TRANSMITTAL

DATE: March 29, 2001
TO: Cindy Todd
Senate Council
FROM: Becky Fister
Graduate Council

The following proposal was approved by the Graduate Council March 27, 2001:

Proposal for a Graduate Certificate in Health Communication

The proposal for a Graduate Certificate in Health Communication will be aimed primarily at individuals interested in developing specialized knowledge and research expertise in health communication that could be applied within both academic and non academic settings.

January 26, 2001

Michael T. Nietzel
Dean of the Graduate School
The Patterson Office Tower
CAMPUS 0027

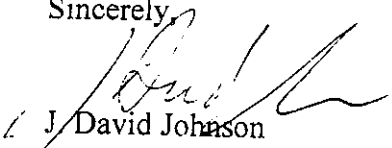

Dear Dean Nietzel:

I enthusiastically endorse the Proposal for the Graduate Certificate in Health Communication, which has the unanimous approval of the College Faculty Council and the Graduate Faculty in Communication. The new program will have a very positive impact on our Graduate Program in Communication by offering students in our program as well as those from other graduate programs at the University the opportunity to develop a specialization in the growing area of health communication.

As you know we have already attracted more than \$25 million in federal grants in health communication, and our doctoral program has been ranked 11th in the country in health communication (applied communication) by the National Communication Association. This new certificate program is a logical extension of our current efforts in this area and will undoubtedly attract more graduate students into our courses.

Thanks for considering this proposal.

Sincerely,

J. David Johnson
Dean

Memorandum

To: Michael T. Nietzel
Dean of the Graduate School
The Patterson Office Tower
CAMPUS 0027

From: Roy L. Moore, Associate Dean for Graduate Studies

Date: January 26, 2001

Subject: Proposal for Graduate Certificate in Health Communication

Attached please find a proposal for a Graduate Certificate in Health Communication, which has been unanimously approved by the Graduate Faculty in Communication and the Faculty Council of the College of Communications and Information Studies. I am requesting approval of this program, which we would like to offer beginning in fall 2001. The certificate program meets all of the guidelines outlined in the September 2000 "Guidelines for Graduate Certificate Curricula" for the Graduate School. No new courses would need to be created, and no additional faculty will need to be hired.

We are very excited about the opportunity to establish this new program and look forward to hearing your decision. If you have any questions or need additional information, please do not hesitate to ask. Thanks for your careful consideration of this proposal.

Proposal for Graduate Certificate in Health Communication

Effective fall 2001, the Graduate Program in Communication would offer a Certificate in Health Communication, which would be available to (a) students in the Ph.D. and M.A. programs in Communication, (b) students in other doctoral programs at the university and (c) post baccalaureate students. The Certificate Program would be aimed primarily at individuals interested in developing specialized knowledge and research expertise in health communication that could be applied within both academic and non academic settings. Students are expected to have a background in social or behavioral science prior to entering the program.

During the last 15 years the Graduate Faculty in Communication have obtained more than \$25 million in federal grants in health communication, the doctoral Program has been ranked 11th in the country in health communication (applied communication) by the National Communication Association and three of our graduate students have been awarded prestigious National Cancer Institute internships. At least one-third of our 24 Graduate Faculty Members are actively involved in health communication research. The Associate Dean for Graduate Studies would serve as the Graduate Certificate Director.

To earn the Certificate in Health Communication, a student would complete the following courses:

1.	CJT 671	"Proseminar in Health Communication"	3 credit hours
2.	CJT 771	"Seminar in Health Communication"	3 credit hours
3.	CJT 775	"Seminar in Health Communication Campaigns"	3 credit hours
		Elective (one course from the following)	
4.	CJT 780	"Special Topics in Communication" (focusing on a health communication topic)	3 credit hours
or	CJT 790	"Research Problems in Communication" (focusing on a health communication project)	
or		Graduate Course in medical informatics	
		TOTAL	<hr/> 12 credit hours

Each student who completes the program would be recognized by the Graduate School as having completed a Certificate in Health Communication. Approximately 10-12 students would be expected to be enrolled in the certificate program each year. No changes would be necessary to the current curriculum. The program would be similar to those offered in Gerontology, Environmental Science and Behavioral Science.

Approved unanimously by the Graduate Program Committee on 11/20/00.

Approved unanimously by the Graduate Faculty in Communication on 11/20/00.

Approved unanimously by the Faculty Council of the College of Communications & Information Studies on 1/16/01.

GRADUATE COUNCIL MINUTES

March 27, 2001

The Graduate Council met March 27, 2001, in Room 318 Patterson Office Tower. Dean Michael Nietzel presided.

Members present:

- Dr. Jonathan Allison
- Dr. Eric Anderman
- Dr. Peter Crooks
- Dr. John Garen
- Dr. Hans Gesund
- Dr. Laura Jolly
- Dr. Douglass Kalika
- Dr. Mark Meier
- Dr. Dexter Speck
- Dr. John Thelin
- Dr. Ernest Yanarella
- Ms. Mary Kelly
- Ms. Erin Manning
- Ms. Gina Owens

Members absent:

- Dr. Kim Anderson
- Dr. Michael Barrett
- Dr. Cynthia Beeman
- Dr. Dan Frank
- Dr. Robert Harmon
- Dr. Brian MacPherson
- Dr. David Sogin

Minutes

The minutes of the February 27, 2001 meeting were approved.

New Items

New items were distributed and assigned to respective subcommittees.

Action Items

Extension of Time for Mr. R. Wayne Baldwin

The Council approved an extension of time for Mr. R. Wayne Baldwin to the end of the Eight Week Summer Session, 2002. Within this period of time, Mr. Baldwin will complete all requirements for the masters degree.

Extension of Time for Ms. Emilia Gonzalez-Clements

The Council approved an extension of time for Ms. Emilia Gonzalez-Clements to the end of the Second Summer Session, 2003. Within this period of time, Ms. Gonzalez-Clements will complete all requirements for the doctoral degree.

Extension of Time for Ms. Donna Rathke

The Council approved an extension of time for Ms. Donna Rathke to the end of the Spring Session, 2003. Within this period of time, Ms. Rathke will complete all requirements for the doctoral degree in Music.

Extension of Time for Mr. Carl Rollins

The Council approved an extension of time for Mr. Carl Rollins to the end of the Fall Semester, 2002. Within this period of time, Mr. Rollins will complete all requirements for the doctoral degree.

Dr. Emme Zanarella reported that the proposal for the Graduate Certificate in Health Communication carries widespread support in the College of Communication, has a strong rationale and high likelihood of success. The Council voted and approved the proposal.

Dr. John Thelin summarized the applications for dropping CJT 650, CJT 721, and CJT 782. The Council voted and approved for the courses to be dropped.

An application to change DIP 720 was investigated by Dr. John Garen. After speaking with Dr. Eugene Gholz, Dr. Garen was satisfied with the responses given and recommended approval. The Council voted and approved the change.

The Council voted and approved the changes to PM 661 with the modification made to question 8: Will changing this course change the degree requirements in one or more programs? The answer should read 'no'. Dr. Dexter Speck was the investigator.

Dr. Laura Jolly presented the application for LAW 931 to be allowed to count for graduate credit. The Council voted and approved.

Three nominations to Full Graduate Faculty membership were reviewed and discussed by the Council. It was voted and approved that Drs. Manivannan and Zhang will go forward to the Vice President and Chancellor for review. Council agreed that Dr. Jaynes' nomination be returned to Computer Science noting Council's concern; he will continue in Associate Graduate Faculty status.

NEW COURSES

College of Law

LAW 931 State and Local Tax (2-3)

This course provides an introduction to the fundamentals of state and local taxation, a subject that has become increasingly important as the economy has expanded across state lines and state and local governments have sought new ways to finance government. The course will focus primarily on the constitutional limitations on state and local taxation and the recent Supreme Court decisions in the area. It will also include coverage of the states' various approaches to the taxation of corporate income. The course will generally be offered every other spring.

COURSE CHANGES

THE GRADUATE SCHOOL

Patterson School of Diplomacy & International Commerce

DIP 720 Economic Statecraft (3)
Change in description.

Change to:

DIP 720 Economic Statecraft (3)

This course introduces students to a range of economic foreign policy tools. The goal is to familiarize students with the toolbox of economic statecraft including types of negotiations for defining international economic "rules," dispute resolution mechanisms and sanctions techniques for enforcing international agreements, and foreign aid and economic sanctions intended to further both economic and political ends. At the end of the course, each student should understand the conditions under which each policy tool is likely to be appropriate and successful. Each student would also be able to explain the research strategies that allow analysts and policy-makers to explain and predict the effectiveness of each policy instrument.

COLLEGE OF MEDICINE

Department of Preventive Medicine and Environmental Health

PM 661 Industrial Hygiene Sampling (3)
Change in title, description.

Change to:
PM 661

Occupational and Environmental Sampling (3)
PM 661 is a lecture/laboratory/field practicum covering sampling and analysis techniques for Occupational and Environmental assessment and monitoring. The laboratory experiments are intended to simulate typical measurement situations and to provide a basis for selection of sampling techniques and critical evaluation of laboratory results. The concepts common to each type of analysis and sampling method are these: (1) the identification of situations where this is appropriate; (2) the limitations inherent in the method (and what specific factors in the sampling situation might prevent accurate application of that approach); (3) the use of quality control procedures in sampling and analysis to verify the reliability and accuracy of the results; (4) correct expression of the results in terms applicable to occupational standards. One Red Mile building project and field sampling projects will allow the class to design, implement, and evaluate sampling results as well as prepare formal reports of the projects.

DROP COURSES

COLLEGE OF COMMUNICATION AND INFORMATION STUDIES

Department of Communication

- CJT 650 **Communication, Language and Culture (3)**
CJT 721 **Seminar in Intrapersonal Comm (3)**
CJT 782 **Seminar in Strategic Communication (3)**
