., Alberta, 2016
Charles W. Fox, Professor, Ph.D., California-Berkeley, 1993
Paul H. Freytag, Professor Emeritus, Ph.D., Ohio State, 1963
David J. Gontier, Assistant Professor, Ph.D., Michigan, 2014
Kenneth F. Haynes, Professor, Ph.D., California-Davis, 1982
Douglas W. Johnson, Extension Professor Emeritus, Ph.D., Florida, 1980
John J. Obrycki, Professor, Ph.D., Cornell, 1982
Subba Reddy Palli, Professor, Ph.D., Western Ontario, 1987
Daniel A. Potter, Professor, Ph.D., Ohio State, 1978
Michael F. Potter, Extension Professor, Ph.D., Arizona, 1982
Lynne K. Rieske-Kinney, Professor, Ph.D., Wisconsin, 1995
Clare C. Rittschof, Assistant Professor, Ph.D., Florida, 2011
John D. Sedlacek, Adjunct Assistant Professor, Ph.D., Kentucky, 1985
Michael Sharkey, Professor Emeritus, Ph.D., McGill, 1983
Brian Stevenson, Ph.D., State University of New York-Stony Brook, 1989
Zainulabedkud Syed, Assistant Professor, Ph.D., University of Neuchatel, 2002
Nicholas M. Teets, Assistant Professor, Ph.D., The Ohio State University, 2012
Lee H. Townsend, Jr., Extension Professor Emeritus, Ph.D., Virginia Tech, 1977
Raul T. Villanueva, Assistant Professor, Ph.D., Florida, 2002
Bruce A. Webb, Professor, Ph.D., Washington, 1988
Thomas C. Webster, Adjunct Assistant Professor, Ph.D., California-Davis, 1986
Steve Yanovick, Adjunct Associate Professor, Ph.D., Oklahoma, 1999
Kenneth V. Yeargan, Professor Emeritus, Ph.D., California-Davis, 1974
Xuguo Zhou, Associate Professor, Ph.D., Nebraska, 2002

**FAMILY SCIENCES**

Ronald Werner-Wilson, Chair

Suzanne B. Badenhop, Extension Professor Emerita, Ph.D., Cornell, 1970
Darla R. Botkin, Associate Professor Emerita, Ph.D., Tennessee, 1983
Gregory W. Brock, Professor Emeritus, Ph.D., Penn State, 1978
John F. Crosby, Professor Emeritus, Ph.D., Syracuse, 1970
Russ Ann Crum, Associate Professor Emerita, M.S., Kentucky, 1980
Kenneth Culp III, Adjunct Associate Professor, Ph.D., Purdue, 1995
Robert H. Flashman, Extension Professor Emeritus, Ph.D., Ohio State, 1976
Raymond Forgue, Associate Professor Emeritus, Ph.D., Virginia Tech, 1980
Diana L. Halem, Senior Lecturer, Ph.D., Kentucky, 1998
Jason Hans, Professor, Ph.D., Missouri, 2004
Claudia J. Heath, Professor, Ph.D., Iowa State, 1981
Gladys J. Hildreth, Professor Emerita, Ph.D., Michigan State, 1973
Jennifer L. Hunter, Extension Professor, Ph.D., Kentucky, 2010
Hyungsoo Kim, Associate Professor, Ph.D., Kyotio, 2000
Amy F. Kostelic, Associate Professor, Ph.D., Kentucky, 2006
Sandra Miller, Professor Emerita, Ph.D., Ohio State, 1971
David C. Payne, Associate Professor Emeritus, Ph.D., Indiana, 1965
Samuel Quick, Extension Professor Emeritus, Ph.D., Florida State, 1975
D. Bruce Ross III, Assistant Professor, Ph.D., Georgia, 2017
Domma. R. Smith, Special Associate Professor, Ph.D., Ohio State, 1989
Ann Vail, Professor, Ph.D., Ohio State, 1991
Alexander T. Vazsonyi, Professor, Ph.D., Arizona, 1995
Retia Scott Walker, Professor Emerita, Ph.D., Iowa State, 1982
O’Neal Weeks, Professor Emeritus, Ph.D., North Carolina, 1972
Ronald Werner-Wilson, Professor, Ph.D., Georgia, 1993
Tracey Werner-Wilson, Lecturer, M.S.W., Western Michigan, 1995
Nathan D. Wood, Associate Professor, Ph.D., Brigham Young, 2004

FORESTRY AND NATURAL RESOURCES
Jeffrey W. Stringer, Chair
Albert Abbott, Adjunct Assistant Professor, Ph.D., Brown, 1981
Mary A. Arthur, Professor, Ph.D., Cornell, 1990
Christopher D. Barton, Professor, Ph.D., Kentucky, 1999
Danna Baxley, Adjunct Assistant Professor, Ph.D., Southern Mississippi, 2007
John Brunjes, Adjunct Assistant Professor, Ph.D., Texas Tech, 2005
Terrance Conners, Extension Associate Professor, Ph.D., Virginia Tech, 1985
Marco A. Contreras, Associate Professor, Ph.D., Montana, 2010
Claudia A. Cotton, Adjunct Assistant Professor, Ph.D., Virginia Tech, 2010
John J. Cox, Associate Professor, Ph.D., Kentucky, 2003
Darryl W. Cremeans, Adjunct Instructor, Ph.D., Kentucky, 1992
Ellen Crocker, Extension Assistant Professor, Ph.D., Cornell, 2015
Tyler J. Dreaden, Adjunct Assistant Professor, Ph.D., Florida, 2014
Wendell R. Haag, Adjunct Assistant Professor, Ph.D., Mississippi, 2002
Deborah B. Hill, Extension Professor Emeritus, Ph.D., Yale, 1977
Michael J. Lacki, Professor, Ph.D., North Carolina State, 1984
Laura R. Lhotka, Adjunct Instructor, Ph.D., Auburn, 2006
John Lhotka, Associate Professor, Ph.D., Auburn, 2006
Monte McGregor, Adjunct Assistant Professor, Ph.D., Auburn, 2000
Charles Dana Nelson, Adjunct Professor, Ph.D., Minnesota, 1988
Thomas O. Ochudodho, Assistant Professor, Ph.D., New Brunswick, 2013
Robert Paratley, Adjunct Instructor, M.S., Cornell, 1985
Steven J. Price, Associate Professor, Ph.D., Wake Forest, 2011
James M. Ringe, Professor, Ph.D., Purdue, 1983
Matthew Springer, Extension Assistant Professor, Ph.D., Southern Illinois, 2016
Jeffrey W. Stringer, Extension Professor, Ph.D., Kentucky, 1993
David B. Wagner, Associate Professor Emeritus, Ph.D., California-Davis, 1986
Jian Yang, Assistant Professor, Ph.D., Missouri, 2005

HORTICULTURE
Mark Williams, Interim Chair
George F. Antonious, Adjunct Assistant Professor, Ph.D., Alexandria, 1983
Douglas D. Archbold, Professor, Ph.D., Michigan State, 1973
Jack W. Buxton, Associate Professor Emeritus, Ph.D., Kentucky, 1973
Seth DeBolt, Professor, Ph.D., Atlanta, 2006
Bruce Downie, Professor, Ph.D., Georgia, 1994
Winston Dunwell, Extension Professor, Ph.D., Idaho, 1978
Richard E. Durham, Extension Professor, Ph.D., Florida, 1990
William M. Fountain, Extension Professor, Ph.D., Louisiana, 1979
Robert L. Geneve, Professor, Ph.D., Minnesota, 1985
Robert L. Houtz, Professor, Ph.D., Michigan State, 1984
Dewayne L. Ingram, Extension Emeritus Professor, Ph.D., Tennessee, 1977
Krista L. Jacobsen, Assistant Professor, Ph.D., Georgia, 2008
R. Terry Jones, Extension Emeritus Professor, Ph.D., Ohio State, 1974
Thomas R. Kemp, Professor Emeritus, Ph.D., Kentucky, 1970
Carlos R. Lopez, Assistant Professor, Ph.D., Reading University, United Kingdom, 2005
Shawn Lucas, Adjunct Assistant Professor, Ph.D., Kentucky, 2013
Robert E. McNeil, Extension Emeritus Professor, Ph.D., Purdue, 1975
Kirk W. Pomper, Adjunct Associate Professor, Ph.D., Oregon State, 1995
C. R. Roberts, Extension Professor Emeritus, Ph.D., Texas A&M, 1964
Rachel F. Rudolph, Extension Assistant Professor, Ph.D., Washington State, 2017
Ruth Scott, Lecturer, M.S., Kentucky, 2000
John C. Snyder, Associate Professor, Ph.D., Minnesota, 1978

John G. Strang, Extension Professor, Ph.D., Oregon State, 1978
Leigh Whittinghill, Adjunct Assistant Professor, Ph.D., Michigan State, 2012
Mark A. Williams, Professor, Ph.D., California-Irvine, 1998
Mary L. Witt, Extension Professor Emerita, Ph.D., Oregon State, 1976

LANDSCAPEARCHITECTURE
Ned M. Crankshaw, Chair
Ned M. Crankshaw, Professor, M.L.A., Iowa State, 1988
Molly M. Davis, Adjunct Assistant Professor, B.S.L.A., Kentucky, 1987
Ryan Hargrove, Associate Professor, Ph.D., North Carolina State, 2007
Jayoung Koo, Extension Associate Professor, Ph.D., California-Davis, 2012
Brian D. Lee, Professor, Ph.D., Penn State, 2005
Thomas J. Nieman, Professor Emeritus, Ph.D., Southern Illinois, 1973
Jordan A. Phemister, Assistant Professor, M.L.A., Virginia, 2006
Christopher K. Sass, Associate Professor, Ph.D., Kansas State, 2011
Horst Schach, Professor Emeritus, M.L.A., California-Berkeley, 1966
Andrea Carolina Segura, Senior Lecturer, M.C.P., Cincinnati, 2010

PLANT AND SOIL SCIENCES
Rebecca L. McCulley, Chair
William A. Bailey, Extension Professor, Ph.D., Virginia Tech, 2002
Richard Irven Barnhise, Professor Emeritus, Ph.D., Virginia Tech, 1964
Michael Barrett, Professor, Ph.D., California-Davis, 1980
Carol Baskin, Professor, Ph.D., Vanderbilt, 1968
Robert L. Blevins, Professor Emeritus, Ph.D., Ohio State, 1967
Harold Rhodes Burton, Associate Professor Emeritus, Ph.D., Louisville, 1964
Lowell Palmer Bush, Professor Emeritus, Ph.D., Iowa State, 1964
Glenn Burton Collins, Professor Emeritus, Ph.D., North Carolina State, 1966
Mark S. Coyne, Professor, Ph.D., Michigan State, 1989
Elisa M. D’Angelo, Associate Professor, Ph.D., Florida, 1998
H. Maelor Davies, Professor Emeritus, Ph.D., London, 1977
Randi D. Dinkins, Adjunct Associate Professor, Ph.D., University of British Columbia, 1992
David C. Ditsch, Professor Emeritus, Ph.D., Virginia Tech, 1991
Charles Thomas Dougerty, Professor Emeritus, Ph.D., Purdue, 1966
Dennis B. Egli, Professor Emeritus, Ph.D., Illinois, 1949
Wilbur W. Frye, Professor Emeritus, Ph.D., Virginia Tech, 1969
Lawrence J. Grabau, Professor, Ph.D., Missouri, 1984; Ph.D., Kentucky, 2016
J.D. Green, Extension Professor, Oklahoma State, 1986
John Hamman Grove, Professor, Ph.D., Georgia, 1980
Erin R. Haramoto, Assistant Professor, Ph.D., Michigan State, 2014
Jimmy C. Henning, Extension Professor, Ph.D., Kentucky, 1986
James Herbek, Extension Professor Emeritus, Ph.D., Illinois, 1970
Andrew J. Hiatt, Professor Emeritus, Ph.D., North Carolina State, 1960
David Floyd Hildebrand, Professor, Ph.D., Illinois, 1982
Arthur G. Hunt, Professor, Ph.D., Brandeis, 1981
Isabelle A. Kagan, Adjunct Assistant Professor, Ph.D., Michigan State, 1999
Anastasios D. Karathanasis, Professor Emeritus, Ph.D., Auburn, 1982
Tomokazu Kawashima, Assistant Professor, Ph.D., California-Los Angeles, 2009
Carrie Knott, Extension Associate Professor, Ph.D., Kentucky, 2007
Garry Lacefield, Extension Professor Emeritus, Ph.D., Missouri, 1974
Brad D. Lee, Extension Associate Professor, Ph.D., California-Riverside, 1999
Chad D. Lee, Extension Professor, Ph.D., Michigan State, 2002
Travis R. Legleiter, Extension Assistant Professor, Ph.D., Purdue, 2017
James R. Martin, Extension Professor Emeritus, Ph.D., Kentucky, 1978
Christopher J. Mataocha, Associate Professor, Ph.D., Delaware, 2000
Rebecca L. McCulley, Professor, Ph.D., Colorado State, 2002
Joshua McGrath, Extension Assistant Professor, Ph.D., Delaware, 2004
David McNear, Associate Professor, Ph.D., Delaware, 2005
Robert D. Miller, Special Professor, Ph.D., Kentucky, 1980
Luke A. Moe, Associate Professor, Ph.D., Wisconsin-Madison, 2005
Gregg Munshaw, Extension Associate Professor, Ph.D., Virginia Tech, 2003
Lloyd W. Murdock, Jr., Extension Professor Emeritus, Ph.D., Kentucky, 1967
Gary K. Palmer, Extension Professor, Ph.D., Tennessee, 1984
Robert C. Pearce, Extension Professor, Ph.D., Georgia, 1994
Sharyn E. Perry, Professor, Ph.D., Wisconsin-Madison, 1993
Todd Wayne Pfeiffer, Professor, Ph.D., Wisconsin-Madison, 1982
Timothy D. Phillips, Associate Professor, Ph.D., North Carolina State, 1991
Hanna J. Polfennbarger, Assistant Professor, Ph.D., Iowa State, 2017
Charles Gustav Poneleit, Professor Emeritus, Ph.D., Purdue, 1968
John Leonard Ragland, Professor Emeritus, Ph.D., North Carolina State, 1959
Monroe Rasmace, Extension Assistant Professor Emeritus, Ph.D., Kentucky, 1973
Wei Ren, Assistant Professor, Ph.D., Auburn, 2009
Harold B. Rice, Extension Associate Professor Emeritus, Ph.D., North Carolina State, 1966
University Faculty

Edwin L. Ritchey, Extension Associate Professor, Ph.D., Kentucky, 2010
Montserrat Salmeron Cortas, Assistant Professor, Ph.D., University of Lleida, Spain, 2011
Travis Shaddox, Research Assistant Professor, Ph.D., Florida, 2004
Chris Shepard, Assistant Professor, Ph.D., Arizona, 2018
Frank J. Sikora, Associate Professor Emeritus, Ph.D., Illinois, 1986
John Leonidas Sims, Professor Emeritus, Ph.D., Iowa State, 1960
Karamat Sistani, Adjunct Professor, Ph.D., Oklahoma State 1983
Jan Smalle, Associate Professor, Ph.D., Ghent, 1998
M. Scott Smith, Professor Emeritus, Ph.D., Michigan State, 1978
S. Ray Smith Jr., Extension Professor, Ph.D., Georgia, 1991
John Spargo, Adjunct Assistant Professor, Ph.D., Virginia Tech, 2008
Chris Teutsch, Extension Associate Professor, Ph.D., Kentucky, 2000
Dennis M. TeKrony, Professor Emeritus, Ph.D., Oregon State, 1969
William Orville Thom, Extension Professor Emeritus, Ph.D., Missouri, 1975
Olga V. Tsyusko, Associate Professor, Ph.D., Georgia, 2004
Jason M. Urine, Associate Professor, Ph.D., Georgia, 2004
David Anthony Van Sanford, Professor, Ph.D., North Carolina State, 1981
George Joseph Wagner, Professor Emeritus, Ph.D., SUNY at Buffalo, 1974
Michael Weintraub, Adjunct Assistant Professor, Ph.D., California-Santa Barbara, 2004
Kenneth Lincoln Wells, Extension Professor Emeritus, Ph.D., Iowa State, 1963
Ole Wendroth, Professor, Ph.D., Georg-August-University Gottingen, 1990
David W. Williams, Professor, Ph.D., Kentucky, 1996
Tanja Williamson, Adjunct Assistant Professor, Ph.D., California-Riverside, 1999
William W. Witt, Professor Emeritus, Ph.D., North Carolina State, 1974
Ling Yuan, Professor, Ph.D., Texas-Austin, 1988
Hongyang Zhu, Professor, Ph.D., Texas A&M, 2001
Demetrio Zourarakis, Adjunct Assistant Professor, Ph.D., Kentucky, 1992

PLANT PATHOLOGY

Christopher L. Scharl, Chair
A. Rick Bennett, Professor, Ph.D., West Virginia, 1987
Carl A. Bradley, Extension Professor, Ph.D., Illinois-Urbana, 2001
Mark L. Farman, Professor, Ph.D., East Anglia, 1990
Saied A. Ghabrial, Professor Emeritus, Ph.D., Louisiana, 1963
Nicole A. Gauthier, Extension Associate Professor, Ph.D., Louisiana State, 2010
Michael M. Goodin, Professor, Ph.D., Penn State, 1996
John R. Hartman, Extension Professor Emeritus, Ph.D., Wisconsin, 1971
James W. Hendrix, Professor Emeritus, Ph.D., North Carolina State, 1963
Donald E. Hershman, Extension Professor Emeritus, Ph.D., Rutgers, 1983
R. Louis Hirsch, Lecturer, Ph.D., Arkansas, 2014
Aarda Kachroo, Professor, Ph.D., Maharaja Sayajirao University of Baroda, 1999
Pradeep Kachroo, Professor, Ph.D., Maharaja Sayajirao University of Baroda, 1995
Joseph A. Kuc, Professor Emeritus, Ph.D., Purdue, 1955
Peter D. Nagy, Professor, Ph.D., Kazhthely, 1990
William C. Nesmith, Extension Professor Emeritus, Ph.D., North Carolina State, 1977
Emily E. Pfeuffer, Extension Assistant Professor, Ph.D., Pennsylvania State, 2014
Thomas P. Pirone, Professor Emeritus, Ph.D., Wisconsin, 1960
Christopher L. Scharl, Professor, Ph.D., California-Davis, 1983
Louis Shin, Professor Emeritus, Ph.D., North Carolina State, 1967
John G. Shaw, Professor Emeritus, Ph.D., Wisconsin, 1960
Shah J. Sheen, Professor Emeritus, Ph.D., Minnesota, 1962
Robert J. Shepherd, Professor Emeritus, Ph.D., Wisconsin, 1959
Malcolm R. Siegel, Professor Emeritus, Ph.D., Maryland, 1962
David A. Smith, Professor Emeritus, Ph.D., Cornell, 1974
Lisa J. Vaillancourt, Professor, Ph.D., Purdue, 1991
Paul Vincelli, Extension Professor, Ph.D., Cornell, 1988
Kiersten A. Wise, Extension Professor, Ph.D., North Dakota State, 2008

RETAILING AND TOURISM MANAGEMENT

Vanessa Jackson, Chair
Desmond Brown, Special Associate Professor Emeritus, Ph.D., Virginia Tech, 1996
RayCarol Cavender, Assistant Professor, Ph.D., Virginia Tech, 2012
Elizabeth Easter, Professor, Ph.D., Pennsylvania, 1982
Vanessa Jackson, Professor, Ph.D., Michigan State, 1998
Min-Young Lee, Professor, Ph.D., Tennessee, 2007
Ying Lu, Assistant Professor, Ph.D., Purdue, 2011
Robert Meuret, Lecturer, M.Ed., Northern Arizona, 2002
Susan O. Michelman, Associate Professor Emerita, Ph.D., Minnesota, 1992
Kim Miller-Spillman, Associate Professor, Ph.D., Wisconsin-Madison, 1990
Jason R. Swanson, Associate Professor, Ph.D., North Carolina State, 2010
Mika L. Turner-Pryor, Lecturer, M.S., Kentucky, 2005
Scarlett C. Wesley, Associate Professor, Ph.D., Tennessee, 1996
Pei Zhang, Assistant Professor, Ph.D., South Carolina, 2017

VETERINARY SCIENCE

David W. Horohov, Chair
Emma Adam, Clinical Assistant Professor, Ph.D., Kentucky, 2016
Lauren Michelle Arnold, Clinical Associate Professor, D.V.M., Tennessee-Knoxville, 1990
Ernest F. Bailey, Professor, Ph.D., California-Davis, 1980
Barry A. Ball, Professor, D.V.M., Georgia, 1981; Ph.D., Cornell, 1987
David C. Bolin, Special Associate Professor, D.V.M., Purdue, 1980; Ph.D., Purdue, 1988
Uneeda Bryant, Special Associate Professor, D.V.M., Tuskegee Institute, 2002
Craig Carter, Special Associate Professor, D.V.M., Ph.D., Texas A&M, 1981, 1993
Lynee M. Cassone, Clinical Assistant Professor, D.V.M., Texas A&M, 1999
Thomas M. Chambers, Professor, Ph.D., Notre Dame, 1982
Seth E. Chapman, Adjunct Assistant Professor, D.V.M., Tennessee, 2002
Undine Christmann, Adjunct Assistant Professor, D.V.M., State University of Liege, 1997, Ph.D., Virginia Tech, 2008

University of Kentucky 2019-2020 Undergraduate Bulletin 336
University Faculty

Kim Woodrum, Senior Lecturer, Ph.D., Kentucky, 1989
Dong-Sheng Yang, Professor, Ph.D., Western Ontario, 1990
Steven W. Yates, Professor, Ph.D., Purdue, 1973
*Joint Appointment

EARTH AND ENVIRONMENTAL SCIENCES
Edward W. Woolery, Chair

Regular Faculty
Andrea Erhardt, Assistant Professor, Ph.D., Stanford, 2013
Frank R. Ettensohn, Professor, Ph.D., Illinois 1975
Rebecca L. Freeman, Assistant Professor, Ph.D., Tulane, 2011
Alan E. Fryar, Professor, Ph.D., Alberta, 1992
Michael M. McGlue, Associate Professor, Ph.D., Arizona, 2011
David P. Moecher, Professor, Ph.D., Michigan, 1988
Keeley O’Farrell, Assistant Professor, Ph.D., Toronto, 2013
Dhananjay Ravat, Professor, Ph.D., Purdue, 1989
J. Ryan Thigpen, Associate Professor, Ph.D., Virginia Tech, 2009
Edward W. Woolery, Professor, Ph.D., Kentucky, 1998
Kevin Yeager, Associate Professor, Ph.D., Texas A&M, 2002

Research Faculty
William C. Haneberg, Professor, Ph.D., Cincinnati, 1989
James Hower, Adjunct Professor, Ph.D., Penn State, 1978

Lecturers
Kent Ratajewski, Senior Lecturer, Ph.D., North Carolina, 1999

Adjunct Faculty
J. Richard Bowersox, Adjunct Assistant Professor, Ph.D., South Florida, 2006
Cortland Eble, Adjunct Assistant Professor, Ph.D., West Virginia, 1988
Stephen Greb, Adjunct Associate Professor, Ph.D., Kentucky, 1992
John Hickman, Adjunct Assistant Professor, Kentucky, 2011
Thomas M. Parris, Adjunct Assistant Professor, Ph.D., California-Santa Barbara, 1998
Zhenming Wang, Adjunct Associate Professor, Ph.D., Kentucky, 1998
Jungfeng Zhu, Adjunct Associate Professor, Ph.D., Arizona, 2005

Emeritus Faculty
Richard I. Barnhisel, Professor Emeritus, Ph.D., Virginia Tech, 1964
William H. Blackburn, Jr., Professor Emeritus, Emeritus, Ph.D., MIT, 1968
Bruce R. Moore, Associate Professor Emeritus, Ph.D., Melbourne, Australia, 1967
Kieran D. O’Hara, Associate Professor Emeritus, Ph.D., Brown, 1984
Susan M. Rimmer, Professor Emeritus, Ph.D., Penn State, 1985
Lyle Sendlein, Professor Emeritus, Ph.D., Iowa State, 1964
Ronald L. Street, Associate Professor Emeritus, Ph.D., St. Louis, 1975
William A. Thomas, Professor Emeritus, Ph.D., Virginia Tech, 1960

ENGLISH
Jonathan M. Allison, Chair

Jonathan M. Allison, Professor, Ph.D., Michigan, 1988
Frederick Bengtsson, Lecturer, Ph.D., Columbus, 2014
Jordan Brower, Assistant Professor, Ph.D., Yale, 2016
Michael Carter, Senior Lecturer, M.F.A., Montana, 1983
Jeffrey A. Clymer, Professor, Ph.D., Duke, 1998
Rynetta Sherri Davis, Assistant Professor, Ph.D., Kentucky, 2006

Soohyung Joo, Assistant Professor, Ph.D., Wisconsin-Milwaukee, 2013
Renee Kaufmann, Assistant Professor, Ph.D., Kentucky, 2014
Youngseok Kim, Associate Professor, Ph.D., Syracuse, 2013
Amanda Lawrence, Lecturer, Ph.D., Kentucky, 2018
Joe Martin, Lecturer, Th.M., Southern Baptist Theological Seminary, 2012
Shannon M. Oltmann, Associate Professor, Ph.D., Indiana, 2011
Nicholas J. Proferes, Assistant Professor, Ph.D., Wisconsin-Milwaukee, 2013
Robert M. Shapiro, Assistant Professor, M.A., Kentucky, 2010
Rachel Steckler, Lecturer, M.A., Kentucky, 2012
Jesalyn Vallade, Assistant Professor, Ph.D., West Virginia, 2014
Fatima K. Espinoza Vasquez, Assistant Professor, Ph.D., Syracuse, 2016
Fallon Watson, Lecturer, Psy.D., University of the Rockies, 2013
Sherali Zealady, Associate Professor, Ph.D., University of Buckingham (England), 1996

*Joint Appointment

COLLEGE OF DENTISTRY
Larry E. Holloway, Interim Dean

DEPARTMENT OF ORAL HEALTH PRACTICE
Robert Frazer, Chair

Comprehensive Care
Emily Winfrey, Division Chair

Tyler Bolin, D.M.D., Assistant Professor (part-time), D.M.D., Kentucky, 2013
Jane Jordan, Assistant Professor (part-time), D.M.D., Kentucky, 1987

*Joint Appointment
Kristy A. Lawson, Assistant Professor, D.M.D., Kentucky, 2005
Thomas A. McConnell, Associate Professor, D.D.S., University of the Pacific, 1977
Cheryl A. Pearson, Assistant Professor (part-time) D.M.D., Kentucky, 1981
Deborah S. Ray, Assistant Professor, D.M.D., Kentucky, 1987; GPR Cert., Kentucky, 1988
Robert C. Taylor, Assistant Professor, D.M.D., Kentucky, 2003
David Thornton, Assistant Professor, D.M.D., Kentucky, 2000
Kathryn H. Wade, Assistant Professor, D.M.D., Kentucky, 2018; GPR Cert., Kentucky, 2019
Emily Winfrey, D.M.D., Assistant Professor, D.M.D., Kentucky, 2013
Allison Wright, Assistant Professor (part-time) D.D.S., Louisville, 2003; M.S., and Cert. Perio, Kentucky, 2013

Endodontics
Alfred Wiemann, Division Chief

Alfred H. Wiemann, Assistant Professor, D.M.D., Kentucky, 1981
Mark A. Schachman, Assistant Professor, D.M.D., Rutgers, 1987; Cert. Endo., New York, 1993
Paul T. Wehrman, Assistant Professor (part-time), D.M.D., Kentucky, 1973; Cert. Endo., Pittsburgh, 1978

Oral Diagnosis, Oral Medicine and Oral Radiology
Craig S. Miller, Division Chief

Robert Danaher, Assistant Professor, Ph.D., Maryland, 1994
David M. DeVito, Assistant Professor, Ph.D., Florida, 2006; D.M.D., Kentucky, 2015
Teressa A. Dawahare Lyon, Assistant Professor (part-time), D.M.D., Kentucky, 1989; Cert., G.P.R., Kentucky, 1991
Craig S. Miller, Professor, D.M.D., Kentucky, 1982; Cert., G.P.R., USAF, 1983; M.S., Texas-San Antonio, 1987
Thamar Mushah, Assistant Professor, B.D.S., Univ. of Al Fateh, Libya, 2003
Kenneth B. Nusabacher, Assistant Professor, D.M.D., Kentucky, 2008
Marcia Rojas, D.D.S., M.S., Assistant Professor, D.D.S., Univ. of Costa Rica, 2010; M.S., Kentucky, 2015
B. Lynn Theiss, Assistant Professor, D.M.D., Kentucky, 1986; G.P.R., Kentucky 1988; M.S.D., Geriatric Dental Fellowship, Kentucky, 1991

Periodontics
Mohanad Al-Sabbagh, Division Chief

Mohanad Al-Sabbagh, Professor, D.D.S., Damacus, Syria, 1993; M.S., Buffalo, 2002
Brittany Camenisch, Assistant Professor, D.M.D., Kentucky, 2013; M.S., Kentucky, 2018; Perio Cert., Kentucky, 2018
Delph Dawson, Assistant Professor, D.M.D., Louisville, 1993; M.S., Kentucky, 1998
Prathishta Mishra, Assistant Professor, B.D.S., India, 2006; M.S.D., India, 2011; Orofacial Pain Cert., Kentucky, 2018
Elliot Neuman, Assistant Professor (part-time) D.M.D., Kentucky, 2011; M.S., Kentucky, 2014
Thomas G. Rubino, Assistant Professor (part-time) D.D.S., Kentucky, 1985; M.S., Kentucky, 1988
Luciana M. Shaddox, Associate Professor, D.D.S., 2001; M.S., 2003; Ph.D., 2005, State Univ. of Campinas, Brazil

Prosthodontics
Richard J. Windhorn, Division Chief

Marcus F. Abboud, Professor, D.D.S., Bonn, Germany, 1996; Ph.D., Bonn Germany, 2000; Cert. Oral Surgery, Bonn Germany; Cert. CBCT Technology and Diagnostics, Dental Medical Assoc., Nordheim, Germany
Kevin Elvidge, D.M.D., Assistant Professor, D.M.D., Kentucky, 1984
Rodrigo Fuentes-Hidalgo, Assistant Professor, D.D.S., Univ. of Concepcion, Chile, 1996
Sarah F. Johnson, Assistant Professor (part-time) D.M.D., Kentucky, 1994; Cert. Prosthodontics, Louisville, 1996
Ahmad Kukti, Assistant Professor, D.D.S., Univ. of Jordan, 2001; M.S.D., New York, 2010
Carlos Rodriguez, Assistant Professor, D.M.D., Kentucky, 1981
Richard J. Windhorn, Assistant Professor, D.M.D., Kentucky, 1983; Cert. Prosthodontics, Fort Gordon, Georgia, 1996

Restorative Dentistry
Howard W. Roberts, Division Chief

Rewida A. Abdalla, Assistant Professor, D.D.S., Ain Shams Univ., Egypt, 2007; M.S.D., Al-Azhar Univ., Egypt; Cert. Community Dentistry, Rochester, 2013; Cert. GPR, Rochester, 2015

Eliangela Bertoli, Assistant Professor, D.D.S., Universidade Federal Do Espirito, 1995; Cert. Endodontics, Universidade Federal Do Espirito, 1998; Cert. Orofacial Pain, Kentucky, 2000; M.S., Kentucky, 2005
Susan Bishai, Assistant Professor, Orthodont., D.M.D., Kentucky, 2001
Delon Graves, Assistant Professor (part-time), D.M.D., Louisville, 2013
H. F. Howard, Assistant Professor (part-time), D.M.D., Kentucky, 1982
Robert E. Kovarik, Associate Professor, D.M.D., Kentucky, 1982; M.S., Georgia, 1991
Stacie Maggard, Assistant Professor (part-time), D.M.D., Kentucky, 1998
Hiroko Nagaoka, Assistant Professor, D.D.S., Nihon Univ., Japan, 2001; M.S., North Carolina, 2013
Gitanjali L. Pinto-Sini, Assistant Professor, D.D.S., SUNY of Buffalo, 2001
Howard W. Roberts, Associate Professor, D.M.D., Kentucky, 1992; M.S., Marquette, 2006
Stephanie Roney, Assistant Professor (part-time), D.M.D., Kentucky, 1993
W. Michael Sadler, Assistant Professor (part-time) D.M.D., Alabama, 1975
Richard Stoss, Assistant Professor (part-time) D.M.D., Kentucky, 2006
Gregory A. Zoll, Assistant Professor (part-time) M.S.Ed., Kentucky, 1995

DEPARTMENT OF ORAL HEALTH SCIENCE
Ted Raybould, Interim Chair
Octavio A. Gonzalez, Associate Professor, D.D.S., Pontifical Javeriana Univ., Columbia, 1993; M.Sc., Pontifical Javeriana Univ., Columbia, 2002; Ph.D., Kentucky, 2010
Christine T. Harper, Assistant Professor (Adjunct), M.S., Dayton, 2002

Oral and Maxillofacial Surgery
Melyn Yeoh, Acting Division Chief
Enil A. Dominguez Fernandez, Assistant Professor, D.D.S., Central Univ. of Venezuela, 2001; Ebah Shehata, Assistant Professor, M.M.Ch.B., 1988; M.S., 1993; B.D.S., 1997; M.D., 2004; Univ. of Alexandria, Egypt
Steven Tucker, Assistant Professor (part-time), D.M.D., Kentucky, 1974; Cert. Oral and Maxillofacial Surgery, Kentucky, 1978
Joseph D. Van Sickels, Professor, D.D.S., Virginia, 1972
Melvin Yeoh, Assistant Professor, D.M.D., Pennsylvania, 2000; M.D., Cornell Univ., 2008

Pediatric Dentistry
Cristina V. Perez Pacheco, Division Chief
Kelly J. Dingrando, Assistant Professor, D.M.D., Kentucky, 2005; Cert. Pediatric Dentistry, Kentucky, 2019
Wendy K. Humphrety Van Meter, Assistant Professor (part-time), D.M.D., Kentucky, 2003; G.P.R. Cert., Kentucky, 2004; Cert. Pediatric Dentistry, Kentucky, 2008
Rodney Jackson, Assistant Professor (part-time), D.M.D., Kentucky, 2001
Julie Keller, Assistant Professor (part-time), D.M.D., Louisville, 1986; Cert. Pediatric Dentistry, Kentucky, 1988
Cristina V. Perez Pacheco, Assistant Professor, D.D.S., Concepcion, Chile, 1998; Cert., Clinical Pediatric Dentistry, Concepcion, Chile, 2000, Cert. Specialization in Pediatric Dentistry, Concepcion, Chile, 2002; Cert. and M.S., Orofacial Pain, Kentucky, 2011
Ronald Singer, Assistant Professor, D.D.S., Univ. of Southern California, 1979; Cert. Pediatric Dentistry, Univ. of California, The Center for Health Sciences, Los Angeles, 1981
Erwin G. Turner, Associate Professor, D.M.D., Kentucky, 1974; Cert. Pediatric Dentistry, Kentucky, 1976

Adult Dentistry
Ted P. Raybould, Division Chief
John B. Burt, Assistant Professor, D.M.D., Kentucky, 1996
Eric T. Demann, Associate Professor, D.M.D., Kentucky, 2000
Christian S. Fraley, Assistant Professor, D.M.D., Kentucky, 1996; G.P.R. Cert., Kentucky, 1997
Sherry Slone, Assistant Professor, D.M.D., Louisville, 2012
Daria Stone, Assistant Professor, D.M.D., Kentucky, 1995

Orthopedic Surgery
Molly H. Smith, Division Chief
Molly, H. Smith, Assistant Professor, D.D.S., Kentucky, 2013; Cert. GPR, VA, Gainesville, FL; 2014; Cert. Oral Pathology, Gainesville, FL, 2017
Dean K. White, Professor (part-time), D.D.S., Missouri, 1970; M.S.D., Indiana, 1972
**Orofacial Pain**

Jeffrey P. Okeson, Division Chief

Charles R. Carlson, Associate Professor (joint), Ph.D., Vanderbilt, 1983

Reny de Leuven, Professor, D.M.D., State Univ. Groningen, 1988; Ph.D., State Univ. Groningen, 1994

Hideaki Nagoaka, Assistant Professor, D.D.S., Nihon Univ., Japan, 2005; Ph.D., Nihon Univ., Japan, 2009

Isabel Moreno-Hay, Assistant Professor, D.D.S., Madrid, 2003; Cert., Implanted Prosthodontics, Madrid, 2006; Ph.D., Facial Treatment Specialist, Madrid, 2011; Cert., Orofacial Pain, Kentucky, 2013

Jeffrey P. Okeson, Professor, D.M.D., Kentucky, 1972

**Orthodontics**

G. Thomas Kluemper, Division Chief

Mohamed Bazina, Assistant Professor, B.D.S., Libya, 2007; GPR Internship, Libya, 2008; Cert. Orthodontics, Case Western, 2015; M.S., Case Western, 2016

James K. Hartfield, Jr., Professor, D.M.D., South Carolina, 1981; M.S., Indiana, 1983; M.Sc., Harvard, 1987; Ph.D., South Florida, 1993

Bruce S. Haskett, Professor (part-time), D.M.D., Pittsburgh, 1973; Cert. Orthodontics, Univ. of Rochester, 1975; Ph.D. Physical Anthropology, Pittsburgh, 1978

G. Thomas Kluemper, Professor, D.M.D., Kentucky, 1983; M.S., Orthodontics, Michigan, 1991

Judson M. Knight, Associate Professor (part-time), D.M.D., Kentucky, 1967; Cert. Orthodontics, Kentucky, 1972

Stephanos Kyriakides, Professor, D.D.S., Univ. of Athens, 1991; Cert. Orthodontics, Eastman Dental Center, 1994; Cert. Orofacial Pain, Eastman Dental Center, 1995; M.S., Neurobiology, Univ. of Rochester, 1997; Cert. General Dentistry, Eastman Dental Center, 1997; Ph.D., Neuroscience, University of Rochester, 1999

Lori Morford, Assistant Professor, Ph.D., Kentucky, 1995

Robert Rust, Assistant Professor (part-time), D.M.D., Louisville, 1981; Cert. and M.S. Orthodontics, Kentucky, 1985

Lina Sharab, Assistant Professor, D.M.D., Al-Ba’ath Univ., Syria, 2003; M.S., Kentucky, 2014

James Thacker, Assistant Professor (part-time), D.D.S., Case Western, 1982; Cert. Orthodontics, Boston, 1984

J. Philip Wahle, Assistant Professor (part-time), D.M.D., Kentucky, 1990; M.S., Kentucky, 1993

**Public Health Dentistry**

Ted Raybould, Interim Division Chief

Wesley Coffman, Assistant Professor (part-time), D.M.D., Kentucky, 1978

Nancy E. Rigidon, Assistant Professor, D.M.D., Kentucky, 1994; GPR Cert., Kentucky, 1995

Keith White, Assistant Professor, D.M.D., Kentucky, 1986

**SCHOOL OF ARCHITECTURE**

Jeffrey Johnson, Director

David M. Biagi, Associate Professor, M.Arch., Ohio State

Clyde R. Carpenter, Professor, M.Arch., Pennsylvania

Angus Eade, Assistant Professor, M.Arch., Harvard

Anne Filson, Associate Professor, M.Arch., Columbia

EARLY CHILDHOOD, SPECIAL EDUCATION, AND REHABILITATION COUNSELING

Ralph Crystal, Chair
Kera Ackerman, Assistant Professor, Ph.D., Kentucky, 2017
Richard Alliday, Associate Professor, Ph.D., Auburn, 2004
Melinda Ault, Associate Professor, Ph.D., Kentucky, 2010
Margaret Bausch, Professor, Ed.D., Kentucky, 1999
William H. Berdine, Professor Emeritus, Ed.D., Penn State, 1972
Brian Bottge, Professor, Ph.D., Tennessee, 1991
Belva Collins, Professor Emeritus, Ed.D., Kentucky, 1990
Ralph M. Crystal, Professor, Ph.D., Wisconsin, 1977
Sonja M. Feist-Price, Professor, Ph.D., Southern Illinois, 1992
Jennifer Grisham-Brown, Professor, Ed.D., Kentucky, 1985
Debra A. Harley, Professor, Ph.D., Southern Illinois, 1992
Sarah Hawkins-Leal, Clinical Associate Professor, Ed.D., Kentucky, 2008
Channon Horn, Clinical Associate Professor, Ph.D., Kentucky, 2010
Justin Kaiser, Clinical Assistant Professor, Ph.D., Pittsburgh, 2014
Justin Lane, Assistant Professor, Ph.D., Georgia, 2014
Donna Lee, Clinical Associate Professor, Ph.D., Western Michigan, 2012
Allison Levine, Assistant Professor, Ph.D., Michigan State, 2018
Kristen Maxwell, Clinical Assistant Professor, Ph.D., Wisconsin-Madison, 2016
Katherine McCormick, Professor, Ph.D., Auburn, 1990
Robert McKenzie, Professor Emeritus, Ph.D., Iowa, 1981
C. Michael Nelson, Professor Emeritus, Ed.D., Kansas, 1969
Jackie Rogers, Clinical Associate Professor, Ph.D., Kentucky, 2001
Phillip Rumrill, Professor, Ph.D., Arkansas, 1993
Kelly Sampson, Clinical Assistant Professor, M.S., Eastern Kentucky, 1990
Collin Shepley, Assistant Professor, Ph.D., Kentucky, 2019
Sally Shepley, Assistant Professor, Ph.D., Georgia, 2015
Deborah Bott Slaton, Professor Emeritus, Ph.D., Florida, 1983
Amy Spriggs, Associate Professor, Ph.D., Georgia, 2011
Kim Townley, Associate Professor Emeritus, Ph.D., Missouri, 1984
Keith Wilson, Professor, Ph.D., Ohio State, 1997

EDUCATIONAL, SCHOOL, AND COUNSELING PSYCHOLOGY

Kenneth Tyler, Chair
Kathleen Aspiranti, Assistant Professor, Ph.D., Tennessee, 2011
Charlotte Clark, Associate Professor Emeritus, Ph.D., Minnesota, 1977
Fred W. Danner, Professor Emeritus, Ph.D., Minnesota, 1974
Stephen T. DeMers, Professor Emeritus, Ed.D., Rutgers, 1976
Alicia Fedewa, Associate Professor, Ph.D., Michigan State, 2009
Joseph Hammer, Assistant Professor, Ph.D., Iowa, 2015
Rachel Hammond, Clinical Associate Professor, Ph.D., Kentucky, 2009
Candice Hargons, Assistant Professor, Ph.D., Georgia, 2015
Xin Ma, Professor, Ph.D., British Columbia, 1997
H. Thompson Prout, Professor Emeritus, Ph.D., Indiana, 1976
Jeff Reese, Professor, Ph.D., Texas A&M, 2000
Pam Remer, Associate Professor Emeritus, Ph.D., Colorado, 1972
Rory Remer, Professor Emeritus, Ph.D., Colorado, 1972
Sharon S. Rostosky, Professor, Ph.D., Tennessee, 1998
Lisa Ruble, Professor, Ph.D., Indiana, 1998
Danelle Stevens-Watkins, Associate Professor, Ph.D., Kentucky, 2008
Michael Toland, Associate Professor, Ph.D., Nebraska-Lincoln, 2008
Kenneth M. Tyler, Professor, Ph.D., Howard, 2002
Ellen Usher, Associate Professor, Ph.D., Emory, 2007
Isaac Woods, Assistant Professor, Ph.D., Memphis, 2017
Judith Worell, Professor Emeritus, Ph.D., Ohio State, 1954
Lynda Brown Wright, Professor Emeritus, Ph.D., Texas A&M, 1991

EDUCATIONAL LEADERSHIP STUDIES

John Nash, Chair
Justin Bathon, Associate Professor, Ph.D., Indiana-Bloomington, 2008
Lars G. Bjork, Professor, Ph.D., New Mexico, 1983
Patricia Browne-Ferrigno, Professor, Ph.D., Colorado-Denver, 2001
Fred Edmonds, Professor Emeritus, Ed.D., Kentucky, 1961
J. John Harris III, Professor Emeritus, Ph.D., Michigan, 1972
Wayne Lewis, Associate Professor, Ph.D., North Carolina State, 2009
John Nash, Associate Professor, Ph.D., Wisconsin-Madison, 1992
Mary John O’Hair, Professor, Ed.D., New Mexico State, 1987
Amanda Potterton, Assistant Professor, Ph.D., Arizona State, 2017
Jayson Richardson, Associate Professor, Ph.D., Minnesota, 2007
Beth Rous, Professor, Ed.D., Professor, Kentucky, 2001
Eddy J. Van Meter, Professor Emeritus, Ed.D., New Mexico State, 1971
Gene Wilhoit, Clinical Assistant Professor, MAT, Indiana, 1971
Lu Young, Clinical Associate Professor, Ed.D., Northern Kentucky, 2013

EDUCATIONAL POLICY STUDIES AND EVALUATION

Kelly Bradley, Chair
Richard Angelo, Associate Professor Emeritus, Ed.D., Temple, 1978
Jeffery P. Bieber, Associate Professor, Ph.D., Michigan, 1990
Kelly Bradley, Professor, Ph.D., Ohio State, 2002
Clinton Collins, Associate Professor Emeritus, Ph.D., Indiana, 1970
Alan J. DeYoung, Professor Emeritus, Ph.D., Stanford, 1975
Beth Goldstein, Associate Professor, Ph.D., Wisconsin, 1985
Julian Vasquez Heilig, Professor, Ph.D., Michigan, 2012
Jane Jensen, Associate Professor, Ph.D., Indiana, 1997
Wills Jones, Associate Professor, Ph.D., Vanderbilt, 2011
Edward Kifer, Professor Emeritus, Ph.D., Chicago, 1973
Jungmin Lee, Assistant Professor, Ph.D., Tennessee, 2014
Kubla Nikai, Clinical Assistant Professor, Ph.D., Kentucky, 2001
Virginia Davis Nordin, Associate Professor Emeritus, J.D., Harvard, 1959
Shannon Sampson, Clinical Assistant Professor, Ph.D., Kentucky, 2006
John Thelin, Professor, Ph.D., California-Berkeley, 1973
Richard Waddington, Assistant Professor, Ph.D., Michigan, 2012
Eric Weber, Associate Professor, Ph.D., Southern Illinois, 2007

KINESIOLOGY AND HEALTH PROMOTION

Benjamin Johnson, Chair
Mark Abil, Associate Professor, Ph.D., Utah, 2006
Rayma Beal, Associate Professor Emeritus, Ed.D., Cincinnati, 1985
Aaron Beighley, Professor, Ph.D., Arizona State, 2003
Stephanie Bennett, Assistant Professor, Ph.D., Middle Tennessee State, 2006
Haley Bergstrom, Assistant Professor, Ph.D., Nebraska, 2014
Stuart Best, Assistant Professor, Ph.D., Sydney, 2010
Lance Bollinger, Assistant Professor, Ph.D., East Carolina, 2013
T. Jeff Chandler, Adjunct Professor, Ed.D., Auburn, 1987
Jody L. Clasey, Professor, Ph.D., Illinois, 1993
Marc Cormier, Assistant Professor, Ph.D., West Virginia, 2014
Randall Crist, Assistant Professor, Ed.D., Kentucky 1994
Heather Erwin, Professor, Ph.D., Illinois, 2006
Elizabeth Fettrow-Whitney, Assistant Professor, Ph.D., Ohio, 2013
Fan Gao, Associate Professor, Ph.D., Penn State, 2004
Melinda Ickes, Associate Professor, Ph.D., Cincinnati, 2010
Jungmin Lee, Assistant Professor, Ph.D., Tennessee, 2014
Fan Gao, Associate Professor, Ph.D., Penn State, 2004
Melinda Ickes, Associate Professor, Ph.D., Cincinnati, 2010
Kathryn Lamphere, Assistant Professor, Ph.D., New Mexico, 2013
Kristen Mark, Associate Professor, Ph.D., Indiana, 2012
James Nance, Associate Professor Emeritus, Ed.S., Eastern Kentucky, 1977
Melody Noland, Professor, Ph.D., Maryland, 1981
Steve Parker, Associate Professor, Ed.D., Kentucky, 1995
Bruce A. Rector, Adjunct Professor, Ph.D., Kentucky, 1990
Richard Riggs, Associate Professor Emeritus, Ed.D., Tennessee, 1975
Michael Samaan, Associate Professor, Ph.D., Old Dominion, 2014
Robert Shapiro, Professor Emeritus, Ph.D., Illinois-Urbania, 1979
Lucian Taylor, Associate Professor, Ph.D., Mississippi, 1995
Dennis Vinton, Associate Professor Emeritus, Re.D., Indiana, 1969
Andrew Weiner, Associate Professor Emeritus, Ed.D., Georgia, 1976
James W. Yates, Associate Professor Emeritus, Ph.D., Penn State, 1980

University of Kentucky

**COLLEGE OF FINE ARTS**

Mark Shanda, Dean

**DEPARTMENT OF ARTS ADMINISTRATION**

Rachel Shane, Chair

Katherine Adams, Adjunct Assistant Professor, J.D., Kentucky, 1985
Tara L. Baker, Adjunct Assistant Professor, M.A., New York, 2011
Michael Braun, Associate Professor Emeritus, M.A., St. Cloud State, 1978
Nancy Denholm, Adjunct Assistant Professor, M.F.A., Florida State, 1981
Lee Erik Eashes, Lecturer, M.A., Savannah College of Art & Design, 2016
Michelle Franzetti, Adjunct Assistant Professor, M.A., Kentucky, 2015
Joe French, Adjunct Assistant Professor, M.S., South Alabama, 2013
Leah Hamilton, Adjunct Assistant Professor, M.S., Drexel, 2016
Steve Hoffman, Adjunct Assistant Professor, M.F.A., Wisconsin-Madison, 1992
Michael Ibrahim, Adjunct Assistant Professor, M.A., Boston, 2007
Yuha Jung, Associate Professor, Ph.D., Penn State, 2012
Heather Kuruvilla, Adjunct Assistant Professor, J.D., DePaul, 2015
Geraldine Maschio, Professor Emerita, Ph.D., Wisconsin-Madison, 1981
Christopher Montpetit, Adjunct Assistant Professor, M.F.A., Columbia, 1990
Kathryn Mullen, Adjunct Assistant Professor, M.A., Kentucky, 2016
Stephanie Richards, Lecturer, M.F.A., Iowa, 2003
Kristina Rideout, Adjunct Assistant Professor, M.A., Kentucky, 2015
Ellen Rosewall, Adjunct Assistant Professor, M.A., Minnesota, 1978
Jill Schinberg, Assistant Professor, M.F.A., Utah, 2005
Jennifer Scintarelli, Adjunct Assistant Professor, M.A., Ohio State, 2009
Rachel Shone, Associate Professor, Ph.D., Ohio State, 2006
Jeremy Stiffler, Adjunct Assistant Professor, M.S., Penn State, 2011
Misty Tolle, Adjunct Assistant Professor, M.A., Juilliard School, 2000

**SCHOOL OF ART AND VISUAL STUDIES**

Robert Jensen, Director

Patrick Adams, Instructor, M.F.A., Kentucky, 1992
Ruth Adams, Associate Professor, M.F.A., Miami, 1999
Becky Alley, Lecturer, M.F.A., Kansas, 2005
Garry Bibbs, Professor, M.F.A., Kentucky, 1986
LA Watson Brock, Instructor, M.F.A., Boston, 2014
Mathew Brock, Senior Lecturer, M.F.A., Vermont College, 2006
Anna Brzyski, Professor, Ph.D., Chicago, 1999
Dennis Carpenter, Professor Emeritus, M.F.A., Florida, 1979
Dana Clark, Instructor, M.F.A., Cranbrook Academy of Art, 2008
Alice Christ, Associate Professor, Ph.D., Chicago, 1992
Mia Cimelli, Assistant Professor, M.F.A., Michigan, 2014
Jeremy Colbert, Lecturer, M.F.A., Florida State, 2002
Joel Feldman, Instructor, M.F.A., Indiana, 1967
Gerald Ferstman, Assistant Professor Emeritus, M.F.A., Washington, 1965
Ivy Johnson Fleming, Instructor, M.F.A., Cranbrook Academy of Art, 2016

**SCHOOL OF MUSIC**

Stanley Pelkey, Director

William Anderson, Instructor, Ph.D., Kentucky, 2012
Cecil “Ben” Arnold, Jr, Professor, Ph.D., Kentucky, 1986
Elizabeth P. Arnold, Associate Professor, D.M.A., Cincinnati University-College Conservatory of Music, 2006
Joseph W. Baber, Professor, M.M., Eastern School of Music, Rochester, 1965
Michael Baker, Associate Professor, Ph.D., Indiana, 2007
John “Dennis” Bender, Associate Professor, D.M.A., Cincinnati University-College Conservatory of Music, 2009
Dana Biggs, Assistant Professor, Director of Bands/Director of Athletic Bands, D.M.A., Kentucky, 2010
Cody Birdwell, Associate Professor, D.M.A., North Texas, 1996
Karen Bottge, Associate Professor, Ph.D., Wisconsin-Madison, 2006
George R. Boulden, Associate Professor, M.M.E., South Carolina, 1986
Lance W. Brunner, Associate Professor, Ph.D., North Carolina, 1976
James B. Campbell, Professor, M.M., Northern Illinois, 1978
Jennifer Campbell, Assistant Professor, M.A., Connecticut, 2002
James “Revel” Carr III, Assistant Professor, Ph.D., California-Santa Barbara, 2006
Daniel Cecil, Instructor, M.M.E., Kentucky, 2010
W. Harry Clarke, Associate Professor Emeritus, M.A., George Peabody, 1963
Jacob Coleman, Assistant Professor, D.M.A., Texas, 2014
Medical Laboratory Science

Steve Schwarz, Program Director
Kim Campbell, Senior Lecturer, MLS(ASCP)/CM, M.S.Ed., Kentucky, 1985
Philip Campbell, Adjunct Assistant Professor, M.T. (ASCP), M.S.Ed., Kentucky, 1979
Patricia Ann Collins, Associate Professor Emeritus, M.T. (ASCP), M.S., West Virginia, 1971
Stacy L. Gabbard, M.A., Lecturer, Liberty University, 2016
Linda Gorman, Associate Professor Emeritus, MLS(ASCP)/CM, Ph.D., Kentucky 1996
Chad Guilliams, Lecturer, MLS (ASCP)/CM, M.Ed, Georgia, 2009
Steve Schwarz, Assistant Professor, MLS(ASCP)/CM, Ph.D., Wisconsin, 1998
E. Anne Stiene-Martin, Assistant Professor Emeritus, M.T. (ASCP), Ph.D., Kentucky, 1991
Marie Vittetoe, Professor Emeritus, M.T. (ASCP), C.L.S. (NCA), Ed.D., West Virginia, 1973

*Joint Appointment

Graduate Faculty

Physician Assistant Studies

W. Scott Black, Department Chair
W. Scott Black, Department Chair, Ph.D.
Somu Chatterjee, Assistant Professor, M.S., MPH, West Virginia
Deshana Collett, Assistant Professor, Ph.D., Kentucky, 2013
David A. Fahringer, Associate Professor, M.S.P.H., PA-C, Kentucky, 1992
Gerry A. Gnila, Professor, Ph.D., Kentucky, 1975
Oleva Coleman Mullins, Assistant Professor, MS, PA-C, Marietta College, 2007
Sam Powdrill, Associate Professor, M.PHIL, PA-C, University of London, England, 1992;
North Dakota, 1999
Kevin M. Schuern, Associate Professor, DrPH, MS, PA-C Kentucky, 2007, 2015
Cheryl E. Vanderford, Assistant Professor, MPAS, PA-C Kentucky, 2008
Leslie N. Wolfenberg, Assistant Professor, Ph.D., Kentucky, 2014

Athletic Training and Clinical Nutrition

Phillip A. Gribble, Department Chair
John P. Abt, Associate Professor, Ph.D., ATC, FACSM, Pittsburgh, 2004
Carrie Silman Baker, Assistant Professor, Ph.D., ATC, Kentucky 2012
Geza G. Bruckner, Professor, Ph.D., Kentucky, 1975
Timothy A. Butterfield, Associate Professor, Ph.D., ATC, University of Calgary, 2005
Philip A. Gribble, Department Chair, Professor, Ph.D., ATC, FNATA, Penn State, 2003
Nick R. Heebner, Assistant Professor, Ph.D., ATC, Pittsburgh, 2015
Johanna M. Hoch, Assistant Professor, Ph.D., Kentucky, 2012
Matthew C. Hoch, Lecturer, Ph.D., University of Kentucky, 2011
David T. Thomas, Associate Professor, Ph.D., RDN, CSSD, LD, FAND, North Carolina-Greensboro, 2009

Communication Sciences and Disorders

Anne D. Olson, Department Chair
Richard D. Andreotta, Associate Professor, Ph.D., Indiana, 1999
Vrshali Argali, Clinical Assistant Professor, Ph.D., CCC-SLP, Kentucky, 2016
Gilsom C. Caplouto, Professor, Ph.D., CCC-SLP, South Carolina, 2002
Dan Croake, Clinical Assistant Professor, Ph.D., CCC-SLP, Kentucky, 2016
H. Isabel Hubbard, Assistant Professor, Ph.D., CCC-SLP, South Carolina, 2014
Joneen Lowman, Associate Professor, Ph.D., CCC-SLP, Florida State, 2003
Robert C. Marshall, Professor, Ph.D., CCC-SLP, Oklahoma, 1969
Peter A. Meulnok, Assistant Professor, Ph.D., CCC-SLP, Wisconsin, 2013
Donna Southerland, Morris, Associate Professor, M.A., CCC-SLP, Eastern Kentucky, 1982
Jen D. Olson, Associate Professor, Ph.D., CCC-A, Kentucky, 2010
Judith L. Page, Associate Professor, Ph.D., CCC-SLP, Purdue, 1981
Janine Schmedding-Bartley, Assistant Professor, Ph.D., CCC-SLP, Florida State, 2006
Joseph C. Stemple, Professor, Ph.D., CCC-SLP, Cincinnati, 1977
Debra Suiter, Clinical Associate Professor, Ph.D., CCC-SLP, Tennessee, 2001

Physical Therapy

Robert A. (Tony) English, Department Chair
Ramona Carper, Assistant Professor, PT, DPT, Kentucky, 2011
Dean P. Currier, Professor Emeritus, PT, Ph.D., Maryland, 1971
Joan Darbee, Senior Lecturer, PT, Ph.D., SUNY-Buffalo, 2000
Esther Dupont-Versteegden, Professor, Ph.D., University of Texas Health Science Center, San Antonio, 1995
Susan Effgen, Professor, PT, Ph.D., Georgia State, 1984
M. Lynn English, Associate Professor, PT, DPT, Simmons, 2007
Robert A. (Tony) English, Associate Professor, PT, Ph.D., Kentucky, 2008
Geetanjali Gera, Assistant Professor, PT, Ph.D., Delaware, 2013
Catherine Goehrman, Lecturer, Ph.D., Kentucky, 2013

*Associate Professor Emeritus

Graduate Faculty

Rehabilitation Sciences Doctoral Program

Esther Dupont-Versteegden, Program Director

### Course Descriptions

**A&S Arts and Sciences**

**A&S 100 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED.**

This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most three times under the A&S 100 number. Students may not repeat under the same title. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

**A&S 101 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED.**

This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most twice under the A&S 101 number. Students may not repeat under the same title. Offered pass/fail only. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

**A&S 103 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES I (Subtitle required).**

This course provides elementary language instruction with an emphasis upon the spoken language of everyday use when appropriate. Writing and the elements of grammar are gradually introduced. Students may not repeat this course under the same subtitle. Prereq: Will be set by instructor.

**A&S 104 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES II (Subtitle required).**

A continuation of A&S 103. Students may not repeat this course under the same subtitle. Prereq: A&S 103.

**A&S 110-A&S 119 SPECIAL INTRODUCTORY COURSE IN THE HUMANITIES (Subtitle required).**

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

**A&S 120-A&S 129 SPECIAL INTRODUCTORY COURSE IN THE NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required).**

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

**A&S 130-A&S 139 SPECIAL INTRODUCTORY COURSE IN THE SOCIAL SCIENCES (Subtitle required).**

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

**A&S 140 FOCUS: CONNECT AND RECOVER.**

This course is designed to assist students in preparation for the continuing academic rigor of coursework in the College of Arts and Sciences majors. Through lectures, discussions, exercises, and out-of-class assignments, A&S 140: FOCUS: Connect and Recover will enable students to actively develop and maintain skill sets and information relevant to their major and planned career path while also emphasizing the interdisciplinary nature of college learning. Prereq: A&S Major; acceptance to Academic Preparation Program.

**A&S 141 ASPIRE: ACADEMICALLY SOUND PREPARATION FOR INVOLVED RESEARCH EDUCATION.**

This course is designed to assist students in transitioning into majors in the College of Arts and Sciences with a focus on a deeper understanding of research and liberal arts education at a tier 1 research institution. Through lectures, discussions, exercises, and out-of-class assignments, A&S 141 will enable students to actively develop and maintain skill sets and information relevant to their major and planned career path while also emphasizing the interdisciplinary nature of college learning. Prereq: A&S Major; acceptance to Academic Preparation Program.

**A&S 150 YOUR CAREER AND ACADEMIC JOURNEY.**

This course simplifies the complex process of choosing a major by leading students through personal, academic and occupational information searches. It offers a natural progression for decision making by using thought-provoking self-exploratory activities. Whether choosing or changing a major, the discovery process examines different perspectives, such as relating interests, skills and values to academic fields of study. Once specific academic alternatives are identified, a search of occupational information helps students examine the career possibilities that specifically relate to the majors they are considering.

**A&S 160 LEADERSHIP AND PROFESSIONAL DEVELOPMENT (Subtitle required).**

This course is designed to assist students in developing the tools they need to be successful in their student leadership positions in the College of Arts & Sciences. May be repeated to a maximum of eight credits. Prereq: Acceptance into A&S Ambassador Program, A&S Mentor Program, A&S leadership program, or consent of instructor.

**A&S 203 INTERMEDIATE INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES I (Subtitle required).**

This course provides intermediate instruction in a less commonly taught language. Development of speaking, listening, reading, and writing skills, as appropriate, will be stressed. Students may not repeat this course under the same subtitle. Prereq: A&S 104 in the same language or permission of instructor.

**A&S 300 SPECIAL COURSE (Subtitle required).**

Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Arts and Sciences. A particular course may be offered at most three times under the A&S 300 number, and no A&S 300 course may be given for more than six credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of 12 credit hours under different subtitles.

**A&S 306 SPIRIT CHEMISTRY.**

In this course, students will explore the production of distilled spirits. The production of distilled spirits involves three basic steps: selection and processing of a carbohydrate (starch or sugar), fermentation of the carbohydrate to produce ethanol and distillation of the ethanol. In these processes, substances are produced and concentrated in the ethanol that create the unique flavors and fragrances associated with the individual spirit. Seven distilled spirits (moonshine, vodka, gin, rum, tequila, bourbon and scotch) will be discussed in detail. Prereq: Credit hours sufficient to be considered a junior or permission of the instructor. All students must be a minimum of 21 years of age prior to registering for the course.

**A&S 310-A&S 319 SPECIAL COURSE IN HUMANITIES (Subtitle required).**

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

**A&S 320-A&S 329 SPECIAL COURSE IN NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required).**

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Natural, Physical, or Mathematical Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.
A&S 330-A&S 339 SPECIAL COURSE IN SOCIAL SCIENCES (Subtitle required). (1-6)
An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 350 PERSONAL STRENGTHS AND YOUR CAREER DEVELOPMENT. (3)
This course is designed to introduce students to the fundamentals of planning and organizing career development strategies. Emphasis is placed on identification of individual goals, assessment of talents/strengths and values, exploration of career options, analysis of the job market, effective use of employment search tools (e.g., résumés, cover letters, and interviewing), and management of career pathways. Stresses the value of the arts and sciences degree in the labor market and develops job search skills that will be useful throughout life. Prereq: Sophomore standing (30+ credits) or higher.

#A&S 420 ADVANCED WRITING AND RESEARCH FOR THE SOCIAL SCIENCES. This course will provide students with an opportunity to gain research experience drawing on the methods used in the social sciences. Students will be exposed to the process of research and writing used by social scientists. Student will identify and evaluate previous research, identify a topic of interest for research, conduct a literature review, and create a research proposal for an original research project. Prereq: Bachelor of Liberal Studies major or permission of instructor.

#A&S 430 ADVANCED WRITING AND RESEARCH IN THE HUMANITIES. (3)
A&S 430, Advanced Writing and Research in the Humanities, is a common capstone experience for students completing the Bachelor of Liberal Studies degree. It is designed to provide an opportunity for majors to gain research experience, as well as to allow them to explore various content areas and scholarly approaches represented in the humanities so as to enhance their understanding of the value of work across disciplines. In addition, the course facilitates student completion of a portfolio highlighting the common thread(s) of their coursework during their time at UK. This is a Graduation Communication and Composition Requirement (GCCR) course. Prereq: Bachelor of Liberal Studies major status or permission of instructor.

A&S 500 SPECIAL COURSE (Subtitle required). (1-6)
Interdisciplinary, topical, or experimental courses to be approved by the Dean of the College of Arts and Sciences and the Dean of the Graduate School. A particular course may be offered at most three times under the A&S 500 number. Open to all university students, subject to such limitations or prerequisites as set by the instructor. May be repeated to a maximum of six credits under different subtitles. Prereq: As specified by the instructor.

#A&S 600 PERSPECTIVES ON DIVERSITY AND INCLUSION. (3)
This 8-week course introduces students to meanings, practices, and theories connected to diversity and inclusion, and the implications of these within an increasingly interconnected world. Themes of approaches to diversity and inclusion as central to professional and societal well-being and success. Students will critically examine the ways in which power, privilege, oppression, diversity, and inclusion inform everyday lives, organizations, institutions, and societies. Students will engage with multiple perspectives on human differences through multidisciplinary lenses to increase their awareness and understanding of the varied ways in which social identities and cultural beliefs inform social and professional settings on an individual basis and systemically. Prereq: Admission to an Online Graduate Certificate or MA program in the College of Arts and Sciences or consent of instructor.

A-E Art Education

A-E 120 PATHWAYS TO CREATIVITY IN THE VISUAL ARTS. (3)
Students will be challenged to think creatively, expand cognitive development, perception, self-expression, and sensory awareness through research and rich studio experiences. Aesthetic knowledge and skills will provide students with a pathway to learning in art that integrates prior knowledge with new experiences which enhance creative learning through discovery, discussion, and collaboration.

A-E 200 WORKSHOP IN DESIGN EDUCATION FOR ELEMENTARY TEACHERS. (3)
A lecture-laboratory course that explores and analyzes concepts in the visual arts and examines how these concepts might be used to improve and enhance learning opportunities in the visual arts and in various disciplines for elementary students.

A-E 300 INTRODUCTION TO ART EDUCATION. (3)
This course provides an introduction to the art teaching profession with particular emphases on developing the creative, critical, collaborative, and communicative skills that are required in art teaching situations. Opportunities to gain skills in working with group-generated projects and leadership activities. Students will engage in personal reflection and critical analysis of the teaching/learning process through journal-keeping, teacher portfolio development and creative research.

A-E 362 FIELD EXPERIENCES IN ART EDUCATION. (1-3)
A-E 362 is the first course in the Art Education professional education sequence. It gives the students an opportunity to experience a variety of planned and supervised experiences in the schools and other educational and community settings. Candidates will learn to identify standards and unbridled learning tasks in school settings, and will develop a variety of products to demonstrate Art Education learning outcomes. 64 field experience hours are required for A-E 362. Prereq: Admission to the Teacher Education Program (TEP).

A-E 395 INDEPENDENT WORK: ART EDUCATION. (1-3)
Supervised individual research, practicum, and field experience leading to the development of art education curriculum theory, and teaching techniques appropriate for various populations and conditions. A learning contract will be submitted to both the department and to the office of the dean at the time of registration. May be repeated to a maximum of six credits. Prereq: Major and consent of instructor.

A-E 399 EXPERIMENTAL EDUCATION. (1-15)
Development of personally motivated and planned projects and internships in art education and interdisciplinary program activities outside the academic classroom experience, encompassing recreation, general education, adult education, special education, state programs, and group field experiences and workshops. May be repeated to a maximum of 15 credits. (Approval of Fine Arts dean required for more than six credits per semester.) Prereq: Recommendation of Art faculty member and department chairman; completion of departmental learning agreement.

A-E 515 INTRODUCTION TO ART THERAPY. (3)
An examination of various historical and contemporary conceptions of the therapeutic function and value of art from an art education perspective. The impact of art experience on emotional, intellectual, and behavioral development and rehabilitation will be examined through readings, discussions, guest lectures, and lab experiences. Lecture, two hours per week; laboratory, two hours per week. Prereq: PSY 331 and major or consent of instructor.

A-E 538 ADVANCED ARTS AND CRAFTS IN THE ELEMENTARY SCHOOL. (3)
Planned to give the elementary teacher an understanding of teaching methods involved in, and construction of, art activities which would enrich the classroom program.

A-E 545 TOPICAL STUDIES IN ART EDUCATION (Subtitle required). (3)
Intensive study and analysis of a designated topic, issue or development in the philosophy, history, or methodology of art education in community and public school settings. May be repeated to a maximum of six credits. Prereq: Art education major or consent of the instructor.

A-E 550 COMMUNITY ART EDUCATION. (3)
An examination of community arts organizations and the role they play in identifying and interpreting the diverse artistic make-up of the community. The course will provide students with the tools to define, locate, and research community organizations as potential sites for art programming.

A-E 560 MUSEUM EDUCATION. (3)
An examination of educational techniques and practices of learning in a museum setting. The course will focus on educational theories, learning styles and techniques, audiences, educational programs, and outreach strategies that will prepare students for professional careers in museum education.

A-E 576 ART IN MIDDLE SCHOOLS. (3)
Centering on the study of perceptual and aesthetic development of middle school adolescents, this course provides field and practicum experiences that utilize methods and materials appropriate to the teaching of art in the middle school. Topics include: curriculum design, lesson planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP), or consent of instructor.

A-E 577 ART IN SECONDARY SCHOOLS. (3)
This course provides students with an overview of the secondary school in American education and explores the history, theory, techniques and contemporary issues of teaching art in the secondary schools. Skills in the planning of curricular activities and the teaching and evaluation of secondary art experiences are stressed. Full class instruction, video, micro-teaching, laboratory and studio experiences are incorporated into class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E 578 ART IN ELEMENTARY SCHOOLS. (3)
Focusing on the study of perceptual and aesthetic development of elementary age children, this course provides field and practicum experiences that utilize methods and materials appropriate to the teaching of art in the elementary school. Topics include: curriculum design, lesson planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E 579 ARTS AND HUMANITIES IN ART EDUCATION. (3)
An exploration of the relationship of current philosophies of art education and aesthetics, a consolidation of art education ideas with a formation of criteria formaking value judgments; the development of a personal viewpoint consistent with education and art as humanistic endeavors. Prereq: Major in art education, admission to the Teacher Education Program (TEP).
A-H 101 INTRODUCTION TO VISUAL STUDIES. (3)
The course introduces students to the concepts and techniques of visual literacy. It explores a full spectrum of mass media visual forms encountered by contemporary Americans from architecture and works of art to graphic novels, advertisements, television programs and films, photos and the Internet.

A-H 105 WORLD ART BEFORE 1400. (3)
An introduction to the visual arts of civilizations prior to the Renaissance. Students will become familiar with selected monuments from cultures in Africa, Asia, the Pacific, the Americas and Europe, and will be able to evaluate the development of artistic practices within a tradition or comparatively between traditions.

A-H 106 RENAISSANCE TO MODERN ART. (3)
An introduction to the history of European art and its legacy from the Middle Ages to the present. Students will become familiar with major works and monuments and develop an understanding of how art has functioned and evolved in the European tradition. As an introduction to the discipline of art history, the class develops a student’s ability to describe and analyze art and architecture using sophisticated terminology, and enables a student to connect works of art to specific social and historical contexts.

A-H 300 TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
Depending on the subtitle, this writing-intensive undergraduate seminar examines topics in art history and visual studies that are explicitly not limited by geographical location and/or period in history. Topics might be defined by subject matter, artistic practices and traditions, genres, and other comparable categories within art history and visual studies. Students will develop skills in writing and formal visual analysis, as well as practical skills needed to conduct and present research. This course is a Graduation Composition and Communication Requirement course for the Art History and Visual Studies program, and therefore is not likely to be eligible for automatic transfer credit to UK. Prereq: At least one Art History and Visual Studies course at the 100-level required. Because A-H 300 is the GCCR course for the major, students must have completed 30 credit hours, including both CIS/WRD 110 and CIS/WRD 111.

A-H 301 CROSS-CULTURAL TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
Depending on the subtitle, this course compares images and/or artifacts produced either in different cultural contexts or as a result of intercultural contacts and exchange. May be repeated under a different subtitle to a maximum of six credits. Prereq: At least one Art History and Visual Studies course at the 100-level required.

A-H 304 AFRICAN ART AND ITS GLOBAL IMPACT. (3)
Throughout history, visual arts from the African continent (architecture, sculpture, painting, body arts, textiles, photography and performance) have inspired artists from around the world. This course examines a selection of African art works that have shaped European and African cultural histories, and created a global modernity. The earliest examples include ancient rock art, and the most recent are comprised of installations and digital works made by African artists working abroad. Prereq: A-H 105 recommended.

A-H 308 STUDIES IN AFRICAN ARTS (Subtitle required). (3)
Depending on the subtitle, the course will focus upon arts connected to a particular period, theme, medium, or region of Africa and the African Diaspora, or examine a specific set of images, themes, theoretical positions or media originating from, or associated with, the African continent. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 104 recommended.

A-H 310 ASIAN ART AND CULTURE (Subtitle required). (3)
Depending on a subtitle, a study of the art production of a particular medium, theme, period, or region in East Asia. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 311 THE ARTS AS SOFT POWER: THE JAPANESE TEA CEREMONY. (3)
The term “soft power” was coined by Joseph Nye, a U.S. scholar of international relations. It is used to describe forms of influence used as alternatives to “hard power” - coercive acts such as war, threats, or economic sanctions. This course will investigate how soft power was used as a tool of diplomacy thousands of years before the term was invented, and explore examples of how it is used at the beginning of the 21st century. The course then will examine the Japanese tea ceremony (known as chanoyu or chado) and its domestic use as soft power among Japanese warlords in the late sixteenth century, its adoption as a way to modernize Japanese women in the nineteenth century, and its role in shaping Japan’s international image in the twentieth century. Prereq: Sophomore standing or permission of the instructor.

A-H 314 ANCIENT (Subtitle required). (3)
Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be on selected periods or media of artistic and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as CLA 314.)

A-H 323 MEDIEVAL (Subtitle required). (3)
Considers the internships of art and architecture with religion, literature, politics, and other expressive forms as they shape and are shaped by medieval patrons and artists between the fourth and fifteenth centuries C.E., according to subtitle. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 334 REFRAMING RENAISSANCE ART. (3)
An exploration of Renaissance artistic production as a European phenomenon of dynamic intercourse between European artistic centers, artists, and trade in works of art. Besides painting, sculpture, and architecture, the study of Renaissance visual culture is expanded to include prints and the decorative arts. While the achievements of individual artists are considered, focus is placed on the values and motives of the patrons as well as the purposes and functions of art works. Prereq: Sophomore standing or permission of the instructor.

A-H 335 EARLY MODERN ART AND VISUAL CULTURE, 1400-1700 (Subtitle required). (3)
According to the subtitle, this course examines various aspects of the social, political, cultural, and aesthetic contexts of European art and visual culture. Issues of production and reception, style and function, artist and viewer, and European interactions with non-European cultures will be considered. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 110 or A-H 106 recommended.
A-H 339 ART AND VISUAL CULTURE 1700-1840 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1700 and 1840. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 106 recommended.

A-H 340 ART AND VISUAL CULTURE 1840-1914 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1840 and 1914. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 106 recommended.

A-H 341 20TH CENTURY (Subtitle required). (3)
Depending on subtitle, this course examines aspects of 20th century art in its social, political, and aesthetic contexts. May be repeated under a different subtitle for a maximum of six credits. Prereq: A-H 106 recommended.

A-H 342 AMERICAN ART & VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines various aspects of American art & visual culture in their social, political, and aesthetic contexts between the 18th and the early 21st centuries. Topics range from the traditional fine arts media to photography, advertising, film, and various forms of popular culture. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 343 HISTORY OF PHOTOGRAPHY. (3)
Chronological survey of the history of photography from its inception to the present day. Emphasis on fine art photography, the work and contributions of its practitioners, the relationship of photography to other art forms, general issues within the medium. Prereq: A-H 106 recommended.

A-H 350 CONTEMPORARY ART AND VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines various aspects of art and visual culture in their social, political, theoretical, and aesthetic contexts after 1965. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 360 VISUAL CULTURE OF POLITICS. (3)
The course examines specific instances of visual political discourse across a range of historic periods, cultural contexts, political positions, and media. Although a significant portion of the historic part of the course focuses on works of art and architecture, the course also examines popular print culture and political use of mass media from film to television and Internet. Some of the themes covered in the course are: symbols and symbolism of political power, imagery of specific political values, emotional appeal, political propaganda, politics of gender and race, and visual strategies of political opposition and resistance.

A-H 370 HISTORY OF DESIGN (Subtitle required). (3)
According to the subtitle, this course examines various aspects of Design History in its social, political, economic, and cultural contexts between the 16th and the 21st centuries. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 399 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-15)
A community-based or field-based experience in Art History. A formal learning contract among student, field supervisor, and supervising faculty member required. May be repeated to a maximum of 15 hours. Prereq: Any 100-level course in Art History and Visual Studies.

A-H 501 MUSEUM STUDIES I: INTRODUCTION. (3)
An introduction to museology and the museum profession as related to a particular exhibition project. Intended for advanced students in arts related professions. Seminar format, coordinated with the University of Kentucky Art Museum staff. Prereq: Major in art history or arts administration (with art history emphasis), or consent of instructor.

A-H 502 MUSEUM STUDIES II: INTERNSHIP. (3)
A supervised internship in a professional museum setting that builds upon Museum Studies I. The focus may be on a single aspect or several areas of museum activity: administration, curatorship, education, registration and collection management, design, development, public relations, etc. Laboratory, 10 hours per week. May be repeated to a maximum of 9 credits within different contexts. Prereq: Completion of A-H 501 with a grade of B or better.

A-H 504 PRACTICAL ISSUES IN ART HISTORY (Subtitle required). (3)
This course examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. In this course, students will have the opportunity to engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing and at least one course in Art History and Visual Studies.

A-H 510 ART HISTORY AND VISUAL STUDIES HONORS THESIS. (3)
Faculty-sponsored research projects for Art History and Visual Studies Majors, leading to an Honors Thesis. Enrollment is offered only to outstanding undergraduate majors with a project in progress, including students who are accepted into the University Scholars Program. Topics to be determined. Prereq: A-HVS major and CFA learning contract, approved by faculty sponsor.

A-H 524 THEORY AND METHODS. (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of the instructor.

A-H 525 STUDIES IN GENRES AND MEDIA (Subtitle required). (3)
Study of a particular genre (type of subject, such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 526 ART AND THE ARTIST IN SOCIETY (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 527 INTERDISCIPLINARY APPROACHES (Subtitle required). (3)
Study of artistic and other visual production of a period, geographical location, theme, or medium, with emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of instructor.

A-H 528 TOPICAL SEMINAR IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
A seminar that reviews basic research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a range of methodological approaches to the study of objects, environments, and images, students refine the practical skills needed to conduct and present their research. Prereq: Junior status and A-H 300 plus one additional Art History and Visual Studies course at the 300-level, or permission of the instructor.

A-H 529 TOPICAL SEMINAR IN ARCHITECTURAL DESIGN HISTORY (Subtitle required). (3)
According to subtitles, seminar will focus on developments, problems, or issues in architectural design history. Subtitle required. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Junior standing.

A-H 555 METHODS IN ART HISTORY AND VISUAL STUDIES. (3)
A seminar that reviews basic research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a range of methodological approaches to the study of objects, environments, and images, students refine the practical skills needed to conduct and present their research. Prereq: Junior status and A-H 300 plus one additional Art History and Visual Studies course at the 300-level, or permission of the instructor.

A-H 592 AESTHETICS. (3)
Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts, in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. (Same as PHIL 592.)

A-H 598 COORDINATE STUDY IN ART HISTORY AND VISUAL STUDIES. (3)
Course number for those students wishing to do advanced work on a special subject in conjunction with a regularly scheduled 300-level course in Art History and Visual Studies not previously taken by the student. May be repeated to a maximum of nine credits. Prereq: Two courses in Art History and Visual Studies or permission of the instructor.

A-H 599 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-9)
Internship with a university, community, state, regional or national organization that provides practical work experience related to art history and/or visual studies. The internship is identified by the student, conducted under the supervision of the on-site supervisor, and evaluated by a faculty advisor. Students must file a learning contract with the College of Fine Arts to register for the course. May be repeated to a maximum of nine credits. Prereq: Two art history courses at the 500-level, or graduate status, or permission of the instructor.

A-H 604 PRACTICAL PROBLEMS IN ART HISTORY (Subtitle required). (3)
A seminar that examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. Students engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 624 THEORY AND METHODS (Subtitle required). (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 625 PROBLEMS IN GENRES AND MEDIA (Subtitle required). (3)
Study of a particular genre (type of subject, such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.
Course Descriptions

A-H 626 THE ARTIST IN SOCIETY: (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of six credits when identified by different subtopics. Prereq: Graduate standing.

A-H 627 INTERDISCIPLINARY PROBLEMS: (Subtitle required). (3)
Seminar that focuses on the artistic and other visual production of a topic, geographical location, theme, or medium with an emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 628 ART HISTORY AND VISUAL STUDIES TOPICAL SEMINAR: (Subtitle required). (3)
In-depth study of works of art and visual culture, the study of a specific period, geographical location, medium or theme, or the study of ideas or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 629 ART HISTORY TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)
According to subtopics, seminar will focus on developments, problems or issues in architectural or design history. May be repeated to a maximum of six credits when identified by different subtopics. Prereq: Graduate standing.

A-H 650 ADVANCED CONTEMPORARY ART HISTORY. (3)
Through advanced readings, in-depth discussions, and substantial research projects, this course examines major issues raised in art and art criticism since 1960. Particular attention is given to the impact of social, intellectual, and technological developments upon art making and concepts of art and the artist.

A-H 655 ADVANCED RESEARCH METHODS IN ART HISTORY AND VISUAL STUDIES. (3)
This course practices research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a selection of methodological approaches to the study of art and images, graduate students will refine the practical skills to conduct and present their own research. Prereq: Graduate status in SAVS.

A-H 738 ART HISTORY AND VISUAL STUDIES M.A. PORTFOLIO PREPARATION. (3)
Three hours of coursework in addition to the 36 hours of course work for the Plan B MA degree, to be arranged with the Graduate Advisor, devoted to planning and executing their studies toward the fulfillment of the non-Thesis option. Prereq: 36 hours of graduate course work completed or in progress in semester of registration.

A-H 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All coursework toward the degree must be completed.

A-H 768 THESIS FORMULATION AND PREPARATION IN ART HISTORY. (3)
Independent study for art history graduate students to formulate and prepare master’s thesis under the direction of their thesis advisor. A formal learning contract between student and thesis advisor is required. May be repeated to a maximum of six credits. Prereq: Art History graduate student completing thesis option (Option A).

A-H 780 INDEPENDENT WORK: ART HISTORY. (1-3)
Supervised and sustained individual research and interpretation in the history of art leading to the discovery and demonstration of new knowledge. A formal learning contract between student and supervising faculty member required. May be repeated to a maximum of six credits. Prereq: Graduate standing in the department, 18 credits in art history and consent of instructor.

A-S Art Studio

*A-S 001 FOUNDATION EXHIBITION. (0)
An annual exhibition where all first-year Foundation students will select and exhibit one of their works created in a course at UK in a Foundations studio course. Students will be required to select their own work, present it professionally, and provide an accompanying artist’s statement. The exhibition will occur each spring semester. Grade: For F.

*A-S 101 CREATIVITY PRACTICES. (1)
This seminar course for incoming Art Studio, Digital Media Design and Art Education majors is focused on creative strategies and introductory professional practices. This course also orients students to the School, College and University. Through discussion, in-class exercises, and out-of-class assignments, students will gain knowledge of arts-related resources and programming at UK and in the local community.

*A-S 102 2D. (3)
A-S 102 is an introductory course in composition on flat surfaces with an emphasis on learning and integrating elements and principles of 2D design. This course is essential for any student who wants to visually communicate in art studio, design, digital media and art education. Students will create contemporary works which may utilize a variety of art and design media, including collage, drawing, painting, printmaking, and or photography. These works will be informed by a wide variety of contemporary artists and designers. Students will work in an iterative process to research and develop ideas, enhance creativity, articulate personal expression, and problem-solve.

*A-S 103 3D. (3)
A-S 103 is an introductory course in compositional strategies within spatial forms for sculptural practices. This studio course is essential for any student who wants to visually communicate in art studio, design, digital media and art education. Students will work with a variety of contemporary art/design materials and approaches, while learning and integrating the basic vocabulary of composition in art and design. These works will be informed by a wide variety of contemporary artists and designers. Students will work in an iterative process to develop ideas, problem solve, enhance creativity and articulate personal expression.

*A-S 120 DRAWING. (3)
Students learn the mechanisms of visual perception, how individual components of a drawing relate to the organization of the composition as a whole. Each student develops not only observational skills rooted in traditional drawing media for realistic renderings, but also gradually builds strategies, concepts, and ideas for abstraction. Students will advance their knowledge of light, tones, composition and increase their ability to see and perceive the world around them. This studio course is essential for any student who wants to visually communicate in art studio, design, digital media and art education.

*A-S 200 DIGITAL ART. (3)
This course provides fundamental instruction in software as a creative tool for image making. Students will learn the basics of digital collage and drawing through use of software and formal qualities of composition. Lectures about the varied digital art practices will provide an overview of historical and contemporary digital art practice. This studio course is essential for any student who wants to visually communicate in art studio, design, digital media and art education.

*A-S 201 PROFESSIONAL PRACTICES IN ART STUDIO. (1)
This course is designed to assist Art Studio and Art Education majors in developing practical skills needed to create a successful, professional practice in the visual arts. Students are required to present a portfolio emphasizing written, oral, and visual presentation and documentation skills.

*A-S 245 INTRODUCTION TO WEB DESIGN. (3)
An introductory level course designed to help students create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the Internet. Navigation strategies, directory structures and familiarity with networks is stressed.

*A-S 270 CERAMICS FOR NON-MAJORS. (3)
This is a studio course that explores the arts and creativity through the discipline of ceramics. An overview of historical and contemporary ceramic art practices will be presented as well as the basics of design and composition. Using hand building and wheel throwing techniques, students will explore the sculptural and functional potential of clay as an object-making media.

*A-S 280 INTRODUCTION TO PHOTOGRAPHIC LITERACY. (3)
Students are introduced to photography, through both the study of its history and the practice of making photographs. The historical portion will focus on both photographic literary and aesthetic. The practice will take students through various styles, genres and technical aspects of the medium.

*A-S 285 LENS ARTS. (3)
A-S 285 is an introductory course in digital image capture that focuses on the still and moving image as an art practice. Students will learn the fundamentals of camera operation and editing software in order to visually communicate their creative ideas. Students will be introduced to contemporary lens arts practice through research and assignments. This course is essential for any student wanting to succeed in digital media and/or design. It is a pre-requisite for A-S 346, and thus upper level video classes.

*A-S 300 DIGITAL PHOTOGRAPHY. (3)
A-S 300 is an introductory course in digital photography as a creative tool. The primary emphasis is the practice of photography as fine art. This course also provides a thorough background in basic techniques that students may apply to any photographic discipline as well as historical and theoretical approaches to photography. Students receive technical instruction in the DSLR camera, lens choice, exposure controls, digital workflow, processing of digital files, output and presentation. Students must have a DSLR camera. Studio 9 hours per week.

*A-S 305 STUDIO LIGHTING. (3)
A-S 305, Studio Lighting is an introductory course in lighting control in photography. This course provides a thorough background in basic techniques that students may apply to any discipline, with its primary emphasis upon the practice of the medium as a fine art. Students will receive technical instruction in the subtleties of lighting, exposure controls, lighting styles and working in a photographic lighting studio. Prereq: A-S 300 or consent of Instructor.
A-S 306 CINEMATOGRAPHY: LIGHTS, CAMERA, ACTION. (3) A-S 306 is an intermediate course that will introduce students to the fundamental theory and practice of cinematography and lighting for film and video. We will examine the technical aspects of camera movement as well as aesthetic aspects of cinematography and learn how to apply this knowledge to practical cinematographic choices. We will also learn about how lighting is effectively used to convey mood, control exposure, and integrate with the narrative within the film industry. Prereq: Successful completion of A-S 346 Digital Video or consent of instructor.

A-S 311 PAINTING II. (3) A continuation of A-S 310. Prereq: A-S 310 and consent of the instructor.

A-S 320 PRINTMEDIA: SCREENPRINT/RELIEF. (3) Students will learn the skills necessary to create screen and relief prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. Prereq: A-S 130 or consent of instructor.

A-S 321 PRINTMEDIA: INTAGLIO/LITHOGRAPHY. (3) Students will learn the skills necessary to create Intaglio and Lithography prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editionable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. Prereq: A-S 130 or consent of instructor.

A-S 322 SCREEN PRINTING. (3) Intensive studio experience in serigraph printmaking processes and history relevant to contemporary practices in the medium. Six studio hours per week. Prereq: A-S 320.

A-S 330 INTERMEDIATE DRAWING. (3) Continued studio experience into two-dimensional representation and abstraction using a variety of drawing materials and processes. When offered in the fall, emphasis will be on the human figure. When offered in the spring, course content will cover a broad range of traditional and experimental subjects including landscape, still life, collage, and mixing words with images. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 102 or consent of instructor.

A-S 331 EXPLORATION OF HUMAN FORM. (3) Students strengthen drawing skills through observation and in experimention with process and strategy. Students gain a better understanding of design and composition in relationship to overall outcome of drawing and explore a range of drawing materials. Prereq: A-S 102 and A-S 130.

A-S 340 INTRODUCTION TO GRAPHIC DESIGN, MEANING, AND IMAGE. (3) An introductory digital-media studio course in graphic design. Emphasis will be placed on the study of typography, illustration, and layout design, as well as the social, political, and historical impact of graphic design. Technical and theoretical issues pertinent to the field will be presented. Prereq: A-S 102, A-S 200.

A-S 341 GRAPHIC DESIGN: LAYOUT. (3) Students prepare professional quality assignments in lettering, pictogram systems, logos, and corporate identity design, line art, and cartoons for advertising illustration, as well as solutions for posters, billboards, folders, storyboards, and cover illustration. Nine studio hours per week. Prereq: A-S 340 (with a grade of B or better) and Portfolio Review.

#A-S 342 TYPEOGRAPHY. (3) Through course readings, personal investigations, creative projects and critiques, students will gain skills and knowledge on the history, use, and creation of typefaces. This course covers content ranging from creation to application across a variety of media, and explores a range of topics surrounding typography – from minute details of use to holistic understanding of its essential role in graphic communication. Prereq: A-S 340 Introduction to Graphic Design.

A-S 343 ANIMATION (Subtitle required). (3) This broad, cross-disciplinary studio course will introduce students to a variety of animation techniques. Students learn the basics of animation through exploration of various tools and software while examining both historical and contemporary animated works. Prereq: A-S 320 or A-S 130 or consent of instructor.

A-S 345 WEB DESIGN. (3) An intermediate level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week. Prereq: A-S 200 or consent of instructor.

A-S 346 DIGITAL VIDEO. (3) An intermediate level course in which students learn video editing and composing methods, color techniques, masking and key effects in the digital video application environment. Storyboarding, shot lists, and audio and sound design will be emphasized for all projects. Creative work may be collaborative and or individual. Prereq: A-S 285 or consent of instructor.

A-S 347 MULTIMEDIA (Subtitle required). (3) An intermediate level course that allows students to explore a variety of programming environments. Programming topics may include video, audio and/or still images with web-based or physical installation based output. This class builds on students’ previous experiences with digital media production and introduces programming to their tool pallet. Fundamentals of computer programming are presented, supplemented by historical readings and discussions of art theory dealing with the use of digital technologies in artistic context. Nine studio hours per week. May be repeated to a maximum of nine hours when identified under a different subtitle. Prereq: A-S 200 or consent of instructor.

A-S 348 CIRCUITS & BITS: INTRODUCTION TO HARDWARE AND SOFTWARE TOPICS IN ARTS. (3) A broad, cross-disciplinary, intermedia studio course designed to teach students custom software creation and electronics fabrication in an art environment. Technical information is presented in conjunction with art historical and theoretical issues. Students will be introduced to a skill set needed to create interactive artworks. Prereq: A-S 200, or junior standing (or above) in the College of Design, or consent of the instructor.

*A-S 350 INTRODUCTION TO FIBER. (3) A survey of fiber art processes and textile techniques used to create sculptural forms. This includes, but is not limited to, looping, knotting, dying, hand and machine sewing, and woven and non-woven structures. This course focuses on experimentation with materials, while using history and theory to guide research. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. Prereq: A-S 102 or A-S 130 or consent of instructor.

*A-S 351 SOFT SCULPTURE. (3) Building on the skills developed in A-S 350, this course emphasizes the development of conceptual and technical skills using textile techniques to guide research and build sculpture. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. Prereq: A-S 350 or consent of instructor.

#A-S 352 WOVEN STRUCTURES. (3) Woven Structures explores the relationship of hand weaving, technology and sculpture. Experimenting with material and pattern, this course examines traditional techniques of Thoarloom hand weaving as well as the use of the computerized loom to understand weaving as a cross-disciplinary practice.

A-S 355 INTRODUCTION TO SCULPTURE. (3) Emphasis is placed on learning diverse 3D techniques, tools and materials as students create sculptures dealing with movement, emotions, narrative and non-objective/abstract subject matters. Sculptural concepts are explored through individual research, critical discussions and art production. Students experiment with mixed-media, and surface finishing. Prereq: A-S 103.

A-S 360 INTRODUCTION TO HOT METALS: FABRICATION. (3) Art Studio 360 is an introductory course in metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation; fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.

A-S 361 INTRODUCTION TO HOT METALS: CASTING. (3) Art Studio 361 is an introductory course in metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation; casting and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.

A-S 364 INTRODUCTION TO DIGITAL FABRICATION. (3) This introductory multidisciplinary course explores digital design and fabrication in the context of Laser CNC and 3D printing. The goal of this course is to develop concepts and techniques of CAD modeling to use in 2D and 3D digital processes as they apply to visual art and design. Emphasis will be placed on aesthetics, effective image making, and problem solving. Six Studio hours per week. No prerequisites.

A-S 365 DIGITAL FABRICATION AND DESIGN. (3) This intermediate level course allows students to explore a variety of 2D, “2.5D”, and 3D forms through digital modeling and design. The primary focus of this course will be laser cutting and etching as well as CNC routing to produce surface designs and complex compositions. Students will use current Computer Aided Design (CAD) and Computer Aided Manufacturing (CAM) technology in combination with traditional processes. Emphasis will be given to multi-medium designs incorporating other creative disciplines. Six Studio hours per week. Prereq: A-S 103 and A-S 364 or consent of the instructor.

A-S 366 HYBRID FABRICATION. (3) A-S 366 is an intermediate level course that allows students to explore three-dimensional form through digital design and hybrid fabrication. Students will create sculpture from digital models using 3D printing, 3D scanning, CNC routing, and laser cutting. The goal of this course is to develop concepts and techniques of CAD modeling for use in 3D CAD/CAM processes as they apply to visual art, space, and design. Emphasis will be given to dealing with the use of current technology in combination with traditional sculpture processes in an artistic context. Six Studio hours per week. Prereq: A-S 103 and A-S 364 or consent of the instructor.
A-S 387 TOPICS IN PHOTOGRAPHY (Subtitle required) (3)
A-S 387 is an introductory level course that allows students to explore a variety of photographic artists. This class builds on students’ previous experiences with hybrid fabrication media. Readings and discussion of contemporary and future directions in digital fabrication supplement the class. The use of current technology combined with traditional processes in an artistic context will be emphasized. Students will develop a professional body of work stemming from personal research. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: A-S 365 or A-S 366 or consent of instructor.

A-S 370 CERAMICS I (3)
Introductory studio experience to a variety of ceramic materials and processes. Nine studio hours per week. Prereq: A-S 103 or consent of instructor.

A-S 371 CERAMICS II (3)
A continuation of A-S 370. Nine studio hours per week. Prereq: A-S 370 or consent of instructor.

A-S 380 BLACK & WHITE DARKROOM PHOTOGRAPHY (3)
A-S 380 is an introductory course in photography. Although it provides a thorough background in basic techniques that students may apply to any discipline, its primary emphasis is upon the practice of the medium as a fine art. Students receive technical instruction in camera and darkroom construction, exposure controls, processing of black and white negatives and prints, and presentation. Studio, nine hours per week.

A-S 381 ADVANCED BLACK & WHITE DARKROOM PHOTOGRAPHY (3)
A-S 381 is a continuation of A-S 380. The emphasis is upon refining visual perception and basic photochemical skills with an introduction to some of the more advanced techniques of black and white photography. Students receive technical instruction in the Zone System, archival processing and printing, and presentation. Nine studio hours per week. Prereq: A-S 380 or consent of instructor.

A-S 382 COLOR PHOTOGRAPHY I (3)
A-S 382 is an introductory course in color photography. The emphasis is upon the unique qualities of color photography relating to visual perception and color theory. Students receive technical instruction in digital and analog cameras and color darkroom printing. Studio, nine hours per week. Prereq: A-S 380 or A-S 300 or consent of instructor.

A-S 385 INTERMEDIATE PHOTOMANIPULATION: PHOTOSHOP (3)
An intermediate level course designed to help students integrate traditional photography with digital computer imaging tools such as Adobe Photoshop or a similar program. Students are required to produce original photographic imagery for use in creating digital artwork that is outputted to printed materials such as inkjet printers. Advanced methods of input and output calibration, as well as advanced methods of image manipulation, are covered. Emphasis is placed on the aesthetics and ethics of digital photographic art and creating meaningful and effective images. Nine studio hours per week. Prereq: A-S 200 and A-S 380 or A-S 300 or permission of instructor.

A-S 386 ALTERNATIVE PROCESSES PHOTOGRAPHY I (3)
A-S 386 is an introductory course in alternative photographic processes. The emphasis is upon the unique qualities of alternative photography relating to visual perception. Students receive technical instruction in the use of digital negatives, cyanotypes, brown prints, and gum-bichromate printing among other 19th century processes. Studio, nine hours per week. Prereq: A-S 380 or A-S 300 or consent of instructor.

A-S 387 TOPICS IN PHOTOGRAPHY (Subtitle required) (3)
An intermediate level course that allows students to explore a variety of lens-based or fine-art photographic topics. The class builds on students’ previous experiences with photographic media. The class is supplemented by historical readings and discussion of art theory dealing with the use of photographic technology in an artistic context. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: Will be designated with subtitle or consent of instructor.

A-S 390 TOPICAL STUDIES (Subtitle required) (3)
Studio investigation of art forms, processes, and topics not specially treated in the regular studio course of study. Topics announced in schedule book for each semester. Nine studio hours per week. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: To be specified as appropriate when topic is identified.

A-S 395 INDEPENDENT WORK: ART STUDIO (1-3)
Supervised individual work in Art Studio. A learning contract will be submitted both to the department and the office of the dean at the time of registration. May be repeated to a maximum of nine credits. Prereq: Art major, senior standing, grade-point average of 3.0 within the department and consent of instructor.

A-S 396 WORKSHOP (Subtitle required) (1-6)
Workshops in a variety of media dealing with supervised investigation of Art-Studio problems. Studio, 3-18 hours per week. May be repeated to a maximum of nine credits when identified by different subtitles. Prereq: Consent of instructor.

A-S 398 COORDINATED STUDIES IN ART STUDIO (3)
Supervised independent study in conjunction with regularly scheduled upper-level classes. Coordinate study credits may not be attached to any upper-level course in which the student is concurrently enrolled. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: Art major, junior standing or above, grade-point average of 3.0 in the department.

A-S 399 EXPERIENTIAL EDUCATION. (1-15)
Off-campus studio experience outside the academic environment leading to significant professional growth. A formal learning contract among student, field supervisor and the department. Studio hours per week by arrangement. May be repeated to a maximum of 15 credits. Prereq: Upper division standing; written statement of objective, recommendation of a studio faculty member and the approval of the department chairperson and the Office of Experiential Education.

A-S 446 DIGITAL VIDEO: VISUAL STORYTELLING (3)
A digital video class with emphasis placed on use of camera and postproduction editing and keyframing skills for an advanced student. Curriculum will focus on the required creation of a series of short original video works. Industry practices of shotlists, color correction and post-production, such as AfterEffects will be explored in depth. Video works for this course can be 2-D animation, projection, installation or screen-based. Prereq: A-S 346.

A-S 480 PROFESSIONAL PRACTICES IN PHOTOGRAPHY (3)
A-S 480 is a seminar style class that looks at the business side of photography. Through this class students will look at different careers and business practices in the photography world. Students will work through exercises in goal setting, financial management, networking, branding, portfolio design and much more. This class is broad enough for students to feel prepared to enter numerous photographic fields after graduation. Prereq: Any two photogra phy 300 level or above classes.

A-S 490 SENIOR SEMINAR (1)
Readings and discussions in art, Selection, preparation, and presentation of senior exhibitions and portfolios. To be taken during the student’s final semester of study. Two lecture hours per week. Prereq: Senior standing in Department of Art.

A-S 510 PAINTING III (3)
Supervised individual development in painting. Nine studio hours per week. Prereq: A-S 311 or consent of instructor.

A-S 511 PAINTING IV (3)
Continuation of A-S 510; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 510 or consent of instructor.

A-S 520 PRINTMEDIA: TOPICS (Subtitle required) (3)
A course will explore and discuss contemporary and future directions in print media. Students will combine traditional, digital, and post-digital matrices to create works that merge print with installation, design, animation, book-arts, or other mixed-media methods. Prereq: A-S 320 or A-S 321 or consent of instructor.

A-S 521 PRINTMEDIA: CONTEMPORARY PRACTICES (3)
Students will utilize knowledge from previous print courses to develop specific projects and research that develops a professional body of work and studio practice. Prereq: A-S 520 or consent of instructor.

A-S 530 ADVANCED DRAWING (3)
Supervised individual development in drawing. When offered in the Fall, emphasis will be on the human figure. When offered in the Spring, students may select from a broad range of traditional and experimental subjects. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 330 or consent of instructor.

A-S 540 GRAPHIC DESIGN: PUBLICATION DESIGN (3)
Students develop innovative concepts in advertising layout and design through brochures, direct mailers, magazine and newspaper ads. Contemporary techniques in design and production emphasized. Printing techniques, and paper selection introduced as design elements. Nine studio hours per week. Prereq: A-S 541 (with a grade of B or better) and Portfolio Review.

A-S 541 GRAPHIC DESIGN: ADVANCED DESIGN (3)
Provides an opportunity for the advanced study of artistic and technical solutions for graphic design problems. Prospecting for employment, working conditions, avenues for advancement, pricing work, and the legal responsibilities of the artist-designer to the client-agency discussed. Students conclude this course with the presentation of a portfolio demonstrating their ability to do quality work which meets the highest professional standards. Nine studio hours per week. Prereq: A-S 540 (with a grade of B or better) and Portfolio Review.

A-S 546 INTERMEDIA STUDIO (Subtitle required) (3)
An advanced course focusing on a specific area of Intermedia art production, i.e. video, installation, robotics, or digital techniques, emphasizing personal development of theoretical and skill-based foundation. May be repeated to a maximum of six credits when identified by the same subtitle and nine credits when identified by different subtitles. Nine studio hours per week. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

A-S 547 DIGITAL MEDIA PROJECTS CAPSTONE (3)
A culminating course that allows digital media students to propose and create large-scale, in-depth projects such as short films, video installations, a complete animation, a photographic series, a 3D printing installation, a web-based research project, etc. that require time and focus to produce. 3 credit hours, may be repeated up to 9 hours. Prereq: Senior Standing, B.S. Digital Media and Design Majors.
Course Descriptions

*A-S 550 ADVANCED FIBER I. (3)
Supervised individual development in fiber. Nine studio hours per week. Prereq: A-S 351 or consent of instructor.

*A-S 551 ADVANCED FIBER II. (3)
Continuation of A-S 550; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 550 or consent of instructor.

A-S 552 ADVANCED WOVEN STRUCTURES. (3)

A-S 560 ADVANCED HOT METALS: FABRICATION. (3)
Art Studio 560 is an advanced level course, continuing metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 360 or consent of instructor.

A-S 561 ADVANCE HOT METALS: CASTING. (3)
Art Studio 561 is an advance course in metal working skills, techniques and processes for production sculpture forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: casting and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 361 or consent of instructor.

A-S 564 DIGITAL FABRICATION PROJECTS (Subtitle required). (3)
This is an advanced course in which students will utilize knowledge from previous hybrid fabrication courses to create personal projects and research to develop a professional body of work and studio practice. Six studio hours per week. May be repeated to a maximum of six credit hours. Prereq: A-S 365 or A-S 366 or consent of the instructor.

A-S 567 ADVANCED TOPICS IN DIGITAL FABRICATION (Subtitle required). (3)
This is an advanced course that allows students to explore a variety of digital fabrication processes used in CAD/CAM based artistic topics. This class builds on students’ previous experiences with hybrid fabrication media. Readings and discussion of contemporary and future directions in digital fabrication supplement the class. The use of current technology combined with traditional processes in an artistic context will be emphasized. Students will develop a professional body of work stemming from personal research. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: A-S 365 or A-S 366 or consent of the instructor.

A-S 570 CERAMICS III. (3)
Supervised individual development in ceramics. Nine studio hours per week. Prereq: A-S 371 or consent of instructor.

A-S 571 CERAMICS IV. (3)
Continuation of A-S 570, emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 570 or consent of instructor.

A-S 580 PHOTOGRAPHY PROJECTS I. (3)
A-S 580 is a photography based project course. The emphasis of this course is on the expansion of photographic techniques, self-expression, and long-term project development. Prereq: Any of the following: A-S 381, A-S 384, A-S 385, A-S 386, A-S 305 or consent of instructor.

A-S 581 PHOTOGRAPHY PROJECTS II. (3)
A-S 581 is a continuation of A-S 580. The emphasis of this course is advanced exploration and experimentation of photographic techniques, self-expression, and long-term project development in preparation for student’s future success in independent research. May be repeated to a maximum of six credits. Prereq: A-S 580 or consent of instructor.

A-S 584 COLOR PHOTOGRAPHY. (3)
A-S 584 is a continuation of A-S 384. The emphasis is upon advanced color photographic processes and continued acquisition of skills for self-expression through the medium. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 384 or consent of instructor.

A-S 585 INDUSTRY PATHWAYS AND PRACTICE. (3)
A-S 585 is a seminar/studio style class that looks at professional practices in the creative industry and helps prepare students for their post-college careers. Students will work through exercises ranging from portfolio presentation to project management. Industry professionals will be guest speakers to present their work in the various mediums used for real world application. This class is broad enough for students to feel prepared to enter into a wide variety of creative fields after graduation. This course provides full GCCR credit for the BS in Digital Media and Design Degree. Prereq: Junior standing in the Digital Media and Design major or consent of instructor.

*A-S 586 ALTERNATIVE PROCESSES PHOTOGRAPHY II. (3)
A-S 586 is a continuation of A-S 386. The emphasis is upon advanced alternative photographic processes and continued acquisition of skills for self-expression through the various media. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 386 or consent of instructor.

A-S 587 ADVANCED TOPICS IN PHOTOGRAPHY (Subtitle required). (3)
An advanced course focusing on a specific area or topic of lens based or photographic arts emphasizing personal development of theoretical, conceptual and technical skills. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: Will be designated with subtitle or consent of instructor.

A-S 596 WORKSHOP. (1-6)
Workshops in a variety of media dealing with supervised investigation of advanced art studio problems. Prereq: Consent of instructor.

A-S 610 PAINTING V. (3)
Advanced studio investigation of current ideas in painting. Exploration of contemporary and traditional procedures, materials, and issues in a context of a group discussion and review. May be repeated to a maximum of nine credits. Prereq: Graduate standing in the department and approval of the instructor.

A-S 611 PAINTING VI. (3)
Continued studio investigation of current ideas in painting, with increased concentration on critical group discussions of student work and readings in contemporary art. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 610 and consent of instructor.

A-S 620 PRINTMAKING V. (3)
Advanced studio investigation of current ideas in printmaking. Exploration of contemporary and traditional procedures, materials, and issues. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: Graduate standing in the department and consent of the instructor.

A-S 621 PRINTMAKING VI. (3)
Continued advanced studio investigation of current ideas in printmaking. Increased concentration of technical and aesthetic development in preparation for entry into the professional environment. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 620.

A-S 630 GRADUATE DRAWING. (3)
Supervised studio course in graduate-level drawing and mixed media works on paper or other two-dimensional surfaces. Emphasis will be placed on personal style, its identification, definition and further development in the context of contemporary drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 646 ADVANCED INTERMEDIA STUDIO (Subtitle required). (3)
A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits when identified by the same subtitle. Nine studio hours. Prereq: A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

*A-S 650 ADVANCED FIBER III. (3)
In this supervised graduate studio course in fiber, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in the fiber arts. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

*A-S 651 ADVANCED FIBER IV. (3)
Continued advanced studio investigation of current ideas in the fiber arts. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 650.

A-S 660 SCULPTURE V. (3)
In this supervised studio course in graduate sculpture, emphasis will be placed on personal style, its identification, definition, and further development in the context of modern sculpture. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

*A-S 661 SCULPTURE VI. (3)
Continued advanced studio investigation of current ideas in sculpture. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 660.

A-S 670 CERAMICS V. (3)
In this supervised studio course in graduate ceramics, emphasis will be placed on personal style, its identification, definition, and further development in the context of direction in modern ceramics. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 671 CERAMICS VI. (3)
Continued advanced studio investigation of current ideas in ceramics. Increased concentration on technical and aesthetic development, professional readings, and group discussion. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: A-S 670.

A-S 680 PHOTOGRAPHY V. (3)
A-S 680 is a continuation of A-S 581. In this supervised studio course in graduate photography, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 581 and consent of instructor.
A-S 681 PHOTOGRAPHY VI. (3)
A-S 681 is a continuation of A-S 680. The emphasis will be upon continued advanced studio investigation of current ideas in photography, with increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 680 and consent of instructor.

A-S 687 GRADUATE TOPICS IN PHOTOGRAPHY (Subtitle Required). (3)
A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in a specified topical area of lens based or photographic arts. May be repeated to a maximum of nine credits when identified under a different subtitle. Six studio hours. Prereq: Graduate standing.

A-S 710 PROBLEMS IN PAINTING. (3)
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of painting. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 720 PROBLEMS IN PRINTMAKING. (3)
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of printmaking. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 730 PROBLEMS IN DRAWING. (3)
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 740 PROBLEMS IN FIBER. (3)
Sustained individual problems and experimental work in the technical and theoretical problems of fiber. May be repeated two times to a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 750 PROBLEMS IN SCULPTURE. (3)
Sustained individual problems and experimental work in the technical and theoretical problems of sculpture. May be repeated to a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 770 PROBLEMS IN CERAMICS. (3)
Sustained individual problems and experimental work in the technical and theoretical problems of ceramics. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 777 PROBLEMS IN INTERMEDIA. (3)
A studio course specially designed for independent graduate research emphasizing individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 779 PROBLEMS IN PHOTOGRAPHY. (3)
A-S 779 emphasizes sustained individual problems and experimental work in the technical and theoretical problems of photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 780 PROBLEMS IN DESIGN. (3)
Sustained individual problems and experimental work in the technical and theoretical problems of design. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 793 GRADUATE STUDIO SEMINAR. (3)
A studio seminar for graduate students in the studio area, in all areas of concentration. Lectures, discussion and criticism will focus on current formal and theoretical problems in the arts. Emphasis will be placed on the integration of concepts and practices arising in the different fields in the visual arts with critical discourse through monthly group critiques. Required of M.F.A. candidates every Fall semester of their residency. May be repeated to a total of 12 credits. Prereq: Graduate standing in the department.

A-S 795 INDEPENDENT RESEARCH. (1-3)
Advanced studio investigation of art forms, processes, and topics not especially treated in the regular curriculum. May be repeated to a maximum of nine credits. Studio, three hours per week per credit. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 799 M.F.A. STUDIO THESIS PROJECT. (6)
Independent research and preparation for the M.F.A. thesis exhibition. For the student working in a highly technical medium or process, the preparation of a correlated written thesis under close guidance will be the outcome. The student will be expected to know the standard forms for photographic records and the preparation of a professional portfolio. Prereq: Normally taken during final semester for graduate study.

AAD Arts Administration

AAD 103 EMOTIONAL INTELLIGENCE FOR ARTS ADMINISTRATORS, PART I. (1)
Emotional intelligence (EI) is arguably the most important key to success in one’s career and personal life. Emotional Intelligence for Arts Administrators I is the first course in a three-part series that allows students to explore the research and theories of EI, the various dimensions of EI, and EI applications in the arts. Students will examine their own EI through a variety of self-assessment tools, activities, and exercises. In Part I, students will specifically consider their own self-awareness and explore ways to control their emotions. Prereq: Premajor in Arts Administration.

AAD 150 EXPLORING ARTS ADMINISTRATION. (3)
Exploring Arts Administration introduces the field of arts administration to students interested in investigating the connections between art, artists, and audiences. Through class discussions, guest lecturers, research, and field trips, students will explore the breadth and depth of the arts in society and how arts administrators connect art to audiences.

AAD 203 EMOTIONAL INTELLIGENCE FOR ARTS ADMINISTRATORS, PART II. (1)
Emotional intelligence (EI) is arguably the most important key to success in one’s career and personal life. Emotional Intelligence for Arts Administrators II is the second course in a three-part series that allows students to explore the research and theories of EI, the various dimensions of EI, and EI applications in the arts. Students will examine their own EI through a variety of self-assessment tools, activities, and exercises. In Part II, students will specifically focus on motivation, focused listening and asking questions, and empathy. Prereq: Premajor in Arts Administration and completion of AAD 103.

AAD 250 DIGITAL DESIGN FOR ARTS ADMINISTRATORS I. (3)
Effective visual communication has become vital for business in today’s global market. AAD 250, Digital Design for Arts Administrators I will explore the powerful graphics and visual design programs of Adobe Photoshop, InDesign, Illustrator and iMovie. Students will develop an ‘eye’ for design through the exploration of advanced design software, advanced design elements, and peer critiques. Students will demonstrate basic design skills through design projects for both print and the web. Prereq: Enrollment limited to AAD pre-majors prior to add/drop.

AAD 260 DIGITAL DESIGN FOR ARTS ADMINISTRATORS II. (3)
A successful organization will have a beautiful and creative online presence through the digital realm of eNewsletters, eBlogs, and social media. AAD 260: Digital Design for Arts Administrators II, students will explore topics such as branding, marketing, color theory, and digital analytics. Specifically, students will learn the process of designing, building and maintaining a website that meets an organization’s needs. The course will also examine the legal, philosophical, societal and technological issues relevant to delivering information in the 21st century. Prereq: Completion of AAD 250, CIS/WRD 111 or CIS/WRD 112.

AAD 299 ARTS ADMINISTRATION INTERNSHIP ORIENTATION. (1)
All students in Arts Administration are required to complete 6-credit hours of internship work. Internships provide an experiential learning opportunity for students to experience real-world circumstances in the arts. AAD 299: Arts Administration Internship Orientation is designed to prepare students for their internship experience. Topics include searching for an internship, resume and cover letter construction, interviewing skills, and professionalism in the workplace. Students must complete AAD 299 before they may register for internship hours. Prereq: Completion of AAD 150, 203, 250 and CIS/WRD 111 or CIS/WRD 112.

AAD 300 MANAGEMENT AND PLANNING FOR THE ARTS. (3)
Arts organizations are inherently collaborative. Arts administration students need to understand the concepts and theories of leadership, management and followership in order to contribute effectively in the ever-changing and adaptive environment of arts organizations. AAD 300: Management and Planning for the Arts will explore the principles of arts management, management theory and practice, organizational structure, organizational culture and communication, decision-making and accountability, human resource management and volunteer administration, and ethics and social responsibility. Additionally, students will study the various approaches to conducting strategic planning, using SWOT analysis, as well as identification of strategic issues and the formulation of strategic plans. Prereq: Completion of AAD 150, 203, 250 and CIS/WRD 111 or CIS/WRD 112.

AAD 363 COLLABORATION AND TEAMWORK IN ARTS ADMINISTRATION. (1)
This course is designed to expand the competencies of students in order to work successfully in teams and build true collaborations. Through structured and unstructured team building, students will analyze and evaluate their own experiences in both leading and participating in teams. Special consideration will be placed on how teams functions within arts organizations. Prereq: Major status in Arts Administration and completion of all 100- and 200-level AAD courses and AAD 300.
Course Descriptions

*AAD 305 ARTS ADMINISTRATION BUSINESS COMMUNICATIONS. (3)
Arts Administration Business Communications introduces students to a variety of technical and business writing theories and practices as they apply in the field of arts administration. The course introduces students to different communication styles and dynamic processes through the application of a variety of communications techniques including verbal, nonverbal, written, visual, listening, and technological communications. Students will apply business communications principles in the creation of business documents and both oral and visual presentations. Prereq: Completion of AAD 250, 250 and CIS/WRD 111 or CIS/WRD 112.

*AAD 310 MARKETING FOR THE ARTS. (3)
Connecting and communicating with current and prospective arts audiences is essential for ensuring a strong future for the Arts. AAD 310: Marketing for the Arts offers an overview of marketing, advertising, and promotion for visual and performing arts institutions. Students will learn practical strategies and solutions for building audiences for the arts through market research, marketing principles, and communication techniques. Topics include audience development, market segmentation, positioning strategies, marketing plans, media coverage, and promotion techniques. Prereq: Completion of AAD 250, 300, and 305.

*AAD 320 FUNDRAISING FOR THE ARTS. (3)
In the United States, a significant amount of nonprofit arts organizations' income comes from unearned revenue through fundraising. Without substantial knowledge and skills specific to fundraising in the nonprofit sector, arts organizations may not be able to sustain themselves long-term. This long course prepares students to understand the function of fundraising in arts organizations and helps them pursue careers in fundraising and development within the nonprofit arts sector. Furthermore, this course will guide students through the key theories, principles, processes, and programs of fundraising. Prereq: Completion of AAD 250, AAD 300, and AAD 310.

*AAD 350 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS I. (3)
Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of "mission to money" is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 350: Financial Management for Arts Organizations I is the first of two courses that will guide students through the key conceptual areas of financial management. Part I includes understanding the basic principles of accounting, legal reporting requirements, reading financial statements, and interpreting performance measurements. Prereq: Completion of AAD 300, 303, 310 and UK Core Quantitative and Statistical requirements.

#AAD 353 EMOTIONAL INTELLIGENCE FOR ARTS ADMINISTRATORS, PART III. (1)
Emotional intelligence (EI) is arguably the most important key to success in one's career and personal life. Emotional Intelligence for Arts Administrators III is the third course in a three-part series that allows students to explore the research and theories of EI, the various dimensions of EI, and EIs applications in the arts. Students will examine their own EI through a variety of self-assessment tools, activities, and exercises. In Part III, students will specifically focus on their development of social skills as well as social relationship management and social responsibility. Prereq: Major status in Arts Administration and completion of all 100- and 200-level AAD courses and AAD 303.

*AAD 370 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS II. (3)
Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of "mission to money" is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 370: Financial Management for Arts Organizations II is the second of the two financial management courses that will guide students through the key conceptual areas of financial management. Part II includes creating mission-driven budgets, developing cost-benefit analyses, managing cash flow, endowment and capital management, and understanding the use and purpose of economic impact studies. Prereq: Completion of AAD 320 and 350.

*AAD 390 PROGRAMMING AND EVENT PLANNING. (3)
This course is designed specifically for majors, and guides them through the complete planning process of events in the arts. The course will provide students with the skills necessary to successfully plan and implement events. Prereq: Major status in Arts Administration and completion of all 200-level AAD courses and AAD 320, AAD 350, and AAD 353.

AAD 395 INDEPENDENT STUDY IN ARTS ADMINISTRATION. (1-9)
Supervised individual work in Arts Administration. Restricted to majors with a 3.2 GPA overall/ 3.5 GPA in major. A learning contract with project clearly defined must be approved by supervising faculty member, program director, and site supervisor (if applicable). May be taken up to 9 credits. Prereq: Major status; 3.2 GPA overall/3.5 in major; consent of instructor.

AAD 399 ARTS ADMINISTRATION PRACTICUM. (1)
The supervision of a faculty member, students complete on-campus arts administration service projects. At least one of the two projects must be in service to the student’s primary art discipline’s department or school. Examples of projects might include conducting a publicity campaign for an event, working on a fundraiser, producing a publication, conducting research, updating a website, etc. Pass/fail option only. Learning contract required. Prereq: Arts Administration major or consent of instructor.

*AAD 402 SPECIAL TOPICS IN ARTS ADMINISTRATION. (1-6)
A seminar course which covers special topics in arts administration. May be repeated to a maximum of 12 credits when identified by different subtitles. Prereq: Completion of AAD 300, AAD 310 and AAD 320 or consent of the department.

*AAD 403 DECISION MAKING IN ARTS ADMINISTRATION. (3)
People make hundreds of decisions each day. Many decisions are simple. Other decisions require thoughtful deliberation. Yet all decisions, whether simple or complex, involve cognitive processes which are reflected in a variety of different fields of study. In Decision Making in Arts Administration, students will explore the theories and concepts surrounding decision making, decision modes, and decision strategies. Students will use these concepts and apply them to real-world arts administration scenarios. Prereq: Major status in Arts Administration and completion of all 200- and 300-level AAD courses.

*AAD 410 ARTS ENTREPRENEURSHIP. (3)
The arts of the 21st century need skillful, innovative, and imaginative leaders and followers. Students in Arts Entrepreneurship will have the opportunity to work on an entrepreneurial venture that connects with arts, arts and/or arts organizations with identified beneficiaries under the guidance of a faculty member. Students will have the opportunity to bring a project to life, develop a business or project plan that incorporates all the skills of an arts entrepreneur including project design, event planning, marketing, fundraising, financial management, leadership and fellowship, and program evaluation. Prereq: Major status in Arts Administration and completion all 200- and 300-level AAD courses. Students enrolled in the Certificate in Innovation and Entrepreneurial Thinking may enroll without the prerequisite courses in their senior year.

*AAD 420 ARTS ADMINISTRATION: PRACTICES, POLICIES AND THE LAW. (3)
Arts and arts administrators are required to work within current cultural, business and legal environments. Thus, students in AAD 420 Arts Administration: Practices, Policies and the Law will discuss cultural policy, management and legal issues that affect the arts, arts organizations and artists. Topics include cultural policy, funding, advocacy, arts and community, First Amendment rights, intellectual property, organizational structure, contracts, labor unions and employee relations. Students will analyze contemporary and historical case studies to expose the cultural, legal and business issues that frame the arts in today's society. Prereq: Major status in Arts Administration and completion all 200- and 300-level AAD courses.

*AAD 450 ARTS ADMINISTRATION SENIOR SEMINAR. (3)
As an advanced seminar course, this course prepares students to enter the job market or pursue graduate studies. It builds upon the other courses in the curriculum as well as practicum and internship experiences. During the course, students will work to refine and prepare electronic portfolios based on written and graphic materials prepared throughout their degree program. Additionally, students will write and critique cover letters and resumes and prepare for job interviews and negotiations. Prereq: Major status in Arts Administration and completion all 200- and 300-level AAD courses. The course should be completed in the final semester of a student’s BA program. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for transfer credit to UK.

AAD 475G MANAGING YOUR ARTISTIC CAREER. (3)
Artistic careers are exciting, dynamic and meaningful. Yet artists still require the skills and knowledge of business and industry in order to build a successful career. This course will walk you through the steps of setting your goals and the objectives that will guide you in building your career. Using the hybrid format, the course will include presentations of arts administration principles and practices as well as in-person sessions tailored to students in Music, Theatre and Dance, and the Visual Arts.

*AAD 499 ARTS ADMINISTRATION INTERNSHIP. (1-12)
The Arts Administration internship experience provides each student the opportunity to explore specific career interests in the arts while applying knowledge and skills learned in the classroom in a work setting with the support of both an on-site supervisor and a faculty advisor. The primary goal of any arts administration internship include 1) acquiring first-hand knowledge about the field of arts administration; 2) exploring new professional activities and relationships; 3) applying classroom knowledge and skills to the work environment; 4) experiencing problems and contributing to solutions in the field; 5) learning by doing; and 6) building professional networks.

Internships also aid students in identifying which skills need more development prior to graduation. One credit hour is equal to 50 work hours. This is a controlled enrollment course and a completed Learning Contract is required. Prereq: AAD 299; Major status in Arts Administration; Controlled Enrollment; Learning Contract Required.
Course Descriptions

AAD 500 THE ARTS AND ARTISTS IN SOCIETY. (3)
The arts and artists have influenced concepts of love, war, religion, race, ethnicity, and gender and have helped society face these problems. This course celebrates accomplishments and events, arts histories, and the role of the arts and artists in historical and contemporary society. Prereq: Undergraduate Arts Administration students: senior status.

*AAD 502 SEMINAR IN ARTS ADMINISTRATION. (1-6)
A seminar course which covers special topics in arts administration. May be repeated to a maximum of 9 credits when identified by different subtitles.

#AAD 521 NONPROFIT BOARD GOVERNANCE. (1)
The concept of governance is critical in the nonprofit sector. Governing boards are a vital component for the success of nonprofit organizations. AAD 531 Nonprofit Board Governance is designed to provide an understanding of how a nonprofit is governed through a volunteer board of directors. In this course, students will explore the fundamentals of governance, leadership, and strategy, and the role of board members. Prereq: Undergraduate students: AAD 350 and senior status. Graduate and certificate students: AAD 625 or AAD 626.

#AAD 531 SOCIAL MEDIA MARKETING, PROMOTION, AND BRANDING FOR ARTS ORGANIZATIONS. (1)
Formerly people, social media has become a place for news, networking, and keeping in touch. Today’s arts organizations have a golden opportunity to tap into this hybrid form of word-of-mouth marketing to build their own brands by projecting the arts and events, and services, unifying and engaging the needs of their patrons and donors. In this course, students will learn the foundations of social media marketing through platform selection, content management, and tactics. Additionally, students will explore how to use online marketing to engage an audience and encourage user-generated content. Prereq: AAD 622 or AAD 626. For graduate students, no prerequisite courses are required. Undergraduate students must have permission from the instructor.

#AAD 532 LIVE STREAMING EVENTS AND INTERACTIVITY FOR ARTS ORGANIZATIONS. (1)
Live streaming events on a variety of social media sites has become a popular method of promoting a brand, enabling users to share content, and creating a high level of engagement with patrons and donors. In this course, students will learn the principles and practices of live streaming in both digital and analog environment, including quality, purpose, and relevance. This course will explore how arts organizations can leverage this technology to increase brand awareness and engage an audience with online events and interactivity. Prereq: AAD 622 or AAD 626. For graduate students, no prerequisite courses are required. Undergraduate students must have permission from the instructor.

#AAD 535 BRAND DEVELOPMENT FOR ARTS ORGANIZATIONS. (3)
A powerful brand can propel a business, entrepreneur, or nonprofit to reach its full potential. By connecting simple concepts to complex practices in the arts, strategic branding enables patrons, donors and stakeholders to better connect, and ultimately give, buy, and participate on a higher level. Elements such as writing tone and style; logo and its specific applications; use of color; pattern and spatial organization; social media practices; and public outreach events can either build a more powerful, clear brand or distract from that desired brand and mission. In this course, students will learn how to effectively assess existing arts brands and identify techniques to improve upon them, as well as learn how to build a new arts brand. Prereq: AAD 622 or AAD 626. Undergraduate students: AAD 310 and senior status. Graduate students: AAD 600 and AAD 630.

AAD 542 GRANT WRITING FOR NONPROFIT ORGANIZATIONS. (3)
The competitive grant proposal process is the ultimate exercise in organizational capacity, yet the process itself can be elusive. In AAD 542 Grant Writing for Nonprofit Organizations, students will develop proposal writing, development, and research skills. Specific topics will include writing style and format, advanced analysis of tone, institutional prospect research, and grant writing ethics. During this course, students will identify, work closely with, and write a complete grant proposal for a nonprofit organization of their choice.

#AAD 555 FUNDRAISING: IDENTIFYING AND CULTIVATING INDIVIDUAL DONORS. (3)
This course will help students develop the necessary skills for soliciting contributions from individuals by focusing on the identification, cultivation, solicitation, and acknowledgement of contributions to arts organizations. Students will learn how to identify potential donors and create a “case for giving” that aligns with the arts organization’s mission before creating targeted fundraising strategies. The course will also include creativity and effective methods of retaining donors. Students will not only be thinking about how to present an “ask” to potential arts donors, but also demonstrating it through real-world activities. Prereq: For graduate students, no prerequisite courses are required. Undergraduate students must meet two key criteria before being able to register and enroll into this course: First, they must be classified as seniors (successfully completed 90 credits of coursework). Second, they must have “full major status” in the Arts Administration program before registering and enrolling into this course.

AAD 560 TEACHING ARTISTRY FOR SCHOOL-BASED PROGRAMS. (3)
By giving students both the understanding and skills necessary to create engaging arts-to-students experiences, AAD 560: Teaching Artistry for School-Based Programs provides students preparation for reaching out to people and communities of diverse backgrounds. Participants will learn the essential skills, strategies, and processes of teaching artistry and arts education for arts organizations. Building from a historical perspective, students will practice teaching artistry and learn how to “open up works of art” and create interactive performances and art exhibits. Course content will also include classroom lesson and assessment creation as well as models of education utilized in professional arts organizations.

AAD 565 COMMUNITY ENGAGEMENT IN THE ARTS. (3)
The purpose of all arts-programming activities is to engage audiences somehow. Through a thorough case study*, students explore the various ways arts administrators can provide community-engaging activities within their cultural organizations. The exploration includes assessing the risks taken by patrons to participate in the arts as well as identifying contextual factors and determining how to communicate with them. Students will not only learn to build strategies that identify program relevancy and engagement, but also explain why community engagement is essential for meeting an organization’s goals. Plus, students will analyze how an organization relates to the public it serves. Finally, students will have an opportunity to organically develop an engagement plan that includes community-engagement activities as well as the evaluations that assess the effectiveness of those activities. NOTE: *This course requires each student to choose one cultural organization in their city to work with and complete a case study throughout the entire course. Please see the syllabus for complete details and direct any questions to the instructor.

#AAD 585 ARTS EMERGENCY MANAGEMENT: CREATING A RESILIENT ORGANIZATION. (3)
The frequency of natural disasters, terrorist attacks, and data breaches across the globe and the dramatic retelling of them on various media outlets has created an expectation that emergency plans are developed and routinely updated for areas of public assembly, including arts and culture venues. This course provides a sociological overview of community actions and reactions to disasters as well as a customized planning approach for arts managers and artists in preparing for emergencies. Prereq: For graduate students, no prerequisites are required. For undergraduate students, they must be classified as a senior (successful completion of 90 credit hours) and have “full major” status in the BA in Arts Administration.

AAD 600 ARTS ADMINISTRATION TECHNOLOGIES. (3)
From brochures to websites to video, arts organizations are investing more and more resources in effectively communicating with the public. As such, arts administrators must be skilled in utilizing current technology to convey messages. In this course, students will learn a variety of software applications that will aid in the successful creation of print materials, websites, and other media presentations. Additionally, the course will introduce concepts of design principles and relevant theories.

AAD 620 MANAGEMENT AND LEADERSHIP IN THE ARTS. (3)
People are the basis of arts organizations. Understanding the factors that determine individual actions and interactions, being able to solve problems, capitalize on new opportunities and react to crises is necessary for being a successful leader in a work environment. As such, this course focuses on the planned, systematic process in which all organizational theory and behavior science principles and practices are introduced into organizations, toward the goal of increasing organizational and individual effectiveness. The course prepares students to organize and motivate people within an arts organization, manage social environments, and execute strategic change. Topics explored include organizational design, decision-making, conflict resolution, designing effective reward systems, team building, and organizational dynamics of culture. Additionally, students will focus on reflecting upon their own leadership skills and abilities.

AAD 625 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS. (3)
Financial management is a central function of successful arts management. It is the foundation in which human, physical, and financial resources are maintained and monitored. In the nonprofit sector, the relationship of “mission to money” is a key conceptual framework that must be understood by arts managers and will be emphasized in this course. In addition, arts managers are the source of financial information to both internal and external stakeholders, and successful financial analysis is essential for sound strategic planning and governance. This course guides students through key topics of financial management including accounting practices, value time of money, interpreting financial statements, creating mission-driven budgets, analyzing cash-flow, and managing investments.

AAD 626 FINANCIAL MANAGEMENT FOR FUNDRAISING. (3)
Financial management is a central function of successful nonprofit fundraising. In the nonprofit sector, the concept of contributed income is a key framework that must be understood by fundraisers and will be emphasized in this course. This course covers the financial aspects of both internal and external stakeholders, and successful financial analysis is essential for sound strategic planning and governance. This course guides students through key topics of financial management including accounting practices, contributed and earned revenue, time value of money, interpreting financial statements, creating mission-driven budgets, analyzing cash-flow, and managing investments.

University of Kentucky 2019-2020 Undergraduate Bulletin

378
## AAD 629 ORGANIZATION THEORIES IN ARTS ADMINISTRATION.
(3)
Organization and management are the inner workings of institutions in an attempt to understand organization functionality. For this course, theories are drawn from numerous disciplines including arts management, business administration, nonprofit management, and public administration. Additionally, theories may be classical, foundational, modern, postmodern, and/or critical. Specifically, this course explores various organizational theories that are relevant to running arts organizations. Through readings and critical analysis, students will establish a conceptual framework in which to design a research study. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

## AAD 630 MARKETING RESEARCH AND PLANNING FOR ARTS ORGANIZATIONS.
(3)
Arts managers are consistently faced with the challenge of connecting arts offerings with an audience. Understanding the possible markets and developing strategies to reach the desired audience are part of every arts organization’s primary administrative activities. Throughout this course, students will identify theories and frameworks crucial to the marketing function, including product development, market research, consumer behavior, brand development, pricing strategies and promotion techniques. Students will utilize the knowledge to analyze marketing strategies, investigate consumer behavior and conduct primary and secondary marketing research for an arts organization. Prereq: AAD 600.

## AAD 640 PRINCIPLES OF FUNDRAISING.
(3)
Most nonprofit organizations earn more than half of their total annual revenue from contributed sources, including funds from businesses, foundations, government, and individuals. This course will examine how each of these entities are identified, researched, cultivated, solicited, and stewarded, in context of the organization’s fundraising cycle. Students will learn practical development techniques such as crafting a case for support, how to identify government and foundation grant programs, the basics of planned giving, donor research and solicitation plans, and carrying out both fundraising and stewardship events. The philosophies and theories that underlie the concept of charitable giving will also be examined, as well as the ethical considerations inherent in the development process. During this course, students will identify, work closely with, and write a complete strategic development plan for a nonprofit organization of their choice. Prereq: AAD 600 and AAD 625, or consent of instructor.

## AAD 650 THE ARTS AND THE LAW.
(3)
How does art interact with law? How does law impact artistic creation? How can arts administrators ensure that their organization legally protects itself? Understanding the legal environment in which arts organizations exist and artists create empowers arts administrators to make sound and reasoned decisions. Throughout this course, students will be exposed to a variety of legal topics related to artistic creation and the managing of arts organizations. The course will provide historical and contemporary introduction to the laws and policies, both in the United States and internationally, related to intellectual property, First Amendment, cultural property, human resource management, labor relations, immigration and cultural exchange, and contract development and enforcement.

## AAD 665 CULTURAL POLICY.
(3)
Arts and culture institutions operate in complex environments with policies that shape the kinds of artistic creations that are created, produced, disseminated, marketed, funded and preserved. What are these policies in the United States? Who are the policy actors? Who implements policy? Who defines policy? What is the impact of policies? This course explores regulatory and provisional areas of public policy as well as cultural policy specifically. Historical and contemporary policy issues related to arts education, creative economy, cultural facility infrastructure, employment, equity, funding, and preservation will be investigated. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

## AAD 660 SOCIAL AND CULTURAL ENTREPRENEURIALISM.
(3)
Utilizing entrepreneurial concepts, social entrepreneurs use innovative solutions in order to achieve social change. Social entrepreneurialism is a burgeoning field that garners attention from investors, philanthropists, foundations and nonprofit leaders in order to achieve meaningful social returns while maintaining financially viable organizations. This course introduces students to the field of social entrepreneurship and explores how to start, grow and maintain successful mission-driven cultural ventures.

## AAD 665 CREATIVE CITIES, CREATIVE PLACEMAKING, AND COMMUNITY VIBRANCY.
(3)
This course examines an array of contemporary approaches to building the economic, physical, and social dimensions of cities structured around creativity, culture, and the arts. Historical underpinnings, trajectories, and problems of these approaches are explored through lectures, readings, student research, and discussions. Creative cities, the creative class, creative placemaking, and the like as “new” ways to further urban development have gained popularity yet remain problematic and raise important issues in how cities develop and how different kinds of artistic creations that are created, produced, disseminated, marketed, funded and preserved. What are these policies in the United States? Who are the policy actors? Who implements policy? Who defines policy? What is the impact of policies? This course explores regulatory and provisional areas of public policy as well as cultural policy specifically. Historical and contemporary policy issues related to arts education, creative economy, cultural facility infrastructure, employment, equity, funding, and preservation will be investigated. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

## AAD 690 CREATING AND EVALUATING NEW ARTS PROGRAMS.
(3)
Successful programs that meet the needs of current and potential audiences are the cornerstone of arts organizations. This course includes the necessary skills for designing, implementing, and evaluating a mission-based program for the arts. Students will utilize research techniques to determine the feasibility of a new program, both internally and externally to the organization. While devising an operating budget, students will include expenses from both earned and unearned revenue sources. Students will learn the process of implementing a new program and applying audience development strategies. Finally, students will use various evaluation tools and create a timeline to evaluate the program for its effectiveness. Throughout the course, students will create a grant proposal for an actual nonprofit arts organization by preparing a proposal for board approval. Prereq: AAD 625 and AAD 630.

## AAD 695 INDEPENDENT STUDY IN ARTS ADMINISTRATION.
(1-6)
Supervised individual work in Arts Administration. Restricted to majors. A learning contract with project clearly defined must be approved by supervising faculty member, program director, and site supervisor (if required). May be taken up to 6 credits. Prereq: Restricted to majors.

## AAD 699 INTERNSHIP IN ARTS ADMINISTRATION.
(3)
Students without substantial work experience in the field of Arts Administration are required to complete three credit hours of internships in order to graduate, and must work at least 50 hours per credit hour earned. While students are ultimately responsible for obtaining and completing their internships, students do receive ample support and assistance from Program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor and the host organization supervisor. Most internships are completed during the summer between the student’s first and second year in the program. However, internships can also be completed during spring and fall semesters, or the summer after students have completed their regular course work.

## AAD 720 SUSTAINING LEADERSHIP IN THE ARTS.
(3)
This course offers a theoretical and practical understanding of leadership for arts and cultural organizations. Students will be exposed to various leadership theories, models, and issues from many different fields, such as arts management, business administration, nonprofit management, and public administration with a specific attention given to running arts and cultural organizations. Sustaining Leadership in the Arts also explores emerging, critical, and contemporary leadership issues including diversity, equity, and inclusion in arts and cultural leadership. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

## AAD 730 MARKETING STRATEGIES AND APPLICATIONS FOR ARTS ORGANIZATIONS.
(3)
This course will provide a comprehensive introduction to marketing and marketing strategies that arts organizations are able to use in order to take advantage of. This course will explore how marketing strategies are connected to arts organizations and how they can be used to connect with audiences. Additionally, this course will also explore how marketing strategies can be applied to arts organizations in order to increase audience engagement and retention.

## AAD 740 FUNDRAISING TECHNIQUES.
(3)
This course will explore how the development theories examined in AAD 640 Principles of Fundraising are organized into actionable fundraising techniques and products. Students will continue working with their chosen organization from AAD 640 to create the many projects conceived in the strategic development plan. Emphasis will be placed on fundraising device creation, goal setting, case development, the donor-centric communication style, prospect identification, pre-campaign testing, campaign execution, practicing the major gift ask, and donor stewardship devices. The course will also cover how these campaigns are supported by planned giving methods, databases, and web-based applications, as well as related legal and ethical issues. Prereq: AAD 640.

## AAD 745 VENTURE PHILANTHROPY.
(2)
This course seeks to challenge the systemic impact of venture philanthropy and empower access by applying an Indigenous-centric approach marked by democratizing, revitalizing, and reframing. Prereq: AAD 640 Principles of Fundraising or department approval.

## AAD 750 CAPSTONE COURSE IN ARTS ADMINISTRATION.
(3)
This course offers a theoretical and practical understanding of leadership for arts and cultural organizations. Students will be exposed to various leadership theories, models, and issues from many different fields, such as arts management, business administration, nonprofit management, and public administration with a specific attention given to running arts and cultural organizations. Sustaining Leadership in the Arts also explores emerging, critical, and contemporary leadership issues including diversity, equity, and inclusion in arts and cultural leadership. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

## AAD 767 ARTS ADMINISTRATION DISSERTATION RESIDENCY CREDIT.
(2)
Residency credit for dissertation research after the qualifying comprehensive examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Passing the qualifying examination for the PhD in Arts Administration.

## AAD 790 ARTS AND CULTURE RESEARCH STUDIES.
(3)
Arts & Culture Research Studies explores various types of research studies done in the field of arts and culture. Both empirical and theoretical research in many different areas, such as management, governance, leadership, financial management, fundraising, marketing, programming and evaluation, human resources management, audience and community development, cultural economics, and cultural policy will be examined. The types of research studies explored in this course will include white papers, research papers (articles), books (and book chapters), and websites (emphasis on visual elements). Studies included in this course are from many different fields, such as arts management, business administration, nonprofit management, and public administration but focus on topics in arts and culture management, administration, and policies. By reading and analyzing a number of studies in many different foci, students will be able to gain a broad understanding of arts and culture research and to shape their future research. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.
# AAD 795 ARTS ADMINISTRATION RESEARCH PLANNING AND PROPOSAL WRITING. (3)
Art Administration Research Planning & Proposal Writing is designed to help students learn the significance and components of sound research design and proposal writing. In the course, students will be exposed to various research design approaches of qualitative, quantitative, and mixed methods utilized within arts and culture research. Students will also understand various components of a sound and effective research proposal including the abstract, introduction, purpose statement, literature review, theoretical framework, research questions and hypotheses, and methodology and methods. Within the course, students will work on their research plan and written proposal for their dissertation project. Prereq: Arts Administration PhD student or consent of the Department of Arts Administration.

# AAS 100 INTRODUCTION TO AFRICAN STUDIES. (3)
This course provides a basic overview of African histories, cultures and societies. (Same as HIS 100.)

# AAS 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY (3)
This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz composition as philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealistic and existentialist artistic movements in modern and postmodern cultural contexts. Articles to be discussed include, James Baldwin, Harryette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative trends, and political connotations specific to African American literature and culture. (Same as ENG 168.)

# AAS 200 INTRODUCTION TO AFRICAN-AMERICAN STUDIES. (3)
An interdisciplinary course which establishes the intellectual context for an examination of the African-American experience; it introduces students to the various approaches scholars use to analyze that experience. This course employs a topical framework which permits focus on issues reflecting the diversity and richness of African-American experience across geographic boundaries. Additional costs associated with field trips may be associated with this course. It is anticipated the cost will be under $50.

# AAS 235 INEQUALITIES IN SOCIETY. (3)
This course seeks to promote an understanding of inequalities in American society by considering them in the context of the social origins, development, and persistence of inequalities in the United States and other societies. Bases of inequality that may be considered include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as SOC 235.)

# AAS 253 HISTORY OF PRE-COLONIAL AFRICA. (3)
This course examines the early history of Africa, from human evolution to colonization by European powers in the late 19th century. Topics include: the development of states from kinship-based forms of political organization, the political, cultural, and social transformations that accompanied African conversion to Islam, a close examination of oral epic poetry as a window into medieval empire-building in the Sahel, an extended conversation about the role of Africa in the transatlantic slave trade, and a discussion of the dilemmas faced by African rulers in their attempts to conquer by European powers. Successful students will gain a thorough introduction to the major developments in the early history of Africa, which will serve as a solid foundation for further coursework in African history and other African studies courses. (Same as HIS 253.)

# AAS 254 HISTORY OF COLONIAL AND POSTCOLONIAL AFRICA. (3)
This course is a survey of the history of Africa from the onset of colonial rule in the 1880s to the present. Its main objective is to introduce students to some of the major socio-political and economic developments that defined Africa what it is today. The course will explore themes such as the European conquest of Africa and Africans’ responses, African nationalism and struggles for independence, as well as post-colonial African politics and economics (under) development. (Same as HIS 254.)

# AAS 260 AFRICAN AMERICAN HISTORY TO 1865. (3)
A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as HIS 260.)

# AAS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT. (3)
This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960’s. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as HIS 261.)

# AAS 262 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3)
This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as FR 263.)

# AAS 264 INTRODUCTION TO BLACK WRITERS. (3)
An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (African), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Can be taken for ENG Major Elective credit. Prereq: ENG minor credit. Credit will not be given to students who already have credit for ENG 264. (Same as ENG 266.)

# AAS 300 HISTORY OF JAZZ. (3)
A listening survey course covering the chronological evolution of jazz from its West African and European roots, through its germination in America, to the present. Emphasis will be on the various styles and functions of jazz, particularly as they have been affected by changing social-cultural patterns during the twentieth century. (Same as MUS 300.)

# AAS 301 INTRODUCTION TO THE AFRICAN DIASPORA. (3)
The course will explore the making of the African Diaspora in the Atlantic and Indian Ocean worlds through a combination of historical and ethnographic studies. How did men and women of African descent come to populate and shape the cultures, economies, and political landscapes of the Americas and South Asia? The course will begin with an examination of African cultures in the centuries leading up to European colonization of the Americas and the advent of the Atlantic slave trade. The spread of Islam and Christianity and the growth of empires in East and West Africa will be discussed as part of understanding the traditions and practices which Africans brought with them to the Americas and throughout the Indian Ocean world. We will look at the development of the African Diaspora in the Middle East and South Asia in order to more fully contextualize the western development of the diaspora. The course ends with an examination of African Americans in the United States.

# AAS 326 CONTEMPORARY AFRICAN LIVES. (3)
What do you think when you hear AFRICA? This course goes beyond the words, images and stereotypes that we typically learn from western news reports, popular media and mainstream descriptions of issues on the continent. Our goal will be to examine, and challenge, many of the popular portrayals of Africa, and thus build a more realistic and grounded understanding of the region. We will consider issues of geography, social organization and family life, health and food security, economy and ecology, and politics and identity. But our examination will draw from African sources and people living on the continent, as well as media built on long term engagement with the multitude of African nations. We will investigate how social, economic and global systems come together to produce the diversity of lives across the vast region. We will also discover positive, hopeful and sustainable aspects of African life with attention to local people’s solutions and efforts to build the lives they want. Ultimately, we will come away with both better understanding of the complex reality of “Africa”, and with analytical tools for examining other complex, but often stereotyped, issues in society more broadly. Prereq: Sophomore standing or higher. (Same as ANT 326.)

# AAS 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3)
A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region’s position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as GEO 328.)

# AAS 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)
This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as GEO 336.)

# AAS 360 RACE AND SPORTS IN AMERICA. (3)
This reading seminar examines the history of race and sport in America. (Same as HIS 360.)

# AAS 384 BLACK THEATRE WORKSHOP. (3)
A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as TA 384.)

# AAS 400 SPECIAL TOPICS IN AFRICAN-AMERICAN AND AFRICANA STUDIES (Subtitle required). (3)
Detailed investigation of a particular topic in African-American and Africana Studies, with emphasis both on content and existing research. Topics will vary from semester to semester and are announced the preceding semester. May be repeated up to 12 credit hours when identified by a different subtitle. Prereq: AAS 200.
AAS 401 INDEPENDENT READING AND RESEARCH IN AFRICAN-AMERICAN AND AFRICANA STUDIES. 
(3) 
For African-American and Africana Studies majors and minors. The student pursues a course of reading and research under the guidance of a staff member and completes a major research project. A written contract defining the area of study is negotiated between student and instructor at the beginning of the course. May be repeated to a maximum of six credits. Prereq: African-American and Africana Studies major or minor; twelve hours of African-American and Africana Studies major or minor courses, including AAS 200.

AAS 417G SURVEY OF SUB-SAHARAN POLITICS. 
(3) 
A survey of sub-Saharan government and politics intended to give the student broad knowledge about the setting of African politics, precolonial African political systems, the political legacies of major European colonial powers, and problems of political development. Prereq: PS 210 or 212. (Same as PS 417G.)

AAS 420 AFRICAN-AMERICAN RELIGIOUS EXPERIENCE. 
(3) 
This course explores and examines how African Americans shaped and fashioned their religion to meet their own peculiar needs as they responded to historical occurrences.

AAS 432 RACE AND ETHNIC RELATIONS. 
(3) 
Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as SOC 432.)

AAS 433 TOPICS IN SOCIAL INEQUALITIES (Subtitle required). 
(3) 
A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: Six hours of social science or consent of instructor. (Same as SOC 433.)

#AAS 469 THE KENTUCKY AFRICAN AMERICAN EXPERIENCE. 
(3) 
This course offers a general perspective of the African American experience in Kentucky. Students will discuss the social, political, economic, and cultural dimensions of black life in the state form the earliest settlement to the present. This course will also highlight the people, places, events, organizations, and institutions that have been pivotal to the Kentucky African American experience. (Same as HIS 469.)

AAS 471 RACE, ETHNICITY AND POLITICS. 
(3) 
An examination of the role that race and ethnicity play in the political arena. Students will explore the nature of race, racism, and ethnocentrism, as well as their impact on political institutions and public policy. Particular attention will be given to elections, public opinion, mass media and social movements in the United States. (Same as PS 471.)

#AAS 500 AFRICAN AMERICAN LIVES. 
(3) 
This course will introduce students to the study of African American life, culture, and history as well as interdisciplinary modes of inquiry that engage the arts, history, literature, and social science. Major topics covered will be the history of race in America, the long Black freedom struggle, and African American epistemologies and methodologies.

AAS 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICES IN AMERICA. 
(2-3) 
The course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as SW 523.)

AAS 535 ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required). 
(3) 
A sociological study of topics relevant to social inequalities and stratification. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 535.)

AAS 545 PSYCHOLOGY OF THE BLACK EXPERIENCE. 
(3) 
EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational, School, and Counseling Psychology and is cross-listed with the Africana Studies program and Psychology department. It is designed to offer enrolled undergraduate and graduate students opportunities to survey, explore, and critique classic and contemporary theories and research articulating the psychologies that inform both social and academic experiences and observed behaviors of Black people. While there are multiple objectives for this upper-level undergraduate and graduate-level seminar course, one central objective of the course is to expose all students to literature and research pertaining to the Black experience in the United States in an effort to develop refe and mindsets that will foster and reflect innovative ways of thinking about how to enhance the life experiences of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons.

AAS 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. 
(3) 
This course assists future educators in developing strategies to create an equitable teaching/ learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief/systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as EDC 550.)

(3) 
This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as HIS 587.)

AAS 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. 
(3) 
This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as EDC 601.)

AAS 616 MULTICULTURAL PSYCHOLOGY. 
(3) 
This course is designed to increase one’s sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one’s skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as EDP 616.)

AAS 635 SEMINAR IN SOCIAL INEQUALITIES. 
(3) 
This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classic and contemporary topics on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as SOC 635.)

AAS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY. 
(3) 
Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as HIS 654.)

AAS 656 BLACK AMERICAN LITERATURE. 
(3) 
An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as ENG 656.)

AAS 657 RACE RELATIONS IN THE UNITED STATES. 
(3) 
This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as HIS 657.)

AAS 720 SOCIAL WORK PERSPECTIVES ON HUMAN AND CULTURAL DIVERSITY. 
(2) 
This second required course in the major and social environment sequence builds upon the foundation course. The focus of this course is upon the effects of discrimination and oppression experienced by diverse population groups with special attention to the effects of racism, sexism, ageism, classism and geography upon vulnerable groups; and upon institutionalized societal and cultural themes in diversity; with implications for social work practice. Prereq: SW 620 or advanced standing in the MSW program. (Same as SW 720.)
Course Descriptions

**ABT 201 SCIENTIFIC METHOD IN BIOTECHNOLOGY.** (1)
A course designed to acquaint students with the common experimental methods used in agricultural biotechnology. Course will be presented with several case studies which demonstrate basic scientific reasoning and experimental strategies. The students will then use their understanding of basic scientific methods and agricultural systems to critically evaluate work from the current scientific literature. Each student will be required to provide a written and oral evaluation of a research project in some aspect of agricultural biotechnology. The class will be structured with the basic skills for preparing their own research proposals. Prereq: ABT 101 and enrollment in the Agricultural Biotechnology degree program or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. [Offered in full only.]

**ABT 301 WRITING AND PRESENTATIONS IN THE LIFE SCIENCES.** (2)
The goals of this course are to expose students to current scientific literature in the life sciences, develop skills for the evaluation of primary research literature and presentations, prepare students to write an independent research proposal, and develop oral and written communications skills. Student participation is a key component of activities, and students are required to provide both oral and written evaluations of research publications, presentations, and proposals. A major part of the course involves students developing, writing, and presenting an independent research proposal in coordination with a research mentor. This course should be taken prior to ABT 395 or ABT 399, and students must identify a research mentor early during the semester. Prereq: Agricultural Biotechnology major or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. [Offered in full and spring.]

**ABT 360 GENETICS.** (3)
The basic principles of genetics as currently understood from evidence accumulated in classical, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: BIO 148, BIO 152 and CHE 105 or consent of instructor. [Same as ENT 360.] [Offered in full only.]

**ABT 361 GENETICS LAB ONLINE.** (1)
Analysis and interpretation of genetics problems using interactive computer programs. Prereq: ABT/ASC/ENT 360 should be taken concurrently.

**ABT 395 INDEPENDENT STUDY IN BIOTECHNOLOGY.** (1-4)
Independent study in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: Agricultural Biotechnology major and consent of appropriate instructor before registration. [Offered in fall, spring and summer II.]

**ABT 396 RESEARCH EXPERIENCE IN BIOTECHNOLOGY.** (1-4)
ABT 396: Research in biotechnology under the supervision of a faculty member. One to four credit hours/semester. The course may be repeated for a maximum of six credits, but the student must meet the requirements each semester to allow enrollment. This course should further the students’ experience with science, enhance their appreciation for the scientific process, and what it means to conduct scientific research. Prereq: Agricultural and Medical Biotechnology major, consent of advisor before registration and identification of a faculty research mentor.

**ABT 399 EXPERIENTIAL LEARNING IN BIOTECHNOLOGY.** (1-6)
An internship in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: Consent of the instructor, chairperson for the Agricultural Biotechnology degree program and completion of a learning contract before registration. [Offered in full, spring and summer II.]

**ABT 460 INTRODUCTION TO MOLECULAR GENETICS.** (3)
Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription, and translation of DNA, as well as RNA processing, recombination and the theoretical underpinnings of genetic engineering. Prereq: ABT/ENT 360 or BIO 304 or consent of instructor. [Same as ENT 460.] [Offered in spring only.]

**ABT 461 INTRODUCTION TO POPULATION GENETICS.** (3)
This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (plants, animals, and microorganisms). Some theoretical derivations will also be introduced. Prereq: ABT/ENT 360 (or equivalent) and one course in probability/statistics. (Same as BIO/ENT/FOR 461G.) [Offered in spring only.]

**ABT 495 EXPERIMENTAL METHODS IN BIOTECHNOLOGY.** (4)
A laboratory techniques course designed to give students the technical skills and understanding necessary to critically examine biological systems at the molecular level. The course will emphasize the principles of chemistry, biochemistry and molecular biology as applied to a model system for laboratory investigations. Laboratory, nine hours per week. Prereq: ABT/ENT 360 or BIO 304, Agricultural Biotechnology major or consent of instructor. [Offered in full and spring.]

**ABT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY.** (3)
An introduction to modern evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). [Same as ENT 505.]

**ACC Accounting**

**ACC 201 FINANCIAL ACCOUNTING I.** (3)
This course is designed to provide an introduction to financial accounting from the users' perspectives. Its primary purposes are to promote understanding of financial accounting information, decision making purposes and to focus on financial accounting's role in communicating business results. Prereq: Successful completion of 27 semester credit hours or consent of the School of Accountancy Director.

**ACC 202 MANAGERIAL USES OF ACCOUNTING INFORMATION.** (3)
An introduction to the use of accounting data within an organization to analyze and solve problems and to make planning and control decisions. Prereq: ACC 201 or consent of the Director of the School of Accountancy.

**ACC 211 FINANCIAL ACCOUNTING LAB.** (1)
A laboratory-based approach to introductory financial accounting applications, with the primary focus on the accounting cycle. The primary objective is to promote an understanding of how accounting information is identified, recorded, and processed for financial reporting. Prereq: ACC 201. Enrollment priority will be given to accounting and finance majors.

**ACC 221 ACCOUNTING FUNDAMENTALS.** (3)
Examines the basic principles/concepts which govern the record keeping/reporting of accounting data. This course examines how business transactions affect the financial statements and establishes a framework for understanding how accounting data is transformed into the financial statements and how the statements are used by decision makers. Prereq: Consent of the School of Accountancy Director.

**ACC 222 ACCOUNTING FUNDAMENTALS II.** (2)
Examines the preparation and use of accounting information for management decision making. Prereq: ACC 221, consent of the School of Accountancy Director. Prereq: Consent of advisor before registration and identification of a faculty research mentor.

**ACC 300 FINANCIAL ACCOUNTING II.** (3)
This course is designed for non-accounting majors to provide expanded study of the impact of financial accounting information on internal and external users of financial reporting. Topics may include financial statements; income recognition; cash and receivables; inventories; operational assets; investments; intangible assets; current liabilities; long-term liabilities; leasing, pensions, postretirement benefits, and bonds; financial instruments; accounting for income taxes; and owner’s equity. Not open to Accounting majors. Prereq: ACC 201 and ACC 202.

**ACC 301 INTERMEDIATE ACCOUNTING I.** (3)
This course is the first of a two-course financial accounting series, providing in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

**ACC 302 INTERMEDIATE ACCOUNTING II.** (3)
This course is the second of a two-course financial accounting series, providing an in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

**ACC 324 ACCOUNTING INFORMATION SYSTEMS.** (3)
This course focuses on two major components of accounting information systems: conceptual models and physical implementation. Accounting systems are studied from an accounting cycles perspective, emphasizing the nature and relevance of accounting internal controls and the relationship of accounting systems to the functional areas of accounting. Using contemporary information technology, students analyze, design, and implement accounting systems along with relevant internal control structures. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

**ACC 356 PRINCIPLES FOR THE FINANCIAL PLANNER.** (3)
This course introduces the principles of financial planning from a professional perspective; applying basic financial, economic, and institutional concepts to advise individuals, families, and small businesses in achieving their financial goals. Topics and tools include financial planning, budgeting, credit management, time value of money, investment strategies, income taxes, risk management, and retirement and estate planning. This class does not count as an accounting elective for accounting majors. Prereq: The student must have completed 60 hours of college credit courses. 

**ACC 357 TAX PLANNING FOR THE PROFESSIONAL FINANCIAL PLANNER.** (3)
The course covers tax planning for the Personal Financial Planner. This course is targeted for Finance or Accounting majors as well as current CPAs interested in pursuing financial planning as a career but is open to anyone with an interest in a career in personal financial planning. This course is a starting point for understanding the tax issues facing a professional tax planner. This course cannot be counted as an accounting elective for an accounting degree. This course cannot be taken if the student has already taken ACC 407. ACC 407 will count towards the certificate in lieu of ACC 357. Prereq: The student must have completed 60 hours of college credit courses.

**University of Kentucky**

2019-2020 Undergraduate Bulletin

382

**KEY:** # = new course * = course changed † = course dropped
Course Descriptions

#ACC 360 ACCOUNTING AND TAX FOR SMALL BUSINESS. (3)
This course provides a deep examination of accounting concepts as essential tools in managing a small business. Students are exposed to important tax and legal considerations in deciding on the appropriate form for conducting business. The course also explores significant tax-related issues and rules for operating and expanding a small business. Prereq: ACC 202 or consent of department.

ACC 395 INDIVIDUAL WORK IN ACCOUNTING. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson's office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ACC 399 INTERNSHIP IN ACCOUNTING. (1)
A course designed for undergraduate accounting students who, through the Accounting Internship Director, have secured full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and for no more than two consecutive semesters, repeated to a maximum of three credits. Prereq: Junior standing in accounting and approval of the Accounting Internship Director.

ACC 403 AUDITING. (3)
This course examines the attest function in accounting. Emphasis is placed on audit standards and objectives, including the evaluation of internal control structures for the purpose of determining relevant auditing procedures. Prereq: ACC 301 and ACC 324 or consent of the Director of the School of Accountancy.

ACC 407 CONCEPTS OF INCOME TAXATION. (3)
A study of the federal income tax structure with emphasis upon the conceptual foundations of taxation relating to the three types of taxpayers: businesses, individuals, and estates and trusts. Prereq: Junior standing and ACC 202 or consent of the Director of the School of Accountancy.

ACC 410 NOT-FOR-PROFIT AND GOVERNMENTAL ACCOUNTING. (3)
This course examines accounting topics specific to not-for-profit entities and various governmental units. Emphasis is placed on the recording of usual transactions, form and content of reports, and analysis of external reports. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

ACC 418 COST MANAGEMENT. (3)
Traditional and contemporary concepts and techniques that provide accounting information for management decision making at both strategic and operational levels. Topics include the costing of products and services, project and activity analysis, planning and control methods, and performance measurement. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

#ACC 457 ESTATE PLANNING. (3)
The course covers estate planning and taxation for the Personal Financial Planning professional. This course is targeted for Finance or Accounting majors as well as current CPA's interested in pursuing financial planning as a career but is open to anyone with an interest in a career in personal financial planning. This course is part of the sequence for the Certificate in Personal Financial Planning. Prereq: ACC 357 Tax Planning for Professional Financial Planners or ACC 407 Principles of Taxation or Consent of Director.

ACC 507 ADVANCED TOPICS IN TAXATION. (3)
A study of advanced topics in taxation, including corporate taxation, accounting for income taxes, and international tax. Prereq: ACC 302 and ACC 407 or consent of the Director of the School of Accountancy.

ACC 508 CONTROLLERSHIP. (3)
A comprehensive study of the controller's objectives, responsibilities, functions, organizational roles, etc. Prereq: ACC 418.

ACC 516 ADVANCED TOPICS IN FINANCIAL REPORTING. (3)
A comprehensive study of financial accounting and reporting issues involving business combinations, partnerships, foreign currency transactions, not-for-profit accounting and other current accounting issues. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

#ACC 520 FINANCIAL PLANNING FOR ACCOUNTING PROFESSIONALS. (3)
The course is a first step in preparation for a career as a Personal Financial Planning professional. This course is for Finance or Accounting majors as well as current CPA's interested in pursuing financial planning as a career. This course is a first step for those intending to complete the PFS certificate exam given by the AICPA. Prereq: ACC 301, FIN 300.

ACC 555 FORENSIC ACCOUNTING AND FRAUD EXAMINATION. (3)
This course will cover the principles and methodology of fraud detection and deterrence. The course includes such topics as skimming, cash larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement schemes, non-cash misappropriations, corruption, fraudulent financial statements, and interviewing witnesses. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 590 SPECIAL TOPICS IN ACCOUNTING: (Subtitle required). (3)
Readings, projects, lectures and/or discussion to illuminate current topics of special interest or concern in accounting. May be repeated to a maximum of twelve credits. May not be repeated under the same title. Prereq: Consent of instructor.

ACC 601 RESEARCH IN ACCOUNTING THEORY. (3)
Critical examination of accounting concepts and standards. Study of current and contemporary developments reflected in accounting literature and reports. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 603 ATTEST FUNCTION. (3)
A critical examination of contemporary professional attestation theory and practice including a comprehensive review of AICPA audit case studies, statements on audit procedure, and their application in simulated business situations. Prereq: ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 605 INTERNAL AUDITING. (3)
This course provides students an understanding of the internal audit profession and the internal audit process. Topics that will be included in this course are: the professional practices framework for internal auditing, organizational governance, risk and control issues, and experience in conducting internal audit engagements. It provides the basic preparation for students to take positions in auditing, compliance, risk management and process improvement. Prereq: Graduate standing.

ACC 610 NOT-FOR-PROFIT AND REGULATORY ACCOUNTING. (3)
A study of the contemporary issues in the area of not-for-profit and regulatory accounting. Prereq: ACC 410G or consent of instructor.

ACC 617 SELECTED TOPICS IN TAXATION. (3)
A study of selected topics in taxation, including partnership taxation, tax research, and other tax topics. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 619 INDEPENDENT STUDY IN ACCOUNTING. (1-3)
Designed for students undertaking special studies to be conducted in regular consultation with the instructor. Prereq: Consent of instructor.

*ACC 621 ACCOUNTING FUNDAMENTALS. (3)
Examines the basic principles/concepts which govern the recording/reporting of accounting data. This course examines how business transactions affect the financial statements and establishes a framework for understanding how accounting data is transformed into the financial statements and how the statements are used by decision makers. Prereq: Consent of the School of Accountancy Director.

ACC 624 ENTERPRISE INFORMATION AND CONTROL SYSTEMS. (3)
The course simultaneously examines two issues related to enterprise information systems development: 1) methodologies for designing and implementing information systems, and 2) assessment of enterprise risk and internal control systems. Case analyses and “real world” projects are used to accomplish the course objectives. Current computer technologies, including relational database systems and Internet data processing, are integrated into the course content. Prereq: ACC 324, ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 628 FINANCIAL/MANAGERIAL ACCOUNTING. (3)
The course examines the application of accounting information and services in the recognition or solution of management problems in business. Prereq: Graduate standing in the MBA program, ACC 201 and ACC 202, or its equivalent. Course credit will not be given to students in the MSACC program.

ACC 637 TAXATION OF FLOW-THROUGH ENTITIES. (3)
A detailed study of the income taxation of flow-through entities, including Partnerships, S corporations, and limited liability companies. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 647 MULTIJURISDICTIONAL TAXATION. (3)
A critical examination of contemporary developments reflected in accounting literature and reports. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 700 TOPICAL SEMINAR IN ACCOUNTING RESEARCH (Subtitle required). (1-3)
An advanced seminar on selected topics such as cross-disciplinary research on behavioral decision-making, research using archival data, and analytical models in accounting. May be repeated to a maximum of eighteen credits. Prereq: Doctoral student status in business administration.

ACC 790 DOCTORAL COLLOQUIUM – ACCOUNTANCY. (1-2)
This course provides professional socialization for Ph.D. students in accountancy. Topics include research, teaching, and service, transition, preparation for a career as a professor, and critical examination of current developments in accounting literature and reports. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 795 INDEPENDENT STUDY IN ACCOUNTING. (1-6)
Designed for students undertaking special studies to be conducted in regular consultation with the instructor. Prereq: Consent of instructor.
AEC 101 THE ECONOMICS OF FOOD AND AGRICULTURE. (3)
An introduction to the field of agricultural economics and some of the basic tools and concepts of decision making. Concepts are illustrated in terms of selected current social and economic issues including the role of agriculture in both a national and international dimension. Students who have completed ECO 201 are not eligible to take AEC 101 without the consent of the instructor.

#AEC 110 CURRENT ISSUES IN AGRICULTURAL ECONOMICS. (3)
An introduction to the field of agricultural economics and some of the basic tools and concepts of decision making. Concepts are illustrated in terms of selected current social and economic issues including the role of agriculture in both a national and international dimension. Students who have completed ECO 201 are not eligible to take AEC 110 without the consent of the instructor.

AEC 300 TOPICS IN AGRICULTURAL ECONOMICS
Subtitle required. (1-3)
Study in special topics in agricultural economics. May be repeated under a different subtitle to a maximum of fifteen credits. Lecture, one to three hours; laboratory, zero to six hours per week. Prereq: ECO 201. [Offered in fall and spring.]

AEC 301 CAREER READINESS FOR AGRICULTURAL ECONOMICS. (1)
This course examines post-graduate opportunities, expectations, and strategies in agricultural economics. Students will explore information relevant to writing resumes, completing job applications, and participating in job interviews. Prereq: Standing in Agricultural Economics and a "C" or higher in ECO 201. [Offered in fall and spring.]

AEC 302 AGRICULTURAL MANAGEMENT PRINCIPLES. (4)
A comprehensive study of economic principles and management tools useful in farm and agribusiness decision making. Utilizes a systems approach to the planning, implementation and control of the agricultural business. Specific attention to application of management and decision theory, economic principles used in decision making, and risk management strategies. Emphasis on planning the future course of the business, acquiring and managing the necessary resources, and establishing financial and financial control over the business. Lab incorporates microeconomic applications of management principles developed in lectures. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]

AEC 303 MICROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)
Emphasis on the development of theoretical models of production and consumption economics and application of these models to problems. The importance of concepts of marginality to managers and consumers is emphasized. Role of risk and uncertainty in resource allocation is outlined. Prereq: "C" or better in ECO 201 and "C" or better in MA 123 or MA 113. [Offered in fall and spring.]

AEC 305 FOOD AND AGRICULTURAL MARKETING PRINCIPLES. (3)
Analysis of the market’s role in determining prices and coordinating productive activities in the food and agricultural systems. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]

*AEC 306 TECHNICAL COMMUNICATION IN ECONOMICS. (3)
This course examines how to create and distribute original economic ideas in written and oral forms using appropriate digital technologies. This course is a Graduation Composition and Communication Requirement (GCCR) course in ECO 201, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: ECO 201, CIS/WRD 110 and 111 or equivalent; 30 credit hours of coursework. AEC 305 is a co-requisite (recommended) or prerequisite. This course fulfills the University’s graduation composition and communication requirement (GCCR) for AGEC majors. To receive GCCR credit, students must earn an average (weighted) of "C" or better on all GCCR assignments.

AEC 309 INTERNATIONAL AGRICULTURE, WORLD FOOD NEEDS AND U.S. TRADE IN AGRICULTURAL PRODUCTS. (3)
Present and projected world and population balance by geographic regions; food production and world trade in agricultural products with an emphasis upon the implications for U.S. agriculture; an introduction to agricultural development problems of the less developed nations of Latin America, Africa, and Asia. Prereq: "C" or better in ECO 201. [Offered in fall only.]

AEC 311 LIVESTOCK AND MEAT MARKETING. (3)
Provides students with a unique and practical overview of the economics of the livestock and meat marketing system. Topics will include general marketing, price forecasting, price risk management, decision making, and capital investment analysis. Prereq: AEC 305. [Offered in fall only.]

AEC 312 EQUINE MARKETS. (3)
This course provides an overview of the economics of equine markets, both domestic and international, and includes an examination of market structures and functions. Prereq: AEC 305 and C or better in ECO 201. [Offered in fall only.]

AEC 314 GRAIN MARKETING. (1)
Study of production and utilization of grain by areas of the world, the marketing systems for grain, and the application of economic and marketing principles to the pricing and movement of grain. Prereq: AEC 305, AEC 321. [Offered in fall only.]
AEC 399 EXPERIMENTAL LEARNING IN AGRICULTURAL ECONOMICS. (1-6)
A field or community-based experience in the application of economics to agricultural or rural problems. May be repeated; a maximum of six credits allowed. Credit not available for the Agricultural Economics Major Elective Requirements. Prereq: Nine hours in agricultural economics or economics, permission of instructor and department chairperson and completion of learning agreement prior to registration. [Offered in fall, spring and summer.]

AEC 422 AGROBUSINESS MANAGEMENT. (3)
Examines and analyzes decision-making tools and problem-solving techniques available to agribusiness managers. Provides learning experience in addressing contemporary economic, marketing and management issues through case study analyses, selected readings and computerized business simulations. Prereq: AEC 303, AEC 305, MGT 301, MKT 300, and either FIN 300 or AEC 441G. [Offered in fall and spring.]

AEC 425 FOREST MANAGEMENT. (4)
The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives for various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: Completion of the Spring Field Semester or consent of instructor. (Same as FOR 425.) [Offered in fall only.]

AEC 441G AGRICULTURAL FINANCIAL MANAGEMENT. (3)
Applies micro agricultural finance to farm and other agricultural business firms. Reviews elementary mathematics of finance and the objectives of financial management. Uses financial statements, cash flow analysis, financial leverage and other elements in applying the theory of capital investment for making management decisions. Prereq: AEC 302 and AEC 303. [Offered in spring only.]

AEC 445G INTRODUCTION TO RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)
Economic analysis of the problems of assuring resource availability and environmental quality. Theoretical concepts and empirical tools for evaluating resource and environmental policy. Prereq: "C" or better in ECO 201 or consent of the instructor. [Offered in fall and spring.]

AEC 471 INTERNATIONAL TRADE. (3)
This is an advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECO 471.) [Offered in fall and spring.]

AEC 473G ECONOMIC DEVELOPMENT. (3)
A comparative study of economic progress in selected countries; growth patterns, theories of development and capital formation, interaction of social and economic change. Prereq: ECO 401 or equivalent or consent of instructor. (Same as ECO 473G.)

AEC 479 PUBLIC ECONOMICS. (3)
An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECO 479.) [Offered in fall and spring.]

AEC 483 REGIONAL ECONOMICS. (3)
This course presents an economic approach to the study of regions. The emphasis is on the role of spatial relationships in economic activity. Topics considered include market area analysis, location theory, economic base and input-output analysis as well as regional economic development. Prereq: AEC 303. [Offered in fall only.]

AEC 490 QUANTITATIVE METHODS AND PRICE ANALYSIS. (3)
An integration of current issues in Agricultural Economics with oral and written communications, problem solving, and research. Major emphasis is on a senior paper and oral presentation. Prereq: AEC 302, 303, 305, ECO 391 and senior standing in Agricultural Economics. [Offered in fall only.]

AEC 500 ADVANCED TOPICS IN AGRICULTURAL ECONOMICS (Subtitled required). (1-5)
Advanced study in special topics in agricultural economics. May be repeated under a different subtitle to a maximum of fifteen credits. Lecture, one to three hours; laboratory, zero to six hours per week. Prereq: AEC 303 or equivalent and consent of instructor.

AEC 503 PRICE THEORY AND APPLICATIONS. (3)
This course uses calculus to develop core concepts in microeconomics and show how they can be applied to agricultural and natural resource issues. A central objective of this course is to link mathematical techniques with economic analysis to show students that calculus provides an efficient way to study producer and consumer behavior. Prereq: AEC 303 and MA 113. [Offered in fall only.]

AEC 510 INTERNATIONAL TRADE AND AGRICULTURAL MARKETING. (3)
A study of institutional, economic and institutional factors that influence aggregate agricultural trade and exports of individual agribusinesses. Macro issues of agricultural trade policies are examined along with elements of international marketing for agricultural products. Prereq: AEC 303 (or equivalent) and AEC 305. [Offered in fall only.]

AEC 531 AGRICULTURAL PRICE ANALYSIS. (3)
The course links calculus-based microeconomic theory, industry-specific pricing systems, and empirical analysis of agricultural and food markets ranging from farm inputs to the consumer level. Students gain experience with tools and techniques used in empirical analysis of supply and demand. Prereq: AEC 303 and (ECO 391 or STA 570). [Offered in spring only.]

AEC 532A AGRICULTURAL POLICY. (3)
This course surveys a variety of current public policies that influence the agricultural and rural economies. Students are exposed to the conflicting views of those concerned with food and agricultural policy issues in an international economy. Economic principles are used to evaluate alternatives in terms of the general welfare of society. Prereq: AEC 303 and AEC 305. [Offered in spring only.]

AEC 545 RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)
This is an advanced level course focused on economic analysis. It will help students frame natural resource and environmental problems so that they can be analyzed and solved. Major topic areas include water resources, fisheries, energy (and other non-renewable resources), agriculture, and pollution. Policy instruments such as pricing, emission fees, and tradable permits will be covered in detail. Prereq: AEC 303 or AEC 445G or consent of instructor. (Same as NRE 545.) [Offered in fall only.]

AEC 550 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)
Directed independent study of a selected problem that generally is sustained over an entire semester, requires data analysis, and results in a significant written product suitable for publication. May be repeated to a maximum of six credits. Prereq: Consent of instructor, director of undergraduate or graduate studies and completion of a proposed plan of learning objectives and outcomes prior to registration. [Offered in fall, spring and summer.]

AEC 590 INTRODUCTION TO QUANTITATIVE ECONOMICS I. (3)
An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in comparative statics. Prereq: ECO 401 and MA 213, or graduate status, or consent of instructor. (Same as ECO 590.) [Offered in fall only.]

AEC 606A ADVANCED AGRICULTURAL MARKETING. (3)
A critical examination of objectives and results of various types of research in market organization, marketing functions, price analysis, markets over time, space and form, market information, commodity promotion programs, quality standards, and macroeconomic linkages to marketing. Prereq: AEC 624 and ECO 601 (may be concurrent). [Offered in fall only.]

AEC 610 INTERNATIONAL TRADE IN AGRICULTURAL PRODUCTS. (3)
This course analytically examines current empirical research in the area of agricultural trade. Prereq: ECO 601, AEC 624 and ECO 671. [Offered in spring only.]

AEC 620 ADVANCED PRODUCTION ECONOMICS I. (3)
An advanced treatment of production economics with emphasis on flexible product and factor price situations, factor demand functions, multiple product production, and poly-periodic production theory. Prereq: ECO 601. [Offered in fall only.]

AEC 622A ADVANCED AGROBUSINESS MANAGEMENT STRATEGIES. (3)
This course integrates knowledge of economics, econometrics, business administration, finance, accounting, marketing, decision making, and research methodology. The focus is on modern and scholarly academic research. Prereq: AEC 422, ECO 601 or AEC 603, an introductory course in econometrics, or consent of instructor. [Offered in spring only.]

AEC 624 ADVANCED QUANTITATIVE METHODS IN AGRICULTURAL ECONOMICS. (3)
This course uses statistical tools to model agricultural and economic systems. Subjects covered include: (1) the classical linear regression model, (2) statistical hypotheses tests, and (3) estimation techniques for single and simultaneous equation models. Prereq: ECO 391, STA 291 and STA 311. [Offered in spring only.]

AEC 626 AGRICULTURAL AND ECONOMIC DEVELOPMENT. (3)
A study of agricultural and economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as ECO 674.) [Offered in spring only.]

AEC 640 ADVANCED AGRICULTURAL POLICY. (3)
This course focuses on development of a framework to analyze alternate paradigms of the political economy. The framework focuses on the role of institutions that modify behavior of decision makers. Agricultural and food policies are evaluated in terms of the efficient use of resources and the general welfare of society. Prereq: ECO 601 or AEC 503. [Offered in spring only.]

KEY: ♦ = new course  ★ = course changed † = course dropped
Course Descriptions

AEC 645 NATURAL RESOURCE ECONOMICS. (3)
Economic analysis of natural resource use and environmental issues. Discussion of criteria for public decision making, welfare economics, market failure, benefit-cost analysis, and benefit estimation, as applied to natural resources and the environment. Prereq: ECO 590 and ECO 601.

AEC 646 INTERTEMPORAL ALLOCATION OF NATURAL RESOURCES. (3)
This course teaches the application of economic theory to the analysis of solutions for current and prospective natural resource problems. Such understanding will be geared toward fashioning, selecting and implementing policies associated with land, water, air, biological and other natural resources and conservation of the natural environment in serving the needs and desires of citizens. Prereq: ECO 660 and AEC 590.

AEC 653 LOCAL ECONOMIC DEVELOPMENT. (3)
The course develops the capacity to employ the theories, practices and philosophies of economic development as applied to local areas. The primary geographic focus of the course is the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as PA 663.) [Offered in spring only.]

AEC 661 PROGRAMMING MODELS IN AGRICULTURAL ECONOMICS. (3)
A study of some programming models useful in agricultural economics; includes an examination of the structure of the models, an examination of formulation by the students, economic interpretation of their components and their use in research in agricultural economics. Prereq: MA 416G and either AEC 620 or ECO 601. [Offered in full only.]

AEC 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)
Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability of models. Prereq: MA 131 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as FOR 662.)

AEC 691 SOCIOLOGY OF FOOD AND AGRICULTURE. (3)
This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphasis will provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as CLD/SOC 691.)

AEC 724 APPLIED ECONOMETRICS. (3)
This course introduces students to the econometric models, estimation procedures, and model applications in the literature. The course includes an overview of different econometric models, model estimation using Stata and SAS, discussion of agricultural and applied economics papers applying these models, and writing mini projects and a term paper with econometric applications. Topics include discrete and limited dependent variables models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics. Prereq: ECO 703 or consent of instructor. [Offered in spring only.]

AEC 745 ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3)
This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and market failures, environmental economics, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 or equivalent courses, or consent of instructor. (Same as ECO 726.) [Offered in full only.]

AEC 747 MASTERS’ THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in full, spring and summer.]

AEC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying examinations.

AEC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in full, spring and summer.]

AEC 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of department. [Offered in full, spring and summer.]

AEC 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Consent of adviser and chairperson of department.

AEC 780 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)
Open to graduate students who have the necessary training and ability to conduct research on a selected problem. May be repeated three times for a total of nine credits. Prereq: Consent of instructor and departmental chairperson. [Offered in full, spring and summer.]

AEC 790 RESEARCH WORK IN AGRICULTURE ECONOMICS. (3-9)
Independent research under the direction of a faculty member and the Director of Graduate Studies. Prereq: Successful completion of written portion of AEC qualifying exam and permission of Director of Graduate Studies. [Offered in full, spring and summer.]

AEC 796 SEMINAR (Subtitle required). (3)
An extended original investigation of a specific topic designed to give students experience in methods of research and an intensive study of a particular subject in the field of agricultural economics. May be repeated to a maximum of six credits under different subtitles. Prereq: Ph.D. applicant or candidate. [Offered in full and spring.]

AED Agricultural Education

AED 110 INTRODUCTION TO CAREER AND TECHNICAL EDUCATION. (3)
The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as ECS 110.)

AED 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION. (3)
Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as ECS 362.)

AED 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION. (3)
This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate at Career and Technical Student Organization as part of the total CTE program. (Same as ECS 371.)

AED 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (1-3)
Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as ECS 395.)

AED 399 EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION. (1-3)
A field based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as ECS 399.)

AED 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as ECS 580.)

AED 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional methodology course focused on analyzing the principles of teaching and learning to design curricula, instruction, and assessment for formal and non-formal educational settings. (Same as ECS 583.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

AED 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as ECS 586.)

AED 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION. (12)
Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as ECS 592.)

AED 671 YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION. (3)
A study of the underlying philosophy and principles for organizing and advising youth social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphasis will provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as CLD/SOC 691.)

AED 695 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (3)
An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems. (Same as ECS 695.)
AEN 103 BASIC PRINCIPLES OF SURVEYING. (2)
General use of surveying equipment, development of topographic maps, layout of engineering systems, earthwork computations, and introduction to boundary surveys for Agriculture students. This course is not available for credit to persons who have received credit in another introductory surveying course. Lecture, one hour; laboratory, three hours. Prereq: A course in trigonometry, enrollment in the College of Agriculture and/or consent of instructor.

AEN 203 BASIC PRINCIPLES OF SURVEYING. (3)
This course provides an introduction to the basic principles of surveying, the general use of surveying equipment, and basic surveying methods. This course is not intended for students who are seeking to become licensed surveyors. Lecture, two hours; laboratory, two hours. Prereq: A minimum of high school trigonometry, and enrollment in the College of Agriculture or consent of the instructor. (Same as TSM 203.)

AEN 220 PRINCIPLES OF INTERNAL COMBUSTION ENGINES. (3)
Principles of selection of internal combustion engines. Operating principles of internal combustion engines including fuel injection, ignition, lubrication, and maintenance. Power transmission application and efficiency are considered. Lecture, two hours per week; lab, two hours per week. (Same as TSM 220.)

AEN 252 FABRICATION AND CONSTRUCTION FOR TECHNICAL SYSTEMS. (3)
Lecture, 1 hour; laboratory, 4 hours. Wood and metal work, including reading engineering drawings, welding, power wood-working tools, soldering and pipe work. Prereq: Major in agricultural education, or Individualized Agriculture Curriculum (TSM), or a minor in TSM, or consent of instructor. (Same as TSM 252.)

AEN 263 AGRICULTURAL SAFETY AND HEALTH. (3)
The course provides an overview of major safety and health hazards in agricultural production (farms) and of the basic approaches to prevention of agricultural injuries and illnesses.

AEN 340 PRINCIPLES OF FOOD ENGINEERING. (4)
The functional requirements and principles of operation of systems for the handling and processing of food and agricultural products are studied. The areas covered are mass and energy balances, heat transfer, refrigeration, food freezing, evaporation, drying and special topics such as extrusion and microwave heating. Prereq: Completion of PHY 211 and MA 123 or MA 113 or MA 137 and junior standing in Food Science major or Technical Systems Management option in AICU. (Same as TSM 340.)

AEN 341 BREWING SCIENCE AND TECHNOLOGY. (3)
Introduction to the science and technology associated with the brewing of beer. Topics will include the history of beer, varieties of beer, and production of beer. Within the discussions about the production of beer, the effect of raw materials, processing, microbiology, and storage on the taste and appearance of the beer will be studied. The class will also cover beer appreciation and sensory perception, which will complement the discussions of science and technology in the production of beer. Prereq: All students must be 21 by the first day of class. (Same as TSM 341.)

AEN 461G BIOMETEOROLOGY. (3)
An introduction to the impact and relationship of the atmosphere on living organisms. Emphasis on the practical application of meteorology to everyday problems within the biosphere. Weather analysis, interpretation, psychometrics of the atmosphere, and the impact of weather and climate on animals, plants and man are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Junior, Senior, or Graduate standing. (Same as TSM 461G.)

AEN 462 RESIDENTIAL AND COMMERCIAL IRRIGATION DESIGN. (3)
The utilization of hydraulic principles in the design, assimilation, installation and operation of residential and commercial irrigation systems in applications which emphasize water conservation, nutrient management and environmental protection. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

AFS 111 AEROSPACE STUDIES I. (1)
A course designed to provide the student with a basic understanding of the nature and principles of war, national power, and the Department of Defense role in the organization of national security. The student also develops leadership abilities by participating in a military organization, the cadet corps, which offers a wide variety of situations demanding effective leadership. Pass/fail only. Coreq: AFS 113.

AFS 114 LEADERSHIP LABORATORY I. (1)
A continuation of AFS 113. A course designed to develop managerial skills including superior/subordinate relationships, communications, customs and courtesies, basic drill movements and career progression requirements. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 113.

AFS 211 AEROSPACE STUDIES II. (1)
Introduces the student to the organization of national security. Leadership experience is continued through active participation in the cadet corps. Lecture, one hour; leadership laboratory, one hour. Prereq: AFS 111, 113 or PAS approval.

AFS 212 LEADERSHIP LABORATORY II. (1)
A course designed for development of advanced skills required to be a manager/leader, including leadership styles, public speaking, group dynamics, motivation and preparation for field training. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 211.

AFS 213 AEROSPACE STUDIES III. (1)
Provides a foundation for understanding how air power has been employed in military and non-military operations to support national objectives. Examines the changing mission of the defense establishment, with particular emphasis on the United States Air Force. Leadership experience is continued through participation in the cadet corps. Lecture, one hour; leadership laboratory, one hour per week. Prereq: AFS 111, 113 or PAS approval.

AFS 214 LEADERSHIP LABORATORY III. (1)
A continuation of AFS 213. A course designed to develop supervisory management skills to include communications, techniques of critique, social actions, personnel evaluation procedures, problem solving, role playing and field training preparation. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 213.

AFS 311 AEROSPACE STUDIES III. (3)
A study of management functions with emphasis on the individual as a manager in an Air Force environment. Individual motivational and behavioral process, communication, and group dynamics are included to provide a foundation for the development of professional skills as an Air Force Officer. Students refine their leadership and managerial abilities by organizing and managing a quasi-military unit. Prereq: Acceptance into POC or approval of PAS.

AFS 312 LEADERSHIP LABORATORY IIIA. (1)
A course designed and focused on developing advanced leadership skills. Students fill the mid-level management function within the cadet corps. The course involves the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other written and oral communications. Pass/Fail only. Coreq: AFS 311.

AFS 313 AEROSPACE STUDIES III. (3)
A study of leadership with specific emphasis on the Air Force leader. Includes theoretical, professional and communicative aspects. In addition, military justice and administrative law are discussed within the context of the military organization. Students continue to develop and refine their leadership abilities by organizing and managing a military unit, the cadet corps, which offers a wide variety of situations requiring effective leadership. Prereq: AFS 311.

AFS 314 LEADERSHIP LABORATORY III. (1)
Lecture to accompany AFS 313. Pass/Fail only. Coreq: AFS 313.

AFS 395 INDEPENDENT AEROSPACE STUDIES. (2-6)
A study of an advanced problem on a subject area in aeronautical science under the guidance of a departmental staff member. One discussion per week; term paper is required. May not be repeated. Prereq: Senior standing in the AFROTC Program, and 3.0 standing in Aerospace Studies. Pass/Fail only. Coreq: AFS 313.

AFS 410 AEROSPACE STUDIES IV. (3)
A study of the military profession, civil-military interaction, communicative skills, framework of defense policy, and formulation of defense strategy. Students develop their leadership abilities by organizing and managing a military unit, the cadet corps, which offers a wide variety of situations requiring effective leadership. Prereq: AFS 313, or approval of PAS.

AFS 412 LEADERSHIP LABORATORY IV. (1)
A course designed and focused on developing advanced leadership skills. Students fill the top level management function within the cadet corps. The course involves the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other written and oral communications. Lab also includes practice of leadership techniques aimed at motivating and managing cadets in the lower three levels. Pass/Fail only. Laboratory, two hours per week. Coreq: AFS 411.
AIS 101 ELEMENTARY MODERN STANDARD ARABIC. (4)
An introduction to the standard written language of the Arab World. Initial emphasis upon the phonology and script, followed by gradual coverage of the grammar, with exercises in reading, writing, pronunciation, and vocabulary building.

AIS 102 ELEMENTARY MODERN STANDARD ARABIC. (4)

AIS 201 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 102, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 102.

AIS 202 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 201, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 201.

AIS 228 ISLAMIC CIVILIZATION. (3)
This course is an introduction to the religion of Islam and the classical era of the Islamic civilization. A great deal of time will be spent on the life of Muhammad (570-632) and basic beliefs, rituals and practices. The course will also explore aspects of the history of Islamic civilization from the time of Muhammad to around the 17th century, including science, art, theology and law.

AIS 301 ADVANCED MODERN STANDARD ARABIC I. (3)
This course provides advanced language instruction in Modern Standard Arabic. In addition, course explores aspects of culture in the Arab world. Prereq: AIS 202 or consent of instructor.

AIS 302 ADVANCED MODERN STANDARD ARABIC II. (3)
This course provides advanced language instruction in Modern Standard Arabic. In addition, course explores aspects of culture in the Arab world. Prereq: AIS 301 or consent of instructor.

AIS 311 ARABIC FOR BUSINESS AND MEDIA I. (3)
This course is designed to meet the needs of intermediate-level students of Arabic as well as members of the business community who wish to learn Arabic for professional purposes. The topics cover travel, social, and business interactions. The course also introduces students with a variety of current, authentic and primary Arabic materials through the language of the newspapers, magazines, Internet news sites, and TV news. Some of the media topics that will be covered are meetings and conferences, elections, and demonstrations and social protest. By the end of this course, the students will be at a mid-intermediate level of proficiency in Arabic.

AIS 312 ARABIC FOR BUSINESS AND MEDIA II. (3)
This course builds on and expands the business, travel, and social topics covered in AIS 311 through additional and more complex situations and interactions, such as shopping, going around town, at the sales office, at the post office, at the bank, renting and buying a house and a lot of land. The course also expands the media topics covered in the first part of this course, in terms of variety and difficulty. Some of the new topics will be elections, conflict and terrorism, business, cultural and social news. The course will take the students to a high-intermediate level of proficiency in Arabic.

AIS 320 MODERN ARABIC LITERATURE AND FILM IN TRANSLATION. (3)
This course introduces students to major Arab writers, poets, and film makers through some of their primary novels, novellas, poems, and films with a focus on the heart of the Arab world.

AIS 330 ISLAMIC CIVILIZATION II. (3)
The Islamic world’s response to westernization and the resultant assertion of its cultural role in the modern world.

AIS 331 CLASSICAL ARABIC LITERATURE (in English). (3)
Reading from some of the major works of Arabic literature (poetry and prose) of the 6th-14th centuries which are an integral part of the Arab cultural heritage, e.g., the Mu’allagat, Koran, Ibn Ishaq’s Sirah, al-Tahari’s Ta’rikh; Abu ’lFaraj’s Kitabal-Aghani; al-Ghazzali’s Ihya; al-Hariri’s Maqamat; and Ibn Khaldun’s Muqaddimah.

AIS 338 WOMEN AND ISLAM. (3)
A survey of women’s issues related to Islam and contemporary Muslim culture including the perception of women in Islam, the role and rights of women in Islam, female circumcision, honor killing women’s dress. The course will discuss the viewpoints of the Muslim traditionalists, modernists, western feminists and the emerging Islamic feminists.

AIS 340 FUNDAMENTALISM AND REFORM IN ISLAM. (3)
This course focuses on the revival of Islam in the 20th century and the various responses of Islam to modernism and western political and intellectual domination. Particular attention will be given to the rise of militant Islam and the terrorist attacks of 9/11. The original writings of major thinkers will be read and discussed.

AIS 345 ISLAMIC MYSTICISM. (3)
This course is an overview of Islamic spirituality, which refers to the spiritual aspects within basic Islamic texts and general Islamic practices, and Islamic mysticism, which refers to the concepts and practices of Sufism. Throughout the entire course, poems from Rumi, the greatest of the Sufi poets, will be read and discussed. The purpose of the course is to expose students to the ideas and practices of Islamic spirituality and mysticism, the history of Sufism and in a lesser extent the debate between Sufism and normative Islam.

AIS 395 INDEPENDENT WORK IN ARABIC/ISLAMIC STUDIES. (1-3)
Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

AHP 840 ETHICS IN HEALTH PRACTICE. (2)
A study of selected ethical issues that arise in the practice of health professions. The health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed.
AMS American Military Studies

BASIC COURSES

AMS 101 INTRODUCTION TO THE ARMY. (2)
This introductory level course is designed to give students an appreciation for the role the Army currently plays in our society. The course covers the history of the Army and the roles and relationships of the Army within our society. The course also covers some of the basic skills necessary for today's leaders to include oral presentation, time management, map-reading, basic rifle marksmanship and squad tactics. Prereq: Must be concurrent with AMS 250.

AMS 102 INTRODUCTION TO LEADERSHIP. (2)
This course is designed to acquaint the student with the fundamental skills necessary to be a leader, both in military and civilian context. Course also covers basic military map reading skills. Prereq: Must be concurrent with AMS 250.

AMS 211 ADVANCED LEADERSHIP I. (2)
This course focuses on both theoretical and practical aspects of leadership. Students will examine topics such as written and oral communication, effective listening, assertiveness, personality, adult development, motivation, and organizational change and culture. Prereq: AMS 101 and 102, or consent of instructor. Must be taken concurrent with AMS 250.

AMS 212 ADVANCED LEADERSHIP II. (2)
This course focuses principally on officerhood, providing an extensive examination of the unique purpose, roles, and obligations of commissioned officers. It includes a detailed investigation of the origin or our institutional values and their practical application in decision making and leadership. Prereq: AMS 101, 102 and 211, or consent of the instructor. Must be taken concurrent with AMS 250.

AMS 250 BASIC MILITARY SCIENCE LAB. (1)
A hands-on practicum which exposes the student to the military skills required for basic technical and tactical competence to enter the Advanced Course. Laboratory, two hours per week and two week-end exercises. May be repeated to a maximum of four credits.

ADVANCED COURSES

AMS 301 LEADERSHIP AND MANAGEMENT I. (3)
Course of study in development of basic skills required to function as a manager; study of leadership styles, group dynamics, communications, motivation and military instruction methods; and related ethical and exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 302 ADVANCED TACTICS. (3)
Small unit tactics and communications, organization and mission of combat arms units; leadership and the exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3)
This course will furnish upper level U. S. ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note-taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as HIS 320.)

AMS 341 LEADERSHIP AND MANAGEMENT II. (3)
An advanced study of logistics, operations, military administrations, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 342 COMMAND MANAGEMENT. (3)
An advanced study of logistics, operations, military administration, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 350 ADVANCED MILITARY SCIENCE LAB. (1)
A hands-on practicum which exposes the student to the military skills required for advanced technical and tactical competence as an Army officer. The course affords junior and senior cadet opportunities to develop and refine their leadership style and abilities under differing constraints and environments. Laboratory, two hours per week and two weekend exercises. May be repeated to a maximum of four credits. Prereq: AMS 250, AMS 101, AMS 201 and AMS 202. Concurrent: AMS 301, 302, 341 or 342.

AMS 355 INDEPENDENT STUDY IN LEADERSHIP. (1-2)
Advanced study in leadership. Students are under guidance and confer individually with faculty on approved topic (s). A written report or paper is expected and will be filed in the chairperson's office. May be repeated to a maximum of four credits. Prereq: Completion of AMS 302 and approval of PMS.

AN Analytics

AN 250 BUSINESS DATA ANALYSIS. (3)
Business Data Analysis is a course in applied business decision making. It uses Excel to organize, summarize, and analyze data and to interpret the results of such analysis. It is an introduction to the process of transforming raw data into results to support business decisions. The course will emphasize hands-on problem solving in a business context rather than on the specific techniques. Prereq: MA 113, MA 123, MA 137 or equivalent.

AN 300 INTRODUCTION TO BUSINESS ANALYTICS. (3)
This course introduces Business Analytics and its application to business problems in functional domains including Operations, Marketing, Management, etc. Students learn contemporary tools, models, and methods for developing and deploying descriptive, predictive, and prescriptive analytics approaches to solving such problems. This course enables students to meaningfully incorporate analytics within an organization or team and how they also support decision making. Prereq: Completion of all college pre-major requirements and Admission to Upper Division in Business and Economics, or (2) consent of department.

AN 330 SUPPLY CHAIN MANAGEMENT. (3)
The study of supply chain management involves the management of key business processes, the flow of goods and information, and relationships with fellow members of the supply chain. This course will introduce students to the terminology, concepts, and skills related to supply chain management. Students will develop an understanding of the complexities associated with the physical movement of goods and information, and how they affect the mission of the firm. Discussions will address the various processes and activities within an organization and how they interact with other members of the supply chain. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 303.)

AN 308 BUSINESS INTELLIGENCE AND DATA VISUALIZATION. (3)
This course introduces students to the principles, tools and best practices of business intelligence and data visualization to enable the analysis of business data to improve decisions and performance. The course provides students with hands-on experience using appropriate software to create visual displays of quantitative data in reports, graphs, charts, maps, stories and dashboards — to facilitate communication of actionable insights for managerial decision-making. Prereq: AN 300. (Same as MKT 308.)

AN 320 BUSINESS COMPUTING SYSTEMS. (3)
This course investigates how business firms use computing systems to facilitate effective and efficient business processes — thereby improving individual and organizational productivity and competitiveness. The course is geared toward non-technical professionals who seek an overall understanding of how firms design and deploy computer-based solutions to organizational problems. Using cases and hands-on exercises as pedagogical tools, the course furnishes a business applications-oriented view of various computing technologies, such as communication networks, databases, decision support systems, and enterprise systems. The course also addresses ethical and global management issues arising from the worldwide deployment and use of such systems by modern, global business firms. Prereq: CS 101 or MOS Certification. Open only to Business Minors; not available for credit to Business and Economics Majors.

AN 322 INFORMATION SYSTEMS IN THE MODERN ENTERPRISE. (3)
Explores strategic uses and management of information systems in the management of organizations. Recognizing that modern organizations rely on such systems, it is geared toward aspiring professionals who need to understand both how these systems contribute to their organizations and how they can participate in the realization of value from these systems. The course covers basic systems concepts; socio-technical issues; emerging hardware, software, and telecommunications infrastructure technologies; systems analysis and design, database management; system implementation; project management; and systems management. It also introduces such applications as decision support, knowledge management, and e-business with an emphasis on relevant managerial problems within both local and global contexts. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 324 BUSINESS DATA MANAGEMENT. (3)
This course introduces “big data,” data harvesting and cleaning, relational databases, structured query language (SQL), Data Warehousing, and online analytical processing (OLAP). The course emphasizes data structure, database design, data queries and data manipulation. Prereq: AN 306 or consent of instructor. (Same as MKT 324.)

AN 390 SPECIAL TOPICS IN ANALYTICS. (3)
This course number gives faculty members the flexibility to teach various special topics of interest to students, subject to contemporary student demand and faculty availability. The special topics are concerned with techniques, technologies, and applications related to analytics. The offerings include, but are not limited to, such courses as Supply Chain Management, Enterprise Systems, Electronic Commerce, Systems Analysis & Design, Data Mining, Data Warehouse & Database Management, Online Analytical Processing, Knowledge Management Systems, and Programming Languages. While a student may take as many distinct AN courses as are offered, only two or these can be counted as electives. A student may not repeat a special topics course under the same title. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.
AN 395 INDIVIDUAL WORK IN ANALYTICS. (1-3)
This individually customized course enables the student to independently study a topic of personal interest and to proactively cover content not included in the standard curriculum. The student confers with a willing, qualified instructor to design the course—including the course scope, learning methods, timetable, milestones, deliverables, and evaluation metrics. Typically, a final written report or paper is required. To ensure progress, the student stays in contact with the instructor throughout the course of independent study. Examples of prior individual work include: Lean Logistics, Website Design & Implementation, Enterprise Resources Planning, Materials Requirements Planning, Lot Sizing, Advanced Six Sigma, Programming in Java, and Database Design. A course of independent study may not be requested/ offered for material that is already covered in the normal curriculum, except under extenuating circumstances. May be repeated to a maximum of six credits. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Business and Economics. Approval of Instructor and Director of Undergraduate Studies.

AN 403G PRODUCTION AND INVENTORY SYSTEMS. (3)
This course is an advanced introduction to the complexities of managing production and inventory systems. An enterprise’s success in today’s highly-competitive, often-global business environment, depends on effectively managing its production activities and the related inventories at various production-process stages. Because such decisions are invariably tied to demand forecasts, the course begins with an examination of forecasting. Students are then led through the topics of production planning, master scheduling, material requirements & manufacturing-resources planning, production activity control, capacity management, and sequencing & scheduling. The course culminates with coverage of contemporary trends toward just-in-time manufacturing systems and lean manufacturing systems. Applications of analogous systems are also addressed throughout the course. Prereq: Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 403.)

AN 406G PRODUCTIVITY AND QUALITY MANAGEMENT. (3)
This course is an advanced treatment of two related concepts that are vital to the success of an enterprise: quality and productivity. Quality encompasses many attributes of a product or service—such as its design, its features, fit and finish, durability, safety, and customer treatment. In highly competitive settings, a firm that achieves and sustains high quality levels for its goods and/or services, while remaining at least as efficient as competitors in processes used to produce these outputs, tends to outperform its competitors. Beginning with an examination of connections between quality and productivity, this course examines the underlying philosophic, strategic, and human issues. The coverage includes emergency practices for continuous improvement including Kaizen, Six Sigma, customer relationship management, and strategic planning. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 406.)

*AN 420G BUSINESS DATA MINING. (3)
Data mining is concerned with tools and techniques to numerically and visually explore vast data sets, classify data, predict outcomes, and identify associations, patterns, and exceptional events. Such capabilities enable firms to— for example— better segment markets, evaluate and classify stocks, identify prospective customers, predict contingencies and catastrophes, identify defaults and fraudulent transactions, measure churn, identify threats, perform service requests, and grade goods and services. Such capabilities are critical in global, competitive business settings. This course is an introduction to the rapidly blossoming field of Data Mining. Prereq: AN 300. (Same as MKT 420.)

AN 440G TOPICS IN ANALYTICS. (3)
This course covers contemporary topics in enterprise data, analysis, and decision making. Past coverage has included Data Mining, Data Communications, and Valuation of Information. The topics covered would also be valuable to students from programs such as Computer Science, Telecommunications, Statistics and Engineering. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 440.)

*AN 450G BUSINESS ANALYTICS STRATEGY AND APPLICATIONS. (3)
This case-based course examines the role of analytics in the development and execution of business strategy. The examination includes applying the principles, tools, and techniques for data-driven decision-making within the standard curriculum. Students will learn to critically analyze data for its use in achieving strategic goals. Prereq: AN 300, AN 306, AN 324. Must have completed or be taking AN 420G concurrently.

ANA Anatomy and Neurobiology

ANA 109 ANATOMY AND PHYSIOLOGY FOR NURSING. (4)
Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.)

ANA 110 ANATOMY AND PHYSIOLOGY FOR NURSING. (4)
Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.) Prereq: Successful completion of ANA 109 with a C or better.

*ANA 209 PRINCIPLES OF HUMAN ANATOMY. (3)
The structure of the human body will be examined at various levels: cellular, tissues and organ systems. The gross anatomical arrangement of the body will be studied in a system-by-system format relating structure to function and the fundamentals of human embryology, malformation with adult anatomy. The central nervous system will be emphasized. The course includes an online laboratory component for each system covered. Prereq: Introductory biology or zoology.

ANA 305 INTRODUCTION TO NEUROSCIENCE TECHNIQUES. (4)
This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent. (Same as PSY 305.)

ANA 309 AN INTRODUCTION TO REGIONAL ANATOMY. (5)
This course is designed to serve as a transition between systems-based undergraduate anatomy and regionally-based medical professional anatomy. The human body will be taught in an online format, including modules for independent study, weekly virtual team-based learning sessions, and formal course and practical examinations. Anatomical organization will be presented in a regional format so that students can assimilate the bones, muscles, vasculature, innervations, and lymphatic pattern for each region of the body, similar to the pedagogical approach used in medical professional programs. Prereq: ANA 209 and mastery of the Second Life program.

ANA 394 INDEPENDENT RESEARCH IN NEUROBIOLOGY AND NEUROSCIENCE. (1-3)
ANA 394 is designed to provide students with an intensive experience in laboratory or field research. Students should take ANA 417G as a strong foundation in the design and execution of experiments and in the analysis and interpretation of data. They should be capable of independent research in the sense that they can conduct the experiments with little direct supervision. Students are expected to become familiar with related research in the current literature by regularly reading scientific journals. The student is expected to devote at least 3-4 hours per week for each credit hour enrolled to laboratory work, although often more time is necessary.

ANA 395 INDEPENDENT RESEARCH IN ANATOMY AND NEUROBIOLOGY. (1-3)
Independent research with faculty members. May be repeated to a maximum of 12 credits. Laboratory, three to nine hours per week. Prereq: Biology or psychology majors with sophomore, junior, or senior standing and consent of a faculty member.

ANA 410G NEUROBIOLOGY OF BRAIN AND SPINAL CORD DISORDERS. (3)
ANA 410G is a multidisciplinary discussion of neurodegenerative diseases and neurologic disorders. The course objective is to provide an in-depth understanding of the basic science and clinical symptoms of selected neurologic disorders and neurodegenerative diseases, current treatment strategies and new approaches for treatment and potential cure of these devastating illnesses. Included are such topics as the 1) subcellular and molecular basis of the diseases, 2) the role of genetics in aging and neurodegeneration, 3) mechanisms of cell death, and 4) the cellular/molecular basis of neurodegenerative diseases and neurologic disorders. The format of the course will consist of a series of formal lectures and informal discussion sessions. Reference materials will be recent review articles. Graduate students taking the course will present studies from the primary medical literature in a journal club format and will also prepare a paper examining one disorder in detail. This course will be of interest to advanced students from a variety of disciplines with an interest in brain and spinal cord disorders. Prereq: For undergraduate students: BIO 302 or PSY 312 or consent of course directors. For graduate students: Enrollment in a graduate program in biomedical sciences, gerontological sciences or consent of one of the course directors.

ANA 417G FUNCTIONAL HUMAN NEUROANATOMY. (3)
This course provides an introductory level of understanding of human central nervous system (CNS) anatomy and function. Lecture topics will explore the CNS based on structures that make up functional systems (e.g., motor, sensory, visual, etc.), how these systems interact, and examples of how a loss of function results in disease conditions. Prereq: BIO 302 Introduction to Neuroscience.

ANA 442 MOLECULAR AND CELLULAR NEUROBIOLOGY. (3)
This 3 credit hour course is designed to be an introductory course for undergraduate students aimed at providing an overview of major principles and techniques associated with cellular and molecular neurobiology. Subject matter is intended to range from molecular mechanisms underlying neuronal signaling and cellular function to how these properties are invoked across functional systems (e.g., motor, sensory, visual, etc.), how these systems interact, and examples of how a loss of function results in disease conditions. Prereq: BIO 152 or an equivalent; BIO 302 or PSY 312, or consent of course director.

ANA 503 INDEPENDENT WORK IN ANATOMY. (3)
Reading and laboratory work in a defined area of anatomy are carried out under the direct supervision of one staff member. Hours of discussion and laboratory work by individual arrangement. May be repeated to a maximum of 12 credits. Prereq: An introductory course in biology, zoology, or botany and consent of instructor.
ANA 511 INTRODUCTION TO HUMAN ANATOMY. (5)
The principles of organization of the human body are presented. Gross anatomy lectures initially follow a systematic plan. This is succeeded by regional and graduation. Several methods of studying anatomy are utilized. These include radiology, palpation of living structures, and the demonstration of prossected fresh and fixed materials. Prereq: Some background in biology, including one or more such courses as biology, zoology, botany, comparative anatomy or embryology, and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 512 MICROSCOPY AND ULTRASTRUCTURE. (4)
The organization of cells, tissues and organs are presented through lectures and in the laboratory, through the microscopic study of histological sections and illustrations. Prereq: Some background in biology, including one or more such courses as biology, zoology, botany, histological techniques, comparative anatomy or embryology and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 516 SELECTED TOPICS IN ADVANCED NEUROSCIENCE. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as BIO/GRN/PGY 612.)

ANA 530 COMBINED HISTOLOGY AND SPECIAL ORAL MICROANATOMY. (5)
An analysis of the histological structure and organization of the human body, including an especially detailed treatment of the tissues and organs related to the oral cavity. Prereq: Admission to the College of Dental Medicine or some background in biology and consent of instructor.

*ANA 534 ANATOMY, EMBRYOLOGY AND NEUROANATOMY. (6)
This course presents principles of human anatomy, integrated with embryology and neuroanatomy and with particular emphasis on the head and neck to first year dental students. The course involves both lectures and viewing cadaver prosections in a laboratory setting. Anatomical concepts are presented in a regional format in lecture followed by viewing specifically-prepared anatomical prosections of the same regions in lab. Prereq: Admission to the College of Dentistry or some background in biology and consent of instructor. (Same as BGY 534.)

ANA 536 HUMAN EMBRYOLOGY, AN ABBREVIATED COURSE. (2)
A concise presentation of developmental mechanisms, early development of the embryo, and subsequent development of selected systems and regions of the body. Lecture, one hour. Prereq: Admission to the College of Dentistry. (Same as ASC/PGY 601 and ASC 364 or BIO/PGY 502 or ASC 361 or BIO 536 or consent of instructor. (Same as ASC/BIO/GRN/BGY 602.)

ANA 600 SEMINAR IN ANATOMY. (1)
A weekly seminar devoted to presentation and discussion of classic and new research in the field. May be repeated to a maximum of four credits. Prereq: Admission to the anatomy graduate program or permission of the course director.

ANA 605 NEUROBIOLOGY OF CNS INJURY AND REPAIR. (3)
The objective of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, prossected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology.

*ANA 625 INTRODUCTION TO FUNCTIONAL MRI. (1)
Hands-on course for practitioners interested in acquiring functional MRI technique(s) as a research tool. Prereq: (1) Introductory statistics (e.g. PSY 610, STA 503, STA 570). (2) Permission of instructor.

ANA 631 ADVANCED HUMAN ANATOMY. (3-5)
The objective of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, prossected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology.

ANA 636 ADVANCED NEUROSCIENCE. (3-5)
This course will consist of a comprehensive examination of the nervous system. Emphasis will be placed on structure-function relationships, neurotransmitters, chemical constituents of the nervous system, neuronal as well as non-neuronal cells, plasticity of the nervous system and development. The detailed content and emphasis will depend on both the background and goals of the students. Prereq: Consent of instructor for the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: Enrollment in a graduate program in the biomedical sciences, or consent of the instructor.

ANA 645 INTRODUCTION TO MAGNETIC RESONANCE IMAGING. (3)
Survey of basic concepts and applications in magnetic resonance imaging: physics and chemistry, basic mathematical foundations, workings of a modern MRI scanner, image reconstruction, biology with emphasis on neurobiology, medical applications in the brain and heart. Covers basic functional imaging and spectroscopy. Prereq: Undergraduate major in a science or engineering discipline.

ANA 660 BIOLOGY OF REPRODUCTION. (3)
Advance study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on fertility. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/GY 601 and ASC 364 or BIO/GY 502 or consent of instructor. (Same as ASC 660 and GY 660.)

ANA 662 ULTRASTRUCTURAL ANATOMY. (2-5)
The objectives of this course are to advance the students’ knowledge of the submicroscopic structure of cells and tissues. Correlation of intra- and extracellular morphology and function will be emphasized. Students will be expected to work in the techniques of electron microscopy. Depending on the number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: ANA 512, previous work in microscopy including histology or cytology, or equivalents, and consent of instructor.

ANA 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as GRN/GY/PHA 710.)

ANA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying examinations.

ANA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ANA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.
Course Descriptions

ANA 780 SPECIAL TOPICS IN NEUROBIOLOGY. (1-3)
A lecture/seminar course offered based on contemporary topics in neurobiology. Course is designed to emphasize emphasis in a given year and to cover timely topics. Prereq: Consent of the course director.

ANA 790 RESEARCH IN ANATOMY. (1-12)
Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Consent of the instructor.

ANA 801 HISTOLOGY FOR PHYSICAL THERAPY STUDENTS. (1)
A survey of selected basic and specialized mammalian tissues most commonly involved in diseases treated by physical therapists. The course provides information for understanding the cellular mechanisms behind the various diseases and the rationale for subsequent treatment. Prereq: Admission to the College of Allied Health.

ANA 802 NEUROANATOMY FOR PHYSICAL THERAPY STUDENTS. (2)
A concise account of the functional anatomy of the central nervous system. The anatomical organization is correlated with physiological activity. Emphasis is placed upon the morphological basis for progressively higher levels of control of activity from the simple reflex to voluntary motor activities controlled by the cerebral cortex. This type of knowledge is required for proper understanding and performance of physical therapy technicians in the treatment of medical and surgical disease.

ANA 811 HUMAN ANATOMY FOR ALLIED HEALTH PROFESSIONS. (5)
A dissection-based gross anatomy course designed to present the principles of the human body in a regional format with special emphasis on functional and anatomical relationships. Prereq: Enrollment in the PT program in the College of Allied Health Professions.

ANA 814 HUMAN STRUCTURE/GROSS ANATOMY. (6)
The course consists of lecture, small group, laboratory, and palpation exercises that provide a basic understanding of anatomical principles, organization and development. Anatomical structures are introduced as a basis for future functional correlates and principles are taught via laboratory discussions, dissections, dissections, films and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year). (Same as MD 814.)

ANA 815 FIRST-YEAR ELECTIVE, ANATOMY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ANA 825 SECOND-YEAR ELECTIVE, ANATOMY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

ANA 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by the permission of the Student Progress and Promotions Committee.

Approved elective:
ANA 850 ELECTIVE: APPLIED HUMAN ANATOMY

ANS 849 ELECTIVE: EXTRAMURAL ROTATION IN ANESTHESIOLOGY. (4)
Clinical electives allow students to gain exposure to medical specialties reflecting their career interests. Extramural electives allow students to experience clinical care in different environments at different institutions. Through this extramural clinical elective, the student will complete a clinical rotation in Anesthesiology at another institution. The specific rotation details and institution must be approved by the course director. Prereq: Promotion to the Advanced Development Phase of the M.D. curriculum.

ANS 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
*ANS 850 ELECTIVE: INTRODUCTION TO ANESTHESIOLOGY.
*ANS 851 ELECTIVE: CRITICAL CARE ANESTHESIOLOGY.
*ANS 852 ELECTIVE: RESEARCH IN ANESTHESIOLOGY.
*ANS 853 ELECTIVE: PAIN MANAGEMENT.
*ANS 854 ELECTIVE: ADVANCED ANESTHESIOLOGY.
*ANS 859 ELECTIVE: ANESTHESIOLOGY OFF-SITE.

ANT Anthropology

ANT 101 WHAT MAKES US HUMAN? INTRO TO ANTHROPOLOGY. (3)
This course explores what it means to be human by studying human cultures, past and present. Students will develop an understanding of anthropology that emphasizes the concepts and methods of the major sub-fields, i.e., cultural, biological, archaeological, and linguistic.

ANT 102 ARCHAEOLOGY: MYSTERIES AND CONTROVERSIES. (3)
Scientific archaeology has a problem: fringe ideas about mysteries of the past attract more interest than scholarly accounts of these same mysteries. In discussing the “mysterious” side of archaeology, this course asks why consideration of the past invites some of the most bizarre speculations about human life. Why do fringe theories about lost civilizations, intergalactic interactions, and mysterious technologies gain more popularity than mainstream theories? Why should serious archaeologists and students pay any attention to such “wacky” ideas? To answer these questions, this course attends to two kinds of controversies: fantastic claims in the past (such as the Myth of the Moundbuilders and the Shroud of Turin) and debates in the present (such as the cultural affilation of Kennewick Man and uses of archaeology to promote discrimination).

ANT 103 SPORTS, CULTURE, AND SOCIETY. (3)
From little league baseball to the world of college and professional sports and the numerous ESPN channels that track them, it is clear that sports play a significant role in our culture and society and yet, we often take for granted this significance. This course introduces students to the anthropology of sports through an examination of the rituals, political and economic dimensions, and social and cultural meanings of sports from around the globe in both the past and the present.

ANT 104 FIRST YEAR SEMINAR (Subtitle required). (3)
This course introduces the freshman student to the concept of community. What is a community? Who is part of the community and who is not? Anthropological theories and concepts involved in defining communities and cultures and in building a sense of community will be explored as will the use of anthropological methods and data collection and presentation.

ANT 105 HUMAN ORIGINS. (3)
This course is directed at non-majors (with no anthropology prerequisite) and will introduce students to the science of Biological anthropology. Students will critically examine the ways in which biology, the environment, society, and culture come together to form the human condition. Guided by evolutionary theory and the scientific method, we will explore the evolutionary history of modern Homo sapiens from early primate origins to our recent hominin ancestors. We will explore the role that evolutionary forces had in shaping the variation that exists in modern humans today, and we will problematize “race” as a way of categorizing that variation.

ANT 130 INTRODUCTION TO COMPARATIVE RELIGION. (3)
Comparative study of major world and selected regional religions with emphasis on analysis of belief, ritual, artistic expression and social organization. Eastern and Western religions are considered.

ANT 160 CULTURAL DIVERSITY IN THE MODERN WORLD. (3)
Directed at non-majors, this course is intended to introduce the student to the diversity of human cultural experience in the contemporary world. Goals of the course include gaining an appreciation for the common humanity and uniqueness of all cultures; to gain a sensitivity toward stereotypes and ethnocentrism, and to understand the distinctions between “race,” ethnicity and racism. The course features extended descriptions of the cultural dynamics of the culture(s) with which the instructor has worked.
ANT 220 INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3) The study of the lifeways and beliefs of different peoples. The objectives of the course are to foster an appreciation for the variety of cultural traditions found throughout the world, and to introduce students to anthropological concepts and methods of inquiry.

ANT 221 NATIVE PEOPLE OF NORTH AMERICA. (3) This is a survey of the aboriginal Native American cultures of North America and of the impact of four centuries of British, French, Spanish, and Russian contact on Native American societies. Particular emphasis is placed on comparing and contrasting cultural characteristics of Native American groups living in ecologically diverse regions of North America. The course will include consideration of the status of Native Americans in present-day North America.

ANT 222 MIDDLE EAST CULTURES. (3) As part of the General Education curriculum, this course falls under the "Global Dynamics" category of the broad area of "Citizenship." This course will explore some of the cultures, and aspects of culture, found in the broad region of the Middle East and North Africa. Exploration will be rooted in anthropological research and perspective, and organized around rubrics including kinship, gender, religion, and cultural performance.

ANT 225 CULTURE, ENVIRONMENT AND GLOBAL ISSUES. (3) A fundamental part of human experience is interacting with our physical surroundings, but in the globalized ecosystem of our planet, our interactions with the physical world increasingly include distant places rather than just the surroundings we see from our door step. This course aims to develop students’ awareness, knowledge and ability to reflect on how human behavior interacts with global environments. To do so, it applies an anthropological interpretive framework to topics that link human lifestyles, the environment and global issues. Prereq: Freshman or sophomore standing only.

ANT 230 INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. (3) This course explores the ways in which biology, the environment and culture come together to form the human condition. Topics include human genetics, human evolution, primate behavior, contemporary human variation and applied biological anthropology, including forensics, child growth and human nutrition. This course includes a laboratory component.

ANT 240 INTRODUCTION TO ARCHAEOLOGY. (3) Introduces the theories, techniques, and strategies used by archaeologists to recover and interpret information about past cultures.

ANT 241 ORIGINS OF OLD WORLD CIVILIZATION. (3) This course explores the rise of civilizations in the Old World through archaeology and history. The course examines theories of civilization and state formation and case studies that demonstrate how states arose. Concentrates on regions that produced some of the earliest and most complex societies on the planet: Mesopotamia, Egypt, the Indus Valley, China, and Europe. Comparing and contrasting these great societies will show how each was influenced by its unique social, cultural and environmental surroundings. The course also examines the origins of agriculture, writing, art, trade, mathematics, astronomy and religion in Africa, Asia, and Europe.

ANT 242 ORIGINS OF NEW WORLD CIVILIZATION. (3) This course discusses warfare, commerce, social organization, political diplomacy, disease, demographics, religion, and environmental degradation among the ancient peoples of the Americas as revealed by archaeological, art historical, and textual data. Students will gain an appreciation of the diversity of human life in the New World as well as an understanding of the tremendous cultural achievements of the Inca, the Aztec, the Maya, and their neighbors. We will use the concept of complexity as a framework for comparing different societies and for contextualizing the relevance of ancient civilizations for understanding global processes in the contemporary world.

ANT 245 FOOD CULTURE AND SOCIETY. (3) This course is designed for students in anthropology, food and nutrition, agriculture and environmental studies. It explores food in terms of human food systems. Human food systems include the knowledge, values, and practices used to produce, distribute, process, exchange and consume food. These are embedded in culture and operate within societies. Thus, why we eat, what we eat when, where and with whom we eat, how and where we obtain our food, how we prepare it, and distribute it in specific ways may vary as a function of the culture in which we live, our place of residence and our location within society. We will explore these issues through the lectures, readings, videos and discussions to gain a better understanding of the complexity of food-related behaviors among people around the world.

ANT 251 GLOBAL HEALTH INEQUALITIES. (3) This course explores contemporary global health issues from an anthropological perspective. We will examine health effects of economic collapse, disasters and socio-political changes in industrialized and developing countries. We also study the growing global health and industrialized and developing countries. We also study the growing global health and geographic issues that link human lifestyles, the environment and global issues.

ANT 252 CULTURE, ENVIRONMENT AND GLOBAL ISSUES. (3) A fundamental part of human experience is interacting with our physical surroundings, but in the globalized ecosystem of our planet, our interactions with the physical world increasingly include distant places rather than just the surroundings we see from our door step. This course aims to develop students’ awareness, knowledge and ability to reflect on how human behavior interacts with global environments. To do so, it applies an anthropological interpretive framework to topics that link human lifestyles, the environment and global issues. Prereq: Freshman or sophomore standing only.

ANT 260 INTRODUCTION TO ANTHROPOLOGY. (3) This course is an introduction to the discipline, and is increasingly paying attention to what can be learned through the other senses as well. This course will explore ethnographic, documentary, and cross-cultural film traditions; ethics, methods, and theories of recording and representation; ways to use sensory anthropology methods in the subfields (archaeologists reconstructing soundscapes; for example); critical attention to the uses of cinema, television, radio and social media to disempower or empower; indigenous media; and current work in participatory video and interest in analogy vs. digital technologies.

ANT 312 BUSINESS, CULTURE AND SOCIETY. (3) This course introduces students to recent research in business and organizational anthropology within three overlapping domains: marketing and consumer behavior, organizational theory and culture, and global business (especially international marketing, intercultural management and intercultural communication). We will explore and critically examine the methods and usage of core concepts such as design, social organization, consumption, globalization, ethnography, business, branding and marketing. Students will have opportunities for hands-on research involving observation and critical analysis and will learn how to make effective (oral, written, and visual) critical commentaries on the methods, theories and ethics of business anthropology.

ANT 315 CULTURE THROUGH FILM AND SOUND. (3) Anthropologists have drawn on visual representation and analysis of human experience since the inception of the discipline, and are increasingly paying attention to what can be learned through the other senses as well. This course will explore ethnographic, documentary, and cross-cultural film traditions; ethics, methods, and theories of recording and representation; ways to use sensory anthropology methods in the subfields (archaeologists reconstructing soundscapes; for example); critical attention to the uses of cinema, television, radio and social media to disempower or empower; indigenous media; and current work in participatory video and interest in analogy vs. digital technologies.

ANT 320 ANDEAN CIVILIZATION. (3) A study of the Incas and other pre-Hispanic civilizations of highland South America in terms of their origins, their development, and their material, social, and intellectual achievements.

ANT 321 INTRODUCTION TO JAPANESE CULTURE, MEIJI (1868) TO PRESENT. (3) General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nation-building, Japan and the West, Japan and Asia (for the Meiji period 1868-1912); gender construction and class formation, urbanization and mass culture (for the Taisho period 1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as JPN 321.)

ANT 322 ANCIENT MEXICAN CIVILIZATIONS. (3) The course provides a study of the Aztec and the related cultures of the New World. It provides a detailed discussion of pre-Columbian subsistence practices, economy, religion, and politics by tracing the development of ancient Mesoamerican civilization from its earliest beginnings to the Spanish conquest.

ANT 323 CONTEMPORARY LATIN AMERICAN CULTURES. (3) This course is a detailed survey of societies and cultures of contemporary Latin America, utilizing contributions from anthropological research. Prereq: Introductory social science course.

ANT 325 LANGUAGE AND CULTURE. (3) This course is an introduction to linguistic anthropology. The course reviews the basic principles of linguistic analysis and examines the ways in which linguistic structures interact with and reflect cultural variation. (Same as LIN 325.)
ANT 326 CONTEMPORARY AFRICAN LIVES. (3)
What do you think when you hear AFRICA? This course goes beyond the words, images and stereotypes you may automatically learn from western news reports, popular media and mainstream descriptions of issues on the continent. Our goal will be to examine, and challenge, many of the popular portrayals of Africa, and thus build a more realistic and grounded understanding of the region. We will consider issues of geography, social organization and family life, health and food security, economy and ecology, and politics and identity. But our examination will draw from African sources and people living on the continent, as well as media built on long-term engagement with the multitude of African nations. We will investigate how social, economic and global systems come together to produce the diversity of lives across the vast region. We will also discover positive, hopeful and sustainable aspects of African life with attention to local people’s solutions and efforts to build the lives they want. Ultimately, we will come away with both better understanding of the complex reality of “Africa”, and with analytical tools for examining other complex, but often stereotyped, issues in society more broadly. Prereq: Sophomore standing or higher. (Same as AAS 126.)

ANT 327 CULTURE AND SOCIETIES OF INDIA AND SOUTH ASIA. (3)
This course considers the interrelationships between the various religious, political and philosophical traditions and practices of India and South Asia in the context of their shared cultural, historic, structural, geographic and demographic ties.

ANT 328 THE ANCIENT MAYA. (3)
This course uses archaeology, epigraphy, ethnohistory and ethnographic analogy to explore the origin, florescence and decline of the ancient Maya (1000 BC to 1500 AD). The class ties economics, politics, social organization, and religion into a holistic understanding of the ancient Maya world.

ANT 329 CULTURES AND SOCIETIES OF EURASIA AND EASTERN EUROPE: SOCIALISM AND POST-SOCIALIST CHANGE. (3)
This course provides an anthropological study of cultures and societies of Eurasia and Eastern Europe. The course considers the demise of Soviet socialism and the emergence of democracy and market economies. We examine how people experience political, cultural and economic transformations in their social relations and in their everyday lives.

ANT 330 NORTH AMERICAN CULTURES. (3)
This course considers how the plurality of peoples and cultures in North America – with particular attention to the US. We will look at youth cultures as sites of creativity and resistance, examine perennial problems in social equality, consider the similarities and differences between urban and rural ways of life, and explore environmental concerns as an integral part of making and sustaining culture.

ANT 331 ANTHROPOLOGY OF NORTH AFRICA. (3)
This is a survey course of North Africa as a cultural area. Countries included in any given semester will vary. North Africa is Islamic and is often considered to be part of the Middle East but has a distinct history and culture of its own. Course content will include cultural, social, historical, economic, religious, and political perspectives on this important region. Ethnicity and the impact of colonialism will be discussed. Other important segments will examine gender status and roles, family and marriage, sociopolitical organization, the life course of males and females, and aging.

ANT 332 HUMAN EVOLUTION. (3)
Basic concepts and theory of evolution will be reviewed and applied to the study of fossil humans. The evidence of human evolution and fossils of humans and their primate relatives will be studied with attention paid to alternate interpretations of the data. Prereq: ANT 230 or BIO 150.

ANT 333 CONTEMPORARY HUMAN VARIATION. (3)
This course focuses on human variation resulting from adaptation to a wide range of environments and the stresses inherent in each. It explores how humans respond have responded to natural stresses, e.g., cold, heat, aridity and altitude, and human-made stresses, e.g., poverty, malnutrition and chemical pollution.

ANT 335 RELIGION IN EVERYDAY LIFE. (3)
Directed at non-majors (with no anthropology prerequisite), this course is intended to introduce the student to the diversity and unity of religious beliefs and practices in everyday life throughout the world through the lens of the social science anthropology. This includes the study of religions both textual and non-textual, large-scale and small-scale. The course content will include ethnographic materials as well as an examination of various methods and theoretical approaches used in anthropology in the cross-cultural study of religion. Questions that are addressed in this course include: Why do humans have/need religion? What is “religion”? Where, when, and how did “religion” evolve as a cultural universal in the human species? We will examine the basic components of religious beliefs and practices and how they are integrated into human life both individually and in communities. Students will think critically about the social organization of religion and impact of religion on society. Other areas of discussion will include: religious specialists, sacred places, religion and adaptation, religion and gender, and politics and religion. This course will also discuss such topics as the sociology of religion and analogs to a survey of world religions and specifically encourage the cross-cultural comparative perspective of a significant feature of all human groups.

#ANT 336 CONTEMPORARY MUSLIM SOCIETIES. (3)
Provides an anthropological analysis of Islam as a key factor for understanding contemporary Muslim societies and globalized Islam. Analyzes issues relevant to the growth and development of Muslim Societies. Exposes students to diverse expressions and practices of Islam through ethnographic case studies in the West and in the Islamic world.

#ANT 337 GLOBAL AGING. (3)
In this course, the discipline of anthropology provides the framework for the study of aging in cross-cultural perspective. Aging is a universal human phenomenon and a basic and inevitable biological reality, but the social and cultural experience of aging varies a great deal cross-culturally. Culture shapes biology and this cultural variation provides the topic of this course. What does it mean to get older in our own and other cultures? We will begin with the global demography of the world’selderly population. Course readings and discussions will include such topics as social support, intergenerational relationships, attitudes and stereotypes about aging, conceptualizations about the life course, gender and aging, religion and aging, and technology, and peer relationships among elders. One of the features of the course will be an examination of the diversity of aging in the US including ethnicity and LGBTQI. Some of the cultures we will study are in Morocco, India, China, Europe, and Japan. One of the main themes of this course is successful aging. Students will be encouraged to explore their own interests as well.

#ANT 338 ECONOMIC ANTHROPOLOGY. (3)
A comparative ethnographic, theoretical, and historical exploration of the socio-cultural constitution of economic practices. Students will examine different approaches to questions of human nature, choice, values and morality. The course explores power and social life in diverse cultures through a topical focus on peasants, markets, gifts, commodities, consumption and systems of production. The course provides a foundation for applying anthropological knowledge to real-world situations and the material is readily applied to anthropology, international business and social science.

#ANT 339 HUMAN RIGHTS IN GLOBAL PERSPECTIVE. (3)
This class discusses theoretical debates on human rights within the discipline of anthropology and contrasts these approaches to those of other disciplines. Once students acquire this foundation, they apply their knowledge to a human rights problem of their own choice. They identify a researchable question about human rights and use appropriate evidence and methods to substantiate their claims. Students will also learn through experience the ethic dimensions of research and how research can have an important impact on society.

#ANT 340 DEVELOPMENT AND CHANGE IN THE THIRD WORLD. (3)
This course introduces the student to how anthropologists approach the study and practice of economic development. It explores cross-culturally how local populations have responded to development; the different topics of development anthropology, such as agriculture and rural development; and the ways anthropological knowledge is applied in addressing development problems.

#ANT 341 APPALACHIAN ENGLISH. (3)
The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this area. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features the speech of Appalachia shares with others. We will examine the history, origins, and development of English in Appalachia and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as APP/LIN 111.)

#ANT 342 NORTH AMERICAN ARCHAEOLOGY. (3)
This course focuses on the origin and growth of prehistoric American Indian cultures north of Mexico as revealed by archaeological data.

#ANT 350 TOPICS IN ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in anthropology. May be repeated up to a maximum of nine credits under different subtitle.

#ANT 351 SPECIAL TOPICS IN ARCHAEOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in archaeology. May be repeated up to a maximum of twelve credits under a different subtitle.

#ANT 352 SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in cultural anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

#ANT 353 SPECIAL TOPICS IN PHYSICAL OR BIOLOGICAL ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in physical or biological anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

#ANT 354 HUMAN SKELETAL ANTHROPOLOGY. (3)
The focus of this course is human osteology, or the study of the human skeleton, from a biocultural perspective. Emphasis will be placed on both the biology of human skeletal remains through comparative analysis and analysis as well as cultural context. This course will explore the various types of biological, cultural and evolutionary information that can be derived from the examination of human skeletal remains. Students will not only learn how to identify skeletal elements, but also estimate age and sex of individuals. Lectures will also cover various topics such as the reconstruction of diet, the identification of disease in past populations (paleopathology), forensic applications and ethical issues concerning the concept of race, and the research of human remains.
#ANT 355 FORENSIC ANTHROPOLOGY. (3)
This course will provide students with an introduction to human skeletal biology and its applications to medical-legal issues. We will also discuss the different contexts in which forensic anthropology is applied, including local death investigations, mass disasters, and human rights violations. Utilizing a biocultural perspective, participants will explore the biology of human skeletal remains through osteological analysis, while also emphasizing the cultural context of the people we study as well as the scientists who study them. We will also investigate the various types of biological, cultural and evolutionary information that can be derived from the examination of human skeletal remains.

#ANT 360 STATISTICS IN ANTHROPOLOGY. (3)
Students learn how to use probability and quantitative data to test hypotheses in anthropology. Due to common characteristics of anthropological data sets, this class emphasizes methods appropriate for handling small sample sizes and nominal and ordinal scale variables. The course also covers descriptive statistics, sampling, spatial analysis, confidence intervals, and the creation of charts and tables. Since the class focuses more on core concepts than mechanical computation, lessons learned in the context of anthropological questions can be applied to everyday decisions. Prereq: Any Quantitative Foundations course.

#ANT 375 ECOLOGY AND SOCIAL PRACTICE. (3)
This course provides a broad survey of theoretical and historical issues in the link between humans and their environment. Throughout the semester, students will read about and discuss the many ways humans interact with their physical surroundings. Students will examine human cultural adaptation to different ecological settings, with an overall concern of finding general principles that apply to the many human lifestyles on the planet.

#ANT 395/INDEPENDENT STUDY. (1-15)
A course with special assignments for study of special topic usually involving preparation of a final paper. Student must identify a clearly defined topic and a specific faculty member as instructor. All work to fulfill this course must be detailed clearly and described fully in advance using the approved learning contract. The student and faculty member will need to agree on a general schedule of student/faculty meetings during the semester to discuss the progress of the project. May be repeated to a maximum of 12 credits. Letter Grade only. Prereq: Major in anthropology, standing of 3.0 in the department and permission of Instructor, DUS or DGS, and Chair; and completion of departmental learning agreement.

#ANT 399 FIELD BASED/COMMUNITY BASED EDUCATION IN ANTHROPOLOGY. (1-15)
A community-based or field-based experience in Anthropology under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Pass-fail only. Prereq: Permission of instructor and departmental chairperson; completion of departmental learning agreement.

#ANT 401 GENDER ROLES IN CROSS-CULTURAL PERSPECTIVE. (3)
Explores the theoretical and substantive basis for contemporary thinking about gender from an anthropological perspective. Gender content is explored in several cultures representing all levels of sociocultural complexity.

#ANT 429 SURVEY OF MEDICAL ANTHROPOLOGY. (3)
This course provides a survey of health, disease, and healing in non-Western and Western societies. An examination of major theoretical perspectives in medical anthropology.

#ANT 432 ANTHROPOLOGY OF EASTERN EUROPE AND RUSSIA. (3)
An anthropological approach to the cultural, political, and economic experiences of people living under state socialism and through its demise. We ask how everyday life and social relations in this region are being affected by emerging market relations and democracy. Reading include ethnographic studies and the works of essayists, fiction writers, and scholars from the region. Prereq: ANT 160 or ANT 220.

#ANT 433 SOCIAL ORGANIZATION. (3)
This course provides an overview of how anthropologists approach the study of social organization. The class will provide historical and conceptual background to the study of social organization, and explore a range of organizational forms from rural households to complex communities.

#ANT 435 CULTURES AND POLITICS OF REPRODUCTION. (3)
This course takes a cross-cultural approach to understanding the ways reproduction and associated family formations and the social use of technologies compose arenas where social relations become created and challenged. Ethnographic case studies will explore cross-cultural constructions of the body (sexuality, anatomy and physiology), parenthood, and kinship relations; and students will examine the ways the state, social movements, legal/media experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: ANT 220 or WS 201 or permission of instructor.

#ANT 440 ANTHROPOLOGICAL PERSPECTIVES ON CHILD GROWTH. (3)
This course examines biocultural concepts of child growth and development, the evolutionary pattern of human growth and comparative patterns of human growth across populations. Taking a biocultural approach, it explores the many influences that facilitate or constrain child growth, including poverty, gender ideology, nutrition, and illness, focusing especially on social inequality. Taking a child-centered approach, the course also focuses on the lives of children, how children are situated in the circumstances of their lives, and the effect of those circumstances on their well-being.

#ANT 450 SYMBOLS AND CULTURE. (3)
Examines the way in which symbolic systems create the meanings through which we experience life. Students will explore symbols and symbolic behavior from a humanistic perspective, and will present examples of non-Western symbolic systems. Prereq: ANT 220, or consent of instructor.

#ANT 470G REGIONAL AMERICAN ETHNOGRAPHY. (3)
The ethnography of a selected North American or South American culture area or group. Both historical and contemporary cultures will be considered, e.g., Appalachia, Northwest Coast Indians, Urban American, etc. May be repeated to a maximum of six credits.

#ANT 480 BUSINESS AND ORGANIZATIONAL CULTURES. (3)
The course introduces students to the various applications of anthropological theory and ethnographic research methods in contemporary institutional settings, including businesses, government, and non-governmental organizations. Students will investigate the concept of organization from an anthropological perspective in order to understand how organizational forms manifest in different social and cultural contexts and what cultural patterns and processes shape them. Students will learn about the growing field of business anthropology in which anthropologists apply their knowledge, skills, and research methods to improve business performance, competitiveness, and communication. Students will explore how business anthropologists help organizations develop culturally appropriate ways of working with suppliers, partners, and consumers and promote smooth working relationships among employees from different cultural contexts. Students will also critically examine the meaning and usage of core concepts such as culture, design, social organization, consumption, globalization, and technologies in the arts, business, and marketing. Students will have opportunities for hands-on, qualitative research involving interviews and participant observation. They will learn to effectively analyze their research data and relate it to the theoretical and analytical frameworks developed by business and organizational anthropologists. Prereq: Admission to the Online Bachelor of Liberal Studies degree program in the College of Arts and Sciences; ANT 101, 160, 220, or consent of the instructor.

#ANT 481 HEALTH CARE INEQUALITIES. (3)
This course introduces students to anthropological theory and ethnographic research methods from the perspective of health inequalities and cultural aspects of health care systems. Students will investigate the concepts of health, disease and illness from an anthropological perspective in order to study how cultural and structural inequalities influence diverse experiences of health care institutions and practices. Students will develop skills in cross-cultural analysis to understand how factors such as race, gender, sexuality, and socio-economic status affect health outcomes, access to care, and the nature of patient-professional interactions in diverse social and cultural contexts. Students will critically examine Western biomedical interventions and practices as culturally embedded rather than universal or existing outside of culture. Students will also reflect on their own cultural and personal beliefs about the causes of and responses to illness. Students will explore the practical applications of medical anthropology for understanding the strengths and limitations of how concepts such as culture, compliance and cultural competency shape health care systems and practices, and how an anthropological approach can improve patient-professional relationships and health outcomes. Students will have opportunities for evaluating scholarly literature, critically analyzing representations of health and illness in mass media and popular culture outlets, and hands-on qualitative research involving interviews. They will learn to effectively analyze their research data and relate it to the theoretical and analytical frameworks developed by medical anthropologists. Prereq: Admission to the Online Bachelor of Liberal Studies degree program in the College of Arts and Sciences; Anthropology 101, 160, 220, or consent of the instructor.

#ANT 506 SOCIOLINGUISTICS. (3)
This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN/SOC 506.)

#ANT 507 LINGUISTIC ANTHROPOLOGY. (3)
This course is an advanced survey of current areas of research in linguistic anthropology. Topics include language and thought, cultural differences in linguistic interaction, the ethnography of communication, ritual uses of language, language and identity and cultural poetics. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN/SOC 507.)

#ANT 515 PHONOLOGICAL ANALYSIS. (3)
This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 515.)

#ANT 516 GRAMMATICAL TYPOLOGY. (3)
This course examines the typological classification of languages according to their morphological and syntactic characteristics. Course work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from a non-Western language. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 516.)
Course Descriptions

ANT 519 HISTORICAL LINGUISTICS. (3)
This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world’s languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 221 and LIN 222. (Same as LIN 519.)

ANT 525 APPLIED ANTHROPOLOGY. (3)
Principles of policy research and intervention in cultural anthropology with attention to the theoretical and ethical basis of such research and intervention. Intervention techniques considered include research and development anthropology, action anthropology, community development, community advocacy anthropology and culture brokerage. Prereg. Nine hours of cultural anthropology or consent of instructor.

ANT 530 ELITES IN CROSS-CULTURAL PERSPECTIVE. (3)
This course examines elites in different areas of the world paying special attention to what defines them as power holders, their sub-cultures, histories, strategies of class reproduction, and relations to subaltern groups. The class will also explore the critical perspectives gained from studying up, as well as the theoretical and methodological difficulties of doing this kind of work.

ANT 534 SOCIOLOGY OF APPALACHIA. (3)
A sociological study of selected social issues facing Appalachian communities, with an emphasis on changing regional political economy, society and culture in a global context. Prereg. Sociology, Anthropology or CLD Senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as CLD/SOC 534.)

ANT 536 GLOBAL APPALACHIA. (3)
Appalachia has always had strong global connections, environmentally, economically, and culturally. Current cultural and political economic issues in the region will be examined in comparative perspective through studying related histories and concerns of communities in Appalachian and other mountain regions, including social and economic marginalization within nation-states, resource extraction, low-wage work, migration, and environmental challenges. Students will have the opportunity to communicate directly with residents and scholars of several different global mountain regions, to consider sustainable livelihoods, identity in relationship to place, and social movements.

ANT 541 ARCHAEOLOGICAL METHOD AND THEORY. (3)
Examines the concepts, aims and methodology of archaeology as a scientific discipline within the social sciences. Attention given to the basic principles and recent advances of archaeological fieldwork and post-field analysis. Prereg. ANT 240 and six hours of cultural anthropology or archaeology courses, or consent of instructor.

ANT 543 CULTURAL RESOURCE MANAGEMENT. (3)
Introduction to the theory and practice of culture resource management as it has developed in the historic preservation movement in the United States. The history of preservation is covered along with the development of the contemporary legal tools. The implications of these for the field evaluation of sites is presented. Prereg. Nine hours cultural anthropology or archaeology, or consent of instructor.

ANT 545 HISTORICAL ARCHAEOLOGY. (3)
Historical archaeology applies archaeological methods and techniques to the remains of societies having written histories. The course introduces students to the history and theoretical development of the discipline, and to the variety of the data sources used by historical archaeologists. Particular attention is given to the ways in which historical archaeologists use material culture to address research issues of interest in anthropology, history, and other relevant disciplines. Prereg. ANT 240.

ANT 555 EASTERN NORTH AMERICAN ARCHAEOLOGY. (3)
Detailed analysis of prehistoric cultures of eastern United States with emphasis on interpretation of prehistory in Ohio River Valley. Prereg. ANT 240 and six hours of archaeology or cultural anthropology, or consent of instructor.

ANT 580 ADVANCED TOPICS IN ANTHROPOLOGY. (3)
Selected topics of theoretical or methodological importance in anthropology, with special attention to topics of contemporary relevance. Refer to Schedule of Classes for topics. May be repeated to a maximum of six credits. Prereg. Consent of instructor.

ANT 581 INDEPENDENT WORK IN ANTHROPOLOGY. (1-4)
May be repeated three times to a maximum of 12 credits. Prereg. Major in anthropology, standing of 3.0 in the department and consent of instructor.

ANT 582 SENIOR INTEGRATIVE SEMINAR. (3)
Seminar focusing on current issues in anthropology. Purpose is to provide a format in which advanced undergraduates can integrate knowledge gained in previous anthropological course work and evaluate the contribution of the different anthropological subdisciplines to understanding contemporary problems. Emphasis placed on oral and written communication. Prereg. Major in anthropology; senior standing.

ANT 585 FIELD LABORATORY IN ARCHAEOLOGICAL RESEARCH. (3-6)
Practical supervised training in-field in archaeological research methods and techniques, problem analysis, field laboratory procedures, recording methods. Laboratory, 20 to 40 hours per week. May be repeated to a maximum of 12 credits. Prereg. Consent of instructor.

ANT 600 PRACTICUM IN TEACHING ANTHROPOLOGY. (1)
Guided practical experience in teaching, supplemented with group discussions of teaching practice and selected reading on lecture technique, course development, test writing and other skills for participation in the professorate. May be repeated to a maximum of three credits. Prereg. Graduate status in anthropology or consent of instructor.

ANT 601 THEORIES AND CONCEPTS IN ANTHROPOLOGY. (3)
This course is an intensive examination of the theoretical perspective in anthropology. While attention will be given to the historical foundations of anthropological theory, emphasis will be placed in contemporary considerations. Topics include the contributions of selected theorists. Prereg. Admission to Graduate Program or approval of instructor.

ANT 603 HUMAN BIOLOGY IN CONTEXT OF SOCIOCULTURAL CHANGE. (3)
This course explores the relationship between society, culture, and human biology. Its thematic focus will be on how cultural and social organization play out with respect to the biology of human groups, both archaeological and contemporary populations. We will pay special attention to issues of class, gender and ethnicity and focus on demographic and health-related issues. Current issues in biological anthropology, including critical analysis of evolutionary/adaptation theory and the concept of “race” in contemporary human populations will also be addressed. Prereg. First-year graduate standing in Anthropology, or permission of instructor.

ANT 604 SOCIAL ORGANIZATION, KINSHIP AND IDENTITIES. (3)
Social organization is a core component of anthropology. This seminar encompasses both historical and contemporary approaches to this central focus of the discipline. It includes the major theoretical approaches to the study of social organization and examines key concepts such as kinship and collective identity. Topics include how human groups are defined, organized, perpetuated, and change, as well as the role of individuals in broader social structures. Prereg. Graduate standing in Anthropology.

ANT 608 ANTHROPOLOGY OF FOOD AND NUTRITION. (3)
This graduate seminar explores food as fundamental to human existence in a variety of ways. We eat to maintain life – and the nutritional characteristics of human diets shape the development and health of individuals and populations. But, for the most part, humans do not eat nutritionally balanced diets, humans eat food, and food consumption and production is an intensely cultural, social and political activity. We will explore food and nutrition from all these perspectives. In addition to theorizing food and nutrition, we will become familiar with the methods most often used by national and global scholars and practitioners for assessing dietary and nutritional status of individuals and populations. Prereg. Graduate standing in Anthropology or permission of instructor.

ANT 610 HISTORY OF THEORY IN ANTHROPOLOGY. (3)
This course aims to give graduate students a firm grounding in the development of anthropological thought from its roots in Enlightenment social philosophy and 19th century evolutionism to the emergence of poststructuralist theory in the late 20th century. Upon completion of this course students should be thoroughly familiar with the major theoretical schools and debates in the history of anthropology and the broader social discourses that shaped them. Prereg. Graduate standing in Anthropology or permission of instructor.

ANT 620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory course of the area with minimal prerequisite or methodological skills. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereg. Consent of instructor, and a basic course in statistics or research. (Same as EDP/EPE 620/SOC 622.)

ANT 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereg. A basic course in statistics or its equivalent; EDP/EPE/ANT 620; and consent of instructor. (Same as EDP 621/EPE 621.)

ANT 631 RESEARCH ETHICS IN THE SOCIAL SCIENCES. (1)
This course will provide students with an understanding of the ethical dimensions of social science research. Students will learn about the ethics guidelines of different social science disciplines and discuss case studies illustrating the kinds of ethical dilemmas that researchers may encounter. The course will also examine such topics as procedures of the Institutional Review Board and the protection of human subjects; ethical implications of community-based and/or participatory research; and the relationship between ethics, research methodologies, and modes of documentation.

ANT 637 SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT. (3)
Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and development, and of alternative policies for the world of the future. Considers the possible roles for social scientists in policy formulation and application. Prereg. Six graduate credits in social sciences or consent of instructor. (Same as SOC 637.)
ANT 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3)
An in-depth examination of the interrelationships between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as CLD/SOC 640.)

ANT 641 GENDER ISSUES IN DEVELOPMENT. (3)
An examination of gender issues in both domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as SOC 641.)

ANT 645 ANTHROPOLOGY AND EPIDEMIOLOGY. (3)
This course will introduce students to the fundamentals of epidemiology, as the methodological approach, which underlies biomedical research, and will examine the ways in which the methodologies of anthropology and epidemiology complement each other in the study of health and disease. The course will examine the points of similarity between anthropology and epidemiology, as well as the differences, in order to better understand the origins of disease. The course will explore the tensions between anthropology and epidemiology in matters of methodology, exemplified by the debate over quantitative vs. qualitative approaches, as well as theoretical perspective. Prereq: Permission of instructor.

ANT 646 GLOBAL HEALTH: PEOPLE, INSTITUTIONS AND CHANGE. (3)
This course presents anthropological studies of health in an international context, attending to ways in which anthropological study can contribute to identification of issues relevant to health and development. It will have a dual focus. First, it will deconstruct western concepts and explore both indigenous and biomedical accounts of health. Topics may include culturally-defined syndromes, international medicines and health, and illness and body from an international, ethnographic perspective. Second, the course will explore the culture of international health agencies, such as WHO, UNICEF, etc. Prereq: Permission of instructor.

ANT 650 THEORY IN ARCHAEOLOGY. (3)
This seminar examines the development of archaeological theory with specific emphasis on the discipline of anthropological archaeology in the New World. Particular schools and trends in contemporary archaeological theory are discussed in detail. Prereq: ANT 541 or consent of instructor.

ANT 651 ARCHAEOLOGICAL DATA ANALYSIS. (3)
This course examines the manipulations of archaeological data that follow fieldwork. These procedures, usually consisting of data processing and classification, are often undertaken in the field as data are being gathered. Data organization and analysis are the basic goals of this course. May be repeated for a maximum of six credits. Prereq: ANT 541 or consent of instructor.

ANT 652 HOUSEHOLD, COMMUNITY, AND DEMOGRAPHIC ARCHAEOLOGY. (3)
A seminar which examines the theory and methodology used by archaeologists to study population aggregates ranging from individual households to regional populations. Particular emphasis given to theoretical perspectives which integrate ecological, social and spatial analyses of population data. Prereq: Graduate standing in the Department of Anthropology or consent of instructor.

ANT 653 PREHISTORIC ECONOMICS. (3)
This seminar examines the theory and methodology used by archaeologists to study and reconstruct the economic structures of past societies. Discussion examines forms of subsistence and craft production and systems of resource distribution and exchange. Prereq: ANT 541 or consent of instructor.

ANT 654 ARCHAEOLOGY OF POLITICAL SYSTEMS. (3)
This course is designed to study the archaeology of political systems. The goals are to discuss the major trends, concepts, and perspectives in researching event and process in the evolution of political organization and social integration. A corollary goal is to examine the empirical evidence for, and archaeological correlates of, political evolution. It is not intended as a comprehensive coverage of all theories about past political systems, or as a survey of the rise and development of political forms in complex societies around the world. Prereq: ANT 541, ANT 602 or consent of instructor.

ANT 660 ETHNOGRAPHIC RESEARCH. (3)
Intensive graduate seminar designed to help students develop skills in ethnographic data collection and analysis. The aim of the course is to explore the processes through which anthropologists collect materials, then transform materials of ethnographic research into univariate analyses and interpretations. We will give careful consideration to the process of writing and issues specific to writing ethnography. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 662 RESEARCH DESIGN. (3)
Guided individual student research covering the relationship between theory, methods, and reality: how to better design anthropological inquiry. Prereq: One year graduate work in anthropology and consent of advisor.

#ANT 680 BUSINESS AND ORGANIZATIONAL CULTURES. (3)
The course introduces students to the various applications of anthropological theory and ethnographic research methods in contemporary institutional settings, including business, government, and non-governmental organizations. Students will investigate the concept of organization from an anthropological perspective in order to understand how organizational forms manifest in different social and cultural contexts and how cultural patterns and processes shape them. Students will learn about the growing field of business anthropology in which anthropologists apply their knowledge, skills, and research methods to help organizations develop culturally appropriate ways of working with suppliers, partners, and consumers and promote smooth working relationships among employees from different cultural contexts. Students will also critically examine the meaning and usage of core concepts such as culture, design, social organization, consumption, globalization, ethnography, business, branding and marketing. Students will have opportunities for hands-on qualitative research involving interviews and participant observation. They will learn to effectively analyze their research data and relate it to the theoretical and analytical frameworks developed by business and organizational anthropologists. Prereq: Admission to an Online Graduate Certificate or MA program in the College of Arts and Sciences or consent of instructor.

#ANT 681 HEALTH CARE INEQUALITIES. (3)
This course introduces students to anthropological theory and ethnographic research methods from the perspective of health inequalities and cultural aspects of health care systems. Students will explore the history, disease, and health of people and the ways in which health is influenced by health care institutions and practices. They will develop skills in cross-cultural analysis to understand the role of culture in the history of health care and healthcare systems and practices. Students will critically examine Western biomedical interventions and practices as culturally embedded rather than universal or existing outside of culture. Students will also reflect on their own cultural and personal beliefs about the causes of and responses to illness. Students will explore the practical applications of medical anthropology for understanding the strengths and limitations of different cultural systems of care, which include cultural competency in health systems and practices, and how an anthropological approach can influence patient-professional relationships and health outcomes. Students will have opportunities for evaluating scholarly literature, critically analyzing representations of health and illness in mass media and popular culture outlets, and hands-on qualitative research in healthcare contexts. Prereq: Graduate standing in anthropology or consent of instructor.

ANT 684 FARMING SYSTEMS RESEARCH METHODS. (3)
A critical analysis of the concepts, methods, and practices of farming systems research. Design and carry out an FSR project. Prereq: Graduate standing in the social or agricultural sciences. (Same as SOC 684.)

ANT 691 CULTURAL RESOURCE MANAGEMENT CLERKSHIP. (1-3)
Practical experience in aspects of the cultural resource management process are provided through a one-semester rotation of work in the Office of State Archaeology (OSA), Museum of Anthropology (UKMA), and the program for Cultural Resource Assessment (PCRA). Students are assigned tasks at each work assignment rotation during the semester and are evaluated on the basis of work performance and a journal summary of this experience by a committee of their supervisors. Prereq: Graduate standing in anthropology or consent of instructor.

ANT 724 ANTHROPOLOGY OF THE STATE. (3)
This seminar will offer a critical approach to the study of states and related political forms, with special emphasis on anthropology's contributions to theorizing about the state. Drawing on temporally and spatially diverse examples of state-making, statecraft, and ideologies of the state, it will both question definitions of the state as well as engage in ethnographic exploration of past and current states. Other topics will include related political forms such as tribes, nationalist movements, empires, and multi-lateral actors. Prereq: Graduate standing or consent of instructor.

ANT 725 SEMINAR IN APPLIED ANTHROPOLOGY. (3)
Seminar discussion and individual or group research in the applications of social anthropology theory and methods to the solution of institutional, community, regional or national problems. Attention will be given to ethics, to the role attributes of the applied anthropologist, and to the history of applied anthropology. Prereq: ANT 601 or consent of instructor.

ANT 731 SEMINAR IN SOCIAL AND POLITICAL DYNAMICS. (3)
Theoretical frameworks for the analysis of political systems and processes. The seminar explores politics as action and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 or consent of instructor.

ANT 732 SEMINAR IN ECOLOGICAL ANTHROPOLOGY. (3)
A study of interrelationship among populations, organization, environment, technology and symbols. The course focuses on recent anthropological contributions to the understanding of ecological relationships both now and in the past, including how people exploit the environment and how resource exploitation results in environmental change. Prereq: Completion of ANT 601 and ANT 602 or consent of Instructor.

ANT 733 SEMINAR IN SYMBOLS AND MEANING. (3)
Seminar in the development of anthropological approaches to cultural meaning in ancient, modern, and contemporary contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 or consent of instructor.
Course Descriptions

ANT 734 SEMINAR IN ECONOMIC ANTHROPOLOGY. (3)
Theoretical frameworks for the analysis of economic systems and processes. The Seminar explores the interaction between economic phenomena and other aspects of social and political organization both as action, structure, and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 (ANT 538 is recommended) or consent of instructor.

ANT 735 SEMINAR IN PRACTICE AND ACTION. (3)
Comparative analysis of various modes of social action including action research, advocacy, cultural action, and participatory action research. Foundations in social theory considered. Prereq: Admission to graduate program in anthropology or consent of instructor.

ANT 736 CULTURE, ENVIRONMENT AND DEVELOPMENT. (3)
This seminar explores the interrelationships between social processes, development and the environment. It provides the graduate student with the necessary theoretical and analytical tools to examine the social and cultural processes of environmental degradation and change. Topics include political ecology, health impacts of development, deforestation, resource tenure systems, environmental grassroots movements and large-scale development organizations. Prereq: Consent of instructor. (Same as SOC 737.)

ANT 737 SOCIOCULTURAL THEORIES IN THE ANTHROPOLOGY OF GENDER. (3)
Anthropological approaches to the study of gender have proliferated since the 1970s. The primary objective of this seminar is to provide participants with an overview of some of the salient “schools” that have emerged, and through comparison, critically to assess their limitations and utility for both theoretical and applied approaches. Prereq: Graduate standing in anthropology, or permission of instructor.

ANT 738 SEMINAR IN REGIONAL ARCHAEOLOGY. (3)
This course examines contemporary issues and theory in the archaeology of a particular region of the world. Students may take this course up to 9 credit hours under different regions each time course is offered. Prereq: Graduate Standing in Anthropology or permission of instructor.

ANT 748 MASTER’S THESIS RESEARCH. (0-6)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANT 749 DISSERTATION RESEARCH. (0-6)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ANT 750 GRADUATE FIELD STUDY IN ANTHROPOLOGY. (1-6)
Field research as part of a long-range anthropological research program for graduate interns training under direct faculty supervision. Provides student with experience conducting scientific research as research team member. Report required. Laboratory, three hours to full time. Prereq: Appropriate language fluency; preparatory area study plus consent of instructor.

ANT 760 PRACTICUM IN APPLIED ANTHROPOLOGY. (1-6)
Practical field experience in which the student applies the theory and method of social anthropology to the solution of a problem defined by the student in consultation with a community or public or private service agency. Required of all doctoral students in Applied Anthropology. Prereq: Consent of instructor.

ANT 765 ADVANCED SEMINAR IN MEDICAL ANTHROPOLOGY. (3)
(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as BSC 765.)

ANT 766 GENDER, ETHNICITY AND HEALTH. (3)
This course will bring the anthropology of gender to the study of medical anthropology. We will examine the interrelationships between gender, ethnicity, and class in relation to the greater and lesser likelihood of disease. We will explore differences in health in relation to the resources available and the treatment modalities called upon by people in different social locations within the United States, and internationally. We will also look at the symbolic importance given to different phenomena related to the body, disease, and healing. This course will draw heavily upon the ethno-archaeological literature to develop conceptual accounts of gender, ethnicity, class, and health. Prereq: Consent of instructor.

ANT 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANT 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ANT 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ANT 770 TOPICAL SEMINAR: (Subtitle required). (3)
Intensive work in particular fields of anthropology. May be repeated four times. Prereq: Graduate standing in Anthropology, or consent of instructor.

ANT 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)
This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as BSC 774.)

ANT 775 CULTURES AND POLITICS OF REPRODUCTION. (3)
This course takes a cross-cultural approach to understanding how reproduction and associated phenomena (family formations and the social use of technologies) comprise arenas where broader political debates become played out, and social relations become created and contested. Ethnographic case studies include cross-cultural constructions of the body, parenthood, and kinship relations; and we examine how the state, social movements, legal medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: Graduate standing in Anthropology or consent of instructor.

ANT 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependence; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as SOC/PSY/BSC 776.)

ANT 790 RESEARCH PROBLEMS IN ANTHROPOLOGY. (1-6)
Intensive study in the fields of physical anthropology, archaeology and ethnology with qualified staff members. May be repeated to a maximum of nine credits. Prereq: Admission into the graduate program.

APP Appalachian Studies

APP 200 INTRODUCTION TO APPALACHIAN STUDIES. (3)
A multidisciplinary introduction to Appalachian culture, history and society. Examines how Appalachia came to be viewed as a distinct region; looks at its place in American life.

APP 300 TOPICS IN APPALACHIAN STUDIES (Subtitle required). (3)
Study of topics relevant to Appalachian Studies, such as gender, folklore, literature, religion, community development, public policy, social movements and social change. May be repeated to a maximum of twelve credits under different subtitles. Prereq: APP 200 or consent of instructor.

APP 311 APPALACHIAN ENGLISH. (3)
The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this variety. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features of the speech of Appalachians shares with others. We will examine the history, origins, and development of English in Appalachia and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as ANT 341/LIN 311.)

APP 395 INDEPENDENT STUDY. (1-6)
Independent study of special topic under the supervision of Appalachian Studies-affiliated faculty. Students must identify both a topic for this project as well as a faculty mentor who has agreed to supervise this project. May be repeated to a maximum of six credits. Prereq: APP 200.

APP 399 PRACTICUM. (1-6)
A field-, community-based, practical or applied educational experience supervised by an Appalachian Studies Program faculty affiliate. May be repeated a maximum of 6 hours. Pass-fail only. A learning contract must be filed in order to receive credit for this course. Prereq: APP 200.

APP 500 SPECIAL TOPICS IN APPALACHIAN STUDIES (Subtitle required). (3)
An interdisciplinary study of topics, related to, or relevant for the Appalachian region. Topics may include global Appalachia, participatory action research in Appalachia, crime and deviance in Appalachia, Appalachian environmental issues, public health issues in Appalachia, critical Appalachian studies, critical and comparative mountain regions, or any other topics relevant to the region. A particular course may be offered at most three times under the 500 number. Open to all university students subject to such limitations or prerequisites as set by the instructor. Repeatable to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.
ARC 101 DRAWING I: OBSERVATIONAL FREEHAND DRAWING. (3)
Focuses on the rigors of observational drawing. Structure, space, contour, line, and color are explored through study of the human body, still life, landscape, and architectural spaces with attention to their application to the architectural experience. Studio: 6 hours per week. Prereq: Admission to the School of Architecture.

ARC 111 INTRODUCTION TO HISTORY AND THEORY. (3)
Introduces enduring themes and generative forces in the history and theory of architecture by examining the cultural periods of various societies in different historical periods.

ARC 151 DESIGN STUDIO I. (6)
Students investigate two-dimensional media, analyze buildings and text, and construct models as a means to explore basic environmental design principles. The studio continues with an emphasis on three-dimensional exploration and construction. Students investigate architectural design programs and materials of constructions. Studio: 12 hours per week. Prereq: Admission to the School of Architecture.

ARC 152 DESIGN STUDIO II. (6)
Students gain understanding of architectural language based on modern archetypes. Projects explore architectural possibilities while also emphasizing cohesion among space, structure, site, program, and material assembly. A variety of assembly types are introduced for the examining of structural and materials concepts. Studio: 12 hours per week. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: ARC 151 with a grade of C or better.

ARC 199 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 203 DIGITAL MEDIA WITHIN ARCHITECTURE. (3)
A workshop that introduces students to the creative, analytical and generative potential of computers in the design of architecture. Lecture: one hour; laboratory: four hours per week. Prereq: Admission to the School of Architecture.

ARC 212 HISTORY AND THEORY I: 15TH-17TH CENTURIES. (3)
An overview of the key themes and historical developments in architecture from the fifteenth through seventeenth centuries. Emphasis on Western examples and relationships with earlier and later conditions, including contemporary problematics.

ARC 213 HISTORY AND THEORY II: 18TH-19TH CENTURIES. (3)
Continues the investigation of key themes and historical developments of architecture in the eighteenth and nineteenth centuries. Prereq: ARC 212 or consent of instructor.

ARC 231 STRUCTURAL AND MATERIAL CONCEPTS. (3)
Introduces technological concepts of building and investigates the spatial and formal language of architecture with visual and physical analyses of various building structures and materials through the use of computers, field observations, etc. Prereq: Admission to the School of Architecture; MA 109 or MA 123. Paired with: ARC 252.

ARC 253 DESIGN STUDY III. (6)
Extends the considerations of the issues related to the isolated object to the multiplication of that object with reference to issues of scale and context, focusing attention on formal strategies for obtaining thematic unity. Studio: 12 hours per week. Prereq: ARC 252 with a grade of C or better.

ARC 254 DESIGN STUDIO IV. (6)
Studies the formal characteristics of site and context together with laws and principles of building and nature, ecology, and the ways these forces influence architecture. The studio investigates application of current technology and building systems. Studio: 12 hours per week. Prereq: ARC 253 with a grade of C or better.

#ARC 280 VISUAL CULTURE IN A DIGITAL AGE. (3)
This course provides a general introduction to visual culture as a formal language with which social, cultural, political, and spiritual meanings are developed and communicated through visual means. Particular emphasis will be placed on the role of contemporary design as an intentional process and actor in the creation of culture via images, artifacts and environments. We will explore the implications and opportunities of visual representation across a range of scales (from the image and object to the patterns of the built environment) and draw from a variety of disciplines (design, architecture, art, anthropology, business, science) to link concepts of image-making, perception, identity, and humanity at large. Students will gain an ability to read the visual world with greater sensitivity; and develop a broad understanding of the power of visual images and how they operate within built and virtual environments. This course is open to all students, but cannot be applied towards the 12 credit hours of electives in the undergraduate architecture degree.

ARC 299 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 314 HISTORY AND THEORY III: 20TH CENTURY AND CONTEMPORARY ARCHITECTURE. (3)
Investigates modern and late twentieth century architecture as well as current themes and issues in contemporary architecture in relation to their historical context. Satisfies graduate writing requirement for Architecture Majors. Prereq: ARC 111, ARC 212 and ARC 213; or consent of the instructor. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ARC 315 HISTORY AND THEORY OF ARCHITECTURE IV: URBAN FORMS. (3)
An investigation of the factors and a consideration of the theories which have affected world urban form related to architecture. Prereq: ARC 314, or consent of the instructor.

ARC 332 ENVIRONMENTAL CONTROLS I. (3)
Design, analysis and coordination of building systems to meet basic human needs and social expectations of the built environment. Considers ecology when addressing the thermal environment, water, sanitation, concentrated energy, circulation, life-safety, and communication. Prereq: ARC 231. Paired with: ARC 354.

ARC 333 ENVIRONMENTAL CONTROLS II. (3)
A continuing investigation into ideas and issues raised in ARC 332, Environmental Controls I. Prereq: ARC 332. Paired with: ARC 355.

ARC 355 DESIGN STUDIO V. (6)
Explores the architectural problem of large-scale interior space conditioned by social and cultural programs. Special problems in lighting and acoustics will be addressed along with long-span structure. Attention will be paid to issues of scale, life safety, social interaction and public circulation. Studio: 12 hours per week. Prereq: ARC 354 with a grade of C or better. Paired with: ARC 333.

ARC 356 DESIGN STUDIO VI. (6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 355 with a grade of C or better.

ARC 399 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 405 DIGITAL VISUALIZATION I. (3)
Students are introduced to concepts of computer visualization as applied to the study of architecture. Students will utilize modeling, rendering, and animation software to create three-dimensional representations of selected projects. Lecture: two hours; laboratory: two hours per week. Prereq: ARC 203.

ARC 406 DIGITAL VISUALIZATION II. (3)
A continued exploration of computer visualization with particular emphasis on a specific software. Subtitle required. Lecture: 1 hours; laboratory: four hours per week. Prereq: ARC 405.

ARC 410 INDEPENDENT STUDY. (3)
An independent study of art/historical and/or theory, wherein a student will research a specific topic agreed upon with a designated faculty member of the college. Laboratory, six hours per week. May be repeated to a maximum of six hours.

ARC 434 STRUCTURAL DESIGN AND ANALYSIS I. (3)

ARC 435 MATERIALS AND METHODS OF CONSTRUCTION. (3)
An intensive exploration of materials and building techniques with special consideration given to the properties of materials and their uses in various methods of construction. Prereq: ARC 231.

ARC 457 DESIGN STUDIO VII. (6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 455 or ARC 456 with a grade of C or better.

ARC 499 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.
ARC 511 HISTORY AND THEORY SEMINAR: PRE-20TH CENTURY (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of pre-twentieth century architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with completion of ARC 314, graduate standing, or consent of instructor or director.

ARC 512 HISTORY AND THEORY SEMINAR: MODERN (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of modern architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with completion of ARC 314, graduate standing, or consent of instructor or director.

ARC 513 HISTORY AND THEORY SEMINAR: CONTEMPORARY (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of contemporary architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with completion of ARC 314, graduate standing, or consent of instructor or director.

ARC 514 HISTORY AND THEORY SEMINAR: THEORY AND CRITICISM (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of architectural theory and criticism. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with completion of ARC 314, graduate standing, or consent of instructor or director.

ARC 515 HISTORY AND THEORY SEMINAR: URBAN FORMS (Subtitle required). (3)
One of a series of graduate seminars devoted to investigations and analyses of urban form. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with completion of ARC 314, graduate standing, or consent of instructor or director.

ARC 533 STRUCTURAL DESIGN AND ANALYSIS II. (3)
An exploration of structural concepts for the materials of steel and wood, including considerations of load and resistance as factors in architectural design. Prereq: ARC 434.

ARC 534 ADVANCED STUDIES IN STRUCTURAL SYSTEMS. (3)
An exploration of structural concepts relating to construction with the materials concrete and masonry, including discussion of stress and load as considerations in architectural design. Prereq: ARC 533.

ARC 550 ACCELERATED DESIGN I. (9)
Accelerated Design I: immersion through design in the comprehensive elements that order architecture with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 551 ACCELERATED DESIGN II. (9)
Accelerated Design II: an immersion in the art and science of architectural design with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 584 DESIGN OF TIMBER AND MASONRY STRUCTURES. (3)
Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as CE 584.)

ARC 599 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 631 BUILDING SYSTEMS INTEGRATION. (3)
Graduate level study of the art and science of building design with emphasis given to integrative strategies for developing a comprehensive, multi-systemic, architectural project. Paired with: ARC 750.

ARC 632 SPECIAL TOPICS IN ENVIRONMENTAL CONTROLS. (3)
Advanced studies in human environmental design. Topics for research and development will include sustainability, energy, infrastructure, sanitation and water, lighting, and acoustics. Subtitle required. Prereq: ARC 332 and ARC 333.

ARC 634 ARCHITECTURAL DETAILING. (3)
A study of the art and technique of complete building design through detail development. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 641 PROFESSIONAL PRACTICE. (3)
An exploration of professional and ethical responsibilities of the architect as they pertain to the procedural matters of practice and management. Prereq: Admission to the M.Arch. program.

ARC 642 PROFESSIONAL INTERNSHIP. (3)
A graduate-level summer internship with a professional architectural firm in which the student, along with a faculty advisor, will determine specific experiential and educational goals to be met. Laboratory: hours to be agreed upon with selected firm (approx. 10-15 hrs/wk for duration of internship). Prereq: Admission to the M.Arch. program.

ARC 658 DESIGN STUDIO VIII. (6)
This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 457 with a grade of C or better.

ARC 659 DESIGN STUDIO IX. (6)
This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 658 with a grade of C or better.

ARC 699 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 707 DIGITAL MEDIA: HISTORY AND THEORY. (3)
A graduate level seminar exploring the impact of digital media on visualization and the theoretical implications arising from its use as a means of visual expression. Laboratory: 6 hours per week. Prereq: ARC 406.

ARC 709 MASTER’S PROJECT IN DIGITAL VISUALIZATION. (9)
A final, comprehensive project in the digital visualization concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Digital Visualization concentration.

ARC 719 MASTER’S PROJECT IN HISTORY/THEORY/CRITICISM. (9)
A final, comprehensive project in the history, theory, and criticism concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the History, Theory and Criticism concentration.

ARC 729 MASTER’S PROJECT IN HISTORIC PRESERVATION. (9)
A final, comprehensive project in the historic preservation concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Historic Preservation concentration.

ARC 735 PROJECT DELIVERY. (3)
A study in the execution of an architectural design including contract documents, cost estimation, and construction management. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 736 BUILDING CODES AND DESIGN. (3)
An analysis of content and format of current model building codes combined with discussion of the necessity for building codes, problems in interpretation and applications as well as legal aspects involved. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 738 CONSTRUCTION SPECIFICATIONS. (3)
A study in defining the quality of materials used in architectural design. Prereq: Admission to the Master of Architecture program.

ARC 743 ADVANCED PROFESSIONAL PRACTICE. (3)
A continuation of concepts introduced in ARC 641, Professional Practice, with an emphasis in issues relating to the legal, business, and organizational considerations of architectural practice as well as investigations into advocacy and the public and private leadership roles of the architect. Prereq: ARC 641.

ARC 748 MASTER’S PROJECT RESEARCH. (0)
Half-time to full-time work on Master’s Project. May be repeated a maximum of six times. Prereq: All course work toward the degree must be completed.

ARC 750 DESIGN STUDIO X. (6)
Utilizing given site and program requirements, graduate students explore design issues comprehensively by producing a developed and detailed building design. Students will engage in structural design, environmental systems, life-safety and post-design assessments as required to meet the most current NAAB standards for a comprehensive studio. Studio: 12 hours per week. Prereq: ARC 659.

ARC 759 MASTER’S PROJECT IN BUILDING DESIGN. (9)
A final, comprehensive project in the building technology and tectonics concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Building Design concentration.

ARC 761 SPECIAL PROBLEMS IN TOWN DESIGN. (3)
Students explore various topics related to the theory and practice of existing, emerging and new strategies for city and town development, revitalization, and long-term sustainability. Subtitle required. Prereq: Admission to the Master of Architecture program.
ART 100 INTRODUCTION TO ART. (3)
This course is open to all University students interested in an understanding and appreciation of the visual arts. The formal and expressive qualities of major art forms are examined through lectures and presentations.

ART 191 ART PROFESSIONS. (1)
Lectures and discussions on the various art professions as they affect the student, the professional artist, the art historian, the art educator, and the community. May be repeated to a maximum of eight hours.

ART 291 B.F.A. STUDIO PRACTICUM. (3)
The study and practice of professional techniques of the organization and maintenance of the art studio environment. Orientation and application of best practices for health and safety. Prereq: Acceptance into B.F.A. program and consent of instructor.

ART 301 PROFESSIONAL PRACTICES. (3)
This course is designed to assist Art Studio majors in developing practical writing and presentation skills needed to maintain a successful, professional practice in the visual arts. Students are required to write in a variety of formats that are standard in the field of art studio. The course will include developing artist and biographical statements, resumes, grant/exhibition proposals and/or reviews, as well as a research paper on a topic of interest in contemporary art. Students will also prepare a digital portfolio emphasizing presentation and documentation skills about a student’s own research. Prereq: Majors only; completion of all pre-major/Foundations course-work and completion of 60 credit hours. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ART 504 CURATORIAL PRACTICE: HISTORY, THEORY, PRACTICE. (3)
An introduction to the history, theory, and practice of curatorial studies through readings, discussion, critical writing and independent research. Intended for advanced students, this seminar will expand students’ understanding of curatorial practice and guide them as they develop a particular curatorial project. Prereq: Junior standing or above, and consent of the instructor.

ART 604 CURATORIAL PRACTICE: CURATORIAL PROJECTS. (3)
In this course students will realize a curatorial proposal developed in ART 504. The focus will be on implementation, marketing, didactics, and education programming. Students will gain practical experience in promotion, budgeting, time and resource management, and professional standards within the field of curatorial studies. Prereq: Graduate status, consent of instructor, and ART 504 required.

ART 748 INDEPENDENT THESIS RESEARCH. (0)
Independent work on thesis project. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ART 768 THESIS PREPARATION AND PRESENTATION. (3)
Independent study to formulate, prepare and present M.F.A. thesis project under the direction of thesis advisor. A formal learning contract between student and thesis advisor is required. Prereq: Good standing as graduate student in curatorial studies; permission of thesis advisor.

ART 794 INTERNSHIP: BOLIVAR GALLERY. (3)
A supervised internship in the SAVS Bolivar Art Gallery. The aim is to give students hands-on experience handling art, installing exhibitions, writing wall text, completing condition reports and contracts, and doing social media outreach. Interns will work directly with artists and the gallery director, and the content of their work, developing written pieces for digital publication and promotion (website, social media, etc.) Learning contract required. Practicum, 40 hours per credit hour. Prereq: Graduate status in Curatorial Studies.

ART 795 INTERNSHIP: UK ART MUSEUM. (3)
A supervised internship in the UK Art Museum. The aim is to strengthen the students’ skills in research, writing, and speaking though practical applications in the profession through area-specific placement. While interns may do a variety of tasks throughout the internship, the majority of time will be spent working within one of the following departments: curatorial, development, education, or registration. Learning contract required. Practicum, 40 hours per credit hour. Prereq: Graduate status in Curatorial Studies.

ART 796 INTERNSHIP: COMMUNITY PARTNERS. (3)
A supervised internship at a local, national, or international arts organization that relates to a student’s research interests. The aim is to help develop programming that aligns with the mission of the organization. Interns may perform a wide variety of tasks such as curating, fundraising, marketing, education, administration, etc. A formal learning contract among student, field supervisor, and supervising faculty member required. Practicum, 40 hours per credit hour. Prereq: ART 794 and ART 795 required.

ART 797 INTERNSHIP: ARTS ORGANIZATION. (3)
A supervised internship with a community partner that integrates the arts into their programming. The focus may be on a single aspect of several areas of community engagement, driven through the arts such as exhibition development, event planning, fundraising, promotion, administration, etc. A formal learning contract among student, field supervisor, and supervising faculty member required. Practicum, 40 hours per credit hour. Prereq: ART 794 and ART 795 required.

ASC 101 DOMESTIC ANIMAL BIOLOGY. (3)
The first in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on a fundamental understanding of anatomy, physiology, nutrition, reproduction, genetics and behavior of domestic animals. Prereq: Fall semester—Animal sciences majors. Spring semesters—Animal sciences majors and minors, Career and Technical Education majors, Equine Science and Management majors, or consent of instructor.

ASC 102 INTRODUCTION TO LIVESTOCK AND POULTRY PRODUCTION. (3)
An introduction to livestock and poultry production. Emphasis is placed on the application of anatomy, physiology, nutrition, feeds and feeding, reproduction, breeding and genetics, and behavior in the production and management of livestock and poultry in the U.S. Prereq: ASC 101. Primary registration access limited to Animal Sciences majors and remaining seats open during secondary registration open to College of Agriculture, Food and Environment majors. [Offered in spring only.]

ASC 205 CAREER DEVELOPMENT FOR ANIMAL SCIENCES. (1)
Local experts in a wide variety of animal production enterprises and associated support services will give presentations on their area of expertise. Following the presentation, students will have the opportunity to discuss the topic of the day and potential employment opportunities in that field with the speaker. Prereq: ASC 102 (or concurrent enrollment). [Offered in fall and spring.]

ASC 209 VETERINARY MEDICAL TERMINOLOGY. (3)
This course will cover veterinary terminology including medical word roots, prefixes, suffixes and animal specific terminology involving food animals, horses and pets. Veterinary case studies will allow students to apply these fundamentals in practical situations. Appropriate for pre-vets and any students interested in animal health and care. Prereq: Primary registration access limited to College of Agriculture, Food and Environment majors or consent of instructor, remaining seats open during secondary registration. Students who have completed CLA 131 are not eligible to take ASC 209 without consent of instructor.

ASC 220 APPLIED ANIMAL BEHAVIOR AND WELFARE. (3)

ASC 300 MEAT SCIENCE. (4)
A historical perspective of the meat industry together with major changes in body type and composition in both the live animal and its end product meat. Students will evaluate live market animals (swine, cattle, sheep), harvest the market animals, and follow their carcasses and cuts through fabrication and distribution channels. Major topics of discussion will focus on growth and development, inspection, grading, physical and chemical composition of meat and behavioral changes that affect quality. Additional information will cover meat marketing trends, nutrition, meat cookery, meat selection, health issues and consumer information. Prereq: ASC 101 and ASC 102 or ASC 382. [Offered in fall only.]

ASC 301 LIVESTOCK SELECTION AND EVALUATION. (3)
Selection principles of purebred and commercial beef cattle, sheep, swine and meat goats. Evaluation of live animal and carcass characteristics of beef cattle, sheep, swine and meat goats. Emphasis placed on oral reasons. Laboratory, six hours. Prereq: Junior or senior standing or consent of instructor. [Offered in fall only.]

ASC 303 EVALUATION AND GRADING OF MEATS. (2)
A detailed consideration of the factors involved in the selection, grading and evaluation of carcasses and wholesale cuts of beef, pork and lamb. Specific emphasis will be given to cutability, quality and maturity as they relate to palatability and acceptance by the consumer. Laboratory, four hours. Prereq: FSC 304 or FSC 306. [Offered in spring only.]

ASC 309 ADVANCED EVALUATION AND GRADING OF MEAT. (2)
Further consideration of the factors involved in selecting, grading and evaluating carcasses and wholesale cuts of beef, pork, and lamb. Emphasis will be placed on writing reasons. Laboratory, four hours. Prereq: ASC 303 or consent of instructor. [Offered in fall only.]

KEY: # = new course  * = course changed † = course dropped
ASC 310 EQUINE ANATOMY. (3)
This course will focus on the functional anatomy of the horse. Topics will include the anatomy of skeletal, muscular, respiratory, digestive, cardiovascular, reproductive, nervous, endocrine, urinary and integumentary systems. Prereq: ASC 101 and sophomore standing; primary registration access limited to ANSC and ESM A majors; secondary registration access limited to CAE majors. [Offered in fall and spring.]

ASC 311 ADVANCED EQUINE EVALUATION. (1)
Advanced study of conformation, performance and breeding value in the horse. Selection of horses based on conformation, breed characteristics and movement. Emphasis will be placed on developing a knowledge of industry standards for evaluating horses for different uses. Laboratory, two hours per week. Prereq: ASC 310. [Offered in Fall only.]

ASC 312 ADVANCED LIVESTOCK SELECTION AND EVALUATION. (2)
Selection of purebred and commercial beef cattle, sheep, swine and meat goats. Special emphasis on oral reasons, livestock contest procedures and herd improvement principles. Laboratory, six hours. Prereq: ASC 301 or consent of instructor. [Offered in spring only.]

ASC 320 EQUINE EQUIPMENT. (3)
Study of the basic principles associated with horse management. Topics will include equine behavior, equine diseases and herd health programs, facilities and environmental management, nutrition and feed management. Lecture, two hours; laboratory, three hours per week. Prereq: ASC 101. [Offered in fall, spring (online), summer (online).]

ASC 321 DAIRY CATTLE EVALUATION. (2)
Evaluation of dairy cattle for type characteristics. Laboratory, four hours. [Offered in Spring only.]

ASC 322 ADVANCED DAIRY CATTLE EVALUATION. (1)
Open only to those who have consent of instructor. Laboratory, two hours. Prereq: ASC 321. [Offered in Fall only.]

ASC 325 ANIMAL PHYSIOLOGY. (3)
An introduction to the functional anatomy and physiology of major body systems in domestic animals. Emphasis will be on how these systems interact to regular circulation, gas exchange, acid-base balance, digestion and metabolism, location and adapting to environmental changes. Prereq: BIO 152, junior standing or consent of instructor. [Offered in fall only.]

ASC 333 TOPICS IN ANIMAL SCIENCE (Subtitle required). (1-4)
Intensive study in a unique aspect of animal agriculture not covered in other courses currently offered. May be repeated under different subtitle two times to a maximum of 8 credits. Prereq: Specified by instructor for each offering.

ASC 340 POULTRY PRODUCTION. (2)
A study of the application of avian biology to modern poultry production. Topics include anatomy, physiology, reproduction, incubation and embryonic development, breeding and genetics, nutrition and feeding, disease control, housing and environmental control, management, poultry and egg products, and the structure of the poultry industry. For majors and non-majors. Prereq: ASC 101 and ASC 102 or ASC 382. [Offered in Spring only.]

ASC 362 ANIMAL BREEDING AND GENETICS. (4)
Fundamental principles of genetics and statistics as applied in selection and mating systems to make genetic improvements in farm animals. Involves traditional discussion of Mendelian, population, and quantitative genetics and their application. Includes development of computer prediction and introduces genomic techniques for increasing accuracy of prediction. Prereq: ASC 101, BIO 152. [Offered in Spring only.]

ASC 364 REPRODUCTIVE PHYSIOLOGY OF FARM ANIMALS. (4)
Introduction to anatomy and physiological processes related to reproduction with a focus on farm animals. Evaluations of management procedures as they relate to reproductive physiology. Prereq: ASC 101 and BIO 152. Primary registration access limited to College of Agriculture, Food and Environment majors and remaining seats open during secondary registration. [Offered in Spring only.]

ASC 378 ANIMAL NUTRITION AND FEEDING. (4)
A fundamental study of the nutrients, their utilization and their role in the animal in conjunction with an applied understanding of the manner in which feedstuffs are evaluated and blended to meet the various species needs for those nutrients. Prereq: ASC 101 and CHE 230 or CHE 236. [Offered in Fall only.]

ASC 380 APPLIED ANIMAL NUTRITION. (3)
The composition and nutritional characteristics of common feedstuffs. The digestive systems, nutritional requirements, formulated rations and economical feeding programs for farm animals. Prereq: ASC 378 or consent of instructor. [Offered in Fall (online).]

ASC 382 ANIMAL PRODUCTION PRINCIPLES. (3)
A broad survey of animal agricultural management covering cattle, horses, poultry, swine, sheep and goats. Emphasis is placed on the practical application of scientific disciplines including anatomy, physiology, nutrition, reproduction and genetics. For nonmajors only. [Offered in Spring only.]

ASC 388 COMPANION ANIMAL NUTRITION. (3)
This course offers an introductory look at the nutrition of companion animals, primarily the dog and cat. Basic concepts in nutrition, food chemistry, biochemistry, digestive physiology and microbiology will be addressed as they pertain to pet health and well being. Prereq: CHE 230 or CHE 236 or equivalent. [Offered in Spring only.]

ASC 389 APPLIED EQUINE NUTRITION AND FEEDING. (2)
This course examines the feeding management of broodmares, growing horses, performance horses and horses with special needs. Lecture material covers common equine feeds, feed and ration analysis, factors influencing the utilization of feeds by horses, and factors affecting nutrient requirements and feeding management of the different classes of horses. Prereq: A course in nutrition or consent of instructor. [Offered in Fall and Spring.]

ASC 395 SPECIAL PROBLEM IN ANIMAL SCIENCES. (1-4)
Independent study in Animal Sciences under the supervision of a faculty member. May be repeated for a maximum of eight credits. Prereq: Consent of appropriate instructor. [Offered in Fall and Spring.]

ASC 399 EXPERIENTIAL LEARNING IN ANIMAL SCIENCES. (1-3)
A field-based learning experience in animal sciences approved by the instructor of record and mentored by an internship supervisor. May be repeated for a maximum of six credits. Prereq: Consent of instructor and director of undergraduate studies in Animal Sciences and completion of a supervisor contract and departmental learning contract before registration. [Offered in Fall and Spring.]

ASC 404G SHEEP SCIENCE. (4)
History and importance of the sheep industry; application of the principles of selection, breeding, feeding, and management of sheep for efficient lamb and wool production. Lecture, three hours per week; laboratory, three hours per week. Prereq: ASC 300, ASC 362, ASC 364, ASC 378 or consent of instructor. [Offered in Fall only.]

ASC 406BEEF CATTLE SCIENCE. (4)
Scope and importance of the beef cattle industry; roles of the major cattle breeds and organizations associated with the beef cattle industry; application of equipment, identification, nutrition, reproduction, genetics, health, marketing, taxation and management principles to beef cattle production; impact of current economic, social and environmental issues on the beef cattle industry. Lecture, three hours; laboratory, three hours. Prereq: ASC 300, ASC 362, ASC 364 and ASC 378 or consent of instructor. [Offered in Fall only.]

ASC 408G SWINE PRODUCTION. (3)
A study of scope and importance of the swine industry. Application of principles of breeding, reproduction, nutrition, housing, health, and management of swine in modern production systems. Prereq: ASC 101 and ASC 102 or ASC 382. [Offered in Spring only.]

ASC 410G EQUINE SCIENCE. (3)
Detailed study of the anatomy and physiology of the horse as they relate to the nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Lecture, two hours; laboratory, two hours. Prereq: ASC 310, ASC 364, and ASC 378. [Offered in Spring only.]

ASC 420G DAIRY CATTLE MANAGEMENT. (3)
Scope and importance of the dairy cattle industry; selection, breeding, housing, feeding and management of dairy cattle. Lecture, two hours; laboratory, two hours. Prereq: ASC 325, ASC 364 and ASC 378 or consent of instructor. [Offered in Fall only.]

ASC 470 CAPSTONE FOR ANIMAL AGRICULTURE. (3)
Discussion of the importance of livestock production to society and consideration of major issues impacting animal agriculture. Principles and practices learned in disciplinary and commodity Animal Sciences courses are integrated into a unified perspective, and the scientific method is employed as an approach to problem analysis and resolution. Refinement of skills in critical thinking, information gathering, writing, and oral communication is emphasized. Prereq: Senior standing in Animal Sciences major. Successful completion of GCCR WRD 203 or WRD 204. [Offered in Fall and Spring.]

ASC 499 ACADEMIC ENRICHMENT EXPERIENCE IN ANIMAL SCIENCES. (1)
Development and evaluation of the student’s required academic enrichment experience (study abroad, undergraduate research, internship, student mentorship, leadership, etc.) Prereq: Open to Animal Sciences majors only.

ASC 564 MILK SECRETION. (3)
Anatomy of the mammary gland, physiology and biochemistry of milk secretion and management factors affecting yield and composition of milk. Prereq: ASC 101 and BIO 152. [Offered in Spring only.]

ASC 601 MAMMALIAN ENDOCRINOLOGY. (3)
An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 410G and BIO 350 or equivalent. (Same as GY 601.)

ASC 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: BBS 101, GY 206. (Same as CUN/NS 602.) [Offered in Spring – odd years.]
ASC 630 ADVANCED MEAT SCIENCE. (4)
Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability, and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as FSC 630.) [Offered in spring – even years.]

ASC 660 BIOLOGY OF REPRODUCTION. (3)
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC PGY 601 and ASC 364 or BIO PGY 502 or consent of instructor. (Same as PGY 660 and ANA 660.) [Offered in spring – odd years.]

ASC 680 LABORATORY METHODS IN NUTRITIONAL SCIENCES. (4)
The use of laboratory techniques and instrumentation in the solution of fundamental problems of nutrition. Lecture, one hour; laboratory, six hours. [Offered in fall – odd years.]

ASC 681 ENERGY METABOLISM. (2)
An in-depth discussion of nutritional energetics, from the standpoint of factors which influence the utilization of dietary energy. A critical review of current literature. Prereq: ASC 378 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring – odd years.]

ASC 683 PROTEIN METABOLISM. (2)
A study of the principles and present concepts of protein and amino acid nutrition and metabolism in the animal. Prereq: Graduate level biochemistry. [Offered in fall only.]

ASC 684 ADVANCED Ruminant Nutrition. (3)
Principles of ruminant metabolism in the utilization of feedstuffs for meat, milk, and wool production. Prereq: ASC 682 and two or more courses from ASC 681, ASC 683, ASC 685 and ASC 687 or consent of instructor. [Offered in spring – even years.]

ASC 685 MINERAL METABOLISM. (2)
An in-depth review of the function, requirement deficiency and toxicity of mineral elements in nutrition. Emphasis on the interactions between elements and current literature will be made. Prereq: ASC 378 or NFS 510 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring – even years.]

ASC 686 ADVANCED NONRuminant Nutrition. (3)
A study of nutrient utilization as influenced by digestion, absorption and metabolism with emphasis on swine and poultry. Prereq: One course each in nutrition and biochemistry.

ASC 687 VITAMIN METABOLISM. (2)
Detailed study of the metabolism of vitamins and the role of vitamins in the metabolism of carbohydrates, proteins, lipids, and minerals. Prereq: BCH 502 or CHE 552 or consent of instructor. [Offered in spring – odd years.]

ASC 688 EQUINE NUTRITION. (2)
Detailed study of anatomical, physiological and microbiological factors influencing the nutritive requirements of the equine for maintenance, growth, reproduction, lactation and work. Prereq: One course in nutrition and physiology or biochemistry or consent of instructor. [Offered in full – even years.]

ASC 689 PHYSIOLOGY OF NUTRIENT DIGESTION AND ABSORPTION. (3)
An analysis and comparison of the structure and function of mammalian and avian gastrointestinal tracts, of feedstuff digestive processes, and of specific mechanisms responsible for nutrient absorption in various cell types. Emphasis is placed on livestock and avian species. Prereq: Graduate level Biochemistry. [Offered in spring – odd years.]

ASC 690 MACRONUTRIENT METABOLISM IN DOMESTIC ANIMALS. (2)
An in-depth study of macronutrient metabolism and how it can be influenced by nutrition in both ruminant and non-ruminant species. Students will learn the important principles of macronutrient metabolism in domestic animals through lectures, evaluation of the current scientific literature and presentations. Prereq: 3 credits in biochemistry (BCH 401G, BIS 601, or equivalent) and 3 credits in animal nutrition, or consent of instructor.

ASC 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall, spring and summer.]

ASC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 resident credit following the successful completion of the qualifying exams.

ASC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall, spring and summer.]

ASC 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ASC 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ASC 771 ANIMAL SCIENCE SEMINAR. (1)
May be repeated twice for a maximum of three credits. [Offered in fall and spring.]

ASC 777 ADVANCED TOPICS IN ANIMAL SCIENCE (Subtitle required). (1-4)
Intensive study in a unique aspect of animal agriculture not covered in other graduate courses currently offered. May be repeated under a different subtitle two times to a maximum of 8 credits. Prereq: Permission of instructor.

ASC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)
May be repeated for a maximum of nine credits. Prereq. Consent of graduate adviser. (Same as FSC 780.) [Offered in fall and spring.]

ASC 781 SPECIAL PROBLEMS IN GENETICS AND ANIMAL BREEDING. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 782 SPECIAL PROBLEMS IN ANIMAL NUTRITION. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 783 SPECIAL PROBLEMS IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-4)
Intensive study or investigation of topics in physiology not covered in formalized courses. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 790.)

ASC 791 RESEARCH IN GENETICS AND ANIMAL BREEDING. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 792 RESEARCH IN ANIMAL NUTRITION. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 793 RESEARCH IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-6)
Original investigation of mechanisms and problems related to mammalian reproduction. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

AST Astronomy

AST 191 THE SOLAR SYSTEM. (3)
A course emphasizing the nature, origin and evolution of planets, satellites and other objects in the Solar System. Topics also include historical astronomy, the naked eye phenomena of the sky and modern solar system discoveries made by spacecraft. This course may be taken independently of AST 192.

AST 192 STARS, GALAXIES AND THE UNIVERSE. (3)
A course covering the universe outside the Solar System. A principle theme is the origin and evolution of stars, galaxies and the universe at large. Topics also include black holes, quasars and the big bang model of the universe. This course may be taken independently of AST 191.

AST 310 TOPICS IN ASTRONOMY AND ASTROPHYSICS (Subtitle required). (3)
Readings, research, discussions and lectures to illuminate problems of contemporary significance in astronomy and astrophysics. May be repeated to a maximum of six credits under a different subtitle. Prereq: To be announced with subtitle.

AST 395 INDEPENDENT WORK IN ASTRONOMY. (1-3)
Students may select an approved topic for study under the direction of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.

AST 591 ASTROPHYSICS I - STARS. (3)
The physics of stars from star formation to stellar death. Topics include stellar structure and evolution, energy generation and transport, the later stages of stellar evolution and stellar remnants. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 591.)
AST 592 ASTROPHYSICS II—GALAXIES AND INTERSTELLAR MATERIAL. (3)
The physics of galaxies and of the interstellar medium. Topics include galaxy formation and evolution, interaction, phases of the interstellar medium, and physical processes in the interstellar medium. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 592.)

AST 639 PHYSICAL PROCESSES IN ATMOSPHERICS. (3)
A lecture and problem course covering the physical processes encountered in atmospheres. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 592 or consent of instructor. (Same as PHY 639.)

AT 120 CAREERS IN ATHLETIC TRAINING. (1)
An overview of the Athletic Training profession including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students’ understanding of the profession(s) and to assist in educational and career planning and discernment.

AT 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to 2 credits experiential/research). (Same as HS 500, CNU 500, CD 500, MLS 500, PAS 500.)

#AT 504 CURRENT TOPICS IN ACTIVE WOMEN’S HEALTH. (2)
This is a required course encompassing a wide range of topics related to women’s health with a focus on active women’s health. The primary focus of this course will be on the discussion of clinical issues specific to active women’s health from a variety of healthcare professionals. The course will utilize a combination of discussions, oral presentations, written communication and group discussions to inform the student. Course materials will be covered and students will be expected to develop a presentation on a topic specific to their respective area of clinical practice. Prereq: 1. Acceptance in the Active Women’s Health Certificate Program. (Same as CNU 504.)

#AT 505 SPORTS MEDICINE FOR ACTIVE WOMEN. (2)
This course is designed to study the basic areas covered in sports medicine with readings and discussions of current trends in research and practice in the field of active women’s health. Readings, discussions, and an independent project will focus on reflexive decision making about critical issues and trends related to sports medicine. Contemporary topics in sports medicine will be covered and students will be expected to develop a presentation on a topic specific to their respective area of clinical practice. Prereq: 1. Acceptance in the Active Women’s Health Certificate Program; 2. B or better in CNU 503: Nutrition for Health Professions.

#AT 506 EXPERIENTIAL LEARNING IN WOMEN’S HEALTH: PART I. (2)
The intent of the Part I Experiential Learning in Women’s Health course is to use knowledge learned in the classroom and apply to women in the healthcare settings to facilitate wellness, prevention and recovery to maximize women’s health. Students will learn to apply the basics of motivational interviewing as well as the fundamentals learned in class to assess and recommend treatment for issues related to active women’s health. Experiences to be covered in the healthcare settings for women will include nutritional assessment, basic nutrition counseling, physical assessment, injury prevention during exercise, and injury recovery. The course will have an introductory didactic component prior to the experiential learning activities to understand issues related to professionalism and motivational interviewing. Prereq: 1. Acceptance in the Active Women’s Health Certificate Program; 2. Students must have maintained an overall GPA of 3.0, with a B in all Certificate courses. (Same as CNU 506.)

#AT 507 EXPERIENTIAL LEARNING IN WOMEN’S HEALTH: PART II. (2)
The intent of the Part II Experiential Learning in Women’s Health course is to use knowledge learned in the classroom and during Part I and further understanding and skills applied to women in the healthcare settings to facilitate wellness, prevention and recovery to maximize women’s health. Students will learn to further apply the basics of motivational interviewing as well as the fundamentals learned in class to assess and counsel on issues related to active women’s health. Experiences to be covered in the healthcare settings for women will include more in depth skills involving nutritional assessment, expanding nutrition knowledge and nutrition counseling skills, additional applications of physical assessment and injury prevention during exercise as well as injury recovery. The course will have lectures interspersed on healthcare workplace skills. Prereq: 1. Acceptance in the Active Women’s Health Certificate Program; 2. Students must have maintained an overall GPA of 3.0, with a B in all Certificate courses. (Same as CNU 507.)

AT 510 LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY. (3)
This is a course designed for students pursuing licensure as an Athletic Trainer or a similar professional license in a health care profession that requires the ability to understand, recognize and manage life-threatening and emergency conditions. This is part of a sequence of courses that focus on sports injury assessment and recognition. The overall objectives are for the students to provide foundational and conceptual information for the body systems most commonly associated with lifethreatening and emergency conditions during physical activity. Students will learn to recognize life-threatening emergency conditions, identify the body systems in crisis, and the associated threats to those body systems. The student will be required to demonstrate competencies in written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

AT 520 MANAGEMENT AND ADMINISTRATION IN ATHLETIC TRAINING. (3)
This is a course designed for students pursuing certification in Athletic Training or similar professional license in health care professions that focuses on the concepts related to the administration of athletic training programs including legal aspects and regulation of clinical practice, department and personnel management, budgeting, medical records management, risk management planning, facility design, development of referral programs and basic program outcome assessment methods. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

AT 550 EVIDENCE-BASED PRACTICE IN ATHLETIC TRAINING. (3)
This is a course designed for students pursuing certification in Athletic Training or similar professional license in health care professions that exposes the students to importance of supportive, validated research to establish evidence for clinical practice. Lectures will provide foundational information for students to understand the 5 steps of seeking and integrating research into clinical practice. The student will be required to demonstrate competencies in evidence-based concepts in written examinations, as well as complete a written and oral presentation of a literature review that utilizes evidence based concepts to address a clinical question. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

#AT 589 FOUNDATIONS IN ATHLETIC TRAINING. (2)
This two credit course (1 credit lecture, 1 credit lab) will cover topics diverse in nature to ensure foundational preparation for athletic training students in their subsequent coursework and clinical experiences. Topics introduced in this course will include: interprofessional practice; legal, ethical, and regulatory issues; professional liability; laws, regulations, and rules that guide athletic training practice; decision making strategies; cultural competency; basic injury prevention techniques; and an introduction to healthcare informatics. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

*AT 590 MUSCULOSKELETAL ANATOMICAL DISSECTION. (3)
This course is designed for students pursuing certification as an Athletic Trainer or a similar professional license in a health care profession that requires the ability to understand, recognize and manage musculoskeletal injuries. This is the first course in a sequence of courses that focus on sports injury assessment and recognition, and is a 3 credit cadaver anatomy course, which will include dissection and examination of the human cadaver. Lecture and laboratory experiences will emphasize the various systems of the body with reference to athletic injury mechanism. The student will be required to demonstrate competencies in written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

*AT 591 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM: I. (3)
This is a 3 credit course (3 lecture) designed for students pursuing certification in Athletic Training or a similar professional license in health care professions that requires the ability to perform musculoskeletal assessment and management of injuries to the various systems of the human body. This is part of a sequence of anatomy and physiology of human body systems courses that focus on normal and disrupted structures involved in sports injuries. The overall objective is for the students to receive foundational information pertaining to structure and function of the various body systems and introduce diagnostic imagining techniques for these various systems. The student will be required to demonstrate competencies in written and practical examinations. Prereq: 1) Formal acceptance into the Master of Science in Athletic Training program at the University of Kentucky.

*AT 592 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM: II. (3)
This course is a 3 credit course (2 lecture, 1 lab) designed for students pursuing certification in Athletic Training or similar professional license in health care professions that requires the ability to perform musculoskeletal assessment and management of the entire human body. This is part of a sequence of anatomical and physiological of human body systems courses that focus on normal and disrupted structures involved in sports injuries. The overall objective is to provide foundational information to the students on the endocrine, gastrointestinal, genitourinary, neurological, reproductory, respiratory, cardiovascular and integumentary body systems. The students will also explore tests and measures to assess these body systems. The student will be required to demonstrate competencies in written and practical examinations. Prereq: 1) Formal acceptance into the Master of Science in Athletic Training program at the University of Kentucky. 2) Grade of C or higher in AT 591.
**Course Descriptions**

**AT 593 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM FOR ATHLETIC TRAINERS:**

This is a course designed for students pursuing a certification in Athletic Training or similar health care careers. The course covers the musculoskeletal assessment and management of the entire human body. This is part of a sequence of anatomical and physiological of human body systems courses that focus on normal and disrupted anatomy and physiology of body systems. The overall objective is for the student to provide foundation information of integumentary and inflammatory body systems. The student will be required to demonstrate competencies in written examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

**AT 610 ASSESSMENT AND MANAGEMENT OF LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY.**

This is a course designed for students pursuing a certification in Athletic Training or similar health care careers. The course focuses on the assessment and management of life-threatening emergency conditions. A combination of lectures and laboratory experiences will be provided in order for the student to learn and demonstrate appropriate assessment and care for patients of all ages with a variety of medical conditions and traumatic injuries. The overall objective is for the students to be able to survey, deliver and manage emergency conditions that are likely to occur during athletic competition or physical activity. The student will be required to demonstrate competencies in assessment and management with both written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 510 Foundational Systems for Athletes: Life-Threatening and Emergency Conditions.

**AT 620 GENERAL MEDICAL CONDITIONS IN THE PHYSICALLY ACTIVE.**

This is a course designed for students pursuing a certification in Athletic Training or similar health care careers. The course covers the assessment and management of life-threatening emergency conditions. Specific focus will be placed on common therapeutic drugs used in sports medicine. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

**AT 631 CLINICAL INTEGRATION I: LOWER EXTREMIT Y ASSESSMENT AND MANAGEMENT.**

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 695.

**AT 632 CLINICAL INTEGRATION II: UPPER EXTREMIT Y ASSESSMENT AND MANAGEMENT.**

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 695.

**AT 633 CLINICAL INTEGRATION III: ASSESSMENT AND MANAGEMENT OF LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY.**

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 695.

**AT 634 CLINICAL INTEGRATION IV: THERAPEUTIC MODALITIES AND ADVANCED THERAPEUTIC REHABILITATION.**

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 691, AT 695, and AT 696.

**AT 635 CLINICAL INTEGRATION V: SPINE ASSESSMENT AND MANAGEMENT.**

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) AT 697.

**AT 640 PRACTICUM IN ATHLETIC TRAINING I.**

This is a 3-credit practicum course designed for students pursuing a certification in Athletic Training. This is the first course in a series of courses that combines supervised field experience with review of clinical skills from the classroom. Students will integrate didactic knowledge and clinical skills from previous coursework into the clinical experience, specifically lower extremity evaluation, lower extremity rehabilitation, and management, and administration. Students will also observe and assist clinical preceptors in healthcare delivery. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making under the supervision of an assigned Preceptor. Additionally, students will be required to demonstrate proficiency in competencies specific to the semester content. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) A grade of C or better in: AT 520, AT 592 and AT 695. 3) Completed Clinical Proficiency Evaluations in AT 640.

**AT 641 PRACTICUM IN ATHLETIC TRAINING II.**

This is a 3-credit practicum course designed for students pursuing a certification in Athletic Training. This is the second course in a series of courses that combines supervised field experience with review of clinical skills from the classroom. Students will integrate didactic knowledge and clinical skills from previous coursework into the clinical experience, specifically lower extremity evaluation, lower extremity rehabilitation, and management, and administration. Students will also observe and assist clinical preceptors in healthcare delivery. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making under the supervision of an assigned Preceptor. Students will meet every Friday during the last four weeks, for one hour with the faculty of record, to review patient case presentations and discuss emerging clinical topics. Additionally, students will be required to demonstrate proficiency in competencies specific to the semester content. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) A grade of C or better in: AT 510, AT 520, AT 592 and AT 695. 3) Completed Clinical Proficiency Evaluations in AT 640.

**AT 642 PRACTICUM IN ATHLETIC TRAINING III.**

This is a 4-credit practicum course designed for students pursuing a certification in Athletic Training. This is the third course in a series of courses that combines supervised field experience with review of clinical skills from the classroom. Students will integrate didactic knowledge and clinical skills from previous coursework into the clinical experience, specifically lower extremity evaluation, lower extremity rehabilitation, and management, and administration. Students will also observe and assist clinical preceptors in healthcare delivery. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making under the supervision of an assigned Preceptor. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) A grade of C or better in: AT 610, AT 641, AT 670 and AT 696. 3) Completed Clinical Proficiency Evaluations in AT 641.

**AT 643 PRACTICUM IN ATHLETIC TRAINING IV.**

This is a 7-credit practicum course designed for students pursuing a certification in Athletic Training. This is the fourth course in a series of courses that combines supervised field experience with review of clinical skills from the classroom. The students will complete an 8-week immersive experience. Students will integrate didactic knowledge and clinical skills from previous coursework into the clinical experience, specifically upper and lower extremity evaluation, lower extremity rehabilitation, and emergency management. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making under the supervision of an assigned Preceptor. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) A grade of C or better in: AT 642, AT 691 and AT 671. 3) Completed Clinical Proficiency Evaluations in AT 642.

**AT 644 PRACTICUM IN ATHLETIC TRAINING V.**

This is a 6-credit practicum course designed for students pursuing a certification in Athletic Training. This is the fifth and final course in a series of courses that combines supervised field experience with review of clinical skills from the classroom. Students will integrate didactic knowledge and clinical skills from previous coursework into the clinical experience, specifically upper and lower extremity evaluation, upper and lower extremity rehabilitation, and emergency management. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making under the supervision of an assigned Preceptor. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. 2) A grade of C or better in: AT 643, AT 672, AT 673 and AT 697. 3) Completed Clinical Proficiency Evaluations in AT 643.

**AT 660 DIRECTED STUDY IN ATHLETIC TRAINING.**

This is a directed study course that requires the student to be pursuing a certification in Athletic Training. This course is intended for students who are interested in selecting an area of focus for indepth study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Graduate standing and consent of the instructor.

**AT 670 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING.**

An introduction to the research process in athletic training. The importance of pursuing quality research in athletic training will be stressed and the procedures necessary to complete this process will be presented. May be repeated to a maximum of 8 credits. Prereq: Graduate standing and consent of the instructor.
Course Descriptions

AT 671 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING II. (2)
The second course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the methodological procedures of designing and pursuing research in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 672 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING III. (2)
The third course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 673 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING IV. (2)
The final course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will focus on developing the skills needed to critically synthesize material with accepted practice, and prepare professional presentations using acquired data and an appropriate statistical analysis. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing, and consent of instructor.

AT 680 SPECIAL TOPICS IN ATHLETIC TRAINING: (Subtitle required). (1-3) Study of emerging topics of current high interest in athletic training. May be repeated to a maximum of 9 credits. Prereq: Graduate standing and consent of instructor.

AT 682 CLINICAL SEMINAR IN ATHLETIC TRAINING. (1)
This is an advanced athletic training course encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course will be on the presentation of case studies for group discussion and contribution. This course will utilize a combination of discussion, review, and student presentation.

AT 685 PRINCIPLES AND APPLICATION OF KINESIOLOGICAL EMG. (3)
To introduce the student to the principles and application of kinesiologic electromyography (EMG). Kinesiologic EMG research incorporates the study of human movement with direct assessment of the muscles involved with human motion. The primary aim for this course is to provide the student with background and practical knowledge of kinesiologic EMG in order to be able to perform and critically analyze kinesiologic EMG studies. Students will enhance their understanding of neuromuscular properties of skeletal musculature. Students will be exposed to the common procedures used to collect, analyze, and interpret both surface and indwelling kinesiologic EMG research. Prereq: KHP 615 or comparable graduate level biomechanics course, these courses can be taken concurrently. Approval of instructor.

AT 690 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE UPPER EXTREMIT Y. (4)
Current evaluation and rehabilitation of upper extremity and upper spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory techniques will be used to review current practice and interventions. Prereq: Graduate standing and consent of instructor.

AT 691 THERAPEUTIC MODALITIES FOR ATHLETIC TRAINERS. (3)
This is a course designed to students pursuing a certification in Athletic Training or similar professional license in health care professions that requires the ability to treat and manage symptoms of musculoskeletal conditions using therapeutic modalities. A combination of lectures and laboratory experiences will be provided in this class for the student to gain theoretical knowledge and practical application of the use of these physical agents. The overall objective is for the students to develop the skills necessary to select appropriate modalities that can be used for the treatment and care of musculoskeletal injuries sustained by physically active individuals. The student will be required to demonstrate competencies in therapeutic modality applications with both written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky. AT 591 Foundational Systems, Disorders and Disruptions in Athletic Injury: Muscle/Tendon/Nerve. AT 592 Foundational Systems, Disorders and Disruptions in Athletic Injury: Articular/Bone/Cartilage. AT 590 Anatomical Musculoskeletal Dissection. AT 591 Foundational Systems, Disorders and Disruptions in Athletic Injury: Articular/Bone/Cartilage. AT 590 Anatomical Musculoskeletal Dissection.

AT 692 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE SPINE. (4)
This is an advanced athletic training course encompassing a wide range of topics related to all aspects of spinal musculoskeletal conditions. A combination of lecture and laboratory experiences will focus on performance of evaluation of regional areas and application of rehabilitation techniques for a variety of upper extremity health conditions. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

AT 696 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE UPPER EXTREMIT Y. (4)
This four credit course (2 hours of lecture, 4 hours of lab per week) is designed for students pursuing a certification in athletic training or similar health care profession. A combination of lecture and laboratory experiences will be provided in order for the student to learn and demonstrate appropriate assessment and care for patient of all ages, specific to the entire upper extremity. Regional study of musculoskeletal and neurological evaluation, assessment, management and rehabilitation of the upper extremity will cover standardized examination and treatment of common musculoskeletal and neurological conditions. Laboratory experiences will focus on performance of evaluation of regional areas and application of rehabilitation techniques for a variety of upper extremity health conditions. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

AT 697 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE SPINE. (3)
This three-credit course is designed for students pursuing a certification in athletic training or similar health care profession. A combination of lecture and laboratory experiences will be provided in order for the student to learn and demonstrate appropriate assessment and care for patients of all ages, specific to the cervical, thoracic and lumbar spine. Regional study of orthopedic evaluation, assessment, management, and rehabilitation of the spine will be covered. Laboratory experiences will focus on performance of evaluation of regional areas and specific manual techniques of rehabilitation. Prereq: 1) Formal acceptance into the Master of Science degree program in Athletic Training at the University of Kentucky.

AT 700 MUSCLE MECHANICS. (3)
This is an advanced athletic training course encompassing a wide range of topics related to all aspects of skeletal muscle form and function. The primary focus of this course will be on the mechanical properties of skeletal muscle, and translational aspects of basic science research and clinical care.

AT 701 CLINICAL SEMINAR IN ATHLETIC TRAINING I. (1)
This is the first course in a 4-part sequence of athletic training courses encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course sequence will be on the discussion of clinical cases and clinical issues in a group discussion ranging from athletic injury assessment, intervention, communication issues among athletes and coaches and any other relevant clinical issues facing credentialed athletic trainers. Each of the four courses will have unique student learning outcomes and assignments relative to your growth in clinical practice. This course will utilize a combination of on-line discussions, oral and written case study presentations, clinical outcomes assessment and competency related clinical goals. Prereq: Formal acceptance into the Graduate Certificate program in Musculoskeletal Injury Management at the University of Kentucky or by instructor permission.

AT 702 CLINICAL SEMINAR IN ATHLETIC TRAINING II. (1)
This is the second course in a 4-part sequence of athletic training courses encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course sequence will be on the discussion of clinical cases and clinical issues in a group discussion ranging from athletic injury assessment, intervention, communication issues among athletes and coaches and any other relevant clinical issues facing credentialed athletic trainers. Each of the four courses will have unique student learning outcomes and assignments relative to your growth in clinical practice. This course will utilize a combination of on-line discussions, oral and written case study presentations, clinical outcomes assessment and competency related clinical goals. Prereq: Formal acceptance into the Graduate Certificate program in Musculoskeletal Injury Management at the University of Kentucky or by instructor permission.

AT 703 CLINICAL SEMINAR IN ATHLETIC TRAINING III. (1)
This is the third course in a 4-part sequence of athletic training courses encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course sequence will be on the discussion of clinical cases and clinical issues in a group discussion ranging from athletic injury assessment, intervention, communication issues among athletes and coaches and any other relevant clinical issues facing credentialed athletic trainers. Each of the four courses will have unique student learning outcomes and assignments relative to your growth in clinical practice. This course will utilize a combination of on-line discussions, oral and written case study presentations, clinical outcomes assessment and competency related clinical goals. Prereq: Formal acceptance into the Graduate Certificate program in Musculoskeletal Injury Management at the University of Kentucky or by instructor permission.

AT 704 CLINICAL SEMINAR IN ATHLETIC TRAINING IV. (1)
This is the fourth course in a 4-part sequence of athletic training courses encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course sequence will be on the discussion of clinical cases and clinical issues in a group discussion ranging from athletic injury assessment, intervention, communication issues among athletes and coaches and any other relevant clinical issues facing credentialed athletic trainers. Each of the four courses will have unique student learning outcomes and assignments relative to your growth in clinical practice. This course will utilize a combination of on-line discussions, oral and written case study presentations, clinical outcomes assessment and competency related clinical goals. Prereq: Formal acceptance into the Graduate Certificate program in Musculoskeletal Injury Management at the University of Kentucky or by instructor permission.
**Course Descriptions**

**B&E Business and Economics**

**B&E 102 MICROSOFT OFFICE SPECIALIST – WORD.**

**B&E 103 MICROSOFT OFFICE SPECIALIST – POWERPOINT.**

**B&E 104 MICROSOFT OFFICE SPECIALIST – EXCEL.**

**B&E 105 TECHNOLOGY FOR BUSINESS SOLUTIONS.** This course prepares pre-major students in the Gatton College of Business & Economics to use business software at a high level of proficiency and focuses on Microsoft Excel and Access. Lectures will be supplemented with hands-on experiences with business problems. Prereq: ACC 201 and ECO 201, pre-major in the Gatton College of Business & Economics, or consent of instructor.

**B&E 120 LEADERSHIP IN THE GLOBAL MARKETPLACE.** An introductory examination of the skills, competencies, and styles of effective global leaders. Activities include individual assessments and a personal leadership development plan. Prereq: Acceptance in the Global Scholars Certificate program.

**B&E 122 THE CHALLENGE OF LEADERSHIP.** Current leadership challenges as discussed by the people who confront them. Students have the opportunity to discuss leadership challenges with guest speakers from the corporate, government, and not-for-profit sectors. Prereq: Acceptance into Global Business Leadership Certificate program.

**B&E 150 BUSINESS CAREER EXPLORATION AND DECISION MAKING.** B&E 150 guides students to explore business majors and career opportunities while addressing their individual decision making style. Students participate in assessment activities designed to enhance their understanding of self, including interests, personality, skills and values – factors influencing making an academic major and career pathway. Students explore potential career paths of Gatton majors by participating in exploration activities and utilizing resources provided by the Graham Office of Career Management. Students learn basics for resume and cover letter development, interviewing, professionalism and business etiquette while completing the INTERVIEWReady program over the span of the course. By completing this course, students will be better equipped to select internships and enrichment activities that align with their career goals.

**B&E 201 INTRODUCTION TO BUSINESS.** This course provides an introductory level understanding of how a business operates and how it is managed. Business concepts and activities that will be covered include business development, management, human resources, marketing, accounting and finance. Prereq: Open to all students except those admitted to the Upper Division of the Gatton College of Business and Economics.

**B&E 223 INTRODUCTION TO THE ECONOMICS OF BUSINESS.** Provides an introduction to the principles of microeconomics and some key concepts of macroeconomics as they relate and apply to the immediate interests of business managers. Basic tools of economics will be used to study consumer/producer behavior, how markets work, supply and demand interaction, and intra to market structure. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

**B&E 240 INTER-CULTURAL BUSINESS COMMUNICATION.** This course is designed to improve students’ ability to communicate effectively with people from diverse cultural backgrounds. Prereq: Acceptance into Global Business Leadership Certificate program.

**B&E 300 CAREER DEVELOPMENT IN BUSINESS AND ECONOMICS.** The course will emphasize the application of analytical, communicative, and critical thinking skills in the development of students’ careers. It will address career opportunities, selection of personally appropriate career plans, and job search activities. It will enhance analytical skills through career analysis and company analysis, and enhance written and oral communication skills through their application to job search activities. Prereq: At least 60 hours of earned credit.

**B&E 327 LARGER WORLD ISSUES IN BUSINESS.** A case-based course that explores the nexus between business and the social issues of the day (e.g., poverty, the environment). Student activities include a case competition where they examine a social issue in business and hone their analytical and oral presentation skills. Prereq: Acceptance into the Global Scholars program.

**B&E 390 SPECIAL TOPICS IN BUSINESS (Subtitle required).** Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in business. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the B&E 390 number. Prereq: Varies by topic.

**B&E 396 INTERNSHIP SEMINAR.** (1-3) B&E 396 is an on-line seminar course taken by Gatton College business majors in conjunction with any credit-bearing, part-time internship experience during fall, spring, or summer semesters. B&E 396 is also the course credit for full time summer internships. Students work the required hours at the internship site (number of hours to be determined by the number of credit hours being earned and the internship pay status – see Graham Office Internship Guidelines and the Graham Office Pre-Internship Checklist for details) and participate in this four session seminar course. The seminar serves as a means to provide the academic and career development supervision, supplementing the site supervisor’s role in monitoring the progress of each intern. The course is designed to provide web-based discussion that provides an opportunity for students to process their internship experience and how it relates to their career goals. The seminar content focuses on professional and career development topics, such as business etiquette, navigating corporate culture, and building a professional network. Seminar content also includes academic major discipline-specific material and applications. By completing this course, students will benefit from a well-rounded professional work experience that is supported by academic and career development resources. Gatton students can earn up to 3 credit hours for the same internship experience more than one semester, and 6 credit hours total, which count toward their degree requirements for graduation. A student may not earn B&E 396 academic credit for the same internship experience more than one semester. This course must be taken pass/fail.

**B&E 397 FULL-TIME INTERNSHIP SEMINAR.** B&E 397 is an on-line seminar course taken by Gatton College business majors in conjunction with any credit-bearing, full-time internship experience during the spring or fall semester. Enrollment in this course constitutes full-time student status. Students work the required hours at the internship site (see Graham Office Internship Guidelines and the Graham Office Pre-Internship Checklist for details) and participate in this four session seminar course. The seminar serves as a means to provide the academic and career development supervision, supplementing the site supervisor’s role in monitoring the progress of each intern. The course is designed to provide web-based discussion that provides an opportunity for students to process their internship experience and how it relates to their career goals. The seminar content focuses on professional and career development topics, such as business etiquette, navigating corporate culture, and building a professional network. Seminar content also includes academic major discipline-specific material and applications. By completing this course, students will benefit from a well-rounded professional work experience that is supported by academic and career development resources. Gatton students can earn up to 3 credit hours of experiential education credit per semester, and 6 credit hours total, which count toward their degree requirements for graduation. A student may not earn B&E 397 academic credit for the same internship experience more than one semester. This course must be taken pass/fail.
Course Descriptions

**#B&É 650 GRADUATE LEVEL EXPERIENTIAL EDUCATION I.** (1-3)
An academic internship is a supervised career-related work experience that allows graduate students to apply classroom learning to real-world situations. Internships offer students an opportunity to set learning goals, obtain valuable professional-level experience, and reflect on what they learned from the experience. Prereq: Approval from the Gatton Career Center and MBA Center.

**#B&É 651 GRADUATE LEVEL EXPERIENTIAL EDUCATION II.** (1-3)
An academic internship is a supervised career-related work experience that allows students to apply classroom learning to real-world situations. Internships offer students an opportunity to set learning goals, obtain valuable professional-level experience, and reflect on what they learned from the experience. B&E 651 is designed as the second term of an internship or externship experience. Prereq: B&E 650 and approval from the Gatton Career Center and MBA Center.

---

**BA Business Administration**

**BA 700 TEACHING METHODS IN BUSINESS.** (1)
A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as ECO 700.)

**BA 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

**BA 762 RESEARCH METHODOLOGY.** (3)
Examines fundamental concepts in design, control, and measurement for social science research with emphasis on: reliability, internal and external validity, and causality. Prereq: Admission to DBA program and prior completion of or concurrent enrollment in a graduate level course on the general linear model.

**BA 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**BA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

**BA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.** (0-12)
May be repeated indefinitely.

---

**BAE Biosystems and Agricultural Engineering**

**BAE 102 INTRODUCTION TO BIOSYSTEMS ENGINEERING.** (1)
An introduction to the engineering of food and fiber production and processing systems. Professionalism and the engineering approach will be emphasized.

**BAE 103 ENERGY IN BIOLOGICAL SYSTEMS.** (2)
This course introduces the concepts of energy transport in biological systems including the study of thermodynamics, heat transfer, psychometrics, and fluid flow. BAE 102 and prereq or concur: MA 113, or consent of instructor.

**BAE 200 PRINCIPLES OF BIOSYSTEMS ENGINEERING.** (3)
The engineering problem solving approach will be practiced to analyze biological systems and to demonstrate the application of mathematical and scientific principles to engineering design. Prereq: MA 113, and concurrent with: PHY 231, CHE 105, EGR 103.

**BAE 202 STATISTICAL INFERENCE FOR BIOSYSTEMS ENGINEERING.** (3)
Introduction to statistics and statistical inference reasoning. Evaluation of common claims based on statistical constructs, hypothesis tests, margins of error, confidence intervals, and analysis of variation. Identification of possible statistical obstacles, such as confounding, missing data, and inappropriate randomness. Conceptual statistics will be emphasized. Special attention will be given to include biosystems engineering problems. Prereq: MA 114.

**BAE 301 ECONOMIC ANALYSIS OF BIOSYSTEMS.** (2)
The financial and managerial aspects of biosystems in evaluating design alternatives. Typical topics include: concepts of present and future value, techniques of managerial economics, and biosystems design analysis in the evaluation of alternatives. Retirement/replacement policies and risk analysis. Prereq: BAE 202.

**BAE 305 DC CIRCUITS AND MICROELECTRONICS.** (3)
An introduction to the use of digital electronics and integrated circuits in solving biosystems engineering problems. Digital circuit design and analysis, microprocessor concepts, computer interfacing, transducers, signal conditioning and control applications are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: EGR 102 and EE 305.

**BAE 310 HEAT AND MASS TRANSFER IN BIOSYSTEMS ENGINEERING.** (3)
Fundamental principles of steady state and transient heat and mass transfer in biosystems engineering. Heat transfer will include conduction, convection, and radiation. Mass transfer will include liquid–gas, solid–gas, and solid–liquid equilibrium scenarios, as well as convective, diffusive, and osmotic mass transfer. Governing equations and boundary conditions for both heat and mass transfer will be included with special attention to industrial, biological, and bioenvironmental problems. Prereq: MA 214 and ME 220; concurrently CE 341.

**BAE 395 INDEPENDENT RESEARCH IN BIOSYSTEMS ENGINEERING.** (1-3)
Individual research on a selected problem in the field of biosystems engineering. May be repeated for a maximum of 6 credits. Prereq: Engineering standing and consent of instructor.

**BAE 400 SENIOR SEMINAR.** (1)
A course for seniors in biosystems engineering with emphasis on oral communications skills. Students will do literature searches on topics related to the biosystems engineering profession and present oral and written reports. Prereq or concur with BAE 402.

**BAE 402 BIOSYSTEMS ENGINEERING DESIGN.** (2)
A design course for seniors in BAE requiring students to solve open-ended problems. Students will use previously learned engineering principles to produce actual designs which will be built and analyzed in BAE 403. Prereq: BIE 148, BIE 152, ME 330 or CE 341; EM 302; concurrently with EM 313 and ME 325.

**BAE 403 BIOSYSTEMS ENGINEERING DESIGN II.** (2)
Student design teams evaluate and enhance design solutions, fabricate prototypes, execute performance tests, analyze results, and develop final design specifications. Oral and written reports are required. Prereq: BAE 402; EM 313; ME 325.

**BAE 417 DESIGN OF MACHINE SYSTEMS.** (3)
A study of the characteristics, treatment and utilization principles, and analysis and design of systems for managing waste from the production and processing of food and fiber. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330 or CE 341; EM 302; or prereq: EM 313.

**BAE 427 STRUCTURES AND ENVIRONMENT ENGINEERING.** (3)
This course teaches load estimate for light timber and concrete structures and introduces the design of heating, cooling, and ventilation systems in these structures. Prereq: CE 341 or ME 330; BIE 148 and 152; or prereq or concur: EM 313.

**BAE 435G WASTE MANAGEMENT FOR BIOSYSTEMS.** (3)
A study of the characteristics; treatment and utilization principles; and analysis and design of systems for managing waste from the production and processing of food and fiber. Lecture, two hours; laboratory, three hours per week. Prereq: MA 214; BIE 152.

**BAE 437 LAND AND WATER RESOURCES ENGINEERING.** (3)
The hydrologic cycle is studied and design procedures are developed for flood control structures, water table management, wetlands, irrigation, and erosion control systems. Prereq: CE 341 or ME 330; BIE 148 and 152; or prereq or concur: ME 325.

**BAE 438G FUNDAMENTALS OF GROUNDWATER HYDROLOGY.** (3)
Design principles and equipment selection for the most common processing operations are studied for the manufacturing and preservation of biological materials. Topics will include the design of fluid flow systems, transient heat transfer, heat exchangers, psychometrics, and refrigeration. Prereq: BIE 148 and BIE 152; or prereq or concur with ME 325.

**BAE 450 SPECIAL PROBLEMS.** (1-3)
An intensive study of some phases of biosystems engineering in which the student is particularly interested. Approval of instructor is required. May be repeated for a maximum of six credits. Prereq: Approval of the instructor.

**BAE 502 MODELING OF BIOLOGICAL SYSTEMS.** (3)
This course will introduce students to mathematical modeling of biological systems, both from a conceptual and methodological perspective. The art and science of developing a computer simulation model will be presented and supported by examples/exercises in MATLAB. Prereq: BAE 402.

**BAE 503 FUNDAMENTALS OF BIORENEWABLE RESOURCE ENGINEERING.** (3)
This course introduces students to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Topics include: Defining the resource base; physical and chemical properties of biorenewable resources; description of biobased products; methods of production for biorenewable resources.
Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data systems and spatially-referenced data unique to water resources and hydrologic modeling. This course studies the principles, methodology and analysis of geographic information systems. Major topics include data modeling. Students will learn to use computer software to conduct simulations and design components. Rapid prototyping and traditional fabrication techniques will be explored. May be repeated to a maximum of six credits, but only three credits can be earned in real engineering settings. Prereq: Engineering standing or consent of instructor. (Same as EE 458.)

BAE 541 INTERMEDIATE FLUID MECHANICS. (3)
Application of basic fluid mechanics to problems of importance to civil engineering practice. This course introduces students to the science and engineering of liquid biofuels for transportation. Topics include: physical and chemical properties, engine performance, processing technologies, and environmental impact of biofuels. Prereq: BAE 503 or consent of instructor.

BAE 542 BIOFUELS AND BIOPRODUCTS. (3)
This course explores the history and current status of biofuels and bioproducts development, the policy drivers and stakeholders, current industrial players, mainstream processing technologies, and current and future research themes. Expanding the technical aspects, this course will cover biochemical conversion techniques for producing bioethanol, biobutanol, biodiesel, biogas, and other advanced biofuels/bioproducts and thermochemical conversion techniques towards syngas, bio-oil, and biochar. Prereq: Engineering standing or consent of instructor.

BAE 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)
Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as EE 543/EGR 543.)

BAE 545 ENGINEERING HYDRAULICS. (3)
Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461G and engineering standing, or consent of instructor. (Same as CE 549.)

BAE 549 BIOLOGICAL PROCESS ENGINEERING. (3)
An analysis of processing operations for the conversion or generation of biological materials. The course material applies thermodynamics, heat transfer, mass and energy balances, and reaction kinetics to biological process operations such as sterilization, fermentation, product recovery, freezing, drying, evaporation, and refrigeration. Applications include biomedical, food processing, and biochemical and biofuel production from biomass. Prereq: BAE 447 or consent of instructor.

BAE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT. (3)
Study of the generation and management of solid and hazardous wastes. Application of engineering principles to the collection, transport, processing, resource recovery and ultimate disposal of these wastes. Prereq: CE 471G, CE 521 or consent of instructor and engineering standing. Prereq: CE 556.)

BAE 580 HEATING, VENTILATING AND AIR CONDITIONING. (3)
A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in the design and application of environmental control systems to achieve energy efficiency and comfort. Students will learn to design and analyze the performance of heating, ventilating, and air conditioning systems. Prereq: BAE 427 or ME 321, or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as ME 580.)

BAE 581 PHYSICS OF PLANT AND ANIMAL ENVIRONMENTS. (3)
A study of the thermal, moisture, light, and gaseous components of plant and animal environments with emphasis on interactions between these biological systems and their environments. Prereq: BAE 427 or consent of instructor.

BAE 583 INDUSTRIAL ENERGY UTILIZATION AND ASSESSMENT. (3)
This course considers energy use in industrial settings— including energy flows and energy transformations. Students will learn methodologies for assessing, analyzing, and reducing energy use and cost in industrial facilities and auxiliary equipment. The content presented in this course is intended to be consistent with the US Department of Energy Industrial Assessment Center program methods. Students will learn how to perform energy assessments in real engineering settings. Prereq: Engineering standing or consent of instructor. (Same as EE 583/EGR 583/ME 583/MFS 583.)

BAE 599 TOPICS IN BIOSYSTEMS ENGINEERING. (2-3)
A detailed investigation of a topic of current significance in biosystems engineering such as: design of small earth dams, vacuum dehydration systems, small particle mechanics, biofuels, environmental control in greenhouses, sprinkler irrigation, energy conversion in agriculture, bio-simulation. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the BAE 599 number. Prereq: Variable; given when topic identified.
BAE 625 TOPICS IN ADVANCED ENVIRONMENT CONTROL AND ANALYSIS (Subtitle required). (3)
A study of current research in environment control and analysis of agricultural, commercial, and residential structures. May be repeated three times for a maximum of nine credits, but not more than three credits may be earned under a particular topic. Prereq: Senior course in environment control and HVAC, BAE/ME 580, or consent of instructor.

BAE 642 OPEN CHANNEL FLOW. (3)
The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as CE 642.)

BAE 643 MECHANICS OF SEDIMENT TRANSPORT. (3)
Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 541 or consent of instructor. (Same as CE 643.)

BAE 647 SYSTEM OPTIMIZATION I. (3)
Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g., biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as ME 647.)

BAE 648 ENERGY AND MASS TRANSFER IN BIOSYSTEMS PROCESSING. (3)
A comprehensive and in-depth study of the principles of energy and mass transfer as they apply to the processing of agricultural and biological materials. Prereq: BAE 549 or consent of instructor.

BAE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL. (3)
Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as CE 652.)

BAE 653 WATER QUALITY IN SURFACE WATERS. (3)
Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as CE 653.)

BAE 658 INSTRUMENTATION FOR ENGINEERING RESEARCH. (3)
Instrumentation and measuring system characteristics; transducers for engineering measurements; and data acquisition and analysis. Lecture, two hours; laboratory, two hours per week. Prereq.: Consent of instructor.

BAE 660 SIMILITUDE IN ENGINEERING. (3)
BAE 662 STOCHASTIC HYDROLOGY. (3)
Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as CE 662.)

BAE 664 WATERSHED MANAGEMENT. (3)
This course provides an overview of the scientific principles and management strategies used to effectively manage the physical, chemical, biological and social resources within a watershed so as to improve and sustain the integrity of the watershed system. The course will examine watershed management from both a scientific/engineering perspective as well as from a social science/policy perspective. Examples of effective watershed management will be drawn from cases studies in Kentucky and the United States. Students will be provided with an introduction to those spatial data sets, computer software, and methods currently used in watershed management practice. Prereq: BAE 437 or CE 461G or an equivalent course in hydrology, or consent of instructor. (Same as CE 664.)

BAE 665 WATER RESOURCES SYSTEMS. (3)
Application of systems analysis, mathematical modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as CE 665.)

BAE 667 STORMWATER MODELING. (3)
Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as CE 667.)

BAE 672 LANDFILL DESIGN. (3)
This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as CE 672.)

BAE 680 BIOCHEMICAL ENGINEERING. (3)
Principles and design of processes involving biochemical reactions, including aerobic and anaerobic respirations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as CME 680.)

BAE 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BAE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BAE 750 SPECIAL PROBLEMS IN BIOSYSTEMS ENGINEERING. (1-3)
Independent work on selected research problems in one of the various fields of biosystems and agricultural engineering. Consultation and laboratory by appointment. May be repeated three times for a maximum of nine credits. Prereq: Approval of chairperson of department.

BAE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BAE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BAE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

BAE 775 PROFESSIONAL PRACTICES SEMINAR. (2)
Review of current research topics, methods, management tools and communications techniques associated with these topics. Required of all departmental graduate students. May be repeated once for credit. Lecture, two hours per week. Prereq: Graduate standing.

BAE 795 THESIS. (0)
May be repeated twice.

BCH Biochemistry

BCH 395 INDEPENDENT WORK IN BIOCHEMISTRY. (3-12)
Students will carry out a laboratory research project and related reference reading. Laboratory: 9-12 hours per week. May be repeated to a maximum of 12 credits. Prereq: Permission of instructor.

BCH 401G FUNDAMENTALS OF BIOCHEMISTRY. (3)
Descriptive chemistry of amino acids and proteins, carbohydrates, lipids, and nucleic acids. Discussion of structure and function; metabolism and energetics; and biological information flow. At the undergraduate level, understanding is demonstrated through four examinations; at the graduate level, understanding is demonstrated through five examinations and a final paper. Lecture, three hours; one optional conference. Prereq.: CHE 107, CHE 236 and BIO 152 or equivalent.

BCH 419G MOLECULAR BASIS OF HUMAN DISEASE. (3)
The goal of this course is to provide students with an understanding of the defining characteristics of the major human diseases, the molecular mechanisms responsible for causing these diseases, and some of the molecular technologies used to diagnose and treat them. Prereq: BCH 410G.

BCH 517 EXPERIMENTAL METHODS IN BIOCHEMISTRY. (4)
A laboratory course dealing with the instrumentation and procedures of biochemical research. Because many of the materials used are labile, the course is given in a block during a four-week period at the end of the spring semester. Five days per week during four-week intersession, or summer session. Prereq: BCH 401G, 502 or 811 and consent of instructor.

BCH 556 PRINCIPLES OF DRUG DESIGN. (3)
Introduction to medicinal chemistry will be explored through rational biochemical and physical organic chemical approaches to drug design, action and development. Structural features, physical properties, mechanism of action and metabolism of drug like molecules, forces that govern interaction of drug-like molecules with their targets, enzyme mechanisms and inhibition and xenobiotic metabolism will be illustrated with specific examples showing how drugs function at the molecular level. Prereq: CHE 230, CHE 232, BIO 148, BIO 152. (Same as PHS 556.)
Course Descriptions

BCH 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/MI/PLS/PAA 601.)

BCH 604 STRUCTURAL BIOLOGY. (3)
An advanced course on the structure and function of proteins and nucleic acids. Topics include: the physical determinants of protein structure, classification of protein architecture, protein-nucleic acid and protein-protein interactions, sequence dependence of nucleic acid structure, ribosomes, dynamics and evolutionary relationships. Prereq: IBS 601-602/BCH 607-608 or equivalent.

BCH 607 BIOMOLECULES AND METABOLISM. (3)
An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as IBS 601.)

BCH 608 BIOMOLECULES AND MOLECULAR BIOLOGY. (3)
An introductory graduate-level biochemistry course focused on the cellular mechanisms that underlie the regulated expression of genes, including transcription and translation, as well as basic mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches critical to molecular biology research will be reviewed. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

BCH 609 PLANT BIOCHEMISTRY. (3)
The course will consider the chemical constituents of plants (with emphasis on biologically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, photosynthesis and transport processes in plants. Prereq: BCH 607 or equivalent or consent of instructor. (Same as PLS/PAA 609.)

*BCH 610 CELLULAR AND MOLECULAR BIOLOGY OF BIOMEMBRANES. (3)
A lecture and seminar course that discusses primary literature focused on the structures, assembly, and functions of biologically important membranes. Prereq: CHE 232; CHE 442G; BCH 401G, 811, or IBS 601.

BCH 611 BIOCHEMISTRY AND CELL BIOLOGY OF NUCLEIC ACIDS. (3)
A lecture and seminar course devoted to a study of the principles of nucleic acid chemistry and to the role of nucleic acids in cellular function. Prereq: BCH 401G, 502 or 811.

BCH 612 STRUCTURE AND FUNCTION OF PROTEINS AND ENZYMES. (3)
Primarily a lecture course devoted to the relationship of the structure of protein molecules to their biological activity. Proteins will be discussed in terms of their size, shape, conformation, primary structure, catalytic mechanism and regulatory properties. Prereq: BCH 401G, 502 or 811; CHE 444G or consent of instructor. May be taken concurrently with BCH 502.

BCH 615 MOLECULAR BIOLOGY. (3)
This course will develop the student's ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g. IBS 602) or consent of instructor. (Same as BIO/MI 615.)

BCH 618 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 619 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 620 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as PHR 620/PLS 642.)

BCH 625 SCIENTIFIC COMMUNICATIONS. (2)
To be useful, scientific research needs to be explained clearly to others – to colleagues, to administrators, to foundations and governmental bodies, and to the public. This course will give students the tools to effectively present their data, their ideas, and themselves to the scientific community. Through a series of directed exercises the students will learn how to write an abstract, a scientific paper, and a grant, and to prepare a poster and to give an oral presentation. The class will draw examples, topics, and exercises from current literature. Prereq: Good standing in a graduate program in the physical, chemical or biomedical sciences.

BCH 640 RESEARCH IN BIOCHEMISTRY. (1-9)
Prereq: Consent of instructor.

BCH 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BCH 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters.

BCH 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BCH 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BCH 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

BCH 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student's own research in particular. May be repeated to a maximum of six credits. (Same as CHE/CME/PHA/PHR 779.)

BCH 780 TOPICS IN BIOCHEMISTRY. (1-3)
A lecture and seminar course offered on topics of special interest to graduate students. May be repeated to a maximum of six credits.

BCH 812 DENTAL BIOCHEMISTRY. (6)
This is a comprehensive course in biochemistry designed to fulfill the specific needs of student dentists. Course content is generally as outlined in the American Association of Dental Schools suggested curriculum guidelines for biochemistry. Part I acquaints students with the chemical constituents of prokaryotic and eukaryotic cells. Topics include the chemistry of lipids, carbohydrates, proteins, vitamins and coenzymes, and the nature of enzyme action. Part II integrates the chemical principles learned from Part I with concepts of cell dynamics, structure, function, subcellular organization, and metabolism. Topics include intermediary metabolism, bioenergetics, DNA replication, protein synthesis, and cellular regulatory and control mechanisms. Course content, where possible, is related to current concepts concerning the etiology of oral diseases, their treatment, and prevention to assist student dentists in attaining institutional goals and objectives for clinical competency. Prereq: Admission into the College of Dentistry and/or consent of course director. (Same as OBI 812.)

BCH 815 FIRST-YEAR ELECTIVE, BIOCHEMISTRY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

BCH 819 CELLULAR STRUCTURE AND FUNCTION/BIOCHEMISTRY. (7)
The course combines lecture, small group activities, clinical correlations, problem-based learning, and problem-solving sessions in providing an understanding of the relationship of biochemical principles to human health and disease. Close integration with genetics topics provides a better picture of how biochemistry, molecular biology and genetics contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

BCH 825 SECOND-YEAR ELECTIVE, BIOCHEMISTRY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student with an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second year medical curriculum and approval of adviser.

BCH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved elective: BCH 850 ELECTIVE: RESEARCH IN BIOCHEMISTRY
Course Descriptions

**BIO 101: Principles of Microbiology.**
(3)
This course introduces fundamental microbiological principles and techniques. Emphasis is on the methodologies used to study and manipulate microorganisms, and the importance of these organisms in a safe environment. Students will become familiar with isolating, culturing, and identifying microorganisms, and with molecular techniques used to study and manipulate microorganisms. Prerequisite: One unit of chemistry or consent of instructor; BIO 208 or BIO 308 should be taken concurrently.

**BIO 300: General Entomology.**
(3)
Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prerequisite: One course in introductory biology. (Same as ENT 300.)

**BIO 302: Introduction to Neuroscience.**
(3)
This introductory course is designed to provide students with a basic understanding of the physiological, cellular and molecular levels, of how the nervous system functions to create behavior. It will also introduce students to the consequences of abnormal system functioning brought about by either disease or injury. Prerequisite: BIO 152 or equivalent permission of instructor.

**BIO 303: Introduction to Evolution.**
(4)
This course covers evolution, concentrating on the Darwinian theories of evolution including descent with modification, natural selection, and sexual selection. Topics will include patterns of evolution, the genetic source of variation, measuring evolution, adaptation, speciation, human evolution, “evo-devo”, and evolutionary medicine. Taught on campus (lecture: three hours; recitation: three hours) or online. Prerequisites: BIO 148, BIO 152 and BIO 155 or equivalent.

**BIO 304: Principles of Genetics.**
(4)
A study of the physical and chemical aspects of the genetic material and their relationship to the expression and inheritance of the phenotype. Lecture, three hours; laboratory, three hours per week. Prerequisites: BIO 148, BIO 152, BIO 155, CHE 107, CHE 113.

**BIO 305: Introduction to Neurosciences Techniques.**
(4)
This introductory laboratory course will provide students with theoretical and practical knowledge, as well as hands-on experience in basic behavioral, anatomical, and physiological techniques used by laboratory scientists in the investigation of the nervous system. Upon completion, students will be prepared for independent research experiences in working neuroscience laboratories. Prerequisite: BIO 302 Introduction to Neuroscience or equivalent.

**BIO 308: General Microbiology.**
(3)
Fundamental concepts of microbiology. The nutrition, physiology, genetics, molecular biology of microorganisms, and their roles in nature and in infection and immunity will be studied. Prerequisites: BIO 304 or ABT 360 or ENT 360 and CHE 230 or CHE 236.

**BIO 309: Microbiology Laboratory.**
(2)
This course includes laboratory exercises that are designed to illustrate processes central to microbiology and to familiarize students with basic skills required for working with microorganisms in a safe environment. Students will become familiar with isolating, culturing, and identifying microorganisms, and with molecular techniques used to study and manipulate microbes. Prerequisites: BIO 304 or ABT 360 or ENT 360 and CHE 230 or CHE 236 or consent of instructor.

**BIO 310: The Life Processes of Plants.**
(3)
This course is intended to provide a basic understanding of the natural products and processes that shape the nature of modern plants and govern their interactions with the environment. Students will develop a basic understanding of how these plant attributes relate to organismic function. Emphasis will be placed on exploring the nature of the major plant biomes of the Earth, their community dynamics, and how member plants compete for space and other resources. Development of optimal plant strategies for reproductive success, plant interaction with other living systems as well as abiotic factors and their defense from predation and attack will also be considered. Prerequisite: BIO 152.

**BIO 315: Introduction to Cell Biology.**
(4)
The structure and function of cells will be considered. Emphasis will be placed on the ultrastructure of cell organelles in plants and animals as a framework for understanding the compartmentalized nature of cell activity. Lecture, three hours; laboratory, three hours weekly. Prerequisites: BIO 303 and BIO 304. Corequisites: CHE 230 or equivalent. Or consent of instructor.

**BIO 325: Ecology.**
(4)
This course introduces the scientific study of the interactions between organisms and their environment. The course is structured around five levels of organization—from the ecological sociology to individuals, populations, communities, ecosystems, landscapes, regions, and the biosphere. Students will be expected to develop a solid knowledge base and understanding of key concepts and issues in contemporary ecology; to become familiar with how ecological understanding is attained by researchers; and to see how ecological knowledge and methods can be used to address important societal problems. Lecture, three hours; laboratory, an average of three hours per week. Prerequisites: BIO 148 and BIO 152, or equivalent introductory biology sequence; and BIO 304 or equivalent genetics course; or consent of instructor.

**BIO 337: Mathematical Modeling in the Life Sciences.**
(3)
This course introduces mathematical modeling in biology and other life science disciplines using discrete and continuous tools and techniques, including difference equations and differential equations. Students will learn to construct, analyze, and simulate models and interpret the results within the biological context. Prerequisites: A grade of B or better in MA 114 (Calculus II) or MA 138 (Calculus II with Life Science Applications) or consent of department. (Same as MA 337.)
BIO 350 ANIMAL PHYSIOLOGY. (4)
An introduction to the basic principles of animal physiology. An elementary discussion of the major vertebrate organ systems including nutrition, metabolism, respiration, circulation, excretion, muscle contraction, peripheral and central nervous system, and endocrine function emphasizing homeostasis. Lecture, three hours; laboratory, three hours. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, CHE 105 (or CHE 109 and CHE 110) and CHE 107 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

BIO 351 PLANT KINGDOM. (3)
An evolutionary survey of the morphology, taxonomy, life histories and biological relationships of all plant groups comprising the plant kingdom. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in biology.

BIO 355 BIOLOGY STUDY ABROAD (Subtitle required). (3)
This course offers students an opportunity to study unique biological communities and to experience living in a foreign culture. Specific content and location varies. May be repeated a maximum of two times under different subtitles. Prereq. Will be set by instructor.

BIO 361 ECOLOGY OF THE KENTUCKY FLORA AND VEGETATION. (3)
An overview of the physiography, geology, soils, hydrology, climate (paleo and recent), vegetation (paleo and recent), floras (including floristic relationships), archeobotany, and agriculture of Kentucky. Lecture, two hours; laboratory, two hours per week. Prereq: One year of introductory Biology or consent of instructor.

*BIO 375 BEHAVIORAL ECOLOGY AND SOCIOBIOLOGY. (3)
This course will explore the selective forces influencing animal behavior, such as foraging, predator avoidance, mate choice, parental care, and social interaction. Specific phenomena to be explored include the evolution of optimal foraging and search images, extravagant male characteristics, female preferences, conflicts between the sexes, infanticide, parent-offspring conflict, dominance hierarchies, optimal group size, altruism, and eusociality. The study of these behaviors integrates ideas and approaches from ecology, genetics, physiology, and psychology. Students will be encouraged to read outside material, to think carefully, logically, and critically about ideas, and to ask questions and defend their views in class. Prereq: A year of introductory biology (BIO 148/152).

BIO 380 SPECIAL TOPICS IN BIOLOGY (INTERMEDIATE LEVEL) (Subtitle required). (1-4)
Interdisciplinary topical or experimental course in intermediate (300-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq. Determined by instructor.

BIO 394 RESEARCH IN NEUROSCIENCE. (1-3)
An independent research project in an area of neuroscience under the direction of a faculty mentor. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies (Neuroscience). May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of the minor or major in Neuroscience. Prereq: BIO 152 and BIO 302 or PSY 312.

BIO 395 RESEARCH IN BIOLOGY. (1-3)
A research project in an area of biology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other biological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Biology. May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of any minor or major in Biology. Completion of at least one of the Biology core courses (Cell Biology, Evolution, Genetics, Physiology, Ecology) is strongly recommended. Prereq: BIO 152 and BIO 155 or BIO 198, CHE 105 (or CHE 109 and CHE 110) and CHE 107 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

BIO 397 RESEARCH IN MICROBIOLOGY. (1-3)
An independent research project in an area of microbiology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other microbiological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Microbiology. Prereq: BIO 308 and BIO 309.

*BIO 398 RESEARCH AND WRITING IN BIOLOGY. (1-3)
An independent laboratory research project in an area of biology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other biological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Biology. As part of the course, students will complete one formal written assignment: that total at least 4500 words, with a significant portion of this assignment or assignments revised at least once. Completion of at least one of the Biology core courses (Cell Biology, Evolution, Genetics, Physiology, Ecology) is strongly recommended. May be repeated to a maximum of 12 credits, but a maximum of only 6 credits of independent research (BIO 394, 395, 397, or 398) may be used to satisfy the requirements of any minor or major in Biology. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent.

BIO 401G SPECIAL TOPICS IN BIOLOGY FOR ELEMENTARY, MIDDLE AND HIGH SCHOOL TEACHERS (Subtitle required). (1-4)
Selected topics in biology of interest to teachers such as biological research experiences related to pharmacological assays, collecting behavioral data, compilation and statistically analysis of data. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory, will be given. Lecture/discussion, two-four hours; laboratory, zero-four hours. May be repeated to a maximum of 12 credits. Prereq. By consent of instructor only.

#BIO 402 PRACTICAL MICROSCOPY. (3)
The objective of this course is to provide an operational understanding of the use of contemporary microscopes and the principles underlying biological imaging methods through a combination of lectures and hands-on laboratory experiences. Students will learn to use stereo and compound microscopes to image specimens using bright field, fluorescence, and enhanced contrast techniques. Students will also learn about the application of advanced microscopy methods to biological samples. Prereq: BIO 148, BIO 152, and BIO 155 or equivalents are required. In addition, one of the following courses or permission of instructor is required: BIO 305, BIO 309, BIO 315, BIO 350.

*BIO 404 ADVANCED GENETICS. (3)
This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. This course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is investigated to understand the development and application of these methods. This course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: Grade of C or better in BIO 304 or permission of instructor.

BIO 410 VERTEBRATE ENDOCRINOLOGY. (3)
This course is designed to provide students with a broad understanding of vertebrate endocrinology. Course topics will include the various classes of hormones, sources and synthesis of hormones, receptors and target tissues, mechanisms of action and regulation, and methods used in endocrinology and behavioral endocrinology. Details of classical endocrine systems will be explored. The last third of the course will focus on neuroendocrinology and how hormones influence the development and activation of behavior in humans and animal models. Prereq: BIO 302 or BIO 315 or BIO 350.

*BIO 418 ECOLOGICAL GENETICS. (3)
Ecological genetics resides at the interface of ecology, evolution, and genetics. At the heart of ecological genetics lie two components of adaptive evolution: genetic variation in phenotypic traits and natural selection on phenotypes. In this course, students will explore basic concepts in population and quantitative genetics and apply these to the analysis of genetic and phenotypic data. This course provides a conceptual link between courses focused on genetics and molecular biology and courses focused on whole organisms and their ecology. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: BIO 303 and BIO 304 or equivalent, or consent of the instructor.

BIO 420G TAXONOMY OF VASCULAR PLANTS. (4)
A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local spring flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq. Junior standing; BIO 148 and BIO 152 or one course in introductory botany or consent of instructor. (Same as NRE 420G.)

*BIO 425 BIOLOGY SEMINAR. (Subtitle required). (1)
This seminar develops effective analysis, presentation, and discussion skills required of Biology majors by exploring various life science topics of interest to faculty and students. Students fulfill their requirements for Biology majors and can be repeated for a maximum of 2 credits under a different subtitle. Prereq: Senior standing in Biology recommended. BIO 148 and BIO 152, or equivalent. Additional prerequisite(s) may be identified by instructor when topic is selected. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.
**Course Descriptions**

**BIO 426 NEUROSCIENCE SEMINAR (Subtitle required).**
(1)
This seminar course develops effective analysis, presentation and discussion skills required of science majors by exploring one neuroscience topic in detail. Prereq: Determined by instructor.

**BIO 427 SEMINAR IN MICROBIOLOGY (Subtitle required).**
(1)
This seminar course develops effective analysis, presentation, writing and discussion skills required of life science majors by exploring various microbiological topics. Prereq: Senior standing recommended. BIO 308 and BIO 309 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected.

**BIO 429 DEVELOPMENTAL BIOLOGY.**
(3)
An introduction to the principles of developmental biology, particularly of animals, including genetic and environmental control of development at the molecular, cellular, and physiological levels. Prereq: BIO 304 or equivalent, or consent of instructor.

**BIO 430G PLANT PHYSIOLOGY.**
(3)
Basic principles of plant physiology: the physiological processes of green plants and the effect of the environment on these processes. Lecture (three hours) and laboratory (three hours). Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 (or equivalent); CHE 230 and CHE 231 (or equivalent) or consent of instructor.

**BIO 440 COMPARATIVE AND FUNCTIONAL ANATOMY.**
(4)
Comparative and Functional Neuroanatomy explores the cellular bases for sensory, integrative and motor neuroscience from an evolutionary perspective, delineating common features of all nervous systems ranging from ctenidial nerve nets to vertebrate cerebral nervous systems. Discovery of the common features of nervous system models in model organisms with the brain will provide students a perspective on the value of model systems for future study. Functional analyses of nervous system structures will enable students to identify anatomical bases for neural function and behavior. Prereq: BIO 302 or consent of instructor.

**BIO 445 THE BIOLOGY OF SEX.**
(3)
What is sex? Who has sex? What is sex for? This course is about the biological aspects of sex and gender, two of the most powerful forces in nature. We will explore the early evolution of sexual exchange of DNA and the emergence of genders. We will also discover the mechanisms by which gender is assigned across a vast array of different organisms and the amazing variability of sexual activity, ranging from duplicitous orcas to the rapturous passions of central nervous systems. Ultimately, we will explore the biological aspect of human sexuality in the context of its evolutionary origins and compare them to our closest relatives, the great apes. Readings in journal articles and a book will be complemented by short videos and discussions. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: BIO 148 and BIO 152 or equivalent, or consent of instructor.

**BIO 446 NEUROPHYSIOLOGY LABORATORY.**
(3)
This course will focus on experimentation in neurophysiology. The generation of receptor potentials in sensory neurons will be measured in addition to action potentials in axons. Pharmacological experimentation of ionotropic and metabotropic receptors subtypes and second messenger signaling will be conducted. The key role of ion channels and transporters in regulation of the membrane potential will be examined. The concept of electrochemical equilibrium will be introduced and the quantitative examination of the equilibrium membrane potential will be made. Use of Goldman and Nernst equations and their applications. The mechanisms of action potential generation, as a result of synaptic and receptor stimulation within a neural cell, will be measured. Lecture and laboratory. Prereq: BIO 302 or BIO 350 or consent of instructor.

**BIO 447 ANIMAL SENSES.**
(3)
Advanced study on how animals use sensory abilities to communicate, navigate, and detect prey, predators and mates. Focus will be on extreme and unusual sensory systems such as echolocation, electroreception, and magnetoreception, as well as vision, smell, touch, and hearing. Prereq: BIO 350 or PGY 412 or permission of instructor.

**BIO 452G LABORATORY IN ECOLOGY.**
(2)
An introduction to laboratory and field experimentation and computer simulation in ecology. Exercises and demonstrations will be performed to familiarize students with 1) particular populations and ecosystems, 2) some important research problems in ecology, and 3) current research techniques for dealing with them. One or two Saturday field trips will be required. Laboratory, four hours. Prereq or coreq: BIO 325 or equivalent and consent of instructor.

**BIO 461G INTRODUCTION TO POPULATION GENETICS.**
(3)
This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts, and mitochondria. Emphasis will be on biological relevance (in plants, animals, and microorganisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/ENT/FOR 461G.)

**BIO 464G IMMUNOLOGY.**
(3)
A survey of theories and mechanisms of immunity including: nature of antigens and antibodies, antigen-antibody reactions, immunocompetent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as MI 494G.)

**BIO 495G BACTERIAL PATHOGENESIS.**
(3)
This course will examine the pathogenic mechanisms used by bacteria to cause human disease. Bacterial virulence factors and host susceptibility factors will be discussed, with an emphasis on understanding the techniques that can be used to identify these traits in newly emerging pathogens. Prereq: BIO 308, BIO 315, BCH 401 recommended. Or permission of instructor. (Same as MI 495G.)

**BIO 499 BIOLOGY RESEARCH SEMINAR.**
(1)
A seminar for students engaged in independent research. Students with BIO 395 experience will interact with student colleagues and an experienced research mentor. Prereq: Past or current enrollment in BIO 395.

**BIO 502 SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY.**
(5)
PGY BIO 502 is a team-taught, lecture-based course that provides an integrated in-depth understanding of the physiology and pathophysiology of the human cardiovascular, digestive, endocrine, neural, renal and respiratory organ systems. Lectures are supplemented with assigned readings, hands-on demonstrations, and problem-oriented study sessions. Prereq: An introductory physiology course (for example PGY 206), and an understanding of fundamental undergraduate-level chemical and physical concepts is recommended but not required. (Same as PGY 502.)

**BIO 507 BIOLOGY OF SLEEP AND CIRCADIAN RHYTHMS.**
(3)
This course provides an introduction to the fields of sleep and circadian rhythms including the underlying neuroanatomy, neurophysiology, and the molecular and genetic underpinnings of sleep and circadian behaviors. The medical and societal relevance of these areas will also be emphasized. Considerable time will be spent reading and analyzing the primary literature in these fields, including student presentations of selected articles. Prereq: BIO 304 or BIO 302 or consent of instructor.

**BIO 508 EVOLUTION.**
(3)
Mechanisms of evolutionary change, with a brief summary of historical evolution, especially of the Metazoa. Prereq: BIO 304 or ASC/ABT 360.

**BIO 509 BRAINS AND BUDS: NEUROSCIENCE OF POLLINATION.**
(3)
Pollinators have tremendous agricultural and societal value, and to a neuroscientist, they showcase principles of cognition in the real world. Pollinator species present exquisite examples of co-evolution, physiological and dietary specialization, navigation in complex landscapes, collective decision-making processes, and the behavioral consequences of environmental toxins and disease. In this course, we will use pollinator species (honey bees and other insects, as well as vertebrate pollinators) to explore how critical features of pollination intersect at the level of brain function, covering important neuroscience topics including sensory ecology and evolution, neural energetics, mechanisms of addiction and reward, molecular neuroscience, cognition, and learning and memory. Prereq: Students must have at least junior standing in a life sciences discipline, or permission from instructor. (Same as ENT 509.)

**BIO 510 RECOMBINANT DNA TECHNIQUES LABORATORY.**
(4)
An introduction to the construction, isolation, and analysis of recombinant DNA clones, with emphasis on practical experience in basic techniques. Graduate students will be given first preference in course enrollment. Lecture, one hour; laboratory, 6 hours per week. Prereq: BIO 304 and BIO 315 or equivalent with consent of instructor.

**BIO 515 GENERAL CELL BIOLOGY.**
(3)
An integrative, analytical study of the cell as the basic unit of biological structure and function, with emphasis on eukaryotes. Lecture, discussions with readings in some original literature. Prereq: BCH 401G or BCH 401 (or equivalent) and consent of instructor. (Same as MI 515.)

**BIO 520 BIOINFORMATICS.**
(3)
An introduction to computer analysis of macromolecular structure information. This course describes how to access, process, and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as INF 520.)

**BIO 525 ADVANCED ECOLOGY.**
(3)
BIO 525 is intended to bring students with a baseline knowledge of ecology to a deeper understanding of and experience with the way that ecological studies are conceived, conducted, analyzed and interpreted. BIO 525 is a series of modules that introduce students to the field site and most basic methods and then to a set of research systems for which the group is challenged to come up with the study design, analysis, and interpretation. These modules will address important issues in contemporary ecology and will build on what students learned in previous undergraduate ecology courses. Prereq: BIO 525 (Ecology) or equivalent.

**BIO 527 STEM CELLS, TISSUE ENGINEERING, AND REGENERATIVE MEDICINE.**
(3)
The course will provide students with knowledge from a broad range of topics related to stem cell tissue engineering and regenerative medicine, including: an historical perspective of these fields, contemporary use of stem cells in medicine, introduction to different concepts in regenerative medicine, research in tissue engineering and biomaterials, and societal issues surrounding stem cells and regenerative medicine. Prereq: BIO 315 and BIO 304.

**BIO 530 BIogeography and Conservation.**
(3)
An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as GEO 530.)
BIO 535 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR. (3)
The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as PGY 535.)

BIO 542 HISTOLOGY. (5)
An in-depth study of vertebrate cell and tissue structure and function. Human tissue is emphasized. Some knowledge of biochemistry, physiology, and anatomy is desirable. The laboratory involves study of prepared microscope slides. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 315 or consent of instructor.

BIO 550 ADVANCED PHYSIOLOGY. (3)
Physiological mechanisms by which animals cope with different environmental stresses. Osmoregulation, respiration, temperature regulation and tolerance, sensory reception, circulation, etc. Prereq: One year college chemistry, BIO 350 or equivalent, one year college physics or consent of instructor.

BIO 551 LIFE CYCLE ECOLOGY OF FLOWERING PLANTS. (4)
The effect of physical and biotic factors on plants and environment. Physiological, morphological and anatomical adaptations of plants to the physical factors of the environment are emphasized. Some of the laboratory exercises are carried out in the field. Lecture, three hours; laboratory, two hours. Prereq: BIO 325 or consent of instructor.

BIO 553 FISH BIOLOGY. (4)
This course explores the biology of fishes from an evolutionary perspective. Lectures cover physiology, functional morphology, ecology, population biology, behavior, evolutionary relationships, and fisheries biology. Laboratory exercises include development of a fish collection; experiments in fish physiology, behavior and ecology; computer modeling of problems in fisheries biology; and field trips. Lecture, three hours; laboratory, two hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 or consent of instructor.

BIO 555 VERTEBRATE ZOOLOGY. (5)
An intensive survey of the vertebrate classes with emphasis on trends and processes in evolution, classification, phylogeny, ecology, and adaptations in morphology and behavior. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 556 COMMUNICATION BIOLOGY. (3)
Animals sense and respond to numerous signals from their environment by using sensory modalities attuned to visual, auditory, chemical, and electromagnetic cues. This course is an in-depth examination of the physiological bases of sensory input and the interactive, motor system-mediated, behavioral responses exhibited by different species in response to such inputs. Prereq: BIO 325 or BIO 550.

BIO 559 ORNITHOLOGY. (4)
A study of the life histories, habits, identification, structure, adaptations, and physiology of birds. Special emphasis upon migrations, songs, nests and economic importance of our native birds. Lecture, field excursions, laboratory studies. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY. (4)
Emphasis will be placed on the physiological and toxicological effects of chemicals on natural biota, including considerations at cellular, organismal, population, and community levels. This will include an examination of the problem of pollutants by animal species, with emphasis upon biochemical and physiological mechanisms involved in stress-induced responses and stress reduction. Additional areas of concern will include the transport, fate, and effects of chemical stressors on structure and function of biotic communities and will include introductions to ecotoxicology and environmental regulatory strategies. Lecture, three hours; recitation, two hours per week. Prereq: BIO 350 or BIO 502 or equivalent or consent of instructor.

BIO 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or permission of instructor. (Same as CPH/ENT 561.)

BIO 563 PARASITOLOGY. (4)
Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as ENT 563.)

BIO 564 INSECT TAXONOMY. (4)
A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as ENT 564.)

BIO 567 APPLICATIONS OF GENETICS. (4)
Course covers genetic concepts with an emphasis on interpretation and analysis of molecular and population genetic data using examples from the entomological literature. Prereq: ABT 360 or BIO 304 or equivalent and an introductory statistics course.

*BIO 568 INSECT BEHAVIOR. (3)
The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology or permission of instructor. (Same as ENT 568.)

BIO 575 PLANT ANATOMY AND MORPHOLOGY. (4)
A survey of the diverse structural features of plants and their functional and phylogenetic significance. Emphasis will be given to adaptations of modern vascular plants as a response to natural and artificial selection. Lecture, three hours; laboratory, two hours per week. Prereq: Introductory biology sequence (six hours) or consent of instructor.

BIO 580 SPECIAL TOPICS IN BIOLOGY (ADVANCED LEVEL); (Subtitle required). (1-4)
Interdisciplinary, topical or experimental course in advanced (500-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Course format: variable—Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 582 Virology. (3)
Virus, chemical and biological properties of viruses. Modes of replication and control of gene product formation displayed by representative plant, animal, and bacterial viruses. Prereq: BIO 404 and biochemistry or equivalent strongly recommended, or consent of instructor. (Same as MI 582.)

BIO 585 IMMUNOLOGY. (2)
Laboratory in immunology and serology. Preparation, standardization, and uses of biological products; serology. Laboratory, four hours. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as MI 585.)

BIO 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/M/PLS/P/PA 601.)

#BIO 602 PRINCIPLES AND APPLICATIONS OF PRACTICAL MICROSCOPY. (3)
The objective of this course is to provide an advanced understanding of the use of contemporary microscopes and the principles underlying biological imaging methods through a combination of lectures and hands-on laboratory experiences. Students will learn to use stereo and compound microscopes to image specimens using bright field, fluorescence, and enhanced contrast techniques. Students will also design their own project and utilize microscope methods to address research questions. Prereq: BIO 148, BIO 152, and BIO 155 or equivalents are required. In addition, one of the following courses or permission of instructor is required: BIO 305, BIO 309, BIO 315, BIO 350.

BIO 604 GENETIC ANALYSIS. (3)
This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. The course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is investigated to understand the development and application of these methods. The course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. Prereq: BIO 304 (Introductory Genetics) or equivalent or consent of the instructor is required. BIO 315 (Cell Biology) or equivalent is recommended, but not required.

BIO 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as ENT/FOR 606.)

BIO 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 308 or consent of instructor. (Same as ENT/FOR 607.)

BIO 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as ENT/FOR 608.)
Course Descriptions

BIO 609 POPULATION AND COMMUNITY ECOLOGY. (3) This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as ENT/FOR 609.)

BIO 612 BIOLOGY OF AGING. (3) A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/GRN/PGY 612.)

BIO 615 MOLECULAR BIOLOGY. (3) This course will develop the student’s ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g. IBS 602) or consent of instructor. (Same as BCH/MI 615.)

BIO 618 ECOLOGICAL GENETICS. (3) Ecological genetics resides at the interface of ecology, evolution, and genetics. At the heart of ecological genetics lie two components of adaptive evolution: genetic variation in phenotypic traits and natural selection on phenotypes. In this course, students will explore advanced concepts in population and quantitative genetics and apply these to the analysis of genetic and phenotypic variation in a variety of organisms. This course provides an in-depth introduction to ecological genetics and molecular biology and courses focused on whole organisms and their ecology. Prereq: Graduate standing in a life sciences program, or consent of instructor.

BIO 620 PLANT MOLECULAR BIOLOGY. (3) This course is intended to be a treatment of current concepts of plant molecular biology. It will be a literature-based course, supplemented by handouts and reading lists. The course will deal as much as is possible with topics that are unique to plants. Current aspects of plant molecular biology that are relevant to the course content will be covered in the first half of the course; however, these lectures will not be a review of topics that should have been retained from introductory genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as PLS 620.)

BIO 621 TOPICS IN MODERN BIOLOGY (Subtitle required). (1-3) A course for students in the biological and related sciences to be taught on various topics by specialists in their fields. Designed to give the student the most up-to-date information on the various topics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

BIO 622 PHYSIOLOGY OF PLANTS I. (3) A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 622.)

BIO 623 PHYSIOLOGY OF PLANTS II. (3) A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, photoreceptors, photoperiodism, nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 623.)

BIO 625 INSECT-PLANT RELATIONSHIPS. (3) A molecular level treatment of cell structure and function derived from current experimental approaches. Emphasis will be on insects and the molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture, growth, division, and differentiation. Prereq: (to reflect appropriate IBS course). (Same as MI 720 and IBS 720.)

BIO 626 INSECT MOLECULAR BIOLOGY. (4) Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq: ENG/BIO 635 or consent of instructor. (Same as ENT 636.)

BIO 630 DEVELOPMENTAL NEUROBIOLOGY. (3) An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cellular and molecular aspects to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as ANA/PGY/PSY 630.)

BIO 650 ANIMAL PHYSIOLOGY LABORATORY. (3) Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as PGS 650.)

BIO 655 INSECT ECOLOGY. (3) The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as ENT 655.)

BIO 667 INVASIVE SPECIES BIOLOGY. (3) This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as ENT/FOR 667.)

BIO 684 PHYLOGENETIC SYSTEMATICS. (3) Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as ENT 684.)

BIO 770 SEMINAR IN BIOLOGY. (1) May be repeated indefinitely.

BIO 771 SEMINAR IN BIOLOGY. (1) May be repeated to a maximum of 8 credits. Prereq: Graduate standing in biological science or consent of instructor. (Same as MI 771.)

BIO 772 SEMINAR IN MICROBIOLOGY. (0-1) Review of current literature in microbiology; presentation of papers on work in progress in the department or on assigned topics; reports on meetings of national and international scientific and professional societies and symposia. Required of all graduate students. Two hours per week. May be repeated nine times for a maximum of 10 credits. (Same as MI 772.)
BME 201 INTRODUCTION TO BIOMEDICAL ENGINEERING. (3)

BME 272 INTRO TO UX FOR PRODUCT DESIGN. (2)
This course serves as an introduction to basic concepts of user experience (UX) design. Students will learn how to create engaging interactions between users and products/services through a holistic user-centered approach to design. Students will examine the history and evolution of user experience design and define key terms associated with the field. Students will explore a range of design research methods and discuss how these practices, along with theories regarding human behavior and perception, inform the user experience design process. Projects from PRD 221, other studio courses within the College of Design, or BME courses will serve as case studies for analysis and application of course content. Students may participate in field trips to sites, businesses, manufacturers, etc. to further their knowledge of the design profession and coursework, sometimes with corresponding entry fees. (Same as PRD 272.)

BME 301 FUNDAMENTALS OF BIOMEDICAL ENGINEERING. (3)
Overview of the application of engineering principles to problems in living systems and healthcare delivery. Fundamental anatomy and physiology for engineers. Quantitative measurement and analysis of the structure, function, and control of biological systems. Prereq: Engineering standing or consent of instructor.

BME 305 FUNDAMENTALS OF BIOFLUID MECHANICS. (3)
Study of continuous and discrete signal concepts, sampling of analog signals, domain transformation (Fourier, LaPlace, Z-Transforms), and introduction to correlation and power spectrum. Characteristics and design of analog and digital filters. Features of biological signals and systems and biomedical applications. Introduction to non-linear systems. Prereq: EE 305 or equivalent and MA 214; or consent of instructor.

BME 425 HUMAN BIOMECHANICS. (3)
This course presents an engineering-based approach to the quantitative study of the human musculoskeletal system. Principles involving static and dynamic mechanical analyses will be applied to quantify the forces and moments in human posture and movement. Study of the material and biological properties of the musculoskeletal system is included because they are intimately coupled to the formulation and interpretation of problems in static and dynamic biomechanics. Prereq: EM 221, EM 313; or consent of instructor.

BME 481G TOPICS IN BIOMEDICAL ENGINEERING. (3)
Detailed investigation of a topic of current significance in biomedical engineering such as: biomaterials, hard or soft tissue biomaterials, rehabilitation engineering, cardiovascular systems analysis, biomedical imaging. Prereq: Consent of instructor.

BME 485 FUNDAMENTALS OF BIOFLUID MECHANICS. (3)
This course is taught concurrently with BME 485 Biofluid Mechanics. This course provides the students with a review of basic fluid mechanics principles and a direct, practical application of these principles to biomedical and clinical problems associated with the human circulatory system. Prereq: Engineering standing or consent of instructor.

BME 488 INTRODUCTION TO BIOMATERIALS. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Engineering standing and MSE 201; or consent of instructor.

BME 501 FOUNDATIONS OF BIOMEDICAL ENGINEERING. (3)
This course demonstrates the application of diverse engineering principles to analysis and understanding of the structure, function, and control of biological systems. Quantitative measurements and analysis of homeostatic, regulatory, transport, biochemical, and biomechanical processes of the human body. Prereq: Engineering standing or consent of instructor.

BME 508 CELL MECHANICS AND MECHANOBIOLOGY. (3)
This course will serve as an introduction to cell and tissue level mechanobiology with focus on the role of mechanical and disease processes. The primary focus is to introduce principles of cell-level mechanics in the context of the biology of living organisms, what we term mechanobiology. In effect, we treat biological processes and regulation as another variable(s) that must be accounted for when modeling the mechanical/physical behavior of human tissues. A large amount of the basic principles in this field of study arose as a result of the intense research in the cardiovascular field. We will draw many examples of basic biomechanical principles as it relates to the circulatory system. Despite our cardiovascular focus, the basic principles can be applied to the whole range of mechanobiological research conducted in other applications (orthopedic, urological, pulmonary, etc.). Prereq: EM 302 and/or CME/ME 330 (or equivalent fluid mechanics course); or consent of instructor.

BME 515 MODELING OF PHYSIOLOGICAL SYSTEMS. (3)
This introductory course in mathematical modeling will teach students how to construct simple and elegant models of biological and physiological processes - for instance the absorption and elimination of drugs in the human body or the kinetics of tumor growth in tissue - and to analyze or predict the dynamics of these events by solving the models. Prereq: MA 113, 114, 213, 214; or consent of instructor; familiarity with computer programming.

BME 530 BIOMEDICAL INSTRUMENTATION. (3)
A comprehensive introduction to major aspects of biomedical instrumentation. Topics include basic concept of medical instrumentation, biopotentials, physiological pressure/flow/respiratory measurement, optical sensing, and clinical applications of all the above. The fundamental mathematics underlying each instrument will be reviewed and an engineering picture of the hardware and software needed to implement each system will be examined. Prereq: Consent of instructor.

BME 540 MECHANICAL MODELING OF HUMAN MOTION. (3)
An introduction to mechanical modeling of human motion (lectures) along with application of computational software to model and estimates internal tissues responses to physical demands of several different activities/tasks (lab activities). Prereq: EM 221, EM 313; or consent of instructor.

BME 541 OCCUPATIONAL BIOMECHANICS. (3)
A course will provide an understanding of physical interaction between workers and their tools, machines, and materials so as to enhance the worker performance while minimizing the risk of musculoskeletal disorders. Discussion of ergonomic methods for measurement, assessment, and evaluation, with major topics including manual materials handling, cumulative trauma disorders, environmental stresses, safety, and legal issues. Prereq: Engineering standing or with instructor permission. (Same as MFS 541.)

BME 579 NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)
A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as EE 579.)

BME 580 INTRODUCTION TO BIOMEDICAL IMAGING. (3)
A comprehensive introduction to bio-medical imaging systems used today, including x-ray imaging and computed tomography (CT), magnetic resonance imaging (MRI), ultrasound imaging (Ul), and diffuse optical tomography (DOT). The course will review the fundamental mathematics underlying each imaging modality, the hardware needed to implement each system, and the image reconstruction and analysis. The class may involve homework, projects, and exams. Prereq: EE 305, or consent of instructor.

BME 599 TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (3)
An interdisciplinary course devoted to detailed study of a topic of current significance in biomedical engineering, such as cellular mechanotransduction, systems biology, and tissue engineering. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BME 605 BIOMEDICAL SIGNAL PROCESSING I. (3)
Continuous and discrete signals, sampling, Fourier Transform, LaPlace Transform, Z-Transform, correlation and spectral analysis, digital filters. Prereq: Concurrent enrollment or completion of PEG 412G or PEG 502.

BME 610 BIOMEDICAL CONTROL SYSTEMS I. (3)
Homeostatic mechanisms, input-output analysis, steady state and transient response, feedback concepts, system identification and simulation from actual operating data. Prereq: PEG 502 and ME 440 or equivalent.

BME 615 BIOMEDICAL SIGNAL PROCESSING II. (3)
Stochastic processes, Fourier-based spectral analysis and linear system identification, modern spectral estimation (AR, MA, ARMA), parametric transfer function estimation, time-frequency analysis of nonstationary signals. Prereq: BME 605, BME 610, EE 640 recommended.
Course Descriptions

BME 640 BIOMEDICAL ENGINEERING ETHICS. (1)
This course presents an engineering-based approach to study the system of ethics applicable to biomedical engineering. This course will describe x21 and examine the responsibilities of biomedical engineers to stakeholders, e.g., patients, research subjects, and engineering clients as well as to the legal system (where applicable) and the profession as an entity. As a scholarly discipline, biomedical engineering ethics draws upon principles from subjects such as: the philosophy of science, the philosophy of engineering, and the ethics of technology. Materials from these principles will be used in this course with adaption to the special circumstances attending the practice of Biomedical Engineering.

BME 642 NAVIGATIONAL GUIDES FOR BIOMEDICAL PRODUCT DEVELOPMENT. (3)
This course teaches engineers how biomedical product designs are influenced by government regulations, economic issues, and ethical concerns.

BME 661 BIOMATERIALS SCIENCE AND ENGINEERING. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Undergraduate engineering degree or consent of instructor.

BME 662 TISSUE-IMPANT INTERFACE. (3)
Study of the interface between implants and host tissues from both the materials and biological perspective. Structure of the tissue-implant interface; surface characterization of biomaterials; protein adsorption; mechanisms of cell responses; the methods for controlling the tissue-implant interface, with emphasis on orthopedic and cardiovascular applications. Prereq: BME 661 or consent of instructor.

BME 670 BIOSOLID MECHANICS. (3)
Application of laws of mechanics to study the behavior of human organ systems. Stress-strain analysis of soft and hard body tissues with emphasis on pulmonary and musculoskeletal systems. Viscoelastic properties. Prereq: Undergraduate engineering degree or consent of instructor.

BME 672 MUSCULOSKELETAL BIOMECHANICS. (3)
Application of laws of mechanics to study behavior of human musculoskeletal system. Materials science of bone, muscle, tendon are integrated into static and dynamic analyses of isolated (e.g., foot, arm, and hand) and whole body segment. Prereq: PGY 502, ME 330 or consent of instructor.

BME 685 BIOFLUID MECHANICS. (3)
Review of the rheology of circulatory processes in the body. Special emphasis on cardiovascular dynamics; pulsatile pressure and flow, vascular impedance, wave propagation/reflection, cardiac dynamics. Special topics. Lecture, 3 hours with periodic lab demonstrations. Prereq: Undergraduate engineering degree or consent of instructor.

BME 690 RESEARCH IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Individual study related to a special research project. Intended for M.S. candidates who want a research project experience independent of their M.S. thesis work. This course cannot be used to satisfy residency credit requirements. Lecture, 1-3 hours; laboratory, 3-6 hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor and graduate standing in BME.

BME 699 SPECIAL TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Special topics in biomedical engineering, addressed primarily in a lecture/discussion format. Presentation of focused or specialized topics that are not available in standard courses. Lecture, three hours; laboratory 0-2 hours per week. May be repeated to a maximum of nine credits. Prereq: Consent of instructor and graduate standing in BME.

BME 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BME 766 MANAGEMENT OF TECHNOLOGY. (3)
Successfulness in developing new technologies relies upon knowing which technology advance, the ultimate scientific limits of that technology, and the forecasted rate of technological change. This course presents curricula that explore the direction of technological change and how this affects the rate and extent of innovation.

BME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BME 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BME 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

BME 772 SEMINAR. (0)
Review of current literature in the field of biomedical engineering, general discussion and presentation of papers on research in biomedical engineering. Lecture, one hour per week. Required for all graduate students in biomedical engineering.

BME 774 GRADUATE SEMINAR. (0-1)
Scientists and engineers present current research in biomedical engineering. Students are required to prepare for and deliver a seminar on their own research. May be repeated to a maximum of 4 credits. Prereq: Graduate standing in Biomedical Engineering or consent of instructor.

BME 777 ADVANCED STUDY PROJECT. (3)
This is an independent study project, topic to be selected in consultation with the instructor. Purpose is to integrate all materials learned in the program and apply these principles to the solution of an actual problem in biomedical engineering technology. Prereq: Permission of instructor and completion of year 1 PBME studies.

BME 781 SPECIAL PROBLEMS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Discussion of advanced and current topics in biomedical engineering. Individual work on research problems of current interest. May be repeated to a maximum of nine credits. Lecture/ laboratory hours, variable. Prereq: Approval of instructor.

BME 790 RESEARCH IN BIOMEDICAL ENGINEERING. (1-9)
Graduate research in any area of biomedical engineering, subject to approval of the Director of Graduate Studies. May be repeated to a maximum of nine hours. Prereq: Consent of the Director of Graduate Studies.

BMI Biomedical Informatics

BMI 633 INTRODUCTION TO BIOINFORMATICS. (3)
This is an introductory course aimed at a multi-disciplinary audience with an interest in applying the principles of information sciences for obtaining insight into biological processes and systems that can eventually be used to make informed decisions.

BMI 730 PRINCIPLES OF CLINICAL INFORMATICS. (3)
This course offers an overview of Clinical informatics, which is the application of informatics principles, methods, and tools to support healthcare practice and research activities as well as business processes.

BMI 731 BIOMEDICAL INFORMATION RETRIEVAL. (3)
This class is an introductory information retrieval class that is focused on biomedical information search engines. Basic IR concepts such index construction, optimization, visualization, and evaluation will be covered. In addition to core IR contexts, students will have an opportunity to learn about search engines, web crawling, and some Web 2.0 technologies based on hands-on exercises and assignments with a focus on techniques that can be used to access, retrieve, organize, and present information. Students will employ an open source indexing engine (e.g., Lemur or Lucene or something similar) to understand how back-end of retrieval engine is effectively and efficiently structured.

BMI 732 BIOMEDICAL ONTOLOGIES AND SEMANTIC WEB TECHNIQUES. (3)
This course is a conceptual introduction to biomedical ontologies and ontological modeling in biomedicine through Semantic Web techniques. Students will learn about RDF, OWL, description logics, and SPARQL and their role in designing ontologies. Biomedical terminologies such as GO, ICD-9-10, SNOMED-C-T, and MeSH will be discussed as case studies. Prereq: MA 123 (or equivalent) or consent of the instructor.

BMI 733 BIOMEDICAL NATURAL LANGUAGE PROCESSING. (3)
This course is a technical introduction to the area of biomedical natural language processing (NLP). In the field of biomedical informatics, this focuses on the common steps in extracting information from textual data that arises from biomedical literature and clinical documents. Topics include n-gram models, tokenization, POS tagging, and parsing. Prereq: MA 123 (or equivalent) or consent of instructor.

BMI 734 INTRODUCTION TO BIOMICROSCOPIC IMAGE ANALYSIS. (3)
This class aims to give students a broad overview of biomedical image analysis and imaging informatics. We will introduce the state-of-the-art knowledge to understand, develop, and apply existing methods and software to handle biomedical image data to extract quantitative matrices.

BMI 735 INTRODUCTION TO BIOIMAGE INFORMATICS. (3)
This class provides an introduction to searching and retrieval in biomedical image analysis and imaging informatics. We will introduce some advanced biomedical image analysis, searching, and retrieval algorithms for fast and efficient image searching and retrieval. Prereq: BMI 734: Introduction to Biomedical Image Analysis.
BSC 152 YOU, ME, MYSELF, AND I: PSYCHOSOCIAL INFLUENCES ON HEALTH. (3)

How do our individual thoughts, behaviors, and social interactions influence our health and well-being? In this introductory course, students explore problems that link psychosocial factors (such as cognition, beliefs, self-concept, social support, behavior change, stress, and decision-making) with health outcomes (such as depression, heart disease, addiction, obesity, and mortality). For those interested in pursuing careers in the health care professions, this course provides a basic understanding of the behavioral concepts that are included in professional school admissions tests as well as board certification tests. Prereq: None. Registration with consent of the course instructor.

*BSC 251 THE ENEMY WITHIN: CULTURE AND HEALTH BEHAVIOR. (3)

This seminar will acquaint students with the major social, cultural, and behavioral phenomena that affect our reactions to variations in our health. Students will move from a knowledge of basic human universal psychological processes to the social and cultural factors shaping our perceptions of health. This constitutive the basic conceptual framework and theories of social science fields of cultural anthropology and psychology. With this conceptual foundation, the rest of the semester will be spent investigating the impact of culture on health and health care. Conscientious students will appreciate the material presented, recognizing that how we define and understand these concepts are crucial to their own research interests and career plans. Active participation by all is expected. Homework assignments will require students to not only summaries the key elements of each seminar as related to clinical and translational research and the relevance of research training in ongoing discussions. The course will promote the application of biostatistics to research concepts in the students’ areas of interest and foster practical knowledge that supports students’ own research agendas. The diverse interests and experiences of students and faculty offer opportunities to learn from each other. Prereq: This course is designed for scholars pursuing research training in clinical and translational science to integrate and apply knowledge obtained in previous training. Permission is required from the Course Director for entry into the class.

BSC 620 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)

This course offers a structural exposure of students to the varieties of basic and clinical science research conducted in health care settings under the auspices of the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as CHP 1841.)

BSC 625 FUNDAMENTALS OF BIOSTATISTICS FOR CLINICAL AND TRANSLATIONAL SCIENCE. (3)

This course is designed to support clinical and translational science students in acquiring an understanding of the biostatistical tools and techniques commonly used in the conduct of clinical and translational science research. Through a combination of lectures, readings, demonstrations, discussions, and self-study exercises, students will understand and be able to describe the biostatistics and statistical methods that are relevant to clinical and translational science research. Prereq: Graduate student or consent of instructor. (Same as PSY 626.)

BSC 731 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE. (3)

This overview course is designed to introduce the student to the major methods and technologies of clinical and translational science (CTS) with an emphasis on human subjects research. Students learn these core methodologies through classroom discussions, readings, and written portfolio activities that challenge them to apply methodological concepts to their own research interests. Specifically, the course teaches students how to formulate research questions and write literature reviews; apply CTS research methods, including experimental, survey, and qualitative research methodologies, to diverse areas of research by aligning appropriate methodologies to research questions of interest, and enhance interdisciplinary communication skills. It is assumed that students are engaged in research that is consistent with CTS and will be encouraged to develop their CTS through their research. Prereq: Graduate standing. (Same as CHP 731.)

BSC 732 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (3)

This course will introduce students to the processes involved in the development and implementation of interdisciplinary research. Students will be introduced to key aspects of the leadership, communication and teamwork involved in interdisciplinary research. Students will also be introduced to the structure and functioning of the NIH and the NIH grant application and review process. Finally, students will apply their knowledge regarding the research methods and technologies of clinical and translational science to develop an NIH-format research grant application that addresses a research topic in their own area of interest. This course is intended for advanced graduate and professional students pursuing focused research training in one of the degree or certificate programs available in clinical and translational science. It is expected students will have completed the course in Methods and Technologies in Clinical and Translational Science (BSC 731) prior to this course. Prereq: BSC 731 and graduate standing in the clinical and translational science program.

BSC 733 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE. (1)

This seminar course is designed for students to clinical and translational research and activities at the University of Kentucky and to incorporate a multidisciplinary cooperative approach to clinical and translational research. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to ongoing discussions. The course will consist of seven evening seminars focusing on different topics of clinical and translational research. Students will be required to present a description of their research interests and activities during one seminar. Homework assignments will require students to summarize the key points in each seminar in a written format. Prereq: This course is designed for graduate students interested in these issues to their own research interests and career plans. Active participation by all members is expected. Prereq: Graduate standing.
Course Descriptions

BSC746 RESEARCH ETHICS AND DILEMMAS. (3)
This class will utilize case studies for debate, class participation, and papers to help students gain skills to recognize and resolve research dilemmas. Objectives of this class include: (1) understand basic elements of ethical dilemmas; (2) to understand basic ethical theories and frameworks for solving ethical dilemmas; (3) to examine ethical dilemmas within a behavioral or medical science research context; and, (4) to examine ways of eliminating bias and promoting objectivity in a behavioral or medical science research context.

BSC750 HISTORY OF MEDICINE AMONG AFRICAN AMERICANS: IMPLICATIONS FOR HEALTH DISPARITIES. (3)
This course on the history of medicine among African Americans seeks to provide an understanding of the health of African Americans from the 1500s to the present era to help students appreciate how disease research, public health, and healthcare has been discriminatory and to examine recent trends in positive social change and health. Prereq: Consent of instructor.

BSC755 RACE, RACISM AND HEALTH DISPARITIES AMONG BLACKS IN THE U.S. (3)
This course on racism and health disparities is designed to support graduate studies in the social sciences, allied health, and medical disciplines. This course will briefly review the biological and social history of race in America; critique emerging views on the genetics of race; discuss how the classification/mechanism of “race” operates to contribute to health disparities; explore theoretical frameworks of racism and related measures; differentiate between the terms “health inequities”, “health inequalities” and “health disparities”; and, examine the biopsychosocial impact of racism on health. Although it is recognized that the concept of race and racism is relevant to other “racially-classified social groups” the course will draw primarily upon the experience of Blacks in the U.S.

BSC760 AGING, HEALTH AND DECISION MAKING. (3)
This is a doctoral level seminar that provides an overview of behavioral decisional theories (e.g. rational choice, multiattribute utility models, naturalistic decision-making, ethnographic decision models, Kahneman and Tversky’s prospect theory) and examines research applications of these theories to the health of older adults. Research focuses on decision made by physicians, older adults, family caregivers and policy makers. A variety of applications include such decision domains as preventative screening, retirement and financial planning, other medical treatments, self-care, seeking medical care, institutionalization, end-of-life, etc.

BSC763 WOMEN’S TRAUMA AND MENTAL HEALTH. (3)
This course will examine the research on intimate partner violence, mental health, and substance abuse among women. Clinical and legal interventions will also be discussed. Although knowledge of at least basic statistics would be helpful, it is not required for this class.

BSC764 SEMINAR IN HEALTH INEQUITIES. (3)
This course is designed to critically examine undeniable inequities in the distribution of morbidity and mortality. Students explore linkages between disease burdens and the social, economic, and cultural contexts of our rapidly changing world by integrating local, national and international perspectives from social and biomedical sciences. Prereq: Graduate studies in the social sciences and permission of the instructor.

BSC765 RESEARCH PROBLEMS IN MEDICAL ANTHROPOLOGY. (3)
(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as ANT 765.)

BSC766 CONCEPTS IN MEDICAL SOCIOLOGY. (3)
A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as SOC 766.)

BSC770 PSYCHOSOCIAL ISSUES IN HEALTH AND AGING. (3)
This course will focus on psychosocial issues related to the physical health and functioning of older adults. Topic areas include: theories of aging; age-appropriate research designs; age-related cognitive personality, social and family changes which influence physical health; health behavior and education of older adults; and selected chronic conditions, e.g. Alzheimer’s disease, arthritis, depression, diabetes and stroke.

BSC772 TOPICAL SEMINAR IN MEDICAL BEHAVIORAL SCIENCE. (1-3)
Advanced study of selected topics of current importance in medical behavioral science. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BSC773 PSYCHOSOCIAL ONCOLOGY. (3)
This course will introduce the student to the field of psychosocial oncology. Historical and recent developments in the application of behavioral science knowledge and methodology to the understanding and treatment of cancer and the cancer patient will be examined. The role of psychosocial factors in the etiology, prevention, and treatment of cancer will be explored. Emphasis will be placed upon the interaction of biological, psychological, and social factors throughout the course of cancer. Prereq: Graduate standing.

BSC774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)
This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, political, and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as ANT 774.)

BSC776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency and its application to the study of various phenomena including alcohol, drug, and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/SOC 776.)

BSC778 BEHAVIORAL FACTORS IN SELECTED DISEASES. (3)
An exploration of behavioral science concepts which bear on various physical illnesses. The perspective of the course is interdisciplinary, using concepts from the various behavioral science disciplines. Prereq: Consent of instructor.

BSC783 AGING, HEALTH AND DECISION MAKING. (3)
This course is designed to review major topics, concepts and issues pertinent to the field of drug and alcohol abuse and dependence. The course will consist of 14 weekly presentations by instructors followed by open discussion of the presentation and assigned readings by class members. Active participation by all members is expected. Each weekly presentation is designed to provide a general overview of the current state of knowledge (e.g. theory, methods, ethics, review of classic and/or exemplary studies) in a given area of drug and alcohol abuse and dependence research. Discussions are intended to integrate the information across traditional disciplinary boundaries. Prereq: Graduate standing.

BSC786 DRUG ABUSE: CONTEMPORARY THEORIES AND ISSUES. (3)
This course is designed to familiarize students with major concepts and current issues in the field of substance abuse research.

BSC790 RESEARCH IN MEDICAL BEHAVIORAL SCIENCE. (1-6)
Individually directed research and reading in particular aspects of medical behavioral science under the supervision of one or more members of the faculty. May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

BSC814 PATIENTS, DENTISTS AND SOCIETY. (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as CDE 814.)

BSC815 FIRST-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

BSC824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as CDE 824.)

BSC825 SECOND-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

BSC850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop and refine knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.
**Course Descriptions**

**Approved electives:**

- BSC 850 ELECTIVE IN BEHAVIORAL SCIENCE
- BSC 880 TREATMENT OF DENTAL FEAR

**BS**

**Biostatistics**

**BST 230 STATISTICAL THINKING IN PUBLIC HEALTH.**

This course provides students with an introduction to statistical concepts that are important for solving real-world public health problems. This course will present statistical principles and associated scientific reasoning underlying public health practice and health policy decision-making. Topics include data visualization, summary statistics, statistical inference, study design and data analysis, and strategies for articulating and evaluating claims using statistical constructs. Prereq: UK Core course in Quantitative Foundations.

**#BST 600 INTRODUCTION TO BIOSTATISTICAL METHODS.**

This course covers basic statistical methods that are commonly encountered in health-related research. Major topics include descriptive statistics, estimation and hypothesis testing for means and proportions, correlation, and regression. Prereq: College level algebra or equivalent.

**BST 655 INTRODUCTION TO STATISTICAL GENETICS.**

This course introduces statistical methods used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used and freely available software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical human genetics literature. Prereq: STA 580 or equivalent. (Same as STA 655.)

**BST 675 BIOMETRICS I.**

This course, the first of a two-semester sequence in biometrics, introduces probability, discrete random variables, continuous random variables, joint distributions, and sampling distributions. Prereq: STA 580 and MA 114 or equivalent.

**BST 676 BIOMETRICS II.**

This course, the second of a two-semester sequence in biometrics, introduces techniques for constructing and evaluating point estimators, hypothesis testing procedures, and interval estimators. Prereq: BST 675.

**BST 681 LINEAR REGRESSION.**

This course, the first in a two-semester sequence in regression modeling, covers linear regression models for normally distributed outcomes. The course will cover simple and multiple linear regression, estimation, interpretation, hypothesis testing, model building and diagnostics, matrix algebra for regression, and an introduction to design of experiments. The course will include the use of computing tools to apply these models to real data. Prereq: STA 580 or consent of instructor.

**BST 682 GENERALIZED LINEAR MODELS.**

This course, the second in a two-semester sequence in regression modeling, covers regression models for outcomes which are not normally distributed, such as binary and count data. The course will cover the generalized linear model framework, multivariate maximum likelihood theory, logistic regression, Poisson regression, and nominal and ordinal logistic regression models, as well as approaches for building and checking these models. The course will include the use of computing tools to apply these models to real data. Prereq: BST 675, BST 681.

**BST 693 STATISTICAL PRACTICE IN PUBLIC HEALTH.**

This course provides an introduction to statistical practice in public health including improved statistical communication (how to ask good questions in a consulting session, writing analysis plans, and how to express results both orally and in writing), programming for reproducibility and data ethics, and utilizing statistical methodology for problem solving in public health research. Prereq: CPH 630/STA 681 or equivalent and CPH 535 or equivalent.

**BST 701 BAYESIAN MODELING IN BIOSTATISTICS.**

This course provides an introduction to Bayesian ideas and data analysis applied to the biosciences. The course illustrates current approaches to Bayesian modeling and computation in biostatistics. Prereq: BST 682 and BST 676 or equivalent.

**BST 713 CLINICAL TRIALS.**

Design and analysis of Phase I-III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalence, mixed models, and meta-analysis. Coreq: STA 603. (Same as STA 653.)

**BST 740 SPATIAL STATISTICS.**

Course will cover risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case control studies, and based on regional counts, linking spatial exposure data to health events through regression modeling, Bayesian spatial modeling. Prereq: BST 682.

**BST 761 TIME TO EVENT ANALYSIS.**

**BST 762 LONGITUDINAL DATA ANALYSIS.**

This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models and an introduction to non-linear models as they apply to the analysis of correlated data. Prereq: BST 682 and BST 676. (Same as STA 652.)

**BST 763 ANALYSIS OF CATEGORICAL DATA.**

Multinomial and product-multinomial models; large-sample theory of estimation and testing, Pearson chi-square and modified chi-square statistics, Pearson-Fisher Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as STA 665.)

**BST 764 APPLIED STATISTICAL MODELING FOR MEDICINE AND PUBLIC HEALTH.**

This course introduces some useful statistical models not typically encountered in the core courses of a master’s or doctoral biostatistics curriculum. These include finite mixture models, nonparametric regression models, covariance-based models, and stochastic models. Prereq: BST 682 and BST 676.

**BST 765 MISSING DATA METHODOLOGY FOR PUBLIC HEALTH.**

This course surveys methods for analyzing data with missing observations. This includes methods for data missing completely at random including hot deck cold deck, mean substitution, and single imputation; methods for data missing at random including multiple imputation and weighted estimating equations and methods for data missing not at random including pattern mixture models, selection models, and shared random effects models. Prereq: BST 676 and BST 762.

**BST 766 ANALYSIS OF TEMPORAL DATA IN PUBLIC HEALTH.**

This course surveys methods for analyzing public health data collected over time. Methods covered include smoothing time series data, the modeling of stationary, non-stationary, Gaussian, dichotomous, and case count responses, methods for detecting the clustering of disease over time, and methods for the surveillance of infectious diseases in real time. Prereq: BST 682 and BST 676.

**BTH**

**Bioethics**

*BTH 405 BIOETHICS ON FILM.**

This 3-credit course uses a variety of films (some documentaries) to examine core bioethics issues and principles comprising Autonomy, Beneficence, Non-Maleficence and Justice. Core concepts in Medical Professionalism and Medical Humanism will also be explored. The films selected help to illustrate complex bioethics issues within our current social and medical constructs.

**BVI**

**Blindness and Visual Impairment**

*BVI 580 INTRODUCTION TO VISUAL IMPAIRMENTS.**

This course will provide an introduction to the educational programs and services for students with blindness and visual impairments. Content of this course will focus on the historical foundation of the field, the developmental and psychosocial aspects of individuals with visual impairments, an overview of legislation, influential agencies, and service delivery methods. The impact of vision loss on early childhood development will also be covered. Prereq: Admission to the Teacher Preparation Program in Visual Impairments, Orientation and Mobility program, or instructor permission required.

*BVI 582 ANATOMY AND PHYSIOLOGY OF THE EYE.**

This course will cover the anatomy and physiology of the eye, including visual development. Causes of ocular and neurological visual impairment will be addressed, treatments, and their impact on learning. Course topics will include optics, low vision devices and services, environmental adaptations, and interpreting eye reports. Learners will have the opportunity to directly observe a low vision evaluation and will learn the components of a functional vision assessment. Prereq: Admission to the Teacher Preparation Program in Visual Impairments, Orientation and Mobility program, or instructor permission required.

*BVI 583 BRAILLE CODES I.**

This course is designed to teach the literary braille code. Students will become proficient in transcribing both uncontracted and contracted braille utilizing a Perkins Brailler, slate and stylus, and six-key entry computer software with proper formatting. Students will also learn appropriate techniques for reading braille both tactually and visually. In addition, the history of the braille code will be covered as well as current resources. Prereq: Admission to the Teacher Preparation Program in Visual Impairments, Orientation and Mobility program, or instructor permission.
Course Descriptions

#BVI611 TEACHING METHODS FOR STUDENTS WITH VISUAL IMPAIRMENTS. (3)
This course is designed to examine how to teach and modify the core curriculum for students who are blind or visually impaired. Topics will include: adaptation of general education classroom materials, IEP development and implementation, lesson planning, and braille literacy. Prospective teachers will develop organization skills and strategies necessary to be efficient in delivery of services as a teacher of the visually impaired. Prereq: Successful completion of BVI580. Permission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#BVI612 BRAILLE CODES II. (3)
This course studies advanced braille codes and a special emphasis on braille mathematics utilizing Unified English Braille (UEB) and the Nemeth Code. Other codes covered are music and foreign language (French, German, and Spanish). Braille formats will also be taught including how to correctly transcribe and format materials for braille users, including preparing worksheets and tests for students. Competency in using the Cranmer Abacus will also be mastered. Prereq: Successful completion of BVI583 (Braille Codes I) or proof of competency in literary braille along with admission to the Teacher Preparation Program in Visual Impairments, or instructor permission.

#BVI615 ASSISTIVE TECHNOLOGY FOR STUDENTS WITH VISUAL IMPAIRMENTS. (3)
This course introduces a wide variety of technologies for people who are blind or visually impaired. Students will learn about Universal Design for Learning (UDL) as it relates to technology, as well as proprietary software and hardware. Technologies covered include, but are not limited to: Screen readers, screen magnification, electronic note takers, refreshable braille displays, braille translation programs, magnification hardware, scanning and OCR programs, and accessible digital book options. A wide variety of computers, tablets, and smart phone options will be explored. Instructional strategies for teaching technology skills will be emphasized. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#BVI616 EXPANDED CORE CURRICULUM FOR BLIND AND VISUALLY IMPAIRED. (3)
The Expanded Core Curriculum (ECC) is the body of knowledge and skills that are needed by students with visual impairments due to their unique needs. This course will explore all nine areas of the ECC including: compensatory or functional academic skills, orientation and mobility, social interactions, independent living skills, recreation and leisure skills, career education, use of assistive technology, sensory efficiency skills and self-determination. Participants will have the opportunity to observe and work with students in a summer program and teach skills from the ECC. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#BVI617 VISUAL IMPAIRMENTS AND MULTIPLE DISABILITIES. (3)
This course is designed to provide students with knowledge and skills necessary to design and implement programs for persons who have visual impairments and additional disabilities. Topics include assistive technology, augmentative and alternative communication, literacy instruction, sensory processing, adaptive behavior, and self-help skills. An emphasis will be placed on adaptations that enhance functioning for persons with developmental delays, autism, medical conditions, deaf-blindness, communication disorders, and those with common syndromes and eye disorders related to multiple disabilities. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#BVI618 ASSESSMENT OF STUDENTS WITH VISUAL IMPAIRMENTS. (3)
This course covers various types of assessments used to evaluate students who are blind or visually impaired. Participants will discuss testing and assessment including the development of standardized tests and their applicability for individuals with visual impairments, as well as alternate assessments. Students will practice assessing and planning educational programs for students with visual impairments by completing a Functional Vision/Learning Media Assessment, as well as assessments in assistive technology and the Expanded Core Curriculum. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

#BVI620 FOUNDATIONS OF ORIENTATION AND MOBILITY. (3)
A fundamental course in the history and development of Orientation & Mobility programs, educational and rehabilitation models, and mobility systems. Philosophies, practices, standards, and ethics of O&M will be discussed. Prereq: Admission to the Orientation and Mobility Program or instructor permission is required.

#BVI622 ADVANCED SKILLS AND TECHNIQUES IN ORIENTATION AND MOBILITY. (2)
The course will focus on advanced skills and techniques used by individuals with visual impairments for independent travel in business and complex environments. Students will have practical experience in the use of the long cane and travel under blindfold and vision loss simulators. Students will gain experience in planning lessons and teaching skills to each other under instructor supervision. Prereq: Admission to the Orientation and Mobility program and instructor permission.

#BVI623 ORIENTATION AND MOBILITY FOR CHILDREN. (3)
The course will address the impact and effects of visual impairment on the overall development of children with visual impairments. Course topics will include information on locomotion, concept development, O&M skill acquisition and performance for children with visual impairments. Instructional methods, strategies, and materials for teaching Orientation & Mobility concepts and skills will also be covered. Prereq: Admission to the Orientation and Mobility program and instructor permission.

#BVI624 TECHNOLOGY IN ORIENTATION AND MOBILITY. (1)
The course will be an introduction to the use of electronic travel aids and electronic orientation aids as a secondary mobility system for individuals with visual impairments. The advantages and disadvantages of using electronic travel devices will be identified along with instructional strategies to incorporate the use into lessons. There will be hands-on experience with using electronic devices with an emphasis on the use of cell phone applications. Prereq: Permission to the Orientation and Mobility Program or instructor permission is required.

#BVI627 ORIENTATION AND MOBILITY. (3)
The course will address a variety of topics, strategies, and approaches related to Orientation and Mobility instruction for individuals with visual impairments. Content will focus on adult student evaluation, devices, mobility systems, orientation instruction, and Flash Sonar. The course content will also include instructional approaches used to assessing environments, teach complex travel environments and intersections, adapt for adverse weather conditions, and use various transportation systems. Prereq: Permission to the Orientation and Mobility program and instructor permission.

#BVI629 PRACTICUM IN ORIENTATION AND MOBILITY. (1)
The practicum in Orientation and Mobility will consist of supervised, field-based experience in various settings ranging from preschool, school-based, adult rehabilitation, and geriatric settings. Site approval is required by the program coordinator. Prereq: Instructor permission.

#BVI650 SPECIAL TOPICS IN BLINDNESS AND VISUAL IMPAIRMENTS. (1-9)
In-depth study of a current and topical problem or issue in the area of blindness and visual impairment. A title is assigned each time the course is offered. Prereq: Admission to the Teacher Preparation Program in Visual Impairments, Orientation and Mobility program, or instructor permission.

#BVI651 STUDENT TEACHING/FIELD EXPERIENCE IN VISUAL IMPAIRMENTS. (3-12)
This is a supervised student teaching experience with children, preschool through graduate age, who are blind or visually impaired. Candidates will apply best practices for working with children who are blind or have low vision, including those with additional disabilities. Successful completion of this course will demonstrate the candidate’s ability to apply methods of teaching that include assessment, program planning and implementation, appropriate environments and adaptations, technology, and instruction in the Expanded Core Curriculum. Candidates will also have to demonstrate appropriate classroom and caseload management strategies based on their placement. Prereq: Admission to the Teacher Preparation program in Visual Impairments and approval by the Visual Impairment Program Faculty Chair.

#BVI720 INTERNSHIP IN ORIENTATION AND MOBILITY. (1-6)
Supervised professional experience for candidates in Orientation & Mobility will be offered in an educational or rehabilitation setting serving individuals with visual impairments. A minimum of 350 hours is required. This may be completed either on a full-time or part-time basis. Prereq: Completion of Orientation & Mobility coursework and instructor permission is required.

CDE Community Dentistry

CDE 814 PATIENTS, DENTISTS AND SOCIETY. (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as BSC 814.)

CDE 815 FUNDAMENTALS OF DENTAL PUBLIC HEALTH. (2)
Fundamentals of Dental Public Health is a first-year course designed to introduce students to the dental specialty of Dental Public Health, to dental epidemiological concepts, terminology, and methods used in population-based health care. Community oral health problems in Kentucky and the United States will be reviewed. Emphasis will be placed on public health research, programming, and outcome evaluation strategies related to oral disease in populations.
CDE 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as BSC 824.)

CDE 826 DENTAL PRACTICE MANAGEMENT I. (1)
This course is designed to present a range of dental practice models and introduce several elements of Practice Management. Students will become acquainted with concepts such as business plans, billing, collections, and risk management, and will have the opportunity to engage in guest lectures from outside experts in a range of legal and business fields.

CDE 830 ADVANCED CONCEPTS IN DENTAL PUBLIC HEALTH. (1)
Advanced Concepts in Dental Public Health is a third year course designed to help students develop the competencies of dentists practicing in the community. It examines the external environment and various factors that influence the oral health of the community including barriers to care. Financing mechanisms and workforce issues will be discussed. To provide a framework for the dental student’s professional development, the instructional content builds on the concepts acquired in the first year introductory course in dental public health and presents concepts that will help the student dentist prepare for the Community-Based Dental Education Program. (CDE 841).

Course material is organized around current societal and dental health issues and health care delivery system trends in Kentucky and the United States. These issues and trends will be examined in the context of current national debates concerning access to oral health prevention and care for high risk populations and the associated health disparities to these populations. Prereq: Admission to College of Dentistry or consent of course director.

CDE 840 ADVANCED COURSE ON THE TREATMENT OF SPECIAL PATIENTS. (1)
In this course, dental students participate in preclinical seminars and dental treatment of mentally, medically and physically handicapped patients. Several phases of dental treatment of the special patient, such as sedation and general anesthesia, pharmacological evaluation and preventive dentistry, are covered. The course is individually designed based on the student’s interest in treating special patients. Note: Scheduling for this course will take place outside of regularly scheduled clinic class time. Enrollment minimum is one and maximum enrollment is four. Prereq: Consent of Course Director, Academic Performance Committee (APC), and Team Leader.

CDE 841 DENTAL PRACTICE FIELD EXPERIENCE. (4-10)
Students are provided a full-time, off-campus assignment to a dental practice environment. Students participate in practice management and patient treatment activities under the supervision of a faculty member. The opportunity to participate in career plan development and in study of the community or region, particularly its health care delivery system and the role of dentistry in that system. Prereq: CDE 830.

*CDE 844 DENTAL PRACTICE MANAGEMENT II. (2)
This course is primarily designed to give the student dentists, prior to graduation, practical, useful knowledge on establishing and maintaining a private dental practice. The course will be presented in an active learning format. Course sessions and activities will also include special sessions designed to introduce students to the current environment of dental practice, to organized dentistry in Kentucky, to the College’s Alumni Association and to new developments and continuing education in the dental profession. Prereq: CDE 830 or consent of course director.

CDE 850 EXTRAMURAL EXPERIENCES FOR STUDENT DENTISTS. (1-6)
This course is designed to provide student dentists an experiential learning experience in a research program, clinical program, public health program, and/or institutional dental program. Career planning and service-learning are emphasized and coordinated with placement in a community-based site. Students learn by active participation in patient care and/or research by observation and by discussion with mentors. Discussions and interviews with patients and dental residents and staff are also encouraged. This course provides an opportunity for selected students, based on their own career goals, to participate in short-term elective dental educational experience external to the students dentists’ clinics. While the sites vary greatly, most experiences include some patient care experiences (observation, assisting, direct participation in patient care under the direct supervision of an approved mentor). Extramural experiences are customized for each student dentist. Prereq: Consent of Course Director, Academic Performance Committee (APC), and Team Leader.

CDE 855 PUBLIC HEALTH DENTISTRY FIELD EXPERIENCE. (1-2)
This course allows implementation of oral health promotion programs designed in CDE 830 in community settings. Prereq: Must be fourth year dental student.

CDE 880 TREATMENT OF DENTAL FEAR. (1)
This advanced course in the treatment of dental fear is intended to prepare the student to manage very fearful dental patients. Topics covered include etiologies, diagnosis and types, relaxation and distraction, and case histories. Note: Scheduling for the course will take place outside of regularly scheduled clinic class time. Prereq: CDS 823 and consent of course director. (Same as BSC 880.)

CDE 883 COMMUNITY-BASED SERVICE ELECTIVE. (1-5)
This Community-Based Service elective is designed to give students greater opportunities to provide dental services to diverse, underserved populations. The goals of this course are to expand development of a service ethic and to meet some of the needs of populations who do not have access to dental care. The majority of the time requirements for this course will be rotations to community clinics where students will work under the supervision of a College of Dentistry faculty providing dental services. Prereq: Third year standing and approval of College of Dentistry APC.

CDE 884 INTERNATIONAL ELECTIVE. (1-3)
This community-based service learning elective is designed to afford students greater opportunities to provide a broad spectrum of dental educational, clinical and public health services to diverse, underserved populations in an international setting. The majority of the time requirements for this course will be in a foreign country at designated community sites potentially working with other health care professionals. Activities will include but are not limited to assessing both community and patient needs and providing services based on the needs assessment and community goals. Students will work with UK approved organizations and under the direct supervision of a College of Dentistry faculty while in-country. Prereq: Admission to College of Dentistry.

CDS Conjoint Dental Science

CDS 611 CHILD GROWTH AND DEVELOPMENT PART I. (2)
A seminar course on nature and physiologic control of physical growth, for graduate students in dentistry. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 612 CHILD GROWTH AND DEVELOPMENT PART II. (2)
A seminar course for graduate students in dentistry covering emotional and intellectual growth of children, and diseases and congenital anomalies of children. Prereq: Admission to graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 613 CONTEMPORARY LEADERSHIP IN DENTISTRY. (1)
The course will explore the current leadership dilemma in the health professions (specifically). The purpose is to prompt the extension of the role of oral health professionals to serve as leaders who engage a richer “public good” agenda as part of their role as doctor/teacher. The course will concentrate on important issues such as leadership development and theories of leadership; team building; personality preferences and leadership; peer assessment; transformational and transactional leadership; stress management; leadership change; negotiation; and giving and receiving feedback. Prereq: Enrollment in one of the College of Dentistry’s post-doctoral programs.

CDS 631 DIAGNOSIS AND MANAGEMENT OF TEMPOROMANDIBULAR DISORDERS AND OROFACIAL PAIN. (1)
This course provides information regarding the normal anatomy and function of the masticatory system and then highlights some of the common disorders related to dysfunction of this system. Emphasis is placed on temporomandibular disorders and how they are identified and managed in the clinical practice. Other disorders associated with orofacial pain complaints will be discussed so that students are able to identify these conditions and successfully manage them or refer the patient to the appropriate health care provider. Prereq: Admission to dental graduate program; D.D.S. or D.M.D. degree.

*CDS 660 SPECIAL TOPICS: RESEARCH DESIGN, METHODOLOGY, AND DISSEMINATION. (2)
This lecture/seminar course is designed to provide students with an overview of the basic principles of study design and protocol development, with a focus on clinical and translational research. It also is designed to expose students to the interplay between patient care and clinical/translational research and to provide the students with tools that will assist them in dissemination of their research findings. Prereq: Admission to a dental graduate program.

*CDS 670 ADVANCES IN ORAL AND MAXILLAROFACIAL PATHOLOGY. (1)
This course will consist of 16 hours of lecture on the major disease topics in Oral and Maxillofacial Pathology including oral mucosal, salivary gland and bone pathology. Current classifications of these major categories will be presented and selected topics of current importance will be discussed. Prereq: Admission to dental graduate program.

CDS 680 CLINICAL MEDICINE FOR POSTGRADUATE DENTAL STUDENTS. (2)
This course is designed to provide graduate students and dental residents with an advanced understanding of how various medical disorders and medical therapies can affect oral health and the delivery of dental care. Prereq: Admission to dental graduate program.

CDS 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CDS 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CDS 812 NORMAL HUMAN GROWTH AND DEVELOPMENT. (1)
A lecture course which introduces basic concepts of normal human growth and development from birth through adolescence. Lectures emphasize the time-dependent changes in development from birth through adolescence. Prereq: Admission to College of Dentistry.

KEY: # = new course  * = course changed † = course dropped
This is the first in a series of conjoint courses to improve the management of patients by student dentists. The course is directed by the patient care Team Leaders. Special didactic and clinical activities are included to improve and maintain your ability to manage patients and provide care. The course spans both semesters of the academic year and includes all clinical activities and interactions with Team Leaders. Prereq. CDS 821.

**CDS 833 MANAGEMENT III: CLINICAL PATIENT MANAGEMENT.** (1)

This course is the third in a series of conjoint courses to improve the management of patients by student dentists. The course is directed by the four patient care Team Leaders. Special didactic and clinical activities are included to improve and maintain the student patient's ability to manage patients and provide care. The course spans both semesters of the academic year and includes all clinical activities and interactions with Team Leaders. Prereq. CDS 823.

**CDS 835 ADVANCED DENTAL IMPLANTOLOGY.**

Dental Implantology has become an integral part of dental services. This course contains information on patient centered criteria for advanced implant services, advanced surgical considerations, and advanced prosthetically driven treatment results. Additional topics include treatment planning for complex dental implant cases, mechanical and restorative complication related to implant dentistry, esthetic consideration for implant restorations, immediate implant placement and immediate provisionalization, and immediate/early loading protocols will be discussed. The student will have the opportunity to familiarize him/herself with multiple implant systems and multiple implant placement protocols. The student will have the opportunity to have literature review on most current techniques and products. Prereq. CDS 825.

**CDS 836 DIAGNOSIS AND MANAGEMENT OF OROFACIAL PAIN.**

This course is designed to present information regarding the diagnosis and management of Orofacial Pain and Temporomandibular Disorders. The course will consist of a series of lectures and case presentations. The information provided in this course will allow the student to understand the dentist’s role in managing complex orofacial pain problems. The area of temporomandibular disorders will be emphasized since the dentist plays a major role in managing these pain disorders. Prereq. ANA 534, OSG 820, and RSD 822.

**CDS 838 THE PROFESSION OF DENTISTRY III.** (1)

This course is an introduction to the unique relationship dentist and dentists have with society generally and patient specifically. This course will explore the relationship of dentistry to society and attempt to explicate further the nature of professional responsibility. In so doing, the major question will be, “How do society and dentistry interact for the good of the public and the profession?” Prereq: Approval of dean and/or his designee for academic affairs and the course director.

**CDS 843 MANAGEMENT IV: CLINICAL PATIENT MANAGEMENT.** (1)

This course is the fourth in a series of conjoint courses to improve the management of patients by student dentists. The course is directed by the patient care Team Leaders. Special didactic and clinical activities are included to improve and maintain your ability to manage patients. The course spans both semesters of the academic year, including all clinical activities and interactions with Team Leaders. Prereq: CDS 833 or consent of course director.

**CDS 844 DRUG MISUSE, ABUSE AND DEPENDENCY: WHAT DENTISTS NEED TO KNOW.** (1)

This course is designed to provide new insights and understanding into prevention, recognition and treatment of patients with, and at risk for, drug misuse and abuse. The course enables students to understand addiction as primary, chronic and progressive disease and to demonstrate an understanding of the pharmacology, abuse potential, as well as the behavioral and physiological effects of the commonly abused drugs. Emphasis will be on increasing dental students skills and abilities to recognize the signs and symptoms of drug abuse; identify and manage patients at risk for drug problems; and become effective in providing successful care for drug dependent patients while minimizing their potential for relapse. Prereq: Fourth-year standing in College of Dentistry or consent of course director.
CE 846 DIAGNOSIS AND MANAGEMENT OF OROFACIAL PAIN. (3)
This course will present information regarding the diagnosis and management of orofacial pain and temporomandibular disorders. The information provided in this course will allow the student to understand the dentist’s role in managing complex orofacial pain problems. The area of temporomandibular disorders will be emphasized since the dentist plays a major role in managing these pain disorders. Prereq: ANA 534, OSIG 820, and RSD 822.

CE 860 SPECIAL TOPICS IN ORAL HEALTH. (1-3)
This course will engage students in a variety of activities including lectures, independent literature review and reading community-based projects, and individual or small group discussions to address current topics of special interest or concern in oral health. Projects and discussion areas for students participating in an interdisciplinary curriculum will be developed in conjunction with other health care providers. Prereq: Enrollment in the College of Dentistry; approval of the course director.

CE 863 EXPLORING DENTAL TEACHING ELECTIVE. (1)
This course will provide dental students who have an interest in teaching an opportunity to learn about being a dental faculty member in a systematic way. This course will educate dental students on two main subjects: 1) Roles, responsibilities, and opportunities for dental educators on an academic institution, and 2) Effective teaching in the classroom and clinic. Lecture, 16 hours. Prereq: Open to all 4th-year dental students. Open to 3rd year dental students with permission of the course director and the Academic Performance Committee.

CE 865 ODONTOLOGY. (1)
Elective introductory course in forensic dentistry for fourth year dental students. Prereq: Must be fourth year dental student.

CE 881 MAXILLOFACIAL DISEASE FOR THE HEALTH CARE PROFESSIONAL. (1)
Designed for motivated 4th year medical students who want to understand more about Hospice and Palliative Care. This rotation will present students with a multidisciplinary approach to caring for patients by working with doctors, nurses, home health care providers, and chaplains. Prereq: MD 836/837 or consent of course director. (Same as SUR 875.)

CE 885 IMPACT ELECTIVE. (1)
Dental Implantology has become an integral part of dental services. This course contains information on patient centered criteria for advanced implant services, advanced surgical considerations, and advanced prosthodontics driven treatment outcomes. Additional topics include but are not limited to implant planning for complex dental implant cases, mechanical and restorative complication related to implant dentistry, esthetic consideration for implant restorations, immediate implant placement and immediate provisionalization, and immediate/early loading protocols will be discussed. The student will have the opportunity to familiarize him/herself with multiple implant systems and multiple implant placement protocols. The student will have the opportunity to have literatures review on most current techniques and products. 12 hours Lecture, 8 hours Laboratory. Prereq: Successful completion of CDS 855.

CE Civil Engineering

CE 106 COMPUTER GRAPHICS AND COMMUNICATION. (3)
Introduction to visualization, orthographic projection, and computer-aided drawing. Graphical design of spatial problems. Integrated use of computer graphics to create civil engineering drawings. Lecture; two hours; laboratory, three hours per week. Prereq or coreq: MA 113 or consent of instructor.

CE 120 INTRODUCTION TO CIVIL ENGINEERING. (1)
An introduction to the civil engineering profession and the use of computer hardware and software in CE systems analysis and design. Presentations will be used to illustrate the conception, design, construction, and operation processes. Sample problems and class exercises on roadway design. Introduction to civil engineering will make use of existing computer software packages and teamwork principles.

CE 195 INDEPENDENT WORK IN PRE-CIVIL ENGINEERING. (0-4)
Independent or make-up work for lower division engineering students in the field of civil engineering. May be repeated for a maximum of four credit hours. Prereq: Admission to the College of Engineering and consent of department chair or DUS, and the instructor.

CE 211 SURVEYING. (4)
A comprehensive course in the art and science of surveying as applied to civil engineering, including the use and care of surveying instruments; measurement of horizontal and vertical distances, angles and directions; collection of ground and underground data for the design and layout of roads, buildings, structures, mining and mineral workings and other structures; and some aspects of the precise determination of position and direction for survey control. Lecture, three hours; laboratory, three hours per week. Prereq or coreq: CE 106; prereq: MA 114.

CE 303 INTRODUCTION TO CONSTRUCTION ENGINEERING. (3)
The study of the planning, administration, management, and cost of construction projects and an introduction to the methodology utilized in executing specific designs. Emphasis is placed on the organization of construction firms, development of construction documents, theory of engineering economics, estimating and quantity take-off, contractual and management systems, scheduling, project administration, and inspection of construction operations. Prereq: C or better in CE 106 and engineering standing.

CE 329 CIVIL ENGINEERING COMMUNICATIONS AND TEAMS LAB. (1)
The class focuses on presenting the proper tools and techniques for oral presentations, identifying the requirements for proper technical writing, and providing students with the means to effectively work within a team environment. Prereq: CIS 111 Comp and Comm II; Engineering standing.

CE 331 TRANSPORTATION ENGINEERING. (3)

CE 341 INTRODUCTION TO FLUID MECHANICS. (4)
Fundamental principles of thermodynamics and fluid flow. Includes fluids at rest, fluids in motion. Continuity, momentum and energy relations, ideal and viscous fluids. Emphasis on incompressible fluids. Description of pumps and open channels. Prereq: PHY 231 and MA 214 and engineering standing.

CE 351 INTRODUCTION TO ENVIRONMENTAL ENGINEERING. (3)
Overview of environmental chemistry and microbiology, water quality, water and wastewater treatment, solid and hazardous wastes management, hazardous waste remediation, and air pollution control. Emphasis on the basic science and engineering principles required to understand both natural and engineered systems, as well as the engineering approach to understanding the natural environment and specific treatment mitigation methods. Prereq: CHE 107, MA 214, PHY 231, and engineering standing.

CE 381 CIVIL ENGINEERING MATERIALS I. (3)
A study of the microscopic and macroscopic structures and properties of materials used in civil engineering construction with an emphasis on the relationships of their physical and mechanical properties to engineering design and application. Written reports and oral presentation of results will be required. Lecture, two hours; laboratory, three hours per week. Prereq and coreq: C or better in EM 302 and engineering standing.

CE 382 STRUCTURAL ANALYSIS. (3)

CE 395 INDEPENDENT WORK IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Engineering standing, consent of department chairperson and the instructor.

CE 399 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling and control, construction engineering, operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 399 number. Prereq: Variable; given when topic identified and registration in the College of Engineering.

CE 401 SEMINAR. (1)
A discussion of the ethical and professional aspects of civil engineering practice. Concepts of loss prevention and conflict resolution. Structured small group discussion, oral presentations, and role-playing. Lecture, two hours per week. Prereq: Senior classification and engineering standing.

CE 429 CIVIL ENGINEERING SYSTEMS DESIGN. (3)
The course is designed to provide the graduating civil engineer with an integration of professional practice issues with planning, design, and construction. Topics to be covered will include: development of learning, problem-solving, and decision-making skills; development of written and oral technical communication skills; procurement of professional services; integration of planning, design, and construction activities; integration of environmental, legal, political, and social issues and concerns into the project process. All activities will be conducted in teams. Lecture, two hours; laboratory three hours per week. Prereq: To be taken during the student’s last semester.

CE 433 RAILWAY OPERATIONS AND MULTI-MODAL TRANSPORTATION. (3)
Study of the transportation engineering aspects of efficient management of railway freight, passenger and intermodal operations and the relationships to the other major transport modes - water, highway, air, pipeline and land conveyors. Prereq: CE 331 and engineering standing.

CE 461 WATER RESOURCES ENGINEERING. (4)
A hydrological and hydraulic study of the laws governing the occurrence, distribution, and movement of water in watershed systems. Meteorological considerations, precipitation, evaporation, infiltration, streamflow, hydrograph analysis, flood routing, open channel hydraulics, culvert design, pump systems, groundwater flow, and frequency analysis. Principles of mathematical models that describe the flow processes in a natural watershed and hydraulic structures. Prereq: C or better in CE 341 and engineering standing or consent of instructor.
Course Descriptions

CE 471G SOIL MECHANICS. (4)
A study of the strength, deformation and hydraulic properties of soils and their relationship to settlement, stress distribution, earth pressure, bearing capacity and slope stability. Design of footing foundations and retaining walls. Written and oral presentations of student projects will be required. Lecture, three hours; laboratory, three hours per week. Prereq: C or better in EM 302; or prereq or concur: EES 220; and engineering standing or consent of instructor.

CE 482G STRUCTURAL ANALYSIS AND DESIGN. (3)
Application of principles of solid mechanics to the design of steel, timber and reinforced concrete members and structures. Emphasis on basic ideas and their application to practical design of relatively simple structures according to building code. Prereq: C or better in CE 302 and engineering standing or consent of instructor.

CE 486G REINFORCED CONCRETE STRUCTURES. (3)
Theory and design of beams, slabs, girders and columns as related to building frames and bridges. Introduction to pre-stressed concrete, elastic design and ultimate strength design. Prereq: CE 382 and engineering standing or consent of instructor.

CE 487G STEEL STRUCTURES. (3)
Behavior, analysis, and design of compression members, laterally braced and unbraced beams, beam-columns, composite beams, tension members, directly loaded bolted and welded connections, and column base plates. Evaluation of frame stability. Prereq: CE 382 and engineering standing, or consent of instructor.

CE 499 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
Devoted to a special topic of current interest in civil engineering. May be repeated to a maximum of eight credits, but not more than four credits may be earned under the same subtitle. A particular topic may be offered at most twice under the CE 499 number. May be counted as technical or design elective with consent of chairman. Prereq: Variable, given when topic is identified, plus engineering standing.

CE 507 CONSTRUCTION SAFETY AND HEALTH. (3)
The course will develop an understanding of safety and health; cost; and human impact; hazard and risk analyses; psychological facts of organizational culture and climate; design safe work procedures for the execution of particular types of work; and individual versus management level improvement in safety and health procedures in the construction process. Prereq: Engineering standing and CE 303 or consent of instructor.

CE 508 DESIGN AND OPTIMIZATION OF CONSTRUCTION OPERATIONS. (3)
The course critically examines repetitive operations that occur from project to project and the deterministic approaches used to design and optimize their effectiveness. Scientific techniques used to field measure the efficiency of construction operations are also examined. The primary metrics used to optimization include cost, schedule, and sustainability. Prereq: C in CE 303, C in CE 381, and engineering standing or graduate standing.

CE 509 CONTROL OF THE CONSTRUCTION PROJECT. (3)
This course investigates the principles and practices for the control of budget and schedule for construction projects. Topics studied include: estimating construction costs and developing a project budget, planning construction operations and developing a project schedule, documenting and reporting of project progress and spending, and the management of change of contract amount, contract time, and contract scope work. Prereq or coreq: CE 508 or consent of instructor.

CE 517 BOUNDARY LOCATION PRINCIPLES. (3)
Procedures for locating or relocating the boundaries of real property; records searching, technical aspects of field work, preparation of descriptions and survey reports, land data systems, legal aspects, special problems. Prereq: C in CE 211, engineering standing, or consent of instructor.

CE 525C CIVIL ENGINEERING APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS. (3)
CE 525 focuses on GIS as a tool in Civil Engineering. The terms and concepts related to Geographic Information Systems are introduced. The management of spatial databases, particularly those related to Civil Engineering, is covered. Students will collect data using a Global Positioning System (GPS). Students will be required to use the GIS ArcInfo to solve a specific individual spatial problem that they propose based on several Civil Engineering databases available to them. Lecture, two hours, laboratory, three hours per week. Prereq: Engineering standing and one of the following: C in CE 331, C in CE 341, or CE 471.

CE 531 GEOMETRIC DESIGN AND OPERATIONS OF ROADS. (3)
Analysis of transportation facilities through a diagnostic study of transportation systems with emphasis on design, capacity and safety. Engineering practice oriented toward open-ended design solutions, mostly focused on roadway design. Prereq: C in CE 331, and engineering standing.

CE 533 RAILROAD FACILITIES DESIGN AND ANALYSIS. (3)
Principles of railroad location, construction, rehabilitation, maintenance, and operation with emphasis on track structure design and analysis, bridges and bridge loading, drainage considerations, track geometry effects, and operating systems analysis. Coreq or prereq: CE 471G or graduate standing or consent of instructor.

CE 534 PAVEMENT DESIGN, CONSTRUCTION AND MANAGEMENT. (3)
Design, analysis, construction, and management of flexible and rigid pavements. Stresses and strains, pavement materials, subgrade soil stabilization, bases and subbases, quality control, drainage, pavement-type selection, and pavement management. Prereq: C in CE 381; or prereq or concur: CE 471G, and engineering standing.

CE 539 TRANSPORTATION SYSTEMS DESIGN. (3)
This course focuses on the design of urban intersections and the procedures used to evaluate the operational level of urban roadway systems. First, a review of urban intersection design principles and aspects is presented. Second, traffic signal timing techniques are reviewed and students are required to use two software packages for evaluation of traffic operation of urban roadway systems. The focal point of the course is a group design project where solutions to accommodate all transportation modes and their issues along a corridor in Lexington are sought. Fieldwork and data collection are part of this course. Lecture, two hours; laboratory, one hour. Prereq: C in CE 331; C in CE 531 or prereq or concur.

CE 541 INTERMEDIATE FLUID MECHANICS. (3)
Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as BAE 541.)

CE 542 INTRODUCTION TO STREAM RESTORATION. (3)
Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/geomorphology), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as BAE 532.)

CE 546 FLUVIAL HYDRAULICS. (3)
Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as BAE 536.)

CE 547 WATERSHED SEDIMENTATION. (3)
The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objectives, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre- or Co-requisite or equivalent). (Same as BAE 547.)

CE 549 ENGINEERING HYDRAULICS. (3)
Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461G and engineering standing, or consent of instructor. (Same as BAE 545.)

CE 551 WATER AND WASTEWATER TREATMENT ENGINEERING. (3)
This course examines the scientific and engineering aspects of water and wastewater treatment. Conventional water treatment processes such as rapid mixing, flocculation, sedimentation, filtration, and disinfection as well as biological processes for wastewater treatment are analyzed. Sustainable alternative treatment techniques are also discussed. Prereq: C in CE 341, C in CE 351, and engineering standing or consent of instructor.

CE 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3)
This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as EGR 553.)

CE 555 MICROBIAL ASPECTS OF ENVIRONMENTAL ENGINEERING. (3)
Environmental microbiology for engineering students with emphasis on microbiologically mediated chemical cycles, microbial ecology, and industrial microbiology. Prereq: C in CE 351, engineering standing, graduate status or consent of instructor.

CE 556 GIS APPLICATIONS FOR WATER RESOURCES. (3)
This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complemented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as BAE 538.)

CE 579 GEOTECHNICAL ENGINEERING. (3)
Application of the principles of soil mechanics and structural mechanics to the design of retaining walls, bracing for excavations, footings, mat and pile foundations and to the analysis of the stability of earth slopes. Prereq: CE 471G and engineering standing.
Course Descriptions

CE 581 CIVIL ENGINEERING MATERIALS II. (3) Design, evaluation, and construction of Portland cement concrete and hot mix asphalt (HMA). Advanced topics related to high performance concrete and asphalt materials are covered in this course. Prereq: C in CE 381 and engineering standing.

CE 582 INTERMEDIATE STRUCTURAL ANALYSIS. (3) Analysis of indeterminate, truss, frame and arch structures using energy principles associated with the flexibility and stiffness methods; influence line functions for indeterminate structures; and use of available computer programs for structural analysis and matrix operations. Prereq: CE 382 or CE 499, be registered in the College of Engineering, or consent of instructor.

CE 584 DESIGN OF TIMBER AND MASONRY STRUCTURES. (3) Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as ARC 584.)

CE 585 CIVIL ENGINEERING FAILURES. (3) Fundamentals of failure investigation and forensic engineering; Failure types and mechanisms; Case studies and discussions on various constructed facilities. Prereq: CE 482 or consent of instructor, and engineering standing.

CE 586 PRESTRESSED CONCRETE. (3) Fundamental basis and underlying principles for the analysis and design of Prestressed concrete. Working stress and ultimate strength design methods, full and partial prestressing. Design for shear and torsion, deflection, crack control, and long-term effects, and prestress losses. Composite beams, slabs, short and slender columns, prestressed structures and their connection. Prereq: Undergrad. (CE 486G, CA 240, CE 482, or CE 499), be registered in the College of Engineering, or consent of instructor.

CE 589 DESIGN OF STRUCTURAL SYSTEMS. (3) Building codes, design loads, computerized structural analysis and design, gravity and lateral system design, structural system descriptions and selection considerations, and structural contract documents. Prereq: C in CE 482, engineering standing or consent of instructor.

CE 595 INDEPENDENT WORK IN CE. (1-4) Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Consent of department chairperson and the instructor; with engineering standing.

CE 599 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4) A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 599 number. Prereq: Variable; given when topic is identified; plus engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor's degree in civil engineering or its equivalent.

CE 602 CONSTRUCTION PROJECT MANAGEMENT. (3) Management of construction projects: planning, estimating, scheduling and control; organization; site management; material management; safety management; quality management; construction labor relations; productivity management; claims. Prereq: Engineering Standing, graduate status, or consent of instructor.

CE 605 NEW ENGINEERING ENTERPRISES. (3) This course covers the theory and actual practices of organization, management and operation of engineering companies. Primary emphasis on construction companies; however, the principles apply to most service oriented engineering companies. Students will be required to do several independent exercises related to establishing an engineering company. Prereq: Graduate standing in engineering or consent of instructor.

CE 608 BUILDING INFORMATION MODELING FOR CONSTRUCTION. (3) The course focuses on advanced information systems used to control and predict project performance (cost and schedule) in construction. Building Information Modeling is examined as a systems approach of integrating design and construction for the benefit of developing construction work packages, 4D simulations, clash detection, trade coordination, and status visualization. Prereq: CE 509 and enrollment in the Graduate School or consent of the instructor.

CE 621 INTRODUCTION TO FINITE ELEMENT ANALYSIS. (3) Theoretical, conceptual, and computational aspects of the finite element method are developed. Development of the essential relationships, element calculations, and assembly of the finite element equation systems are covered. Both one- and two-dimensional finite element problems are considered. One-dimensional problem areas include elastic deformation, heat conduction, fluid flow, electrostatics, groundwater flow, mass transport, beams on elastic foundations, etc. Two-dimensional problem areas include Poisson’s equation, viscous incompressible flow, plane elasticity, and bending of elastic plates. Prereq: MA 432G, MA 537 or consent of instructor. (Same as MATH 521.)

CE 631 URBAN TRANSPORTATION PLANNING. (3) A detailed review of the transportation planning process; inventory methodologies; trip generation, distribution and assignment with associated mathematical models and theories; prediction of future travel; land and use models; modal split; developing and testing proposed systems; simulation. Prereq: CE 531 or equivalent and STA 381, or 681 or equivalent statistics course. (Same as GEO 643.)

CE 633 AIR TRANSPORT ENGINEERING. (3) Planning location and design of airports, STOL ports, and heliports. Air traffic operations, performance and control as related to facility requirements. Role of governmental agencies. Prereq: CE 531 or consent of instructor.

CE 634 TRAFFIC CHARACTERISTICS. (3) Vehicle operating characteristics; driver, pedestrian and roadway characteristics as they individually, and collectively as traffic stream characteristics, are related to the planning design and operation of highway facilities.

CE 635 HIGHWAY SAFETY. (3) A detailed review of the impacts of safety considerations on highway design and planning, focusing on the highway environment, its users (both vehicles and drivers) and their interactions. The role of special interest groups (tracking industry, insurance agencies) is also examined. Prereq: CE 539 or consent of instructor.

CE 642 OPEN CHANNEL FLOW. (3) The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipation, flow transitions, curve analytical solutions and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as BAE 642.)

CE 643 MECHANICS OF SEDIMENT TRANSPORT. (3) Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and designs based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as BAE 643.)

CE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL. (3) Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as BAE 652.)

CE 653 WATER QUALITY IN SURFACE WATERS. (3) Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as BAE 653.)

CE 655 WATER SANITATION AND HEALTH. (3) Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CHP 790.)

CE 662 STOCHASTIC HYDROLOGY. (3) Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as BAE 662.)

CE 664 WATERSHED MANAGEMENT. (3) This course provides an overview of the scientific principles and management strategies used to effectively manage the physical, chemical, biological and social resources within a watershed so as to improve and sustain the integrity of the watershed system. The course will examine watershed management from both a scientific/engineering perspective as well as from a social sciences policy perspective. Examples of effective watershed management will be drawn from cases studies in Kentucky and the United States. Students will be provided with an introduction to those spatial data sets, computer software, and methods currently used in watershed management practice. Prereq: BAE 437 or CE 461G or an equivalent course in hydrology, or consent of instructor. (Same as BAE 664.)

CE 665 WATER RESOURCES SYSTEMS. (3) Application of systems analysis, mathematical modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as BAE 665.)

University of Kentucky
2019-2020 Undergraduate Bulletin
427
Course Descriptions

CE 667 STORMWATER MODELING. (3)
Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Presentation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as BAE 667.)

CE 671 ADVANCED SOIL MECHANICS. (3)
Detailed study of soil behavior. Specific topics include soil classification and strength, stress and deformation behavior, compaction, consolidation, and stress distribution in earth masses. Prereq: CE 471G and consent of instructor.

CE 672 LANDFILL DESIGN. (3)
This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as BAE 672.)

CE 673 STABILITY OF EARTH SLOPES. (3)
Review of shear strength principle including laboratory and field tests for shear strength and shear strength of unsaturated soils; theoretical and practical aspects of infinite slopes, block analysis, method of slices, effective and total stress analysis, analysis of unsaturated slopes, commercial software packages for slope stability analysis, probabilistic analysis of slope stability problems, rapid drawdown, and slope failure mitigation.

CE 676 GROUNDWATER AND SEEPAGE. (3)

CE 679 GEOTECHNICAL EARTHQUAKE ENGINEERING. (3)

CE 681 ADVANCED CIVIL ENGINEERING MATERIALS. (3)

CE 682 ADVANCED STRUCTURAL ANALYSIS. (3)
Theory and application of energy principles for plane and space frames; shear wall structures; geometric and material nonlinear formations; and nonlinear solution strategies. Solution techniques for the analysis of large complex structures. Introduction to plane stress/strain, axisymmetric and plate bending finite element analysis.

CE 684 SLAB AND FOLDED PLATE STRUCTURES. (3)

*CE 686 ADVANCED REINFORCED CONCRETE THEORY. (3)
Background and origin of modern reinforced concrete design procedures and codes. Comparison of American and foreign methods of analysis. Review of current research and projection to anticipated future changes in design and construction practices. Prereq: C in CE 482 or consent of instructor.

*CE 687 ADVANCED STEEL DESIGN. (3)
Strength of structural steel columns, including asymmetry and slender compression elements. Flexural strength of slender plate girders. Shear strength with and without post-buckling strength. Frame stability. Steel connections. Floor vibration serviceability. Prereq: CE 587 and registered in the College of Engineering, or consent of instructor.

CE 689 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
An advanced level presentation of a topic from one of the major areas of civil engineering, such as hydraulic engineering, geotechnics, structures, transportation, surveying, or water resources. Course with a given subtitle may be offered not more than twice under this number. Prereq: Variable, given when topic identified; graduate standing.

CE 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams. Prereq: CE 769 DISSERTATION RESEARCH. (0)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CE 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CE 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)

CE 779 ADVANCED GEOTECHNICAL ENGINEERING. (3)
Application of the principles of soil mechanics to the design and analysis of foundations and earth structures. Prereq: CE 579 and CE 671 or consent of instructor.

CE 782 DYNAMICS OF STRUCTURES. (3)

CE 784 SHELL STRUCTURES. (3)
Design and analysis of reinforced concrete shell structures, including domes, barrel shells, hyperbolic paraboloids and cylindrical tanks. Prereq: CE 684 or consent of instructor.

CE 790 SPECIAL RESEARCH PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Laboratory, six hours. May be repeated to a maximum of nine credits. Prereq: Consent of the chairperson of the department.

CE 791 SPECIAL DESIGN PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Laboratory, six hours. May be repeated to a maximum of nine credits. Prereq: Consent of the chairperson of the department.

CEF Consumer Economics and Financial Counseling

CEF 251 PERSONAL AND FAMILY FINANCE INTRODUCTION. (3)
An introductory course for personal and family finance. Relevant topics such as building and protecting wealth, retirement and estate planning and personal investing will be covered throughout the course.

CEF 350 CONSUMER ECONOMICS. (3)
An in-depth study of consumer issues, rights, and responsibilities. An examination of how individual and societal decisions affect quality of life, including consumer safety, and the interactions of consumption, health, law, government regulations and the economy. Consumer education and financial literacy will also be emphasized.

CEF 351 ADVANCED PERSONAL AND FAMILY FINANCE I. (3)
Management of personal and family financial resources throughout the life span. A study of individual and family finances as related to financial planning, property and liability risk, health care management and expenses; insurance planning; investment fundamentals; stocks, bonds, and mutual fund investments; real estate and high risk investments; and retirement and estate planning. Prereq: CEF 251 and CEF 351.

CEF 352 ADVANCED PERSONAL AND FAMILY FINANCE II. (3)
Management of personal and family financial resources throughout the life span. A study of individual and family finances as related to financial planning, property and liability risk, health care management and expenses; insurance planning; investment fundamentals; stocks, bonds, and mutual fund investments; real estate and high risk investments; and retirement and estate planning. Prereq: CEF 251 and CEF 351.

CEF 360 INTRODUCTION TO FAMILY INTERVENTION: WORKING WITH FAMILIES AND INDIVIDUALS. (3)
Survey course to introduce students to the various skills, strategies and professional ethical standards used by family scientists in helping relationships. The emphasis will be on learning the skills required to provide support for families and individuals. Prereq: Declared majors or minors in CEF, FAM 251 is a prerequisite for FAM majors and minors. CEF 251 is a prerequisite for CEF majors. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. (Same as FAM 360.)

CEF 390 ADVANCED RESEARCH METHODS. (3)
An introduction to research design, methodology, instrumentation, and data analysis with emphasis on a student’s ability to understand and critique research in the content areas of consumer economics, personal finance, human development, and family relations. This course provides partial credit for the written component of GCCR in conjunction with CEF 210 and CEF 303. Prereq: Declared majors or minors in FAM or CEF 303. Prereq: Declared majors or minors in FAM Sciences; STA 210; CIS/ WRD 110; CIS/WRD 111; and sophomore standing. (Same as FAM 390.)
CHE 104 INTRODUCTORY GENERAL CHEMISTRY. (3)
A study of general principles, including laws of definite and multiple proportions, stoichiometry, gases, electron structure, chemical bonding, periodic relationships, oxidation-reduction, chemical equilibrium, and acids and bases. Not open to students who have already completed both CHE 105 and CHE 107. Not recommended for students seeking careers in science, engineering, medicine, pharmacy, or dentistry for which the recommended sequence is CHE 105/107. Prereq: Credit for MA 111, or Math ACT score above 20, or ALEKS Math Placement above 45.

CHE 105 GENERAL COLLEGE CHEMISTRY. (4)
A study of chemical principles and their application to pure and mixed substances. Not open to students who have already completed both CHE 109 and CHE 110. Prereq: Math ACT of 23 or above (or Math placement test), or MA 109 or MA 110.

CHE 107 GENERAL COLLEGE CHEMISTRY II. (3)
A continuation of CHE 105. A study of the principles of chemistry and their application to elements and compounds. Prereq: CHE 105 or CHE 110 (with a C or better).

CHE 108 INTRODUCTION TO INORGANIC, ORGANIC AND BIOCHEMISTRY WITHOUT LABORATORY. (3)
Formally a continuation of CHE 104, a study of selected aspects of inorganic, organic, and biochemistry including the chemistry of metals and nonmetals, basic organic functional groups, proteins, nucleic acids, and lipids. Not recommended for students seeking careers in medicine, pharmacy, science, dentistry, and engineering for which the recommended sequence is CHE 105/107. Prereq: CHE 104 or CHE 105.

CHE 109 GENERAL CHEMISTRY I. (4)
A study of chemical principles and their applications to pure and mixed substances. The two-semester CHE 109/110 sequence covers the same material as CHE 105. Prereq: Math ACT of 23 or above (or math placement test), or MA 109 or MA 110.

CHE 110 GENERAL CHEMISTRY II. (4)
A continuation of CHE 109; CHE 109 and 110 are equivalent to CHE 105. Prereq: CHE 109 with grade C or better.

CHE 111 GENERAL CHEMISTRY LABORATORY. (1)
A laboratory course, to accompany CHE 105 or CHE 110, dealing with the properties of chemical substances and providing an introduction to quantitative chemical analysis. Prereq or coreq: CHE 105 or CHE 110.

CHE 113 GENERAL CHEMISTRY III LABORATORY. (2)
A laboratory course, to accompany CHE 107, emphasizing qualitative and quantitative chemical analysis. Prereq: CHE 111; prereq or concur: CHE 107.

CHE 195 GENERAL CHEMISTRY WORKSHOP I. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 195 need not be accompanied by enrollment in CHE 195. Prereq: Concurrent registration in CHE 195 required.

CHE 197 GENERAL CHEMISTRY WORKSHOP II. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 110 need not be accompanied by enrollment in CHE 197. Prereq: Concurrent registration in CHE 197 required.

CHE 199 RESEARCH EXPERIENCE IN CHEMISTRY. (0)
Participation in laboratory research in chemistry. Offered pass/ fail only. Prereq: Permission of instructor.

CHE 226 ANALYTICAL CHEMISTRY. (3)
An introduction to the theory and practice of quantitative chemical analysis. Lecture, 2 hours; laboratory, 3 hours. Prereq: CHE 107 and CHE 113.

CHE 230 ORGANIC CHEMISTRY I. (3)

CHE 231 ORGANIC CHEMISTRY LABORATORY I. (1)
Laboratory for CHE 230 or CHE 236. Laboratory, three hours per week. Prereq: CHE 113; prereq or concur: CHE 230 or CHE 236.

CHE 232 ORGANIC CHEMISTRY II. (3)
A continuation of CHE 230. Prereq: CHE 230 with grade C or above.

CHE 233 ORGANIC CHEMISTRY LABORATORY II. (1)
Laboratory for CHE 232. Laboratory, three hours per week. Prereq: CHE 231. Prereq or concur: CHE 232.

CHE 236 SURVEY OF ORGANIC CHEMISTRY. (3)
A one-semester course in organic chemistry. Not open to students who have already completed both CHE 230 and 232. Prereq: CHE 107 and 113.

CHE 250 FORENSIC SCIENCE ON TELEVISION. (3)
This course introduces students to the basic chemical and biochemical principles of forensic science utilized on popular science/science fiction television shows. Forensic science involves the application of techniques from instrumental chemical analysis and molecular biology to identify and quantify evidence collected from crime scenes. By using popular television shows to introduce specific techniques students should gain a basic understanding of the capabilities and limitations of forensic science as it is presently practiced. Prereq: CHE 103 or CHE 104 or CHE 110 or CHE 105.
CHE 295 ORGANIC CHEMISTRY LABORATORY. (2)
A one-semester survey of thermodynamics, chemical kinetics, and quantum chemistry with an elementary introduction to spectroscopy. Prereq: PHY 213 or PHY 232; MA 114; CHE 226 or MA 213.

CHE 413 INORGANIC CHEMISTRY I. (3)
A laboratory course for graduate students in the synthesis, characterization, and properties of inorganic and organometallic compounds of both main-group and transition elements. Laboratory, six hours per week. Prereq: CHE 410G, or concurrent or concur: a physical chemistry course at or above the 400 level.

CHE 414 INORGANIC CHEMISTRY II. (3)
A laboratory course that acquaints the student with the synthesis, characterization, and properties of inorganic and organometallic compounds of both main-group and transition elements. Laboratory, six hours per week. Prereq: CHE 514 or equivalent; or permission of instructor.

CHE 514 DESCRIPTIVE INORGANIC CHEMISTRY. (3)
A course dealing in detail with descriptive chemistry of the elements and their compounds, excluding the hydrocarbons and their derivatives. Prereq: CHE 226 and CHE 232, or CHE 450G, or permission of instructor.

CHE 516 INORGANIC MATERIALS CHEMISTRY. (3)
Introduction to solid state inorganic materials chemistry, including atomic structure; optical, electronic, and magnetic properties; and characterization methods such as x-ray diffraction and electron microscopy. Prereq: CHE 440G or CHE 547 or equivalent; and CHE 410G or 510G, or permission of instructor.

CHE 520 RADIOCHEMISTRY. (3)
Applications of radionuclides in chemistry with emphasis on principles of radioactive decay, interactions of radiation with matter, use of isotopic tracers, activation analysis, isotope dilution analysis, hot atom chemistry and nuclear dating methods. Prereq: CHE 107, or 226.

CHE 524 CHEMICAL INSTRUMENTATION. (3)
Aspects of electronics, microcomputers, computer interfacing, and data analysis as they apply to chemical measurements and measurement systems. Lecture, two hours; laboratory, six hours per week. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 525 BIOANALYTICAL SENSORS. (3)
Theory, principles, and applications of bioanalytical sensors and sensing systems, including transducers, molecular recognition, and microfabrication. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 526 CHEMICAL SEPARATIONS. (3)
An advanced study of the theory, instrumentation, and analytical applications of chemical separation methods. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 532 SPECTROMETRIC IDENTIFICATION OF ORGANIC MOLECULES. (2)
A discussion of nuclear magnetic resonance, ultraviolet and infrared spectroscopies, and mass spectrometry in the determination of the structure and stereochemistry of organic molecules. Prereq: CHE 231 and CHE 232.

CHE 533 ADVANCED ORGANIC CHEMISTRY LABORATORY. (2)
The practice of synthesis, purification, and characterization of organic compounds in the modern chemistry laboratory. Laboratory, six hours. Prereq: CHE 532.

CHE 535 SYNTHETIC ORGANIC CHEMISTRY. (3)
A general survey of organic chemistry with emphasis on synthetic methods and the synthesis of natural products. Prereq: CHE 232.

CHE 536 ORGANIC MATERIALS: ELECTRONIC AND PHOTONIC PROPERTIES. (3)
A description of relationships between molecular structure and optical and electronic properties, focusing on changes in properties moving from single molecules to aggregates to bulk solid states. Electronic structure and photonic properties of organic molecules, solid-state polymers and interfaces will be considered. Material characteristics will studied in the types of devices where organic materials show promising performance: displays, lighting, transistors, energy conversion/storage applications, and non-linear optics technologies. Prereq: CHE 232 or PHY 232, or permission of the instructor.

CHE 537 PRINCIPLES OF PHYSICAL CHEMISTRY I. (3)
A general survey of the field of organic chemistry. Topics emphasized are: mechanistic principles relating molecular structure to reaction outcome, stereoisomerism and its effect on chemical reactivity, and simple molecular orbital theory as required to understand aromaticity and to predict the occurrence and stereochemistry of pericyclic reactions. Prereq: CHE 232.

CHE 547 PRINCIPLES OF PHYSICAL CHEMISTRY II. (3)
An introduction to quantum chemistry and spectroscopy, emphasizing modern applications of quantum theory to the calculation of molecular properties. Practical experience with quantum chemistry software on various computer platforms is included. Prereq: MA 213; PHY 213 or 232; or consent of instructor.

CHE 548 PRINCIPLES OF PHYSICAL CHEMISTRY III. (3)
Fundamental principles of classical physical chemistry, including thermodynamics, statistical thermodynamics, and chemical kinetics. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 550 BIOLOGICAL CHEMISTRY. (3)
An introduction to biological chemistry. Topics include amino acids and proteins; nucleic acids and nucleotides; enzyme structure, function and energetics; metabolism including glycolysis; the tricarboxylic acid cycle; electron transport and oxidative phosphorylation; glycogen metabolism; hormone action; and other aspects of modern biological chemistry. Prereq: CHE 232.

CHE 552 BIOLOGICAL CHEMISTRY II. (3)
A further introduction to biological chemistry. Topics include lipid metabolism, biosynthesis and metabolism of nitrogen-containing compounds, storage and utilization of genetic information, immunology, and other contemporary topics in biological chemistry Prereq: CHE 232.

CHE 560 BIOLOGICAL INORGANIC CHEMISTRY. (3)
This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.
CHE 553 CHEMISTRY AND MOLECULAR BIOTECHNOLOGY. 
This course focuses on the chemical aspects of biotechnology development. Current topics in biotechnology are emphasized through extensive reading and classroom discussion of the most recent scientific literature. Biotechnology development in fields as diverse as agriculture, the environment, and medicine will be covered. Prereq: An introductory course in biology, biological chemistry, or biochemistry; and CHE 232; or consent of instructor.

CHE 555 HOMONUCLEAR NMR. 
This course will give students hands-on experience with modern NMR experiments that are the mainstays of chemical structural analysis and physical studies of macromolecules and pharmaceuticals. Lecture, two hours; laboratory, three hours per week. Prereq: CHE 232 or CHE 236; and a physical chemistry course at or above the 400 level.

CHE 556 ELEMENTS OF NEUROCHEMISTRY. 
A course in the neuroscience of the brain. Among topics to be covered: brain cell cytoarchitecture; chemical bases for: neuronal membrane transport, electrical excitability, and ion channels; axonal transport; energy metabolism; synaptic transmission; cellular signaling; Ca2+ homeostasis; neurotransmitters; oxidative stress; apoptosis and necrosis; application of neurochemical principles to the molecular bases of neurodegenerative disorders. Prereq: CHE 232 and a biological chemistry course, or consent of instructor.

CHE 558 HORMONE RECEPTORS AND CELL SIGNALS. 
This course starts with the general concepts on hormones and their receptors and describes how hormones interact with their receptors and generate hormone signals and responses. Prereq: BIO 315 or equivalent, BCH 410G or equivalent, CHE 550 or 552 or equivalent, or consent of instructor.

CHE 559 MOLECULAR BIOPHYSICS. 
Overview of intermolecular forces responsible for formulation tertiary structure and macro-molecular assemblies, as well as linked equilibria, allosterity and propagation of signals. Extension of these principles to explain macromolecular machines, complex molecular behavior and, ultimately, processes of life. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 565 ENVIRONMENTAL CHEMISTRY. 
A study of the sources, reactions, transport, effects, and fates of chemical species in the atmosphere, hydrosphere, lithosphere and biosphere. Prereq: Two semesters of general college chemistry are required. Courses in analytical and physical chemistry are recommended, but are not required.

CHE 566 ORGANIC MATERIALS: CHARACTERIZATION AND DEVICES. 
A study of applications of organic materials in electronic and optical devices, focusing on appropriate material selection, processing, and interpretation of device output. Will cover basic methods for the formation of thin films of organic molecules and polymers, various spectroscopic techniques relevant to device performance, and methods to form and measure devices such as transistors and light-emitting diodes. Hybrid organic-inorganic material systems, and complex device structures for all-organic circuitry will be discussed. Prereq: CHE 232 and PHY 213 or PHY 232, or permission of the instructor.

CHE 567 ORGANIC MATERIALS: FABRICATION LABORATORY. 
A laboratory course focused on the fabrication and characterization of organic and organic-inorganic hybrid electronic devices. Although a stand-alone course, the laboratory will cover practical aspects related to topics covered in CHE 536 and 566, including processing methods and characterization of optical and electronic properties of organic materials and thin films. Prereq: CHE 536 or CHE 566, and PHY 213 or 232, or permission of the instructor.

CHE 576 POLYMER CHEMISTRY. 
Introduction to the theory and practice of polymer chemistry and polymer characterization. Prereq: CHE 230 and CHE 226; or permission of the instructor.

CHE 580 TOPICS IN CHEMISTRY. 
(1-3) A detailed investigation of a topic of current significance in chemistry. May be repeated to a maximum of nine credits. Lecture and/or laboratory: variable. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 610 CHEMISTRY OF THE TRANSITION METALS. 
A detailed treatment of the chemistry of the transition elements, lanthanides and actinides, including the structure of coordination complexes, bonding, reaction mechanisms and preparations. Prereq: CHE 510.

CHE 612 INORGANIC CHEMISTRY OF THE NON-METALS. 
A detailed treatment of the inorganic chemistry of the nonmetals. Topics include theories of bonding, spectral characteristics, reaction mechanisms, preparations, physical methods of characterization and structural determination, and applications. Prereq: CHE 510.

CHE 614 ORGANOTRANSITION METAL CHEMISTRY. 
A detailed treatment of the organometallic chemistry of the transition metals, including lanthanides and actinides. Topics include synthesis, structure, bonding theories, reactions, characterization by physical methods, and applications in organic chemistry and catalysis. Prereq: CHE 232, and CHE 410G or 510, and a physical chemistry course at the 400 level or above, or consent of instructor.

CHE 620 ELECTROCHEMICAL METHODS OF ANALYSIS. 
An intensive study of the fundamental theories and principles of electrochemistry, and their practical applications for physical and quantitative analytical measurements. Topics include potentiometric, voltammetric, amperometric, and coulometric methods. Prereq: CHE 522 or a physical chemistry course at the 400 level or above.

CHE 623 CHEMICAL EQUILIBRIUM AND DATA ANALYSIS. 
An advanced treatment of chemical equilibrium, sampling, and the evaluation of data obtained from chemically related measurements. Prereq: CHE 226 or 522 or a physical chemistry course at the 400 level or above.

CHE 625 SPECTROCHEMICAL ANALYSIS. 
An intensive study of the theory, instrumentation, and analytical applications of modern atomic and molecular spectrometric methods. Prereq: CHE 522.

CHE 626 ADVANCED ANALYTICAL CHEMISTRY. 
An advanced study of the theory and practice of quantitative analysis.

CHE 640 CHEMICAL CRYSTALLOGRAPHY. 
An introduction to modern small-molecule crystallography with emphasis on typical applications of interest to synthetic chemists. Prereq: CHE 232 and a physical chemistry course at the 400 level or above.

CHE 643 SPECTROSCOPY AND PHOTOPHYSICS. 
An integrated treatment of modern spectroscopy and photophysics. Topics to include atomic spectroscopy, microwave, infrared and UV-visible spectroscopy of diatomic and polyatomic molecules, lasers, creation and detection of excited states, fluorescence, phosphorescence, radiationless processes and photochemical transformations. Prereq: CHE 547 or 446G or permission of instructor.

CHE 646 CHEMICAL KINETICS. 
Studies of chemical reactions from the standpoint of velocity and mechanism. Prereq: CHE 442G.

CHE 664 MULTIDISCIPLINARY SENSORS LABORATORY. 
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and, sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CME/EE/MSE 664.)

CHE 666 PROTEOMICS AND MASS SPECTROMETRY. 
A course in the identification, characterization, and quantification of the proteins in tissues and cells. Mass spectrometric methods are of central importance, and those techniques (including data analysis) are a major focus of the course. Prereq: CHE 232, a course in physical chemistry at or above the 400-level.

CHE 668 SYMMETRY AND CHEMICAL APPLICATIONS. 
An integrated treatment of fundamentals, techniques, and chemical applications of molecular symmetry and group theory. Prereq: A physical chemistry course at the 400-level, or consent of instructor.

CHE 736 TOPICS IN ORGANIC CHEMISTRY. 
(2-4) Selected topics which may include heterocyclic organic compounds, natural and synthetic dyes, carbohydrates, nitrogen compounds, and recent advances in the field of organic chemistry. May be repeated to a maximum of 12 credits.

CHE 746 TOPICS IN PHYSICAL CHEMISTRY. 
(2-4) Selected topics which may include photochemistry, structure of crystals, molecular spectra, nature of the chemical bond, and other recent advances in the field of physical chemistry. May be repeated to a maximum of 12 credits. Prereq: A physical chemistry course at the 400 level or above.

CHE 748 MASTER'S THESIS RESEARCH. 
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CHE 749 DISSERTATION RESEARCH. 
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CHE 767 DISSERTATION RESIDENCY CREDIT. 
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CHE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. 
May be repeated to a maximum of 12 hours.

CHE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. 
May be repeated indefinitely.

CHE 772 SEMINAR IN CHEMISTRY INSTRUCTION. 
A seminar for teaching assistants on the methods and techniques of effective instruction in laboratory and recitation classes in chemistry. Required of all new graduate teaching assistants. Prereq: Admission to M.S. or Ph.D. program in chemistry.
Course Descriptions

CHE 776 GRADUATE SEMINAR. (3)
Reports and discussions on recent research and current literature. Required of all graduate students. Prereq: Graduate Standing.

CHE 779 MEMBRANE SCIENCES COLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CME/PHAR 779.)

CHE 780 INDIVIDUAL WORK IN CHEMISTRY. (1-5)
Selected library and laboratory problems in conformance with the student’s interest will be attacked and pursued under the direction of a suitable staff member who is proficient in the area under investigation.

CHE 790 RESEARCH IN CHEMISTRY. (1-12)
Work may be taken in the following fields, subject to the approval of the Departmental Graduate Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry, radiochemistry, or physical chemistry. May be repeated indefinitely.

CHI Chinese Culture and Language

CHI 101 BEGINNING CHINESE I. (4)
A course in first semester Chinese language.

CHI 102 BEGINNING CHINESE II. (4)
A course in second semester Chinese language. Prereq: CHI 101 or equivalent.

CHI 201 INTERMEDIATE CHINESE I. (4)
A course in third semester Chinese language. Prereq: CHI 102 or equivalent.

CHI 202 INTERMEDIATE CHINESE II. (4)
A fourth semester course in Chinese language. Prereq: CHI 201 or equivalent.

CHI 301 ADVANCED INTERMEDIATE CHINESE I. (3)
A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced, focus-on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 202 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 302 ADVANCED INTERMEDIATE CHINESE II. (3)
A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced, focus-on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 301 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 320 GENDER POLITICS IN CHINESE LITERATURE. (3)
An interdisciplinary, multimedia approach to the representation of gender relations in Chinese literature over time. Critical engagement of such topics as the complex relationships between women’s issues and national discourse, between identity and performance, between the construction of female subjectivity and male fantasy, between gender and genre. Students will be encouraged to conduct cross-genre and cross-cultural comparisons. All readings in English. Prereq: Junior status or consent of instructor.

CHI 321 INTRODUCTION TO CONTEMPORARY CHINESE FILM. (3)
The course offers an overview of major films, directors and actors in the contemporary PRC, Taiwan and Hong Kong. It examines the genres of Chinese film better known in the U.S., including the Hong Kong action film, fifth-generation mainland cinema and Taiwanese urban dramas. The course will provide an understanding of contemporary Chinese cinema through analyses of the content and style, politics and politics of films/filmmakers/film movements, that reflect the Chinese cultural value system and differing Chinese aesthetics vis-a-vis Western and Hollywood views. All films are screened with English subtitles. Prereq: Junior status or consent of instructor.

CHI 322 SELF AND SOCIETY IN CHINESE CULTURE. (3)
This course takes an interdisciplinary approach to the concept of the self and its relationship to larger social categories such as family and society in Chinese culture. Critical approaches to topics such as self expression in art and literature over time and across genres, self-cultivation, gender, consciousness, modernity, and transnational identity. Course readings will include philosophical and religious texts as well as literature, historical writing, and material culture in its various forms. Prereq: Junior status or consent of instructor.

CHI 323 CHINESE DRAMA – FROM PAST TO PRESENT. (3)
An interdisciplinary course that introduces students to the drama and oral performances of China from their origins in early time to their contemporary developments. Focuses will be the history and aesthetics of Chinese tragic art as well as works of regional dramatic forms. Students will also learn to appreciate Chinese performances in terms of both their social, political and historical context and their structural and formal properties. The course will be conducted in English and all required readings are English as well. Students are not expected to know Chinese to take this course.

CHI 330 INTRODUCTION TO CHINESE CULTURE, PRE-MODERN TO 1840. (3)
Some of the major questions to be addressed include: Is “China” the oldest continuous civilization? Was it culturally and ethnically homogeneous? Was Chinese traditional society and culture “patrimonial”? To what extent was the state successful in penetrating into the daily lives of individuals? Course assignments will include primary and secondary literature (entirely in English) as well as visual and material culture sources. No prior knowledge of Chinese history, culture, or language required.

CHI 331 INTRODUCTION TO CHINESE CULTURE, 1840 TO PRESENT. (3)
This course introduces students to modern Chinese history, society, and culture from 1840 to the present, with a special focus on developments in the twentieth century. We will investigate three sets of major problems: (1) China is often seen as an ethnically and culturally homogeneous society, but what is China and (Han) Chinese? (2) How did China transition from a multi-ethnic empire to a modern nation state? (3) What does modernity mean in the Chinese context? Aside from these specific objectives, this course will also teach students to analyze written and visual texts found in various genres. No prior knowledge of Chinese history, culture, or language required.

CHI 333 CHINESE SHORT STORIES. (3)
This course takes an interdisciplinary approach and analyzes the issues of didacticism in story-telling, the problems of interpretation and the balance between entertaining and enlightening and the art and techniques of narration in traditional Chinese short stories. By reading Taoist, Buddhist, detective and fox and ghost stories as windows onto the social practices and values of traditional China, the course investigates broad social concerns such as identity, gender, sexuality and morality in pre-modern China. The course will be conducted in English and all required readings are in English as well. Students are not expected to know Chinese to take this course.

CHI 334 TRADITIONAL CHINESE MEDICINE. (3)
This course is an interdisciplinary introduction to the history of Chinese medicine: its philosophy, theories, practices and transformations. Drawing on cultural history, anthropology, and gender studies, this course investigates Chinese medicine in its intellectual, social and cultural context and emphasizes the following components: 1) reading primary texts in translation; 2) a historical overview of the development of Chinese medicine; 3) examining different methodological approaches. The course will be conducted in English and all required readings are in English as well. Students are not expected to know Chinese to take this course.

CHI 345 INTRODUCTION TO EARLY CHINESE THOUGHT. (3)
This course will examine the intellectual history of China’s classical period, from the late Shang until the sixth century CE, and critically engage fundamental concepts of early Chinese philosophy and religion including: the Dao, the discourses of tradition, formation of philosophers’ “schools,” cosmic and social gender, the Sage, and human nature. This course will also consider “Religion” and “Philosophy” as terms of inquiry, and synthesize this literature to describe and analyze changes and continuities to Chinese thought during the classical era.

CHI 395 INDEPENDENT WORK IN CHINESE. (1-3)
Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

CHI 401 ADVANCED CHINESE I. (3)
The course builds on material covered in CHI 302 and will cover a wide range of materials, including dialogues and newspaper articles. It will facilitate oral and written practice, allow students to communicate in real-life situations, and read and write Chinese texts with minimal aid of pinyin. Prereq: CHI 302 or equivalent.

CHI 402 ADVANCED CHINESE II. (3)
This course builds on the linguistic skills acquired in previous Chinese study and further trains students in advanced use of the language, including listening, speaking, reading and writing. The course will expand students’ vocabulary and improve students’ reading and writing, listening and speaking skills. The topics of the lessons cover the social changes in contemporary China and cultural developments in their social context. Prereq: CHI 401 or equivalent.

CHI 430 POPULAR CULTURE IN MODERN CHINA. (3)
This course provides a critical examination of modern Chinese popular culture and its global cultural significance in the contemporary world. From film to literature, music to theatre, this course will probe modern Chinese popular culture as it has manifested itself, and trace its sociopolitical, aesthetic, and affective impact on the contemporary world.

CHI 450 DAOISM. (3)
Interdisciplinary examination of the development of Daoism, China’s indigenous philosophico-religious tradition. Includes critical approaches to texts that are central to the doctrines, concepts, and practices of Daoism, and an assessment of its impact on Chinese art, poetry, fiction, and historical writing form all periods of Chinese history. This course will also offer a discussion of Daoism and its emergence in 20th century American culture and evaluate its impact and effects on North American pop culture, alternative culture, and new religious movements.
CI 495G ADVANCED INDEPENDENT WORK IN CHINESE. (1-3)
Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of CHI 395 and 495G.

CHI 511 LITERARY CHINESE. (3)
This course builds on linguistic skills learned in previous study of Chinese and Japanese, introducing the grammar, vocabulary, and concepts of Literary Chinese. The class will focus on early texts written in what is often referred to as “Classical Chinese,” which flourished from the late Zhou to the end of the Han dynasty (220 CE) and was the common written language of East Asia. Prereq: CHI 301 or JPN 301 or consent of instructor.

CHS College of Health Sciences

CHS 101 AN INTRODUCTION TO HEALTH PROFESSIONS FOR EXPLORATORY STUDENTS. (2)
This course introduces students to the health sciences professions and explores healthcare related careers. Students engage in self-reflection, in-class and co-curricular activities to enhance their awareness of personal strengths, interests, values, and goals to assist them in confirming or choosing a major and/or career pathway. Guest speakers, lectures, and assigned readings assist students in understanding the broader context of healthcare, trends in health practice, accreditation and certification requirements of various professions, health care delivery environments, and professional roles and responsibilities as members of an interprofessional health care team. The overall course goal is to promote informed decision-making as health sciences students begin their academic preparation within the health professions. Prereq: College of Health Sciences Exploratory Student or permission of the instructor.

CHS 150 INTRODUCTION TO INTERPROFESSIONAL HEALTHCARE SEMINAR. (3)
This course is designed to introduce entry-level health care students to the importance and role of collaborative practice in healthcare for the purpose of building effective teams that can achieve optimal healthcare outcomes, promote patient safety, and organizational function. Students will learn the foundational skills and knowledge of core interprofessional competencies including professionalism, shared values and ethics, roles and responsibilities, interprofessional communication, and the development of teams and teamwork. Conceptual models through which an understanding of interprofessional healthcare practice will be presented. The International Classification of Functioning, Disability and Health (ICF) will form a key theoretical model to help develop a holistic perspective of patient care and develop a shared interprofessional framework and language. Prereq: CHS major or consent of instructor.

CHS 354 INTERPROFESSIONAL EVIDENCE-BASED DECISION MAKING. (3)
This course prepares CHS majors for their careers by helping them understand the evidence-based decision making paradigm. Students in this course will apply evidence-based decision making skills in order to conduct a literature review, design a research question/hypothesis, and evaluate research studies. Prereq: CHS/WRD 110/111/112 or equivalent; not to be taken concurrently with CHS 150.

CI Communication and Information

CI 601 PROSEMINAR IN COMMUNICATION. (3)
Introduction to graduate study; theory and systems, research strategies. Prereq: Graduate standing in communication or consent of instructor.

CI 608 MASS COMMUNICATIONS AND SOCIETY. (3)
A study of the ways in which the communications media play their roles in contemporary society with special attention to the major functions, rights, and responsibilities of media and individuals. Prereq: Graduate standing in communication or consent of instructor.

CI 610 PARTICIPATORY COMMUNICATION. (3)
This seminar will provide students with a state of the art account of the underlying philosophical, theoretical, and methodological premises of participatory communication. This will help students gain a deep understanding of participatory communication theory and research, and their implications for such contexts as management and organizational communication, health communication, international development, journalism, democracy and civic engagement, public policy, and communication with marginalized groups. Prereq: At least one year of graduate study in communication or consent of instructor.

CI 615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS. (3)
This course is an introductory graduate-level survey of theory and research on human communication mediated by communication and information technologies. This course is designed to cover the areas not typically addressed in traditional courses of mass or interpersonal communication, including theory and research on the use of computers and electronic communication over a variety of communication and information systems. Prereq: Graduate standing or consent of instructor. (Same as LIS 615.)

CI 616 FOUNDATIONS IN INSTRUCTIONAL COMMUNICATION. (3)
Instructional communication is a blending of three disciplines including pedagogy (i.e., teaching), educational psychology (i.e., cognitive learning), and communication. Although each of these unique disciplines is embedded in its own theoretical and research tradition, this course will focus on where these three disciplines intersect. We will examine and criticize various communication and instructional models, plan for and deliver instruction in both in-person and computer-aided venues, learn various methods for assessing teaching and learning, and discuss the ethical and political aspects of instructional delivery in various professional contexts, with a special emphasis on those in academic, information, and organizational settings.

CI 619 PROSEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION. (3)
Examines important issues in communication from a global perspective. In-depth study of international communications systems, international information flow, problems that occur in communicating with members of different cultures or subcultures, and development of theories and strategies for improving international communications at the mass, organizational, and interpersonal levels. Prereq: CI 601 and graduate standing in communication or consent of instructor.

CI 625 PROSEMINAR IN ORGANIZATIONAL COMMUNICATION. (3)
This course is an introductory graduate-level survey of theory and research in the area of organizational communication and related topics. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Prereq: Graduate standing in communication or consent of instructor.

CI 629 INTRODUCTION TO MEDICAL INFORMATICS. (3)
This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical Informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including patient care, research, and education. During the semester we will explore a number of topics central to understanding the field, including: the nature of biomedical information, the electronic medical record, the role of informatics in supporting clinical decision making, healthcare and informatics standards, information retrieval, system analysis and technology assessment, and essential issues of information technology in medical education and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and can use this as a foundation for further education, training, and work in health informatics professions. (Same as LIS 629.)

CI 630 PROSEMINAR IN MASS MEDIA LAW AND PUBLIC POLICY. (3)
Study of mass communication law and policy-making. Intensive review of court decisions, statutes and administrative rules and regulations regarding libel, privacy, public access to government meetings and documents, intellectual property, broadcast regulation, commercial and corporate speech, obscenity and protection of news sources. Prereq: CI 601 and graduate standing in communication or consent of instructor.

CI 631 PROSEMINAR IN INTERPERSONAL COMMUNICATION. (3)
The course reviews existing and emerging theoretical, perspectives relevant to the context of interpersonal communication. Emphasis is on theories of message production and reception, identity management, relationship development, and related processes. Methods of investigation unique to the study of interpersonal interaction are also addressed. Students are expected to be familiar with general communication theory and basic research methods prior to enroling in the course.

CI 636 ASSESSMENT AND EVALUATION METHODS IN APPLIED COMMUNICATION RESEARCH. (3)
Practical and methodological considerations in applied instructional settings (e.g., training, workshops, teaching, online courses, conference proceedings), goals are set for specific outcomes to be achieved, whether they are affective, cognitive, or behavioral. In these instructional contexts, assessment is used for the evaluation of new program or intervention. Additionally, assessment is used to improve upon existing programs and interventions. Students will learn how to develop, conduct, and evaluate sound assessment plans, and provide recommendations based on assessment results.

CI 637 INFORMATION TECHNOLOGY. (3)
Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer systems, software evaluation and selection, and system security. Prereq: Consent of instructor. (Same as LIS 637.)

CI 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)
A course examining the structure, development and evolution of the Internet; network protocols and client/server architecture issues; Web page design, authoring, and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTTP (Hypertext Transfer Protocol) and scripting languages; and Internet related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as LIS 638.)

CI 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, and issues in the management of collections and access to health libraries. (Same as ICI/ LIS 640.)

CI 645 PROSEMINAR IN MASS COMMUNICATION THEORY. (3)
A broad examination and critical analysis of major mass communication theories and research areas. Prereq: A course in research methods and graduate standing in communication or consent of instructor.
CI 646 INTERPERSONAL COMMUNICATION IN INSTRUCTION. (3)
Interpersonal communication exists in the relationships between students and instructors and between students, both in and out of the classroom. Although these relationships differ from other interpersonal relationships (e.g., friends, significant others), their impact is no less profound or influential. In this course, students will explore how interpersonal concepts, constructs, theories, and relationships emerge in the classroom and impact the overall instructional environment in terms of learning outcomes, satisfaction, and engagement, among other important instructional outcomes.

CI 651 COMMUNICATION THEORY. (3)
Examination and critical analysis of the major theories of communication processes, including systems theory, structural theories and semiotics, behaviorsim, symbolic interactionism, theories of the social construction of reality, and other theoretical approaches to the study of communication. Prereq: Graduate standing or consent of instructor.

CI 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)
This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master’s degree. (Same as EDS 652.)

CI 656 INSTRUCTIONAL COMMUNICATION AND TECHNOLOGY. (3)
Instructional communication often utilizes technology. Teaching and learning now incorporate a wide variety of technologies, ranging from supplementing traditional lectures to holding classes online with students across the world. This course covers major areas of concern for instructional communication and emerging technologies to explore the landscape of teaching and learning. Through readings, technology demonstrations, and discussion, the class will examine ethical, technological, professional, and scholarly questions.

CI 664 QUALITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
Goals, epistemology and methods of qualitative inquiry in communication. Strengths and limitations of different qualitative research methodologies. Distinctive contributions of qualitative research to theory and practice of communication.

CI 665 QUANTITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
The scientific method. Communication research as part of social science research. Study and practice of quantitative behavioral research techniques which apply to communication. Prereq: Graduate standing in communication or consent of instructor.

CI 668 DATABASE MANAGEMENT. (3)
This course is designed as a first database course for students without any previous experience. The general aim of the course is to understand the basic concepts, principles, and hand-on experiences on database systems. The course will evolve from understanding, visualizing, and analyzing data. Then transition to understanding relational databases by designing and building databases using Access and querying using Structured Query Language (SQL). Prereq: LIS 636 or permission of instructor. (Same as LIS 668.)

CI 671 PROSEMINAR IN HEALTH COMMUNICATION. (3)
This course is designed to provide a broad introduction to communication in a health care context. Topics may include—health care provider communication, small group communication, communication in health care organizations, intercultural communication in health care, and health images in the mass media. Prereq: Graduate standing in communication or consent of instructor.

CI 682 COMMUNICATION AND PERSUASION. (3)
An advanced course examining the literature in communication and attitude change. Issues in measurement, theory, and philosophical orientation are central. Covers communication broadly, including interpersonal, mediated, and mass communication. Prereq: Graduate standing in communications or consent of instructor.

CI 684 PROSEMINAR IN INSTRUCTIONAL COMMUNICATION. (3)
This course is an introductory graduate-level survey of current theory, research, and current developments in the area of instructional communication. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Hands-on opportunities are provided to construct and refine strategies and resources for instruction. Prereq: Prior teaching experience, or COM 584, or consent of instructor.

CI 685 SEMINAR: PREPARING FUTURE FACULTY FOR THE MULTICULTURAL CLASSROOM. (1)
This course is designed to prepare future communication faculty for facilitating and dealing with diverse student learning in an increasingly multicultural classroom context. Prereq: Recommended CI 684 or GS 650.

CI 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (1-3)
A survey and historical study of multicultural literature for your of all ages. Students will engage in extensive reading, evaluation, and discussion of literature and the issues related to developing an understanding of various cultures and social populations. Prereq: LIS 610 or LIS 614, or consent of instructor.

CI 696 INTERNSHIP IN COMMUNICATION. (3)
Field experience for candidates for the M.A. degree in any field of communications through work in industry, government, education, research or business agencies. Laboratory, 12 hours per week. Prereq: Admission to M.A. program and 18 hours of graduate work. Consent of DGS required.

CI 700 DIRECTED READING IN COMMUNICATION. (1-3)
Individual reading study on some communications aspects not treated in depth in a regular course or of topical interest. Advance consultation regarding reading list and examination procedure required. May be repeated to a maximum of 12 credits. Prereq: Graduate standing in communication or consent of instructor.

CI 719 SEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION (Subtitle required). (3)
Special Topics/Issues in International/Intercultural Communication examines the current and the alternative perspectives in the field of study. Topics/Issues such as the New World Information and Communication Order, Information/Communication Technologies, Communication and Development, Transborder Data Flows, etc., are studied. May be repeated to a maximum of six credits. Prereq: CI 619 and graduate standing in communication or consent of instructor.

CI 721 SEMINAR IN RISK COMMUNICATION. (3)
This course establishes risk communication as a distinct sub-discipline within the communication discipline. Ethical considerations are paramount in all areas covered in the course. Theories of risk communication such as mindfulness, sensemaking, chaos, image repair, issues management, the constraints of structuration, and renewal discourse are discussed in terms of pre-crisis, crisis, and post-crisis. Applied research areas such as best practices, high reliability organizations, terrorism, and health risks are also considered. Ultimately, the course provides an overview of the established and emerging perspectives on risk and crisis from the communication perspective.

CI 722 SEMINAR IN CRISIS COMMUNICATION. (3)
This course follows the crisis communication management process through the stages of pre-crisis, crisis, and post-crisis. The pre-crisis stage discusses planning and environmental scanning. The crisis stage discusses communication strategies for image restoration. The post-crisis stage depicts crisis as an opportunity for organizational learning and for rebuilding or expanding public trust. The course uses a case study approach throughout.

CI 723 SEMINAR IN TRAINING AND CONSULTING. (3)
This graduate course explores communication training and consultation as a research and instructional focus for students interested in applied communication. Students will learn how to identify and assess communication competence and how to develop training programs to enhance communication competency.

CI 725 SEMINAR IN ORGANIZATIONAL COMMUNICATION: (Subtitle required). (3)
This course is concerned with theory and research relevant to organizational communication and related areas of interest. Special attention is given to various topics relevant to a specific subtitle. May be repeated to a maximum of six credits under a different subtitle. Prereq: Graduate standing in communication or consent of instructor.

CI 726 COMMUNICATION LEADERSHIP STUDIES. (3)
The primary purpose of this course is to extend students’ theoretical understanding of leadership from a communication perspective. Specifically, this course is designed to (1) sharpen the students’ understanding of the role of communication in developing effective leadership behaviors; (2) familiarize students with leadership as it relates to the communication process; (3) involve students in major term projects which incorporate current leadership theory and research; and (4) enhance students’ understanding of published research in leadership communication.

CI 730 SEMINAR IN MASS MEDIA AND PUBLIC POLICY (Subtitle required). (3)
The role of mass communications media in making public policy and the effects of public policies on the mass media. One subject area will be investigated each semester; typical topics are (1) political campaign communications; (2) censorship; (3) controversial public issues; (4) rights; (5) international and world agreements. May be repeated to a maximum of six credits under a different subtitle. Prereq: CI 630 and graduate standing in communication or consent of instructor.

CI 731 SEMINAR IN INTERPERSONAL COMMUNICATION (Subtitle required). (3)
Consideration of special problems in interpersonal communication with emphasis on emergence of theory and implications for further research. May be repeated under a different subtitle to a maximum of six credits. Prereq: CI 631 and graduate standing in communication or consent of instructor.

CI 745 SEMINAR IN MASS COMMUNICATION (Subtitle required). (3)
Consideration of selected topics in mass communication theory and research. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate standing in communication or consent of instructor.

CI 747 SEMINAR IN COMMUNICATION THEORY CONSTRUCTION. (3)
Intensive examination of selected topics important to the construction, development, and testing of communication theories and problems. Prereq: Completion of required first-year curriculum for the Ph.D.
CIS 110 COMPOSITION AND COMMUNICATION I. (3)
Composition and Communication I is the introductory course in a two-semester sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

CIS 111 COMPOSITION AND COMMUNICATION II. (3)
Composition and Communication II is the advanced course in a two-semester sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. In this course, students will work in small groups to explore issues of public concern using rhetorical analysis, engage in deliberation, compose conscientious and well-developed arguments, and propose viable solutions to different audiences. Students will sharpen their ability to conduct research; compose and communicate in spoken, written, and visual forms; and work effectively in teams through sustained interrogation of an issue. A significant component of the class will involve students to enhance written and oral presentations and to communicate with public audiences. Prereq: CIS 110.
COURSES IN CULTURE AND CIVILIZATION

CLA 100 ANCIENT STORIES IN MODERN FILMS. (3)
This course will view a number of modern films and set them alongside ancient literary texts which have either directly inspired them or with which they share common themes. In the first part of the course, we will consider the relationship between ancient Greek epic, tragic, and comic literature and the modern cinema. In the second part, we will look at a number of ways in which the city of Rome has been treated as both a physical place and as an idea or ideal in the works of both ancient Romans and modern film-makers.

CLA 131 MEDICAL TERMINOLOGY FROM GREEK AND LATIN. (3)
Latin and Greek roots, prefixes, and suffixes as found in medical terminology. Primarily for pre-medical, pre-dentistry, pre-nursing and pre-veterinary students, but others will be admitted for help in vocabulary building.

CLA 135 GREEK AND ROMAN MYTHOLOGY. (3)
The Greek myths studied both from the standpoint of their meaning to the Greeks and Romans and from the standpoint of their use in later literature and in everyday life. Fullfills Gen Ed Inquiry, Humanities.

CLA 190 INTRODUCTION TO THE NEW TESTAMENT. (3)
This course introduces students to both the role religion can play in human experience and the principles of the interpretation of historical, especially religious, texts by exploring the literary, historical, and cultural dimensions of the Christian Bible, the New Testament. The scholarly and academically rigorous exploration of sacred texts and religion in general, outside the realm of denominational belief, stretches back nearly 200 years, to the time of the birth of such disciplines as archaeology, anthropology, sociology, cultural history, and folkloric studies, all of which contribute to the modern discipline of biblical studies and the historical-critical method of interpretation. The academic study of the New Testament, especially since it is a text already familiar to many students, can in particular serve to teach reasoned analysis and critical thinking, challenge assumptions, and demonstrate the vital relevance of the humanities disciplines to our daily lives.

CLA 191 CHRISTIANITY, CULTURE, AND SOCIETY: A HISTORICAL INTRODUCTION. (3)
A historical introduction to Christianity in its varying cultural contexts, examining the primary developments in its teachings, practices, and structures from its origins to the sixteenth century.

CLA 210 THE ART OF GREECE AND ROME. (3)
A survey of the major forms of art in ancient Western Asia, Greece, and Rome, with emphasis on the comparative typology and cultural significance of the monuments.

CLA 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT. (3)
Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as HIS 229.)

CLA 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE. (3)
Covers the conquests of Alexander the Great, and the main features of the Hellenistic World, the Roman Republic and the Roman Empire to the death of Constantine. (Same as CLA 230.)

CLA 261 LITERARY MASTERPIECES OF GREECE AND ROM. (3)
A survey of major Greek and Roman literary works. Attention will be focused on the various genres of Classical literature, and the course will include comparative analysis of Greek and Latin literary pieces.

CLA 314 ANCIENT (Subtitle required). (3)
Study of the arts and visual cultures of the Ancient World. According to subtitiles, focus may be on selected periods or media of artistic and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as A-H 314.)

CLA 331 GENDER AND SEXUITY IN ANTIQUITY. (3)
A survey of the construction of gender, sexuality, and their relation to and expression in the societies of ancient Greece and Rome. Gender roles, marriage, social problems concerning sex and virginity, and different ways of understanding sexuality and gender in historical contexts are examined through the study of ancient literature, art and the insights of contemporary scholarship.

CLA 382 GREEK AND ROMAN RELIGION. (3)
A broad examination of the varieties of religious practice and experience in the ancient Mediterranean world, particularly in Greece and Rome, with emphasis placed on how dramatically ancient religious concepts and systems differ from those of the modern world.

CLA 390 BACKGROUND TO AND EARLY HISTORY OF CHRISTIANITY TO 150 CE. (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 390.)

CLA 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlining theme of this course is: What it is to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 391.)

CLA 450G SPECIAL TOPICS IN CLASSICAL STUDIES (Subtitle required). (3)
This course offers advanced study of a particular topic in classical studies not covered in other CLA courses. The field of study for this course is broadly conceived, and can include aspects of Greek or Latin philology and literature, as well as the history and culture of antiquity, archaeology and material studies, literary rhetorical theory and criticism, the classical tradition in the humanities, and pertinent topics in the Middle Ages and Renaissance. Format includes lectures and discussions, assigned and supplementary readings, and paper writing. May be repeated to a maximum of nine credits with different topics.

CLA 462G TOPICS IN CLASSICAL LITERATURE (Subtitle required). (3)
A study of a specific genre or genres, or author or set of authors, selected from Greek and Roman literature read in English translation. In addition to developing an appreciation of the works studied and their ongoing contribution to world literature, the course will examine various methods of literary analysis and criticism as well as the historical, social, and cultural contexts of these works in classical antiquity. The course is especially suited for students outside the classical languages who wish to acquire a sophisticated understanding of classical culture and for students interested in comparative literary studies.

CLA 509 ROMAN LAW. (3)
An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as HIS 509.)

COURSES IN LATIN

CLA 205 COMPREHENSIVE INTERMEDIATE LATIN. (3)
An accelerated course offered in the summer session designed to take the student through the material normally covered in the two intermediate-level Latin courses (201 and 202). This course is intended to expand the student’s knowledge of the vocabulary, grammar, and prose idiom of classical and post-classical Latin. There will also be discussions of Roman art, literature, history, and culture and, as time permits, Latin’s role in the development of the English language. Oral exercises will also be part of the instruction. Prereq: CLA 102 or equivalent, or permission of the instructor.

CLA 301 LATIN LITERATURE I (Subtitle required). (3)
An introduction to the literature of Republican Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

CLA 302 LATIN LITERATURE II (Subtitle required). (3)
An introduction to the literature of Imperial Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.
CLA 628 SEMINAR IN LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)
Graduate seminar on an author, a literary form, or a problem from Latin literature of late antiquity or early Christianity, or after the fall of the empire in the west, including the Middle Ages and Renaissance. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

COURSES IN GREEK

CLA 350 PREPARING TO READ GREEK TEXTS. (3)
This course completes the study of fundamentals of the grammar and syntax of Classical Greek and prepares the student to read original Greek texts with competence and confidence. Prereq: CLA 252 or equivalent, or permission of instructor.

CLA 551 GREEK POETRY AND DRAMA (Subtitle required). (3)
A study of one or more works of Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed both on mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 555 GREEK PROSE (Subtitle required). (3)
A study of one or more works of Greek prose literature, which may include history, biography, philosophy, satire, and the novel, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed both on mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 651 SEMINAR IN GREEK POETRY AND DRAMA (Subtitle required). (3)
Graduate seminar in Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 655 SEMINAR IN GREEK PROSE (Subtitle required). (3)
Graduate seminar in Greek prose literature, which may include history, biography, satire, and the novel. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

OTHER ADVANCED COURSES

CLA 395 UNDERGRADUATE INDEPENDENT STUDY IN CLASSICS. (1-3)
An independent investigation of a topic, usually outside of or in considerably greater depth than available in the regular course offerings, in Greek and/or Roman language, literature, history, or culture. The course is designed for advanced undergraduate students under the supervision of a faculty member, and usually takes the form of directed readings, writing, and discussion, with tutorial meetings with the instructor no less than once a week. An advanced undergraduate research paper or equivalent project is the standard product of the course. May be repeated to a maximum of 6 credits. Prereq: Advanced undergraduate experience in Classics and permission of the instructor.

CLA 480G STUDIES IN GREEK AND LATIN LITERATURE (Subtitle required). (3)
A study of one or more works of Classical literature, either Greek or Latin, is designed to offer study in a particular text or author meeting a particular need or demand for graduate students from other disciplines and advanced undergraduate students in Classics. The course is not intended for Classics graduate students. Mastering the language of the text is a fundamental objective of this course, but the historical, social, and cultural milieu will also be studied. May be repeated for credit up to a maximum of six hours.

CLA 580 INDEPENDENT WORK IN CLASSICS. (3)
Courses to meet the needs of the student, including those who wish to study Medieval and/or Renaissance Latin, will be arranged in various areas. May be repeated to a maximum of 12 credits. Prereq: Major standing of 3.0 in the department or consent of instructor.

CLA 615 MANUSCRIPT CULTURES. (3)
This course examines how the vehicle of the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in print and manuscript cultures. (Same as HIS 615.)
CLA 616 PALEOGRAPHY. (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, to expand abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the "archaeology of the book." The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as HIS 616.)

CLA 630 SEMINAR IN CLASSICAL LITERATURE AND CULTURE (Subtitle required). (3)
This graduate seminar offers advanced, intensive study in two particular approaches to the study of Classics, requiring a broader and more inclusive approach beyond the scope of the typical Greek or Latin seminar. These are: 1) the coordinated study of works of both Greek and Latin literature, and 2) the study of a specific research area in classical studies and culture. One of these areas will be the focus of the course each time it is offered. Topics in the coordinated study of Greek and Latin literature can take various forms, such as the passions in Greek and Latin poetry, comparative Greek and Latin drama, Homer and Virgil, etc. Research in classics and culture involves extensive reading of a large body of sources and scholarship on a specific topic of current scholarly interest, along with the use of texts in the original language(s) for course assignments and for the appropriate competence in reading Latin and/or Greek texts expected of all students in the course. Topics may include a focused aspect of Greek and/or Roman society, material culture, early Christianity – and its relation to classical culture, aspects of Medieval or Renaissance culture, or the ongoing influence of classical stories, ideals, and cultural forms in modern media. May be repeated for up to six credits on different topics. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 695 INDEPENDENT STUDY. (1-3)
Independent investigation of a problem under supervision of a graduate faculty member; or directed readings, writing, and discussion in small groups on topics outside the usual seminar offerings, guided by a graduate faculty member. May be repeated to a maximum of nine credits. Prereq: Admission to graduate program, permission of instructor and of departmental Director of Graduate Studies.

CLA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CLA 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CLA 790 RESEARCH IN THE TEACHING OF CLASSICAL LANGUAGES. (3)
Problems in the teaching of Latin and/or Greek in secondary and/or higher education. Objectives, methods, organization of materials, development of curricula, or the history of the field. Prereq: CLA 530 or the equivalent.

CLD - Community and Leadership Development

CLD 102 THE DYNAMICS OF RURAL SOCIAL LIFE. (3)
Introduces major concepts of sociology by exploring social, political and cultural issues confronting rural society and American agriculture, such as: population change, industrialization, energy developments, agricultural change. Student may not receive credit for both this course and SOC 101.

CLD 230 INTRAPERSONAL LEADERSHIP. (3)
This course is designed to provide a foundation for individuals "to get to know themselves better" in the context of leadership. Examination of effective leader characteristics, personality traits, motivation, personal leadership vision and other concepts will encourage students to develop a personal understanding of their own leadership skills and personal growth. In addition, students will determine their own personality style, and learn how to best use this style when leading others. Ultimately, this type of intrapersonal knowledge will serve as the building block for deeper exploration into the field of leadership.

CLD 250 READING CRITICALLY AND WRITING WELL: COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3)
This course will provide students with a foundation in critical thinking through an emphasis on reading, writing and analytical discussions addressing basic agricultural topics, controversial agricultural topics and specific topics in community communications and leadership development. Prereq: ENG 104 and sophomore status. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 260 COMMUNITY PORTRAITS. (3)
This course introduces the social science concept of community. The focus will be on definitions of community, community basics and the different types of communities that exist in society. Students will explore the development of community as defined by place and interest, structure and function. Finally, students will begin developing a theory to practice mentality by gathering and analyzing information about real communities that represent different types of community (i.e. place, practice and interest).

CLD 305 RESEARCH METHODS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
This course will familiarize students with research concepts, methods, and skills used in community and organizational development and communication. The course focuses on applied research topics such as secondary data analysis, survey design, focus groups, key informant interviews and content analysis. In addition, the course considers the policies of information and ethical concerns in social research. Prereq: Major standing and CLD 300 (may be taken concurrently).

CLD 320 COMMUNITY AND COMMUNICATION: EXPLORING THEIR INTERSECTIONS. (3)
This course will explore the inextricable link between community and communication by examining the social structure of communities and the media residing within them. Particular emphasis will be placed on the availability of information to citizens and in turn how this information environment facilitates/limits social interaction. Prereq: Community and Leadership Development majors or consent of instructor.

CLD 325 WRITING FOR COMMUNITY MEDIA. (3)
This 3-hour course will teach students how to write clearly, concisely and accurately for various community media, including print, radio, television and new social media. It provides a broad-based understanding of writing and communicating to community audiences. Prereq: Major standing in CLD plus completion of graduation writing requirement.

CLD 330 INTERPERSONAL SKILLS FOR TOMORROW’S LEADERS. (3)
This course provides fundamental leadership theories, models, and perspectives to aid students in conducting interpersonal relationships in their daily lives, and help students acquire skills basic to becoming a leader in their professional lives. Each student will begin developing a personal understanding of practical leadership skills and elements. Prereq: Major standing in CLD.

CLD 340 COMMUNITY INTERACTION. (3)
Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attitudes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as SOC 340.)

CLD 360 ENVIRONMENTAL SOCIOLOGY. (3)
A sociological study of the inter-relation of human behavior, the environment, the culture and society. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as SOC 360.)

CLD 362 FIELD EXPERIENCE IN CLD. (3)
Supervised experiences in businesses, agencies or government. Required of all Community Communications and Leadership Development majors. Includes observation, participation, experience, fieldtrips, inspection of programs, and professional organizations. Prereq: Junior standing, majors only.

CLD 370 LEARNING IN SOCIETY. (3)
Learning in Society is designed to assist students in identifying and evaluating human learning and development within various social contexts. This course focuses on the impact social interactions have on human cognition, emotion and identity. Theoretical foundations for this course include social learning, social integration, multiple intelligences, emotional intelligence, systems psychology, and identity development. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 375 CONTEMPORARY ADULT LEARNING. (3)
This course expands on adult learning theory first presented by Malcolm Knowles and focuses on the idea of lifelong learning, differences between pedagogy and andragogy, fundamental andragogical concepts, and the role that adult learning professionals play in the adult learning process. Finally, an international context will be explored by comparing and contrasting adult education in the U.S. and around the world. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 380 GLOBALIZATION: ACROSS-CULTURAL PERSPECTIVE. (3)
A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as SOC 380.)

CLD 395 SPECIAL PROBLEMS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-3)
Directed independent study of an selected problem in the field of community and leadership development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

CLD 399 EXPERIENTIAL LEARNING IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-3)
A field-based learning experience, under faculty supervision, in the application of community and leadership techniques in agricultural public issues. May be repeated to a maximum of six credits. Offered on a pass/fail basis only. Prereq: Consent of instructor and completion of learning contract.
CLD 400 AGRICULTURAL COMMUNICATIONS CAMPAIGNS. (3)
Exploration of communications campaigns and strategies in the agricultural sector. Students will learn how to plan and enact communications campaigns centered on agricultural issues and audiences. Prereq: Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 401 PRINCIPLES OF COOPERATIVE EXTENSION. (3)
Philosophy, history, and development of Cooperative Extension Service; evaluation of instructional techniques; leadership training; and practice in use of Extension methods. Open to junior and senior students.

CLD 402 PRINCIPLES OF LEADERSHIP. (3)
This course is designed to provide an introduction to leadership. Its focus is the development of an understanding of leadership theories and styles. You will also learn strategies for successful leadership. The course introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership styles and strategies for success, and 3) examination of the responsibilities of leadership. Prereq: Admission to the program or consent of instructor. (Same as EDL 402.)

CLD 403 LEADERSHIP AND COMMUNICATION. (3)
This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as EDL 403.)

CLD 404 CONTEMPORARY LEADERSHIP APPLICATIONS. (3)
This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as EDL 404.)

CLD 420 SOCIOLOGY OF COMMUNITIES. (3)
A sociological study of issues relevant to communities. Topics may include: conceptual approaches to community; organizational and institutional linkages within and beyond the community; social inequality and social processes within communities such as social networks, social capital, social cohesion, power and decision-making, and social change. Prereq: SOC 101 or RSO 102 or CLD 102; and one of the following: SOC 302 or 304 or CLD 405; or consent of instructor. (Same as SOC 420.)

CLD 430 LEADING IN COMMUNITIES: VISION, ACTION, AND CHANGE. (3)
This course examines the nuances of leadership within communities. To learn what makes an effective community leader and the role a leader plays in community action, students will explore the importance of framing ideas, mobilizing resources, and developing social capital. This course expands on theories to highlight correlations with servant leadership, community behavior, and collaborative leadership styles. Finally, working with community visions, change and ambiguity will reinforce the need for flexibility within the community leader’s toolkit. Prereq: Major standing in CLD.

CLD 440 COMMUNITY PROCESSES AND COMMUNICATION. (3)
This course examines the relationship between community organization and change and the media. Special emphasis is given to the place of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD/SOC 340 or consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration. (Same as SOC 440.)

CLD 460 COMMUNITY DEVELOPMENT AND CHANGE. (3)
This course examines change and change management within communities and organizations. This includes looking at the change process through the eyes of innovation, opinion leader and community member. In addition to individual skill development, this course will introduce a vision of an ideal organization/community, one that supports innovation and creativity, knowledge exchange and application and collaboration; a culture that makes productive change a part of the everyday work, encouraging initiative and promoting viability in today’s society. This course weaves together theoretical and experiential threads using insights gained from readings, industry-based examples, case studies, class assignments and experiential activities. Prereq: Major standing in CLD.

CLD 465 TOPICS IN COMMUNITY COMMUNICATIONS (Subtitle required). (3)
Intensive study of a specialized topic in community communications. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 470 TOPICS IN LEADERSHIP (Subtitle required). (3)
Intensive study of a specialized topic in leadership studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 475 TOPICS IN NON-FORMAL EDUCATION (Subtitle required). (3)
Intensive study of a specialized topic in non-formal education. May be repeated under different subtitles. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 478 ENTREPRENEURIAL PROGRAMMING IN COMMUNITY EDUCATION. (3)
This course focuses on using creative and entrepreneurial processes to develop innovative programming for communities in a variety of contexts. Within this theory to practice course, students will develop innovative educational programming for communities of place, practice, and interest. Prereq: CLD 370 or consent of the instructor.

CLD 479 INSTRUCTIONAL APPROACHES IN COMMUNITY EDUCATION. (3)
This course will present the basics of teaching and learning within a community setting. Community learning and development, community-based education and community education will all be explored, as well as effective teaching methodologies outside of the classroom. Students will learn innovative, unique teaching techniques through hands on instruction in a variety of community settings. Prereq: CLD 370 or consent of the instructor.

CLD 480 TOPICS IN COMMUNITY (Subtitle required). (3)
Intensive study of a specialized topic in community studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 490 SENIOR CAPSTONE SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
One of the two senior capstone courses in Community and Leadership Development. Students will learn to integrate theories common to multiple social science contexts. Following critical analyses, students will learn to describe how these theories are applied within various situations. Presentations and applied research papers will be significant course components. Prereq: Senior standing in the CLD major, or consent of instructor. Concurrently enrolled in CLD 497: Senior Capstone Practicum in CLD.

CLD 495 TOPICAL SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT (Subtitle required.). (1-3)
Topical seminar using readings, discussions, and papers to focus on current issues of significance to community and leadership development. May be repeated to a maximum of twelve credits under different subtitles. Prereq: Consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 497 SENIOR CAPSTONE PRACTICUM IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
A senior capstone course for seniors in community and leadership development. This is a cooperative educational program between the Community and Leadership Development majors at the University of Kentucky and approved employers who furnish facilities and instruction that help students acquire the skills and knowledge required in their chosen field. Ultimately, this is a mutually beneficial relationship; stakeholder relations are improved while students have an opportunity to build relationships/networks that could encourage future career development. Prereq: Major standing in CLD; senior standing.

CLD 517 RURAL SOCIOLOGY. (3)
A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 517.)

CLD 525 COMMUNITY DIVERSITY AND MEDIA. (3)
This course covers how media, both traditional news media and newly emerging digital communication technologies, relate to community diversity. Specifically, the course focuses on the relationships between media and community (power) structure, community institutions, organizational behavior, social movements and minority groups, urban/rural communities, gender/race/ethnicity/class and more. Prereq: Major standing in CLD or graduate student status.

CLD 530 FUNDAMENTALS OF ORGANIZATIONAL LEADERSHIP. (3)
This course examines the existing and emerging knowledge base for leadership within organizations. Leadership and motivation of others requires individuals to go beyond their basic knowledge of managing others and learn how cultures, structures, and individuals in organizations interact within the system. This course highlights correlations with organizational behavior, team building, and collaborative leadership styles. In this class, students will explore organizational culture, team synergy and individual leadership capital. Prereq: Major standing in CLD or graduate student status.

CLD 534 SOCIOLOGY OF APPALACHIA. (3)
A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/SOC 534.)

CLD 560 COMMUNITY INEQUALITIES. (3)
This course focuses on the emergence and persistence of community inequalities in contemporary American society. This begins by identifying, describing, and analyzing inequalities within and among American communities and then considering the implications of these inequalities for organizational and community processes. The essential questions that will guide this course are: How do we define, measure and evaluate the differences among communities? What factors contribute to the emergence and persistence of the inequalities among communities? What are the consequences of these inequalities for the people who live in these communities? Prereq: Major standing in CLD or graduate student status.

University of Kentucky 2019-2020 Undergraduate Bulletin 439
### Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLD 650</td>
<td>APPLIED COMMUNITY COMMUNICATIONS</td>
<td>(3)</td>
<td>-</td>
<td>Designed to familiarize students with advanced writing and editing techniques, common forms of workplace writing, audience analysis, content analysis, and graphic design tips and tools. Discussion will include some of the larger issues surrounding communication, such as discourse communities, bias, and ethics. Prereq: Graduate standing.</td>
</tr>
<tr>
<td>CLD 660</td>
<td>ADVANCED LEADERSHIP THEORY AND PRACTICE</td>
<td>(3)</td>
<td>-</td>
<td>This course has been designed to introduce the theoretical and research foundation of leadership studies through current journal articles and texts which also emphasizes multiple dimensions and contexts that influence leadership dynamics.</td>
</tr>
<tr>
<td>CLD 665</td>
<td>PROGRAM DEVELOPMENT AND EVALUATION</td>
<td>(3)</td>
<td>-</td>
<td>The purpose of this course is to provide a basic understanding of program evaluation processes, concepts, and theories and to develop expertise needed to design and conduct systematic evaluation for formal and non-formal programs. The material to be covered is applicable to a wide range of topics and disciplines, including social welfare, youth development, family studies, agriculture and the environment, community economic development, and other formal and non-formal educational programs. Such programs have a common goal of achieving their desired objectives and being held accountable for the resources they obtain from agencies and stakeholders.</td>
</tr>
<tr>
<td>CLD 670</td>
<td>COMMUNITY ENGAGEMENT</td>
<td>(3)</td>
<td>-</td>
<td>This course is designed as a service-learning/community engagement experience. It is organized with a field component related to the student’s area of interest and an in-class experience that provides students with the opportunity to share and process their field experiences and learn and grow from them through a variety of interactive exercises, readings, films and guest presentations.</td>
</tr>
<tr>
<td>CLD 671</td>
<td>ADVANCED METHODS OF TEACHING</td>
<td>(3)</td>
<td>-</td>
<td>The principles of method applied to teaching in the fields of classroom and community-based education. Prereq: Teaching experience within a classroom or community-based educational setting.</td>
</tr>
<tr>
<td>CLD 672</td>
<td>ADULT EDUCATION IN COMMUNITY AND LEADERSHIP DEVELOPMENT</td>
<td>(3)</td>
<td>-</td>
<td>Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.</td>
</tr>
<tr>
<td>CLD 673</td>
<td>CURRENT TRENDS IN AGRICULTURAL EDUCATION</td>
<td>(3)</td>
<td>-</td>
<td>Class work pertains to current trends and significant developments in agricultural education. May be repeated to a maximum of nine credits.</td>
</tr>
<tr>
<td>CLD 674</td>
<td>THE ADMINISTRATION OF AGRICULTURAL EDUCATION</td>
<td>(3)</td>
<td>-</td>
<td>A course designed for superintendents, high school principals, and other administrators. Its purpose is to prepare administrators and supervisors for leadership in agricultural education. (Same as EDL 694.)</td>
</tr>
<tr>
<td>CLD 675</td>
<td>THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY DEVELOPMENT</td>
<td>(3)</td>
<td>-</td>
<td>This course is designed to explore the dynamics of community development and leadership communication within both geographic bounded communities and communities of taste. (Same as SOC 675.)</td>
</tr>
<tr>
<td>CLD 676</td>
<td>SUPERVISION IN AGRICULTURAL EDUCATION</td>
<td>(3)</td>
<td>-</td>
<td>This course offers a non-thesis option in Community and Leadership Development for students interested in completing a practitioner-based scholarly project. Prereq: All course work toward the degree must be completed and approval of the student’s Advisory Committee is required.</td>
</tr>
<tr>
<td>CLD 677</td>
<td>SOCIOLOGY OF FOOD AND AGRICULTURE</td>
<td>(3)</td>
<td>-</td>
<td>This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as AEC/SOC 691.)</td>
</tr>
<tr>
<td>CLD 678</td>
<td>COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES</td>
<td>(3)</td>
<td>-</td>
<td>A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture.</td>
</tr>
<tr>
<td>CLD 680</td>
<td>STATISTICAL ANALYSIS IN COMMUNITY AND LEADERSHIP DEVELOPMENT</td>
<td>(3)</td>
<td>-</td>
<td>The purpose of this course is to develop an overview and basic understanding of descriptive and inferential statistics. As a result, students will be able to organize and summarize quantitative data; interpret data; make generalizations from sample data to populations or theory; and, read and understand research reports.</td>
</tr>
<tr>
<td>CLD 685</td>
<td>COMMUNITY DEVELOPMENT THEORY AND PRACTICE</td>
<td>(3)</td>
<td>-</td>
<td>This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as SOC 685.)</td>
</tr>
<tr>
<td>CLD 686</td>
<td>RESEARCH DESIGN</td>
<td>(3)</td>
<td>-</td>
<td>This course is an introduction to research design/methodology in social science research. The course emphasizes conceptualizing and working with the various components of a research inquiry and in particular how these components work together and strengthen the overall research design.</td>
</tr>
<tr>
<td>CLD 691</td>
<td>SOCIETY OF FOOD AND AGRICULTURE</td>
<td>(3)</td>
<td>-</td>
<td>This course offers a non-thesis option in Community and Leadership Development for students interested in completing a practitioner-based scholarly project. Prereq: All course work toward the degree must be completed and approval of the student’s Advisory Committee is required.</td>
</tr>
<tr>
<td>CLD 694</td>
<td>THE ADMINISTRATION OF AGRICULTURAL EDUCATION</td>
<td>(3)</td>
<td>-</td>
<td>A course designed for superintendents, high school principals, and other administrators. Its purpose is to prepare administrators and supervisors for leadership in agricultural education. (Same as EDL 694.)</td>
</tr>
<tr>
<td>CLD 695</td>
<td>ADVANCED METHODS OF TEACHING</td>
<td>(3)</td>
<td>-</td>
<td>Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.</td>
</tr>
<tr>
<td>CLD 696</td>
<td>EXPERIENTIAL EDUCATION: PROCESS AND PRACTICE</td>
<td>(3)</td>
<td>-</td>
<td>This course highlights the integral relationships between contemporary and historical societal norms, distinctive communities and educational systems. Prereq: Major standing in CLD; CTE students admitted to TEP; or graduate student status.</td>
</tr>
<tr>
<td>CLD 697</td>
<td>SUPERVISION IN AGRICULTURAL EDUCATION</td>
<td>(3)</td>
<td>-</td>
<td>This course offers a non-thesis option in Community and Leadership Development for students interested in completing a practitioner-based scholarly project. Prereq: All course work toward the degree must be completed and approval of the student’s Advisory Committee is required.</td>
</tr>
<tr>
<td>CLD 698</td>
<td>TOPICAL SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT</td>
<td>(3)</td>
<td>-</td>
<td>Advanced study of topics of current importance in community and leadership development such as dispute resolution, volunteer management, or advanced program design and evaluation. May be repeated to a maximum of six credits.</td>
</tr>
<tr>
<td>CLD 699</td>
<td>SPECIAL PROBLEMS IN COMMUNITY AND LEADERSHIP DEVELOPMENT</td>
<td>(1-6)</td>
<td>-</td>
<td>Supervised individual study on selected issues in community and leadership development. May be repeated to a maximum of six credits. Learning contract must be filed with Director of Graduate Studies.</td>
</tr>
<tr>
<td>CLD 700</td>
<td>RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT</td>
<td>(1-6)</td>
<td>-</td>
<td>Supervised individual graduate research projects on selected issues in community and leadership development. May be repeated to a maximum of six credits. Research Learning contracts must be filed with the Director of Graduate Studies.</td>
</tr>

**University of Kentucky**

**2019-2020 Undergraduate Bulletin**

**440**

**KEY:**

# = new course    * = course changed    † = course dropped
**CLM 104 MINDFULNESS PRACTICES AND STRESS REDUCTION.** (1)
This course is designed for students interested in gaining personal insight into their busy mind's activity and learning how to settle the mind and more effectively deal with daily life stressors. Mindfulness practices will be discussed on evidenced-based health outcomes and will be applied through personal mindfulness practice experiences. (Same as HHS 104.)

**CLM 120 CAREERS IN CLINICAL LEADERSHIP AND MANAGEMENT.** (2)
This course designs descriptive an overview of clinical leadership and management and related careers by examining of professionals, areas of specialization, and professional issues. Students will explore personal values and academic goals through guest speakers, individual projects, class exercises and group interaction and examine how these values and goals connect to careers in Clinical Leadership Management. Prereq: CLM Major designation, CHS pre-major status, or consent of instructor.

**CLM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS.** (3)
Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. Prereq: HHS or CLM Major designation, CHS pre-major status, or consent of instructor. (Same as HHS 241/ISE 241.)

**CLM 300 HEALTHCARE MANAGERS: WRITE, SPEAK, AND CREATE.** (3)
This course merges CLM and GCCR courses for their careers by further developing effective written, oral, and visual/digital communication skills, applied specifically to today's healthcare management environment. Students will communicate effectively based on audience analysis in face-to-face and online settings; deliver effective formal public healthcare presentations (informative and persuasive) based on audience analysis and using a variety of presentation aids that enhance the message. This course provides GCCR credit for the CLM Program. Prereq: CIS110/111 or CIS112, WRD110/111 or 112 or equivalent and CLM major status.

**CLM 323 SOCIAL DETERMINANTS OF HEALTH.** (3)
The social determinants are instruments that influence health outcomes and risk patterns across the lifespan. This course will provide students with an understanding of how the social determinants influence health outcomes with a focus on a variety of patient and community populations. An overarching theme of the course addresses how the social determinants of health adversely affect health outcomes and contribute to health disparities. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 325 INTRODUCTION TO HEALTH CARE MANAGEMENT.** (3)
The purpose of the course is to provide an integrated approach to understanding management in a variety of healthcare organizations (HCOs). This course highlights the major functions of healthcare managers and introduces students to the skills necessary to be successful managers. It also serves a foundation for the leadership series of classes that come after this course in the major. Prereq: CLM 241 or equivalent or permission of instructor.

**CLM 335 HEALTH INFORMATION MANAGEMENT.** (3)
The course is designed to introduce challenges facing managers of integrated healthcare information systems and delivery networks. Specifically, the course will address the following: A. Overview of the field of health informatics and its specialty fields; B. The role of health informatics in day-to-day management and practical applications of information systems in health care; C. Current trends that impact the design and evolution of healthcare informatics. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 342 LEADERSHIP: MANAGEMENT COMPETENCIES ESSENTIAL TO LEAD IN HEALTHCARE.** (3)
This course introduces theories and concepts of leadership and management and provides opportunities to translate learning into action through the simulation of various healthcare settings and scenarios. Students will engage in opportunities designed to increase their Emotional Intelligence and further develop leadership and management competencies essential for future clinical and/or healthcare leaders. The foundation learning strategy will be an assessment tool that will help students better understand themselves and others and identify ways to adapt their communication and leadership presence to be an effective leader. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 345 QUALITY AND PRODUCTIVITY IMPROVEMENT AND EVALUATION.** (3)
A core program course that focuses on leadership and management knowledge, skills, and practices that promote healthcare quality, efficiency, and productivity. Methods to measure, monitor, and evaluate quality and productivity will be discussed. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 350 HEALTH POLICY, POLITICS, AND LAW.** (3)
This is a survey course in U.S. health policy and law. It begins by describing the basic machinery of policymaking and legal process that underpin the individual health care and health systems and then turns to an exploration of many of the fundamental issues and topics related to policy and practice. Students will learn to think systematically about these issues and the various methods available to public and private policymakers to solve them. Students should also be able to [1] discern when significant legal issues exist in a situation and when consultation with legal counsel is appropriate; have a basic familiarity and facility with legal terminology so as to be in a position to consult effectively with legal counsel; [2] be able to identify and critically assess news reports and professional matters related to legal issues in health care. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 353 ETHICS IN HEALTH SERVICES MANAGEMENT.** (3)
This course introduces students to moral reasoning and ethics in health services management relevant to ethical dilemmas likely to be encountered in the healthcare industry. Basic concepts, methods, and resources for ethical decision-making in healthcare administration will be included. Obligations to patients, the community, healthcare workers and the organization (institutions, agencies, associations) will be considered. Prereq: CLM 325 or equivalent or permission of instructor.

**CLM 354 HEALTH LAW.** (3)
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical-moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes Associate Degree in healthcare discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HHS/SHM 354.)

**CLM 370 ELECTRONIC HEALTH RECORDS.** (2)
The Electronic Health Records course is an undergraduate level introduction to the concepts and trends in health care electronic health records in today’s technology driven health care field. Several areas will be introduced that will provide baseline knowledge for EHRs. Topics include Meaningful Use, EHR Adoption, Quality of Care, Workflow, Inpatient and Ambulatory Care, Specialty-specific EHRs, Health Information Exchange, and other related topics. It is highly recommended for students to either have experience working in a healthcare related field or have a health care major or minor. Some exceptions to being in a health care profession would be computer science or related majors in which the student plans to apply the profession in a health care organization or consent of instructor. (Same as HHS 370.)

**CLM 380 LONG-TERM CARE ADMINISTRATION.** (3)
A longitudinal and continuing introduction to the history and philosophy of long-term care administration. Provides an introduction to and application of regulatory standards. Specializations within the long-term care industry are discussed. Semester Hours 3 (3 lec). Prereq: Admission to CLM Program, CLM Track C, or by consent of instructor.

**CLM 401 PRACTICUM I: FOUNDATIONS.** (3)
This practicum is the first in a three-course sequence. In this foundational practicum, students gain practical general training and integrate learning from foundational Clinical Leadership and Management courses in a healthcare setting context. Through their experiences in a healthcare work environment, they further develop their fundamental knowledge and skills in areas of professionalism, critical thinking, cultural humility, and inter-professional practice—essential elements for collaborative leadership and the development of the professional “self”. Students will apply for the practicum course and work with faculty and the practicum coordinator to secure a clinical leadership and management focused placement in a healthcare setting that is appropriate for the course and student learning goals. Students develop a site-specific individualized learning plan and class seminars assist students with their workplace experiences with foundational coursework as a cohort. This course includes specified hours per semester of seminar and experiential learning. Prereq: Completion of CLM 325 or equivalent.

**CLM 402 PRACTICUM II: INTERMEDIATE.** (3)
This practicum is the second in a three-course sequence. This advanced level practicum builds on the foundation practicum and provides students with the opportunity to further develop the knowledge and skills essential for effective, collaborative clinical leadership, to manage complex processes, resolve multi-faceted problems, build teams and productive work environments, and promote organizational health, growth, and quality of services. The advanced clinical leadership and management practicum focuses on the 1) application of theory, knowledge, and skills essential for effective and collaborative leadership in healthcare, and 2) the integration of CLM student learning outcomes and foundational learning dimensions addressed in CLM 401 through applied experiences and seminar/course assignment activities. Students will apply for the practicum course and work with faculty and the practicum coordinator to secure a clinical leadership and management focused placement in a healthcare setting that is appropriate for the course and student learning goals. Students develop a site-specific individualized learning plan and class seminars assist students with their workplace experiences with foundational coursework as a cohort. CLM 402 and CLM 403 offer concentrated professional practicum immersion experiences. Simultaneous enrollment in courses other than the Capstone course is discouraged. Employment is also discouraged so that students may fully engage in the professional practicum experience.

Students will be required to attend a mandatory Orientation session prior to participating in CLM 401 and CLM 403. The schedule for Orientation will be available on the first day of the semester. Preceptors may also request to meet with and/or interview potential student interns prior to acceptance at the site. Prereq: Completion of all required CLM coursework and CLM 401 Practicum Foundations (with a grade of “C” or better) or equivalents except for CLM 444, CLM 444, CLM 403, and CLM 495 or consent of the instructor.
Course Descriptions

#CLM 403 PRACTICUM III: ADVANCED. (3)
This practicum is the third in a three-course sequence. This advanced level practicum continues the development and integration of clinical leadership and management core learning outcomes associated with CLM 402. Students continue to focus on (1) application of theory, knowledge, and skills essential for effective and collaborative leadership in health care, and (2) the integration of CLM student learning outcomes and foundational learning dimensions addressed in CLM 401 through applied experiences and seminar/course assignment activities. Additionally, CLM 403 assists students in deepening their knowledge and skills through preceptor mentorship and engagement in activities such as quality improvement projects, system/process/service assessments, data collection, analysis, synthesis and presentation as part of their individualized, agency-specific learning agreements.

Students will apply for the practicum course and work with faculty and the practicum coordinator to secure a clinical leadership and management focused placement in a healthcare setting that is appropriate for the course and student learning goals. Students develop a site-specific individualized learning plan and class seminars assist students with integrating their workplace experiences with foundational coursework as a cohort.

CLM 402 and CLM 403 offer concentrated professional practicum immersion experiences. Simultaneous enrollment in courses other than the Capstone course is discouraged. Employment during the practicum is also discouraged so that the student may fully concentrate on the practicum experience.

Students will be required to attend a mandatory Orientation session prior to participating in CLM 402 and CLM 403. The schedule for Orientation will be available on the first day of the semester. Preceptors may also request to meet with and/or interview potential student interns prior to acceptance at the site. Prereq: Completion of all required CLM coursework and CLM 401. Practicum Foundations (with a grade of “C” or better) or equivalents except for CLM 443, CLM 444, CLM 402, and CLM 495 or consent of the instructor.

CLM 405 SOCIAL AND CULTURAL EVOLUTION OF DISEASE. (3)
This course provides students with the opportunity to understand the intersection between culture, society, and disease as it relates to their future careers as healthcare professionals. Topics to be covered include epidemics, pandemics, and the spread of infectious disease. How cultural and social factors evolve over time to influence the way disease is framed, starting in the 1600s and ending in the present day. Prereq: HHS/CLM 241 and 350. Admission to the CLM or HHS program or consent of instructor. (Same as HHS 405.)

#CLM 443 LEADERSHIP: STRATEGIC VISION, MISSION AND PLANNING IN HEALTHCARE. (3)
This course is one of three (3 credit) courses in the Clinical Leadership and Management Leadership Course Series. Strategy development from planning to action is an important process in healthcare administration. The course begins with developing a mission and vision and proceeds toward planning, marketing and how that leads managers to action. Prereq: Completion of all required CLM coursework or equivalents except for CLM 444, CLM 402, and CLM 495 or consent of the instructor.

*CLM 444 LEADERSHIP: HUMAN RESOURCES MANAGEMENT IN HEALTHCARE. (3)
This course covers strategic human resources management concepts for contemporary healthcare environments. Students will explore the relationship between human resources management and strategic advantage. Topics such as human resources functions, compensation and benefits, personnel planning, recruitment and selection, training and development, employee relations and labor union-management relations will be covered. Prereq: Completion of all required CLM coursework or equivalents except for CLM 444, CLM 402, and CLM 495 or consent of the instructor.

CLM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)
Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor. (Same as HSM 452.)

#CLM 453 CULTURAL COMPETENCE IN HEALTHCARE. (3)
This course is designed to introduce students to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias, especially in the context of healthcare. Factors related to culturally and linguistically appropriate healthcare will be reviewed. Prereq: CLM 323 or equivalent or permission of instructor.

*CLM 455 FINANCIAL MANAGEMENT OF HEALTHCARE ORGANIZATIONS. (4)
This course examines the current system of healthcare financing and factors affecting it. Topics covered include exploration and analysis of budgetary concepts, financial management, cost accounting and management under rate control and competition, as well as differences between the goods and services industries within the healthcare context. The pros and cons of a single payer system are also considered. Spreadsheet software will be used to develop budgets, business proposals, and other selection applications in the financial management of healthcare organizations. Completion of ACC 201 Financial Accounting or equivalent is recommended but not required. Prereq: CLM 325 or equivalent or permission of instructor.

CLM 470 LONG-TERM CARE MANAGEMENT. (3)
An overview of the functional organizational structures common to long-term health care facilities. An examination of the departments in long-term care facilities, chains, management, personnel, regulatory requirements, quality indicators, and the role of the long-term care administrator. Prereq: CLM 241, CLM 350, CLM 351 and CLM 353 Admission to CLM Program or consent of instructor.

CLM 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as HHS 480.)

*CLM 495 CLINICAL LEADERSHIP AND MANAGEMENT CAPSTONE. (3)
The CLM Capstone course is a culmination of coursework and experiences in this program. Students will synthesize course material and major concepts from their CLM coursework and apply the major concepts to case studies in health services. Students will also examine their own competencies for entry-level healthcare administration jobs or graduate school and create an individualized learning plan to continue growth as a professional. Prereq: Completion of all required CLM coursework: CLM 443, CLM 444, CLM 402, and CLM 405 may be concurrent with CLM 495.

CLM 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT. (1-6)
Students will gain practical general training and experience in the healthcare workplace with a focus on exposure/experience in clinical leadership and management. The CLM faculty in conjunction with the practicum coordinator will arrange these experiences with the site and selects the workplace training and experiences to the student’s general and technical course of study. Prereq: Consent of instructor; HHS 102; student must earn a grade of C or better in previous practicum in order to re-enroll in this course. (Same as HHS 501.)

CLM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR. (3)
This course examines the structure and function of the long-term care sector with emphasis on nursing homes and the role of noninstitutional alternatives. Analysis focuses on the impact of changes in reimbursement and regulatory policy, interorganizational relations, newly emerging treatment modalities, and the influence of the external organizational, economic, and political environment. Prereq: A course in health care delivery systems or permission of instructor. (Same as HSM 510.)

CLM 570 MANAGING HEALTH ISSUES IN LONG-TERM CARE: TEAM APPROACH. (2)
This course will cover the identification and management of health issues commonly found in long-term care (LTC) settings. Specifically, this course is designed to recognize, screen and identify the most common health issues present in elder residents of LTC facilities. After identification of these health issues, information regarding the appropriate course of action, utilizing appropriate care team resources, to prevent, manage, as well as treat these health issues will be provided. Common health issues to be covered include unintentional weight loss (malnutrition, frailty); unintentional weight gain (obesity and related co-morbidities); major organ system dysfunction (heart, kidney, lungs, immune, gastrointestinal, endocrine/ironomics); diminished function of ‘senses’ (vision, hearing/balance and its implications); physical dysfunction (muscle wasting, mobility issues and implications); osteoporosis (bone health, risk of falls); mental decline (depression, dementia/Alzheimer’s Disease); social isolation; spiritual support; polypharmacy. Prereq: HHS 101, HHS 102, CLM 241, GRN 250 or consent of instructor. (Same as HSE 570.)

CLM 595 DIRECTED STUDIES. (1-3)
Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 355, CLM 405, CLM 444, CLM 445, CLM 452, CLM 495, or consent of instructor. (Same as HSE 595.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CLS Clinical Laboratory Sciences

CLS 832BASIC CLINICAL CHEMISTRY.
CLS 833BASIC HEMATOLOGY.
CLS 838BASIC IMMUNOHEMATOLOGY.
CLS 851BASIC CLINICAL MICROBIOLOGY.
CME 006 THE ENGINEERING PROFESSION (JUNIOR AND SENIOR). (0)
Activities of the Student Chapter of the American Institute of Chemical Engineers (for junior and senior year chemical engineering students). Lecture: one hour per week. May be repeated three times. Prereq: Chemical engineering major.

CME 101 INTRODUCTION TO CHEMICAL ENGINEERING. (1)
An introduction to the chemical engineering profession including: problem-solving techniques, use of computers, computer problems and lectures by practitioners.

CME 200 PROCESS PRINCIPLES. (3)
A course in material and energy balances, units, conversions, tie elements, recycle, bypass, equations of state, heat effects, phase transitions, and the first and second laws of thermodynamics applications in separation processes involving equilibrium reactions and energy exchange. Prereq: “C” or better in MA 113; “C” average in CHE 105 and 107; prerequisite or concurrent: MA 114, PHY 231.

CME 220 COMPUTATIONAL TOOLS IN CHEMICAL ENGINEERING. (3)
An introduction to computational tools used in chemical engineering, such as Microsoft Excel, MATLAB, and Aspen. Prereq: Grade of “C” or better in CME 200.

CME 320 ENGINEERING THERMODYNAMICS. (3)
Fundamentals of thermodynamics, review of first law, second and third laws, V-L-L and SL equilibria, homogeneous and heterogeneous chemical reaction equilibria. Prereq: MA 213, PHY 231, and “C” or better in CME 200.

CME 330 FLUID MECHANICS. (3)
Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows; flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing, CME 220, 320, MA 214.

CME 395 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)
Individual work on some selected problems in the field of chemical engineering. May be taken three times for a total of 9 credit hours. Prereq: Engineering standing and approval of the chairman of the department.

CME 404G POLYMERIC MATERIALS. (3)
Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and thermal properties, crystallinity, polymer blends, evaluation of polymers for specific applications (aerospace, automotive, biomedical), laboratory activities for each of the above. Prereq: Engineering standing, CHE 230 or CHE 236. MSE 301 or consent of instructor. (Same as MSE 404G.)

CME 415 SEPARATION PROCESSES. (3)
Separations based on both equilibrium stage concepts and mass transfer rate control are addressed for a range of chemical process operations, including distillation, gas absorption, extraction, adsorption, and membrane-based processes. Design problems are conceived to require computer-aided modeling and analysis. Prereq: Engineering standing, CME 220, 320.

CME 420 PROCESS MODELING IN CHEMICAL ENGINEERING. (3)
Applications of principles of material and energy balances, thermodynamics, heat and mass transfer, physical chemistry and numerical methods to problems in separation and transport processes and reactive systems. Prereq: Engineering standing, CME 330, 415.

CME 425 HEAT AND MASS TRANSFER. (4)
Fundamental principles of conduction and convective heat transfer, and diffusion and convective mass transfer. Design applications to heat exchanges and packed bed absorbers. Prereq: Engineering standing; CME 330, 415.

CME 432 CHEMICAL ENGINEERING LABORATORY I. (2)
A laboratory course emphasizing experimental work in fluid flow, separations, heat transfer, and mass transfer. A majority of this course will focus on lab report writing, statistics, experimental design and safety in the laboratory. Prereq: Engineering standing; CME 330, CHE 415; CHE 230, 231.

CME 433 CHEMICAL ENGINEERING LABORATORY II. (3)
A continuation of CME 432. A laboratory course emphasizing more detailed experiments in fluid flow, heat transfer, mass transfer, separations, and chemical reaction kinetics with more extensive data collection and analysis as well as design component based on the experimental results. Prereq: Engineering standing; CME 432; concurrent: CME 550.

CME 455 CHEMICAL ENGINEERING PRODUCT AND PROCESS DESIGN. (3)
A lecture and problem-solving course emphasizing process economic evaluation, product design, and process synthesis as they apply to chemical units and systems. Appropriate use of software for simulation and design of chemical systems will also be emphasized. Prereq: Engineering standing; concurrent: CME 550.

CME 456 CHEMICAL ENGINEERING PROCESS DESIGN II. (3)
A lecture and problem-solving course intended to combine the principles of chemical engineering with optimization as they apply to the design of chemical processes. Results of each design case studied will be presented by both oral and written reports. Prereq: Engineering standing; CME 455, 550.

CME 462 PROCESS CONTROL. (3)
Basic theory of automatic control devices and their application in industrial chemical plants is emphasized. Identification of control objectives, appropriate measurements and manipulations, and possible loops between these, requires integration of the control system with the original process design. Interactions between process units are analyzed using well-known analytical tools and design strategies. Prereq: Engineering standing; CME 420, 550.

CME 470 PROFESSIONALISM, ETHICS AND SAFETY. (2)
Detailed lectures and supervised discussions on standards of ethics and safety as they relate to the chemical engineering profession. Emphasis will be on safety in plant design and process operations, laboratory safety, hazardous risk management, regulation and oversight. Prereq: Engineering standing. Concurrent: CME 455.

CME 505 ANALYSIS OF CHEMICAL ENGINEERING PROBLEMS. (3)
The application of differential and integral equations to traditional and non-traditional chemical engineering problems. Prereq: CME 425, CME 550 concurrent or consent of instructor.

CME 515 AIR POLLUTION CONTROL. (3)

CME 523 CONCEPTS, ASSESSMENT TOOLS AND METHODS IN SUSTAINABLE POWER AND ENERGY. (3)
A multidisciplinary course presenting an overview of key topics in sustainability and environmental impact assessment for engineers. Topics will include assessment of current and future energy systems, renewable and conventional energy technologies, supply chain management, sustainability metrics, energy assessment tools, environmental impact assessment and life cycle assessment. Topics will be presented and their attributes described within a framework that aids in evaluation and analysis of energy technology systems and designs in the context of political, social, economic, and environmental goals. Prereq. Engineering Standing and Senior Classification or Consent of Instructor. (Same as EGR/MFS 523.)

CME 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3)
Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as EGR 542.)

CME 550 CHEMICAL REACTOR DESIGN. (3)
A lecture and problem course dealing with interpretation of rate data and development of performance equations for single and multiple reactor systems. A design problem will be selected for an industrially important chemical reaction system requiring computer solution. Prereq. Engineering standing; CME 420, 425.

CME 552 AUTOMOTIVE PLASTICS. (3)
Overview of materials and processes for the application of plastics in the automotive industry. Engineering properties of plastics, rheology and governing relations for melt process flows. Plastic injection molding including design, control, and simulation of molding operations. Plastic part design and material selection; material testing and quality control. Prereq: Engineering Standing, MSE 201 or enrollment in the Production Engineering Certificate. (Same as MSE 552.)

CME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3)
Theory and practice as related to the chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. This course is open only to graduates students or undergraduates with engineering standing. (Same as ME/MFS/MSE 554.)

CME 556 INTRODUCTION TO COMPOSITE MATERIALS. (3)
Course Descriptions

CME 570 BIOMATERIALS TECHNOLOGY: INTERFACES AND DEVICES. (3)
This course introduces the broad impact of small-scale biological and synthetic structures and resulting miniature technologies on the biological, medical, and environmental fields, focusing on interfaces and devices. It will discuss the fundamental science behind the technologies, highlighting the advantages that result from the micro- and nanoscale (e.g. mass and energy transport). In particular, medical (diagnostic and therapeutic devices) and environmental applications will be examined, with several examples of micro- and nanoscale systems exhibiting enhanced properties highlighted. This student will be introduced to the fundamental science, the cutting-edge research activities, and the current commercially available technologies. Prereq: Upper level in CME or consent of instructor.

#CME 573 DRUG DELIVERY: ADVANCED PHARMACEUTICS. (3)
Drug delivery is a multidisciplinary field that combines the expertise of engineering, pharmaceutics, and medicine to design better therapies for a wide variety of diseases. This course will provide a solid foundation on the mathematical principles that underlie all drug delivery technologies. These principles will then be integrated into several delivery routes and dosage forms, including pulmonary, oral, and transdermal. This combination of fundamentals and case study applications will provide a broad understanding of the origins and current state of the art in drug delivery. Prereq: Students not enrolled in Pharmaceutical Sciences or in Upper Level Chemical Engineering require permission of instructor. (Same as PHS 573.)

#CME 575 FUNDAMENTALS OF PHARMACEUTICAL ENGINEERING. (3)
Pharmaceutical Engineering is a cross-disciplinary field that requires the knowledge of engineering principles, materials science, and general regulatory concepts associated with the production of pharmaceutical dosage forms. Safety and biological performance drive all decisions throughout drug discovery and development. Once a lead candidate is selected, several facets of the API and finished dosage form must be considered, including chemical stability, physical stability, manufacturability, patient acceptance, and regulation. Small synthetic molecules and biomolecules present unique challenges and require specific manufacturing processes. This course will cover the foundational science associated with the development of APIs. Prereq: Enrollment in the Biopharmaceutical Certificate Program.

CME 580 DESIGN OF RATE AND EQUILIBRIUM PROCESSES FOR WATER POLLUTION CONTROL. (3)
The design of chemical and physical processes for the removal and concentration of organic, inorganic, and particulate pollutants from aqueous solution/suspension: adsorption, desaturation, disinfection, membrane processes, thermal processes, flow through beds of solids, etc. Prereq: CME 440G, CME 425 and proof of or concurrent CME 550 or consent of instructor.

CME 599 TOPICS IN CHEMICAL ENGINEERING. (3)
A detailed study of one of the current areas of interest in chemical engineering such as: contemporary energy topics, fuels development, membrane science, computer control of chemical processing. A particular topic may be offered twice under the CME 599 number. May be repeated to a maximum of nine credits. Prereq: Engineering standing.

PREREQUISITE FOR GRADUATE WORK

Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics, and mathematics. For major work, a candidate must hold a bachelor’s degree in chemical engineering or its equivalent.

CME 620 EQUILIBRIUM THERMODYNAMICS. (3)
The criteria for physical and chemical equilibria including: predictive equations, solution theory, chemical activity, coupled chemical equilibria, and external constraints. Emphasis may be on vapor-liquid equilibrium, chemical reaction equilibrium, or complex ionic equilibria in dilute aqueous solutions and suspensions. Prereq: CME 440G and CME 320 or consent of instructor.

CME 630 TRANSPORT I. (3)
A unified study of fluid rate processes in liquids and vapors, including: mass, energy, and momentum transport, transport in chemically reacting systems, similarities, turbulence modeling, buoyancy-induced transport and multidimensional diffusion. Prereq: ME 330, CME 425, CME 505 concurrent or consent of instructor.

#CME 634 PHARMACEUTICAL ENGINEERING. (3)
Pharmaceutical Engineering is a cross-disciplinary field requiring knowledge of engineering principles, materials science, and an understanding of the unique aspects of developing active pharmaceutical ingredients (API) into finished dosage forms. Safety and bioequivalence drive all decisions throughout drug discovery and development. Once a lead candidate is selected, several facets of the API and finished dosage form must be considered, including chemical stability, physical stability, manufacturability, patient acceptance, and regulation. Small synthetic molecules and biomolecules present unique challenges and require specific manufacturing processes. This course will cover the foundational science associated with the development of APIs. Prereq: Calculus IV and Transport Phenomenon or equivalent. For undergraduate students: Enrollment in the Biopharmaceutical Engineering Certificate Program. (Same as PHS 634.)

CME 650 ADVANCED CHEMICAL REACTOR DESIGN. (3)
Rate expressions for heterogeneous reaction kinetics, energy and mass transport within and external to reacting porous catalysts; design equations for multiphase fixed and moving bed reactors. Prereq: CME 550, CME 630, CME 505, or instructor consent.

CME 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/EE/MSE 664.)

CME 680 BIOCHEMICAL ENGINEERING. (3)
Principles and design of processes involving biochemical reactions, including aerobic and anaerobic respirations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CME 440G or consent of instructor. (Same as BAE 680.)

CME 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CME 768 RESIDENCY CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CME 769 RESIDENCY CREDIT FOR THE DOCTOR’S DEGREE. (0-12)

CME 771 SEMINAR. (0)
Review of current literature in the field of chemical engineering, general discussion and presentation of papers on departmental research. Lecture, one hour per week. Required for all graduate students in chemical engineering.

CME 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk, especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CH/PHA/PHR 779.)

CME 780 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)
Independent study, design, or research in chemical engineering topics. May be repeated to a maximum of 12 credits. Prereq: Approval of the departmental director of Graduate Studies.

CME 790 RESEARCH IN CHEMICAL ENGINEERING. (1-9)
Graduate Research in Chemical Engineering on a topic approved by the Departmental Graduate Studies Committee. May be repeated to a maximum of two semesters. Prereq: Consent of Director of Graduate Studies.

CNU Clinical Nutrition

CNU 400 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level physiology or equivalent.

CNU 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to 2 credits experiential research). (Same as AT 500, HS 500, CD 500, MLS 500, PAS 500.)
CNU 501 NUTRACEUTICALS AND FUNCTIONAL NUTRITION. (2)
The course will cover the classification, brief history, and the impact of nutraceuticals and functional foods on health and disease. An example of nutraceuticals to be covered in the course include isoprenoids, isoavolanes, flavonoids, carotenoids, lycopene, garlic, omega 3 fatty acids, sphyngolipids, vitamin E and antioxidant 3, adenosyl-L-methionine, CLA, creatine, herbal products in foods and lipotic acid. Prereq: Undergraduate organic chemistry and/or biochemistry.

CNU 502 OBESITY C2C: CELL TO COMMUNITY (Subtitle required). (2)
This course will provide an overview of the obesity epidemic from an applied clinical as well as public health perspective. Topics to be covered include etiology, pathophysiology, evaluation, treatment, management, and prevention of obesity throughout the lifecycle.

CNU 503 NUTRITION FOR HEALTH PROFESSIONALS. (1-2)
An interdisciplinary/interprofessional approach to applied medical nutrition therapy and its role in primary, secondary, and tertiary health care delivery. Covers the fundamental principles and concepts of nutrition science as applied to the human life cycle. Prereq: Undergraduate junior, senior and/or graduate students planning to enroll and/or who are currently enrolled in the College of Medicine, Nursing, Dentistry, Pharmacy, Public Health and/or Health Sciences. Completion of at least one semester of physiology, biology, chemistry and/or biochemistry and/or consent of instructor.

#CNU 504 CURRENT TOPICS IN ACTIVE WOMEN’S HEALTH. (2)
This is a required course encompassing a wide range of topics related to women’s health with a focus on active women’s health. The primary focus of this course will be on the discussion of clinical issues specific to active women’s health from a variety of healthcare professionals. The course will utilize a combination of discussions, oral presentations, written communication and group discussions to inform the student. Course must be taken twice for a total of 4 credits. Prereq: 1. Acceptance into the Active Women’s Health Certificate Program. (Same as AT 504.)

#CNU 506 EXPERIENTIAL LEARNING IN WOMEN’S HEALTH: PART I. (2)
The intent of the Part I Experiential Learning in Women’s Health course is to use knowledge learned in the classroom and apply to women in the healthcare settings to facilitate wellness, injury prevention, and recovery to maximize women’s health. Students will learn to apply the basics of motivational interviewing as well as the fundamentals learned in class to assess and recommend treatment for issues related to active women’s health. Experiences to be covered in the healthcare settings for women will include nutritional assessment, basic nutrition counseling, physical assessment, injury prevention, and injury recovery. The course will have an introductory didactic component prior to the experiential learning activities to understand issues related to professionalism and motivational interviewing. Prereq: 1. Acceptance in to the Active Women’s Health Certificate; 2. Students must have maintained an overall GPA of 3.0, with a B in all Certificate courses. (Same as AT 506.)

#CNU 507 EXPERIENTIAL LEARNING IN WOMEN’S HEALTH: PART II. (2)
The intent of the Part II Experiential Learning in Women’s Health course is to use knowledge learned in the classroom and during Part I further understanding and skills applied to women in healthcare settings to facilitate wellness, injury prevention, and recovery to maximize women’s health. Students will learn to further apply the basics of motivational interviewing as well as the fundamentals learned in class to assess and counsel on issues related to active women’s health. Experiences to be covered in the healthcare settings for women will include nutritional assessment, basic nutrition counseling, physical assessment, injury prevention during exercise, and injury recovery. The course will have an introductory didactic component prior to the experiential learning activities to understand issues related to professionalism and motivational interviewing. Prereq: 1. Acceptance in to the Active Women’s Health Certificate; 2. Students must have maintained an overall GPA of 3.0, with a B in all Certificate courses. (Same as AT 507.)

CNU 601 INTEGRATED NUTRITIONAL SCIENCES I. (3)
The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism, (2) the impact of nutritional influences on macronutrient metabolism to health and disease, and (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: BBS 601, PGY 206. (Same as NS 601.)

CNU 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as ASC/NS 602.)

CNU 603 INTEGRATED NUTRITIONAL SCIENCES III. (2)
This course is designed to give the medical and health professional student an understanding of the basic principles of normal nutrition and medical nutrition therapy during the course of health and disease. Topics to be covered include: general principles of macro- and micronutrients, the basics of nutritional assessment, the Recommended Dietary Allowances and Dietary Reference Intakes, the “MyPyramid” Food Guide Pyramid, nutritional needs throughout the life cycle, determination of energy and macronutrient requirements, and nutrition for health promotion and disease prevention, e.g., cardiovascular, diabetes, renal, pulmonary, cancer, AIDS, gastrointestinal; weight maintenance/weight loss. Prereq: Completion of a 400 or 500 level nutrition course or consent of instructor.

*CNU 605 ADVANCED SPORTS NUTRITION. (3)
Emphasis is directed toward the scientific underpinnings and evidence-based applied nutrition strategies for human performance. General focus areas will be categorized as nutrition needs for chronic training or acute phases (i.e. before, during and post acute training sessions and competition) in competition and sport. Targeted focus areas are: macronutrient metabolism, energy availability and expenditure, body composition, the metabolic basis of weight management in sport, micro-nutrient needs, ergogenic aids, disordered eating and eating disorders, and water and electrolyte balance. Prereq: PGY 412G, and BCH 401G or equivalent or consent of instructor. (Same as NS PT 605.)

CNU 606 MOLECULAR BIOLOGY APPLICATIONS IN NUTRITION. (2)
Focus will be on the use of the recently developed techniques and model systems in molecular biology for studying nutrient regulation of gene expression. Examples include current problems in nutrition such as models for engineering plants containing more desirable nutrient sources (fats); for studying effects of various nutrients in transgenic mice on tumor suppressor genes and oncogene expression, that are important in cancer prevention; and for studying nutrient effects on general metabolic obesity. Prereq: BCH 501 and 502 or equivalent; or BCH 401G and consent of instructor. (Same as NS 606.)

CNU 608 NUTRITIONAL IMMUNOLOGY. (3)
Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from experimental and clinical perspectives. A lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: PGY 412G and CNU 601, or consent of instructor. (Same as NS 608.)

CNU 609 ETHICS IN CLINICAL SCIENCES RESEARCH. (1)
Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and presentation, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as C/D/CLS/PT/RAS 610.) (Same as NS 609.)

CNU 611 ADVANCED MEDICAL NUTRITION THERAPY. (2)
The overall course objective is for the advanced health care professional to gain an in-depth working knowledge and set of skills in medical nutrition therapy of acute and chronic conditions, including pediatrics that builds upon previously acquired nutrition course work and/or experience. Prereq: PGY 206 or equivalent; BCH 401G or equivalent; advanced nutrition course or consent of instructor.

CNU 612 ASSESSMENT SKILLS FOR THE CLINICAL NUTRITIONIST. (2)
The goal of this course is to provide the Clinical Nutrition masters student with the skills necessary to elicit a comprehensive medical history, perform basic physical examination techniques appropriate for nutritional assessment, evaluate and interpret laboratory test results, and systematically report their findings in appropriate oral and written formats. Prereq: Admission into the Center for Nutritional Sciences Masters with emphasis in Clinical Nutrition or by consent of instructor.

CNU 613 APPLIED NUTRITION AND DISEASE PREVENTION. (2)
This course is designed to give the medical and health professional student an understanding of the basics of nutritional assessment and nutrition counseling, health promotion, and disease prevention to maximize women’s health. Students will learn to apply the basics of nutritional assessment and nutrition counseling, health promotion, and disease prevention to maximize women’s health. Experiences to be covered in the healthcare settings for women will include nutritional assessment, basic nutrition counseling, physical assessment, injury prevention during exercise, and injury recovery. The course will have a didactic component prior to the experiential learning activities to understand issues related to professionalism and motivational interviewing. Prereq: 1. Acceptance in to the Active Women’s Health Certificate; 2. Students must have maintained an overall GPA of 3.0, with a B in all Certificate courses. (Same as AT 506.)

CNU 614 PROBATIONARY EXPERIENCE. (2)
Students enrolled in the Clinical Nutrition masters program may enroll in a supervised clinical experience. Prereq: PGY 206 or equivalent; Admit to program. (Same as NS 614.)

CNU 615 PROBATIONARY EXPERIENCE. (2)
Students enrolled in the Clinical Nutrition masters program may enroll in a supervised clinical experience. Prereq: PGY 206 or equivalent; Admit to program. (Same as NS 615.)

CNU 618 NUTRITIONAL ASSESSMENT (C2C) - CONSENT. (2)
Students enrolled in the Clinical Nutrition masters program may enroll in a supervised clinical experience. Prereq: PGY 206 or equivalent; Admit to program. (Same as NS 618.)

CNU 619 NUTRITIONAL ASSESSMENT (C2C) - CONSENT. (2)
Students enrolled in the Clinical Nutrition masters program may enroll in a supervised clinical experience. Prereq: PGY 206 or equivalent; Admit to program. (Same as NS 619.)

CNU 701 INTRODUCTION TO NUTRITION (C2C) - CONSENT. (2)
Students enrolled in the Clinical Nutrition masters program may enroll in a supervised clinical experience. Prereq: PGY 206 or equivalent; Admit to program. (Same as NS 701.)

CNU 702 CLINICAL/WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3)
A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer options in therapeutic nutrition, and/or health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services e.g. surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CNU 601, NS/ASC 602, NS/ CNU 701, NS/NS 610 and graduate status or consent of instructor. (Same as NS 702.)

CNU 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to give the student’s independent thinking and critical analysis regarding various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as NFS/NS 704.)

CNU 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as NFS/NS 782.)

CNU 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as NFS/NS 790.)
The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all aspects of the U.S. context and culture, the course will examine the relationship between sport and race, gender, class, violence, community, and/or society. The relationship between sport and culture is a key focus of the course, and the course will introduce students to a variety of theoretical and practical approaches to studying this relationship.

**COM 311 INTRODUCTION TO COMMUNICATION THEORY**

This course examines the process of communication as a critical element in human interaction and society. Designed to enhance effective communication and informed use of the media, the course will introduce students to the fundamental communication skills needed to prepare and present messages effectively. The course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

**COM 316 UNDERSTANDING WORKPLACE COMMUNICATION IN A DIVERSE U.S. SOCIETY**

Understanding workplace communication in U.S. society requires an interdisciplinary approach in preparing students to develop an enlightened consideration of the complex and contextual nature of communication in organizations. The emphasis on communication and culture in the course is designed to engage students using dynamic learning experiences such as debates, discussions, and critical analysis.

**COM 317 COMMUNICATION IN FAMILY AND MARRITAL RELATIONSHIPS.**

The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all aspects of the U.S. context and culture, the course will examine the relationship between sport and race, gender, class, violence, community, and/or society. The relationship between sport and culture is a key focus of the course, and the course will introduce students to a variety of theoretical and practical approaches to studying this relationship.

**COM 318 COMMUNICATION AND RELATIONSHIPS.**

The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all aspects of the U.S. context and culture, the course will examine the relationship between sport and race, gender, class, violence, community, and/or society. The relationship between sport and culture is a key focus of the course, and the course will introduce students to a variety of theoretical and practical approaches to studying this relationship.

**COM 319 COMMUNICATION AND RELATIONSHIPS.**

The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all aspects of the U.S. context and culture, the course will examine the relationship between sport and race, gender, class, violence, community, and/or society. The relationship between sport and culture is a key focus of the course, and the course will introduce students to a variety of theoretical and practical approaches to studying this relationship.

**COM 320 COMMUNICATION THROUGH MEDIA AND FILM.**

An introduction to the process of communication as a critical element in human interaction and society. Designed to enhance effective communication and informed use of the media, the course will introduce students to the fundamental communication skills needed to prepare and present messages effectively. The course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

**COM 321 COMMUNICATION IN SMALL GROUPS.**

A study of communication processes in small group situations. Topics include conflict, leadership, and decision-making. Students will participate in group discussion and develop skills in analyzing group performance.

**COM 322 COMMUNICATION IN GROUPS.**

This course examines interpersonal and co-cultural divides using a skills-based approach. Students will be exposed to cultural communication situations and will apply skills using lecture, discussion, and various media (e.g., news, radio, film, blogs), equipping them with more effective skills for communicating with other groups, communities, and cultures.

**COM 323 COMMUNICATION IN INTERCULTURAL RELATIONSHIPS.**

This course focuses on describing and explaining communication processes that occur within the context of close relationships. Three general topic areas include: (1) developing and escalating relationships, (2) satisfying relationships, and (3) coping with relational challenges.

**COM 324 COMMUNICATION IN PROFESSIONAL RELATIONSHIPS.**

This course examines the process of communication as a critical element in human interaction and society. Designed to enhance effective communication and informed use of the media, the course will introduce students to the fundamental communication skills needed to prepare and present messages effectively. The course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

**COM 325 COMMUNICATION STRATEGIES FOR PROFESSIONAL EXCELLENCE.**

Communication Strategies for Professional Excellence introduces students to a variety of technical and business theories and practices designed to be applicable to business communication in the real world. This course is focused on communication strategies to use once the job has been secured, rather than those to get the job (i.e., resume, cover letter, interviewing). Specifically, the course teaches the fundamentals of good business communication, including protocols for writing media notices/releases, marketing copy, business letters, memoranda, electronic mail, thank you notes, apology letters, persuasive messages, and business plans. Throughout these writing assignments, you will also become acquainted with the strategies used by communication professionals such as functions of media, employee, community, government, investor, and consumer relations. In addition, there will be instruction in oral presentation and in depth practice on both an individual and collaborative basis. Finally, students will also learn tactics for running a business meeting, dealing with organizational conflict, and finding ways to enhance their business communication through technically based media. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: Upper Division standing in the Communication Major. ADDITIONALLY, completion of all COM BA/BS pre-major requirements. Specifically: COM 101, COM 249, COM 252, CIS or WRD 110, CIS or WRD 111.

**COM 327 COMMUNICATION AND SPORT.**

This course is designed to explore the relationship between communication and sport. We will examine theories of communication and connect them to sport. The class will examine the relationship between sport and race, gender, class, violence, community, and/or society throughout the United States and around the world.

**COM 328 COMMUNICATION AND SOCIAL MEDIA.**

An introductory survey course covering narrative, linguistic, and sociocultural aspects of language as it relates to communication. Language learning, sign typologies, psycholinguistics, and the nature of meaning are selected topic areas. Emphasis is on behavioral, communication approach. Not open to students who have completed a 300-level (or above) linguistic class.
#COM 353 TECHNOLOGY-MEDIATED COMMUNICATION IN SPORT.  (3)
A study of the processes involved in technology mediated communication, including interactions between public figures and their fans and followers, with emphasis on the preparation and delivery of messages that directly impact identity management. Prereq: COM 327.

COM 365 INTRODUCTION TO COMMUNICATION RESEARCH METHODS.  (3)
An introduction to methods of philosophy of scientific research into the origins, nature, and effects of communication processes. Provides skills necessary for designing research projects and for interpreting critically evaluating research results. Prereq: STA 210.

COM 381 COMMUNICATION, LEADERSHIP, AND ENTREPRENEURSHIP.  (3)
This course provides an introduction to the study and practice of leadership from an entrepreneurial and communication perspective. Course activities will cover, 1) the basic concepts essential to personal skills development and organizational leadership behavior, 2) the theory component, and 3) the practical process of leadership and entrepreneurship. The course is designed to introduce students to leadership perspectives and the role communication plays in effective leadership and entrepreneurial strategies. The course explores communication variables involved when leaders attempt to influence members to achieve a goal. Topics include power, credibility, motivation, research on leader traits, styles, and situations, innovation strategies, organizational dynamics, creative problem solving, and current models of leadership. The different leadership challenges posed by different group and organizational types will also be explored.

COM 390 COMMUNICATION EDUCATION ABROAD (Subtitle required).  (1-6)
Communication education abroad is an academically rigorous and experientially rich opportunity for students to work with a UK faculty member by participating in a formal study abroad course, research program, or service project related to one or more of many communication theory, concepts, and skills. Any communication education abroad offering will be grounded firmly in the communication discipline in ways designed to enrich one’s understanding of how individual and local communication norms and practices both shape and are shaped by global trends, communication, and interactions. Prereq: Approval from instructor.

COM 395 INDEPENDENT WORK.  (1-3)
Research and study of special topics in communication. The student proposes the specific study to be undertaken and formally contracts with a faculty supervisor for guidance and evaluation. Ordinarily, projects will require the production of written materials as a basis for the evaluation. May be repeated up to a maximum of six credits. Prereq: Communication major, departmental approval, and completion of learning contract prior to registration.

COM 399 INTERNSHIP IN COMMUNICATION.  (1-6)
Provides field-based experience in communication through work in industry, government, education, etc. Pass-fail only. May be repeated to a maximum of six credits. A maximum of three credit hours may be counted toward the communication major. Prereq: Consent of Department Internship Director prior to registration, and completion of departmental learning contract.

COM 425 COMMUNICATION, NEGOTIATION, AND CONFLICT MANAGEMENT IN ORGANIZATIONS.  (3)
This course explores the role of communication in negotiation and conflict management in organizations. The course examines conflict theories and approaches, negotiation processes, and third party intervention through the study of strategies and tactics, interaction processes, phases and stages of negotiation development and conflict framing. The course examines strategies and tactics used in exchange of offers and counteroffers, salary negotiations, buying and selling of products, team bargaining, and multiparty negotiations. Prereq: COM 326 or COM 351.

#COM 426 SPORT COMMUNICATION AND ANALYTICS.  (3)
This course is designed to enhance students’ literacy regarding sport analytics through the examination of structured historical data and the interpretation of sport metrics. Prereq: COM 327 and COM 326 or COM 351.

COM 449 SOCIAL PROCESSES AND EFFECTS OF MASS COMMUNICATION.  (3)
This course examines the relationship between the organization of modern society and its communication media with special emphasis on cultural processes and social change. The social-psychological bases of communication are studied within a context of theory and research. Prereq: COM 326 or COM 351.

COM 452 STUDIES IN INTERPERSONAL COMMUNICATION.  (3)
Examines current theory and research on the nature and development of interpersonal communication ability. Topics include: understanding strategic communicative relational communication elements, and cultural and institutional influences on the development of interpersonal communication. Prereq: COM 326 or COM 351.

COM 453 DIGITAL AND MASS COMMUNICATION MEDIA LITERACY.  (3)
A course designed to examine theory and research related to criticism of the mass media and to the relationship of digital and mass communication to contemporary social issues. Prereq: COM 249, and COM 326 or COM 351.

COM 454 HONORS SEMINAR IN COMMUNICATION (Subtitle required).  (3)
Intensive study of a communication topic in professional, theoretical, and research methodology areas of communication. This seminar will count toward a Communication major and toward credits for graduation. Prereq: COM 351, COM 365, and 3.3 COM GPA, or permission of the instructor.

#COM 460 SPORT INDUSTRIES AND AUDIENCES.  (3)
The primary objective of this course is to provide you with an understanding of the social and economic relationships that exist between sport industries and the effects those relationships have on sport media consumers’ daily lives. Prereq: COM 326 or COM 351 and COM 327.

COM 462 INTERCULTURAL COMMUNICATION.  (3)
An overview of problems, issues, processes and assumptions involved with communicating across cultures and co-cultures. Theories of cognition and communication will be used to explore and explain communication with people from diverse cultures. Differences in both verbal and nonverbal communication among different cultural groups will be discussed. Prereq: COM 326 or COM 351.

COM 471 INTRODUCTION TO HEALTH COMMUNICATION.  (3)
This course examines theory and research relevant to health communication including interpersonal, organizational, and mass communication approaches. Topics include the role of communication in general models of health and illness, the relationship between patients and healthcare providers, social support, and health campaigns.

COM 482 STUDIES IN PERSUASION.  (3)
This course examines theory and research of persuasion. Topics include message characteristics, credibility, compliance-gaining, decision-making and motivational appeals. Prereq: COM 326 or COM 351.

COM 525 ADVANCED ISSUES IN ORGANIZATIONAL COMMUNICATION (Subtitle required).  (3)
Examines theory and research relevant to understanding advanced issues in organizational communication. Topics may include strategies of innovation, organizing, networking, decision-making, globalization, technology, power, and diversity. Prereq: COM 326 or COM 351.

COM 535 RISK AND CRISIS COMMUNICATION.  (3)
This course examines strategic risk and crisis communication research, theory, and practices. Special emphasis is placed on crisis planning, media relationships, image restoration, ethical responses, and organizational learning. Prereq: COM 326 or COM 351.

COM 553 CRITICAL ANALYSIS OF COMMUNICATION AND PERSUASION IN POPULAR CULTURE.  (3)
This course focuses on what and how popular culture entertainment media functions to communicate and persuade. Forms to be examined may include films/movies, television programs, music, cartoons, and/or comics. Ultimately, students will be equipped with tools to make educated decisions as critical consumers of the messages conveyed in popular culture entertainment media. Prereq: COM 326 or COM 351.

#COM 563 CRITICAL ANALYSIS OF SPORT MEDIA AND SOCIETY.  (3)
This course is designed to explore how sport media communicate social values, social norms, cultural identification, and cultural values. This approach will allow students to critically evaluate sport media organizations, and audiences. Prereq: COM 326 or COM 351 and COM 327.

COM 571 INTERPERSONAL COMMUNICATION IN HEALTH Contexts.  (3)
Examines theory and research relevant to the role of interpersonal communication in managing mental and physical health. Topics related to interaction in health contexts include: communicating identity in health and illness, health and personal relationships, health care provider/patient communication, medical decision-making, and interpersonal health education and prevention efforts. Prereq: COM 471, and COM 326 or COM 351.

COM 572 HEALTH COMMUNICATION CAMPAIGNS AND COMMUNITIES.  (3)
This course focuses on the role of the mass media in contemporary public health campaigns. Most class sessions focus on the application of theory and research to the design of these campaigns. Earlier studies examining the role of the mass media in health campaigns indicated that the mass media played a small and rather insignificant role in changing health behaviors. However, more recent studies indicate that careful targeting combined with formative research often yield successful behavior change. Prereq: COM 326 or COM 351.

COM 581 TEAMWORK AND LEADERSHIP IN ORGANIZATIONS.  (3)
Examines theory and research on the nature and development of small group communication. Topics include leadership, interpersonal relations and roles, goals, and decision-making in multiple organizational contexts. Communication major or permission of instructor required for enrollment. Prereq: COM 325 AND completion of the major graduation communication and composition in the communication major requirement (COM 326 or COM 351).

COM 584 TEACHING OF COMMUNICATION.  (3)
This course uses communication research and theory to develop effective instructors of communication. Topics include instructor identity, course development, teaching communication contexts (e.g., small group, intercultural, persuasion, speech) in diverse settings (e.g., classroom, organizational training), managing learners, and learning assessment. Prereq: COM 326 or COM 351.
Course Descriptions

COM 591 SPECIAL TOPICS IN COMMUNICATION (Subtitle required). (1-3)
Intensive study of a specialized topic area in communication. May be repeated to a maximum
of six credits under different subtitles. Prereq: COM 326 or COM 351.

CPE 200 COMPUTER ENGINEERING SOPHOMORE SEMINAR. (1)
A required course designed for sophomore Computer Engineering Students to inform them about the CPE degree program career opportunities in computer engineering and resources available to students to ensure success. The course will introduce students to the computer engineering program requirements; the academic advising resources and policies; the academic advising staff; the faculty. The course will assist students in setting career objectives; assist in the selection of appropriate electives to meet their career objectives; assist in preparing a plan of study; assist in preparing a professional resume. The course will also introduce students to the areas within computer engineering and learn of the major developments in the field of computer engineering from industrial practitioners. Prereq: EGR 103.

CPE 282 DIGITAL LOGIC DESIGN. (4)
Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Prereq: EGR 102 or equivalent programming course. (Same as EE 282.)

CPE 287 INTRODUCTION TO EMBEDDED SYSTEMS. (4)
Introductions to embedded system design concepts, tools, and built-in development environments focusing on how to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, programming, and interfacing and lab projects will back up that theory with hands-on design experiments using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/ O, and basic real-time processing. Prereq: ECE/CPE 282 and prereq or concur: CS 215 or consent of instructor. (Same as EE 287.)

CPE 380 COMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: Engineering standing, CS 215 and EE/ CPE 282 or EE 280. (Same as CS/EE 380.)

CPE 480G ADVANCED COMPUTER ARCHITECTURE. (3)
This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NIC's, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CS 480G and EE 480.)

CPE 490 ECE CAPSTONE DESIGN I. (3)
The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacture concern parameterization, project management, team roles, grounding, safety, and communication. Students are expected to formally propose a design project that includes a problem definition that incorporates engineering standards and realistic constraints. Students work in teams to develop and complete the designs. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and completion of all other required 400-level ECE/CPE courses, excluding EE/CPE 491. (Same as EE 490.)

CPE 491 ECE CAPSTONE DESIGN II. (3)
The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: CPE/CPE 490 completed in the previous semester and Engineering standing. (Same as EE 491.)

CPE 580 EMBEDDED SYSTEM DESIGN. (3)
Embedded System Design covers the design and implementation of hardware and software for embedded computer systems. Topics include architectural support for embedded systems, power management, analog and digital I/O, real-time processing design constraints and the design of embedded systems using real-time operating systems. Prereq: EE/CPE 287, EE/CPE 380, and engineering standing or consent of instructor. (Same as EE 580.)

CPE 584 INTRODUCTION OF VLSI DESIGN AND TESTING. (3)
Introduction to the design and layout of Very Large Scale Integrated (VLSI) Circuits for complex digital systems; fundamentals of the VLSI fabrication process; and introduction to VLSI testing and structured design for testability techniques. Prereq: Engineering standing or consent of instructor. (Same as EE 584.)

CPE 585 FAULT TOLERANT COMPUTING. (3)
Students in this course study the theory and practice of fault-tolerant and dependable computing systems. The course will introduce sources of faults, error and failures in computer controlled systems and approaches to design masking and recovery techniques at the hardware, software, and systems level. Prereq: EE/CPE 380 and engineering standing or consent of the instructor. (Same as EE 585.)

CPE 586 COMMUNICATION AND SWITCHING NETWORKS. (3)
Fundamentals of modern communication networking and telecommunications, data transmission, multiplexing, circuit switching networks, network topology routing and control, computer communication, packet switching networks, congestion control, frame relay, ATM switching networks, traffic and congestion control. Prereq: EE/CPE 282 and engineering standing. (Same as EE 586.)

CPE 587 ADVANCED EMBEDDED SYSTEMS. (3)
An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as CS/EE 587.)

CPE 588 REAL-TIME COMPUTER SYSTEMS. (3)
This course covers topics typically found in real-time and embedded systems. Topics include real-time operating systems, scheduling, synchronization, and architectural features of single and multiprocessor real-time and embedded systems. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as EE 588.)

CPH 201 INTRODUCTION TO PUBLIC HEALTH. (3)
This course provides the student with basic knowledge about the discipline of public health. Emphasis will be placed on the history and philosophical and political orientation to public health, and students will begin to acquire functional knowledge of the strategies most often applied in public health practice. Key content areas (such as HIV prevention, maternal and child health, reducing obesity rates, and reducing tobacco addiction) will become focal points for the investigation of these strategies.

CPH 202 PUBLIC HEALTH THROUGH POPULAR FILM. (3)
This course will provide students with an introductory understanding of public health concepts through critical examination of popular cinema and instruction in basic public health principles, disease prevention strategies, and social interactions related to the movie topics. A combination of lectures, readings and film viewing will enable students to understand the relationship between behavioral, environmental, biological and other risk factors with disease, injury or other health outcomes. The effect of social, economic and health systems context will also be examined. In addition, students will learn to distinguish between fact and fiction with regard to the science and activities of public health as portrayed in cinema.

CPH 203 SEXUAL HEALTH. (3)
This course will be an in-depth introduction to the relationship of sex and sexual behaviors to health and wellness.

CPH 309 HEALTH, HISTORY, AND HUMAN DIVERSITY. (3)
Health care reform is often in the news, and everyone has an opinion on why the system is broken, how to fix it, who should have access to good medical care, under what circumstances, and what constitutes “good care.” This online, multi-format course will consider what it has meant to be a good patient or a good doctor at various points in U.S. history, who was included or excluded in each group, how medicine became professionalized, and how people have organized around health issues. Students will engage with primary sources, watch related films, interact with the professor during virtual “office hours,” and participate in online moderated discussions. (Same as GWS 309.)

CPH 310 DISEASE DETECTIVES: EPIDEMIOLOGY IN ACTION. (3)
This course will outline the history of epidemiology as a science and examine its wide-ranging contributions to the fields of public health, medicine, and the social sciences. This course will focus on epidemiological methods to investigate health outcomes and identify associated and causative factors of disease in populations.

CPH 315 CHRONIC DISEASE EPIDEMIOLOGY. (3)
This course is an introduction to the epidemiology of chronic diseases including but not limited to cardiovascular disease, cancer, and diabetes, with a focus upon chronic disease surveillance and risk factors. Prereq: CPH 310 or equivalent (with permission from instructor).

CPH 318 GLOBAL CANCER EPIDEMIOLOGY. (3)
This course applies and integrates the principles and tools of epidemiology to the study of cancer. The course includes discussions of the burden of various kinds of cancer across the United States and the world by age, gender, and race/ethnicity, the underlying biology behind the development of cancer in humans, cancer surveillance, and the epidemiology of various types of cancer by cancer site such as breast, lung, and colorectal cancers. The course also examines the major risk factors of cancer such as smoking, alcohol use, endogenous and exogenous hormones, viruses, environmental/occupational exposures, and diet. Prereq: CPH 310.
Course Descriptions

**CPH 320 FUNDAMENTALS OF ENVIRONMENTAL HEALTH.** (3)
An overview of the physical factors that influence human health, including hazards from unsanitary water, polluted air, traumatic injury hazards, toxins, radiologic risks, and other features of the natural and human made environment that can kill, injure, maim, and cause disease in human populations. Special focus is given to understanding the relationships between biological, chemical, and other factors that produce unhealthy environments that sicken individuals throughout their lifespan. Additional topics include the important influence of environmental hygiene, health impact inspections, occupational safety and health issues, clean water standards, air pollution regulations, and other laws and regulations that protect the health and safety of human populations. Prereq: BPH Majors only.

**CPH 330 HEALTH ANALYTICS I.** (3)
CPH 330 focuses on applying methods for solving public health analytical problems. This course will build on the statistical principles and scientific reasoning introduced in introductory statistics courses, but will focus on the application of methods for categorical data analysis. Topics include data visualization, exploratory data analysis, summary statistics, statistical testing, estimation, confounding, and the use of regression models commonly encountered in public health. An emphasis on data analytic methods will also introduce students to the use of statistical software. Prereq: CPH 310 and BPH Majors only or permission of instructor.

**#CPH 345 FOODIGHT: PUBLIC HEALTH AND NUTRITION IN THE 21ST CENTURY.** (3)
Linked to many of the biggest health challenges of our time – heart disease, stroke, diabetes, cancers, and more – overeating represents one of the leading preventable causes of premature death, both domestically and increasingly around the globe. Understanding why people overeat requires an understanding of the food system – the production, distribution, and consumption of food. Public health professionals have important roles to play in shaping the food system, including participating in the public debate over issues such as junk food taxes, farm subsidies, food assistance programs, genetically-modified organisms (GMOs), and factory farms. This course explores the role of public health professionals and the science behind behavioral decisions to combine our food system and dietary behaviors, as well as exploring the public health response to this health crisis. Prereq: BPH major or consent of instructor.

**CPH 350 INTRODUCTION TO HEALTH CARE ORGANIZATION AND POLICY.** (3)
This introductory course exposes students to the various components of the U.S. health care system and its history, current status, proposed policy solutions, and expanding focus on improving health. The course begins with an introduction of healthcare to population health. Next, the course discusses how the organization of services influences health care access, quality, and efficiency. It follows with a review of the complexities of the organization of the health care system, including the inter-relationships between health care providers, health insurance and financing, and political forces. Prereq: ECO 201.

**CPH 351 PREPARING FOR AN APOCALYPSE: POPULATION HEALTH AND CRISIS MANAGEMENT.** (3)
Students enrolled in this course will participate in in-depth analyses of multiple large-scale disasters. This course will provide students with the knowledge necessary to participate in all phases of the crisis management process, as overseen by a health service organization. Case studies will be utilized heavily throughout this course and students will have the opportunity to engage in discussion with various health professionals from around Kentucky who engage in crisis management activities. Prereq: CPH 201 or permission of the instructor.

**CPH 365 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required).** (3)
This course provides focused coverage within domains of public health, including: Health Behavior; Biostatistics; Environmental Health; Biostatistics; Epidemiology; Environmental Health. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduate majors university-wide.

**CPH 395 UNDERGRADUATE INDEPENDENT STUDIES IN PUBLIC HEALTH.** (1-3)
This course offers students the opportunity to independently promote learning in public health content areas and/or skills that are not covered by formal courses within the college. Students typically work with an individual faculty member to develop specialized or advanced knowledge or skills, or to identify, design and/or conduct research. Students must coordinate with a faculty member to complete a Prospectus for Research/Independent Study prior to registering for CPH 395. This course may be repeated for a maximum of 6 semester hours. Prereq: A minimum of 60 credit hours completed or junior level standing and permission of instructor.

**CPH 410 EPIDEMIOLOGY IN THE WEB OF CAUSATION: PEOPLE, PLACE, AND POLITICS.** (3)
This course will provide an interdisciplinary introduction to applications of epidemiology in the context of political, community, social, and environmental influences on health. Epidemiology is the study of patterns of diseases, injury, and other indicators of health in human populations. The course will review principles and introduce novel methods used in epidemiologic research. Students will learn approaches to collecting data about sensitive health behaviors, examining social networks, integrating information from interviews and focus groups, and collecting spatial data using a smartphone application. These topics will be explored using a range of case examples, including infectious disease, humanitarian crises, sexual health, substance abuse, obesity, and aging. Prereq: Health (CPH 201) and Public Health (CPH 310) or equivalents (instructor permission required) should be taken before or at least concurrently with this course.

**CPH 423 HEATH OF KENTUCKIANS.** (3)
This course provides an overview of the determinants, factors, and remedies to the traditionally poor health status of Kentuckians. The course focus is on population health of the Commonwealth, with an emphasis on data, trends and solutions to illness, death and disability. Other topics include health rankings, vital statistics and demographic factors. The comparison of Kentucky’s population health status to the US average and to other states is presented, plus strategies to improve population health in the Commonwealth. Additional topics include the importance of health insurance, financial and behavioral issues related to health policy, social, economic, environmental, and education characteristics and their impact on health.

**CPH 440 FOUNDATIONS OF HEALTH BEHAVIOR.** (3)
This course will provide students with an overview of how the social and behavioral sciences contribute to primary prevention in the rapidly expanding field of health behavior. Emphasis will be placed on theory-driven approaches that are supported by empirical investigations. Students will acquire a working knowledge of foundational theories used in public health practice as well as the ability to measure key theoretical constructs. The course includes an overview of public health issues in the United States. The course also includes training regarding the translation of research findings into public health practice. Prereq: BPH Majors only.

**CPH 441 THE SMOKING GUN: TOBACCO AND THE PUBLIC'S HEALTH.** (3)
This course will provide a theoretical, cultural and economic rationale for the role of tobacco smoking related to the overall health of US populations in the United States and abroad. This course will examine trends in tobacco smoking from the 1960’s to present day and how social and political forces have both directly and indirectly underformed the current public health agenda— to reduce, minimize, and eventually eradicate tobacco related chronic disease and death worldwide. Students will acquire the necessary tools to identify the scientific literature on smoking and disease through traditional published literature, tobacco websites, and national data sets. Prereq: Junior or Senior undergraduate in good academic standing, recommendation from advise, proof of tobacco smoking exposure in the last year.

**CPH 450 MANAGING HEALTH ORGANIZATIONS TO IMPROVE POPULATION HEALTH.** (3)
This course will introduce students to a number of foundational concepts related to leadership and management, specifically in the realm of health organizations (e.g., local and state health departments, hospitals, community clinics, etc.). In particular, this course will explore the areas of managing human and non-human resources, and improving agency performance. Students will have the opportunity to interact with managers and organizational leaders from a variety of health service agencies. Prereq: CPH 201 or permission of the instructor.

**CPH 470 PUBLIC HEALTH CAPSTONE.** (3)
This course will provide students a culminating Bachelor of Public Health (BPH) experience through synthesis of material learned throughout the program’s core coursework in the following areas: epidemiology; biostatistics; environmental health; population health management and policy; and health behavior. Students will draw upon previous coursework in public health to assess multi-factorial public health problems through case studies, videos/movies and current events. Students will also practice professional writing skills and public presentiations. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: BPH Majors only plus CPH 310, CPH 320, CPH 330, CPH 350 and CPH 440.

**CPH 472 PUBLIC HEALTH PROFESSION AND PRACTICE.** (3)
This course familiarizes students with the practice of public health, introducing them to the various settings and arenas in which public health professionals work. Through guest lectures and discussions, students will gain an understanding of the theoretical and methodological underpinnings of global public health practice. Key content areas such as health determinants, issues of health, education, and poverty, ethical and human rights concerns, the impact of culture on global health, the burden of disease on the global health population, and other pertinent global public health topics will become focal points for class discussion. This course will emphasize theory-driven empirical investigation of key behavioral issues that influence the health and well-being of people around the globe. Case studies of global public health issues will be utilized. Prereq: CPH 440 and BPH Majors only or by permission of the instructor.

**CPH 535 DATABASES AND SAS PROGRAMMING.** (3)
Students will learn how to construct and maintain databases with applications to public health. They will also learn how to program in SAS, the leading statistical analysis system. SAS skills will be utilized heavily throughout this course and students will have the opportunity to interact with managers and organizational leaders from a variety of health service agencies. Prereq: CPH 201 or permission of the instructor.

**CPH 423 HEALTH OF KENTUCKIANS.** (3)
Prereq: BPH Majors only plus CPH 310, CPH 320, CPH 330, CPH 350 and CPH 440.

**CPH 441 THE SMOKING GUN: TOBACCO AND THE PUBLIC'S HEALTH.** (3)
Prereq: Junior or Senior undergraduate in good academic standing, recommendation from advice, proof of tobacco smoking exposure in the last year.

**CPH 450 MANAGING HEALTH ORGANIZATIONS TO IMPROVE POPULATION HEALTH.** (3)
Prereq: CPH 201 or permission of the instructor.

**CPH 470 PUBLIC HEALTH CAPSTONE.** (3)
Prereq: BPH Majors only plus CPH 310, CPH 320, CPH 330, CPH 350 and CPH 440.

**CPH 472 PUBLIC HEALTH PROFESSION AND PRACTICE.** (3)
Prereq: BPH Majors only plus CPH 310, CPH 320, CPH 330, CPH 350 and CPH 440.

**CPH 476G A SICK WORLD: GLOBAL PUBLIC HEALTH IN THE EARLY 21ST CENTURY.** (3)
Prereq: BPH Majors only plus CPH 310, CPH 320, CPH 330, CPH 350, and CPH 440.

**#KEY:** # = new course  * = course changed † = course dropped
Course Descriptions

*CPH 551 COMPARATIVE HEALTH SYSTEMS. (3)
An overview of healthcare system structure in selected countries with attention to their development history, financing, and delivery infrastructure. Prereq: Enrollment in a public health degree program or permission of instructor.

CPH 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of biology (BIO 103 or BIO 148 or equivalent) or permission of instructor. (Same as BIO/ENT 561.)

CPH 565 SPECIAL TOPICS IN PUBLIC HEALTH: (Subtitle required.)
This course provides focused coverage within domains of public health, including, but not limited to: Biostatistics; Epidemiology; Gerontology; Health, Behavior & Society; Health Management & Policy; and Preventive Medicine and Environmental Health. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduates and graduate students university-wide.

CPH 580 BIOSTATISTICS I. (3)
This course covers univariate statistical methods commonly encountered in public health studies. This course is descriptive statistics, hypothesis testing, paired and unpaired tests, ANOVA, contingency tables, log rank test, regression and correlation. Prereq: MA 109 or higher. (Same as STA 580.)

CPH 600 HEALTH SERVICES AND SYSTEMS ORGANIZATION. (3)
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: College of Public Health graduate program enrollment or permission of instructor.

*CPH 601 OCCUPATIONAL & ENVIRONMENTAL HEALTH. (3)
This course provides an introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor.

*CPH 603 DATA ANALYSIS. (3)
This course covers topics relating to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards).

*CPH 604 FOUNDATIONS OF HEALTH BEHAVIOR. (2)
This course will demonstrate how changes in health behavior can and do impact population-level indicators of morbidity and mortality. Within the context of the socio-ecological framework, students will focus on health behavior theories and interventions targeting the intra- and interpersonal levels of the framework. Students will apply an intervention mapping approach to identify priority needs for health promotion and design health promotion programs. Students will be able to make clear linkages between health promotion practices and the overarching goals of public health. Selection and design of strategies will be achieved through an understanding of theory-based approaches that have been widely applied in health promotion research. Prereq: Admission to MPH program or permission of instructor.

CPH 605 EPIDEMIOLOGY. (3)
This is an initial graduate level course in the principles of epidemiology and applications in preventive medicine and environmental health. The course consists of lectures and informal discussions. Principles and methods of epidemiologic research with a focus on issues of study design and analysis will be presented. Prereq: Graduate student in good standing in the MPH program, MSPH program, or community health nursing, or consent of instructor.

CPH 608 PUBLIC HEALTH CAPSTONE. (3)
To be successful in the MPH degree program and the profession, students are expected to demonstrate excellence in communication skills both orally and in writing. The `manuscript' format for the capstone project is intended to familiarize students with the rigor of preparing manuscripts for professional journals. This course provides course credit for students who successfully complete the MPH capstone project and oral final examination. Prereq: MPH students only.

CPH 609 PUBLIC HEALTH PRACTICUM. (3 or 6)
The public health practicum is designed as an integrative experience in the workplace. The practicum is an opportunity to apply classroom theories and methods under the guidance of an experienced public health practitioner with faculty oversight. Prereq: Admission to MPH program or permission of instructor.

CPH 610 INJURY EPIDEMIOLOGY AND CONTROL. (3)
The epidemiological basis for understanding the distribution and determinants for traumatic injury and poisonings including both intentional and unintentional events. Topics include sources of data, methodological approaches to studying injuries, evaluation of injury interventions and the link between epidemiology and public health policy impacting injuries. Prereq: PM 620 and/or permission of instructor.

CPH 611 ADVANCED EPIDEMIOLOGY. (3)
This course provides specialized epidemiologic content and method designed to meet the research and practice needs of health professionals. Practice-based problem sets and hands-on computer assignments will complement this seminar-oriented course, focusing on the role of epidemiology in the prevention of disease and injury. Prereq: CPH 605 or consent of instructor. (Same as PM 621.)

*CPH 612 INFECTIOUS DISEASE EPIDEMIOLOGY. (3)
This course applies the principles of infectious disease epidemiology to infectious and emerging diseases of public health importance. Prereq: CPH 605 or consent of instructor.

CPH 613 MOLECULAR EPIDEMIOLOGY, CANCER PREVENTION AND CONTROL. (3)
This course consists of didactic lectures, journal clubs, and small group roundtable discussions related to molecular epidemiology. Topics include biomarker discovery and development for cancer prevention and control. The overarching goal of this course will be to assess how biomarkers are developed and used for the risk assessment, early detection, diagnosis, prognosis, and theragnosis of cancer. Prereq: CPH 605 or consent of instructor.

CPH 614 MANAGERIAL EPIDEMIOLOGY. (3)
This course applies and integrates the principles and tools of epidemiology to the decision-making process in health care management. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

*CPH 615 CANCER EPIDEMIOLOGY. (3)
This course applies and integrates the principles and tools of epidemiology to the study of cancer. The course includes discussion of the epidemiology of various kinds of cancer across the United States and the world by age, gender, and race/ethnicity. The underlying biology behind the development of cancer in humans, cancer surveillance, the epidemiology of various kinds of cancer by category of major risk factors such as human behavior, (e.g. smoking and alcohol use), endogenous/exogenous hormones, viruses, environmental/occupational exposures, and diet, and an overview of data and methods for cancer surveillance, measuring the impact of risk factors, determining the incidence of cancer and cancer clusters, measuring patterns of care, and understanding the determinants of survival. Prereq: CPH 605 or consent of instructor.

CPH 616 EPIDEMIOLOGY OF AGING. (3)
A study of work-related and environmental exposures and hazards associated adverse health outcomes. Integrating the fields of occupational and environmental epidemiology. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 620 or consent of instructor.

CPH 618 EPIDEMIOLOGY OF AGING. (3)
This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and CPH 605/PM 620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as GRN 618.)

#CPH 619 EPIDEMIOLOGY OF THE OPIOID EPIDEMIC. (3)
This course will provide an interdisciplinary and contemporary overview of the epidemiology of substance use and public health approaches to reducing harms related to substance use (e.g., HIV, hepatitis C, overdose). The course will also introduce novel methods used in epidemiologic research on substance use, including strategies for participant recruitment and collection of sensitive behavioral data; interwoven with this content will be discussions of the ethical considerations for research involving people who use drugs. The course will focus dominantly on heroin and nonmedical use of prescription opioids, but will also discuss issues surrounding cocaine, crack, methamphetamine, nonmedical use of other prescription drugs, hallucinogens, synthetic drugs, and other emerging substances. These topics will be explored using a range of approaches, including readings, documentaries, and discussions with guest lecturers involved in epidemiologic research on substance use, public health practice, and/or who are in recovery from substance use. Prereq: Graduate student or consent of instructor.

*CPH 620 OCCUPATIONAL & ENVIRONMENTAL HEALTH. (3)
This course addresses advanced theories and practices of identifying, assessing, and controlling occupational and environmental hazards that may adversely affect the health of communities and working populations. The course emphasizes harmful effects of non-chemical hazards, such as radiation, noise, hypoxia, and physical agents that lead to morbidity and mortality. However, evaluation and control measures will cover many types of hazardous exposures, including those from chemical exposures. Prereq: CPH 601 or consent of instructor.

#CPH 621 UNDERSTANDING AND COMMUNICATING ENVIRONMENTAL HEALTH RISKS. (3)
Public health practitioners and researchers require knowledge of how exposure to environmental and occupational contaminants can adversely affect the health of both current and future generations. Public health professionals also require skills to communicate clearly with multiple stakeholders about opportunities to assess, control, and/or prevent complex environmental health hazards. In this course, students will develop foundational environmental health concepts and build cultural competencies for effective stakeholder communication. Prereq: Admissions to College of Public Health program or consent of instructor.

CPH 622 TOXIC AGENTS AND THEIR IMPLICATIONS IN PUBLIC HEALTH. (3)
This course provides an overview of chemical agents within the environment, their interaction with the human organism, and resultant public health implications. The goal of this course is to provide students with core knowledge about key classes of chemicals, their interactions with the human organism and the health implications. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as STA 580.)
Course Descriptions

**CPH 623 PUBLIC HEALTH BIOLOGY.**
Public Health Biology is a 1 credit course offered over five weeks that will introduce students to some of the basic terminology and concepts of human health.

**CPH 630 BIOSTATISTICS II.**
Students will learn statistical methods used in public health studies. This includes receiver operator curves, multiple regression, logistic regression, Cox proportional hazards, Mantel-Haenszel procedure, and the Cox proportional hazards model. Prereq: STA 570, CPH 603, STA 580/CPH 580, or equivalent. (Same as STA 681.)

**CPH 631 DESIGN AND ANALYSIS OF HEALTH SURVEYS.**
Students will learn design and analysis issues associated with well-known national health surveys, including reliability and validity of measurements, instrument validation, sampling designs, weighing of responses, and multiple imputations. Students will learn how to use statistical software to analyze data from complex survey designs. Lecture, two hours in the laboratory, two hours per week. Prereq: STA 580 or equivalent.

**CPH 632 FUNDAMENTALS OF CLINICAL RESEARCH.**
This course is intended to lay the foundation for the more advanced study necessary for a clinical research investigator; and, will cover the concepts of clinical research design and implementation with an emphasis on clinical trials. This course is intended to be a springboard and to complement the more advanced curricula in Epidemiology and Biostatistics, by providing concepts that will aid the student in patient-oriented investigation. Some medical knowledge is preferable for the successful completion of this course. Prereq: CPH 605 or permission of instructor.

**#CPH 634 ANALYTICS METHODS FOR HEALTHCARE DATA.**
The course will discuss the use and importance of observational data, such as naturalistic real-world trials, patient registries, and health care claims. We will review issues involved in analyzing observational data (like selection bias or confounding) and common statistical solutions to those issues (e.g., propensity score matching). As a part of “hands-on” training experience, students will work with a subset of health claims data to gain experience in analyzing, managing and exporting data to statistical software. Prereq: Enrollment in the Master of Public Health degree program or consent of instructor.

**CPH 636 DATA MINING IN PUBLIC HEALTH.**
This course concerns statistical techniques for and practical issues associated with the exploration of large public health data sets, the development of models from such data sets, and the effective communication of one’s findings. Prereq: STA/CPH 580 and CPH 535, or graduate program status in Ph.D. Statistics or Ph.D. Epidemiology/Biostatistics.

**CPH 640 WOMEN’S HEALTH.**
This course will cover the broad spectrum of women’s health topics including substance abuse, violence against women, nutrition, chronic diseases, reproductive and sexual health, and menopause. The course content will also emphasize the social, economic, environmental, behavioral, and political factors associated with women’s health. We will address these content areas using a life course perspective. The epidemiology, measurement and interpretation of these factors, and how these factors can be translated into interventions, programs, and policy, will be of major interest. Our focus will be primarily within the United States though we will touch on some aspects of global health. Prereq: Enrollment in the MPH program or permission of instructor.

**CPH 641 PUBLIC HEALTH AND ANTHROPOLOGY.**
Examination of how the perspectives and methods of anthropology can be and have been applied in public health research and intervention projects. Prereq: Enrollment in the MPH, or DrPH program, or consent of instructor.

**CPH 642 ECOLOGICAL AND ADVANCED HEALTH BEHAVIOR THEORY.**
Exploration of ecological model and other advanced theories of health behavior, based on theoretical and case-study literature. Contrasts individual-level and population-level approaches to health behavior. Prereq: CPH 604 or consent of instructor.

**CPH 643 MEASURING HEALTH BEHAVIOR: QUANTITATIVE & QUALITATIVE APPROACHES.**
This course focuses on measurement, the key component of research. Topics include types of measurement; units of measurement; theory and measurement; reliability and validity; survey development; how and where to find “good” measures of health behaviors; quantitative and qualitative methods of evaluating cultural considerations in measurement. The course relies upon the sociocultural framework. Acknowledging that health behaviors (as well as their determinants, consequences, and correlates) can and should be measured at all levels of society (e.g., individual, relational, community, and societal). The goal of the course is to train the student in how to measure health behaviors both responsibly and effectively. Prereq: Enrollment in the MPH, or consent of instructor.

**CPH 644 RURAL HEALTH DISPARITIES.**
Through class meetings, course readings, and assignments, this course will provide students with a comprehensive overview of issues pertaining to health disparities of rural populations by examining current programs and policies, relevant literature, public health practice, and quantitative and qualitative research pertaining to the health and well-being of rural populations.

**CPH 645 FOOD SYSTEMS, MALNUTRITION AND PUBLIC HEALTH.**
Exploration of the role of the global food system in shaping food consumption and the implications for public health. Prereq: Enrollment in College of Public Health or consent of instructor.

**CPH 646 SPECIAL TOPICS IN BEHAVIORAL HEALTH.**
(Subtitle required).
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH 647 RESEARCH METHODS FOR PUBLIC HEALTH.**
This course provides the student with basic knowledge about the design and analysis of research in the field of health behavior. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health behavior; 2) achieving competence in research methodology; and 3) understanding the conceptual application of analytic techniques to data. Prereq: M.P.H., Dr. P.H., or Ph.D. in public health student or permission of instructor.

**CPH 648 ELIMINATING RACIAL AND ETHNIC HEALTH DISPARITIES.**
This course will help the learner understand differences in minority populations in order to help build and lobby for the infrastructure needed to prevent excess disease and death among underserved populations. A special emphasis in this class will be placed on understanding the role of culture in influencing the adaptation of health behaviors, practices, and behaviors. An additional focus will be placed on health status, current trends, and health indicators for special populations. Prereq: Graduate student in Public Health and others by instructor permission.

**CPH 649 INDEPENDENT STUDIES IN HEALTH BEHAVIOR.**
Designed for advanced students with research or special study interest in Behavioral Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**#CPH 650 PUBLIC HEALTH SYSTEMS ADMINISTRATION.**
The course introduces students to foundational concepts of health policy, the US health care and public health system, at the national level. This course is intended to be a springboard and to the implementation and impact of population health improvement strategies. Prereq: Enrollment in the MPH program or permission of the instructor.

**CPH 652 HEALTH FINANCE.**
This course provides students an understanding of key principles of financial management as they are applied in healthcare organizations. Knowledge of key elements of strategic financial planning and their application in developing organizational plans and programs will be enhanced through the case study method. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

**CPH 653 PUBLIC HEALTH LAW & POLICY.**
Overview of public health law with emphasis on topics and materials used by public health practitioners, as well as those of law to advance public health agenda. Prereq: Graduates status or approval of instructor.

**CPH 655 MANAGEMENT ACCOUNTING FOR HEALTHCARE ORGANIZATIONS.**
This course introduces the use of management accounting techniques for decision making in healthcare organizations. Lectures, problems and cases will be used to focus on various types of healthcare organizations. Prereq: Enrollment in a College of Public Health degree program or MBA (or permission of instructor).

**CPH 658 HEALTH ECONOMICS.**
This course introduces students to basic economic concepts to understand the U.S. health care system in terms of access, cost, and quality. This course provides the perspective that economic reasoning is a valuable critical thinking approach to social science inquiry and demonstrates how this perspective helps students understand health policy and market issues. Prereq: Enrollment in a College of Public Health degree program or certificate program (or permission of instructor).

**CPH 660 DISEASE MAPPING & DATA VISUALIZATION.**
This course will introduce students to basic concepts in disease mapping and data visualization using a variety of software packages. These will include Excel from Microsoft, Epinfo from the Centers for Disease Control & Prevention (CDC), QGIS from the open-source QGIS Project, and more. Students will use these tools to gain experience producing figures and tables appropriate for publication in epidemiologic manuscripts. Prereq: CPH 605 or consent of instructor.

**CPH 661 BIOETHICS FOR PUBLIC HEALTH PROFESSIONALS.**
This course will engage students in readings, projects, and discussions to address controversial issues of bioethics for public health professionals. Prereq: Enrollment in a Public Health degree program or consent of instructor.
Course Descriptions

CPH 662 PUBLIC HEALTH RESPONSE TO TERRORISM, DISASTERS AND EMERGENCIES. (3)
This course will focus on the public health concepts, history, methods, planning, and response preparedness to weapons of mass destruction, terrorism, natural and human-made disasters, and other health emergencies. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

*CPH 663 INTRODUCTION TO PUBLIC HEALTH PRACTICE. (1)
This course is to be a practical introduction to public health at the national, state, and local levels. This course is intended for students in the Master of Health Administration, PhD in Gerontology, and PhD in Epidemiology & Biostatistics. Prereq: Enrollment in one of these programs or permission of instructor.

CPH 664 DESIGN AND ANALYSIS OF CLINICAL TRIALS. (3)
This course will introduce the fundamental concepts used in the design of Phase II/IV clinical trials and statistical methodology associated with trial data analysis. Prereq: STA 570 or permission of instructor.

CPH 665 ETHICAL ISSUES IN CLINICAL RESEARCH. (3)
Based on NIH guidelines for Responsible Conduct of Research, this course will present ethical and regulatory guidelines for conducting clinical research. Prereq: Participation in a course leading to Graduate Certificate in Clinical Research Skills, or permission of instructor. (Same as PHR 665.)

CPH 670 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (2)
This course is designed to orient students to leadership and teamwork processes involved in clinical and translational research and to train students to function effectively in team settings. Students will be assigned to multidisciplinary teams with a designated principal investigator. Each team will be assigned to develop an integrated multidisciplinary clinical protocol to address an assigned clinical research topic. Students are expected to apply their knowledge of scientific communication, research design, and legal and ethical considerations to the scientific design of research, and the development of the associated clinical protocol. The course will consist of five class meetings. The first three classes will consist of an orientation to translational research and the role of leadership and teamwork in multidisciplinary clinical and translational research. The final class, one hour per week, is reserved for a teams organizational meeting. Supplemental team meetings are optional. Each team member will be required to complete an individual five-page research methods report that is integrated into a multidisciplinary research application addressing a clinical research topic assigned to the team under the direction of an assigned principal investigator. Prereq: Graduate standing.

*CPH 672 EVIDENCED-BASED PUBLIC HEALTH PLANNING & PRACTICE. (3)
This course provides the student with knowledge and skills in understanding and practicing evidence-based public health: applying scientific reasoning, systematic use of data and information systems, and appropriate public health theories to the development, implementation, and evaluation of effective programs and policies in public health. The course will emphasize online data tools, and other resources that support the evidence-based decision making process. Prereq: Enrollment in the MPH program or consent of instructor.

#CPH 674 FOUNDATIONS OF HEALTH BEHAVIOR II. (2)
This course will demonstrate how changes in health behavior can and do impact population-level indicators of health status and mortality. Within the context of the sociocultural framework, students will focus on health behavior theories and interventions targeting the organizational, community, and societal levels of the framework, as well as multilevel interventions. Students will apply an intervention mapping approach to identify priority needs for health promotion and design health promotion programs. Students will be able to make clear linkages between health promotion practices and the overarching goals of public health. Selection and design of strategies will be achieved through an understanding of theory-based approaches that have been widely applied in health promotion research. Prereq: CPH 604 and Admission to MPH program or permission of instructor.

CPH 680 FUNDAMENTALS OF HEALTHCARE QUALITY AND SAFETY. (3)
This course introduces you to the broad discipline of health services systems with an emphasis on quality and patient safety. By the end of this course you will have a better understanding of the theory, methods, structures, and processes of health services, quality, patient safety and why the core areas of interest are so important in health care. Prereq: CPH 600 or permission of instructor.

CPH 681 LEGAL ASPECTS OF HEALTHCARE MANAGEMENT. (3)
The course will familiarize students with the application of law to management issues in healthcare organizations. Skills addressed include terminology, legal reasoning, the tools of law, and topics specific to healthcare settings. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 682 QUANTITATIVE METHODS FOR HEALTHCARE MANAGEMENT. (3)
This course is a survey of quantitative methods for healthcare managers. Specific content areas include problem selection, data collection, measurement, analytic techniques, and research design. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 683 OPERATIONS MANAGEMENT AND QUALITY IMPROVEMENT. (3)
This course covers the basics of key operations management issues including management of productivity, quality, and inventory as well as process improvement, capacity and throughput analysis and benchmarking. Development of operational performance metrics and basics of both project management and supply chain management are also covered. The focus is on developing tools to support decision making under conditions of uncertainty, risk, and multiple objectives. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 684 HUMAN RESOURCES MANAGEMENT IN HEALTHCARE. (2)
This course will examine concepts, methods, systems, and processes for planning and managing human resources in healthcare. It is designed for those aspiring to strategic leadership roles in complex healthcare organizations, rather than primarily for those seeking a specialized role in human resources. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 687 ORGANIZATION THEORY AND BEHAVIOR. (3)
This course introduces the disciplines of organization theory and organization behavior and their application in healthcare organization management. Special attention is given to understanding the practice of administration in healthcare organizations, the skills needed for effective management, and evolving management approaches (i.e. Lean). Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 688 INTERNSHIP IN HEALTH ADMINISTRATION. (1-3)
Managerial experience in a healthcare setting is an essential component of the health administration educational process. An administrative internship, also referred to as the internship, provides the student with the opportunity to put into practice the knowledge and skills learned in the classroom in healthcare organizations under the guidance of a senior healthcare administrator with faculty oversight. Prereq: Enrollment in a MPH program or permission of the instructor.

CPH 689 PUBLIC HEALTH PRACTICE THROUGH SERVICE LEARNING. (1-3)
This course will provide students the opportunity to gain first hand public health experience by participating in projects in a community setting. Number of credit hours, associated contact hours, and assignments to be determined in consultation with the instructor. Prereq: Enrollment in a Public Health degree program and completion of the core curriculum, or consent of instructor.

CPH 698 OCCUPATIONAL SAFETY AND HEALTH: FIELD SURVEYS. (3)
The course provides students with the opportunity to visit various work sites and industries in the Appalachian region. This course will provide students with onsite, direct experience recognizing hazards and evaluating control measures to reduce occupational health and safety risks. This is a cross-disciplinary course for graduate students in occupational safety, industrial hygiene, environmental health, occupational nursing, ergonomics, injury prevention, agricultural health and safety, occupational epidemiology and occupational medicine. Prereq: CPH 620 Occupational Health.

CPH 701 CURRENT ISSUES IN PUBLIC HEALTH. (1)
This seminar course will introduce M.S. and Ph.D. students to the critical role of public health in protecting, maintaining, and improving the health of the population. Specific emphasis will be directed to the "Ten Essential Functions of Public Health" through weekly lectures, readings, and writing assignments. While all five core areas of public health will be introduced. Prereq: Admission to College of Public Health M.S. or Ph.D. program.

CPH 709 GLOBAL HEALTH INTERNSHIP. (1)
This course will consist of an internship in a foreign country, preferably in a resource-limited setting. Students will have both a University of Kentucky and a local mentor, and will develop a plan for participating in some type of health-related project or activity during a four-week period. A paper or presentation summarizing the key components of the internship experience will be submitted upon returning to Lexington. Prereq: Enrollment in the Graduate Certificate in Global Health Program, and completion of the course CPH 751, Introduction to Global Health, or approval from the Director of the certificate.

CPH 710 ADVERSE EVENTS IN HEALTHCARE: EPIDEMIOLOGY AND PREVENTION. (3)
This course will focus on the epidemiology, history, methods, and ancillary laboratory tools used in the study and control of healthcare associated adverse events, including discussions of the concepts and theory, basic types of epidemiological investigations of adverse events, and distinctive problems associated with specific risk factors. Adverse events will be discussed as components of patient safety and the quality of care.

CPH 711 CHRONIC DISEASE EPIDEMIOLOGY. (3)
A survey course on the leading chronic diseases in the U.S., including cardiovascular disease, cancer and diabetes with focus on surveillance and risk factors. Prereq: Enrollment in a Public Health degree program, CPH 605/PM 620 Introduction to Epidemiology or consent of instructor.
**Course Descriptions**

**CPH 721 ADVANCED EPIDEMIOLOGY.**

This course provides students with the understanding of advanced issues in the design, analysis, and interpretation of epidemiologic studies. The course text and associated readings will focus on study designs and the methodologic approaches to addressing bias, confounding, and error in the design of population-based health research. The development of a systematic approach for evaluating evidence from epidemiologic studies as it relates to demonstrating causality will be emphasized. Focusing on study design, methods of associations, confounding, interaction, sources of bias, and error, the student will gain an understanding of epidemiology and its role in the medical and public health sciences. Prereq: Enrollment in a public health degree program or CPH 605 or consent of instructor. **(3)**

**CPH 713 PHARMACOEPIDEMIOLOGY.**

This course will provide an overview of the field of pharmacoepidemiology and its relationship to health care research. Various topics including methodology and analytical issues relevant to the conduct of pharmacoepidemiologic research will be covered. Time will also be spent reviewing existing papers in the field of pharmacoepidemiology. Prereq: CPH 605 and STA 580 or equivalent, may be concurrent. (Same as EPS 701.) **(3)**

**CPH 714 MATERNAL AND CHILD HEALTH INFORMATION AND DATA SYSTEMS.**

This course will equip participants with basic skills in identifying, accessing, interpreting and utilizing U.S. maternal and child health data systems at the national and state level. Participants will learn the essential ways that secondary data sources inform public health practice and how to interpret and present information from these sources. They will also learn key skills in data interpretation, data linkage, working with small numbers, stratifying data by population subgroups and examining trends over time. **(3)**

**CPH 715 PERINATAL EPIDEMIOLOGY.**

This course will equip participants with basic skills in the field of perinatal epidemiology and its application in the field of Maternal and Child Health. Students will work with birth and death data using SAS, SPSS or STATA to gain experience in secondary data analysis; from initial data base organization and cleaning through descriptive analysis and interpretation of the content. Topics such as proper data coding, the use of prenatal indices and an introduction to data linkage will be included. **(3)**

**CPH 716 PROSEMINAR IN OCCUPATIONAL HEALTH AND SAFETY.**

(0-1)

This course will provide students, in a seminar format for 6 sessions during the semester, presentations from occupational health and safety professionals from a variety of disciplines and experiences. The seminar is 2.5 hours long at each session. Knowledge regarding workplace exposures and related health outcomes will be provided. Students should acquire basic understanding of current topics in the field of occupational medicine, nursing, safety, industry, hygiene, epidemiology, biostatistics, mining, and agriculture. **(3)**

**CPH 718 SPECIAL TOPICS IN EPIDEMIOLOGY:**

(Subtitle required).

This course will engage in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 719 INDEPENDENT STUDIES IN EPIDEMIOLOGY.**

(1-3)

Designed for advanced students with research or special study interest in Epidemiology. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 720 HEALTH OF AGRICULTURAL POPULATIONS.**

(3)

Health of Agricultural Populations addresses the threats and hazards that impact the health, safety and productivity of farmers, members of farm families, hired farm workers, and others who live or work in agricultural environments, such as crop and livestock production, timber production and commercial fishing. This course offers analysis in selected issues of agricultural health and safety. Students will visit agricultural operation sites. **(3)**

**CPH 725 CLINICAL PREVENTIVE SERVICES.**

(3)

Disease prevention and control have been recognized as more efficient and effective in extending the quality and quantity of human life. As a core part of the Preventive Medicine-Public Health Residency curriculum, this course will focus on up-to-date, clinically relevant information and cutting edge research results regarding clinical preventive medicine and public health issues. The primary focus of this course will be 1) evidence based preventive health care services, and 2) recommendations of the United States Preventive Services Task Force for screening and preventive health care services. Prereq: Permission of instructor. **(3)**

**CPH 728 SPECIAL TOPICS IN OCCUPATIONAL/ENVIRONMENTAL HEALTH:**

(Subtitle required).

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 729 INDEPENDENT STUDIES IN OCCUPATIONAL/ENVIRONMENTAL HEALTH.**

(1-3)

Designed for students with research or special study interest in Occupational and Environmental Health. Structured activities with goals, objectives, and deliverables are designed with individual students. May be repeated to a maximum of 6 credit hours; may be semester. Prereq: Enrollment in a College of Public Health program or consent of instructor. This is a controlled enrollment course; see instructor for additional information. **(1-3)**

**CPH 738 SPECIAL TOPICS IN BIOSTATISTICS:**

(Subtitle required).

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 739 INDEPENDENT STUDIES IN BIOSTATISTICS.**

(1-3)

Designed for advanced students with research or special study interest in Biostatistics. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 740 INTRODUCTION TO MATERNAL AND CHILD HEALTH.**

(3)

This course will acquaint students with the major issues and challenges of working in the area of maternal and child health. Prereq: UK graduate or professional school student status. **(3)**

**CPH 746 RESEARCH METHODS AND PROGRAM EVALUATION FOR HEALTH BEHAVIOR.**

(3)

This course provides the student with basic knowledge about the design and analysis of research in the field of health promotion. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health promotion practice; 2) achieving competence in research methodology, and 3) understanding the conceptual application of analytic techniques to data. This course also prepares second-year MPH students concentrating in Health Behavior to successfully construct and defend their thesis in April of the current academic year. Prereq: CPH 672 and CPH 643, or permission of instructor. **(3)**

**CPH 748 RESEARCH.**

(0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. **(3)**

**CPH 752 LEADERSHIP IN HEALTH ORGANIZATIONS.**

(3)

This course is designed to explore the dimensions of leadership as presented in both the traditional and contemporary literature. It focuses student understanding on their leadership qualities and the ways to apply them in the current public health environment. **(3)**

**CPH 754 HEALTH CARE ACCESS AND COVERAGE.**

(3)

This course offers students a greater understanding of programs available to underserved populations, how these changes in health care market impact care provided to underserved populations and policy and programmatic options to address the needs of underserved populations. Prereq: Graduate or post-baccalaureate student status. **(3)**

**CPH 755 LEADING CHANGE WITH HEALTHCARE TEAMS.**

(3)

This course focuses on developing the skills necessary to successfully facilitate teams to achieve sustainable change in healthcare systems. The course introduces the foundational concepts of change management, key features of successful teams and factors that lend to team failures; and specific behaviors and communications that enhance effective team interaction. By the end of this course you will have a better understanding of team dynamics and the tools of implementation with special emphasis on applications to improve healthcare quality, safety, satisfaction and efficiency. Prereq: Enrollment in a College of Public Health degree program (or certificate program) or permission of instructor. **(3)**

**CPH 758 SPECIAL TOPICS IN HEALTH MANAGEMENT POLICY:**

(Subtitle required).

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor. **(1-3)**

**CPH 759 INDEPENDENT STUDIES IN HEALTH MANAGEMENT POLICY.**

(1-3)

Designed for students with research or special study interest in Health Services Management. Students must develop a prospectus that specifies goals, objectives, and deliverables with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health degree program or consent of instructor. This is a controlled enrollment course; contact instructor for additional information. **(1-3)**

**CPH 763 ETHICS FOR PUBLIC HEALTH.**

(3)

The focus of this class is on applied ethics and its application to public health issues. In addition to examining current issues that might arise during the timeframe of the course, we will address the following: ethical frameworks, theories, and approaches; a unique public health ethics; social justice; ethics surrounding infectious diseases, including surveillance and control; health disparities and environmental and occupational health issues; genetics; smoking cessation; end-of-life issues; and many other ethical issues. Prereq: Enrollment in the MPH program or consent of instructor. **(3)**

**CPH 767 DISSEMINATION RESEARCH CREDIT.**

(2)

Students will enroll in this course to complete their research for their dissertation. Prereq: Approval of DGS. **(2)**

**CPH 768 RESIDENCY CREDIT FOR MASTER'S DEGREE.**

(1-6)

May be repeated to a maximum of 12 credits. Prereq: All course work toward the degree must be completed. **(1-6)**
Course Descriptions

CPH 776 INTRODUCTION TO GLOBAL PUBLIC HEALTH. (3) This course will acquaint students with the major issues and challenges for public health in a variety of wealthy, emerging, and impoverished nations and with the impact of local or regional issues on national and/or global levels. Prereq: UK graduate or professional school student status.

CPH 778 SPECIAL TOPICS IN PUBLIC HEALTH: (Subtitle required.) (1-3) This course will engage in reading, projects, lectures and/or discussions to address current topics of special interest or concern in public health. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 779 INDEPENDENT STUDIES IN PUBLIC HEALTH. (1-3) Designed for advanced students with research or special study interests in Public Health. Students and instructor will confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 780 STRATEGIC PLANNING AND MARKETING IN HEALTHCARE. (3) This course focuses on the future needs of health care organizations as contrasted with day-to-day operations management. Strategies for the design and implementation of organizational change will be addressed. The strategic planning components of environmental analyses, direction strategy, gap analysis, strategic options, goals and objectives, and performance monitoring framework the basis of the course. Current trends in health care delivery and financing, marketing and performance measurements are illustrated through case analysis. Prereq: Enrollment in College of Public Health degree program or permission of instructor.

CPH 781 HEALTHCARE ETHICS AND GOVERNANCE. (2) This course addresses the basic concepts and principles of healthcare ethics, including the biomedical, managerial, and organizational components and applies them using case studies, role playing, and ethical exercises. The course also examines the roles and responsibilities of healthcare governing boards and factors that influence their effectiveness. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 782 INFORMATION SYSTEMS IN HEALTH CARE. (3) This course provides an overview of information systems and their use in healthcare organizations. Topics include the history of IT use, recent developments, continuing challenges and emerging opportunities. The role of the healthcare manager in information system planning, selection and implementation is stressed. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 783 APPLICATIONS IN HEALTHCARE FINANCE AND OPERATIONS. (3) An analysis of the healthcare industry's financial framework and operational issues applying insights from earlier coursework in realistic scenarios. Prereq: Enrollment in MHA Program.

CPH 784 CASE STUDIES IN HEALTH ADMINISTRATION. (2) This course builds on the concepts and techniques introduced in the MHA curriculum and integrates them with a decision making focus in a variety of healthcare problems and settings. Case analysis will be used extensively to develop an opportunity for the student to apply appropriate skills in an unstructured environment. Prereq: Enrollment in MHA program and completion of two semesters of course work.

CPH 785 HEALTH POLICY. (3) An analysis of the development and implementation of health policy on a national, state, local and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values and political and community factors affecting policy development and program implementation. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 786 DOCTORIAL SEMINAR. (1) Students will attend colloquium sessions that will supplement the core curriculum with additional application. Prereq: Enrollment in the Ph.D. in Epidemiology and Biostatistics program.

CPH 787 INDEPENDENT STUDY IN HEALTH ADMINISTRATION. (1-3) Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Enrollment in MHA program.

CPH 788 SPECIAL TOPICS IN HEALTH ADMINISTRATION. (1-3) An analysis of selected issues with special significance for health administration. Prereq: Enrollment in MHA program.

CPH 790 WATER SANITATION AND HEALTH. (3) Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CE 655.)

CPH 841 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1) This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as BSC 620.)

CPH 901 PUBLIC HEALTH DOCTORAL PROFESSIONAL COLOSSUM. (1) Seminar course designed as the integrative introduction, consideration, capstone for the Doctor of Public Health (Dr.P.H.) degree. Offered each semester of enrollment. Prereq: Admission to the Dr.P.H. program.

CPH 910 ADVANCED EPIDEMIOLOGY. (3) This course provides students with the understanding of advanced issues in the design, analysis, and interpretation of epidemiologic studies. The course text and associated readings will focus on study designs and the methodologic approaches to addressing bias, confounding, and error in the design of population-based health research. The development of a systematic approach for evaluating evidence from epidemiologic studies as it relates to demonstrating causality will be emphasized. Focusing on study design, measures of associations, confounding, interaction, sources of bias and error, the student will gain an understanding of epidemiology and its role in the medical and public health sciences. Prereq: Enrollment in the doctorate of public health degree program and CPH 605 or consent of instructor.

CPH 911 PROFESSIONAL SEMINAR IN EPIDEMIOLOGY. (3) Professional Seminar in Epidemiology is an advanced course in one of the five content areas of public health designed as the link between academic work in epidemiology and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 910, or approval of instructor.

CPH 920 ADVANCED ENVIRONMENTAL HEALTH. (3) This professional seminar in Environmental Health is designed to provide comprehensive coverage of the principles upon which the Environmental Health field relies. Prereq: Admission into the Dr.P.H. curriculum.

CPH 921 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH. (3) Designed as the link between academic work in environmental health and application health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to Dr. P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

CPH 930 BIOSTATISTICS CONCEPTS FOR THE PUBLIC HEALTH PRACTITIONER. (3) This course covers topics related to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards). Prereq: Good standing in the DrPH program.

CPH 931 PROFESSIONAL SEMINAR IN BIOSTATISTICS. (3) Designed as the link between academic work in biostatistics and application in public health practice; and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr. P.H. program, CPH 930, or approval of instructor.

CPH 940 HEALTH-RELATED BEHAVIORS: MODELS AND APPLICATIONS. (3) Designed as the link between academic work in biostatistics and application in public health practice; and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr. P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.

CPH 941 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH ENHANCEMENT. (3) Designed as the opportunity to link academic work in health enhancement with application in public health practice and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr. P.H. program, CPH 940, or approval of instructor.

CPH 942 SEMINAR IN PUBLIC HEALTH COMMUNICATION. (3) This seminar in Public Health Communication is intended to acquaint students with theory and current research related to communication in public health settings. It is designed to provide insight into the communication that serves as the lifeblood of the organized institutions which promote public health. Those who wish to have a significant role in the management of public health practitioners, improve their understanding of organizations, understand how groups and individuals fit into the larger mission, need to apply advanced information and communication technologies, and desire to become more effective communicators will find this course worthwhile. This course is primarily designed to give students a background in theories, perspectives, concepts, and approaches to understanding communication. Thus, it seeks to promote student understanding, analytical skills, and critical thinking necessary for such professions as consulting, research, and management, and for their personal development.

CPH 949 DOCTORAL CAPSTONE RESEARCH. (0) This course will allow Dr.P.H. students to remain in a full-time enrollment status at the University of Kentucky while working on their doctoral capstone. Enrollment is restricted and by special permission only; students may only register for this course after all for-credit course work has been completed.

CPH 950 WELL MANAGED PUBLIC HEALTH CARE ORGANIZATION. (3) The Well Managed Public Health Care Organization is an advanced course addressing effective senior management of public and private organizations focusing upon public health. Prereq: Admission to the Dr. P.H. program, completion of MPH/MPH core or equivalent, or approval of instructor.
CPh 951 Professional Seminar in Public Health Management and Practice. (3)
Designed to link academic work in public health management with application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr. P.H. program, CPh 950, or approval of instructor.

CPh 952 Seminar in Advanced Leadership. (3)
This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the learner for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr. P.H. student or permission of the instructor.

CPh 953 Seminar in Ethical and Moral Decision-Making. (3)
This course provides the opportunity to link academic work in public health decision-making with its application to public health practice and to prepare the learner for the practice of public health decision-making based on ethical and moral principles. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health decision-making. The period of Nazi Germany 1933-1945 will comprise the underlying case study. The seminar will consider in depth the decisions made by Nazi political and military leaders, citizens, religious leaders, concentration camp commanders, guards, and prisoners, physicians, scientists and business leaders. Films will be used extensively in the seminar. Prereq: Enrollment as a Dr. P.H. student or permission of the instructor.

CPh 954 Seminar in Advanced Public Health Finance and Economics. (3)
This course provides the opportunity to link academic work in public health finance and economics with application in public health practice and to prepare the learner for key leadership roles in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health finance and economics. Prereq: Enrollment as a Dr. P.H. student or permission of instructor and approval of the Associate Dean for Admissions and Student Affairs.

CPh 956 Program Evaluation for Public Health Professionals and Leaders. (3)
This course is designed to provide Dr. P.H. students the knowledge and skills to guide and critically review program evaluations in their roles as public health professionals and leaders. The course focuses on providing an overview of the key concepts, methods, and approaches to program evaluation with an emphasis on public health practice. Topics include approaches to program evaluation, defining evaluation questions, managing an evaluation, program evaluation standards, program evaluation designs, reporting and disseminating results and findings, and political issues of evaluation. Prereq: Enrollment as a Dr. P.H. student or by permission of the instructor.

#CPh 957 Health Outcomes Research: Design, Measurement, and Analysis. (3)
This course explores how to plan and conduct rigorous health outcomes research studies at the clinic and population levels. Students will learn how to formulate health outcomes research questions, design a study to investigate selected research questions, evaluate the validity and reliability of health outcomes measures, and identify appropriate statistical analyses. Prereq: Doctoral student standing or consent of instructor is required.

CPh 960 Biology of Aging. (3)
This course will focus on the recognition and discussion of the outcomes of biological changes in terms of the effects of aging on the individual’s physical and psychosocial systems. It will be organized utilizing a systems approach to presentations, class discussions, class readings and on-line discussions. Prereq: Enrollment as a Dr. P.H. student or by permission of the instructor.

CPh 961 A Study of the Older Person. (3)
An increasing elderly population during this century has created a variety of pressing social issues. Underlying such issues is a long-standing cultural view of elders as a homogeneous group of people who are “different” from younger labor force participants, a view that has resulted in pervasive “ageism” – the collection of attitudes and practices that may reflect discrimination against elders. A properly informed public is necessary to combat ageism and establish sound economic, social, cultural and health care policies that successfully encompass all ages of society. Gerontology is a field of study designed to provide knowledge and a sound data base for dealing with present and future issues of aging and the older population, especially within the realm of public health. This course has been designed to provide students with a broad, comprehensive understanding of the aging process and the factors that influence aging. Prereq: Enrollment as a Dr. P.H. student or by permission of the instructor.

CPh 993 Professional Seminar in Foundations of Public Health Practice. (3)
A culminating experience professional seminar linking evidence-based academic work in public health with the foundations of practice. A fundamental part of the course is to prepare the learner for a community advocacy role in public health using skills sets found in critical analysis and leadership. Prereq: All 9X0 and 9X1 courses in the Dr. P.H. program.

CPh 994 Professional Seminar in Leading People - Managing Change. (3)
A culminating experience professional seminar linking academic work in public health leadership, management and ethics with application to public health practice and preparing learners for a leadership role in public health. Prereq: All five 9X0 and three 9X1 courses in the Dr. P.H. program.

CPh 995 Doctoral Seminar in Public Health Research Methods. (3)
A survey course in a seminar style covering both classical and recent literature in public health services, including description and critique of research. Prereq: HSM 601/CPH 602, STA 570 or 580, and admission to the Dr. P.H. program or post-doctoral fellowship, or consent of instructor.

CPh 996 Public Health Project or Dissertation Research. (1-12)
Public health project or dissertation research for residency credit. To be repeated unlimited. Prereq: Completion of the Dr. P.H. Determinative Examination.

CPh 997 Doctoral Public Health Field Practicum. (2-4)
Required public health field work is the integrative component of the curriculum and an opportunity to apply and test didactic learning. May be repeated twice. Laboratory, eight to sixteen hours per week. Prereq: Admission to the Dr. P.H. program, completion of MPH/MSPH core or equivalent, second year status, or approval of instructor.

CPh 998 Special Topics in Public Health (Subtitle required). (1-4)
Designed to address contemporary topics of significance in the field of public health as well as the study of specific topics and problems. May be repeated three times. Prereq: Admission to the Dr. P.H. program, consent of instructor.

CPh 999 Directed Studies in Public Health. (1-4)
Study and research on contemporary and specific topics and problems of significance to the field of public health, and the interests of individual students. May be repeated to a maximum of six hours. Prereq: Admission to the Dr. P.H. program, consent of instructor.

CS Computer Science

CS 100 The Computer Science Profession. (1)
An introductory seminar which covers the fundamental activities, principles, and ethics of the computer science profession. An overview of the discipline of computer science, examples of careers, the history of computing and experience with elementary computing tools are included.

CS 101 Introduction to Computing. (3)
An introduction to computing and its impact on society from a user’s perspective. Topics include: computation using spreadsheets, beautification using text formatters and word processors, information management with database managers, and program solving through program design and implementation using a simple programming language. Not open to students who have received credit for higher level computer science courses.

CS 115 Introduction to Computer Programming. (3)
This course teaches introductory skills in computer programming using a high-level computer programming language. There is an emphasis on both the principles and practice of computer programming. Covers principles of problem solving by computer and requires completion of an number of programming assignments.

CS 215 Introduction to Program Design, Abstraction, and Problem Solving. (4)
The course covers introductory object-oriented problem solving, design, and programming engineering. Fundamental elements of data structures and algorithm design will be addressed. An equally balanced effort will be devoted to the three main threads in the course: concepts, programming language skills, and rudiments of object-oriented programming and software engineering. Prereq: EGR 102 or CS 115 or equivalent.

CS 216 Introduction to Software Engineering Techniques. (3)
Implementation of large programming projects using object-oriented design techniques and software tools in a modern development environment. Software engineering topics to include: life cycles, metrics, requirements specifications, design methodologies, validation and verification, testing, reliability and project planning. Prereq: CS 215.

CS 221 First Course in Computer Science for Engineers. (2)
Characteristics of a procedure-oriented language; description of a computer as to internal structure and the representation of information; introduction to algorithms. Emphasis will be placed on the solution of characteristic problems arising in engineering. Prereq: Not open to students who have received credit for EGR 102 or CS 115.
Course Descriptions

CS 261 SOCIAL NETWORKS: METHODS AND TOOLS. (3)
The complex connections of the modern society is a multifaceted phenomenon resulting from the growing complexity of human population, the advent of fast global mass transportation infrastructure, the emergence of global companies and markets, and spurred by the Internet and its applications such as the Web, Facebook and Twitter. In this course, we learn about graph theory, game theory and computational tools required to model and analyze social networks, matching markets, web search, network externalities, tipping points, information cascades, epidemics, small worlds, and voting schemes. The course requires no programming background and has no university-level prerequisites.

CS 270 SYSTEMS PROGRAMMING. (3)
This course provides an introduction to computer systems and explores computer architecture, operating systems, and networks from a programmer’s perspective. The course also introduces advanced programming and debugging tools. Topics include hardware instruction sets, machine language and C language program representations, linking, loading, operating systems (process management, scheduling, memory management, interprocess communication, and file systems), network programming (socket programming and web protocols), and common security attacks and solutions. Prereq: CS 216; coreq: EE 280.

CS 275 DISCRETE MATHEMATICS. (4)
Topics in discrete math aimed at applications in Computer Science. Fundamental principles: set theory, induction, relations, functions, Boolean algebra. Techniques of counting: permutations, combinations, recurrences, algorithms to generate them. Introduction to graphs and trees. Prereq: MA 113 and either EGR 102 or CS 115.

CS 315 ALGORITHM DESIGN AND ANALYSIS. (3)

CS 316 WEB PROGRAMMING. (3)
This course introduces students to the Worldwide Web, languages and techniques used for web programming, data transfer over the Internet, and the tools available in the web environment. Prereq: CS 216.

CS 321 INTRODUCTION TO NUMERICAL METHODS. (3)

CS 335 GRAPHICS AND MULTIMEDIA. (3)
This course focuses on the graphical human-machine interface, covering the principles of windowing systems, graphical interface design and implementation, and processing graphical data. There is an emphasis on medium-scale programming projects with graphical user interfaces using a high-level procedural programming language and concepts such as object-oriented design. Prereq: CS 216 and engineering standing.

CS 340 APPLICABLE ALGEBRA. (3)
Topics include: Euclid’s algorithm, unique factorization moduli arithmetic, Fermat’s and Euler’s theorems, Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotient rings, field extensions, finite fields and BCH codes. Prereq: MA 322 or MA 213. (Same as MA 340.)

CS 371 INTRODUCTION TO COMPUTER NETWORKING. (3)
Introduction to the principles and concepts of the Internet; data communications and digital channel characteristics; networking applications and protocols, client-server paradigm and network programming; reliable data transfer, end-to-end transport; addressing, forwarding and routing, datagram networks; media access control, data link control; selected topics from cloud computing, network security and network management. Concepts are combined with programming and other hands-on assignments to enhance the learning of these topics. Prereq: CS 270, CS 315.

CS 375 LOGIC AND THEORY OF COMPUTING. (3)

CS 378 INTRODUCTION TO CRYPTOLOGY. (3)
The study of secrecy in digital systems. Methods of keeping information secure from classical systems dating from ancient times to modern systems based on modern mathematics. Basic methods of encryption using public key systems, block ciphers, and stream ciphers. The mathematical foundations for the design and analysis of data structures. Topics will include classical cryptography, modern methods of public and private key encryption, authentication and digital signatures, hashing, and passwords. Number theory, abstract algebra, combinatorics, and complexity theory necessary for the design and analysis of cryptographic systems. Prereq: CS 315 and STA 281, or instructor’s consent.

CS 380 COMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: Engineering standing, CS 215 and EE/CPE 282 or EE 280. (Same as CPE/EE 380.)

CS 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)
A course in the hardware and software of microprocessors. Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CS 380. (Same as EE 383.)

CS 395 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-3)
A course that provides an opportunity for supervised individual research and study in computer science. A topic of the course must be approved by a supervising instructor and the Computer Science Department. May be repeated to a maximum of six credits. Prereq: Consent of the Computer Science Department.

CS 405G INTRODUCTION TO DATABASE SYSTEMS. (3)
Study of fundamental concepts behind the design, implementation and application of database systems. Brief review of entity-relationship, hierarchical and network database models and an in-depth coverage of the relational model including relational algebra and calculi, relational database theory, concepts in schema design and commercial database languages. Prereq: CS 315 and graduate or engineering standing.

CS 415G COMBINATORICS AND GRAPHTHEORY. (3)
A basic course in the theory of counting and graph theory. Topics in enumerative combinatorics may include: generating functions, compositions, partitions, Fibonacci numbers, permutations, cycle structure of permutations, permutations statistics, Stirling numbers of the first and second kind, Bell numbers, inclusion-exclusion. Topics in graph theory may include: Eulerian and Hamiltonian cycles, matrix tree theorem, planar graphs and the 4-color theorem, chromatic polynomial, Hall’s marriage theorem, stable marriage theorem, Ramsey theory, electrical networks. Prereq: MA 213 or MA 322. (Same as MA 415G.)

CS 416G INTRODUCTION TO OPTIMIZATION. (3)
The course is an introduction to modern operations research and includes discussion of modeling, linear programming, dynamic programming, integer programming, scheduling and inventory problems and network algorithms. Prereq: MA 213 and MA 322 (or equivalent courses), or graduate student status, or consent of the department. (Same as MA 416G.)

CS 422 NUMERICAL SOLUTIONS OF EQUATIONS. (3)
Linear equations: Gaussian elimination, special linear systems, orthogonalization, eigenproblem, iterative methods. Nonlinear equations: solutions of equations in one variable, solutions of systems of nonlinear equations. Optimization. Prereq: CS/MA 321 and MA 322; or consent of instructor. (Same as MA 422.)

CS 441G COMPILERS FOR ALGORITHMIC LANGUAGES. (3)
The techniques of processing, specifying, and translating high-level computer languages are studied. Topics include finite state machines and lexical analysis, context-free grammars for language specification, attributed translation grammars, language parsing, and automatic generation of compilers by SLR/LALR and other methods of analyzing context-free grammars. Other topics may include code optimization, semantics of programming languages, and top-down parsing. Prereq: CS 315 and engineering standing.

CS 450G FUNDAMENTALS OF PROGRAMMING LANGUAGES. (3)
An intensive study of fundamental programming concepts exhibited in current high level languages. Concepts include recursion, iteration, coroutines, multiprocessing, backtracking, parameter passing, memory parameter passing, data structures, and storage management. Typical languages studied are SNOBOL, LISP, PASCAL, and APL. Prereq: CS 370. Restricted to computer science and electrical engineering majors. Others by permission.

CS 460G MACHINE LEARNING. (3)
Study of computational principles and techniques that enable software systems to improve their performance by learning from data. Focus on fundamental algorithms, mathematical models and programming techniques used in Machine Learning. Topics include: different learning settings (such as supervised, unsupervised and reinforcement learning), various learning algorithms (such as decision trees, neural networks, k-NN, boosting, SVM, k-means) and crosscutting issues of generalization, data representation, feature selection, model fitting and optimization. The course covers both theory and practice, including programming and written assignments that utilize concepts covered in lectures. Prereq: Strong programming ability (CS 315), basic probability and statistics (CS 311), and basic concepts of linear algebra (MA/CS 321 or MA 322), or instructor’s consent.

CS 463G INTRODUCTION TO ARTIFICIAL INTELLIGENCE. (3)
The course covers basic techniques of artificial intelligence. The topics in this course are: search and game-playing, logic systems and automated reasoning, knowledge representation, intelligent agents, planning, reasoning under uncertainty, and declarative programming languages. The course covers both theory and practice, including programming assignments that utilize concepts covered in lectures. Prereq: CS 315, CS 375, and engineering standing.

CS 470G INTRODUCTION TO OPERATING SYSTEMS. (3)
This course provides an introduction and overview of operating system design, internals, and administration. Topics include data structures, operating systems (process management, scheduling, memory management, device drivers, file systems), modern operating systems concepts (kernel/microkernel designs, concurrency, synchronization, interprocess communication, security and protection), and operating system administration. Prereq: CS 315, CS 380, and graduate or engineering standing.
Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as EGR/MA 537.)

CS 541 COMPILER DESIGN. (3)
Intermediate aspects of a compilation process with an emphasis on front-end issues. Practical issues in using compiler writing tools. Code generation for expressions, control statements and procedures (including parameter passing). Symbol tables, runtime organization for simple and structured variables. Using compilers and translators for automation (filers, programs writing programs). Prereq: CS 441 or consent of instructor.

CS 555 DECLARATIVE PROGRAMMING. (3)
The course covers fundamentals of propositional and predicate logic, and their uses in declarative programming and solving computational problems. Topics include propositional satisfiability, satisfiability testing techniques such as the DPLL algorithm, automated reasoning techniques for predicate logic such as resolution with unification and logic programming. Prereq: CS 315 and CS 375 or consent of instructor.

CS 564 COMPUTER SECURITY. (3)
This course will introduce students to the basics of computer and software security. It will expose students to topics such as cryptography, secure hash functions, access control models, audit of computer systems, attacks on computer systems and countermeasures, elements of computer forensics, and elements of database and network security. Prereq: CS 270 or EE 287 or consent of the instructor.

CS 570 MODERN OPERATING SYSTEMS. (3)
Brief review of classical operating system concepts (process and memory management, process coordination, device drivers, file systems, starvation deadlock). Modern topics of files systems (e.g., log-structured file systems, distributed file systems, memory-based file systems); operating system design (monolithic, communication-kernel, extendable/ adaptable, distributed shared memory); multiprocessor issues (scheduling, synchronization, IPC); security (internet attacks, encryption, defenses); Inspection and modification of actual operating system code (Linux). Prereq: CS 470 and engineering standing.

CS 571 COMPUTER NETWORKS. (3)
Principles of computer networks using current Internet technologies and protocols as examples. Routing algorithms and protocols; end-to-end transport; flow control; congestion avoidance and control; mail, web, and file transfer protocols; designing and implementing applications using common network APIs. Advanced topics, included as time permits, include network security, multicast, and quality of service. Prereq: CS 471G or consent of instructor.

CS 572 NETWORK SECURITY. (3)
This course introduces students to the state of the art of network security problems and solutions. Topics include security issues in computer networks, the Public Key Infrastructure ecosystem, key exchange protocols, and security mechanisms and protocols at the application, transport, network and data link layers. It will also discuss up-to-date development in the field of network security. Prereq: CS 270 or EE 287 or consent of the instructor.

CS 575 MODELS OF COMPUTATION. (3)
The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Formal languages and machines as recognizers of languages. The Chomsky Hierarchy of language types. Topics may include Turing machines or other basic models of computation; decidability and undecidability; basic complexity theory; finite automata and regular languages; pushdown automata and context-free languages. The course will cover primarily theory, including assignments that utilize concepts covered in lectures. Prereq: CS 375 and engineering standing, or consent of instructor.

CS 585 INTERMEDIATE TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)
Topics to be selected by staff. May be repeated to a maximum of six credits, but only three credits may be earned by a student under the same topic. Prereq: Restricted to computer science and electrical engineering majors. Others by permission.

CS 587 ADVANCED EMBEDDED SYSTEMS. (3)
An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as EE/CPE 587.)

CS 610 MASTER’S PROJECT. (3)
Design and implementation of a large computing project under the supervision of a member of the graduate faculty. Prereq: Satisfactory completion of the departmental foundational examination.

CS 611 RESEARCH IN COMPUTER SCIENCE. (1-9)
Doctoral students conduct research work in computer science under supervision of a faculty member from the Department of Computer Science. May be repeated to a maximum of 4 semesters. Prereq: 36 credit hours of graduate course work in computer science and approval of the Departmental Committee on Higher Degrees.
CS 612 Independent Work in Computer Science. (1-3) Reading course for graduate students in computer science. May be repeated to a maximum of nine credits. Prereq: Overall standing of 3.0, and consent of instructor.

CS 616 SOFTWARE ENGINEERING. (3) This course provides an overview of the software engineering discipline: software requirements, software design, implementation, software management, and software quality. Testing and validation techniques will be emphasized throughout the course. Programs and program fragments will be developed and studied throughout the course to illustrate specific problems encountered in the lifecycle development of software systems. Prereq: At least nine hours of graduate computer science courses.

CS 617 REQUIREMENTS ENGINEERING. (3) The course examines the requirements phase of the Systems Engineering and Software Engineering courses. Topics include: requirements elicitation, requirements specification, and requirements analysis. Verification and validation techniques are emphasized throughout the course. Students work in small groups to research and present a related topic. Prereq: Nine hours of graduate study.

CS 618 SOFTWARE DESIGN. (3) This course provides an overview of the software design field: software design overview, software design process, a survey of software design method (such as structured design methods, object-oriented design methods, concurrent design methods), design reviews, as well as discussing current topics such as aspect-oriented programming, refactoring, and design patterns. Testing and validation techniques are emphasized throughout the course. Program designs are developed and validated throughout the course. Readings and summaries of current and seminal journal papers and texts are required. Prereq: Nine hours of graduate study.

CS 621 PARALLEL AND DISTRIBUTED COMPUTING. (3) This course provides graduate students in computer science and in other fields of science and engineering with experience of parallel and distributed computing. It gives an overview of parallel and distributed computing, and parallel programming. The course address architectures, parallelism, languages, environments, communications, and parallel programming. Emphasis on understanding parallel and distributed computers and portable parallel programming with MPI. Prereq: Two 500 level CS courses, or consent of the instructor.

CS 623 PARALLEL ITERATIVE COMPUTING. (3) The course will present advanced computational science techniques needed to support large scale engineering and scientific computations. Emphasis on iterative methods for solving large sparse linear systems and parallel implementations of iterative techniques. Prereq: CS 537 or consent of the instructor.

CS 626 LARGE SCALE DATA SCIENCE. (3) This course will offer an opportunity for students to learn big data techniques and apply them to tackle real-world data science challenges (e.g., processing, storing, querying, exploring, and mining big data). Topics include: NoSQL database systems, parallel processing for big data, and programming models, parallel architectures, frameworks, scalable data management and processing solutions, scalable data mining techniques for large datasets, and advanced applications. Prereq: CS 505 or consent of the instructor.

CS 630 FREE-FORM SOLID MODELING. (3) This course covers the path from a conceptual vision of a shape to a concrete computer-based description that is suitable for manufacturing. It covers various solids modeling techniques, including volume representations, boundary representations, instantiation and Boolean combinations of shapes, and procedural generation such as sweeps. It discusses effective data structures and consistent and unambiguous part description formats to transfer a shape from a designer to a fabrication house, as well as problems with maintaining unambiguous topology in the presence of finite-precision geometry. Prereq: CS 535 or consent of instructor.

CS 631 COMPUTER-AIDED GEOMETRIC DESIGN. (3) Overview of current concepts and issues in CAGD with emphasis on free-form surface design; mathematics of free-form curve and surface representations, including Coons patches, Gregory patches, QBS, NURBS, triangular interpolants, and their geometric consequences; creating objects with smooth surfaces, covering assembling spline patches, geometric and parametric continuity, texture mapping onto complex shapes, subdivision surfaces, surface evolution, and global optimization. Prereq: CS 535 and CS 321, or consent of instructor.

CS 633 3D COMPUTER ANIMATION. (3) This course covers the underlying principles and techniques of 3D computer animation. The topics covered include: (1) modeling; the process of building the forms that will be animated, (2) rendering; the process of defining how the final picture in the model will look, (3) animation techniques: the process of creating in-between frames and key frames, (4) composing and special effects; the process of assembling various pieces of an image to get special two-dimensional effects, and (5) recording; the principles and techniques involved in putting animation frames onto film or video. Prereq: CS 335 or CS 535, or consent of instructor.

CS 634 MULTIMEDIA SYSTEMS. (3) This course covers fundamental techniques in multimedia systems for capturing, managing, accessing and delivering digital media over local, wide-area and wireless network technology. The core topics will emphasize the digital media (images, video, audio) and the algorithms to generate, store, access and process it. Network concepts will be presented at a high level only. Prereq: CS 335 or consent of instructor.

CS 635 IMAGE PROCESSING. (3) The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as EE 635.)

CS 636 COMPUTER VISION. (3) This course covers digital image processing as well as advanced topics in computer vision. Initial topics include image formation, digital filtering, sensor modeling and feature detection techniques. The course will discuss how these algorithms are used to address general computer vision problems including three-dimensional reconstruction, scene understanding, object recognition, and motion analysis. Prereq: CS 536 or consent of instructor.

CS 637 EXPLORING VIRTUAL WORLDS. (3) This course covers a mixture of core techniques related to systems for constructing and modeling virtual environments, such as model-building, image-based rendering, head-mounted hardware, stereo image generation, head-tracking, and immersive display technology. The core topics will be presented using textbooks and papers from the current literature. A substantial project will provide hands-on experience with the concepts, algorithms and technology. Prereq: CS 335 and CS 635.

CS 642 DISCRETE EVENT SYSTEMS. (3) The objective of the course is to prepare students for research in the field of supervisory control of discrete event systems (DES’s). Logical models, supervising control. Stability and optimal control of DES, complexity analysis and other related research areas will be covered. Prereq: Graduate standing or consent of instructor. (Same as EE 642.)

CS 655 PROGRAMMING LANGUAGES. (3) Overview of programming-language styles: imperative, functional, declarative, object-oriented, concurrent, simulation, glue. Non-local referencing environments, combinatorial control structures (backtracking, coroutines), higher-order types, lazy-eager evaluation. This course looks at features, not complete languages, touching on such languages as Ada, CLU, FP, Haskell, Icon, Lisp, ML, Modula-2, Modula-3, Pascal, Post, Prolog, Russell, Cisim, Simula-67, and Smalltalk-80. Students will not become proficient in any of these languages, but rather will learn what contributions each has made to the state of the art in language design. Compiler-construction issues will be touched on only impassing. Prereq: CS 450 or consent of instructor.

CS 660 TOPICS IN ARTIFICIAL INTELLIGENCE (Subtitle required). (3) Topics to be selected from the following: machine learning, computer vision, AI techniques to handle knowledge, new methods for representation, problem solving, very high-level programming languages, expert systems, intelligent and deductive databases, automated theorem proving. May be repeated to a maximum of six credits, but only three credits may be earned under the same topic. Prereq: CS 505 and CS 560 or consent of instructor.

CS 663 ARTIFICIAL INTELLIGENCE. (3) Overview of modern artificial intelligence. Covers topics such as searching and game trees, knowledge representation techniques, methods to represent uncertain information and to reason about it, time-dependent reasoning, expert systems, machine learning and neural networks. Prereq: CS 555 or consent of instructor.

CS 670 DISTRIBUTED OPERATING SYSTEM THEORY. (3) This course covers advanced distributed operating system algorithms and theory. Topics such as distributed mutual exclusion, distributed event ordering, distributed deadlock detection/avoidance, agreement protocols, consistent global snapshot collection, stable predicate detection, failure recovery, faulty-tolerant consensus, leader election, process groups and group communication. Case studies of distributed operating systems such as LOCUS, Grapevine, V System, ISIS, Amoeba, Sprite, and Mach will be used as illustrations of the above algorithms. Prereq: CS 570 or consent of instructor.

CS 671 ADVANCED COMPUTER NETWORKS. (3) This course is intended to provide students with a solid understanding of the state of the art in computer network systems and protocols. Topics are covered in some depth, including both abstract and concrete aspects. The course begins with a study of implementations of the current TCP/IP stack, and provides a concrete backdrop for the rest of the course. The emphasis is on learning by doing, with programming and other hands-on assignments associated with most topics. Prereq: CS 571 or consent of instructor.

CS 673 ERROR CORRECTING CODES. (3) The problem of correct transmission of data in a noisy environment. The design and analysis of codes that efficiently (in terms of data rate and encryption and decryption speed) correct errors. Linear and nonlinear block codes, general encoding and decoding techniques, fundamental bounds, dual codes, cyclic codes. Specific codes will be studied, including Hamming, BCH, Reed-Muller, Reed-Solomon, trellis, and convolutional codes. Prereq: CS 515 or consent of the instructor.

CS 674 HEURISTIC ALGORITHMS. (3) Solving problems that are intractable. Exact techniques such as search integer programming and dynamic programming. Approximation techniques including local search, divide and conquer, and greedy algorithms. Methods based upon natural models such as force-directed iteration, simulated annealing, genetic algorithms, and neural networks. Examples will be selected from active research areas. Prereq: CS 515 or consent of instructor.
CS 675 COMPUTABILITY AND COMPLEXITY. (3)
The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Topics will include Turing machines or other basic models of computation; reductions; computable and computably enumerable sets; Rice’s Theorem; decidability and undecidability; basic complexity theory; NP-completeness and notions of intractability. Additional topics may include primitive recursive functions and Grzegorczyk hierarchy; nondeterminism; the arithmetic hierarchy; formal complexity measures; time and space hierarchy theorems; the polynomial hierarchy and PSPACE; probabilistic complexity classes; circuit complexity. Prereq: CS 575 or consent of instructor.

CS 677 COMPUTATIONAL GEOMETRY. (3)
Design and analysis of algorithms and data structures for geometric problems. The particular groups of problems addressed include convex hull construction, proximity, Voronoi Diagrams, geometric search, intersection. Prereq: CS 580.

CS 678 CRYPTOGRAPHY. (3)
The study of security in communications and electronic computing. The encryption of data using public key systems, block ciphers, and stream ciphers. The basic tools for the design and analysis of such systems. Topics may include information theory, authentication, digital signatures, secret sharing schemes, complexity theoretical issues, probabilistic encryption, electronic commerce and others. Prereq: CS 515 or consent of the instructor.

CS 680 SEMINAR IN COMPUTER SCIENCE. (2)
May be repeated to a maximum of four credits. Prereq: Consent of instructor, or two 500-level computer science courses.

CS 683 FINITE-STATE MACHINES. (3)

CS 684 SPECIAL TOPICS IN VISION, GRAPHICS AND MULTIMEDIA (Subtitle required). (3)
Advanced topics in computer graphics, computer vision, and multimedia systems. Specific topics include but are not limited to: isotopes, volume rendering, displacement mapping, geographic information systems (GIS), remote sensing topics, large scale sensor networks, video and audio encoding, visualization, immersive environments, and multimedia interfaces. May be repeated to a maximum of up to 6 credit hours, with no more than 3 in the same topic.

CS 685 SPECIAL TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)
Topics to be selected by staff. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or two 500-level computer science courses.

CS 686 SPECIAL TOPICS IN THE THEORY OF COMPUTATION (Subtitle required). (3)
Advanced topics in the theory of computation and the design and analysis of algorithms, including heuristic approaches for algorithm design, parallel computation, flow problems, parallel and concurrent processes and other areas of current research interest. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or CS 575 and CS 580.

CS 687 SPECIAL TOPICS IN SYSTEMS. (3)
This course is a special topics course. The topic and syllabus will change each time the course is offered, reflecting the interests of the instructors. Typically the course will survey new research in the topic area but may also look back at canonical and ground breaking work from the past. Example course topics might include things such as web operating systems, global file systems, distributed object-based systems, fault tolerance/distributed check pointing, high-speed networking, network security, active networking, group communication models, compilers for parallel/distributed computing, recent programming languages, and data mining. Prereq: Consent of instructor.

CS 689 SPECIAL TOPICS IN NUMERICAL AND SCIENTIFIC COMPUTING (Subtitle required). (3)
Advanced topics in numerical analysis, scientific computation, and complexity of continuous problems. Specific topics may include, but are not limited to: iterative methods, advanced parallel algorithms in numerical linear algebra, multivariate function approximation and integration. Prereq: CS 537 or consent of instructor.

CS 690 OPERATING SYSTEMS THEORY. (3)
An advanced study of operating systems theory including cooperating sequential processes, processor scheduling, paging systems, and memory management. Prereq: CS 570.

CS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

CS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the same semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CS 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CS 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

CSC Clinical Sciences

CSC 528 LABORATORY TECHNIQUES FOR CLINICAL SCIENCES STUDENTS. (2)
Basic clinical laboratory principles and techniques; includes laboratory safety, sterilization procedures, pipetting, microscopy, routine culture and staining procedures, chamber counts, laboratory math calculations and statistics. Consent of instructor required for non-CS or non-CLS students.

CSC 600 HUMAN PATHOPHYSIOLOGY. (4)
A study of disease processes, pathognomonic parameters, and pathologic factors that mediate disease. Diagnostic testing used to validate disease process will be used to emphasize to the student the role of clinical sciences in the diagnosis of these complex disease states. Variances in disease in relationship to age will be examined. Prereq: Admission to the Clinical Sciences graduate program or consent of the course faculty committee.

CSC 601 HEALTH CARE POLICY AND ETHICS. (3)
The focus of this integrative course will be on policy and ethical issues confronting health care providers, health care systems, and particularly those issues specific to clinical sciences. Emphasis will be placed on current trends and anticipated challenges in providing humane and cost-effective health care services, with particular reference to the medically underserved and other at-risk populations. The different needs of special populations such as the aging, socioeconomically disadvantaged, insured and uninsured persons, ethically and culturally diverse groups such as recent immigrants and minorities will be explored. Discussion of technology dissemination delivery models, funding sources, human resources required to provide health care, alternative methods of coordinating these resources, and shifting from an “illness” orientation to a “wellness” approach will be included. The bioethics of health care delivery addressed will also include global considerations relative to health care, population dynamics, health care rationing, health care economics and assisted reproduction and transplantation issues.

CSC 602 CLINICAL SCIENCES SEMINAR (Subtitle required). (1)
Provides skills required of successful scientist to communicate effectively with peers, clients and general public. Each student will demonstrate an ability to interact with community, to function in an educator role by investigating a topic and preparing and delivering a presentation to the class and a community group. May be repeated up to five times. Prereq: Admission to the Clinical Sciences graduate program or consent of instructor.

CSC 604 RESEARCH METHODS FOR THE CLINICAL SCIENCES. (3)
Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 606 ADVANCED LABORATORY STATISTICS AND ADMINISTRATIVE ANALYSIS. (3)
Applications-based statistical and analytical software is used to demonstrate Continuing Quality Improvement (CQI) adherence to Federal regulation, NCCLS/IFCC protocols, and other accrediting agency requirements. Special emphasis is on defining and controlling unstable error through a statistical modeling approach. Documentation structures for quality operations policy; and processes, procedures and implementation of a quality system are examined with special attention to assuring quality of point-of-care testing. Detailed computerized study of method comparison includes receiver operator charting (ROC). Computerized diagnostic screening programs are used to evaluate prevalence, sensitivity, specificity, and predictive values. Utilization of management systems to track expenses, budget/inventory management, employee scheduling, productivity evaluations, process improvement and restructuring are demonstrated. Computerized performance management systems and innovations in compliance strategies are featured. Student evaluation will be based on examinations, projects, and papers.

CSC 615 REPRODUCED LABORATORY SCIENCE. (1)
The course includes basic cell biology and principles of genetics; a review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization; a review of the female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation.
CSC 616 ANDROLOGY. (1)
The course will include a review of male physiology, spermatogenesis and fertilization. The procedures appropriate for evaluation of male fertility will be presented and conditions and diseases associated with male factor infertility will be discussed. Basic and advanced andrology tests and procedures for both diagnostic and treatment purposes will be reviewed. Microsurgical procedures (intracytoplasmic injection ICSI) and treatments using epididymal and testicular sperm will be introduced. Prereq: CSC 528, CSC 615 or consent of the instructor.

CSC 617 REPRO MICROBIOLOGY AND IMMUNOLOGY. (1)
A review of basic immunology will be covered including an overview of the organs, tissues and cells that comprise the immune system, different forms of immunity and the basis of the immune response. The reproductive immunology segment will focus on antibodies associated with infertility and reproductive failure, and will also include properties of the immune system during pregnancy. Microbiology will be covered as it pertains to assisted reproductive technology, focusing on: (1) causes of infertility may be transmitted in the assisted reproductive technology (ART) laboratory and (2) prevention of contamination in the ART facility. Prereq: CSC 528, CSC 615 or consent of instructor.

CSC 618 LABS IN ANDROLOGY, REPRODUCTIVE MICROBIOLOGY AND IMMUNOLOGY. (1)
Student laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Advanced andrology procedures, including the sperm penetration assay and the hema-zoni assay, will be discussed and protocols provided. Reproductive Immunology: Students will perform procedures for detecting antispem antibodies in semen and in serum. Sperm- cervical mucus testing and cross-testing will be performed using controlled donor semen and bovine cervical mucus. Reproductive Microbiology: Organisms associated with sexually transmitted diseases, infertility, and reproductive failure will be demonstrated with representative demonstrations consisting of: stained slide of bacteria, fungi and parasites and electron micrographs of viruses; organisms on appropriate animal tissues; diagrams of cell surface receptors and the cytotoxic T-lymphocyte. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor.

CSC 620 ANDROLOGY. (1)
Review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization. Basic and advanced andrology procedures will be discussed and laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Prereq: BIO 549, CSC 620.

CSC 621 EMBRYOLOGY/ASSISTED REPRODUCTIVE TECHNOLOGY. (3)
Review of the human reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation. Assisted reproductive technology procedures will be discussed with the aid of photographs and videos and laboratories will focus on culturing and manipulating mouse embryos. Prereq: BIO 549, CSC 620.

CSC 622 REPRODUCTIVE IMMUNOLOGY. (1)
Immunology associated with fertilization, implantation, and early development in humans. Various procedures for detecting antibodies associated with reproduction will be discussed and the laboratories will assess both direct and indirect antibodies on spermatozoa. Prereq: BIO 549, CSC 620, CSC 621.

CSC 624 CRYOPRESERVATION OF REPRODUCTIVE TISSUES. (2)
Principles of methods of cryopreservation will be covered and procedures for freezing human oocytes, embryos, and ovarian and testicular tissues will be detailed. Legal, ethical and policy issues associated with cryopreservation will be introduced. Laboratory sessions will focus on freezing human embryos and mouse and gametes and embryos. Prereq: CSC 620 and CSC 621.

CSC 625 POLICY, MANAGEMENT, ETHICAL AND LEGAL ISSUES IN ASSISTED REPRODUCTION. (1)
Current and anticipated regulations of assisted reproductive technology will be discussed. Legal and ethical concerns associated with ART will be introduced and case studies will focus on specific issues. Prereq: CSC 620, 621, 624.

CSC 626 CLINICAL PRACTICUM IN ANDROLOGY LABORATORY. (2)
Students must complete the checklist procedures while working under supervision. Andrology procedures will include semen analysis, sperm function tests, microbiology, preparation for artificial insemination, and cryopreservation of male gametes. Prereq: CSC 620, 621, 623, 624, 625.

CSC 627 CLINICAL PRACTICA IN ART LABORATORY. (3)
Students must complete the checklist procedures while working under supervision. All ART procedures including in vitro fertilization, ICSI, zona-hatching and cryopreservation of gametes and embryos will be practiced under supervision using appropriate models for practice. Prereq: CSC 620, 621, 623, 624, 625.

CSC 628 RLS SEMINAR. (1)
Students in the RLS seminar will critique research papers in the field, will develop and present PowerPoint presentations on subjects covering andrology, ART, cryopreservation of human reproductive tissue, management issues in the reproductive laboratory, and policy, ethical and legal issues in ART. May be repeated for total of two credits. Prereq: CSC 528, CSC 615, CSC 616, CSC 617, CSC 618, CSC 619, CSC 621, CSC 624, CSC 625 or consent of instructor.

CSC 630 RLS RESEARCH. (1-5)
Research projects for students in Reproductive Laboratory Science. Students will complete research projects under the supervision of faculty members. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor. Additional CSC courses in the RLS track may be required as prerequisites depending on the nature of the research project.

CSC 670 HISTOCOMPATIBILITY AND IMMUNOGENETICS. (3)
In-depth study of the human histocompatibility polymorphisms will include genetic inheritance, alleles, typing methodologies, and matching requirements for solid organ and tissue transplantation. The human leukocyte antigen (HLA or MHC) system and its role in transplant rejection will be the major focus, however minor histocompatibility systems will also be examined. Specific and detailed correlation of specific antigens in the scientific literature will be integrated with case studies to explore current concepts in immunologically-based molecular methods of antigen detection and their impact on clinical practice. Prereq: Immunology course.

CSC 672 TRANSPLANTATION SCIENCE. (3)
Course content includes immunological, biochemical and genetic concepts and molecular biology related to the clinical process of transplantation. Cellular and molecular mechanisms will be an intense focus of this course. Solid organ and tissues transplantation, the need for donor organs and tissues, compatibility requirements for successful transplantation of each type of organ and tissue, immunosuppressive therapy, and research opportunities that may impact clinical application of transplantation science will be reviewed. Prereq: Immunology course.
CSD 120 CAREERS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY. (3)
An overview of the Speech-Language Pathology and Audiology profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students’ understanding of the profession(s) and to assist in educational and career planning and discernment.

CSD 220 AMERICAN SIGN LANGUAGE I AND THE CULTURE OF THE DEAF COMMUNITY IN AMERICA. (3)
An introductory course in American Sign Language (ASL), the native language of the Deaf community in America, this course lays a foundation for effective, respectful, participation in a culturally and linguistically diverse society. The course will employ an immersion approach to develop basic skills in conversational ASL and fingerspelling, as well as an appreciation of the basic grammatical, phonological, and historical aspects of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, and the role of Deaf culture in society. Prereq: CSD or HHS majors or permission of the instructor.

CSD 277 INTRODUCTION TO COMMUNICATION DISORDERS. (3)
An introduction to disorders of speech, language, and hearing. The course includes definitions, symptomatology, etiologies, and basic intervention principles for these disorders.

CSD 320 AMERICAN SIGN LANGUAGE II AND THE CULTURE OF THE DEAF COMMUNITY IN THE US. (3)
An intermediate level course in American Sign Language (ASL), the native language of the Deaf community in America, this course will use an immersion approach to develop skills in conversational ASL and fingerspelling, as well as an appreciation of the basic grammatical, phonological, and historical aspects of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, appropriate use of interpreters, and the role of Deaf culture in society. Prereq: Successful completion of CSD 220 (ASL I) or permission of instructor.

CSD 378 ANATOMY AND PHYSIOLOGY OF SPEECH. (3)
A detailed investigation of structures and functions supporting speech production: respiration, phonation, articulation, and resonance. Neural bases of speech and language will also be introduced. Prereq: CSD major or permission of instructor.

CSD 402 SPEECH AND HEARING SCIENCE. (3)
Investigation of the physiological and acoustic bases of speech and hearing; the physics of sound and the scientific bases of human speech production. Students will have exposure to instrumentation designed to increase understanding of human communication. Prereq: CODI major or permission of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CSD 409 ENGLISH GRAMMAR FOR COMMUNICATION SCIENCES AND DISORDERS. (1)
This one-credit hour course is designed to provide students with a comprehensive understanding of English syntactic form and function necessary to the future clinical practice of speech-language pathology. In addition, students will appreciate the role of complex syntax in spoken and written language and how these are commonly measured in children and adults with language disorders. Readings, activities, projects, and examinations will be used to establish a strong foundation in language form for graduate coursework in childhood and adolescent language disorders as well as adult language impairments. Prereq: CODI major or consent of the instructor.

CSD 410 LANGUAGE DEVELOPMENT THROUGH THE LIFESPAN. (3)
An introduction to the normal development of language in individuals from birth to advanced age. Topics include theories of language acquisition; prelinguistic development; development in each of the language domains (phonology, semantics, morphology and syntax, and pragmatics); the relationships between oral language, written language, and academic progress; and cultural differences. Prereq: CODI major or consent of the instructor.

CSD 420 AMERICAN SIGN LANGUAGE III. (3)
This course is designed to build receptive and expressive language abilities in American Sign Language (ASL). You will learn to translate and produce narrative language. Instruction includes an advanced level vocabulary, the structure of the language, as well as an expanded exposure to the history and culture of Deaf people. ASL II is taught solely in ASL by an instructor who only uses ASL to communicate. You will not be allowed to use your voice in this class at all. The American Sign Language Teaching Association (ASLTA) recommended curriculum will be followed. Prereq: Successful completion of CSD 320 or permission of the instructor.

CSC 790 CLINICAL SCIENCES DISSERTATION RESEARCH. (0-12)
Research design, protocol development and production of written dissertation after completion of the dissertation research. Grade will be issued following evaluation of the dissertation by committee. Candidates for the degree must complete nine credit hours in each of two successive semesters of dissertation research. Prereq: Successful completion of the Clinical Sciences qualifying examinations.

CSD 424 AMERICAN SIGN LANGUAGE IV. (3)
This course is designed to further develop your intermediate receptive and expressive language ability in American Sign Language (ASL). You will learn to translate and produce narrative language, temporal & distributional inflections, ASL numbers and ASL classifiers. Instruction includes an upper intermediate level vocabulary, the structure of the language, as well as an expanded exposure to ASL literature. ASL IV is taught solely in ASL by a native speaker of ASL to communicate as recommended by American Sign Language Teachers Association (ASLTA). The ASLTA curriculum will be followed. Prereq: Successful completion of CSD 420 or permission of the instructor.

CSD 481 CLINICAL EXPERIENCE IN COMMUNICATION DISORDERS. (3)
The general purpose or this course is to provide a competency-based experience in the clinical laboratory designed to orient the student to the professional activities in speech-language pathology. Clinical observations and shadowing, readings, in-class activities, and independent projects will focus on reflective decision making in professional activities. These topics will include professional ethics, client rights, scope of practice, preferred practice patterns, health/safety, liability/legal issues, professional organizations, credentialing, multicultural issues, and treatment outcomes. This course helps meet the required ASHA coursework standards in the areas of professional coursework in Speech-Language Pathology, and clinical observation. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 482 INTRODUCTION TO CLINICAL MANAGEMENT. (3)
Introduction to strategies for remediation of speech and language disorders in individuals from birth through adulthood and from culturally and linguistically diverse backgrounds. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 483 CLINICAL MANAGEMENT OF COMMUNICATION DISORDERS II. (3)
CSD 484 INTRODUCTION TO DIAGNOSTIC PROCEDURES IN SPEECH-LANGUAGE PATHOLOGY. (3)
Introduction to the principles, techniques, and tools used to develop and implement a diagnostic protocol. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 485 CLINICAL PHONETICS. (3)
Study of the phonetic structure of the English language with requirement of mastery of the International Phonetic Alphabet. Emphasis will be placed on phonetic transcription of normal and disordered speech for students in communication sciences and disorders. Prereq: CODI major or permission of instructor.

CSD 491 AUDIOLOGY. (3)
Introduction to symptomatology and etiologies of hearing impairment and principles of hearing assessment. Topics include: peripheral hearing impairment; central and nonorganic hearing impairment; screening for hearing impairment; hearing conservation; pure tone air and bone conduction threshold testing; basic speech audiometry; masking; audiometric calibration; and acoustic immittance screening. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. This course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential research). (Same as AT 500, HS 500, CLS 500, CNU 500, PAS 500.)

CSD 520 INTRODUCTION TO MANUAL COMMUNICATION. (3)
CSD 571 NEURAL BASES OF SPEECH, LANGUAGE, AND HEARING. (3)
Detailed investigation of the neuroanatomy and neurophysiology of speech, language, and hearing from a communication sciences perspective. Emphasis on anatomy and physiology of the central nervous system, neurodevelopment, and normal and abnormal neural substrates involved in speech, language, and hearing. Prereq: CSD 378 or permission of the instructor.

CSD 588 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)
In-depth study of a current problem or issue related to the communication disorders profession. May be repeated for a maximum of 6 credits. A title is assigned each time the course is offered. Prereq: Undergraduate or master’s level CODI majors only and consent of the instructor.

CSD 589 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)
Independent study for undergraduate or master’s level graduate students with an interest in a specific problem or issue in communication disorders. May be repeated for a maximum of 6 credits. Prereq: Undergraduate or master’s level graduate CODI majors only and consent of the instructor.
CSD 591 AURAL REHABILITATION. (3)
Management strategies for people with hearing loss. Topics include: variables affecting hearing handicap; characteristics, selection, counseling, and orientation in regard to amplification systems; acoustic, perceptual and visual aspects of speech; assessment and management of problems resulting from hearing loss across the lifespan. Prereq: CSD 420 or consent of instructor; undergraduate and graduate CODI majors only. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CSD 621 ALTERNATIVE AND AUGMENTATIVE COMMUNICATION. (3)
A detailed investigation of the use of augmentative and alternative communication systems with individuals with moderate to severe communication disorders. Participants will examine the full range of augmentative/alternative communication systems and the related assessment and intervention considerations. Prereq: EDS 375 or equivalent or graduate status in CODI or RHB, or consent of instructor.

CSD 647 LANGUAGE DISORDERS IN DEVELOPMENTALLY YOUNG INDIVIDUALS. (3)
A detailed investigation of language disorders and language intervention in developmentally young populations. Includes an in-depth discussion of prevention strategies, service delivery models, assessment tools and paradigms, and intervention strategies. Provides practice in self-directed inquiry. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 648 LANGUAGE DISORDERS IN SCHOOL-AGE POPULATIONS. (3)
A detailed investigation of language disorders and language intervention in school-age populations. Includes an in-depth discussion of prevention strategies, service delivery models, related cultural diversity issues, and assessment and intervention principles and strategies. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 649 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS. (3)
This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as EDS 662.)

CSD 654 CLINICAL ORIENTATION IN COMMUNICATION DISORDERS. (3)
A lecture-laboratory experience designed to orient the student to the professional activities in speech-language pathology. Lecture, one hour; laboratory, four hours per week. Prereq: Graduate status in CODI or consent of instructor.

CSD 657 CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY. (1-3)
Experience with children and adults in the assessment and management of communication and swallowing disorders. Lecture, one hour; practicum, four hours per week. May be repeated to a maximum of 12 credits. Prereq: Graduate status in CODI, CSD 481 or equivalent, and CSD 654.

CSD 659 CLINICAL ROTATION IN SPEECH-LANGUAGE PATHOLOGY. (1-12)
Supervised clinical experience in the evaluation and management of children and adults. Up to 40 laboratory hours per week (at site all day). May be repeated up to 36 hours. Prereq: Graduate status in CODI, successful completion of 6 hours of graduate clinical practicum and consent of instructor.

CSD 661 PHONOLOGICAL DEVELOPMENT AND DISORDERS. (3)
A comprehensive course in phonological theory, assessment, and treatment. Advanced principles of diagnosis and remediation for patients across the age span and from culturally and linguistically diverse backgrounds. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 670 VOICE DISORDERS. (3)
Assessment and management of adults and children with disorders of voice and resonance. Includes laryngectomy. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 674 DISORDERS OF FLUENCY. (3)
Analysis, identification and management of fluency disorders. Prereq: Permission of instructor.

CSD 675 LOW INCIDENCE COMMUNICATION DISORDERS (Subtitle required). (1)
Assessment and management of adults and children with low incidence communication disorders including disorders of fluency, craniofacial anomalies and tracheostomy. Topics may vary depending on current trends in the discipline. Prereq: Graduate status in CODI or consent of instructor.

CSD 677 APHASIA AND RELATED DISORDERS. (3)
Identification, appraisal, diagnosis, and clinical management of persons with aphasia and related disorders. Primary emphasis is given to aphasia and apraxia of speech in adults. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 701 RESEARCH METHODS IN COMMUNICATION DISORDERS. (3)
Principles and methods for designing research in communication sciences and disorders. Topics include: introduction to the scientific method, research designs, measurement techniques, formulating research questions, writing and evaluating research reports, and ethics of research. Prereq: Graduate standing in Communication Disorders.

CSD 710 COGNITIVE COMMUNICATION DISORDERS. (3)
The class will focus on the neuroanatomy and pathology of traumatic brain injury, right hemisphere disorders, and dementia. Students will learn current theory regarding differential diagnosis and treatment of these disorders. Prereq: CSD 571 or permission of instructor.

CSD 720 PROFESSIONAL ISSUES IN SPEECH-LANGUAGE PATHOLOGY. (1)
This course addresses professional issues in speech-language pathology as they relate to various employment settings including public school, healthcare, and private practice. Topics will include professional ethics, cultural competence, professional practice documents, service delivery models, billing and coding, job exploration, resumes, interviews, credentialing, legal considerations, and professional advocacy. Content will be in accordance with the American Speech-Language-Hearing Association (ASHA) Scope of Practice, Code of Ethics and guidelines for credentialing. Prereq: Graduate standing in CODI or consent of the instructor.

CSD 744 ADULT SWALLOWING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of adult neurogenic disorders of speech and swallowing. Emphasis will be placed on clinical management of adult dysarthria and the concomitant communication and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 745 PEDIATRIC FEEDING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of pediatric disorders of speech, feeding and swallowing. Emphasis will be placed on clinical management of dysarthria and the concomitant communication, feeding and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 746 MOTOR SPEECH DISORDERS. (2)
This 2 credit graduate course focuses on the pathophysiology, diagnosis, differential diagnosis, assessment, and treatment of motor speech disorders (MSDs) in individuals from birth through adulthood. The course will address oral sensory disorders, developmental delays, and MSDs secondary to neurological damage and disease with particular emphasis on dysarthria and Childhood Apraxia of Speech (CAD). The course will also address the dysarthrias resulting from acquired brain injury (e.g. stroke and trauma) in adulthood and progressive and non-progressive diseases of the nervous system. Clinical management of MSDs in both children and adults will be addressed as well as cultural differences and diversity issues as they affect development, care-giving, treatment and access to services. Prereq: CSD 571 or permission of instructor.

CSD 747 SEMINAR IN LANGUAGE DEVELOPMENT IN CHILDREN. (3)
A half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CSD 761 APPLIED PHONOLOGY: DEVELOPMENT AND DISORDERS. (1-6)
May be repeated to a maximum of 12 hours.

CSD 767 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (3)
This course addresses professional issues in speech-language pathology as they relate to various employment settings including public school, healthcare, and private practice. Topics will include professional ethics, cultural competence, professional practice documents, service delivery models, billing and coding, job exploration, resumes, interviews, credentialing, legal considerations, and professional advocacy. Content will be in accordance with the American Speech-Language-Hearing Association (ASHA) Scope of Practice, Code of Ethics and guidelines for credentialing. Prereq: Graduate standing in CODI or consent of the instructor.

CSD 775 SEMINAR IN LITERATE LANGUAGE. (3)
This course addresses professional issues in speech-language pathology as they relate to various employment settings including public school, healthcare, and private practice. Topics will include professional ethics, cultural competence, professional practice documents, service delivery models, billing and coding, job exploration, resumes, interviews, credentialing, legal considerations, and professional advocacy. Content will be in accordance with the American Speech-Language-Hearing Association (ASHA) Scope of Practice, Code of Ethics and guidelines for credentialing. Prereq: Graduate standing in CODI or consent of the instructor.

CSD 788 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)
In-depth study of a current problem or issue related to the communication disorders profession. May be repeated for a maximum of nine credits. A title is assigned each time the course is offered. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 789 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)
Independent study for graduate students with an interest in a specific problem in communication sciences and disorders. May be repeated to a maximum of 12 hours. Lecture, 1-6 hours; laboratory, 2-12 hours per week. Prereq: Graduate status and consent of instructor.
Course Descriptions

DHN 101 HUMAN NUTRITION AND WELLNESS. (3)
Food composition, digestion, absorption and metabolism as related to selection of nutrients essential for human life, growth, reproduction, lactation, wellness and physical activity. Not open to DHN majors except hospitality management students.

DHN 212 INTRODUCTORY NUTRITION. (3)
An elementary study of the principles of nutrition and the application of these principles to providing adequate nutrition to humans. The chemical and physiological approach to nutrition is emphasized. Prereq: CHE 105 or CHE 103 or CHE 108; plus, past or concurrent BIO 103 or BIO 148 or BIO 152 or BIO 208.

DHN 241 FOOD SERVICE SANITATION. (1)
This course covers the principles of food microbiology, important food borne diseases, standards that are enforced by regulatory agencies, and applied measures for the prevention of food borne diseases and other microbiological problems. It leads to certification from the National Restaurant Association.

*DHN 301 DIETETICS PRACTICE. (2)
This course provides a study of dietetic practice including professional ethics, standards of practice, scope of practice, educational pathways, credentials attainment and maintenance, competencies required for entry level practice, responsibilities as a professional. Experiences allow exploration of dietetics practice in medical nutrition therapy, food service management and delivery of nutrition services. Prereq: DHN 212; limited to Dietetics majors only.

DHN 302 PRINCIPLES OF FOOD PREPARATION. (3)
The physical and chemical principles involved in the preparation of foods and the application of these principles to control for quality outcomes. Laboratory experiences link theory to practice to ensure that the standards of safety and overall quality factors are applied to maximize nutrient retention while maintaining the acceptability and nutritional qualities of foods produced for individuals and groups. Lecture, one hour; laboratory, four hours. Prereq: DHN 241; limited to DHN and Family and Consumer Science (FSC) department majors and with permission of instructor.

DHN 304 EXPERIMENTAL FOODS. (3)
Chemical and physical properties of food and the changes resulting from processing and preparation. Experimental study of variations in ingredients and preparation methods on food quality. Design and report an independent research project. Lecture, two hours; laboratory and discussion, three hours per week. Prereq: DHN 302; CHE 230 or CHE 236.

*DHN 311 NUTRITIONAL BIOCHEMISTRY. (3)
An introductory study of the biochemical basis of nutrition – the biochemical properties of nutrients and other essential biochemicals and their role in physiological and metabolic processes. Prereq: CHE 230 or CHE 236 must be completed prior to DHN 311; Pgy 206 must be taken concurrently or prior to DHN 311. Limited to Dietetics, Human Nutrition, and Food Science majors only; other majors by Consent of Instructor.
DHN 474 RESEARCH IN NUTRITION: THEORY. (3)
A required course which allows the student to explore research opportunities in the health field, identify potential funding sources, review institutional review board requirements, and develop a grant proposal based on their own interests in nutrition. Prereq: Human Nutrition majors only. Senior standing. DHN 311 (may be taken concurrently with consent of instructor). This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 475 RESEARCH IN NUTRITION: APPLICATION. (3)
A required course which allows the student to design a research study, write a grant, prepare a comprehensive literature review, design a survey, conduct statistical analyses on collected data, and prepare a professional article and poster to present at University and regional events. Prereq: Human Nutrition majors only. Grade of C or better in DHN 474. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 480 DIETETICS PRE-PROFESSIONAL PRACTICE. (1-6)
Pre-professional experiences are designed to allow students to apply knowledge and skills in assessing, planning, implementing, and evaluating nutrition care in various health delivery systems. Student experience will include opportunities to link theory and practice while developing the skills and attitudes essential to practice in the dietetics profession. Placement of experiential settings must have the approval of the appropriate Director of Dietetics in Nutrition and Food Science. A minimum of 60 supervised practice hours will constitute one semester credit hour with prior approval. May be repeated to a maximum of six credits. Prereq: Consent of instructor and senior status in the Dietetics Didactic Program.

DHN 510 ADVANCED NUTRITION. (3)
Application of biochemistry, physiology and nutrition to the understanding of the utilization and function of nutrients and its relationship to the structure, function and metabolic needs of cells/organ systems. Prereq: DHN 311 or BCH 401G or equivalent; PGY 206; Dietetics and Human Nutrition Majors or admission to DHN/NS graduate program.

DHN 512 MEDICAL NUTRITION THERAPY I. (4)
This course explores changes in nutrient metabolism related to biochemical and physiological alterations in disease conditions and application of the Nutrition Care Process. Content includes case study evaluations, medical nutrition therapies for disease conditions, and current research in the field. Prereq: DHN 311 and 312; plus, past or concurrent DHN 510. Enrollment is restricted to dietetics majors only.

*DHN 514 DIETETICS: COUNSELING AND COMMUNICATION THEORIES AND APPLICATIONS. (3)
Counseling and communication theories are combined to study specific applications which include disease prevention, disease management and refinement of communication skills to enhance effectiveness as a practicing RD. Students will enhance their capacity to motivate others to practice healthy food behaviors. Active learners will develop a conceptual framework for future professional practice in dietetics as ethical counselors and facilitators of behavior change. Three credit hours. Prereq: DHN 313, DHN 510, DHN 512; must be taken concurrently with DHN 517. Limited to Dietetics majors only.

DHN 515 MEDICAL NUTRITION THERAPY II. (5)
This capstone course explores changes in nutrient metabolism related to biochemical, physiological, and pathophysiological alterations in disease conditions, application of the Nutritional Care Process and Model, and development of medical nutrition therapy intervention. Content includes case study evaluations, medical nutrition therapies for disease conditions, including enteral and total parenteral nutrition, and current research in the field. Prereq: DHN 311, 312, 403 and 510 and concurrent with DHN 514. Enrollment is limited to dietetics majors.

DHN 516 MATERNAL AND CHILD NUTRITION. (3)
Food selection for optimal nutrition during pregnancy and lactation and for infant and child development through preadolescence. Cultural, social, and psychological aspects of food selection and dietary patterns, as they relate to mental and physical development. Prereq: DHN 312 or consent of instructor.

DHN 517 MEDICAL NUTRITION THERAPY II. (3)
This course continues study of medical nutrition therapy topics, including trauma and enteral and parenteral nutrition. Content includes more advanced case study evaluations, medical nutrition therapies, and current research in the field. Prereq: DHN 512 and concurrent with DHN 514 and enrollment is limited to dietetics majors.

DHN 518 EVALUATION OF DIETETIC ISSUES AND LEADERSHIP. (2)
Course provides opportunities for the development of competencies, attitudes and values expected of the entry level professional. Lectures, presentation of individual case studies and research projects are conducted. Opportunities to practice interpretation of research, discussion of professional literature and application of leadership and communication skills in addressing issues of professional dietetic practice. This web enhanced didactic course is taught via distance learning coupled with on campus sessions. Prereq: Admission to the Coordinated Program or Dietetic Internship.
Course Descriptions

DHN 599 INTRODUCTION TO CULINARY MEDICINE. (3)
This course will introduce students to the field of culinary medicine, which involves using evidence-based nutrition and medicine knowledge and culinary skills to assist healthcare providers and nutrition professionals in supporting patients and their families in achieving and maintaining optimal health and wellness through diet. Students will learn key food preparation and food science principles and how those can be translated to modifying recipes for optimal health and provide appropriate evidence-based educational resources for use in patient care. Students will use this knowledge to develop healthy, flavorful, and delicious snacks and meals that are appropriate for individuals with chronic health conditions such as food allergies, Celiac disease, gastrointestinal disorders, heart disease, diabetes, hypertension, cancer, and obesity. Prereq: Admission to Graduate Certificate in Applied Nutrition and Culinary Medicine; Admission to MS degree programs in Nutrition and Food Systems or Science and Translation Outreach; Upper-level undergraduate students who have completed DHN 302; or, Consent of Instructor.

DHN 600 RESEARCH METHODS IN NUTRITION AND FOOD SYSTEMS. (3)
Students will study accepted research methodologies and scientific approaches in human nutrition and food systems. Emphasis is placed on understanding the research methods, study design, data collection, and evaluation of various nutrition-related studies. Discussions include development of research aims and hypothesis, internal review board, collecting of primary and secondary data, measurement approaches, study designs, and key considerations in developing a thesis for publication. Prereq: Admission to graduate program and selection of graduate faculty mentor with approved research topic.

*DHN 603 ADVANCED COMMUNITY PROGRAM DEVELOPMENT. (3)
This course focuses on the theory, practice, and evaluation of community programs to improve quality of life. Key concepts include the socio-ecological model, direct education combined with policy, systems, and environmental approaches, program evaluation, and implementation of evidence-based interventions. Some concepts, like logic models and social marketing, may appear to be simple and straightforward, but are actually quite complex. The course will employ a variety of teaching strategies; we will use experience and reflection to enhance the learning process. Discussions, projects, electronic communication and resources, and visual media will allow learning to be contextual, instructor-based, and peer-supported. Assignments are designed to help students learn how to effectively plan, develop, and evaluate community programs and strategies to promote healthy eating, active living, and a sustainable environment. Prereq: Admission to MS degree programs in Nutrition and Food Systems or Science and Translation Outreach OR enrollment in Graduate Certificate in Applied Nutrition and Culinary Medicine OR consent of instructor.

DHN 605 FOOD SYSTEMS AND SOCIETY. (3)
Food Systems and Society tracks food from farm to table, including growing, harvesting, processing, packaging, transporting, marketing, consumption, and disposal. Policy and culture determine who eats what and who benefits and loses in any given food system. As a result, food systems vary considerably across the world with each evolving to affect overall health. The course will assess sustainability of food systems and explore the ethical, economic, socio-cultural, and environmental factors that affect local, regional, national, and global food system development. Content includes case study evaluations and current research in the field. Prereq: Graduate standing.

DHN 607 FOOD RELATED BEHAVIORS. (3)
This team-taught course will provide background in topics and methods in food related behaviors to students in Nutritional Sciences and other interested students. The course will follow a problem-based learning approach, and will consist of 3 out of 4 modules in any given year. The four modules will be Social and Cultural Perspectives on Food, Psychological Perspectives on Food and Food Behaviors, Challenges to Community Food Security, and International Issues in Nutrition.

DHN 608 CHRONIC DISEASE MANAGEMENT AND PROCESS. (3)
This course focuses on the etiology and pathophysiology of nutrition-related chronic diseases and conditions including obesity, hypertension, dyslipidemia, heart disease, diabetes, and cancer. Emphasis is placed on the biochemical and physiological mechanisms involved by which nutrients impact the prevention, nutrition care process-diagnosis, assessment, implementation of care, monitoring and evaluation, and progression of chronic diseases and conditions. Prereq: Graduate standing and minimum 3 credit hours of upper level advanced nutrition or DHN 510.

DHN 610 MARKETING IN HOSPITALITY AND DIETETICS. (3)
This course overviews the discipline of marketing as it relates to the hospitality and dietetics professions. Special emphasis will be placed on the analysis of the marketing environment, marketing strategies and the diversity of marketing practices used by the hospitality industry and dietetics profession. This course will provide opportunities for students to develop appropriate marketing approaches in today’s increasingly competitive and complex global marketplace. Prereq: MKT 300 or HMT 320 or equivalent course.

DHN 620 NUTRITION AND AGING. (3)
Emphasis on current research in nutrition and aging, nutrition needs of the elderly and nutrition-related diseases associated with aging. Prereq: DHN 510 and 511 or equivalent. (Same as NS 620.)

DHN 640 HUMAN NUTRITION: ASSESSMENT. (3)
Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: DHN 510, DHN 511 or equivalent. (Same as NS 640.)

DHN 648 MANAGEMENT OF HOSPITALITY AND DIETETICS ORGANIZATIONS. (3)
This course will engage students with the theories and their application in the area of leadership and management of people, resources, finances, information and internal and external customers as they relate to dietetics, food service and hospitality professions. Prereq: Admission to graduate program, DHN 346 or equivalent course.

DHN 690 ADVANCED WORK IN DIETETICS. (3)
Evaluation of administrative practices in dietetics. This course will examine topics related to managing dietetics services including medical nutrition therapy protocols, dietetics outcomes research, parental and enteral support, clinical pathways, JC AHO requirements, state and institutional policy controls, reimbursement for dietetics services, in-patient and out-patient quality management, and hospital outreach programs. Prereq: Admission to graduate program. Lecture only course.

DHN 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of Instructor. (Same as CNU/NS 704.)

DHN 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. (Same as NS 748.)

DHN 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. (Same as NS 768.)

DHN 770 SEMINAR IN HOSPITALITY AND DIETETICS ADMINISTRATION. (1)
Investigation of recent research in Hospitality and Dietetics Administration. May be repeated to a maximum of three credits.

DHN 772 CURRENT TOPICS IN HOSPITALITY AND DIETETICS ADMINISTRATION. (2)
Faculty from different disciplines will provide in-depth coverage of selected topics in Hospitality and Dietetics Administration.

DHN 774 SEMINAR IN NUTRITION AND FOOD SYSTEMS. (3)
This advanced participatory seminar focuses on the latest in nutrition and food systems research. Students will be expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies in nutrition and food systems through weekly readings, presentations, and class discussions. Prereq: Graduate standing and upper level graduate statistics.

DHN 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NS 782.)

DHN 784 SPECIAL PROBLEMS IN FINANCIAL MANAGEMENT. (3)
A current events approach to the financial and accounting decision-making process in dietetics and hospitality administration. The course will prepare advanced students in dietetics and hospitality administration to analyze and make sound financial decisions in settings relevant to the dietetics profession and the hospitality industry. Prereq: Admission to graduate program, ACC 201, ECO 201 and either FIN 300 or (DHN 340, DHN 342, and DHN 346).

DHN 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NS 790.)

DIP 600 SPECIAL TOPICS. (1-3)
This course will vary in content depending on special needs or faculty availability.

DIP 700 DYNAMICS OF DIPLOMACY. (3)
This course explores the historical evolution of diplomacy, then focuses on post WWll diplomatic practice and especially the dynamics of diplomacy since the end of the Cold War. Emphasis will be placed on diplomacy’s role in the international system, new tasks for diplomacy, and enhancing diplomatic skills in a new paradigm. Prereq: Permission of instructor.

DIP 712 WEEK STATES AND INTERNATIONAL SECURITY. (3)
This course reviews how the policy community has measured the weak state, revealing discrepancies in the quantifiable parameters, definitions, and categorizations, and analyze the efforts taken to address state weakness, particularly foreign economic and security assistance. It will review the five theoretical approaches to the weak state in the literature, which are informed by the international community’s concerns with state weakness: development, intervention, post-colonialism, globalization and terrorism. The theory will be applied to specific cases of weak states in several regions (e.g., Africa, Asia, the Balkans, Latin America, the Middle East, and the Former Soviet States) and analyzes the threats they pose to international security.
### Course Descriptions

**DIP 715 DEMOCRACY AND INTERNATIONAL AFFAIRS.** (3) Discussion of the impact of the global spread of democracy on foreign policy and war. Prereq: Graduate status and consent of instructor. (Same as PS 753.)

**DIP 716 INTERNATIONAL TRADE POLICY AND PRACTICE.** (3) This course is designed to prepare students to function comfortably in either the trade policy formulation (public trade policy producers) or commercial environment (policy consumers). Although the course is organized in two discrete sections, throughout the course, the implications of policy on commercial practice and the reverse will be stressed.

**DIP 720 ECONOMIC STATECRAFT.** (3) This seminar course will explore how economic values and choices shape economic options, and the techniques used to pursue them in the diplomatic arena. Trade and fiscal techniques, financial policies, and sanctions will be explored in relationship to the interplay between economic and political international relations theory, and the relevance of economic statecraft to achieving both economic and noneconomic goals.

**DIP 725 GEOPOLITICAL MODELING.** Course uses large user-friendly computer model of world's political/economic systems to explore topics such as globalization, development, energy security, and political instability from a theoretical and quantitative viewpoint. Prereq: STA 570 or permission of instructor.

**DIP 726 INTRODUCTION TO INTELLIGENCE.** (3) This course will introduce the student to the role of intelligence in U.S. national security policymaking.

**DIP 727 ANALYTICAL METHODS FOR INTELLIGENCE ANALYSIS.** (3) This course will introduce the student to the role of intelligence analysis in U.S. national security policymaking. It will be discussed and put to practical use the various analytical methods and techniques that are used by analysts within the Intelligence Community.

**DIP 730 CROSS-CULTURAL NEGOTIATION AND BARGAINING.** (3) A multidisciplinary graduate course using contemporary studies of negotiation and bargaining from the individual to the international level. Uses both public (diplomatic) and private (commercial) examples, including case studies and practice negotiations. Group and national differences are explored as well as the content and environment of negotiations. Prereq: Any one graduate course plus consent of instructor.

**DIP 734 AFRICA'S DEVELOPMENT CHALLENGES.** (3) Examination of challenges facing sub-Saharan African countries in developing economic and politically sustainable societies.

**DIP 735 ENERGY SECURITY.** (3) This course uses the tools of economic analysis and economic statecraft to examine energy security. It will look at the connection between energy and the economy in both the U.S. and other states and the connections between energy and military security and power. It will include a detailed review of the U.S. energy economy, the international energy market, the economies of the major Middle Eastern states, and the Russian economy. At the end of the course each student will understand the history of energy security, be aware of the data sources for current policy analysis, be able to use the relevant tools of economic analysis including econometrics, and be familiar with the energy security policy debate both in the United States and in key foreign countries. Prereq: DIP 740 or ECO 672 or at least two semesters of undergraduate economic theory with grades of B or better. DIP 720 and DIP 750 recommended.

**DIP 740 GLOBALIZATION.** (3) This course examines the phenomenon of globalization by applying core theories of the international political economy. Subjects to be covered include economic and political definitions of globalization, the technological, economic, and political causes of globalization, and the effects of globalization on national politics and wealth. By the end of the course, students should be able to apply the basic international political economy analysis to both trade and financial issues, giving them the necessary skills to prepare convincing policy analyses, political advocacy programs, and business plans. Lecture: Discussion hours per week. Prereq: Graduate status, a modest undergraduate or graduate background in Foreign Affairs or consent of instructor.

**DIP 742 NATIONAL SECURITY POLICY.** (3) This course provides a foundation in the major debates on national security policy.

**DIP 748 MASTER'S THESIS RESEARCH.** (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All coursework toward the degree must be completed.

**DIP 750 DEFENSE STATECRAFT.** (3) Students will gain familiarity with the key military policy issues that confront government officials, and they will learn to evaluate the claims of journalists and advocacy organizations that confront informed American opinion on a day-to-day basis. Prereq: Graduate status.

**DIP 755 POLITICS AND DIPLOMACY OF THE MIDDLE EAST.** (3) Analyzes the interplay between politics and diplomacy in the Middle East. Prereq: Permission of instructor.

**DIP 756 DIPLOMACY OF NUCLEAR WEAPONS.** (3) This course explores diplomatic issues with developing and maintaining, securing, restricting and eliminating nuclear weapons.

**DIP 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.** (1-6) May be repeated to a maximum of 12 hours.

**DIP 777 RESEARCH PROBLEMS IN INTERNATIONAL RELATIONS.** (3) This seminar focuses on research strategies that can be utilized in dealing with problems in international relations. May be repeated once with consent of instructor. Prereq: PS 674 or consent of instructor.

**DIP 780 INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY.** (3) A multidisciplinary graduate course that investigates policy questions and the policy process surrounding developments in international sciences and technology. This course will focus on the intersection of scientific research, technological applications and change, and business and governmental activities in these areas that impact upon international relations. Prereq: Consent of instructor.

**DIP 795 SPECIAL PROBLEMS IN DIPLOMACY AND INTERNATIONAL COMMERCE.** (3) Specially designed independent study course taken under the supervision of various instructors. May be repeated to a maximum of six credits. Prereq: Permission of instructor.

**DIS Decision Science and Information Systems

**DIS 600 PRODUCTION MANAGEMENT.** (3) This course exposes the MBA generalist to the functional area of production in both manufacturing and service sectors. Topics include tactical decisions in production and operations management and operational relationships with corporate strategy. Course emphasizes operations planning and control. Prereq: Graduate standing; MGT 611, ECO 610, ACC 628, DIS 650, ECO 611, FIN 600, DIS 651, MKT 600.

**DIS 612 SUPPLY CHAIN OPERATIONS.** (3) An introduction to the terminology, concepts, and skills related to supply chain management. Students develop an understanding of the complexities associated with the movement of goods and information, and how they affect the mission of the firm. Discussions address the various processes and activities within an organization and how they interface with other members of the supply chain.

**DIS 620 MANAGEMENT INFORMATION SYSTEMS IN DECISION MAKING.** (3) In-depth consideration of the value of information in managerial decision making. Topics include issues in design and evaluation of management information systems, decision support systems, and business expert systems. Prereq: DIS 651.

**DIS 621 BUSINESS EXPERT SYSTEMS.** (3) Introduction to expert systems and artificial intelligence in the business setting. Discussions include past and current applications of expert systems in business and considerations of future application possibilities. Prereq: DIS 620.

**DIS 622 BUSINESS DATA SYSTEM ANALYSIS AND DESIGN.** (3) An introduction to the comparative and business use of various data models. Topics include the theory and design of information storage and retrieval procedures in the context of business information needs. Prereq: DIS 620, CS 101 or consent of instructor.

**DIS 623 BUSINESS DECISION SUPPORT SYSTEMS.** (3) Discussion of business decision support system concepts and the applications of these concepts in business organizations. The theoretical development of the decision support system concept is analyzed through review of important literature in this area. Emphasis is placed on the impact of technological advances which form the basis of decision support system software. Current decision support systems are studied and future likely applications considered. Prereq: DIS 620.

**DIS 624 MANAGEMENT OF INFORMATION RESOURCES.** (3) The course is designed to prepare students to understand and analyze major issues related to the management of information resources, evaluate the current state of information resources management within an organization, and participate in the management of such resources. Prereq: DIS 620 or consent of instructor. (Same as MGT 624.)

**DIS 651 QUANTITATIVE ANALYSIS IN BUSINESS DECISION MAKING.** (3) A study of key problem formulation and solution procedures in business decision making. The topic studied include statistical techniques integrated in decision making under uncertainty, decision trees, queuing problems, and value of information. A major segment of the course is devoted to the study of linear programming problems, sensitivity analysis, assignment problems, and transportation problems. Prereq: MBA standing.

**DIS 695 INDIVIDUAL WORK IN DISIS.** (3) Students confer individually with instructor. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

**DIS 700 TOPICS IN OPERATIONS MANAGEMENT.** (3) To review the various topics of operations management and to survey the status of the art research in each topic area. Research methodology and research opportunities in each topic area will be identified. May be repeated to a maximum of nine credits.
#DS 720 MANAGEMENT INFORMATION SYSTEMS THEORY. (3) A theoretical consideration of the role of MIS in managerial decision making. Emphasis is placed on current research in MIS and interpersonal relationships with management science and operations management. Prereq: Consent of instructor.

#DS 753 SEMINAR IN MANAGEMENT SCIENCE. (3-6) Each semester some topic in management science such as simulation, queuing theory, stochastic processes, numerical methods, and Bayesian Decision Theory will be studied intensively. Prereq: DIS 751, 752.

#DS 780 STUDIES IN DECISION SCIENCE AND INFORMATION SYSTEMS. (3) This course will analyze the current research topics of interest in the decision sciences. Possible areas of study may include: network management, multiple-criteria decision making, data envelopment analysis, combative decisions, and models for service organizations. May be repeated to a maximum of nine credits. Prereq: DIS 751 or consent of instructor.

#DS 790 SPECIAL TOPICS IN MANAGEMENT DECISION SYSTEMS (Subtitle required). (3) This is a variable topic course enabling focused doctoral student investigation of current research areas. It is anticipated that the course grade will be based on individual student semester research papers in the course topic area. May be repeated to a maximum of 12 credits under different subtitles. Prereq: Consent of instructor.

DMT Interior Design, Merchandising, and Textiles

DMT 520 TEXTILES FOR INTERIORS. (3) Selection, cost, expected performance and care of textiles used in residential and commercial interiors. Prereq: MAT 120.

DR Diagnostic Radiology

DR 815 FIRST-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-3) With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

DR 825 SECOND-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-4) With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

DR 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6) With the advice and approval of the Third and Fourth Year Curriculum and Student Progress Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by permission of the Third and Fourth Year Curriculum and Student Progress Committee.

Approved electives:
- DR 850 ELECTIVE: DIAGNOSTIC RADIOLOGY
- DR 851 RESEARCH IN DIAGNOSTIC RADIOLOGY
- DR 855 NUCLEAR MEDICINE
- DR 856 PEDIATRIC RADIOLOGY
- DR 890 ELECTIVE: RADIOLOGY OFF-SITE

DS Data Science

#DS 272 INTRODUCTION TO USER EXPERIENCE DESIGN. (2) This course is supplemental to PD 221 Product Design Studio II, serving as an introduction to basic concepts of user experience (UX) design. Students will learn how to create engaging interactions between users and products/services through a holistic user-centered approach to design. Students will examine the history and evolution of user experience design and define key terms associated with the field. Students will explore a range of design research methods and discuss how these practices, along with theories regarding human behavior and perception, inform the user experience design process. Projects from PD 221 and other studio courses within the College of Design will serve as case studies for analysis and application of course content. (Same as BME 272.)

#DS 372 USER EXPERIENCE + INTERFACE DESIGN. (1) This course is supplemental to PD 521 Product Design Studio III and introduces principles and methodologies of user interface and interaction design as critical elements of user experience design. Students will create interaction diagrams and develop prototypes for products and/or services. Students will learn and apply principles of visual communication, typography and motion design to create visually appealing, intuitive and feedback-based user interfaces. Students will learn how to conduct a range of usability tests to evaluate and improve interface designs. Projects from PD 521 and other studio courses within the College of Design will serve as case studies for analysis and application of course content. Prereq: DES 272. (Same as BME 372.)

#DS 710 RESEARCH SEMINAR IN DATA SCIENCE. (1) An independent study course that aims to expose students to a broad range of research and professional topics in data science, and enhance students’ ability to do research. Students read research papers and professional articles, attend colloquium/seminar talks on topics in data science as directed by the instructor, prepare written reports on topics and make in-class presentations. Prereq: Enrollment in the MS or PhD program in Data Science.

#DS 711 MASTER’S PROJECT IN DATA SCIENCE. (3) Design and implementation of a large data science project under the supervision of a faculty member. Prereq: The course is open only to students in the MS program in Data Science who completed the program’s core requirement.

#DS 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

DSP Discovery Seminar Program

DSP 110 SOCIAL SCIENCES: (Subtitle Required). (3) An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 120 HUMANITIES: (Subtitle Required). (3) An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP humanities requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 130 NATURAL SCIENCES: (Subtitle Required). (3) An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 200 GENERAL RESEARCH SKILLS: (Subtitle Required). (3) Course provides the basic skills required to conduct research and other scholarly activities. Prereq: All students must be actively engaged (for an average of at least ten hours per week) in a research or other scholarly activity under the mentorship of a UK faculty member through the UK Undergraduate Research Program (UKURP).

DST Digital Studies

#DST 200 DIGITAL LITERACY. (3) This course teaches elementary and fundamental approaches to digital production and critique by asking students to consider cultural, technological, aesthetic, political, and other objects of digital study.

#DST 300 INTRODUCTION TO DIGITAL STUDIES. (3) DST 300 introduces students to basic and introductory ideas associated with the field of digital studies. Prereq: DST 200.

#DST 301 PODCASTING AND SOUND. (3) In this course, students will study recorded sound and produce their own recordings. Course texts will include podcast episodes and readings from the field of sound studies. Major projects will include a student-produced podcast, a proposal for the podcast, and audio exercises.

#DST 310 WRITING MARKUP. (3) In this course, students will explore the history, theory, and application of markup languages, such as HTML or SGML. Markup languages are the underlying structure and instructions for the web and all digital artifacts.
EAP Education Abroad Program

*AEP 400G EDUCATION ABROAD ON UK-SUPPORTED PROGRAM. (0)
A course designed for undergraduate, graduate and non-degree students who participate in a UK-Sponsored Education Abroad Program. Registration in the course would constitute full-time status. This course may only be taken Pass-Fail. Students will be enrolled in the course upon payment of the non-refundable program fee deposit. The balance of the program fees will be charged on an EAP 500 course fee. The suffix indicates the particular UK-sponsored program. Upon completion of the program, Education Abroad at UK will submit to the Registrar the credit and grades given by the Program Director for the approved program courses. Prereq: Approval by each student’s academic advisor, the program director and Education Abroad at UK.

EAP 410G EDUCATION ABROAD ON EXCHANGE PROGRAM: COST. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. COST- Consortium for Overseas Teaching. Prereq: Approval by each student’s academic advisor and Education Abroad at UK.

EAP 431G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE- Tuition/Fees. Prereq: Approval by each student’s academic advisor and Education Abroad at UK.

EAP 432G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLM. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLM-Tuition/Lodging/Meals.

EAP 433G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLO. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLO-Tuition/Lodging.

EAP 434G EDUCATION ABROAD ON EXCHANGE PROGRAM: TMO. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TMO-Tuition/Meals.

EAP 435G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees. Prereq: Approval by each student’s academic advisor and Education Abroad at UK.

EAP 436G EDUCATION ABROAD ON EXCHANGE PROGRAM: ISEP. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. ISEP.

EAP 437G EDUCATION ABROAD ON EXCHANGE PROGRAM: DES. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. DES.
EAP 599 STUDY ABROAD. (1)
The course is designed for undergraduate and graduate students who go abroad for study following a plan developed as part of their academic program and who are not otherwise registered at the University during the period overseas. Registration in the course would constitute full-time status. The course may be taken on a pass-fail basis for undergraduate students and audited by graduate students. Evaluation by the academic advisor will be an element of the plan. May be repeated to a maximum of three credits. Prereq: Approval by each student’s academic department, the Registrar, and the Office for International Programs.

ECONOMICS

ECO 101 CONTEMPORARY ECONOMIC ISSUES. (3)
A basic course in the analysis of contemporary economic issues with emphasis on current economic topics such as inflation, poverty, and affluence, urban segregation, and environmental pollution. (Credit will not be given for this course to students who have received prior credit in ECO 201 and/or 202.)

ECO 201 PRINCIPLES OF ECONOMICS I. (3)
The study of the allocation of scarce resources from the viewpoint of individual economic units. Topics include household and firm behavior, competitive pricing of goods and resources, and monopoly power.

ECO 202 PRINCIPLES OF ECONOMICS II. (3)
A study of how society’s needs are satisfied with the limited resources available. Topics include contemporary issues such as inflation, unemployment, economic growth, international dependencies, and how public policy deals with them. A critical understanding of the U.S. and global economies will enhance your value as a manager or executive of a business (whether for-profit or non-profit), as a family member dealing with jobs and financial decisions, and as a voter in a democracy. The course will allow you to become knowledgeable of, and able to critically think about, the major macroeconomic issues of unemployment, jobs, recessions, economic growth, inflation, deflation, oil prices, monetary policy, the Federal Reserve, fiscal policy, budget deficits, the national debt, international trade, international finance, and the financial system. Prereq: ECO 201.

ECO 301 ECONOMIC PRICE THEORY. (3)
ECO 301 is an undergraduate course in microeconomic theory designed for students who enjoy economics but are not planning on selecting a major in economics. We will study the behavior of individual decision makers: households, firms, resource owners and the interaction of such individual economic units within the larger economy. We will study how markets allocate resources in a market economy. To reinforce students’ understanding of microeconomic theory, and also to demonstrate the relevance of particular theoretical concepts, we will include numerous real world situations as we apply each topic. Students who have already taken ECO 401 are not allowed to take ECO 301. Prereq: ECO 201 and ECO 202 or the equivalent.

ECO 311 BUSINESS ECONOMICS. (3)
This course applies basic economic principles to the types of problems faced by business decision makers. Particular attention is paid to the economics of organizations and to the economics of firm strategy. Topics covered will include the nature of the firm, the make or buy decision, corporate governance, distribution channels, external market structure, selling decisions, and rivalry and strategy. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 312 MONETARY ECONOMICS. (3)
This course analyzes how savers and borrowers meet in financial markets to allocate resources to their most productive uses. Major topics include the theory of pricing of financial assets, the equilibrium determination of asset prices, risk and term structures of interest rates, how moral hazard and adverse selection inhibit credit allocation, fundamentals of commercial banking, and central bank policies. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY. (3)
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as MA 327.)

ECO 365 SOCIAL ECONOMIC ORGANIZATION. (3)
This course examines the major economic systems of the world. Students will develop a general understanding of how economic systems work and how economic theory interacts with government policy, history, and culture to explain economic performance. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 367 AMERICAN ECONOMIC HISTORY. (3)
The development of the American economy will be examined within the general framework of economic theory. Major emphasis will be given to the long-run process of economic growth of the economy from the colonial period to the present. Prereq: ECO 201 and ECO 202 or the equivalent.

ECO 370 THE GLOBAL ECONOMY. (3)
This course explores the theoretical foundations of International Trade including the basics of why countries trade, factors that explain the pattern of trade, the effects of trade on welfare and the distribution of income, and various policy issues. The course also provides an examination of topics in International Finance such as how international financial markets are structured and how currencies across countries relate to each other in international exchange markets. Prereq: Courses include ECO 201 AND ECO 202 or the equivalent. Students who have already taken ECO 370 may not take ECO 471 and ECO 472. Students majoring in Foreign Language and International Economics are not allowed to take ECO 370. While other economics majors through the College of Business and Economics and the College of Arts and Sciences are allowed to take this course, it is ideal for non-majors who have an interest in the global economy and students pursuing a Minor in International Business and Economics.

ECO 379 THE ECONOMICS OF PUBLIC POLICY, LAW, AND GOVERNMENT. (3)
This course develops the economics view of the role of government from both normative and positive perspectives. Conditions under which markets perform well are presented, as well as cases where there is market failure. Legal and social institutions that support markets are discussed, as are government policies to intervene in markets. Economic models of the operation of government are developed to understand possible shortcomings of government action, as well as further linkages of economics to law. The course will be presented along with examples from specific government programs. Prereq: ECO 201.

ECO 381 ENVIRONMENTAL ECONOMICS. (3)
This class will focus on the role of the environment and related issues in the theory and practice of economics. Topics covered include externalities caused by market failures, environmental policies and regulation, basic techniques used in the valuation of non-market goods and amenities, and welfare calculation and cost-benefit analysis. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 383 HEALTH ECONOMICS. (3)
This course examines the organization, financing, and management of the U.S. health care system, and emphasizes contemporary health policy concerns. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 385 LAW AND ECONOMICS. (3)
This course will survey the field of law and economics. We will study the core areas of common law—property, contract, and tort. We will consider the sometimes-competing goals of equity and efficiency and their roles in the formulation of legal decisions. We will study the Coase theorem, and will see how the presence of transaction costs, incomplete information, and risk aversion can influence the outcome of any particular legal decision. Finally, we will examine criminal law, optimal punishment, and optimal enforcement. Prereq: ECO 201 and ECO 202 or the equivalent.

*ECO 391 ECONOMIC AND BUSINESS STATISTICS. (3)
Statistical ideas are part of the language of business. An understanding of statistics will enhance your value as a manager or executive. Many of the upper division courses in Accounting, Agricultural Economics, Economics, Finance, Management, Marketing, and Public Policy use statistical ideas and data. This course provides an introduction to the statistical techniques relevant to modern economics and business, with major emphasis on estimation, hypothesis testing, correlation, modeling, analysis of variance, regression, and forecasting. Prereq: STA 296 or STA 381 or equivalent.

ECO 392 INTRODUCTION TO RESEARCH IN ECONOMICS. (3)
In this course students will apply economic theory to real world problems and concerns, learn where resources and data can be located, use statistical methods to analyze, and make projections based on the implications of economic theory and reasoning, and gain an appreciation for the value of economic reasoning and research, while also recognizing the limitations of its application. Students will also learn to write a final paper and effectively present it to their fellow students. Prereq: The course has two prerequisites ECO 202 and ECO 391. Students who have already taken ECO 491G cannot take ECO 392 and ECO 392 cannot be taken concurrently with ECO 491G.

ECO 393 SPORTS ECONOMICS. (3)
This course focuses on the application of economic theories to sports and the sports industry and understanding the behavior of economic agents in sports. Students who complete the course will gain insights into economics, understand how to apply economic models to explain observed behavior in sport, and appreciate empirical economic evidence generated from sports-related data. Prereq: ECO 201 and ECO 202 and ECO 391 or the equivalent.

ECO 395 INDIVIDUAL WORK IN ECONOMICS. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of credits. Prereq: GPA of 3.0 or higher, approval of instructor and chairperson.

ECO 401 INTERMEDIATE MICROECONOMIC THEORY. (3)
An analysis of the behavior of consumers and firms, price determination, various market structures, and income distribution. Prereq: ECO 201 or equivalent with a grade of C or higher, and MA 113 or MA 123 or equivalent.

ECO 402 INTERMEDIATE MACROECONOMIC THEORY. (3)
National income concepts, the determination of aggregate income and employment, the theory of money and inflation and problems of economic growth. Prereq: ECO 202 or equivalent and ECO 401 taken previously or permission of instructor.
Course Descriptions

*ECO 410 CURRENT ISSUES IN ECONOMICS (Subtitle required). (3)
The course addresses relevant topics in economics. May be repeated for a maximum of six credits under different subtitle. Prereq: ECO 202, ECO 391, ECO 401 and/or ECO XXX to be identified by instructor upon time of offering.

#ECO 430G COST-BENEFIT ANALYSIS. (3)
Cost-Benefit analysis uses economic tools to identify and quantify how society values the outcomes of public policies. This course examines how to identify these costs and benefits, addresses uncertainty, evaluates research techniques used to measure policy outcomes, and discusses methods for valuing these outcomes. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 450G THE ECONOMICS OF POVERTY AND WELFARE PROGRAMS. (3)
Examines the economic conditions of the poor in the U.S., theories of poverty, and major redistribution programs in the U.S. The course will study the economic impacts of such programs as Social Security, Medicare, Aid to Families with Dependent Children, Food Stamps, Medicaid, and child care subsidies. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 461 MARKET STRUCTURE AND ANTI-TRUST POLICY. (3)
A study of the relationship between industry performance and market structure, and the role and effect of the government’s anti-trust policies. Prereq: ECO 401 or equivalent.

ECO 463 ANALYSIS OF BUSINESS CONDITIONS. (3)

ECO 471 INTERNATIONAL TRADE. (3)
This is an advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as a means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as AEC 471.)

ECO 472 INTERNATIONAL MONETARY ECONOMICS. (3)
This course deals with macroeconomic and financial aspects of the open economy. Main subjects include the balance of payments, exchange rate determination, and macroeconomic theory and policy in an open economy. Students are exposed to basic concepts such as purchasing power parity, interest parity, monetary models of the exchange rate, and the Mundell-Fleming model. Current issues for discussion include currency crises, pros and cons of international capital flows, and the choice of exchange rate regime. Prereq: ECO 402 or consent of instructor.

ECO 473G ECONOMIC DEVELOPMENT. (3)
A comparative study of economic progress in selected countries; growth patterns, theories of development and capital formation, interaction of social and economic change. Prereq: ECO 401 or equivalent or consent of instructor. (Same as ECO 473G.)

ECO 477 LABOR ECONOMICS. (3)
Application of economic principles to analyze the operation of labor markets. Topics covered include: theories of labor movements, comparative analysis of unionism in different economies, labor supply, labor demand, human capital, collective bargaining, public policy and the operation of labor markets. In addition, selected topics such as female and minority employment, social security, and industrial conflict will be covered. Prereq: ECO 401 or equivalent.

ECO 479 PUBLIC ECONOMICS. (3)
An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECE 479.)

ECO 491G APPLIED ECONOMETRICS. (3)
To provide the student with a firm foundation in the design and estimation of economic models, empirical analysis of economic relationships, and forecasting. Emphasizes the structure and utilization of economic models. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 499 SEMINAR IN ECONOMICS (Subtitle required). (3)
Reading, research and discussion in a seminar format to illuminate problems of historical and contemporary interest in areas of special faculty competence. May be repeated to a maximum of nine credits, but may not be repeated under the same subtitle. Will be limited to a maximum of 15 students. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 590 INTRODUCTION TO QUANTITATIVE ECONOMICS. (3)
An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and use of computers in quantitative analysis. Prereq: ECO 401 and MA 213, or graduate status, or consent of instructor. (Same as AEC 590.)

ECO 601 ADVANCED MICROECONOMIC THEORY. (3)
An intensive course covering microeconomic theory and its various methodological and analytical techniques. Prereq: ECO 401 or consent of instructor.

ECO 602 MACROECONOMIC THEORY. (3)
An analysis of a market clearing, general equilibrium macroeconomic model. Emphasis on theoretical foundations of relevant behavioral functions and comparative statics. Not open to those with credit in ECO 761. Prereq: ECO 402 or consent of instructor.

ECO 603 RESEARCH METHODS AND PROCEDURES IN ECONOMICS. (3)
The basic procedures and methods of research in economics are considered from the standpoint of their applicability to problem solving and discovery of new scientific facts and generalizations in economics. Definition of the problem, statement of hypothesis, research design, data collection methods, and data analysis constitute the major topics. Attention is given to proper style and preparation of research reports in economics.

ECO 610 MANAGERIAL ECONOMICS. (3)
Analysis of applications of economic theory to management decision making. Such problems as demand and cost determination, pricing, and capital budgeting are treated. Prereq: Graduate standing, MA 123 or its equivalent.

ECO 619 SKILL DEVELOPMENT FOR APPLIED ECONOMIC ANALYSIS. (3)
Calculus, matrix algebra, mathematical statistics to understand basic economic models and applications and the fundamentals of econometric analysis. The intent of this course is to provide and develop the tools the students will need to engage in applied economic analysis and that will be used in subsequent courses in the MS in Economics Program. Prereq: MA 114 or its equivalent or consent of the instructor.

ECO 621 APPLIED MICROECONOMICS. (3)
This course covers essential microeconomic models and issues for the advanced applied economist and is the foundational course for the microeconomics in the applied track of the MS in Economics program. The focus on topics and methods most frequently used and relied upon in applied business and policy problems. By doing so, the course will prepare students for subsequent coursework for the applied MS track. Additionally, it will strive for students to gain strong intuitive skills regarding how to approach applied economics problems and their related empirical applications. Prereq: ECO 401 or its equivalent or consent of the instructor.

ECO 622 MACROECONOMICS FOR APPLIED ECONOMISTS. (3)
An applied analysis of macroeconomic conditions useful to a professional business economist is presented. Emphasis is on blending mainstream economic models of the economy with data to interpret current conditions, prospects for future conditions, and monetary and fiscal policies that influence these conditions. Prereq: ECO 402 (Intermediate Macroeconomics) or an equivalent course.

ECO 623 ECONOMETRICS FOR APPLIED ECONOMICS. (3)
This course examines a variety of topics in applied econometrics. The course begins with a review of the classic linear regression model and ordinary least squares estimation. The primary focus of the class is to examine how estimation can be done when the classic model doesn’t apply. Topics include endogenous regressors and instrumental variables, limited dependent variables models and maximum likelihood estimation, unobserved heterogeneity and panel data methods. Prereq: ECO 491 or equivalent or consent of instructor.

ECO 624 EMPIRICAL DATA MANAGEMENT. (3)
This course will cover the basic ways that economic data can be obtained. The course will cover obtaining data from data from the web, from APIs, and from colleagues in various formats including raw text files, binary files and databases. It will also cover the basics of data cleaning and how to make data operational. Organized data dramatically speeds downstream data analysis tasks. The course will also cover the components of a complete data set including raw data, processing instructions, codebooks, and processed data. The course will cover the basics needed for collecting, cleaning and sharing data. Particular points of emphasis will include reading and writing datasets, data cleaning, creating, changing and labeling variables and values, automating your work, combining and reshaping files, processing observations across subgroups, do file programming, and programming using .ado files. Prereq: ECO 491 or its equivalent or consent of the instructor.

ECO 625 PREDICTIVE MODELS AND FORECASTING. (3)
This course provides students with an overview of modern techniques in the forecast of time series used in a variety of applications in the private and public sectors including revenue and sales forecasting. As an applied course the techniques will be motivated by specific practical problems and will be put to use in forecasting practices. The course covers autoregressive and moving average models, distributed lag models, forecasting, Vector Auto-Regression, unit roots and testing, and auto-regressive conditional heteroskedasticity. Prereq: ECO 623 or its equivalent.
ECON 631 BUSINESS ECONOMICS. (3)
ECON 631 studies the economics of organizations and the economics of strategy. The first half of the course applies transactions costs and principal–agent theories to study the internal organization of the firm. Topics to be covered include the boundaries of the firm, corporate governance, choice of production process, and internal incentive systems. The second half of the course applies economic tools to the analysis of firm strategy. Topics to be covered include basic cost and demand conditions, economics of scale and scope, product differentiation, entry, exit and monopoly conditions, price discrimination and commodity bundling, vertical control, and rivalry and strategy. Basic tools of game theory and asymmetric information are integral parts of this course. Prereq: ECO 621 or its equivalent or consent of the instructor.

ECON 652 PUBLIC POLICY ECONOMICS. (3)
Principles and practices of economical resource management in the governmental sector: tax and expenditure types, intergovernmental fiscal cooperation, debt financing, budgeting, and financial planning. Prereq: ECO 201 or equivalent and MPA or MPP program status or permission of department. (Same as PA 652.)

ECON 653 HEALTH ECONOMICS. (3)
This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses, and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefits-cost analysis, and reform health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and MPA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as PA 636.)

ECON 654 BENEFIT-COST ANALYSIS. (3)
Principles, practices and applications of applied welfare analysis are the content of this course. The basic theory of benefit-cost analysis is presented and the relevance of implementation analysis in policy analysis is established. Prereq: ECO 652. (Same as PA 680.)

ECON 672 WORLD TRADE AND COMMERCIAL POLICY. (3)
An analysis of trade patterns and the implications of government policy on trade, in the light of both economic theory and empirical findings. Prereq: Successful completion of an upper-division undergraduate or graduate level economics course.

ECON 674 AGRICULTURE AND ECONOMIC DEVELOPMENT. (3)
Analytical consideration of the role of agriculture in economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as AEC 626.)

ECON 676 ECONOMICS OF THE PUBLIC SECTOR. (3)
Topics and methods for students who wish to become policy practitioners as well as for those who will deal with policy makers. Focus is on role of the federal, state, and local government in the economic with both the expenditure and revenue sides of the government budget examined. Substantial material from standard public finance courses including welfare measures and cost-benefit analysis, program evaluation, and tax analysis. Prereq: ECO 621 or equivalent or consent of the instructor.

ECON 692 ECONOMETRICS FOR POLICY ANALYSTS. (3)
Maximum likelihood estimation, ordinary least squares (OLS) regression, instrumental variables (IV) regression, heteroscedasticity-consistent regression, fixed and random effects models, probit, logit and tobit models, and identification and two-state least squares estimation of simultaneous equations models. Prereq: Any undergraduate statistics course. MPA, MPP or PUAD program status for priority registration, other students with permission of instructor. (Same as PA 692.)

ECON 697 FINAL PROJECT IN APPLIED ECONOMICS. (3)
The purpose of this course is to assist the student in developing and completing a research study applying the tools and institutional knowledge obtained in other courses in the Applied Economics courses to evaluate an important economic policy or concern in either the public or private sector. While much of the work in the course is done independently students will meet together to discuss their progress as well as meet with the instructor individually. Prereq: ECO 623 or its equivalent or consent of the instructor.

ECON 700 TEACHING METHODS IN BUSINESS. (1)
A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as BA 700.)

ECON 701 NEOCLASSICAL MICROECONOMIC THEORY. (3)
The Neoclassical theory of consumer behavior, production, market equilibrium and imperfect competition. Prereq: ECO 601 and ECO 590, or consent of instructor.

ECON 702 ADVANCED MACROECONOMIC THEORY. (3)
Analysis of general equilibrium macroeconomic models and factors responsible for deviations from general equilibrium. Emphasis on issues from recent professional literature. Prereq: ECO 602 or consent of instructor.

ECON 703 INTRODUCTION TO ECONOMETRICS I. (3)
The first course in the introduction to econometrics. A comprehensive survey of the general linear regression, autocorrelation, errors in variables and distributed lag models. Prereq: ECO 590 and either ECO 603 or STA 525, or consent of instructor.

ECON 704 GENERAL EQUILIBRIUM ANALYSIS AND WELFARE ECONOMICS. (3)
Existence, stability, efficiency and Pareto satisfactions of competitive equilibrium. Recent developments in general equilibrium and welfare theory. Prereq: ECO 701 or consent of instructor.

ECON 705 MACROECONOMIC DYNAMICS. (3)
Theoretical and empirical assessment of dynamic issues in macroeconomics. Topics include neoclassical and endogenous growth models and vector autoregressions. Prereq: ECO 702 or consent of instructor.

ECON 706 INTRODUCTION TO ECONOMETRICS II. (3)
The second course in the introduction to econometrics. A comprehensive survey of identification, estimation, and hypothesis testing in the context of simultaneous equations models. Prereq: ECO 703 or consent of instructor.

ECON 707 RESEARCH SEMINAR IN ECONOMICS. (3)
This course will help students develop research skills by requiring them to work through an independent project from start to finish. The student will review the literature and select a topic in an area of economics of interest. The student will then complete the project under the guidance of the instructor. Students will discuss their ongoing work in class with other students and in individual meetings with the instructor. The final output of the course will be a finished paper suitable for submission to a scholarly journal for publication. Prereq: Passing the Theory Exams or permission of the instructor.

ECON 721 ENVIRONMENTAL ECONOMICS, REGULATION AND POLICY. (3)
This course takes a balanced practitioner approach to the problems of the environment and environmental regulation. Efficiency aspects will be developed carefully, so as to provide a background for an extensive coverage of various available alternative policies. Prereq: PA 652 and MPA or economics program status or consent of instructor. (Same as PA 727.)

ECON 724 ENVIRONMENTAL ECONOMICS. (3)
This seminar in environmental economics deals with market failure, benefit-cost analysis, no market failure, valuations of environmental changes, and selected topics in environmental economics. Central to the course is valuation changes in health risks, risk perception, and behavior and their implications. Selected topics include international issues, environmental equity and markets for environmental quality. This course and ECO 725 Health Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. Program in Economics. Prereq: ECO 601 and ECO 703 or consent of instructor.

ECON 725 HEALTH ECONOMICS. (3)
This course rigorously examines the organization, financing, and management of the U.S. health care system and programs, and emphasizes economic analysis contemporary health policy concerns of today. By mid-term of the semester, students should have the institutional knowledge and analytic tools needed to contribute to current public policy debates about health and medical care. This course and ECO 724 Environmental Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. program in Economics. Prereq: ECO 601 and 703 or consent of instructor.

ECON 726 ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3)
This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and other market failures, environmental policies, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 (or equivalent courses), or consent of instructor. (Same as AEC 745.)

ECON 731 LABOR ECONOMICS I. (3)
The theory and estimation of the demand for and the supply of labor are introduced. Topics include demographic changes, minimum wages, retirement, and secular trends in labor force participation. The concept of human capital is examined, including applications to income distribution. Theory and evidence on the structure of wages in the U.S. is considered. Topics include compensating wages and race and gender differences. Prereq: ECO 601 or consent of instructor.

ECON 732 LABOR ECONOMICS II. (3)
Dynamic and cyclical labor demand are examined theoretically and empirically. Models of unemployment are considered, including search theory and the implicit contract model. The concept of a labor market is examined, including applications to income distribution. The incentive effects of compensation are discussed, including sorting models and the principal-agent problem. Prereq: ECO 601 or consent of instructor.
Course Descriptions

ECO 741 THEORY OF THE FIRM AND MARKET STRUCTURE. (3)
A study of firms and markets covering such topics as organizational structure and objectives of firms; product selection, advertising and quality; price discrimination; vertical control; entry, accommodation and exit; cost structure and market organization, market structure and performance; and public policy. Prereq: ECO 601 or consent of instructor.

ECO 742 INDUSTRIAL ORGANIZATION. (3)
A comprehensive survey of the literature in industrial organizations including static theories of oligopoly, dynamic theories of oligopoly, information about strategic behavior, research and development, patents, and adoption of new technology.

ECO 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ECO 751 PUBLIC ECONOMICS. (3)
An advanced study of both how government activities influence allocation, relative prices and welfare and what is the proper role of the public sector in resource allocation. Relevant topics include: public goods, externalities, tax incidence, optimal taxation, benefit-cost analysis, public pricing, fiscal federalism, state-municipal finance and public choice. Prereq: ECO 601 or consent of instructor.

ECO 752 ADVANCED TOPICS IN PUBLIC FINANCE. (3)
Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism, international and public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as PA 754.)

ECO 753 URBAN AND REGIONAL ECONOMICS. (3)
An intensive study of the theory, evidence and policy concerning urban areas and regions. Topics typically covered include: nature of regions and urban areas, size and distribution of cities, location decisions, housing, transportation, migration and regional growth. Prereq: ECO 601 or consent of instructor.

ECO 761 MACRO AND MONETARY ECONOMICS I. (3)
Advanced study of business cycle fluctuations. Theoretical and empirical investigations of the causes of business cycles; evaluating the effectiveness of monetary, fiscal, and other policies to affect inflation, unemployment, and short-run economic goals. Emphasis on current academic research. Prereq: ECO 701, ECO 702 or consent of instructor.

ECO 762 MACRO AND MONETARY ECONOMICS II. (3)
Advanced study of long-run macroeconomic issues. Theoretical and empirical examinations of the determinants of economic growth; analysis of government policies, country endowments, and institutional factors in determining growth rates and income levels. Emphasis on current academic research. Prereq: ECO 702 or consent of instructor.

ECO 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ECO 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ECO 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ECO 771 INTERNATIONAL ECONOMICS: INTERNATIONAL MONEY AND FINANCE. (3)
International finance and open economy macroeconomics; the balance of payments; theory of exchange rate determination; macroeconomic policy issues in open economies. Prereq: ECO 602.

ECO 772 INTERNATIONAL ECONOMICS: TRADE THEORY AND POLICY. (3)
Theory and empirical analysis of the effects of trade and trade policy. Prereq: ECO 601.

ECO 773 OPEN ECONOMY MACROECONOMICS. (3)
Development of rigorous models to enhance knowledge of open economies. Topics include: impact on an economy of changes in trade, the current account balance, exchange rates, and international financial markets. Prereq: ECO 702.

ECO 790 TIME SERIES ANALYSIS. (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, auto-regressive and mixed auto-regressive-moving average processes; linear nonstationary models, minimum mean square error forecasts and their properties; model identification, estimation and diagnostic checking. Prereq: STA 422G or STA 622G. (Same as STA 626.)

ECO 796 SEMINAR. (1-6)
An extended original investigation of some specific topic with a view to giving training in methods of research and studying intensively a particular subject in the field of economics. May be repeated to a maximum of six credits.

ECO 797 RESEARCH PROBLEMS IN ECONOMICS. (1-9)
Students confer individually with the instructor. May be repeated to a maximum of 15 credits. Prereq: Permission of the Director of Graduate Studies is required.

EDC 317 INTRODUCTION TO INSTRUCTIONAL MEDIA. (1)
An introductory instructional media experience including basic production and utilization techniques for media materials and operation of commonly used educational media equipment. Topics include graphic preservation, transparency production, audio materials, motion pictures, 35mm photographic techniques, and an introduction to videotape television. Prereq: Admission to a Teacher Education Program.

EDC 322 ELEMENTARY PRACTICUM. (1-3)
Planned and supervised practicum in teaching elementary science, reading, social studies, and mathematics. Observation, selecting objectives and materials, questioning strategies, learning centers, instructional units, and assessment techniques will be emphasized. May be repeated to a maximum of three credits. Lecture, one hour; laboratory, six to twelve hours per week. Prereq: Admission to Early Elementary TEP. Concur: EDC 323, EDC 326, SEM 328, SEM 337, and EDC 339.

EDC 323 CLASSROOM MANAGEMENT AND DISCIPLINE. (3)
EDC 323 should be taken in conjunction with EDC 329. Prereq: Admission to Teacher Education Program.

EDC 326 TEACHING SOCIAL STUDIES IN THE ELEMENTARY SCHOOL. (3)
A study of methods and materials for teaching social studies at the elementary level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques for elementary social studies. Consideration will be given to addressing the individual needs of a diverse student population. Special emphasis is placed on instruction in grades K-4. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 15 hours of social sciences. Coreq: EDC 322.

EDC 327 READING IN THE CONTENT AREAS. (3)
A study of materials and techniques useful in the diagnostic teaching of reading and other language arts with students in grades 5-9. The course will emphasize materials, techniques, and procedures, which diagnose individual strengths and weaknesses, and prescriptive instruction based upon the diagnosis. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to teacher education or permission of instructor.

EDC 329 TEACHING READING AND LANGUAGE ARTS. (3)
Development of competencies for the teaching of reading and other language arts to groups. Course will also provide an overview of the nature of reading and language arts development from grade K-8. Twenty hours of laboratory work in the schools are required. Prereq: Admission to Early Elementary Education TEP or Middle School TEP.

EDC 330 WRITING IN THE CONTENT AREAS. (3)
Development of competencies for the teaching of writing and other language arts, including digital texts and other 21st century platforms, to groups. This course is in conjunction with a four-week field experience, consisting of 2 for-week placements in the candidate’s areas of content concentration. Prereq: EDC 327, or permission of instructor.

EDC 334 ORAL AND WRITTEN LANGUAGE DEVELOPMENT IN THE ELEMENTARY SCHOOL. (3)
A study of language differences, methods for teaching children with language differences, ways to integrate oral language instruction with the total curriculum, ways to enhance students’ expressive writing abilities, and ways to teach grammar, spelling, and handwriting through functional and creative writing activities. Prereq: EDC 329 and admission to the elementary teacher education program.

EDC 339 DESIGNING A READING AND LANGUAGE ARTS PROGRAM FOR THE ELEMENTARY SCHOOL. (3)
A study of materials and procedures for developing reading and language arts skills with elementary students, with an emphasis on grades K-4. Course will emphasize how to diagnose individual student skill strengths and weaknesses and build a prescriptive program based upon the diagnosis. Prereq: EDC 329, admission to the TEP or permission of instructor. Coreq: EDC 322.

EDC 341 THE EARLY ADOLESCENT LEARNER AND METHODS IN MIDDLE LEVEL EDUCATION. (3)
An examination of the nature of early adolescents as well as the history and characteristics of the schools designed to teach them. Focus is on responsive pedagogy, especially the rationale behind the middle school concept and the generic techniques of teaching as an individual and as a member of an interdisciplinary team. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to Teacher Education or permission of instructor.

EDC 342 STUDENT TEACHING IN ART. (3-12)
Designed to give the student practical experience through observation, planning, teaching, and evaluating procedures. The student works with children on all grade levels under the guidance of the supervising teacher. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.
EDC 343 METHODS AND MANAGEMENT IN MIDDLE LEVEL EDUCATION. (3)
A course covers the development of theory and practice, with a focus on planning and assessment in middle level classrooms. The course includes a four-week field experience, consisting of 2 two-week placements in the candidate’s areas of content concentration. Prereq: EDC 341, or permission of instructor.

EDC 346 METHODS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)
Introduction to theory, research, purposes, methods and materials appropriate to social studies instruction in the middle grades. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate’s areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in approved social studies courses, or permission of instructor.

EDC 347 METHODS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS. (3)
This course introduces teacher candidates to the fundamentals of theory and practice for teaching English Language Arts at the middle level (grades 5-9) as they develop an understanding of state and national standards. Course work includes current issues and recent developments in curriculum and methodology in the teaching of middle level English Language Arts with emphasis on the integration of reading, writing, listening, speaking, and language use. Course includes a four-week field placement in middle school settings. Prereq: Admission to Teacher Education, 9 hours in English, or permission of instructor.

EDC 362 FIELD EXPERIENCES IN SECONDARY EDUCATION. (1-3)
Supervised experiences in schools, other education agencies, and the community. Required of all students receiving a bachelor’s degree in secondary education. Includes field trips, work in schools, and involvement in community projects.

EDC 377 STUDENT TEACHING IN MUSIC. (3-12)
A course planned for teachers who expect to become either instructors or supervisors of music in the public schools. Observation, teaching, work on research problems, and conferences with the supervising instructor included. Offered on a pass/fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.

EDC 421 SURVEY OF SECONDARY MATHEMATICS CURRICULUM. (3)
This course will examine the content of the mathematics curriculum of the secondary school and issues related to that curriculum. Students are expected to demonstrate competency in this content.

EDC 433 STUDENT TEACHING IN THE ELEMENTARY SCHOOL. (3-12)
A course designed to give the student experience with and practice in the program of an elementary school setting with children in all learning situations is the basic part of the course. A required weekly seminar will include sessions on: beginning teacher internship, school law and students’ rights, administrative organization, and professional development. Offered on a pass/fail basis only. Prereq: Must meet the published college requirements for student teaching.

EDC 446 APPLICATIONS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)
This course emphasizes analyzing and assessing teaching and learning appropriate to inquiry-based social studies instruction in the middle grades. This course is in conjunction with an eight-week field experience. Prereq: EDC 346 or permission of instructor.

#EDC 447 APPLICATIONS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS. (3)
This course emphasizes planning, assessing, and analyzing teaching and learning in English/Language Arts at the middle level. Students are introduced to strategies and skills for teaching English/Language Arts content aligned with state and national standards with an emphasis on equity. This course is in conjunction with an eight-week field experience. Prereq: EDC 347 or permission of instructor.

*EDC 454G CULTURE, EDUCATION AND TEACHING ABROAD. (3)
The purpose of this course, which is required for those wishing to student teach overseas, is to help participants examine theories and practices related to intercultural understanding and to develop strategies to teach with a global perspective. Prereq: Sophomores must have instructor’s permission to register. (Same as EPE 454G.)

EDC 501 TEACHING INTERNSHIP. (1-12)
Supervised practice teaching under competent leadership. Observation, instruction, independent study which parallels field experience, and conferences with supervising instructor included. This course is designed primarily for students in Allied Health Professions, Education, Library and Information Science, Home Economics, and Social Work. May be repeated to a maximum of 12 hours. Prereq: EDC 500 or permission of instructor.

EDC 504 LITERATURE AND RELATED MEDIA FOR YOUNG ADULTS. (3)
A study of literature and related materials for use with young people in grades 6-12. Emphasis is placed on the special characteristics and needs of young people and the evaluation of materials for this age group. (Same as LIS 514.)

EDC 509 COMPOSITION FOR TEACHERS. (3)
A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 509.)

EDC 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language teaching theory as it relates to other disciplines, (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 513.)

EDC 514 TESL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 514.)

EDC 520 ASSESSMENT AND ACCOUNTABILITY IN MIDDLE LEVEL EDUCATION. (3)
This capstone course is taken during the student teaching experience and is taught via an online modality. The purpose of the course is to investigate and document teaching effectiveness. Candidates design an integrated unit of study, pre- and post test student learning, analyze learning gains drawing on formative and summative measures, and make modifications and accommodations based on the results. Prereq: Admission to Teacher Education.

EDC 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)
Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDP/EPE 522.)

EDC 533 TEACHING LITERACY ACROSS THE DISCIPLINES. (3)
This course provides an in-depth study of theories and teaching methods for integrating literacy (including digital literacy) instruction into content area classrooms at the K-12 levels. Instructional strategies, procedures, and assessments designed to increase vocabulary learning and comprehension of expository texts are emphasized. Prereq: Graduate standing or consent of the instructor.

EDC 537 ADVANCED APPLICATIONS OF TEACHING WRITING. (3)
This course promotes the thoughtful examination of writing instruction at the middle and high school levels. Throughout the course, learners are introduced to strategies and skills they can use to enhance their own writing and the writing of their students. Using a process approach, students learn how to communicate ideas effectively in a variety of genres and for a multitude of purposes. Based on the most current research in the field, this course explores such topics as writers workshop, conferencing, assessment of struggling writers, reading/writing connections, writing in the disciplines, revision and editing, the use of digital media to support writers, and the management of writing instruction. This course is offered in conjunction with an eight-week clinical field experience. Prereq: EDC 347, graduate standing, or permission of instructor.

EDC 540 ASSESSMENT AND SCHOOL DATA ANALYSIS. (3)
This course focuses on the theoretical and practical aspects of educational assessment at the student, classroom, school, state/province, national, and international levels. Students examine the history of assessment in education, the varied purposes of assessment, the strengths and shortcomings of different assessment formats, and relevant research regarding the effectiveness of various types of assessment for specific educational purposes. They also explore the development of assessments to address particular types of student learning goals, the construction of rubrics to offer students descriptive feedback on their performance, the interpretation of assessment results, and the use of these results to improve teaching quality and student learning. There are no formal prerequisites, but an introductory course in statistical methods (e.g., EDP/EPE 557 or 558) and a basic course in educational and psychology (e.g., EDP/EPE/ECC 522) are recommended. The course may be conducted either in an online or face-to-face format, depending on the semester and instructor. (Same as EDP 560/EPE 560.)

EDC 541 READING AND UNDERSTANDING EDUCATIONAL RESEARCH. (3)
The purpose of this course is to learn how to critically read, analyze, and reflect upon educational research from quantitative, qualitative, and mixed methods perspectives.

EDC 543 DIGITAL GAME BASED LEARNING AND INSTRUCTION. (3)
Digital game-based video applications as prominent video-based vehicles for distance education and multimedia development through multi-user and virtual platforms. Classroom exercises and projects develop basic game video production skills including the use of graphical and video assets, flash animations storyboarding, equipment, terminology and systems, message design issues and research in GDIH.

EDC 544 USE AND INTEGRATION OF INSTRUCTIONAL MEDIA. (3)
Students use a range of traditional, interactive, and emerging technological interventions in analog and digital formats. Students gain skill in the operation, production, and integration of basic media such as video, graphics, videotape, and CD-ROM in a variety of instructional settings (training, exploratory learning, on-line databases, etc.). Students demonstrate skills via the composition and production of several media documents using available tools and resources.

EDC 547 TECHNOLOGY IN INSTRUCTION PRACTICE. (3)
Students use instructional computing applications and understand the roles and uses of computers in instruction. Students select and use instructional computing hardware and software appropriate to instructional goals and settings. Students use instructional computing networks for instructional purposes. Students demonstrate skill using basic productivity software through structured assignments and collaborative projects.
Course Descriptions

EDC 548 INSTRUCTIONAL TECHNOLOGY LEADERSHIP. (3)
Students develop skill in advanced aspects of the operation and use of the range of instructional technologies from desktop to distributed computing environments. Students use operating systems, learn network administration, do technology planning, and work with basic authoring tools. Skill is demonstrated through a series of projects including development of a technology plan for a specified work setting and authorship of a prototype program.

EDC 549 MIDDLE LEVEL STUDENT TEACHING. (3-15)
This course provides candidates with the opportunity to participate in a full-time, supervised internship in middle grade classrooms. The student teaching experience occurs in a 5-9 school setting. Offered on a pass-fail basis only. Repeated for up to 15 hours. Prereq. Must meet published college requirements for student teaching.

EDC 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3)
This course assists future educators in developing strategies to create an equitable teaching/ learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as AAS 550.)

EDC 560 LITERACY DEVELOPMENT IN THE ESL CLASSROOM. (3)
This course is designed to introduce students to theory, research, and teaching applications of second language literacy development in the ESL classroom. This is a field-based course, and students will study current teaching methods of literacy instruction and apply those ideas with learners in an ESL setting. (Same as TSL 560.)

EDC 575, 576 MODERN EDUCATIONAL PROBLEMS. (UNCLASSIFIED). (3 ea.)

EDC 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3)
This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq. Graduate standing, EDP 557 or consent of instructor. (Same as AAS 601.)

EDC 603 TEACHING READING TO LOW-ACHIEVING PRIMARY STUDENTS. (3)
Reading Recovery is dependent on the level of expertise of Reading Recovery teachers. Students will learn to use the Reading Recovery procedures in order to help accelerate the learning of Reading Recovery children. Reading Recovery Teacher Leaders provide clinical supervision and guidance as teachers learn how to solve the particular challenges of children who are not making accelerated progress. Additionally, students will study the theoretical underpinnings of Reading Recovery. In order to work effectively within their schools in the future, teachers are placed in the teaching role with visible accountability across a school year.

EDC 605 DISTANCE LEARNING RESEARCH AND DESIGN. (3)
Study of the design and development of distributed learning systems in education and training. Topics include: foundations of distance education, distance learning research, and the design and development of e-learning courses and workshops. Student involvement in the design of an e-learning course or workshop will be emphasized.

EDC 607 INSTRUCTIONAL DESIGN I. (3)
Introduction to the instructional design process from needs assessment and goal definition through evaluation. Each student will design prototype instructional materials based on an instructional design model and/or procedures. The course will also introduce students to the field of instructional design and technology.

EDC 608 INSTRUCTIONAL DESIGN II. (3)
Critical analysis of instructional design models and their theoretical foundations including the impact of various models and perspectives on the practice and the products of instructional design. Prereq: EDC 607 or consent of instructor.

EDC 612 INTERACTIVE MULTIMEDIA AND USER DESIGN. (3)
The goal of this course is to examine the theoretical foundations and best practices involved in multimedia design and interface design. These investigations are anchored in user-centered design and the methodology explored in the course is research to practice in usability testing and iterative program design. Prereq: EDC 544.

EDC 610 DISCIPLINE AND CLASSROOM MANAGEMENT. (3)
The course is designed to examine the causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher. The course content is designed around two approaches: (1) identifying prevalent problems and customizing specific solutions to them; (2) presenting selected strategies and applying them to a variety of problems. In both cases, alternatives are considered in the light of recent research, law, research and experience. Prereq: Teacher certification and EDP 203.

EDC 611 AUTHORING APPLICATIONS FOR E-LEARNING. (3)
Focuses on individual and collaborative authoring applications for technology based instructional materials. Topics include linear and non-linear information structures, instructional message design, compositional issues related to audience focus, information density, language control, and organization, and prototype production with industry standard authoring software. Prereq: EDC 547 and EDC 607 or consent of instructor.

EDC 612 INSTRUCTIONAL DESIGN AND TECHNOLOGY FOUNDATIONS. (3)
Provides an in-depth survey of the field of instructional design and technology. Topics covered include the history of instructional design and technology, critical issues, current trends and future prospects for the field, instructional development, research, certification, and professional development. Prereq: EDC 607, EDC 608 or permission of instructor.

EDC 615 ADVANCED INSTRUCTIONAL APPLICATIONS FOR THE EARLY ADOLESCENT LEARNER. (3)
This course for middle school teachers examines the complex nature of the 10 to 14 year old student. Analysis of recent research-based effective instructional strategies to meet the needs, interests, and characteristics of these students will be included. Prereq. Teacher Certification or consent of instructor.

EDC 616 THE MIDDLE SCHOOL. (3)
The purpose of this course is to provide middle school teachers with an in-depth analysis of the characteristics of effective middle school facilities. An examination of current curricular models, issues, trends, and exemplary middle schools will comprise the primary focus of this course. Prereq. EDC 615 or consent of instructor.

EDC 617 EFFECTIVE TEACHING IN CULTURALLY AND LINGUISTICALLY DIVERSE CLASSROOMS. (3)
The purpose of this course is to prepare educators to effectively teach culturally and linguistically diverse students in mainstream classrooms. Prereq. Graduate student status is required.

EDC 618 ADVANCED STUDY IN THE TEACHING OF READING. (3)
An advanced course for classroom teachers which focuses on selection and implementation of reading assessment and instructional procedures. The theoretical bases of the reading process and the knowledge of research in reading will be related to the design of classroom instruction. This course is to become an option in Area 7 of both the Elementary and Secondary Standard Certification programs. Prereq. EDC 330 or 339 or 533 or equivalent.

EDC 619 ASSESSMENT OF READING GROWTH AND DEVELOPMENT. (3)
Clinical techniques for the diagnosis of reading disabilities. A course designed to develop both theoretical understandings and professional skills in clinical diagnosis of reading problems. Classroom application of the techniques is discussed. Prereq: EDC 330, or EDC 533, or EDC 534, or permission of instructor.

EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)
Clinical techniques used in the remediation of reading problems. It is a course designed to develop individualized procedures related to diagnosis. Classroom applications of the instructional procedures are discussed. This course is a combination of lecture and application with a student client. Prereq: EDC 619, or permission of instructor.

EDC 621 LANGUAGE AND LITERACY DEVELOPMENT. (3)
A study of language and literacy development (oral and written language development, first and second language development, etc.) across the lifespan to provide a foundation for literacy instruction and curriculum development. Prereq: EDC 641 or equivalent course in research foundations.

EDC 622 OBSERVING AND RESPONDING TO YOUNG READERS. (3)
Throughout the preparation year, teacher leaders engage in sensitive observation and responsive teaching of individual grade one children who have been identified as having difficulty learning to read and write. They study the theoretical rationales and practical application of Reading Recovery teaching procedures and connect their practice to wider understandings of literacy development. Across the year, teacher leaders work with a variety of children to gain a range of experiences, always focusing on teaching for accelerated learning. Reading Recovery trainers provide clinical supervision and guidance as teacher leaders learn how to solve the particular challenges of children who are not making accelerated progress. In order to work effectively with teachers in the future, teacher leaders are placed in the teaching role with visible accountability across a school year. Prereq. Applied for and been accepted to a Reading Recovery position in a school district.

EDC 623 THEORETICAL FOUNDATIONS: LANGUAGE AND LITERACY LEARNING AND DEVELOPMENT. (3)
Teacher Leaders in training examine the theoretical base underlying the processes of reading and writing. We will explore and extend our own personal models of reading and writing processes and ground this theory, building in close observations of young children reading and writing. Prereq. Applied for and been accepted to a Reading Recovery position in a school district.

EDC 624 LEADERSHIP PRACTICUM FOR TEACHER LEADERS. (3)
The course prepares teacher leaders for multiple and complex roles. Teacher leaders learn how to deliver initial training courses and ongoing professional support for Reading Recovery teachers. A key aspect of the teacher leader’s role is to provide the yearlong course of initial training for Reading Recovery teachers. In order to prepare teacher leaders for this role, attention is given to research, theory and practice relating to adult learners.
EDC 625 LITERACY LEADERSHIP P-12. (3) The purpose of this course is to prepare literacy professionals to facilitate positive change in school and community programming through planning, development, and evaluation, monitoring, and advocacy. Students will understand and assume various roles as literacy leaders; learn how to develop, implement, and evaluate effective research-based literacy programs and practices; learn how to design, facilitate, and evaluate effective professional development programs for professional educators; learn how to mentor colleagues and work collaboratively with families, teachers, administrators, and community members in individual and group contexts; and learn how to influence local, state, and national policies in literacy leadership.

EDC 626 CURRENT ISSUES IN LITERACY EDUCATION. (3) “Current Issues in Literacy Education” (EDC626) is an advanced course for graduate students, which focuses on contemporary matters in literacy education and learning. An emphasis on social, historical, and political factors affecting the literacy learning is included.

EDC 627 OBSERVING AND RESPONDING TO YOUNG READERS, ADVANCED. (3) This course represents advanced study of the Fall Semester course (622). Students will continue to engage in sensitive observation and responsive teaching focusing on the hardest to teach children. Students will refine and deepen their understandings of the theoretical rationales and practical applications of Reading Recovery. The Teacher Leader-in-training will have the opportunity to observe, analyze, discuss, and directly experience the role of Teacher Leader in class and assigned field experiences, while preparing to implement the Reading Recovery program within their regional university or school district.

EDC 628 THEORETICAL FOUNDATIONS: ISSUES IN LITERACY DIFFICULTIES. (3) The purpose of this course is three fold. First, to acquaint students with the most current thinking about reading and learning processes relative to young, low progress, “at-risk” students. Second, to acquaint students with the seminal research and theories which have influenced the reading difficulties field. Third, to help students relate recent and seminal theories of learning difficulties, teaching reading difficulties, to young children, students who are hard for us to teach. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627

EDC 629 LEADERSHIP PRACTICUM FOR TEACHER LEADERS, ADVANCED. (3) Careful attention to implementation is critical for a successful intervention. Reading Recovery has well-developed, context-sensitive and evolving mechanisms for ensuring quality implementation. Teacher leaders play a critical role in maintaining the quality of each implementation. In order to provide effective leadership, teacher leaders must be knowledgeable about the design principles of the intervention and skillful in problem solving issues that arise. Teacher leaders collect and analyze data to evaluate and strengthen the implementation of Reading Recovery. They create awareness, work collaboratively with stakeholders, and cultivate support for Reading Recovery at the building, district, site, and state levels. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

EDC 630 FAMILY AND COMMUNITY LITERACY. (3) Viewed through a lens of lifelong literacy, this course focuses on developing strong partnerships between families, communities, and schools. Course topics will include: (a) family diversity & multiple literacies, (b) learning about, from, and with families & communities, (c) building upon family/community knowledge and resources in instruction, and (d) designing effective family/community partnerships and instructional activities. Framed by concepts from Activity Theory, Social Networking Theory and Social Learning Models, students will read current books, research articles and be introduced to research methods and tools (such as tracking utilities and on-line data collection) for examining on-line communities. Students will design and collect data for an original research project as part of required course work. Prereq: EDC 608, EDC 612, or consent of instructor.

EDC 631 SOCIAL STUDIES PEDAGOGY IN THE SECONDARY SCHOOL. (0-3) Through campus and school-based experiences, students will learn how to engage young people in learning social studies and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 0-3 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary Education), and, for the M.Ed. in Education (Initial Certification Option-School Secondary Education), the M.A./M.S. in Education (Initial Certification Option-School Secondary Education) and, for the M.Ed. in Education (Initial Certification Option-School Secondary Education), EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

EDC 632 BUSINESS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3) Through campus and school-based experiences, students will learn how to engage young people in learning business and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 0-3 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary Education), and, for the M.Ed. in Education (Initial Certification Option-School Secondary Education), EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

EDC 633 BUSINESS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3) Through campus and school-based experiences, students will learn how to engage young people in learning business and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 0-3 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary Education), and, for the M.Ed. in Education (Initial Certification Option-School Secondary Education), EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

EDC 634 ENGLISH PEDAGOGY IN THE SECONDARY SCHOOL. (0-3) Through campus and school-based experiences, students will learn how to engage young people in learning English and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 0-3 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary Education), and, for the M.Ed. in Education (Initial Certification Option-School Secondary Education), EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

EDC 635 CURRICULUM DESIGN FOR LEARNING AND LEADING. (3) Critical analysis, design, and implementation of curricula. Survey of theoretical foundations, in-depth case studies, research experiences, design of curriculum resource materials, and implementation of curriculum design.
**Course Descriptions**

**EDC 733 LEADERSHIP AND ANALYSIS OF ADVANCED INSTRUCTIONAL PRACTICE.**

Course participants will develop leadership skills in curriculum and instruction through a variety of research-based analytic practices such as lesson study, observation, mentoring, dialogic and collaborative work in the context of a school learning community. Clinical/field/practicum experiences provide experience identifying a research problem, planning a course of action, and implementing and evaluating the action plan to improve learning results in K-12 classrooms. This course is designed as a hybrid workshop as follows. The class begins with a one-week intensive summer experience. Online and distance learning instruction will be conducted throughout the full semester as students engage in their course work through clinical/field/practicum experiences. During the semester, two-in-class meetings will serve as midpoint and final assessments of student progress toward meeting course objectives. Clinical/field work will be conducted in school classrooms. Practicum, 1 hour; Seminar, 3 hours. Prereq: Graduate-level curriculum course, graduate-level assessment course, and a minimum of two years' K-12 teaching experience.

**EDC 740 PRACTICUM IN TEACHING READING AND RELATED LANGUAGE ARTS.**

Supervised practicum in analyzing problems in reading and related language arts and providing remedial work. Requires six hours per week in practicum with individual children or groups, plus two hours per week in seminar. May be repeated a maximum of six credits. Prereq: EDC 619, 620.

**EDC 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL.**

Students will teach in their subject areas in the schools full-time, meet regularly to discuss teaching effectiveness and strategies for improvement and develop their professional portfolios. May be repeated a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: The appropriate methods course in the subject area (SEM 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-School Secondary). (Same as SEM 746.)

**EDC 748 MASTER’S THESIS RESEARCH.**

Half-time to full-time work on thesis. May be repeated a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**EDC 749 DISSERTATION RESEARCH.**

Half-time to full-time work on dissertation. May be repeated a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**EDC 750 INTERNSHIP IN INSTRUCTIONAL SYSTEMS DESIGN.**

Students will apply their knowledge of instructional systems design in a real-life setting. The work setting will be selected based on the professional goals of each student and student work will be supervised and reviewed by the internship coordinator. May be repeated to a maximum of nine credits. Prereq: Consent of program coordinator.

**EDC 755 CURRICULUM AND INSTRUCTION RESEARCH COLLOQUIUM.**

Students and faculty will discuss current research and related issues in curriculum & instruction. May be repeated to a maximum of two credits. Prereq: Admission to graduate program in Curriculum & Instruction.

**EDC 767 DISSERTATION RESIDENCY CREDIT.**

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Passing qualifying exam.

**EDC 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**

May be repeated to a maximum of 12 hours.

**EDC 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.**

May be repeated indefinitely.

**EDC 777 SEMINAR IN CURRICULUM AND INSTRUCTION (Subtitle required).**

A critical analysis of recently developed materials and techniques in curriculum and instruction for precollege education. Includes analysis of evaluative research related to new materials and techniques. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

**EDC 781 INDEPENDENT STUDY IN CURRICULUM AND INSTRUCTION.**

An independent study course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

**EDC 791 RESEARCH PROBLEMS IN CURRICULUM AND INSTRUCTION.**

A research problems course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

**EDL 401 THE PROFESSIONAL TEACHER: LEGAL PERSPECTIVES.**

Study of legal concerns of public school teachers. Emphasizes legal rights and responsibilities of teachers and pupils. Lecture, two hours per week for eight weeks. Prereq: Admission to the Teacher Education Program.

**EDL 402 PRINCIPLES OF LEADERSHIP.**

This course is designed to provide an introduction to leadership. Its focus is the development of an understanding of leadership theories and styles. You will also learn strategies for successful leadership. The introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership skills and styles and strategies for success, and 3) examination of the responsibilities of leadership. Prereq: Admission to the program or consent of instructor. (Same as CLD 402.)

**EDL 403 LEADERSHIP AND COMMUNICATION.**

This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as CLD 403.)

**EDL 404 CONTEMPORARY LEADERSHIP APPLICATIONS.**

This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as CLD 404.)

**EDL 571 DESIGN THINKING IN EDUCATION.**

This course exposes students to many facets of design thinking and provides them with an interdisciplinary perspective on the role of design in addressing the world’s challenges. This course also raises awareness about the values and power of design thinking in art and design programs. Students will work in collaborative teams on semester-long projects in collaboration with client organizations, field liaisons, and a set of multidisciplinary experts. Students are exposed to the process of human-centered design, and hone their skills in need finding, problem definition, brainstorming, prototyping, and user testing. The course will consist of lecture, hands-on practicum, and guest speakers.

**EDL 601 INTRODUCTION TO SCHOOL LEADERSHIP AND ADMINISTRATION.**

Study of school leadership and administrative responsibilities, with emphasis on understanding schools as complex organizations and facilitating leadership to create a work climate supportive of excellence in teaching and learning.

**EDL 610 SCHOOL LEADERSHIP PRACTICUM I.**

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed, or consent of instructor.

**EDL 611 SCHOOL LEADERSHIP PRACTICUM II.**

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610 completed, or consent of instructor.

**EDL 612 SCHOOL LEADERSHIP PRACTICUM III.**

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610, EDL 611 completed, or consent of instructor.

**EDL 625 SCHOOL SAFETY AND DISCIPLINE LEADERSHIP.**

Study of processes and programs effective in promoting school wide safety and discipline. Emphasis on school connections to community security and resources. Prereq: Admission to Department Program or Consent of instructor.

**EDL 627 SCHOOL FINANCE AND SUPPORT SERVICES.**

Study of concepts in school finance and school business management. Attention is given to local, state, and federal laws. Emphasis is also given to school support services including transportation, facility planning and maintenance, food service, and risk management. Prereq: Program status or consent of instructor.

**EDL 628 SCHOOL LAW AND ETHICS.**

Study of legal and ethical issues as related to practical problems of school administration. Constitutional provisions and court decisions are examined as they impact education. Prereq: Program status or consent of instructor.

**EDL 631 LEADERSHIP FOR SCHOOL PROGRAM COLLABORATION.**

This course prepares school leaders to administer integrated instructional support programs in schools and districts. Attention is also given to leadership requirements related to collaboration among school and community-based programs that provide and support student learning. Prereq. Program status or consent of instructor.
EDL 634 SECURING AND DEVELOPING SCHOOL STAFF. (3)
Study of human resources development practices in school systems, with emphases on central office and school unit responsibilities for attracting, selecting, developing, evaluating, and retaining competent faculty and staff.

EDL 638 INSTRUCTIONAL COACHING AND MENTORING. (3)
This course explores multiple strategies for instructional coaching and mentoring and their relationship to educational leadership, school improvement, and student learning.

EDL 646 LEADERSHIP FOR SCHOOL-FAMILY COMMUNITY ENGAGEMENT. (3)
EDL 646 explores issues in administering integrated support programs in schools and districts serving specific student or community populations while increasing school and community collaboration. Prerequisite: Program status or consent of instructor.

EDL 661 SCHOOL TECHNOLOGY LEADERSHIP. (3)
This course provides an introduction to the study of school technology leadership with an emphasis on educational administrators developing a shared vision, planning, and implementing policies and utilizing resources for the comprehensive integration of technology at the school, district, and state levels. Prerequisite: Admission to the program or consent of instructor.

EDL 662 LEADING FOR NEXT GENERATION LEARNING. (3)
This course focuses on the role of educational administrators in creating and sustaining a culture of learning that ensures all students have access to an academically rigorous, relevant, and engaging education through the use of appropriate digital technologies.

EDL 663 LEADERSHIP FOR SCHOOL PROGRAM IMPROVEMENT. (3)
This course addresses the role of the educational administrator in providing professional development that supports communities of practice and the adoption of contemporary technologies and digital resources to enhance student academic learning. The course introduces students to principles of adult learning that characterize effective professional development and planning as it relates to technology adoption at the school, district, and state levels of education.

EDL 664 ASSESSMENT LEADERSHIP. (3)
This course focuses on educational administrators’ use of technology to support data-driven decision making to support continuous improvement and change at the school, district, and state levels of education. Prerequisite: Admission to the program or consent of instructor.

EDL 665 SCHOOL TECHNOLOGY LEADERSHIP FOR DIGITAL CITIZENSHIP. (3)
This course examines school administrators’ social, ethical, and legal issues and responsibilities all students, including those with disabilities and special needs, for digital citizenship. Facilitating understanding of evolving virtual school environments and modeling digital citizenship at the school, district, and state levels are also addressed. Prerequisite: Admission to the program or consent of instructor.

EDL 669 LEADERSHIP FOR CREATIVE PROBLEM SOLVING. (3)
Study of diverse strategies and protocols used to identify authentic problems of practice in educational settings, diagnose potential options, determine innovation solutions, and assess impact by using diverse data sources.

EDL 676 THE SCHOOL SUPERINTENDENCY. (3)
Role of the school district superintendent is studied including: historical and current job responsibilities of the position; knowledge, skills and dispositions necessary to serve successfully in the position; future challenges of the position. Prerequisite: Admission to the program and consent of instructor.

EDL 677 SCHOOL SYSTEM ADMINISTRATION. (3)
Study of overall school district management and operations including administration of auxiliary services, federal programs, financial management, and human resources. Prerequisite: Admission to program or consent of instructor.

EDL 678 STRATEGIC MANAGEMENT IN EDUCATION. (3)
Study of strategic management procedure applications in school administration utilized at both the school district and individual school site levels. Prerequisite: Admission to program or consent of instructor.

EDL 679 SCHOOL SUPERINTENDENT PRACTICUM I. (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prerequisite: Admission to school superintendent certificate program or consent of instructor.

EDL 680 SCHOOL SUPERINTENDENT PRACTICUM II. (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prerequisite: Admission to school superintendent certificate program and completion of EDL 679 or consent of instructor.

EDL 681 SCHOOL SUPERINTENDENT PRACTICUM III. (1)
Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prerequisite: Admission to school superintendent certificate program and completion of EDL 679 plus EDL 680, or consent of instructor.

EDL 682 LEADING DISTRICT CHANGE AND INNOVATION. (3)
This course focuses on understanding the role of the school district superintendent in leading school-wide change and innovation, educational reform in national, state and local contexts, and change models and processes. Students will collaborate with a superintendent mentor in completing field-based, work-embedded assignments. Prerequisite: Admission to the Superintendent Certification Program or consent of the instructor.

EDL 694 LEADERSHIP IN CAREER AND TECHNICAL EDUCATION. (3)
A course designed for superintendents, high school principals, and other leaders. Its purpose is to prepare administrators and supervisors for leadership in career and technical education. (Same as CLD 694.)

EDL 700 KNOWLEDGE BASE FOR LEADERS. (3)
This course reviews the quest for a knowledge base in educational administration. It begins with a survey of the history of education and organizational thought in the United States, examining scientific management, human relations, bureaucracy, and the theory movement. The course also reviews more recent attempts to capture the knowledge base including the University Council of Educational Administration’s article bank, PRIMIS, and the Standards for School Leaders from the Interstate School of Leadership Licensure Consortium. The course emphasizes epistemologies used to generate a knowledge base in educational administration tracing the evolution of thought and vocabulary within the profession. Prerequisite: Permission of instructor.

EDL 701 LEADERSHIP IN EDUCATIONAL ORGANIZATIONS. (3)
A study of leadership with particular emphasis on understanding the nature, defining characteristics, responsibilities, contextual determinants, and importance of leadership within educational organizations. Prerequisite: Admission to Department program or consent of instructor.

EDL 702 LEADERSHIP FOR ORGANIZATIONAL LEARNING. (3)
This course examines theories associated with organizational learning and change processes that can be used by leaders of 21st century educational systems. Theories are then used to examine prevailing practices within organizations and to inform the development of action plans appropriate for improved organizational performance. Prerequisite: Admission to Department program or consent of instructor.

EDL 703 LEADING ORGANIZATIONAL CHANGE. (3)
This course focuses on understanding the field of organizational change as well as emphasizing the nature, characteristics, responsibilities, and contextual determinants that influence a leader’s role in changing educational organizations. Prerequisite: Admission to Department program or consent of instructor.

EDL 704 POLITICS OF EDUCATIONAL LEADERSHIP. (3)
This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prerequisite: Graduate standing. (Same as EPE 603.)

EDL 705 INTERNATIONAL PERSPECTIVES ON EDUCATIONAL REFORM. (3)
The course focuses on international education reform, the function of schools in national social, economic and political development, as well as emerging perspectives on educational leadership and professional preparation. Prerequisite: Admission to a doctoral degree program at the University of Kentucky, completion of EPE 555, its equivalent, or consent of the instructor.

EDL 706 CONTEMPORARY SCHOOL LEADERSHIP. (3)
EDL 706 examines leadership and administrative responsibilities in contemporary P12 schools with emphasis on a principal’s role in creating a learning-centered culture focused on student achievement and school excellence. Hybrid delivery that features face-to-face and online sessions. Prerequisite: Admission to EdD program or permission of instructor.

EDL 707 LEADERSHIP IN LEARNING-CENTERED SCHOOLS. (3)
EDL 707 examines theories associated with a learning-centered leadership in P12 educational organizations with emphasis on the roles and responsibilities of principal in supervising and monitoring a school’s instructional program, learning assessment, and evaluation and accountability processes to assure academic achievement by all students. Prerequisite: Admission to EdD program or permission of instructor.

EDL 708 ORGANIZATIONAL LEARNING IN P12 SCHOOLS. (3)
EDL 708 examines theories associated with organizational learning and change processes that can be used by principals to create learning-centered schools. Students conduct disciplined inquiry within P12 schools to identify current practices and then develop action plans to improve school performance.

EDL 709 EVIDENCE-BASED DECISION MAKING. (3)
EDL 709 provides an overview of assumptions and procedures for systematic inquiry in educational settings and practice using diverse strategies to analyze data in order to make informed decisions about improving student learning and school performance. Hybrid delivery that features face-to-face and online sessions. Prerequisite: Current EdD degree-seeking student in principal preparation program or approval of course instructor.

EDL 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prerequisite: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
EDP 751 FOUNDATIONS OF INQUIRY. (3)
Introductory study of assumptions and procedures of systematic inquiry used to investigate administrative, leadership, and supervisory phenomena in education. Issues regarding qualitative and mixed methods models of inquiry are included.

EDP 767 DISSERTATION RESIDENCY CREDIT. (3)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDP 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

EDP 770 TOPICAL SEMINAR IN EDUCATIONAL LEADERSHIP. (1-3)
Advanced graduate students enroll in this topical seminar to enhance their portfolios for educational leadership through concentrated study of innovations in the specialized functions of leadership. These specializations include, but are not limited to, the study of curriculum and instructional leadership, educational law, personnel administration, school and community relations, education for diverse populations, budgeting and financing of schools. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDP 771 SEMINAR IN LEADERSHIP. (1-3)
A variable topic seminar on selected problems in educational leadership. Activities are designed to improve skill in planning, data-informed decision making, organizing, communicating, evaluating, negotiating, and problem solving will be provided as appropriate. Educational leadership through concentrated study of innovations in the specialized functions of leadership. These specializations include, but are not limited to, the study of curriculum and instructional leadership, educational law, personnel administration, school and community relations, education for diverse populations, budgeting and financing of schools. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDP 785 INDEPENDENT WORK IN EDUCATIONAL LEADERSHIP. (3)
Includes research on a practical problem in educational leadership. Open only to students with at least one semester of graduate work in education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDP 792 RESEARCH IN EDUCATIONAL LEADERSHIP. (3)
Critical examination of representative research studies in leadership and related fields. Emphasis upon the students’ defining and delimiting an appropriate problem in educational leadership, generating a design appropriate to the problem and selecting appropriate techniques of analysis. Prereq: Admission to program.

EDP Educational and Counseling Psychology

EDP 202 HUMAN DEVELOPMENT AND LEARNING. (3)
Theories and concepts of human development, learning, and motivation are presented and applied to interpreting and explaining human behavior and interaction in relation to teaching across the developmental span from early childhood to adulthood. A field experience in a school or other educational agency is a required and basic part of the course. Prereq: PSY 100.

EDP 203 TEACHING EXCEPTIONAL LEARNERS IN REGULAR CLASSROOMS. (3)
An introduction to the characteristics and instructional needs of exceptional learners. Prereq: Admission to a school or other educational agency as a required and basic part of the course. Lecture, three hours per week; laboratory, two hours per week for a maximum of six weeks. Prereq: Successful completion of EDP 202 with an earned grade of C or higher.

EDP 303 TEACHING EXCEPTIONAL LEARNERS IN THE ELEMENTARY CLASSROOM. (3)
This course is designed to introduce students to issues related to classroom instruction to meet the needs of ALL students. We will examine the concept of the “least restrictive environment” (LRE) for learners and will discuss a variety of individual and group differences and exceptionalities, including various disabilities, giftedness, multicultural and diversity issues that teachers encounter in the regular classroom. The emphasis will be on understanding the needs and abilities of exceptional learners in order to make appropriate, reflective decisions about their education. Prereq: Admission to the Elementary Teacher Education Program and successful completion of EDP 202, or an equivalent.

EDP 305 INTRODUCTION TO COUNSELING SKILLS. (3)
This course serves as an introduction to the skills and techniques required to be an effective helper, broadly defined, but generally focused within a counseling context. Didactic and experiential training is provided for initial counseling, interviewing (listening), and relationship building skills. Prereq: Completion of PSY 100 or consent of instructor.

EDP 513 SOCIAL ASPECTS OF BEHAVIOR. (3)
This course is designed to meet the needs of undergraduate and graduate students in the College of Education for a course in theory and principles of social psychology. The course will cover the basic concepts and theories of social psychology. Theories of attitude formation, group dynamics, and biases will be surveyed, with an application to the professional fields of psychology. In addition to the theories and principles of social psychology, research paradigms, social change, social influence, system consultation, and community issues as they relate to social psychological considerations will be addressed. Undergraduate-level prerequisite: One course in psychology or consent of instructor. Graduate-level prerequisite: None.

EDP 518 CONTEMPORARY TOPICS IN UNIVERSITY RESIDENTIAL LIVING. (3)
An exploration of topics such as conflict mediation, crisis management, communication skills, student development theories, and wellness designed to provide new Resident Life Advisors with the skills and knowledge essential for being successful. Prereqs: PSY 100, PSY 215, or EDP 202 and must be a Residence Life Advisor.

EDP 520 PROGRAM EVALUATION. (3)
This course is an application-focused course that provides an overview of program evaluation. This course will cover the types of evaluation, the theory associated with evaluation, and the tools of evaluation applied to the evaluation process. Students will develop an appreciation for the flexibility needed in order to perform evaluation tasks in practical situations related to their area of expertise. (Same as EPE 520/KHP 520.)

EDP 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)
Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDC/EPE 522.)

EDP 545 PSYCHOLOGY OF THE BLACK EXPERIENCE. (3)
EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational Leadership and Policy Studies. Students will study the historical context of the Black Experience. Prereq: PSY 100, PSY 215, or EDP 202 and must be a Residence Life Advisor. (Same as EDC/EPE 545.)

EDP 548 EDUCATIONAL PSYCHOLOGY. (3)
An introduction to the application of principles of psychology to classroom learning and teaching problems.

EDP 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3)
This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate (with permission) or graduate status in the College of Education; or consent of the instructor. (Same as EDC 557.)

EDP 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)
The course covers application of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EDP/EPE 557 or equivalent. (Same as EDC 558.)

EDP 560 ASSESSMENT AND SCHOOL DATA ANALYSIS. (3)
This course focuses on the theoretical and practical aspects of educational assessment at the student, classroom, school, state/province, national, and international levels. Students examine the history of assessment in education, the varied purposes of assessment, the strengths and shortcomings of different assessment formats, and relevant research regarding the effectiveness of various types of assessment for specific educational purposes. Prereq: EDP/EPE 557 or EDC 522 and basic course in educational tests and measures (e.g., EDP/EPE/EDC 522 recommended). The course will be conducted in an either an online or face-to-face format, depending on the semester and instructor. (Same as EDC 540/EPE 560.)

EDP 570 INTRODUCTION TO PSYCHOLOGICAL SERVICES IN SCHOOLS. (3)
A review of the historical development and models of organization and administration in the field of school psychology and the relationship between school psychology and other educational and psychological specialties. Prereq: Admission to School Psychology Program or consent of instructor.

University of Kentucky
2019-2020 Undergraduate Bulletin
478

KEY: # = new course * = course changed † = course dropped
EDP 600 LIFE SPAN OF HUMAN DEVELOPMENT AND BEHAVIOR. (3)
This course is designed to meet the needs of graduate students in the College of Education for a course in theory and principles of developmental theories of individuals across the lifespan. Lifespan developmental psychology is a study of how and why people change over time as well as how and why they remain the same from conception through the aging process. The course is described through three perspectives: physical, cognitive, and psychosocial. Emphasis will be on the major transitions from infancy through young adulthood in the physical, cognitive, social, moral and emotional domains. The impact of ethnic, gender, and cultural factors on development will also be examined.

EDP 603 HUMAN COGNITIVE DEVELOPMENT. (3)
Theory and research concerning the development of attitudes, motives, self-concept and other cognitive processes are presented and the educational implications explored. Prereq: EDP 548 or EDP 610 or EDP 600.

EDP 604 LIFE SPAN GENDER DEVELOPMENT. (3)
An in-depth examination of theory, research, and personal attitudes concerning gender development over the lifespan. Interaction of gender with effective personal functioning in family, educational, and work-related settings. Prereq: EDP 600 and 601 or equivalent.

EDP 605 INTRODUCTION TO COUNSELING: TECHNIQUES I. (3)
A survey of counseling psychology, philosophy, procedures and practices. Consideration of the roles of counselor and counseling (theory, counseling models, the counseling interview, and counseling educational settings). In-depth training in initial counseling skills, interview (listening) and relationship building skills. Prereq: Acceptance to the graduate program in counseling psychology with the following major codes: RECO, ECGO, CPEC, ECPY, ECPC, CNPS, ESPP, ESPY, ECPS, or consent of instructor via permit.

EDP 606 COUNSELING PSYCHOLOGY PROFESSIONAL IDENTITY, ISSUES, AND RESEARCH METHODS. (3)
Foundational doctoral seminar in counseling psychology. Addresses professional identity, historical perspectives, training issues, and current issues in counseling psychology. Provides an introduction to counseling psychology research methodology related to evidence-based practice. Prereq: Enrollment in the doctoral program in counseling psychology.

EDP 610 THEORIES OF LEARNING IN EDUCATION. (3)
Consideration of the theoretical origins of learning within the context of education. Topics include major theories of learning, physiological bases for learning, relationships between learning theory and instruction, and major applications of learning theories in educational settings.

EDP 614 MOTIVATION AND LEARNING. (3)
This course will provide a review of current educational and psychological theories of motivation. After examining various theories (e.g., attributions, goals, self efficacy, expectancy, X value), the course will examine applications of these theories to contemporary issues such as violence, substance abuse, dropping out of school, health maintenance, etc.

EDP 615 PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)
A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in department of Psychology or department of Educational and Counseling Psychology. (Same as PSY 620.)

EDP 616 MULTICULTURAL PSYCHOLOGY. (3)
This course is designed to increase one's sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one's skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as AAS 616.)

EDP 620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EP E620/ SOC 622.)

*EDP 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE/ANT 620; and consent of instructor. (Same as ANT/ E621.)

*EDP 622 SUPERVISION IN SCHOOL PSYCHOLOGY I: THEORETICAL MODES OF PRACTICE. (3)
The objectives of this seminar include 1.) Students will be able to demonstrate knowledge of supervision models and practice, 2.) Students will be able to identify and articulate a personal supervision model, 3.) Students will be able to apply their personal supervision model, and 4.) Students will be able to identify areas of growth and areas in need of improvement with respect to their professional supervision skills. Students will work with second year school psychology students as “Supervisors in Training” to build their knowledge and skill-based competencies in supervision. Prereq: Enrollment in PHD program in School Psychology.

KEY: # = new course  * = course changed † = course dropped
EDP 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)
This is a statistics-oriented course that focuses on various aspects of regression analysis (general and special models). Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with and without interaction/moderation terms, with/without nonlinear terms, contrast variable coding for categorical predictors, nested model comparison for hierarchical regression, etc.), regression diagnostics (outlying and influential cases identification and assessment, collinearity evaluation, residual analysis, etc.), logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), among other things. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) for the data in hand, and interpreting regression analysis results using the right language. Students will gain requisite knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals and the mass media. Students will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, Stata, or R). Prereq: EPE/EDP 558 or consent of instructor. (Same as EPE 660.)

EDP 661 TECHNIQUES OF COUNSELING II. (3)
Practice in interviewing, simulated problems, observational techniques, role of the counselor. Study of films, tapes and transcripts of leading practitioners of several schools of counseling. Supervised practice with selected clients. Lecture, two hours; laboratory, two hours. Prereq: EDP 652, PSY 535 (both with a grade of "B" or better), and consent of instructor.

EDP 662 DOCTORAL PRE-PRACTICUM SEMINAR. (1)
Preparation for UK Counseling Center Doctoral Level practicum will include starting to develop an integrative understanding of theory, assessment, ethics, and practice as it relates to effective work with university students. The course introduces the application of mental health laws, and ethical decision-making models. Prereq: EDP 605 and 661, or consent of instructor.

EDP 663 PRE-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (1-6)
Supervised experience in application of diagnostic and interviewing techniques in a counseling service. May be repeated to a maximum of 12 credits. Lecture, three hours; laboratory, eight hours per three credit hours. Prereq: All required counseling coursework. EDP 605, PSY 535 or equivalent, EDP 652, EDP 668, and EDP 661 (minimum competency courses with grades of "B" or better), application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 664 POST-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (3-6)
Supervised experience in application of diagnostic and interviewing techniques in a counseling service. Prereq: PSY 535 or equivalent, EDP 605, EDP 652, EDP 661, EDP 669, and EDP 668 or equivalent (both with grades of "B" or better). Application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 665 POST-MASTERS PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)
Supervised experience in application of diagnostic and interviewing techniques in a counseling service. Prereq: PSY 535 or equivalent, EDP 605, EDP 652, EDP 661, EDP 669, and EDP 668 or equivalent (both with grades of "B" or better). Application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 666 PSYCHOEDUCATIONAL STRATEGIES OF INTERVENTION. (3)
A general review of the development of basic competence in the major intervention strategies applicable to the amelioration of children’s common learning and adjustment difficulties in the school setting. Prereq: EDP 640, EDP 669 and Admission to School Psychology Program.

EDP 671 SEMINAR IN PSYCHOEDUCATIONAL CONSULTATION IN SCHOOLS. (3)
A study of the rationale and techniques used in consultation with teachers, parents, administrators and other school personnel for the purpose of both preventing and alleviating the learning and adjustment difficulties of individual or groups of school-aged children. Prereq: Admission to School Psychology Program, advanced standing in a professional educational program or permission of the instructor.

EDP 674 SCHOOL-BASED PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)
Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a school setting. Requires minimum three hours of on-site activities per credit hour. Students will have a primary supervisor at their school site. Students will attend class meetings in a didactic format. Students will have a university supervisor who will serve as a secondary supervisor and communicate and coordinate on-going communication with the school-based supervisor. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 675 PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)
Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a school setting. Requires three hours of on-site activities per credit hour and weekly supervision meetings. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)
This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales, scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EPE/EDP 660, EPE 621, or equivalent. (Same as EPE 679.)

EDP 680 PARENT AND CHILD COUNSELING. (3)
Theories, methods, and techniques of counseling psychology as applied to planned interventions with parents and their children. Contemporary approaches to family and child dysfunctioning are studied within a framework of human development; applied practice utilizing simulated problems. Prereq: EDP 652 and EDP 661 (both with a grade of "B" or better) or consent of instructor.

EDP 683 TOPICS IN COUNSELING PSYCHOLOGY. (1-3)
Supervision and consultation with groups and organizations. Seminar, one hour, fifteen minutes. Prereq: Approval for doctoral-level practicum at UK Counseling & Testing Center.

EDP 688 ETHICAL AND LEGAL ISSUES IN PSYCHOLOGY. (3)
Preparation for certification as a professional counselor, counselor supervisor, or counselor educator. Emphasis will be on the interpretation and application of the ethical standards and laws of the American Counseling Association. Students will have the opportunity to critically examine the psychology of sex therapy from an intersectional perspective. The course will cover sexual functioning, as well as cultural scenarios, interpersonal scripts, and intrapsychic scripts related to sex therapy from various social locations. This course will also explore the psychophysiology of sex and attachment in sexual relationships and focus special attention to culturally competent, intersectional sex therapy interventions.

EDP 702 SEX PSYCHOLOGY: INTERSECTIONAL SEX THERAPY PRACTICE. (3)
To prepare counseling psychology scientist-practitioners and other mental health professionals from a social justice framework, this course is designed to provide students with an opportunity to critically examine the psychology of sex therapy from an intersectional perspective. The course will cover sexual functioning, as well as cultural scenarios, interpersonal scripts, and intrapsychic scripts related to sex therapy from various social locations. This course will also explore the psychophysiology of sex and attachment in sexual relationships and focus special attention to culturally competent, intersectional sex therapy interventions.

EDP 703 SEMINAR IN CLINICAL SUPERVISION AND CONSULTATION. (1-3)
An advanced seminar covering theories, issues, methods and techniques used in supervision of counseling and psychotherapy and in consultation with groups and organizations. Seminar topics will vary depending on the interests of the professor and students. May be repeated to a maximum of six credits. Prereq: EDP 652, EDP 661, and EDP 665 or equivalent.

EDP 704 SOCIAL JUSTICE CONSULTATION AND EVALUATION. (3)
This course focuses on theoretically grounded social justice consultation and evaluation in counseling psychology. The purpose of this course is to help students develop beginning competencies in social justice consultation, advocacy, and program evaluation as counseling psychologists. Doctoral students in counseling psychology will practice beginning skills in interprofessional collaboration and community partnership. Prereq: Students can enroll once they have completed the first year of the counseling psychology doctoral program.
course descriptions
EED 549 STUDENT TEACHING IN SPECIAL EDUCATION. (3-12)
Supervised student teaching experience utilizing the special techniques used in working with individuals with exceptional educational problems such as speech handicaps, physical handicaps, visual impairments, hearing disabilities, neurological impairments (learning disabilities), mental retardation, and the gifted. To be offered only on a pass-fail basis. Prereq: Must complete the published College requirements for admission to student teaching; admission to the Teacher Education Program or permission of instructor.

#EEDS 501 UNIVERSAL DESIGN FOR LEARNING (UDL). (3)
With the increase in diversity in education and the global economy, it is critical that students, staff, and faculty have experience in Universal Design for Learning (UDL). UDL calls for materials that address the majority of individual needs and are accessible from the very beginning. This requires a change in thinking from a traditional one-size-fits-all education and training philosophy to one that provides greater flexibility, providing multiple means of engagement, multiple means of representation, and multiple means of action and expression, in order to promote more purposeful and motivated, resourceful and knowledgeable, and strategic and goal-directed learners.

The course will be founded in current practices and literature applicable to UDL. Learners will be encouraged to use current and innovative technologies and tools to develop course content that exemplifies best practices, including UDL principals, accessibility standards/regulations, and Quality Matters.

EEDS 513 LEGAL ISSUES IN SPECIAL EDUCATION. (3)
A review of pertinent legislation concerning human and constitutional rights related to persons with disabilities. Teachers’ specific responsibilities and liabilities are described and related to current requirements of appropriate educational programs. Emphasis is given to how, through active parent participation, teachers can facilitate each student’s developmental progress. Prereq: EEDS 375 or consent of instructor.

EEDS 514 INSTRUCTIONAL TECHNOLOGY IN SPECIAL EDUCATION. (3)
An overview of ways technology can be used to facilitate the education of students with disabilities. Topics include personal computer operation, personal productivity tools, instructional software evaluation and integration into the curriculum, multimedia applications, telecommunications, and emerging technologies. Lecture; three hours; laboratory; two hours per week. Prereq: EDP 203.

EEDS 516 PRINCIPLES OF BEHAVIOR MANAGEMENT AND INSTRUCTION. (3)
Basic principles of applied behavior analysis and modification which employ social learning theory and operant conditioning models are taught. Emphasis is placed on designing individualized learning environments, selecting and implementing behavior management strategies, and analyzing behavior objectives, and performing task analyses. Prereq: EEDS 375 or permission of the instructor.

EEDS 517 ASSISTIVE TECHNOLOGY IN SPECIAL EDUCATION. (3)
This course is designed to enable students to critically discuss issues relating to the educational, psychosocial, medical, and therapeutic aspects of teaching students with specific cognitive, physical, and sensory disabilities and health impairments. Students will learn to use assistive technology. This will include selecting appropriate adaptive devices /strategies, programming for their use in an educational setting, and identifying professionals who support these selections. The conceptual underpinning of the course is based on the Human Function Model which identifies education workers to assist with the array of existence; communication; body support, alignment and positioning; travel and mobility; education and transition; environmental adaptation; and sports, recreation, and leisure. Prereq: EDP 203 or EEDS 375 or equivalent; or permission of the instructor. Coreq: EEDS 301.

EEDS 518 BEHAVIOR MANAGEMENT IN APPLIED SETTING. (3)
Principles of behavior analysis will be used to determine behavioral functions and intervention development for students exhibiting challenging behaviors within the schools. The course will focus on the key tenants of functional behavioral assessments and behavior intervention planning, with special attention to the provisions of indirect services to students. Field experiences are required as part of this course. Coreq: EEDS 401 or permission of instructor.

EEDS 522 CHILDREN AND FAMILIES. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as IEC 522.)

EEDS 526 INTRODUCTION TO SPECIAL EDUCATION ASSESSMENT AND PROGRAM PLANNING. (3)
This course provides an overview to the procedures used in determining special education eligibility and subsequent program planning for students with disabilities. Emphasis is placed on understanding various assessment processes, instruments, norm-referenced and curriculum-based scores, and individualized educational program planning. Prereq: EEDS 375, EEDS 513, and EEDS 516.

EEDS 528 READING AND LANGUAGE ARTS ASSESSMENT AND METHODS FOR STUDENTS WITH MILD TO MODERATE DISABILITIES. (3)
EEDS 528 focuses on diagnosing and evaluating individualized reading and language arts programs based on the educational characteristics of children with learning and behavior disorders in elementary and secondary school. This course also addresses the procedures needed for assessing the educationally relevant strengths and weaknesses in reading and language arts using informal and formal evaluation measures. Prereq: Admission to Teacher Education Program, EEDS 570, EEDS 516, and/or permission of the instructor. Coreq: EEDS 401.

EEDS 529 MATHEMATICS ASSESSMENT AND METHODS FOR STUDENTS WITH MILD TO MODERATE DISABILITIES. (3)
EEDS 529 focuses on diagnosing and evaluating individualized mathematics programs based on the educational characteristics of children with learning and behavior disorders in elementary and secondary school. This course also addresses the procedures needed for assessing the educationally relevant strengths and weaknesses in mathematics using informal and formal evaluation measures. Prereq: Admission to Teacher Education Program, EEDS 570, EEDS 516, and/or permission of the instructor. Coreq: Students must also be concurrently enrolled in EEDS 402.

EEDS 530 MODERATE AND SEVERE DISABILITIES. (3)
Special education issues with individuals exhibiting moderate to severe intellectual and developmental disabilities. A critical examination of contemporary research with regard to the educational, behavioral, developmental issues of individuals exhibiting moderate to severe intellectual and developmental disabilities. Issues and research describing the full educational inclusion and community integration of persons with moderate to severe intellectual and developmental disabilities will be addressed. Lecture; three hours. Prereq: Junior or graduate student status. Coreq: Should occur concurrently with EEDS 301; or permission of instructor.

EEDS 546 TRANSDISCIPLINARY SERVICES FOR STUDENTS WITH DISABILITIES: TRANSITION. (3)
This course is designed as an examination of the critical issues of transition from school to work and post-secondary education for students with disabilities. As such, this course is appropriate for both graduate students in special education and those in rehabilitation counseling. Given the increasing numbers of students with disabilities, including students with disabilities, who are attending post-secondary education programs, this course will provide equal emphasis to work and post-secondary education, as well as to other critical life domains (community living, recreations, social networks, financial and legal issues involved in transition). Finally, this course will address the broad spectrum of youth and young adults with disabilities — including students with the most significant disabilities as well as students with more mild disabilities. Prereq: EEDS 375 or permission of instructor.

EEDS 547 COLLABORATION AND INCLUSION IN SCHOOL AND COMMUNITY SETTINGS. (3)
This course will focus on inclusion of students with moderate to severe disabilities in all aspects of school and community life, with special consideration given to the individual student planning variables that must be addressed in meeting the needs of each school-age student and for preparing students to function effectively in both school and community settings. The course is designed to meet the needs of those pursuing certification in Moderate and Severe Disabilities and pursuing degrees in Elementary and Secondary Education, Vocational Rehabilitation, School Psychology, Social Work, Physical Therapy, Communication Disorders, and related disciplines. Prereq: Consent of instructor. (Same as RC 547.)

EEDS 548 CURRICULUM DESIGN FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)
This course is designed to expand student’s knowledge and skills in administering, interpreting, and utilizing a variety of assessment instruments and procedures (standardized and informal) for the purpose of program planning specifically for students with moderate and severe disabilities. Students will learn about transdisciplinary assessment processes and how to facilitate collaboration between the various related service providers when assessing students. Students will use assessment results to plan individualized instruction for students using a transdisciplinary model. Prereq: Admission to Teacher Education Program, EEDS 516, EEDS 530, or permission of the instructor; coreq: students enrolled in this course must also be concurrently enrolled in EEDS 402.

EEDS 549 METHODS FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)
This course is designed to introduce students to instructional strategies typically used with students classified with moderate and severe disabilities. Throughout the semester, course participants will be presented with information on how to organize and present instruction to students with moderate to severe disabilities across environments. The implementation of these skills is assessed through written products and classroom performance in school settings. Class meetings are two and one-half hours per week. Prereq: Admission to Teacher Education Program, EEDS 516. Coreq: Occurs concurrently with EEDS 401; or permission of instructor.

EEDS 550 STUDENT TEACHING: SPECIAL EDUCATION. (12)
Supervised student teaching in a classroom for students with disabilities utilizing contemporary curricula, assessments, methods, and materials designed for use with children exhibiting moderate severe developmental or intellectual disabilities and learning and behavior disorders. Student teachers are required to demonstrate attainment of the Kentucky Teacher Standards. Student teachers will be evaluated on these competencies by the university supervisor and the cooperating teacher. Prereq: Admission to the Teacher Education Program or permission of the instructor. Successful completion of all EEDS Core Moderate/Severe Disabilities (MSD) and Learning and Behavior Disorders (LBD) Certification Area course work. EEDS 550 is the final certification requirement in the special education teacher undergraduate program. Prior to entering this course, the special education major will have successfully completed all MSD and LBDA and EEDS CORE practica in a variety of learning environments serving the needs of children exhibiting moderate to severe intellectual or developmental disabilities and learning and behavior disorders.
EDS 588 BRAILLE CODES II. (3)
This course studies braille codes with a special emphasis on the Nemeth Code (Braille Mathematics and Technical Writing) and foreign languages (French, German, and Spanish) and computer braille. Braille formats will also be taught, including how to correctly transcribe and format materials for braille users, including preparing worksheets and tests for students. Competency in using the Crummer Abacus will also be mastered. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 585 ASSISTIVE TECHNOLOGY FOR STUDENTS WITH VISUAL IMPAIRMENTS. (3)
This course introduces a wide variety of technologies for people who are blind or visually impaired. Students will learn about Universal Design for Learning (UDL) as it relates to technology, as well as proprietary software and hardware. Technologies covered include, but are not limited to: Screen readers, screen magnification, electronic note takers, refreshable braille displays, braille interface programs, magnification hardware, scanning and OCR programs, and accessible digital book options. A wide variety of computers, tablets, and smart phone options will be explored. Instructional strategies for teaching technology skills will be emphasized. In-state students are required to attend class at the Kentucky School for the Blind in Louisville and will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the distance learning section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 586 EXPANDED CORE CURRICULUM FOR BLIND AND VISUALLY IMPAIRED. (3)
The Expanded Core Curriculum (ECC) is the body of knowledge and skills that are needed by students with visual impairments due to their unique needs. This course will explore all nine areas of the ECC including: compensatory or functional academic skills, orientation and mobility, social interaction, communication, sighted guidance, braille and other paper materials, technology, use of assistive technology, sensory efficiency skills and self-determination. Participants will have the opportunity to observe and work with students in a summer program and teach skills from the ECC. In-state students are required to attend class at the Kentucky School for the Blind in Louisville as well as complete practicum hours at various locations throughout the state. In-state students will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the distance learning section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 587 VISUAL IMPAIRMENTS AND MULTIPLE DISABILITIES. (3)
This course is designed to provide students with knowledge and skills necessary to design and implement programs for persons who have visual impairments and additional disabilities. Topics include assistive technology, augmentative and alternative communication, literacy instruction, sensory processing, adaptive behavior, and self-help skills. An emphasis will be placed on adaptations that enhance functioning for persons with developmental delays, autism, medical conditions, deaf-blindness, communication disorders, and those with common syndromes and eye disorders related to multiple disabilities. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 588 ASSESSMENT OF STUDENTS WITH VISUAL IMPAIRMENTS. (3)
This course covers various types of assessments used to evaluate students who are blind or visually impaired. Participants will discuss testing and assessment including the development of standardized tests and their applicability for individuals with visual impairments, as well as alternate assessments. Students will practice assessing and planning educational programs for students with visual impairments by completing a Functional Vision/Learning Media Assessment, as well as assessments in assistive technology and the Expanded Core Curriculum. This course is designed to be taken in conjunction with student teaching/internship in visual impairments. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 590 FIELD EXPERIENCES: MILD DISABILITIES. (3)
This course will provide pre-service teaching experiences with children having learning and behavioral disabilities. This course includes teaching experiences in a five-week public school block at least one different special education site. Approximately two hours lecture-discussion and two-three hour observations and/or practice per week. Prereq: EDS 513, 516, admission to the Teacher Education Program, or consent of instructor. Prereq: or concur: EDS 528. Must take EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).
Course Descriptions

EDS 611 CONTEMPORARY TRENDS AND ISSUES IN THE EDUCATION OF STUDENTS WITH MILD DISABILITIES. (3) This course examines trends and issues in the education of students with mild disabilities (e.g., learning disabilities, mild cognitive disability, ADHD, and emotional/behavioral disabilities). The professional literature is examined to identify emerging methods of effective instruction as well as points of controversy in identification, placement, and services. Prereq: EDS 529 and EDS 610 or consent of instructor.

EDS 612 ADVANCED PRACTICUM: SPECIAL EDUCATION. (1-6) Intensive clinical experience with exceptional children in day and resident schools, hospitals, and private agencies. Students engage in prescriptive teaching with persons with disabilities in individual, small group, and special class settings. Laboratory, 6-12 hours per week. Prereq: Graduate Standing; major in Special Education, Applied Behavior Analysis, or permission of the instructor.

EDS 613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION. (3) This course is designed as a required course for certification in the school administration program or elective in graduate or post baccalaureate degree. Essential course questions will emphasize the delivery of a free and appropriate public education for children with disabilities within a practical application format that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as well as the legal and programmatic implications for children with disabilities and their families. Finally, the course will model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administrator preparation program, or received permission of instructor.

EDS 614 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS I. (1) This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 615 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS II. (1) This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 616 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS III. (1) This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 630 ADVANCED METHODS FOR TEACHING STUDENTS WITH DISABILITIES. (3) An intensive study of the principles and procedures used in programming learning activities for students with disabilities, including those with autism spectrum disorders. Topical areas include the acquisition of stimulus control and programming for the generalization and maintenance skills. Lecture, three hours. Prereq: EDS 601 and consent of instructor.

EDS 631 ADVANCED PROGRAMMING FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3) Intensive review of instructional programs designed for use with students with moderate and severe disabilities, including autism spectrum disorders. Emphasis is on leadership in assessment and development of individual education programs for students. Lecture, three hours. Prereq: Consent of instructor.

EDS 632 ADVANCED PRACTICUM: MODERATE AND SEVERE DISABILITIES. (1-12) Intensive educational experience with students with moderate and severe disabilities in educational, residential and hospital settings. Site and practicum responsibilities will be based on students’ competencies and area of interest. May be repeated to a maximum of 21 credits. While enrolled in this course, students will be required to apply for the Teacher Education Program. Prereq: Admission to the Master’s program in Special Education or permission of the instructor.

EDS 633 SINGLE SUBJECT RESEARCH DESIGN. (3) Principles and methods in designing single subject research, including those involving students with disabilities. Students will be required to design a research proposal. Prereq: EDS 601 or 630 or consent of instructor.

EDS 634 LEADERSHIP IN SPECIAL EDUCATION. (3) Students will select from a variety of options that demonstrate leadership in the field of education. Between the course instructor and each student’s master’s committee, students will complete a variety of activities and experiences that will assist them in completing the capstone requirement. Prereq: EDS 601, 630, 633.

EDS 640 ADVANCED ASSISTIVE TECHNOLOGY. (3) An advanced study of assistive technology devices and services for individuals with learning, cognitive, physical, and sensory disabilities. The course includes lecture, hands-on experiences, and discussions of current trends and issues in assistive technology consideration and implementation for teachers, families, and administrators. Prereq: EDS 600 or equivalent or permission of instructor.

EDS 641 ASSISTIVE TECHNOLOGY ASSESSMENT. (3) A study of the evaluation of students with learning, cognitive, physical, and sensory disabilities for assistive technology devices and services. Students implement data-based assistive technology decisions for students with disabilities, locate assistive technologies through a variety of sources, and develop assistive technology implementation plans for individuals with disabilities. Prereq: EDS 640, or permission of instructor.

EDS 645 HYPERMEDIA DEVELOPMENT FOR SPECIAL EDUCATION. (3) Students will study ways that hypermedia/multimedia can be developed for use in special education programs. Students will examine how theories of human learning and principles of universal design provide a foundation for designing instructional programs that meet the unique needs of all students. Topics will include theories of human learning, principles of universal design, and hypermedia/multimedia concepts, interface design guidelines, computer graphics, digital scanning of images, accessible text, sound effects, use of digital movies, and multimedia authoring tools. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 647 SEMINAR IN SPECIAL EDUCATION TECHNOLOGY (Variable topic). (1-3) A topical seminar on technology applications in special education. Seminars will address different topics of timely interest, current issues, and various approaches to providing assistive technology and instructional technology services for people with disabilities. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 648 COORDINATING ASSISTIVE TECHNOLOGY PROGRAMS. (3) Students will study procedures for planning and implementing assistive technology programs in schools. Topics will include use of planning models, philosophy and mission development, generating program goals and objectives, procedures for preparing strategic plans, establishing policies and procedures, identifying resource requirements, managing program implementation, evaluation of program effectiveness, and preparation of proposals for funding. Prereq: EDS 640 and EDS 641 or permission of instructor.

EDS 649 ADVANCED PRACTICUM: SPECIAL EDUCATION TECHNOLOGY. (1-9) Students will engage in supervised practicum activities associated with the delivery of technology services to individuals with disabilities. Practicum settings may include schools, rehabilitation agencies, clinics, hospitals, technology resource centers, administrative offices, and other facilities involved in the development of technology services. May be repeated to a maximum of nine credits. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 650 INITIAL CERTIFICATION ADVANCED PRACTICUM IN MODERATE AND SEVERE DISABILITIES. (6) Supervised practicum experience in a classroom for students with moderate/severe disabilities utilizing contemporary curricula, assessments, methods, and materials designed for use with children exhibiting moderate-severe developmental or intellectual disabilities. This course is designed as an advanced practicum for students in the MSD program who are pursuing an initial certification at the graduate level. Practicum students will be evaluated on these competencies by the university supervisor throughout the semester. EDS 650 is offered on a letter grade basis only. Prereq: Published University, College and Departmental requirements (see appropriate section of the most recent UK Bulletin) admission to the Teacher Education Program or permission of instructor. Successful completion of all EDS Core and Moderate/Severe Disabilities (MSD) Certification Area course work. EDS 650 is the final certification requirement for students obtaining initial certification at the graduate level. Prior to entering this course, the MSD major will have successfully completed all MSD Area and EDS CORE practica serving the needs of children exhibiting moderate to severe intellectual or developmental disabilities. Students in this course will complete their assignments while working full time in a classroom for students with MSD.

EDS 651 DISTANCE EDUCATION: DELIVERY. (3) This course has been designed for those faculty or future faculty who plan to teach via distance education technology. This course will review current literature on how to deliver distance education content with attention to developing materials, setting delivery timelines, facilitating interactions, and using appropriate teaching strategies. Prereq: Master’s degree.
### Course Descriptions

**EDS 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT.**

(3)
This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master’s degree. (Same as C6152.)

**EDS 660 OVERVIEW OF CHARACTERISTICS AND INSTRUCTIONAL STRATEGIES FOR INDIVIDUALS WITH ASD.**

(3)
This course introduces students to the characteristics, classification systems, etiology and research, screening and assessment strategies/issues, approaches, and research-based interventions related to individuals with autism spectrum disorders. Practical classroom strategies, such as visual strategies and environmental arrangements will also be reviewed. The primary goal of the course is to provide students with a foundational knowledge of the strengths and needs characteristic of individuals with ASD, as well as to provide students with a comprehensive array of research-based instructional approaches for individuals with ASD, and to provide the criteria for determining which approach to use. Prereq: EDS 601.

**EDS 661 ADVANCED INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH ASD.**

(3)
This course builds on topics previously learned in EDS 660. Teachers will learn to critically analyze current trends, issues, and therapies used with individuals with ASDs. Practical classroom strategies detailing what to teach based on assessment results, how to use data-based decisions to guide instruction, and an overview of alignment to state standards based on alternate assessments will also be reviewed. The primary goal of the course is to provide teachers with a comprehensive array of practical research-based instructional approaches for individuals with ASDs, criteria for determining which approaches to use, and planning for access to the general education curriculum for all students across the spectrum. Completion of this course sequence (in combination with EDS 660, EDS 662, and EDP 671) will prepare teachers for applications in the ASD Institute (EDS 663). Prereq: EDS 601 and EDS 660.

**EDS 662 COMMUNICATION, AAC, and Technology for Individuals with Autism Spectrum Disorders.**

(3)
This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as CSD 649.)

**EDS 663 SERVING INDIVIDUALS WITH ASD INSTITUTE.**

(3)
Students will connect content knowledge with skills from courses taken in the Autism Certificate courses (EDS 660, EDS 661, EDS 662, and EDP 671). Students will demonstrate skills in areas such as implementing research-based strategies and/or behavior supports, collaborating for planning and delivery of instruction, working with diverse families and service providers, and evaluating appropriate technologies based on student needs. Students will demonstrate competency via role-play, case studies, video examples, and/or direct observation of individuals with ASD. Students will have an opportunity to learn from one another and experts in the field in a face-to-face format. Prereq: EDS 601 and EDS 660, EDS 661, EDS 662, EDP 671.

**EDS 701 SEMINAR FOR EDSRC LEADERSHIP PERSONNEL.**

(1)
Study of issues and topics affecting the preparation of Rehabilitation Counseling, Special Education, and Early Childhood personnel and of research issues involving persons with disabilities and educational and rehabilitation programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., Ed.D., or IEC Ph.D. Programs. (Same as IEC/RC 701.)

**EDS 710 SEMINAR IN MILD DISABILITIES.**

(3)
Advanced study of issues related to mild disabilities in children, including etiology, assessment, intervention, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

**EDS 711 SEMINAR IN MODERATE AND SEvere DISAbILITIES.**

(3)
Advanced study of issues related to moderate and severe disabilities, including problems of identification and assessment, program alternatives, curricula, theories, and contemporary research findings. Prereq: Admission to Ed.S or Ed.D. program in Special Education or consent of instructor.

**EDS 712 SEMINAR IN EDSRC PROFESSIONAL SERVICES.**

(3)
Education and Rehabilitation professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., Ed.D., or IEC Ph.D. Programs. (Same as IEC/RC 712.)

**EDS 713 DESIGNING CLASSROOM-BASED INTERVENTION RESEARCH IN SPECIAL EDUCATION.**

(3)
The purpose of this course is to acquaint students with methods for designing and conducting experimental and quasi-experimental intervention studies in school-based settings. Students will have the opportunity to conceptualize a study based on their interests and propose procedures for implementing it. Although knowledge of basic statistics would increase understanding, the substance of the course focuses primarily on designing studies that test for the presence of a distinct cause-and-effect relationship between variables.

**EDS 720 SEMINAR IN EDSRC TEACHER PREPARATION.**

(3)
Rehabilitation Counseling and Special Education college/university professor preparation, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 720.)

**EDS 721 PRACTICUM IN EDSRC PERSONNEL PREPARATION.**

(1-9)
Professional preparation of Rehabilitation Counselors or Special Education Teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising rehabilitation counselors or special education student teachers, and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S. or Ed.D. program in special education or consent of instructor.

**EDS 730 SEMINAR IN SPECIAL EDUCATION ADMINISTRATION.**

(3)
Administration of special education programs at the local and state levels. Emphasis is on program planning, staffing, fiscal management and program evaluation. Prereq: EDS 602 and admission to the Ed.S. or Ed.D. program in special education or consent of instructor.

**EDS 731 ADVANCED PRACTICUM: SPECIAL EDUCATION ADMINISTRATION.**

(1-9)
Supervised practicum experiences related to the administration of special education programs at the local and state levels, and project management, including staff management and development, program planning, evaluation, fiscal management, organization, reporting, communications, and coordination. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to the Ed.S. or Ed.D. program in special education or consent of instructor.

**EDS 748 MASTER’S THESIS RESEARCH.**

(0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**EDS 749 DISSERTATION RESEARCH.**

(0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**EDS 767 DISSERTATION RESIDENCY CREDIT.**

(2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 767.)

**EDS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**

(1-6)
May be repeated to a maximum of 12 hours.

**EDS 769 RESIDENCE FOR THE DOCTORAL DEGREE.**

(0-12)
May be repeated indefinitely.

**EDS 779 SEMINAR IN SPECIAL EDUCATION (Variable topic).**

(1-3)
Study of philosophy, principles, trends and research in education of exceptional children. Students will carry on an extensive study of a problem dealing with the exceptional child. May be repeated to a maximum of nine credits.

**EDS 789 INDEPENDENT STUDY IN EARLY CHILDHOOD/SPECIAL EDUCATION/REHABILITATION COUNSELING RESEARCH.**

(1-6)
An independent study supervised research course for advanced graduate students in Rehabilitation Counseling, Special Education, or Early Childhood with an interest in a specific research problem. Class hours determined with supervising instructor. Note: For Rehabilitation Counseling doctoral students this course will satisfy CACREP internship requirements in the Research core area. Additional internship in 2 additional core areas are also required. Prereq: Admission to EDSRC Doctoral Program or approval of instructor. (Same as RC 789.)

**EDU Education**

**EDU 300 SPECIAL COURSE.**

(1-9)
This course is an opportunity for experimental, topical or interdisciplinary experience for up to 9 hours of credit without creating a permanent course. The description and course subtitle will be submitted each time the course is offered. Subtitle required.
EDV 305 CONTEMPORARY ISSUES FACING THE AT-RISK SCHOOL-AGE/ADOLESCENT CHILD. (3)
To provide background information, experience, and skills for undergraduate students to interact with elementary and middle school children in a consulting role. Special emphasis will address the needs of the “at-risk” student population. The “at-risk” student is associated with families with incomes below the poverty level, as well as other significant problems which plague contemporary society—e.g., homelessness, child abuse/neglect, single parent homes, non-English speaking parents, fetal alcohol or substance abuse syndrome, mentally and/or physically handicapped parents or siblings, and high incidence of academic achievement declines and dropout rates. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

EDU 645 FOUNDATIONS OF PEDAGOGICAL THEORY AND PRACTICE IN THE SECONDARY SCHOOL. (0-9)
Students will participate with other secondary education majors in a variety of disciplines in the reflective study of the context of schooling, secondary school curriculum, school law, learning theory, learning styles, effective teaching and learning, instructional technology, working with special populations, cultural diversity in the schools, school context, and professional development. Students will spend time in the schools applying concepts. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDU 745 INTERDISCIPLINARY INSTRUCTION IN THE SECONDARY SCHOOL. (0-3)
Students will participate with other secondary education majors from a variety of disciplines in the reflective study of the context of schooling, classroom management, individual student differences, and professional development. Students will be in the schools applying concepts on a full-time basis. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDV Vocational Education

AGRICULTURAL EDUCATION
EDV 580 MATERIALS AND METHODS FOR TEACHING VOCATIONAL AGRICULTURE. (3)
Designed to develop teacher competency in methods of teaching with emphasis on the problem-solving procedure and use of demonstrations, field trips, and audiovisual materials. Evaluation of teaching-learning is emphasized. A study of facilities and instructional materials needed by a department of vocational agriculture is made. Prereq: Admission to the Teacher Education Program or permission of instructor.

BUSINESS EDUCATION
EDV 626 CLASSIFICATION AND POSSIBLE USE OF COMMUNITY RESOURCES IN BUSINESS EDUCATION. (3)
Course provides for community analysis, and the development of possible ways and means to supplement the business education course in the secondary school with a study of vital community resources.

VOCATIONAL EDUCATION
EDV 501 PRACTICUM IN VOCATIONAL EDUCATION. (1-12)
Planned and supervised practicum in teaching agriculture, business, home economics and vocational industrial education at middle and high school levels. Requires the integration of observation skills, application of instructional objectives, teaching strategies, selection of instructional materials, assessment of student progress, and use of student organizations. Regularly scheduled seminars included as an integral part of course. Open only to students in the master’s degree combined with initial teaching certification program. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

EDV 520 THE ADULT LEARNER IN VOCATIONAL SETTINGS. (3)
An overview of adult education practices and their relevance to adult learning in the work setting. Prereq: EDV 211 or consent of instructor.

EDV 535 PRINCIPLES AND PHILOSOPHY OF VOCATIONAL EDUCATION. (2-3)
Study is made of philosophy, accepted principles, and legislation affecting programs in vocational education. May be repeated to a maximum of six credits.

EDV 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

EDV 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EE Electrical Engineering

EE 101 CREATIVITY AND DESIGN IN ELECTRICAL AND COMPUTER ENGINEERING. (3)
This course provides an introduction to the process and application of creative design and problem solving within science and engineering. Emphasis is placed on applications and case studies in the areas of electrical and computer engineering. Several laboratory-based engineering problems are used to provide practical settings in which to apply and evaluate constraint-and product-focused strategies for creative design and problem solving. In addition to technical and aesthetic considerations, ethical and cultural influences on the creative process will also be discussed.

EE 167 FUNDAMENTALS OF NANOTECHNOLOGY AND APPLICATIONS IN RENEWABLE ENERGY. (3)
In 6 lecture modules and 4 observational visits to laboratories on UK campus, this course covers: effects of small size (1 nm to 100 nm) on the electro-optical properties of materials; fundamental principles of quantum mechanics; applying quantum mechanics to understand the changes in material properties like color, luminescence and electrical conductance at nanoscale; operating principles, basic theory and design issues in solar cells; nanotechnology applications for enhancing the performance of renewable energy generation and storage systems, especially solar cells and batteries. Prereq: Proficiency in mathematics, physics and chemistry at the high school graduate level.

EE 211 CIRCUITS I. (4)
Fundamental laws, principles and analysis techniques for DC and AC linear circuits whose elements consist of passive and active components used in modern engineering practice including the determination of steady state and transient responses. In addition to the required text book, additional materials including a portable Oscillator & Signal Generator, a digital Multimeter, an electronics-part kit, and a simulation software are required for at-home laboratory assignments. Prereq: MA 114, prereq or concurrent; PHY 232, 242.

EE 221 CIRCUITS II. (3)
Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project involving modern design practices. Prereq: EE 221. Concur: MA 214.

EE 222 ELECTRICAL ENGINEERING LABORATORY I. (2)
Laboratory exercises in the use of measuring instruments. Experiments in R-L-C circuit analysis. Lecture, one hour; laboratory, three hours. Prereq or concur: EE 221.

EE 223 AC CIRCUITS. (4)
Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project and laboratory experiments involving modern design practices. Prereq: EE 211, Concur: MA 214.

EE 280 DESIGN OF LOGIC CIRCUITS. (3)
Boolean algebra; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using standard integrated circuits. Prereq: CS 115 or EGR 102.

EE 281 LOGICAL DESIGN LABORATORY. (2)
A laboratory involving the design and implementation of logic circuits. Combinational and sequential (both synchronous) design examples using small and medium scale integrated circuits. Lecture, one hour; laboratory, one three-hour session. Prereq: EE 280.

EE 282 DIGITAL LOGIC DESIGN. (4)
Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Prereq: EGR 102 or equivalent programming course. (Same as CPE 282.)

EE 287 INTRODUCTION TO EMBEDDED SYSTEMS. (4)
Introduction to Embedded Systems teaches students how to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, programming, and interfacing and lab projects will back up that theory with hands-on design experiments using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/O, and basic real-time processing. Prereq: EE/CPE 282 and prerequisite or concur: CS 215 or consent of instructor. (Same as CPE 287.)

EE 305 ELECTRICAL CIRCUITS AND ELECTRONICS. (3)
A service course covering electrical engineering principles for engineering or science students with majors outside of electrical engineering. Topics include: AC and DC circuits analysis. Prereq: MA 114, PHY 232.
Course Descriptions

EE 360 INTRODUCTION TO SEMICONDUCTOR DEVICES. (3)
Electronic properties of solid-state materials and calculation of charge carriers in semiconductors; structure and physical model of p-n junctions and various diode devices, bipolar transistors, field effect transistors; semiconductor fabrication technologies and microelectronics manufacturing issues. Prereq: PHY 232 and CHE 105.

EE 380 COMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: Engineering standing, CS 215 and EE/CPE 282 or EE 280. (Same as CPE 380.)

EE 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)
A course in the hardware and software of microprocessors. Assembly language programming, addressing concepts, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using a microprocessor hardware. Prereq: EE 280 and EE/CSE 380. (Same as CS 383.)

EE 391 UNDERGRADUATE RESEARCH EXPERIENCE. (1)
Research project activity led by an engineering faculty member, designed to provide students research experience. Completion of this course requires that the student submit a report overviewing activities of the student and summarizing the experience. Course may be repeated to a maximum of three credit hours. Prereq: Submission of approved learning plan and approval of department.

EE 395 INDEPENDENT WORK IN ELECTRICAL ENGINEERING. (1-6)
Special research and problems for individual students who are capable of pursuing independent investigations. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EE 396 COMMUNITY OR CAMPUS EXPERIENTIAL LEARNING. (1)
This course credit recognizes extensive involvement by a student in a campus organization or community organization. This involvement may be leadership or responsibility for significant substantial portions of a project or event. Enrollment in this course requires a Learning Plan developed by the student and a faculty advisor (such as the organization faculty advisor, for campus organizations). The Learning Plan must be approved by the Director of Undergraduate Studies. The plan should include a list of learning objectives, and a list of readings or other curricular materials that will be read related to the experience. Successful completion of the course requires that the student submit a report, covering an overview of activities and responsibilities of the student during the experience, and a reflective statement on lessons learned during the experience. These lessons learned may be in regards to leadership, team interactions, project management, or technical aspects of a project. The report must be approved by the designated advisor and the DUS, or his/her delegate. Course may be taken on a pass-fail basis only and may be repeated to a maximum of three credit hours. Prereq: Submission of acceptable learning plan and approval of department.

EE 402G ELECTRONIC INSTRUMENTATION AND MEASUREMENTS. (3)
Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, the theory of operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, three hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as PHY 402G.)

EE 415G ELECTROMECHANICS. (3)
Study of electric machines and electromechanical systems. Prereq: Engineering standing, EE 221 with a C or better, and PHY 232.

EE 416G ENERGY CONVERSION LABORATORY. (2)
Laboratory practice and experimental studies related to EE 415G. Lecture one hour; laboratory, three hours. Prereq or concour: EE 415G.

EE 421G SIGNALS AND SYSTEMS. (3)
An introduction to continuous and discrete signal and system models and analyses. Topics include discrete and continuous convolution, Fourier transforms, and Laplace transforms and Z-transforms with applications examples including AM modulation and the sampling theorem. Prereq: Engineering standing, MA 214 and a C or better in EE 221.

EE 422G SIGNALS AND SYSTEMS LABORATORY. (2)
Lectures and laboratory exercises on signal and systems modeling. Topics include noise models and analysis, filter design, modulation techniques, sampling, discrete Fourier Transforms, State Variable Models, and feedback design with an emphasis on using computer software for analysis and simulation. Prereq: EE 421G, MA 320.

EE 461G INTRODUCTION TO ELECTRONICS. (3)
Analysis and design of electronic circuitry incorporating nonlinear electronic elements such as transistors, FET’s, and vacuum tubes. Applications to amplifiers. Prereq: Engineering standing and a grade of C or better in EE 221.

EE 462G ELECTRONIC CIRCUITS LABORATORY. (2)
Experimental exercises in the design and analysis of useful electronic circuits incorporating semiconductor devices: transistors, tunnel and Zener diodes; also, vacuum tubes, integrated circuits and operational amplifiers. Lecture, one hour; laboratory, three hours. Prereq: EE 222 and EE 461G.

EE 468G INTRODUCTION TO ENGINEERING ELECTROMAGNETICS. (4)
Applications of electromagnetic theory; electrostatic and magnetostatic fields; Maxwell’s field equations; plane waves; transmission lines and waveguides; antennas and radiation. Prereq: Engineering standing and MA 213; prereq or concour: EE 221.

EE 480 ADVANCED COMPUTER ARCHITECTURE. (3)
This course focuses on advanced computer architecture and low-level system software. Topics include microprocessors, computer architecture and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CSE/EE 380. (Same as CPE 480 and CS 480G.)

EE 490 ECE CAPSTONE DESIGN I. (3)
The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacturing are included, including considerations of economics, safety, and communication. Students are expected to formally propose a design project that includes a problem definition that incorporates engineering standards and realistic constraints. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: EE/CPE 490 completed in the previous semester and Engineering standing. (Same as CPE 491.)

EE 491 ECE CAPSTONE DESIGN II. (3)
The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: EE/CPE 491. (Same as CPE 490.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EE 503 POWER ELECTRONICS. (3)
Study of solid-state power electronic devices and their applications. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. Prereq: EE 415G and EE 461 or consent of instructor.

EE 511 INTRODUCTION TO WIRELESS COMMUNICATIONS. (3)
An introduction to the basic signal processing operations in communications systems. Topics include frequency and time domain signal and system representation, random signals, modulation, sampling, pulse modulation, information theory. Prereq: EE 421G, MA 320, and engineering standing.

EE 512 DIGITAL COMMUNICATIONS SYSTEMS. (3)
A treatment of the basic signaling concepts involved in the communication of digital information. Topics include transmission requirements and distortion of digital signals; discrete amplitude, frequency, and phase modulation; error control coding. Prereq: EE 421G, EE 422G, engineering standing or consent of instructor.

EE 513 AUDIO SIGNALS AND SYSTEMS. (3)
An introduction to digital signal processing and classification methods for audio signals. Topics include signal analysis and system design using correlation functions, power spectra, difference equations, and transfer functions; implementations of filters, classifiers, and audio effects; characteristics and modeling of common audio signals such as speech, music, and noise. Prereq: EE 422G, engineering standing.

EE 517 ADVANCED ELECTROMECHANICS. (3)

EE 518 ELECTRIC DRIVES. (3)
Introduction to common power electronic converters used in electric motor drives. Steady-state analysis methods for electric machines fed by power conditioning converters. Performance prediction of electric machines by electromagnetic field theory and by coupled oil models. Prereq: EE 415G, EE 421G, and engineering standing.

EE 521 INTRODUCTION TO WIRELESS COMMUNICATIONS. (3)
Study of analog RF electronics for wireless communications through a combination of course and laboratory work. Topics covered in the course include: modulation/demodulation, filters, RF transformers, mixers, transistor switches and amplifiers, class A, AB, AB, C, D, E, and F amplifiers, quartz crystals, transmission lines, impedance inverters, acoustic, oscillators, audio circuitry, noise and inter-modulation, and antennas. Prereq: EE 422G, engineering standing.

EE 522 ANTENNA DESIGN. (3)
Principles of radiation, potential solution to Maxwell’s equations for current in empty space, electrically small antennas, antenna arrays, wire antenna principles, introduction to numerical methods, aperture antennas, frequency scaling antennas, receiving properties of antennas, wire antenna principles, and applications. Prereq: EE 422G, engineering standing.

EE 523 MICROWAVE CIRCUIT DESIGN. (3)
Physical and mathematical descriptions of wave propagation in guided structures; microstrip lines; microstrip integrated circuits; passive components; two-terminal devices, four-terminal devices, S-parameter concepts, equivalent circuit concepts, solid state microwave amplifiers and oscillators. Prereq: EE 468G and engineering standing.

University of Kentucky 2019-2020 Undergraduate Bulletin
Course Descriptions

EE 524 SOLID STATE PHYSICS. (3)
Introductory solid state physics with emphasis on the properties of electrons in crystals; crystal structure, crystal defects, reciprocal lattice, lattice vibrations and phonons, free electron theory, energy bands in solids, semiconductors. Prereq: PHY 520, or consent of instructor. Engineering standing required for EE 524. (Same as PHY 524.)

EE 525 NUMERICAL METHODS AND ELECTROMAGNETICS. (3)
This course covers the basics of numerical methods and programming with applications in electromagnetics. Examples range from statics to radiation/scattering problems involving numerical solutions to integro-differential and finite difference equations. Prereq: EE 468G and engineering standing, or consent of instructor.

EE 526 LEAN OPERATIONS MANAGEMENT. (3)
This course will cover topics in basic lean system operations as well as the management system to support the attainment of highest customer satisfaction with respect to Safety, Quality, Cost, Productivity, Delivery and Human Resource Development. Working in teams, students apply fundamental lean tools and concepts to develop a lean operations environment capable of driving continuous improvement in a simulated factory. As the operational environment evolves, key management principles and tools are explored using the teachings of Taiichi Ohno and others considered to be the pillars of the Toyota Production System. All students must have a webcam and microphone or headset to participate in on-line team and class meetings. Prereq: Enrollment restricted to junior-level or above students. Prior enrollment in the Lean Student certificate course or MFS 503 is required or with the consent of the instructor. (Same as ME 526/MFS 526.)

EE 527 ELECTROMAGNETIC COMPATIBILITY. (3)
Design of electronic systems to minimize 1) emission of electromagnetic signals that cause interference in other electronic systems, 2) the susceptibility of that system to electromagnetic signal from other electronic systems, and 3) the susceptibility of that system to its own, internally generated signals. A set of brief laboratory experiments demonstrate the design principles and provide familiarity with modern test equipment. Prereq: EE 468G and engineering standing.

EE 528 AUTOMOTIVE BODY WELDING. (3)
The objective of this course is to introduce students to automotive Body Production Engineering (BPE). The course will introduce students to the joining methods to produce subassemblies and the main body assembly. The course will cover joining methods, joining theory, quality assessment, and design of experiment to prove welding joints. Prereq: Engineering Standing and enrollment in the Production Engineering Certificate.

EE 531 ALTERNATIVE AND RENEWABLE ENERGY SYSTEMS. (3)
Study of non-traditional, electric generating systems, and the use of renewable energy sources. Energy sources include solar, wind, hydro, and biomass/biogas. Generating technologies include both inverter based equipment and rotating machinery. Prereq: EE 415G, Engineering Standing or consent of instructor.

EE 532 SMART GRID: AUTOMATION AND CONTROL OF POWER SYSTEMS. (3)
This course covers introduction to smart grid, key technologies in transmission and distribution systems that enable smart grid, power market structure, and real time pricing. Prereq: Engineering standing, or consent of instructor.

EE 533 ADVANCED POWER SYSTEM PROTECTION. (3)
This course teaches philosophies for protecting power systems, covers microprocessor based relays, and provides projects on relay setting and relay testing. Prereq: Engineering standing, or consent of instructor.

EE 535 POWER SYSTEMS: GENERATION, OPERATION, AND CONTROL. (3)
This course covers essential aspects of the energy management system of power systems. Will cover topics: power system economics, state estimation, power system stability, power quality, and fault location. Prereq: EE 537 or concurrent, and Engineering Standing.

EE 536 POWER SYSTEM FAULT ANALYSIS AND PROTECTION. (3)
This course teaches computer based methods for performing fault analysis of power systems, and principles for protecting power systems. Prereq: EE 537, or concurrent, and Engineering Standing.

EE 537 ELECTRIC POWER SYSTEMS I. (3)
A study of power flow, elements of power factor correction, the one-line diagram, the per-unit system, transformer modeling, generator modeling, transmission line modeling, transmission line performance calculations from equivalent circuits, and general methods for network calculations. Prereq: Engineering standing, or consent of instructor.

EE 538 ELECTRIC POWER SYSTEMS II. (3)
Introduction to modern power system practices, basic transient and steady-state stability analysis with emphasis on digital techniques. Prereq: Engineering standing and consent of instructor.

EE 539 POWER DISTRIBUTION SYSTEMS. (3)
Study of electric utility distribution power systems. Topics include configurations, equipment, customer class data, load flow, phase balancing, capacitor placement, system protection, power quality, and distributed generation. Prereq: EE 537, engineering standing or consent of instructor.

EE 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)
Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as BAE 543/EGR 543.)

EE 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)
Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 211, EE 305, or equivalent. (Same as EGR 546.)

EE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3)
This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as ME/MSE 555.)

EE 560 SEMICONDUCTOR DEVICE DESIGN. (3)
Theory, development and discussion of equivalent circuit models of transistor devices, negative resistance, semiconductor devices and integrated electronic processes in solid state elements. High and low frequency, as well as the Ebers-Moll and charge control switching models and their application in computerized electronic circuit analysis will be developed. Prereq: EE 461G or equivalent, and engineering standing.

EE 562 ANALOG ELECTRONIC CIRCUITS. (3)
Feedback amplifiers, tuned and untuned amplifiers, oscillators, AM and FM transmitters. Prereq: EE 360, EE 461G and engineering standing.

EE 566 ENGINEERING OPTICS. (3)
Fundamentals of geometrical and physical optics; applications as related to problems in engineering design and research, details of some optical measurement techniques; introduction to lasers and laser techniques for determining optical properties. Prereq: Engineering standing. (Same as ME 560.)

EE 567 INTRODUCTION TO LASERS AND MASERS. (3)
Basic principles of laser action; atomic transitions; population inversion; two and three level systems; optical resonators; pumping methods; applications. Prereq: EE 360, EE 468G, or PHY 417G, or consent of instructor. (Same as PHY 567.)

EE 568 FIBER OPTICS. (3)
The course presents theory and practice related to (a) fiber optic cable and their fabrication, (b) fiber optic transmitters and detectors, (c) fiber optic communication systems and (d) fiber optic remote sensors. Prereq: EE 468G. (Same as MSE 568.)

EE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)
Study of packaging systems which interconnect, support, power, cool, protect, and maintain electronic components. The course will address systems at the chip, board, and product levels. Topics include design, properties, materials, manufacture, and performance of various packaging systems. Laboratory will provide familiarity with design software and production equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of instructor. (Same as MSE 569.)

EE 570 FUNDAMENTALS OF NANOELECTRONIC DEVICES AND MATERIALS. (3)
Energy bonds in crystals, heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostructures; current topics in nanoscale devices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as ME/MSE 570.)

EE 571 FEEDBACK CONTROL DESIGN. (3)
System representation via transfer function and state variables, root locus analysis; Bode plots; compensation by root-locus and frequency response methods; state variable feedback; sensitivity analysis; tracking via output feedback; digital control systems. Prereq: EE 421G, EE 422G, engineering standing, and consent of instructor.

EE 572 DIGITAL CONTROL OF DYNAMIC SYSTEMS. (3)
Zero and first order hold, theory of analog to digital and digital to analog conversion. Z-transform analysis, discrete state variable analysis, discrete estimation techniques, error analysis of discrete systems. Prereq: EE 422G, engineering standing.

EE 575 INDUSTRIAL CONTROL. (3)
Control technologies for industrial and process control systems, including sensors, actuators, PLCs, and hydraulic and pneumatic control elements. Prereq: Engineering standing or graduate standing.

EE 576 CYBERSECURITY. (3)
This course focuses on technologies in protecting infrastructure, networks, programs and data from unintended or unauthorized access, change or destruction. It provides a survey of latest developments in cybersecurity through study of theoretical foundation and hands-on practical implementation. Topics include basic security technology, cryptography, security management, risk assessment, operations and physical security, software and network security, as well as ethical and legal issues. Prereq: CS 270 and EE 380 or consent of instructor.
Course Descriptions

EE 579 NEURAL ENGINEERING. Merging engineering with neuroscience. (3)
A multidisciplinary course combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movement design and development of controllers for robot function, proposal development and presentation. Prereq: EE 426C and Engineering standing or consent of instructor. (Same as BME 579.)

EE 580 EMBEDDED SYSTEM DESIGN. Embedded System Design covers the design and implementation of hardware and software for embedded computer systems. Topics include architectural support for embedded systems, power management, analog and digital I/O, real-time processing design constraints and the design of embedded systems using a real-time operating systems. Prereq: EE/CPE 387, EE/CPE 380, and Engineering standing or consent of instructor. (Same as CPE 580.)

EE 582 HARDWARE DESCRIPTION LANGUAGES AND PROGRAMMABLE LOGIC. (3)
A study of hardware description languages including netlists, VHDL and Verilog; their use in digital design methodologies including modeling techniques, design verification, simulation, synthesis, and implementation in programmable and fabricated logic media. Programmable logic topics include CPLD and FPGA architectures, programming technologies and techniques. Prereq: EE/CSE 380 and Engineering standing.

EE 583 INDUSTRIAL ENERGY UTILIZATION AND ASSESSMENT. (3)
This course considers energy use in industrial settings— including energy, flows and energy transformations. Students will learn methodologies for assessing, analyzing, and reducing energy use and cost in industrial facilities and auxiliary equipment. The content presented in this course is intended to be consistent with the US Department of Energy Industrial Assessment Center program methods. Students will learn how to perform energy assessments in real-engineering settings. Prereq: Engineering standing or consent of instructor. (Same as BAE 583/EGR 583/ME 583/MFS 583.)

EE 584 INTRODUCTION OF VLSI DESIGN AND TESTING. (3)
Introduction to the design and layout of Very Large Scale Integrated (VLSI) Circuits for complex digital systems; fundamentals of the VLSI fabrication process; and introduction to VLSI testing and structured design for testability techniques. Prereq: Engineering standing or consent of instructor. (Same as CPE 584.)

EE 585 FAULT TOLERANT COMPUTING. (3)
Students in this course study the theory and practice of fault-tolerant and dependable computing systems. The course will introduce sources of faults, error and failures in computer controlled systems and approaches to design masking and recovery techniques at the hardware, software, and systems level. Prereq: EE/CPE 380 and Engineering standing or consent of the instructor. (Same as CPE 585.)

EE 586 COMMUNICATION AND SWITCHING NETWORKS. (3)
Fundamentals of modern communication networking and telecommunications, data transmission, multiplexing, circuit switching networks, network topology routing and control, computer communication, packet switching networks, congestion control, frame relay, ATM switching networks, traffic and congestion control. Prereq: EE/CPE 282 and Engineering standing. (Same as CPE 586.)

EE 587 ADVANCED EMBEDDED SYSTEMS. (3)
An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and Engineering standing or consent of instructor. (Same as CPE-CS 587.)

EE 588 REAL-TIME COMPUTER SYSTEMS. (3)
This course covers features typically found in real-time and embedded systems. Topics include real-time operating systems, scheduling synchronization, and architectural features of single and multiple processor real-time and embedded systems. Prereq: EE/CPE 580 and Engineering standing or consent of instructor. (Same as CPE 588.)

EE 589 ADVANCED VLSI. (3)
An advanced class in topics related to Very Large Scale Integration. Example topics are advanced simulation, yield impact, memory design, statistical analysis and date reduction. Prereq: EE 584, Engineering standing.

EE 595 INDEPENDENT PROBLEMS. (1-3)
For electrical engineers. A problem, approved by the chairperson of the department, provides an objective for study and research. May be repeated to a maximum of six credits. Prereq: 2.5 standing and Engineering standing.

EE 598 SPEC. TOPICS MULTI-INST (Subtitle required). (3)
This course covers advanced topics on various aspects of electrical engineering, and is a template for courses to be shared among multi-institutions via distance learning technologies.

EE 599 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (3)
A detailed investigation of a topic of current significance in electrical engineering such as biomedical instrumentation, digital filter design, active networks, advanced electrical devices, digital communications, display of electronics. May be repeated, but only three credits can be earned under the same title. Only nine credit hours may count toward degree requirements. A particular topic may be offered at most twice under the EE 599 number. Prereq: Equivalent of two 400-level courses in electrical engineering, consent of instructor and engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of mathematics and science.

EE 601 ELECTROMAGNETIC ENERGY CONVERSION. (3)
Generalized electric machine theory; parameter determination. Energy conversion in continuous media including magnetohydrodynamics. Prereq: Consent of instructor.

EE 603 POWER ELECTRONICS. (3)
Study of solid-state power electronic devices and their applications. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. This course may not be used to satisfy degree requirements if credit is earned in EE 503. Prereq: EE 517 and EE 571 or consent of instructor.

EE 604 SWITCH MODE CONVERTERS. (3)
Study of analysis techniques for switching mode converters and associated control practices. Fast, buck, buck-boost, flyback, and Cuk topologies in both continuous and discontinuous conduction mode are presented. Numerical solution, state-space averaging, and linearization techniques are applied to predict performance and formulate transfer characteristics. Prereq: EE 517 or consent of instructor.

EE 605 MODELING, SIMULATION AND CONTROL FOR MANUFACTURING. (3)
The purpose of this course is to examine methods and systems from the perspectives of modeling, simulation, and control of manufacturing facilities. The emphasis will be primarily on techniques that can be used to model and evaluate performance of systems. Students are encouraged to think critically about available technologies, identify relative strengths and weaknesses, and analyze the technologies toward developing improved solutions to factory control and information management problems. Prereq: Graduate Standing. (Same as ME/MFS 605.)

EE 606 GLOBAL ISSUES IN MANUFACTURING. (3)
The need to increase quality, productivity, efficiency and sustainability in manufacturing operations is expanding the product, process and systems (manufacturing systems as well as supply chain) domains is essential for companies to be successful. The increased globalization of markets and manufacturing operations, declining natural resources and negative consequences of some manufacturing practices as well as increased legislation in many regions has led to many new challenges that companies must overcome to be successful in competitive markets. This seminar course will introduce students to a variety of global issues in manufacturing through presentations by leading national and international experts in these domains. The seminars will cover a broad range of manufacturing related topics relevant to many disciplines including manufacturing, mechanical and electrical engineering. The course can also help graduate students identify topical issues that need further investigation and could become potential research topics. (Same as ME/MFS 606.)

EE 611 DETERMINISTIC SYSTEMS. (3)
Concepts of linear systems, singularity functions, convolution and superposition integrals, state-variable method for linear systems, relation between transfer function and state-variable equations, fundamental matrix, state-transition matrix, unit-impulse response matrix, and transmission matrix. Prereq: EE 421G.

EE 613 OPTIMAL CONTROL THEORY. (3)
State-space modeling of control systems; variational techniques; system optimization by maximum principle, dynamic programming; Hamilton-Jacobi equations design of linear optimal systems; computational methods for solving boundary value problems. Prereq: EE 611.

EE 614 ADAPTIVE CONTROL. (3)
Real-time parameter estimation; deterministic self-tuning regulators; stochastic and predictive self-tuning regulators; model-reference systems; auto-tuning; gain scheduling; practical issues; design and simulation projects. Prereq: EE 611.

EE 619 PROBLEMS SEMINAR IN OPERATIONS RESEARCH. (3)
In this course, the student is exposed to the art of applying the tools of operations research to real world problems. The seminar is generally conducted by a group of faculty members from diverse disciplines to which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor.

EE 621 ELECTROMAGNETIC FIELDS. (3)
Development of electromagnetic field theory from the basic postulates of Maxwell’s equations in differential and integral forms, solution to static, quasi-static, and wave-propagation problems. Radiation from dipole antenna elements. Prereq: EE 468G.

EE 622 ADVANCED ELECTRODYNAMICS. (3)
Solution methods for applied electrodynamics problems; uniqueness, equivalence, duality, reciprocity, linear space methods; wave solutions in separable coordinate systems; classical problems in cartesian, cylindrical, and spherical coordinates. Prereq: EE 468G.
Course Descriptions

EE 624 COMPUTATIONAL ELECTROMAGNETICS: THE FINITE-DIFFERENCE TIME-DOMAIN. (3)
A course on the application of the finite-difference time-domain (FDTD) technique for the time-wave simulation of time-dependent electromagnetic waves in complex media. Representative topics in the course include: The Yee-algorithm, numerical dispersion and stability, physical source models, absorbing boundaries and perfectly matched layered media, near-field to far-field transformations, modeling of microwave circuits and antennas, parameter extraction, lumped load models, non-uniform and non-orthogonal grid methods, and current topics in FDTD. Prereq: EE 621 or consent of instructor.

EE 625 COMPUTATIONAL ELECTROMAGNETICS. (3)
This advanced course in computational electromagnetics primarily covers moment method and finite element method solutions to scattering problems. Representative topics of the course include surface and volume equivalence principles, scattering by material cylinders, scattering by periodic structures and absorbing boundary condition models. Prereq: EE 525, EE 621, or consent of instructor.

EE 630 DIGITAL SIGNAL PROCESSING. (3)
An introductory treatment of the basic concepts of signal processing via time and frequency domain (Z-transform) methods and a survey of procedures for designing, implementing and using digital signal processors. Prereq: EE 512 or consent of instructor.

EE 635 IMAGE PROCESSING. (3)
The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression, enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as CS 635.)

EE 639 ADVANCED TOPICS IN SIGNAL PROCESSING AND COMMUNICATIONS. (3)
Advanced topics in signal processing and communications research and design topics of current interests, such as optical processing, pattern recognition, satellite systems, and digital communication networks. A review and extension of current literature and selected papers and reports. May be repeated to a maximum of nine credits. Prereq: Advanced graduate standing.

EE 640 STOCHASTIC SYSTEMS. (3)
Random variables, stochastic processes, stationary processes, correlation and power spectrum, mean-square estimation, filter design, decision theory, Markoff processes, simulation. Prereq: EE 421G.

EE 641 ADVANCED POWER SYSTEMS. (3)
This course covers advanced topics on electric power systems including power system analysis, operation, monitoring, protection, optimization and control. Prereq: Graduate student, AND EE 415 or equivalent or consent of instructor.

EE 643 INTEGRATION OF DISTRIBUTED ENERGY RESOURCES. (3)
This course covers characteristics of distributed energy resources, and the challenges and methods for integrating them into the power grid. Prereq: Graduate student, AND EE 415 or equivalent or consent of instructor.

EE 645 ADVANCED CONTROL SYSTEM ANALYSIS. (3)
Conceptual development and study of complex systems; their synthesis and design; analysis and optimization of system parameters. Input-output relationships; formulation of mathematical models, parameters and constraints on physical systems. Prereq: ME 440 or instructor consent. (Same as ME 645.)

EE 661 SOLID-STATE ELECTRONICS. (3)
A study of semiconductor fundamentals including crystal structure, basic quantum mechanics, energy-band theory, carrier distributions, carrier transport, and recombination-generation. Analysis of semiconductor devices including PN junction diodes, bipolar-junction transistors, metal-semiconductor diodes, and metal-oxide semiconductor field-effect transistors. Prereq: EE 360 and EE 46 1G or consent of instructor.

EE 663 OPTOELECTRONIC DEVICES. (3)
Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting diodes and display devices, nanocrystal line structures and organic semiconductor applications in optoelectronic devices. Prereq: EE 360 or MEE 402G, consent of instructor and/or graduate standing. (Same as MEE 663.)

EE 664 MULTI-DISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/CME/MEE 664.)

EE 672 NONLINEAR SYSTEMS AND CONTROL. (3)
This course presents methods for analyzing and controlling nonlinear dynamic systems. The major topics are: 1) fundamental properties of nonlinear ordinary differential equations such as existence and uniqueness; 2) Lyapunov stability theory; and 3) nonlinear feedback control techniques such as backstepping, feedback linearization, and Lyapunov-based design. (Same as ME 672.)

EE 684 INTRODUCTION TO COMPUTER AIDED DESIGN OF VLSI CIRCUITS. (3)
Computer-aided design of Very Large Scale Integration (VLSI) circuits. Topics include: VLSI technologies, CMOS circuit characteristics, computer aids in the design of VLSI circuits, use of various CAD tools for layout, circuit design, logic design, and functional design, and the use of VLSI circuits in the system design. A design project is required. Prereq: EE 581 and EE 461G or consent of instructor.

EE 685 DIGITAL COMPUTER STRUCTURE. (3)
Study of fundamental concepts in digital computer system structure and design. Topics include: computer system modeling based on instruction set processor (ISP) and processor-memory-switch (PMS) models, design and algorithms for ALU, processor, control unit and memory system. Special topics include floating-point arithmetic, cache design, pipeline design technologies, and parallel computer architectures. Prereq: EE 380 and EE 581 or consent of instructor.

EE 686 ADVANCED COMPUTER ARCHITECTURE DESIGN. (3)
A study of current diverse advanced architectures such as microprogrammed, parallel, array and vector, networked, and distributed architectures; applications and example systems employing these architectures; matching applications to architectures; consideration of architectures of the future. Prereq: EE 685.

EE 688 SPEC. TOPICS MULTI-INST (Subtitle required). (3)
This course covers advanced topics on various aspects of electrical engineering, and is a template for courses to be shared among multi-institutions via distance learning technologies.

EE 699 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (3)
A detailed study of a topic of current interest in electrical engineering. May be repeated to a maximum of six credits, but only three credits may be earned under the same subtitle. A particular topic may be offered at most twice under the EE 699 number. Prereq: Consent of instructor.

EE 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769G residency credit following the successful completion of the qualifying exams.

EE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EE 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EE 780 ADVANCED PRACTICE IN ELECTRICAL AND COMPUTER ENGINEERING. (1-3)
Apply advanced training in electrical/computer engineering to solve complex practical problems through analysis, design, implementation, experiments, and/or developments subject to approval of the course instructor. This course may be repeated for a maximum of six credit hours in combination with EE 783. Prereq: 18 hours of graduate courses.

EE 783 SPECIAL PROBLEMS IN ELECTRICAL ENGINEERING. (1-3)
Open to graduate students only. Individual work on an assignment approved by the chairperson of the department. May be repeated to a maximum of nine credits.

EE 784 RESEARCH PROJECT IN ELECTRICAL ENGINEERING. (3)
Individual study related to a special research project supervised by the student’s advisor. A final written report on the project is required. This course is open only to and required by students pursuing the MSEE degree with a non-thesis option (Plan B). The course cannot satisfy part of the required 30 hours of course work for Plan B. Prereq: Approval of student’s MSEE advisor.

EE 790 RESEARCH IN ELECTRICAL ENGINEERING. (1-9)
Research in any field of electrical and/or computer engineering subject to approval of the Director of Graduate Studies. This course can be taken prior to the qualifying examination, but will not count for pre-qualifying examination residency credit. This course may be repeated to a maximum of 18 credit hours. Prereq: Consent of DGS.
EES 110 ENDANGERED PLANET: AN INTRODUCTION TO ENVIRONMENTAL GEOLOGY.
(3)
An introductory course that applies basic geological concepts to current environmental issues including the availability and use of water and soil resources, pollution causes, effects and solutions, and causes and prediction of environmental hazards including floods, landslides, subsidence, earthquakes and volcanoes.

EES 120 SUSTAINABLE PLANET: THE GEOLOGY OF NATURAL RESOURCES.
(3)
An introduction to the geologic and societal controls that govern the distribution and cost of using geologic resources: minerals, soils, and energy and industrial materials. Topics include the geological processes responsible for forming these resources, controls on their distribution, quality and abundance, economic factors that drive their recovery, and the legal political arena in which we attempt to utilize them.

EES 130 DINOSAURS AND DISASTERS.
(3)
More than 65 million years ago, dinosaurs and their kin dominated the earth and relegated our mammalian ancestors to positions of unimportance for nearly 155 million years. This course traces the history of dinosaurs from early vertebrate ancestors to their final extinction and surveys the evolution, paleogeographic, environmental, and possible extraterrestrial causes for the rise to dominance and sudden fall. Along the way and afterwards, dinosaur interactions with other animals and the environment, as well as their indirect influence on mammals, particularly on the much later evolution of humankind, will be examined.

EES 150 EARTHQUAKES AND VOLCANOES.
(3)
An introduction to earthquakes and volcanoes through theory, active learning assignments, and case studies. Using the basic principles of plate tectonics, students will learn why, where and how earthquakes and volcanoes occur. The hazards associated with earthquakes and volcanic eruptions will be discussed, as well as their societal implications in both the United States and developing world. Earthquake and volcanic hazard mitigation techniques will be addressed. In addition, earthquake hazards in the central United States will be discussed.

EES 151 QUANTITATIVE PLANET.
(3)
A basic problem solving approach to quantifying and predicting how Earth changes through time. Involves application of math skills of sufficient level for UK admission. Satisfies the UK Core Quantitative Foundations requirement; no prerequisites.

EES 155 EARTHQUAKES AND QUANTITATIVE REASONING.
(3)
Earthquake phenomena will be introduced in a manner that will allow students to learn why, where, and how earthquakes occur using elements of fundamental topics in algebra and trigonometry. These quantitative foundations will be used to investigate the origins and hazards associated with earthquakes, as well as their societal implications in both the United States and developing world. Students will often work in small groups to increase confidence in orally communicating their quantitative thinking and defending their logic, as well as providing an opportunity to consider alternative problem solving strategies.

EES 160 GEOLOGY FOR TEACHERS.
(3)
The basic principles of geological processes, materials, and history with primary emphasis on inquiry-based laboratory and field activities. The course is designed in conjunction with PHY 160 to provide basic concepts of earth science, astronomy and physics appropriate for elementary and middle school teachers. Both courses are taught with an emphasis on inquiry-based, laboratory activities. Lecture, two hours per week; laboratory, three hours per week. Not available for credit to students who have received credit for EES 220.

EES 170 BLUE PLANET: INTRODUCTION TO OCEANOGRAPHY.
(3)
Survey of oceanography, including the geologic evolution of the ocean floor; composition and dynamics of ocean water; interaction of lithosphere with hydrosphere; ocean-atmosphere interaction and oceanic controls on climate dynamics; marine life and ecosystems; impact of human activity on marine ecosystems.

EES 180 GEOLOGY OF THE NATIONAL PARKS.
(3)
The American system of national parks and monuments provides a natural and exciting basis for learning about geology, the scientific study of the Earth. These spectacular, diverse natural classrooms will be used to uncover the origin and variety of Earth materials, probe the dynamic processes that have produced and continue to modify internal and surficial environments over geologic time, critically examine the effects of changing patterns of land use on the natural environment, and recount the conservation efforts that have preserved these unique natural environments for future generations. The course includes a required, two-day (Saturday-Sunday) field trip to Mammoth Cave National Park.

EES 185 QUANTIFYING THE BLUEGRASS WATER SUPPLY.
(3)
This course develops the ability to locate and identify data, critically evaluate the data, develop probabilistic models, and present the results of their research. Geology provides important information on the origins of natural resources and the amounts available for exploitation and use. Course focuses on the issues surrounding the water supply and demand in the central Kentucky Bluegrass region, and the impact of global climate change.

EES 220 PRINCIPLES OF PHYSICAL GEOLOGY.
(4)
How the Earth Works: an integrated course in physical geology, covering the physical, chemical and biological processes that combine to produce geological processes. Attention is focused on plate tectonics, earth surface processes, and properties and formation of earth materials. Lab exercises emphasize identification and interpretation of geologic materials and maps. Lecture/Discussion, three hours per week; laboratory, three hours per week.

EES 230 FUNDAMENTALS OF GEOLOGY I.
(3)
Field and laboratory methods for identification and description of rocks and minerals with emphasis on sedimentary rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, three hours per week. Eight days in the field. Prereq: EES 220.

EES 235 FUNDAMENTALS OF GEOLOGY II.
(3)
Modern techniques for displaying and interpreting surface and subsurface data. GIS-based field data collection and geologic mapping. Introduction to Appalachian tectonics. Laboratory, three hours per week. Four days in the field. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. Prereq: EES 220 and 230.

EES 295 GEOSCIENCE ORIENTATION.
(1)
Survey of geoscience disciplines and post-baccalaureate career options for Geology majors. Introduction to the range of geoscience research approaches and means of dissemination of geoscience information. Guest speakers from industry, government, and academia will discuss career issues specific to geology, including consideration of appropriate educational preparation for potential career paths. Pass/Fail only. Prereq: EES 220 and sophomore standing.

EES 310 EXPLORATIONS OF THE SOLAR SYSTEM.
(3)
Fundamental and current topics in the space exploration of our solar system. Topics and examples of themes include: What is a planet? critical evaluation of the evidence for the heliocentric system; electromagnetic waves; the threat of asteroid impact; critical evaluation of the possibility of extra-terrestrial life; critical evaluation of the evidence for climate change; and other topical items based on the results of on-going space missions. Prereq: Any two university science/math courses or completion of one and concurrent enrollment in another.

EES 323 FIELD WORK IN REGIONAL GEOLOGY.
(6)
Geologic mapping in the field for a six-week period. Description, measurement, and mapping of a wide variety of rocks and structures, and analysis of geologic events in mountainous regions of the Rockies or Appalachians. Includes practice in writing geologic field reports. Offered only during the summer session. At least 40 hours of field-related work per week. Special fee. Prereq: EES 230 and EES 235.

EES 341 LANDFORMS.
(3)
A study of the origin and distribution of landforms. Lecture, three hours per week. (Same as GEO 451.)

EES 345 PALEOClimatOLogy: THE SCIENCE.
(3)
This course focuses on the science behind our understanding of how our planet’s climate has changed over time, in particular from 100 million years ago to the present. The most significant processes, astronomical, geological, oceanographic, and atmospheric, are examined with an emphasis on the broad scales of time and space over which they operate, and drive climate change. Proxy data records are defined in the context of how they record climate data, and how we ‘read’ them to learn the climatic history they store. Finally, the course brings us into the historical age, where data stores on climate change are the most diverse, but shortest in duration. The ultimate goal is for students to understand how we know what we know about Earth’s past climatic changes, so that we can formulate informed strategies moving forward to mitigate our own species’ impact on global climate.

EES 350 REGIONAL HISTORICAL GEOLOGY.
(3)

EES 360 MINERALOGY.
(4)
The study of mineral structure and composition, and mineral classification through crystallographic and crystal chemical techniques. Laboratory work includes study of minerals via crystallography, X-ray diffraction, mineral chemical analysis, and optical petrographic techniques. Lecture, three hours per week; laboratory, three hours per week. Prereq: CHE 105 and EES 220.

EES 385 HYDROLOGY AND WATER RESOURCES.
(3)
The occurrence, movement, and quality of fresh water in the water cycle, including environmental problems and possible solutions. Case studies are explored through readings, videos, and required field trips. Prereq: EES 220.

EES 395 SPECIAL PROBLEMS IN GEOLOGY.
(1-3)
Individual work on a special problem in geology. Report required. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EES 399 WORK EXPERIENCE IN GEOLOGICAL SCIENCES.
(1-6)
Professional-level, pre-planned learning experience in geological sciences in the work place under the supervision of a faculty member. The student will complete work of the type done by professional geoscientists in the same setting. May be repeated to a maximum of six credits. Pass/Fail only. Prereq: Approval of learning contract by faculty supervisor, director of undergraduate studies, and department chair.
EES 401G INVERTEBRATE PALEOBIOLOGY AND EVOLUTION. (3) Basic ecologic and evolutionary framework of common fossil invertebrate taxa. Major principles of paleontology, ecology, systematics, and evolution; and the use of fossils in paleocology and biostratigraphy. Laboratory work in classification of common fossils. Lecture, two hours; laboratory, three hours per week. Prereq: EES 102/112.

EES 450G SEDIMENTARY GEOLOGY. (4) Basic principles and concepts of stratigraphy and sedimentation. Lithologic correlation and the interpretation of geologic history and paleogeography. Field and laboratory analysis of sedimentary rocks including megascopic and microscopic methods. Lecture, three hours per week; laboratory, three hours per week. Prereq: EES 230 and EES 360.

EES 461G IGNEOUS AND METAMORPHIC PETROLOGY. (4) Classification and origins of the common igneous and metamorphic rocks. Lecturer material will emphasize the mineralogical, chemical, and physical equilibria within the earth. Laboratory topics will stress hand-specimen and microscopic petrography. Lecture, three hours; laboratory, three hours per week. Prereq: EES 230 and 235 and EES 360. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EES 480 ADVANCED TOPICS IN GEOLOGICAL SCIENCES (Subtitle Required). (1-6) Advanced topical course in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

EES 480G EARTH DYNAMICS. (3) Basic planetary changes through geological time, including continental drift, formation of supercontinents, paleoclimate, and the growth of the earth’s crust. Students will be required to take the Fundamentals component of the ASBOG Professional Geologist Certification Exam (fee required). Prereq: Senior standing with at least 30 credits in a Geoscience curriculum.

EES 511 PETROLEUM GEOLOGY. (3) Survey of the origin, chemical composition, occurrence in the context of stratigraphy, structure, and reservoir types of natural hydrocarbons; exploration methods and production techniques; environmental impacts of exploration and production. Prereq: EES 400G, EES 420G, or equivalent, or consent of instructor.

EES 530 LOW TEMPERATURE GEOCHEMISTRY. (4) An introduction to sedimentary and environmental geochemistry, including carbonate equilibria, redox chemistry, acid-base reactions, and kinetics. These examples will be considered in the context of geologic and environmental topics including acid mine drainage, groundwater, chemical oceanography, and changes across earth history.

EES 550F FUNDAMENTAL GEOPHYSICS. (3) Survey of active geophysical measurements and passive geophysical observations and their relation to Earth’s structure and composition. Investigation of the relationship between Earth’s elastic, potentiometric, and thermodynamic properties and traditional geophysical methods for measurement (e.g., gravity, magnetics, seismic, and heat flow). Material will help students improve their quantitative problem-solving abilities, but will also emphasize the visual learning skills commonly developed in the broader geology curricula. Prereq: MA 113, PHY 211 or 213, or consent of instructor. (MA 114 suggested).

EES 555G STRATIGRAPHY. (3) Principles of stratigraphy, depositional systems, sequence stratigraphy, and tectonic framework of sedimentation. Prereq: EES 450G.

EES 560G GEOPHYSICAL FIELD METHODS. (4) An introduction to the principles and applications of geophysics in the field. The course will present the geophysical methods used to assess the configuration and physical properties of the earth’s subsurface, as well as explore for natural resources. Designed for geology students (upper-division or first-year graduate) and other science or engineering students without prior formal instruction in geophysics. To understand the discussions and exercises, the student should be familiar with first-year calculus and physics. Prereq: MA 113, 114, PHY 211, 213, or PHY 231, 232 or consent of instructor. MA 114, PHY 213 or PHY 232 may be taken concurrently.

EES 570 SEMINAR IN GEOLOGICAL SCIENCES (Subtitle required). (1) A general seminar in a broad range of topics in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Senior or graduate standing in Geological Sciences.

EES 585G HYDROGEOLOGY. (3) A study of the physical aspects of groundwater, including regional flow, well hydraulics, and computer simulation. Prereq: EES 220 and MA 113 or 123.

EES 610G TOPICS IN HYDROGEOLOGY AND SURFICIAL PROCESSES (Subtitle required). (3) Study of topics in hydrogeology and surficial processes. Recent topics include: models of surface processes; contaminant hydrogeology; modeling in hydrogeology. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 620G TECTONICS. (3) A study of the structural features of the earth’s crust with an analysis of the mechanics involved. Prereq: PHY 211, 213; EES 420G.

EES 624 ADVANCED STRUCTURAL GEOLOGY. (3) An advanced study of the theory, principles, and application of structural geology. Prereq: EES 420G.

EES 625 TOPICS IN GEOPHYSICS. (3) Special topics in geophysics such as advanced seismology, seismic processing, seismic stratigraphy, earthquake seismology, geologic hazards, gravity fields, magnetic fields, heat flow, geodynamics, planetary geophysics, quantitative methods, inverse methods, geophysical modeling. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 626G GRAVITY AND MAGNETIC METHODS. (3) Theory and practice of the gravity and magnetic methods of geophysical exploration as applied to geological, archeological, environmental, and planetary exploration problems. The course includes principles of instrumentation, surveying, reduction of anomalies, and their interpretation. Prereq: MA 113, MA 114, PHY 211 and PHY 213 or PHY 231 and PHY 232, or consent of instructor. MA 114 and PHY 213 or 232 may be taken concurrently.

EES 630 TOPICS IN STRUCTURE AND TECTONICS. (3) An overview of stable isotope systematics and applications related to environmental applications. Key topics covered include trophic ecology, nutrient cycling, carbonate chemistry, oceanography, petroleum geology, and hydrology.

EES 645G TOPICS IN PETROLOGY AND GEOCHEMISTRY (Subtitle required). (3) Study of selected topics in petrology and geochemistry. Past topics include: Carbonate Petrology, Igneous Petrology, Organic Petrology, Isotope Geochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 652T TECTONICS AND STRATIGRAPHY. (3) Use of stratigraphic data in the interpretation of tectonic framework of sedimentation, tectonic controls on paleogeography, and interactions between sedimentary rocks and geologic structures. Prereq: EES 420G and 450G or equivalent.

EES 665G MUD AND MUDSTONES. (3) This course focuses on the geology and geochemistry of muds and mudstones. Lectures emphasize the generation of silt and clay, processes of transport and accumulation, muddy depositional environments, provenance techniques (inorganic geochemistry and mineralogy), organic geochemistry, and concepts/tools in basin analysis. An introduction to petroleum resource exploration in shale plays of the USA will be presented. An introduction to applied paleontology and paleoclimatology using deposits from muddy basins will also be presented.

EES 670G EXPLORATION SEISMOLOGY. (3) Advanced study of the acquisition, processing and interpretation of reflected and refracted seismic waves in layered media with applications to energy and geotechnical exploration. Prereq: EES 550 or EES 560 or consent of instructor.

EES 675G EARTHQUAKE SEISMOLOGY. (3) A study of the principles and methods of earthquake and engineering seismology. Specifically, the course will focus on the concepts of the seismic source, path, and site effects phenomena, as well as the practical aspects of seismic hazard assessment. Prereq: EES 550 or consent of instructor.

EES 685G GROUNDWATER MODELING. (3) This course teaches the basic concepts in groundwater modeling and provides basic exposure to standard modeling software. Prereq: EES 585 Hydrogeology or consent of instructor.

EES 695G SCIENTIFIC COMMUNICATION. (3) A professional development course focused on scientific communication in the geosciences. Prereq: Graduate student in Geological Sciences or related field.

EES 715G COAL GEOLOGY SEMINAR. (3) Seminar discussion and presentation of current work in coal geology from current literature or ongoing research. May be repeated to a maximum of eight credits. Prereq: EES 513 or 517 or consent of instructor.

EES 730G SEMINAR IN TECTONICS AND STRATIGRAPHY (Subtitle required). (3) Seminar in Tectonics and Stratigraphy. Past topics include: Tectonics and Stratigraphy of the Appalachians; Tectonics and Sedimentation; Basin Analysis. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 735G TOPICS IN STRUCTURE AND TECTONICS. (3) Seminar or new course offering in Structure and Tectonics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 741G ENVIRONMENTAL CLAY MINERALOGY. (3) A comprehensive study of the crystal structures of clay minerals commonly found in soils and sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: EES 360 or consent of instructor. (Same as PL S 741.)
## EGR 748 MASTER'S THESIS RESEARCH.

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

### EGR 749 DISSERTATION RESEARCH.

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for full-time semester of 769 research credit following the successful completion of the qualifying exams.

### EGR 767 DISSERTATION RESIDENCY CREDIT.

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

### EGR 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.

May be repeated to a maximum of 12 hours.

### EGR 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.

May be repeated indefinitely.

### EGR 782 INDIVIDUAL WORK IN GEOLOGY.

Problems involving independent laboratory and/or library study concerning to the student’s special interest under the direction of an appropriate staff member having proficiency in the area selected. May be repeated to a maximum of nine credits. Prereq: Geology major with graduate standing.

### EGR 790 RESEARCH IN GEOLOGICAL SCIENCES.

Research in the geological sciences. May be repeated to a maximum of twelve credits. Prereq: Approval of instructor and Director of Graduate Studies.

## EGR 101 ENGINEERING EXPLORATION I

Introduction to the engineering and computer science professions, College of Engineering degree programs, and opportunities for career path exploration. Topics and assignments include study skills, team development, ethics, problem solving and basic engineering tools for modeling, analysis and visualization. Open to students enrolled in the College of Engineering. Students who received credit for EGR 112 are not eligible for EGR 101. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Students who received credit for EGR 112 are not eligible for EGR 101.

### EGR 102 FUNDAMENTALS OF ENGINEERING COMPUTING.

Fundamentals of Engineering Computing introduces students to the practice and principles of computer programming and computational problem solving. Students will engage in hands-on project-based problem solving using modern computer software and hardware, with a particular emphasis on problems and techniques commonly appearing in various domains of engineering. Open to students enrolled in the College of Engineering. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent.

### EGR 103 ENGINEERING EXPLORATION II

Exploration of engineering careers in the context of project-based work. Students working in teams to apply the skills and tools introduced in EGR 101. Topics and assignments include more in depth exploration of engineering tools for modeling, analysis, visualization, programming, hardware interfacing, team development, collaboration, and communication. Students gain experience in project management, defining constraints, iteration and technical report writing. Prereq: EGR 102 or equivalent; or concurrent MA 113: or concurrent PHY 231: or concurrent CHE 105.

### EGR 111 SUCCESS IN ENGINEERING.

EGR 111 is reserved for Freshman College of Engineering students who have been admitted into the Engineering Living Learning Community. For registration information contact 859-257-0552.

### EGR 112 ENGINEERING EXPLORATION FOR TRANSFER STUDENTS.

Engineering Exploration For Transfer Students introduces transfer students to the engineering and computer science professions using multidisciplinary and societally relevant content. Topics and assignments will focus on skills development for engineering academic success, team development, engineering ethics, problem solving and basic engineering tools for modeling, analysis and visualization. In addition, the student will be introduced to College of Engineering student services and will have opportunities for career path exploration. Open to transfer students enrolled in the College of Engineering. Students who received credit for EGR 101 are not eligible for EGR 112. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Students who received credit for EGR 112 are not eligible for EGR 112.

### EGR 120 TECHNOLOGY: BLESSING OR CURSE.

Technology has created the world in which we live. Our wealth, our economy, and the way we live each day have come about due to the emergence of technology over the centuries. The course will examine the relationship between technology and society, how technology influenced the development of society, how society influenced the development of technology, and how people in society view technology. Prereq: Acceptance into SEAM Program.

### EGR 175 ENGINEERING ACADEMIC SUCCESS.

This 1-hour, graded course is designed to assist students in developing and utilizing study skills and learning strategies needed to reach their academic goals. It also includes exploration of careers related to target majors, as well as identification of relevant campus resources designed to enhance success. Through assessments, homework assignments, class activities, and reflective evaluations, students will set their semester objectives; implement new behaviors and methods to achieve their goals; assess their performance regularly; and adapt their strategies in response to their obtained results.

### EGR 190 UNDERSTANDING LEADERSHIP.

To introduce students to the principles of leadership, common strategies used by leaders, and communication techniques that are vital to becoming a dynamic leader. This course is only available to students admitted to the Scholars in Engineering and Management (SEAM) honors program.

### EGR 196 ENGINEERING PRACTICE, CULTURE, AND LANGUAGE IN GERMANY.

This course is part of a study abroad program conducted in Germany. Students will visit Engineering companies and cultural sites in Germany, and better understand engineering practices, training and culture of Germany and its engineering companies. Students will conduct background research on the companies and sites they visit. Students will also take a German language and culture course as part of this course, which will teach basic German language, but also customs, culture and history of Germany and its residents.

### EGR 198 PLTW CREDIT.

This course grants college credit to Project Lead the Way Pathway to Engineering graduates from PLTW Certified high schools. University of Kentucky Engineering students may earn one college credit for each of the following courses: IED, PWT Pathway to Engineering, SE, DE, CIM, CSE, CE, ES, AE) completed while enrolled in secondary school(s), up to a maximum of six UK College of Engineering credits. Three of these credits may be used in approved engineering majors as support electives. Additional credits past three can be used for fulfill free electives in approved engineering majors. Criteria to obtain the credit: • Graduation from a PLTW Certified secondary school; • Completing each PLTW course with an average of B; • Scoring in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam; • Enrolling in the UK College of Engineering; • Paying any designated University of Kentucky tuition and fees. Prereq: Process to obtain the credit: • be a graduate of a PLTW Certified secondary school; • received a B (or better) in the PLTW course in high school; • scored in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam for that course; • be enrolled in the UK College of Engineering; • pay any designated University of Kentucky tuition and fees.

### EGR 199 TOPICS IN ENGINEERING

TITLE TO BE ASSIGNED.

An experimental, topical or interdisciplinary course devoted to special topics of interest in engineering. Course offerings must be approved by the Deans and Chairpersons of all engineering and co-curricular areas. A particular title may only be offered twice under the EGR 199 number. Students may not repeat this course under the same title. May be repeated to a maximum of twelve hours. Prereq: Enrollment in the College of Engineering, or permission of the instructor.

### EGR 201 LITERATURE, TECHNOLOGY, AND CULTURE.

EGR 201 focuses on human endeavors in science as refracted through literature. The course brings together two distinct traditions: the study of literature and the practice of technical communication. The course operates from several assumptions: (1) that imaginative treatments of technological subjects offer powerful, useful, and even needed critical perspectives, (2) that authors and engineers both work from written conventions—genres and other tropes—that frame knowledge, (3) that writers benefit from scrutiny of generic conventions, and (4) that creative play with conventional literary genres can inspire engineers to “think outside the box,” to think creatively about their own designs and projects and about innovative ways of presenting their work. Prereq: Students must have successfully completed the first course in the General Education Communication sequence (or its transfer equivalent) and must have completed at least 30 hours of course work.

### EGR 215 INTRODUCTION TO THE PRACTICE OF ENGINEERING FOR TRANSFER STUDENTS.

Introduction to the Practice of Engineering for Transfer Students welcomes transfer students to the College of Engineering and introduces them to the creativity inherent in how engineers and computer scientists approach innovation, design and problem solving from blue sky brainstorming to implementing a solution. Students will be introduced to general engineering content, practice with tools of the trade (written and oral communications, data analysis, visualization, and professional development), provide peer reviews and discuss ethical implications of creative engineering endeavors. Students will work in teams to apply the skills and tools introduced. Topics and assignments include in depth engagement with engineering tools for modeling, analysis, visualization, teamwork development, documentation and communication. Students gain experience in project management, identifying constraints, accepting and providing critical analysis, iterating to refine their work, and keeping a technical design notebook. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Prereq or concurrent MA 113.

### EGR 240 GLOBAL ENERGY ISSUES.

This is a cross-disciplinary course open to all majors. This course critically examines issues related to global energy. The course is taught through lectures, discussions, and invited speakers. 493
EGR 390 EXPERIMENTAL LEARNING IN ENGINEERING OR COMPUTER SCIENCE. (0-3)
Project or activity led by an engineering faculty member, designed to provide students the opportunity to apply engineering principles in the context of real-world and multi-disciplinary community-based problems. May be repeated to a maximum of nine credits. Prereq: Engineering standing.

EGR 394 BS/MBA SEMINAR. (0-1)
Participation in team development exercises, seminars, company visits, and activities associated with the BS/MBA program. Prereq: Admission to the BS/MBA program.

EGR 399 COOPERATIVE ENGINEERING EDUCATION. (1)
A course designed for undergraduate students who, through the engineering cooperative education office, secure full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and may be repeated on a rotational basis to a maximum of six credit hours. Prereq: Approval of Coordinator of Cooperative Engineering Education.

EGR 401 CAREER PLANNING/EMPLOYMENT SEMINAR. (1)
This course will introduce students to the various elements involved in obtaining a position in their chosen field of engineering. Prereq: Engineering standing.

EGR 490 ENGINEERING LEADERSHIP. (1)
To introduce students to advanced principles of leadership, common strategies used by distinguished community leaders and UK alumni, and communication techniques that are vital to becoming a dynamic leader in engineering industry. Prereq: Junior or senior with Engineering standing.

EGR 492 ORGANIZATIONAL LEADERSHIP. (1)
This course focuses on advanced study of leadership, with a focus on leadership within teams and organizations. Topics include a review of core personal leadership concepts, team formation and dynamics, conflict management, professional ethics, strategic planning and decision making, global cultures and perspectives, organizational cultures and lifecycles, and coalition building for systematic change. Course content will be reinforced through facilitated discussions and interactive seminars. Many of the UK Engineering alumni and industry leaders, throughout the semester. Prereq: EGR 190 or equivalent introductory leadership class.

EGR 505 PROJECT LEAD THE WAY (Subtitle required). (1-6)
Project Lead The Way is the nation’s leading provider of science, technology, engineering, and math (STEM) programs. Through world-class K-12 curriculum, high-quality teacher professional development, and outstanding partnerships, PLTW is helping students develop the skills needed to succeed in the global economy. To be an educator in this program, the teacher must successfully complete a core training session. Core Training is an intensive program intended to give Instructors an overview of the PLTW course they will be teaching. Class meets from 8am to 5pm each day, with an hour for lunch. Attendance is required at all sessions. During the training, participants complete a portfolio in order to be certified to teach the course and receive credit. Prereq: Completion of a bachelor's or be registered as a junior or higher at a Kentucky university.

EGR 521 RENEWABLE ENERGY. (3)
This is a cross-disciplinary course open to all majors. Topics include Energy Policy in Navarre, US and MEA, different, renewable energy, hydroelectric, wind, photovoltaic, solar, biomass, geothermal and marine. In addition, there are technical tours of important renewable energy centers in Navarre. Prereq: Engineering standing or consent of instructor.

EGR 523 CONCEPTS, ASSESSMENT TOOLS AND METHODS IN SUSTAINABLE POWER AND ENERGY. (3)
A multidisciplinary course presenting an overview of key topics in sustainability and environmental impact assessment for engineers. Topics will include assessment of current and future energy systems, renewable and conventional energy technologies, supply chain management, sustainability metrics, energy assessment tools, environmental impact assessment and life cycle assessment. Topics will be presented and their attributes described within a framework that aids in evaluation and analysis of energy technology systems and designs in the context of political, social, economic, and environmental goals. Prereq: Engineering Standing and Senior Classification or Consent of Instructor. (Same as CME/MPS 523.)

EGR 537 NUMERICAL ANALYSIS. (3)
Floating point arithmetic. Basic mathematical methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent, or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS/MA 537.)

EGR 540 POWER ECONOMICS AND PUBLIC POLICY. (3)
This course provides an introduction to the theories and industry practices related to power economics and power public policy. Topics include: U.S. power markets, electric utility business regulation, electric utility environmental regulation, public policy theory, political science theory, development of new electric generation facilities, utility business operation, engineering influence on public policy, and engineering economic analysis. Prereq: Engineering standing, graduate standing, or consent of instructor.

EGR 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3)
Overview of technologies used for generation from location, recovery, transporta- tion and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as CME 542.)

EGR 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)
Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as BAE 543/EE 543.)

EGR 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)
Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EE 546.)

EGR 549 POWER AND ENERGY EXPERIENCES. (3)
This course will provide unique experiences through visits to a variety of energy-related sites and presentations from topical experts. The course begins with preparations through readings, videos, and assignments. The course then has a week-long tour of selected energy related sites, which may include: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power generation stations, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. in the region. More than simply tours, these visits include presentations by industry technical personnel. Students prepare for these visits in advance through preliminary assignments, and students then do a written summary and reflection journal on these visits afterwards. This course may not be used to satisfy degree requirements if credit is earned in EGR 499. Prereq: EGR 240 or EGR 542 or EGR 546, or consent of the instructor. Due to the nature of this class, enrollment is limited. Students pursuing either the Undergraduate Certificate or Graduate Certificate in Power and Energy may be given preference in enrollment.

EGR 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3)
This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as CE 553.)

EGR 583 INDUSTRIAL ENERGY UTILIZATION AND ASSESSMENT. (3)
This course considers energy use in industrial settings—including energy flows and energy transformations. Students will learn methodologies for assessing, analyzing, and reducing energy use and cost in industrial facilities and auxiliary equipment. The content presented in this course is intended to be consistent with the US Department of Energy Industrial Assessment Center program methods. Students will learn how to perform energy assessments in real engineering settings. Prereq: Engineering standing or consent of instructor. (Same as BAE/EE 583/EE 583/ME 583/FMS 583.)

EGR 599 TOPICS IN ENGINEERING (Subtitle required). (1-3)
An experimental, interdisciplinary course devoted to a topic of interest to students in several departments of the college. Only three credits may be earned under the same title; students may register for more than one section each semester. A particular topic may be offered at most three times under the EGR 599 number. Prereq: Variable, given when topic is identified.

EGR 601 INTRODUCTION TO RESEARCH IN ENGINEERING. (3)
Introduction to scientific research, applied to engineering. Characterization of scientific research, the definition of a research project, and methodology. Research Discussion includes management, organization and execution of a research project, scientific writing, information related to research ethics and data management, national policies, and intellectual properties. Case studies. Introduction to share research tools such as high performance computing or scanning electron microscopy. Prereq: Graduate standing or consent of instructor.

EGR 611 BOUNDARY ELEMENT METHODS IN ENGINEERING. (3)
Introduction of boundary element methods for use in solving common engineering equations, such as the Laplace equation, the Poisson equation, the wave equation, and the diffusion equation. Both the theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: EGR 537 or consent of instructor. (Same as ME 611.)
ELSI2 LEADERSHIP FOR TECHNOLOGY AND INNOVATION. (3)

Successful implementation of innovation in schools requires broad-based leadership. ELSI2 (a) highlights current issues provoking educational innovation nationally and locally, (b) explores how innovations require students and teachers to become technologically competent, and (c) explores distributed leadership research and concepts for improving leadership practice through distributed roles and responsibilities for teacher leaders and other stakeholders.

ELSI3 LEADERSHIP IN THE PUBLIC CONTEXT OF EDUCATION. (1)

ELSI3 is a study of the role of teacher leader whose influence and responsibility transcends school walls to include community and civic leadership.

ELSI4 PARTNERSHIPS FOR CLOSING ACHIEVEMENT GAPS. (1)

ELSI4 is a study of strategies that teacher leaders may utilize for mobilizing school, community, and family resources toward eliminating achievement gaps among students.

ELSI5 LEADERSHIP FOR RESPONSE TO INTERVENTION CLASSROOMS. (1)

ELSI5 is a study of roles of teacher leaders in the Response to Intervention (RTI) model, which serves as both a strategy for providing assistance to children having learning difficulty, as well as a method for diagnosing learning disabilities.

ELSI6 LEADERSHIP FOR SCHOOL AS INCLUSIVE COMMUNITY. (3)

ELSI6 is a study of evolving perspectives of the purposes of public education, leadership within and beyond the school building to support family-community partnerships and networks, and leadership to ensure inclusive classrooms. Curriculum includes how diverse personnel ensure school-wide safety.

ELSI7 TEACHER LEADERSHIP FOR INSTRUCTIONAL TEAMS. (1)

ELSI7 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

ELSI8 INTRODUCTION TO LEADING ACTION RESEARCH FOR SCHOOL RENEWAL. (1)

ELSI8 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

ELSI9 EVIDENCE-BASED DECISION MAKING. (1)

ELSI9 is the study of teacher roles and responsibilities when analyzing evidence of student outcomes at classroom and school levels and examination of a model and tools for data analysis and team based discussions, reflection, and decision making.

ELSI10 LEADING ACTION RESEARCH AND INQUIRY 1. (3)

ELSI10 is the first course in a two-part sequence that presents concepts and procedures for conducting systematic inquiry to investigate phenomena in classrooms and schools to ensure learning excellence. Emphasis is placed on developing a proposal for disciplined inquiry in classrooms or schools that will be conducted in ELSI11, the second course in the sequence.

ELSI11 LEADING ACTION RESEARCH AND INQUIRY 2. (3)

ELSI11 is the second course in a two-part sequence in which action research proposed in ELSI10 is conducted. Emphasis is placed on appropriate use of data for making informed decisions about classroom and school practices. Prerequisite: Successful completion of ELSI10 or consent of instructor.

ELSI12 LEADERSHIP PRACTICUM. (3)

ELSI12 is a field-based practicum to explore leadership roles and responsibilities distributed within P12 schools. Students work closely with a principal and leadership team members to examine specific site issue(s) and provide recommendations for action.

ELSI13 LEGAL PERSPECTIVES FOR TEACHERS. (1)

This course introduces legal concerns for public school teachers. It emphasizes legal rights and responsibilities of both teachers and pupils. Course coverage includes an introduction to governance, liability, church and state, instructional issues, student rights, student discipline, student abuse, teacher rights, and teacher discipline.
Course Descriptions

**EM 221 STATISTICS.**
Study of forces on bodies at rest. Vector algebra; study of force systems; equivalent force systems; distributed forces; internal forces; principles of equilibrium; application to trusses, frames and beams; friction. Prereq or conc: MA 213.

**EM 302 MECHANICS OF DEFORMABLE SOLIDS.**
A study of stress and strain in deformable solids with application primarily to linear elastic materials: stress and strain transformations; simple tension and compression of axial members; torsion of shafts; bending of beams; combined loading of members; buckling of columns. Prereq: Registration in the College of Engineering or consent of chairperson, and EM 221; prereq or conc: MA 214.

**EM 313 DYNAMICS.**
Study of the motion of bodies. Kinematics: cartesian and polar coordinate systems; normal and tangential components; translating and rotating reference frames. Kinetics of particles and rigid bodies: laws of motion; work and energy; impulse and momentum. Prereq: Registration in College of Engineering, EM 221; prereq or conc: MA 214.

**EMBA Executive Master of Business Administration**

**EMBA 601 MANAGING PEOPLE.**
This course will address the central question of how to manage and motivate individuals and teams for high performance in today’s organizations including the underlying fundamental and powerful concepts in organizations as open systems, individual behavior, group and social processes, and control and leadership. Prereq: Admission to joint EMBA program.

**EMBA 602 BUSINESS MODELS FOR QUANTITATIVE ANALYSIS.**
This course introduces students to quantitative techniques commonly used to make effective business decisions. It introduces tools and techniques illustrating the application of the techniques for managerial decision making. Prereq: Admission to the joint EMBA program.

**EMBA 603 ECONOMICS I.**
This course will apply economic theory to managerial decision making and analysis. Traditional tools of microeconomics will be employed to see how they can be used to evaluate practical business problems. Prereq: Admission to the joint EMBA program.

**EMBA 604 STRATEGIC ANALYSIS.**
This course will provide a framework of competitive analysis and competitive advantage upon which functionally oriented courses in the program may build. It provides an overview of the analysis activities and decision-making situations facing a company’s stop management team (i.e., CEOs, general managers, division managers) focusing on top management decisions relating to the external environment and internal issues. It presents practical experience in recognizing what information is important, sifting it for relevance, and employing the knowledge for the competitive benefit of the firm. Prereq: Admission to the joint EMBA program.

**EMBA 605 ECONOMICS II.**
This course will apply economic theory to managerial decision making and analysis. It will employ many of the traditional tools of microeconomics to see how they can be used to evaluate practical business problems. Markets and market structures will be studied including competitive markets, monopoly and pricing with market power, and oligopoly, rivalry, and strategic behavior. Particular attention will be paid to the strategy of firms in the marketplace. Prereq: Admission to the joint EMBA program.

**EMBA 606 FINANCIAL ACCOUNTING.**
This course provides an overview of financial accounting information and the role of that information in the economy. It focuses on the recognition and measurement concepts underlying financial accounting, but also covers the mechanics of recording and recording accounting information to outside parties. The first portion of the course presents an overview of the accrual accounting model, how information is presented and the mechanics of keeping track of financial accounting information. Prereq: Admission to the joint EMBA program.

**EMBA 607 BUSINESS INTELLIGENCE.**
This course is an introduction to the field of Business Intelligence (BI), a field that encompasses the use of business performance monitoring, querying/reporting, online analytical processing (OLAP), and business analytics, with particular emphasis on the latter. Prereq: Admission to the EMBA program.

**EMBA 608 MANAGERIAL ACCOUNTING.**
This course reviews the tools needed by managers to plan and control (evaluate) personnel and operations of the firm. It provides a framework for understanding when and why managers need specific types of accounting information to both facilitate their decision making and influence the decisions of their employees. Techniques covered include: product costing, activity-based costing, planning and controlling costs, budgeting, standard cost systems, new production philosophies and analytical techniques for decision making. Prereq: Admission to the EMBA program.

**EMBA 609 FINANCIAL MANAGEMENT I.**
The goal of this course is to provide an overview of modern corporate financial methods with an emphasis on practical financial decision making and financial managers in the real world need to make on a regular basis. Emphasis will be placed on the investment decision (how firms should invest capital). This course takes the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to the EMBA program.

**EMBA 610 MARKETING MANAGEMENT I.**
This course will help develop the skills, knowledge and experience required to critically solve marketing problems. It will rely on a mixture of lectures, applications, and cases to add well-established and proven marketing concepts and frameworks to your managerial arsenal. The course is inclined to be practical and is focused on developing your ability to be an effective manager and decision maker. Prereq: Admission to the EMBA program.

**EMBA 611 FINANCIAL MANAGEMENT II.**
This course provides an overview of modern corporate financial methods with an emphasis on practical financial decision making and financial managers in the real world need to make on a regular basis. It will emphasize the financing decision (how firms optimally raise money). Topics will include cost of capital, capital structure, valuation, and issuing securities. The course will take the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to EMBA program.

**EMBA 612 MARKETING MANAGEMENT II.**
This course provides students with insight into how profitable branding strategies can be created by addressing three important questions: (1) How do you build brand equity? (2) How do you capitalize on brand equity to expand your business? (3) How can brand equity be measured? Prereq: Admission to the EMBA program.

**EMBA 613 LEADING ORGANIZATIONS.**
In this course, you will discuss theories, empirical studies, and strategies for improving your effectiveness as a leader, all within a framework designed to enhance your learning experience. Experimental learning, projects, case discussion and critical analysis will be used to help you develop an entirely unique viewpoint on what leadership is, how to be a leader. It will help you begin the process of practicing new leadership skills and how to make them habitual. As a result, you will increase your positive impact now and in the future. Prereq: Admission to the EMBA program.

**EMBA 614 MANAGING GLOBAL CHALLENGES.**
This course will familiarize students with the foundations of the global economy, current trends in the global business environment, and issues facing countries and individual firms (e.g., foreign market entry modes, global supply chain configurations, global new product development, international joint venture formation, and global competitive rivalry). It will introduce the fundamental principles of international economics, discuss positive and negative impacts of globalization on the domestic economy, labor and product markets. Prereq: Admission to the EMBA program.

**EMBA 615 OPERATIONS MANAGEMENT.**
This course addresses how to design and operate a manufacturing or service company. The underlying fundamental and powerful concepts include (1) design of a system, (2) operations of a system, and (3) measuring and controlling the performance of a system from effectiveness (e.g., quality of a product) and efficiency (e.g., cost of producing a product) viewpoints. Prereq: Admission to the EMBA program.

**EMBA 616 CORPORATE ENTREPRENEURSHIP.**
This course introduces entrepreneurship in the corporate setting. The difference between individual entrepreneurial activities and corporate entrepreneurial activities is examined. Models of entrepreneurial activities in established organizations are presented. Prereq: Admission to the EMBA program.

**EMBA 617 BUSINESS STRATEGY AND PUBLIC POLICY.**
This course will examine how public policy decisions are made at the federal and state level and how they influence business decision making. A managerial perspective is used to examine the interface between business and the external political environments in which they operate. Public policies, from tax or trade policies to regulatory policies affecting the environment, intellectual property, human resources and tort liability are discussed. Prereq: Admission to the EMBA program.

**EMBA 618 COMPLEX ORGANIZATIONAL CHANGE.**
This course examines both the content and process of complex organizational change. The first part of the course is dedicated to content issues, including an introduction to a systems view of organizations and organization structure, an examination of the role of organizational structure in creating competitive advantage, and understanding how structure and strategy must be aligned with various environmental constraints. The second part of the course focuses on the complexity and intricacies of the change process, including working with internal and external change agents. Prereq: Admission to the EMBA program.

**EMBA 619 NEGOTIATIONS AND CONFLICT RESOLUTION.**
This course focuses on negotiation skills and making the student a more confident and judicious negotiator. By the conclusion of this course, you will have improved your daily ability to diagnose negotiation situations, strategize and plan upcoming negotiations, and engage in more fruitful negotiations when you are dealing with difficult negotiation partners. Prereq: Admission to the EMBA program.
Course Descriptions

**ENG 101 WRITING I.** (3)
A course in writing emphasizing argument. Instruction and practice in reading critically, thinking logically, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Includes grammar and mechanics review. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

**NOTE:** ENG 101 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 102 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

**ENG 102 WRITING II.** (3)
Argumentative writing. Emphasis on development of a fluent, precise, and versatile prose style. Continued instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Prereq: ENG 101 or equivalent. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

**NOTE:** ENG 102 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 101 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

**ENG 107 WRITING CRITIQUE: INTRODUCTION TO CREATIVE WRITING.** (3)
An introduction to the genres and craft of creative writing, including fiction, nonfiction, and poetry. Students will study and practice writing in various modes through composition, peer critique, and research. Lecture or lecture with discussion section. Offers credit for the UK Core requirement in Intellectual Inquiry in Arts & Creativity. Provides ENG minor credit.

**ENG 130 LITERARY ENCOUNTERS.** (3)
This course introduces students to literary works of various styles that deal with current subjects and creative applications. Topics vary by semester and are chosen to give a broad-based understanding of literary works, genres, creative techniques, or cultural trends (e.g., literature and other art forms; film, art, social protest; creative writing, mixed media, and social media). See departmental listings for different offerings per semester. Provides ENG Major or Minor Elective credit.

**ENG 142 GLOBAL SHAKESPEARE.**
Global Shakespeare will expose students to selected productions and adaptations of Shakespeare’s plays by authors and acting companies from Asia, the Middle East, Africa, the Americas, and from European nations other than Great Britain. In our globally connected age, Shakespeare has crossed borders, occupying an honored place in the school curriculum and cultural aspirations of many formerly colonized nations. In a post-colonial age, he has become the medium through which multiple cultures articulate their own values and enter into equal intellectual and aesthetic exchange with the English-speaking west. Students in the course will be asked to ponder what it is about Shakespeare that makes his plays so rich raw material for these encounters and exchanges. Prereq: None. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

**ENG 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY.** (3)
This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz and democracy in philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealism and existentialist artistic movements in modern and postmodern cultural contexts. Artists to be discussed include James Baldwin, Harryette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative trends, and political connotations specific to African American literature and culture. (Same as AAS 168.)

**ENG 171 GLOBAL LITERATURE IN ENGLISH.** (3)
A course exploring the diversity and significance of English literature from across the world. To what extent is English now a global language, no longer the property of any national group? How has fiction contributed to the process of internationalizing English? To answer these questions and others, this course examines the idea of global citizenship and cosmopolitan English through the work of some of the language’s most compelling international novelists. Lecture. Offers credit for the UK Core requirement in Global Citizenship. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 181.

**ENG 180 GREAT MOVIES (Subtitle required).** (3)
A course introducing students to films of various genres and styles, from both historical and contemporary filmmakers, investigating a particular issue or theme. Topics vary by semester and are chosen by faculty to give a broad-based understanding of important cinematic works, trends, and the creative processes behind this important, collaborative artform. As with all Arts and Creativity classes, this class will require students to produce an artistic artifact. Intended as a general humanities course for non-majors. Lecture and section. See departmental listings for different offerings per semester. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Fulfills the UK Core requirement in Arts and Creativity.

University of Kentucky 2019-2020 Undergraduate Bulletin

KEY: # = new course  * = course changed † = course dropped
ENG 191 LITERATURE AND THE ARTS OF CITIZENSHIP. (3) A survey and investigation of contemporary literature of modern American citizenship, with an emphasis on questions of race, religion, gender, sexuality, and socioeconomic class. Lecture. Offers credit for the UK Core requirements in either U.S. Citizenship or Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement or ENG Major Elective credit. Provides ENG minor credit.

ENG 207 BEGINNING WORKSHOP IN CREATIVE WRITING (Subtitle required). (3) A beginning workshop in the craft of writing, teaching students how to read critically and how to review work in progress. The students provide an audience for each other’s work. Exercises involve practice in aspects of craft and promote experimentation with different forms, subjects, and approaches; outside reading provides models and inspiration. May be repeated under different subtitles to a maximum of 6 credits. Does not fulfill ENG premajor requirement. Provides ENG Major Elective credit and ENG minor credit. Required for ENG Creative Writing Option.

*ENG 209 THE STRUCTURE AND USE OF ENGLISH. (3) A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversies. Offers UK Core credit for Intellectual Inquiry in the Humanities. Provides ENG Major Elective credit and ENG minor credit. (Same as LIN 209.)

ENG 210 HISTORY OF THE ENGLISH LANGUAGE. (3) A survey of the historical development of English from its Indo-European origin to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as LIN 210.)

ENG 221 INTRODUCTION TO LINGUISTICS: THEORETICAL FOUNDATIONS AND ANALYSIS. (3) First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisite for most 500 level LIN courses. Prereq. This course is primarily designed for Linguistics majors and minor students, but it is also suitable for students pursuing a major in the following disciplines: English, Modern and Classical Languages, and Communication Science Disorders, or consent of instructor. (Same as LIN 221.)

ENG 230 INTRODUCTION TO LITERATURE (Subtitle required). (3) An introduction to literary analysis through close reading and argumentative writing. The course involves studying selected texts from several genres and investigating a unified theme or set of topics indicated in the subtitle. Students will learn how to read closely, how to relate texts to contexts, and how to use basic literary terms and concepts. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings with different subtitles each semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Provides ENG minor credit. Prereq. Graduation Requirement Course – credit is awarded to students meeting the GWR prerequisites.

ENG 241 SURVEY OF BRITISH LITERATURE I. (3) A survey of British literature from the Anglo-Saxon period to the later seventeenth century, with emphasis on different genres, periods, and cultural characteristics of the early English literary tradition. Texts and authors covered may include Beowulf and Old English elegiac poetry; Middle English poetry and selections from Geoffrey Chaucer’s Canterbury Tales; Renaissance lyrics, sonnets, and narrative poetry; the drama of Shakespeare; selections from John Milton’s Paradise Lost; and more. Lecture. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 331.

ENG 242 SURVEY OF BRITISH LITERATURE II. (3) A survey of British literature from the seventeenth century to the present, with emphasis on different genres, periods, and cultural characteristics of the later English literary tradition. Authors covered may include the Augustan poetry of John Dryden and Alexander Pope; the early and later Romantic movements; novelists and poets of the Victorian period such as Charles Dickens, Alfred Tennyson, and Elizabeth B. Browning; the early twentieth-century Modernist movement; and the ideological dimensions of written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. (Same as AAS 264.)

ENG 251 SURVEY OF AMERICAN LITERATURE I. (3) A survey of American literature from its colonial origins to the Civil War, with emphasis on different genres, periods, and cultural characteristics of the American Colonies and antebellum United States. The course explores both the social conditions in which authors lived and wrote—such as conflicts over land with Native Americans, slavery, and the emergence of women’s rights—as well as the key developments in literary form during this period, such as the rise of the novel, the slave narrative, and the changing shape of poetry. Texts and authors covered may include: Susanna Rowson, Herman Melville’s Moby Dick, Frederick Douglass’ Narrative, short stories by Edgar Allen Poe, the poetry of Walt Whitman and Emily Dickinson, and more. Lecture or lecture with discussion. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 334.

ENG 252 SURVEY OF AMERICAN LITERATURE II. (3) A survey of American literature from the Civil War to the present, with an emphasis on different genres, periods, and cultural characteristics of later periods in U.S. history. The course explores the social conditions in which American literature was produced—such as the Roaring 20’s, the Cold War, and the upheaval of the 1960’s—and several key literary movements, such as the Harlem Renaissance, Modernism, and Postmodernism. Texts and authors covered may include Edith Wharton’s House of Mirth, Nella Larsen’s Quicksand, Ernest Hemingway, Toni Morrison, the poetry of Marianne Moore and Elizabeth Bishop, and more. Lecture or lecture and discussion. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 335.

*ENG 260 INTRODUCTION TO BLACK WRITERS. (3) An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. (Same as AAS 264.)

ENG 265 SURVEY OF AFRICAN-AMERICAN LITERATURE I. (3) A survey of African-American literature from the mid-eighteenth century to Reconstruction and beyond, with emphasis on selected genres, periods, and thematic characteristics of the later African-American cultural and literary experience. Topics include colonialism and abolitionism; early black aesthetics, narratives of enslavement, and drama, novels, and poetry. Authors may include: Nelson Algren, Ralph Ellison, Richard Wright, James Baldwin, Toni Morrison, and Zora Neale Hurston. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 266 SURVEY OF AFRICAN-AMERICAN LITERATURE II. (3) A survey of African-American literature from post-Reconstruction to the Black Arts Movement and beyond, with emphasis on selected genres, periods, and thematic characteristics of the later African-American cultural and literary experience to the present day. Topics include literature of the Reconstruction; poetry and dialect poetry, the “plantation tradition” and black musical traditions; Black Modernism and the Harlem Renaissance; the Black Power movement and Black Rights. Authors may include: Langston Hughes, Zora Neale Hurston, Richard Wright, Gwendolyn Brooks, and others. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 271 THE BIBLE AS LITERATURE. (3) A course investigating selections from the Christian Bible (Old and New Testaments) in English, and from related sacred texts, as literary and cultural documents of great significance and literary achievement. Emphasis is on the careful analysis of literary forms and themes within a broadly historical and non-denominational context. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 274 CLASSICS OF WESTERN LITERATURE. (3) A study of selected works by major Western authors from the Bible and ancient Greek literature through the Renaissance and Enlightenment periods, and later. Emphasis is on the study of genres, themes, characters, and literary forms that have had an enduring presence in Western culture. Texts may include Homer’s Iliad and Odyssey; selections from the Old Testament; classical Greek drama; Virgil’s Aeneid; Dante’s Divine Comedy; Don Quixote; and others. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 280 INTRODUCTION TO FILM. (3) An introduction to the study of films as narrative art and cultural documents. The course involves viewing and analyzing films from different genres and investigating a unified theme or set of topics. Students will learn how to view films closely, how to relate films to their context, and how to employ the basic terms and concepts of film analysis. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. Viewing films outside of class is required. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 281. Prereq. Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite.
Course Descriptions

ENG 284 HISTORY OF FILM I. (3) An introduction to the history of film as art and industry from the invention of the moving picture to World War II. Emphasis is on the artistic development of the silent film in America and Europe, the rise of the American studio system, and the emergence of sound in film in the 1930’s. Filmmakers may include the Lumière brothers, Georges Méliès, Buster Keaton, D. W. Griffith, Charlie Chaplin, King Vidor, Alan Crossland, Leni Riefenstahl, and others. Lecture. Viewing films outside of class is required. Does not fulfill Historical Survey requirement. Can be taken for ENG Major Elective requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 381.

ENG 285 HISTORY OF FILM II. (3) A chronological survey of narrative film (primarily American) from World War II to the present, concentrating on both canonical films (such as Hitchcock’s Vertigo) and often overlooked examples of cult, low budget, and independent film. Many paradigms of the major genres are included: musical, film noir, gangster, screwball comedy, horror and science fiction, western, and more. This survey also examines more idiosyncratic work of auteur directors (Nicholas Ray, Jane Campion), films capturing a specific sociopolitical moment (e.g. Spike Lee’s Do the Right Thing), and larger cinematic movements such as Italian neo-realism, French New Wave cinema, and the New Hollywood of the 70’s. Lecture. Viewing films outside of class is required. Does not fulfill ENG Historical Survey requirement. Can be taken for ENG Major Elective requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 382.

ENG 290 INTRODUCTION TO WOMEN’S LITERATURE. (3) An introduction to the rich traditions of women’s writing, focusing on some important issues and representative examples. Students will read canonical and non-canonical works, discuss continuities and differences among women writers, and master some of the concepts of gender studies. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Prereq: Consent of instructor. Provides ENG Major Elective credit and ENG minor credit. Credit will not be given to students who already have credit for ENG 390.

ENG 301 STYLE FOR WRITERS. (3) This course is designed for those who wish to improve their own writing style or the style of others. While the course may include some account of historical changes in prose style and require some stylistic analysis of literary texts, the emphasis is on editing contemporary prose, both in exercises and in the students’ own writing. Students will learn and practice principles such as economy, coordination, subordination, precision, parallelism, balance, coherence, rhythm, clarity, and grace. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. (Same as WRD 301.)

ENG 307 SPECIAL TOPICS IN CREATIVE WRITING (Subtitle required). (3) An exploratory creative writing class (craft-based, cross-genre, or theme-based), this course is suitable for prospective English teachers, for those practicing creative writing who wish to explore cross-genre work, or for students with other majors who are interested in the given topic. May be repeated under different subtitles to a maximum of 6 credits. Prereq: Completion of Composition and Communication requirement and consent of instructor.

ENG 310 AMERICAN ENGLISH. (3) The study of the varieties of modern American English: regional, social, and ethnic varieties, gender differences in communication, creoles and pidgins, stylistic variation. History and methods of American dialect study. No prerequisites. Provides ENG Major Elective credit and ENG minor credit. Same as LIN 310.)

ENG 330 TEXT AND CONTEXT (Subtitle required). (3) The core course in the English Major focusing on the close reading and analysis of a single major literary text, or a focused set of texts, in historical and critical context. Students will develop analytical and interpretive skills that deepen their historical and conceptual understanding of literature, as well as their skills of critical reading, writing, and presentation. See departmental listings for different offerings per semester. ENG major and minor requirement. Repeatable for up to six hours of credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent, and either ENG 107, or ENG 209, or ENG 230. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENG 337 LITERATURE AND GENRE: (Subtitle required). (3) An advanced course exploring one or two literary genres or formal categories. It focuses on analysis of the major works and practices of a broad generic category (e.g. the short story, lyric poetry; epic and mock-epic; autobiography; the bildungsroman; protest literature) or a genre specific to a particular period (e.g. mid-century American crime novels; Elizabethan songs and sonnets; Victorian drama). May be repeated up to 9 hours under different subtitles. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. Provides ENG Major Elective credit and ENG minor credit. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester.

ENG 338 TOPICS IN LITERATURE (Subtitle required). (3) An advanced course exploring a focused literary topic across various periods, genres, styles, and regions. Emphasis on the major works of a author or group of authors. May be repeated up to 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 339 AUTHOR STUDIES (Subtitle required). (3) An advanced course exploring the works of a single important author of English literature, or literature in translation, from any period or nationality. It focuses on developing a strong familiarity with the oeuvre of a specific important writer. Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 341 CHAUCER AND HIS CONTEMPORARIES. (3) A course covering medieval English literature from around the years 1350-1450 and centering on the works of Geoffrey Chaucer (c. 1340-1400), particularly his early dream-visions and The Canterbury Tales. Other authors and texts may include William Langland’s Piers Plowman; the poetry of John Gower; Sir Gawain and the Green Knight and the works of the Pearl Poet; Thomas Hoccleve; Margery Kempe; and the Marian narrative; and more. Topics include courtly love and chivalry; Christian spirituality; women and gender roles; feudal politics and rebellion. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 342 SHAKESPEARE. (3) A course offering advanced study of a representative selection of Shakespeare’s plays across the length of his career. It situates Shakespeare within Renaissance culture: the playhouses and audiences he wrote for, the structure of his acting company, and the patronage system that supported their business. Students will learn how his plays departed from received ideas about dramatic genres and in some instances set new standards for how certain types of plays should look and feel. Students will also gain a sense of how interpretations of individual plays have changed over time and how later periods and audiences continue to make Shakespeare their own. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Credit will not be given to students who already have credit for ENG 340. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 343 RENAISSANCE DRAMA AND SOCIETY. (3) This course studies Elizabethan and Jacobean drama by Shakespeare’s predecessors and contemporaries. Although most people identify Shakespeare as the representative Renaissance playwright, he was only one member of a distinguished generation. Students will encounter a variety of popular dramatic genres in which Shakespeare either did not work or that he heavily adapted to his own ends: Turk plays, city comedy, unperformed “closet drama,” revenge tragedy, pastoral. Readings may include playwrights such as Thomas Kyd, Christo- pher Marlowe, Elizabeth Cary, Lady Mary Wroth, Thomas Middleton, John Webster, and others; and topics such as tragedy and comedy, sex and romance, urban life and the value of money, and racial and religious difference. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 345 BRITISH POETRY. (3) This course provides a selective encounter with the poetry of the British tradition. Texts and topics may be drawn from the later Renaissance (16th c.) up through the present day, exploring the depth, history, and continued vitality of British poetry. Particular attention is paid to the formal aspects and skills of reading poetry in different periods and styles. Reading may include authors and texts such as the sonnets and songs of Philip Sidney and Shakespeare; the verse of John Milton and other seventeenth-century poets; Alexander Pope and his contemporaries; Victorians and pre-Raphaelites such as E. B. Browning and Christina Rossetti; Modernists such as Ezra Pound, W. B. Yeats, and H.D.; and contemporary British, Irish, and Scottish poets. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 347 THE RISE OF THE BRITISH NOVEL. (3) What is the novel and how did it begin? Why did it develop at a specific moment in history and what counted as fiction before that time? What makes one novel “literature” and another “trash”? In this course we explore the early decades of the novel to better understand prose fiction and how it came to be a dominant genre in English literature. Readings can include works by Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Laurence Sterne, Frances Burney, Mary Shelley, Jane Austen (including selected cinematic adaptations), and more. Topics can include the novel in history and the history of the novel; the evolving cultural practices of novel-reading; eighteenth-century fiction and contemporary popular culture. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.
Course Descriptions

ENG 348 VICTORIAN NOVELS AND THEIR WORLDS. (3)
This course examines the development of the novel as a literary and cultural form at the moment of its greatest impact during the Victorian era (1837–1901). It focuses on the emergence of the realist novel and other modes that intersected and competed with it (e.g., the gothic, the supernatural, sensation fiction, the New Woman novel), to explore the complex ways that represented different realities. The course also addresses contemporary issues such as new ideas about human psychology; gender, democracy, and The Woman Question; social status and class conflict; science and religion; race and empire. Authors may include Jane Austen, Mary Shelley, Charles Dickens, Mary Elizabeth Braddon, Oscar Wilde, Olive Schreiner, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 349 MODERNISM. (3)
A course on Modernist Literature: British, Irish and American writing from the first half of the twentieth century. Virginia Woolf once tried to explain modernism by claiming, “On or about December 1910 human character changed.” Much of the writing of the period might be read as an attempt to record and understand that change. Texts include the fiction, poetry, drama, and essays from writers such as Woolf, James Joyce, T. S. Eliot, W. B. Yeats, Ezra Pound, Wyndham Lewis and Gertrude Stein. The literature of the period will be examined in relation to various contexts and backgrounds, including the experience of war; the breakup of empires, and other major events and upheavals. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 352 AMERICAN LITERATURE AND CULTURES TO 1900. (3)
This course focuses on selected literary movements and their relationships to American culture up through 1900. Authors studied may include Susanna Rowson, Nathaniel Hawthorne, Herman Melville, Walt Whitman, Harriet Jacob, and Henry James. Topics may include American imperialism, slavery and abolition, the rise of the historical novel, Sentimentalism, Romanticism, the Gilded Age, and the emergence of psychological realism. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 353 AMERICAN LITERATURE AND CULTURES POST-1900. (3)
This course focuses on selected literary movements and their relationships to American culture since 1900. Authors studied may include Edith Wharton, F. Scott Fitzgerald, Allen Ginsberg, Ralph Ellison, Toni Morrison, Thomas Pynchon, and others. Topics may include the literature of World War I, the Cold War, the Beat Generation, the New Social Movements of the 1960’s, Postmodernism, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 355 AMERICAN POETIC TRADITIONS. (3)
A course investigating contrasting traditions of American poetry from the nineteenth and twentieth centuries. Several poets are examined within historical and literary contexts, and their poems examined through close reading, with attention paid in particular to stylistic and formal characteristics. Poets studied may include Walt Whitman, Emily Dickinson, William Carlos Williams, Wallace Stevens, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 357 CONTEMPORARY AMERICAN LITERATURE. (3)
A course on American literature from the late 1980’s up to the present. This course will explore American literature from the perspective of the past twenty years, or the postmodern era. This is a time when the old boundaries of literature have been pushed aside, allowing for a variety of new influences and movements. In this course, students will explore the ways in which contemporary authors challenge traditional notions of literature and explore new forms and genres. Authors may include Jack Kerouac, Henry Miller, John Updike, and many others. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 359 THE KENTUCKY LITERARY HERITAGE. (3)
A course exploring the rich literary heritage of the Commonwealth of Kentucky and the greater Appalachian region, surveying its local history and diversity as well as its wider significance for American culture. Authors covered may include early figures such as William Wells Brown, the first African-American novelist, and John Fox Jr., the first million-selling novelist; Robert Penn Warren, the first African-American novelist, and John Fox Jr., the first million-selling novelist; Robert Penn Warren, first poet laureate of the United States and author of All the King’s Men; Elizabeth Madox Roberts; Harriette Arnow, winner of the National Book Award in 1954 for The Dollmaker; counter-cultural writers of the 1960’s and 1970’s such as Hunter S. Thompson, Gurney Norman, and Ed McClanahan; contemporary Kentucky writers such as Wendell Berry, Erik Reece, Bohett Johnson, Loudermilk, C. E. Morgan, Kim Edwards, Anne Tyler and Pat Conroy; and contemporary award-winning poets such as Frank X Walker, Nikky Finney, and Maurice Manning. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 361 EARLY AFRICAN-AMERICAN LITERATURE. (3)
This course investigates selected writers of the early African-American tradition, primarily from the mid-eighteenth century to post-Reconstruction. Inquiry focuses on the literary modes and genres that were central to the creation of a distinct African-American literary voice and canon, including slave narratives, folklore, poetry, drama, and more. Authors can include Phyllis Wheatley, Frederick Douglass, Harriet Jacob, William Wells Brown, Frances Harper, Charles Chesnutt, Martin Delaney, Sojourner Truth, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265 or 266 are recommended but not required.

ENG 362 FLIGHTS TO FREEDOM: LITERATURE OF THE GREAT BLACK MIGRATIONS. (3)
Between 1890-1930 over 2.5 million African Americans migrated from the rural South to the urban North. This course focuses on the development of African-American migration narratives from the slave era to the contemporary moment. It examines literary, musical, artistic, and journalistic representations of the Great Migrations that capture the experiences of African-Americans as they moved not only from the South to the North, but also from the South to the West. Readings are drawn from writers such as William and Ellen Craft, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, James Weldon Johnson, Jean Toomer, Nella Larsen, Ann Pettry, Dorothy West, Pearl Cleage, August Wilson, Toni Morrison, Ishmael Reed, Colson Whitehead, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265, or 266 are recommended but not required.

ENG 363 CONTEMPORARY AFRICAN-AMERICAN VOICES. (3)
Encompassing an array of genres and forms, this course examines black culture, literature, and performance from mid-20th century to present. It engages aesthetic, critical, and political issues related to seminal periods such as the Black Arts Movement of 1960’s, the Third Renaissance of 1980’s-90’s, and the ascent of the first U.S. president of African descent. This course examines how forms of performance such as folklore and work songs, the blues, jazz, and rap, as well as the diverse categories by which its critics and readers have sought to identify it: gender black female characters in ways that perpetuate, contest, or subvert stereotypical images of black women. Texts and authors may include Harriet Jacobs’ Incidents in the Life of a Slave Girl, Frances Harper’s Trial and Triumph, Nella Larsen, Zora Neale Hurston, Gwendolyn Brooks, and Malcolm X. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 369 AFRICAN AMERICAN WOMEN’S WRITING. (3)
This course analyzes the literary and visual representations of black women from the nineteenth to the twentieth centuries. It examines how writers, working across different genres, render black female characters in ways that perpetuate, contest, or subvert stereotypical images of black women. Texts and authors may include Harriet Jacobs’ Incidents in the Life of a Slave Girl, Frances Harper’s Trial and Triumph, Nella Larsen, Zora Neale Hurston, Gwendolyn Brooks, and Malcolm X. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 370 LITERATURE ACROSS BORDERS. (3)
A course examining literature as a product of multiple regional, national, and international contexts. How do texts, ideas, goods, and people move across borders? How are identities and concepts produced through transnational dialogue and exchange? Possible areas of study include transatlantic political or literary movements, border studies, multilateral literatures, or literatures of migration and diaspora. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 380 FILM AND GENRE (Subtitle required). (3)
An advanced course exploring one or two film genres, styles, or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. gangster films; science fiction; jarokas; historical dramas) or genre-specific to a particular period (e.g. early silent films; twentieth-century horror films). Viewing films outside of class is required. See departmental listings for different offerings per semester. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

ENG 384 LITERATURE AND FILM. (3)
This course explores the relationship between two creative traditions, literature and film, focusing on film adaptations of literary works for the screen. Subjects can include the adaptation of works by a particular writer such as Shakespeare or Jane Austen, or it may range more widely among the thousands of innovative cinematic reimaginings of literary texts, e.g. Richardson’s Tom Jones, Altman’s Short Cuts. In some semesters the course may focus on a particular topic or genre and its treatment in both literary and cinematic texts, or on a particular moment when cinema and literary writers exerted a strong mutual influence (such as Hollywood in the 1920’s). Viewing films outside of class is required. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

ENG 391 LITERARY THEORY. (3)
The term covers a wide range of formal, historical, and critical approaches to literature and culture that have changed the ways we read. This course investigates selected trends and schools of modern literary theory in diverse texts and contexts. These can include formalism, Practical Criticism, and the New Criticism; French Structuralism and the various modes of post-structuralism (Semiotics, Deconstruction, Reader-response, Speech-act theory); historicism and the New Historicism, as well as broader modes of cultural critique such as feminism, Marxism, Critical Theory and the Frankfurt School, Post-colonialism, Critical Race Theory, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq. Completion of UK Core Composition and Communication I-II requirement or equivalent.

University of Kentucky 2019-2020 Undergraduate Bulletin 560

KEY: # = new course  * = course changed † = course dropped
 ENG 395 INDEPENDENT WORK. (1-3) For undergraduate majors in English. Credit available for independent study, tutorial, or directed project under the guidance of a faculty member, with appropriate assessment and grading (e.g., term paper, examinations, final project). Projects are generally proposed and arranged by student and faculty members, reflecting individual interests and goals. Limited enrollment. Prereq: ENG major with a major GPA of 3.0 or above; prior permission of faculty advisor and ENG chairperson; approved Learning Contract. May be repeated to a maximum of 6 credits. Contact the Director of Undergraduate Studies for information. Provides ENG Major Elective credit.

 ENG 399 INTERNSHIP IN ENGLISH-RELATED WORK EXPERIENCE. (1-3) The Department of English internship is available for qualified students to receive academic credit toward the Bachelor of Arts or Bachelor of Science in English through applied and practical experience with a variety of private and public entities, including, but not limited to, the University Press of Kentucky. The student will identify a field, community-based, practical or applied educational experience and locate a sponsor to host their internship, which will be supervised by both a responsible person on-site and an English Dept. faculty member. The internship will provide supervised professional experience in public and private sector positions and is intended to introduce students to the skills and working environments of careers for graduates of the English Dept. Students should consult with an English faculty member in advance of registering for this class. A learning contract must be completed by the student, the faculty supervisor, and the on-site internship supervisor, then filed with the English Dept.'s Director of Undergraduate Studies (DUS) in order to receive credit for this course. Credits: 1-3 credit hours, depending on the time required and nature of the internship. Approximately 10 hours a week of internship work equals three credit hours. At midterm, the faculty and on-site supervisors will communicate about the student's progress so that the faculty member can submit a midterm grade. English 399 will be graded only on a pass/fail basis. Repeatable for a total of up to 6 credit hours. Prereq: To be eligible for the internship, students must be sophomores, juniors or seniors, and (2) have completed both parts of the CCR/composition and communication requirement.

 ENG 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3) Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature, cultural critique, and composing law and justice. Topics are announced in the preceding semester. May be repeated under different subtitles to a maximum of 6 credits. Does not fulfill ENG major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. (Same as WRD 401.)

 ENG 405 EDITING ENGLISH PROSE. (3) This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student's own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and preparation of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Does not fulfill ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as WRD 405.)

 ENG 407 INTERMEDIATE WORKSHOP IN CREATIVE WRITING (Subtitle required). (3) Continued studies in the writer's craft, focusing on student work but with increased emphasis on outside reading. Areas of workshop practice include Poetry, Fiction, and Creative Non-Fiction. Prereq: ENG 207 in the same genre or consent of instructor. May be repeated to a maximum of 6 credits. Provides ENG Major Elective credit and ENG Minor credit. Can count only once for ENG Major 400-level course requirement. Required for ENG Creative Writing Option.

 ENG 425 ENVIRONMENTAL WRITING. (3) Students will consider the ways writers address environmental issues by exploring various forms of environmental writing, from personal narrative to literary nonfiction to advocacy. Students will be required to take a mandatory day long field trip to UK’s Robinson Forest. All students must participate in this field trip. Prereq: Completion of Composition and Communication requirement or consent of instructor.

 ENG 440G STUDIES IN BRITISH LITERATURE: (Subtitle required). (3) An advanced British literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 450G STUDIES IN AMERICAN LITERATURE: (Subtitle required). (3) An advanced American literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major 400-level course requirement. Provides ENG Major Elective credit.

 ENG 460G STUDIES IN AFRICAN-AMERICAN LITERATURE: (Subtitle required). (3) An advanced African-American literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 470G COMPARATIVE AND TRANSLATIONAL STUDIES IN LITERATURE: (Subtitle required). (3) An advanced literature course focusing on comparative or transnational periods, themes, genres, national or ethnic traditions, or one or more authors. Possible areas of study include transatlantic connections, diasporic communities, or comparisons between English language authors and foreign authors in translation. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 480G STUDIES IN FILM (Subtitle required). (3) An advanced course in the history, analysis, criticism, and theory of film. Viewing of films outside of class is required. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. ENG 280 strongly recommended. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 490G STUDIES IN LITERATURE AND GENDER: (Subtitle required). (3) An advanced course focusing on any aspect of gender in literary studies, such as gender and genre, gender issues in a particular literary period, masculinity, minority women writers, or feminist literary theory. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 491G STUDIES IN THEORY: (Subtitle required). (3) An advanced course focusing on any aspect of literary theory, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 492G CULTURAL STUDIES: (Subtitle required). (3) An advanced course focusing on any aspect of cultural studies, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 495 MAJOR HONORS SEMINAR (Subtitle required). (3) An advanced undergraduate seminar in literature, film, or cultural study. Prereq: Junior or senior standing and instructor consent. May be repeated to a maximum of 3 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 502 TECHNOLOGY IN LITERATURE AND FILM. (3) This course will explore one of the most popular storylines in fiction and film, and one that is relevant to life throughout our history: humans and their relationships to machines and technology. Literature and cinema have long provided a perfect medium for telling stories about such relationships, for exploring how they intersect with and shape our lives, and for documenting how this has changed over time. Credit for this course can be applied to the certificate in Liberal Studies and not toward the B.A., M.A., Ph.D., or M.F.A. in English.

 ENG 507 ADVANCED WORKSHOP IN CREATIVE WRITING (Subtitle required). (3) For the student who has shown marked talent and commitment, this course provides a rigorous workshop among peers and includes additional attention to outside reading. Each student will produce a chapbook of poems or stories. See departmental listings for different offerings per semester. Prereq: ENG 407, or the equivalent, and consent of the instructor. May be repeated with different subtitles (different or same genre) to a maximum of 6 credits. Required for the ENG Creative Option under two different subtitles. Provides ENG Major Elective credit and ENG Minor credit.

 ENG 509 COMPOSITION FOR TEACHERS. (3) A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do quite a bit of writing. Provides ENG Major Elective credit and ENG Minor credit. (Same as EDC 509.)

 ENG 512 ANALYSIS OF ENGLISH SYNTAX. (3) Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: LIN 221 or graduate standing. (Same as LIN 512.)
Course Descriptions

ENG 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
This course examines the current theories and methods of teaching English as a second language. Prereq: ENG 413 or 414; or consent of instructor. Provides ENG Major Elective and ENG minor credit. (Same as EDC/LIN 513.)

ENG 514 TESL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 514.)

ENG 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE. (3)
This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English, culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. Fulfills the ENG Early Period requirement. Provides ENG Major Elective Credit and ENG Minor Credit. (Same as ENG 518.)

ENG 519 INTRODUCTION TO OLD ENGLISH. (3)
An introduction to the study of the Old English language and its literature from the 8th to the 11th centuries. Emphasis on learning the basic vocabulary and grammar of Old English in the West Saxon standard written dialect. Readings include excerpts from prose and poetry, the basics of Old English verse forms and alliterative poetry, and some historical and cultural background. The course is particularly recommended for students of European languages (especially German) and Linguistics; some basic background in Linguistics is recommended but not required. Fulfills ENG major Early Period Requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 570 Selected Topics for Advanced Studies in Literature (Subtitle required). (3)
Study of special topics that cut across the normal divisions of genre or period, such as the relations of literature to other disciplines; metaphor and symbolism; interpretive theory. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor.

PROSEMINARS: The purpose of the proseminar courses (600 level) is to impart through lectures and discussion both the facts of literary history and the techniques of literary analysis. They are, therefore, designed to go beyond the mere information level to techniques of contemporary literary criticism and scholarship.

ENG 600 BIBLIOGRAPHY AND METHODS OF RESEARCH. (3)
An introduction to descriptive and enumerative bibliography, textual criticism, and historical scholarship.

ENG 601 ESSAYS AND CREATIVE NONFICTION. (3)
Study and practice in nonfiction writing, including literary nonfiction, literary journalism, personal essays, and creative nonfiction. May not be repeated for graduate credit. Prereq: Junior standing or consent of instructor.

ENG 602 CONTEMPORARY AMERICAN LITERATURE. (3)
This course examines American literature written since the 1960s, introducing students to important writers, as well as key genres, movements, and intellectual trends, of the period. The class will situate literature within various social, political, cultural, and historical contexts to better understand literary imagination of the contemporary world. Credit for this course can be applied to the certificate in Liberal Studies and not toward the B.A., M.A., Ph.D., or M.F.A. in English.

ENG 605 EDITING. (3)
ENG 605 offers instruction in the history of U.S. publishing and extensive practice in verification of sources, fact checking, copy editing, and manuscript preparation. Prereq: Admission to Graduate School or consent of instructor.

ENG 607 GRADUATE WRITING WORKSHOP (Subtitle Required). (3)
A course for experienced writers who have some knowledge of contemporary American literature. Equal emphasis on students’ original work and outside reading. Each student will produce a chapbook of poems or stories and write a short introduction to it. May be repeated with the same subtitle to a maximum of fifteen credits. Prereq: Consent of instructor.

ENG 608 CRAFT OF WRITING (Subtitle required). (3)
This course examines the craft, emphasizing techniques, style, and structure. May be offered in each genre offered in the MFA degree program. At least 6 hours of courses related to the study of creative writing genres, such as: Craft of Poetry, Fiction, or Nonfiction, with emphasis on themes such as: Ekphrastic Writing, Experimental Forms, Working Class Themes, etc. Prereq: This course is open only to MFA in Creative Writing candidates or by permission of the instructor.

ENG 609 COMPOSITION FOR TEACHERS. (3)
A course in the theory and practice of teaching English composition at the college level. Required of first-year teaching assistants in the Department of English, the course is structured to match the ordering of English 101 so that the practical work of college writing and the theoretical considerations of English 609 will be mutually reinforcing.

ENG 610 STUDIES IN RHETORIC. (3)
This course explores theories of rhetoric with readings drawn from major theoreticians and rhetoricians; applies theory to the practice of teaching college writing; with special emphasis on argumentation, the subject of English 102; and provides an opportunity for teaching assistants to get help from the teacher and from their peers in responding to and evaluating students’ written work. This course, required of second semester teaching assistants in the Department of English, continues the work of English 609. Prereq: ENG 609 or equivalent.

ENG 611 LITERATURE TEACHING SEMINAR. (3)
This seminar prepares graduate students to teach literature classes at the University of Kentucky and elsewhere. It offers instruction and guidance in curriculum design, syllabus creation, reading and work exercises, and more. Students develop a portfolio of course materials and refine skills for teaching literature and film at the introductory as well as advanced levels of an undergraduate curriculum. This course is not a requirement for completing the Ph.D. degree, but it is required for graduate instructors to be approved to teach their own introductory-level literature and film classes in the University of Kentucky English Department curriculum.

ENG 612 STRUCTURE AND STYLISTICS OF FRENCH. (3)
A study of the history and structure of French with an emphasis on contemporary features. (Same as FR/LIN 612.)

ENG 619 BEOWULF. (3)
Translation and study of Beowulf. ENG 518 or ENG 519 recommended as background courses.

ENG 620 STUDIES IN MODERN ENGLISH LITERATURE. (3)
A study in depth of selected writers and movements.

ENG 621 STUDIES IN CHAUCER. (3)
A study in depth of selected works of Chaucer, especially Troilus, in relation to aspects of the medieval literary tradition.

ENG 622 STUDIES IN RENAISSANCE LITERATURE: 1500-1600. (3)
Intensive study of selections from the drama, poetry, and prose of the period.

ENG 625 STUDIES IN RENAISSANCE DRAMA EXCLUSIVE OF SHAKESPEARE. (3)
A study in depth of selected writers.

ENG 626 STUDIES IN SPENSER, SHAKESPEARE, MILTON. (3)
An intensive study of one or more major authors and the relevant criticism and scholarship. Prereq: ENG 425 or ENG 426 or ENG 428 or equivalent.

ENG 630 STUDIES IN ENGLISH LITERATURE: 1660-1720. (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG 631 STUDIES IN ENGLISH LITERATURE: 1720-1780. (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG 635 STUDIES IN ROMANTICISM. (3)
Readings in selected authors and relevant scholarship.

ENG 638 STUDIES IN VICTORIAN LITERATURE. (3)
Readings in the prose and poetry non-fiction of the period with relevant scholarship.

ENG 642 STUDIES IN MODERN BRITISH LITERATURE. (3)
Selected writers, works, and movements in the modern period with concentration on the period from 1890 to 1945.

ENG 651 STUDIES IN AMERICAN LITERATURE BEFORE 1860. (3)
A study in depth of selected writers and movements.

ENG 652 STUDIES IN AMERICAN LITERATURE: 1860-1900. (3)
A study in depth of selected writers and movements.

ENG 653 STUDIES IN AMERICAN LITERATURE SINCE 1900. (3)
A study in depth of selected writers and movements.

ENG 656 BLACK AMERICAN LITERATURE. (3)
An in-depth study of Black American literature, with concentration on major texts by major black writers. (Same as AAS 656.)

ENG 660 MODERN CRITICAL THEORY (Subtitle required). (3)
Detailed examination of one or another topic in contemporary theory of interpretation, such as literature and analytical philosophy, phenomenology and literature, structuralism, Marxism, psychoanalysis. May be repeated up to 6 credit hours under different subtitles.

ENG 681 STUDIES IN FILM. (3)
Comprehensive study of the history, theory, and criticism of film, with concentration on a series of major American and foreign films. Viewing of films outside of class is required. May be repeated up to 6 credit hours under different subtitles.

ENG 682 STUDIES IN FICTION. (3)
A study in depth of selected types of fiction.
ENG 690 STUDIES IN LITERATURE AND GENDER (Subtitle required). (3)
This course focuses on gender as a primary category for literary analysis. Topics will vary from a group of authors, an historical period or an aesthetic movement, to a genre, a theme, or an aspect of literary theory. May be repeated under different subtitles to a maximum of six credits.

ENG 691 READINGS IN RHETORIC (Subtitle required). (1)
This reading course allows graduate students to integrate readings in Rhetic and Composition scholarship and provides an opportunity to discuss research with faculty associated with Rhetic and Composition. In addition to readings, students will be expected to keep a reading journal or complete a brief annotated bibliography. May be repeated to a maximum of three credits. Prereq: ENG 609 and ENG 610 or consent of instructor.

ENG 700 TUTORIAL FOR PH.D. CANDIDATES. (3)
This course allows Ph.D. candidates who have completed all course work requirements to work together under the direction of a senior faculty member in preparing for and taking the Qualifying Examination. May be repeated to a maximum of twelve credits. Prereq: Admission to the Ph.D. program and instructor’s consent.

ENG 720 SEMINAR IN MEDIEVAL LITERATURE. (3)
Recent topics: medieval fiction; Chaucer and the Gothic mind. May be repeated to a maximum of six credits.

ENG 722 SEMINAR IN RENAISSANCE STUDIES (Subtitle required). (3)
Advanced work on a specific author or topic. Recent topics: Eco-Milton, Romance narrative. May be repeated to a maximum of nine credits.

ENG 730 SEMINAR IN 18TH CENTURY LITERATURE. (3)
Recent topics: neoclassicism. May be repeated to a maximum of six credits.

ENG 735 SEMINAR IN ROMANTIC LITERATURE. (3)
Recent topics: Keats; Wordsworth. May be repeated to a maximum of six credits.

ENG 738 SEMINAR IN VICTORIAN LITERATURE. (3)
Seminar in Victorian literature. May be repeated to a maximum of six credits.

ENG 740 SEMINAR IN 20TH CENTURY BRITISH LITERATURE. (3)
Seminar in 20th century British literature. May be repeated to a maximum of six credits.

ENG 747 DISSERTATION RESEARCH. (0)
Half-time to full-time work. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ENG 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on theses. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ENG 750 SEMINAR IN COLONIAL LITERATURE. (3)
Seminar in Colonial Literature; may be repeated to a maximum of six credits.

ENG 751 SEMINAR IN AMERICAN LITERATURE: 1800-1860. (3)
Seminar in American literature 1800-1860. Recent topics: Emerson and Melville; Hawthorne. May be repeated to a maximum of six credits.

ENG 752 SEMINAR IN AMERICAN LITERATURE: 1860-1900. (3)
Seminar in American literature 1860-1900. Recent topics: Whitman and Dickinson. May be repeated to a maximum of six credits.

ENG 753 SEMINAR IN AMERICAN LITERATURE SINCE 1900. (3)
Seminar in American literature since 1900. Recent topics: Faulkner, Wolfe, and Warren. May be repeated to a maximum of six credits.

ENG 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ENG 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ENG 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ENG 771 SEMINAR IN SPECIAL TOPICS (Subtitle required). (1-3)
Seminar in special topics; includes genres and subject matters such as symbolism which cover more than one period of literature. Recent topics: symbolism and allegory. May be repeated up to 9 credit hours under different subtitles.

ENG 780 DIRECTED STUDIES. (1-6)
Independent work devoted to study and research on specific subjects and problems according to the interests and needs of individual students. May be repeated to a maximum of nine credits. Permission of chairperson required.

ENG 781 SEMINAR IN FILM (Subtitle required). (3)
Seminar in special topics in film, such as directors, genres, historical periods, film and literature, film theories, and film movements. Viewing of films outside of class is required. May be repeated under different subtitle to a maximum of nine credits.

ENS Environmental Studies

ENS 200 INTRODUCTION TO ENVIRONMENTAL STUDIES. (3)
A broad-ranging multidisciplinary introduction to current environmental issues and problem solving presented through a series of case studies. Case studies incorporate contemporary environmental themes including industrialization, resource use, and pollution; changing land use patterns; global warming and deforestation; biodiversity; political regulation; economic resources; cultural attitudes toward nature. Each case study will present environmental issues as scientific problems with social, political, philosophical, and economic causes and consequences. Emphasis is placed on understanding and combining different approaches to environmental problems and on proposing public policy solutions.

ENS 201 ENVIRONMENTAL AND SUSTAINABILITY STUDIES I: HUMANITIES AND SOCIAL SCIENCES. (3)
This course will provide a foundation in the core ideas, theoretical concerns and practical approaches to environmental studies framed within the disciplines of the humanities and social sciences. Students will study human interactions with the environment, both natural and built, and inter-human relations conditioned by local and global environmental factors. Students will obtain a basic conceptual and historical understanding of the nature and value of their local, regional, and global environment.

ENS 202 ENVIRONMENTAL AND SUSTAINABILITY STUDIES II: NATURAL SCIENCE AND POLICY. (3)
This is an introduction to natural science and policy as they pertain to understanding environmental studies. The core ideas include understanding how the ecological theories of population dynamics, community structure, and ecosystems dynamics lay a scientific foundation to understanding the nature of current environmental issues and how they might be addressed individually and through governmental regulation.

ENS 300 SPECIAL TOPICS (Subtitle required). (1-4)
Special topics in environmental studies. This course permits the offering of special topics in order to take advantage of faculty specialties. Course topic must be approved by the Environmental Studies Program Director. Prereq: Variable, when topic is identified.

ENS 395 INDEPENDENT WORK. (1-4)
Under special conditions selected students may investigate specific environmental issues and problems. The instructor and the student will agree on a formal semester plan/learning contract, which will be filed with the Environmental Studies Program Director and will include weekly reports to the instructor. Prereq: Environmental Studies minor, 3.0 G.P.A., consent of instructor.

ENS 400 SENIOR SEMINAR (Subtitle required). (3)
This course will draw on your interdisciplinary understanding of environmental issues and your problem-solving capacities developed while fulfilling Environmental Studies Minor requirements. It is a participatory capstone seminar designed to utilize and test your critical ability for independent thinking organized around specific environmental issues. Independent library research will be an integral part of the course. Students are expected to prepare for weekly, interactive topical seminar meetings. Group projects will culminate in individual term papers/projects on different aspects of the environmental issues under discussion. Specific topics will vary. Prereq: ENS 200 and 12 hours of course work from approved Environmental Studies courses (or instructor’s consent). This course is a Graduation Composition and Communication Requirement (GCC) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENS 601 ENVIRONMENT AND SUSTAINABILITY: ISSUES AND IDEAS. (3)
This course will survey some of the most important environmental problems (climate change, biodiversity loss, deforestation, water scarcity) and the tools needed to analyze, understand, and respond to these problems (market-based solutions, political economy, institutional economic theories, environmental ethics). Students will also explore new scientific ideas on sustainability to better understand the contemporary environmental problems the world is facing. With rigorous thinking about the science of sustainability, students will have the knowledge and skills so that they can help institutions, business, public policy, and individuals understand and act on key principles of sustainability. Prereq: Admission to the MA or Graduate Certificate in Applied Environmental and Sustainability Studies or permission of instructor.

ENS 602 ENVIRONMENT AND SUSTAINABILITY POLICY AND GOVERNANCE. (3)
This course will explore the roles of governments, markets, and civil society in the creation, adoption, and implementation of environmental and sustainability rules and norms. We will evaluate leading environmental and policy strategies, including traditional state regulation, market-based incentives and regulations created by private actors (civil society and corporations/Corporate Social Responsibility). Increasingly, the interactions between different forms of regulation figure prominently in debates about environmental and sustainability governance. We will draw upon empirical examples of governance and policy for a diverse reference set of environmental and sustainability challenges and solutions. Students will develop strong critical thinking and problem-solving skills in order to contribute to environmental and sustainability policy and governance. Prereq: Admission to online MA program or Graduate Certificate in Applied Environmental and Sustainability Studies or consent of instructor.
Course Descriptions

#ENS 603 COMMUNICATING ENVIRONMENTAL AND SUSTAINABILITY STUDIES. (3)
The course provides students with an understanding of the latest scientific research in the field of environment and sustainability studies and the tools to communicate this research effectively to the public. In addition, students will learn key technical writing skills to apply knowledge in environmental and sustainability studies. For technical writing, students will develop skills for writing letters, grant proposals, reports, and presentations for specific audiences. To communicate with a broad audience about the questions central to environmental and sustainability studies, students will write short articles, record podcasts, make videos, craft memes, and author multimodal texts. Storytelling and clear description will also be emphasized across multiple platforms, which will include blogs, audio podcasts and short videos, among others. Students will build the critical skill sets necessary for technical writing as well as craft dynamic and compelling visuals. Prereq: Admission to online MA or Graduate Certificate in Applied Environmental and Sustainability Studies or consent of instructor.

#ENS 605 SEMINAR IN ENVIRONMENTAL AND SUSTAINABILITY STUDIES (Subtitle required). (3)
Seminars in Environmental and Sustainability Studies, including, for example, environmental racism, environmental justice, sustainability ethics, environment and development, climate change and climate justice, environmental health, or environment and society. May be repeated to a maximum of six credits under different subtitles. Prereq: Admission to the online MA or Graduate Certificate in Applied Environmental and Sustainability Studies or permission of instructor.

#ENS 695 RESEARCH IN APPLIED ENVIRONMENTAL AND SUSTAINABILITY STUDIES. (3)
Students will complete a significant research project in environmental and sustainability studies that includes reviewing relevant literature and collecting data. Students will design an independent research project using recognized research methodology and will collect and analyze data under the guidance of their faculty advisor and graduate committee. A learning contract with project clearly defined must be approved by supervising faculty member. Prereq: ENS 601 and ENS 602 and ENS 603.

#ENS 696 REPORTING RESEARCH IN APPLIED ENVIRONMENTAL AND SUSTAINABILITY STUDIES. (3)
This course is part of the Plan B Capstone option for the MA in Applied Environmental and Sustainability Studies. Students will learn to report on the significant research projects in environmental and sustainability studies that they conducted in ENS 695 under the guidance of their faculty advisor. Students will complete a report on their research in a format agreed upon with their faculty advisor. Students will also create a blog post and give an oral presentation supported with visual aids (such as powerpoint) to demonstrate their ability to apply different forms of communication in environmental and sustainability studies. A learning contract with a clearly defined scope of the work and deadlines must be approved by the supervising faculty member. Prereq: ENS 603, ENS 695.

#ENS 697 INTERNSHIP IN APPLIED ENVIRONMENTAL AND SUSTAINABILITY STUDIES I. (3)
Students pursuing the Plan B Internship option in the MA in Applied Environmental and Sustainability Studies are required to complete six credit hours of internships in order to graduate and must work 40 hours per week at their internship. Students are ultimately responsible for finding and completing their internships, students do receive ample support and assistance from program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor, and the host organization supervisor. Internships can be completed during spring and fall semesters or the summer after students have completed their regular course work. Prereq: ENS 601, ENS 602, and ENS 603.

#ENS 698 INTERNSHIP IN APPLIED ENVIRONMENTAL AND SUSTAINABILITY STUDIES II. (3)
Students pursuing the Plan B Internship option in the MA in Applied Environmental and Sustainability Studies are required to complete six credit hours of internships in order to graduate and must work 40 hours for each credit hour earned. While students are ultimately responsible for finding and completing their internships, students do receive ample support and assistance from program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor, and the host organization supervisor. Internships can be completed during spring and fall semesters or the summer after students have completed their regular course work. Prereq: ENS 601, ENS 602, ENS 603, ENS 697.

#ENS 699 INDEPENDENT STUDY IN ENVIRONMENT AND SUSTAINABILITY STUDIES. (3)
Supervised individual work in Applied Environmental and Sustainability Studies. A learning contract with a clearly defined project must be approved by supervising faculty member or program director. May not be repeated for additional credit. Prereq: ENS 601, ENS 602, and ENS 603 or consent of instructor.

University of Kentucky

2019-2020 Undergraduate Bulletin

564
ENT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY. (3)
An introductory evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). (Same as ABT 505.)

ENT 509 BRAINS AND BUDS: NEUROSCIENCE OF POLLINATION. (3)
Pollinators have tremendous agricultural and societal value, and to a neuroscientist, they showcase principles of cognition in the real world. Pollinator species present exquisitie examples of co-evolution, physiological and dietary specialization, navigation in complex landscapes, collective-decision-making processes, and the behavioral consequences of environmental toxicants and disease. In this course, we will use pollinator species (honey bees and other insects, as well as vertebrate pollinators) to explore how critical features of pollination interact at the level of brain function, covering important neuroscience topics including sensory ecology and evolution, neural energetics, mechanisms of addiction and reward, molecular neuroscience, cognition, and learning and memory. Prereq: Students must have at least Junior standing in a life sciences discipline, or permission from instructor. (Same as BIO 509.)

ENT 530 INTEGRATED PEST MANAGEMENT. (3)
Principles of insect damage, populations and distributions. Various types of natural and applied control, including problems of insecticide toxicity, resistance and residues. Prereq: ENT 300 or ENT 310 or ENT 320 or equivalent course, or consent of instructor.

ENT 550 SPIDER ECOLOGY AND BEHAVIOR. (3)
Spiders are fascinating in their own right, and also are major predators in terrestrial food webs. This course explores the ecology and behavior of spider as model predators in systems ranging from undisturbed forests and meadows to agroecosystems and the urban landscape. While focusing on spiders, the course also introduces the two general sub-themes: (1) the advantages of employing diverse approaches (e.g. field and laboratory experiments, non-manipulative observations, and meta-analyses) in ecological and behavioral research; and (2) the strengths and limitations, of using model organisms to develop and test theory. Prereq: One year of undergraduate biology.

ENT 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of biology (BIO 103 or BIO 148 or equivalent) and permission of instructor. (Same as BIO/CHP 561.) [Offered in fall – odd years.]

ENT 563 PARASITOLOGY. (4)
Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as BIO 563.)

ENT 564 INSECT TAXONOMY. (4)
A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq. Consent of instructor. (Same as BIO 564.) [Offered in fall – even years.]

ENT 565 INSECT BEHAVIOR. (3)
The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology or permission of instructor. (Same as BIO 565.)

ENT 574 ADVANCED APPLIED ENTOMOLOGY. (4)
The objective of this course is to present the student with advanced concepts of applied entomology in a system-specific context. Each week, the insect problems associated with a different commodity/production system will be presented so as to illustrate a different broadly-based theme. Prereq: An introductory entomology course and consent of instructor.

ENT 595 ENTOMOLOGICAL SPECIAL TOPICS (Subtitle required). (1-4)
Special topics or experimental courses in Entomology for undergraduate and graduate students. Special title is required and must be approved by the chairperson of the Department of Entomology. A particular title may be offered twice at most under ENT 595. Students may not repeat under the same subtitle. Prereq: Will be set by instructor. [Offered in fall and spring.]

ENT 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/FOR 606.)

ENT 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivsion) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/FOR 607.) [Offered in fall only.]

ENT 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/FOR 608.)

ENT 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/FOR 609.) [Offered in fall only.]

ENT 625 INSECT-PLANT RELATIONSHIPS. (3)
This course examines the natural history, ecology, and evolution of insect/plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multihop鸡-level interactions, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as BIO 625.) [Offered in spring – odd years.]

ENT 635 INSECT PHYSIOLOGY. (4)
Study of insect physiological processes including development, digestion, reproduction, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq. Consent of instructor. (Same as BIO 635.) [Offered in spring – even years.]

ENT 636 INSECT MOLECULAR BIOLOGY. (4)
Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq. ENT/BIO 635 or consent of instructor. (Same as BIO 636.) [Offered in spring – odd years.]

ENT 660 IMMATURE INSECTS. (3)
Bionomics, structure and classification of immature stages of insects; practice in identifying. Lecture, one hour; laboratory, six hours. Prereq: BIO 570 or ENT 564, or consent of instructor.

ENT 665 INSECT ECOLOGY. (3)
The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq. Consent of instructor. (Same as BIO 665.) [Offered in fall – even years.]

ENT 667 INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches for minimizing the incidence and impact of invasions. Prereq. Graduate standing or consent of instructor. (Same as BIO/FOR 667.) [Offered in fall – odd years.]

ENT 670 SCIENTIFIC PUBLISHING: PROCESS AND ETHICS. (2)
An introduction to scientific publishing, including types of scientific journals, choosing where to publish, the structure of scientific papers, the peer review process, data management and archiving, post-publication promotion of research, metrics of scientific impact such as impact factors and altmetrics, and publication ethics. Prereq. Graduate student in a science discipline OR permission of instructor.

ENT 684 PHYLOGENETIC SYSTEMATICS. (3)
The principles related to the use of arthropods to suppress populations of arthropod pests and weeds. Includes historical perspective, ecological relationships, and contemporary issues related to the conservation and manipulation of arthropod predators, parasitoids, and herbivores. Prereq: ENT 300 or equivalent OR permission of instructor. (Offered in spring – even years.)

ENT 686 SPECIAL TOPICS IN ENTOMOLOGY (Subtitle required). (1-4)
Special topics or experimental courses in entomology for graduate students. Special title required and must be approved by the chairperson of the Department of Entomology. A particular title may be offered twice at most under ENT 686. Students may not repeat under the same subtitle. Prereq: Will be set by instructor. [Offered in fall and spring.]

ENT 748 MASTER'S THESIS RESEARCH. (0)
Full-time to half-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall and spring.]
**Course Descriptions**

**ENT 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

**ENT 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall and spring.]

**ENT 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

**ENT 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.** (0-12)
May be repeated indefinitely.

**ENT 770 ENTOMOLOGICAL SEMINAR.** (0-1)
Discussion of current research problems in entomology. May be repeated to a maximum of six hours. [Offered in fall and spring.]

**EPE 520 PROGRAM EVALUATION.** (3)
This course is an application-focused course that provides an overview of program evaluation. This course will cover the types of evaluation, the theory associated with evaluation, and the tools most commonly applied to the evaluation process. Students will develop an appreciation for the flexibility needed in order to perform evaluation tasks in practical situations related to their area of expertise. (Same as EDP 520/KHP 520.)

**EPE 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS.** (3)
Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking, and rating systems. (Same as EDC/EDP 522.)

**EPE 525 SPECIAL TOPICS SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION.** (3)
Study of selected topics in educational policy studies and evaluation. May be repeated to a maximum of six credits but no more than three may be earned under the same subtitle. Prereq: Consent of instructor.

**EPE 555 COMPARATIVE EDUCATION.** (3)
Analytic and comparative study of contemporary education in selected countries, with emphasis on the historical development and total cultural context of educational programs in non-Western countries. Informal as well as formal agencies and programs will be studied with particular attention to recent reforms and innovations. Prereq: Junior, senior or graduate status, or consent of instructor.

**EPE 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA.** (3)
This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate (with permission) or graduate status in the College of Education; or consent of the instructor. (Same as EDP 557.)

**EPE 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II.** (3)
The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stat/SoftWare. Prereq: EDP/EPE 557 or equivalent. (Same as EDP 558.)

**#EPE 560 ASSESSMENT AND SCHOOL DATA ANALYSIS.** (3)
This course is an introduction to the theoretical and practical aspects of educational assessment at the student, classroom, school, state/province, national, and international levels. Students examine the history of assessment in education, the varied purposes of assessment, the strengths and shortcomings of different assessment formats, and relevant research regarding the effectiveness of various types of assessment for specific educational purposes. They also explore the development of assessments to address particular types of student learning goals, the construction of rubrics to offer students descriptive feedback on their performance, the interpretation of assessment results, and the use of those results to improve teaching quality and student learning. There are no formal prerequisites, but an introductory course in statistical methods (e.g., EDP/EPE/EDC 522) are recommended. The course may be conducted in either an online or face- to-face format, depending on the semester and instructor. (Same as EDC 540/EDE 560.)

**EPE 571 WRITING SEMINAR IN EDUCATIONAL RESEARCH.** (3)
This course is intended to familiarize students with the academic writing process and expectations. Topics include: qualitative writing, quantitative writing, and program evaluation report writing. Other specific writing topics may also be explored

**EPE 600 SOCIAL FOUNDATIONS TOPICS FOR SECONDARY EDUCATION.** (1)
This course is a seminar designed to introduce students to the theoretical and practical aspects of educational assessment at the student, classroom, school, state/province, national, and international levels. Students examine the history of assessment in education, the varied purposes of assessment, the strengths and shortcomings of different assessment formats, and relevant research regarding the effectiveness of various types of assessment for specific educational purposes. They also explore the development of assessments to address particular types of student learning goals, the construction of rubrics to offer students descriptive feedback on their performance, the interpretation of assessment results, and the use of those results to improve teaching quality and student learning. There are no formal prerequisites, but an introductory course in statistical methods (e.g., EDP/EPE/EDC 522) are recommended. The course may be conducted in either an online or face-to-face format, depending on the semester and instructor. (Same as EDC 540/EDE 560.)

**EPE 601 PROSEMINAR.** (3)
Introductory survey of the bibliographic parameters and research approaches to educational policy studies and evaluation. Graduate faculty resources and typical research problems are introduced. Emphasis upon significance and importance of the thesis writing and dissertation in graduate studies. Required, first semester of study, for all degree students in the department. Prereq: Graduate standing or consent of instructor.

**EPE 602 SOCIAL POLICY ISSUES AND EDUCATION.** (1-3)
Study of philosophical, historical, and sociological dimensions of contemporary educational policy issues. Topical policy controversies, such as equality of educational opportunity, tuition tax credits, and religious education, will be examined.
EPE 603 POLITICS OF EDUCATIONAL LEADERSHIP. (3)
This course provides a study of the political contexts in which educational leaders must operate. The course examines various policy actions, institutions, ideologies, and competing interests, both internal and external to educational institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Graduate standing. (Same as EDL 704.)

EPE 612 INTRODUCTION TO HIGHER EDUCATION. (3)
This course is designed to give the student a broad overview of contemporary higher education. The course examines major trends, issues, and problems facing colleges and universities from a variety of perspectives, including historical, administrative, public policy, governance, and faculty. The primary objectives of the course are to assist the student in developing an understanding of 1) various components and operations of higher education and 2) the interaction of these components and operations.

EPE 619 SURVEY RESEARCH METHODS IN EDUCATION
(Subtitle required). (3)
Survey research is one of the most common and useful methods for gathering data in educational research. Obtaining valid and reliable research results requires the administration of instruments that provide valid and reliable measures of the variables selected for observation. This course will focus on principles of measurement and procedures for developing a variety of survey instruments and for determining their validity and reliability. It is designed to teach students both how to improve the questions and design instruments. The theory and practice of survey research relies on contributions from disciplines such as psychology, sociology, statistics, and computer science. The purpose of this course is to familiarize participants with basic features of the design and implementation of surveys, and acquaint them with some principles and underlying theory from disciplines that have traditionally used surveys most heavily. The course will cover major stages of the survey process, including hypothesis and problem formulation, study design, sampling, questionnaire design, interviewing techniques, pretesting, modes of data collection, data cleaning, management, and analysis. The course involves lectures, readings, and discussions. Students are encouraged to bring materials related to their own research interests. The course will provide an overview of the theoretical and experimental literature related to question and questionnaire design as well as focusing on practical issues in the design, critique, and interpretation of survey questions that are often not taught in formal courses. There will be exercises both in and outside of class to reinforce both theory and practice. Prereq: EPE/EDP 557 or an equivalent course; an introductory statistics course.

EPE 620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT 620; EDP 620.)

EPE 621 ADVANCED TOPICS AND METHODS OF EVALUATION
(Subtitle required). (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE/ANT 620; and consent of instructor. (Same as ANT 621; EDP 621.)

EPE 622 COLLEGE AND UNIVERSITY FACULTY. (3)
This course considers college and university faculty in their roles as researchers, teachers, and community/institutional servants. The class considers from various theoretical perspectives who faculty are, what they do, and how they relate to the environments and cultures in which they work. Prereq: EPE 612 or consent of instructor.

EPE 628 ETHICS AND EDUCATIONAL DECISION MAKING. (3)
Examination of ethical theories upon which educational evaluations are based and upon which they become the basis for educational policies. Theories considered include classical and rule utilitarianism, Rawlsian social justice, behavioralistic, critical, and hermeneutic theories of value. Prereq: EPE 603 or consent of instructor.

EPE 632 STUDENT SERVICES. (3)
This course focuses on student services (broadly defined) and those who work with college and university students outside of the academic arena. The course not only surveys the history of student services but critically examines its theoretical bases and current practices with special attention paid to the relationship between student services and other segments of campus. Prereq: EPE 612 or consent of instructor.

EPE 640 PHILOSOPHY OF EDUCATION. (3)
The course is designed to enhance the professional educator’s competence in analyzing and evaluating educational policies and programs. Theoretical frameworks, philosophical methods, and current educational debates are examined. May be repeated once to a maximum of six credits. Prereq: Two 600-level education or permission of instructor.

EPE 651 HISTORY OF EDUCATION IN THE UNITED STATES. (3)
A history of the growth and development of education in the United States from earliest colonial times to the present, including recent movements and trends.

EPE 652 HISTORY OF EDUCATIONAL THOUGHT. (3)
Description and critical examination of the core ideas of leading educational theorists in the history of Western culture. Emphasis upon the societal and cultural conditions in which the ideas emerged, and the relevance of these ideas to contemporary educational policy concerns.

EPE 653 HISTORY OF HIGHER EDUCATION. (3)
Social and institutional history of higher education which will include selected topics in European culture and education and which will emphasize the development of the American college and university. This is a Distance Learning (DL) course that will be offered via formats and media provided by the University of Kentucky Distance Learning Center. It will be asynchronous in character, using standard Distance Learning internet capabilities.

EPE 655 COMPARATIVE HIGHER EDUCATION. (3)
This seminar will explore comparative methods and theoretical frameworks in international higher education research. Students will examine questions of access, quality, and accountability in tertiary education, student mobility within nations and internationally, and the processes of internationalization and regional collaborations in higher education in the US and abroad.

EPE 661 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)
This is a statistics-oriented course that focuses on various aspects of regression analysis (general and generalized linear models). Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with and without interaction/moderation terms, with and without linear terms, contrast variable coding for categorical predictors, nested model comparison for hierarchical regression, etc.), regression diagnostics (outlying and influential cases identification and assessment, collinearity evaluation, residual analysis, etc.), logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), and other topics. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) for the data in hand, and interpreting regression analysis results using the right language. Students will gain requisite foundation knowledge necessary to learn more complex statistical tools and procedures, and become more critical of statistical presentations in academic journals and the mass media. Students will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, Stata, or R). Prereq: EPE/EDP 558 or consent of instructor.

EPE 663 FIELD STUDIES IN EDUCATIONAL INSTITUTIONS. (3)
Field research in an educational setting. Questions of theory, method, and application examined. Students plan and implement a study under faculty supervision. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EPE 665 EDUCATION AND CULTURE. (3)
An analysis of the cultural role and function of educational institutions and processes. Topics considered include schooling as cultural transmission, the community context of education, cross-national studies of schools, and implications of anthropological approaches for teacher training.

EPE 667 EDUCATION AND GENDER. (3)
The course examines the relationships between gender and education in U.S. society. The focus will be on the formation and enactment of gender within social and educational institutions. Using a variety of source materials and theories, we will address the following questions: How and what do educational institutions teach about gender? And how do females and males respond to these learning contexts? What are the normative and equity important to engendering our lives? How does schooling contribute to the differential experiences of women and men in their transitions to adult work in the domestic and waged labor forces? How can education contribute to societal changes in sex equity?

EPE 669 ORAL HISTORY. (3)
This course is an introduction to oral history methodology and theory. It is designed for persons intending to use oral and life history interviews in historical or other qualitative research. The course will also cover: oral history projects are initiated, projects are administered, interviews are conducted, and oral history interviews are preserved in archives and libraries. The course also explores the reliability of memory and the utilization of oral histories in public presentations. Readings in the course focus on the development of oral history as a research methodology. Assignments and discussions will provide experience with interviewing, recording and transcribing, editing and publishing oral histories.

EPE 670 POLICY ISSUES IN HIGHER EDUCATION. (3)
A survey of modern tendencies in higher education; scope and development, organization, administration, curricula, finance, faculty and student personnel. Designed primarily for prospective college administrators, teachers, and registrars.

EPE 671 ADVANCED WRITING SEMINAR IN EDUCATIONAL RESEARCH. (3)
This course is intended to familiarize students with the advanced academic writing process and expectations. Topics will vary each semester and may include advanced topics in the areas of manuscript writing, proposal development, grant writing, and evaluation report writing. Other specific writing topics may also be explored.

EPE 672 COLLEGE TEACHING AND LEARNING. (3)
A study of all phases of instruction at the college level. The course will include methods and principles of teaching, utilization of materials in teaching, a consideration of the teaching learning process as it relates to the individual student, and the evaluation of student progress. A comprehensive course for prospective college teachers.
Course Descriptions

EPE 674 THEORIES OF STUDENT DEVELOPMENT. (3)
A study of college student behavior, relationship of student personnel to total college program, organization and administration, evaluation, and research of college student personnel.

EPE 675 SOCIOLOGY OF HIGHER EDUCATION. (3)
A study of higher education and society using sociological views and policy perspectives. Topics include inequality and diversity in higher education; university and college community; organizations and cultural institutions; the academic profession, academic departments and disciplines; the social and academic lives of students; as well as the impact of higher education and its relations to labor markets.

EPE 676 ORGANIZATION AND ADMINISTRATION OF HIGHER EDUCATION. (3)
Purposes and scope of higher education, organization, general administration, faculty administration, inter-institutional cooperation, allocation of financial resources, state systems of higher education.

EPE 678 ECONOMICS OF HIGHER EDUCATION. (3)
This course addresses issues of equity and efficiency by analyzing 1) how students, faculty and institutions are influenced by markets and incentives, 2) the economic impact of higher education on students and society, and 3) the financial management of institutions.

EPE 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)
This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized scores; scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures for software implementing measurement techniques, gain requisite knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EDP/EPE 660, EPE 621, or equivalent. (Same as EDP 679.)

EPE 680 POLITICS OF HIGHER EDUCATION. (3)
Survey and analysis of the political processes and forces which influence the development and implementation of higher education policies, financing and programs at the federal, state and institutional levels.

EPE 681 HISTORY OF THE UNIVERSITY: GOVERNANCE AND ITS LEGAL CONTEXT. (3)
Identification and analysis of the legal and governance issues in medieval, reformation and American colonial universities and their implications for contemporary issues of governance, autonomy and academic freedom.

EPE 682 HIGHER EDUCATION AND THE LAW. (3)
Case analysis regarding the university as a legal entity, private universities, the constitutionally autonomous university and other public universities, faculty rights, student rights, miscellaneous issues. Prereq: EPE 681 or consent of instructor.

EPE 683 AFFIRMATIVE ACTION AND FEDERAL REGULATION OF HIGHER EDUCATION. (3)
Affirmative Action as a legal concept, history and current application; sexual harassment; special codes; higher education desegregation cases and other miscellaneous issues including copyright, age discrimination, ADA and the Rehabilitation Acts. Prereq: EPE 682 or consent of instructor.

EPE 684 HIGHER EDUCATION AND ATHLETICS: A HISTORICAL ANALYSIS. (3)
Historical analysis of the politics, economics and philosophical implications of intercollegiate athletics programs as part of the American college and university.

EPE 685 THE RESEARCH UNIVERSITY. (3)
Historical analysis of the changing character, missions and roles of research universities in the United States. Emphasis will be on critical examination of large-scale sponsored research and graduate programs.

EPE 686 PHILANTHROPY AND HIGHER EDUCATION. (3)
Social, historical and philosophical perspective on the development of philanthropy as a significant factor in the character of American higher education and non-profit sector.

EPE 690 THE COMMUNITY COLLEGE. (3)
Comprehensive analysis of community colleges: history, current activity and future; demography, budget, administration. Prereq: EPE 612 or consent of instructor.

EPE 703 PREPARING RESEARCH PROPOSALS. (3)

EPE 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3)
Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EDP 707.)

EPE 711 ADVANCED QUANTITATIVE METHODS (Subtitle required). (3-12)
This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologies used in methodologically-oriented studies in educational research, evaluation, and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. This course can be repeated for up to 12 credit hours. Prereq: Intermediate Statistics. (Same as EDP 711.)

EPE 712 ADVANCED PSYCHOMETRIC METHODS (Subtitle required). (3-12)
This course will provide students with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies in educational measurement and evaluation techniques. The goal of this course is to prepare students to analyze data using advanced psychometric methods. It covers topics in the areas of Rasch Modeling, Item Response Theory, Structural Equation Modeling, Advanced Survey Techniques, and Latent Variable Modeling (as well as additional techniques). Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. This course can be repeated for up to 12 credit hours. Prereq: Intermediate Statistics. (Same as EDP 712.)

EPE 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EPE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

EPE 763 ADVANCED FIELD STUDIES. (3)
This course continues an exploration of qualitative research methods in the study of education. It focuses on advanced data collection techniques and particularly on methods of data analysis, representation and writing. The course revolves around an experiential core of individual student research products. May be repeated to a maximum of six credits. Prereq: EPE 663, other introductory qualitative research methods courses or instructor's permission.

EPE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EPE 768 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EPE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EPE 773 SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Examination of selected problems in educational policy studies and evaluation. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EPE 777 SEMINAR IN HISTORY OF EDUCATION IN KENTUCKY. (3)
Emphasis upon implications of major trends in national historiography for needed research in education in Kentucky. Prereq: A graduate-level course in the history of education or consent of instructor.

EPE 785 INDEPENDENT STUDIES IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Independent study experience for advanced graduate students to investigate special problems and conduct research in educational policy studies and evaluation. Prereq: Permission of department chairperson required.

EPE 790 INTERNSHIP IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-6)
Formal assignment to an evaluation and/or policy analysis project in an appropriate educational setting. Student’s work directed and evaluated by both departmental faculty and on-site supervisor. Laboratory, 5-20 hours per week. May be repeated to a maximum of 12 credits. Prereq: Twelve hours graduate course work in the department and permission of the director of graduate studies.
EPI Epidemiology

EPI 714 EPIDEMIOLOGIC STUDY DESIGN. (3)
This course provides students with advanced course material relevant to the planning and execution of epidemiologic studies of various designs. The course will consider study designs which employ routinely collected data on disease occurrence, such as would be undertaken in government agencies and health departments, and the classic etiologic study designs including the case-control, prospective cohort, retrospective cohort, nested case control, case-cohort and case-crossover designs. The course will focus considerable attention on measurement methods and measurement error, borrowing examples from the subfields of epidemiology including occupational, cardiovascular, and social epidemiology. Given current interest on multilevel methods of analysis, the class will discuss approaches to the incorporation of designing multilevel studies. Finally, we will consider recent advances in experimental epidemiology with consideration of controlled community trials. Prereq: CPH 605 or consent of instructor.

#EPI 717 INTRODUCTION TO CAUSAL INFERENCE. (3)
Epidemiology can be defined as the study of the distribution and determinants of health and disease in human populations. As a result, most epidemiological studies are observational designs that are subject many biases. In this course, we will focus on the mitigation of confounding and selection bias through the application of causal inference methodologies. Prereq: CPH 712.

EQM Equine Science and Management

EQM 101 INTRODUCTION TO THE HORSE AND THE HORSE INDUSTRY. (3)
This course is an introduction to the horse and its basic anatomy, biology, and terminology. This course will also cover breeds, disciplines, and an overview of the equine industry. Prereq: Restricted to Equine Science and Management majors.

EQM 105 EQUINE BEHAVIOR AND HANDLING. (2)
This course covers basic equine behavior and how to handle horses safely in a variety of management situations. Students will use their understanding of equine behavior to develop management strategies and practices for all classes of horse. Prereq: EQM 101 and restricted to Equine Science and Management majors. [Offered in spring only.]

EQM 106 INTRODUCTION TO CAREERS IN THE EQUINE INDUSTRY. (1)
This course will introduce students to more than 30 equine industry related jobs through guest lecturers, career research, and job shadowing. Guest lecturers will represent various jobs in different disciplines. They will explain how they ended up with the career they have and through question and answer sessions discuss how others can find similar careers and share career advice with the class. Students will also learn about benefits including insurance, retirement, 401K plans, housing, time off, etc. and they will study different careers in relation to Myers-Briggs personality types. [Offered in spring only.]

EQM 205 EQUINE CAREER PREPARATION. (1)
This course will prepare students for careers in the equine industry by teaching them to prepare for, find, and apply for jobs. It will also help them learn to plan for and design their own business and related marketing, employee relations, and tax issues. [Offered in fall only.]

EQM 210 TOOLS AND TACK IN THE EQUINE INDUSTRY. (2)
An overview of the tools, tack and equipment in the equine industry and how they are utilized by different breeds and disciplines.

EQM 300 TOPICS IN EQUINE SCIENCE AND MANAGEMENT. (1-6)
Study in special topics in equine science and management. May be repeated under a different subtitle to a maximum of fifteen credit hours. Hours are variable with each special course. Prereq: As specified by the instructor.

EQM 301 THOROUGHBRED SALES. (1)
This course will introduce students to the thoroughbred sales industry. Students will learn about the different regional and targeted markets as well as the sales process from sales prepping to being auctioned off. Students will learn about the different sales organizations and the different roles of individuals at the sales including consignors, auctioneers, sales companies, veterinarians, owners, pinhookers, and bloodstock agents. Students will also be introduced to the legal aspects of thoroughbred sales from contracts to insurance to financial transactions and conditions of sale. Prereq: EQM 101 or consent of instructor. [Offered in spring only.]

EQM 302 EQUINE EVENT PLANNING. (1)
This course will introduce students to planning equine events. Students will learn about the process of event planning including organization, committee work, and preparing timelines. They will also be introduced to numerous marketing strategies and tools and gain experience working with different registration programs. Students will also gain hands on event planning experience by putting on and Equine Career Fair as a class. They will be assigned to committees, responsible for different tasks, and involved in the Equine Career Fair from developing measurable objectives for success to analyzing survey feedback. Prereq: Sophomore level or above. EQM students on first priority registration. [Offered in spring only.]

EQM 305 EQUINE INDUSTRY ISSUES. (3)
This will be an "assignment-intensive" course designed to present provocative, current equine industry issues to students. Students will then repackage and/or further research that information and communicate the information in various written and oral formats. This course fulfills the Graduation Composition and Communication Requirements (GCCR) for Equine Science and Management students. Prereq: Successful completion of CWRD 110 and 111 or equivalent; minimum of 30 credits; C or higher in EQM 101. Restricted to Equine Science and Management students.

EQM 340 EQUINE FACILITY DESIGN AND MANAGEMENT. (3)
This course examines the interaction between the physical design and facility management of equine facilities. Facility design needs and management will be discussed over a number of different types of enterprises, including but not limited to boarding, training, breeding, and competition facilities. Facility functions and design will focus on safety, functionality, and client expectations; management will look at the daily facility management activities as well as some limited financial considerations related to business profitability. Prereq: ECO 201 and ASC 320 or consent of instructor.

EQM 351 EQUINE HEALTH AND DISEASES. (3)
This course will focus on health issues affecting the horse industry. Students will learn about the diseases and parasites affecting horses in Kentucky and across the nation. In addition, discussions will focus on management practices used on horse enterprises to reduce incidence of disease and maintain health for breeding horses, performance horses and the recreational horse. Prereq: ASC 320 and major in Equine Science and Management B.S. degree program. [Offered in spring only.]

EQM 396 EQUINE STUDY ABROAD (Subtitle required). (3)
This course will help prepare students for the planned in-country equine experience. Students will increase their understanding of cultural and global awareness and sensitivity as well as the differences between the equine industries abroad and here in Kentucky and the United States. The in-country experience will include visits to equine related facilities and cultural and historic landmarks in the country they will be visiting. Additional fees beyond regular tuition will be incurred when taking this course. Prereq: Consent of instructor.

EQM 399 EQUINE SCIENCE AND MANAGEMENT INTERNSHIP. (1-6)
The equine internship is designed to provide students with experiences in career opportunities related to the horse industry. The internship gives students an educational experience that allows them to see the application of concepts learned in the classroom in an industry setting appropriate for the student. Prereq: senior standing (minimum of 60 credits), at least 120 hours of EQM core courses, 40 hours of verifiable previous work experience in the equine industry, a GPA of 2.0 or above, and an approved learning contract. [Offered in fall, spring and summer.]

EQM 490 CAPSTONE IN EQUINE SCIENCE AND MANAGEMENT. (3)
Discussion of the major issues impacting today’s equine industry. Students will use concepts from core and discipline related courses to analyze a variety of scenarios related to the industry. The scenarios will range from production to enterprise management, but may also include issues that have the potential to impact all aspects of the industry. Prereq: Senior standing, major in Equine Science and Management degree. [Offered in fall and spring.]

ER Emergency Medicine

ER 815 FIRST-YEAR ELECTIVE, EMERGENCY MEDICINE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Emergency Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

KEY: # = new course  * = course changed † = course dropped
ESL English as a Second Language

ESL 090 ENGLISH FOR INTERNATIONAL TEACHING ASSISTANTS. (3)
ESL 091 Academic Speaking and Listening for International Graduate Students is designed to help international students develop their oral and aural skills in a practical environment. Students’ pronunciation patterns are assessed at the beginning of the semester and time is spent developing a sense of American English sounds, rhythm, and intonation patterns. Course time will also be devoted to helping students develop communication strategies, prepare for and present short presentations, and to challenge students as well as roundtable discussions. Instruction is often individualized to meet the specific needs of the students and some class time is planned to enable all students to develop better listening strategies and confidence when speaking. Students may not count credit earned in ESL 091 toward their graduate degree requirements.

ESL 092 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 092 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 092 toward their graduate degree requirements.

ESL 093 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 093 Academic Speaking and Listening for International Graduate Students is designed to help international students develop their oral and aural skills in a practical environment. Students’ pronunciation patterns are assessed at the beginning of the semester and time is spent developing a sense of American English sounds, rhythm, and intonation patterns. Course time will also be devoted to helping students develop communication strategies, prepare for and present short presentations, and to challenge students as well as roundtable discussions. Instruction is often individualized to meet the specific needs of the students and some class time is planned to enable all students to develop better listening strategies and confidence when speaking. Students may not count credit earned in ESL 093 toward their graduate degree requirements.

ESL 094 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 094 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 094 toward their graduate degree requirements.

ESL 095 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 095 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 095 toward their graduate degree requirements.

ESL 096 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 096 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 096 toward their graduate degree requirements.

ESL 097 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 097 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 097 toward their graduate degree requirements.

ESL 098 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)
ESL 098 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Special attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 098 toward their graduate degree requirements.
EXP 455 CAPSTONE EXPERIENCE IN INNOVATION AND ENTREPRENEURSHIP. (3)
EXP 455 is designed as the required capstone course to earn the interdisciplinary Certificate in Entrepreneurship Studies at the University of Kentucky. It is aimed at providing students with the opportunity to integrate the knowledge and skills they have acquired as part of the courses they have completed in entrepreneurship as well as provide experiences for students to focus on innovative processes that require entrepreneurial thinking. The course is based upon the National Science Foundation Innovation Corps program and Stanford’s Lean Launch Pad developed by Steve Blank. Students get out of the building, build a company, and test hypotheses related to the nine building blocks of the Business Model Canvas as they complete a capstone project that draws on prior entrepreneurial coursework. The experience culminates in a formal, business plan pitch. The course requires students to apply their critical thinking skills as they synthesize previous coursework and extend and develop their own original ideas in entrepreneurial thinking. By integrating their knowledge and skills, students will also demonstrate that they possess them. Prereq: COM 381 and consent of instructor.

EXP 510 INTERNATIONAL SERVICE-LEARNING. (1-12)
This course is designed to introduce students to the theories, concepts, and practices of service-learning in an international setting. Service-learning engages the student in enhancing the common good through the application of learning to service. (Same as MC 500.)

EXP 650 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9)
A community-based or field-based learning experience under the supervision of a faculty member. Letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

EXP 651 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9)
A community-based or field-based learning experience under the supervision of a faculty member. Pass/Fail. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

FA Fine Arts

FA 501 ARTS-STUDY TOUR. (3)
Domestic or foreign tour for intensive study of the arts in major cultural centers. Seminars, tours, and performances are planned according to specific itineraries. Attendance at all scheduled seminars on campus and arts events during the tour plus maintenance of a journal and completion of a substantial course project is required. May be repeated to a maximum of six credits.

FAM Family Sciences

FAM 251 PERSONAL AND FAMILY FINANCE. (3)
Management of personal and family financial resources throughout the lifespan. A study of individual and family finances as related to planning, credit, savings, investment, insurance, taxes, housing costs, transportation costs, retirement and estate planning.

FAM 253 HUMAN SEXUALITY: DEVELOPMENT, BEHAVIOR AND ATTITUDES. (3)
An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. FAM 253 is a University Studies Program Course. Prereq: Three hours in social or behavioral science.

FAM 254 LIFE COURSE HUMAN DEVELOPMENT. (3)
An introduction to the basic principles of human development through the life course of the individual from conception to death, common life transitions, and social change shape people’s lives from birth to death. Roles of family, school, peers, and work will also be examined in relation to human development. Emphasis will be placed on the general theories of human development and their relation to the life course.

FAM 350 CONSUMER ISSUES. (3)
An in-depth study of consumer issues, rights, and responsibilities. An examination of how individual and societal decisions affect quality of life, including consumer safety, and the interactions of consumption, health, law, government regulations and the economy. Consumer education and financial literacy will also be emphasized.

FAM 352 ISSUES IN FAMILY SCIENCES. (3)
The scientific study of the family with a special emphasis on Family Systems Theory. Current research and theory as it applies to Family Systems will be explored. Topics covered will include other important historical and contemporary theories related to family structure and processes, historical trends in marriage and family life, gender role theory, sexual intimacy, friendship and love, parenthood, communication and conflict, managing economic resources, divorce and remarriage, human abuse, adult child interactions, family roles and strengths. Students will analyze contemporary family issues and take informed, written positions on those issues. This course meets the required Family Systems content for the Child Life Certification. Prereq: FAM 254 or an equivalent human life span course with the approval of the instructor.

FAM 354 THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. (3)
Approaches the study of the family from a comparative perspective, emphasizing cross-cultural variability in the structure and function of family. Kinship, household formation, sex roles, and socialization are examined in the context of the family, as well as patterns of interaction, personality formation, and family pathology. Prereq: Declared majors or minors in Dept. of Family Sciences or SW. (Same as SW 354.)

FAM 357 ADOLESCENT DEVELOPMENT. (3)
This course conducts an in-depth analysis of adolescent development and adjustment using an ecological, multi-contextual framework. The primary focus is on scholarship and empirical evidence from a number of disciplines that have direct bearing on the study of adolescent development, with a particular interest in applying a cross-cultural/national comparative lens. Prereq: Declared majors or minors in Dept. of Family Sciences, CTED or consent of the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 360 INTRODUCTION TO FAMILY INTERVENTION: WORKING WITH FAMILIES AND INDIVIDUALS. (3)
Survey course to introduce students to the various skills, strategies and professional ethical standards used by family scientists in helping relationships. The emphasis will be on learning the skills required to provide support for families and individuals. Prereq: Declared majors or minors in FAM or declared majors in CEF. FAM 251 is a prerequisite for FAM majors and minors. CEF 251 is a prerequisite for CEF majors. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. (Same as CEF 360.)

FAM 390 INTRODUCTION TO RESEARCH METHODS. (3)
An introduction to research design, methodology, instrumentation, and data analysis with emphasis on a student’s ability to understand and critique research in the content areas of consumer economics, personal finance, human development, and family relations. This course provides partial credit for the written component of GCCR in conjunction with FAM 360 and CEF 403 or FAM 357. Prereq: ENG 111 or ENG 112, or FAM 251, or STA 210, or CIS/WRD 110, or CIS/WRD 111, and sophomore standing. (Same as CEF 390.)

FAM 402 ISSUES IN FAMILY RESOURCE MANAGEMENT. (3)
Examination of family economics and management issues and analysis of their impact on the well-being of families across the major transitions of the family life-cycle. Particular emphasis will be given to family decision-making. Prereq: FAM 251 and declared majors and minors in Department of Family Sciences, or with consent of instructor.

FAM 403 MATE SELECTION THEORY AND RESEARCH. (1-3)
This course is designed to develop a basic understanding of mate selection theory and research. Processes in the U.S. and abroad will be explored. Sex, love, culture, values, and how these factors play into the process of mate selection will be covered. Students may enroll for 1, 2, or 3 credits.

FAM 473 FAMILY LIFE EDUCATION. (3)
Historical development, current programs, and emerging trends in family life education with particular emphases on programs and techniques for teaching sex education, marital relations, parenting and human development. Prereq: Declared majors and minors in Department of Family Sciences and FAM 360.

FAM 475 SPECIAL TOPICS IN FAMILY SCIENCES. (1-3)
Course will focus on selected topics drawn from various areas of family sciences taught by faculty members with special interests and competence. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

FAM 486 FIELD EXPERIENCES IN FAMILY RESOURCE MANAGEMENT. (3)
Field training in community setting. Opportunities for developing competencies in planning and conducting individual and small group experiences related to family resource management. Lecture, one hour; laboratory, seven hours per week. May be repeated for a maximum of six credits. Prereq: Senior standing and consent of instructor.

FAM 495 INDEPENDENT WORK IN FAMILY SCIENCES. (1-3)
Intensive independent scholarship or training in family sciences. May be repeated to a maximum of 12 credits. Prereq: Junior or senior standing.

FAM 499 INTERNSHIP IN FAMILY SCIENCES. (3)
Supervised internship, and capstone course for seniors, in a community, educational, Cooperative Extension, and/or research setting. Emphasis on observation, teaching, conceptualizing research problems, and developing competencies in providing service at the individual, family and/or community level. Students will be required to assist in designing, implementing, and evaluating research and programs related to family life. Presentations, research papers, outside speakers, and career guidance will be significant course components along with the laboratory hours. Lecture, two hours bi-weekly; laboratory, eight hours weekly. May be repeated for a maximum of six credits. Prereq: FAM 251, 352 and 356, and Junior or senior standing. Family Sciences majors only.

FAM 502 FAMILIES AND CHILDREN UNDER STRESS. (3)
An investigation of the stressors and crises experienced by families and their members and their efforts to cope with them. Special attention is given to prevention, management and enrichment strategies. Implications for practitioners will be drawn from conceptual frameworks and recent research. Prereq: FAM 352 and declared majors or minors in Dept. of Family Sciences or consent of instructor.
**Course Descriptions**

**FAM 544 CULTURAL DIVERSITY IN AMERICAN CHILDREN AND FAMILIES.**
(3) Study of cultural and linguistic diversity in American children and families, with special emphasis on Kentucky children and families. Consideration of implications for working with young children and families in educational settings. Study of the variations in beliefs, traditions, values, and cultural practices within American society, and their effects on the relationships between child, family, and school. Prereq: FAM 352; declared majors or minors in Dept. of Family Sciences or consent of instructor.

**FAM 553 PARENT-CHILD RELATIONSHIPS ACROSS THE LIFE COURSE.**
(3) Exploration of the parenting process from a life-span perspective. Current theory and research, with childrearing application, will be emphasized. Emphasis will be on parent education methods and the changing parental role over the life cycle. Prereq: FAM 352; declared majors and minors in Dept. of Family Sciences or consent of instructor.

**FAM 554 WORKING WITH PARENTS.**
(3) Principles, techniques, and resources relevant to working with parents as individuals, couples, and families. Survey of related literature on parent effectiveness and parent education is included with relevant field experiences. Lecture, two hours; laboratory, two hours. Prereq: FAM 260 and six hours of 300 level or above in social and behavioral sciences or consent of instructor.

**FAM 563 FAMILIES, LEGISLATION, AND PUBLIC POLICY.**
(3) A study of the impact of legislation and public policies on the well being of the family. Emphasis on the involvement of individuals and families with policies and legal resources as a means for realizing satisfying life styles. Prereq: FAM 251, 352, and declared majors and minors in Dept. of Family Sciences or consent of instructor.

**FAM 585 AGING AND ENVIRONMENT.**
(3) Explores the elderly person’s changing experience of environment. Physiological, psychological, and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as GEO/GRN 585.)

**FAM 600 WORKING WITH MILITARY FAMILIES.**
(3) This course provides an overview of military work and family connections. Students will gain familiarity with the challenges unique to military individuals and families and the resources available to address them. Topics to be covered include: theoretical approaches to understanding the impact of military work on individuals and families; demographic profiles of military families; and organizational demands on military service personnel and their families; military service and outcomes for children and adolescents, roles and challenges of military spouses; family policy in the military (including current formal and informal support structures and emerging trends in serving military families). Prereq: Graduate or advanced undergraduate standing and 6 hours of 300 level or above courses in social and behavioral sciences or consent of instructor.

**FAM 601 FAMILY PROCESSES.**
(3) Advanced study of typical family functioning across the family life course from a family process perspective, including examination of how “normal” differs according to family culture, structure, and history. Prereq: Family Science major.

**FAM 622 THE FAMILY’S ROLE IN EARLY CHILDHOOD EDUCATION.**
(3) The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 622.)

**FAM 624 PERSPECTIVES ON HUMAN SEXUALITY.**
(3) An examination of social, cultural, and biological factors affecting human sexuality. Current theory and research, with case studies, will be emphasized. Emphasis will be on parent education and the role of families and implications for working with adolescents. Prereq: Six hours in social or behavioral science.

**FAM 628 ADOLESCENT DEVELOPMENT.**
(3) A survey of theory and research in adolescent development with particular emphasis on the importance of the role of families and implications for working with adolescents. Prereq: Six hours in social or behavioral science.

**FAM 660 AGING ISSUES AND FAMILY RELATIONS.**
(3) The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various social categories. (Same as GRN 660.)

**FAM 661 HEALTH AND FINANCIAL ISSUES OF AGING FAMILIES.**
(3) This course is designed to discuss health and financial security of older adults and develop empirical research from the perspectives of individual aging and family relations. Emphasis is placed on the following topics: health status of the elderly, economic well-being of the elderly, intergenerational transfers of time and money, family care, giving and work, living arrangements, and empirical research for aging and family. Prereq: STA 570 or equivalent, or consent of instructor.

**FAM 668 ALLOCATION OF FAMILY RESOURCES.**
(3) Study of the contributors to and the recipients of family resources. Emphasis on the methods of assisting families to better allocate family resources through understanding money beliefs and attitudes and practicing financial planning strategies.

**FAM 673 FAMILY LIFE EDUCATION.**
(3) Demographic, social, economic, political, and professional issues related to emerging trends in family life education will be examined. Emphasis will be placed on the development, implementation, and evaluation of family life education curricula. Prerequisites: FAM 690; FAM 652 or FAM 654; or consent of instructor.

**FAM 685 PROFESSIONAL ISSUES IN COUPLE AND FAMILY INTERVENTION.**
(3) Exploration and definition of the legal, ethical, and professional issues in the practice of couple and family intervention. Emphasis will be on developing professional skills, attitudes, and identity for couple and family intervention.

**FAM 686 THEORY AND METHODS IN COUPLE AND FAMILY THERAPY.**
(3) A survey of theories and methods used in couple and family therapy. Designed to provide students with a knowledge of the theoretical bases for couple and family therapy, including an introduction to procedures used to assess, diagnose and treat couple and family dysfunctions.

**FAM 687 PRE-PRACTICUM: TREATMENT MODALITIES IN COUPLE AND FAMILY THERAPY.**
(3) Phases of couple and family therapy process are presented both in theory and in case study analysis. The presenting problem, history of the problem, family history, identification of dysfunctional dynamics, goals, plan of treatment, and outcome/evaluation are emphasized within the context of organizing family therapy and phases of family therapy. Prereq: Admission to the CFT master’s program or consent.

**FAM 690 RESEARCH METHODS IN FAMILY SCIENCES.**
(3) The study of research techniques and methodological problems involved in research on the family. Emphasis is placed on research concerning interrelationships between the family and its environment, development within the family, and family dynamics. Prereq: Consent of instructor.

**FAM 699 FIELD EXPERIENCES IN FAMILY SCIENCES.**
(1-3) Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a site supervisor. May be repeated to a maximum of six credits.

**FAM 703 ADVANCED THEORY AND RESEARCH IN FAMILY ECONOMICS AND MANAGEMENT.**
(3) Advanced study of research and theories in family economics and management with special emphasis given to current issues. Conceptual frameworks developed by leaders in family economics and management are studied and applied through designing and carrying out an empirical study. Prereq: Graduate work in statistics and research methods.

**FAM 740 COUPLE AND SEX THERAPY.**
(3) Field training in a community setting related to couple sciences and the diagnosis of sexual dysfunctions. In program planning, delivery, and evaluation. Prereq: FAM 686 or consent of instructor.

**FAM 745 FAMILIES AND CHILDREN IN PLAY THERAPY.**
(3) Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a site supervisor. May be repeated to a maximum of six credits.

**FAM 748 MASTER’S THESIS RESEARCH.**
(0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

Course Descriptions

FIN 250 PERSONAL INVESTING AND FINANCIAL PLANNING. (3)
An overview of financial planning, decision making and investing activities. Emphasis is on financial assets such as stocks, bonds, options and futures and their use in meeting investment goals. Discusses IRAs, 401(k)s and other retirement programs. Also considers mutual funds, real estate, insurance and other alternatives. Includes a discussion of asset selection and allocation strategies, risk management methods, and alternative wealth maximization strategies.

FIN 300 CORPORATION FINANCE. (3)
An introduction to the basic principles, concepts, and analytical tools in finance. Includes an examination of the sources and uses of funds, budgeting, present value concepts and their role in the investment financing and dividend decisions of the corporate enterprise. Prereq: ECO 201, ECO 202, ACC 201, ACC 202, MA 123, STA 291 or equivalent, or consent of department.

FIN 310 INVESTMENTS. (3)
This course studies investments as broadly defined. Topics covered come from financial investments, corporate investments and personal finance. Prereq: FIN 300 or consent of department.

FIN 357 INVESTMENT PLANNING. (3)
This course covers various aspects of the principles of investments, securities markets, and their application to financial planning. It also prepares students to apply the concepts and principles through a financial calculator and Microsoft Excel. Prereq: Completion of all College pre-major requirements and admission to Upper Division in Business & Economics. Non B&E Upper Division students may be enrolled with the consent of the Department.

FIN 360 PRINCIPLES OF REAL ESTATE. (3)
An overview of the basic concepts and principles of real estate in the private and public sectors. The course provides an introduction to real estate issues and a foundation for further study in the various specialized areas of real estate and urban development. The course will cover topics related to urban economics, mortgage finance, and real estate valuation.

FIN 395 INDIVIDUAL WORK/RESEARCH. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

FIN 405 CAPITAL INVESTMENT AND FINANCING DECISIONS. (3)
A study of the factors that drive firm decisions to invest in new plant, capital equipment or technology and/or to pursue acquisitions of other firms. Optimal strategies for financing such investments are also a focal point of this capstone course, which involves extensive application of financial concepts and tools. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 300.

FIN 410 INVESTMENT ANALYSIS. (3)
Analysis of corporation statements for investment purposes; the security market; market influences on security prices; effect of interest changes on security prices; and the development of investment programs. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 300.

FIN 423 INTERNATIONAL FINANCE. (3)
The course provides an overview of world trade, international monetary and trade theory, and the theory of exchange rate determination. Focus is on the management of short- and long-term international assets, with particular attention given to the direct investment decision and on financing international operations. Prereq: ACC 302 and a grade of C or better in FIN 405.

FIN 430 FINANCIAL MODELING. (3)
The rapidly increasing computational power of personal computers in combination with the development of dynamic software solutions for computational needs have in the recent few years brought the advantage of fairly sophisticated financial models into the reach of a broader audience. The increasing flow of financial information is converting the skill of quantitative modeling using computers from an advantage into a necessity. This course is designed to provide students with the skills necessary to apply modern financial theories to real world applications using advanced spreadsheet and visual-programming tools. Prereq: ACC 302 and a grade of B or better in FIN 410.

FIN 432 QUANTITATIVE PORTFOLIO MANAGEMENT. (3)
This course covers the complex characteristics and analysis of individual securities as well as the theory and practice of optimally combining securities into portfolios. Stressing the economic intuition behind the subject matter, this course presents advanced concepts of investment analysis and portfolio management. Prereq: ACC 302 and a grade of C or better in FIN 410.

FIN 435 VENTURE FINANCE. (3)
The goal of this class is to understand the process of new venture financing from both the entrepreneur and investor perspectives. The course will primarily focus on the financing of high-growth technology start-ups. Students will learn how to apply financial theory to new venture valuation and capital structure decisions. Prereq: A grade of C or better in FIN 405.

FIN 440 BUSINESS VALUATION. (3)
This course studies valuation for buyers, sellers, and independent appraisers to determine values of financial instruments, whole businesses and intangible assets. We develop the standard income and market-based approaches to valuation. Prereq: A grade of B or better in FIN 405.

FIN 452 OPTIONS AND FUTURES. (3)
A study of the options and futures markets including institutional aspects, pricing, and regulation. Primary emphasis will be on the uses and applications of options and financial futures. Prereq: ACC 302 and a grade of C or better in FIN 410.

FIN 464 REAL ESTATE FINANCE. (3)
The course surveys the sources and uses of real estate funds. The institutions which provide funds and the various types of financial instruments are described and compared. Likewise, various forms of real estate investment are analyzed and methods of determining value are critiqued. Prereq: A grade of C or better in FIN 410.

FIN 465 FINANCIAL INSTITUTIONS MANAGEMENT. (3)
A study of the principles and cases in commercial banking practice. Financial institution management practices are studied within the economic, monetary, fiscal and legal framework of the American economy. Prereq: ACC 302, and a grade of C or better in FIN 410.
FIN 470 FINANCIAL RISK MANAGEMENT. (3)
Financial price risk in the form of unexpected movements in the foreign exchange rates, interest rates, and commodity prices and their impacts on a firm’s earnings, cash flows, value, and competitiveness are the focus of this course. Various financial derivatives such as forwards, futures, options, and swaps and different hedging techniques, principles, and strategies will be studied. The course also includes the design, development, execution, and evaluation of corporate risk management program. Lecture, discussion, readings, case study, and internet access approaches will be employed. Prereq: ACC 302, FIN 405, and FIN 410.

FIN 475 FIXED INCOME SECURITIES. (3)
The course provides students with an introduction to the fundamentals of fixed income securities and markets. Topics covered include bond pricing, convexity, duration, the yield curve, the U.S. Treasury market, corporate bond markets and mortgage-backed securities. Prereq: A C or better in FIN 410.

FIN 480 MONEY AND CAPITAL MARKETS. (3)
A study of the institutional structure and theory of the money and capital markets, including the types of financial claims traded in such markets, the major buyers and sellers, the regulatory environment, capital market theory, and the forces of supply and demand affecting the level and structure of interest rates. Prereq: ACC 302, and a grade of C or better in FIN 410.

FIN 485 APPLIED INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT. (3)
The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio currently, making all buy/sell decisions. Prereq: Consent of department.

FIN 490 SPECIAL TOPICS IN FINANCE (Subtitle required). (3)
Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in finance. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the FIN 490 number. Prereq: Varies by topic.

FIN 600 CORPORATE FINANCIAL POLICY. (3)
A study of financial management from the viewpoint of the corporate financial officer. Areas studied include capital budgeting, capital structure, financing decisions, working capital management, dividend policy, and mergers and acquisitions. Prereq: Graduate standing: ECO 610, ACC 628, MGT 650 or consent of department.

FIN 623 INTERNATIONAL FINANCIAL MANAGEMENT. (3)
This course provides an overview of financial management at the international level. Topics covered include: The nature and uses of international financial markets, the financial behavior of multinational corporations, exchange rates, and hedging in international business. Prereq: FIN 600 or consent of the department.

FIN 630 FINANCIAL MODELING AND ANALYSIS. (3)
This course provides students with the skills necessary to apply modern financial theories to real world applications in both corporate finance and investments. Students will get hands-on experience implementing models from areas such as capital budgeting, financial planning, and asset valuation.

FIN 637 HEALTH FINANCE. (3)
This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are studied and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635, or consent of department.

FIN 645 CORPORATE INVESTMENT AND FINANCING POLICY. (3)
Emphasizing both theory and practice, this course is an in-depth study of long-term corporate investment and financing decisions. Topics include valuation, capital budgeting, cost of capital, leasing, dividend policy, capital structure, and mergers and acquisitions. Prereq: FIN 600 or consent of department.

FIN 650 INVESTMENTS. (3)
Analysis and valuation of securities and the effects on investment decisions. Prereq: Appropriate undergraduate courses in accounting and finance or consent of department.

FIN 664 REAL ESTATE FINANCE. (3)
A basic orientation in commonly used instruments, institutional structures, and real estate financing policies. Emphasis will be placed on mortgage instruments, mortgage types, effective cost of borrowing, construction lending, financial institutions, loan underwriting, and the secondary mortgage market. Analysis is primarily from the debitor-investor’s perspective. Prereq: FIN 600 or consent of department.

FIN 680 MONEY, INTEREST AND CAPITAL. (3)
A study of the theory of money, interest and financial intermediation. In addition to the theory, the major financial markets, financial institutions and financial instruments will be examined. Finally, the governmental agencies which regulate the industry will be discussed as will the overlapping nature of the regulatory process. Prereq: Completion of the first year MBA core or consent of instructor.

FIN 685 INVESTMENTS PRACTICUM. (3)
The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio, making all buy/sell decisions. Prereq: Consent of department.

FIN 691 ADVANCED TOPICS IN FINANCE (Subtitle required). (1-3)
The study of selected topics in finance for graduate students. Special title required. May be repeated for a maximum of nine credits under different subtitles. Prereq: Consent of department.

FIN 695 INDIVIDUAL WORK IN FINANCE. (1-6)
Students confer individually with the instructor. Prereq: Consent of department.

FIN 700 SEMINAR IN FINANCIAL THEORY. (3)
Primary emphasis on the theory of financial asset valuation. Topics include utility theory, investor reaction to uncertainty, cost of capital theory, dividend theory, portfolio theory, and asset pricing in equilibrium.

FIN 701 SEMINAR IN FINANCIAL THEORY II. (3)
A continuation of FIN 700. Topics covered include state-preference theory, arbitrage pricing theory, agency theory, and the pricing of contingent claims.

FIN 740 SEMINAR IN THEORETICAL CORPORATE FINANCE. (3)
This is an introduction course in theoretical corporate finance for Ph.D. students. This course has the objective of introducing doctoral students to theoretical research in corporate finance. The emphasis will be on incomplete information models, though a few models driven by other considerations will also be studied. The first part of the course will examine the fundamentals of corporate finance theory (e.g., the theory of the firm’s choice of its capital structure and dividend policy under alternative assumptions), as well as various tool areas in corporate finance (e.g., the notion of moral hazard and agency problems, adverse selection and signaling, various aspects of non-cooperative games with and without incomplete information, and the equilibrium concepts in such games). The second part of the course will focus on a couple of important related topics which are the focus of recent research in corporate finance. Prereq: FIN 660 and 650, or equivalent or consent of department.

FIN 745 SEMINAR IN MANAGERIAL FINANCE. (3)
Primary emphasis on the implementation of financial theory for the management of the assets of a business firm. Topics include capital budgeting, working capital planning, financing the firm, cost of capital and the financial structure of the firm, and mergers and acquisitions. Prereq: FIN 700 or consent of department.

FIN 750 SEMINAR IN INVESTMENT THEORY. (3)
Primary emphasis on the implementation of financial theory for the valuation and management of financial assets in an efficient capital market. Topics include mean-variance efficiency, development and testing of the capital asset pricing model, stochastic dominance, and option pricing theory as well as other topics in modern capital market theory. Prereq: FIN 700 or consent of department.

FIN 780 SEMINAR IN FINANCIAL INSTITUTIONS. (3)
An examination of the role of financial institutions in the financial system and in the economy, with special emphasis on commercial banks. Topics covered include: theories of financial intermediation, asset-liability management, regulation and deposit insurance, structure of the financial institutions industry, and empirical models of banking. Prereq: FIN 700 or consent of department.

FIN 791 SEMINAR IN FINANCE (Subtitle required). (1-3)
An intensive study of current theory and research in a topic in finance as discussed in scholarly journals. Examples of possible topics include: Capital structure, agency theory, market efficiency, contingent claims. May be repeated with a different subtitle for a maximum of 12 credits. Prereq: Consent of department.

FIN 795 INDEPENDENT WORK IN FINANCE. (1-12)
Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to total of 12 credit hours. Prereq: Consent of department.

FM Family and Community Medicine

FM 815 FIRST-YEAR ELECTIVE, FAMILY MEDICINE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

FM 825 SECOND-YEAR ELECTIVE, FAMILY MEDICINE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.
FOR 101 INTRODUCTION TO WILDLIFE CONSERVATION. (3)
An introduction to the history, concepts, and principles of wildlife biology and management.
The role of wildlife in ecological systems and human-altered environments will be discussed.
Lecture, two hours; laboratory, two hours per week.

FOR 103 WILDLIFE CONSERVATION PRACTICAL EXPERIENCE. (2)
Earned on completion of the academic prerequisites and upon admission to the Department of Natural Resources.
Laboratory; two hours per week. Prereq: For admission to the Department of Natural Resources.

FOR 105 WILDLIFE CONSERVATION PROFESSIONAL EXPERIENCE. (1-3)
Earned on completion of the academic prerequisites and upon admission to the Department of Natural Resources.
Laboratory; one to three hours per week. Prereq: For admission to the Department of Natural Resources.

FOR 109 INTRODUCTION TO WILDLIFE CONSERVATION. (3)
An introduction to the history, concepts, and principles of wildlife biology and management.
The role of wildlife in ecological systems and human-altered environments will be discussed.
Lecture, two hours; laboratory, two hours per week.

FOR 110 NATURAL RESOURCE ISSUES. (1)
A communication intensive course in which students will learn to research current forestry and natural resource issues, interpret popular press and professional publications, evaluate opposing viewpoints, and discuss issues in a clear, effective and professional manner through a variety of communication media.

FOR 150 COMPUTER APPLICATIONS IN NATURAL RESOURCE PROFESSIONS. (2)
Use and application of standard computer software to solve problems. Emphasis will be placed on decision processes and algorithm construction. Additionally, students will learn to construct aesthetic graphics, diagrams, maps and other visual material and will gain experience communicating results in a variety of written formats.

FOR 200 BASICS OF WILDLAND TECHNOLOGY. (3)
A basic introduction to the various types of maps and their uses, field navigation skills, and map making.
The course is heavily field and laboratory based, with an emphasis on hands-on learning and practice. Both traditional technologies, such as compasses, U.S. Geological Survey maps, and aerial photographs as well as newer technologies, such as global positioning systems and geographic information system databases will be employed in carrying out course exercises.

FOR 205 FOREST AND WILDLAND SOILS AND LANDSCAPES. (4)
A study of soil-plant-landscape relationships as related to forestry and the management of natural ecosystems. Emphasis will be on properties and processes of wildland soils, and on interrelationships between soils; composition and productivity of plant communities; and the structure, form, and functioning of landscapes. Lecture, three hours; laboratory, three hours per week. Prereq: At least three credits of biology and three credits of chemistry.

FOR 219 DENDROLOGY. (4)
A study of the basic concepts of botany related to woody species and their use, along with basic soil and site characteristics in the identification of trees and forest vegetation.

FOR 221 WINTER DENDROLOGY. (1)
Identification of 100 species of trees, shrubs, and lianas based upon bark, form, twig, and bud characteristics. Laboratory; four hours per week for one-half semester. Prereq: FOR 219.

FOR 240 FORESTRY AND NATURAL RESOURCE ETHICS. (2)
A study of the key ethical concepts of conservation, preservation, deep ecology, land ethic, spiritualism/religion, and multiple value systems as applied to forestry and natural resource issues. Students will gain an understanding of the ethical dilemmas faced by natural resource professionals, and will be able to identify ways of handling these dilemmas, including application of professional associations’ codes of ethics.

FOR 250 STATISTICS AND MEASUREMENTS I. (4)
The application of statistical concepts, computations, and software to forestry sampling and inventory problems. Land, individual tree and timber stand measurement techniques will be covered as will the design and implementation of sampling systems to derive information necessary to meet landowner objectives. Prereq: MA 109 or calculus.

FOR 255 FOREST FIRE. (1)
Basic wildland fire behavior including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

FOR 260 FOREST PRODUCTS AND WOOD SCIENCE. (4)
An examination of basic material properties of wood, methods by which it is used, and issues and economic conditions in which domestic and global wood markets operate. Concepts covered include species identification, chemical and mechanical properties and their effect on utilization, utilization technologies and their linkage to silvicultural practices, and a myriad of issues such as recycling, product certification, environmental concerns, and alternative products.

FOR 261 WOOD SCIENCE AND ANATOMY. (2)
A 2 credit hour course examining the basic structure of wood and how it affects wood’s physical properties. Topics include macroscopic wood properties, composition and structure of wood cells, hardwood and softwood structure, juvenile wood, reaction wood, wood and water relationships, wood deterioration and prevention, and specific gravity and density.

FOR 262 WOOD IDENTIFICATION. (2)
A 2 credit hour course covering the methods and techniques necessary for identifying common wood species. Topics include macroscopic wood properties, hardwood and softwood structure, and the systematic thought processes for successful identification of 27 wood species.

FOR 280 FOREST RESOURCE POLICY AND LAW. (3)
This course provides a basic knowledge of United States policy and law as it applies to management and administration of forests and related resources on public and private land. Topics include the sources, development, and analysis of relevant laws, administrative regulations, and other policies. Judicial decisions addressing the management of National Forests, biodiversity, water resources, and other specific issues will be discussed.
### Course Descriptions

**FOR 285 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES I.**

(1) Course provides students with the knowledge and skills to communicate effectively in a variety of professional situations. Leaders from the forestry sector will meet with students in open seminar settings to discuss various internship and career opportunities, job requirements, and career paths. A key component of these presentations will emphasize the ideas, concepts, and skill sets students need to succeed in various forestry careers.

**FOR 286 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES II.**

(1) The course provides students with the knowledge and skills to communicate effectively, written and orally, in a variety of professional settings. Students will meet with forestry and natural resource professionals at their place of business, professional conferences, and in class. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

**FOR 310 INTRODUCTION TO FOREST HEALTH AND PRODUCTION.**

(1) Introduction to common forest health challenges in the central Appalachians. Identify symptoms associated with common biotic agents (e.g., hemlock woolly adelgid, emerald ash borer, chestnut blight, etc.) and abiotic stresses that affect the health of forested ecosystems. Understand and assess the effects these problems have on ecosystem processes and different methods for conserving forest resources while addressing the impacts. Course incorporates components of forest entomology, forest pathology, abiotic stressors, and invasive species. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

**FOR 320 FOREST VALUATION AND ECONOMICS.**

(3) Apply economic concepts to silvicultural practices, land values, and values affiliated with various forest uses. Apply supply and demand concepts and financial computations to identify and quantify economic consequences of silvicultural actions or management practices. Taxation and monetizing ecosystem services will be discussed. Prereq: MA 109 or Calculus.

**FOR 325 ECONOMIC BOTANY: PLANTS AND HUMAN AFFAIRS.**

(3) Plants have played a major role in human affairs. Course will relate plant life processes and chemistry to human uses: food crops, spices, medicinals, and materials. Major units are the origins and agglutination of domesticates, esthetics and botany, and a selection of plant-based products with major historical impacts — potato, nutmeg, pepper, sugarcane, cotton, quinine, rubber, tobacco. Contemporary themes include herbal medicine and plant-based pharmaceuticals. Prereq: PLS 104, PLS 210, one year of introductory biology, or permission of the instructor.

**FOR 330 GIS AND SPATIAL ANALYSIS.**

(3) Principles and operations of Geographic Information Systems (GIS) applied to forestry and natural resources. Students will learn to collect necessary field data to create GIS maps and digital spatial data sets, perform basic spatial analysis, and integrate social and economic data to solve spatially related natural resource problems. Prereq: MA 109 or Calculus, and FOR 200, or consent of instructor.

**FOR 340 FOREST ECOLOGY.**

(4) The study of the forest as a biological community, covering ecosystem concepts such as energy flow, forest nutrition, nutrient cycling, and decomposition. Interrelationships between trees and other organisms comprising the community is also examined through concepts of disturbance, succession, population dynamics, biological and ecosystem diversity, ecosystem management, and ecosystem services. Prereq: BIO 103 or BIO 150.

**FOR 350 SILVICULTURE.**

(4) A study of ecologically based manipulations of forests to achieve desired management objectives. Develop and apply silvicultural prescriptions and learn the effects of these prescriptions on timber and non-timber forest benefits, forest health and biodiversity, soil, and water resources as well as their effect on broader social, economic, and ecological issues. Prereq: FOR 219 and FOR 250.

**FOR 356 FOREST SOILS AND HYDROLOGY.**

(1) Students will learn to assess the physical environment of forested ecosystems by examining soil-plant-water relationships across a variety of landscape settings. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

**FOR 357 INVENTORY AND MEASUREMENTS II.**

(2) This is a practical course designed to provide students with knowledge and skills related to the collection of forest inventory data and the preparation of a forest inventory report required to manage forests and natural resources. Students will become familiar with statistical concepts used in forest measurements; use mapping and navigation procedures to locate sampling areas; conduct forest inventories; and develop inventory reports. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

**FOR 358 SILVICULTURAL PRACTICES.**

(3) A study of the silvicultural practices for altering the forest canopy and regenerating the forest. Students will learn to apply these practices to meet multiple use objectives such as forest products, wildlife, health and protection, watershed, and recreation and develop silvicultural prescriptions. Prereq: FOR 219; FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

**FOR 359 FOREST OPERATIONS AND UTILIZATION.**

(3) Plan and design timber harvests, mark a stand for harvest, and describe the effects of harvesting. Use herbicides and pesticides to eradicate invasive species, perform tree planting, conduct thinnings, and participate in prescribed burns. Learn timber utilization technology and determine value added in converting trees to lumber. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

**FOR 365 WILDLIFE ASSESSMENT.**

(2) An experiential learning opportunity designed to introduce students to basic concepts of forest wildlife management. Become familiar with common techniques to determine wildlife presence and relative abundance. Learn how forest management practices can directly and indirectly impact many wildlife species and their habitats in Kentucky. Understand how forestry and wildlife professionals manipulate forests to meet wildlife management and biodiversity conservation objectives at various spatial scales. Learn the direct and indirect impacts of some wildlife species on forest management. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

**FOR 370 WILDLIFE BIOLOGY AND MANAGEMENT.**

(4) Applications of basic biological concepts such as physiology, energetics, nutrition, digestive systems, and anatomy to the study of wildlife and wildlife management. In addition to basic wildlife biology, students will also learn taxonomy and identification of wildlife and the principles of wildlife management as well as applied field techniques such as trapping and radio telemetry.

**FOR 399 FIELD-BASED EDUCATION IN FORESTRY.**

(1-6) The use of field experience as an educational complement to classroom work. May be repeated to a maximum of 12 credits which are to be used as electives. Prereq: Permission of instructor and department chairperson. A departmental learning agreement must be completed prior to registration.

**FOR 400 HUMAN DIMENSIONS OF FORESTRY AND NATURAL RESOURCES.**

(3) In an issues-based format, students will study and write about societal trends and their impact on natural systems, the disconnect between society and nature, wildlife-human interactions, as well as problems related to globalization and urbanization. Prereq: This course is approved to fulfill the Composition and Communication Requirement (GCCR) for forestry majors. To receive GCCR credit for this course, you must 1) already have sophomore status (completed 30 credit hours), 2) earn an average grade of C or better on the designated Composition and Communication intensive assignments, and 3) complete this course and the other approved GCCR course, FOR 480. This course provides partial credit for the written component of the GCCR for the forestry major in conjunction with FOR 480. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

**FOR 425 FOREST MANAGEMENT.**

(4) The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives for various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: FOR 320 or FOR 359.

**FOR 435 CONSERVATION BIOLOGY.**

(3) Review the ethical foundations of conservation biology, discuss the scientific evidence that illustrates recent rapid loss of biological diversity at multiple spatial and temporal scales, identify and elaborate on the causative factors of biodiversity loss, discuss various strategies for conserving biodiversity, and discuss ways that various human cultures and associated resource use influence non-human life and the human societies that depend on them. Conservation biology is multidisciplinary in scope and discussion topics include wildlife management, restoration ecology, economics, ethics, geology, evolution, philosophy, phylogeny, taxonomy, genetics, behavioral ecology, population ecology, disease, sociology, sustainable living, and human dimensions. Conservation topics will be global in scope, with well-studied case examples used to support class activities. Prereq: Introductory biology course, or consent of instructor.

**FOR 460 FOREST HYDROLOGY AND WATERSHED MANAGEMENT.**

(3) Principles and techniques involved in watershed management as it relates to the practice of forestry. Emphasis is placed on understanding the hydrologic cycle, plant-soil interactions from a land-use and landscape perspective, and the need for implementation of forestry best management practices. Prereq: Forestry spring field semester, or NRE 320, or consent of instructor.

**FOR 461G INTRODUCTION TO POPULATION GENETICS.**

(3) This survey course examines the population dynamics and equilibria of genes in nucleic acids, chromosomes, and mitochondria. Emphasis will be on the biological relevance in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/ENT 461G.)
FOR 470 INTERDEPENDENT NATURAL RESOURCE ISSUES. (3)
Culmination of the student’s study of public concerns and problems related to natural resources. Work in teams to find and verify information on diverse topics, listen to and address public concerns, communicate natural resource information to a wide range of audiences, and be effective professionals in working toward solutions. Prereq: Senior Standing. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. Forestry majors must complete this course and FOR 400 to fulfill the upper tier graduation writing requirements.

FOR 480 INTEGRATED FOREST RESOURCE MANAGEMENT. (5)
Capstone course. Students will be presented with a real life management scenario in a forested location in Kentucky. Working in teams, students will collect data, determine management objectives, and develop action plans for managing the forest according to the desires of the owner, subject to realistic legal, economic, ethical, and social constraints. Students will be required to produce a professional management plan and present the plan in a public forum at the end of the semester. Prereq: Completion of Field Semester, FOR 425, FOR 460, and Senior Standing. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FOR 502 FOREST ENTOMOLOGY. (3)
Lectures primarily address principles and concepts. Laboratories use a hands-on approach to demonstrate insect collecting and identification techniques, ecological concepts and management approaches, and use of reference materials. Prereq: A minimum of 3 credits of Basic biology (BIO 103 or BIO 148 or equivalent) or consent of instructor. (Same as ENT 502.)

FOR 510 HERPETOLOGY. (4)
This is a 4-credit, advanced biology and/or wildlife course about amphibians and reptiles for both undergraduate and graduate students. Lectures and labs follow two concurrent themes: 1) a survey of amphibians and reptiles, with special emphasis on Kentucky species, and 2) a general analysis of amphibian and reptile biology, ecology, conservation and management. Prereq: All students enrolled in FOR 510 should have taken at least one college-level biology course.

FOR 520 MAMMALS OF THE EASTERN UNITED STATES. (4)
Covers the evolution, taxonomy, biogeography, biology, and natural history of mammals, emphasizing North American fauna. All mammalian orders (extant and extinct) in North America will be covered, emphasizing major morphological differences among groups, and physiological and behavioral adaptations to North American climates and ecosystems. Lecture discussions will cover major physiological systems (digestive, excretory, reproductive, etc.), energetics, diet and nutrition, reproductive patterns, and anatomical differences unique to each taxonomic order. Laboratory exercises will stress identification of extant mammals occurring in eastern North America, with a heavy emphasis on species occurring in Kentucky and adjacent states. Prereq: Entry level courses in biology (BIO 148 or equivalent), field ecology (FOR 340 or equivalent), and wildlife management (FOR 370 or equivalent) or consent of instructor.

FOR 530 FRESHWATER ECOLOGY. (3)
Advanced biology and natural resources course about the ecology of freshwater environments. Course material covers 1) interactions among freshwater species and between the species and their aquatic environment, 2) how these interactions influence distribution and abundance of freshwater species, and 3) conservation and management of freshwater species and aquatic systems. Prereq: Upper level course in biology, field ecology, wildlife management or consent of the instructor.

FOR 540 URBAN ECOLOGY. (3)
Discussion-based course focused on describing urban ecosystems, the processes determining patterns of abundance and distribution of organisms in urban ecosystems, the interactions among organisms in the urban environment, the interactions between humans (and societies) and nature in urban environments, and some aspects of urban planning and urban forestry as it relates to ecology and the environment. Prereq: Upper level course in biology, ecology, environmental policy or consent of the instructor.

FOR 550 U.S. BIODIVERSITY HOTSPOTS. (3)
This is a 3-hour travel-based experiential learning course designed to immerse students in some of the most biodiversity areas in the U.S. Students will experience and learn about the ecology, geology, conservation, and management activities and policy of these areas by: 1) visiting several representative protected areas (e.g., National Parks, National Forests), and 2) interacting with resource managers and land stewards that work on landscape and local conservation and management issues to get a feel for the challenges and opportunities in protecting biodiversity and accommodating human needs. Students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 605.)

FOR 560 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course uses hands-on experience in a diverse array of conceptual research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, chemical ecology, behavioral studies, motion analyses, using high-speed video, image analyses for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 606.)

FOR 570 LANDSCAPE ECOLOGY FOR NATURAL RESOURCES. (3)
Principles of landscape ecology and their applications to contemporary ecological problems. Students will learn and apply the tool of geographic information system (GIS) and spatial analysis to problems in natural resource ecology, management, and conservation. Course covers the following topics: principles of landscape ecology (e.g., patch, mosaic, and scale), quantification of landscape patterns, formation and dynamics of landscapes patterns, role of disturbance, landscape models and their applications. Prereq: Any upper level course in GIS or consent of instructor. (Same as GEO 570.)

FOR 599 INDEPENDENT WORK IN FORESTRY. (1-3)
Study and independent work on selected problems related to allocation and utilization of natural resources. May be repeated to a maximum of six credits. Any combination of FOR 599 and FOR 781 cannot exceed six credits. Prereq: Senior or graduate standing and consent of instructor.

FOR 601 RESEARCH METHODS IN FORESTRY. (3)
A study of research methods, procedures, and techniques used in forestry. Major emphasis will be placed on problem analysis and methods of conducting organized research. Prereq: Graduate standing.

FOR 602 RENEWABLE NATURAL RESOURCES IN A GLOBAL PERSPECTIVE. (3)
An advanced course that examines world and transboundary issues related to renewable natural resources. Students will attend a series of lectures, discuss assigned readings, and identify issues related to those issues will be presented and discussed in a seminar format. Prereq: Graduate standing.

FOR 603 FOUNDATIONS IN FORESTRY, WILDLIFE AND NATURAL RESOURCE SCIENCES. (3)
Foundations in Forestry, Wildlife and Natural Resource Sciences is a 3-credit, graduate level, seminar-style course focused on evaluating, discussing, and tracking the progression of the science and philosophy behind select topics in forestry, wildlife and other natural resource sciences, as well as environmental management and policy. Prereq: Graduate Standing.

FOR 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, behavioral studies, motion analyses, using high-speed video, image analyses for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 605.)

FOR 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of conceptual research methods used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will be for population size estimation, population growth models, and applied statistical analyses. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 606.)

FOR 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., genetic drift, natural selection, random genetic drift), and between populations (e.g., genetic flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/ENT 607.)

FOR 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/ENT 608.)

FOR 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/ENT 609.)

FOR 612 FOREST ECOSYSTEM DYNAMICS. (3)
The study of ecosystem structure and function with emphasis upon eastern deciduous forest ecosystems. Topics discussed will include energy flow, mineral cycling, the influence of disturbance upon ecosystem properties and dynamic processes in the development of ecosystems. Prereq: FOR 340 or BIO 451G and consent of instructor.

FOR 620 SPECIAL TOPICS IN FORESTRY (Subtitle required). (1-3)
Special topical and experimental courses in forestry for advanced graduate students. Special title required and must be approved by the chairperson of the Department of Forestry. May be repeated to a maximum of nine credits. Students may not repeat under the same subtitle. Prereq: Consent of instructor.
FOR 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or conc: BCH 607. (Same as BIO/PLS 622.)

FOR 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or conc: BCH 607. (Same as BIO/PLS 623.)

FOR 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)
Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as AEC 662.)

FOR 667 INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/ENT 667.)

FOR 695 FIELD RESEARCH IN FORESTRY. (0)
Full-time research that requires the student to remain off-campus for extended periods. Students enrolled in this course remain in full-time academic status May be repeated to a maximum of 2 semesters. Prereq: Graduate standing in the Forestry Graduate Program. For students whose research precludes them from taking courses on campus for a semester. Registration requires (a) approval of Research Contract by a committee of at least three Forestry faculty members established to consider a particular student’s Research Contract, (b) approval of Research Contract by the Director of Graduate Studies, and (c) approval of Research Contract by Associate Dean for Academic Programs.

FOR 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

FOR 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

FOR 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of the department.

FOR 770 FORESTRY SEMINAR (Subtitle required). (1)
Reports and discussions on recent research and current literature. Credit is given to those who satisfactorily present papers. Required of all graduate students. Can be repeated to a maximum of three credits. Prereq: Graduate standing.

FOR 781 SPECIAL PROBLEMS IN FORESTRY. (1-3)
Advanced study of selected problem areas in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate advisor.

FOR 791 RESEARCH IN FORESTRY. (1-3)
Involves original research in selected areas of interest in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate advisor.

FP Family Practice and Community Medicine

FP 850-890 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine, and/or permission of the Student Progress and Promotions Committee.

FR French Language and Literature

FR 011 FRENCH FOR READING KNOWLEDGE. (3)
This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination.

FR 101 ELEMENTARY FRENCH. (4)
The study of basic French through grammar, reading and oral practice.

FR 102 ELEMENTARY FRENCH. (4)

FR 103 FRENCH CINEMA. (3)
A history of the French cinema from the early twentieth century to the present. Emphasis on the primary aesthetic movements of French cinematic expression in social and historical context. Attention given to the formal elements specific to film, techniques of film analysis, and the nature of visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 106 ELEMENTARY FRENCH REVIEW. (5)
A course equivalent in level to FR 102 designed to prepare students with two or three units of high school French for French 201 who, on the basis of the placement test, appear to lack sufficient skill in French for that course. Prereq: Two years of high school French and the placement test.

FR 201 INTERMEDIATE FRENCH. (3)
Reading, conversation and oral comprehension are the basic aims of this course, which is structured around contemporary texts. Prereq: FR 102 or two years of high school French and placement test.

FR 202 INTERMEDIATE FRENCH. (3)
A continuation of FR 201. Prereq: FR 201 or three years of high school French and placement test.

FR 204 INTRODUCTION TO FRENCH AND FRANCOPHONE STUDIES. (3)
Introduces students to the concepts, questions, and methodologies that inform the study of the Francophone world. Includes an intensive French grammar review. Prereq: FR 202 or equivalent.

FR 205 THE FRENCH GRAPHIC NOVEL. (3)
Examines the rich tradition of graphic narrative in France where the modern comic form was invented in the early twentieth century. Explores the technical aspects of graphic narrative and considers how the graphic novel has been linked to political questions of national identity in post-war France. Taught in English, with no knowledge of French necessary.

FR 214 FRANCE TODAY. (3)
Examines the issues, debates, and conflicts that define culture and society in contemporary France. Emphasis on speaking and listening skills in French. Prereq: FR 202 or equivalent.

FR 215 VISUAL CULTURES. (3)
An interdisciplinary discussion of the centrality of the visual in French and Francophone society and culture. Representative examples of the kinds of visual media encountered might include medieval tapestries as well as twenty-first century web sites. Prereq: FR 202 or equivalent.

FR 225 FRENCH FILM NOIR. (3)
Examines the crime thriller and the “noir” style in French cinema during the 1940s and 1950s. Emphasis on the aesthetic, philosophical, and historical origins of the crime film in France, the impact of French cinema on Hollywood film noir, and the role of noi in French visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3)
This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as AAS 263.)

FR 307 FRENCH FOR BUSINESS AND ECONOMICS. (3)
Development of specialized conversational and written proficiency necessary to import-export business activities, banking, insurance, business regulation, etc., in the French-speaking world. Prereq: FR 204.

FR 310 FRENCH PHONETICS. (3)
Phonetics and phonemics, theory and practice. Advanced corrective pronunciation drill on an individual basis. Prereq: FR 204.

FR 311 INTRODUCTION TO FRENCH LINGUISTICS. (3)
An introduction to the study of language structure. Explores various aspects, levels, and components of verbal communication. Prereq: FR 204.

FR 324 STUDIES IN FRENCH LITERATURE (Subtitle required). (3)
An introduction to the major trends of the French literary tradition, with emphasis on textual analysis and critical approaches. May be repeated to a maximum of 6 hours with a different subtitle. Prereq: FR 204.

University of Kentucky 2019-2020 Undergraduate Bulletin

519

KEY: # = new course * = course changed †= course dropped
Course Descriptions

FR 325 FRENCH CINEMA (Subtitle required). (3) An introduction to the analysis of film and to the major movements in the history of French cinema. May be repeated up to 6 hours with different subtitle. Prereq: FR 204.

FR 335 WAR, LITERATURE, FILM. (3) This course examines the strategies used by French writers and filmmakers to translate the experience and memory of World War I and World War II into literary and cinematic form. Topics treated will include eyewitness testimony, uses of irony and humor, the representation of disfigurement, the question of documentary, collaboration with the enemy, and practices of commemoration. Taught in English, with no knowledge of French necessary.

FR 344 THE LITERARY TEXT (Subtitle required). (3) An exploration of the concepts of text and textuality in relation to the notions of authorship, form and formal experiment, theme and other questions at the heart of literary studies. May be repeated up to 6 hours with a different subtitle. Prereq: FR 204.

FR 350 FRANCOPHONE CULTURES. (Subtitle required). (3) Explores the social, historical, and political situation of French-speaking cultures outside metropolitan France. May be repeated up to 9 hours with a different subtitle. Prereq: FR 204 or equivalent.

FR 395 INDEPENDENT WORK IN FRENCH AND FRANCOPHONE STUDIES. (3) Directed study in French and Francophone studies. Given in exceptional circumstances only. May be repeated up to 6 credit hours. Prereq: Major, junior or senior standing, 3.5 grade-point average in the major, consent of instructor, and approval of the Director of Undergraduate Studies.

FR 410 FRENCH IN PERFORMANCE. (3) Deepens linguistic and analytical skills as well as cultural knowledge through the rehearsal and performance of texts and other cultural artifacts. Representative activities include theatrical and short cinematic productions. Prereq: Completion of 6 hours of 300-level or higher French course work.

FR 425 MEDIA STUDIES. (3) An introduction to the analysis of film and to the major movements in the history of French cinema. May be repeated up to 6 credit hours. Prereq: Major, junior or senior standing, 3.5 grade-point average in the major, consent of instructor, and approval of the Director of Undergraduate Studies.

FR 470G TOPICAL SEMINAR I (Subtitle required). (3) Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; Le nouveau roman; Literature and Film of Subsaharan Africa; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; Le poème ivre; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 6 hours of 300-level or higher French course work.

FR 471G TOPICAL SEMINAR II (Subtitle required). (3) Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; Le nouveau roman; Literature and Film of Subsaharan Africa; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; Le poème ivre; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 9 hours of 300-level or higher French course work.

FR 502 INTRODUCTION TO CRITICAL AND CULTURAL THEORY: THE FRENCH CONNECTION. (3) Introduces upper-level undergraduate and beginning graduate students to the principles of critical and cultural theory. Explores topics of language, literacy, writing, subjectivity, culture, gender, everyday life and power through the work of primarily, but not exclusively, French thinkers such as Saussure, Barthes, Fanon, Foucault, Derrida, Lyotard, Kristeva, Baudrillard, de Certeau. Taught in English with no knowledge of French necessary.

FR 504 TOPICS IN FRENCH LITERATURE AND CULTURE (Subtitle required). (3) Intensive study of an author, genre, period or movement of French literature or an aspect of French culture. May be repeated to a maximum of nine credits under a different subtitle.

FR 510 LINGUISTIC STRUCTURE OF MODERN FRENCH. (3) An introduction to the basic phonological, syntactic and semantic categories and processes of contemporary French as studied in the light of current linguistic theory and practice. Prereq: FR 306 or equivalent.

FR 550 FRANCE TODAY. (3) A contrast between contemporary France in today's Europe and the historical image of France. The impact of the “New Quiet French Revolution” and of the new institutions on French Society. Conducted in French. Prereq: FR 306 and consent of instructor.

FR 553 TEACHING OF FRENCH. (3) The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on French. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

FR 570 SEMINAR IN FRENCH LANGUAGE PEDAGOGY. (1) A general seminar in a broad range of subjects in the area of French language pedagogy. May be repeated to a maximum of two credits. Prereq: Graduate student standing in French or consent of instructor.

FR 606 LITERATURE OF THE MIDDLE AGES (Subtitle required). (3) Special topics in French literature from the period 1050-1500. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FR 607 STUDIES IN RENAISSANCE LITERATURE (Subtitle required). (3) Comprehensive study of selected writers. May be repeated under a different subtitle to a maximum of six credits. Prereq: Consent of instructor.

FR 609 SEVENTEENTH-CENTURY STUDIES (Subtitle required). (3) Study of selected French writers, literary, intellectual and cultural practices of the time. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR 612 STRUCTURE AND STYLISTICS OF FRENCH. (3) A study of the history and structure of French with an emphasis on contemporary features. (Same as ENG/LIN 612.)

FR 617 EIGHTEENTH-CENTURY STUDIES (Subtitle required). (3) Literary, intellectual and social practices and theories of the French Enlightenment. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR 619 NINETEENTH-CENTURY STUDIES (Subtitle required). (3) Study of the intellectual, literary and social practices and theories of the major movements of the century, including Romanticism, Realism, and Symbolism. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR 621 TWENTIETH-CENTURY STUDIES (Subtitle required). (3) Study of the practices and theories of the major intellectual, literary and social movements of the century, such as modernism, existentialism, the new novel, post structural and postmodern writing. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR 630 FRENCH LANGUAGE, LITERATURE AND CULTURE OUTSIDE FRANCE (Subtitle required). (3) Study of Francophone writing, currents of thought, and cross-cultural movements in Africa, the Caribbean, Quebec and elsewhere. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR 687 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

FR 780 SPECIAL STUDIES IN FRENCH. (3) Selected studies and investigations in the French language and literature, permitting the student to work in areas of special interest, and providing opportunity for original endeavor. May be repeated to a maximum of 6 hours. Prereq: Consent of instructor.

FSC 107 INTRODUCTION TO FOOD SCIENCE. (3) A general basic food science course that deals with world food needs and available food supplies, types of food and nutritive values and use, food processing technology and distribution methods.

FSC 304 ANIMAL FOOD PRODUCTS. (4) Principles of red meat, poultry, fish and dairy processing; physical and chemical composition and nutritive value of meat, dairy and egg products; structure and identification of muscle; inspection, grading, formulation, processing and preservation methods; organoleptic properties and consumer acceptance of processed meat, dairy, and egg products. Lecture, three hours; laboratory, two hours per week. Prereq: FSC 107.

FSC 306 INTRODUCTION TO FOOD PROCESSING. (4) Commercial processing of foods including theory and use of heat exchangers, separators, freezers, air and vacuum dryers, evaporators, membrane separation, electrodialysis, emulsion formers, extruders, and irradiators. Physico-chemical changes in osmotic pressure, vapor pressure, pH surface tension, viscosity, emulsification and colloidal dispersions in processed foods will be discussed. Processing of waste streams will also be discussed. Lecture, three hours; laboratory, two hours per week. Prereq: CHE 105, CHE 107.

FSC 393 SPECIAL PROBLEM IN FOOD SCIENCE. (1-4) Independent study in food science under the supervision of a faculty member. A learning contract must be completed prior to enrolling course. May be repeated for a maximum of 8 credits. Prereq: Completion of learning contract and consent of instructor.

FSC 399 EXPERIENTIAL LEARNING IN FOOD SCIENCE. (1-3) A field-based learning experience in food science under the supervision of a faculty member. May be repeated for a maximum of 6 credits on a pass/fail basis. Prereq: Consent of instructor and department chairman and completion of a departmental learning contract before registration.
### Course Descriptions

#### FSC 430 SENSORY EVALUATION OF FOODS.
This course deals with the sensory evaluation methods used for food products based on flavor, odor, color, and texture. This includes techniques for measuring sensory attributes, instrumental analysis of foods, statistical analyses of data, and how sensory evaluation programs are utilized in the food industry. Prereq: STA 296 and FSC 306, or FSC 304 (prerequisite or concurrent enrollment).

#### FSC 434G FOOD CHEMISTRY.
Chemical and physical properties of proteins, lipids, carbohydrates, pigments and food additives as they relate to food processing and food preservation. Lecture, three hours; laboratory, two hours. Prereq: BCH 401G or consent of instructor.

#### FSC 530 FOOD MICROBIOLOGY.
Study of procedures for the enumeration and identification of foodborne microorganisms important in the food industry. Principles for controlling contamination and growth of microorganisms during production, processing, handling and distribution of food products. Lecture, three hours; laboratory, four hours. Prereq: BIO 208 and BIO 209 or equivalent.

#### FSC 535 FOOD ANALYSIS.
Techniques and instrumentation used to determine the chemical composition of foods. Emphasis is placed on the principles of chemical analysis as it relates to foods and food processing. Lecture, two hours; laboratory, four hours per week. Prereq: FSC 434G.

#### FSC 536 ADVANCED FOOD TECHNOLOGY.
Concepts of developing/improving new food products or processing including: consumer awareness, marketing, ingredient specifications and check testing, product formulation, stabilization of the food product, packaging to meet shelf life goals, shelf testing of products, thermal processing, challenge testing, establishment of HACCP system, consumers testing, marketing testing, and introduction to the market. A capstone course, where all concepts of food science are used to extend or create new food products for the marketplace. Lecture, three hours; laboratory, two hours. Prereq: AEN 340, FSC 306, FSC 530, and FSC 535 or consent of instructor.

#### FSC 538 FOOD FERMENTATION.
The use of microorganisms in the preservation of raw foods and the manufacture of new foods. Manipulation and improvement of cultures to ensure production of desirable end products. Lecture, three hours; laboratory, two hours. Prereq: BIO 208 and BIO 209 or equivalent, or consent of instructor.

#### FSC 540 FOOD SANITATION.
A study of sanitation principles and techniques for ensuring the safety and wholesomeness of our food supply. Prereq: FSC 350 or equivalent.

#### FSC 603 INTEGRATED NUTRITIONAL SCIENCES III.
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as CNU/NS 603.)

#### FSC 630 ADVANCED MEAT SCIENCE.
Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as ASC 630.)

#### FSC 632 FOODBORNE DISEASE AGENTS.
Discussion of foodborne, toxins and chemical involved in foodborne illnesses as well as procedures for controlling and investigating foodborne disease outbreaks. Prereq: FSC 330.

#### FSC 636 FOOD PACKAGING.
Detailed description of food packaging materials, composition and resistance to chemical and physical damage and their use in food systems as well as criteria for selection of packaging systems for specific food processing techniques will be presented. Methods of production, e.g., blow mold, casting and extrusion; layering; lamination and co-extrusion; processing, and printing and sealing will be discussed. Prereq: FSC 356, FSC 358 or equivalent or consent of instructor.

#### FSC 638 FOOD PROTEINS.
This course deals with chemical, biochemical, and enzymatic significance of proteins in food systems; physiochemical and functional properties of animal and plant proteins, their interactions with lipids, carbohydrates, flavors, minerals and other food components during processing and storage, and evaluating modifications of food quality. Prereq: FSC 434G or consent of instructor.

#### FSC 640 FOOD LIPIDS.
An advanced study of the chemical, physical, and biochemical significance of lipids in foods. Topics include the structure and function of lipids in post-harvest physiology, interaction with other food components, and the effect of lipids on the physical properties of foods during processing and storage. Prereq: One course in Food Chemistry or Biochemistry.

#### FSC 642 FOOD PIGMENTS.
Course deals with the chemistry and biochemistry of color of different food products which influence consumers’ purchase decision. Lecture topics include fundamental basis of food color and pigments, manipulation of food color, influence of processing on food color, and regulatory issues related to food pigments. Prereq: FSC 434G.

#### FSC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS.
May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 780.)

#### FSC 790 RESEARCH IN ANIMAL DERIVED FOODS.
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 790.)

### General Agriculture

#### GEN 100 ISSUES IN AGRICULTURE, FOOD AND ENVIRONMENT.
An introductory course requiring critical analysis of the major social, economic, political and scientific issues in agriculture and related disciplines. The historical development of agriculture will be surveyed, followed by discussions of major issues related to agriculture, food and environment. Development of skills in information gathering, critical analysis of issues, and written and oral communication will be emphasized. Satisfies the U.S. Citizenship area of UK Core. Prereq: Students enrolled in the College of Agriculture, Food and Environment; freshmen only in fall semesters and transfer students only in spring semesters.

#### GEN 109 SPECIAL INTRODUCTORY COURSE:
(Subtitle required.)
Interdisciplinary, topical or experimental courses offered at the introductory level to be approved by the Dean of the College of Agriculture, Food and Environment. A particular title may be offered at most twice under this GEN 109 number. Students may not repeat under the same title; repeatable to a maximum of twelve credit hours. Prereq: To be set by the instructor.

#### GEN 200 ISSUES IN AGRICULTURE: CONTEMPORARY PROBLEMS IN AGRICULTURE AND NATURAL RESOURCES.
An intermediate course which extends the critical analysis of selected issues in agriculture and related disciplines begun in GEN 100. Continues the development of skills in information gathering, critical analysis, and written and oral communication. Students will be required to investigate scientific literature germane to the issues covered and develop reviews, papers and project papers. Prereq: Sophomore enrolled in College of Agriculture.

#### GEN 300 SPECIAL COURSE.
Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Agriculture. A particular course may be offered at most twice under the GEN 300 number, and no GEN 300 course may be given for more than three credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. Hours are variable with each special course. Prereq: As specified by the instructor.

#### GEN 301 AN INTRODUCTION TO CHINESE CULTURE THROUGH AGRICULTURE.
This course is designed to introduce students to basic culture in China. Students will learn about Chinese agriculture, languages, customs, history, the political and educational system, geography and the economy. The culmination of the course is a three-week trip to China. Only students committed to go on the trip to China will be enrolled in the course. First priority for the trip is given to College of Agriculture students.

#### GEN 302 INTERNATIONAL EXPERIENCE IN AGRICULTURE AND NATURAL RESOURCES.
Credit for international experiences and travel abroad related to College of Agriculture degree programs. Students must work with faculty to determine if the experience is appropriate for credit. Credit will be determined by Associate Dean of the College depending on type of activity and requirements to be completed by students. Students may not use more than six hours toward degree requirements.

#### GEN 305 GOVERNMENT IN AGRICULTURE, FOOD AND ENVIRONMENT.
Course is an in-depth study of government in relation to agriculture, food and environment. Instructor and guest presenters will address the class on how government policy, regulations, laws and decision making affect all aspects of agriculture, food and environment. The origination and purpose of the land grant institution will also be discussed. Class will be very informative and time will be allotted each class period for questions/answers.

#### GEN 401 JOB SEARCH SEMINAR.
This course will address the selection of appropriate career choices, job search activities and the transition to the world of work. It will emphasize the application of communicative and team building skills in the area of career development. Pass/Fail only. Prereq: Junior or senior standing in the College of Agriculture.

#### GEN 501 AGRICULTURAL AND ENVIRONMENTAL ETHICS.
This course illuminates the major moral considerations of public policy issues concerning agriculture and the environment. The course will provide an overview of major moral theories, as well as opportunities to apply these theories to critical analysis of the major contemporary moral issues associated with agriculture and the environment. Prereq: Senior Standing.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEO 109</td>
<td>DIGITAL MAPPING.</td>
<td>3</td>
<td>This course introduces the concepts, techniques, and histories behind mapping as a creative and artist practice. It covers the centrality of the map in everyday life and the changing role of maps as society becomes increasingly saturated by digital information technologies such as geographic information systems (GIS) and global positioning systems (GPS). The course introduces principles in cartographic design and geographic visualization culminating in a series of maps created by each student.</td>
</tr>
<tr>
<td>GEO 130</td>
<td>EARTH’S PHYSICAL ENVIRONMENT.</td>
<td>3</td>
<td>A course exploring the fundamental characteristics of Earth’s physical environment. Emphasis is placed on identifying interactions between atmospheric processes involving energy, pressure, moisture, weather, and climate, and terrestrial processes of vegetative biomes, soils, and landscape formation and change. Fulfills elementary certification requirements in education, and USP cross-disciplinary requirement.</td>
</tr>
<tr>
<td>GEO 133</td>
<td>SCIENCE AND POLICY OF NATURAL HAZARDS.</td>
<td>3</td>
<td>This course examines the science of natural hazards such as hurricanes, earthquakes, landslides and floods, and the causes and effects of the natural hazards. It explores the relationships between the science of, and policy toward, such hazards, discusses their predictability, and examines how scientific knowledge influences policy-making.</td>
</tr>
<tr>
<td>GEO 135</td>
<td>GLOBAL CLIMATE CHANGE.</td>
<td>3</td>
<td>This course provides a broad overview of the processes that have shaped the climate in which we live, and of consequences of changes to this climate. The principle functions of climate in relation to the hydroosphere and biosphere are introduced, and climate change over geological time is described. The basic data used by climate science to identify and explain historical climate change, paleoclimate change, and more recent climate trends are examined. The course also considers the difference between climate science and ‘pseudoscience’ and how to evaluate predictions of future climate change. Fulfills the Gen Ed Intellectual Inquiry – Natural Physical Mathematical Sciences requirement.</td>
</tr>
<tr>
<td>GEO 152</td>
<td>REGIONAL GEOGRAPHY OF THE WORLD.</td>
<td>3</td>
<td>A geographical study of the world by regions with a focus on the world’s physical and human landscapes. Emphasis on how regions are connected to each other. Also how each region is affected by, and affects, global issues such as economic restructuring, food production, and environmental change, will be examined. Fulfills elementary certification requirement for Education and USP disciplinary social science requirement.</td>
</tr>
<tr>
<td>GEO 160</td>
<td>LANDS AND PEOPLES OF THE NON-WESTERN WORLD.</td>
<td>3</td>
<td>The geographic study of the conceptual and historical definition of regions of the world as “Non-Western.” Global patterns of social, cultural, economic, and political difference between the West and Non-West as well as the processes key to the making of the Non-Western world (such as colonialism and imperialism) are discussed. In addition, selected current issues of significance to peoples in the Non-Western world, such as sustainable development, environment, human rights, and gender relations, are examined. Fulfills the General Education Global Citizenship requirement.</td>
</tr>
<tr>
<td>GEO 161</td>
<td>GLOBAL INEQUALITIES.</td>
<td>3</td>
<td>This course focuses on basic spatial patterns of wealth and poverty at the global scale, comparing places and regions. Contemporary trends are identified and viewed in their historical context. Inequalities in access to basic human needs – food and water – are investigated through case studies drawn from around the world. The highly unequal world we live in raises serious questions of justice and sustainability, and these are considered in this course. Fulfills General Education requirements for Global Citizenship.</td>
</tr>
<tr>
<td>GEO 162</td>
<td>INTRODUCTION TO GLOBAL ENVIRONMENTAL ISSUES.</td>
<td>3</td>
<td>This course addresses environmental questions of global importance, including population growth, resource consumption, environmental degradation, biodiversity conservation, toxic contamination and environmental justice. Fulfills Gen Ed Global Dynamics requirement.</td>
</tr>
<tr>
<td>GEO 163</td>
<td>GLOBAL CONFLICTS.</td>
<td>3</td>
<td>This course will focus on the dynamics and effects of conflicts over boundaries, territory, environmental resources, and civil and political rights. A geographic lens will be used to understand contemporary world conflicts. This course introduces students to an understanding of conflicts as grounded both in localities and an effect of global interconnections – political, economic, and cultural. The course will focus on six major contemporary conflicts. Students will become versed in the debates and possible options for solution of these problems. While lectures will provide students with an understanding of the coordinates of the conflicts, recitations sections provide an opportunity for discussion and debate. The readings are chosen to supplement lecture material, providing a greater depth of understanding of the issues at stake. Fulfills the Gen Ed Global Dynamics requirement.</td>
</tr>
<tr>
<td>GEO 164</td>
<td>WORLD’S GLOBAL INFORMATION GEOGRAPHIES.</td>
<td>3</td>
<td>This course examines the ways that existing and emerging information technologies are helping to transform places and the way in which the world relates. It covers the intertwining of society and technology and how different cultures produce distinct technologies and use similar technologies in unique ways. Of particular focus will be the history and evolution of mapping technologies to present day systems such as global positioning systems (GPS), geographic information systems (GIS), and the geoweb. In addition the course will introduce the spatial implications of information technologies and contemporary debates on digital divides, surveillance and privacy, proximity and distance, democracy, and relationships between virtual, real-world and hybridized communities. Fulfills the Global Dynamics Requirement of General Education.</td>
</tr>
<tr>
<td>GEO 172</td>
<td>HUMAN GEOGRAPHY.</td>
<td>3</td>
<td>An introduction to geographic perspectives on human political, economic, social, and cultural activities (such as trade, economic development, empire, colonialism and nation building, agri-cultural population dynamics). Emphasis is on spatiality (including concepts of location, scale, globalization, maps, migration, and diffusion). Place making and regions (including concepts of the cultural landscape, place meaning, race, class and gender identities, and territority), and nature/society relations (including concepts of environmental adaptation and modification, climate change, and sustainability). Fulfills Gen Ed Intellectual Inquiry – Social Science and elementary certification requirement for education.</td>
</tr>
<tr>
<td>GEO 200</td>
<td>ORIENTATION TO GEOGRAPHY.</td>
<td>3</td>
<td>Introduces students to geographic perspectives, theories, research and professional opportunities. Applied qualitative and quantitative approaches to geographic research are reviewed and examples from current literature presented and discussed. Prereq: GEO 130, GEO 172.</td>
</tr>
<tr>
<td>GEO 220</td>
<td>U.S. CITIES.</td>
<td>3</td>
<td>This course introduces salient contemporary U.S. urban topics as seen from and analyzed by a geographic perspective. Topics include migration, urban sprawl, city services, gentrification and urban redevelopment, school districts, parks, housing, financing, and others. The course examines key issues, problems, and debates facing diverse U.S. urban communities, and will address the possibilities for citizen engagement in their resolution. Fulfills the Gen Ed U.S. Citizenship requirement.</td>
</tr>
<tr>
<td>GEO 222</td>
<td>CITIES OF THE WORLD.</td>
<td>3</td>
<td>Focuses on the historical development, contemporary character, and alternative futures of cities in both developing and developed regions. The spatial, social, economic, and political processes of major world cities are studied and contemporary urban problems are discussed. Fulfills Gen Ed Global Dynamics requirement.</td>
</tr>
<tr>
<td>GEO 230</td>
<td>WEATHER AND CLIMATE.</td>
<td>3</td>
<td>A survey of the atmospheric controls associated with local, regional, and global weather and climate variability. Includes fundamental coverage of the physics and chemistry of energy, gasses, pressure and moisture, with a goal of promoting understanding of general weather analysis and forecasting, severe storms, atmospheric pollution, descriptive climatology, and global climate change. Prereq: GEO 130 or consent of instructor.</td>
</tr>
<tr>
<td>GEO 231</td>
<td>ENVIRONMENT AND DEVELOPMENT.</td>
<td>3</td>
<td>This course explores the intertwining of environment, development and sustainability. It analyzes the political economy of environmental destruction (at macro and micro levels) to understand its origins and strategies to prevent it.</td>
</tr>
<tr>
<td>GEO 235</td>
<td>ENVIRONMENTAL MANAGEMENT AND POLICY.</td>
<td>3</td>
<td>An introduction to environmental systems such as weather and climate, vegetation, land forms and soils, and how the quality of these systems is modified by human use. Resource issues discussed include: atmospheric pollution and global warming; groundwater, flooding, and flood plain management; volcanic activity and earthquakes; and biospheric processes associated with deforestation and lake eutrophication. Case studies based upon important environmental problems illustrate how human activity and environmental systems interrelate. Fulfills USP Cross-Disciplinary requirement.</td>
</tr>
<tr>
<td>GEO 240</td>
<td>GEOGRAPHY AND GENDER.</td>
<td>3</td>
<td>Adopts a geographic approach to the study of gender relations. The role of space and place in shaping the diversity of gender relations throughout the world will be considered. Through case studies the importance of gender relations in understanding a variety of issues will be stressed. Such issues include: the design and use of urban and rural environments; “Third World” development; regional economic restructuring; changing political geographies; and migration.</td>
</tr>
<tr>
<td>GEO 255</td>
<td>GEOGRAPHY OF THE GLOBAL ECONOMY.</td>
<td>3</td>
<td>This course reviews the globalization of the world economy as a historical process with specific local, regional, and national outcomes. It introduces students to the factors and dynamics of ongoing globalization of the economy. Fulfills General Education requirements for Global Citizenship.</td>
</tr>
<tr>
<td>GEO 260</td>
<td>GEODESIES OF DEVELOPMENT.</td>
<td>3</td>
<td>This course focuses on differences between the richer global north and the poorer global south – sometimes referred to as the “Third World”. The basic global patterns of “development” are studied and the various explanations for development or lack there of are examined critically. Emphasis is placed on identifying interrelationships between atmospheric processes involving energy, pressure, moisture, weather, and climate, and terrestrial processes of vegetative biomes, soils, and landscape formation and change. Fulfills elementary certification requirements in education, and USP cross-disciplinary requirement.</td>
</tr>

University of Kentucky 2019-2020 Undergraduate Bulletin 522

KEY: #: new course *: course changed †: course dropped
GEO 261 GLOBAL DYNAMICS OF HEALTH AND DISEASE. (3)
This course is an introduction to the relationships between environment and health. While this course emphasizes environmental concerns of the ‘Global South’, this course will also cover instances of ‘Global North’ peoples and places, particularly in less privileged areas such as Appalachia. The course examines the political economy of environmental destruction by asking why, despite much significant research, environmentally destructive development schemes continue. Although we understand at least the main contours of what it will take to become a sustainable society, little progress has been made in implementing even evidently necessary policies.

GEO 285 INTRODUCTION TO PLANNING. (3)
An introduction to the history, purpose, and objectives of planning with emphasis on urban and regional planning, planning processes, techniques, and legislation.

GEO 300 GEOGRAPHIC RESEARCH. (3)
Provides a detailed examination and analysis of the methods of initiating and executing research projects in human or physical geography. Includes identification of geographic dimensions of research topics, theoretical/conceptual frameworks, conduct of literature reviews, research designs, data collection/analysis and presentation. Prereq: GEO 130 or 152, 160 or 172, or consent of instructor.

GEO 305 ELEMENTS OF CARTOGRAPHY. (3)
Fundamental training in map drafting, compilation, symbolization, scales, projections, and map reproduction, including emphasis on the conceptual planning and designing of maps and graphs as a medium for communication.

GEO 309 INTRODUCTION TO GIS. (3)
This course introduces students to the use of geographic information systems and their basic principles. Topics addressed include data collection, processing and output. Students will learn about types of geographic information and data: sources, constraints, and uses; the range of secondary spatial data sets available; and the collection of primary spatial data using global positioning systems (GPS) and other technologies.

GEO 310 DATA EXPLORATIONS AND APPLICATIONS IN EVERYDAY LIFE. (3)
This course instructs students on the full workflow associated with primary data – research design, data definition, collection and cleaning, mapping, statistical analysis – that can also be applied to secondary data. Use cases will focus on a range of human and physical geography topics emerging from everyday life and emphasize spatial data and the analytical techniques associated with common software packages, e.g., spreadsheets and open-source mapping tools.

GEO 311 QUALITATIVE METHODS IN GEOGRAPHY. (3)
This course is an introduction to qualitative methods in geographical research. Students will begin by learning the basic principles of research design, as well as ethical and procedural considerations of any research project using qualitative methods. The course primarily will focus on introducing students to basic qualitative methods used in geographic research, but pertaining also to social science research in general, potentially including (but not limited to): participant observation, archival analysis, interviews, surveys, focus groups, participatory action research, data coding and analysis, discourse and textual analysis, visual analysis, and content analysis.

GEO 316 ENVIRONMENT AND DEVELOPMENT. (3)
This is an introductory/intermediate level course on the relationships between environment and economic development. While this course emphasizes environmental concerns of the ‘Global South’, this course will also cover instances of ‘Global North’ peoples and places, particularly in less privileged areas such as Appalachia. The course examines the political economy of environmental destruction by asking why, despite much significant research, environmentally destructive development schemes continue. Although we understand at least the main contours of what it will take to become a sustainable society, little progress has been made in implementing even evidently necessary policies.

GEO 320 GEOGRAPHY OF THE UNITED STATES AND CANADA. (3)
A systematic review of the physical context, economic, historic, and cultural diversity that distinguish U.S. and Canadian regions. Topical emphasis on the geographic aspects of regional problems. Fullfills General Education requirements for U.S. Citizenship. Prereq: GEO 130 or 152 or 172, or consent of instructor.

GEO 321 LAND, PEOPLE, AND DEVELOPMENT IN APPALACHIA. (3)
Major themes revolve around regional diversity and regional development. Major topics examined are economic development, cultural and population geography. The study region includes the upland areas between southern New York State and central Alabama. Prereq: GEO 130, 152 or 172, or consent of instructor.

GEO 322 GEOGRAPHY OF KENTUCKY. (3)
An examination of the cultural, economic, political, and environmental diversity of Kentucky. In addition to studying the state’s historical evolution, emphasis will be placed on contemporary problems facing the state. Kentucky’s regional, national, and international contexts are discussed. Prereq: GEO 130, 152, 160, or 172.

GEO 323 MEXICO: ENVIRONMENT, POLITIES, AND SOCIETY. (3)
This course examines how politics, the environment, and socio-economic relations have shaped Mexico’s contemporary social and cultural geography. The course examines how historical and contemporary processes such as agrarianism, urbanization (Mexico City), the Mexican Revolution, migration, and development have shaped the politics of identity, community, and geography, with particular attention to questions of gender, indigenous peoples, and popular culture.

GEO 324 GEOGRAPHY OF CENTRAL AND SOUTH AMERICA AND THE CARIBBEAN. (3)
A study of the diversity of physical environments and human societies. The various historical geographies (pre-Columbian and after) of the region are presented as essential to an understanding of contemporary geographical patterns and processes in transport, agricultural, industry and mining, urbanization, and population. Throughout the course case-studies are presented and students are guided as they develop their own case studies. Prereq: GEO 152 or 160 or 172.

GEO 326 GEOGRAPHY OF EUROPE. (3)
This course explores the physical, cultural, and political geography of the European continent. Diversity of populations and physical landscapes is stressed. The geopolitical context for current events that are changing the face of Europe are presented. Prereq: GEO 152 or 172.

GEO 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3)
A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region’s position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as AAS 328.)

GEO 329 GEOGRAPHY OF THE FORMER SOVIET UNION. (3)
A study of this region’s diverse physical and human landscapes, emphasizing the historical and contemporary interlinkages between the various states. Contemporary problems of the post-Soviet era (such as environmental degradation, economic and regional restructuring, or the international position of the region) will be studied from a geographical perspective. Prereq: GEO 152, 160, or 172.

GEO 330 GEOGRAPHY OF THE INDIAN SUBCONTINENT. (3)
A study of the human, economic, and environmental aspects of India, Pakistan, Bangladesh, Himalayan Nepal and Bhutan, and Sri Lanka. Topics include basic physical and cultural regionalisms, land use and population problems, and patterns of economic development involving urbanization, resources, and industrialization. Prereq: GEO 152 or 160 or 172.

GEO 331 GLOBAL ENVIRONMENTAL CHANGE. (3)
This course focuses on environmental processes (in the atmosphere, hydrosphere, lithosphere and biosphere) and the effects of historic and long-term environmental changes. Climatic change and natural system adjustments will be discussed, but the course will concentrate on human-induced environmental changes. Prereq: GEO 130 or equivalent, or consent of instructor.

GEO 332 GEOGRAPHY OF SOUTHEAST ASIA. (3)
A study of the cultural, economic, and political patterns and processes in mainland and insular Southeast Asia. Major themes examined are how the region’s diverse physical geography, diverse natural resource base, cultural diversity, and colonial heritage provide a background for understanding contemporary development. Prereq: GEO 152 or GEO 160 or GEO 172 or consent of instructor.

GEO 333 GEOGRAPHY OF EAST ASIA. (3)
Provides an understanding of the life and landscapes in East Asian nations, with special focus on China and Japan. Emphasis is placed on contemporary issues of sustainable development, environmental management, minority groups, human rights and gender relations. Prereq: GEO 152, GEO 160, GEO 172 or consent of instructor.

GEO 334 ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN. (3)
This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses human and physical environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials; challenges to the management of environment and its resources; and Japan’s role in global economy. (Same as JPN 334.)

GEO 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)
This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as AAS 336.)

GEO 351 PHYSICAL LANDSCAPES. (3)
A study of earth surface processes and land forms. The focus is on the analysis and interpretation of earth surface features and topography in terms of process-response mechanisms, and on an understanding of the fundamental physical, chemical, biological, and historical processes which create and modify land forms. Prereq: GEO 130 or equivalent, or consent of instructor.

GEO 356 SPECIAL TOPICS IN REGIONAL GEOGRAPHY (Subtitle required). (3)
Offers coverage of world regions not usually covered in other geography courses, or in-depth examinations of specific subregions. Topics covered include: elements of climate and physical landscapes; political and economic systems and their historical development and dynamics; social and cultural processes and landscapes. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Any 100-level geography course or consent of instructor.

GEO 399 INTERNSHIP IN GEOGRAPHY. (3)
Provides supervised professional experience in public and private sector positions, and is intended to introduce students to the skills and working environments of careers in geography. Students should consult with a geography faculty member in advance of registering for this class. Prereq: Junior or senior standing in the major.
GEO 406 FIELD STUDIES IN GEOGRAPHY (Subtitle required). (3)
Field-based, regionally specific study of selected topics in cultural, economic, environmental, physical, political, social, or urban geography. May be repeated to a maximum of 8 credits with change in field site. Prereq: GEO 200.

GEO 409 ADVANCED GIS. (3)
This course is developed to introduce intermediate and advanced topics in geographic information science and spatial analysis including theoretical and applications areas. Building upon a range of GIS software systems this course covers geographic data collection, entry and editing, spatial analysis, interpolation and map development and display. Prereq: GEO 309 or consent of instructor.

GEO 415 MAP INTERPRETATION. (3)
An introduction to reading and interpreting maps. Special attention given to the study of physical and human geography portrayed on large scale topographic maps. Emphasizes the relationship between the environmental setting and human activities, surveys and boundaries, transportation, urban and rural settlement and land use, and place names. Prereq: GEO 130 or 172 or consent of instructor.

GEO 419 INTRODUCTION TO REMOTE SENSING. (3)
This course offers an introduction to remote sensing technologies and their application to land use/cover analysis, environmental monitoring, natural resources management, and urban planning. This course covers the fundamental remote sensing principles, overview of space/borne sensors/data, essential techniques for digital image processing, and applications particular related to diverse land surfaces such as vegetation, water, urban, and soil/bedrocks. Theoretical training and lab exercises are integrated components in this course. Prereq: GEO 309 or consent of instructor.

GEO 422 URBAN GEOGRAPHY. (3)
An examination of the relationship between urbanization and the larger social and economic contexts within which city growth occurs. Surveys a range of theoretical perspectives on the internal socio-economic structuring and built environment of cities, including the contributions of Chicago School, neo-classical, Marxist, and postmodern theorists. Emphasis also placed on relevant environmental, social, and political problems of cities. Primary focus is on North American cities, but includes cross-cultural comparisons. Prereq: GEO 152, 160, 172, or 222, or consent of instructor.

GEO 431 POLITICAL ECOLOGY. (3)
This course examines the relationship between political economies and the biophysical environment and seeks to understand the challenges of development, agriculture, gendered divisions of labor, and the representation of nature in the context of the globalization of economic relations.

GEO 442G POLITICAL GEOGRAPHY. (3)
This course examines how space and political activities are related. Major topics will include: history of political geographic thought; geopolitics; nationalism and identity; the territorial state; regionalism; conflicts; borders and frontiers, and electoral geography, at a range of scales.

GEO 451G FLUVIAL FORMS AND PROCESSES. (3)
An examination of erosion, deposition, and sediment transport processes associated with flowing water, landforms associated with fluvial processes, and landscape evolution in areas dominated by fluvial dissection and deposition. Field trips may be required. Prereq: GEO 353 or GLY 341.

GEO 452G WORLD GEOGRAPHY FOR TEACHERS. (3)
Approaches to teaching geographic themes and concepts within the context of the world’s major regions and countries in grade levels K-12. Addresses those issues and problems that affect world regions in the context of the following broad themes: location, place, movement, regions, and human-environment interactions. Among those topics discussed are the use and importance of maps and related resource materials in instruction, presentation of themes at different grade levels, and identification and utilization of a broad range of reference materials for student and teacher use. Lecture, ten hours per week for four weeks.

GEO 455 GLOBALIZATION AND THE CHANGING WORLD ECONOMY. (3)
This course provides an advanced view of the ongoing restructuring of the geography and organization of the capitalist global economy. Emphasis will be placed on contemporary issues (such as industrial restructuring or the financial industry), and specific regions (such as Kentucky or China). Competing theories (classical, neoclassical, and marxist) and empirical and analytical strategies will be used to analyze the relationship between globalization and the changing world economy.

GEO 465 SPECIAL TOPICS IN GEOGRAPHY (Subtitle required). (3)
Offers coverage of issues and themes not covered in other geography courses, or in-depth examinations of specific issues and themes. Topics covered will commonly address emerging national and global issues of both general and scholarly interest. May be repeated for a maximum of six credit hours (under different subtitles). Prereq: Any 100-level geography course or consent of instructor.

GEO 470G AMERICA’S CULTURAL GEOGRAPHIES. (3)
This course examines the diversity of cultural attributes (both tangible and intangible) in the American landscape through a range of perspectives, e.g., environmental/historical, politics, economic, gender, race, etc., and understand how deeply held values manifest in minds and places. Prereq: GEO 172 or ANT 220.

*GEO 475 HEALTH AND MEDICAL CARE IN SPACE AND TIME. (3)
An examination of the geography of health and medical care of the two major traditions of medical geography: disease, ecology and medical care. Examined are the etiology, diffusion, and distribution of selected major diseases. Issues pertaining to the spatial-temporal distribution, accessibility and utilization of medical care resources are presented. Prereq: GEO 160, GEO 172, GEO 261 or consent of instructor.

GEO 485G URBAN PLANNING AND SUSTAINABILITY. (3)
An analysis of urban and regional planning with emphasis on the contemporary urban and regional planning activities. Prereq: GEO 285 or consent of instructor.

GEO 490G AMERICAN LANDSCAPES. (3)
A review and analysis of America’s vernacular landscapes. Topics include: the history of settlement by Europeans, Africans, and others; evolving political allegiances; and the expansion of agricultural and industrial technologies in the context of diverse physical environments. The role of political philosophy in landscape development and historic preservation will be highlighted. Prereq: GEO 172 or consent of instructor.

GEO 491G JAPANESE LANDSCAPES. (3)
A study of the landscapes of Japan as vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as JPN 491G.)

GEO 499 SENIOR RESEARCH SEMINAR. (3)
Course is intended to provide a capstone experience in geographical research and problem-solving through demonstrating students’ ability to identify an appropriate research topic in geography; developing and implementing appropriate research strategy; and presenting research results. Prereq: GEO 406. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

GEO 505 PRACTICUM IN CARTOGRAPHY. (3)
Experience credit in which a small number of advanced students work under the direct supervision of the faculty or staff cartographer and in conjunction with other faculty members on departmental and contracted projects. May be repeated to a maximum of six hours. Prereq: GEO 305 and GEO 506 and consent of instructor.

GEO 506 INTRODUCTION TO COMPUTER CARTOGRAPHY. (3)
A basic introduction to computer-assisted cartography. Emphasis on basic computer graphics literacy and automated techniques for spatial data acquisition, storage, processing, and output. Introduction to current mainstream, workstation, and desktop mapping programs. Prereq: GEO 305 or permission of instructor.

GEO 509 WORKSHOP IN GEOSPATIAL TECHNOLOGIES. (3)
A workshop course for advanced students and professionals in the field of geospatial science. The course covers a full range of collaborative GIS: working with team members and project partners to identify project goals, acquiring and preparing spatial data for GIS analyses, communicating with clients to assess progress, managing spatial data, and producing necessary maps and analyses. Prereq: GEO 309 or GEO 609 or consent of instructor.

GEO 530 BIOGEOGRAPHY AND CONSERVATION. (3)
An introduction to the geographic patterning of biological diversity, exploring its origins, variation, and present trends. Examines the interplay among biophysical, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as BIO 530.)

GEO 531 LANDSCAPE ECOLOGY. (3)
This course explores the field of landscape ecology—the causes, development, importance of ecological processes, and the interactions of dynamic processes over broad spatial scales that can serve as foundation for decision-making and problem solving. Prereq: Six hours of physical geography or biology.

GEO 544 HUMAN POPULATION DYNAMICS. (3)
The study of human population distributions, densities, and growth patterns through analyses of the processes of fertility, mortality and mobility. Topical coverage includes the environmental, social, political, economic, and behavioral impacts on population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, with special attention given to issues of gender, race, and class.

GEO 546 TOURISM AND RECREATION GEOGRAPHY. (3)
Tourism is the world’s fastest-growing economic sector, creating and transforming places, regions and broader geographies of travel, movement, and investment. The course will examine concepts, models, and theories in the study of tourism and recreation. Selected themes include major travel flows and patterns; economic, environmental, and socio-cultural impacts; mass tourism; new tourism, adventure tourism, extreme tourism; heritage tourism; marketing; place boosterism; tourism and recreation planning; and the politics of tourism. Local, national, and international examples in both developed and developing countries are discussed. Prereq: GEO 152, 172, 455, or consent of instructor.

KEY: # = new course  * = course changed † = course dropped
GEO 550 SUSTAINABLE RESOURCE DEVELOPMENT AND ENVIRONMENTAL MANAGEMENT. (3)
A study of the strategies for sustainable management and sustainable development of resources. Topics covered include environmental management and sustainable development of resources. Topics covered include contemporary environmental degradation and resource use problems, political economy of resource use and environmental change, design and management of sustainable development, impact of sustainable development on gender issues and poverty, and environmental accounting. Prereq: GEO 130 or GEO 210 or consent of instructor.

GEO 551 JAPANESE MULTINATIONAL CORPORATIONS. (3)
A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinationals on policies on the environment; and local economy. Prereq: Consent of instructor. (Same as JPN 551.)

GEO 560 INDEPENDENT WORK IN GEOGRAPHY. (3)
Individualized study and/or research intended to provide opportunities for students to explore topics in more depth than is offered in existing courses, or to address topics not covered in existing courses. Students work with a faculty supervisor to define a specific area of study, appropriate learning objectives, and suitable evaluation criteria. Course format may range from critical reading of selected literatures to innovative research projects. Students should identify and consult with a faculty supervisor well in advance of registration for this course. Prereq: Restricted to Geography majors with GPA of 3.0 or above in the department.

GEO 565 TOPICS IN GEOGRAPHY. (3)
Discussion, readings, and papers focusing on relevant topics in geography directed by a staff member having specific competence for the topics under study. Current research developments in particular geographic subfields will be stressed. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

GEO 570 LANDSCAPE ECOLOGY FOR NATURAL RESOURCES. (3)
Principles of landscape ecology and their applications to contemporary ecological issues. Students will learn and apply the tool of geographic information system (GIS) and spatial analysis to problems in natural resource ecology, management, and conservation. Course covers the following areas: principles of landscape ecology (e.g., patch, network, and scale); quantitative analysis of landscape patterns, formation and dynamics of landscape patterns, role of disturbance, landscape models and their applications. Prereq: Any upper level course in GIS or consent of instructor. (Same as FOR 570.)

GEO 585 AGING AND ENVIRONMENT. (3)
Explores the elderly person's changing experience of environment. Physiological, psychological, social and cultural changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GRN 585.)

GEO 600 INTRODUCTION TO METHODS IN GEOGRAPHY. (3)
A broad survey of methods and methodological debates of research in human/physical geography. Emphasis on contemporary research examples. Prereq: Graduate standing.

GEO 609 GISCIENCE FUNDAMENTALS. (3)
This course introduces students to the use of geographic information systems and the science behind their use. Topics include an introduction to types of geographic information and data; the sources, constraints, and uses of data; the techniques for processing and visualizing spatial data and the methodological, epistemological and ontological issues associated with GIScience.

GEO 610 ANALYTICAL METHODS IN GEOGRAPHY. (3)
An introduction to the application of analytical methods to geographic problem solving. Topics covered sampling theory, probability theory and both parametric and nonparametric statistical techniques. Prereq: STA 570 or equivalent or consent of instructor.

GEO 619 REMOTE SENSING FUNDAMENTALS. (3)
This course covers the use of remote sensing technologies and their application in natural resource management, land use/cover analysis, city and regional planning and environmental monitoring. This course covers the basic remote sensing principles, the range of space/airborne sensors/data, key techniques for digital image processing, and applications particular related to diverse land surfaces including the built environment, water, soil and vegetation.

GEO 655 SPECIAL STUDY OF SYSTEMATIC GEOGRAPHY. (3)
The application of the methods of systematic geography to particular special studies in topical areas, such as conservation, urban areas, climatology, cartography, or others. May be repeated to a maximum of six credits. Prereq: Above one of the following courses: GEO 550, GEO 610, or GEO 650 or equivalent.

GEO 702 CONCEPTS IN GEOGRAPHY. (3)
Contemporary geographic concepts and theories are examined with emphasis on concepts within human geography, especially with reference to the economic, urban, cultural, and population subfields within the discipline. Prereq: Graduate student status.

GEO 705 ADVANCED GEOGRAPHIC METHODS (Subtitle required). (3)
In-depth study and application of one or more research methods/techniques (e.g., qualitative methods, ethnography, textual analysis, visual analysis, GIS). Intended to offer M.A. and Ph.D. students advanced methodological specialization in geography. May be repeated to a maximum of six credits under different subtitles. Prereq: GEO 600 or equivalent.

GEO 706 ADVANCED FIELD STUDIES (Subtitle Required). (1-9)
Field-based, regionally specific study of selected topics in cultural, environmental, political, social, urban, or economic geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: Consent of instructor.

GEO 707 DEVELOPMENT OF GEOGRAPHIC THOUGHT. (3)
An analytical review of the evolution of geographic thought, in terms of concepts, methodologies and scholars, emphasizing the basic literature through a series of topics.

GEO 708 GEOGRAPHIC INFORMATION SYSTEMS RESEARCH METHODOLOGIES. (3)
Following a brief overview of GIS, remote sensing, GPS, and other relevant information technologies as information collection, presentation, and analytical aids, this course will consider current developments of geographic information technologies. These include, but are not limited to, field GIS, public participation GIS, participatory information technology, collaborative environments, and spatial decision-making. Discussion of these developments will be complemented by a rigorous examination of theoretical and methodological issues. Prereq: GEO 409G or its equivalent, or consent of instructor.

GEO 709 ADVANCED GISCIENCE. (3)
This course explores advanced applications and topics within GIScience including data mining, scripting, point pattern analysis, data interpolation, geospatial modeling and network analysis and the methodological, epistemological and ontological issues, with the classification requirements and analytical capabilities of GIScience. Prereq: GEO 609 or consent of instructor.

GEO 711 CULTURAL STUDIES AND GEOGRAPHY (Subtitle required). (3)
Seminar in cultural studies and geography, including, for example, interpretation and analysis of the built environment; space and representation; the political economy of landscape production; regional imagery; media studies; popular culture; the social construction of community; historic preservation; recreation; tourism and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 712 DEVELOPMENT STUDIES AND GEOGRAPHY (Subtitle required). (3)
Seminar in selected topics in the policies, practices, and processes of development, including, for example, political economy perspectives on development; anti-development and postcolonial theory; economic restructuring and transition economies; gender and development; the relations between development and migration, transportation and tourism; environmental management and sustainable development. May be repeated to a maximum of nine credits under different subtitles.

GEO 713 ECONOMIC GEOGRAPHY: (Subtitle required). (3)
A seminar in economic geography, including, for example, global, regional, and local economic restructuring, global financial systems; foreign direct investment and trade; geography of multinational corporations; geography of labor, spaces of production and spaces of consumption; gender and economic space; space-time convergence; information and communications. May be repeated to a maximum of nine credits under different subtitles.

GEO 714 POLITICAL GEOGRAPHY: (Subtitle required). (3)
A seminar in political geography, including, for example, electoral systems; state theory; post-Cold War democratization; the geography of revolutionary change; critical geopolitics; political economy of environmental movements; political economy of globalization discourses and practices. May be repeated to a maximum of nine credits under different subtitles.

GEO 715 GEOGRAPHY AND SOCIAL THEORY (Subtitle required). (3)
Seminar in geography and social theory, including, for example, theories of human spatiality; marxist, neo-marxist, and post-Marxist theory; postmodernism and poststructuralism; feminist theory; actor network theory; identity theory; geographic thought and society; technology and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 717 URBAN GEOGRAPHY (Subtitle required). (3)
Seminar in urban geography, including, for example, urban morphology; urban systems; the local state; urban social fragmentation; conflicts over urban growth and development; urban transportation planning; urban historical geography; gender and urban space; race and urban space; urban landscapes. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 718 TOPICAL SEMINAR IN GEOGRAPHY OF ENVIRONMENT AND RESOURCES (Subtitle required). (3)
Study of selected topics on agriculture resource allocation, resource conflict, public land policy, natural hazards, environmental management, energy and biogeochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 719 GEOSPATIAL TECHNOLOGIES (Subtitle required). (3)
A seminar in the social construction of geospatial technologies and the implications of their use. Topics may include crowd-sourcing, privacy and surveillance, open source software, code/ space, censorship and control, copyright and locative media usage. May be repeated to a maximum of nine credits under different subtitles.
Course Descriptions

GEO 721 TOPICAL SEMINAR IN PHYSICAL GEOGRAPHY (Subtitle required). (3)
Examination of selected topics in geomorphology, hydrology, pedology, biogeography, climatology, and earth system science. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 722 SOCIAL GEOGRAPHY (Subtitle required). (3)
Seminar in social geography, including, for example, race and gender, feminist geography, health care, disease and society; the geography of AIDS; the geography of aging and the life course; poverty and social policy; human behavior in space and time; population and migration studies; spatial structure of social networks; transportation of disadvantaged groups. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 731 EARTH SURFACE SYSTEMS. (3)
A treatment of earth surface systems from the perspective of complex systems theory. The course takes a holistic viewpoint, emphasizing interactions between the atmo-, litho-, hydro-, and biospheres and the manifestations of those signatures in soils, landforms, and ecosystems. Prereq: Consent of instructor.

GEO 740 RESEARCH INTERNSHIP (Subtitle required). (1-6)
To provide students with course credit for faculty supervised internships with governmental and non-governmental organizations. May be repeated to a maximum of nine credits.

GEO 741 TEACHING PRACTICUM. (1)
Introduction to teaching, with particular focus on pedagogical issues in geography courses. Intended to provide students with background sufficient to enable them to assume full responsibility for university college level courses.

GEO 742 PREPARING FUTURE FACULTY IN GEOGRAPHY. (1)
Introduction to the professoriate, with particular focus on geography within the academy. Intended to provide students with background sufficient to assume responsibility as new faculty members in universities and colleges.

GEO 743 RESEARCH PROPOSALS AND GRANT WRITING. (1)
Introduction to basic geographic research proposal design standards, with particular emphasis on the requirements of granting agencies.

GEO 748 MASTERS THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GEO 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

GEO 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GEO 768 RESIDENCE CREDIT FOR THE MASTERS DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

GEO 769 RESIDENCE CREDIT FOR THE DOCTORS DEGREE. (0-12)
May be repeated indefinitely.

GEO 772 SPECIAL RESEARCH PROBLEMS IN GEOGRAPHY. (1-6)
Open to doctoral candidates who have the necessary training and ability to conduct research on a selected problem. May be repeated to a maximum of 12 credits. Prereq: Approval of the director of graduate studies.

GER German Studies

GER 211 GERMAN FOR READING KNOWLEDGE. I. (3)
This is the first of a two-course sequence in German that will enable students to read any German texts they wish, from daily newspapers and magazines, to literary works, to scholarly prose in any discipline. Prereq: GER 201.

GER 212 GERMAN FOR READING KNOWLEDGE. II. (3)
The course will confront students with a variety of texts of ever increasing difficulty. Students will be provided with the foundation necessary both for understanding the evolution of German literature, history, and culture, and with the reading skills necessary for them to use the language in their course work. Completion of the two-semester sequence will enable undergraduates to pursue a course of study leading to the proposed certificate in German studies. Prereq: GER 211, or GER 201 and permission of instructor or GER 202.

GER 263 THE GERMAN CULTURAL TRADITION. I. (3)
An introduction to the social, intellectual and aesthetic traditions of German-speaking cultures from the Germanic past to the Enlightenment. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

GER 264 THE GERMAN CULTURAL TRADITION. II. (3)
An introduction to the social, intellectual and aesthetic tradition of German-speaking cultures from the Enlightenment to the present. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

GER 305 GERMAN FILM TODAY. (3)
This course explores German filmmaking in the 21st century. It is an introduction to the understanding and interpretation of films produced in a specific national context outside of what is commonly referred to as Hollywood. Our examination will have two parts. An introduction to interpretative strategies used to understand feature length films as one of the dominant modes of storytelling and myth making in the contemporary world. And, an on-going discussion of the many ways in which issues related to history, nationality, language and global economics have influenced filmmaking in Germany. We will view, analyze, compare, discuss and interpret a representative sampling of contemporary German films while questioning and exploring the very designation German in the context of globalized media markets.

GER 307 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION I. (3)
This course develops listening, speaking and writing skills in German with emphasis on practical communicative needs. It includes a review of grammar, special oral and written projects, class discussion, and practice in a variety of written forms. Prereq: GER 202 or equivalent.

GER 308 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION II. (3)
Continuation of GER 307. Prereq: GER 307, or equivalent.

GER 310 GERMAN FOR INTERNATIONAL BUSINESS AND PROFESSIONS. (3)
This course will develop written and conversational skills based on communicative needs of international business and professions in German-speaking countries, using materials from banking, computer science, export-import, journalism, government and the public sphere. Prereq: GER 307 or permission of the instructor.

GER 311 INTRODUCTION TO GERMAN LITERATURE: THEMES (Subtitle required). (3)
An introductory course that explores such themes in German literature as Fathers and Daughters, Fathers and Sons, Trials, Judgments and Justice, and Conceptions of the Self. Readings will be drawn from various periods and major genres. Themes vary and will be announced. May be repeated once for a total of six credits by nonmajors if theme changes. Prereq: GER 202 or equivalent.
GER 312 GERMAN POPULAR FORMS (Subtitle required). (3) An introductory course that focuses on social, political, anthropological and aesthetic aspects of popular forms of German literature. Readings include fairy tales, folk songs and legends, children's literature, detective stories, comics and other popular literary forms. May be repeated up to 6 hours with change in topic. Prereq: GER 202 or equivalent.

GER 317 HISTORY OF GERMAN CULTURE. (3) An introduction to German culture with emphasis on the epochs important to the development of modern German-speaking countries. Readings in German from philosophy, the sciences, the arts, history, politics and literature. Visual materials documenting high culture and everyday life. Taught in German. Prereq: GER 205 or 206, or equivalent.

GER 319 CONTEMPORARY GERMAN LITERATURE AND CULTURE. (3) Selected works of contemporary German literature by Austrian, German, and Swiss authors are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 307.

GER 342 WAR, PEACE, AND TERROR IN GERMANY AND EUROPE. (3) This course explores the topics of war, peace, and terror in the context of Germany, Central Europe, and beyond: in the desire for peace and for war, from depictions of battle to reflections on policy and strategy; and from the logic of terror to its horrifying effects.

GER 352 GERMAN-SPEAKING EUROPE: (Subtitle required). (3) This course will place an important aspect of German culture in the broader context of European cultural and historical developments. Focus is a given semester will be on a special topic through which significant developments in literature and the arts may be considered in relation to the historical context of such developments. Possible topics include Language of the Holocaust, Terrorism in the German Context, The Culture of Sport, and Children's Literature. All readings will be in English. Students taking the course for a German major or minor will complete a number of assignments in the German language. May be repeated to a maximum of six credits under different subtitles.

GER 361 GERMAN CINEMA. (3) A history of the cinema in the German-speaking world from its beginnings to the present, emphasizing the evolution of the production, distribution and reception of film in relation to changing political, social, economic, ideological and literary/ artistic contexts. Some consideration of film theory and criticism in conjunction with class discussion of individual films. Viewing of films (silent or German dialogue with English subtitles) outside of class is required. Class taught in English.

GER 363 GERMANIC MYTHOLOGY. (3) Overview of the mythological traditions of the Germanic peoples and their continuing presence in Western culture.

GER 395 INDEPENDENT WORK IN GERMAN. (1-3) This course is designed for students who wish to do advanced work in German on any subject. May be repeated up to a maximum of six credit hours. Prereq: Major and a standing of 3.0 in the department.

GER 507 ADVANCED GERMAN COMPOSITION AND CONVERSATION. (3) Further development of conversational skill and practice in writing stylistically appropriate German. Study of finer points of grammar. Discussion of special topics and theme writing. Prereq: GER 308 or equivalent.

GER 515 STUDIES IN MAJOR AUTHORS. (3) Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors' literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 516 STUDIES IN GENRE. (3) One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 520 SPECIAL TOPICS SEMINAR. (3) Investigation of a topic pertinent to the advanced study of German language, literature and culture. May be repeated once with new topic. Prereq: GER 415G, 416G, 420G or equivalent.

GER 550 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required). (3) A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as "Individual and Collective Identity Formations in post-Enlightenment Germany," "Constructions of German Heimat," and "Fried, Culture, Society." May be repeated to a maximum of six credits under different subtitles. Prereq: Senior standing or consent of instructor.

GER 553 THE TEACHING OF GERMAN. (3) The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on German. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

GER 612 STUDIES IN LITERARY THEORY. (3) Course will explore such fundamental issues as the definition of literature, interpretation and evaluation, the reading process, and literary life from the perspective of competing theoretical systems.

GER 615 STUDIES IN MAJOR AUTHORS. (3) Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors' literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits.

GER 616 STUDIES IN GENRE. (3) One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of nine credits.

Note: The course series GER 620-630 provides a general framework for the systematic study of German literature in its cultural setting and delimits various issues to be investigated further in corresponding 700-level courses. Readings and discussions focus on documents central to the literary life of a given period and to the understanding of its institutional and biographical basis as well as its regional, sociopolitical, motivational, poetological, and ideological diversity. Each course also emphasizes critical methodology and tools of scholarship and identifies new directions for basic research.

GER 625 STUDIES IN THE 18TH CENTURY. (3) Enlightenment to Classicism.

GER 629 STUDIES IN THE 19TH CENTURY. (3) Romanticism to Naturalism.

GER 630 STUDIES IN THE 20TH CENTURY. (3) Turn-of-the-century Modernism to the present.

GER 650 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required.) (3) A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as “Individual and Collective Identity Formations in post-Enlightenment Germany,” “Constructions ofGerman Heimat,” and “Fried, Culture, Society.” May be repeated to a maximum of six credits.

GER 653 RESEARCH AND ISSUES IN TEACHING GERMAN. (1) This course builds on GER 553, Methods of Teaching German. The course will address a range of educational issues beyond the teaching of foreign language skills as well as acquaint students with research methods in both a theoretical and practical manner. May be repeated to a maximum of four semesters. Coreq: GER 553.

Note: The course series 720-730 offers the opportunity for the more specialized and greater in-depth investigation of various topics encountered in the corresponding, but more broadly conceived, period courses of the 620-630 series. With changes in topic, each course number of the 720-730 series can be repeated a total of three times - thus enabling the student at the more advanced level to specialize within a particular period or periods.

GER 721 SPECIAL TOPICS IN GERMAN LITERARY AND CULTURAL HISTORY. (3) This course allows for the in-depth study of specific topics in German literary and cultural history encountered in the broadly conceived period courses of the 620-630 series. With changes in topic the course may be repeated to a maximum of nine credits. Prereq: Permission of Director of Graduate Studies.

GER 748 MASTER'S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GER 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

GER 781 INDEPENDENT STUDIES IN GERMAN. (1-3) Course allows individual students to pursue independent research on a selected aspect of German language, literature or cultural history. May be repeated once if topic changes. Prereq: Permission of Director of Graduate Studies.

SCANDINAVIAN (Offered as required) (3) Rapid coverage of morphology, phonology and syntax of Old Icelandic, with some attention to linguistic affinities within the Indo-European and Germanic groups of languages. Prereq: Reading knowledge of German; consent of instructor.

GER 610 OLD ICELANDIC. (3) Rapid coverage of morphology, phonology and syntax of Old Icelandic, with some attention to linguistic affinities within the Indo-European and Germanic groups of languages. Prereq: Reading knowledge of German; consent of instructor.

GER 655 studying GERMAN LITERATURE AND CULTURE. (3) A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as “Individual and Collective Identity Formations in post-Enlightenment Germany,” “Constructions of German Heimat,” and “Fried, Culture, Society.” May be repeated to a maximum of six credits.
GRK 101 ELEMENTARY GREEK.
(4)
An introduction to the study of Classical Greek. Emphasis is placed on learning to read the language. Some attention is given to Greek literature and civilization.

GRK 102 ELEMENTARY GREEK.
(4)
A continuation of GRK 101. Prereq: GRK 101 or equivalent.

GRK 201 INTERMEDIATE GREEK.
(4)
Review of grammatical principles together with readings from Greek prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Greek literature. Emphasis is placed on developing reading ability. Prereq: GRK 102 or equivalent.

GRK 202 INTERMEDIATE GREEK.
(4)
The reading of Greek prose and poetry. Textual and literary analysis of selections from classical authors and the New Testament. Prereq: GRK 201 or the equivalent.

GRN 250 AGING IN TODAY’S WORLD.
(3)
This class explores the processes and meanings of “growing old,” focusing on influences from childhood through adolescence and adulthood, with constant attention to how these processes and meanings are situated in time and space and eventually inform individual and societal conceptions of and actions concerning old age. The many faces of aging are examined from an array of disciplinary perspectives using selected readings, film documentaries, consideration of personal/family histories, and a series of exercises that allow students to place one’s own life experience and thoughts of growing old in a broader societal context.

GRN 513 GERIATRIC PHARMACY.
(3)
A course designed to educate students in the basic knowledge of attitudes and skills required to meet the pharmacological needs of the elderly. Topics include discussions of the aging process, physiological and psychological changes in the elderly, how these changes influence patient compliance and the responses to drug and nondrug treatments, monitoring drug use in long-term care facilities, and special community services available to the elderly. Prereq: PHR 849, 852, 853, 854 and 856 or permission of instructor. (Same as PPS 813.)

GRN 585 AGING AND ENVIRONMENT.
(3)
Explores the elderly person’s changing experience of environment. Physiological, psychological, and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GEO 585.)

GRN 600 A STUDY OF THE OLDER PERSON.
(3)
This didactic/experiential course is designed to give the student an overview of the experience of growing old by focusing on the individual older person. Framed from a cell to society perspective, didactic lectures will focus on historical, demographic, biological, psychological, social, environmental, life course and humanistic dimensions of growing old. Emphasis is placed on the relationship between individual experience and societal context. The experiential component will consist of having each student interact with a healthy elder mentor who will provide insight from the perspective of lived experience. Prereq: Admission to the Ph.D. Program in Gerontology.

GRN 602 CERTIFICATE PRACTICUM IN GERONTOLOGY.
(3)
The course is a field experience of approximately 220 hours focused on aging. Content, site, and supervisor may vary; but the student must have an objective-based proposal approved prior to beginning the practicum. Prereq: Acceptance into the Graduate Certificate in Gerontology.

GRN 610 PSYCHOLOGY OF AGING.
(3)
This is a graduate level seminar on the psychology of aging. The course will focus on many of the major topics and theories relevant to understanding the aging process. It focuses on health behaviors, sensation and perception, cognitive abilities, personality, social interactions, motivation and emotion, psychological disorders, end of life issues, and successful aging. The course examines the topics above from a normal aging perspective, atypical aging, successful aging, and demonstrates the interrelationships between the topics to address the aging individual. The course will also focus on the methods used to conduct psychological research with an aging population.

GRN 612 BIOLOGY OF AGING.
(3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/BIO/PYG 612.)

GRN 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MED SCIENCE TEACHING).
(2)
A two credit course. A seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as PGY 615.)

GRN 616 TEACHING SEMINAR IN GERONTOLOGY.
(2)
The purpose of this seminar is to prepare doctoral students as classroom instructors, and to enhance their instructional skills of those students with teaching experience. Emphasis is placed on developing the fundamental knowledge and skills needed to survive and excel in the classroom. Topics covered include: course development strategies; lecture preparation and delivery; interactive and group learning; writing for learning; student evaluation; student advising; and instructional ethics and responsibilities. Seminar activities include development of instructional materials, thematic discussion, and demonstrations of classroom experiences. Prereq: GRN 600 and GRN 620, or consent of instructor.

GRN 617 TEACHING PRACTICUM IN GERONTOLOGY.
(3)
This practicum provides a forum for continued development of teaching skills by concurrently combining classroom instruction experience with formal instructor debriefing sessions. Problematic and successful experiences will be discussed, and specific instructional concepts and issues will be addressed in depth. Prereq: GRN 616 and concurrent classroom teaching.

GRN 618 EPIDEMIOLOGY OF AGING.
(3)
This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and SPH 605/PGM 620 Intro to Epidemiology and GRN 600, or consent of instructor. (Same as SPH 618.)

GRN 620 HUMAN AGING AND ADJUSTMENT.
(3)
The intent of GRN 620 is to provide continued development (from GRN 600) of critical interdisciplinary skills in studies of the aging process. Students will, as a group, identify a single central issue associated with aging and conduct comprehensive literature reviews and appropriate research to thoroughly address that issue. Prereq: GRN 600 and admission to the Ph.D. program in gerontology.

GRN 644 DEMOGRAPHY AND AGING.
(3)
This course examines the dynamics of human population distributions, densities, and growth patterns as they relate to population aging. The essential demographic processes of fertility, mortality, and mobility are addressed from multiple disciplinary perspectives, and topical coverage includes the environmental, social, political, economic, and cultural impacts on personal demographic behavior and population change. Emphasis is placed on contemporary and historical meanings and influences of population diversity, and how this diversity affects the patterns and consequences of aging across space and time.

GRN 650 RESEARCH DESIGN IN GERONTOLOGY.
(4)
This course will provide training in research design appropriate for the study of aging and the aged and will critically assess special considerations involved in studying this population. Topics to be covered will include: philosophy of science; data sources for research on aging (including medical informatics and clinical epidemiology sources); the use of animal models in aging research; special design considerations for the study of aging [reconciling age, period, and cohort effects]; longitudinal research; measurement tools for assessing the elderly [functional assessment, ADLs, life satisfaction scales, etc.]; issues in interviewing older people; qualitative methods in aging research; the ethics of research on aging and the aged. Prereq: Admission to Gerontology Ph.D. Program.

GRN 651 QUALITATIVE GERONTOLOGY.
(3)
This course (1) critically evaluates different qualitative epistemologies including biography, phenomenology, grounded theory, ethnography and the case study; (2) assesses the value of alternative qualitative methodologies for gaining deeper understanding of the experience of elders; (3) explores practical issues in employing such methodologies; and (4) provides opportunities for participants to engage in different styles of qualitative research. Prereq: Graduate standing.

GRN 653 LABORATORY RESEARCH IN GERONTOLOGY.
(3)
Students will be exposed to current biomedical techniques by conducting supervised research in a laboratory setting. Prereq: Permission of instructor.

GRN 656 INTEGRATIVE STUDIES IN GERONTOLOGY.
(3)
This seminar is designed to provide gerontology doctoral students the opportunity to place individual dissertation topics within the broader field of gerontology, and to broaden the authority with which the students engage in their dissertation work. Although work will largely be independently driven, frequent class meetings provide ongoing feedback from the group on progress and allow all participants to learn from each others work. Prereq: Completion of gerontology core requirements.

GRN 660 AGING ISSUES AND FAMILY RELATIONS.
(3)
The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various kin categories. (Same as FAM 660.)

GRN 662 LONG-TERM CARE IN AN AGING SOCIETY.
(3)
This graduate seminar provides a comprehensive overview of the philosophy, theory and practice of long-term care focusing on the manner in which such care is evolving in an aging society. The full range of long-term care options are considered including the design of supportive communities that support individual autonomy and reduce the need for long-term care, home and community based long-term care, family care, transitional options for long-term care, and the full array of residential and institutional alternatives. Emphasis is placed on changing care recipient and caregiver needs along the long-term care continuum. Critical perspective is provided on contemporary issues in long-term care including ethical and legal concerns, financing and public policy.
GRN 704 MENTAL HEALTH AND AGING. (3)
The aim of this class is to provide some breadth and selected depth in the area of Mental Health and Aging, aimed at research perspectives. Various psychiatric syndromes will be evaluated in lectures and throughout the readings in relation to prevalence, assessment, etiology, and treatment in reference to research in older adults. Prereq: Graduate student status.

GRN 705 COGNITIVE AGING. (3)
This is a graduate level seminar on cognitive aging. Topics to be addressed include theories of aging, memory, sensation, and perception, attention, language, social cognition, intelligence, decision-making, and dementia.

GRN 706 HEALTH PROMOTION AND AGING. (3)
In this class health promotion and lifestyle will be examined. The theory behind health promotion programs and the status of existing health promotion program for older adults will be reviewed. Special emphasis will be placed on the role of knowledge acquired in class as well as on developing innovative health promotion program for older adults. Prereq: Graduate student standing.

GRN 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA/PGY/PHA 710.)

GRN 720 GERONTOLOGY/GERIATRIC DENTISTRY. (1)
This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

GRN 731 ELDER MISTREATMENT. (3)
This course reviews major issues and trends related to elder mistreatment. The course emphasizes individual and systemic issues related to elder abuse, neglect, exploitation, and self-neglect on individual, local, state, and federal levels. Special considerations is given to dynamics that shape past, current, and future issues related to elder mistreatment. Prereq: Graduate student status and/or permission of instructor.

GRN 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

GRN 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GRN 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

GRN 770 SPECIAL TOPICS IN GERONTOLOGY. (1-3)
This course is designed to present contemporary topics in gerontology in either a lecture or seminar format. It is intended to provide students with opportunities to be informed of current issues in gerontology as well as to explore in-depth studies of particular gerontological topics. May be repeated to a maximum of twelve credits.

GRN 771 AGING IN RURAL ENVIRONMENTS. (3)
The context of a changing rural environment, this seminar explores the life circumstances and life experience of rural elders in relation to the health and well-being of this population.

GRN 772 AGING AND THE LIFE COURSE. (3)
This seminar will establish a common foundation of knowledge through examinations of traditional “life courses” influencing individuals as they age through time, including household and family, education and work, and housing. This foundation will be built upon using critical examinations of such themes as gender roles, spatial experience, cognitive change and memory, and structural effects on life trajectories. Emphasis will be placed on surveys of existing literature and on integrating various life course elements within social and behavioral theory.

GRN 773 ETHICS AND AGING. (3)
The focus of this class is on applied ethics and aging. We will address the following topics: mid/later life reproduction; research with older adults; spirituality/religion; legal issues; cultural issues; vulnerability; meaning; caregiving and community-based care; specific issues related to Alzheimer’s Disease; issues at the end of life; and other timely ethical issues that may arise during the course. The course will make use of provocative readings, case studies, supplementary professional articles, a presentation and paper, lively class discussion, and outside speakers who will share their expertise with you on a variety of ethical issues related to aging.

GRN 774 PUBLIC POLICY AND AGING. (3)
This course reviews major issues and trends in the economics of aging and social policy and aging. The course emphasizes health, economic, and welfare policies and considers their implications on federal, state, and local levels. Special consideration is given to dynamics that shape past, current, and future policy in the area of aging. Prereq: Graduate standing.

GRN 775 CLINICAL GERONTOLOGY. (3)
This course is an interdisciplinary introductory course in gerontological health and the healthcare system that examines the processes of normal human aging, the common diseases and disorders that affect older adults, and aging in the context of the US healthcare system. Special emphasis will be placed on physical function and the ability to participate in desired roles and activities as well as societal supports and barriers to health among older adults in the US. The course will highlight areas of importance for those who will be working and/or conducting research with older adults. This course provides a perspective of clinical geriatrics. Basic concepts of geriatric care are presented, along with concepts of gerontology as it applies to geriatric medicine. This course is designed for both clinicians and non-clinicians.

GRN 776 CURRENT TOPICS IN BRAIN AGING. (3)
Students will learn cellular and molecular changes that occur in the brain through AD progression in addition to the impact of these changes on individual lifestyle and on society.

GRN 780 APPLIED GERONTOLOGY PRACTICUM. (1-3)
This course is designed to provide students the opportunity to experience the practical application of gerontology in such domains as government, administration and clinical environments. In addition, the student will gain in-depth experience with the organization and an introduction to problems in applied research. Students will work under the supervision of a gerontology faculty member to coordinate efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of six credits. Approval of the Director of Graduate Studies required.

GRN 781 STUDENT DEVELOPMENT PRACTICUM. (1)
This practicum provides an opportunity for students to present and discuss their research findings in a venue that promotes skill development in the areas of preparation and delivery of professional presentations. Students are required to enroll in GRN 781 during each of the first five semesters in residence. Prereq: Admission to Gerontology Ph.D. program.

GRN 782 WOMEN’S HEALTH AND AGING. (3)
This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level graduate class in social science. (Same as BSC 782.)

GRN 783 PUBLIC HEALTH AND AGING. (3)
Public Health and Aging is an elective course in the Graduate Center for Gerontology and Department of Health Behavior and is offered to students on the graduate level. The focus of the course is to help students identify a public health framework and a paradigm for addressing the issues of social, emotional, physical, and mental health in older adults, as well as a keen understanding and awareness of chronic disease prevention, mortality, and quality of life issues that are germane to aging in the United States. Prereq: Graduate standing.

GRN 785 INDEPENDENT RESEARCH IN GERONTOLOGY. (1-6)
Open to doctoral students who have the necessary training and ability to conduct research at an advanced level. Students will work under the supervision of a gerontology faculty member in research on ethical issues, followed by an examination of ethics in gerontology, and the development of new research with respect to the course. May be repeated to a maximum of 6 credits. Approval of the Director of Graduate Studies required.

GRN 786 INDEPENDENT READINGS IN GERONTOLOGY. (1-6)
Open to doctoral students who have the necessary training and ability to work independently at an advanced level. Students will work under the supervision of a gerontology faculty member to identify readings appropriate for the student’s chosen topic, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of nine credits. Approval of the Director of Graduate Studies required.

GRN 790 PROFESSIONAL DEVELOPMENT IN GERONTOLOGY. (1)
This seminar will cover elements of professional development in the areas of research, teaching and service as students are prepared for obtaining positions and developing careers in gerontology. Emphasis will be placed on means of documenting progress and accomplishment (e.g., CV building, teaching portfolio development, evaluation), effective strategies for searching for and securing jobs (e.g., interview skills), and strategies for promoting quality performance and professional success in gerontology-related professions. Prereq: Admission to the Gerontology Ph.D. program.

GS 600 SPECIAL TOPICAL GRADUATE COURSE. (1-3)
An interdisciplinary, topical or experimental course to be approved by the Dean of the Graduate School. A particular course can be offered no more than twice under the number GS 600. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

GS 610 COLLEGE TEACHING. (1)
This one-credit-hour seminar addresses teaching and learning issues in the college classroom. It is intended for graduate students who want to prepare for future academic careers and enhance current teaching activities. The seminar will examine pedagogical issues in general format with opportunities for discipline-specific applications. This course can serve to augment any department-based program.
GWS 620 TEACHING IN THE 21ST CENTURY. (1-2) This seminar, part of the Preparing Future Faculty program, is a rotating series of 1-2 credit hour courses on various aspects of life in institutions of higher education. Participating graduate students from a range of disciplines will have the opportunity for an in-depth exploration of the research and practice surrounding a special topic in college teaching and learning. The seminars will involve both classroom activities and experience-based learning. For example, the course on first-year students will include a study of current research on the first-year experience, interviews with first-year students, and an experiential component where participants serve as mentors for first-year students. Participants will be asked to produce a paper that integrates the theoretical and experiential aspects of the course and develops implications for teaching in their content areas. May be repeated to a maximum of three enrollments.

GWS 630 INSTRUCTIONAL TECHNOLOGY. (1) This seminar addresses pedagogically sound and effective applications of instructional technologies (IT) in college teaching. Course goals include examining the impact of IT on teaching outcomes, teaching strategies, and instructional assessments; developing proficiency in creating PowerPoint presentations, designing and managing instructional Web sites, facilitating Internet dialogue, and conducting distance learning courses; and considering how IT affects faculty roles and responsibilities, the nature of the college classroom, and the future of higher education.

GWS 640 GRANT WRITING. (3) This course prepares graduate students to be PI on a state, federal, other large competitive grant. Students prepare and critique proposal. Prereq: GS 650.

GWS 650 PREPARING FUTURE FACULTY. (2) Preparing Future Faculty is designed to introduce graduate students to the roles and responsibilities of the college teacher and to assist them in understanding the variety of institutions in which effective teaching takes place. Students will focus on the academic expectations, institutional identities, and particular policies and procedures which characterize different types of institutions of higher learning. Skills to help students apply for positions and achieve success in their appointments will also be addressed. Lecture, two hours per week.

GWS 660 BIOACTIVE INTERFACES AND DEVICES SEMINAR. (1) A multi-disciplinary seminar in Bioactive Interfaces and Devices. May be repeated to a maximum of four credits. Prereq: Graduate status.

GWS 680 GRADUATE STUDENT LEAVE OF ABSENCE. (0) This course is intended for degree-seeking graduate students that have received permission to take a leave of absence for one or more semesters. By registering for GWS 680 (0 credit) students remain officially enrolled in the Graduate School and will therefore be eligible to priority register for the subsequent semester. Prereq: Enrollment in a graduate degree-granting program.

GWS 690 VISITING STUDENT RESIDENCY. (0) This zero-credit course is intended for graduate students who are enrolled in a degree program at another university and are visiting the University of Kentucky for a period of time no longer than one semester. Students enrolled in this course will typically engage in research activity during their time at UK. Prereq: Good academic standing in a degree program at an accredited domestic or international university.

GWS 695 SPECIAL PROBLEMS IN COLLEGE TEACHING AND LEARNING. (1-3) This special problems course is designed to provide opportunities for graduate students and postdoctoral scholars pursuing a Certificate in College Teaching and Learning to explore special problems related to college teaching that bridge or fall outside the domain of departmental efforts; graduate students exploring faculty development as a career option; and students who currently hold full-time teaching positions in colleges or universities and who are interested in professional development or credentialing in College Teaching and Learning. An “Independent Graduate Work Initiation Form” must be filed with the Certificate Director prior to registration for this course. May be repeated to a maximum of six credits. Prereq: Submission of the GS 695 Proposal Form one semester in advance.

GWS 699 PRACTICUM IN COLLEGE TEACHING. (3) The Practicum is a mentored teaching experience that not only immerses the graduate student in teaching by also fosters reflection on the experience, provides structured feedback and plans for improvement, and guides students in developing a teaching portfolio. The practicum requires that the graduate student assume full responsibility for a course, under the guidance of a mentor teacher. Supervision for the practicum experience is a joint responsibility of the Teaching and Learning Center, certificate faculty, and the student’s mentor. The practicum is distinct from many mentored Teaching Assistant experiences because the student must have full responsibility for the course, including syllabus and materials development, assessment, instructional responsibilities, and grade assignments. Credit will not be assigned until the full responsibility for the course, including syllabus and materials development, assessment, instructional responsibilities, and grade assignments. Credit will not be assigned until the student’s mentor has submitted a teaching portfolio that includes the practicum experience. Prereq: EPE 672; GS 610 (or equivalent); consent of instructor required.

GWS 758 CAPSTONE RESIDENCY. (0) Completion of capstone project for plan B (non-thesis) students; course may not be repeated. All course work toward the degree must be completed. Prereq: All course work toward the degree must be completed.
GWS 350 FEMINIST THEORY. (3)
An interdisciplinary course that acquaints undergraduate students with the central issues and texts in contemporary feminist methodologies. It will explore the ways in which feminist theories are and the ways in which they analyze and explain the workings of our social world. The course will clarify basic concepts in feminist thought such as gender, difference, patriarchy, and post-colonialism and will provide students with tools to analyze these theories and explore contemporary applications. Prereq: GWS 200 or GWS 201.

GWS 360 LGBTQ HISTORIES IN THE UNITED STATES. (3)
Introduces changing perceptions of homosexuality, same-sex love, and gender identities and social movements; explores the meanings of same-sex love prior to the existence of current terminology, and how, when, and why such language developed; and examines the cultural context in which “homosexual” came to represent a person rather than a behavior in 19th century Euro-American culture and the concurrent medicalization of homosexuality and gender nonconformity.

GWS 395 UNDERGRADUATE RESEARCH IN GENDER AND WOMEN'S STUDIES. (1-3)
The purpose of this course is to give students the opportunity to engage in independent faculty-directed research focused upon significant issues and problems confronting women in contemporary society. May be repeated to a maximum of 6 hours. Prereq: GWS 200 or GWS 201 and written agreement of a Women’s Studies affiliated faculty member, who will direct the study.

GWS 399 INTERNSHIP IN GENDER AND WOMEN’S STUDIES. (1-6)
Provides field experiences in women’s studies through work in education, industry, government, or community organizations. Offered on a pass/fail basis only. Maximum six credit hours per placement to a maximum of twelve credit hours total. Three hours can be counted toward the undergraduate Women’s Studies minor requirements.) Prereq: GWS 200 or GWS 201 and declaration of minor in Women’s Studies and consent of instructor.

GWS 400 DOING FEMINIST RESEARCH. (3)
In this course, we focus primarily on different kinds of qualitative research. Students will become familiar with a variety of methods used by Gender and Women’s Studies scholars, and reflect on the problems involved in gathering information. But primarily, students will be the researchers: each will develop a thesis of approximately 10 pages and a 30-60 minute presentation. The course will be organized around the Women’s Studies topic of choice. Each week, class participants will discuss the practicalities of conducting particular kinds of research and evaluate the studies; and they will share research findings in a workshop format. Prereq: GWS Major or permission of instructor.

GWS 410 INTRODUCTION TO QUEER THEORY. (3)
An introduction to theories of how people think about and enact genders and sexualities. Students will learn key scholarly concepts in order to differentiate between queer theory as an interdisciplinary approach to sexuality studies and disciplinary approaches to the study of sexuality, identity, and social applications. We will explore the paradigm of gender nonconformity, examine state, institutional, and interpersonal violence and critically analyze the ways in which gender and sexuality studies have organized around the binary categories of male and female, and how people have organized around issues of individual or public health. As such, it will be organized around topical units within the gendered history of medicine and health in the United States, containing several readings and a film. Students will interactively engage with a range of primary sources, watch presentations and related films, have the opportunity to ask the professor questions, and seek assistance during designated virtual “office hours” via Skype, and participate in online moderated discussions of the assigned readings and films, and at the end of each unit, of the questions it raised about gender, bodies, and health.

GWS 610 WOMEN AND “MADNESS”. (3)
This course explores the social construction of mental illness as it pertains to gender. We will consult narratives from different disciplines: Literature, Psychology, Cultural Studies, Anthropology, History and Feminist Theory. Our focus will concern the ways in which all women are constructed as “sick” as well as the perspectives of women who feel a sense of psychic dislocation and disability in their lives. Readings by women of color and lesbians will suggest the particular ways culture defines such women as “abnormal.”

GWS 616 COLONIALISM/POST-COLONIALISM AND GENDER. (3)
This course is designed to expose students to a range of theories and debates centering on or pertinent to women, gender, and sexuality in the field of postcolonial studies. Here, the field is understood in its widest and most interdisciplinary sense, inclusive of studies of Empire, the independent so-called “Third World”, and diasporas. Topics for study will include classic texts in the field, current postcolonial readings on gender and sexuality in empire, representation, trans/nationalism, and diasporas. Course credit may be used to help satisfy the international component of the Women’s Studies Graduate Certificate requirements.

GWS 620 COMPARATIVE CONSTRUCTIONS OF GENDER AND SEXUALITY. (3)
This course is designed to give students an understanding of an array of diversely situated theories and debates about gender and sexuality mainly outside of mainstream U.S. culture. Countries/communities of focus will vary.

GWS 630 SEMINAR IN FEMINIST RESEARCH METHODS. (3)
This course presents a variety of research methods used by Gender and Women’s Studies scholars. The course examines how research has been conducted in a range of fields within Gender and Women’s Studies, presents basic skills, commonly used methods, ethical issues, and social applications.

GWS 640 HISTORY OF FEMINIST THOUGHT AND ACTION. (Subtle required). (3)
Course provides a historically organized, thematically focused examination of pioneering works of feminist argument and analysis, creative writing, art, memoir, and politics. Themes and time periods vary according to instructor, but time span covers at least fifty years and content includes at least two national, ethnic, or geographical contexts. May be taken up to six credit hours under different subtitles.

GWS 650 FEMINIST THEORY. (3)
An interdisciplinary course addressing issues in contemporary feminist theory (such as intersections of race and gender, the body, ideology and representation, sexuality, etc.).

GWS 675 ADVANCED FEMINIST THEORY. (3)
An advanced topics course in feminist theory. Prereq: Permission of instructor.

GWS 690 GRADUATE RESEARCH IN GENDER AND WOMEN'S STUDIES. (3)
The purpose of this course is to provide graduate students the opportunity to engage in independent faculty-directed research in Women’s Studies. Prereq: Written agreement of a Women’s Studies Affiliated Faculty Member, who will direct the study.
GWS 775 DOMESTIC VIOLENCE ACROSS CULTURES.
(3)
This course focuses on domestic violence cross-culturally and from an interdisciplinary perspective. We discuss theories of domestic violence and how research and popular representations influence ideas regarding this phenomenon. We draw on specific experiences of intimate partner violence in different parts of Latin America, North America, Africa, Asia, and Europe. Topics include the impact of migration on women’s experiences of violence, state responses and law enforcement, women’s use of violence, the role of in-laws in women’s experiences of violence, and women’s resistance.

HA Health Administration

HA 622 MENTAL HEALTH ADMINISTRATION.
(3)
This course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

HDI Human Development Institute

HDI 601 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS: PRACTICUM.
(2)
Participants engage in a wide range of structured site visits and other university-based clinical and community-based learning experiences, related to services and supports for persons with developmental disabilities and/or special health care needs and their families. Lecture: one hour; laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HDI 602 INTERDISCIPLINARY SUPPORTS.
(2)
This course will build on the disciplinary clinical competence of participating students and enhance their knowledge and skills related to specific issues regarding the needs of persons with developmental disabilities and/or special health care needs. Topics covered include: Epidemiology, Prevention of Developmental Disabilities, Micro Environment, Early Childhood, School Age and Adult Issues, Cultural Diversity, the Rural and Underserved Population, Politics, Law and Health Care Reform Issues and Advocacy. Lecture, three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 603 INTERDISCIPLINARY SUPPORTS PRACTICUM.
(2)
The course will include practical experiences in interdisciplinary assessments and/or activities, as well as a long-term individualized student practicum. The practicum seminars will focus upon problem-solving strategies in providing high quality supports to persons with developmental disabilities and their families. Lecture: one hour every two weeks; laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HDI 604 INTERDISCIPLINARY LEADERSHIP SEMINAR.
(3)
This course will provide a base of core knowledge and experiences in leadership, systems change, strategic planning, proposal development, group facilitation, conflict resolution, and interagency collaboration principles and strategies. These topical areas effectively represent key functions for those who would assume leadership roles in promoting inclusive community supports for persons with developmental disabilities and their families. The course will utilize faculty and Institute staff from a wide range of disciplines. Lecture: three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 605 INTERDISCIPLINARY LEADERSHIP PRACTICUM.
(2)
This course will include the trainee’s individually designed leadership project. Options for projects include: research, development and preparation of grant applications, development and delivery of in service training, or development of evaluation plans. As a final requirement for this course, the student will be required to develop a Leadership Project Summary, and make a class presentation on the Leadership Project. Laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HES Human Environmental Sciences

HES 100 AN INTRODUCTION TO PROFESSIONS IN HUMAN ENVIRONMENTAL SCIENCES.
(1)
An orientation to human environmental sciences, its history, contemporary issues and philosophy, discussed through a common body of knowledge, utilizing family systems theory as the overarching conceptual model. Emphasis will be on the interactive, interrelatedness and capacity building opportunities of individuals, families, and communities, using a systemic life course approach. Prereq: Declared majors in Human Environmental Sciences.

HES 300 SPECIAL COURSE IN HUMAN ENVIRONMENTAL SCIENCES (Subtitle required).
(1-3)
Interdisciplinary, topical or experimental course to be approved by the appropriate department chairperson and by the Dean of the College of Human Environmental Sciences. Open to all University students, subject to limits or prerequisites set by the instructor. May be repeated to a maximum of six credits.

HES 400 CONCEPTS IN HUMAN ENVIRONMENTAL SCIENCES: INTEGRATION AND APPLICATION.
(2)
Interdisciplinary approach to the solution of family and individual problems. Application of concepts from the developmental, relational, managerial, nutritional, and environmental studies within the college and support disciplines. Prereq: HES 100, senior standing in the College of Human Environmental Sciences, and consent of instructor (via permit).

HES 596 SPECIAL PROBLEMS IN HUMAN ENVIRONMENTAL SCIENCES.
(1-3)
Intensive work on specific topics in human environmental sciences. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

HES 600 RESEARCH METHODOLOGY IN HUMAN ENVIRONMENTAL SCIENCES.
(3)
Students will study scientific techniques and accepted research methodologies in human environmental science research. Emphasis is placed on understanding the research process and developing the skills necessary to evaluate and implement research methods and design procedures. Prereq: Graduate standing. (Same as RTM 600.)
**HHS Human Health Sciences**

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>HHS 101</td>
<td>SURVEY OF HEALTH PROFESSIONS I.</td>
<td>(1)</td>
<td>An introduction to the health professions including an exploration of health professions careers. (Same as HSE 101.)</td>
</tr>
<tr>
<td>HHS 102</td>
<td>SURVEY OF HEALTH PROFESSIONS II: SHADOWING EXPERIENCE.</td>
<td>(1)</td>
<td>This course provides students with opportunities to explore the health sciences professions. It assists students in developing beginning observation, recording, and reporting skills appropriate to the selected professions by way of an on-the-job shadowing experience.</td>
</tr>
<tr>
<td>HHS 104</td>
<td>MINDFULNESS PRACTICES, STRESS REDUCTION.</td>
<td>(1)</td>
<td>This course is designed for students interested in gaining personal insight into their busy mind’s activity and learning how to settle the mind and more effectively deal with daily life stressors. Mindfulness practices will be discussed on evidenced-based health outcomes and will be applied through personal mindfulness practice experiences. (Same as CLM 104.)</td>
</tr>
<tr>
<td>HHS 120</td>
<td>CAREERS AS A PHYSICIAN ASSISTANT.</td>
<td>(1)</td>
<td>An overview of the Physician Assistant profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The year-end post includes assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students’ understanding of the profession(s) and to assist in educational and career planning and discernment. (Same as PAS 120.)</td>
</tr>
<tr>
<td>*HHS 241</td>
<td>HEALTH AND MEDICAL CARE DELIVERY SYSTEMS.</td>
<td>(3)</td>
<td>Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and programs, and their roles in addressing the social, economic, environmental, regulatory, and legal issues. Also included is a discussion of major health problems and related health care programs. Prereq: HHS or CLM Major designation, CHS pre-major status, or consent of instructor. (Same as CLM 241/HSE 241.)</td>
</tr>
<tr>
<td>HHS 350</td>
<td>HEALTH POLICY AND POLITICS.</td>
<td>(3)</td>
<td>This course will explore the development of the past and current US health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Preq: HHS 101, HHS 102 and CLM 241. Student admitted to the CLM or HHS program or consent of instructor. (Same as CLM 350.) This course is a Graduation Composition and Communication Requirement (GC3R) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.</td>
</tr>
<tr>
<td>HHS 351</td>
<td>HEALTH SERVICES ADMINISTRATION.</td>
<td>(3)</td>
<td>Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Preq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor.</td>
</tr>
<tr>
<td>HHS 353</td>
<td>ETHICS IN HEALTHCARE.</td>
<td>(3)</td>
<td>The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered and relevant case studies will be analyzed.</td>
</tr>
<tr>
<td>HHS 354</td>
<td>HEALTH LAW.</td>
<td>(3)</td>
<td>Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral issues, and the impact of law on the practice of healthcare. Prereq: Professional program status (which includes an earned Associate Degree in a health care field). Students will focus on clinician and clinical leader roles in the implementation of an Electronic Health Record systems. Prereq: HHS or CLM Major designation, CHS pre-major status, or consent of instructor. (Same as CLM 241/HSE 241.)</td>
</tr>
<tr>
<td>HHS 355</td>
<td>SEMINAR IN INTERPROFESSIONAL HEALTHCARE: PART 1: GLOBAL CONTEXT.</td>
<td>(1)</td>
<td>This course will be the first part of a two-part course. In HHS 355, students will gain a better understanding of the world around them, regarding healthcare and practices. A study of selected topics in health and wellness with a focus on the way individuals experience health and utilize resources within their ideal nesting environments of health and social communities. Topics will include an exploration of individual perceptions and experiences of health, wellness, and quality of life throughout the lifespan and resources available to achieve health. Prereq: Admission to HHS Program or consent of instructor.</td>
</tr>
<tr>
<td>HHS 356</td>
<td>SEMINAR IN INTERPROFESSIONAL HEALTHCARE: PART 2 COMMUNITY ENGAGEMENT.</td>
<td>(1)</td>
<td>In Part 1 of the course, students were able to learn about and reflect upon their thoughts regarding the different healthcare systems and practices around the world. Part 2 of the course will continue to build upon skills in interprofessional understanding and relationships as well as allow students to experience healthcare practices first-hand within a community setting. The experience gained during this portion of the course will help students identify, compare, and contrast the different aspects of healthcare in the community as well as allow them to reflect upon how those settings may differ from their own backgrounds. A study of selected topics in health and wellness with a focus on the way individuals experience health and utilize resources within their ideal nesting environments of health and social communities will also be key aspects of this course. Topics will include an exploration of individual perceptions and experiences of health, wellness, and quality of life throughout the lifespan and resources available to achieve health. In addition, Part 2 of the course will focus on international and regional differences within healthcare and ways to collaborate and use diverse Interprofessional relationships to achieve health goals. Prereq: HHS 356.</td>
</tr>
<tr>
<td>HHS 361</td>
<td>HEALTHCARE QUALITY AND PATIENT SAFETY.</td>
<td>(3)</td>
<td>This course provides students an opportunity to study how healthcare quality and patient safety has changed over the last 10 years, how human error and “high-reliability organizations” (e.g., hospitals) interact, how changes to our healthcare system have affected care, and how quality/safety/improvement theories from other industries are impacting healthcare. Preq: Admission to HHS Program or consent of instructor.</td>
</tr>
<tr>
<td>HHS 362</td>
<td>INTERDISCIPLINARY HEALTH ADVOCACY.</td>
<td>(1)</td>
<td>The course will provide experiences as a health navigator for students in the health sciences. Students will work with patients who are seeking advice about the availability of health resources, how to access services and health information. Students will be trained in skills needed to become effective health navigators, will work with communities to develop and maintain a health resources data base and will serve as motivational coaches to patients to attain healthy lifestyles. Preq: Admission to the HHS Program or consent of instructor.</td>
</tr>
<tr>
<td>HHS 363</td>
<td>INTERDISCIPLINARY HEALTH ADVOCACY II.</td>
<td>(1)</td>
<td>The course will allow students to apply concepts they learned in HHS 362 in various workplace settings and by shadowing opportunities in the healthcare system. Additionally, students will become more familiar with hospital services and work with patients who are seeking advice about the availability of health resources, health services and health information. Preq: HHS 362.</td>
</tr>
<tr>
<td>HHS 370</td>
<td>ELECTRONIC HEALTH RECORDS.</td>
<td>(3)</td>
<td>The course will provide students an opportunity to study how healthcare quality and patient safety has changed over the last 10 years, how human error and “high-reliability organizations” (e.g., hospitals) interact, how changes to our healthcare system have affected care, and quality/safety/improvement theories from other industries are impacting healthcare. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>HHS 395</td>
<td>INDEPENDENT STUDY.</td>
<td>(1-3)</td>
<td>Independent study for undergraduates with an interest in a specific problem, topic, or issue in Human Health Sciences. Preq: Admission to HHS Program or consent of instructor.</td>
</tr>
<tr>
<td>HHS 400G</td>
<td>NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION.</td>
<td>(2)</td>
<td>This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physical activity. Students will become familiar with the current and emerging trends in health, physiologic and nutritional needs to prevent injury and aid healing following injury. Preq: Undergraduate Students: Admission to HHS undergraduate degree program or consent of instructor, 200 level physiology or equivalent. Graduate Students: Acceptance to nutrition, kinesiology, or other health-related graduate programs.</td>
</tr>
<tr>
<td>HHS 402G</td>
<td>MUSCLE BIOLOGY.</td>
<td>(3)</td>
<td>This course examines the gross as well as microscopic structural properties and the physiological function of skeletal muscle. Students will gain in-depth knowledge about not only normal muscle function, but also about the adaptability and plasticity of skeletal muscle under different environmental circumstances. The comparative biology of structure and function of skeletal muscle will be covered; also the relationship between muscle structure and function as it relates to human health-related issues will be examined and discussed. This course is for undergraduate as well as graduate students and will benefit those interested in health-care related fields (e.g. pre-physical therapy, pre-medicine) as well as students interested in the basic functioning of skeletal muscle. Prereq: One course of general biology (BIO 148, BIO 150 or BIO 152), a general anatomy/physiology (i.e., PGY 206) course or permission of instructor.</td>
</tr>
<tr>
<td>HHS 405</td>
<td>SOCIAL AND CULTURAL EVOLUTION OF DISEASE.</td>
<td>(3)</td>
<td>This course provides students with the opportunity to understand the intersection between culture, society, and disease as it relates to their future careers as healthcare professionals. Topics to be covered include epidemics, pandemics, and the spread of infectious disease. How cultural and social factors evolve over time to influence the way disease is framed, starting in the 1600s and ending in the present day. Preq: HHS/CLM 241 and 350. Admission to the HHS or CLM program or consent of instructor. (Same as CLM 405.)</td>
</tr>
<tr>
<td>HHS 443</td>
<td>HEALTH INFORMATION MANAGEMENT.</td>
<td>(2)</td>
<td>This course provides students with an opportunity to understand and address the challenges associated with health care change and improvement intended by the Recovery Act of 2009. Students will understand the concepts, models, architectures, market forces, and law. Students will understand the advantages for using electronic health records in today’s technology driven health care field. Several areas will be introduced that will provide baseline knowledge for EHRs. Topics include Meaningful Use, Electronic Health Records, Health Information Exchange, and other related topics. It is highly recommended for students to either have experience working in a health care related field or have a health care major or minor. Some exceptions to being in a health care profession would be computer science or related majors in which the student plans to apply the profession in a health care organization or consent of instructor. (Same as CLM 370.)</td>
</tr>
</tbody>
</table>

**Course Descriptions**
HIS 450 INTRODUCTION TO DENTISTRY. (3)
This course is an introduction to the profession of dentistry and provides a brief overview of some pre-clinical dental courses that are taught in the first two years of dental school. The student will become familiar with basic dental terminology, current issues in dentistry and the latest techniques and technology used in clinical settings. The student will have the opportunity to develop manual dexterity and learn basic clinical etiquette and safety procedures. This course serves as a foundation for students interested in pursuing a career in dentistry or for those who want to enhance their knowledge of oral health prior to entering any health field. Prereq: Admission to HHS Program or consent of instructor. Two semesters of Biology with Lab and Human Anatomy recommended, but not required.

HIS 451 INTRODUCTION TO MEDICINE. (2)
This course will provide students with an introduction to the field of medicine. Skills required to complete patient interviews and take the medical history as well as a limited number of physical examination maneuvers will be discussed. The focus will be on gaining an understanding of why a complete and accurate medical history and physical examination are key to quality medical practice. The course will cover the scope of practice and ethical codes for physicians and physician assistants. Prereq: Admission to HHS Program or consent of the instructor.

HIS 453 CULTURAL COMPETENCE IN HEALTHCARE. (3)
This course is designed to introduce the student to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias. Factors related to culturally and linguistically appropriate health care will be reviewed. Prereq: Admission to HHS Program or consent of instructor. This course is a Graduation Completion and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HIS 454 RESEARCH IN HUMAN HEALTH SCIENCES. (3)
An introduction to basic methods for undertaking research on issues related to health, health care, and within health services organizations and systems. Students will become critical consumers of research by learning how to evaluate and apply the results of health research conducted by others. The course will also assist those who plan to conduct clinical research or program evaluation within health delivery systems. Prereq: Admission to HHS Program or consent of instructor.

HHS 455 RESEARCH EXPERIENCE IN HUMAN HEALTH SCIENCES. (1-3)
Students complete a mentored, self-directed research experience. Students work with a faculty to develop an experience of mutual scientific interest. The nature of the experience and the subsequent activities and expected outcomes are defined and outlined in the research contract between the student and mentor. Prereq: Consent of instructor.

HHS 470 INTERNATIONAL EXPERIENCE IN HEALTH SCIENCES (Variable topic). (1-6)
This course provides students with opportunities to explore international issues in health care through study and international travel. Course content and organization will depend on the topic to be studied and the structure of the course. Prereq: Admission to the HHS Program or consent of instructor.

HHS 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as CLM 480.)

HHS 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT. (1-6)
Students will gain practical general training and experiences in the healthcare workplace with a focus on exposure/experience in clinical leadership and management. The CLM faculty in coordination with the practicum coordinator will arrange these experiences with the site employer personnel and develop an individualized plan for the student at each site. The plan will relate the workplace training and experiences to the student’s general and technical course of study. Prereq: Consent of instructor; HHS 102; student must earn a grade of C or better in previous practicum in order to re-enroll in this course. (Same as CLM 501.)

HIS 106 WESTERN CULTURE: SCIENCE AND TECHNOLOGY. (3)
Presents the interactions of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period to the Industrial Revolution.

HIS 107 WESTERN CULTURE: SCIENCE AND TECHNOLOGY II. (3)
Presents the interactions of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period since the Industrial Revolution.

HIS 108 HISTORY OF THE UNITED STATES THROUGH 1876. (3)
This course is a survey of American history from the first British settlements c. 1585 to the end of Reconstruction in 1876 and explores the most important events, ideas, and people that created the foundations of the American nation. This course fulfills the requirements for the elementary teachers’ certificate.

HIS 109 HISTORY OF THE UNITED STATES SINCE 1877. (3)
This course examines American History from 1877 to the present: political, economic and social -- Gilded Age, Progressive Era, New Deal, Age of Affluence and Limits, Great Society and two Great Wars. You will find out how much, how little, America has lived up to its ideals; how it grew from a nation of farms and cotton mills to an industrial giant; how it became a world power (top Nation) and what problems this created.

HIS 112 THE MAKING OF MODERN KENTUCKY. (3)
An examination of the political, social, economic, environmental, and cultural dynamics that have shaped modern Kentucky.

HIS 119 WAR AND SOCIETY, 1350-1914. (3)
“War and Society in the West, 1350-1914,” is the opening course in a three-course series on the history of warfare. The course begins in the late middle ages with the impact of gunpowder, and ends with the advent of the First World War. Topics covered in the course include the impact of technology on war, the connections between culture and warfare, the growth of the state in modern Europe, the experience of soldier and civilians during war, and the rise of western military superiority. No prerequisites.

HIS 120 THE WORLD AT WAR, 1939-45. (3)
A global overview of the events of the Second World War, including consideration of the conflict’s military, diplomatic, political, social and economic dimensions.

HIS 121 WAR AND SOCIETY, 1914-1945. (3)
“Total war” in the 20th century exerted a profound impact on social relations in a great many ways. This course provides you with the opportunity to think long and hard about the social impact of “total” warfare, from a transnational perspective. We will explore a number of social and cultural themes as they relate to the two World Wars, such as: the impact of total war on gender relations; military technology and ethics; the demonization of the enemy; war-time propaganda; the roots of the welfare state within the warfare state; and the postwar efforts to come to terms with the atrocities of total war.

HIS 122 WAR AND SOCIETY SINCE 1945. (3)
Historical studies of warfare around the world and their impact on society since 1945.

HIS 130 DRUGS AND ALCOHOL IN WESTERN CIVILIZATION, 1492 TO THE PRESENT. (3)
“Alcohol and Drugs in Western Civilization” is an overview of the history of drugs and alcohol, and the individual and social problems that surround their use. The course begins when new or newly wide-spread stimulants like coffee, tea, tobacco, chocolate, sugar, and distilled spirits and wine and animals like European consumer goods. The course then goes on to the more modern problems of increasingly potent drugs like heroin, cocaine, and cigarettes, and responses to them such as regulation, taxation, Prohibition, Alcoholics Anonymous, and the “War on Drugs.” No prerequisites.

HIS 191 A HISTORY OF WORLD RELIGIONS (Subtitle required). (3)
A historical introduction to the development of Christianity from social, cultural, and institutional perspectives which demonstrates the evolution of the religion.

HIS 202 HISTORY OF BRITISH PEOPLE TO THE RESTORATION. (3)
From the Roman period to the Stuart period. A general survey of the various epochs and phases of the English people at home and abroad.

HIS 203 HISTORY OF THE BRITISH PEOPLE SINCE THE RESTORATION. (3)
From the Stuart period to the present. A continuation of HIS 202.

HIS 206 HISTORY OF COLONIAL LATIN AMERICA, 1492 TO 1810. (3)
A broad survey of the social, economic, political and cultural development of Latin America from the fifteenth century to 1810. Includes analysis of such topics as pre-Columbian societies on the eve of conquest, the Iberian kingdoms in the Age of Expansion, the conquest and colonization of the indigenous cultures of the New World, the establishment of Spanish and Portuguese institutions, the relations between the Church and the State, the encomienda and the hacienda, slavery and the impact of the Bourbon Reforms on America.
HIS 207 HISTORY OF MODERN LATIN AMERICA, 1810 TO PRESENT. (3) A broad survey of the Latin American nations focusing on their social, economic, political, and cultural development. Traces the history of the Independence movements, nation building, the struggle for modernization, dependency and the phenomenon of revolution in the twentieth century.

HIS 208 HISTORY OF THE ATLANTIC WORLD. (3) Examines the connections between Europe, Africa, and the Americas from 1492 to the present day, focusing especially on the legacies of slavery, race, and imperialism in Central America and the Caribbean.

HIS 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT. (3) Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as CLA 229.)

HIS 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE. (3) Covers the conquests of Alexander the Great, and the main features of the Hellenistic world, the Roman Republic, and the Roman Empire to the death of Constantine. (Same as CLA 230.)

HIS 240 HISTORY OF KENTUCKY. (3) A general survey of the chief periods of Kentucky’s growth and development from 1750 to the present.

HIS 253 HISTORY OF PRE-COLONIAL AFRICA. (3) This course examines the early history of Africa, from human evolution to colonization by European powers in the late 19th century. Topics include: the development of states from kinship-based forms of political organization, the political, cultural, and social transformations that accompanied African conversion to Islam, a close examination of oral epic poetry as a window into medieval empire-building in the Sahel, an extended conversation about the role of Africa in the transatlantic slave trade, and a discussion of the dilemmas faced by African rulers in the era of partition on conquest by European powers. Successful students will gain a thorough introduction to the major developments in the early history of Africa, which will serve as a solid foundation for further coursework in African history and other African studies courses. (Same as AAS 253.)

HIS 254 HISTORY OF COLONIAL AND POST-COLONIAL AFRICA. (3) This course is a survey of the history of Africa from the onset of colonial rule in the 1880s to the present. Its main objective is to introduce students to some of the major socio-political and economic developments that made Africa what it is today. The course will explore themes such as the European conquest of Africa and Africans’ responses, African nationalism and struggles for independence, as well as post-colonial African politics and economics (under development). (Same as AAS 254.)

HIS 260 AFRICAN AMERICAN HISTORY TO 1865. (3) A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as AAS 260.)

HIS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT. (3) This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960’s. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as AAS 261.)

HIS 265 HISTORY OF WOMEN IN AMERICA. (3) History of American women, with particular emphasis on the mid-19th through the mid-20th centuries. Major themes include the family, work, social ideas about women, and feminism. Prereq: HIS 240 or consent of instructor.

HIS 296 EAST ASIA SINCE 1600. (3) What we think of today as East Asia has a long history of both shared culture and separate experiences. In premodern East Asia, cultural contacts led to commonalities including systems of writing and ways of thought such as Confucianism, Daoism, and Buddhism. In modern times and in becoming nations, China, Japan, and Korea each sought their own identity. The reforms and revolutions that Asia has experienced since 1600 can be viewed both in the context of the region and through the experience of each nation. This is an introductory course in the cultural, social, and political history of East Asia.

HIS 301 HISTORY WORKSHOP: INTRODUCTION TO THE STUDY OF HISTORY. (3) An introduction to the skills of historical research writing. Preferably to be taken during the sophomore year. Required of all history majors. Prereq: Sophomore standing.

HIS 302 CAREERS IN HISTORY. (3) You dread the questions from your parents and others: A history major? What are you going to do with that? This course enables students to articulate a response, going beyond law and teaching to consider all the possibilities a history degree holds. We will strategize on how to best position yourself to make your dreams reality, emphasizing the importance of networking, study abroad, internships, and other experiences outside the classroom. By the end of the course, students will be prepared to sell their skills to future employers in a variety of settings. Prereq: Must be a declared History major or minor or have permission of instructor. Cannot receive credit for both HIS 302 and A&S 350.

HIS 310 HISTORY THROUGH FICTION AND NON-FICTION. (3) Texts contrast fictional (novels) and non-fictional accounts of events in U.S. History dealing with major themes and institutions since the American Revolution.

HIS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3) This course will furnish upper level UK ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note-taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as AMS 320.)

HIS 323 THE HOLOCAUST. (3) This course will attempt to help students understand the events that resulted in the virtual destruction of Europe’s Jews during the Second World War. Topics will include the history of anti-Semitism, the ways in which Nazi policy against the Jews was implemented, Jewish resistance, response of non-Jews and other governments to the Holocaust.

HIS 330 A HISTORY OF WESTERN RELIGIOUS THOUGHT I. (3) A history of Judeo-Christian religious thought from the rise of Judaism through the Protestant Reformation.

HIS 350 TOPICS IN U.S. HISTORY BEFORE 1789. (3) Readings, research, and discussions in seminar format to illuminate problems of historical and contemporary significance, in areas of special faculty competence. May be repeated once. Lecture, two hours; conference, one hour.

HIS 351 TOPICS IN U.S. HISTORY SINCE 1789. (3) Same as HIS 350.

HIS 352 TOPICS IN EUROPEAN HISTORY BEFORE 1789. (3) Same as HIS 350.

HIS 353 TOPICS IN EUROPEAN HISTORY SINCE 1789. (3) Same as HIS 350.

HIS 355 TOPICS IN NON-WESTERN HISTORY SINCE 1789. (3) Same as HIS 350.

HIS 357 JAPAN AT WAR, 1850 TO THE PRESENT. (3) This course covers military conflicts in modern Japan with a particular focus on the Asia-Pacific War (1931-45) – Japan’s imperialist quest in China and Southeast Asia that ultimately expanded into the Pacific Theater of World War II. We will begin by a brief examination of Japan’s earlier wars in the modern period, including the Meiji Restoration (1868-79), the First Sino-Japanese War (1894-5), and the Russo-Japanese War (1904-5) in order to set Japan’s modern wars in context; of particular focus here will be the emergence and the development of Japan’s Emperor-centered, militaristic nationalism, which influenced every aspect of Japanese thought during the Asia-Pacific War. Themes covered will include both politics and culture of a nation at war. We will look not only at the political and military strategists and foreign relations, but also at the life on the battlefront and the home front. The cult of death, which centered around the belief that those who sacrifice their lives for the emperor for the sake of the nation will be honored as a god at Yasukuni Shrine, and which resulted in such fanatical actions as kamikaze attacks and mass suicides, will be investigated in detail. The last sessions of the class will cover the legacies of the Asia-Pacific War in the decades following Japan’s defeat. The course requires no prior knowledge of the history of modern Japan.

HIS 360 RACE AND SPORTS IN AMERICA. (3) This reading seminar examines the history of race and sport in America. (Same as AAS 360.)

HIS 370 EARLY MIDDLE AGES. (3) A survey of European history from the fourth through the mid-10th centuries. 

HIS 371 LATER MIDDLE AGES. (3) A history of Judeo-Christian religious thought from the rise of Judaism through the Protestant Reformation.

HIS 375 EUROPE AND THE WORLD IN THE AGE OF THE FRENCH REVOLUTION. (3) A study of the political, social, economic and cultural changes that transformed Europe during the age of the French Revolution and Napoleon, with special emphasis on the relations between Europe and the non-European world during this period.

HIS 378 RENAISSANCE EUROPE. (3) "Renaissance Europe" is an overview of the rebirth of classical culture that we call the Renaissance. We will examine the political and social background to the changes in arts and letters that occurred in 14th- and 15th-century Italy, how the Renaissance developed, and why and how the Renaissance spread to the rest of western Europe. No prerequisites.
HIS 390 BACKGROUNDS TO AND EARLY HISTORY OF CHRISTIANITY TO 150 CE. (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the contexts of Jewish, Greek, and Roman culture in their respective times. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 390.)

HIS 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 391.)

HIS 395 INDEPENDENT WORK. (1-3)
Under special conditions selected students may investigate problems with weekly reports to the instructor. May be repeated to a maximum of six credits. Prereq: Major and a standing of 3.0 in the department.

HIS 404 U.S. WOMEN’S HISTORY TO 1900. (3)
U.S. women’s lives and experiences across cultures and regions from pre-settlement to 1900. Addresses current debates and scholarship in the field.

HIS 405 U.S. WOMEN’S HISTORY SINCE 1900. (3)
U.S. women’s lives and experiences across cultures and regions from 1900 to the present. Addresses current debates and scholarship in the field.

HIS 460 COLONIAL AMERICA TO 1763. (3)
This course explores a number of important themes in early America: the comparative view of Western European colonizing efforts; the dynamics of a multicultural environment; the character of family, community and religious life; regional distinctiveness in social/economic life; and the maturation of the colonies in the 18th century.

HIS 461 THE AMERICAN REVOLUTION, 1763-1789. (3)
A study of the disagreement between Great Britain and the 13 colonies, the decision for independence, and the progress of revolutionary change through the ratification of the Federal Constitution.

HIS 462 THE NEW REPUBLIC, 1789-1820. (3)
An intensive study of the launching of the federal government, the rise of America’s first parties, and the conflict over the completion of the revolutionary experiment.

HIS 463 EXPANSION AND CONFLICT, 1820-1860. (3)
A social and political study of the United States from 1820 to 1860, with special attention to the growth of Jacksonian democracy, territorial expansion, and the rise of the sectional controversy over slavery.

HIS 464 CIVIL WAR AND RECONSTRUCTION, 1860 TO 1877. (3)
A study of events immediately preceding the outbreak of conflict, of the military campaigns, and of the social, economic, and political developments during the periods of war and reconstruction.

HIS 465 EMERGENCE OF MODERN AMERICA, 1877-1917. (3)
A study of the transformation of the U.S. from an agrarian society into an industrial nation covering years from the Gilded Age to the American entry into World War I. This course emphasizes the growth of corporate capitalism, the emergence of modern political institutions, and the development of modern American foreign policy. It also explores how various Americans—workers, farmers, immigrants, women—responded to and were affected by industrialization.

HIS 466 MODERN AMERICAN HISTORY FROM WWI TO PEARL HARBOR, 1917-1941. (3)
A study of America in World War I and the interwar era, emphasizing political, economic, social, and cultural developments. The course examines the impact of the First World War and the great depression on America and the nature of the New Era and the New Deal.

HIS 467 MODERN AMERICA: 1941-1974. (3)
An intensive study of the United States from 1941 to 1974, emphasizing America’s emergence as a global power and political, economic, and social developments.

HIS 468 CONTEMPORARY AMERICA: 1974 TO THE PRESENT. (3)
Examines the history of the United States since 1974 with particular emphasis on political, social, and economic developments.

HIS 499 SENIOR SEMINAR FOR HISTORY MAJORS (Subtitle required). (3)
All History majors must complete a senior seminar with a grade of C or better. Topics will vary, but a major is required. Prereq: HIS 301 or permission of instructor. Graduation Writing Requirement Course — credit is awarded to students meeting the GWR prerequisites. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HIS 500 PRECLASSICAL AND CLASSICAL GREECE. (3)
A history of Greece from earliest times to the death of Alexander the Great.

HIS 501 FOURTH-CENTURY GREECE AND THE HELLENISTIC WORLD. (3)
A history of Greece and the Greek world from the death of Alexander to the Roman conquest of Egypt.

HIS 502 A HISTORY OF THE ROMAN REPUBLIC. (3)
A history of Rome from earliest times to the fall of the Republic. Emphasis will be placed upon the territorial expansion of Rome and the effects of this expansion on republican institutions.

HIS 503 A HISTORY OF THE ROMAN EMPIRE. (3)
A study of the foundation of the Roman Empire, the development of Imperial institutions, social and intellectual developments of the Graeco-Roman world. The decline of Rome and the barbarian invasions of the fourth century.

HIS 504 GREEK AND ROMAN MEDICINE. (3)
An historical introduction to the development of Greek and Roman medicine, from the pre-Socratic philosophers through Oribasius and early medieval influences. Prereq: A course in ancient history, or classics, or ancient philosophy, or consent of instructor.

HIS 506 HISTORY OF SEXUALITY IN THE U.S. (3)
An overview of the history of the development of the different legal systems to which people in western Europe had recourse between the fourth century and the fourteenth century. Topics to be covered include the shift from oral to written law, the problems small communities faced in dealing with transgressors, the competition between various authorities for jurisdiction, the ways in which Judeo-Christian values and beliefs affected the orientation of medieval law, the use of procedures such as oaths and inquisitions, the evolution of ideas about natural rights, and how law reflected the massive social and political reorganization of the state that occurred after the Roman Empire.

HIS 509 ROMAN LAW. (3)
An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as CLA 509.)

HIS 510 MEDIEVAL LAW. (3)
This course examines the development of the various legal systems to which people in western Europe had recourse between the fourth century and the fourteenth century. Topics to be covered include the shift from oral to written law, the problems small communities faced in dealing with transgressors, the competition between various authorities for jurisdiction, the ways in which Judeo-Christian values and beliefs affected the orientation of medieval law, the use of procedures such as oaths and inquisitions, the evolution of ideas about natural rights, and how law reflected the massive social and political reorganization of the state that occurred after the Roman Empire.

HIS 511 BARBARIANS. (3)
This course examines the peoples known to historians of Western Europe as the “Barbarians” who took up residence on the continent of Europe and whose polities replaced the central government of Imperial Rome in the fifth and subsequent centuries, as well as those of the northern realms of the British Isles and Scandinavia. Topics to be studied include the ethnic and cultural identities of the Barbarians, their role in redefining the social and political institutions of Europe, the reasons for their political and military successes, and their hold on the imaginations of both sympathetic and unsympathetic historians.
HIS 512 CAROLINGIAN EMPIRE. (3)
This course examines the reconstitution of much of the former Roman empire in the western provinces under the hegemony of the Carolingian rulers of the eighth and ninth centuries. Among the topics to be studied are the dynamics of the interplay between ecclesiastical and secular leaders that produced a distinctive vision of a Christian empire, the relations between the Carolingian, Byzantine, and Islamic political systems, the means of building royal legislative and judicial power in an environment of fragmented authority, the role of the arts, and artistic activity in creating a distinctive “Carolingian Civilization”. military activities that consolidated the empire, and the fragility of the imperial enterprise.

HIS 513 MEDIEVAL INSTITUTIONS SINCE THE MID-10TH CENTURY. (3)
A survey of medieval political, social, economic and ecclesiastical institutions from the beginning of the High Middle Ages to the middle of the 15th century.

HIS 514 SPAIN: FROM RECONQUEST TO EMPIRE, 1200–1700. (3)
This course focuses on the expansion of the Christian kingdoms (Portugal, Castile, and Aragon) in the Iberian peninsula and across the Atlantic. Special attention will be paid to the interaction of Islam, Christianity, and Judaism; cultural transformations, including developments in music, literature, and the arts; political developments in Iberia and the emergence of Spain and Portugal; and the spread of Iberia’s trans-Atlantic empires.

HIS 519 THE ERA OF THE RENAISSANCE. (3)
An historical description and analysis of the development of political, economic, social, religious, intellectual and cultural institutions of Europe from Petrarch to Erasmus.

HIS 520 THE ERA OF THE REFORMATION. (3)
An historical description and analysis of the development of the religious, intellectual, cultural, political, economic and social institutions of Europe from Luther to the Treaty of Westphalia.

HIS 521 EUROPEAN SOCIAL HISTORY, 1400-1800. (3)
Survey of European social history in the early modern period, including analysis of demographic patterns, family and social structures, rural and urban economic patterns, and cultural and religious attitudes.

HIS 525 MODERN EUROPE: 1890-1939. (3)
This course examines European history from 1890-1939. It focuses heavily on the Great War and its aftermath through an analysis of the political cultures of the era. Prereq: HIS 105 or consent of instructor.

HIS 526 EUROPE SINCE 1939. (3)
This course examines the major cultural, social, and political developments that have shaped Europe, European history, and Europe’s relationships with the world since the outbreak of World War II. Prereq: HIS 105 or consent of instructor.

HIS 529 WOMEN IN MODERN EUROPE. (3)
This course examines the historical, changing lives of women in Europe from the late eighteenth century to the present. It explores the historical contributions of both ordinary and famous women, as well as their participation in, and contributions to, major political, social, and cultural movements. The course will analyze political changes and continue through the lens of gender.

HIS 532 RUSSIA IN THE 19TH CENTURY. (3)
This course examines the social, political, and cultural history of 19th century Russia in depth, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

HIS 535 RUSSIA IN THE 20TH CENTURY. (3)
This course examines the social, political, and cultural history of 20th century Russia in depth, focusing on the social conditions that caused the Revolution, the formation of the Soviet Union and its decline.

HIS 536 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA TO 1800. (3)
A study of Russian culture to 1800 emphasizing Slavic paganism, Orthodox Christian culture in Kiev, Novgorod, and Muscovy, and the impact of the West in the Seventeenth and Eighteenth Centuries.

HIS 537 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA FROM 1800 TO THE PRESENT. (3)
A study of Russian culture from 1800 to the present emphasizing the conservative as well as the revolutionary tradition, the Russian avant-garde, Stalinist culture, and the Dissident Movement.

HIS 540 HISTORY OF MODERN FRANCE TO 1815. (3)
The course of French history to 1815, including the development of French political, administrative, legal, social, economic and cultural achievements and institutions and their contribution to the modern world.

HIS 541 HISTORY OF MODERN FRANCE SINCE 1815. (3)
Continuation of HIS 540.

HIS 542 GERMAN HISTORY, 1789-1918. (3)
This course examines the political, social, and cultural history of Germany during the century when it arose from utter defeat by Napoleon to become the strongest economic and military power in Europe; then concludes with Germany’s fate in World War I.

HIS 543 GERMAN HISTORY SINCE 1918. (3)
This course examines the history of Germany from the end of World War I until the present, including the Weimar Republic, the Third Reich, the occupation regimes after World War II, East and West Germany from 1949 to 1990, and the reunified Germany since 1990. The main focus of coverage will be on political and social history, with lesser emphasis on cultural, diplomatic, and military history.

HIS 546 THE BYZANTINE EMPIRE. (3)
A study of Byzantine history from the time of Constantine the Great to the capture of Constantinople by the Turks in 1453. Prereq: HIS 104 or 247.

HIS 549 HISTORY OF THE MIDDLE EAST: 1952 TO THE PRESENT. (3)
A continuation of HIS 548. Emphasis is on the politics of Middle Eastern nationalism, Pan-Arabism and its demise, the Arab-Israeli conflict, the politics of oil and nuclear weapons, the Islamic revolution in Iran, and the development of the Islamic movement since 1967.

HIS 550 STUDIES IN MID-EAST HISTORY AND POLITICS: (Subtitle required). (3)
Selected topics on the history of the Middle East and its politics. The specific topics for a given semester will be listed in the class schedule book and the department’s website.

HIS 552 TUDOR-STUART BRITAIN, 1485-1714. (3)
An analysis of political, religious, cultural, and economic changes in Britain during the reign of the Tudors and Stuarts kings and queens, a period when Britain became increasingly prominent in world affairs.

HIS 553 EIGHTEENTH CENTURY BRITAIN. (3)
An analysis of English society and politics in an important transition period when the country was transformed by the Industrial Revolution and challenged by the French Revolution.

HIS 554 BRITISH HISTORY 1815-1901. (3)
A detailed study of Britain’s political, social, diplomatic and industrial development in the 19th century.

HIS 555 BRITISH HISTORY SINCE 1901. (3)
A detailed study of Britain in the 20th century with special consideration of Britain in World War I and World War II, and her position in the contemporary world.

HIS 556 THE BRITISH EMPIRE, 1322-1879. (3)
This course covers the rise, fall, and rise of the British empire from its extension into Scotland and Ireland till the beginning of the age of “New Imperialism,” explaining the means by which Britain came to dominate one-third of the globe, and its impact on the many cultures, economics, and geopolitical entities of the third world. It will further discuss how those cultures transformed Britain itself. Prereq: Prior experience in HIS 105 strongly recommended.

HIS 557 THE BRITISH EMPIRE AND COMMONWEALTH, 1880-2000. (3)
This course will trace the imperial theme, and the gradual decline and decomposition of Britain’s empire from Victoria’s day to the present; it will examine decolonization and the blending and clash of cultures, the effect of technology and western ideas on the subject peoples, and their impact on western civilization. Prereq: Prior experience in HIS 105 strongly recommended.

HIS 561 CULTURE, IDEAS, AND SOCIETY IN LATIN AMERICA. (3)
This course explores the interplay of culture, ideas, and society in the history of Latin America from Independence (1825) to the present. It takes an interdisciplinary approach and is attentive to issues of class, gender, sexuality, ethnicity and race, power, domination, and resistance. Major themes to be developed in the course are history of ideas; popular and elite cultures; material and visual culture; work, leisure, and consumption; and the politics of representation. Prereq: HIS 207 or LAS 201 are suggested.

HIS 562 MODERN MEXICO. (3)
Following a brief survey of Mexican political history from Independence to the present, this course will examine topically major historical themes, such as landholding and agrarian problems, church and state, and assessment of the 1910 Revolution.

HIS 563 THE HISTORY OF WOMEN IN LATIN AMERICA. (3)
This course will survey the history of women in Latin America from pre-Columbian period to the present. The emphasis will be mainly on the late nineteenth and twentieth centuries in order to understand the situation of women in Latin America today.

HIS 564 HISTORY OF BRAZIL. (3)
Study of Brazilian history from 1500 to the present, stressing the multiethnic dynamics of colonial society, the political transformations of independence, and the contemporary legacies of race, slavery, abolition, and gender.

HIS 572 AMERICAN LEGAL HISTORY. (3)
A history of law in the United States, emphasizing interrelationship of law and society. Particular attention given to law and economic growth, the criminal justice system, legal reform, the bar, and minorities and the law.

HIS 573 AMERICAN CONSTITUTIONAL HISTORY. (3)
A study of constitutional development in the United States from the colonial period to current times, with emphasis on the Supreme Court.
HIS 574 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES TO 1919. (3)
A survey designed to acquaint the student with the principles of American foreign policy and its historical evolution. Prereq: HIS 108 or equivalent.

HIS 575 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES SINCE 1919. (3)
A continuation of HIS 574. Foreign policy after the United States became a world power. Prereq: HIS 109 or equivalent.

HIS 576 FRONTIER AMERICA, 1400-1869. (3)
A study of the ways in which America's people shaped and were transformed by the frontier; how they wrestled with the problems of nationhood, democracy, sacrifice, and innovation; and how the idealism and promise were fulfilled and betrayed, from the first settlers to the driving of the Golden Spike.

HIS 577 FRONTIER AMERICA, 1869-PRESENT. (3)
A survey of the many Westerners, women as well as men, Native Americans, Chinese, and Hispanics as well as whites, sodbusters as well as six-shooters, and of the many Wests, wild and not-so-wild, from the prairie homesteaders to the Sagebrush Rebellion; and how they made, inherited, and were imprisoned by the frontier heritage.

HIS 578 HISTORY OF THE OLD SOUTH. (3)
A study of the colonial beginnings and expansion of southern life, economics, and society. The growth of slavery, staple agriculture, and sectional politics will constitute the major interest. Prereq: HIS 108.

HIS 579 HISTORY OF THE NEW SOUTH. (3)
The evolution of southern life and society, agrarian politics, relationships with other sections, industrial growth, and new leadership.

HIS 580 HISTORY OF APPALACHIA. (3)
A survey of the social, economic, and cultural history of Appalachia from the colonial period to the present with emphasis on the interaction of this social state region with the broader forces of social change at work in modern America. Prereq: HIS 108, 109 or consent of instructor.

HIS 584 HEALTH AND DISEASE IN THE U.S. (3)
Examines the emergence of modern medicine and the allied health professions, from colonial times to the present. Emphasis will be placed on the social, institutional, and scientific contexts of medical thought, education, and practice. It also explores how social and professional thought and action shape the meaning of health and disease.

HIS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3)
This course will focus on the struggle for African American equality in the U.S. during the mid-twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as AAS 587.)

HIS 593 EAST ASIAN HISTORY SINCE WORLD WAR II. (3)
A study of the revolutionary political, economic and social changes occurring in China, Japan, and Korea in the aftermath of World War II. Important political and institutional developments and their relations to pre-war trends will be emphasized.

HIS 594 USES OF THE PAST IN MODERN CHINA. (3)
The twentieth century has brought great change to the cultural landscape of China. This change is marked by paradox: New China’s claim to political legitimacy has been based on both revolution and historical continuity. How is the past adapted for the present? This course will examine this dilemma through cultural relics: architecture, art, and artifacts. Considering changes to the Chinese city as well as museum history, we will study how cultural relics have been understood in modern China. Prereq: Any course in Chinese history or consent of instructor.

HIS 595 STUDIES IN HISTORY. (3)
Professors will offer lecture and discussion courses in areas in which they have special teaching interest. May be repeated to a maximum of six credits. Prereq: To be denoted by the instructor.

HIS 597 WESTERNERS IN EAST ASIA, 1839 TO THE PRESENT. (3)
The history of interactions between the peoples of East Asia and those of Europe and North America in the nineteenth and twentieth centuries. The actions and goals of merchants, diplomats, missionaries, journalists, and soldiers will be examined, and such concepts as colonialism, imperialism, and cultural change will be discussed.

HIS 598 CHINA IN REVOLUTION, 1895-1976. (3)
After a brief survey of modern Chinese history, this course explores the ideas which inspired the people who organized China’s Nationalist and Communist parties and examines the social conditions which influenced the outcome of the Chinese civil war. The course also covers the attempts of some Chinese Communists to “continue the Revolution” after 1949.

HIS 606 HISTORICAL CRITICISM. (3)
Required of every entering graduate student in history. For history graduate students only.

HIS 613 READINGS IN EARLY MEDIEVAL HISTORY. (3)
The problems, major sources and secondary literature in the period from the beginning of the fifth century to the end of the 10th century will be covered. Primary emphasis will be given to the Latin West. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another.

HIS 615 MANUSCRIPT CULTURES. (3)
This course examines how the vehicle of the manuscript and the circumstances of manuscript production and usage shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as CLA 615.)

HIS 616 PALAEOGRAPHY. (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused on Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, to expand abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, and to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the “archaeology of the book.” The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as CLA 616.)

HIS 621 READINGS IN EARLY MODERN EUROPE, 1450-1648. (3)
This course is designed to give graduate students a grounding in the historiography of Europe from 1450 to 1648. Students should expect to familiarize themselves in the recent trends in political, social, cultural, religious, economic, and intellectual history of the period.

HIS 622 READINGS IN EARLY MODERN EUROPE, 1648-1815. (3)
This course is designed to give graduate students a grounding in the history of Europe from the conclusion of the Thirty Years War to the Era of The French Revolution, with a focus on political, cultural, and intellectual history.

HIS 623 READINGS IN 19TH CENTURY EUROPEAN HISTORY. (3)
Intensive survey of the literature in the political, social, and/or cultural history of nineteenth-century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: Graduate status.

HIS 624 READINGS IN EUROPEAN HISTORY OF THE TWENTIETH CENTURY. (3)
A critical survey of problems and literature in the political, social, and cultural history of Twentieth Century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: An undergraduate course in European history.

HIS 625 BRITAIN, 1688-1815. (3)

HIS 626 BRITAIN, 1792-1914. (3)
This course will provide graduate students with a detailed overview of the history of Britain in the “long” nineteenth century. It will focus on such issues as the impact of the Industrial Revolution, the formation of a recognizably modern class society, the growth of working-class political consciousness, and the politics of class and gender. Prereq: Permission of instructor.

HIS 627 THE BRITISH EMPIRE, 1763-1914. (3)
This course provides graduate students with a detailed overview of several broad themes pertaining to the history of the British empire, 1763-1914: the first imperial crisis, slavery and the slave trade, race as a category of imperial knowledge/power, women’s emancipation and the problem of empire, the post-colonial challenge to the “imperial mindset,” and the intensification of imperial awareness within Britain itself, c. 1880-1914. Prereq: Permission of the instructor.

HIS 628 COLLOQUIUM ON MODERN EUROPEAN HISTORY. (3)
This course will provide an overview of the major themes and events that have shaped Modern European History from the late 18th century to the present. We will analyze the various ways in which particular historical topics have been interpreted (and reinterpreted) over time, as well as historian’s different methodologies, underlying assumptions, and use of evidence. The major goal of the course, however, is to introduce graduate students to significant works and historical debates in Modern European History.

HIS 637 READINGS IN COLONIAL LATINO AMERICAN HISTORY. (3)
Intensive survey of major themes and debates in colonial Latin American history from 1492 to the early nineteenth century. Includes political, economic, social, and cultural trends. Prereq: Consent of instructor.

HIS 638 READINGS IN LATIN AMERICAN HISTORY. (3)
Intensive survey of the major themes and debates in Latin American history from 1850 to the present. Includes political, economic, social and cultural topics. Prereq: Consent of instructor.

HIS 640 READINGS IN AMERICAN HISTORY TO 1877. (3)
Course will examine major scholarly debates in American history to 1877.
Course Descriptions

HIS 641 READINGS IN AMERICAN HISTORY SINCE 1877. (3)
Course will examine major scholarly debates in American history since 1877.

HIS 650 READINGS IN SPECIAL TOPICS IN HISTORY. (3)
Supervised reading at the graduate level of a selected bibliography of the essential literature of various special topics. May be repeated to a maximum of nine credits with different topics. Prereq: Consent of instructor.

HIS 651 READINGS IN INTERNATIONAL RELATIONS SINCE 1890. (3)
This course will involve intensive reading in the history of United States foreign relations in the twentieth century. It will examine various theoretical approaches to the subject. It will analyze the sources and consequences of America’s global expansion as well as the historiography of important events such as World War I and II, Korea and Vietnam.

HIS 653 READINGS IN U.S. WOMEN’S HISTORY. (3)
This course will introduce students to the main currents in U.S. women’s history in four broad chronological units: Traditional America, 1600-1820; Industrializing America-Part I, 1820-1880; Industrializing America-Part II, 1880-1920; and Modern America, 1920-present. Within this framework, the course will explore such topics as: work, communities and public life; gender, families and sexuality; race and African-American experiences; and religion, reform and political culture. The course will also familiarize students with the ongoing theoretical debates within women’s history.

HIS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY. (3)
Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as AAS 654.)

HIS 655 READINGS IN ANTEBELLUM SOUTHERN HISTORY. (3)
Introduces graduate students to the historical literature on the antebellum South and the major historiographical issues.

HIS 656 READINGS IN NEW SOUTH HISTORY. (3)
Introduces graduate students to the historical literature on the New South and the major historiographical issues.

HIS 657 RACE RELATIONS IN THE UNITED STATES. (3)
This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as AAS 657.)

HIS 673 READINGS IN AMERICAN HISTORY: THE Gilded Age and the Progressive Era. (3)
An intensive survey of the major historiographical issues and the secondary literature of the Gilded Age and the Progressive Era.

HIS 695 INDEPENDENT WORK. (1-3)
Under special conditions selected students may investigate problems, with weekly reports to instructor. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

HIS 700 SPECIAL PROBLEMS IN HISTORY. (3)
Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

HIS 701 RESEARCH SEMINAR IN AMERICAN HISTORY. (3)
Graduate research seminar in American history. May be repeated to a maximum of 12 credits.

HIS 705 COLLOQUIUM IN PRE-MODERN EUROPEAN HISTORY. (3)
Graduate research seminar for students in pre-modern European history. Students will write a research paper of 20-30 pages using primary sources in the original languages. Class time will primarily involve discussion of issues in progress, including works by the students and pre-modern European faculty members, as well as discussion of the mechanics of researching and writing history.

HIS 706 SEMINAR IN MEDIEVAL HISTORY. (3)
Directed research on a common problem. May be repeated to a maximum of 12 credits. Prereq: A reading knowledge of Latin or of one European language or consent of instructor.

HIS 710 SEMINAR IN AMERICAN HISTORY, 1607-1815. (3)
May be repeated to a maximum of 12 credits.

HIS 711 SEMINAR IN AMERICAN HISTORY, 1815-1865. (3)
May be repeated to a total of 12 credits.

HIS 722 SEMINAR IN MODERN EUROPEAN HISTORY, 1870 TO THE PRESENT. (3)
May be repeated to a maximum of 12 credits.

HIS 730 SEMINAR IN MODERN BRITISH HISTORY. (3)
May be repeated to a total of 12 credits.

HIS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

HIS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

HIS 750 INTRODUCTION TO THE HISTORICAL PROFESSION. (1)
Intend to acquaint students with dissertation research expectations, the responsibilities of a new faculty member, and professional career options.

HIS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

HIS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

HIS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

HJS Hebrew and Jewish Studies

HJS 101 ELEMENTARY HEBREW. (4)
Coverage of Hebrew grammar designed to prepare students to use Hebrew for their particular needs and programs.

HJS 102 ELEMENTARY HEBREW. (4)
Continuation of HJS 101. Prereq: HJS 101 or consent of instructor.

HJS 110 INTRODUCTION TO THE OLD TESTAMENT/HEBREW BIBLE. (3)
This course is an introduction to and survey of the small library of ancient documents collectively known as the Hebrew Bible (or Old Testament) – a library which is sacred to Judaism and Christianity. During our survey of the Hebrew Bible’s content and our close reading of selected passages, we will consider the origins and formation of these texts and how they relate to the history and culture of the ancient Near Eastern context in which they were written. We will also pay attention to the artistry of the texts’ various genres and to modern academic theories about how to understand and interpret them.

HJS 201 INTERMEDIATE HEBREW. (3)
Hebrew grammar and introduction to the reading of specimens of Hebrew prose. Prereq: HJS 102 or consent of instructor.

HJS 202 INTERMEDIATE HEBREW. (3)
Readings in selected Hebrew authors. Prereq: HJS 201 or consent of instructor.

HJS 324 JEWISH THOUGHT AND CULTURE I: FROM ANCIENT ISRAEL TO THE MIDDLE AGES. (3)
A survey of Jewish intellectual and material civilization from its beginnings in ancient Israel to its efflorescence in the medieval period.

HJS 325 JEWISH THOUGHT AND CULTURE II: FROM THE EXPULSION FROM SPAIN TO THE PRESENT. (3)
A survey of Jewish intellectual and material civilization from the expulsion from Spain in 1492 to the destruction of European Jewry in the Holocaust and the re-establishment of Israel.

HJS 326 THE JEWISH EXPERIENCE IN AMERICA. (3)
An investigation of the history, literature, and situation of Jewish life in America.

HJS 327 WOMEN IN JUDAISM. (3)
An investigation of the history, literature, and experiences of women in Judaism.

HJS 425 TOPICS IN JUDAIC STUDIES (Subtitle required). (3)
Variable in content, this course focuses on important texts and issues in Jewish history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

HJS 495 INDEPENDENT STUDY IN JUDAIC STUDIES. (3)
Independent study on a topic mutually acceptable to instructor and student in Judaic Studies. Prereq: Declared minor in Judaic Studies.

HMN Humanities

HMN 300 TOPICS IN THE HUMANITIES (Subtitle required). (1-4)
A multidisciplinary, topical course, experimental in nature, approved by the Gaines Center Faculty Advisory Committee. Open to all juniors and seniors; enrollment will be limited to ten students selected by Gaines Center Faculty Advisory Committee through competitive application. Cannot be repeated under same subtitle. Prereq: Junior/senior status; approval of Gaines Center for the Humanities Director.
New issues or the in-depth study of issues relevant to hospitality and/or tourism will be offered through this course. Credit hours will vary. May be repeated to a maximum of six credit hours. Prereq: Consent of instructor.

HMT 120 INTRODUCTION TO HOSPITALITY MANAGEMENT AND TOURISM. (3)
A survey of the historical development and management structure of organizations that comprise the hospitality and tourism industry. The course format includes presentation by industry representatives, lectures and student led discussions.

HMT 210 HOTEL ROOMS DIVISION MANAGEMENT. (3)
A comprehensive study of the management principles which apply to the rooms division of a hotel property that includes front desk and housekeeper operations, reservations and billing, accounting procedures and public relations. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 270 PRINCIPLES OF TRAVEL AND TOURISM. (3)
An introduction to the structure, operation and characteristics of domestic and international tourism. Topics include transportation modes, destination planning and marketing, wholesale and retail travel agent agreements, geographic, social and cultural aspects of tourism. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 308 PRINCIPLES OF FOOD AND BEVERAGE. (3)
This course provides an overview of the principles of food and beverage concepts, menu development and food service operations in various segments of the hospitality and tourism industries. Food and beverage demonstrations and labs are included. A fee to cover materials and activities may be assessed from students. Lecture, two hours; laboratory, two hours per week. Prereq: HMT 120; DSN 241; Hospitality Management and Tourism Majors only.

HMT 320 HOSPITALITY AND TOURISM MARKETING. (3)
This course focuses on the principles of marketing as they are applied to the hospitality industry. Problems and characteristics specific to the industry will be examined. Additionally, this course will be a starting point for the development of a marketing feasibility study and comprehensive plan and strategy for marketing a hospitality operation. Prereq: HMT 120, HMT 210, HMT 270, HMT 308 and MGT 300. For Hospitality Management and Tourism majors only.

HMT 330 MEETINGS AND CONVENTION MANAGEMENT. (3)
This course highlights the importance, growth, and economic impacts associated with convention/trade shows to hotels, restaurants, visitors and convention centers, museums, airlines and local governments. Prereq: HMT 120, HMT 210, HMT 270, MKT 300. For Hospitality Management and Tourism majors only.

HMT 345 INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY. (3)
This course discusses the strategic impact of information technology on the hospitality industry, describes basic functions found in IT applications in the hospitality industry, and devotes time to learning industry-specific applications as well as the Internet. Prereq: CS 101, HMT 120. For Hospitality Management and Tourism majors only.

HMT 350 REVENUE MANAGEMENT. (3)
This course explores the skills and role of revenue managers in hospitality management as well as discussing the benefits of revenue management practices and systems. Consideration is given to concepts such as pricing, value, forecasting, inventory, distribution and evaluation as it relates to maximizing revenue in hospitality. Prereq: HMT 120 and ACC 201. For Hospitality Management and Tourism Majors only.

HMT 359 HOSPITALITY AND TOURISM SPECIAL TOPICS (Subtitle Required) (1-3)
New issues or the in-depth study of issues relevant to hospitality and/or tourism will be offered through this course. Credit hours will vary. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Consent of instructor.

HMT 360 TOURISM PLANNING AND DEVELOPMENT. (3)
This course is designed to provide students with a thorough overview of tourism planning at the local and regional level. The course covers a variety of tourism planning theories, procedures and guidelines to meet the diverse needs of travelers, destinations, and the industry. Prereq: Consent of instructor.
HMT 694 STRATEGIC PLANNING IN HOSPITALITY, LODGING AND TOURISM. (3)
This course is designed to shape students’ understanding of strategic planning as it relates to hospitality, lodging, and tourism. The concepts utilized to accomplish this objective represent several discipline areas such as: organizational theory, strategic management, and the function of management. Prereq: Admission to graduate program.

HMT 759 SPECIAL TOPICS IN HOSPITALITY MANAGEMENT AND TOURISM. (3)
Advanced work on a specific topic in hospitality management and tourism. May be repeated for a maximum of twelve credits under different subtitles. Prereq: Graduate standing.

HMT 781 ADVANCED TRENDS ANALYSIS IN HOSPITALITY AND TOURISM. (3)
The student will investigate the major trends occurring in the hospitality, lodging, and tourism industry and develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Admission to graduate program.

HMT 785 INDEPENDENT STUDY IN HOSPITALITY MANAGEMENT AND TOURISM. (1-6)
Problems involving independent library, studio, and/or laboratory study conforming to the student’s special interest under the direction of an appropriate faculty member having proficiency in the selected area selected. May be repeated up to a maximum of six credits under different subtitles. Prereq: Nine credit hours of graduate study, consent of instructor, contractual agreement.

HON Honors

*HON 100 ACADEMIC ORIENTATION FOR HONORS STUDENTS. (1)
This course is designed to introduce Honors students to the scholarly life of the University and also to organize and execute community service as a cohort. Through guest lectures, discussions and out-of-the-classroom assignments, HON 100 helps Honors scholars gain an early understanding of opportunities at a research university, increase awareness and use of campus resources, reflect on community issues that they can address using the skills and talents specific to their cohort, and form beneficial relationships with students, faculty and staff. Prereq: Lewis Honors students only. Priority given to Honors Scholarship programs cohorts, e.g., the Singletary Scholarship recipients.

*HON 101 KNOWLEDGE AND SOCIETY. (3)
As a foundational course to the Honors curriculum, Knowledge and Society takes a vested interest in helping students develop an appreciation for the pursuit of truth and knowledge. By exploring the links between subjective and social phenomena, students will gain a clearer understanding of the way inquiry and curiosity are implicated in our familial, cultural, historical, and political worlds. This course aims to foster an environment where students are equipped with the tools to confidently discern the assumptions, premises, and expectations of variant claims to knowledge and truth. Knowledge and Society is an invitation extended to students to reimagine their identity as agents in an interconnected and ever-expanding global context. Prereq: Lewis Honors students only.

*HON 151 HONORS IN HUMANITIES (Subtitle required). (3)
Honors Humanities topics offered by various professors (topics announced the preceding semester). Whatever the topic, the Honors Humanities courses reflect on community issues that they can address using the skills and talents specific to their cohort, and form beneficial relationships with students, faculty and staff. Prereq: Lewis Honors students only. Priority given to Honors Scholarship programs cohorts, e.g., the Singletary Scholarship recipients.

*HON 152 HONORS IN NATURAL, PHYSICAL, AND MATHEMATICAL SCIENCES (Subtitle required). (3)
A hands-on, semester-long course for Honors students in which they ask questions requiring scientific analysis, develop a related experimentation regimen, collect data, do the experimentation, analyze the results, draw conclusions and appropriately disseminate the results. Students will directly experience the scientific process to learn how scientists work. Prereq: Lewis Honors students only.

*HON 251 HONORS IN SOCIAL SCIENCES (Subtitle required). (3)
The World as Human Network and Affairs. Courses in this category promote the understanding of individuals and the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. May be repeated up to six hours under a different subtitle. Prereq: Lewis Honors students only.

*HON 252 HONORS IN ARTS AND CREATIVITY (Subtitle required). (3)
The creative process and its products and results are the focus of these Honors courses, and include but are not limited to, visual, verbal, musical, spatial, or kinesthetic forms of expression. Readings and final projects vary at the discretion of the faculty. May be repeated up to six hours under a different subtitle. Prereq: Lewis Honors students only.

*HON 301 PROSEMINAR. (3)
An interdisciplinary course that offers an in-depth examination into a topic chosen by the instructor. HON 301 Proseminar uses an interdisciplinary approach to interrogate history, culture, and constructions of knowledge. The format of the seminar is discussion-based and student-centered. Throughout the semester, students will be responsible for leading assigned discussions in collaboration with their peers and/or professor. This course extends critical and creative thinking skills through specialized projects, research, written assignments and/or oral presentations. May be repeated to a maximum of six hours. Prereq: At least two lower level honors courses. Lewis Honors students only.

*HON 333 JOURNAL/JOURNEY PROJECT. (1)
Special credit for Honors College students who keep an intellectual journal for both fall and spring semesters, receiving one credit during the spring semester. Regular consultation with an advisor, several group meetings during the year. May be repeated to a maximum of five credits. Pass/Fail only. Prereq: Consent of instructor. Lewis Honors students only.

*HON 352 STUDY AND TRAVEL ABROAD (Subtitle required). (3)
An experiential, travel-abroad course that requires pre-travel class preparation followed by travel abroad that will provide students with multi-cultural exposure, leadership, and a new frame of reference for understanding the world and its role in it. Prereq: Lewis Honors students only.

*HON 395 HONORS INDEPENDENT WORK. (1-6)
An independent research or creative project for 1-6 credits under the mentorship of a faculty member in the field. May be repeated up to a maximum of 6 credits. A research or creative project proposal must be agreed to by the student and faculty mentor and must be approved by the Honors Director of Academic Affairs. Prereq: Lewis Honors students only.

*HON 398 SENIOR HONORS CAPSTONE. (3-15)
A formal thesis or creative project of the student’s choosing, to be directed by a professor in the student’s major department. Student must present this research in an appropriate public or professional venue. Prereq: Consent of instructor and approval from the Honors Director of Academic Affairs. Lewis Honors students only.

*HON 399 HONORS EXPERIENTIAL LEARNING (Subtitle required). (1-15)
A service- or community-based experience in the field under the supervision of a faculty member. May be repeated to a maximum of 30 credits. Prereq: Lewis Honors students only. Completion of an Honors Learning agreement, consent of supervising faculty member, and approval from the Honors Director of Academic Affairs.

HP Historic Preservation

HP 101 HISTORIC PRESERVATION: HOW THE PAST INFORMS THE FUTURE. (3)
An introduction to the theory and practice of historic preservation in the Commonwealth of Kentucky and beyond. The approach will be through an interdisciplinary lens, including architecture, interiors, history, urban planning, archaeology, geography, economic development, and community engagement. Lectures, readings, discussion, and field observations.

HP 252 ADAPTIVE REUSE AND TREATMENTS FOR HISTORIC BUILDINGS. (3)
Available to any student, whether they are a designer or future property owner, this class considers case studies of a range of projects. Students will discuss the challenges and ethical considerations inherent in the process of adapting and conserving historic buildings.

HP 300 SUSTAINABILITY AND THE BUILT WORLD. (3)
Examines the relationship between sustainability and the built environment, with emphasis on construction, building operations, and community planning and development. Topics considered include green building design and sustainability, smart growth, embodied energy, adaptive reuse, whole life cycle assessments, energy-efficient retrofitting, social and environmental justice, and the role of heritage in fostering durable commitments to place.

HP 352 KENTUCKY ARCHITECTURE AND LANDSCAPES. (3)
This course is an introduction to Kentucky’s characteristic built environment. There will be a focus on central Kentucky to enable context for assignments and access to sites for field trips. The course employs an interdisciplinary approach to architectural and cultural landscape developments, using both historical and geographical perspectives. It will include lectures, discussions, field trips, field observations and readings. Students will need to provide their own transportation to the field trip site. When necessary, carpooling arrangements will be made for any student without appropriate transportation. There will be nominal cost associated with the field trips. Prereq: Junior standing or permission of instructor.

HP 501 SELECTED TOPICS IN HISTORIC PRESERVATION (Subtitle required). (3)
Seminar for investigations of selected topics in historic preservation. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.
Course Descriptions

#HP 510 CULTURAL LANDSCAPES AND HISTORIC PRESERVATION. (3)
Introduces students to the concept of cultural landscape and the field of cultural landscape studies, with special emphasis upon how historic preservation policy and practice regards cultural landscapes, and the concept’s potential for the future of the field. Prereq: Graduate or upper level undergraduate standing.

#HP 511 SUSTAINABLE DEVELOPMENT AND HERITAGE. (3)
Globalization, urbanization, and climate change are all threats to cultural heritage and cultural diversity. Although it is increasingly recognized that heritage plays a significant role in sustainable development, its contribution has been trivialized as a part of the sustainable development agenda. This course will address the relevance of protecting, promoting, and utilizing cultural heritage to achieving social, economic, and environmental well-being as well as strategies for integrating cultural heritage conservation into the sustainable development debate.

HP 601 INTRODUCTION TO HISTORIC PRESERVATION. (3)
This course will introduce students to the history and theory driving the modern preservation movement, and will draw attention to the broad scope of what constitutes preservation practice in the 21st century. The course will emphasize the relationship between historic preservation and allied fields, including city planning, economic development, design, archaeology, environmental sustainability, and landscape studies.

HP 602 HISTORIC PRESERVATION LAW. (3)
The goal of this course is to assist non-lawyers in understanding laws, policies, and procedures and how they impact your professional practice as preservationists, planners, archaeologists, and in other conservation related fields. Preservation law encompasses a number of practice areas including, but not limited to land, property, local government, constitutional, administrative, and environmental law as well as the conservation of archaeological resources. Prereq: HP 601 or consent of instructor.

HP 609 URBAN REVITALIZATION IN THE UNITED STATES: HISTORY, CONCEPTS, AND TECHNIQUES. (3)
This course explores the idea of historic preservation as a tool for economic development. Students will critically reflect on the relationship between historic preservation and issues such as income inequality, governance, and gentrification. It will also introduce students to the tools and techniques being used by preservationists, urban planners, private and non-profit developers, housing advocates, and others to promote the revitalization of economically distressed communities. These tools will include a variety of federal, state and local housing and economic development programs, the National Trust for Historic Preservation’s Main Street Program, and basic real estate decision-making tools that can be applied in both historic and non-historic contexts. Prereq: Enrollment in program or consent of instructor.

HP 610 AMERICAN ARCHITECTURE I. (3)
This course will trace architectural developments in America from colonial settlement until the middle of the 19th century. Examples will come from vernacular, professional and monumental contexts so that students become familiar with various design processes and types of architecture. The course will also survey the features of buildings constructed in different times in various American places and consider their historical and social contexts.

HP 611 AMERICAN ARCHITECTURE II. (3)
This course is a sequel to HP 610: American Architecture I. It will examine architectural developments in America from the mid-19th to the early 20th century, with a focus upon the virate intersection of American architecture with the emergence of modern architecture in the rest of the world. There will be special emphasis upon architectural professionalization and its impact on processes of design in all context. Field trip is required. Prereq: HP 610 or consent of instructor.

HP 612 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES. (3)
This course introduces students to basic research methods and techniques for gathering, recording, and interpreting information about historic buildings and sites. Class discussions and practical exercises focus on the National Register system’s documentation requirements, HABS conventions for drawing, and recording for survey and compliance purposes (e.g., Section 106). While engaging in field research to investigate historic buildings and sites, students will learn how, when, and why to apply the everyday research and recording techniques used by preservation professionals including fundamental methods for conducting archival research; evaluating physical evidence; developing building descriptions and historical narratives; producing measured drawings (plans); photographing buildings for reporting or archival purposes; and organizing results.

HP 613 HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS. (3)
HP 613 will provide an in-depth examination of current methods and technologies used in the conservation of historic materials and structural elements. This course will also examine the materials and methods of construction used in historic structures in Europe and the United States. The investigation of historic structural systems will include an examination of the technology available and the progressive changes in technology and how it impacted construction methods. The analysis of existing regional structures and the conservation methods used to preserve them will be a key component to the class. These investigations will be carried out using a number of methods including research, identification, analysis, problem-solving remediation and writing. Prereq: HP 601.

HP 614 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES II. (3)
This course reinforcing concepts taught in HP 612 while introducing students to more advanced documentary and analytical techniques for evaluating historic sites and structures. Students will work through practical exercises in large format photography, advanced measured drawing skills including the production of elevations and sections, and new analytical and representational techniques using computer applications. Where HP 612 emphasizes research, interpretive, and recording methods, the emphasis for this course is on analyzing, synthesizing, illustrating, and communicating the results of building investigations. Prereq: HP 612 or consent of instructor.

HP 615 AMERICAN SETTLEMENT PATTERNS: HISTORY OF LAND DEVELOPMENT. (3)
A graduate seminar that explores the traditions, policies, practices and regulations that dictate the form of the built environment in the United States, from colonial times to the present, in rural, suburban, and urban contexts. Prereq: Enrollment in program or consent of instructor.

HP 616 HISTORIC PRESERVATION AND DESIGN. (3)
An introduction to architectural preservation and design, using sites in Kentucky. Design projects will focus on restoration, preservation, and adaptive reuse of historic structures, new urban infill structures, and new structures within historic urban and rural contexts. Individual and team projects will involve interaction with local government, planning and preservation groups. Course meets for 3 hours each week. Prereq: Enrollment in program or consent of instructor.

HP 617 HISTORIC PRESERVATION PLANNING. (3)
An introduction to historic preservation planning. Projects will introduce students to a variety of preservation planning tools, including neighborhood historic resource surveys, the creation of historic districts, the development of design guidelines, and the mapping of historic resources inventory. The course will focus on historic sites and structures within Kentucky, and individual and team projects will involve interaction with local government, planning and preservation groups. Class meets for three (3) hours per week. Prerequisite: HP 601 and enrollment in program or consent of instructor.

HP 670 RETHINKING PRESERVATION: ETHICS, PUBLIC POLICY, AND HERITAGE RESOURCES. (3)
This course explores the ethical and legal issues of historic preservation in the context of historic preservation by examining how these issues have shaped the public debate, policy making, and policy execution surrounding heritage resources. It will provide an overview of how issues such as race, gender, location, and income play a part in preservation efforts in the United States. It will further address ethical considerations in the global context through an examination of the impact of climate change, political conflict, and human rights on heritage resources. Prereq: HP 601 and HP 602 or consent of the instructor.

HP 671 INTRODUCTION TO CULTURAL RESOURCE MANAGEMENT. (3)
This course introduces students to the history, theory, and practice of cultural resource management (CRM) in the United States. Topics covered include the legal basis of CRM, the review and compliance process, reporting and consultation requirements, and the business, ethics, and politics of CRM. Assigned readings, case studies, and presentations will emphasize the interdisciplinary nature of CRM practice. Prerequisite: HP 601 and HP 602.

HP 675 ARCHITECTURAL HISTORY FOR PRESERVATION PRACTICE. (3)
This course introduces students to an interdisciplinary method for identifying, documenting, analyzing, and evaluating historic buildings. While 676, Field & Archival Methods in Historic Preservation, focuses in detail on how to gather and record data about buildings, this course emphasizes a methodology for deciphering the information in order to interpret the meaning of historic buildings. Prereq: Enrollment in the online graduate certificate program; prior completion of HP 601 – Introduction to Historic Preservation; or consent of instructor.

HP 676 FIELD METHODS IN HERITAGE CONSERVATION. (3)
This hybrid course will provide students with an immersive experience in documenting, interpreting, communicating and visualizing cultural heritage— including the built environment (buildings, districts, cultural landscapes) and intangible culture (stories, music, oral history, etc.). The course is divided into eight modules, roughly corresponding to eight weeks in a face-to-face course. The modules are further divided into three units. Unit One and Three will be taught entirely online through the University of Kentucky’s Canvas system. Unit Two consists of a six-day intensive face-to-face field school in Lexington, KY. All of the course units are designed to teach students how to “read” the historic built environment within its historical, material, political, social, and cultural contexts. Students will be introduced to traditional field methods and technology, as well as emerging interdisciplinary methods of inquiry that enhance the knowledge of people, communities and cultures that have been historically marginalized. Prereq: HP 601 or consent of the instructor.

HP 699 SUMMER INTERNSHIP. (1-6)
Summer internship either in or out of Kentucky, providing intensive, practical experience in historic preservation. Internships for which the student can apply in other states or countries will be encouraged to provide practical experience outside of Kentucky, and work at several sites is possible. Possible internship programs include those offered by the Smithsonian Institution, National Park Service, or in various foreign countries, depending on the student’s interest and subject to approval of the Director. Prereq: Two semesters of course work or consent of the Director.
**HSE 570 MANAGING HEALTH ISSUES IN LONG-TERM CARE: APPROACH.**

This course will cover the identification and management of health issues commonly found in LTC settings, including those related to physical, psychological, social, and environmental factors. May be repeated to a maximum of six credits. Prereq: HHS 101, HHS 102, CLM 241, GRN 250 or consent of instructor. (Same as CLM 570.)

**HSM 595 DIRECTED STUDIES.**

Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 405, CLM 444, CLM 445, CLM 452, or CLM 495, or consent of instructor. (Same as HSM 595.)

**HSM 880 SEMINAR IN ALLIED HEALTH (Variable topic).**

Study and analysis of current and topical problems and issues regarding the roles, trends and research for allied health educators. May be repeated to a maximum of six credits. Prereq: Admission to the College of Allied Health Professions Program or permission of instructor.

---

**Health Sciences Education**

**HSE 101 SURVEY OF HEALTH PROFESSIONS.**

An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HHS 101.)

**HSE 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS.**

Review of the wellness–illness spectrum and the societal response to health services decision making. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. Prereq: HHS or CLM Major designation, CHS pre-major status, or consent of instructor. (Same as CLM 241/HHS 241.)

**HSE 510 INTEGRATIVE CARE FOR HEALTH SCIENCES.**

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on sound science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to 2 credits experiential research). (Same as AT 500, CNU 500, CD 500, MLS 500, PAS 500.)
HSP 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3) Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 551, and admission to the CLM Program or consent of instructor. (Same as CLM 452.)

HSP 601 OVERVIEW OF U.S. HEALTHCARE. (3) An introduction to the health care delivery system in the United States, including its composition and functioning, the interactions of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

HSP 622 MENTAL HEALTH ADMINISTRATION. (3) This course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

IAS Interdisciplinary American Studies

IAS 301 TOPICS IN AMERICAN STUDIES. (3) A team-taught seminar on a selected topic in American Studies, emphasizing approaches to interdisciplinary study in this field and the ways that different disciplines, when integrated, better complement an understanding of the topic. Possible topics include: slavery, racism, women’s rights, Native Americans, the West, the South, and the city and industrialization. May be repeated to a maximum of six credits.

IAS 401 PERSPECTIVES IN AMERICAN STUDIES. (3) A team-taught seminar on a selected period in American history, emphasizing how different disciplines complement and illuminate a perspective on that period. Possible periods for study: Colonial America, the Enlightenment Age in America, the Age of Jackson, Ante-bellum America, Civil War and Reconstruction, the Gilded Age, America between the Two Wars, and Contemporary America. May be repeated to a maximum of six credits.

IBS Integrated Biomedical Sciences

IBS 601 BIOMOLECULES AND METABOLISM. (3) An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as BCH 607.)

IBS 602 MOLECULAR BIOLOGY AND GENETICS. (3) In introductory graduate-level course on molecular biology and genetics (concepts and techniques) necessary for advanced graduate courses. The course will emphasize basic genetic principles and the molecular mechanisms that underlie the regulated expression of genes, including transcription, mRNA processing and translation, as well as mechanisms of DNA replication, repair and recombination. Genetic engineering and other experimental approaches that are critical to molecular biology research will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 603 CELL BIOLOGY AND SIGNALING. (3) An introduction to cell biology and signaling focused on cell types and architecture, membrane structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 606 PHYSIOLOGICAL COMMUNICATION. (3) This course will consider the function of the mammalian organism from a perspective ranging from cells to organs, with an emphasis on physiological communication between organ systems. It will build upon the Integrated Biomedical Sciences (IBS) series of courses to allow the student to develop a truly integrative appreciation of biologic function. Prereq: IBS 601 and IBS 602.

IBS 607 SEMINAR IN INTEGRATED BIOMEDICAL SCIENCES. (0) Weekly seminar devoted to the presentation and discussion of classic and new research. May be repeated to a maximum of four times; two semesters are required as part of the IBS curriculum. Prereq: Admission to IBS curriculum.

IBS 608 SPECIAL TOPICS IN INTEGRATED BIOMEDICAL SCIENCES. (2) IBS 608 is comprised of a series of 1/2 credit minicourses, meeting each for 1 hour/week for 7 weeks, that will be taught during the Spring semester. Each minicourse will focus on a specific topic or area of research that is ongoing at UK or is particularly timely/exciting. Each student is required to participate in 4 of these minicourses for a total of 2 credit hours during the semester. Up to ten minicourses will be offered each semester. The particular topics (and participating faculty) may vary from year to year. Students will be expected to sign up for 6 courses in order of preference and will be assigned to 4 minicourses. Prereq: Students enrolled in IBS and have taken IBS601 and IBS602 can participate in this course. Non-IBS students can participate with permission of the Course Director. A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended.

"IBS 609 RESEARCH IN INTEGRATED BIOMEDICAL SCIENCES. (3) Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of six credit hours. Two semesters required as part of IBS curriculum. Prereq: Admission to IBS curriculum and consent of instructor.
IBS 610 CRITICAL SCIENTIFIC READINGS. (2)
The major emphasis of this course is to develop within students the ability to critically read, evaluate and critique papers in the areas of biomedical and translational research studies. The emphasis will be on "how" and "why" certain basic statistical applications are used rather than the theory behind them. Prereq: IS 202. (Same as IS 303.)

ICT 115 EXPERIENCE ICT. (3)
Through the exploration of social and technological theories related to Information Communication Technology and the evolution and current applications of ICT, students will gain a better understanding of how emerging technologies have led to the need and development of ICT as a discipline; its shared commonalities with other disciplines; its distinct characteristics; its applications in the workplace and personal contexts; and its impact and future implications on individuals, organizations, and societies.

ICT 150 EXPERIENCE ICT. (3)
In the Digital Age I is the introductory course in a two-course sequence designed to engage STEAM students in composing and communicating ideas using speech, writing, visuals, and technology. This course will focus on equipping students to (1) translate complex, technical information into comprehensible terms, (2) utilize research skills to collect and evaluate information, and (3) employ written, oral, and technical elements as both independent and interconnected forms of communication.

ICT 114 COMPOSITION AND COMMUNICATION IN THE DIGITAL AGE I. (3)
Composition and Communication in the Digital Age I is the introductory course in a two-course sequence designed to engage STEAM students in composing and communicating ideas using speech, writing, visuals, and technology. This course will focus on equipping students to (1) translate complex, technical information into comprehensible terms, (2) utilize research skills to collect and evaluate information, and (3) employ written, oral, and technical elements as both independent and interconnected forms of communication.

ICT 115 COMPOSITION AND COMMUNICATION IN THE DIGITAL AGE II. (3)
Composition and Communication in the Digital Age II is the introductory course in a two-course sequence designed to engage STEAM students in composing and communicating ideas using speech, writing, visuals, and technology. This course will focus on equipping students to (1) translate complex, technical information into comprehensible terms, (2) utilize research skills to collect and evaluate information, and (3) employ written, oral, and technical elements as both independent and interconnected forms of communication.

ICT 301 INTRODUCTION TO DATABASES. (3)
This course is intended to provide students with an understanding of the process of organizing data for storage, retrieval, and manipulation. The course covers the basic concepts of database management systems, including data models, query languages, and database administration.

ICT 302 CONTENT MANAGEMENT SYSTEMS. (3)
The course focuses on the practice and theory of designing, building and maintaining content management systems.

ICT 303 SYSTEMS ANALYSIS. (3)
This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entire life cycle of the information system. The course utilizes a case study approach in which students initiate the analysis and design of a limited scope information system. Prereq: IS 202. (Same as IS 303.)
INTRODUCE FOUNDATIONAL CONCEPTS OF NEW MEDIA (UNIT 1), ASSOCIATE AND APPLY THESE CONCEPTS IN THEIR PROFESSIONAL AND PERSONAL LIVES. TO THIS EXTENT, THE READINGS ARE CAREFULLY CHOSEN TO CAN BE USED WHILE CREATING AND ENGAGING WITH MULTIMEDIA TOOLS, PLATFORMS, AND ARTIFACTS BOTH IN THEIR DAILY LIVES (UNIT 2), AND CRITICALLY THINK ABOUT SOME OF THE WIDER IMPLICATIONS OF NEW MEDIA (UNIT 3). THE ASSIGNMENTS ARE CONSTRUCTED TO CULTIVATE CRITICAL ANALYTICAL THINKING BY HELPING STUDENTS APPLY THE INSIGHTS TO DAY-TO-DAY EXAMPLES. STUDENTS ARE ALSO REQUIRED TO COMPLETE TWO MULTIMEDIA TOOLWORKSHOPS AS PART OF THEIR CURRICULUM IN ORDER TO GAIN PRACTICAL SKILLS.

**ICM 305 ELECTRONIC INFORMATION RESOURCES FOR HEALTH PROFESSIONALS.**

This course is a survey of electronic information resources for health professionals, including databases and Web resources, but with a focus on MEDLINE. Discussion of relevant controlled vocabularies, their use in formulating and executing search strategies, and alternative interfaces to MEDLINE are addressed. The course also includes reference management software, an evidence-based health care component, and discussion of systematic reviews. (Same as IS 326.)

**ICM 327 CONSUMER HEALTH INFORMATION SEEKING.**

This course will provide students with a foundation for the history and development of consumer health information seeking in addition to practical experience in locating, evaluating, and providing health information to diverse and special populations within educational and healthcare settings. Students will gain an understanding of the lifecycle of consumer health information—policy development, creation, to dissemination, and use—and the role of healthcare professionals in providing that information. Current issues and trends, as well as future directions in consumer health information provision and health information seeking will be discussed. (Same as IS 327.)

**ICT 351 TECHNOLOGY SECURITY.**

An introduction to the various technical and administrative aspects of information security and assurance. This course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing an accessible, reasonable information security system with appropriate intrusion detection and reporting features.

**ICT 390 SPECIAL TOPICS IN ICT.**

Intensive study of one aspect of information communication technology under the leadership of an authority in the area.

**ICT 395 INDEPENDENT STUDY IN INFORMATION COMMUNICATION TECHNOLOGY.**

Opportunities for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor and approval of proposal.

**ICT 399 INTERNSHIP AND PROFESSIONAL DEVELOPMENT IN ICT.**

Students apply the insights to day-to-day examples. Students will gain a better awareness of what is needed to develop instructional experiences for adult populations. Students will seek opportunities to develop their ICT skills and knowledge. Supervised internships approved by the School allow experiences in a variety of environments. Emphasis will be placed on professional development. A typed and signed contract must be completed prior to the start of the internship. Pass/fail only. Prereq: Junior or Senior standing; completed at least two upper-division ICT electives.

**ICT 406 INTERNET AND E-COMMERCE REGULATION.**

The Internet and related information and communication technologies have had a dramatic impact on business, commercial transactions, communication, and the control of information. Business and commercial transactions conducted via electronic means are subject to complex legislation and regulation that changes frequently. This course provides an overview of the legal and regulatory frameworks governing commercial activities conducted via the Internet ("e-commerce"), covering topics such as electronic contracts, domain names, intellectual property (including the liability of user-generated content platforms and online intermediaries), free speech (and intermediary liability for harmful speech), privacy, and other relevant standards, ethical considerations, protocols to ensure consumer protection, and emergent issues relating to compliance and enforcement. Prereq: Major standing in ICT or permission of the instructor.

**ICT 410 PRIVACY.**

As new information and communication technologies are developed, they increasingly raise concerns about the collection, use, storage, and sharing of personally identifiable information. This course provides an overview of privacy laws, privacy-related technologies, and self-regulatory efforts to mitigate potential privacy risks. The study of privacy will be approached from philosophical, historical, legal, policy, and technical perspectives. Prereq: Major standing in ICT or permission of the instructor.

**ICT 415 TECHNOLOGY TRAINING AND INSTRUCTIONAL STRATEGIES.**

Using technology in workplace settings requires an understanding of the relevant instructional strategies as well as an understanding of how technology supports learning in a specific IT context. In this course, students will gain a better awareness of what is needed to develop instructional experiences for adult populations. Students will explore how to use specific instructional strategies to learn, assess, and develop content to meet the needs of organizations seeking to train their workforce. Prereq: ICT 315 Human Relations in ICT. Major standing in ICT or permission of the instructor.

**ICT 418 LINUX SYSTEMS ADMINISTRATION.**

Systems administrators install, maintain, and manage computer systems and servers that support small and large networks. We will learn how to administer these computer systems and servers with the Linux operating system. In the process, students will learn how to install software, implement security policies, manage users, configure networks, evaluate logs, and automate processes. Prereq: ICT 301 Introduction to Databases.
**ICT 420 SEMANTIC WEB DEVELOPMENT.** (3)
This course introduces students to web development with the goal of designing a website containing structural data that adheres to principles of usability, accessibility, and inclusion. By the end of this course, students will acquire skills in planning, developing, organizing, and managing websites in HTML5 and CSS3 and will develop an understanding of basic design principles and project management. Prereq: ICT 320 Information Architecture. Major standing in ICT or permission of the instructor.

**ICT 550 SECURITY INFORMATICS.** (3)
This course introduces students to policy concerns relating to security informatics, and highlights theoretical and practical approaches to designing secure information and communication technology (ICT) systems. It addresses key issues such as authentication, risk analysis, access control, database and network security, and information assurance.

**ICT 552 CYBERCRIME AND DIGITAL LAW ENFORCEMENT.** (3)
The global reach of the Internet, the low marginal cost of online activity, and the relative anonymity of users have contributed to a wide escalation in cybercrimes. Consequently, information and communications technologies (ICT) are being increasingly employed to instigate threats to global civil society. This course provides an overview of cybercrime and the digital law enforcement practices put in place to respond to them. The course will focus on the types and extent of current cybercrimes, how the justice system responds to these crimes, the various constitutional protections afforded to computer users, the law and policies that govern cybercrime detection and prosecution, and related technologies.

**ICT 596 INTERNSHIP IN ICT.** (3)
Provides students with supervised work-and-learning experience in a professional environment under the direction of a University faculty member and an employee of a participating firm. One hundred (100) hours of student time are expected during the semester. Enrollment is contingent upon the availability of internships. Students are selected on the basis of personal qualifications, including GPA, coursework, recommendations, and an interview.

**ICT 600 INFORMATION COMMUNICATION TECHNOLOGY IN SOCIETY.** (3)
We live in a world of rapid technological innovation. This innovation has allowed significant changes in the ways that we communicate and interact with forms of media. In fact, the technology that has been in development has created a culture surrounded by technology, read and use information, and have significantly impacted politics, economics, policy, etc. This course studies the impacts of information and communication technology (ICT) on individuals and society, and the impact that society has on ICTs. It examines current issues related to the diffusion of new technologies in society as well as the obstacles to widespread use of individual ICTs. Students in this course will analyze the various theories related to the use of emerging communications forms, and consider the factors related to successful ICT deployment. Students will be required to look beyond “good/bad” classification of new communication technology, and conduct in-depth interrogations of ICTs, the issues that surround them and the environments in which ICTs are used.

**ICT 601 INFORMATION SEEKING.** (3)
This course provides an overview of the theory and practices of human information seeking behavior, including both basic models to understand user behavior, and techniques to effectively select, locate, evaluate, and use information to meet diverse information needs and facilitate human-computer interaction.

**ICT 605 INTRODUCTION TO HUMAN COMPUTER INTERACTION.** (3)
