Subject: request for nonstandard scheduling in summer session

Shelia: the following is a request for nonstandard scheduling of two courses in the eight week summer session.

Contact person: Robert Shapiro

Courses: EDC 610, EDC 730

Start and End Dates: July 6-July 24, 2015

Recurring request: These classes are offered every summer and will have the same problem of ending after the students need to return to work and will be unable to take the class.

Justification: These two graduate courses serve public school teachers. Given the fall public school schedule teachers are required to be in professional development activities sponsored by their districts prior to the end of these courses if they follow the standard schedule. Therefore, they are not enrolling in the classes. Moving to the dates suggested will allow the students to complete the classes prior to returning to work. The classes are scheduled so that a student could take one class in the morning and the other in the afternoon.

Student load: This would not be a violation of student load for the summer session.
