

Bachelor of Liberal Studies

College of Arts and Sciences

A Bachelor of Liberal Studies degree allows students to design individualized programs of study in the humanities, social sciences, and natural and mathematical sciences; to develop a breadth of knowledge reflective of a true liberal arts education; to develop critical thinking and writing skills; and to synthesize problem-solving strategies.

This degree is beneficial to a wide range of students: students who plan to work in business, technological, cultural, community, and human-service settings; students for whom a highly specialized, structured major is not ideal; and students who have accumulated a substantial number of credit hours across a range of departments.

To graduate with a BLS degree, students will complete rigorous upper-division courses within the College of Arts and Sciences and complete a capstone writing intensive course in which they synthesize and evaluate their previous course work. Students will also be required to take at least one course that includes laboratory or field experience. Along with the completion of UK Core courses, and the College of Arts and Sciences requirements, students complete 24 credit hours in a specific track: Humanities, Social Sciences, and Natural/Physical/Mathematical Sciences.

Students must complete at least 45 credit hours before declaring the major. Students may not double or triple major/degree with the BLS.
